RSSI BARRIERS, LLC.	CRITICAL SPARE PARTS ARE NEEDED FOR THE ELECTRIC VEHICLE BARRIERS, WHICH ARE ANTI-TERRORISM MEASURES MANDATED BY FEDERAL STANDARDS, THAT PROTECT THE MAIN ENTRANCE TO ONE OF THE AGENCY S DATA CENTERS. THE BARRIERS ARE MEANT TO KEEP OUT ILL-INTENTIONED INDIVIDUALS MEANING TO DO HARM TO AGENCY PEOPLE AND ASSETS. SHOULD THE BARRIERS FAIL WITHOUT THE SPARE PARTS ON HAND, THIS WOULD DELAY REPAIRS AND POTENTIALLY PUT THE PEOPLE AND ASSETS AT RISK. THE MAIN PART NEEDED IS AN ELECTRIC ACTUATOR THAT RAISES AND LOWERS THE BARRIER. THE PARTS ARE CUSTOM DESIGNED BY THE ORIGINAL EQUIPMENT MANUFACTURER FOR THE VEHICLE BARRIERS AND SIMILAR PARTS MAY NOT WORK, FIT OR FUNCTION PROPERLY CAUSING ADDED TIME, COST AND MATERIALS TO BRING THE BARRIERS BACK TO FULL FUNCTIONALITY.	\$9,381.42	\$9,381.42	2015	4/21/2015	SS001550123		0	SMALL BUSINESS

Unclassified duties are work related to a specific initiative or project not tied to a classified position. In the Office of Human Resources, we have classification specialists who establish organizational positions based on each organization's mission. The classification specialists group similar work and levels of responsibility and write descriptions (PDs) for each. Unclassified duties are those that are unrelated to any of the agency's PDs.

## **Revisions to Rules of Conduct and Standards of Responsibility for Appointed Representatives**

On August 16, 2016, the Social Security Administration (SSA) published a Notice of Proposed Rulemaking (NPRM) proposing changes to our current rules of conduct and standards of responsibility for appointed representatives. We are proposing these changes based on our concerns that some representatives are using our processes in a way that undermines the integrity of our programs. The revised rules clarify that certain actions are prohibited and provide additional means to address representative actions affecting our ability to provide the best possible public service.

While the current regulations set forth a standard of conduct for individuals who represent claimants before SSA, the proposed regulatory changes more clearly define this standard by adding several affirmative duties and prohibited actions such as conduct that we have seen but could not address under existing rules, including representatives withdrawing from representation shortly before the hearing was to be held. The changes also clarify the Office of Disability Adjudication and Review's (ODAR) procedures for processing representative sanction hearings and appeals.

### **The proposed regulatory changes clarify standards for non-attorney representatives.**

- We proposed adding examples of situations, such as felony convictions, in which non-attorneys "lack good character and reputation," which may demonstrate to us that a non-attorney is unqualified to serve as a representative.
- Under the proposed rules, we may disqualify a non-attorney representative who has been removed from practice or suspended by a professional licensing authority for reasons that reflect on the person's character, reliability or fitness to serve.

### **The proposed regulatory changes include affirmative duties and prohibited actions to clarify our expectations regarding representatives' obligations to their clients.**

- The regulatory changes require representatives to provide dates and times for hearing availability; withdraw in a manner that does not disrupt case processing; and maintain prompt and timely communication with claimants.
- The proposed rules require representatives to disclose whether a medical or vocational opinion is drafted, prepared, or issued by an employee or contractor of the representative, and whether the representative referred the claimant for treatment.
- The proposed rules require disclosure if a representative has been disbarred, removed or suspended from practice, or if a claimant uses the representative's services to commit fraud against the agency.
- Under the proposed rules, representatives are prohibited from misleading a claimant, submitting misleading evidence, and contacting agency employees outside the normal course of business.

### **The proposed regulatory changes clarify and modify for processing efficiency procedures involving charges against representatives.**

- We propose reducing the time a representative has to respond to charges or request Appeals Council review from 30 to 14 days.
- We propose clarifying that hearings and appeals may be conducted at our discretion in person, by video teleconferencing, or by telephone.
- We propose revising the current regulations to state that a representative who has been disqualified or sanctioned and has been denied reinstatement must wait three years before again requesting reinstatement, rather than the existing waiting period of one year.

**Return on Investment on Program Integrity Activities**  
**Prepared by the Office of Budget, Finance, Quality and Management**  
**December 1, 2016**

Program Integrity Activities		
	Activity	Return on Investment
<b>BBA PI Activities</b>	CDR	\$8 on average per \$1 budgeted
	RZ	\$3 on average per \$1 budgeted
	CDI Units	\$14 per \$1 spent
	SAUSA Fraud Prosecutors	\$6 in restitution returns per \$1 spent
<b>Non-BBA PI Activities</b>	PER	\$11 per \$1 spent

**NOTES**

1a. Continuing Disability Reviews (CDR): Based on the assumptions inherent in the FY 2017 President's Budget, SSA estimates that medical CDRs conducted in 2017 will yield net Federal program savings over the next 10 years of roughly \$8 on average per \$1 budgeted for dedicated program integrity funding, including the Old Age, Survivors, and Disability Insurance (OASDI), Supplemental Security Income (SSI), Medicare and Medicaid program effects.

1b. Redeterminations (RZ): Similarly, based on the assumptions inherent in the FY 2017 President's Budget, SSA estimates indicate that non-medical RZs conducted in 2017 will yield a ROI of about \$3 on average of net Federal program savings over 10 years per \$1 budgeted for dedicated program integrity funding, including SSI and Medicaid program effects.

1c. Cooperative Disability Investigation Units (CDI Units): The Office of the Inspector General determined this return of investment and shared with the U.S. House Subcommittee on Social Security. *See Protecting Social Security from Waste, Fraud, and Abuse: Hearing Before the Subcomm. on Social Security of the H. Comm. on Ways & Means*, 114th Cong. 4 (2016) (statement of Patrick P. O'Carroll, Jr., Inspector Gen. of the Social Security Administration). This is not an official estimate of program savings by the Office of the Chief Actuary.

1d. Special Assistant United States Attorneys (SAUSA) Fraud Prosecutors: In recent years, we have expanded the number of SAUSA fraud prosecutors as part of the Fraud Prosecution Project. These attorneys are focused on prosecuting SSA-related fraud cases at the Department of Justice. This return on investment reflects total restitution compared to administrative cost for these attorneys in FY 2016.

1e. Pre-Effectuation Reviews (PER): This return on investment is for FY 2014. We review at least 50 percent of all State DDS initial and reconsideration allowances of applicants for Old-Age, Survivors, and Disability Insurance benefits based on disability. We also review a sufficient number of OASDI medical CDR continuances. These reviews are not paid for by dedicated program integrity funding, as authorized by the Budget Control Act of 2011 and the Bipartisan Budget Act of 2015.

2. The Budget Control Act of 2011 (BCA) provided that SSA may be granted specified dollar amounts of additional budget authority each year for program integrity activities over and above the agency's standard operating budget. *See* Budget Control Act of 2011, Pub. L. No. 112-25, § 101, 125 Stat. 240, 243-244 (amending the Balanced Budget and Emergency Deficit Control Act of 1985, § 251) *Id.* The BCA limited this additional funding for the cost of performing CDRs and RZs. *Id.* The Bipartisan Budget Act of 2015 (BBA) amended the BCA by adding higher amounts for program integrity through FY 2021 and expanding the use of those funds to include cooperative disability investigation units (CDI units) and Special Assistant United States Attorneys (SAUSA). *See* Bipartisan Budget Act of 2015, Pub. L. No. 114-74, § 815, 129 Stat. 584, 604.
3. The return on investment from program integrity activities strictly represents estimated benefit savings, i.e. an estimated amount of benefits that will not have to be paid from the Social Security Trust Funds or the general fund of the Treasury in the future. Therefore, there are no real dollars returned to our administrative account to cover the costs associated with program integrity activities.
4. The SSA program integrity savings from the Bipartisan Budget Act (BBA) of 2015 were used to offset costs of other portions of that bill.

**Q: “What percentage of the population files for early retirement if defining early retirement as any application before FRA?”**

A: Table 6.B51 in SSA’s Annual Statistical Supplement (<https://www.ssa.gov/policy/docs/statcomps/supplement/2016/6b.html#table6.b5.1>) shows that approximately **68 percent of new retired-worker benefit claims were filed before FRA for men and 75 percent for women when excluding the disabled**, who automatically convert to retired-worker benefits at FRA.

SSA staff member Pat Purcell’s paper, “[Employment at Older Ages and Social Security Benefit Claiming](#)” explains these trends in more detail. **Here are the rationales:**

**Table 6.B5.1—Number, average age, and percentage distribution, by sex and age at entitlement, 1998–2015**

Year of entitlement	Number (thousands)	Average age	Percentage distribution by age at month of entitlement											
			Total, all ages	62	63	64	65 <sup>a</sup>			66 <sup>a</sup>		Disability conversions <sup>b</sup>	67–69	70 or older
							Before FRA	At FRA	After FRA	At FRA	After FRA			
Men														
2015	1,391	64.4	100.0	33.1	6.3	5.9	10.5	...	...	17.4	3.1	17.7	3.9	2.2
Women														
2015	1,286	64.2	100.0	38.9	6.7	6.9	10.4	...	...	12.1	2.1	16.5	3.1	3.4

SOURCE: Social Security Administration, Master Beneficiary Record, 100 percent data.

**Below is the re-calculation when excluding disability conversions, which changes the denominator and the percentages.**

Men:

100= total

100-17.7(disability) = 82.3 = total minus DI conversions at FRA

33.1+6.3+5.9+10.5=55.8=retired worker claims before FRA

55.8/82.3=**67.8%** = Percent of NEW retired worker claims before FRA for men

Eg. 33.1/82.3=40.2% = percent of new retired worker claims at age 62 for men

Women:

100= total

$100 - 16.5 = 83.5$  = total minus DI conversions at FRA

$38.9 + 6.7 + 6.9 + 10.4 = 62.9$  = retired worker claims before FRA

$62.9 / 83.5 = 75.3\%$  = Percent of NEW retired worker claims before FRA for women

Eg.  $38.9 / 83.5 = 46.6\%$  = percent of new retired worker claims at age 62 for women

**Percentage distribution of nondisabled retired-worker benefit awards by age of claimant: By sex, 2015**

SOURCE: Authors' calculations based on SSA (2016a, Table 6.B5.1).

NOTES: Data are shown by age at entitlement. Entitlement may be retroactive and therefore precede the award date.

Rounded components of percentage distributions do not sum to 100.0.

a. In the first month of age 66.

Prepared by the Office of Retirement and Disability Policy / Office of the Chief Actuary

<b>Pending “Major” Contracts Anticipated to be Awarded in the Next 90 days (greater than \$10 million)</b>	
<b>Acquisition</b>	<b>Contract Term</b>
Desktop and Network Printer Blanket Purchase Agreement	5 years (1-year base period plus four 1-year option periods)
IBM Software and Maintenance Contract	5 years (1-year base period plus four 1-year option periods)
IT Support Services Contract (ITSSC2)	10 years (2-year base period plus four 2-year option periods)

# Notice of Proposed Rulemaking (NPRM), Implementation of the NICS Improvement Amendments Act of 2007

## Overview of Public Comment Information

### General Background Information

- The NICS NPRM published on May 5, 2016. The public comment period was open from May 5 through July 5, 2016.

### Comment Statistics

- Total number of comments received: **91,288**
- Total number of comments redacted or not posted (due to vulgarity, profanity, abusive language, duplicate comments submitted by the same commenter, empty comments, or comments without any relevance to the subject matter of the proposed regulation): **45**
- Actual total number of comments accepted (91,288 submissions – 45 redactions/no posts): **91,243 comments**
- Of these 91,243 comments:
  - **86,860** *were duplicate paper comments with different names organized by one organization (the National Association for Gun Rights). Per the guidance of our Office of the General Counsel, we scanned and posted one of these comments on the Federal Document Management System (FDMS) and disclosed how many copies of the document we had received.*
  - **324** commenters signed one comment letter;
  - **4,059** *comments were posted on FDMS:*
    - **49** comments were from advocacy groups, including disability rights, mental-health advocacy, gun-rights, gun control, legal, medical, and special-interest organizations.
    - **4,010** comments were from individuals:
      - **1,434** comment submissions were unique.
      - Approximately **2,576** comments appeared to be duplicates; an online search revealed the text of these comments was suggested by a gun-rights group, the Gun Owners of America.

NICS NPRM Overview of Comments

Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.

## **Commenter Concerns by Category**

### **Legal Authority**

Comment: Multiple individuals questioned our authority to report any information to the National Instant Criminal Background Check System (NICS) database. Some commenters opined that the NICS Improvement Amendments Act of 2007 (NIAA) section 101(c)(1)(C) prohibited us from reporting information to the Department of Justice (DOJ) that is “based solely on a medical finding of disability. . . .” Another commenter suggested that we should not be able to submit any medical information to the NICS without a court order.

Comment: Multiple commenters questioned our authority to declare an individual to be subject to the Federal mental health prohibitor, and argued that only a court can make that decision.

Comment: One commenter asked if the determinations would be secret or open, and if there are safeguards in place to ensure that the people making the designations are free of bias or prejudice.

### **Constitutional Issues: Second Amendment and Equal Protection**

Comment: Many commenters expressed concern that these rules would violate the affected individuals’ rights under the Second Amendment to the Constitution, and would also violate their equal protection rights under the Constitution. Most of these comments were provided in largely identical letters, and they asserted that our rules would take firearms away from elderly recipients of Social Security retirement benefits.

### **Due Process**

Comment: Multiple commenters also stated that the rules as written would violate beneficiaries' right to due process, particularly because they do not allow affected individuals to appeal the inclusion of their names in the NICS before we submit them to the DOJ. One commenter suggested that we should obtain a beneficiary's written permission before submitting information to the DOJ.

Comment: Several commenters questioned whether individuals who meet our criteria would receive adequate notice or be given the opportunity to appeal before we share their information with the DOJ. One commenter expressed concern that, "[m]any people will not be informed of the action." Other commenters asked whether "an existing beneficiary with a representative payee [would] be notified and given the opportunity to appeal before they are reported to NICS" or if we would "allow the person a reasonable amount of time to appeal that action."

Comment: Several commenters expressed the belief that pursuing relief would be a highly expensive process for beneficiaries, and thus beneficiaries who could not afford what might be prohibitively expensive activities, would effectively be denied due process.

### Reporting Criteria

Comment: Multiple individuals commented on the criteria we proposed for identifying individuals whose names we would report to the DOJ. Many questioned how we selected these criteria for inclusion. One commenter suggested that, "there should be a more specific review of these criteria." Another individual asked why we did not propose to send information on individuals who, among other things, are felons, domestic abusers, or unlawful users of controlled substances. Another commenter suggested that we conduct a criminal background history as an additional step prior to reporting an individual's information to the DOJ. One

commenter suggested that we include an additional factor to consider an individual's propensity for violence, aggressive behavior, or self-destructive behavior<sup>1</sup>.

Comment: Several commenters protested against what they thought would be our evaluation of all Social Security beneficiaries for potential inclusion in the NICS.

Comment: We received a significant number of comments expressing the view that we should not report certain categories of people to the DOJ for inclusion in the NICS based solely on one qualifier. Commenters erroneously expressed the belief that we would report names to the NICS if they belonged to any one of the following categories: (1) Recipients of any type of Social Security benefits; (2) recipients of Supplemental Security Income (SSI) payments or Disability Insurance (DI) beneficiaries under the Social Security Act; (3) senior citizens; (4) DI beneficiaries for other physical, non-mental disabilities; (5) DI beneficiaries based on a mental impairment, but who do not have a representative payee; (6) have a representative payee for retirement benefits but do not receive DI benefits; (7) have a representative payee but do not receive DI benefits because of a listing-level mental impairment; or (8) no longer receive any type of Social Security benefits.

Comment: One commenter stated that, because we do not make medical determinations about Social Security retirement beneficiaries' health, we do not have the right to make decisions concerning their mental status.

Comment: Multiple commenters expressed the belief that we would report beneficiaries to the NICS solely based on their having a representative payee. Further, commenters opined that having an alternate payee,

---

<sup>1</sup> One commenter raised the issue of our reporting felons to the NICS database. This issue is outside the scope of this final rule.

or requiring some help with financial arrangements such as receipt of Social Security benefits, does not demonstrate mental incompetence.

Comment: Several individuals expressed concern that we would decide to expand the categories of names to submit to the NICS beyond the scope of the current rules without justification or prior notice.

## Mental Illness

### Connection to Violence, Potential for Stigmatization

Comment: Commenters questioned the decision to add beneficiaries' names to the NICS based on mental illness, stating we had not provided data indicating that mental illness was a precursor for violence (particularly gun violence).

Comment: Multiple commenters opined that these rules would unfairly stigmatize those with mental illness.

Comment: Some commenters expressed concern that individuals might choose not to seek mental health treatment or apply for Social Security benefits out of fear that we would submit their information to the DOJ for inclusion in the NICS. One commenter stated that, "[t]he end result of this will be many will be very reluctant to seek help, and will refuse the help of a payee, if that is to be automatically reported in this way." Another commenter suggested that, "[o]ne unintended consequence of the proposed action will be to introduce a tremendous disincentive to those who would seek medical assistance."

## Mental Illness Determination

NICS NPRM Overview of Comments

Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.

Comment: We received several comments questioning how we determine whether individuals are disabled based on their diagnosed mental disorders. One commenter stated that, "[t]he parameters established within this rule are entirely too vague." The commenter went on to opine that the proposed rules rely on factors that are "severely error-prone," suggesting that our system "'red flags' too many claims based simply on the mentioning of certain terms (i.e. 'red flagging' claims as 'suicidal' based solely on the term 'suicide' within a person's records. . . even if the actual reference is 'claimant states he does not have any suicidal ideations.'") Another commenter stated that we do not explain the severity required to satisfy a mental disability listing.

Comment: Multiple commenters stated that, because our adjudication of an individual as disabled under our mental disorders listings causes the individual's name to be included in the NICS, commenters' perceived flaws in the adjudication process could lead to unfair inclusion in the NICS. Concerns were raised about the ability of our employees to participate in what seems to be a medical decision. Commenters also discussed the possible lack of input by medical professionals during the determination process. Multiple commenters raised the idea that it is difficult to properly diagnose mental illness at all.

Comment: Multiple commenters focused on our classification and diagnosis of mental disorders in general. One commenter asked which mental disorders would be included in the criteria under section 421.110 of our rules. One commenter stated that the term "mental impairment" itself is unclear and asked "[h]ow and who will define this impairment and to what degree will be considered worthy to report? If I have a panic attack is that worthy?" Another wondered if, "[f]or purposes of this rule, anxiety, abnormal sleep/appetite, inflated self-esteem, or decreased energy, combined with alleged difficulty in managing money, are sufficiently disabling to disqualify a person from possessing firearms." Hundreds of commenters asked if Post Traumatic Stress Disorder (PTSD) was an included impairment. Multiple commenters expressed concern that the disorders

NICS NPRM Overview of Comments

Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.

included in section 12.00 of the Listings are too broad, and equate "severe mental issues the same as other issues" such as "eating and anxiety disorders."

### Privacy and Confidentiality

Comment: Several commenters stated that our sending information to the NICS would violate beneficiaries' right to privacy, both generally and with regard to their medical information.

Comment: We received multiple comments from individuals stating that our proposed rules conflicted with the (Health Insurance Portability and Accountability Act of 1996) HIPAA privacy rights or doctor-patient confidentiality.

### Representative Payee Appointment

Comment: We received many comments expressing concern about the manner in which we appoint representative payees. Some comments expressed the belief that we may force the appointment of representative payees for certain beneficiaries who do not require their services. Other commenters conveyed that perceived flaws in the representative payee appointment process would result in the unnecessary appointment of a representative payee and, consequently, unfair inclusion of names in the NICS. Multiple commenters questioned the manner in which we appoint representative payees. One individual questioned the thoroughness of our representative payee evaluation process, while others suggested that we should require direct medical evidence to support the need for a representative payee.

Comment: Several commenters questioned beneficiaries’ ability to remove a representative payee once we appoint one. One commenter asked how we determine if an individual no longer needs a representative payee, and another opined that it is much more difficult to remove a representative payee than it is to obtain one.

Comment: One commenter stated, “Presumably, a current recipient who can manage his/her own financial affairs and is in fact receiving benefits directly (e.g., direct deposit to bank account) would not fall under the above-mentioned phrase, and would retain the right to own, possess, etc., firearms. If this is true, I would recommend making that clearer in the [final] Rule.” Another asked, “If disability benefits under Title II or Title XVI of the Social Security Act are NOT received through a representative payee (i.e., a third party), does the proposed rule to the NIAA still apply?” Many commenters expressed concern that an individual who assigns a representative payee for a temporary period or for convenience would be unfairly reported for inclusion in the NICS. A common scenario described by commenters was that of retired individuals who asked their children to pay their bills during an extended vacation. Another scenario described was that of a mentally capable individual with a physical disability who, due to an inability to write checks or drive, was assigned a representative payee.

### Relief Process

Comment: Multiple commenters asked for specific information about the relief process, including when and at what points in the NICS inclusion decision process a request for relief could be submitted and reviewed, what documentation and evidence would be required to request relief, and who would review the evidence and make relief decisions.

Comment: Commenters suggested that we simplify the relief process for beneficiaries and representatives. Many expressed their disapproval that affected individuals would be required to request that their names be removed from the list and to provide evidence to our satisfaction to be removed from the list. Many highlighted the fact that the burden of proof for non-inclusion would lie with the individual. Other commenters found it problematic that our relief process does not make provision for a formal hearing before an adjudicative authority or allow the examination of witnesses. Several others suggested that we should provide legal counsel to those individuals whom we report to the DOJ.

Comment: Multiple commenters sought clarification about what evidence we would consider when we review a request for relief. One commenter specifically asked about issues relating to documents attesting to a person's character and 5 years of mental health records, such as the availability of these records and who would be required or allowed to provide them. The commenter questioned whether a "clean" criminal record or State background check would qualify as documentation attesting to a person's character. Another commenter questioned the specifics of how we would propose that relief "may" be granted if an individual could establish to our "satisfaction" that the applicant will not be likely to act in a manner dangerous to public safety.

Comment: One commenter questioned how beneficiaries could find out what their specific primary diagnosis was in order to best seek relief from inclusion in the NICS. The commenter also asked about the possibility of disputing the diagnosis, particularly when a secondary diagnosis is also involved in the adjudication of being disabled.

Comment: Several individuals expressed concern over the anticipated length of time for the processing of a request for relief, stating that 30 days was insufficient time to gather and submit all of the required

information, particularly as it involved actions by other government agencies or individuals. One individual expressed concern about the 30-day deadline for the submission of evidence supporting a beneficiary's request for relief in contrast to our 365-day response time. Several other commenters also questioned our ability to respond within the 365-day period, given current delays in the NICS-related relief programs run by other Federal agencies.

Comment: One commenter suggested that we should not report to the DOJ individuals awaiting a response to their petition for relief unless a judge deems it appropriate.

Comment: Multiple commenters asked if we would develop a procedure other than seeking relief to request the removal of individuals' names from the NICS for individuals who no longer meet the criteria that were the cause of their original inclusion in the NICS.

Comment: One commenter stated that, "there is no guarantee that the same prejudices that the rule creates in the first place won't reassert themselves" in the relief process.

### Resources Concerns

Comment: Several commenters expressed that this policy would be an unnecessary waste of the Government's time and resources. One commenter opined that implementing the proposed rules would add to the workload of SSI cases and risk additional backlogs, without any offsetting improvement to public safety.

### Comments in Support of the Rule

Multiple commenters expressed support for the rule. Several individual commenters were in favor of our reporting certain individuals to the NICS database based on their expressed belief that some persons with mental illness should not be allowed to own firearms, because they could pose a danger to themselves or others. Some commenters spoke in their capacity as relatives and representative payees for Social Security beneficiaries with mental illness. One such commenter stated that if “someone does not have enough mental capacity to handle personal finances, he certainly does not have enough mental capacity to have access to guns.” Another commenter opined that medical professionals should support the rules, because clinicians would not want to authorize anyone to possess a firearm for legal liability reasons.

Several advocacy groups also articulated support for the rules. One group supported the rules as written. One group suggested we should expand the criteria used to identify names for inclusion in the NICS, stating that, “One issue not addressed by the proposed rule is the NICS status of future applicants for benefits who are dangerous due to severe mental illness, but who do not have third party representatives who receive payments on their behalf.” This commenter encouraged us to consider ways to expand the rule to include those beneficiaries who pose a danger to themselves or others, regardless of whether their payments are made to a representative payee.

**List of Key Regulations Since June 1, 2016** (NOTE: This list is not exhaustive and does not include extensions or regulations introducing technical changes, including technical changes as a result of the *Bipartisan Budget Act of 2015*.)

**Potentially will be published:** Revisions to Rules Regarding the Evaluation of Medical Evidence. (NOTE: The attached document provides a summary of the rationale for the rule.)

*Summary:* We are proposing several revisions to our medical evidence rules. The proposals include redefining several key terms related to evidence, revising our list of acceptable medical sources (AMS), revising how we consider and articulate our consideration of medical opinions (especially treating source opinions) and prior administrative medical findings, revising who can be a medical consultant (MC) and psychological consultant (PC), revising our rules about treating sources, and reorganizing our evidence regulations for ease of use. These proposed revisions would conform our rules with the requirements of the Bipartisan Budget Act of 2015 (BBA), reflect changes in the national healthcare workforce and in the manner that individuals receive primary medical care, simplify and reorganize our rules to make them easier to understand and apply, allow us to continue to make accurate and consistent decisions, and emphasize the need for objective medical evidence in disability and blindness claims.

This rule has been submitted to the Federal Register for publication (<https://www.reginfo.gov/public/do/eoReviewSearch;jsessionid=247628D397B00768A84B47D68D6BB24E>) with an effective date of March 27, 2017.

*Final Rule,* [Revised Medical Criteria for Evaluating Respiratory System Disorders](#) (Jun. 9, 2016)

*Summary:* We are revising the criteria in the Listing of Impairments that we use to evaluate claims involving respiratory disorders in adults and children under titles II and XVI of the Social Security Act (Act). The revisions reflect our program experience and advances in medical knowledge since we last comprehensively revised this body system in 1993, as well as comments we received from medical experts and the public.

*Final Rule, Revised,* [Medical Criteria for Evaluating Neurological Disorders](#) (Jul. 1, 2016)

*Summary:* We are making final the rule for evaluating neurological disorders that we proposed in an NPRM published in the Federal Register on February 25, 2014 (79 FR 10636). In the preamble to the NPRM, we discussed the revisions to our current rule for the neurological body system and our reasons for proposing those revisions. To the extent that we are adopting the proposed rule as published, we are not repeating that information here; interested readers may refer to the NPRM preamble. We incorporated into the final rule the portions of Social Security Ruling (SSR) 87-6, “Titles II and XVI: The Role of Prescribed Treatment in the Evaluation of Epilepsy” that continue to be relevant to the treatment of epilepsy. As part of the publication of this final rule, we are rescinding SSR 87-6. We also respond to public comments on the NPRM and explain what changes we

are making based on those comments in the “Public Comments on the NPRM” section of the preamble.

*Final Rule*, [Evidence from Excluded Medical Sources of Evidence](#) (Sept. 23, 2016)

**Summary:** In accordance with section 812 of the Bipartisan Budget Act of 2015 (BBA section 812), these rules explain how we will address evidence furnished by medical sources that meet one of BBA section 812’s exclusionary categories (excluded medical sources of evidence) as described below. Under these new rules, we will not consider evidence furnished by an excluded medical source of evidence unless we find good cause to do so. We identify five circumstances in which we may find good cause. In these rules, we also require excluded medical sources of evidence to notify us of their excluded status under section 223(d)(5)(C)(i) of the Social Security Act (Act), as amended, in writing each time they furnish evidence to us that relates to a claim for initial or continuing benefits under titles II or XVI of the Act. These rules will allow us to fulfill obligations that we have under BBA section 812.

*Final Rule*, [Revised Medical Criteria for Evaluating Mental Disorders](#) (Sept 26, 2016)

We are revising the criteria in the Listing of Impairments (listings) that we use to evaluate claims involving mental disorders in adults and children under titles II and XVI of the Social Security Act (Act). The revisions reflect our program experience, advances in medical knowledge, recommendations from a commissioned report, and public comments we received in response to a Notice of Proposed Rulemaking (NPRM).

*Final Rule*, [Unsuccessful Work Attempts and Expedited Reinstatement Eligibility](#) (Oct 17, 2016)

These rules finalize the rules we proposed in our notice of proposed rulemaking (NPRM), published on May 11, 2016. In these rules, we remove some of the requirements for evaluation of an unsuccessful work attempt (UWA) that lasts between 3 and 6 months, allow previously entitled beneficiaries to apply for expedited reinstatement (EXR) in the same month they stop performing substantial gainful activity (SGA), and provide that provisional benefits will begin the month after the request for EXR if the beneficiary stops performing SGA in the month of the EXR request. These changes will simplify our policies and make them easier for the public to understand.

*Final Rule*: [Revised Medical Criteria for Evaluating Human Immunodeficiency Virus \(HIV\) Infection and for Evaluating Functional Limitations in Immune System Disorders](#) (Dec. 2, 2016)

**Summary:** We are revising the criteria in the Listing of Impairments (listings) that we use to evaluate claims involving human immunodeficiency virus (HIV) infection in adults and children under titles II and XVI of the Social Security Act (Act). We also are revising the introductory text of the listings that we use to evaluate functional limitations resulting from immune system disorders. The revisions reflect our program experience, advances in medical knowledge, our adjudicative experience, recommendations from a commissioned report, and comments from medical experts and the public.

Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.

Final Rule, [Ensuring Program Uniformity at the Hearing and Appeals Council Levels of the Administrative Review Process](#) (Dec 16, 2016)

*Summary:* We are revising our rules so that more of our procedures at the hearing and Appeals Council levels of our administrative review process are consistent nationwide. We anticipate that these nationally consistent procedures will enable us to administer our disability programs more efficiently and better serve the public.

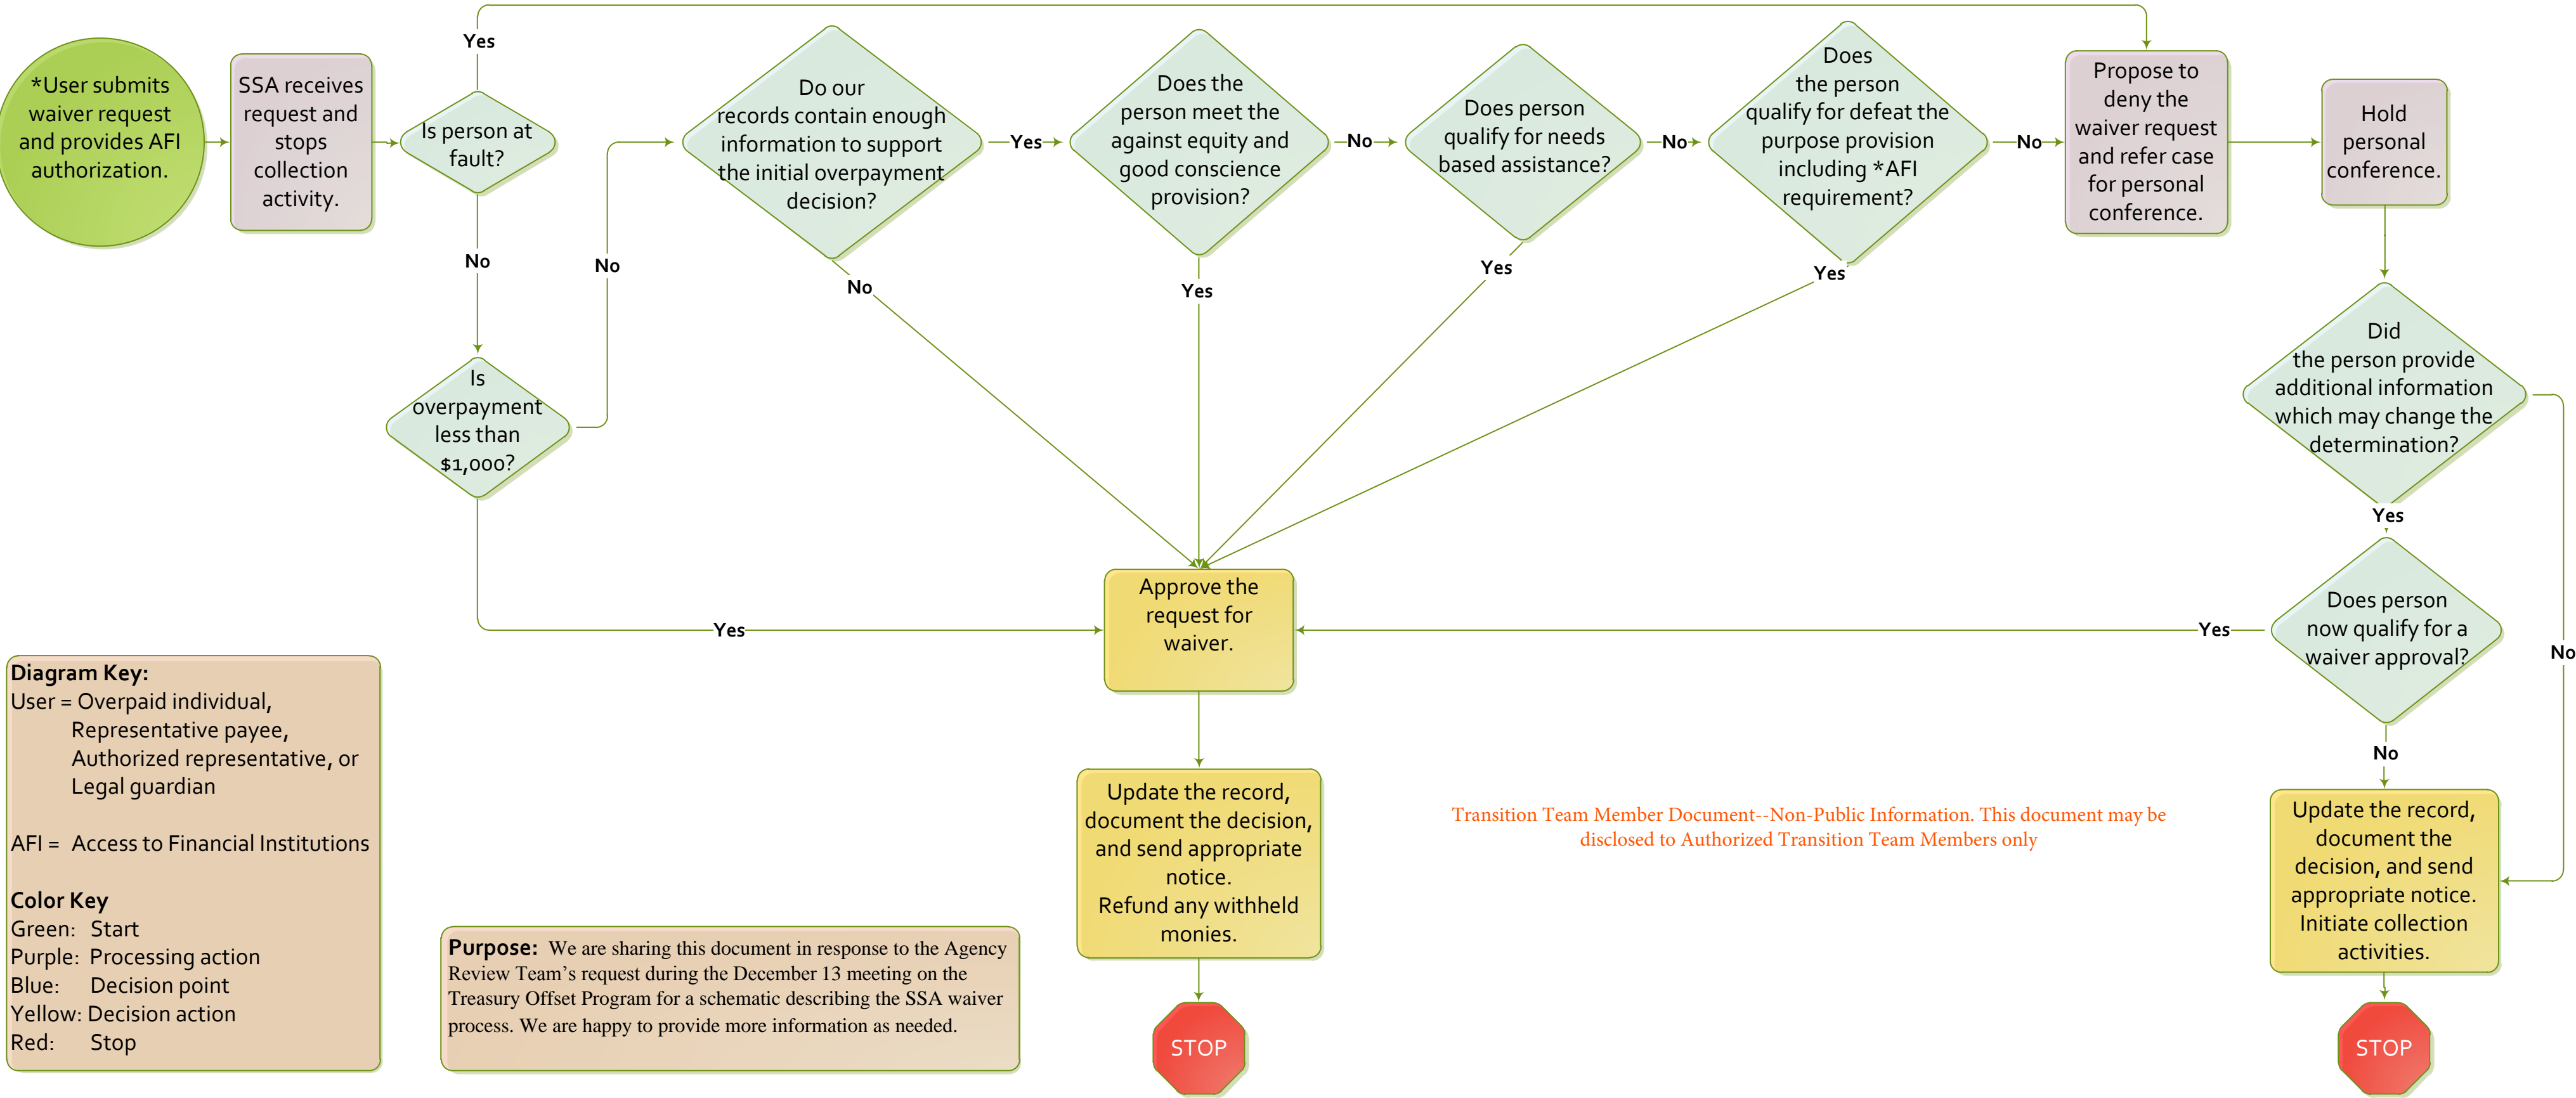

We are revising and making final the rules for creating nationally uniform hearing and Appeals Council procedures, which we proposed in a notice of proposed rulemaking (NPRM) published in the Federal Register on July 12, 2016 (81 FR 45079). In the preamble to the NPRM, we discussed the changes we proposed from our current rules and our reasons for proposing those changes. In the NPRM, we proposed revisions to:

- (1) The time frame for notifying claimants of a hearing date.
- (2) The information in our hearing notices.
- (3) The period when we require claimants to inform us about or submit written evidence, written statements, objections to the issues, and subpoena requests.
- (4) What constitutes the official record.
- (5) The manner in which the Appeals Council would consider additional evidence.

Final Rule: [Implementation of the NICS Improvement Amendments Act of 2007](#) (publication date: Dec 19, 2016)

*Summary:* These final rules implement provisions of the NICS Improvement Amendments Act of 2007 (NIAA) that require Federal agencies to provide relevant records to the Attorney General for inclusion in the National Instant Criminal Background Check System (NICS). Under these final rules, we will identify, on a prospective basis, individuals who receive Disability Insurance benefits under title II of the Social Security Act (Act) or Supplemental Security Income (SSI) payments under title XVI of the Act and who also meet certain other criteria, including an award of benefits based on a finding that the individual's mental impairment meets or medically equals the requirements of section 12.00 of the Listing of Impairments (Listings) and receipt of benefits through a representative payee. We will provide pertinent information about these individuals to the Attorney General on not less than a quarterly basis. As required by the NIAA, at the commencement of the adjudication process we will also notify individuals, both orally and in writing, of their possible Federal prohibition on possessing or receiving firearms, the consequences of such prohibition, the criminal penalties for violating the Gun Control Act, and the availability of relief from the prohibition on the receipt or possession of firearms imposed by Federal law. Finally, we also establish a program that permits individuals to request relief from the Federal firearms prohibitions based on our adjudication. These changes will allow us to fulfill responsibilities that we have under the NIAA.

# FY 2017 WORK PLAN

## OFFICE OF RETIREMENT AND DISABILITY POLICY (ORDP)

*ORDP is essential to the successful completion of the agency's Critical Priorities and implementation of Vision 2025. This work plan outlines ORDP's priorities for fiscal year (FY) 2017, in support of the agency's goals, Critical Priorities, and Vision 2025.*

Transition Team Member Document-Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.

# ORDP FY 2017 WORK PLAN

## MESSAGE FROM THE DEPUTY COMMISSIONER

Since its founding in 1935, Social Security has provided a bulwark of economic security for American workers and their families. For more than 80 years, these earned benefits have helped secure millions of people throughout life's journey. In addition to providing the foundation of retirement security for almost all American workers and families, Social Security is one of the most effective poverty-prevention programs in the nation, and the largest federal benefit program for children.

Few government agencies today touch as many lives as the Social Security Administration (SSA). Our stated mission is to “deliver Social Security services that meet the changing needs of the public.” Much of the agency's job is to get the checks to all 66 million Social Security and Supplemental Security Income (SSI) beneficiaries – the right amount, to the right person, at the right time. That takes an incredible amount of consistency and focus across the agency, and we do it every month of every year.

While our front line employees who work directly with the public are the face of Social Security, ORDP's policy and research work provides the backbone for this mission. ORDP draws the connections between program operations and the beneficiaries we serve – because our policies determine *how* we operate, and our research builds understanding about *why* we do so, by examining the effects of our programs.

I encourage us all to take the time to focus on our shared mission and shared values, and the impacts we are making every day in the lives of millions of individuals. I have found that focusing and reflecting on *why* we do what we do helps bring us together as an agency and strengthen our commitment to public service.

This work plan continues that focus by aligning ORDP's FY 2017 priorities with the agency's long-term plan, Vision 2025. By improving and streamlining policies, using research to further our understanding of the policies and programs, and engaging every one of our employees, we will advance the agency's mission in countless ways.

## ORDP FY 2017 WORK PLAN

Some of you may remember Ida Merriam, who was the head of the Office of Research and Statistics for many years – and my original mentor at SSA. At the 50<sup>th</sup> anniversary of Social Security, Ida wrote that “in a changing world,” research (and here I would add policy, too) “could help point the way toward the unchanging goal of economic security for all first laid out in the Social Security Act of 1935.” Her words still apply today. As the needs of the public for Social Security programs continue changing over time, ORDP’s work will continue to hold the utmost value for our agency. Thank you for all that you do to make the original vision of Social Security’s value a reality for millions of people.

Virginia Reno  
Deputy Commissioner

# ORDP FY 2017 WORK PLAN

## INTRODUCTION TO THE FY 2017 ORDP WORK PLAN

Although all ORDP staff are supporting critical efforts necessary to accomplish ORDP's goals, resource constraints require that we focus on a select number of objectives that will have the greatest impact on our ability to advance our vision and mission. These objectives are the ORDP priorities for FY 2017. It is important to recognize that all ORDP employees are supporting these priorities, whether directly or by providing the support critical to the operational of the organization.

## CONTEXT OF THE ORDP WORK PLAN WITHIN SSA

In October, the Office of the Chief Strategic Officer unveiled the [Agency's Critical Priorities](#) for FY 2017. As in the previous year, these Critical Priorities fall into three areas:

1. **Superior Customer Experience;**
2. **Exceptional Employees;** and,
3. **Innovative Organization.**

ORDP has established eight priorities for FY 2017. Each of ORDP's eight FY 2017 priorities aligns with these three Agency Critical Priority areas, and is color-coded to illustrate the linkages.

## HOW TO USE THIS DOCUMENT

The intent of this document is to assist ORDP staff in connecting the Agency's strategic plan and long-term vision to the ORDP priorities, and ultimately, to their own efforts. The ORDP work plan sets guideposts for what ORDP intends to achieve by identifying priorities and the general strategies through which we will achieve these objectives. Associate Commissioner (AC) level component are utilizing this document to develop component-level work plans that further develop the strategies outlined here, including specific activities and milestones for achieving each of these strategies. ORDP staff should refer to their AC level work plans to incorporate those activities into their own annual work plans.

### OFFICE OF RETIREMENT AND DISABILITY POLICY - VISION, MISSION AND VALUES

#### **VISION**

To create evidence-based programs and policies that enable and support people through their life's journey.

#### **MISSION**

Develop, promote, and use research and data to improve programs and policies and to enable accurate, consistent, and timely Social Security determinations.

# ORDP FY 2017 WORK PLAN

## VALUES

Inclusive and engaging research and policy development will leverage the experiences and views of our own employees as well as stakeholders outside the agency, to ensure thorough and thoughtful consideration of all options and implications.

Evidence based and data driven approaches will guide our research and policy development, to ensure that we are basing decisions and proposals on the most current evidence.

Innovative research and policy development will question the status quo and look for ways to simplify, automate and improve our policies by exploring new ideas and opportunities.

Customer centric approaches to policy development and service delivery will ensure that we consider the impact of our policies and programs on the public, including vulnerable populations.

# ORDP FY 2017 WORK PLAN

## ORDP - FISCAL YEAR 2017 PRIORITIES

**Superior Customer Service**

**Exceptional Employees**

**Innovative Organization**

### **1. Engage, Empower, and Develop our Employees**

Cultivate an organizational environment that attracts, retains, and motivates exceptional employees.

### **2. Create Effective, Efficient, and Innovative Policy**

Pursue innovative, evidence based, data driven ideas to help us administer our programs more efficiently and effectively for our customers.

### **3. Keep the Disability Program Aligned with Contemporary Medicine, Healthcare Systems, Technology, and Workplace Requirements**

Develop and maintain evidence-based policies that reflect present-day views of disability, medical care advancements, healthcare delivery models and changes in workplace requirements.

### **4. Be a Leader in Social Insurance Discussions and Activities around the World**

Collaborate with international organizations to produce comparative research on social security systems throughout the world and strengthen international programs and policies.

### **5. Inform Public Policy Through Research**

Provide high-quality public policy research to help shape the future of our programs and provide support to Congress and other external stakeholders and policymakers.

### **6. Support the Employment Needs of our Customers**

# ORDP FY 2017 WORK PLAN

Strengthen return to work policies and programs and conduct demonstrations to help policymakers shape employment support programs and policies in the future.

## **7. Transform Data Sharing for Better Public Service**

Build relationships with federal and state agencies and find new ways to improve the administration of government programs by sharing data in a secure manner.

## **8. Enhance Payment Accuracy and Quality for Our Customers**

Create and implement strategies to improve payment accuracy and quality by addressing the root causes of improper payments and inconsistent procedural outcomes.

## ORDP - FISCAL YEAR 2017 OBJECTIVES

### 1. Engage, Empower, and Develop our Employees

*We continue to cultivate an organizational environment that attracts, retains, and motivates employees.*

- a. Assess training and development needs and create opportunities for growth by supporting within and cross-component developmental assignments and detail opportunities.
- b. Recruit and hire the right people for the right job, and support flexibility in movement across components as needed to ensure the right fit and component needs.
- c. Increase employee satisfaction and work-life balance by continuing to expand telework throughout ORDP while maintaining high quality work.
- d. Support engagement and superior performance by effectively delegating, empowering, and holding one another accountable by addressing performance, including non-performers, exceptional performers, and those who consistently do their job well.
- e. Strengthen collaboration by fostering open communication, transparency, real time feedback, and idea sharing.
- f. Continuously improve our efficiency by refining our internal processes and organizational structure.

### 2. Create Effective, Efficient, and Innovative Policy

*We pursue innovative, evidence-based, data-driven ideas to help us administer our programs more efficiently and effectively for our customers.*

- a. Develop new and modified policies based on data, quantitative and qualitative research, evaluation of program effectiveness, and distributional analysis of policy options.

## ORDP FY 2017 WORK PLAN

- b. Simplify and improve the SSI program.
- c. Implement legislative changes in the least complex manner possible (e.g., the Achieving a Better Life Experience (ABLE) Act and certain provisions of the Bipartisan Budget Act of 2015).
- d. Develop policy that supports the agency's eServices initiatives (e.g., Internet Social Security Number Replacement Cards Policy and iSSI).
- e. Improve the clarity and usefulness of notices for our beneficiaries.
- f. Strengthen the representative payee program (e.g., implement the new process for monitoring representative payees in a more robust and targeted way).
- g. Deliver clear policy guidance to staff nationwide via a stable and modern 21st Century PolicyNet.
- h. Enhance appointed representative program policies, training, and online systems (e.g., continuing education training courses and representative payment structure).
- i. Identify medical improvement at the earliest opportunity (e.g., evaluate and implement Continuing Disability Review program policy/training on establishing diaries).

### **3. Keep the Disability Program Aligned with Contemporary Medicine, Healthcare Systems, Technology, and Workplace Requirements**

*We continually evaluate policies and procedures, and propose changes to reflect current medical care/technology, and changes in workplace requirements.*

- a. Ensure medical criteria in our listings are up to date on a 3–5 year cycle.
- b. Ensure vocational program policy reflects current workplace requirements as shown in the Bureau of Labor Statistics Occupational Requirements Survey.
- c. Streamline and automate disability business process and guide decision-making (e.g. Health Information Technology and enhanced decision support tools and integration of the electronic Claims Analysis Tool into the Disability Case Processing System).

## ORDP FY 2017 WORK PLAN

- d. Ensure policy decisions are informed by evidence (e.g., conduct medical research activities prior to policy development on topics such as assistive technology, function and hospitalization alternatives, management information and data analytics, and case reviews and Request for Program Consultation).
- e. Increase consistent application of disability policy across adjudicative components and levels (e.g., using state-of-the-art practices and developing case based training).
- f. Ensure policy is realistic and responsive to changes in the environment by seeking input from stakeholders and from the advocacy community (e.g. the National Disability Forum).

#### **4. Be a Leader in Social Insurance Discussions and Activities around the World**

*We collaborate with international organizations to produce comparative research on social security systems throughout the world, and strengthen international programs and policies.*

- a. Explore and solve common challenges in social insurance (e.g., represent our agency and our country at meetings of international social security organizations, and collaborate with other nations).
- b. Inform policy makers and contribute to the dialogue among nations (e.g., conduct research and comparative studies on international issues).
- c. Simplify policy and create efficiencies for U.S. beneficiaries living abroad as well as foreign beneficiaries living in the U.S. (e.g., pursue negotiations of international totalization agreements with foreign governments, ensure that current agreements keep pace with changing laws around the world, and engage in dialogue with our foreign benefit offices).
- d. Provide leadership for the development of Social Security programs through technical assistance.
- e. Engage in a joint venture of training activities with international organizations such as the Inter-American Conference on Social Security.

# ORDP FY 2017 WORK PLAN

## 5. Inform Public Policy Through Research

*We produce high-quality public policy research to help inform the public about our programs and provide evidence to facilitate policy-making.*

- a. Create a robust intramural and extramural research agenda that articulates the research performed by our employees and grantees and that is responsive to key social insurance issues of interest to policymakers and the public.
- b. Maintain and enhance capabilities for modeling Social Security policy reforms
- c. Use and disseminate research findings to strengthen public understanding of Social Security programs and develop policy relevant options for stakeholders (e.g., explore and build upon communication strategies such as the brochure developed for transition-age youth).
- d. Use grants and other mechanisms to partner with third-party experts and others to support research and evaluate social insurance topics, train scholars and practitioners in Social Security programs and disseminate findings to the public, (i.e., the Disability and Retirement Research Consortia and the Analyzing Relationships between Disability, Rehabilitation, and Work program).
- e. Work with federal partners to conduct research and develop data resources to improve policies and processes (e.g. Institute of Medicine (IOM) and National Institutes of Health (NIH) and the Bureau of Labor Statistics (BLS), White House Social and Behavioral Sciences Team, etc.).

## 6. Support the Employment Needs of our Customers

*We strengthen return to work policies and programs and conduct demonstrations to help policymakers shape employment support programs and policies in the future.*

- a. Ensure quality service to our beneficiaries and timely and accurate Vocational Rehabilitation (VR) payments to the state VR agencies (e.g., timely and accurate information from the Work Incentives Planning and Assistance (WIPA) and the Protection and Advocacy of Beneficiaries of Social Security (PABSS) programs, enhance collaboration with SSA Regional Offices and field components to promote communication and awareness of return to work services and work incentives; etc.).

## ORDP FY 2017 WORK PLAN

- b. Strengthen communication, oversight and performance of Employment Networks (e.g. continue site visits and quality review audits).
- c. Enhance the administration and effectiveness of the Ticket to Work Program (e.g., continuously solicit stakeholder input, pursue regulatory action changes, and leverage Information Technology to strengthen the Program).
- d. Leverage technology to ensure timely and accurate payments for return-to-work service providers and to prevent overpayments to beneficiaries (e.g., improve automation around the VR program, utilize Continuing Disability Review Enforcement Operation (CDREO)/WorkSmart, implement wage reporting Proof of Concept and gain direct access to beneficiary earnings to minimize the need for wage reporting by the beneficiary).
- e. Test and benchmark policies and program rules to encourage employment and self-sufficiency (e.g., develop, implement and/or evaluate experimental designs such as the Promoting Opportunities Demonstration (POD), the Early Intervention Mental Health Demonstration, and the Promoting Readiness of Minors in Supplemental Security Income (PROMISE) demonstration).
- f. Use research and outreach to identify the needs of return to work customers and identify alternatives to existing programs and policies (e.g. surveys).

### **7. Enhance Data Sharing for Better Public Service**

*We ensure that agency data exchange services align with agency priorities*

- a. Identify with SSA business sponsors opportunities where data could support policy analysis and improve SSA program implementation and stewardship (e.g., state non-covered pension data from states or the Internal Revenue Service Arrival and Departure Information System).
- b. Improve the efficiency and effectiveness of SSA and other government programs (e.g., lead the Federal Data Exchange Community of Practice, continue to build relationships with federal and state agencies and find new ways to share data in a secure manner (e.g., Centers for Medicare & Medicaid Services Hub)).

## ORDP FY 2017 WORK PLAN

- c. Enhance the effectiveness and transparency of SSA data sharing policy (e.g., develop, streamline, and document policy).
- d. Foster data availability and sharing within and across ORDP components (e.g., inventory of available data).

### **8. Enhance Quality and Payment Accuracy for Our Customers**

*We create and implement strategies to improve quality and payment accuracy by addressing the root causes of improper payment and inconsistent procedural outcomes*

- a. Ensure ongoing alignment between root causes and improper payment prevention strategies (e.g., make use of quality and stewardship findings).
- b. Target key areas for improving payment accuracy (e.g., co-lead the Agency Critical Priority, “Enhance Quality and Payment Accuracy for our Customers,”; pursue corrective action and remediation plans, including legislation, policy, training, systems and business process changes that may be required to correct and prevent errors).
- c. Foster collaboration with internal and external partners, and share challenges and strategies for reducing improper payments (e.g., lead the Federal Improper Payments Community of Practice, lead the Improper Payments Oversight Board).

# ORDP FY 2017 WORK PLAN

## ORDP AT A GLANCE

ORDP supports the agency's vision to "proudly serve Social Security customers throughout their lifetime, when and where they need us." Social Security is our nation's most effective poverty prevention program. We are also one of the largest government programs in the world, disbursing almost \$1 trillion dollars in federal benefits per year – with a consistently high accuracy rate and with an administrative cost of only 1.3%.

ORDP plays a critical role in creating evidence-based policy, research and demonstrations to inform and shape our programs. ORDP is comprised of seven Associate Commissioner level components with a diverse and complementary set of functions as follows, and described in more detail on our intranet site:

- **Office of Data Exchange and Policy Publications (ODEPP):** ODEPP provides agency-wide oversight of more than 3,000 data sharing agreements. They also work across government to identify trends and opportunities in data sharing and to leverage data to improve program administration. ODEPP also manages the agency's policy publication systems and processes, as well as all Information Technology support for ORDP.
- **Office of Disability Policy (ODP):** ODP shapes medical and vocational disability policy to keep pace with changes in medicine, technology and the world of work. They also develop solutions to improve the disability application process, support the use of data and evidence to drive decision-making, and develop standards and protocols to exchange health related information with the public and private sectors.
- **Office of Income Security Programs (OISP):** OISP shapes, simplifies, implements and advances a wide array of program policies, including on retirement, SSI, Medicare enrollment, Social Security cards, earnings, agency notices and representative payees. They also coordinate payment accuracy strategies and activities for the agency.
- **Office of International Programs (OIP):** OIP creates and manages a network of bilateral ("totalization") Social Security agreements that coordinate the U.S. Social Security program with the comparable programs of other countries. They also

## ORDP FY 2017 WORK PLAN

collaborate with international organizations on research, comparative studies and technical assistance to inform social insurance programs throughout the world.

- **Office of Research, Demonstration, and Employment Support (ORDES):** ORDES conducts large-scale demonstrations to test and evaluate potential policy changes. In addition, ORDES manages the agency's employment support programs and policies, including the Ticket to Work. ORDES also produces data, research, and statistical models to inform the agency's disability policy.
- **Office of Research, Evaluation & Statistics (ORES):** ORES conducts research on Social Security programs, including demographic and economic trends that affect our programs and beneficiaries. ORES also leverages the expertise of researchers around the country through the administration of grant programs. ORES is a designated federal statistical office that produces statistical publications on Social Security programs and supports the development of data for research purposes.
- **Office of Retirement Policy (ORP):** ORP conducts policy research on retirement security, including using microsimulation models to project the impact of policy changes on our beneficiaries and other demographic groups. ORP also leverages research findings to help the public make informed choices about planning for retirement, such as when to claim benefits.

**Office of Quality Review (OQR)**  
**Prepared by DCBFQM**  
**December 8, 2016**

**What We Do**

- Evaluate and report on the integrity and quality of the administration of Social Security programs.
- Conduct broad-based reviews, studies, and analyses of agency operations with emphasis on compliance with laws, regulations, policies; prevention of program and systems abuse; elimination of waste; and the increase of efficiency.
- Establish quality review policy for our field reviewers; analyze and report on results; and recommend changes in programs, policies, or legislation aimed at quality and productivity improvement and program simplification.
- Perform customer surveys that measure the public's perceptions of the agency's service delivery and provide insights for agency planning.
- Lead the development and maintenance of the quality assurance systems that support nationwide studies and reviews.
- Conduct evaluations of the agency's 800 number and field office telephone service to assess the quality of service provided to the public based on adherence to policy and procedures.

**FY 2016 ACCOMPLISHMENTS**

**Reviews and Surveys**

Conducted 501,360 quality reviews, surveys, and studies and provided direct feedback to agency partners.

**Mandatory**

Type	Total Cases	Scope and Impact
PER: Title II/Title XVI	348,399	Reviews 50 percent of all favorable determinations before benefits are paid. Uses a predictive model to select the most error-prone cases. Identifies issues in case documentation or decisional accuracy. Authority: Public Law 96-265, enacted in 1980, (section 221 (c) of the Social Security Act for Title II and Public Law 109-171, enacted February 2006, (section 1633(e)(1) of the Act) for Title XVI.
QA Initial/CDRs	57,298	Completes initial and CDR reviews for performance accuracy. Provides customer accuracy feedback and trend analysis. Authority: 20 CFR 404.1640 – 404.1670 (QA Initial) and PL 96-265 (CDR)
SSI Stewardship	4,428	Provides an accuracy measurement of Title XVI payments to individuals who received at least one SSI payment during the fiscal year. Authority: Improper Payments Elimination and Reduction Act
Medicare Part D	2,544	Redetermines eligibility on a random sample of cases for quality assurance purposes. By determining if the subsidy determination was correct, we try to pinpoint possible areas for accuracy improvement. Authority: 20 CFR 418.3125 (b)(5)
OASDI Stewardship	1,768	Reviews for overpayment accuracy and underpayment accuracy. Provides accuracy measurement of payments to beneficiaries currently on the rolls and the basis for reports to monitoring authorities as well as the reporting requirements. Authority: Improper Payments Information Act of 2002.

**Priority**

Type	Total Cases	Scope and Impact
Targeted Denial Review	42,466	Selects error-prone DDS initial and reconsideration denials from each State based on a predictive model. Ensures the agency is not denying or delaying benefits to people rightfully entitled and reduces potential hearings.
Retirement Applicant Survey	6,659	Surveys customers who had recently filed for retirement to determine their level of satisfaction with the retirement application process. Provides feedback to help improve the service for future customers.
PC Inline Review	4,802	Improves accuracy in processing alerts, exceptions, and processing limitations. Prevents improper payments. Provides customer accuracy feedback and trend analysis.
Disability Initial Claims Report Card Survey	3,409	Surveys customers who had recently filed an initial disability claim to determine their level of satisfaction with the disability claims process. Provides feedback to help improve the service for future customers.
AFI Study	3,692	Determined that it would not be cost-effective to conduct AFI verification in-between redeterminations or to lower the current \$400 liquid resource tolerance.
FO/HO Office Visitor Survey	1,967	Surveys customers who had recently visited an FO or HO to conduct business with the agency to determine their level of satisfaction with the office visit.
PC Overpayment Review	1,589	Completed EIB CESS reviews and EPE reviews from PC-7. Improves overpayment processing.
800 Number Caller Survey	1,408	Surveys customers who had recently called the National 800 Number to conduct business with the agency to determine their level of satisfaction with the phone call. Provides feedback to help improve the service for future customers.
FO Caller Survey	1,185	Surveys customers who had recently called an FO to conduct business with the agency to determine their level of satisfaction with the phone call.
Social Security Card Center Survey	1,003	Surveys customers who had recently visited a card center to conduct SSN related business with the agency to determine their level of satisfaction with the SSN application process.
Force Pay/M01	23	System enhancement made to M01 process. Mitigates a significant deficiency. Peer review to ensure that FOs processed and

		correctly documented M01 transactions requiring a payment change.
--	--	---

## Customer Requests

Type	Total Cases	Scope and Impact
QA Recon	7,976	Provides customer accuracy feedback and trend analysis
Disability Hearing Officer (DHO) Review	2,612	Provides customer accuracy feedback. Hearing Officers may continue cases previously ceased. Prevents cases from moving to appeal.
Workload Support Unit (WSU)	2,200	Determines the quality and accuracy of WSU processing of claims.
Administrative Law Judge (ALJ) Reversal Study	400	Reviews cases that were denied by DDS and later allowed by ODAR. Verifies conditions where a case was policy compliant at the initial decision and appropriately allowed later.
Title II Claimant Representative Fee Review	400	Determines if proper procedures were followed in the representative fee payment process and in the withholding of past-due benefits. Determines case-dollar accuracy rate.
Special Fraud Review	200	Fraud reviews for multiple fraud situations. Provides customer accuracy feedback.
Third Party Death Information Analysis	200	Determined third-party databases are not an effective means to determine death in cases where the beneficiary is in suspense. Determined the cost-effectiveness of using third-party databases for dates of death and contact information for beneficiaries who may have died, when that information is not in agency records.
ALJ Bench Decisions Probe	100	Provides feedback on bench decision accuracy versus standard decision accuracy, and adherence to bench decision procedures.

## Reports Published for One-Time Reviews, Surveys, or Studies

Published nine reports to address audit recommendations, conduct in-depth analysis into areas with political sensitivity, or provide additional quality probes of areas previously identified as error-prone:

- Third Party Death Information Analysis
- Title II Claimant Representative Fee Review
- Government Pension Offset
- SSI Internet Use
- Administrative Law Judge Bench Decisions Probe
- Title XVI Living Arrangement B
- Title XVI Post-Entitlement Nonmedical Appeals
- Error Exceptions to the Medical Improvement Review
- Post-Windsor, Pre-Obergefell Title XVI Same-Sex Marriage Determinations

## Reports Published for Ongoing Reviews, Surveys, or Studies

Published 15 reports to provide customer accuracy feedback and trend analysis, reduce errors, reduce potential hearings, and pay claimants correctly:

- Online Authentication
- Overall Service Satisfaction - Telephone and In-Person Service
- Office Visitor Survey: Field and Hearing Office Analysis
- Prospective Client Survey
- Telephone Service Evaluation—800 Number Call Monitoring
- Telephone Service Evaluation—Field Office Call Monitoring
- Title XVI Payment Accuracy Report
- Title XVI Transaction Accuracy Review
- Senior Attorney Advisor National Screening Unit Study
- Disability Case Review - Administrative Law Judge Hearing Decisions
- Enumeration Accuracy
- Medicare Low Income Subsidy Awards Review
- Medicare Part D Low Income Subsidy Redetermination Review
- Title II Payment Accuracy
- Title II Post-Entitlement Field Office Transactions

## Report Recommendations

Developed a Recommendation Tracking System (RTS) to monitor the progress made in implementing our report recommendations. Recommended 27 corrective actions and collaborated with stakeholder components to develop corrective action plans.

## Assistance to the Office of Disability Review and Adjudication (ODAR)

Assisted with Compassionate and Responsive Service (CARES)-related workload processing tasks to enable

ODAR to redirect its resources to focus on reducing pending cases. Completed actions on 16,846 cases for ODAR. Suspended some of our own discretionary work to complete these tasks.

***Quality Visits and Collaborations (QVC)***

Provided tailored analysis, reviews, training, and collaborative assistance to agency components in key areas to drive quality improvement and service objectives. Completed 141 QVCs, 72 percent conducted face-to-face and 28 percent virtually, in the agency's 10 regions and headquarters.

## **DCO (Non-Headquarters) Components and Facilities**

### **Regional Offices (RO)**

The Office of the Regional Commissioner (ORC) serves as the principal SSA component in each of SSA's ten regions. Each ORC ensures effective SSA interaction with other Federal and local government agencies, State welfare agencies, State Disability Determination Services (DDS) and regional and local organizations. The ORC also issues supplementary operating policies and procedures for SSA's programs that target their specific regional needs. The ORC directs a region-wide network of Area Director Offices (ADO), Field Offices (FO), teleservice centers (TSC) and, in each of the six regions where present, a Program Service Center (PSC). It provides overall management direction for the provision of personnel services and administrative support to SSA regional components and implements a regional SSA public affairs program.

### **Area Director's Offices (ADO)**

Area Directors ensure FO managers are carrying out their assigned responsibilities fully and effectively and provide support for sensitive issues. The office ensures sound working relationships are established and maintained between field offices and many entities, such as DDSs, large employers, unions, medical associations and organizations, Federal, State, and local agencies, and major information media. The ADO facilitates the administration of programs to obtain the advantages of coordinated, area-wide effort in such fields as public affairs, community relations, recruiting, training, career development, equal opportunity and parallel functions. There are 51 Area Offices throughout the nation.

### **Field Offices (FO) – Primary Customer: Walk-in Visitors**

Field offices are geographically located to provide citizen's access to in-person, face-to-face Social Security services. Technicians in each SSA FO are trained to handle the wide scope of SSA responsibilities. These may include: providing general information on all the programs SSA administers; providing speakers for informational events; serving those who wish to file for retirement, survivor, disability, or Medicare benefits; providing assistance to resolve issues involving address or bank changes, lost checks, and applying for or replacing Social Security number cards. The FO also offers citizens the opportunity to complete business via local telephone service, Video Service Delivery for transacting business with other SSA entities and ability to use a Self-Help computer to complete SSA business. There are approximately 1200 FOs throughout the nation.

**Card Centers – Primary Customer: Walk-in Visitors**

Card centers are unique SSA FOs designed for one exclusive purpose – receive and process applications for Social Security numbers (i.e., Enumeration) and replacement cards. Card centers are located in metropolitan areas with high volume demand for Social Security card processing requests. We have 14 card centers in the following areas: several cities in California and New York; Phoenix, AZ; Orlando, FL; Minneapolis, MN; Las Vegas, NV; and Philadelphia, PA.

**Workload Support Units (WSU) – Primary Customer – Internet User**

Since the inception of iClaim (filing a claim online) in 2000, we have seen the public's service channel preferences continue to evolve to include online service as the faster and more convenient service channel. In support of that shift and expectations that trend will continue, our Workload Support Units (WSU) process work generated through the internet – just as a field office, but virtually – and perform other work that does not require face-to-face contact, increasing customer convenience and reducing FO traffic. We have 16 WSUs nationally.

**Teleservice Center (TSC) Primary Customer – Callers**

The Teleservice Center (TSC) is the primary public contact point for most persons who call SSA via the nationwide "800" telephone number (1-800-SSA-1213). Telephone technicians assist the public when they call our 800 number to obtain information, schedule appointments, or resolve issues with benefits. These employees assist the public by answering a wide variety of questions, conducting interviews, investigating situations, and resolving problems.

TSCs are national network, linked together on SSA's 800 number network, and calls are routed to different locations at different times of the day, or different days of the week, depending on call volumes and available resources. SSA's 800 number network is a very complex and sophisticated system and handles millions of calls every year. There are 26 TSCs located throughout the United States and in Puerto Rico.

**Processing Center Operations (PCO)**

Processing Center Operations (PCO) is comprised of eight organizations: six Program Service Centers (PSC), the Office of Disability Operations (ODO) and the Office of Earnings and International Operations (OEIO). PCO is a centralized organization with a complex structure and mission that touches a wide-range of service objectives. Multiple organizational components, comprised of well over a hundred positions, process the most complex workloads in the Agency for

approximately 11-12% of SSA beneficiaries, including claims, appeals, attorney fee payments, debt collection, evaluation of medical/vocational evidence, records maintenance, continuing eligibility, inquiries, remittance and accounting functions. In addition, PCO provides support to callers contacting the National 800 Number and for the Agency's online and electronic services.

### **Office of Central Operations (OCO)**

In addition to serving as the lead component for OCO and OEIO, subcomponents within the OCO organization maintain records of workers' earnings, furnish earnings statements, resolve individual and employer earnings problems, service domestic claims, and handle foreign claims around the globe.

Other components within the jurisdiction of OEIO include the Foreign Benefit Units (FBU). The different laws, customs, languages and conditions abroad, together with the difficulties that can arise in dealing with claimants and beneficiaries abroad by mail, often make it difficult to administer the Social Security program effectively outside the U.S. SSA customers who live outside the United States are serviced by Department of State (DOS) personnel located in US Embassies, Consulate Generals and Consulates.

OEIO utilizes these Foreign Service Posts (FSP) to assist with our business, including taking and developing claims. FSP employees are nationals of the host country and are called Foreign Service Nationals (FSN). FSN positions function like standard SSA Field Office (FO) service, claims and field representatives. OIO can structure requests for assistance to these FSPs in the same way as a developmental request to any SSA FO. However, because the FSNs do not have SSA adjudicative authority, they must send completed claims packages to OIO for review and final adjudicative action.

### **State DDS (DDS)**

The State Disability Determination Services (DDS) are responsible for the development and evaluation of medical and vocational documentation for Social Security and Supplemental Security Income claims, leading to a determination of whether or not an individual is disabled. These determinations may include consideration of the individual's age, education, and past work experience. Determinations involving vocational factors consider the availability of jobs in the national economy. The DDS is 100% federally funded by the Social Security Administration.

The overall objective of the DDS is to provide accurate, timely, and cost-effective disability determinations in accordance with Title II and Title XVI of the Social Security Act to disabled citizens while facing challenges that include attrition and periods of limited or no hiring authority.

## OPERATIONS DECISION MAKING PROCESS

The decision making process within Operations is based upon organizational hierarchy, with the decision-making responsibility delegated according to lead areas and the sensitivity or significance of the decision.

Associate Commissioners (AC) have established lead areas according to component responsibility. Regional Commissioners (RC) also have established lead areas. In addition, each DCOSS AC collaborates with an RC in certain topic areas. For example, the Boston RC has the executive lead for disability and partners with the ACs of the Office of Public Service and Operations Support and the Office of Disability Determinations. Together, the RC and two ACs take the national lead on disability related projects and initiatives.

Within Operations, there are quarterly DCO executive meetings that include the DC, ADCs, ACs, and RCs. The executives use these meetings to discuss long-term planning, strategic initiatives, and current topics of importance. In addition, this group of executives has a weekly touch point call to discuss hot topics in between the larger quarterly meetings.

Decisions solely under DCO purview are made within individual regions, individual components, or in collaboration with other RCs/ACs with approval or concurrence from the Assistant Deputy Commissioner (ADC) or the Deputy Commissioner for Operations (DCO). Decisions or proposals are developed at staff level and reviewed by management prior to escalating through higher management levels for final approval. Under the shared services model, regions coordinate responsibilities to reduce redundancies. For example, the Chicago region is responsible for human resources for the Denver region.

Decisions that extend into other non-Operations components' areas are similarly developed at staff level prior to internal approval at higher management levels. Once DCO internal leadership agrees with the recommendation, the issue is taken before the executives of the other affected component for consensus. The decision is taken before ACs, ADCs, or DCs depending upon the significance of the decision point.

Budget decisions are typically made at the DC level, with execution at the AC and RC level. Decisions on staffing allocations are made at the DC level. Specific hiring decisions are made according to grade of hire with lower graded hiring decisions made by component Division Directors (DD). GS-14 decisions are made by AC based upon recommendation from the DD. GS-15 decisions are made by ADC or DC with recommendations from AC.

## **Office Consolidation**

### **Consolidation Determining Factors**

Factors to consider in the consolidation decision process:

- Demographics of service area
- Impact on the public
- Geography of service area
- Staffing
- Impact on stakeholders
- Socio-economic conditions
- Proximity of other offices
- Impact on employees\*
- Lease expirations

### **Communication Plan – Responsible Components**

The Office of Operations, the Office of Communications, and the Office of Legislative and Congressional Affairs are responsible for the coordination and timely communication of office consolidations.

### **Pre-Process Activities**

The pre-process consists of the following activities:

1. Identify stakeholders and community leaders
2. Develop and finalize communication material

### **Notification Process Activities and Time Frame**

The notification process consists of the following activities:

1. Notice to AFGE
2. Notice to staff
3. Meeting with field office employees
4. Regional notification to local congressional offices
5. D.C. Level Congressional notifications
6. Regional Management Operations' Support notifies GSA (GSA notifies lessor)
7. Communication material distributed to stakeholders and community leaders
8. Congressional letter mailed to confirm notifications
9. Office consolidates

### **Outreach Activities and Messaging**

The Regional Commissioner (RC), working with the Regional Communications Director (RCD), directs outreach activities and contacts.

The RC and RCD develop messaging that includes factors leading to the consolidation decision.

The RC and RCD will work with field office managers to ensure:

- All stakeholders and community leaders are identified,
- There is a clear understanding of the needs of the community, and
- The concerns of the service area are appropriately addressed.

After all outreach activities and contacts are complete, the RCD is the point of contact for questions from stakeholders, the media, and the public. The RCD also handles all requests for information and interviews.

Securing today  
and tomorrow

## Message About OGC's Strategic Plan

*Colleagues,*

*We are excited to share the Office of the General Counsel's Strategic Plan for 2016-2020. As public servants, we can all embrace the honor of our service and take pride in the service we provide to the agency and to our nation.*

*Through this plan, we will focus on six areas to advance our organization over the coming years. The plan's initiatives will help us to:*

- *better serve our client;*
- *communicate more clearly inside and outside of our office;*
- *provide increased opportunities for focused training and developmental opportunities and;*
- *better apply technology and analyze information in inventive ways to support our mission.*

*As we execute on our new plan, we count on each of you to join us in enthusiastically contributing to our strategies, initiatives, and overall success.*

*We look forward to shaping our organization together.*

*The Leadership Team*

## Overview of Our Strategic Plan

The Office of the General Counsel's (OGC's) primary mission is to provide legal and privacy protection services to our client agency. However, we recognize that we best accomplish our mission through strong relationships with not only our clients, but also with our government partners and other stakeholders, including the bench and bar.

Our success in litigation, solid legal advice, focus on protecting privacy interests, and strong recruitment efforts provide a solid basis to serve our clients more successfully for the decades to come. As the complexity and volume of our workload continue to grow, though, it is imperative that we focus our resources and improve our knowledge management systems and processes. Doing so will enable us to continue to meet our client's needs while further developing our people and improving our work processes.

To leverage our momentum, we have developed a strategic plan that targets our most critical organizational needs, provides innovative steps to guide us forward, and focuses on actions we can take now and in the near future.

Our Strategic Plan serves to identify the critical priorities that will move us toward a future where:

- *Clients seek us out because they value, respect, and trust our advice; and because we are client service-focused.*
- *We speak with One OGC voice in the courts and to clients, partners, and stakeholders.*
- *We have a cohesive culture with a focus on our people.*
- *We communicate clearly, timely, and accurately.*
- *We make thoughtful decisions quickly and adjust based on new information.*
- *We use advanced technology that supports our work environments.*
- *We are on the cutting edge of – and drive discussions on – privacy in the public sector.*

Our service allows our agency to deliver benefits to America's most vulnerable population in ethical and responsible ways. Our Strategic Plan describes our collective commitment to ensuring that we serve the agency and the American public as effectively as possible as we move forward. We will transform OGC into an even stronger organization.

We are One OGC – here to serve with a commitment to excellence, integrity, and judgment.

## Approach to Our Strategic Plan Development

Our Strategic Plan is the culmination of several months of collaborative effort by a team of OGC leaders, including staff contributions. We used this time to define the most important focus areas for our organizational growth and, within these focus areas, to identify innovative and immediate ways to strengthen OGC. The result is a set of six focus areas, which cascade directly from Vision 2025, the Agency Strategic Priorities and the Agency's Critical Priorities:

### SUPERIOR CUSTOMER EXPERIENCE

- A. Strengthen Our Client, Partner, and Stakeholder Relationships**
- B. Improve Our Communications**

### EXCEPTIONAL EMPLOYEES

- C. Enhance Our Recruitment, Hiring, and Retention**
- D. Promote Employee Development and Engagement**

### INNOVATIVE ORGANIZATION

- E. Improve Our Virtual Workforce Experience**
- F. Use Data to Inform Decisions**

Sections A-F of this document provide a high-level summary of each of the six focus areas. Included in each of these summaries is a narrative of what the focus area entails, a specific set of “outcomes” we will achieve by 2020, and the key initiatives that will drive us to those outcomes. Separately, we will have shorter-term goals and milestones that will help us achieve these longer-term objectives.

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

## A. Strengthen Our Client, Partner, and Stakeholder Relationships

### Summary

We are committed to creating a client, partner, and stakeholder focus in how we communicate and deliver results. We will continue to strengthen our existing relationships with each of these groups to understand their needs better and, as a result, to serve them more effectively.

We will use innovative approaches, such as virtual detail programs across the agency to deepen our knowledge of our client and agency work environments. In addition, we will create tools that leverage existing knowledge and best practices to identify and respond to common client requests to improve our agility, quality, and responsiveness. These actions will improve the quality of our work and our relationships with our clients, partners, and stakeholders and will lead to better results, including more responsive legal and privacy guidance and desirable resolutions of legal and other issues.

We will enhance our relationships with the client we serve, the partners we work with, and the stakeholders whose interests are important to us.

### Outcomes to Achieve by 2020

- We consistently provide timely, accurate, and excellent legal services to our clients. With an improved understanding of our client's needs and a proactive approach to identifying its future needs, we are able to enhance both our responsiveness and the quality of our services. We communicate clearly with our government partners and engage in or support activities that benefit our national goals. We also provide pertinent information to and respond appropriately to stakeholder requirements or requests.

### Key Initiatives

- Improve our communications with our clients, partners, and stakeholders through new avenues for mutual information sharing, provide training in client-centric communications, and create stronger methods of engagement, including bench-bar meetings and other methods to enhance the flow of information.
- Assess client challenges and concerns through existing and new channels, e.g., client surveys and focus groups, to assist clients in better identifying potential issues/risks of actions and decisions to provide a more proactive and responsive approach to their needs.
- Become better integrated into our client's work processes through innovative programs, such as detail programs (including virtual details) that rotate OGC staff and leaders to other client components and bring other component staff into OGC as the budget allows.
- Place common client, partner, and stakeholder requests into intuitive and readily available tools, e.g., Frequently Asked Questions, to enhance consistency, quality, and speed in responses to regular requests.

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

## B. Improve Our Communications

### Summary

Communicating more often, consistently, and effectively will allow us to improve all aspects of our work.

We will focus on communicating better inside and outside of our organization to inform and educate our staff and to ensure that our clients, partners, and stakeholders know how to engage with us and recognize the value we can provide.

Through this focus, we will ensure that we all have the information we need to work with each other, our clients, and our partners in a more collaborative manner to improve the quality of our work and the value we provide.

### Outcomes to Achieve by 2020

- Our internal and external communications are clear, consistent, and timely – allowing our staff to build trusted and valued relationships with each other and with our clients, partners, and stakeholders

### Key Initiatives

- Provide employees with the skills, tools, and technology to communicate effectively, including training, web-based information sharing tools, enhanced standards for written communications, and improved internal communication processes.
- Establish subject matter expertise workgroups to promote national consistency in work products and provide training in areas of expertise to clients and OGC staff.
- Develop OGC One Voice products, similar to agency messages, to keep our clients, partners, and stakeholders informed on our efforts and on areas that affect their work.
- Listen to our clients, partners, and stakeholders to find proactive ways to support and educate them and improve the level of service we provide.

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

## C. Enhance Our Hiring, Recruitment, and Retention

### Summary

We are committed to strengthening our recruitment and retention programs to build and sustain a talented and diverse workforce.

We will identify innovative ways – and build on current programs – to attract and retain the best and the brightest. These efforts will include refining, standardizing, and strengthening our hiring and retention programs. We will also continue to expand our efforts around diversity and inclusion, identifying new mechanisms to attract and support a diverse workforce.

With this focus, we are committed to attracting, supporting, and retaining our employees through our recruitment, hiring, and retention programs.

### Outcomes to Achieve by 2020

- Our recruiting, hiring, and retention practices have enabled us to attract and retain a talented and diverse workforce that is committed to our mission in serving the agency.

### Key Initiatives

- Refine our hiring process for staff and leadership positions by identifying innovative programs and approaches to recruit talented candidates in a competitive landscape.
- Identify mechanisms for increasing diversity and inclusion in recruitment, e.g., attending affinity bar conferences as appropriate, attending job fairs that specifically promote diversity, creating partnerships with law schools, and creating mentoring programs.
- Standardize onboarding for all staff (both attorneys and non-attorneys) to build a more consistent experience and, as a result, a more cohesive culture.
- Develop our retention plan to foster and support a talented and diverse workforce.

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

## D. Promote Employee Development and Engagement

### Summary

Employees are the heart of our organization and must have the right skills and capabilities to best serve our clients and support our partners and stakeholders.

To build a more engaged and cohesive workforce, we will identify innovative ways to provide developmental opportunities, strengthen training programs, and increase interactions across OGC. We will create developmental pathways to allow our staff to navigate their careers within OGC and move toward leadership positions.

With this focus, we will support and engage employees throughout their careers at OGC.

### Outcomes to Achieve by 2020

- Our high-performing workforce consistently exhibits the highest standards of excellence, integrity, and judgment in meeting our and the agency's missions.

### Key Initiatives

- Foster opportunities for staff who seek to develop into leaders, identifying new developmental opportunities to bolster skills and leadership capabilities, such as detail programs (including virtual details) across the agency and participation in the OGC Leadership Development Program.
- Strengthen our focus on staff development, including improving our training programs and creating developmental pathways for all employees.
- Identify ways to build a cohesive culture to improve employee engagement and increase consistency in serving our clients and supporting our partners and stakeholders.

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

## E. Improve Our Virtual Workforce Experience

### Summary

We are committed to ensuring our employees have the necessary tools to foster a cohesive, flexible, and effective virtual working environment.

We will explore innovative ways to understand our technological needs, including developing a super user community and a strong partnership with the Office of Systems to provide recommendations and inputs into enhancing our virtual work experience. We will also identify ways in which to increase opportunities for all of us to connect and interact in order to maintain consistency in our approaches to our work and business process to deliver consistent quality nationally.

Through this focus, we will ensure that all OGC staff and leadership experience a flexible, productive virtual work environment that offers them the tools, community, and collaboration they need to perform their jobs and stay connected across OGC.

### Outcomes to Achieve by 2020

- OGC uses existing and new technologies to maintain a productive, collaborative, and cohesive virtual work environment across the country that delivers consistent and quality services.

### Key Initiatives

- Use innovative approaches to identify and meet virtual work environment needs, such as building an OGC super user community to assist in understanding how we can best use technology in OGC.
- Enhance our use of existing technology and new technologies, including partnering with the Office of Systems to leverage agency level tools and technologies.
- Benchmark other OGCs within the federal government on their telework practices and successes.
- Improve our existing virtual work experience to enhance employee retention, morale, and work/life balances, including identifying ways to maintain office culture in a virtual environment.

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

## F. Use Data to Inform Decisions

### Summary

We are committed to providing our client and employees with timely information to improve the quality of our work.

We will build an analytics infrastructure that uses data to better inform our decisions, increase efficiency and productivity, and provide our staff with the information they need to make well-informed decisions and provide quality service.

Through this focus, we are committed to equipping our staff with the information needed, in a timely manner, to allow us to perform our work more effectively, efficiently, and accurately.

### Outcomes to Achieve by 2020

- OGC uses business intelligence to increase workload efficiencies and accountability—resulting in our providing quality service to our client, partners, and stakeholders.

### Key Initiatives

- Build an analytics infrastructure, including tools and reporting, that provides our entire staff with improved business information to enhance our individual and collective work efficiencies and quality.
- Identify new ways to use data to enhance our ability to provide timely service and equip employees with the skills necessary to use analytics effectively.

## Summary of Next Steps

To ensure that our Strategic Plan is actionable and drives us toward our vision for 2020, our teams have initiated several key activities to test their efficacy and to produce several results quickly. For example, we are already piloting client and Department of Justice surveys and a staff training survey.

Over the next several months, the Leadership Team will identify additional pilot programs and milestones for our focus area initiatives and will assign owners, including staff, within OGC to drive these actions forward. Where possible, we will engage other agency components to support activities to further our vision for 2020.

As we begin to see results and meet key milestones, we will assess our strategic planning activities to determine if they are having the desired impact on OGC. To do so, the Leadership Team will meet regularly, with staff input, to measure the effectiveness of these activities over time and to shift focus, expand programs, or identify new activities, as we meet new challenges in an ever-changing environment.

With this continued concentration on our focus areas, initiatives, and activities, we will adjust our strategy over time – ensuring that it is a “living” and evolving process to produce the richest results possible in service to our clients and support of our employees, partners, and stakeholders. Together, we will create a better OGC – here to serve with a commitment to excellence, integrity, and judgment.

# Regional Staffing Numbers for FY 15

Region	OGC	Operations	ODAR
Boston	38	1,521	370
New York	56	4,150	764
Philadelphia	71	4,495	1,162
Atlanta	72	8,731	2,059
Chicago	81	6,093	1,534
Dallas	74	4,691	1,016
Kansas City	55	2,594	951
Denver	44	897	241
San Francisco	72	6,305	1,059
Seattle	52	1,744	322
<b>Total</b>	<b>615</b>	<b>41,836</b>	<b>9,478</b>

# WHAT WE DO

## *OGC provides the agency with legal counsel and representation to protect the agency's legal interests*

- **Office of Program Law** supports the agency programmatic policy development and represents the agency in program litigation, including issues of first impression and of national significance.
- **Office of General Law** provides legal support and representation on non-programmatic matters, including fiscal law, personnel and employment law, contract law, and tort law.
- **Office of Privacy and Disclosure** develops and implements privacy and disclosure policies under applicable privacy laws and guidelines.
- **Regional Offices** provide legal advice to regional leaders, provide representation in program litigation, and manage fraud prosecutors.
- **Ethics Office** provides ethics training, advice and counsel, and financial disclosure review to agency employees.

# Office of Program Law

- Provides a full range of legal services and advice (including administrative and court litigation) regarding the agency's operations and administration of its various programs under the Social Security Act.
- Drafts and reviews SSA regulations, Federal Register materials, proposals for legislation and specifications for such proposed legislation.
- Drafts reports and letters to congressional committees, the Office of Management and Budget, and others on proposed legislation and legislative matters; and proposed testimony of SSA officials before Congress.
- Represents SSA, in concert with the Department of Justice, in litigation challenging agency policies and procedures, the constitutionality of provisions of the Social Security Act, and benefit claim determinations. Anti-Fraud programmatic and litigation support particularly on large fraudulent schemes.

# OPL Workloads for FY 16

OPL Workloads	Processed
Regulations	39
Controls	21
Legal Review and Advice	901
Dispositions	758
Briefs	525
RVR Requests	136
Appellate Dispositions	16

# OPL Highlights

Same Sex Marriage and Transgender Legal Opinions

Support Agency Policy Development Related to Supreme Court's *Obergefell v. Hodges* Decision

National Instant Criminal Background Check System (NICS) Policy Development

Treasury Offset Program (TOP) Litigation

# Office of General Law

- Provides all legal services to the Commissioner and every Headquarters component on non-program legal issues affecting the agency's operations and employees with an emphasis on contracts, administrative and court litigation, appropriations law, property management issues and security matters (regional involvement).
- Provides legal advice on the agency's duties and responsibilities under the Privacy Act, the Freedom of Information Act, Section 1106 of the Social Security Act, and related laws.
- Advises agency components with legal advice and appropriate related representation on labor and employment law matters, including playing an integral role in supporting the agency's bargaining activities.
- OGL head serves as the agency's *Touhy* officer, handling requests for y agency employee testimony in private matters.

# OGL Workloads for FY 16

Workloads	Processed
Civil Rights	6
Legal Review & Advice	2,164
Subpoenas	6
MSPB	13
EEOC	46
LMR	11
Misc. Court Cases	15

# OGL Highlights

- Legal advice on the disclosure of personally identifiable information in agency records including data exchange agreements with local, state, and federal agencies
- ALJ discipline litigation
- Represent the agency in multi-million dollar contract disputes
- Support on budget execution, including the legal support for certain budgetary priorities

# OGL - SAFEGUARDING THE AGENCY'S CONTRACTING PROCESS

- OGL successfully resolved four GAO bid protests that arose in FY16
- OGL successfully defended two appeals before the CBCA in FY16
- The total value of contracts OGL defended totaled approximately \$60 million
- In FY16, OGL attorneys provided legal advice in over 60 major procurements valued at approximately \$500 million

## 100% Favorable Resolution of GAO Bid Protests in FY 2016

- (1) Crosby Marketing and (2) Diversity Marketing - \$25 million contract
- (3) National Disability Rights Network - \$25 million contract
- (4) Executive Information Systems, LLC - \$8 million contract

## OGL - GROWTH IN PROCUREMENT RELATED ADVICE

- Over the past three years, OGL has seen an increase in over 30 percent in requests for legal advice in procurement-related matters.
- OGL has provided legal assistance with solicitation, statement of work, or award documentation on the procurements ranging from \$1,000 contracts to \$1.5 billion Information Technology Support Services Contract (ITSSC)

# Office of Privacy and Disclosure

- Develops national guidelines and assists in policy development related to requests for information under the Freedom of Information Act (FOIA)
- Develops national standards relating to the release and exchange of personal data in SSA databases to federal, state, and local agencies, and serves as the agency's focal point for all programmatic data sharing activities with outside organizations
- Reviews agency projects and initiatives to ensure compliance with the Privacy Act and related laws and regulations
- Examines public service issues related to handling various information requests from the public
- Prepares the Annual Report to Congress on FOIA activities, and reviews requests and determines whether records are required to be disclosed to members of the public

# OPD Workloads for FY 16

OPD Workloads (for 3 qtrs.)	Processed
Data Exchange	62
Disclosure matters	476
Privacy matters	331
FOIA	1,033
Agreements (IEA, CMPPA)	35
Production Documents reviewed	742

# Office of Regional Chief Counsels

Provides legal services and support to the Commissioner and the Regional Offices. Examples include:

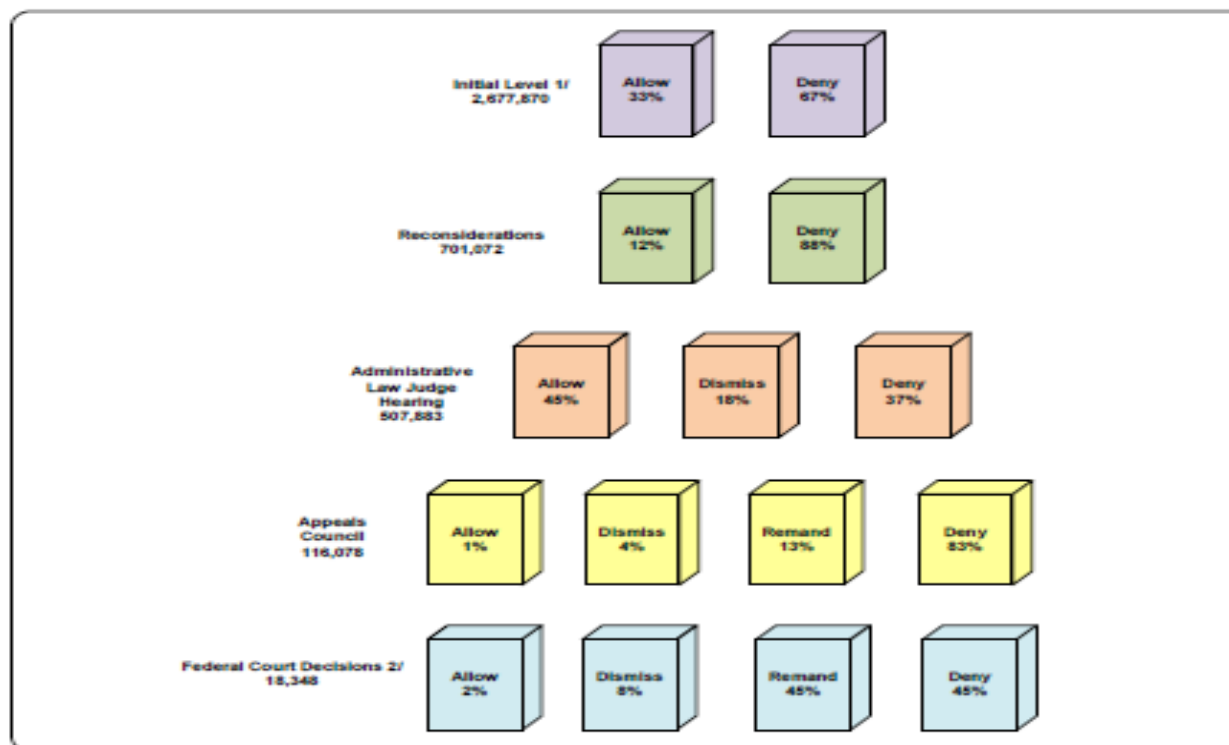

- Providing legal advice on matters arising in their respective geographic locations.
- Providing representation in program litigation before U.S. district and appellate courts.
- Managing the agency's fraud prosecutors in partnership with U.S. Attorney Offices.
- Protecting the agency's legal interests in bankruptcy litigation.

# Regional Workload for FY 16

Workload	Processed
Legal Review and Advice	2,206
Subpoenas	1,048
MSPB	87
EEOC	200
LMR	553
Civil Rights	100
Misc. Court Cases	54

# Program Litigation - Workflow

## FISCAL YEAR 2015 WORKLOAD DATA: DISABILITY DECISIONS\*

\*Includes Title II, Title XVI, and concurrent initial disability determinations and appeals decisions issued in FY 2015, regardless of the year in which the initial claim was filed, and regardless of whether the claimant ever received benefits (in a small number of cases with a favorable disability decision benefits are subsequently denied because the claimant does not meet other eligibility requirements.) Does not include claims where an eligibility determination was reached without a determination of disability. If a determination or appeals decision was made on Title II and Title XVI claims for the same person, the results are treated as one concurrent decision.

1/About 24% of initial level denials are issued in States that use the Disability Prototype process, which eliminates the reconsideration step of the appeals process. The first level of appeal for these cases is a hearing before an Administrative Law Judge.

2/ Federal Court data includes appeals of Continuing Disability Reviews.

NOTE: Due to rounding, data may not always total 100%.

Prepared by: SSA, ODPMI (Office of Disability Program Management Information)

Date Prepared: January 14, 2015

Data Sources:

1) Initial and Reconsideration Data: SSA State Agency Operations Report

2) Administrative Law Judge and Appeals Council data: SSA Office of Disability Adjudication and Review (ODAR)

3) Federal Court data: SSA Office of General Counsel

# Federal District Court Dispositions

# OGC is Proactive

- Outreach and training for ALJs and decision writers
- Outreach and training on topics ranging from reasonable accommodation to ethics to e-discovery related issues
- Local rules changes
- Affirmative appeals
- Bankruptcy data analytics project (more on that in a minute)
- Anti-fraud project (more on that in a minute)

## Anti-Fraud Project

The additional 12 hires provided in FY 14 enabled us to have SAUSA's in 25 locations by the end of FY 15. We achieved 171 convictions that resulted in \$16.4 million in restitution ordered in FY 15.

# Bankruptcy Data Analytics Project

- Project Goal - Determine the optimum threshold amount to initiate OGC actions in order to remove SSA overpayments from discharge in bankruptcy.
  - Balancing the administrative cost of preparing an adversary action with the amounts removed from discharge.
  - Average administrative cost is roughly \$5500 when you factor in both actions that we pursue and actions that we don't pursue.
- 9,799 MBR records with Bankruptcy Codes.
  - \$123,792,202 = Total value of SSA overpayment debt subject to bankruptcy discharge.
  - 2,582 Claimants have over \$15,000 in SSA overpayment debt subject to bankruptcy with combined value of \$91.9 million.

# Combined OGC Bankruptcy Filings and Exceptions from Discharge: FY 11 - 16

Adversary Actions Filed	14	18	29	52	43	136
-------------------------	----	----	----	----	----	-----

\* Estimated values - data still being compiled (several actions are still awaiting court decision)

# FY 15 District Court Results

In FY 2015 district court, affirmances in program litigation cases total 9,654 cases. These wins result in savings to SSA's Trust Fund as evidenced below:

- ❖ 7,371 Title II and concurrent cases. Savings per case is \$260K (combined savings to OASDI and Medicare Trust Funds). (using actuary estimates).  $7,371 \times \$260K \text{ per case} = \$1.91 \text{ billion}$
- ❖ 2,283 Title XVI cases only. Savings per case is \$75K (combined savings for SSI/Medicaid).  $2,283 \times \$75K \text{ per case} = \$171 \text{ million}$
- ❖ **Over \$2.08 billion in total savings**

OGC's administrative cost for FY 2015 was approximately \$116 million.

# Ethics

## Ethics Training:

- The Ethics staff is providing supplemental Ethics training on a quarterly basis to Operations managers nationwide.
- Managers will receive the same training nationwide.
- Most regions have scheduled and/or provided the first quarterly training, which is on the Hatch Act.
- We provided training on:
  - Outside Activities/Fundraising - April 2016
  - Gifts - August 2016

# Ethics (continued)

## Advice and Counsel:

- We regularly provide advice and counsel to Operations employees and managers nationwide.
- We have also provided advice and training to Advisory Councils to ensure their regional activities comply with the Standards of Conduct.

## Financial Disclosure:

- We work with filers to ensure their OGE 450 forms are conflict-free and technically correct.
- We review OGE form 278-Ts, new entrant, and retirement forms for Operations filers.

# Data Exchange Agreements

## Overview

- Data Exchange Process
- Why an Agreement is Necessary
- Laws, Regulations, Policy
- Data Exchange Examples

# Data Exchange Agreements

## Data Exchange Process

- Length of Process
- Development and Negotiation
- Legal, Disclosure Policy, and Finance Review
- Agency Stakeholder Review
- Agency Representative Sign-off
- Data Integrity Board (DIB) Review and Approval\*
- DIB Chair Review and Approval\*
- Congressional and OMB Notice\*
- Federal Register Publication\*

\*Computer Matching Requirements

# Data Exchange Agreements

Why do we need an agreement?

- Purpose
- Legal Authority
- Disclosure Authority
- Identifies Data
- Access Parameter
  - Who will have access
  - Will the data be re-disclosed (federal, state, private, contractor)
- Retention and Destruction of Data
- Reimbursement

# Data Exchange Agreements

## Laws, Regulations, and Policy

- Privacy Act of 1974
- Computer Matching and Privacy Protection of 1988
- Social Security Act, 42 U.S.C. 1306
- Internal Revenue Code, 26 U.S.C. 6103
- Social Security Disclosure Regulations (20 C.F.R. Part 401)
- Office of Management and Budget Guidance

# Treasury Offset Program

- Two putative class action lawsuits
  - Grice
  - Heard
- Legislative proposal

## **OGC Bankruptcy Project—Factors Considered**

**Business Question:** What is the optimum dollar threshold to contest the discharge of Title 2 overpayments in bankruptcy cases, to get the best return on investment without causing undue burden to operational staff?

The factors that OGC took into consideration for deriving the optimal threshold to contest the discharge of Title II overpayments in Bankruptcy cases included:

- Title II Bankruptcy cases
- Overpayment amount
- Cost of an adversary action - \$7500
- Success rate in prosecuting adversary actions
- Time OGC attorneys spent processing all bankruptcy notices
- Time OGC attorneys spent assessing and preparing adversary actions
- Time other SSA components spent assisting OGC in preparing documents to support adversary actions
- OGC general wage of a GS 14, step five, with associated overhead costs

## **Office of Systems – IT Technical Staff Data**

**December 7, 2016**

- GS-2210s eligible to retire as of 11/30/16 = 1,057 out of 3,835 employees = 27.56%
- GS-2210s eligible to retire in the next 5 years = 1,684 out of 3,835 employees = 43.91%
- Average age = 48.
- GS-2210s represent all of DCS' Technical IT staff.

# Office of Systems

Data protection (PII)

80 year legacy and  
ongoing commitment

**Brand Mission – Promoting the economic security of the nation's people**

# Our FY17 Goal/Objectives

**Goal: Establish Social Security as the trusted and comprehensive resource that our customers turn to to help them secure today and tomorrow.**

## **Objectives:**

- Build awareness of who Social Security is and why we exist
- Make Social Security meaningful and relevant to our customers throughout their lives
- Make [socialsecurity.gov](https://www.socialsecurity.gov) the first place our customers go for information/tools for key life events (i.e. birth, first job, marriage, disability, retirement, loss).

## **Key Plan Considerations:**

- Full year view of the year of planned marketing activities
- Flexibility to take advantage of local/regional opportunities as they present themselves

## **The Occupational Information System**

**December 20, 2016**

**Prepared by the Office of Retirement and Disability Policy (ORDP)**

This document provides background information on the Occupational Information System (OIS) initiative discussed during the December 14 Office of Retirement and Disability Policy briefing with the Agency Review Team.

We are developing a new OIS that will replace the *Dictionary of Occupational Titles* (DOT) as the primary source of occupational information that we use in our disability adjudication process. Social Security policy requires that we follow a five-step sequential evaluation process to determine if adult claimants qualify for disability benefits. For steps 1 through 3, we consider the claimants' work activity and the severity of their medical impairments. At steps 4 and 5, we need information on the requirements of work to compare claimants' functional abilities with the demands of their *past work* as generally performed in the national economy and to determine if *other work* exists in the national economy that they can perform. We make the majority of our initial and hearings level decisions at steps 4 and 5.

Currently, we base most of these decisions on occupational information found in the DOT as well as paid testimony from vocational experts at a cost of \$60 million a year. However, the Department of Labor last updated about 80 percent of the occupations found in the DOT in 1977, with the other 20 percent having been updated in 1991. As a result, we are making decisions about a claimant's ability to perform their *past work* and *other work* based on data that no longer reflects the contemporary economy.

In order to provide our claimants with fair and accurate decisions, we are developing a modern database of occupational requirements with support from the Bureau of Labor Statistics (BLS). Experienced BLS field economists are visiting employers across the country to collect information about the current requirements of work that will meet our program needs and partially eliminate the need for vocational expert testimony.

Following three years of successful testing and improvements to the survey and methods, BLS began national data collection in 2015 with the goal of launching the occupational information system in 2019 after BLS has completed three years of data collection. Thereafter, we will maintain the OIS with data releases every five years.

**OSOHE Fast Facts**

**Mainframe Transaction Volume:**

180 million earnings records

- Process more than 5 million claims annually
- 141 million beneficiary records
- 70 - 80 million daily CICS transactions (average)
- 175 - 195 million daily online transactions (average)
- Daily total online transaction high 201,250,148 (January 12, 2016)

**Storage:**

- Mainframe: 20 Petabytes (PB) raw
  - Virtual Tape Systems: 17
  - Capacity: 11.8 PB
  - Silos: 17
  - Cartridges: 140,317
- Open Systems: 22 Petabytes (PB) raw
  - Virtual Tape Systems: 51
  - Capacity: 5.95 PB

**Network:**

- 125 Firewalls
- 4,727 Hosts
- 74 Load balancers
- 13 Nodes
- 97 Probes
- 3,489 Routers
- 5,282 Switches
- 13,718 Total devices
- 456,103 Total ports

**Client Server Operation:**

- 2,250 Local Area Networks
- 129,292 End User Devices (workstations and laptops)

**Mobile Communications**

4,500 mobile hand-held devices are currently in service; provisioned by 3 physical servers and 32 virtual servers

The Office of Operations and Hardware Engineering

Design, build, monitor, protect, and sustain the systems infrastructure at the heart of the world's largest social benefit program.

**National Support Center**

**The National Support Center**

A Tier 3 data center with double redundancy

**Phase I—Completed in April 2015**

- Facility Cost: \$298 Million
- IT Migration Cost: \$202 Million
- Total Program Cost: \$500M
- Leadership in Energy and Environmental Design (LEED) Gold Certification
- Hot aisle containment
- Photovoltaic Solar Array 1.3MW
- Free cooling below 55 deg (145 days/year)
- Uptime Institute certified Tier 3
- 64% virtualization of open systems platforms.
- Passive solar heated water

**Data Center Facilities**

	National Support Center (NSC)	Second Support Center (SSC)	National Computer Center (NCC)
<b>Occupied</b>	2015	2010	1980
<b>Employees</b>	60 federal employees 120 facilities, security, and support staff	267 federal employees 131 Contractors (122 in SSC + 145 in RTP)	750+ federal employees 415 Contractors
<b>Sq. Ft.</b>	300,000	100,000	N/A
<b>Generators</b>	Six 2.5 MW Generators 1 MW solar Array	Seven generators that generate 2.25 MW each (4 dedicated)	Three Titan 130 Gas Turbine 13 Megawatts Each

**The NSC Inner Core:**

**NSC Hardware : EFFECTIVE MIPS**

- IBM zEC12 2827-HA1-712 (14,255 GP MIPS)
- IBM zEC12 2827-HA1-726 (25,457 GP MIPS)
- IBM zEC12 2827-HA1-725 (24,844 GP MIPS)
- IBM zEC12 2827-HA1-727 (26,613 GP MIPS)

**Coupling Facilities**

- 4— IBM zEC12 2827-H43-706 (6) with Internal Coupling Facility (ICF) engines (7,809 ICF MIPS each)

**The Mainframe environment comprises:**

- 28 logical systems (LPARs)
- 90 General Processor (GP) engines,
- 72 z-Series Application Assist Processor (ZAAP Engines)
- 9 z-Series Integrated Information Processor (ZIIP) engines
- 77 Capacity Back-Up (CBU) engines

## Second Support Center

The Second Support Center (SSC) provides operational assurance for the Social Security Administration. It is a fully-functional, co-processing data center operating in concert with the National Service Center (NSC) to provide world-class IT services for the American public. The SSC houses approximately one half of the Office of Operations and Hardware Engineering processing environment, and it operates around the clock, seven days per week, 365 days per year.

### SSC Inner Core

#### SSC Mainframe Computers:

##### **SSC Hardware: EFFECTIVE MIPS**

- IBM zEC12 2827-HA1-719 (20,144 GP MIPS)
- IBM zEC12 2827-HA1-706 (7,581 GP MIPS)
- IBM zEC12 2827-HA1-705 (6,281 GP MIPS)
- IBM zEC12 2827-HA1-705 (6,346 GP MIPS)

##### **Coupling Facilities**

- IBM zEC12 2827-H43-706 (4) with ICF engines (7,809 ICF MIPS)

##### **The Mainframe environment comprises:**

- 35 logical systems (LPARs)
- 35 General Processor (GP) engines,
- 19 z-Series Application Assist Processor (zAAP) engines
- 4 z-Series Integrated Information Processor (zIIP) engines, and
- 167 Capacity Back-Up (CBU) engines
- 2 IFL z-Series

There are total 1,102 physical servers and 1,515 virtual servers that enable agency infrastructure.

Total SSC GP MIPS = 40,352  
Total NSC GP MIPS = 91,139

## Organization

We manage the agency's 24/7 data operations, networks, and telecommunications. Our organization is led by Tom Grzynski, Assistant Deputy Commissioner (ADC).

Within the Office of Operations and Hardware Engineering, there are two AC-level components:

**Office of Hardware Engineering:**  
Dave Thomas, Associate Commissioner

**Office of Operations:**  
Tom Fellona, Associate Commissioner

## Monitoring & Responding

#### **Enterprise Operations Control Center:**

Composed of three teams: CICS Monitoring Room, Network Operations Center (NOC), and Master Scheduling; the EOCC provides 24x7 monitoring and support of critical O2HE services including CICS and mainframe environment, Agency's network (SSANET), and all batch job operations for internal components and external business partners. By extension, the EOCC includes the voice Network Operations Center for TSRP services, along with the CenturyLink and Verizon dedicated Network Operation Center.

#### **Visual Communications Control Center:**

Manages and supports satellite video telecommunications with over 1700 downlink training customers throughout the United States, Alaska, Hawaii, Puerto Rico and other outlying areas serviced by the Social Security Administration. The VCCC also supports the Video Teleconferencing (VTC), consisting of over 2,500 endpoints and the core network.

## Featured Capabilities

**Windows Dev/Prod Environment:** Provides a platform for managing the Software Development Lifecycle (SDLC) of SSA Windows-based production applications.

**Managed Linux Environment to the NSC.** Provides a platform for managing the Software Development Lifecycle (SDLC) of SSA Linux based production applications.

#### **Print Mail Facility:**

NCC and SSC print facilities provide approximately 23,000,000 SSN Cards and 6,000,000 notices to the public per year.

- The Kodak VL2000 is capable of printing 36,000 SSN cards per hour
- The Pitney Bowes MPS inserter is capable of inserting 15,000 cards per hour
- The Pitney Bowes FPS inserter is capable of inserting 8,000 notices per hour
- The Ricoh 4100 printer is capable of printing 20,000 notices per hour

#### **Electronic Messaging:**

- Infrastructure functions at NCC Service Delivery Point (SDP) - electronic messaging and collaborative services.
- Infrastructure functions at SSC SDP—electronic messaging and collaborative services.
- Infrastructure functions at RI SDP— electronic messaging.
- Infrastructure functions at KC SDP— electronic messaging and collaborative services.

#### **VPN/Remote Access:**

Number of VPN users: 7,500 approved users  
VPN Capacity: 10,000 concurrent connections

## Laboratory and Testing Facilities

#### **System Zero**

System Zero allows the Agency's network engineers to test and evaluate the integration of new network devices, upgrades to existing network devices, modified network configurations and the integration of new LAN/WAN services and network applications, such as voice and video.

#### **NET-F (Network Environment & Testing Facility):**

The NET-F provides testing environments for workstations, Active Directory network and enterprise servers, LAN peripherals (routers & switches), SAN access for virtual infrastructure devices, laptops, and printers.

#### **Unified Communications Lab**

Purpose is to Identify, Design, Build, and Test an IP Unified Communications infrastructure (Voice, Video, Chat, Data) for multi-modal communications with anyone, anywhere, anytime.

Provides a quantitative understanding of bandwidth requirements by utilizing call admission control, zoning and reservation systems for voice-video-data. Call admission control (CAC) provides a hierarchical mechanism for dynamic allocation of network resources.

#### **Integration Testing:**

Final integration testing and release-to-production pre-production testing facilities:

- Internet Testing Facility (9 workstations)
- Network Engineering & Testing Facility (120+ devices)
- VMware virtual environment (7 Servers, 50 TB)
- Security Testing Environment

# DISABILITY CASE MANAGER MODERNIZATION PLAN

# Good News about Important Updates to Your DCM System

Dear DCM Customer

MicroPact has some important and exciting news to share with you about planned updates to iLevy Case Tracking and VERSA CaseExpert, collectively known as Disability Case Manager (DCM). As part of our ongoing software maintenance commitment, we're ready to incrementally migrate the software you have been using to an advanced technology platform that will bring the DDS and SSA communities up to date with current enterprise software standards. Users will experience minimal disruption throughout the update, which, when completed, will result in an entirely modernized system that is more intuitive to use and less costly to maintain for decades to come. Our intent is for the update to be deployed incrementally over the next 2-3 years, but this pace can be accelerated or moderated at customer preference.

This product roadmap lays out a plan for you that is:

- **Smart.** There will be a single core system for all DDSs, which will enable us to efficiently push out both universal updates and state- and agency-specific configurations.
- **Low-risk.** You will experience a seamless, incremental update of discrete areas of functionality (hence referred to as modules) over several years, with no loss of existing functionality, no disruption in service, and no "big bang" cutover to a completely new system.
- **Low-cost.** The cost of the core modules for existing license holders is fundamentally covered under your existing software maintenance contract, with implementation costs and any unique configurations and interfaces billed separately.
- **State-of-the-art.** The new web-based technology will reduce your hardware maintenance costs and resource requirements by fully transitioning to low cost, high performance commodity infrastructure sited at a customer preferred location(s) or in the cloud.
- **Intuitive.** By preserving all existing functionality and expansion of these core features, the updated system will require minimal retraining beyond adjusting from old but familiar green screens to intuitive user interfaces.

Rationale

As you probably know, MicroPact is a major vendor in the disability case management marketplace. Forty-seven of the 54 U.S. state and territory DDSs rely on legacy MicroPact software to manage their caseloads. Currently, 30 agencies are on one platform (iLevy Case Tracking, launched in 1980), and 17 agencies are on another platform (VERSA CaseExpert, launched in 1985). Both applications are solid workhorses that have been enhanced annually to keep current with all state and federal regulations.

With the 2015 merger of Iron Data and MicroPact, iLevy and VERSA became part of a larger portfolio of case management solutions. One of the stated goals of the merger was to find opportunities to enhance our technological capabilities and offerings. DCM customers are among the first who will benefit from the ensuing analysis.

Updated Platform, Same Solution

The updated DCM COTS solution will be built on entellitrak®, MicroPact's commercial off the shelf (COTS) platform for case management and business process management (BPM). A highly

configurable platform based on open standards and open architecture, entellitrak was launched in 2006 and is used across the federal government as a case management and BPM platform of record. In 2015 IT industry analyst Gartner recognized entellitrak in its first Magic Quadrant for BPM Platform-Based Case Management Frameworks, saying that, "MicroPact entellitrak provides an open architecture platform that enables easy configuration, fast development, and low costs." All MicroPact-hosted entellitrak solutions meet the federal government's stringent FedRAMPsm requirements.

Roadmap

Your DCM update will occur as a series of stepped releases, primarily consisting of replacement modules that will plug into an enhanced version of the legacy DCM messaging service software (see illustration). Once the replacement module passes acceptance test environment (ATE), the legacy technology counterpart will be retired.

The anticipated release cadence is 1-3 releases a year, subject to change based on complexity. Additional updates required for system interoperability and to reflect changes to SSA policy, judicial rulings, or legislation will continue to be priced and delivered separately per your agency's current DCM IDIQ.

Agency-specific Considerations

No DDS is the same. The single entellitrak platform will not only facilitate delivery of universal updates tied to new SSA regulations, but it will also make it easier to configure the software based on unique state-level DDS mandates and fiscal business practices, as well as other non-SSA requirements. (For example, currently 16 DDSs use DCM for Medicaid case management. Those workflows and records will all be carried forward into the modernized system.)

Next Steps

I hope you're as excited about these coming updates as we are. In the next few weeks the MicroPact DCM Team will be reaching out to schedule a demonstration of the modernized, next generation DCM solution and to answer any questions. If you'd like to speak to someone before then, please contact Chuck Barthlow, Vice President, Disability Case Management, at 314.744.7363.

Best Regards,

*Tom*

# A Seamless Modernization

The modernization of iLevy Case Tracking and VERSA CaseExpert technologies, collectively known as Disability Case Manager (DCM), will be executed through a series of stepped releases.

Each step-over will update discrete areas of functionality, while maintaining continuous system access and service.

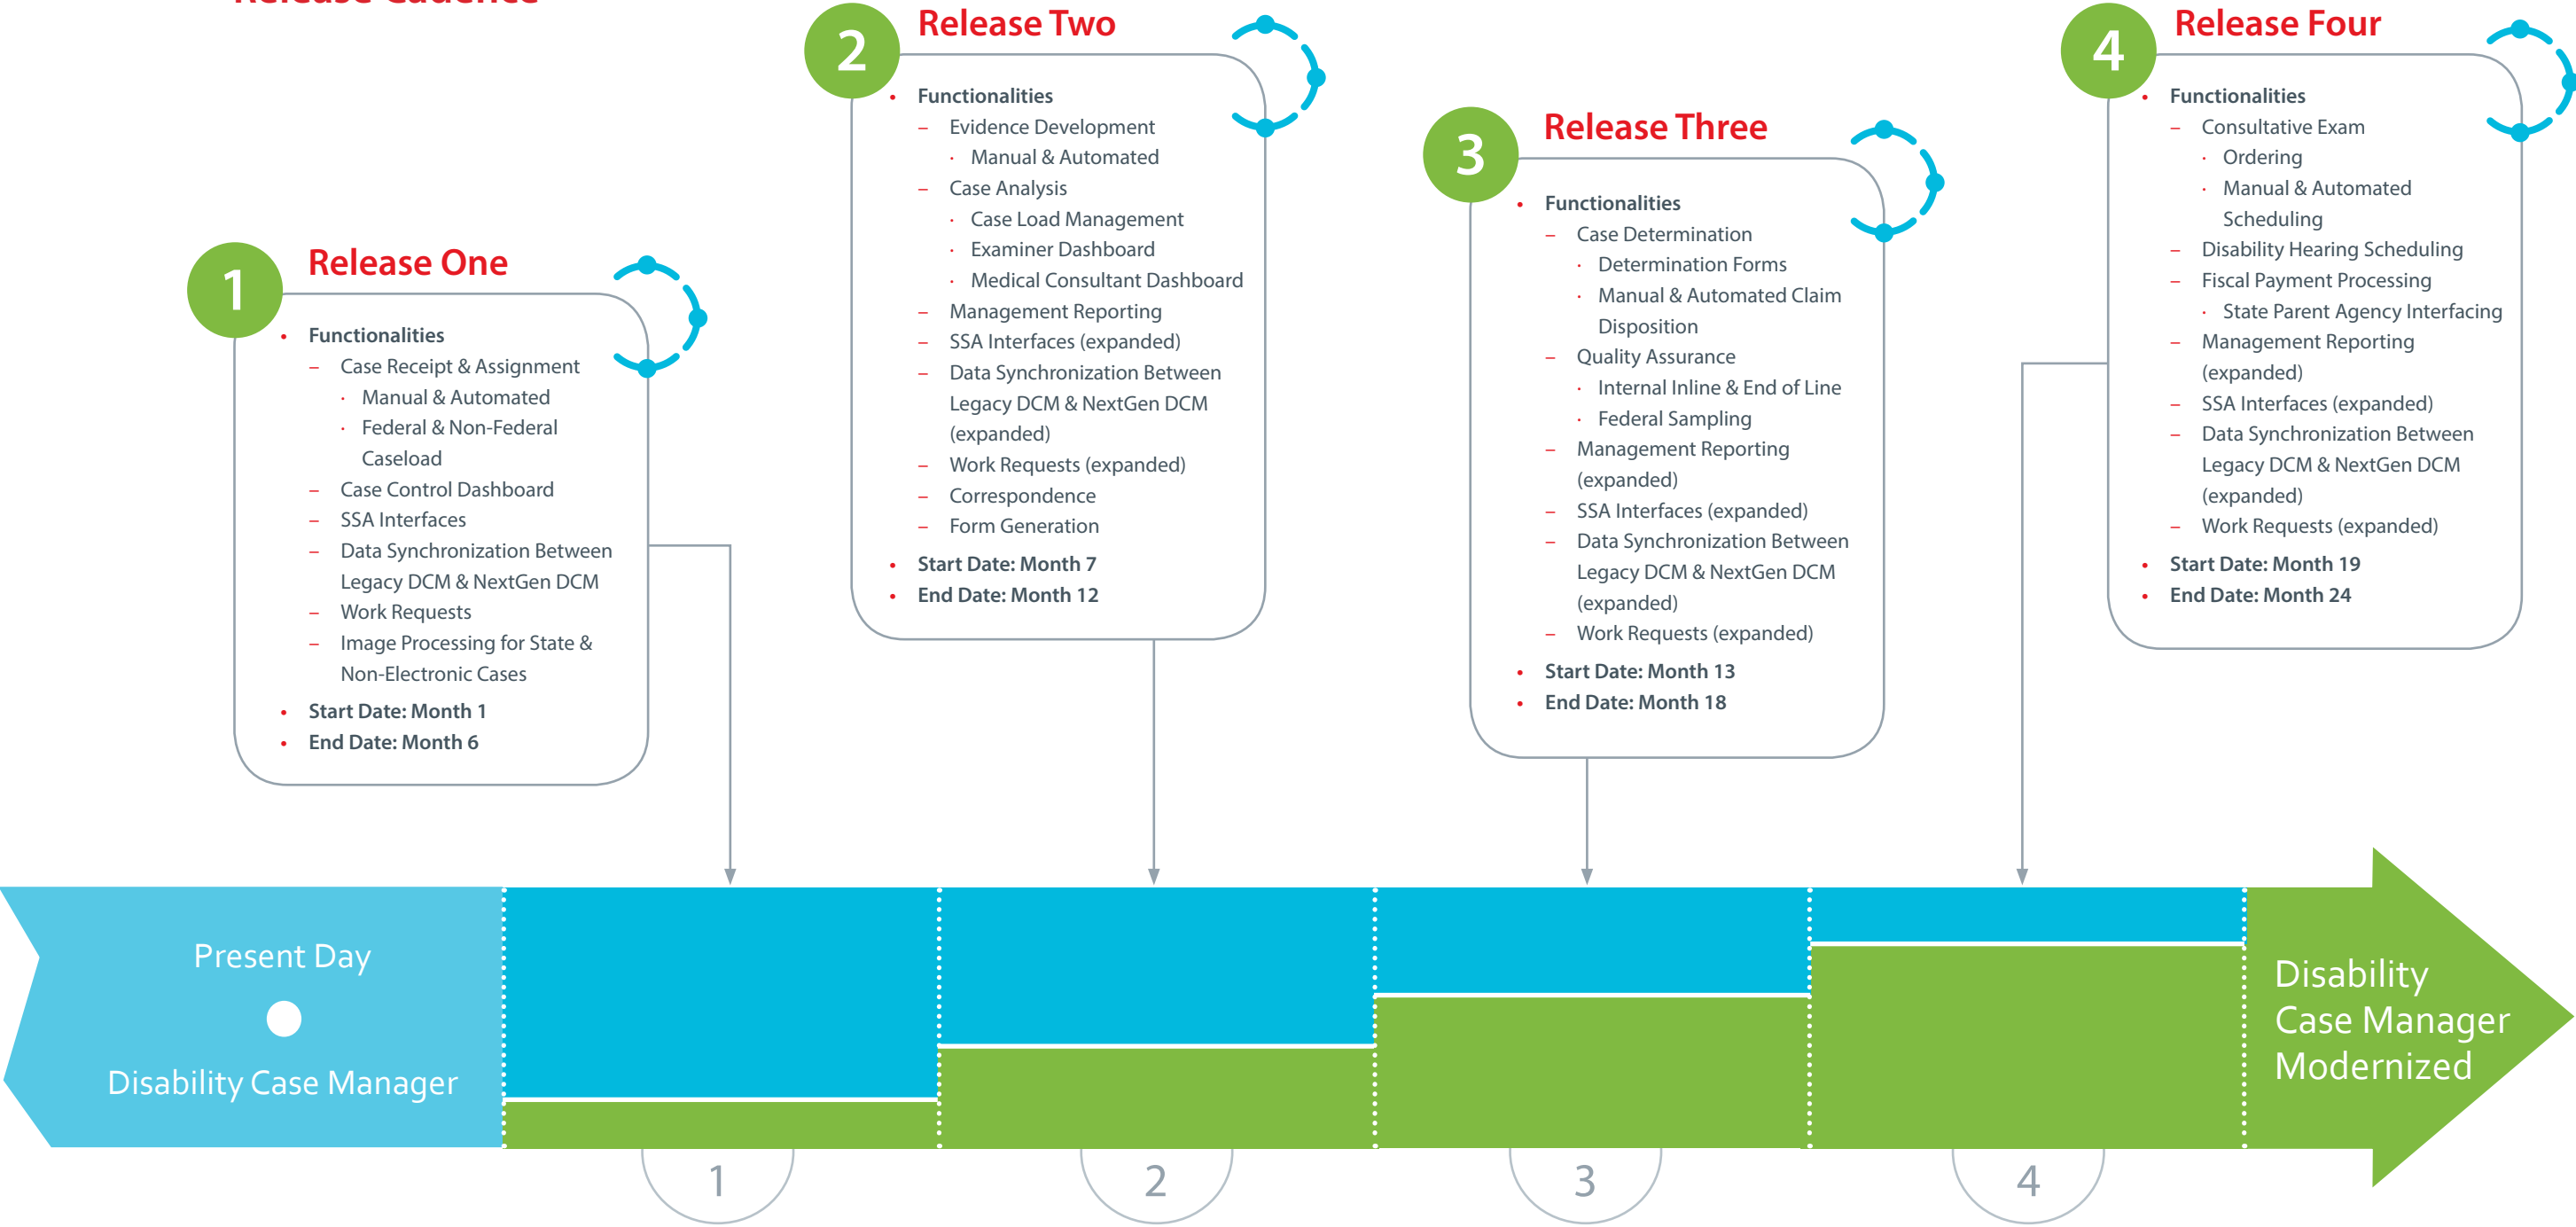

In the end the SSA and DDSs will have a single core system that can be maintained through universal updates and state- and agency-specific configurations.

# Disability Case Manager Modernization Plan

**SUBJECT:** DCM Draft Evaluation Report Comments

In November 1995 SSA and AFGE negotiated an agreement regarding the establishment of the DCM. The agreement provided that overall implementation of the plan for disability redesign is a joint labor-management initiative. Unfortunately SSA has refused to meet with the union to discuss the draft report. Throughout the redesign process SSA has always met with the union to discuss mutual concerns regarding redesign issues. The union requested three meetings with SSA to discuss the draft report, discuss the final report and meet with the Commissioner to present the results of the "joint labor-management initiative". Management has refused to schedule any meetings. This violates the spirit of the November 1995 agreement.

The parties agreed to substantive evaluation requirements:

1. Effects on Service to the Public
2. Effects on Employees
3. Program and Administrative Cost Impact
4. Program Accuracy and Timeliness Impact
5. The effect on the Efficiency of the Disability Process

Unfortunately, the Draft report indicates that the only scientific and statistically valid elements that were assessed were public service or customer satisfaction, employee satisfaction, processing time and accuracy. In all these categories the DCM pilot shows that the DCM is a success story. The Draft report authors, despite the protests of DPRT staff, attempt to minimize and denigrate the accomplishments of the DCM in these categories. The results, however, speak for themselves.

Processing time is 6 days (T-XVI) to 10 days (T-II) better for DCM cases than control cases. That means that the DCM processes cases significantly faster than the current process. In fact, average processing time was only 67 days for both T-II and T-XVI cases. According to SSA's FY 2002 Performance Plan, SSA's processing time goal for initial disability cases in FY 2002 is 120 days. That goal equals the FY 2001 target. The DCM beat this goal by 53 days! That's called incredibly better performance than SSA expectations. SSA officials should be jumping out of their shorts to try to figure out how to take advantage of this excellent DCM processing time rather than to attribute the superior performance to DDS "resources constraints" and control of leads issues. No mention was made in your analysis that DCM's were discouraged from taking unnecessary technical denial cases which are 0 day processing time cases. In the real SSA world these cases are encouraged if not required. These cases drive down overall processing time. Despite this competitive handicap, DCM's still outperformed the control group and SSA overall. When a new pilot program results in 44% better processing time than expectations without resorting to statistically manipulative procedures (i.e., technical denials), management should be working on political and logistical strategies for expanding this remarkable success story to the entire country.

Customer satisfaction surveys conducted by Office of Quality Assurance (OQA) indicate that the public prefers DCM's to customers of the current CR-DE bifurcated product. Customers prefer the single decision maker to the current pass the buck explanations of responsibility. In the DCM Draft Evaluation report, you assert that claimant satisfaction for DCM's exceeds the current process only for denied claimants. What reports were you reading? In virtually every question, customers categorized DCM's as Excellent and Very Good to a significantly greater degree than customers rated the current process. This is true for both claimants awarded benefits and claimants denied benefits. In fact, awarded disability claimants rated the DCM higher in percentage of Excellent and Very Good ratings in every single question where this choice was provided. Yet your summary states that the survey results were comparable for those who were

awarded benefits. By not stating this fact the report is shows bias against the DCM. TELL THE TRUTH.

Employee satisfaction was significantly higher for DCM's than employees who work under the current process. The satisfaction rate was eighty three percent higher in Phase 2 for DCM's in comparison to their job as CR/DE. The executive summary should categorize this as overwhelmingly greater employee satisfaction. That would be an accurate portrayal of this huge satisfaction increase. SSA failed to measure CSS job satisfaction in violation of the DCM MOU. Gratuitous remarks by biased OWA authors in Appendix VI should be stricken from the report. The remarks contained in "Caveats" and "Reactions/Conclusions" are gratuitous and not in conformance with the MOU requirements to conduct a valid employee satisfaction survey. The analysis of the narrative comments is unscientific and not valid and, therefore, violates the MOU. Strike these remarks. It is actually remarkable that there was such a high level of DCM satisfaction in view of SSA's abysmal performance on keeping DCM's informed of their fate and the fate of the DCM pilot. Also, continuing adverse remarks by high-level Agency officials about the DCM pilot still did not reduce employee satisfaction levels. In an environment where SSA must compete for workers, you appear to have stumbled on a job whose workers are uniformly satisfied with their work. This is noteworthy and deserves emphasis.

The report states that DCM statistical accuracy for disability allowances and denials was comparable to the control group. The report, however, states that DCM technical accuracy for disability allowances was significantly higher than the current process (eight.3% higher). Also, the dollar accuracy of T-II DCM cases is reported to be significantly higher than the current process. Thus, the DCM accuracy, in some respects, exceeds the current process. This isn't even mentioned in the Executive Summary despite the fact that it is one of the key evaluative elements addressed in the DCM MOU.

Thus, in categories that were measured accurately, the DCM is an overwhelming success story. The success is so dramatic, that we should be organizing parades down Security Boulevard celebrating the DCM success story. The Weasels should play and the SSA Choir should sing an ode to the DCM.

However, in the key issues of cost and productivity, the report attempts to skewer the DCM. Unfortunately, your statistics are cooked and your findings are fiction. Also, the productivity data is not valid and, therefore, violates the DCM MOU.

Section V (A) of the MOU states as follows:

In order to ensure the effectiveness of the DCM pilots, valid evaluations will be performed to assess a variety of issues including the quality of the work product, the impact of the pilot activity on employees, productivity and for continuation or expansion.

Section V (B) of the DCM MOU states as follows:

Pilot evaluation to assess productivity, processing time, and employee impact issues will be performed by the Office of Workforce Analysis.

On June eighth, 2001 I wrote a letter to Acting Commissioner Massanari objecting to SSA's productivity and cost analysis of the DCM pilot (see Enclosure 1 and its attached letter of April eighteenth regarding the DCM Shutdown). In this letter I object to specific SSA use of productivity measures that are only valid at the national level such as WUPWY, PPWY, OWA baseline Study and the CEMS. Using statistical measures that are only valid at the national level to evaluate productivity of an individual site violates the validity requirement of the MOU. I would like to incorporate all objections to SSA's methodology for determining cost and productivity that were delineated in the aforementioned letter to Mr. Massanari to these comments.

Unfortunately the June 29, 2001 response by Ms. Roecker does not substantively address any of my objections. Instead, Ms. Roecker asserts that since the union had appointed a full time DCM DPRT member that somehow allows SSA to violate the DCM MOU. I don't think so. She states that the Agency is apparently exonerated for their MOU violations due to the fact that they had AFGE input throughout Phase II. Part of this input included objections at NPC meetings to the Agency's refusal to seek professional third party independent evaluation of the DCM pilot i.e., Lewin. Unfortunately SSA decided to do an in house evaluation of the DCM. SSA used inexperienced amateurs in evaluate this important project. SSA used no professional statisticians. It shows. SSA didn't even use OWA as required by V (B) of the MOU. Why? OWA would have likely rejected measures only valid at the national level to measure local performance.

SSA's cost and productivity analysis doesn't meet fundamental requirements of accuracy and validity. Assumptions are made where facts are needed. Why didn't SSA conduct a time study to determine how much time each employee spent on each segment of DCM work? Why wasn't this compared to a control group and to the current process?

Why doesn't the Evaluation Report state that the number of Claims Support Specialists (CSSs) was not designed to be reflective of actual support needs but rather was a negotiated compromise to the DDS refusal to initiate a 750 DCM pilot as envisioned by the DCM MOU. The report should also mention that the key factor in DCM allocation to specific sites was space availability rather than program needs. Although the Executive Summary acknowledges the added cost of an excessive managerial ratio, no effort is made to estimate the cost of using a standard managerial to employee ratio. Although the report states that site coordinators and DCM's recommend substituting CSSs with clerical support, no effort is made to analyze the difference this would make in cost and productivity. Although the MOU requires an assessment of any needs for clerical and technical support, this was not done. (Simply quoting comments made by DCM's and site coordinators is not an assessment. Oh, and why didn't anyone talk to the CSSs and solicit their opinions regarding this issue?)

The report assumes State costs for personnel now and in the future without any current time studies to determine the time that state personnel spent on DCM activities. Projections of future costs were done without any assessment of State labor agreements, inflationary projections, or any review of state personnel rules.

Gratuitous statements are made in the Report about training costs without any analysis of the current cost for training CRs and DEs and comparing it to future costs using similar training methodologies.

The report should include alternative cost analysis of the DCM cost without CSS technical support and with reduced managerial ratios. Unfortunately the findings of such an analysis would suffer from the same criticism of the report's invalid cost and productivity findings.

The worst abuse is the attempt to saddle the DCM with higher program costs by asserting that significantly more DCM claimants filed for Reconsideration and the cumulative allowance rate for DCMs was statistically significant. This finding is completely irresponsible, violates the MOU and is a blatant attempt to portray the DCM pilot as more costly program wise. Such an impression is completely false. The Agency admits in the Summary that allowance rate projections are premature until sufficient case volumes are processed to final appeal. Even the Reconsideration data is incomplete since many Reconsideration cases are still pending. Referencing these invalid statistics violates the DCM MOU.

The reference to Prototypes constitutes more selective data. The Executive Summary compares DCM performance to control group performance in prototype

states. It concludes that there were no marked differences in accuracy, processing time and initial allowance rates. Perhaps the report should compare the strikingly superior customer satisfaction for the DCM as compared to the Prototype. This data shows the following:

**Customer Service Comparison – DCM/Prototype  
(Excellent/Very Good Responses)**

<b>Question</b>	<b>DCM</b>	<b>Prototype</b>
Adjudicator Explained Rules/Requirements – claim allowed	74%	46%
Adjudicator Explained Rules/Requirements – claim denied	41%	27-35%
Adjudicator Caring/Helpful – claim allowed	87%	59%
Adjudicator Caring/Helpful - claim denied	60%	38%
Adjudicator Courteous/Respectful - claim allowed	87%	67%
Adjudicator Courteous/Respectful - claim denied	65%	53%
Adjudicator Job Knowledge – claim allowed	85%	64%
Adjudicator Job Knowledge - claim denied	64%	42-60%
Amount of Time Spent with Claimant – claim allowed	78%	58%
Amount of Time Spent with Claimant - claim denied	49%	33%
How Long it Took to handle application – claim allowed	58%	40%
How Long it Took to handle application - claim denied	23%	18%
Clear Notice With Reason – claim allowed	69%	41%
Clear Notice With Reason - claim denied	21%	20%
Overall Service – claim allowed	79%	47%
Overall Service - claim denied	25%	25%

Wouldn't an accurate analysis of the DCM in comparison to Prototypes include the finding that the public prefers the DCM to a substantial degree?

Another problem with SSA's assessment of productivity and cost is the inclusion of backfilled DCMs in the statistical data. This was done despite an agreement at an NPC meeting that backfilled DCM performance would not be used in the DCM evaluation process. Unfortunately SSA has violated this commitment. Thus, all productivity data is of questionable value.

In conclusion, the valid measurements addressed in the DCM pilot Draft Evaluation Report show the DCM to exceed or match control groups and the

current process. Invalid measures such as productivity and cost should be excluded from the report due to their questionable accuracy and value. The bottom line is that the DCM is a success.

The report fails to take the next step and recommend the role of DCM in the future. The attempt to assess environmental fit falls short of being a useful tool to address the future need for a single disability decision maker in SSA field offices. The report should conclude that since the customers appear to want DCM service, SSA ought to provide it. All valid measures show that the DCM pilot experience matches or exceeds current service levels, often to a substantial degree. If there are barriers to roll out or further study, the report should propose methodologies to overcome those barriers.

If legislative change is necessary to permit SSA workers to make disability decisions, the report should recommend that the Commissioner propose such legislation. If lobbying and jawboning the States to accept SSA disability decision-making is a potential roll out strategy, such a proposal should be offered for the Commissioner's consideration. If further piloting is necessary to assess cost and productivity in a valid manner, the report should contain proposals for such further piloting.

It's the union's view that the DCM is a success story and needs a joint union management devised roll out strategy. Such a multifaceted approach would include further study of cost and productivity, legislative strategy to expand disability decision making to SSA workers, and adding states and facilities to the DCM environment in a reasonable roll out strategy. All roll out initiatives should contain the ability for the parties to continue to review the DCM experience and adjust mutual goals and targets if necessary.

Such a strategy should be the focus of the Evaluation Report. It needs to be rewritten to reflect the positive successes of the DCM pilot. Speculation, guesswork and invalid data should be discarded. The prior DPRT team should be reassembled to write an accurate report. It would be a shame if this successful pilot were shelved due to SSA's reluctance to stand up for what is needed- better customer service. Let's restore SSA to the status of a model Agency. The American public deserves it.

**Disability Claims Manager (DCM) -- Was it a Success or Failure?**

Acting Commissioner Larry G. Massanari announced on October 22, 2001 "after much consideration, I have decided the Agency should not pursue further testing or implementation of the DCM position". This decision, announced early on a Monday morning, followed the release of the Final DCM Evaluation Report on October 19, 2001.

This decision was foreseeable in January 1999, when Sue Roecker, now Acting Director of the Office of Strategic Management, stated that the DCM is "better government than we can afford". This comment was made despite the fact that the Phase 1 pilot results indicated that the DCM was a screaming success. In the ensuing months, proponents of DCM were shut out of the evaluation process, and AFGE was dismissed from the DCM team at the first draft of the final evaluation on June 29, 2001. Acting Commissioner Massanari refused to meet with the Union regarding the draft results before the final evaluation, despite the Union's involvement in the DCM project since its inception. SSA management also denied Union requests for copies of comments by stakeholders regarding the draft report. The result was that the evaluation was written in secret with no oversight. Finally, the DCM report was issued without a validated measure of productivity or cost despite SSA's signed agreement that only valid results would be considered in the DCM Evaluation.

**What is "Better Government Than We Can Afford"?**

The DCM Evaluation did not attempt to measure the qualitative improvement in the life of a seriously and even terminally ill applicant who received compassionate and knowledgeable service and a speedy decision from a DCM. The evaluation cannot hide the fact that service to the public was greatly improved during the DCM process, because decisions were comparably accurate and made measurably faster than in the current process. In heavily impacted states, the DCMs made decisions 2-4 months faster! The FY 2000 processing time goal for initial disability claims is 120 days. The DCM overall processing time was 67 days. This stellar performance is exactly the answer to public and Congressional demands to streamline the disability process.

Acting Commissioner Massanari stated, "Test results were mixed". The DCM results are exactly the right mix! The public was highly satisfied, and even denied claimants cited superior customer service in every surveyed category. Eighty-seven percent (87%) of the DCMs reported higher job satisfaction than being limited to their former Claims Representative or Disability Examiner duties.

The real reason for SSA's rejection of the DCM is pressure exerted by the National Council of State DDS Directors (NCDDD), which is opposed to this proven customer-friendly initiative. It is evident that the DCM pilot was terminated for political reasons rather than on meritorious grounds. SSA is unwilling to support good government if it disrupts the status quo.

In October 1999, SSA rolled out a Prototype process in ten states without preliminary testing. States involved in this initiative eliminated the Reconsideration step of a denied disability claim and substituted a claimant conference. Without measures of the productivity and administrative cost of the Prototype, SSA is forging ahead. Projected cost savings have not been achieved by SSA. Why is this project continuing despite lackluster results?

An analysis prepared by AFGE comparing the customer service surveys of DCM vs. Prototype reveals much higher customer service ratings in all categories by the DCMs.

### **Where Do We Go From Here?**

The underlying problems in the disability program, which led to the testing of a DCM solution, have not diminished, but are worsening year after year. Both the U. S. Congress and the Social Security Advisory Board (SSAB) have advised SSA that over the past decade that the disability program is a train wreck waiting to happen. The SSAB less than a year ago noted, "long-standing problems are growing more acute and new ones are emerging" in serving disabled Americans. About two thirds of the SSA budget, nearly \$5 billion, was spent on disability work in 2001. As baby boomers age, the economy worsens and unemployment rises, the growth in disability claims will accelerate.

Many states are overwhelmed with the current volume of disability work, which will only increase. It is predictable that more and more states will require the assistance of trained field office employees in handling medical portions of the disability workload to adequately serve the American public.

There is a vital role for SSA field office employees trained in making disability determinations in our community based field offices. This will result in an improvement in public service; faster disability decisions and a streamlined process. SSA has been hypocritical by promoting a Service Vision empowering employees, while insisting that an improved medical form (3368) is all that is required. SSA is paying lip service to the substantive successes of the DCM by relegating future development to "local and regional service improvement initiatives." When will SSA pay their field office employees commensurate with their talent and performance? The DCM is a GS 12 position offering an opportunity for SSA field office employees to add value to the disability program.

The real tragedy is the failure of SSA management to acknowledge the talents of field operations employees who showed that they could provide one stop disability customer service. The DCMs provided vastly improved customer service, faster, with comparable accuracy and productivity. Another tragedy is SSA's failure to provide the one stop disability service that the public demands. SSA's rejection of the DCM is a decision to provide the public with substandard disability service.

Perhaps newly confirmed Commissioner Barnhart will have a different attitude regarding better disability customer service. Perhaps Congress and the American public will demand a DCM roll out. The Union will continue to work to achieve this disability process and higher graded jobs for field operations workers.

**Final Rule:**  
**"Revisions to Rules Regarding the Evaluation of Medical Evidence"**

Summary of the Treating Source Rule:

- Since 1991, the treating source (physician) rule required adjudicators to give controlling weight, under certain circumstances, to a treating source's medical opinion about how a claimant's impairment affects his or her physical or mental abilities. The treating source rule reflected healthcare practice of the era—in other words, medical care provided by one physician over a lengthy period.

Reasons to Revise the Treating Source Rule:

- Since we implemented the treating source rule, healthcare delivery has changed substantially. Many individuals now receive health care from multiple medical sources, such as from coordinated and managed care organizations, instead of from one treating source.
- The complexity of the current treating source rule, including the articulation requirements associated with the rule, has caused the rule to be one of the most common causes of Federal court remands in our disability litigation cases. Moreover, while courts in most circuits typically remand claims to us for further adjudication when they find we erred in our evaluation of treating source opinions, the Ninth Circuit uses a "credit-as-true" rule, which sometimes results in it ordering us to award benefits instead of remanding cases. Application of the credit-as-true rule prevents us from reconsidering the evidence in the record as a whole and correcting any errors that may exist, effectively supplanting the judgment of our decision makers.
- There has been some Congressional concern that the treating source rule can be abused to bind adjudicators in how they view a claimant's medical conditions. In particular, Senator James Lankford has expressed concern that attorneys and other professional advocates manipulate the treating source rule to obtain benefits for claimants who are not truly disabled. He has requested that SSA revise the treating source rule to allow ALJs to consider all relevant medical opinions.

Summary of the Final Rule:

- The final rule would eliminate requiring our adjudicators to give controlling weight to treating source opinions. The final rule would replace our current treating source opinion rule with a policy that reflects modern healthcare delivery, emphasizes the record as a whole, and values the factors of consistency and supportability over the status of the medical source.
- The final rule also would expand the list of "acceptable medical sources." Under the final rule, acceptable medical sources would include licensed advanced practice registered nurses, licensed audiologists, and physician assistants. These sources are used

to establish or verify the existence of a medical impairment. (Adjudicators, however, must weigh whether the impairment(s) is disabling.)

#### Advantages of the Final Rule:

- The final rule reflects changes in the national healthcare workforce (as well as how individuals currently receive primary medical care), and ensures that we continue to make accurate and consistent determinations and decisions.
- The final rule maintains our focus on policy that supports modern healthcare delivery and continues our practice of consistent, timely, and evidence-based decisionmaking.
- The final rule would provide trust fund and administrative cost savings. We estimate that the final rule will save roughly \$630 million in program benefits and \$295 million in administrative costs over a 10-year period (fiscal years 2017 to 2026).

#### Congressional Response to the Treating Source Rule:

- During the passage of the *Bipartisan Budget Act of 2015*, Senator Lankford introduced an amendment to that bill that, while rejected by the Senate, would have made significant changes to the disability programs. The proposed changes would have eliminated *controlling* weight for treating source opinions (but treating sources could still receive *greater* weight than non-treating sources). In this respect, Senator Lankford's proposed amendment was similar to the changes in this final rule.
- During the comment period for the NPRM, we received a letter from the ranking members of our authorizing full committees (and their relevant subcommittees) and appropriating subcommittees that asked us to withdraw the proposed changes to the way we consider opinion evidence provided by claimants' treating sources. The ranking members recommended that we focus on increased training and compliance with existing policy, and add clarifications where necessary, rather than abandon the policy itself.

**List of any pending regulations to be published in the Federal Register**

**Prepared by OLCA**

**December 23, 2016**

We have no regulations scheduled for publication in the Federal Register at this time.

There are two regulations under review at OMB (reginfo.gov), but we cannot anticipate if or when OMB will conclude review and approve them for publication. The two regulations are:

- "Revisions to Rules of Conduct and Standards of Responsibility for Appointed Representatives"
- "Revisions to Rules Regarding the Evaluation of Medical Evidence"

Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.

**Social Security Administration**  
**Social Security Disability and Health Information Technology – December 5, 2016**

**EXECUTIVE SUMMARY:**

Serving the public through a stronger, more responsive disability program by maximizing efficiencies throughout the disability program is a strategic goal and agency commitment. Part of this goal is leveraging the availability of electronic medical records with user-enhancements, such as standard content organization and decision-support, to serve our claimants through more timely and accurate disability determinations. Doing so also improves program effectiveness and efficiency; thus, helping to process the Disability Determination Services (DDS) and Office of Disability Adjudication and Review (ODAR) workloads more accurately and timely, and reducing the number of pending claims by facilitating a complete record at the initial claims level. SSA is a leading federal agency in the Health Information Technology (Health IT) industry—ensuring our content and system requirements are included in the industry standards.

Currently, information obtained from health IT represents 11.23 percentage of the medical evidence in SSA disability claims. Our main challenge to the rate of growth is the availability of sufficient resources with Health IT knowledge and experience to bring on new providers and to ensure that newly forming exchange networks incorporate our requirements in their standards. Failure to seize the opportunities at hand to on-board providers and to drive standards may put the agency in a position where we are unable to obtain the necessary medical evidence needed to make decisions. For example, once standards are developed, the industry may not tailor their requirements to meet our needs. Further, providers who exchange information electronically eliminate the infrastructure necessary to support the current manual process. Therefore, sufficient and sustained investment in Health IT is essential to our ability to serve individuals with a disability through a strong and responsive disability program.

**BUSINESS NEED:**

Medical records are key to making disability determinations. Currently, most of the medical records that SSA receives are in the form of mailed, faxed, and/or scanned images of paper. Requesting and waiting to receive the medical records required to evaluate disability is often the most time consuming part of the disability determination process—often taking weeks to months. In FY2016, SSA received about 15M pieces of medical evidence records (MER) and paid for 2.3M Consultative Exam (CE) reports. Collectively, this represents ~543M pages of medical documentation that DDS and Hearing Office resources need to review. Under the non-Health IT process, each one of these medical records were converted to TIF image documents before storing in the respective claimant's Electronic Folder (EF); thus, limiting the ability to readily search the documentation, conduct data analytics, and introduce decision support.

**HEALTH IT POTENTIAL:**

SSA has been sponsoring an ongoing, multi-year effort to leverage the healthcare industry's move to electronic medical records (EMR) since 2007. Health IT supports health information management across computerized systems and the secure exchange of health information between consumers, providers, and payers. Access to electronic medical records allows our adjudicators and decision-makers the ability to reduce the amount of days it takes to receive medical records. Natural Language Processing (NLP) offers the opportunity to extract clinical information (e.g. diagnoses, procedures, lab results) from these documents. Using these industry and technological advancements, we have developed software, Medical Evidence Gathering and Analysis through Health IT (MEGAHIT), and used it to enhance decision support for the past seven years. MEGAHit automates the request and receipt of EMRs, displays the information in a consistent format, automates the fiscal process, and is able to perform decision support based on the

**Social Security Administration**  
**Social Security Disability and Health Information Technology – December 5, 2016**

standardized codified information contained therein—currently 6 percent of health IT cases in FY16 include decision support. Our vision is to increase the amount of medical evidence obtained through Health IT (and other electronic venues), and the amount of decision support, until this is our primary way to conduct business. In this manner, an adjudicator and decision-maker will have all of the medical evidence and policy guidance needed to decide a case when they first open it—resulting in more timely and accurate disability determinations for individuals with a disability.

**BENEFITS:**

**Benefits to the Public:**

- Faster and more consistent disability decisions
- Quicker access to monthly cash benefits
- Earlier access to medical insurance coverage
- Fewer consultative examinations
- Reduced burden to provide medical record

**Health IT Benefits to the Social Security Disability Determination Process:**

- **Improves how we collect and use medical information** - Fully automates the request and receipt process and gives adjudicators access to medical records within seconds of transmitting the request as opposed to days and weeks
- **Provides decision support through use of business rules** - Automatically alerts adjudicators to key findings within the record that could result in an allowance
- **Enables more efficient processing of medical evidence** - Allows adjudicators to easily navigate the record and quickly identify significant or missing medical information
- **Reduces disability determination case processing time** – In FY 16, initial cases with health IT sources processed 10% (9 days) faster than other cases; initial cases with only health IT processed 49% (43 days) faster

**Health Care Provider Benefits:**

- Reduced administrative cost and labor to pull records
- Reduced uncompensated care faster for disability and patient access quicker to Medicare/Medicaid benefits
- Increased revenue due to the ability to respond to greater number of requests and records
- Automated payments from SSA
- Increased patient satisfaction

**COST BENEFIT ANALYSIS:**

Benefit Factor	FY2017	FY2018	FY2019	FY2020	FY2021	Total
Cost Savings	\$ 8,465,714	\$ 12,787,783	\$ 22,698,196	\$ 44,659,913	\$ 51,081,814	\$ 139,693,420
Cost Avoidance	\$ 9,478,184	\$ 13,380,965	\$ 22,301,609	\$ 41,815,517	\$ 47,390,919	\$ 134,367,194
Total	\$ 17,943,898	\$ 26,168,748	\$ 44,999,805	\$ 86,475,430	\$ 98,472,733	\$ 274,060,614

**Social Security Administration**  
**Social Security Disability and Health Information Technology – December 5, 2016**

**RETURN ON INVESTMENT: NPV: \$236,758,843; ROI: 512%**

CBA Factor	FY2017	FY2018	FY2019	FY2020	FY2021	Total
Costs	\$ 8,701,098	\$ 7,118,932	\$ 6,354,603	\$ 6,048,390	\$ 5,323,787	\$ 33,546,810
Benefits	\$ 17,943,898	\$ 26,168,748	\$ 44,999,805	\$ 86,475,430	\$ 98,472,733	\$ 274,060,614
Net Benefits	\$ 9,242,800	\$ 19,049,816	\$ 38,645,202	\$ 80,427,040	\$ 93,148,946	\$ 240,513,804

**STATUS:**

From project inception to date, SSA has established working relationships with 57 health care organizations, representing 7,288 health care providers, to automate the request and receipt of EMRs for disability claimants. Currently over 11.23% of all initial disability claims contain medical evidence received via the automated Health IT process received over the “eHealth Exchange” network. The eHealth Exchange network is a community of partners who share health information under a common trust framework and a common set of rules. SSA was the first participant when eHealth Exchange (formerly known as NwHIN) began operating in 2009. As of November 2016, the eHealth Exchange has more than 140 participating organizations, sharing health data for more than 100 million patients. Participants include four federal agencies, approximately 50% of US hospitals, 26,000 medical groups, 3,400 dialysis centers, and 8,300 pharmacies.

SSA has been an active participant and collaborator with the Office of the National Coordinator’s Federal Health Architecture Boards, as well as, government-wide health IT policy and standards advisory panels, and workgroups. These collaborations bring together Federal, State, and private sector organizations to work toward the common goal of wide spread interoperability of health care records. We participate in these committees to ensure that Social Security’s unique business needs are met. Currently, we are in active discussions with the two new networks that are joining eHealth Exchange on the information exchange highway—CareQuality and Commonwealth. Together, these three networks will cover the majority of the health care facilities and providers—large and small alike.

**FY17 FUNDING REQUEST:**

To support Health IT efforts, we requested and received \$33.5 million over the course of FYs 17-21 to support:

- 5-year funding for Health IT Program Support
  - MEGAHIT Enhancements
  - Industry Standards and Collaboration
  - Obtaining Medical Evidence of Record (MER)
- 5-year funding for Open Source Language & Computing
- 1-year funding for Planning & Analysis to update our market research into technology that enables technicians to search, filter, link, and organize medical information

**Social Security Administration**  
**Social Security Disability and Health Information Technology – December 5, 2016**

This level of funding will increase the percentage of information received through HIT but will not realize the full potential of Health IT and our vision without further investment and accelerated growth.

Current Status – 57 organizations with 7,288 participating providers in 49 States, DC, Guam, and Puerto Rico

FY17 Percent of Initial Level Closed Cases with Health IT MER (as of 11/25/16): 11.23%

FY17 Agency Tracking Report target through November 2016: 9.89%

1.34%

#### Assumptions:

- Dynamic market forces (e.g. mergers, acquisitions, financial sustainability, and changes in business relationships) may cause some of our Exchange partners to become inactive
- Actual volumes for in-production partners are based on the EMIS Health IT Dashboard

11/28/2016

## SSA Health IT At-A-Glance – FY17 (as of November 25, 2016)

<b>Partners</b>	<b>7,288</b> health IT providers* within <b>57</b> organizations
<b>States with Providers</b>	<b>49</b> (AK, AL, AR, AZ, CA, CO, CT, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NM, NJ, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, WA, WI, WV, WY) plus DC, Guam, and Puerto Rico
<b>Case Processing Time</b>	<b>FY 2016:</b> <ul style="list-style-type: none"> <li>➤ Cases with health IT sources processed <b>10.2% (9 days)</b> faster than other initial cases</li> <li>➤ Cases with only health IT sources processed <b>48.9% (43 days)</b> faster than all other initial cases</li> </ul> <b>November 2017:</b> <ul style="list-style-type: none"> <li>➤ Cases with health IT sources processed <b>10.5% (9 days)</b> faster than other initial cases</li> <li>➤ Cases with only health IT sources processed <b>51.2% (44 days)</b> faster than other initial cases</li> </ul>
<b>FY 2017 Performance Measure Results (3.2a)</b>	Improve the disability determination process by increasing the percentage of initial disability claims with health IT medical evidence – FY16 goal is <b>12%</b> <ul style="list-style-type: none"> <li>➤ November goal – <b>9.89%</b></li> <li>➤ Actual to date – <b>11.23%</b></li> </ul>
<b>Medical Evidence of Record (MER) Volume</b>	<ul style="list-style-type: none"> <li>➤ <b>38,660</b> MER received via health IT for the month of November</li> <li>➤ <b>77,688</b> MER received via health IT for FY 17 (through November)</li> <li>➤ <b>461,219</b> MER received via health IT for FY16, which is <b>55%</b> more than FY15</li> </ul> <i>Note: One health IT MER request may collect information from more than one source identified by claimant</i>
<b>Newest Partners</b>	Dean Clinic (September), Kadlec Regional Medical Center (September), Department of Veterans Affairs pilot (October), Contra Costa Health Services (November), UnityPoint Health (November)
<b>Outreach</b>	We plan to continue our expansion of health IT partners with new high volume organizations as well as additional facilities with existing partners. Current outreach status: <ul style="list-style-type: none"> <li>➤ <b>13</b> healthcare organizations in various stages of active on-boarding</li> <li>➤ <b>8</b> current partner facility expansions</li> <li>➤ In discussions with <b>106</b> healthcare organizations</li> <li>➤ Working with <b>15</b> healthcare system vendors to include SSA requirements</li> </ul>
<b>Interesting Fact</b>	On <b>November 9<sup>th</sup></b> , SSA and the Department of Veterans Affairs (VA) made a joint announcement regarding health IT interoperability. <ul style="list-style-type: none"> <li>➤ Virginia Reno, Deputy Commissioner of Retirement and Disability Policy, participated in a joint presentation with Dr. David Shulkin (Under Secretary for Health) and Robert Reynolds (Deputy Under Secretary for Disability Assistance, Veterans Benefits Administration)               <ul style="list-style-type: none"> <li>○ Audience included Veteran Service Organization (VSO) Executive Directors</li> <li>○ Attendees included Systems, ORDP, OCOMM, and OLCA</li> </ul> </li> <li>➤ Both SSA and VA issued Press Releases:               <ul style="list-style-type: none"> <li>○ SSA - <a href="https://www.ssa.gov/news/press/releases/#/post/11-2016-1">https://www.ssa.gov/news/press/releases/#/post/11-2016-1</a></li> <li>○ VA - <a href="http://www.va.gov/opa/pressrel/pressrelease.cfm?id=2831">http://www.va.gov/opa/pressrel/pressrelease.cfm?id=2831</a></li> </ul> </li> </ul>

## **A MESSAGE FROM THE ACTING COMMISSIONER**

As the Acting Commissioner, it is rewarding to know that our services continue to play a critical role in the lives of millions of people. We are the face of the Federal Government for many, and over the past eight decades, generations of Americans have relied on our programs and compassionate employees to help them navigate through life's personal challenges and during times of change. Today, over 65,000 dedicated Social Security employees make up our great agency and provide exemplary service to the public. Thanks to these dedicated employees, America's hardworking citizens, and support from the Administration and the Congress, Social Security will continue to provide an economic safety net that has kept millions of our citizens from indigence in their old age and disability-prone years.

While we have endured funding constraints, sequestration, and a Government shutdown at the beginning of this decade, the funding we received for fiscal years (FY) 2014 and 2015 provided much-needed relief and allowed for critical service improvements. Our current state of service remains fragile, though, as the demands of balancing service and stewardship responsibilities continue to strain our resources. Our FY 2016 budget will not allow us to sustain our recent gains, unfortunately, as the FY 2016 funding level does not cover all inflationary growth in our fixed costs (e.g. payroll, benefits, guard services, and rent). The FY 2017 President's Budget of \$13.067 billion will keep us on the right path. While we continue to look for efficiencies and ways to work better and smarter, especially in light of our service challenges, it is essential that we receive the full budget request to ensure our ability to execute critical service delivery efforts, modernize our IT infrastructure, and expedite implementation of important SSA provisions in the Bipartisan Budget Act (BBA) of 2015.

The FY 2017 President's Budget will allow us to balance our important service and stewardship work, and address the critical agency priorities outlined in Vision 2025. Specifically, we will execute our Compassionate and Responsive Services (CARES) plan, a multiyear plan to eliminate the hearings backlog; implement many of the provisions in the BBA; significantly increase our cost-effective program integrity work; reduce National 800 Number wait times; and invest in our IT infrastructure.

The FY 2017 President's Budget will fully fund administrative law judge (ALJ) and support staff hiring to implement our CARES plan to tackle our hearings backlog. With sustained funding, our goal is to get to a 270-day hearings wait time by FY 2020, down from over 500 days today. Our plan, which is built on people and quality, combines a number of immediate, tactical, and strategic initiatives to increase hearings adjudication and disposition capacity, improve ALJ support and staff efficiency, and strengthen personnel oversight and policy compliance without sacrificing our commitment to quality.

Vision 2025, our long-range strategic plan, is shaping the future of Social Security service delivery and will provide a framework to tackle our current challenges. With full funding of the FY 2017 President's Budget request, we can ensure high-quality service and address the critical agency priorities outlined in Vision 2025.

**Providing a Superior Customer Experience:** We are committed to providing superior customer service, whether it is in-person, online, or on the telephone. Starting with our direct service areas, we are focused on providing relief to our frontline staff by expanding our use of alternate service delivery methods. We are also leveraging increased demand for our online services to allow for additional flexibility in our field offices.

**Supporting Our Exceptional Employees:** We are focused on attracting, training, and retaining employees who can provide superior service to the public now and in the future. With nearly 20 percent of our workforce currently eligible for retirement, employee development and engagement, and improving succession management are critical priorities for our agency. We will equip our employees with the skills and tools they need to do their jobs more efficiently by providing training opportunities and investing in technology.

**Moving forward as an Innovative Organization:** We are committed to accelerating our use of data-driven decisions to improve processes and deliver faster and more accurate service to our customers. In addition, we will provide greater oversight and project management expertise to increase the success of mission-critical projects. We will also begin the process of modernizing our IT to bring our legacy systems up to current standards.

**Enhancing Program Integrity:** We continue to increase our efforts to reduce improper payments and to combat fraud, waste, and abuse. In FY 2015, we expanded to 36 Cooperative Disability Investigation (CDI) units across 31 States and the Commonwealth of Puerto Rico, and our Budget request will allow us to continue to expand these important anti-fraud units. We will harness the benefits of data analytics to guard against new and developing fraud schemes. In addition, we propose to process more than one million full medical continuing disability reviews (CDR) in FY 2017, which will save billions of taxpayer dollars and allow us to achieve CDR currency by the end of FY 2019.

Our FY 2017 budget is pivotal to strengthening the tenuous state of our services and positioning the agency for the future. With the requested funding, we can move forward on a path to providing quality services and position the agency to best serve the public both now and in the future.

Carolyn W. Colvin  
Acting Commissioner

## OUR PROGRAMS

Whether it is after the loss of a loved one, at the onset of disability, or during the transition from work to retirement, we touch the life of virtually every person in America. We administer three key programs that serve the public.

- Old-Age and Survivors Insurance: Created in 1935, the Old-Age and Survivors Insurance (OASI) program provides retirement and survivors benefits to qualified workers and their family members. In FY 2017, we will pay a total of about \$813 billion in OASI benefits to a monthly average of approximately 52 million beneficiaries, including 89 percent of the population aged 65 and over.
- Disability Insurance: Established in 1956, the Disability Insurance (DI) program provides benefits for disabled workers and their families. In FY 2017, we will pay a total of about \$149 billion in DI benefits to a monthly average of approximately 11 million disabled workers and their family members per month.
- Supplemental Security Income: Established in 1972, the Supplemental Security Income (SSI) program provides financial support to aged, blind, and disabled adults and children who have limited income and resources. In FY 2017, we will pay a total of nearly \$59 billion in Federal benefits and State supplementary payments to a monthly average of approximately 8.4 million recipients.

We also increasingly contribute in important ways to furthering other national priorities, including activities related to: the Employees Retirement Income Security Act of 1974, the Coal Act, Supplemental Nutrition Assistance Program (formerly Food Stamps), Social Security Number (SSN) verifications for a wide-range of non-SSA program purposes, the Help America Vote Act, the State Children's Health Insurance Program, and Federal Benefits for Veterans.

Our ongoing workloads include the following:

- Claims: We take claims, evaluate evidence, and determine benefit eligibility and payment amounts. In FY 2017, we will handle over 5.7 million retirement, survivors, and Medicare claims; over 2.8 million Social Security and SSI initial disability claims; and nearly 216,000 SSI aged claims.
- Appeals: We have three levels of administrative appeals for claimants who disagree with our decisions:
  - 1) Reconsideration, which entails a complete review of the claim by an employee who did not take part in the initial determination;
  - 2) Hearing before an ALJ; and
  - 3) Request for review by the Appeals Council. If a claimant disagrees with the Appeals Council's decision or if the Appeals Council decides not to review the case, a claimant may file a lawsuit in a Federal district court.

In FY 2017, we will complete approximately 715,000 reconsiderations, 784,000 hearings, and 140,000 Appeals Council reviews.

- Program Integrity: Our stewardship responsibility includes conducting non-medical SSI redeterminations and full medical CDRs. These reviews save significant program dollars by avoiding improper payments. In FY 2017, we will conduct 2.822 million SSI redeterminations and 1.1 million full medical CDRs.
- Social Security Numbers: We complete applications for and assign SSNs to all Americans. In FY 2017, we will complete requests for approximately 16 million new and replacement Social Security cards.
- Earnings Records: We receive regular updates from employers on the earnings of the working population. We post the reported earnings to workers' records. We link these earnings records to the appropriate workers' SSN and resolve any discrepancies. In FY 2017, we will post 265 million earnings items to workers' records.
- Social Security Statements: We provide information on earnings as well as estimates of future benefits workers and their families may receive based on those earnings. We will process 44 million paper Social Security Statements in FY 2017 in accordance with our plan to mail a paper statement to workers attaining ages 25, 30, 35, 40, 45, 50, 55, and 60 and older who are not receiving Social Security benefits and who are not registered for [my Social Security](#). Individuals may access their Social Security Statement at any time through their personal online [my Social Security](#) account.
- Services After Individuals Become Eligible for Benefits: In FY 2017, we will complete more than 100 million post-entitlement actions for beneficiaries, including issuing emergency payments, recomputing payments, and completing address and status changes.
- Medicare Administration Assistance: For over four decades, we have assisted the Centers for Medicare and Medicaid Services in administering the Medicare Hospital Insurance and Supplementary Medical Insurance programs. In addition to determining Medicare eligibility, in FY 2017, we will handle about 1 million Medicare prescription drug subsidy applications.
- Data Exchanges: We provide and verify data for many purposes such as employment, voting, and eligibility for Federal and State programs, including the Affordable Care Act and the Department of Veterans Affairs.

## **FY 2015 ACCOMPLISHMENTS**

We are pleased that we ended FY 2015 with nearly all of the employees we added in the previous year. As our new employees completed training and gained on-the-job experience, we were able to make some improvements in our direct service areas. Most notably, we reduced busy signals and wait times on our National 800 Number. The employees we added also allowed us to restore some service hours to the public that we previously cut because of insufficient

resources. Our online services continued to provide relief to our frontline positions, as more than 50 percent of all retirement and disability claims were filed online. In addition, the public used our website to complete nearly 87 million other transactions.

Our FY 2015 funding allowed us to make considerable progress in our ongoing fight against fraud, waste, and abuse. Starting with our important program integrity work, we completed 50 percent more CDRs than we did in FY 2014 and maintained our high volume of SSI redeterminations. We continued our commitment to prevent and deter fraud by establishing the Office of Anti-Fraud Programs to centralize our anti-fraud efforts. We also expanded our CDI program to 36 units covering 31 states and the Commonwealth of Puerto Rico.

In FY 2015, we:

- paid over \$930 billion to more than 67 million beneficiaries;
- handled approximately 37 million calls on our National 800 Number;
- served over 40 million visitors in over 1,200 field offices nationwide;
- received over 66 million calls to field offices nationwide;
- completed over 8 million claims for benefits and more than 660,000 hearing dispositions;
- handled over 35 million changes to beneficiary records;
- issued about 16 million new and replacement Social Security cards;
- posted about 266 million wage reports;
- handled over 18,000 cases in Federal District Courts;
- completed 799,000 full medical CDRs; and
- completed over 2.2 million non-medical redeterminations of SSI eligibility.

## **FY 2017 BUDGET REQUEST**

Our FY 2017 President's Budget of \$13.067 billion will allow us to balance our important service and stewardship work, and address the critical agency priorities outlined in Vision 2025. Specifically, we will build a workforce to execute our multiyear plan to eliminate the hearings backlog, increase our cost-effective program integrity work, implement many of the provisions in the BBA, and invest in our IT infrastructure. We will work to reverse the service deterioration that will result from constrained funding in FY 2016, and we will build additional capacity in key areas to address specific challenges. This level of funding will allow us to:

- Execute our CARES plan, which includes aggressive hiring of ALJs and support staff, as well as other initiatives, to increase the number of hearings completed by nearly 20 percent;
- Improve frontline service to the public, such as in our field offices and on our National 800 Number;

- Significantly increase CDRs and SSI redeterminations, by nearly 40 percent and 25 percent, respectively;
- Provide additional resources to our State disability determination services (DDS), to support implementing BBA-related changes including the elimination of single decision maker (SDM) authority, completing higher levels of continuing disability reviews, and processing high levels of initial disability claims.
- Expand our efforts to prevent and deter fraud by adding new units to our CDI program, and continue to support our SSA fraud prosecutors;
- Provide our employees with training opportunities to ensure successful knowledge transfer and leadership development;
- Continue to enhance our online services and promote them as a safe and convenient service option;
- Make more data-driven decisions to improve processes throughout the agency;
- Strengthen support for mission-critical projects to increase chances of success; and
- Implement a more efficient IT investment strategy and begin modernizing our IT infrastructure.

The following charts provide the FY 2017 President's Budget request for our administrative expenses, including funding amounts, associated workyears, and key performance goals. The first chart, the FY 2017 Funding Table, provides amounts for our key appropriations and the associated workyears. The second chart, the FY 2017 Performance Table, includes the actual performance for FY 2015 and anticipated targets for FYs 2016 and 2017 for our key performance measures.

## FY 2017 PRESIDENT’S BUDGET REQUEST – FUNDING

The funding table below provides actual dollar figures and workyears expended for FY 2015, our estimated spending for FY 2016 based upon Public Law 114-113, and our FY 2017 budget request.

<b>FY 2017 Funding Table</b>	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Request</b>
<b>Budget Authority</b> (in millions)			
<b>Limitation on Administrative Expenses (LAE)</b>	\$11,806	\$12,162	\$13,067
<b>Research and Demonstrations</b>	\$83	\$101	\$58
<b>Office of the Inspector General (OIG)</b>	\$103	\$106	\$112
<b>Total Budget Authority</b> <sup>1</sup>	<b>\$11,992</b>	<b>\$12,368</b>	<b>\$13,237</b>
<b>Workyears</b>			
Full-Time Equivalents	63,394	64,860	66,140
Overtime	2,831	674	2,200
Lump Sum	<u>246</u>	<u>298</u>	<u>298</u>
<b>Total SSA Workyears</b> <sup>2</sup>	<b>66,471</b>	<b>65,832</b>	<b>68,638</b>
Disability Determination Services (DDS) Workyears	<u>14,925</u>	<u>15,270</u>	<u>16,000</u>
<b>Total SSA/DDS Workyears</b>	<b>81,396</b>	<b>81,102</b>	<b>84,638</b>
OIG Workyears	<u>533</u>	<u>543</u>	<u>564</u>
<b>Total SSA/DDS/OIG Workyears</b>	<b>81,929</b>	<b>81,645</b>	<b>85,202</b>

<sup>1</sup> Totals may not add exactly due to rounding.

<sup>2</sup> Totals do not include MACRA workyears.

## FY 2017 PRESIDENT’S BUDGET REQUEST – PERFORMANCE

The performance table below reports our actual performance for FY 2015, our estimate for what we can achieve in FY 2016 based upon P.L.114-113, and what we can achieve with our FY 2017 budget request.

<b>FY 2017 Performance Table</b>	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted<sup>1</sup></b>	<b>FY 2017 Request</b>
<b>Selected Workload Measures</b>			
Retirement and Survivors Claims Completed (thousands)	5,327	5,586	5,732
Initial Disability Claims Completed (thousands)	2,759	2,695	2,810
Disability Reconsiderations Completed (thousands)	723	702	715
Hearings Completed (thousands)	663	703	784
National 800 Number Calls Handled (millions)	37	34	38
Average Speed of Answer (ASA) (seconds)	617	945	675
Agent Busy Rate (percent)	7.5	9.5	7.0
Social Security Numbers (SSN) Completed (millions)	16	16	16
Annual Earnings Items Completed (millions)	266	264	265
Social Security Statements Issued (millions) <sup>2,3</sup>	50	38	44
<b>Selected Outcome Measures</b>			
Initial Disability Claims Receipts (thousands)	2,756	2,807	2,817
Hearings Receipts (thousands)	746	730	729
Initial Disability Claims Pending (thousands)	621	733	740
Disability Reconsiderations Pending (thousands)	144	136	137
Hearings Pending (thousands)	1,061	1,087	1,033
Average Processing Time for Initial Disability Claims (days)	114	113	113
Average Processing Time for Disability Reconsiderations (days) <sup>4</sup>	113	N/A	109
Annual Average Processing Time for Hearings Decisions (days)	480	540	555
Disability Determination Services Production per Workyear	307	307	314
Office of Disability Adjudication and Review Production per Workyear	95	94	98
Other Work/Service in Support of the Public - Annual Growth of Backlog (workyears)	N/A	(2,000)	(2,700)
<b>Selected Program Integrity Performance Measures</b>			
Periodic Continuing Disability Reviews (CDR) Completed (thousands)	1,972	1,950	2,200
Full Medical CDRs (included above, thousands)	799	850	1,100
Supplemental Security Income (SSI) Non-Medical Redeterminations Completed (thousands)	2,267	2,522	2,822

<sup>1</sup> FY 2016 is a 53-week year for management information purposes. After the close of the year, we will report both 52 and 53-week actual performance data. Our budgeted performance goals are full-year goals based on the workyears we are able to support with funds available in FY 2016.

<sup>2</sup> The Social Security Statements Issued measure includes paper statements only; does not include electronic statements issued.

<sup>3</sup> The original estimate for Social Security Statements (SSS) Issued measure in the FY 2016 President’s Budget was 45 million. This has been reduced by ~6.6 million, as a result of the agency sending out the scheduled SSS for FY 2016 October in FY 2015 September. Therefore, the FY 2016 Enacted number has been adjusted to ~38 million.

<sup>4</sup> We developed management information for Average Processing Time for Disability Reconsiderations in FY 2013. FY 2014 is the first full fiscal year for which data are available for this measure. Now that we have had the opportunity to analyze at least two years of actual data, this year we developed a performance target for FY 2017.

## **BIPARTISAN BUDGET ACT OF 2015 (BBA)**

We are pleased with the BBA's support to protect and strengthen our programs, and we will work to implement the provisions in the Act as expeditiously as possible. The BBA will help us address critical priorities, such as reducing improper payments and ensuring we have an adequate pool of ALJ candidates to successfully execute our hearings reduction plan. In addition, the BBA increases the annual spending caps for program integrity purposes through FY 2021, as well as expands use of the cap adjustment funds to include cooperative disability investigation units and fraud prosecutions. The BBA also included critically important provisions to bolster the financing of the Social Security Disability Insurance Program (SSDI), ensuring that the program can continue to provide workers with serious disabilities and their families the full benefits they have earned. For a summary of all of the SSA provisions included in the BBA, please see our exhibit in the Limitations on Administrative Expenses technical materials.

### **❖ PROVIDING A SUPERIOR CUSTOMER EXPERIENCE**

A vast majority of the public continues to complete their business with us in person at a field office or with one of our customer service representatives on our National 800 Number, either out of necessity or preference. As such, we rely heavily on an adequate and experienced workforce to deliver timely and accurate service. With increasing workloads, it is critical to ensure sufficient funding for FY 17. Our online services and other self-service options have alleviated some of the pressure our frontline staff is facing, but much of the work we do to serve the public still requires human interaction.

#### ***Field Offices***

With more than 160,000 visitors on a daily basis, our more than 1,200 field offices nationwide are the cornerstone of our operation. As such, we remain committed to maintaining a field office structure for those customers who need or prefer face-to-face service. We were pleased to restore some of the field office hours that we previously reduced because of insufficient resources. Effective March 16, 2015, field offices nationwide opened for an additional hour every weekday except for Wednesday.

To improve efficiency in our field offices, we are focused on redirecting internet claims to 16 sites called Workload Support Units (WSU) to free up field office employee time for direct face-to-face service. These units processed approximately 84 percent of all internet retirement claims in FY 2015, which would have otherwise had to be processed by field office representatives. While internet retirement claims continue to be WSU's primary workload, we are building the capacity to increase their intake of internet disability claims.

We continue to expand our use of alternate methods of service delivery to our customers, such as video service, self-help computers, and express customer service stations while also providing high-quality face-to-face field office services for individuals who need or prefer them.

- *Video Service Delivery (VSD)*: The use of VSD is helping us balance workloads, save on travel costs, provide services to our deaf and hard of hearing population, and reduce customer wait times in busier field offices. VSD allows customers who live in remote locations to see a field office representative via live-streaming video. We have VSD units in 670 sites, and conducted approximately 130,000 interviews in FY 2015. Our next step is to explore more cost-efficient technology that will allow us to expand VSD to new locations.
- *Self-Help Personal Computers (SHPC)*: SHPC allows our customers to access our online services using computers located inside our field offices, enabling customers to complete some transactions without needing to speak with a representative. However, a field office representative is available to provide assistance, if necessary, to ensure customers complete their business. These stations now run on a virtual desktop infrastructure, which is more secure and cost efficient. Currently, SHPC is available in 790 field offices nationwide. In FY 2016, we plan to add 200 SHPCs in new or existing sites.
- *Social Security Express Desktop Icons*: These icons allow users to access most of our online services from a public computer or website. Available at external partner sites, such as libraries and senior centers, these icons offer the same services as the SHPCs in our field offices. In FY 2015, we designed and implemented a process allowing partner sites to download the desktop icon directly to a PC or website. Visits to Social Security Express through our icons more than tripled from 19,343 visits in FY 2014 to 61,470 visits in FY 2015.
- *Express Customer Service Stations*: Currently in the proof-of-concept (POC) phase, Customer Service Stations (CSS) offer customers a streamlined menu of service options geared towards the needs of individuals already conducting business in external partner locations (e.g., libraries and senior centers) or in our field offices. These stations support one-stop online access to some of Social Security's most popular quick online services – and improve service delivery for customer communities such as Veterans and those without home internet access. We currently have seven CSSs installed – one is in a Social Security field office and the other six are in external partner locations. This POC began on July 2, 2014 and is expected to continue through February 2017. After the POC ends, we will use the data collected to decide whether to move into a pilot expansion and potentially purchase additional units.

### ***National 800 Number***

Our National 800 Number allows customers to speak with a Social Security representative between 7 a.m. and 7 p.m. local time, Monday through Friday. The National 800 Number also offers a menu of automated services 24 hours a day.

The telephone agents we have across the country handle more than 2.6 million calls every month. Similar to the representatives who work in our field offices, the customer service representatives on our National 800 Number are knowledgeable of all the programs we administer, including Medicare and Medicaid, and customers rely heavily on this personal service to conduct business with us. As such, our National 800 Number faces similar challenges to our field offices in keeping pace with customer demand.

While we have worked diligently to improve National 800 Number service, the funding we received for FY 2016 will increase wait times and busy signals. With full funding of the FY 2017 Budget request, we will once again reverse the service deterioration on our National 800 Number, improving wait times from nearly 16 minutes at the end of FY 2016 to just over 11 minutes at the end of FY 2017. Busy signals will also improve from 9.5 percent at the end of FY 2016 to 7 percent by the end of FY 2017.

### ***Initial Disability Claims***

Our State DDSs make the time-intensive medical determinations for both initial disability claims and CDRs. While initial disability claims receipts have decreased since FY 2010, receipts are projected to increase again in FY 2016 and FY 2017. In FY 2015, the DDSs handled over 2.7 million initial disability claims while completing over 790,000 CDRs with the Budget Control Act level of program integrity funding. At the same time, our DDSs are keeping processing times relatively stable. With the FY 2017 President's Budget, we will increase the number of initial disability claim decisions by 4.3 percent from FY 2016. At the same time, we will significantly increase CDRs from 850,000 in FY 2016 to a record 1.1 million in FY 2017, and stay on track to eliminate the CDR backlog by the end of FY 2019.

*Health Information Technology (HIT):* We use an application that allows us to request, receive, and analyze electronic medical records in a fully automated manner using HIT. HIT automates the medical records request and receipt process, as well as gives adjudicators access to medical records within seconds of transmitting the request, as opposed to days or weeks. In FY 2015, over 6 percent of our initial disability claims received HIT medical records. Our FY 2017 goal is to increase HIT medical records to 11 percent of initial disability claims.

*Disability Case Processing System (DCPS):* DCPS will replace 54 independent legacy systems currently used throughout the DDS offices nationwide. The new system will allow for faster and more accurate case processing, reduce administrative costs, and provide structured data that will support our fraud analytics efforts. We plan to develop and deploy the core product to initial sites in FY 2016, adding additional functionality to process all types of disability cases throughout FY 2016 and FY 2017.

### **Hearings**

Our CARES plan presents a sustained, comprehensive, multiyear, and multi-layered approach for eliminating our hearings backlog. If we continue to receive adequate funding, and support from the Office of Personnel Management (OPM), we believe that through our innovative and engaging CARES plan, geared towards quality and people, we will facilitate the decrease in the backlog by FY 2017 and eliminate the hearings backlog by FY 2020. The CARES plan will reduce the current average wait time for a hearing decision from over 500 days currently to 270 days in FY 2020, and we expect to cut the number of pending cases in half.

Examples of initiatives currently underway in the CARES plan include:

- *Increased Staffing:* We will likely need to expand our hearings workforce by a few thousand employees between now and FY 2018, including 250 ALJs per year, if we are to eliminate the backlog by the end of FY 2020. In order to meet our hiring goals, we

need OPM to provide an adequate pool of ALJ candidates. OPM recently provided 50 additional candidates, but we need many more. The BBA included an important provision to ensure another exam will be administered this year, which is critical to ensuring an adequate pool of ALJs in future years. If we meet our hiring goals, we will increase our hearing decisions in FY 2017 to approximately 784,000, nearly 20 percent more than our FY 2015 levels, and begin to reduce pending levels.

- *National Adjudication Team*: This team allows our most experienced attorney advisors to issue fully favorable, on-the-record decisions, freeing up our ALJ resources to concentrate on the more complex cases that require hearings. These senior attorney adjudicators either reverse the DDS determination through an on-the-record decision or prepare an explanation as to why they were unable to reverse the determination.
- *Video Expansion and Improvement*: Expanding the use of video hearings will help us balance workloads across the country, reduce ALJ travel to remote sites, and offer claimants a more convenient and timely way to have their case heard. Currently, we hold more than 25 percent of hearings via videoconference. Our goal is to hold at least 170,000 hearings via video in FY 2016 and FY 2017.
- *Pre-Hearing Conference Pilot Program*: We implemented a program that allows senior attorneys to conduct pre-hearing conferences with unrepresented claimants. The purpose of the pilot is to reduce the number of delayed or rescheduled hearings by developing the record, explaining the hearing process to the claimant, and advising the claimant of his or her right to representation. Currently, more than 11 percent of scheduled hearings do not take place because claimants fail to appear or ask to postpone so they can seek representation.
- *Inline Quality Review*: Under this program, we conduct independent, random reviews to ensure that the laws, and our regulations and policies are applied equally and fairly to each individual who has filed a request for a hearing.
- *Contractor Access to eFolders*: Following the success of online services for representatives, we are developing a similar service for medical and vocational experts to access and view the electronic folder. A pilot is scheduled for release in April 2016. Additional functionality and national rollout are expected in December 2016.
- *Appointed Representative Services (ARS)*: ARS provides representatives with the ability to access their claimant's electronic folders via a secure SSA website. It also allows representatives to upload evidence and highlight pertinent information within the document. ARS reduces our costs for burning, encrypting, packaging, and mailing evidence on compact discs to representatives.
- *Electronic Bench Book (eBB)*: eBB allows ALJs and decision writers to perform pre-hearing file reviews and capture hearing notes. Post hearing, eBB guides the ALJ through each step of the sequential evaluation process while documenting the decisional instructions. Currently, ALJs are using eBB to process decisional instructions on 1,500 cases per week. A recent software release automatically generates a draft decisional notice.

### **Enhancing Online Customer Service**

In FY 2015, customers continued to increase their use of our online services to conduct business with us as they completed nearly 87 million transactions via our website. Customer satisfaction with our online services also continues to shine, as five of the top ten ranked federal websites were SSA online customer service products, according to the Foresee e-Government Report Card 2015. We will continue to enhance our online services and promote them as a safe and convenient service option to increase usage and reduce unnecessary field office visits. Our goal is to increase the volume of online transactions by 25 million each year, which would result in a total of 112 million transactions in FY 2016 and 137 million in FY 2017. With increased usage of online services, we can free-up more time for customers that need or prefer to complete business with us in person.

We are exploring and developing ways we can expand our online customer base. For example, we are enhancing *my Social Security* to include services for representative payees and to allow people with a foreign address to register. In addition, we are developing new customer engagement tools including Click-to-Chat, Click-to-Video, and a Message Center for relaying informational messages and promotional content to *my Social Security* users. Our 2015 releases of Dynamic Help and Click-to-Callback are also scheduled for enhancements. Expanding and enhancing our communication channels will allow customers to complete their online transactions within the method they prefer.

In November 2015, we released the internet Social Security Number Replacement Card (iSSNRC) application, which allows eligible customers to apply for their replacement SSN card online. Currently, we are slowly rolling out iSSNRC to a few States at a time but will continue releasing to additional States in the future.

Other services include adding an SSI application to the current iClaim process; and the development of a Smart Claim application that will allow our customers to file for retirement, disability, and Medicare within the same online service tool. We will later expand Smart Claim to include online service options for SSI claimants as well.

The internet appeals (iAppeals) application will allow customers to complete their non-medical appeals online; and we are developing applications to allow appointed representatives to complete all of their business via the internet, including expanding services at the initial claim level.

To promote our current and new online services, we use public service announcements on television, radio, printed leaflets, billboards, bus posters, displays in airport terminals, and social media. We also engage with the public on Facebook and Twitter, and we recently launched a new blog to enhance our social media outreach. We are collaborating with the Internal Revenue Service and TaxACT, a large tax preparation software company, to promote *my Social Security*.

### **Educate the Public about Social Security Programs**

We strive to educate the public, as well as our employees, about all the benefits and services we provide, to create a better customer experience. We are working with youth groups, faith-based groups, labor unions, and senior citizen and disability advocates to leverage their resources to reach both local and national audiences. At the end of FY 2016, we will deploy an employee

education program that will enable all of our employees to better understand and convey agency messages to those they meet, both at work and in their personal lives.

## ❖ **SUPPORTING OUR EXCEPTIONAL EMPLOYEES**

The level of service we provide to the public relies heavily on a workforce equipped with the knowledge, skill, and leadership to apply the complex rules of our programs. One of our greatest challenges is replacing the loss of our most experienced employees, especially in our current leadership ranks. More than 50 percent of our senior executives and 30 percent of our frontline supervisors are eligible to retire. Without leadership development and succession planning, this loss will result in both a lack of experience and institutional knowledge.

### **Employee Development and Engagement**

We plan to continue to invest in our employees by bolstering our leadership programs, offering opportunities to more employees, and continuing to offer and support mentoring opportunities, such as in our newly piloted National Mentoring Program.

Employee engagement is vital in recruitment, retention, and satisfaction. It can improve organizational performance while also contributing to individual performance. Therefore, it is paramount that we continue to promote an engaged and satisfied workforce and to improve our Federal Employment Viewpoint Survey scores on employee satisfaction.

### ***Altmeyer Building Renovation Project***

The well-being of our employees is also an agency priority, which includes, among other things, providing a work environment that is safe, comfortable, and energy efficient. As such, our budget request supports the renovation and repair of several office buildings to bring them up to current health and safety codes.

Our FY 2016 appropriation included \$150 million to fund the renovation of the Altmeyer Building on SSA's Woodlawn, MD main campus. The renovation includes full interior and exterior renovations of the existing building including infrastructure, electrical system, and space. The improved space utilization will create space for about 300 to 350 additional staff. We expect to award a contract for design services sometime in FY 2017 and estimate occupancy of the renovated building in FY 2021.

### **Succession Planning**

Our FY 2016-2018 Succession Plan promotes the assessment of competencies essential to leadership succession. The updated plan includes expanded training and developmental programs that support continual learning and close competency gaps. Organizational components will identify critical positions to serve as the foundation of the plan's strategies and activities. Our leaders will use the FY 2015-2024 *Retirement Wave Report* to make data-driven human capital and financial management decisions. This approach further enhances the goal of data-driven operations to ensure a continuation of a strong leadership pipeline of talent to meet the changing needs of our customers.

## ❖ MOVING FORWARD AS AN INNOVATIVE ORGANIZATION

Our investments in technology will allow us to obtain and use information in a more efficient manner, and provide fast and accurate service to our customers. This Budget request also supports our efforts to ensure the success of mission-critical projects and strengthens our investment planning for IT systems. In addition, this Budget reflects what we need to build and maintain effective cybersecurity programs.

### **Transforming the IT Investment Process**

We developed a new IT investment process that will provide a better way to select, track, and manage IT investments, as well as help us deliver the high quality IT services necessary to move the agency towards our Vision 2025 goals.

In FY 2015, we documented inefficiencies in our current IT investment process and began developing the framework for a new approach. The new process will focus on up-front project planning with outcomes tied to specific agency goals. Improved project planning and documentation will allow us to assess project costs and timelines with greater accuracy. An independent executive IT investment board will meet throughout the year to make informed funding decisions on projects that provide the greatest benefit to our agency's mission. As a result, we will be better able to deliver the right project on time and within budget, and provide the best tools for our employees and superior service to the American public.

### ***IT Modernization***

The database systems our agency uses today are 40 years old and are no longer the best solution to administer our programs. For several years, we worked to modernize our IT in small pieces at a time, but we have exhausted nearly all of these small efforts. We are now at a point where we must undertake a larger, multiyear effort.

The FY 2017 President's Budget requests multiyear funding of \$300 million, spread over four years, to undertake an IT modernization project that will bring our systems into the modern world. In FY 2017, \$60 million is included as part of the FY 2017 President's Budget. The FY 2017 President's Budget also contains a mandatory proposal for additional IT modernization funding - \$80 million each year in FYs 2018-2020. The project will require effort and investment in several areas including modernization in computer language, database, and infrastructure.

### ***Digital Services Team***

Our FY 2017 Budget request includes funding for staffing costs to build a Digital Services Team. We will recruit digital service experts from among America's leading technology enterprises and startups to help us effectively build and deliver important digital services. This team will focus on transforming our digital services with the greatest impact to citizens and businesses, making them easier to use and more cost-effective to build and maintain.

### ***Cybersecurity***

Our cybersecurity program continues to evolve our detection, protection, and intelligence capabilities for strengthening the agency's defenses against evolving threats and cyber-attacks. Our program incorporates these security capabilities into a comprehensive, multi-layered defensive approach for ensuring the confidentiality, integrity, and availability of the public's sensitive personal identifiable information. As we continue to provide new opportunities for better customer service through new online services, we must remain vigilant in continuing to strengthen our cybersecurity program capabilities.

Our cybersecurity program compares well against other Federal departments and agencies in key performance standards. To remain strong, we need to continue to evolve our cybersecurity program to reflect changes in technology, changes to business processes, and changes in the complexity of internal or external threats. Continued investments in cybersecurity projects and initiatives will ensure we have the resources needed to accomplish our agency's mission and thus maintain public confidence in the agency's ability to protect their privacy.

### **Establishing a Program Management Office**

We are implementing an Enterprise Program Management Office that will increase the opportunity for success of our mission-critical projects. Through the efforts of this new office, critical agency projects will have additional oversight and project management expertise, increasing the chance of project success.

### **Accelerating the Use of Data-Driven Decision Making**

Our new Analytics Center of Excellence (ACE) will execute analytical projects, develop agency advanced analytics capacity and capabilities, improve data sharing between intra-agency components, and co-operate with analytics practitioners to identify best practices and improve skills. We will continue to increase our use of data-driven decision making to improve quality and efficiencies in our business processes.

## **❖ ENHANCING PROGRAM INTEGRITY**

The American public expects and deserves for us to be outstanding stewards of the Social Security Trust Funds and general revenues that finance our programs – and as such, we are committed to ensuring that program rules and eligibility standards are fully enforced. The program integrity workloads we have in place help us make such determinations, which include conducting reviews to ensure beneficiaries are still entitled to benefits. We also work aggressively to prevent and detect fraud and recover improper payments whether fraudulent or not. While program integrity workloads consume valuable time and resources, we must continue to invest in these efforts to protect our programs.

### **Program Integrity Workloads**

The program integrity work we perform saves billions of taxpayer dollars. CDRs and SSI redeterminations use a small investment of administrative funds to ensure that beneficiaries continue to meet the eligibility requirements to receive payments. However, annual appropriations bills have not always provided the full amount of funding for these activities.

Recently, recognizing the significant benefits to program activities, the BBA of 2015 increased authorized cap adjustments for these activities by a net \$484 million over the FY 2017 to FY 2021 period.

With the Budget Control Act program integrity funding provided to us in FY 2015, we exceeded our goal of 790,000 CDRs and 2.255 million SSI redeterminations by completing 799,000 CDRs and 2.267 redeterminations. The BBA increased such adjustments for Social Security programs by a net \$484 million over the FY 2017-2021 period. It also expanded the activities that may be funded by this funding source to include cooperative disability investigation units, and special attorneys for fraud prosecutions. In FY 2016, we will conduct 850,000 and 2.5 million, respectively. With our FY 2017 Budget request of \$13.067 billion, we will complete a record 1.1 million CDRs and 2.8 million redeterminations.

Current estimates indicate that medical CDRs conducted in FY 2017 will yield a return on investment (ROI) of about \$8 on average in net Federal program savings over 10 years per \$1 budgeted for dedicated program integrity funding. This ROI includes Old-Age, Survivors, and Disability Insurance (OASDI), SSI, Medicare, and Medicaid program effects. Similarly, we estimate that non-medical redeterminations conducted in FY 2017 will yield a ROI of about \$3 on average of net Federal program savings over ten years per \$1 budgeted for dedicated program integrity funding, including SSI and Medicaid program effects.

### Other Stewardship Activities

In addition to our key program integrity workloads, we have an aggressive strategy, through a variety of initiatives, to reduce improper payments and combat fraud. We recently established an Improper Payments Community of Practice to increase interagency collaboration and leverage ideas and best practices of other benefit-paying agencies. The Office of Anti-Fraud Programs (OAFP) is providing centralized oversight of and accountability for our efforts to prevent, deter, and detect fraud. OAFP increases our efficiency and enhances our ability to combat fraud by sharing knowledge, using data analytics and industry-standard business processes, and centralizing our deployment of training and communications. Our National Anti-Fraud Committee works with all of the Regional Anti-Fraud Committees to enhance existing fraud prevention efforts and implement new mitigation strategies, while also providing guidance and support to OAFP.

The FY 2017 President's Budget funds our stewardship initiatives such as:

- Continuing to expand our CDI program, which is highly successful at detecting fraud before we make a disability determination;

- Supporting our centralized fraud prevention units, which are comprised of disability examiners dedicated to reviewing and analyzing fraud cases;
- Strengthening and modernizing our representative payee program to ensure we appoint suitable representative payees for our beneficiaries and that representatives managing funds use these funds appropriately;
- Exploring data analytics to detect and prevent fraud by determining common characteristics and patterns of anomalous activity; and
- Improving death data processing by working to centralize and capture all death information in one system to prevent erroneous payments.

We will support reducing improper payments by continuing to use the Access to Financial Institutions (AFI) process. AFI, which is an electronic process that verifies bank account balances with financial institutions for purposes of determining SSI eligibility. The BBA expands the use of AFI and grants us the ability to verify financial information for all overpaid individuals (Title 2 or Title 16). The BBA requires the Commissioner to obtain an individual's authorization to obtain financial institution records before determining whether recovery of such individual's overpayment may be waived under the "defeats the purpose" provision. Additionally, in order to protect citizens who have been victims of identity theft, provide more secure authentication for our online services, and comply with Executive Order 13681, "Improving the Security of Consumer Financial Transactions," issued in October 2014, we are currently in the process of implementing multifactor authentication for *my Social Security* users. Multifactor authentication is a security process that requires more than a single method (e.g., user ID/password) to verify the user's identity. Initially, *my Social Security* users will need to also enter a code that is sent via text message to their cellphone as a second factor during registration and login. Following the initial implementation, we plan to enhance the service in FY 2017 to allow additional multifactor options as governed by NIST/OMB guidelines for customers. By offering more multi-factor options, we can improve usability and lower the chances of online fallout, thus helping us move towards the Agency goal to increase *my Social Security* usage.

## CONCLUSION

Full funding of the FY 2017 President's Budget will allow us to advance our efforts to improve service delivery and address critical priorities to provide a superior customer experience, sustain a workforce of exceptional employees, and move forward as an innovative organization.

This budget lays out a plan to address our most pressing problems and allows us to move closer to realizing our Vision 2025. Most notably, we will be able to fully execute our CARES plan to eliminate the hearings backlog by FY 2020 and eliminate our CDR backlog by the end of FY 2019.

For 80 years, we have provided caring and compassionate service to hardworking Americans and our most vulnerable citizens. As an economic lifeline for millions, we remain focused on making improvements to deliver timely and accurate services. We need continual support to stay on track and provide the service the public expects and deserves.

## **APPENDIX A – OUR EXTRAMURAL RESEARCH BUDGET**

In FY 2017, we are requesting \$58 million in new budget authority as part of our SSI appropriation to support extramural research projects. These projects will continue to test changes to the disability programs to improve program administration and reduce dependency on our programs. The broad-based SSI, OASI, and DI projects funded in this budget include projects in the areas of disability policy research, employment support programs, retirement policy research, financial literacy and education, and evaluations of proposed or newly enacted legislation.

Our FY 2017 budget request continues to support ongoing rigorous evaluations, such as our evaluation of the interagency Promoting Readiness of Minors in SSI (PROMISE) effort. The Departments of Education, Labor, and Health and Human Services created the PROMISE initiative to foster improved outcomes for children who receive SSI by facilitating positive changes in health status, physical and emotional development, completion of education and training, and eventually, employment opportunities. In addition to conducting surveys of participants, in FY 2017, we will conduct project site visits and produce site-specific process analyses.

The budget also includes continued funding for our Occupational Information System (OIS) project, which will allow us to make consistent, better-informed disability decisions. We often need information about work to make a disability determination, but the types of jobs in the workforce, as well as job requirements, change over time. The occupational resources we currently use to adjudicate claims have not been updated in more than 20 years. To support the development of new occupational data, we entered into an interagency agreement with the Department of Labor's Bureau of Labor Statistics (BLS). Starting in FY 2016 and continuing through FY 2018, BLS will collect occupational data related to the requirements of work. We expect to roll out the use of the new occupational data in stages and we are working to develop testing and training plans.

The Consolidated Appropriations Act, 2016, includes \$50 million in additional funding for our planned Early Intervention Demonstration. Early Intervention measures – such as supportive employment services for individuals with mental impairments– have the potential to achieve long-term gains in the employment and the quality of life of people with disabilities. By providing medical and vocational services prior to receiving benefits as part of the demonstration, we can test whether such services help individuals with these impairments remain active in the workforce, and perhaps avoid or delay a need for disability benefits. We anticipate awarding a contract for this project in FY 2016, and the project will continue through FY 2022. We will not need additional funding for this demonstration in FY 2017.

In FY 2017, we will continue to support the Benefit Offset National Demonstration and the new demonstration outlined in the BBA testing a benefit offset after an allowance for impairment-related work expenses. We are currently designing this demonstration and are still developing cost estimates and a project plan.

## APPENDIX B – FY 2017 LEGISLATIVE PROPOSALS – SUMMARIES

### Prevent Improper Payments and Improve Debt Collection

1. **Hold Fraud Facilitators Liable for Overpayments.** In a few recent high profile cases of fraud against SSA's disability programs, third parties, such as representatives and doctors, facilitated fraudulent applications for benefits by submitting false statements or evidence purporting to show that the individuals were disabled, when in fact some of those individuals had no disabling conditions. Under current law, such facilitators may be subject to criminal prosecution and penalties, but they are not required to repay the benefits improperly paid to a person who was not eligible for them. This proposal would hold fraud facilitators liable for overpayments by allowing SSA to recover the overpayment, with interest, from a third party if the third party was responsible for making fraudulent statement(s) or providing false evidence that allowed the beneficiary to receive payments they should not have received. Furthermore, a facilitator would be ineligible for a waiver of recovery of such an overpayment.
2. **Government-Wide Use of CBP Entry and Exit Data to Prevent Improper Payments.** The U.S. Customs and Border Protection (CBP) maintains data on when individuals enter and exit the United States. This entry and exit information may be useful in preventing improper payments in Federal programs, such as the Supplemental Security Income (SSI) program, that require U.S. residency to receive benefits. This proposal would provide for access to and use by federal agencies of CBP entry and exit data to prevent improper payments.
3. **Use the Death Master File to Prevent Federal Improper Payments.** SSA receives about 2.5 million reports of death each year from many sources, such as family members, funeral homes, financial institutions, and the States. SSA is authorized to share all of the death information it maintains with Federal and State agencies that administer Federally-funded benefits, State agencies administering State-funded programs, and Federal and State agencies using the information for statistical and research activities. Currently, the Department of the Treasury's (Treasury) Do Not Pay Portal only receives a limited file, which excludes State death information. This proposal would increase the amount of death information available to Federal agencies for use in preventing improper payments by authorizing SSA to share all of the death information it maintains with Do Not Pay.
4. **Authorize SSA to Conduct a New Continuing Disability Review when Fraud Is Involved in a Prior Continuing Disability Review.** SSA is required to redetermine an individual's entitlement to disability benefits if there is reason to believe that fraud or similar fault were involved in the individual's application for benefits. During this redetermination, SSA must disregard any evidence where there is reason to believe that fraud or similar fault were involved in the providing of such evidence. This proposal would apply a similar requirement if SSA believes that fraud or similar fault were involved in a prior continuing disability review (CDR). This proposal would authorize SSA to conduct immediately a new CDR to determine continuing eligibility if there is reason to believe that fraud or similar fault was involved in a prior CDR. During this review, SSA would be authorized to disregard any

evidence if there is reason to believe that fraud or similar fault was involved in the providing of such evidence.

5. **Authorize SSA to Use All Collection Tools to Recover Funds in Certain Scenarios, Such as When Someone Improperly Cashes a Beneficiary's Check or Removes a Benefit from a Joint Account.** Current law provides SSA only limited authority to recover certain incorrect payments that do not meet the statutory definition of an overpayment. Such incorrect payments include when someone improperly cashes a beneficiary's check or improperly removes benefit funds from a joint account after a beneficiary's death. For example, payments in excess of the amount due or paid after death are considered overpayments. Specifically, if a benefit payment of this nature is made to a joint account of the deceased worker and the other account holder is entitled to a spousal benefit, based on the deceased worker's record, it is considered an overpayment. However, if the other joint account holder is entitled to benefits on his/her own record or not entitled to benefits, the improper payment is deemed an incorrect payment; a designation which limits SSA's recovery tools. The Budget proposes a consistent treatment, deeming them both as overpayments and subjecting them to the same broader range of collection procedures. This proposal would authorize SSA to use all of its overpayment collection tools, such as credit bureau reporting and administrative wage garnishment, to recover these incorrect payments.
6. **Allow SSA to Use Commercial Databases to Verify Real Property Data in the SSI Program.** This proposal would reduce improper payments by authorizing SSA to conduct data matches with private commercial databases that maintain data on ownership of real property (i.e., land and buildings), which can be a countable resource for SSI beneficiaries. The proposal would authorize SSA to use that information to automatically determine eligibility for benefits, after proper notification. Beneficiaries would be required to consent to allow SSA to access these databases as a condition of benefit receipt. All other current due process and appeal rights would be preserved.
7. **Increase from \$10 to 10 Percent the Minimum Amount SSA Can Withhold from a Monthly Old-Age, Survivors, and Disability Insurance Benefits to Recover an Overpayment.** When a beneficiary receives more Old-Age, Survivors, and Disability Insurance (OASDI) benefits than he or she should have, SSA can recover this overpayment by reducing the beneficiary's monthly benefit going forward. Depending on the beneficiary's financial circumstances, SSA may decide to recover less than the full amount of the monthly benefit until the overpayment is repaid in full. However, SSA is required to recover at least \$10 per month. This proposal would require SSA to recover at least 10 percent of the monthly OASDI benefit when recovering an overpayment. The SSI program already uses the 10 percent rule to recover overpayments.
8. **Exclude SSA Debts from Discharge in Bankruptcy.** Debts due to an overpayment of OASDI or SSI benefits, and certain Medicare-related debts that SSA also collects, are generally dischargeable in bankruptcy. This proposal would exclude such debts from discharge in bankruptcy, except when it would cause an undue hardship.
9. **Lower Electronic Wage Reporting Threshold to Five Employees.** SSA processes W-2 forms for Treasury. Currently, Treasury requires businesses that file 250 or more W-2s per

calendar year to file electronically. This proposal would modify the Internal Revenue Code so that Treasury can require businesses that employ five or more employees to file electronically. This change would be phased-in over three years and would increase the efficiency and accuracy of this process, because electronic returns are completed more rapidly, and are generally more accurate, than scanned or keyed returns.

**10. Move from Annual to Quarterly Wage Reporting.** Employers report wages annually to SSA. However, from 1939 to 1977, SSA received wage reports on a quarterly basis. Increasing the frequency of wage reporting could enhance tax administration. More frequent reporting would also facilitate implementation of automated enrollment of employees in existing workplace pensions and be the foundation for the creation of a system of automatic workplace retirement accounts for workers who do not currently have access to a retirement plan. Furthermore, more frequent reporting may improve program integrity by providing timelier wage data for use by Federal, income-tested programs. This proposal would restructure the Federal wage reporting process by requiring employers to report wages on a quarterly basis<sup>1</sup>.

**11. Modify the treatment of certain debt referrals to the Treasury Offset Program:** The Budget proposal has two parts. First, the proposal would forgive a limited group of older debts that would have been impacted by implementation of the Food, Conservation, and Energy Act of 2008 provision (section 14219 of Public Law 110-246), which eliminated the prior 10-year statute of limitations for collection of legally enforceable, non-tax debts through TOP. This group includes debts from both former childhood beneficiaries and others. For similar debts that would not have been immediately impacted by the implementation of the regulation, SSA will continue to consider forgiveness on a case-by-case basis using its existing administrative authority. Second, going forward SSA will only be able to refer debts for former childhood beneficiaries to TOP if SSA has initiated collections within 10 years of an overpayment being incurred. This is intended to ensure that individuals are not surprised by a TOP collection that occurs years after a debt was incurred when individuals may have difficulty remembering the circumstances of the error.

The Budget proposals ensure that the Administration maintains its commitment to reducing improper payments, while preventing former debtors from being surprised by the abrupt seizure of their tax refunds, sometimes decades after the original overpayments were made. While Congress considers the legislative proposals, SSA will begin the gradual process of restarting TOP referrals for those debts not impacted by the Administration's proposals.<sup>2</sup>

**12. Strengthening Child Support Enforcement and Establishment.** SSA reduces a child's monthly SSI benefit by up to two thirds of any monthly child support payment he or she also receives. The President's Budget includes several proposals aimed at increasing and

---

<sup>1</sup> This proposal would have no effect on the reporting of self-employment income.

<sup>2</sup> The budget assumes the proposal costs \$50 million over 10 years. The Office of the Chief actuary is working on a detailed estimate of this proposal.

improving child support collections and program efficiency. By increasing the amount of child support collected, these proposals would result in savings to the SSI program.

## **Improve Efficiency**

- 13. Improve Collection of Pension Information and Transition after ten years to an Alternative Approach based on Years of Non-Covered Earnings.** Current law requires SSA to reduce OASDI benefits when someone also receives a pension based on work that was not covered by Social Security. SSA currently has a matching agreement with the Office of Personnel Management (OPM) to obtain information on Federal government retirees who receive a pension from work not covered by Social Security. However, SSA generally lacks a way to receive similar information from State and local governments. As a result, many of these pensions go unreported, leading to improper payments. The Budget re-proposes legislation that would improve reporting for non-covered pensions by including up to \$70 million for administrative expenses, \$50 million of which would be available to the States, to develop a mechanism so that the Social Security Administration could enforce the offsets for the Windfall Elimination Provision (WEP) and Government Pension Offset (GPO). This proposal would require State and local government pension payers to report information on pensions paid for non-covered work to SSA through an automated data exchange. In addition, the Budget proposes to transition after ten years to an alternative approach, which would adjust Social Security benefits based on the extent to which workers have non-covered earnings. SSA now collects data on non-covered employment and could calculate the offset without any disclosure from the individual.
- 14. Establish Workers' Compensation Information Reporting.** Current law requires SSA to reduce an individual's Disability Insurance (DI) or SSI benefit if he or she receives workers' compensation (WC) or public disability benefits (PDB). SSA currently relies upon beneficiaries to report when they receive these benefits. This proposal would improve efficiency and program integrity by requiring States, local governments, and private insurers that administer WC and PDB to provide this information to SSA. Furthermore, this proposal would also provide for the development and implementation of a system to collect this information from States, local governments, and insurers.
- 15. Eliminate Dedicated Accounts.** Under current law, if the retroactive SSI benefits due a child exceed six times the maximum monthly SSI benefit, plus any optional State SSI supplement, then SSA must deposit the benefits into a special account, called a "dedicated account." The child's representative payee—who is typically a parent—can expend funds from such an account only for education, health care, and certain other expenses. These restrictions are often considered intrusive and confusing, and oversight of these accounts is labor-intensive for both SSA and representative payees. This proposal would eliminate dedicated accounts.
- 16. Provide Mandatory Funding Dedicated to Modernizing SSA's Information Technology.** This proposal would provide SSA with \$240 million in mandatory funding over fiscal years 2018, 2019, and 2020 dedicated to modernizing SSA's information technology (IT), specifically its core databases, programming languages, and IT infrastructure. These systems are becoming antiquated, and the staff experienced in maintaining these systems are

approaching retirement and are difficult to replace. SSA would use the proposed funds to invest in complex, multi-year IT projects necessary to update these systems in accordance with modern design principles.

### **Improve Benefits and Promote Work Opportunity**

- 17. Extend SSI Time Limits for Qualified Refugees.** Refugees and certain other humanitarian immigrants who are disabled or elderly are potentially eligible for SSI benefits for up to seven years from the date they attained their immigration status, and without time limit if they become naturalized. Congress acknowledged that humanitarian immigrants might be unable to attain citizenship within the seven-year period of SSI eligibility, even if they apply for naturalization as soon as they are eligible. Accordingly, Congress temporarily extended the time-limited SSI eligibility period from seven years to nine years for fiscal years 2009-2011. However, effective October 2011, the SSI eligibility period for refugees and other humanitarian immigrants reverted to seven years. This proposal would underscore the nation's commitment to refugees, asylees, and other humanitarian immigrants—who come to America with very little and frequently have nowhere else to go—by again extending the time limit from seven to nine years during fiscal years 2017 and 2018.
- 18. Conform Treatment of State and Local Government Earned Income Tax Credits and Child Tax Credits for SSI.** When determining someone's eligibility for, and benefit amounts under, the SSI program, SSA excludes Federal earned income tax credits (EITC) and child tax credits (CTC). However, the law requires SSA to count State EITCs and CTCs for SSI purposes. This proposal would simplify administration of the SSI program by excluding State EITCs and CTCs, in the manner in which similar, Federal tax payments are excluded.
- 19. Terminate Step Child Benefits in the Same Month as His or Her Parent's Benefits Terminate.** A parent and stepchild may receive benefits on the record of a worker, but if the marriage terminates by divorce, they are no longer eligible for benefits. When a stepchild's parent is divorced, spousal benefits terminate in the month before the month of the final divorce. However, benefits for the stepchild terminate one month later, in the month of the final divorce. This proposal would fix this discrepancy by ending benefits for the stepchild in the same month as the parent, in the month before the final divorce.
- 20. Create an Interagency Coordinating Council on Workforce Attachment.** This proposal would create and fully fund an interagency council comprising Federal agencies involved in improving the well-being of people with health impairments and disabilities, including the Office of Management and Budget; the Departments of Education, Health and Human Services, Labor, and the Treasury; and the Social Security Administration. The council's mission would be to improve workforce attachment for people with health impairments and disabilities, and its duties would include developing and maintaining a strategic plan to improve work outcomes, evaluating and recommending improvements to Federal programs, designing and overseeing demonstration projects, and improving interagency coordination.

## SOCIAL SECURITY ADMINISTRATION

### FY 2017 PRESIDENT'S BUDGET

#### Key Tables

**Table i.1 - Summary Table of SSA's Appropriation Request**

FY 2017	FTE	Amount
Payments to Social Security Trust Funds		\$ 11,400,000
Supplemental Security Income Program	--	--
FY 2017 Request	--	\$ 43,824,868,000 <sup>1</sup>
FY 2018 First Quarter Advance	--	\$ 15,000,000,000
Limitation on Administrative Expenses	66,140 <sup>2</sup>	\$ 13,067,000,000 <sup>3</sup>
Office of the Inspector General	560	\$ 112,000,000

<sup>1</sup> Excludes \$14,500,000,000, previously appropriated as a first quarter advance for FY 2017.

<sup>2</sup> Figure includes workyears for LAE, reimbursable work, LIS, SCHIP. Excludes workyears associated with Medicare Access and CHIP Reauthorization Act of 2015 funding.

<sup>3</sup> Includes \$126,000,000 for SSI State Supplementary user fees and up to \$1,000,000 for non-attorney user fees.

**Table i.2 – Administrative Budget Authority and Other Planned Obligations<sup>1</sup> (in millions)**

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>	<b>Change FY 16/FY 17</b>
<b><u>Budget Authority</u></b>				
Base Limitation on Administrative Expenses (LAE)	\$10,285	\$10,599	\$11,121	\$522
Program Integrity Base Level	\$273	\$273	\$273	\$0
Program Integrity Cap Adjustment	\$1,123	\$1,153	\$1,546	\$393
User Fees <sup>2</sup>	\$125	\$137	\$127	-\$10
<b>Subtotal, LAE Appropriation</b>	<b>\$11,806</b>	<b>\$12,162</b>	<b>\$13,067</b>	<b>\$905</b>
Percent change from FY 2016				7.44%

<b>TOTAL OUTLAYS, Current Law</b>	<b>\$58,901</b>	<b>\$64,675</b>	<b>\$61,624</b>	<b>-\$3,051</b>

<sup>1</sup> Totals may not equal sums of component parts due to rounding.

<sup>2</sup> There are 12 payments per year in FY 2015 and FY 2017. There are 13 payments in FY 2016.

<sup>3</sup> “Other” includes beneficiary services, research, administrative costs and \$2M for Special Immigrant Visa in FY 2017.

<sup>4</sup> States must reimburse SSA in advance for State Supplementary Payments. There will always be 12 state reimbursements in each fiscal year, but there can be 11, 12, or 13 benefit payments per fiscal year because a monthly payment is advanced into the end of the previous month anytime the due date falls on a weekend or holiday. Hence, the “Net State Supplementary Payment” numbers vary from year-to-year depending on the timing of the October benefit payments at the beginning and end of each fiscal year.

<sup>1</sup> FY 2016 is a 53-week year for management information purposes. After the close of the year, we will report both 52 and 53-week actual performance data. Our budgeted performance goals are full-year goals based on the workyears we are able to support with funds available in FY 2016.

<sup>2</sup> The Social Security Statements Issued measure includes paper statements only; does not include electronic statements issued.

<sup>3</sup> The original estimate for Social Security Statements (SSS) Issued measure in FY 2016 President's Budget was 45 million. This has been reduced by ~6.6 million, as a result of the agency sending out the scheduled SSS for FY 2016 October in FY 2015 September. Therefore, the FY 2016 Enacted number has been adjusted to ~38 million.

<sup>4</sup> We developed management information for Average Processing Time for Disability Reconsiderations in FY 2013. FY 2014 was the first full fiscal year for which data was available for this measure. Now that we have had the opportunity to analyze at least two years of actual data, this year we developed a performance target for FY 2017.

## APPROPRIATION LANGUAGE

### PAYMENTS TO SOCIAL SECURITY TRUST FUNDS

---

For payment to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, as provided under sections 201(m)[, 228(g),] and 1131(b)(2) of the Social Security Act, \$11,400,000.<sup>1</sup> (*Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2016.*)

---

<sup>1</sup> Social Security checks, like those issued by other federal agencies, are negotiable for only 12 months from their date of issue. Under the "Limited Payability" procedure, the value of unnegotiated checks issued on or after October 1, 1989 are credited directly to the trust funds from Treasury's general fund when the checks are canceled. These funds do not pass through the Payments to Social Security Trust Funds account, but the interest adjustments do pass through this account.

Section 1131 of the Social Security Act requires the Commissioner of Social Security to furnish information regarding deferred vested pension rights to pension plan participants (and their dependents or survivors). It permits the administrative expenses of carrying out this pension reform work to be funded initially from the OASI Trust Fund through SSA's Limitation on Administrative Expenses and authorizes an annual appropriation of federal funds to reimburse the OASI Trust Fund.

## GENERAL STATEMENT

The Payments to Social Security Trust Funds (PTF) account provides federal fund payments to the Social Security trust funds for several distinct activities. The purpose of each requested payment is to put the trust funds in the same financial position they would have been in had they not borne the cost of certain benefits or administrative expenses chargeable to general revenues. This account includes payments requiring an annual appropriation and payments made to the trust funds under permanent indefinite authority.

## ANNUAL APPROPRIATION

The annual PTF appropriation provides reimbursement to the Social Security trust funds for non-trust fund activities. These activities include pension reform and interest on unnegotiated checks<sup>1</sup>. Listed below is the estimated annual appropriation and resulting obligations for FY 2017.

**Table 1.1—Annual Appropriation and Obligations**

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>	<b>FY16 to FY17 Change</b>
<b>Appropriation</b>	\$ 16,400,000	\$ 11,400,000	<b>\$ 11,400,000</b>	<b>\$ 0</b>
<b>Obligations</b>	\$ 3,870,255	\$ 11,450,000	<b>\$ 11,450,000</b>	<b>\$ 0</b>

## PERMANENT INDEFINITE AUTHORITY

Amounts not subject to the annual appropriation include: (1) receipts from federal income taxation of Social Security benefits, (2) Federal Insurance Contribution Act (FICA) and Self-Employment Contribution Act (SECA) tax credits, (3) reimbursement for federal employee union administrative expenses, (4) transfers to offset the financial effects of the Food, Conservation, and Energy Act of 2008, and (5) reimbursements for the loss in FICA tax revenue resulting from the payroll tax holiday provided by the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 and extended by the Temporary Payroll Tax Cut Continuation Act of 2011. The permanent appropriation provides that the trust funds are credited for each of these revenue items.

### Taxation of Social Security Benefits

The Social Security Amendments of 1983 provide for taxation of up to one-half of Social Security benefits in excess of certain income thresholds. The Omnibus Reconciliation Act of

<sup>1</sup> This account used to include the quinquennial adjustment for military service wage credits that was authorized to be appropriated every five years. Section 842 of the Bipartisan Budget Act, 2015 (Public Law 114–74) amends section 217(g)(2) of the Social Security Act ending trust fund/general fund Quinquennial Military Service Credit adjustments effective retroactively to 2010, the date of the last such adjustment.

1993, P.L. 103-66, amended this provision so that up to 85 percent of benefits could be subject to taxation. The additional amounts collected from this 1993 provision are paid to the Hospital Insurance Trust Fund; no additional income is due the Social Security trust funds as a result of the enactment of the 1993 law.

The taxes are collected as federal income taxes; subsequently, an equivalent payment to the Social Security trust funds is made from the general funds of the Treasury. Transfers of estimated aggregate tax liabilities arising from Social Security benefits of U.S. citizens are made quarterly and then adjusted as actual receipts are known. The estimated income from these taxes is \$32,383 million in FY 2016 and \$39,007 million in FY 2017 from U.S. citizens; the monthly transfer of taxes imposed on aliens are transferred monthly and will generate estimated income of \$203 million in FY 2016 and \$214 million in FY 2017. The estimates for taxation of benefits reflect normal growth related to benefit levels and the beneficiary population.

Section 733 of the Uruguay Round Agreements Act, P.L. 103-465, also increased the taxable portion of nonresident aliens' Social Security benefits from 50 percent to 85 percent. The Offices of the General Counsel at SSA and at the Centers for Medicare and Medicaid Services, Department of Health and Human Services, agreed that the additional income resulting from the law should go to the OASDI trust funds as opposed to the HI trust fund.

#### **FICA and SECA Tax Credits**

The Social Security Amendments of 1983 also provided for the granting of FICA and SECA tax credits to individuals. The tax credits are granted at the time the individual is taxed and are funded by the general funds of the Treasury through reimbursement to the trust funds. The FICA tax credit applies only to wages earned in calendar year 1984. The SECA tax credit applies from calendar year 1984 through calendar year 1989. There are small periodic adjustments made due to tax credits being applied retroactively.

#### **Reimbursement for Employee Union Expenses**

In addition to taxation of benefits and tax credits, the PTF account includes reimbursement to the trust funds from general funds, including interest, for certain administrative expenses incurred in support of federal employee union activities. This \$11 million reimbursement is included in SSA's Limitation on Administrative Expenses appropriation.

#### **Transfers to Offset Two Coverage Provisions**

Section 15361 of P.L. 110-246, the Food, Conservation, and Energy Act of 2008, provides for annual transfers from the general fund of the Treasury to the OASDI trust funds in FYs 2009 through 2017 to roughly offset the financial effects of the law's two coverage provisions. Section 15301 of P.L. 110-246 excludes Conservation Reserve Program payments from SECA coverage for OASDI beneficiaries, and Section 15352 increases the limit for the optional method for computing earnings from self-employment. The transfers will be \$6 million in FY 2016 and \$7 million in FY 2017.

#### **Reimbursement for Payroll Tax Holiday**

P.L. 111-312, the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010, reduced employees' payroll contributions from 6.2 percent to 4.2 percent for calendar year 2011. P.L. 112-78, the Temporary Payroll Tax Cut Continuation Act of 2011, amended

## **Payments to Social Security Trust Funds**

P.L. 111-312 to extend the reduced payroll contributions through February 29, 2012. On February 22, 2012, a new law, the Middle Class Tax Relief and Job Creation Act of 2012 (P.L. 112-96) extended the reduced rate through December 31, 2012. The general funds continue to reimburse the trust funds for this loss in tax revenue. The estimated reimbursement from the general fund for the payroll tax holiday is \$118 million in FY 2016.

## BUDGETARY RESOURCES

The PTF annual appropriation request for FY 2017 is \$11,400,000. SSA expects to make \$39,250,450,000 in payments to the trust funds in FY 2017, including amounts appropriated under permanent indefinite authority.

Table 1.2—Amounts Available for Obligation

	FY 2015 Actual	FY 2016 Enacted	FY 2017 Estimate
<b>Annual Appropriation</b>	<b>\$ 16,400,000</b>	<b>\$ 11,400,000</b>	<b>\$ 11,400,000</b>
<b>Permanent Appropriation</b>	<b>\$ 30,922,939,039</b>	<b>\$ 32,721,000,000</b>	<b>\$ 39,239,000,000</b>
Total Appropriation	\$ 30,939,339,039	\$ 32,732,400,000	\$ 39,250,400,000
Unobligated Balance, Start-of-Year	\$ 12,852,343	\$ 12,829,664	\$ 12,779,664
<b>Subtotal Budgetary Resources</b>	<b>\$ 30,952,191,382</b>	<b>\$ 32,745,229,664</b>	<b>\$ 39,263,179,664</b>
<b>Obligations</b>	<b>(\$ 30,926,809,294)</b>	<b>(\$ 32,732,450,000)</b>	<b>(\$ 39,250,450,000)</b>
Unobligated Balance, End-of-Year	\$ 12,829,664	\$ 12,779,664	\$ 12,729,664
Unobligated Balance, Lapsing	\$ 12,552,424	\$ 0	\$ 0

The unobligated balances represent funds appropriated for the Coal Industry Retiree Health Benefits Act (CIRHBA) in FY 1996 and FY 1997 and made available until expended. The lapsed unobligated balances represent the amount of the annual appropriation not obligated in the current year.

## ANALYSIS OF CHANGES

---

The FY 2017 annual appropriation request is the same as the FY 2016 enacted level. The obligations reported below include CIRHBA activity, funded from unobligated balances carried forward from prior years. These funds, provided in FY 1996 and FY 1997, remain available until expended.

**Table 1.3—Summary of Changes**

	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>	<b><i>FY16 to FY17 Change</i></b>
<b>Appropriation</b>	<b>\$ 11,400,000</b>	<b>\$ 11,400,000</b>	<b>\$ 0</b>
<b>Obligations</b>	<b>\$ 11,450,000</b>	<b>\$ 11,450,000</b>	<b>\$ 0</b>

## BUDGET AUTHORITY AND OBLIGATIONS BY ACTIVITY

The table below displays the budget authority and obligations for each of the PTF activities funded by the annual appropriation. Coal Industry Retiree Health Benefit obligations are funded from prior year unobligated balances.

**Table 1.4—New Budget Authority & Obligations, Current Authority  
(In thousands)**

	FY 2015 Actual	FY 2016 Enacted	FY 2017 Estimate
<b><u>Appropriation</u></b>			
Pension Reform	\$ 6,400	\$ 6,400	\$ 6,400
Unnegotiated Checks	\$ 10,000	\$ 5,000	\$ 5,000
Coal Industry Retiree Health Benefits	\$ 0	\$ 0	\$ 0
<b>Total Annual Appropriation</b>	<b>\$ 16,400</b>	<b>\$ 11,400</b>	<b>\$ 11,400</b>
<b><u>Obligations</u></b>			
Pension Reform	\$ 858	\$ 6,400	\$ 6,400
Unnegotiated Checks	\$ 2,989	\$ 5,000	\$ 5,000
Coal Industry Retiree Health Benefits	\$ 23	\$ 50	\$ 50
<b>Total Obligations</b>	<b>\$ 3,870</b>	<b>\$ 11,450</b>	<b>\$ 11,450</b>

## Payments to Social Security Trust Funds

The table below displays budget authority and obligations for the PTF activities not subject to the annual appropriation. This includes taxation of benefits, FICA and SECA tax credits, reimbursement for certain union administrative expenses, transfers to offset the financial effects of the Food, Conservation, and Energy Act of 2008, and reimbursements for the employee payroll tax holiday. The actual amount appropriated for these activities is determined by the actual amount collected from, or to be reimbursed for, each activity.

**Table 1.5—Budget Authority and Obligations,  
Permanent Indefinite Authority  
(In thousands)**

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>
<b><u>Appropriation</u></b>			
Reimb. for Union Administrative Expenses	\$ 9,634	\$ 11,000	\$ 11,000
Food, Conservation, and Energy Act, 2008 <sup>1</sup>	\$ 8,000	\$ 6,000	\$ 7,000
Employee Payroll Tax Holiday <sup>2</sup>	\$ 242,520	\$ 118,000	\$ 0
Taxation of Benefits, U.S.	\$ 30,469,744	\$ 32,383,000	\$ 39,007,000
Taxation of Benefits, Nonresident Alien	\$ 193,000	\$ 203,000	\$ 214,000
FICA Tax Credits	\$ 0	\$ 0	\$ 0
SECA Tax Credits	\$ 41	\$ 0	\$ 0
<b>Total Permanent Appropriation</b>	<b>\$ 30,922,939</b>	<b>\$ 32,721,000</b>	<b>\$ 39,239,000</b>
<b><u>Obligations</u></b>			
Reimb. for Union Administrative Expenses	\$ 9,634	\$ 11,000	\$ 11,000
Food, Conservation, and Energy Act, 2008	\$ 8,000	\$ 6,000	\$ 7,000
Employee Payroll Tax Holiday	\$ 242,520	\$ 118,000	\$ 0
Taxation of Benefits, U.S.	\$ 30,469,744	\$ 32,383,000	\$ 39,007,000
Taxation of Benefits, Nonresident Alien	\$ 193,000	\$ 203,000	\$ 214,000
FICA Tax Credits	\$ 0	\$ 0	\$ 0
SECA Tax Credits	\$ 41	\$ 0	\$ 0
<b>Total Obligations</b>	<b>\$ 30,922,939</b>	<b>\$ 32,721,000</b>	<b>\$ 39,239,000</b>

<sup>1</sup> P.L. 110-246, the Food, Conservation, and Energy Act of 2008 (H.R. 6124) provided that SSA's trust funds would be reimbursed for lost income resulting from enacted changes to the reporting of self-employment income (SECA taxes). The bill established that SSA would be reimbursed from FY 2009 to FY 2017.

<sup>2</sup> P.L. 111-312, the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (H.R. 4853), reduced employees' payroll contributions from 6.2 percent to 4.2 percent for calendar year 2011. P.L. 112-78, the Temporary Payroll Tax Cut Continuation Act of 2011 (H.R. 3765) amended P.L. 111-312 to extend the reduced payroll contributions through February 29, 2012. On February 22, 2012, a new law, the Middle Class Tax Relief and Job Creation Act of 2012 (P.L. 112-96) extended the reduced rate through December 31, 2012. The general funds reimburse the trust funds for the loss in tax revenue (Title VI, Sec 601).

## OBLIGATIONS BY OBJECT CLASS

The table below displays the obligations by object class for the total PTF account (annually and permanently appropriated funds).

**Table 1.6—Obligations by Object  
(In thousands)**

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>
<b>Other Services</b>	\$ 21,545	\$ 28,450	\$ 29,450
<b>Financial Transfers</b>	\$ 30,662,744	\$ 32,586,000	\$ 39,221,000
<b>Financial Transfers: Employee Payroll Tax Holiday</b>	\$ 242,520	\$ 118,000	\$ 0
<b>Total Obligations</b>	<b>\$ 30,926,809</b>	<b>\$ 32,732,450</b>	<b>\$ 39,250,450</b>

## BACKGROUND

### AUTHORIZING LEGISLATION

The PTF account is authorized by the sections of the Social Security Act described below.

**Table 1.7—Authorizing Legislation (In thousands)**

	<b>Amount Authorized</b>	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>
Pension Reform: S.S. Act, Section 1131(b)(2)	Indefinite	\$ 6,400	\$ 6,400	\$ 6,400
Unnegotiated Checks: S.S. Act, Section 201(m); Social Security Amendments of 1983, Section 152	Indefinite	\$ 10,000	\$ 5,000	\$ 5,000
Coal Industry Retiree Health Benefits: Internal Revenue Code of 1986, Sections 9704 and 9706; Energy Policy Act of 1992, Section 19141	Indefinite	\$ 0	\$ 0	\$ 0
<b>Subtotal Annual PTF Appropriation</b>		<b>\$ 16,400</b>	<b>\$ 11,400</b>	<b>\$ 11,400</b>
Reimbursement for Union Administrative Expenses: FY 2002 Social Security Appropriations Act	Permanent Indefinite	\$ 9,634	\$ 11,000	\$ 11,000
Food, Conservation, and Energy Act, 2008: P.L. 110-246, Section 15361	Permanent	\$ 8,000	\$ 6,000	\$ 7,000
Employee Payroll Tax Holiday: P.L. 111-312, Section 601, As Amended By Temporary Payroll Tax Cut Continuation Act: P.L. 112-78	Permanent Indefinite	\$ 242,520	\$ 118,000	\$ 0
Taxation of Benefits, U.S.: Social Security Amendments of 1983, Section 121	Permanent Indefinite	\$ 30,469,744	\$ 32,383,000	\$ 39,007,000
Taxation of Benefits, Nonresident Aliens: Social Security Amendments of 1983, Section 121	Permanent Indefinite	\$ 193,000	\$ 203,000	\$ 214,000
FICA/SECA Tax Credits: Social Security Amendments of 1983, Section 124(b)	Permanent Indefinite	\$ 41	\$ 0	\$ 0
<b>Subtotal Permanent PTF Appropriation</b>		<b>\$ 30,922,939</b>	<b>\$ 32,721,000</b>	<b>\$ 39,239,000</b>
<b>Total Appropriation</b>		<b>\$ 30,939,339</b>	<b>\$ 32,732,400</b>	<b>\$ 39,250,400</b>

## APPROPRIATION HISTORY

The table below displays the annual appropriation requested by SSA, amounts approved by the House and Senate, and the amount ultimately appropriated by Congress. This does not include amounts appropriated under permanent indefinite authority. The FY 2007 appropriation included a one-time reimbursement to the trust funds for an overpayment made from the trust funds to the IRS. The quinquennial adjustment for Military Service Wage Credits is included in the FY 2008 and FY 2011 enacted appropriations. The FY 2008 appropriation also included funds to administer economic recovery payments to beneficiaries.

**Table 1.8—Appropriation History Table**

Fiscal Year	Budget Estimate to Congress	House Committee Passed	Senate Committee Passed	Enacted Appropriation
2007 <sup>1</sup>	\$ 27,756,000	\$ 27,756,000 <sup>2</sup>	\$ 27,756,000 <sup>3</sup>	\$ 20,416,000 <sup>4</sup>
Trust Funds Restoration Act <sup>5</sup>				\$ 1,297,614,000
2008 <sup>6</sup>	\$ 28,140,000	\$ 28,140,000 <sup>7</sup>	\$ 28,140,000 <sup>8</sup>	\$ 28,140,000 <sup>9</sup>
Economic Stimulus Act <sup>10</sup>				\$ 31,000,000
2009	\$ 20,406,000	-- <sup>11</sup>	\$ 20,406,000 <sup>12</sup>	\$ 20,406,000 <sup>13</sup>
2010	\$ 20,404,000	\$ 20,404,000 <sup>14</sup>	\$ 20,404,000 <sup>15</sup>	\$ 20,404,000 <sup>16</sup>
2011 <sup>17</sup>	\$ 21,404,000	-- <sup>18</sup>	\$ 21,404,000 <sup>19</sup>	\$ 21,404,000 <sup>20</sup>
2012	\$ 20,404,000	-- <sup>21</sup>	\$ 20,404,000 <sup>22</sup>	\$ 20,404,000 <sup>23</sup>
2013	\$ 20,402,000	-- <sup>24</sup>	\$ 20,404,000 <sup>25</sup>	\$ 20,404,000 <sup>26</sup>
2014	\$ 16,400,000	-- <sup>27</sup>	\$ 16,400,000 <sup>28</sup>	\$ 16,400,000 <sup>29</sup>
2015	\$ 16,400,000	\$ 16,400,000 <sup>30</sup>	--- <sup>31</sup>	\$ 16,400,000 <sup>32</sup>
2016	\$ 20,400,000	\$ 20,400,000 <sup>33</sup>	\$ 20,400,000 <sup>34</sup>	\$ 11,400,000 <sup>35</sup>
<b>2017</b>	<b>\$ 11,400,000</b>			

<sup>1</sup> The FY 2007 request included \$7,340,000 for the quinquennial adjustment to the Federal Disability Insurance Trust Fund for the costs of granting noncontributory credit for military service. This was not appropriated for FY 2007.

<sup>2</sup> H.R. 5647.

<sup>3</sup> S. 3708.

<sup>4</sup> Revised Continuing Appropriations Resolution, 2007 (P.L. 110-5).

<sup>5</sup> Appropriation provided by the Social Security Trust Funds Restoration Act of 2006 (P.L. 109-465), to repay the Social Security trust funds for an overpayment to the Internal Revenue Service for Voluntary Income Tax Withholding.

<sup>6</sup> Includes \$7,727,000 for the quinquennial adjustment to the Federal Disability Insurance Trust Fund for the costs of granting noncontributory credit for military service.

<sup>7</sup> H.R. 3043.

<sup>8</sup> S. 1710.

## Payments to Social Security Trust Funds

---

- <sup>9</sup> Consolidated Appropriations Act, 2008 (P.L. 110-161).
- <sup>10</sup> Appropriation provided by the Economic Stimulus Act of 2008, P.L. 110-185, for agency administrative costs related to stimulus payments to Social Security beneficiaries.
- <sup>11</sup> The House Committee on Appropriations did not report a bill.
- <sup>12</sup> S. 3230.
- <sup>13</sup> Omnibus Appropriations Act, 2009 (P.L. 111-8).
- <sup>14</sup> H.R. 3293.
- <sup>15</sup> H.R. 3293, reported from Committee with an amendment.
- <sup>16</sup> Consolidated Appropriations Act, 2010 (P.L. 111-117).
- <sup>17</sup> Requested \$1 million in FY 2011 for the quinquennial adjustment for military service wage credits from the general funds to the Federal Disability Insurance Trust Fund. However, we later determined that transfers should be made from the trust funds to the general fund in FY 2011.
- <sup>18</sup> The House Committee on Appropriations did not report a bill.
- <sup>19</sup> S. 3686.
- <sup>20</sup> Department of Defense and Full-Year Continuing Appropriations Act, 2011 (P.L. 112-10).
- <sup>21</sup> The House Committee on Appropriations did not report a bill. Appropriations Chairman Rehberg introduced H.R. 3070, which included \$20,404,000.
- <sup>22</sup> S. 1599.

## PENSION REFORM

**Authorizing Legislation:** Section 1131(b)(2) of the Social Security Act.

### PURPOSE AND METHOD OF OPERATION

The purpose of this payment is to reimburse the OASI Trust Fund for the cost of certain pension reform activities chargeable to Federal funds.

**Table 1.9—Pension Reform: Budget Authority**

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>	<b>FY16 to FY17 Change</b>
<b>Budget Authority</b>	\$ 6,400,000	\$ 6,400,000	<b>\$ 6,400,000</b>	<b>\$ 0</b>

The Employee Retirement Income Security Act of 1974, P.L. 93-406 (Pension Reform Act, also known as ERISA) established section 1131 of the Social Security Act. This requires the Commissioner of Social Security to furnish information regarding deferred vested pension rights to pension plan participants (and their dependents or survivors), either upon request or automatically upon application for retirement, survivors, or disability insurance benefits.

Each time an employee leaves employment that earned him or her vested rights to a pension, SSA or its contractor representative receives related information from the IRS in either paper or electronic format. SSA or its contractor representative controls, scans (using optical character recognition), and, if necessary, keys the paper forms and transfers the data to the ERISA mainframe system. This data, along with electronic data received from the IRS, is added to the ERISA Master Files after name verification against the NUMIDENT (SSN record) database takes place. Each month, an activity file of new benefit applications is compared to the ERISA Master Files. SSA sends an ERISA notice of pension plan eligibility to individuals included in both the activity file and the ERISA Master Files. This notice includes the information the worker needs to contact the pension plan administrator. SSA staff also resolves exceptions and responds to inquiries from employers and the public.

Section 1131(b)(1) permits the administrative expenses of carrying out this pension reform work to be funded initially from the OASI Trust Fund through SSA's Limitation on Administrative Expenses. Section 1131(b)(2) authorizes an annual appropriation of federal funds to reimburse the OASI Trust Fund. To the extent that resources needed to process this workload exceed the budget authority available for reimbursement in the current year, reimbursement is made to the OASI Trust Fund at the beginning of the subsequent year, including interest as appropriate. SSA began to incur pension reform administrative expenses in FY 1977.

**Table 1.10—Pension Reform: Obligations**

<b>Fiscal Year</b>	<b>Obligations</b>
FY 2008	\$ 1,200,000
FY 2009	\$ 813,000
FY 2010	\$ 2,022,000
FY 2011 <sup>1</sup>	\$ 3,802,000
FY 2012	\$ 6,400,000
FY 2013	\$ 2,521,092
FY 2014	\$ 1,010,592
FY 2015	\$ 858,477
FY 2016 Estimate	\$ 6,400,000
<b>FY 2017 Estimate</b>	<b>\$ 6,400,000</b>

## RATIONALE FOR BUDGET REQUEST

The FY 2017 budget requests \$6,400,000 to reimburse the OASI Trust Fund for the cost of carrying out SSA's responsibilities under the Pension Reform Act. The FY 2017 request is the same as the FY 2016 enacted level. The table below summarizes the recent trend of pension coverage report receipts:

**Table 1.11—Receipts from Pension Coverage Reports**

<b>Fiscal Year</b>	<b>Pension Coverage Report Receipts</b>
FY 2004	5,621,371
FY 2005	5,363,409
FY 2006	6,003,014
FY 2007	5,397,935
FY 2008	5,554,314
FY 2009	6,073,898
FY 2010	6,334,329
FY 2011 <sup>2</sup>	68,159
FY 2012	10,454,215
FY 2013	3,810,675
FY 2014	8,074,160
<b>FY 2015</b>	<b>6,310,851</b>

<sup>1</sup> Despite a downturn in report receipts, due to costs incurred to support the conversion of ERISA microfilm to computer images, as well as other IT-related costs, obligations for Pension Reform increased in FY 2011.

<sup>2</sup> Because IRS created a new form (IRS Form 8955-SSA) for filers and a new electronic filing system, in addition to granting a filing deferral during this timeframe, most of the pension coverage report receipts were input into the system in FY 2012 (i.e., FY 2012 receipts essentially represent 2 years of receipts).

## UNNEGOTIATED CHECKS

**Authorizing Legislation:** Section 201(m) of the Social Security Act and Section 152 of P.L. 98-21.

### PURPOSE AND METHOD OF OPERATION

The purpose of this payment is to reimburse the OASI and DI Trust Funds for the value of interest on benefit checks cashed after 6 months or subsequently cancelled.

**Table 1.12—Unnegotiated Checks: Budget Authority**

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>	<b>FY16 to FY17 Change</b>
<b>Budget Authority</b>	\$ 10,000,000	\$ 5,000,000	<b>\$ 5,000,000</b>	\$ 0

This activity was originally established to reimburse the trust funds for uncashed benefit checks and accrued interest. Beginning October 1, 1989, Social Security checks, like those issued by other federal agencies, are negotiable for only 12 months from their date of issue under the provisions of the Competitive Equality Banking Act (CEBA) of 1987 (P.L. 100-86). In the 14<sup>th</sup> month after issue, the Department of the Treasury prepares a listing of checks outstanding from each agency, cancels those checks, and refunds the value of checks canceled to the authorizing agencies. Under this "Limited Payability" procedure, the value of unnegotiated checks issued on or after October 1, 1989 are credited directly to the trust funds from Treasury's general fund when the checks are canceled, pursuant to P.L. 100-86. These funds do not pass through the Payments to Social Security Trust Funds account. However, the interest adjustment must be paid through this account because CEBA made no provision for it.

This appropriation funds the estimated ongoing level of activity and represents the value of interest for unnegotiated OASDI benefit checks.

**Table 1.13—Unnegotiated Checks: Obligations**

<b>Fiscal Year</b>	<b>Obligations</b>
FY 2009	\$ 8,756,319
FY 2010	\$ 7,435,351
FY 2011	\$ 7,471,475
FY 2012	\$ 5,910,374
FY 2013	\$ 3,082,985
FY 2014	\$ 2,698,386
FY 2015	\$ 2,989,099
FY 2016 Estimate	\$ 5,000,000
<b>FY 2017 Estimate</b>	<b>\$ 5,000,000</b>

## Payments to Social Security Trust Funds

The actual interest reflects the ongoing shift of beneficiaries away from the paper check method of benefit payment to direct deposit. On December 21, 2010, the Department of Treasury published a final rule amending 31 Code of Federal Regulations Part 208 to require recipients of federal benefits and nontax payments to receive their payments by electronic funds transfer. People who apply for Social Security benefits on or after May 1, 2011 receive their payments electronically. Many people who previously received federal benefit checks before May 1, 2011 have switched to an electronic payment. As a result, the final rule has decreased the volume of unnegotiated benefit checks, and we expect this trend to continue. Benefits paid via direct deposit bypass the mechanism in which there is the possibility of an uncashed check. However, the effect of the growth in direct deposit participation on unnegotiated check interest is somewhat offset by increases in the number of beneficiaries and in the average monthly benefit payments. The following table summarizes the recent trend in the percentage of OASDI beneficiaries enrolled in the direct deposit payment program.

**Table 1.14—Direct Deposit Participation Rate**

	<b>Direct Deposit Participation Rate</b>
December 2006	84%
December 2007	85%
December 2008	86%
December 2009	87%
December 2010	88%
December 2011	91%
December 2012	95%
December 2013	98%
December 2014	99%
<b>December 2015</b>	<b>99%</b>

---

## RATIONALE FOR BUDGET REQUEST

---

The FY 2017 request is for \$5,000,000 to reimburse the OASDI Trust Funds for the value of interest on unnegotiated checks. The FY 2017 request is equal to the FY 2016 enacted.

**Table 1.15—Unnegotiated Checks: Budget Authority by Trust Fund**

	<b>FY 2017 Estimate</b>
OASI Trust Fund	\$ 3,000,000
DI Trust Fund	\$ 2,000,000
<b>Total</b>	<b>\$ 5,000,000</b>

## COAL INDUSTRY RETIREE HEALTH BENEFITS

**Authorizing Legislation:** Sections 9704 and 9706 of the Internal Revenue Code of 1986 as amended by section 19141 of the Energy Policy Act of 1992.

### PURPOSE AND METHOD OF OPERATION

The purpose of this payment is to reimburse the OASDI Trust Funds for work carried out under section 19141 of the Energy Policy Act of 1992 (Public Law 102-486), which established the Coal Industry Retiree Health Benefit Act of 1992 (CIRHBA).

**Table 1.16—Coal Industry Retiree Health Benefits: Obligations**

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>	<b>FY16 to FY17 Change</b>
<b>New Budget Authority</b>	\$ 0	\$ 0	\$ 0	\$ 0
<b>Obligations</b>	\$ 22,679	\$ 50,000	<b>\$ 50,000</b>	\$ 0

CIRHBA combined two existing United Mine Workers of America (UMWA) pension plans into a single fund and required that certain existing coal mine operators pay health benefit premiums for the new combined plan. The law directed the Commissioner of Social Security to:

- Search the earnings records of the group of retired coal miners covered by the combined plan;
- Determine which retirees should be assigned to which mine operators;
- Notify the involved mine operators of the names and Social Security numbers of eligible beneficiaries who have been assigned to them;
- Process appeals from operators who believe that assignments have been made incorrectly; and
- Compute the premiums based on a formula established in the Act.

## PROGRESS TO DATE

---

SSA has completed initial decisions and reviews on all of the retired miners covered under the provisions of the 1992 CIRHBA. In addition, SSA implemented the Coal Act provisions of the Tax Relief and Health Care Act of 2006 (P.L. 109-432), which significantly affected and restructured CIRHBA. SSA carefully reviewed the legislation, obtained legal advice, and assessed how P.L. 109-432 affected existing policies and procedures. SSA complied with the provision that specifically directed the Commissioner to “revoke all assignments to persons other than 1988 agreement operators for purposes of assessing premiums for plan years beginning on or after October 1, 2007.”

SSA devoted considerable time and resources to comply with P.L. 109-432. All court cases challenging SSA’s involvement in the Coal Act are now closed. There is no active litigation. SSA has also completed its obligation to provide yearly data on miner assignments to the UMWA Combined Benefit Fund. However, SSA’s Office of the Actuary continues to compute the per beneficiary premiums on a yearly basis.

This account provides general fund reimbursement to the trust funds to the extent that the Limitation on Administrative Expenses account advances funds for SSA to carry out this work. Additional funds are not requested for FY 2017 because the balance of the \$10,000,000 per year appropriated in FY 1996 and in FY 1997 remains available until expended to reimburse the trust funds.

## MILITARY SERVICE WAGE CREDITS

**Prior Authorizing Legislation:** Section 217(g) of the Social Security Act.

**Terminating Legislation:** Section 842 of the Bipartisan Budget Act of 2015.

### PURPOSE AND METHOD OF OPERATION

The purpose of this payment was to reimburse the OASDI trust funds, as necessary, for the costs of granting noncontributory wage credits for pre-1957 military service, as authorized by Section 217(g). Section 842 of the 2015 Bipartisan Budget Act made 2010 the final year for adjustments/transfers.

Pre-1957 Military Service: The 1946 Social Security Amendments provided for payment of Social Security benefits to World War II veterans and their survivors based upon noncontributory wage credits of \$160 for each month of the veteran's active military service. Subsequent amendments extended the period for which these credits were granted through December 1956. For that period, the Social Security Act did not require contributions to the trust funds based on the wages of individuals in the military service. To finance the additional costs incurred in paying benefits, which are based on periods of military service before 1957 for which no contributions were made, the Social Security Act provides for reimbursement to the OASI and the DI trust funds from the general fund of the Treasury.

The Social Security Amendments of 1983 modified section 217(g) to reimburse the trust funds in a lump sum for the present value of all future benefits arising from the gratuitous credits granted for military service before 1957. This provision directed the Secretary of the Treasury to transfer the pre-1957 wage credit lump sum to the trust funds within 30 days after enactment of the legislation. Section 217(g) required that the Commissioner adjust this lump sum transfer every fifth year beginning in 1985. This adjustment was required to be done on the basis of the actual benefit payment and administrative expense data available at the time of the determination, as well as the relevant actuarial assumptions in the Social Security Trustees Report issued in the year of the adjustment. Under the 1983 amendments, the only costs of pre-1957 military service credits included in the determination of this adjustment were additional benefit payments and associated administrative expenses incurred as a result of the granting of these non-contributory wage credits. This adjustment amount was required by section 217(g) to be transferred within 30 days of the date of the determination.

Following the initial transfers from the general fund to the trust funds in 1983 and 1985, the quinquennial adjustments resulted in the transfer of funds from SSA's trust funds to the general fund of the Treasury each time until the 2000 determination was prepared. In that year, it was determined that the general fund owed a payment to the OASI trust fund instead. The FY 2002 appropriation for this transfer, including interest, was \$414,000,000. Appropriations were not needed whenever quinquennial transfers were determined to be due from the trust funds to the general fund.

## **Payments to Social Security Trust Funds**

The 2010 quinquennial adjustment took place December 30, 2010 and included a \$113 million transfer from the OASI trust fund to the general fund and a \$3 million transfer from the DI trust fund to the general fund.

## APPROPRIATION LANGUAGE

### SUPPLEMENTAL SECURITY INCOME PROGRAM

For carrying out titles XI and XVI of the Social Security Act, section 401 of Public Law 92-603, section 212 of Public Law 93-66, as amended, and section 405 of Public Law 95-216, including payment to the Social Security trust funds for administrative expenses incurred pursuant to section 201(g)(1) of the Social Security Act, [\$46,305,733,000] \$43,824,868,000 to remain available until expended: *Provided*, That any portion of the funds provided to a State in the current fiscal year and not obligated by the State during that year shall be returned to the Treasury: *Provided further*, That not more than [\$101,000,000] \$58,000,000 shall be available for research and demonstrations under sections 1110, 1115, and 1144 of the Social Security Act and remain available through September 30, [2018] 2019.

For making, after June 15 of the current fiscal year, benefit payments to individuals under title XVI of the Social Security Act, for unanticipated costs incurred for the current fiscal year, such sums as may be necessary.

For making benefit payments under title XVI of the Social Security Act for the first quarter of fiscal year [2017] 2018, [\$14,500,000,000] \$15,000,000,000, to remain available until expended. (Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2016.)

## LANGUAGE ANALYSIS

---

The appropriation language provides the Social Security Administration (SSA) with the funds needed to carry out its responsibilities under the Supplemental Security Income (SSI) program. This includes the funds needed to pay Federal benefits, administer the program, and provide beneficiary services to recipients. The budget authority for these activities is made available until expended, providing SSA the authority to carryover unobligated balances for use in future fiscal years. In addition, a portion of this funding is made available for SSA to conduct research and demonstration projects, which is available for 3 years, providing SSA the authority to carryover unobligated balances into the next fiscal year.

In addition, the language provides SSA with indefinite authority beginning June 15 in the event Federal benefit payment obligations in FY 2017 are higher than expected and SSA does not have sufficient unobligated balances to cover the difference. Consistent with previous years, the appropriation also includes an advance appropriation for Federal benefit payments in the first quarter of FY 2018 to ensure the timely payment of benefits in case of a delay in the FY 2018 appropriations bill.

**Table 2.1—Appropriation Language Analysis**

Language provision	Explanation
"For carrying out titles XI and XVI of the Social Security Act... including payment to the Social Security trust funds for administrative expenses incurred pursuant to section 201(g)(1) of the Social Security Act, \$43,824,868,000, to remain available until expended:"	Appropriates funds for Federal benefit payments, administrative expenses, beneficiary services, and research and demonstration projects under the SSI program. SSA may carryover unobligated balances for use in future fiscal years.
"Provided, That any portion of the funds provided to a State in the current fiscal year and not obligated by the State during that year shall be returned to the Treasury."	Ensures that states do not carry unobligated balances of Federal funds into the subsequent fiscal year. Applies primarily to the beneficiary services activity.
Provided further, That not more than \$58,000,000 shall be available for research and demonstrations under sections 1110, 1115, and 1144 of the Social Security Act and remain available through September 30, 2019.	Specifies that not more than \$58 million of the SSI appropriation is available for research and demonstration projects. SSA may carryover unobligated balances through September 30, 2019.

## Supplemental Security Income Program

"For making, after June 15 of the current fiscal year, benefit payments to individuals under title XVI of the Social Security Act, for unanticipated costs incurred for the current fiscal year, such sums as may be necessary."	Provides an indefinite appropriation to finance any shortfall in the definite appropriation for benefit payments during the last months of the fiscal year.
"For making benefit payments under title XVI of the Social Security Act for the first quarter of fiscal year 2018, \$15,000,000,000, to remain available until expended."	Appropriates funds for benefit payments in the first quarter of the subsequent fiscal year. Ensures that recipients will continue to receive benefits during the first quarter of FY 2018 in the event of a temporary funding hiatus.

## GENERAL STATEMENT

The SSI program guarantees a minimum level of income to financially needy individuals who are aged, blind, or disabled. The program was created in 1972 by Title XVI of the Social Security Act and payments began January 1974. It is Federally-administered and funded from general revenues.

Prior to the establishment of the SSI program, the Social Security Act provided means-tested assistance through three separate programs—Old-Age Assistance, Aid to the Blind, and Aid to the Permanently and Totally Disabled. Federal law only established broad guidelines, with each state largely responsible for setting its own eligibility and payment standards. The SSI program was established to provide uniform standards across states.

**Table 2.2—Summary of Appropriations and Obligations  
(in thousands)**

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>	<b>Change</b>
Appropriation	\$ 60,932,978	\$ 64,429,733 <sup>1</sup>	<b>\$ 58,324,868</b>	-\$ 6,104,865
Obligations	\$ 59,422,736	\$ 64,512,412	<b>\$ 61,646,258</b>	- \$ 2,866,154
First Quarter Advance Appropriation for Subsequent Fiscal Year	\$ 19,200,000	\$14,500,000	<b>\$ 15,000,000</b>	+ \$ 500,000

## PROGRAM OVERVIEW

### Eligibility Standards

As a means-tested program, individuals must have income and resources below specified levels to be eligible for benefits. Rules allow some specific categories of income and resources to be either totally or partially excluded. Recently, the ABLE Act of 2014 created a new type of tax-advantaged account that has a limited effect on an individual's eligibility for the SSI program and other Federal means-tested programs.

An individual's benefit payment is reduced dollar for dollar by the amount of their "countable income"—income less all applicable exclusions—in a given month. Income in the SSI program includes "earned income" such as wages and net earnings from self-employment; and "unearned income" such as Social Security benefits, unemployment compensation, deemed income from a spouse or parent, and the value of in-kind support and maintenance such as food and shelter. Different exclusion rules apply for different types of income.

<sup>1</sup> Reflects the most recent Federal benefit estimate from SSA's Office of the Chief Actuary.

### **Incentives for Work and Opportunities for Rehabilitation**

The SSI program is designed to help recipients with disabilities achieve independence by encouraging and supporting their attempts to work. The program includes a number of work incentive provisions that enable recipients who are blind or disabled to work and retain benefits. The program also includes provisions to help disabled beneficiaries obtain vocational rehabilitation and employment support services. These provisions were revised by legislation establishing the Ticket to Work program, discussed in more detail in the Beneficiary Services section.

### **State Supplementation**

Supplementation is mandatory for certain recipients who were on state rolls just prior to the creation of the Federal program on January 1, 1974. Otherwise, states are encouraged to supplement the Federal benefit and may elect to have their state supplementation program administered by SSA. States that choose to have SSA administer their program reimburse SSA in advance and SSA makes the payment on behalf of the state. Participating states also reimburse SSA for the cost of administering their program, based on a user fee schedule established by the Social Security Act. The user fee is \$11.56 per SSI check payment in FY 2016 and is expected to increase to \$11.69 in FY 2017. The Department of Treasury receives the first \$5.00 of each fee and SSA retains the amount over \$5.00.

### **Coordination with Other Programs**

SSA plays an important role in helping states administer Medicaid and the Supplemental Nutrition Assistance Program (SNAP). Provisions in the SSI statute ensure that payments made by states or under the Social Security program are not duplicated by SSI benefits.

Generally, SSI recipients are categorically eligible for Medicaid. States may either use SSI eligibility criteria for determining Medicaid eligibility or use their own, provided the criteria are no more restrictive than the state's January 1972 medical assistance standards.

SSI recipients may qualify for SNAP. Social Security offices work with SSI applicants and recipients in a variety of ways to help them file for SNAP, including informing them of their potential benefits, making applications available to them, and in some cases helping them complete their applications. Social Security also shares applicant data with a number of states in support of SNAP.

### **Benefit Payments**

SSA estimates it will pay \$56.2 billion in Federal benefits to an estimated 8.2 million SSI recipients in FY 2017. Including state supplementary payments, SSA expects to pay a total of \$58.8 billion and administer payments to a total of over 8.4 million recipients.

Federal benefit payments represent approximately 91 percent of Federal SSI spending. Administrative expenses represent nearly 9 percent of spending; beneficiary services and research and demonstration projects make up the remaining less than one percent.

## FY 2017 PRESIDENT'S BUDGET REQUEST

The SSI appropriation includes funds for Federal benefit payments, administrative expenses, beneficiary services, and research and demonstration projects. In total, the President's Budget request for FY 2017 is \$58,324,868,000. However, this includes \$14,500,000,000 made available for the first quarter of FY 2017 in the FY 2016 appropriation. The appropriation language provides SSA with its remaining appropriation for FY 2017, \$43,824,868,000—the total amount requested for FY 2017 less the advance already received.

Similarly, in addition to the amount above, the request includes an advance appropriation of \$15,000,000,000 for Federal benefit payments in the first quarter of FY 2018. This advance is to ensure recipients continue to receive their benefits at the beginning of the subsequent fiscal year in case there is a delay in passing that year's appropriation.

**Table 2.3—Appropriation Detail <sup>1</sup>**  
(in thousands)

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted<sup>2</sup></b>	<b>FY 2017 Estimate</b>	<b>Change</b>
Advance for Federal Benefits <sup>3</sup>	\$ 19,700,000	\$ 19,200,000	\$ 14,500,000	
Regular for Federal Benefits	\$ 36,501,000	\$ 40,410,000	\$ 38,441,736	
<b>Subtotal Federal Benefits</b>	<b>\$ 56,201,000</b>	<b>\$ 59,610,000</b>	<b>\$52,941,736</b>	<b>- \$ 6,668,264</b>

Total Appropriation	\$ 60,932,978	\$ 64,429,733	\$ 58,324,868	- \$ 6,104,865
<b>Advance for Subsequent Year</b>	<b>\$ 19,200,000</b>	<b>\$ 14,500,000</b>	<b>\$ 15,000,000</b>	<b>+ \$ 500,000</b>

<sup>1</sup> Does not include state supplementary payments and reimbursements or the corresponding state supplementary user fee collections; user fees are included in the Limitation on Administrative Expenses (LAE) appropriation.

<sup>2</sup> Federal benefit numbers reflect the most recent estimates from SSA's Office of the Chief Actuary.

<sup>3</sup> Amount provided or requested in the previous year's appropriation bill.

## KEY INITIATIVES

---

SSA continues to pursue efforts to ensure the proper management and stewardship of the SSI program.

### **Payment Accuracy**

For more than 80 years, SSA has been committed to paying the right benefit to the right person at the right time. The challenge of meeting this goal is especially apparent in the administration of the SSI program because eligibility and payment amounts are so closely tied to the fluctuating circumstances of individual recipients. In FY 2014, 93.0 percent of SSI benefit payments were free of overpayment errors and 98.5 percent were free of underpayment errors. The vast majority of incorrect payments are the result of unreported changes to recipients' incomes, resources, or living arrangements.

While maintaining and improving payment accuracy remains a challenge, SSA considers it a matter of great importance to continue to improve administration of the SSI program. SSA has taken steps to prevent overpayments before they occur and is addressing the two largest (in dollar amounts) causes of overpayments: unreported wages and unreported bank accounts.

### **Continuing Disability Reviews and Non-Disability Redeterminations**

SSI continuing disability reviews (CDRs) are periodic reviews conducted to ensure recipients are still disabled according to agency rules. The frequency of these reviews is dependent on the likelihood that a recipient's medical condition will change. Non-disability redeterminations (redeterminations) are periodic reviews that verify living arrangements, income levels, and other non-disability factors related to SSI eligibility. Similar to CDRs, the frequency of redeterminations is determined by the probability that changes affecting eligibility will occur. CDRs and redeterminations are key activities in ensuring the integrity of the SSI program and maintaining and improving payment accuracy.

The FY 2017 President's Budget request includes \$1,342 million specifically for conducting SSI CDRs and redeterminations, which would allow SSA to conduct about 621,000 SSI CDRs<sup>1</sup> and 2,822,000 redeterminations. For details on the estimated program savings resulting from the PI proposal, please refer to the Budget Process chapter in the Analytical Perspectives volume of the Budget.

### **Access to Financial Institutions**

Access to Financial Institutions (AFI) is an electronic process that verifies bank account balances with financial institutions for purposes of determining SSI eligibility. In addition to verifying alleged accounts, AFI detects undisclosed accounts by using geographic searches to generate requests to other financial institutions. AFI's purpose is to identify excess resources in financial accounts, which are a leading cause of SSI payment errors. We currently use the AFI system in all 50 States, the District of Columbia, and the Commonwealth of the Northern Mariana Islands

---

<sup>1</sup> The total estimated CDR volume is 1,100,000. We expect to complete about 479,000 Social Security Disability Insurance (DI)/Concurrent CDRs in addition to SSI CDRs.

for essentially all SSI non-medical redeterminations and full applications where there is an allegation of financial resources above the current AFI resource tolerance level.

Along with preventing overpayments, AFI can help us to eliminate ineligible applicants at the beginning of the application process, reducing the workload in the State Disability Determination Services. Full implementation is defined as using AFI on essentially every full SSI claim and non-medical redetermination and assumes using 10 geographic searches per person where possible and fully integrating the process with our systems. In 2013, we expanded the use of AFI and increased geographic searches from 5 to 10, moving closer to full implementation. While we expect the 2016 account verifications to be cost effective, we continue to evaluate aspects of AFI to see if further enhancements would be beneficial.

Additionally, as part of the Bipartisan Budget Act of 2015, AFI will help us to make informed decisions on overpayment waiver requests. The change in the law grants us the ability to verify financial information for all overpaid individuals who request waivers to determine whether they have the ability to repay their overpayment. We must obtain authorization from the overpaid individual to request the financial records. If an individual refuses to provide or revokes any authorization to obtain financial records, we may determine that they do not meet one of the requirements for granting a waiver.

### **Pre-Effectuation Reviews**

The Deficit Reduction Act of 2005 provided SSA with the authority to conduct pre-effectuation reviews (PER) for favorable initial SSI adult blindness or disability determinations. SSA started conducting these reviews in April 2006. They are conducted before the individual is awarded benefits and are done to ensure the accuracy of the determinations made by State Agencies.

The DI program already required PERs, but prior to this legislation only SSI adult disability claims involving concurrent SSI/DI claims were subject to review. SSI PERs support the performance measure to reduce improper payments, improve the accuracy and integrity of the SSI program, and make the SSI and DI programs more consistent.

### **Combating Fraud**

SSA continues to engage in an aggressive program to deter, detect, investigate, and prosecute fraud. During FY 2015, SSA's Office of the Inspector General (OIG) received almost 90,000 fraud-related allegations via telephone, correspondence, fax, or email. Of those allegations, almost 21,100 were related to SSI fraud. As allegations are received, they are carefully reviewed to determine the most appropriate course of action, such as referral to OIG's Office of Investigations Field Divisions, other components of OIG, outside law enforcement agencies, or other program or policy components in SSA. In addition to matching the law enforcement data received pursuant to the matching program, Federal law authorizes OIG and SSA to release information back to law enforcement regarding beneficiaries and recipients who have unsatisfied felony arrest warrants or who are violating a condition of probation or parole imposed under Federal or State law. Individuals are identified by using an automated data matching process which compares warrant information at the State and Federal levels with the SSI rolls.

### SSI Simplification

The process of evaluating eligibility and payment levels for the SSI program and addressing the accuracy of payments that have already been made is inherently complex. SSA remains committed to simplifying the SSI program and is exploring ways to do this in a fair and equitable manner.

### Debt Collection

SSA currently makes use of the following debt collection tools that are authorized by law: benefit withholding; cross-program recovery; repayment by installment agreements; Credit Bureau Reporting; Administrative Wage Garnishment; and the Treasury Offset Program (TOP), which includes Tax Refund Offset (TRO), Administrative Offset (e.g., Federal travel and expense reimbursements), and Federal Salary Offset. Using these debt collection tools, SSA collected \$1.2 billion in SSI overpayments, including Federally-administered state supplement overpayments, in FY 2015. Also in FY 2015, SSA eliminated an additional \$123.4 million through Netting, a process that adjusts SSI overpayments through an automated offset against SSI underpayments.

SSA began collecting SSI overpayments by TRO in 1998 under the authority of The Deficit Reduction Act of 1984. The Foster Care Independence Act of 1999 extended to the SSI program all of the additional debt collection authorities previously available for collection of overpayments under the Social Security retirement and disability programs. In FY 2002, SSA expanded the use of TOP by implementing Administrative Offset. SSA further expanded the use of TOP in FY 2006 when the agency implemented Federal Salary Offset, a collection tool used to collect delinquent overpayments owed by Federal employees, including employees who work for SSA. We again expanded our use of TOP in FYs 2012 and 2013. In FY 2012, we began referring debts delinquent for 10 years or longer to TOP<sup>1</sup> and in FY 2013, we began collecting delinquent debts via TOP through Treasury's State Reciprocal Program (SRP). The SRP allows States to enter into reciprocal agreements with Treasury to collect unpaid State debt by offset of Federal non-tax payments. In return, the agreements allow the Federal Government to collect delinquent non-tax debt by offset of State payments. In FY 2015, TOP enabled the agency to collect \$71.5 million in delinquent SSI overpayments.

In FY 2002, SSA implemented Credit Bureau Reporting and Cross Program Recovery. In FY 2015, Credit Bureau Reporting contributed to the voluntary repayment of almost \$30 million and the Agency recovered \$123.8 million via Cross Program Recovery.

In FY 2005, SSA implemented Administrative Wage Garnishment, which has collected \$27 million in SSI debt through FY 2015. In the future, SSA plans to implement the remaining authorized collection tools, which include interest charging, administrative cost recovery, and the use of private collection agencies.

---

<sup>1</sup> In April 2014, some members of the public alleged that they received no prior notice that the Department of Treasury would offset their eligible payments to recover their delinquent overpayments. In response to the allegations, effective April 14, 2014, our Acting Commissioner ordered a halt of TOP referrals for debts 10 years or more delinquent, pending a thorough review of our responsibility and discretion under the law. Please refer to the legislative proposals section on page 170 of the LAE section for our proposed actions moving forward.

## Computer Matching Programs

SSA routinely matches SSI recipient data with data maintained by other Federal, state, and local government entities to detect changes in income, resources, or living arrangements that may affect SSI eligibility. In addition, the Foster Care Independence Act of 1999 provides for expansion of access to data from financial institutions.

SSA's computer matching operations include matches with:

- Prison inmate records to find recipients made ineligible by incarceration;
- Law enforcement agencies data on fugitive felons;
- Quarterly data on wage and unemployment compensation information;
- Monthly nursing home admission and discharge information;
- Internal Revenue Service records of non-wage income reported via 1099s to detect resources and/or income;
- Bureau of Public Debt's Savings Bond records to detect unreported assets;
- Department of Defense (DOD) records to detect and verify DOD pension information;
- Veterans Administration benefit data to be used in SSI benefit calculations;
- Office of Personnel Management pension data to be used in certain SSI benefit calculations;
- Railroad Retirement Board data to be used in certain SSI benefit calculations;
- Department of Homeland Security (DHS) data for deportation information on aliens outside the U.S. for more than 30 continuous days to terminate SSI benefits;
- DHS records of aliens who voluntarily leave the U.S; and
- AFI system to electronically request and receive financial account information.

Actions taken as a result of such matches include independent verification of assets or income. If this results in a change in payment amount or eligibility, notification is provided to the recipient of the findings along with appeal and waiver rights.

## Legislative Proposal – Refugees, Asylees, and Other Humanitarian Immigrants

Refugees and certain other humanitarian immigrants who are disabled or elderly are potentially eligible for SSI benefits for up to 7 years from the date they attained their immigration status, and without time limit if they become naturalized. The “SSI Extension for Elderly and Disabled Refugees Act” (Public Law 110-328) extended the 7-year SSI eligibility period for refugees, asylees, and certain other humanitarian immigrants to 9 years for FY 2009 through FY 2011. Effective October 2011, the SSI eligibility period for refugees and other humanitarian immigrants reverted to 7 years. This proposal would underscore the nation's commitment to

## **Supplemental Security Income Program**

refugees, asylees, and other humanitarian immigrants by again extending the time limit from 7 to 9 years during fiscal years 2017 and 2018.

Additional legislative proposals would:

- Hold facilitators liable for overpayments
- Authorize SSA to establish a computer match with the Department of Homeland Security's Customs and Border Protection data for purposes of enforcing lawful presence provisions
- Restore quarterly reporting of wages for individuals
- Conform treatment of state and local government earned income tax credits and child tax credits
- Develop a process to collect workers' compensation information from states and private insurers
- Authorize SSA to conduct a new CDR when fraud was involved in a prior CDR
- Authorize SSA to use all collection tools to recover funds
- Allow SSA to use commercial databases to verify real property
- Exclude SSA's debts from discharge in bankruptcy proceedings
- Eliminate SSI dedicated accounts
- Increase child support enforcement collections and expand their distribution
- Absolve older delinquent debts and prohibit use of the Treasury Offset Program for certain debts

For additional information regarding these proposals, refer to the legislative proposal summaries on page 170 of the LAE section.

### **Change in a Mandatory Program – Special Immigrant Visa Extension for Afghans**

The FY 2017 President's budget includes \$2 million for a discretionary change in a mandatory program (CHIMP) from the State Department's 2-year Special Immigrant Visa extension for Afghans. Please see the State Department's 2017 Congressional Justification for additional detail on this proposal.

## BUDGETARY RESOURCES

The SSI annual appropriation consists of a regular appropriation made available by the current year's appropriation bill and an advance made available by the prior year's appropriation. This advance is for Federal benefit payments in the first quarter of the subsequent fiscal year to ensure recipients continue to receive their benefits in case there is a delay in passing that year's appropriation bill. The President's Budget for FY 2017 is \$58,324,868,000, including \$14,500,000,000, provided in advance by the FY 2016 enacted appropriation.

**Table 2.4—Amounts Available for Obligation<sup>12</sup>**  
(in thousands)

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted<sup>3</sup></b>	<b>FY 2017 Estimate</b>
Regular Appropriation	\$ 41,232,978	\$ 45,229,733	\$ 43,824,868

Federal Unobligated Balance	\$ 3,623,669	\$ 3,603,990	\$ 326,600
State Supp. Unobligated Balance <sup>5</sup>	\$ 220,968	\$ 7,968	\$ 7,968
<b>Total Unobligated Balance</b>	<b>\$ 3,844,638</b>	<b>\$ 3,611,959</b>	<b>\$ 334,569</b>

<sup>1</sup> Does not include state supplementary user fees; user fees are included in the LAE appropriation.

<sup>2</sup> Totals may not add due to rounding.

<sup>3</sup> Federal benefit numbers reflect the most recent estimates from SSA's Office of the Chief Actuary.

<sup>4</sup> This is SSI's prorated share of unobligated LAE money that has been converted into no-year IT funds. It is not part of the annual administrative appropriation.

<sup>5</sup> The amount received for the October 1 payment, reimbursed at the end of September in the prior fiscal year, is available for use in the subsequent fiscal year.

## Supplemental Security Income Program

The SSI annual appropriation was \$60.9 billion in FY 2015. The FY 2016 appropriation is \$64.4 billion. SSA has the authority to carry over unobligated balances for use in future fiscal years for Federal benefit payments, administrative expenses, and beneficiary services because the amounts appropriated are made available until expended. Beginning in FY 2015, research and demonstration funds received three year appropriations; FY 2016 balances can be used through September 30, 2018. SSA carried over approximately \$3.6 billion in Federal unobligated balances into FY 2016. SSA expects to carry over approximately the same amount into FY 2017, and use over \$3.2 billion in federal benefit carryover in that year.

In addition to these appropriated amounts, SSA has spending authority in the amount of the advance reimbursement SSA receives from states to pay their state supplementary benefits. Because states reimburse SSA in advance, SSA carries over the amount received for the October 1 payment, reimbursed at the end of September in the prior fiscal year, for use in the subsequent fiscal year.

---

### ANALYSIS OF CHANGES

---

The FY 2017 request represents a decrease of approximately \$6 billion from the FY 2016 level. The majority of this decrease results from fewer Federal benefit payments in FY 2017 and carryover funds from FY 2016.

SSA plans to use unobligated balances to partially fund beneficiary services, early intervention projects and research and demonstration projects in FY 2016. In FY 2017, SSA plans to use unobligated balances to partially fund federal benefit payments, administrative expenses and research and demonstration projects. SSA plans to use approximately \$68 million in unobligated balances and recoveries in FY 2016 and approximately \$3,277 million in FY 2017.

#### **Federal Benefit Payments**

The decrease in the FY 2017 request for Federal benefit payments is a result of one fewer benefit payment and carryover funding from FY 2016, stemming from no FY 2016 COLA and lower beneficiary estimates. There is a slight increase in estimated payments due to the estimated FY 2017 cost of living adjustment (COLA). The increase in Federal benefit payments is partially offset by the impact of Old-Age, Survivors, and Disability Insurance (OASDI) COLAs on concurrent SSI/OASDI recipients. Since OASDI benefits are counted as income in the SSI program, the annual OASDI COLA decreases the SSI benefit payment for concurrent recipients.

#### **Administrative Expenses**

The FY 2017 request for administrative expenses is \$585 million more than the FY 2016 level. SSA expects to transfer \$63 million from the no-year LAE Information Technology Systems budget in FY 2016 for information technology needs. We expect to transfer an additional \$44 million in FY 2017. This transfer will not alter the overall spending levels in FY 2017, as reflected in the Limitation on Administrative Expenses section.

#### **Beneficiary Services**

SSA is requesting \$89 million in new authority for FY 2017. Our estimate reflects a steady level of payments to Employment Networks under the Ticket to Work program. In FY 2015, SSA

used \$70 million in budget authority and \$18.1 million in carryover for beneficiary services. SSA expects to use the remaining \$21 million of carryover funds in FY 2016, and no carryover funds in FY 2017 to cover our estimated obligations.

### Research and Demonstration

The FY 2017 combined request for research and early intervention demonstration projects is \$43 million less than the FY 2016 level; \$50 million less for Early Intervention Demonstration projects and an increase of \$7 million for other research and demonstration projects. SSA expects to use \$16.9 million of prior year unobligated balances in FY 2016, and \$5.2 million in FY 2017 to cover our estimated obligations.

In addition, our 2016 appropriation included \$50 million in funding for the Early Intervention Demonstration projects. SSA expects to use \$35 million of prior year unobligated balances in FY 2016 to cover our estimated obligations. We are not requesting any additional funding for Early Intervention Demonstration projects in FY 2017.

**Table 2.5—Summary of Changes<sup>1</sup>**

	<b>FY 2016 Enacted<sup>2</sup></b>	<b>FY 2017 Estimate</b>	<b>Change</b>
<b>Appropriation</b>	<b>\$ 64,429,733,000</b>	<b>\$ 58,324,868,000</b>	<b>- \$ 6,104,865,000</b>
Obligations Funded from Prior-Year Unobligated Balances and Recoveries net of estimated carryover from appropriation	+\$ 67,679,000	+\$ 53,126,000	- \$ 14,553,000
Reduction in Federal Benefits Request Due to Estimated Carryover from FY 2016	\$ 0	+\$ 3,224,264,000	+ \$ 3,224,264,000
Transfer from LAE <sup>3</sup>	+\$ 63,000,000	+\$ 44,000,000	- \$ 19,000,000

<b>Total Obligations</b>	<b>\$ 59,422,736</b>	<b>\$ 64,512,412</b>	<b>\$ 61,646,258</b>

---

<sup>1</sup> Totals may not add due to rounding.

<sup>2</sup> Federal benefit numbers reflect the most recent estimates from SSA’s Office of the Chief Actuary

<sup>3</sup> The administration portion of these services includes the SSI’s prorated share of unobligated LAE money that has been converted into no-year IT funds. It is not part of the annual administrative appropriation.

## BACKGROUND

### AUTHORIZING LEGISLATION

The SSI program is authorized by Title XVI of the Social Security Act. Section 1601 of the Act authorizes such sums as are sufficient to carry out the Title.

**Table 2.9—Authorizing Legislation**

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted<sup>1</sup></b>	<b>FY 2017 Estimate</b>	<b>FY Amount Authorized</b>
Title XVI of the Social Security Act, Section 401 of P.L. 92-603 and Section 212 of P.L. 93-66, as amended, and Section 405 of P.L. 92-216	\$ 60,932,978,000	\$ 64,429,733,000	<b>\$ 58,324,868,000</b>	<i>Indefinite</i>
First Quarter Advance Appropriation for Subsequent Fiscal Year	\$ 19,200,000,000	\$ 14,500,000,000	<b>\$ 15,000,000,000</b>	---

<sup>1</sup> Federal benefit numbers reflect the most recent estimates from SSA's Office of the Chief Actuary.

## APPROPRIATION HISTORY

The table below displays the President's Budget request, amounts passed by the House and Senate, and the actual amount appropriated, for the period FY 2007 to FY 2018. Indefinite budget authority is requested when actual Federal benefit payments exceed the amounts available for Federal benefit payments in a given fiscal year.

**Table 2.10—Appropriation History**

to conduct a rigorous evaluation of a demonstration project designed to improve the outcomes for SSI child recipients and their families.

<sup>17</sup> The House Committee on Appropriations did not report a bill. Appropriations Chairman Rehberg introduced H.R. 3070, which included \$38,062,428,000 for fiscal year 2012. Of this amount, not more than \$17,428,000 was made available for research and demonstrations under sections 1110 and 1114 of the Social Security Act and remain available until the end of fiscal year 2013. Up to \$10,000,000 of the research funds were to provide incentives payments and to conduct a rigorous evaluation of a demonstration project designed to improve the outcomes for SSI child recipients and their families. In addition, H.R. 3070 included \$18,200,000,000 for benefit payments for the first quarter of fiscal year 2013.

<sup>18</sup> S. 1599.

<sup>19</sup> Consolidated Appropriations Act, 2012 (P.L. 112-74). Of this amount, not more than \$8,000,000 was made available for research and demonstrations under sections 1110 and 1144 of the Social Security Act. The amount does not include a rescission of \$6,377,000 for SSI administrative expenses and \$2,000 for research and demonstration projects in accordance with P.L. 112-74.

<sup>20</sup> The President's Budget proposed to provide \$140 million in cap adjustment funding in FY 2012, consistent with section 251(b)(2)(B) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended. Of the \$140 million, the SSI portion totaled \$46 million.

<sup>21</sup> Of this amount, not more than \$48,000,000 was for research and demonstrations under sections 1110, 1115 and 1144 of the Social Security Act.

<sup>22</sup> The House Committee on Appropriations did not report a bill. The Committee posted a draft bill which included \$39,335,614,000 for fiscal year 2013. Of this amount, not more than \$8,000,000 was made available for research and demonstrations under sections 1110 and 1144 of the Social Security Act and to remain available until the end of fiscal year 2014. In addition, the draft bill included \$19,300,000,000 for benefit payments for the first quarter of fiscal year 2014.

<sup>23</sup> S. 3295.

<sup>24</sup> Consolidated and Further Continuing Appropriations Act, 2013 (P.L. 113-6).

<sup>25</sup> The President's Budget proposed to provide \$266 million in mandatory administrative funding in FY 2013. Of the \$266 million, the SSI portion totals \$106 million.

<sup>26</sup> SSI was exempt from sequestration in FY 2013.

<sup>27</sup> Of this amount, not more than \$54,000,000 is for research and demonstrations under sections 1110, 1115 and 1144 of the Social Security Act.

<sup>28</sup> S. 1284.

<sup>29</sup> Consolidated Appropriations Act, 2014 (P.L. 113-76).

<sup>30</sup> The President's Budget proposed to provide \$1.2 billion in mandatory administrative funding in FY 2014. Of the \$1.2 billion, the SSI portion totals \$587 million.

<sup>31</sup> Consolidated and Further Continuing Appropriations Act, 2015 (P.L. 113-235).

<sup>32</sup> Of this amount, not more than \$48,000,000 is for research and demonstrations and not more than \$35,000,000 is for early intervention demonstrations under sections 1110, 1115 and 1144 of the Social Security Act.

<sup>33</sup> H.R. 3020.

<sup>34</sup> S. 1695

<sup>35</sup> Consolidated Appropriations Act, 2016 (P.L. 114-113).

<sup>36</sup> Of this amount, not more than \$101,000,000 is for research and demonstrations under sections 1110, 1115 and 1144 of the Social Security Act.

## FEDERAL BENEFIT PAYMENTS

**Authorizing Legislation:** Section 1602, 1611, and 1617 of the Social Security Act.

### PURPOSE AND METHOD OF OPERATION

The SSI program was established to pay needy aged, blind and disabled individuals a minimum level of income through Federally-administered monthly cash payments. In many cases, these payments supplement income from other sources, including Social Security benefits and state programs. In FY 2017, SSA estimates benefit payments will total approximately \$56.2 billion for more than 8.2 million Federal SSI recipients.

**Table 2.11—Federal Benefit Payments: New Budget Authority and Obligations  
(in thousands)**

	<b>FY 2015 Actual</b>	<b>FY 2016<sup>1</sup> Enacted</b>	<b>FY 2017 Estimate</b>	<b>FY 16 to FY 17 Change</b>
<b>Appropriation</b>	<b>\$ 56,201,000</b>	<b>\$ 59,610,000</b>	<b>\$ 52,941,736</b>	<b>- \$ 6,668,264</b>
<b>Obligations</b>	<b>\$ 54,706,388</b>	<b>\$ 59,610,000</b>	<b>\$ 56,166,000</b>	<b>- \$ 3,444,000</b>
Advance for subsequent fiscal year	\$ 19,200,000	\$ 14,500,000	\$ 15,000,000	+ \$ 500,000

### RATIONALE FOR BUDGET REQUEST

SSA is requesting \$52.9 billion in new budget authority for Federal benefit payments in FY 2017.

SSA estimates benefit payments based on a number of interrelated factors including the number of SSI recipients, number of applications, award and termination rates, cost-of-living adjustments, maximum benefit rates, average payment amounts and number of payments per fiscal year.

<sup>1</sup> Federal benefit numbers reflect the most recent estimates from SSA's Office of the Chief Actuary.

## SSI RECIPIENT POPULATION

The number of Federal SSI recipients has increased from 7.9 million in FY 2012 to 8.2 million in FY 2015 and is expected to remain at 8.2 million through FY 2017. The estimated increase in Federal recipients in FY 2017 represents a 0.02 percent increase over the FY 2016 level. SSA estimates the number of SSI recipients by analyzing a number of factors including applications, award and termination rates, and funding for program integrity initiatives.

**Table 2.12—SSI Recipients, Actual <sup>1</sup>**  
(average over fiscal year, in thousands)

	<b>FY 2012</b>	<b>FY 2013</b>	<b>FY 2014</b>	<b>FY 2015</b>
Aged	1,094	1,089	1,094	1,100
Blind or Disabled	6,846	7,000	7,076	7,073
<b>Total Federal</b>	<b>7,940</b>	<b>8,089</b>	<b>8,171</b>	<b>8,173</b>
<b>Year-to-Year Change</b>	<b>2.4%</b>	<b>1.9%</b>	<b>1.0%</b>	<b>0.0%</b>
State Supplement Only	234	220	217	171
<b>Total Federally Administered</b>	<b>8,173</b>	<b>8,309</b>	<b>8,388</b>	<b>8,344</b>

In addition to Federal SSI recipients, SSA currently administers state supplementary payments for 20 states and the District of Columbia. SSA administers payments for approximately 1.6 million state supplement recipients, of which approximately 170,000 do not receive a Federal SSI benefit and only receive the state supplementary payment.

**Table 2.13—SSI Recipients, Projected<sup>1</sup>**  
(average over fiscal year, in thousands)

	<b>FY 2016 Estimate</b>	<b>FY 2017 Estimate</b>	<b>FY 16 FY 17 Change</b>
Aged	1,106	1,111	+ 0.5%
Blind or Disabled	7,113	7,126	+ 0.2%
<b>Total Federal</b>	<b>8,219</b>	<b>8,237</b>	<b>+ 0.2%</b>
State Supplement only	170	173	+ 1.8%
<b>Total Federally Administered</b>	<b>8,389</b>	<b>8,410</b>	<b>+ 0.3%</b>

<sup>1</sup> Totals may not add due to rounding.

## SSI Disabled vs. Aged Recipient Population

The number of Federal blind or disabled SSI recipients as a percentage of all Federal SSI recipients has steadily increased from 81 percent in FY 2000 to 86.5 percent in FY 2015. Because the average monthly benefit payment for blind or disabled recipients is higher than that of aged recipients, this consistent shift in the population make-up increases overall Federal SSI benefit payments.

**Table 2.14—Blind or Disabled Recipients as a Percentage of Total <sup>1</sup>**  
(average over fiscal year, in thousands)

Fiscal Year	Total Federal	Aged	Blind or Disabled	Blind or Disabled as % of Total
2000	6,328	1,203	5,125	<b>81.0%</b>
2008	7,117	1,103	6,014	<b>84.5%</b>
2009	7,304	1,106	6,198	<b>84.9%</b>
2010	7,522	1,105	6,417	<b>85.3%</b>
2011	7,756	1,105	6,652	<b>85.8%</b>
2012	7,940	1,094	6,846	<b>86.2%</b>
2013	8,089	1,089	7,000	<b>86.5%</b>
2014	8,171	1,094	7,076	<b>86.6%</b>
2015	8,173	1,100	7,073	<b>86.5%</b>
<b>2016 Estimate</b>	<b>8,219</b>	<b>1,106</b>	<b>7,113</b>	<b>86.5%</b>
<b>2017 Estimate</b>	<b>8,237</b>	<b>1,111</b>	<b>7,126</b>	<b>86.5%</b>

## Concurrent SSI/OASDI Recipients

SSI recipients also receiving Old-Age and Survivors Insurance (OASI) or DI benefits have their SSI benefit reduced, less applicable exclusions, by the amount of their OASDI benefit. Approximately 33 percent of all SSI recipients (including those only receiving a state supplement) also receive Social Security benefits. Approximately 56 percent of the SSI aged and 30 percent of the SSI blind and disabled populations receive concurrent payments.

<sup>1</sup> Totals may not add due to rounding.

## BENEFIT PAYMENTS

### Maximum Monthly Federal Payments

The maximum monthly federal benefit rate (FBR) is increased each January when there are increases in the cost-of-living. There is no cost of living increase in 2016. An increase of 0.8 percent is projected for January 2017. The FBR remained \$733 for an individual and \$1,100 for a couple for calendar years (CY) 2015 and 2016. SSA estimates the FBR will increase to \$739 for an individual and \$1,109 for a couple in CY 2017. The COLA will be effective in January 2017, raising the maximum benefit rate to higher levels than the first 3 months of the fiscal year.

**Table 2.15—Maximum Benefit Rates**

	FY 2016		FY 2017	
	First 3 Months	Last 9 Months	First 3 Months	Last 9 Months
Individual	\$ 733	\$ 733	\$ 733	\$ 739
Couple	\$ 1,100	\$ 1,100	\$ 1,100	\$ 1,109

### Average Monthly Benefit Payments

The amount actually paid to a recipient can vary from the FBR based on their income received (e.g., earnings and Social Security benefits) and the living arrangement of the recipient (e.g., residence in one's own home, the household of another person, or in a nursing home which meets Medicaid standards). The average monthly benefit is expected to increase from \$551 in FY 2015 to \$556 in FY 2016 and \$561 in FY 2017. The increase in the average benefit payment is driven by COLAs and recipient population characteristics.

**Table 2.16—Average Monthly Benefit Payments**

	FY 2015 Actual	FY 2016 Estimate	FY 2017 Estimate
Aged	\$ 390	\$ 396	\$ 402
Blind or Disabled	\$ 576	\$ 580	\$ 586
All SSI Recipients	\$ 551	\$ 556	\$ 561

### Cost of Living Adjustments

When applicable, COLAs increase both the maximum and average monthly benefit payment. However, for concurrent SSI/OASDI recipients, increases in SSI benefit payments are partially offset by increases in Social Security benefits resulting from the same COLA. Social Security benefits are counted as income in the SSI program. Therefore, any increase in Social Security benefits resulting from the annual COLA increases countable income in the SSI benefit computation.

### Program Integrity Funding

Annual benefit payment estimates are dependent on SSA performing a certain level of SSI CDRs and redeterminations. Specifically, the FY 2017 estimate assumes SSA receives the proposed administrative funding to conduct almost 621,000 SSI CDRs and 2,822,000 non-medical redeterminations.

### Timing of Monthly Benefit Payments

Monthly SSI benefit payments are made on the first of the month, unless the first falls on a weekend or Federal holiday. In that case, the payment is made on the prior business day at the end of the previous month. When October 1 falls on a weekend or Federal holiday, the payment is made in the prior fiscal year at the end of September. This timing of payments results in 11, 12, or 13 payments in a given fiscal year.

**Table 2.17—Check Payments by Fiscal Year**

	<b>Number of Check Payments</b>	<b>Federal Benefit Obligations</b>
FY 2008	12	\$ 41,309,722,313
FY 2009	12	\$ 44,987,045,867
FY 2010	12	\$ 47,322,385,581
FY 2011	13	\$ 52,274,301,053
FY 2012	11	\$ 47,003,477,518
FY 2013	12	\$ 52,782,740,412
FY 2014	12	\$ 53,849,499,196
FY 2015	12	\$ 54,706,388,000
<b>FY 2016</b>	<b>13</b>	<b>\$ 59,610,000,000</b>
<b>FY 2017</b>	<b>12</b>	<b>\$ 56,166,000,000</b>

## ADMINISTRATIVE EXPENSES

**Authorizing Legislation:** Sections 201(g)(1) of the Social Security Act.

### PURPOSE AND METHOD OF OPERATION

---

Administrative expenses for the SSI program are funded from general revenues. Section 201(g)(1) of the Social Security Act provides that administrative expenses for the SSI program, including Federal administration of state supplementary payments, may be financed from the Social Security trust funds with reimbursement, including any interest lost, to the trust funds from general revenues.

This appropriation funds the SSI program share of administrative expenses incurred through the Limitation on Administrative Expenses (LAE) account. Amounts appropriated are available for current-year SSI administrative expenses, as well as for prior-year administrative expenses that exceeded the amount available through this account for the prior year. If those excess prior year amounts were paid out of the Social Security trust funds, then current year SSI funds must be used to reimburse these trust funds with interest.

The legislative history of the 1972 amendments (which established this funding mechanism) indicates a desire to obtain economy of administration by giving SSA the responsibility for the SSI program because of its existing field office network and its administrative and automated data processing facilities. Because of the integration of the administration of the SSI and Social Security programs, it was desirable to fund them from a single source (the LAE account). This requires that the trust funds and the SSI account pay their appropriate shares. The determination is based on a Government Accountability Office (GAO) approved method of cost analysis of the respective expenses of the SSI and Social Security insurance programs, and mandates a final settlement by the end of the subsequent fiscal year as required by law.

**Table 2.18—Administrative Expenses: New Budget Authority and Obligations**  
(in thousands)

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate<sup>1</sup></b>	<b>FY 16 to FY 17 Change</b>

---

#### RATIONALE FOR BUDGET REQUEST

---

The FY 2017 request for SSI administrative expenses is \$5,234,132,000. This appropriation is used to reimburse the trust funds for the SSI program's share of administrative expenses. This amount includes additional funding of \$1,342 million specifically for FY 2017 SSI program integrity activities.

These amounts exclude funding made available in the LAE account from state user fees for SSA expenses for administering SSI state supplementary payments. The LAE account assumes funding of up to \$136,000,000 for SSI state supplementary user fees in FY 2016 and up to \$126,000,000 in FY 2017.

---

<sup>1</sup> Based on our latest estimates, obligations exceed budget authority in FY 2017 by \$92 million. We plan to transfer the SSI's prorated share of unobligated LAE money that has been converted into no-year IT funds to account for the difference. This ITS fund is not part of the annual administrative appropriation.

## BENEFICIARY SERVICES

**Authorizing Legislation:** Sections 1148 and 1615(d) of the Social Security Act

### PURPOSE AND METHOD OF OPERATION

Beneficiary services consist of the Vocational Rehabilitation (VR) and Ticket to Work programs. The objective of the programs is to help disabled individuals achieve and sustain productive, self-supporting work activity.

**Table 2.19—Beneficiary Services: New Budget Authority and Obligations**  
(in thousands)

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>	<b>FY 16 to FY 17 Change</b>
<b>Appropriation</b>	<b>\$ 70,000</b>	<b>\$ 70,000</b>	<b>\$ 89,000</b>	<b>+ \$ 19,000</b>
Obligations Funded from Prior-Year Unobligated Balances	\$ 18,126	\$ 21,000	\$ 0	- \$ 21,000
<b>Obligations</b>	<b>\$ 88,126</b>	<b>\$ 91,000</b>	<b>\$ 89,000</b>	<b>- \$ 2,000</b>
Vocational Rehabilitation	\$ 79,303	\$ 82,000	\$ 79,000	- \$ 3,000
Ticket to Work	\$ 8,823	\$ 9,000	\$ 10,000	+ \$ 1,000

In the VR program, SSA repays state VR agencies for the reasonable and necessary costs of services that successfully rehabilitate disabled SSI recipients. VR agencies are successful when a disabled recipient performs substantial gainful activity for a continuous period of nine months out of twelve.

A portion of the FY 2016 obligations in the above table will cover estimated payments authorized by the Ticket to Work and Work Incentives Improvement Act of 1999 (P.L. 106-170). Under the Ticket program, SSA pays Employment Networks (ENs) for providing vocational rehabilitation, employment, and other support services to disabled SSI recipients. Recipients select an EN (including state VR agencies), which SSA pays in exchange for services that may reduce reliance on federal cash benefits.

Ticket payments, unlike VR reimbursement payments, are not based on the costs of specific services provided by the EN. SSA pays ENs on either an outcome-milestone payment method or an outcome-payment method. Under the outcome-milestone payment method, SSA pays the EN for each milestone the recipient successfully achieves. The recipient may continue to receive monthly benefit payments when SSA issues a milestone payment. In contrast, SSA will begin issuing outcome payments only after the individual's monthly benefit payments cease. SSA bases outcome-payment amounts on the prior year's national average disability benefit payable

under Title XVI. Outcome payments are payable for a maximum of 60 months (consecutive or otherwise).

### RATIONALE FOR BUDGET REQUEST

SSA is requesting \$89 million in new budget authority for beneficiary services in FY 2017. SSA will use prior-year unobligated balances to cover a portion of FY 2016 obligations.

In the Ticket to Work program, the estimate for FY 2017 assumes a total of 5,600 Ticket beneficiaries with payments to an EN, an increase from 5,000 in FY 2016.

In the VR Reimbursement program, the estimate for FY 2017 assumes a total of 6,900 distinct beneficiaries with significant work and for which reimbursement are paid, a decrease from 7,300 in FY 2016. For SSI-only recipients, the FY 2017 average cost per VR reimbursement payment is \$17,800 for an estimated 3,500 payments. For recipients concurrently receiving SSI and DI, the FY 2017 average SSI cost per VR reimbursement payment is \$5,000 for an estimated 3,400 payments. In FY 2016, the average cost per VR reimbursement to SSI-only recipients is \$17,300 for an estimated 3,700 payments. For SSI and DI concurrent recipients, the FY 2016 average SSI cost per VR reimbursement is \$5,000 for an estimated 3,600 payments.

SSA continues its ongoing efforts to improve management and oversight of the current VR program, to ensure program effectiveness, and to make certain the money spent is a good investment. This effort includes an ongoing quality review of state claims for reimbursement and continuing internal audits of the agency's payment process.

**Table 2.20—SSI VR Reimbursement and Ticket to Work Payments**

<b>SSI VR Reimbursement Payments</b>	<b>FY 2015 Actual</b>	<b>FY 2016 Estimate</b>	<b>FY 2017 Estimate</b>	<b>FY 16 to FY 17 Change</b>
Number of SSI-Only Awards	3,843	3,700	3,500	- 200
SSI-Only Cost per Payment	\$ 16,991	\$ 17,300	\$ 17,800	+ \$ 500
Number of SSI/DI Concurrent Awards	3,070	3,600	3,400	- 200
SSI/DI Concurrent Payment (SSI portion of costs only)	\$ 4,657	\$ 5,000	\$ 5,000	+ \$ 0
<b>Total Number of SSI VR Reimbursement Awards</b>	<b>6,913</b>	<b>7,300</b>	<b>6,900</b>	<b>- 400</b>
<b>Total SSI VR Reimbursement Payments (in thousands)<sup>1</sup></b>	<b>\$ 79,593</b>	<b>\$ 82,000</b>	<b>\$ 79,000</b>	<b>- \$ 3,000</b>
<b>Ticket Beneficiaries with Payments (SSI-Only &amp; SSI/DI Concurrent Beneficiaries for whom we served and paid an EN)</b>	<b>4,755</b>	<b>5,000</b>	<b>5,600</b>	<b>+ 600</b>
<b>Total Ticket Payments (in thousands)<sup>1</sup></b>	<b>\$ 8,543</b>	<b>\$ 9,000</b>	<b>\$ 10,000</b>	<b>+ \$ 1,000</b>

<sup>1</sup> Payments shown do not necessarily equal outlays due to reporting lags.

## MUSCULAR DYSTROPHY AND THE SSI AND SSDI PROGRAMS

This section provides statistics on SSDI and SSI recipients who have a diagnosis code indicating muscular dystrophy as a primary or secondary impairment. Not all individuals with muscular dystrophy will be on SSA's rolls because some may not meet the child or adult definitions of disability in the law or may not meet other program requirements such as sufficient work in Social Security covered employment or having income or resources below the SSI thresholds.

Data on the number of individuals with muscular dystrophy in the overall United States population is incomplete, according to components within the Department of Health and Human Services (HHS). However, for context, we note that Duchenne muscular dystrophy is the most common form among children and, thus, most likely reflected in statistics on SSI children. In addition, Duchenne and Becker (which is similar to but less severe than Duchenne) muscular dystrophy primarily affect males. The Centers for Disease Control estimates one in every 5,600 to 7,700 males ages 5 through 24 in the United States has Duchenne or Becker muscular dystrophy. Finally, for adults, we note the most common form of muscular dystrophy is myotonic muscular dystrophy.<sup>1</sup>

In December 2013, there were a total of 38,313 SSDI and SSI beneficiaries ages 0 to 66 with a primary or secondary diagnosis of muscular dystrophy who were in current payment status in that month (the data do not allow us to break out the type of muscular dystrophy). Among this group, 35,152 are adult beneficiaries. See Table 2.21.<sup>2</sup>

**Table 2.21 – Beneficiaries with Muscular Dystrophy by Beneficiary Type  
in Current Pay Status, December 2013**

Beneficiary Type	Number	Percent
Adult SSDI only	22,636	59.1
Adult SSI only	9,249	24.1
Adult concurrent	3,267	8.5
SSI child	3,161	8.3
<b>Total</b>	<b>38,313</b>	<b>100.0</b>

There are 3,161 children on SSI with a diagnosis of muscular dystrophy or about one out of every 420 child recipients on SSI. Most of these children are male (74 percent); one out of every 376 male children on SSI have an impairment code indicating muscular dystrophy.

<sup>1</sup> Please see <https://www.nichd.nih.gov/health/topics/musculardys/conditioninfo/pages/types.aspx> and <http://www.cdc.gov/ncbddd/muscardystrophy/data.html>.

<sup>2</sup> Source: Program statistics are based on SSA tabulations of administrative records.

Table 2.22 provides additional information on the child population. Most begin receiving benefits at a very young age. The average age for the start of benefits is five. Twenty-five percent of child recipients are receiving benefits by age two and 50 percent are receiving benefits by age four. Nearly 80 percent of child recipients with muscular dystrophy were receiving benefits by age eight.

**Table 222 – Age at First Benefit, Child Recipients, Ages 0-17  
with Muscular Dystrophy in December 2013**

<b>Child Age</b>	<b>Number</b>	<b>Percent</b>
0-1	803	25.4
2-4	811	25.7
5-8	844	26.7
9-17	703	22.2
<b>Total</b>	<b>3,161</b>	<b>100.0</b>

The average age of child recipients is 10 (not shown in Table 2.22). One-quarter of child recipients were under the age of seven in December 2013, and three-quarters were under the age of 14.

#### *Employment activities of Adult beneficiaries with Muscular Dystrophy*

For this section of the note, we expand the population under study to include not only adults who are in current pay in December 2013, but also adults that have had benefits suspended or terminated due to work. There are 36,116 such beneficiaries with an impairment code indicating muscular dystrophy.

Among such individuals:

- 3,868 (11%) have participated in the Ticket To Work (TTW) program, receiving services from either an Employment Network (EN) or a State Vocational Rehabilitation Agency (VR).
  - The vast majority of this group (94%) received services through VR. For this population, VR may be in the best position to offer needed and intensive educational and work supports.
- 964 (3%) had benefits suspended due to work in December 2013 or had their SSDI or SSI benefits terminated in the past due to work.

#### *Allowance rates for Child and Adult beneficiaries with Muscular Dystrophy*

We also examined application records since 2008 and found 1,563 cases with Muscular Dystrophy listed as the impairment, and “Duchenne” included under the claim’s allegation description. These cases had a very high allowance rate at 88%. Allowance rates were highest for the very young and those older than age 10. Among this group:

## **Supplemental Security Income Program**

- Those less than age 1 at the time of application were allowed at a rate of 87%.
- Those older than age 10 were allowed at a rate of 96%.
- The allowance rate for those between the ages of 1 and 10 was 80%.

## RESEARCH, DEMONSTRATION PROJECTS, AND OUTREACH

**Authorizing Legislation:** Sections 1110, 1115, and 1144 of the Social Security Act.

### PURPOSE AND METHOD OF OPERATION

SSA conducts extramural research, demonstrations, and outreach under sections 1110, 1115, 1144, and 234 of the Social Security Act. Projects funded under section 234 are not a part of this appropriations request.

**Table 23 - Research, Outreach, and Early Intervention Demonstration Projects:  
Budget Authority and Obligations  
(in thousands)**

	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>	<b>FY 16 to FY 17 Change</b>
Research Appropriation	\$ 48,000	\$ 51,000	\$ 58,000	+ \$ 7,000
Early Intervention Appropriation	\$ 35,000	\$ 50,000	\$ 0	- \$ 50,000
<b>Total Appropriation</b>	<b>\$ 83,000</b>	<b>\$101,000</b>	<b>\$58,000</b>	<b>- \$ 43,000</b>
Unobligated Balance	\$ 16,702	\$ 51,882	\$ 5,203	- \$46,679
Recovery of Prior-Year Obligations	\$ 833	\$ 0	\$ 0	
Offsetting Collections	\$ 0	\$ 0	\$ 0	
<b>Total Budgetary Resources</b>	<b>\$100,535</b>	<b>\$ 152,882</b>	<b>\$ 63,203</b>	<b>- \$ 89,679</b>
<b>Total Obligations</b>	<b>\$ 48,653</b>	<b>\$ 147,679</b>	<b>\$63,126</b>	<b>- \$ 84,553</b>
Total Unobligated Balance	\$ 51,882	\$ 5,203	\$ 77	- \$5,126

Section 1110 of the Social Security Act provides authority for conducting broad-based cross-programmatic projects for OASDI and SSI programs. This includes both waiver authorities for the SSI program, as well as projects dealing with specific SSI issues. Under the authority of section 1110, we fund a range of extramural projects: disability policy research, projects to develop effective rehabilitation and return-to-work strategies, financial literacy and education, retirement policy research, evaluations of proposed or newly enacted legislative changes, and projects to maintain and improve basic data about our programs and beneficiaries.

Section 1115 provides the Secretary of Health and Human Services (HHS) with the funding and authority to waive compliance with Medicaid requirements for the purpose of allowing states to participate in SSA's research and disability demonstration projects.

Section 1144 requires SSA to conduct outreach to those individuals with Medicare who are potentially eligible for state-administered Medicaid programs or Medicare prescription drug subsidies under Medicare Part D. We identify these potential beneficiaries, inform them about these programs, and notify state Medicaid agencies. The Centers for Medicare & Medicaid Services, within HHS, oversees both the Medicare and Medicaid programs.

---

### RESEARCH INVESTMENT CRITERIA

---

To help ensure that our research and demonstration projects reflect the agency's long-term priorities and support the objectives of our Agency Strategic Plan, we have established guidelines for developing, managing, and vetting projects for potential inclusion in our long-term research and demonstration agenda. We employ a variety of methods to ensure: 1) that we meet the funding requirements of the sections of the Act that authorize our extramural research and demonstration activities; and 2) that our extramural research activities meet high standards for relevance, quality, and performance. This section of our justification highlights some of the steps we take to ensure that our research activities meet high standards:

#### Relevance

The extramural research budget undergoes careful scrutiny both within SSA and by external monitoring authorities. A fundamental step in SSA's review is assuring that each project responds to current issues facing the Social Security retirement, disability and/or SSI programs. Our internal review process includes obtaining the advice and recommendations of researchers with technical expertise, program managers, and Agency executives. We also receive input on our research program from the Social Security Advisory Board.

Internal reviews also help to ensure that funded activities reflect SSA's strategic goals and objectives, help us respond to legislative requirements and address high-priority issues. Many of our extramural research activities are directed toward providing policymakers and the public with the analytical and data resources they need to assess the implementation of existing SSA programs and the implications of reform proposals.

Our budget request reflects our support of the Administration's and Congress' ongoing goal to provide opportunities for disability beneficiaries to maximize their self-sufficiency through work. For example, we are working collaboratively with the Department of Labor (DOL), the Department of Education (ED), and HHS in this area to test interventions that will improve the postsecondary education and employment outcomes of children who receive SSI. Existing studies indicate a lack of effective retirement planning on the part of the public. Our budget also includes provisions to increase the American public's basic financial management skills. For example, we support projects funded under the Financial Literacy and Education Commission (FLEC).

#### Quality

We use a competitive, merit-based procurement process to ensure that our extramural research program produces high quality results. We award nearly all of our extramural research projects conducted by private-sector organizations through competitive contracts or cooperative agreements.

We also make use of technical evaluation panels to review projects while they are in progress and to provide feedback and suggestions to the agency and its contractors. These panels include internal experts in relevant disciplines, such as statistics, economics, and survey design. They help ensure that SSA-sponsored research projects are methodologically sound and consistent with professional standards. In addition, the research projects that we sponsor through the Retirement Research Consortium (RRC) and Disability Research Consortium (DRC) are often discussed in a formal, external setting, via seminars or workshops.

### Performance

We carry out our extramural research and evaluation projects primarily through contracts, jointly funded cooperative agreements, and grants that identify specific deliverables and timetables. The agency has sent a strong message to contractors that they must complete projects on time and within budget. Contracting Officer Technical Representatives (COTR), project officers, administrative staff, and senior executives monitor the progress of all research contracts and agreements.

Consistent with the Administration's encouragement to support evidence-based evaluations, we produce reports and data files for each research and evaluation project in an effort to determine whether existing or proposed programs are working as they should. Where appropriate, we make these reports publicly available or announce their availability in the *Social Security Bulletin* and on the Web. The RRC also disseminates output at annual meetings, on the Web, and through a variety of publications, workshops, and conferences. Finally, agency funded research projects based on the Survey of Income and Program Participation (SIPP), the Health and Retirement Study (HRS), or the Model of Income in the Near Term (MINT) model are widely cited in both peer-reviewed publications and the mainstream press.

---

## RATIONALE FOR BUDGET REQUEST

---

We are requesting \$58 million in new budget authority in FY 2017 for research projects designed to explore potential improvements to our programs. This level will allow continued support for key Congressional and long-standing SSA priorities such as the development of the Occupational Information System (OIS), our rigorous evaluation of the Promoting Readiness of Minors in SSI (PROMISE) pilot, and the National Academy of Sciences/Institute of Medicine's independent evaluation of the disability program for adults and children. The request also provides funding for our Interagency Agreement (IAA) with the National Institutes of Health (NIH) to help quickly and efficiently identify individuals who should be awarded disability benefits.

In FY 2017, we plan to continue our efforts to ensure that policymakers and the public have access to objective, scientific and methodologically sound data and analysis as the dialogue on how to strengthen and reform Social Security continues. In support of this effort, we plan to continue funding the RRC, which will continue to maintain our capability to produce policy-relevant research on retirement, and the DRC, which will continue to address a shortage of disability policy research and foster collaborative research with other federal agencies that serve individuals with disabilities.

The table and discussion that follow present the research and outreach efforts we plan to fund in FY 2017 in more detail.

<sup>3</sup> This amount includes obligations funded from prior-year unobligated balances.

## MAJOR RESEARCH AND OUTREACH PROJECTS

---

Although our extramural research budget represents a small piece of our overall funding, our research and demonstration projects help us to significantly increase the efficiency and accuracy of our mission-critical work. Below is a detailed summary, by category, of the major research and demonstration projects we plan to conduct in FY 2017:

### **Serve the Public through a Stronger, more Responsive Disability Program**

The Social Security and SSI disability programs are the largest Federal programs providing assistance to people with disabilities. Eliminating the disability hearings backlog and improving the disability process are two of our top priorities. Key projects in support of this effort include:

#### *Advisory Services to Assist SSA with Disability Issues/Institute of Medicine (IOM)*

As part of our efforts to continuously improve the administration and effectiveness of our disability programs, in FY 2013 we entered into a new 5-year contract with the IOM. The IOM established a standing committee of medical experts to assist us with ongoing and emerging disability issues at step 3 (Listing of Impairments--see below), step 4, and step 5 of the sequential evaluation process. Having independent medical experts involved in our process helps to further maintain the objectivity of our policy and procedures. Additionally, the current contract also provides for Federal Advisory Committee Act (FACA)-compliant IOM consensus committees of medical and other experts.

In FY 2013, we awarded a task order that provided for a consensus study committee tasked with describing past and current trends in the prevalence and persistence of mental disorders for the general U.S. population under age 18, and providing a comparison between those trends and trends in the SSI childhood disability population. We received this committee's final report in October 2015. The committee concluded that the number of children that receive SSI benefits for mental disorders has remained relatively stable. The committee found that, after taking child poverty into account, the increase in the percentage of poor children receiving SSI benefits for mental disorders (from 1.88 percent in 2004 to 2.09 percent in 2013) is consistent with and proportionate to trends in prevalence of mental disorders among children in the general population.

In FY 2014, we awarded a task order that provided for a consensus study committee tasked with performing a critical review of selected psychological testing, including symptom validity testing (SVT), that could contribute to our disability determinations. We received this committee's final report on psychological testing in June 2015. The committee verified that, where appropriate, there is value in standardized psychological testing, including both non-cognitive measures and cognitive tests. The committee also concluded that validity tests alone do not provide information about whether or not an individual is disabled. These findings support our current practice of considering the results of standardized psychological tests when they are part of the record, but not ordering validity tests alone.

In FY 2014, we also awarded a task order that provided for a consensus study committee tasked with describing past and current trends in the prevalence and persistence of speech disorders and

## Supplemental Security Income Program

language disorders for the general U.S. population under age 18, and providing a comparison between those trends and trends in the SSI childhood disability population. We expect to receive this committee's final report in April 2016. Lastly in FY 2014, we awarded a task order that provided for an IOM-established FACA-compliant consensus study committee tasked with providing recommendations to improve the accuracy and efficiency of our policy and procedures for capability determinations for adult beneficiaries. We expect to receive this committee's final reports in May 2016.

In FY 2015, we awarded a task order that provides for a consensus study committee to provide an overview of assistive devices that relate to physical and mental disorders and functioning for adults (including young adults as they transition from high school to the workplace); and provide a comprehensive review of selected assistive devices that relate to physical and mental disorders and functioning for adults (including young adults as they transition from high school to the workplace). The selected assistive devices that the committee will study include wheeled/seated mobility devices and upper extremity prostheses. SSA addresses, to some extent, the use of assistive devices, such as canes, crutches, walkers, lower extremity prostheses, and eyeglasses, and how these devices affect a person's ability to perform basic work activities (for example standing or walking) in its current disability determination process.

In FY 2016, we plan to use an IOM-established FACA-compliant consensus study committee to provide a comprehensive list of programs, services, and treatments available (nationally, regionally, and locally) for improving health outcomes among SSI children (of all ages) with mental, speech, and language disorders; provide a comprehensive, analytical review of effective and evidence-based programs, services, and treatments that improve health outcomes for SSI children and youth while in school and as they transition from high school to the workplace or higher education; and provide findings and conclusions for SSA involvement, policy development, and future research.

### List of Impairments

Since 2004, we have updated approximately 70 percent of the listings and we plan to propose revisions in the Federal Register for all listings by the end of 2020. Comprehensive revisions pending include:

Mental disorders (final rule in agency clearance process), neurological (final rule in agency clearance process), respiratory system (final rule in agency clearance process), and musculoskeletal system (proposed rule in agency internal review process).

For combinations of impairments, our current regulations state that, if we find that a person has a severe, medically determinable combination of impairments, then we consider the combined effect of the impairments throughout the disability determination process. In FY 2017, we plan to use a consensus study committee to identify listing criteria (symptoms, signs, and laboratory findings) for disabling combinations of impairments, and identify medical profiles that result in an inability to sustain a baseline of work functioning.

Disability Analysis File (DAF)

The DAF has been previously funded under the former “other research” line item. The DAF is a composite of the ten most relevant SSA administrative files needed to answer questions about disability and work. The DAF pulls these files together into a meaningful whole that researchers can easily understand and use. The DAF also provides complete researcher-friendly documentation of the data for these files. As a result, having a standing DAF file eliminates the first 6-12 months of investigation and start-up assembly of the data for every new research project that uses it and is essential in providing quick responses to agency inquiries. The DAF proved to be an essential tool in FY 2015 for providing disability data and analysis in response to inquiries from Congress and other Federal agencies, including the Office of Management and Budget. Using the DAF allowed us to make data-driven policy recommendations and changes. In FY 2016, we will continue to build the DAF and use this tool for quick turnaround inquiries and analysis.

Disability Determination Process Small Grants Program

This grant program provides 1-year stipends to graduate and post-doctoral students to conduct disability research, including research that supports the identification of more claims for fast-tracking under the CAL/Quick Disability Determination process. Other potential research topics include: an examination of severity thresholds in medical conditions that meet CAL criteria; variability across states and regions of disability determination and the diary date for periodic medical review; whether current medical listings provide consistent consideration regarding the use of assistive technology for disability determination purposes; the potential for predictive modeling and focusing on information collection instruments; and the relationship between homelessness and disability.

In September 2011, we awarded a 5-year grant to Policy Research Inc. (PRI) to run the small grant program. PRI targeted graduate programs in public health, social work, occupational medicine, vocational and rehabilitation counseling, public policy and administration, sociology, psychology, education, economics, medicine, and law. Each of the teams PRI convenes to review the proposals will include at least one person with a disability.

PRI approved eight stipend awards for the first cohort, 10 stipend awards for the second cohort, 11 stipend awards for the third cohort, six stipend awards for the fourth cohort, and 11 stipend awards for the fifth cohort. Applications for the sixth cohort are due to PRI by March 1, 2016.

Please see the following PRI website for a list of the awarded projects and accepted final reports: <http://ddp.policyresearchinc.org/completed-projects/>. We will re-compete the grant in FY 2016. The re-competed grant will focus on rehabilitation, work and the disability program.

Disability Research Consortium (DRC)

We awarded the fourth year of the DRC cooperative agreements with the Mathematica Policy Research center and the National Bureau of Economic Research center in September 2015. This funding supports the production and dissemination of program and policy-relevant research to assist policymakers in improving services and benefits from the DI and SSI programs. The DRC

## Supplemental Security Income Program

supports research to better understand how programs that provide services and benefits to people with disabilities (Federal and nonfederal) intersect and interact with each other. This will help develop policy to improve service delivery, enhance coordination of services across programs, build on complementarities across programs, eliminate duplication and waste, and advance cooperation across Federal agencies that serve people with disabilities.

An analysis conducted using the RAND American Life Panel (ALP) explored the population where a health-related workplace accommodation would increase ability to work, as well as the volume of these accommodations. The study has five key findings. First, 35 percent of people between the ages of 18 to 70 report health problems that affect their work performance. Second, a sizeable group of people report receiving health-related accommodations from their employers, but do not report work limitations per se. The authors' interpretation of this finding is that these individuals do not experience work limitations precisely because their health problems are fully accommodated. Third, the order of the questions in disability surveys matters. The authors found evidence that people understate accommodations when first asked about very severe disabilities. Fourth, when all respondents were asked about health-related workplace accommodations (not just those reporting work limitations), the measured accommodation rate was substantially higher. The ALP estimates that the rate of accommodation among accommodation-sensitive individuals who are employed is about 60 percent, two to three times higher than existing estimates in the literature. Finally, they find that 54 to 59 percent of accommodation-sensitive individuals (both employed and not employed) would benefit from some kind of employer accommodation to either sustain or commence work. This estimate of unmet need for accommodation is substantially lower than previous estimates, though still economically large.

Other recent DRC studies have provided descriptive information on the DI/SSI populations. These studies address questions about the economic resources, consumption, and poverty of beneficiaries; the characteristics of beneficiaries who work; and geographic differences in disability claiming.

The DRC centers will continue research activities across six broad priority research areas: demographics, economics, health, programmatic issues, work and education, and international comparisons. These topics will be guided by the agenda for the consortium's research projects for FY 2017. In addition, the DRC will continue to train future experts on disability issues and policy through summer research training fellowships, dissertation support, and pre- and post-doctoral fellowships.

### National Beneficiary Survey (NBS)

The NBS collects data from a national sample of DI and SSI beneficiaries and a sample of Ticket to Work (TTW) participants that are not available from any other source. We have used the NBS to provide information on our programs and beneficiaries to answer questions for SSA, other Federal agencies, the Government Accountability Office (GAO), and Congress. The NBS is available as a public use file on Data.gov and the SSA website.

From the NBS, we have learned about the health and socio-demographic characteristics of our SSI and DI beneficiaries with disabilities, including their physical and mental health status, functional limitations, education, health insurance, household living arrangements, and income. Beyond this basic information, we have also examined the work aspirations of beneficiaries with disabilities, their use of employment-related services, and their work activities and outcomes.

The NBS has provided us with detailed information on wages, hours of work, benefits, work accommodations and unmet needs, and the barriers beneficiaries face as they try to work. NBS data tell us that nearly half of all beneficiaries are interested in work and many are pursuing employment goals. The data also tell us that many barriers to work remain. Beneficiaries tend to have activity limitations, poor health, and low levels of education that limit their employment opportunities. Many rely on public programs where benefits may be limited by work and earnings. Many also experience work-specific obstacles, such as a lack of reliable transportation, inaccessible workplaces, and discouragement from work, either by others or through their own experiences.

We completed the first four rounds of the NBS in 2004, 2005, 2006, and 2010. We completed 27,000 interviews across the first four rounds of the NBS. In FY 2012, we began to make changes in the NBS to collect more information on the factors associated with successful and unsuccessful work attempts and less information on the TTW program. In the redesigned NBS, new questions focus on the home, community, employer, and SSA policies that influence successful work attempts. In 2015, we completed interviews for the first of three rounds of the redesigned NBS, including 4,000 interviews of the national sample of SSI and DI beneficiaries and 90 in-depth interviews of the most successful working beneficiaries. From the information we learned from the in-depth interviews, we developed the new questions and the design of the larger sample of the most successful working beneficiaries. We plan to conduct the second and third rounds of the national sample and the sample of the most successful working beneficiaries in FY 2017 and FY 2019.

Public use data files, documentation, and reports for the first four rounds of the NBS are available on our website at: <http://www.ssa.gov/disabilityresearch/nbs.html>. The report of the in-depth interviews will be available in March 2016. The draft findings, data, and documentation for the 2015 national sample will also be available in March 2016.

#### *New and Emerging Research - Disability*

Our New and Emerging Research –Disability line item replaces the former “Other Research” category and includes projects that provide broad program analysis and development in support of the DI and SSI programs. These projects typically include studies of program policy issues, the identification of trends in the disability programs, the formulation of agency policy regarding cross-cutting programs or issues related to disability and/or income assistance programs, and the development and implementation of policy and procedures on DI and SSI work incentives. Often, these projects address necessary but unforeseen requests for studies from Congress, OMB, the Administrative Conference of the United States, or our leadership, which are typically quick turnaround projects regarding policy priorities. In FY 2016, we plan to pursue a collaboration with the Department of Education to encourage disability-related research at minority serving colleges and institutions.

National Institutes of Health (NIH) IAA for Data Analytics and FAB Development

Under an agreement with their Office of Extramural Research, NIH provides in-depth analysis of our existing data and contracts with Boston University (BU) in developing a work disability functional assessment battery (FAB). The FAB will provide accurate and uniform information about individuals' self-reported functional ability that we can use to inform our data collection and determination processes.

In FY 2015, NIH continued an analysis of potential Compassionate Allowances (CAL) conditions using an expanded and updated database. The CAL initiative identifies diseases and other medical conditions that invariably qualify for allowance under our Listing of Impairments. The initiative allows us to target the most obviously disabled individuals for allowances based on objective medical information that we can obtain quickly. We currently have 225 CAL conditions. Likewise, BU furthered development of the FAB's functional domains, and conducted a national calibration study of the entire FAB item pool. Functional domains organize body function into areas descriptive of what a person can do in their usual environment. The item pool consists of statements that elicit responses to indicate limitations in specific functional domains. To date, our partnership has resulted in a productive cross-governmental relationship, significant cost-sharing, and scientifically and legally defensible research.

In FY 2016, BU will finalize the basic domain structure of the FAB, conclude the national calibration study, and initiate a predictive validity study of the FAB instrument. In addition, NIH will finish development of an empirical method for nominating new candidates for our CAL list.

In FY 2017 NIH will continue to explore data-driven methods to inform our data collection and determination processes, and will work with BU to replenish and scientifically enhance the rigor of the existing FAB instrument.

Occupational Information System (OIS)

We are developing a new OIS that will replace the Dictionary of Occupational Titles (DOT) as the primary source of occupational information in our disability adjudication process. The Department of Labor has not updated the DOT since 1991. In 2012, the Bureau of Labor Statistics (BLS) began conducting feasibility tests to determine whether they could collect the type of occupational information we need, using the platform of the National Compensation Survey (NCS). BLS calls this data collection effort the Occupational Requirements Survey (ORS). In September 2015, after three years of successful testing, BLS began collecting production data that our adjudicators will eventually use to make disability decisions. The first production collection cycle will take 3 years. We hope that disability adjudicators can begin using the new data in 2019. In the future, we intend to update the data annually under an agreement with BLS to ensure we use current occupational data to adjudicate our disability claims.

Once completed, the new OIS will include many occupational descriptors similar to those adjudicators currently use in the DOT. However, the OIS will expand on DOT information by describing the basic mental and cognitive requirements of work. The OIS will incorporate ORS

data, elements from DOL's Occupational Information Network (O\*NET), and will crosswalk to the Military Occupational Classification (MOC). The new OIS will combine these data in a web-based, publicly available information technology (IT) platform that will filter and sort the data as needed to adjudicate disability claims and will eventually integrate with our internal electronic case processing systems.

We signed yearly IAAs with BLS for FY 2013 through FY 2015 to continue testing. In FY 2013, BLS tested collecting the physical and skill requirements of occupations and workers' environmental exposure. After each of three test phases, BLS consulted with SSA, evaluated data collection issues, and refined the data collection protocols and processes.

In FY 2014, the BLS resolved outstanding issues identified in FY 2013 and tested collecting new data elements, such as the mental and cognitive requirements of work. BLS also contracted with an expert to evaluate internal research regarding the methods of occupational data collection and approaches for testing the validity and reliability of the data. In accordance with the report recommendations, BLS conducted a job observation test during the summer of 2015 to compare the data collected during pre-production to those collected through direct job observation. The testing indicates high levels of agreement across most elements. For elements with lower levels of agreement, the testing can be used to provide additional guidance to both field economists and the respondent to aid in estimating. BLS will consider continuing to select a subsample of occupations for direct observation as a quality assurance measure. The complete report can be found on the BLS website at [http://www.bls.gov/ncs/ors/preprod\\_job\\_ob.pdf](http://www.bls.gov/ncs/ors/preprod_job_ob.pdf).

In FY 2014, we also began working with Northrop Grumman through our Information Technology Support Services Contract. We started developing the requirements for the front-end instrument that will pull together the occupational data BLS is collecting, the O\*NET data, and the Military Occupation Code crosswalks.

In early FY 2015, BLS started the nationwide pre-production test to prepare for production data collection. During pre-production testing, we continued working with BLS to evaluate and refine the survey elements describing the mental and cognitive requirements of work to ensure this information meets the needs of our adjudicators. BLS released the pre-production test data in September 2015. BLS also applied for clearance from OMB to implement production data collection, which began in September 2015. BLS also started researching the rate at which occupations change in order to inform decisions about the OIS lifecycle. We continued working with Northrop Grumman to outline system requirements for the OIS IT platform, developed an OIS prototype, and outlined a plan to test the platform using pre-production data.

In FY 2016, BLS will complete the first round of production data collection, and start the second year. In the last quarter of FY 2016, Northrop Grumman will complete the development of an IT application that will allow us to conduct a usability test using pre-production data. We will work with the Office of Disability Policy to develop training and roll out plans, and consider policy changes that will allow us to use the new data more efficiently.

In the first quarter of FY 2017, BLS will release estimates from the first year of collection. BLS will release the second year of production data to us by the end of 2017 and the third year by the

## Supplemental Security Income Program

end of 2018. Before the end of this first 3-year cycle of production data collection, we will work with BLS to identify the best method to update data into the future to capture requirements of occupations important to disability adjudication.

The current IAA with BLS ends at the end of FY 2016, and we plan to renew it annually, providing our collaboration continues to be successful.

We use Section 1110 funding for all OIS research and development contracts, while LAE funds the salaries and benefits of the SSA employees managing the project and for the development of the platform that will house the OIS data. More information regarding this project is available at our OIS website: [https://www.ssa.gov/disabilityresearch/occupational\\_info\\_systems.html](https://www.ssa.gov/disabilityresearch/occupational_info_systems.html).

### Promoting Readiness of Minors in SSI (PROMISE)

PROMISE is a joint pilot demonstration program with ED, HHS, and DOL. The goal of the program is to test interventions that improve the health, education, and post-school outcomes of children who receive SSI, including the completion of postsecondary education and employment. It is also intended to improve family or household outcomes through improved services and supports, such as education and job training for parents.

In FY 2013, ED's Office of Special Education and Rehabilitation Services awarded competitive grants to five states and one consortium of states. States are using these funds to improve coordination and increase the use of existing services for which children receiving SSI and their families are already eligible. These services are available through the Individuals with Disabilities Education Act, the Vocational Rehabilitation State Grants program, Medicaid's Care Coordination Services, Job Corps, and other Workforce Investment Act programs.

Developing and conducting a rigorous evaluation to guide implementation, gather evidence, and validate incentive payments is a key component of PROMISE. In FY 2012, we convened a technical advisory panel to help prioritize the evaluation needs of this project. In FY 2013, we awarded a contract to evaluate PROMISE pilot interventions and in FY 2014, our evaluation contractor provided technical assistance to the state grantees and will begin randomly assigning youth into treatment and control groups. In FY 2015, our contractor continued random assignment and technical assistance, conducted site visits and focus groups, and delivered early assessments of the recruitment and enrollment process. In FY 2016, we have begun collecting data for the first national evaluation survey and will conduct additional site visits and focus groups. Enrollment and random assignment into PROMISE will end in April 2016. Our contractor will also begin work on the process analyses, the first of which will be due in early FY 2017. In FY 2017, our contractor will continue conducting surveys, conduct the final site visits, and finish the site-specific process analyses.

## Deliver Innovative Quality Service

### Understanding Americans Study (UAS) Enhancements

The UAS is an innovative, nationally representative longitudinal internet panel. Through a jointly financed cooperative agreement with National Institute on Aging (NIA), our support will

maintain the sample size we funded in prior fiscal years. It will also allow for additional data improvements that support policy-relevant research and evidence-based decision-making. Planned data enhancements include:

- Increasing the sample size so that we can conduct more robust retirement security research on the American public to inform SSA's targeted outreach efforts to specific populations, including young workers and those nearing retirement; and
- Maintaining a Quick Turnaround Project fund for directly testing and answering emerging research questions from internal and external policy makers.

The UAS enhancements allow SSA to make more informed decisions about initiating new policies, procedures, and educational products designed to enhance retirement security. The UAS data also serves the public because the sample we support is available for researchers inside and outside of SSA to use in addressing research questions. For example, the Society of Actuaries have used the information in the UAS to help inform their research efforts to better understand families with income in the middle quartiles so they can possibly create products that will make this segment of the population less reliant on Social Security retirement benefits in old age. In addition, the Financial Literacy and Education Commission (FLEC) has used data from the UAS in their publications about the public's knowledge of Social Security programs and from whom the public seeks financial advice. With the exception of our staff time related to administering the funding agreement, the cost associated with our UAS enhancement is charged to our Section 1110 appropriation.

### *Collaboration with Other FLEC Members*

In FY 2016, we are continuing our focus on collaborative initiatives designed to improve retirement security among vulnerable populations. One component of this effort is to support activities of Federal agencies that are members of the FLEC. The FLEC, established by Congress in 2003, is a consortium of more than twenty Federal departments, agencies, and other entities working together toward the goal of improving the financial literacy and education of persons in the United States. Coordinating extramural research efforts on financial literacy and retirement security with other Federal agencies allows SSA to minimize redundancy, identify best practices, share results, and leverage existing investments.

In FY 2017, we plan to continue supporting jointly funded cooperative agreements with ED, a key FLEC partner. Our extramural research partnership with ED builds on existing programs to foster retirement security-related research at Historically Black Colleges and Universities (HBCUs) and other minority-serving institutions. This partnership, launched in FY 2011, is consistent with [Executive Order 13532](#) which supports HBCUs. ED issued the initial awards under the program at the end of FY 2013. The four grantee institutions are now using this funding to produce research on retirement security issues and to build capacity and human capital for future research. This research has been submitted to academic journals, such as the Elder Law Journals, and to conferences, such as Society of Business and Industry Conference and the Public Management and Political Pedagogy Annual Conference. In addition, one grantee is testing a culturally-sensitive mobile app to improve that segment of the public's retirement security.

## Supplemental Security Income Program

Investing in this collaborative research initiative is a critical way for SSA to support the FLEC and to help improve financial capability, financial literacy, and retirement security among economically vulnerable groups. We anticipate that this program may also increase the return on our investment in data support for the UAS and HRS. More broadly, the financial literacy and education research we fund via this project line is specifically designed to prevent dependency in old age and to promote understanding and effectiveness of Social Security program features. With the exception of our staff time related to administering the programs, all costs for these activities are charged to our Section 1110 appropriation.

### Enterprise Business Intelligence Platform

This project develops data on an Enterprise Business Intelligence Platform (EBI) for use by SSA components and appropriate entities external to SSA (e.g. Congressional Budget Office (CBO), Congressional Research Service, Open Government, etc.) for research and statistical purposes.

With FY 2015 funding, we began automating current processes, building a web portal where authorized staff can access structured, cleansed, and validated datasets based on SSA administrative data. Enhanced processes and access points will allow for:

- greater efficiency in the production of the Agency's program statistics;
- on-demand access to large quantities of data, as well as customized reports by policy developers, policy makers, and researchers; and
- easier and timelier dissemination of data analysis findings to support data based decisions.

These actions leverage the capabilities of EBI technology to maintain and even increase SSA's ability to provide accurate, timely, and consistent information on our social insurance programs. Furthermore, the proposed automation will allow SSA to reallocate human resources to pursue the development and dissemination of new data, research, and analysis products.

With FY 2016 funding, we plan to continue automation and development of the web portal for OASDI and SSI data. With FY2017 funding, we plan to complete the automation and web portal for earnings related data.

### New and Emerging Research- Retirement

In FY 2017, we plan to continue our partnership with the NIA supporting the "Roybal Center for Decision Making to Improve Health and Financial Independence in Old Age" at the University of Southern California. Congress created the Roybal Centers Program in 1992 to help translate basic social and behavioral research into practical applications for improving the health and well-being of older Americans. We intend to use the Roybal Center project to address emerging research topics of value to the Agency and external stakeholders, such as the White House and Congress. We first contributed funding to this project in FY 2015. The initial set of pilot projects the grantee has proposed to NIA includes research on financial decisions, annuities, and other topics that could inform our outreach and messaging to improve retirement security.

We may also continue to address retirement topics using other research vehicles, such as Intergovernmental Personnel Act (IPA) scholars. Through the IPA program, we fund recognized scholars to work on defined and targeted projects to help create unique and valuable retirement research relevant to SSA's mission. Past accomplishments from the IPA program include research on the impact of the Social Security Statement for both younger and older workers, the earnings implications of divorce for women, and the effects of employment gaps and layoffs on earnings and Social Security benefits.

### Medicare Outreach – Section 1144

Section 1144 of the Social Security Act requires that we conduct outreach to Medicare beneficiaries who may qualify for Medicare cost-sharing assistance under the Medicare Savings Programs (MSP) and for the Medicare prescription drug coverage low-income subsidy. In order to meet this requirement, we have targeted our outreach efforts to include income-tested new Medicare beneficiaries, beneficiaries that have experienced a drop in income, and 20 percent of those who were previously notified of their potential eligibility and still meet the appropriate test.

We use a variety of outreach methods to inform those who potentially qualify for the MSP and/or subsidized Part D. We also send outreach letters to former Disability Insurance beneficiaries without Medicaid who lost their free Medicare Part A due to work. These beneficiaries may be eligible to get help from the MSP to pay their monthly Part A premiums.

In FY 2015, we mailed approximately 3 million outreach letters to those who potentially qualified for MSP or Medicare prescription drug coverage and in FY 2016 we anticipate approximately the same number of mailings.

### **Strengthen the Integrity of Our Programs**

One of the primary aims of our research program is to preserve the public's trust in SSA's programs by simplifying and streamlining how we do our work. To meet the challenges of our growing workload, SSA's research program provides analyses and data that support our efforts to make Social Security more responsive to the needs of the 21<sup>st</sup> century workforce. The following project summaries highlight the external efforts we plan to fund in FY 2017 that will help to simplify and streamline our policies, procedures, and business processes, as well as maximize our use of automation:

#### Census Surveys

The Census Bureau's surveys—primarily the SIPP and the Current Population Survey—are the foundation for much of our policy analysis and modeling efforts. Improving the overall quality of data from Census Bureau surveys enhances the value and reliability of the analyses we conduct. We support efforts to improve the quality of Census Bureau survey data that are of direct relevance to analyses of the Social Security, SSI, and related income-maintenance programs. In addition, we support efforts by the Census Bureau to improve the ability to match Census Bureau survey data to our administrative data on benefits and earnings.

Beginning in FY 2010, a major focus of our funding has been to contribute to the Census Bureau's re-engineering of SIPP, with a new survey that entered the field in February 2014. We rely upon SIPP data matched to our records to study the effects of OASDI, SSI, and related

## Supplemental Security Income Program

programs and to determine how changes to our programs affect individuals, the economy, and program solvency. Some of the important data elements required for our modeling and analysis efforts are not contained in the Census Bureau's re-engineered SIPP. In recent years, we have provided funding and worked with Census to design a supplementary data collection to the re-engineered SIPP to meet our research and evaluation needs. Our FY 2015 funding completed our support of the supplemental data collection effort and data processing. The data are due to be released in December 2016 according to the Census Bureau.

Without this supplemental data collection, our ability to update and use the MINT model to respond to requests from the White House, Congress, and others to evaluate the impact of proposed changes to the Social Security programs will be severely impaired.

### Data Development

One of the main objectives of our extramural research program is to provide information for decision-makers on the Social Security and SSI programs. A key ingredient to providing such information is having appropriate data to answer questions on a range of pending issues. As part of this effort, we develop and maintain a series of detailed statistical databases drawn from SSA's major administrative data systems, prepare a broad range of statistical tables, produce statistical compilations and publications, and develop information for research, evaluation, and models using survey data collected by SSA, other Federal agencies, or federally-sponsored institutions.

This project funds the creation of data that are needed to inform policymakers about important programs, efforts to make data more widely accessible or usable for policy research purposes, and collaboration with other agencies to study issues of policy relevance or to improve data quality and methods of data analysis.

Projects that we are currently funding include:

- Workers' Compensation Statistics—provides support to produce an income series on Workers' Compensation that we publish on an ongoing basis in the Annual Statistical Supplement.
- Committee on National Statistics of the National Research Council—along with contributions from other federal statistical agencies, provides support to the committee to improve statistical methods and information on which public policy decisions are based. Recent Committee topics include survey options for estimating the illegal alien flow at the Southwest border; redesigning the Consumer Expenditure Surveys; improving healthcare cost projections for the Medicare population; formulating a research agenda for the future of social science data collection; the future of federal household surveys collecting pay information from U.S. employers by gender, race and national origin; and measuring financial vulnerability by analyzing spending on medical care spending.
- Joint Program in Survey Methodology—a project jointly sponsored by the Census Bureau and the Interagency Council on Statistical Policy to develop up-to-date research techniques and training programs to train the next generation of researchers on state of the art practices in the statistical and methodological aspects of surveys.

- Research on Survey Methodology Program—a project jointly sponsored by the National Science Foundation and the Interagency Council on Statistical Policy to further the development of new and innovative approaches to surveys that will have broad implications for the field in general and specifically for the federal statistical system. Research topics include survey measurement issues; data collection procedures; technological issues related to survey design; and methods for the analysis of survey data.
- Key Indicators of Well-Being of Older Americans—provides support to the Federal Interagency Forum on Aging-Related Statistics for an interagency collaboration to produce a chart book with 37 key indicators about older Americans in five broad areas: population; economics; health status; health risks and behaviors; and healthcare, and related publications and workshops to identify and fill gaps and improve the quality of data on older Americans.

In addition to these specific projects, we will respond to new needs and opportunities for expansion and improvement of data as they arise.

#### Health and Retirement Study (HRS)

The University of Michigan's HRS surveys more than 22,000 Americans over the age of 50 every 2 years and provides an ongoing source of longitudinal data for research on retirement and aging. The study paints an emerging portrait of an aging nation's transition from work to retirement and provides data on health and economic well-being after retirement. HRS data help us assess a wide range of issues, including pre-retirement saving, health insurance and pension coverage, retirement patterns, and projected benefits of disabled and retired workers. Through jointly financed cooperative agreements with NIA, we have supported the HRS from its inception. HRS has become the premier source of data on the retirement-age population, especially when linked with our administrative records on benefits and earnings.

This project has five major components in FY 2017:

- Basic survey support that is targeted toward protecting against losses in sample size, improving data quality, assuring confidentiality of the data, and developing restricted access to administrative data on benefits and earnings.
- Production of user-friendly public-use HRS longitudinal data files with consistent imputations of missing data and simplified merging of observations across interview waves.
- Collection of longitudinal information from HRS respondents on consumption to understand how consumption changes through retirement and whether people have adequate retirement income to meet their consumption needs.
- Improvements to the consent rate among respondents to match HRS survey information to SSA administrative records on benefits and earnings. This goal is largely achieved through increasing the proportion of HRS interviews in each wave that are conducted in person rather than by telephone. This effort will continue with the new cohort of respondents that will be added to the 2016 HRS.

## Supplemental Security Income Program

- Updates of sample weights that account for attrition across waves of the HRS, longitudinal imputations of wealth and asset measures, and an integrated file to facilitate matching of HRS data to SSA administrative records.

### HRS Supplement

The HRS is an important source of longitudinal data on retirement and aging, but sample sizes of minority and low-income populations are small, limiting research on these groups. Through a jointly financed cooperative agreement with NIA, this project will maintain the increased sample size in the HRS for minority and low-income populations that we started supporting in FY 2009. The minority expansion will continue to have HRS data matched to Agency administrative records.

The HRS minority samples expansion allows researchers to complete subgroup analysis of vulnerable populations, which is particularly important as the HRS has become the premier data source for research on the near-retirement-age and retirement-age populations. The HRS is used heavily for research projects funded by SSA through the RRC and by SSA staff in conducting research on topics including pension participation, differences in contributions to tax-deferred savings accounts among different birth cohorts, and retirement resources of near-retirees. The HRS data we support is also available for outside researchers to use.

Since its inception in 1992, SSA has provided annual funding to support and improve data collection and linkage HRS data to SSA administrative data. Among the things we fund are a user-friendly longitudinal HRS data file, which is heavily used by SSA analysts, academics and contractors; in-person interviews to improve consent rates to match to SSA records; and the collection of longitudinal data on consumption patterns of a subset of HRS respondents. This unique longitudinal dataset makes it possible to study the dynamics of retirement and the aging of the population and how this is changing in successive cohorts. Over 2,000 studies using HRS data are registered on the HRS website. SSA uses the HRS for both policy analysis and model development. HRS data have been used to estimate labor force participation, retirement transitions, financial wealth, and housing equity relationships in SSA's MINT model. The data are also extensively used for RRC-funded research and as the basis for reports by CBO, GAO, the Council on Economic Advisors, and the President's Commission to Strengthen Social Security.

### Retirement Research Consortium (RRC)

The RRC is one of our key tools for maintaining a strong capability to produce a large body of policy-relevant research on retirement and Social Security. The RRC comprises three competitively selected research centers based at the University of Michigan, Boston College, and the National Bureau of Economic Research. They are broadly charged with planning, initiating, and maintaining a high quality, multidisciplinary research program that covers retirement and Social Security program issues. The centers perform valuable research and evaluation of retirement policy, disseminate results, provide training and education awards, and facilitate the use of our administrative data by outside researchers. These centers have greatly expanded the

amount of policy research on Social Security-related issues and have responded to our specific analytical needs.

The research results of the RRC are widely reported in professional journals and conferences and in leading newspapers, radio, and television programs. The centers also disseminate results, train students and practitioners, and facilitate the use of our administrative data by outside researchers. In FY 2017, we will enter year four of the current 5-year cooperative agreements, which run through FY 2018.

Some recent studies funded through the RRC examine how behavioral and psychological factors affect individuals' financial and claiming decisions. These studies are looking at the roles of personality traits and biases, such as the tendency to underestimate exponential growth, which could lead to decisions that may put future retirees' financial security at risk.

Other recent RRC studies have looked at the role of occupations and their characteristics on the work choices of older workers. These studies are looking at how job demands influence retirement plans and whether changes to working conditions, either through job change or workplace accommodations, could lead older workers to delay leaving the workforce.

Finally, additional studies through the RRC assess the relationship between age and cognitive decline as they relate to financial decision making. This research is important to establish the size and the characteristics of the population of future retirees who will require representative payees to manage their Social Security benefits. Recent RRC papers are available at the following link: <http://www.ssa.gov/policy/rrc/>.

### Retirement Income Modeling

Fundamental changes to the Social Security program can have a significant effect on the distribution of benefits, total retirement income, and incidence of poverty. Econometric and simulation models can provide policy makers with detailed information on the effects of changes in government programs on individuals, with projections for years into the future. SSA's MINT model is an important tool for such evaluations. MINT's projections of the aged population have been extended well into the 21<sup>st</sup> century to enable simulation of additional Social Security policy changes. MINT is particularly well suited for studying the distributional effects of reform proposals that are implemented immediately, but also provides valuable insights into proposals that are phased in over time. For example, MINT has been used by SSA, GAO, the Council of Economic Advisors, and OMB. MINT estimates have provided data for numerous congressional policy proposals.

SSA continually assesses the functionality of MINT. MINT is updated frequently to enhance components of the model, add new components, use more recent data, and incorporate the latest assumptions from the Trustees Reports through individual 1 to 2 year contracts. A recently completed contract enhanced MINT to include more recent survey and SSA administrative data and incorporated behavioral responses, model family-level consumption, and improved processing efficiency and turnaround time.

## Supplemental Security Income Program

The MINT project provides quality and productivity improvements that go beyond SSA's staffing resources and expertise. All costs for the development of MINT are charged to our Section 1110 appropriation. However, most MINT analyses are conducted in-house and the costs associated with in-house staff analyses using MINT are funded through our administrative budget.

### *Social Security Programs throughout the World*

The Social Security Programs throughout the World (SSPTW) publication is the product of a cooperative effort between SSA and the International Social Security Association (ISSA). The ISSA is the principal international institution bringing together social security agencies and organizations around the world. The information contained in these volumes is crucial to our efforts and those of researchers in other countries to review different ways of approaching social security challenges that will enable us to adapt our social security systems to the evolving needs of individuals, households and families. These efforts are particularly important as each nation faces major demographic changes, especially the increasing number of aged persons, as well as economic and fiscal issues.

The Office of Research, Evaluation and Statistics has produced the SSPTW since 1937. It is the only source that provides reliable current country specific information on such a large number of foreign social security programs—currently more than 170 countries around the world. Internally, it is used extensively by the Office of International Programs in the preparation of totalization agreements and for determining a country's eligibility under section 202(t) of the Social Security Act; to prepare for international meetings and for internal research activities (e.g. Social Security Bulletin articles, International Update and a monthly newsletter). Externally, it is used by Congress (such as the Senate Special Committee on Aging and the HELP Committee), across other Federal agencies (e.g., the GAO, DOL, and HHS) to prepare reports on a variety of social insurance topics, and by the State Department, which widely distributes copies to its embassies around the world. International Organizations including the World Bank, International Labor Organization, International Monetary Fund and the United Nations, often include SSPTW data in their publications (e.g., the ILO relies on SSPTW for its series World Social Protection Report). In FY 2017, we plan to continue to fund this effort.

---

## RELATED FUNDING SOURCES

The Commissioner of Social Security has the authority to conduct research and demonstration projects under section 234 of the Social Security Act. The Commissioner uses trust fund monies to conduct various demonstration projects, including alternative methods of treating work activity of individuals entitled to DI benefits. These demonstration projects, authorized under the 1999 Ticket to Work Act and the Bipartisan Budget Act (BBA) of 2015, P.L. 114-74, are funded from the trust funds, and are not part of the annual research appropriation request. OMB directly apportions section 234 funds. The BBA provides authorization to initiate such projects until December 31, 2021 and to carry out such projects through December 31, 2022. We are currently considering potential demonstration projects that would support the employment efforts of individuals with disabilities, and reduce their dependence on disability benefits. Our Benefit Offset National Demonstration (BOND) requires continued section 234 funding in FY 2017. The BBA also directs SSA to conduct a new demonstration testing a benefit offset

after an allowance for impairment-related work expenses. We are currently developing this demonstration and do not yet have estimates of the FY 2017 costs.

### **EARLY INTERVENTION MENTAL HEALTH DEMONSTRATION (EIMHD)**

---

A key challenge for early-interventions is to identify individuals at risk of becoming long-term DI and SSI recipients who would also have the potential to benefit from the intervention methods. This demonstration will test early-intervention methods with a focus on workers with mental illness under the age of 50 who have recently applied for SSI or DI disability benefits and been denied.

Denied applicants often include individuals who are on the margin between employment and receiving disability benefits. Prior research estimates that 40 percent of DI claimants denied at the appeals level end up on the disability rolls within 10 years.<sup>1</sup> With the appropriate health care and employment supports, some of those individuals may remain in the labor market.

The EIMHD will provide participants with an intensive set of behavioral health and related services above and beyond what is available through the individual's existing health plan. Additionally, long-term employment services following the evidence-based Individual Placement and Support (IPS) model will be used to help participants remain in or return to the labor market rather than seek SSA disability benefits.<sup>2</sup> IPS services are delivered by supported employment teams that operate within community mental health agencies and other medical providers, with a key differentiator from other interventions being the linkage between employment and medical services. We will follow an IPS service model similar to that successfully implemented for SSA's MHTS.

The health-related treatment may include behavioral health and related services, medication, and disease management services. The employment-related services could include job placement, and pre- and post-placement support services. We will require service providers to have strong employer contacts and the ability to place participants in sustainable jobs with reasonable wages. Support services may include help with incidentals necessary to secure and maintain employment (such as work clothes or transportation) and low-intensity, long-term services that focus on employment retention once a job is secured (e.g., providing an employment retention coach).

The demonstration will include a 1-year design refinement phase and a 5-year implementation phase. Over that period, it will evaluate impacts on outcomes such as employment, earnings, health, and DI and SSI applications and benefit receipt.

In FY 2015, we released the Request for Proposals for the EIMHD and plan to award a contract in FY 2016. We plan to begin the 1-year design refinement, obtain OMB clearance for surveys, and finalize site selection in FY 2016 and start recruitment in FY 2017.

---

<sup>1</sup> See French and Song, "Effect of Disability Receipt on Labor Supply," July 1, 2011, Federal Reserve of Chicago.

<sup>2</sup> The behavioral health and related services would be in addition to base services already available, such as including greater intensity and frequency of services and reimbursement for medication co-pays.

## APPROPRIATION LANGUAGE

For necessary expenses, including the hire of two passenger motor vehicles, and not to exceed \$20,000 for official reception and representation expenses, not more than

[ \$10,598,945,000 ] *\$11,121,000,000* may be expended, as authorized by section 201(g)(1) of the Social Security Act, *and including the cost of carrying out the Social Security Administration's obligations as required under section 1411 of Public Law 111-148*, from any one or all of the trust funds referred to in such section: *Provided*, That not less than [ \$2,300,000 ] *\$2,500,000* shall be for the Social Security Advisory Board: *Provided further*, That, [ \$116,000,000 may ] *not less than \$59,000,000 shall* be used for the costs associated with conducting continuing disability reviews under titles II and XVI of the Social Security Act and conducting redeterminations of eligibility under title XVI of the Social Security Act: *Provided further*, That, *upon a determination that part of the funds specified in the preceding proviso is not necessary for such reviews and redeterminations, such amounts may be used for other purposes provided herein:*

[ *Provided further*, That the Commissioner may allocate additional funds under this paragraph above the level specified in the previous proviso for such activities but only to reconcile estimated and actual unit costs for conducting such activities and after notifying the Committees on Appropriations of the House of Representatives and the Senate at least 15 days in advance of any such reallocation: *Provided further*, That the acquisition of services to conduct and manage representative payee reviews shall be made using full and open competition procedures:

*Provided further*: That, \$150,000,000 to remain available until expended, shall be for necessary expenses for the renovations and modernization of the Arthur J. Altmeyer Building:] *Provided further*, That unobligated balances of funds provided under this paragraph at the end of fiscal

year [2016] 2017 not needed for fiscal year [2016] 2017 shall remain available until expended to invest in the Social Security Administration information technology and telecommunications hardware and software infrastructure, including related equipment and non-payroll administrative expenses associated solely with this information technology and telecommunications infrastructure: *Provided further*, That the Commissioner of Social Security shall notify the Committees on Appropriations of the House of Representatives and the Senate prior to making unobligated balances available under the authority in the previous proviso: *Provided further*, That reimbursement to the trust funds under this heading for expenditures for official time for employees of the Social Security Administration pursuant to 5 U.S.C. 7131, and for facilities or support services for labor organizations pursuant to policies, regulations, or procedures referred to in section 7135(b) of such title shall be made by the Secretary of the Treasury, with interest, from amounts in the general fund not otherwise appropriated, as soon as possible after such expenditures are made.

In addition, for the costs associated with continuing disability reviews under titles II and XVI of the Social Security Act [and], *including work related continuing disability reviews to determine whether earnings derived from services demonstrate an individual's ability to engage in substantial gainful activity*, for the cost associated with conducting redeterminations of eligibility under title XVI of the Social Security Act, *for the cost of co-operative disability investigation units, and for the cost associated with the prosecution of fraud in the programs and operations of the Social Security Administration by Special Assistant United States Attorneys*, [\$1,426,000,000] \$1,819,000,000 may be expended, as authorized by section 201(g)(1) of the Social Security Act, from any one or all of the trust funds referred to therein: *Provided*, That, of such amount, \$273,000,000 is provided to meet the terms of section 251(b)(2)(B)(ii)(III) of the

Balanced Budget and Emergency Deficit Control Act of 1985, as amended, and  
[\$1,153,000,000] \$1,546,000,000 is additional new budget authority specified for purposes of  
section 251(b)(2)(B) of such Act: *Provided further*, That the Commissioner shall provide to the  
Congress (at the conclusion of the fiscal year) a report on the obligation and expenditure of these  
funds, similar to the reports that were required by section 103(d)(2) of Public Law 104–121 for  
fiscal years 1996 through 2002.

In addition, [\$136,000,000] \$126,000,000 to be derived from administration fees in excess  
of \$5.00 per supplementary payment collected pursuant to section 1616(d) of the Social Security  
Act or section 212(b)(3) of Public Law 93–66, which shall remain available until expended. To  
the extent that the amounts collected pursuant to such sections in fiscal year [2016] 2017 exceed  
[\$136,000,000] \$126,000,000, the amounts shall be available in fiscal year [2017] 2018 only to  
the extent provided in advance in appropriations Acts.

In addition, up to \$1,000,000 to be derived from fees collected pursuant to section 303(c)  
of the Social Security Protection Act, which shall remain available until expended.

*(Departments of Labor, Health and Human Services, and Education, and Related Agencies  
Appropriations Act, 2016.)*

## LANGUAGE ANALYSIS

The Limitation on Administrative Expenses (LAE) appropriation language provides the Social Security Administration (SSA) with the funds needed to administer the Old Age and Survivors Insurance (OASI), Disability Insurance (DI), and Supplemental Security Income (SSI) programs, and to support the Centers for Medicare and Medicaid Services in administering their programs. The LAE account is funded by the OASI, DI, and Medicare trust funds for their share of administrative expenses, by the General Fund of the Treasury for the SSI program's share of administrative expenses, and through applicable user fees. The language provides the limitation on the amounts that may be expended, in total from these separate sources, for the administrative expenses of the agency.

SSA is requesting a total of \$1,819,000,000 in dedicated program integrity funding, including funding for full medical Continuing Disability Reviews (CDR), SSI non-medical redeterminations of eligibility (redeterminations), work related CDRs, cooperative disability investigation (CDI) units, and fraud prosecutions by Special Assistant United States Attorneys (SAUSAs). The FY 2017 program integrity request is comprised of \$273,000,000 in base funding to meet the terms of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, and \$1,546,000,000 in additional new budget authority. This funding level is consistent with the Bipartisan Budget Act of 2015 (P.L. 114-74).

In addition to the appropriated amounts, SSA is requesting to spend up to \$126,000,000 in SSI State Supplement user fees and up to \$1,000,000 in non-attorney representative fees.

**Table 3.1—Appropriation Language Analysis**

Language Provision	Explanation
<i>“...and including the cost of carrying out the Social Security Administration's obligations as required under section 1411 of Public Law 111–148,...”</i>	The language allows SSA to use LAE resources for some Affordable Care Act activities.
<i>Provided further, That, not less than \$59,000,000 shall be used for the costs associated with conducting continuing disability reviews under titles II and XVI of the Social Security Act and conducting redeterminations of eligibility under title XVI of the Social Security Act: Provided further, That, upon a determination that part of the funds specified in the preceding proviso is not necessary for such reviews and redeterminations, such amounts may be used for other purposes provided herein:</i>	This language carves out funding to support the fully loaded costs of performing 1.1 million CDRs and approximately 2.8 million redeterminations.

Language Provision	Explanation
<p>“<i>Provided further</i>, That unobligated balances of funds provided under this paragraph at the end of fiscal year [2016] 2017 not needed for fiscal year [2016] 2017 shall remain available until expended to invest in the Social Security Administration information technology and telecommunications hardware and software infrastructure, including related equipment and non-payroll administrative expenses associated solely with this information technology and telecommunications infrastructure: <i>Provided further</i>, That the Commissioner of Social Security shall notify the Committees on Appropriations of the House of Representatives and the Senate prior to making unobligated balances available under the authority in the previous proviso...”</p>	<p>The language allows SSA to carryover unobligated balances for non-payroll automation and telecommunications investment costs in future fiscal years.</p>
<p>“In addition, for the costs associated with continuing disability reviews under titles II and XVI of the Social Security Act [and], <i>including work related continuing disability reviews to determine whether earnings derived from services demonstrate an individual’s ability to engage in substantial gainful activity</i>, for the cost associated with conducting redeterminations of eligibility under title XVI of the Social Security Act, <i>for the cost of co-operative disability investigation units, and for the cost associated with the prosecution of fraud in the programs and operations of the Social Security Administration by Special Assistant United States Attorneys</i>, [\$1,426,000,000] \$1,819,000,000 may be expended, as authorized by section 201(g)(1) of the Social Security Act, from any one or all of the trust funds referred to therein: <i>Provided</i>, That, of such amount, \$273,000,000 is provided to meet the terms of section 251(b)(2)(B)(ii)(III) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, and [\$1,153,000,000] \$1,546,000,000 is additional new budget authority specified for purposes of section 251(b)(2)(B) of such Act: <i>Provided further</i>, That the Commissioner</p>	<p>The language appropriates \$1,819,000,000 of dedicated program integrity funding for SSA’s full medical CDRs, redeterminations, work related CDRs, CDI units, and fraud prosecutions. That amount comprises a base of \$273,000,000 and additional new budget authority of \$1,546,000,000 for the purposes of an adjustment to the discretionary spending limit as provided in section 251(b)(2)(B) of the Balanced Budget and Emergency Deficit Control Act of 1985.</p>

Language Provision	Explanation
<p>shall provide to the Congress (at the conclusion of the fiscal year) a report on the obligation and expenditure of these funds, similar to the reports that were required by section 103(d)(2) of Public Law 104–121 for fiscal years 1996 through 2002.</p>	
<p>“In addition, [\$136,000,000] <i>\$126,000,000</i> to be derived from administration fees in excess of \$5.00 per supplementary payment collected pursuant to section 1616(d) of the Social Security Act or section 212(b)(3) of Public Law 93–66, which shall remain available until expended. To the extent that the amounts collected pursuant to such sections in fiscal year [2016] <i>2017</i> exceed [\$136,000,000] <i>\$126,000,000</i>, the amounts shall be available in fiscal year [2017] <i>2018</i> only to the extent provided in advance in appropriations Acts.”</p>	<p>The language makes available up to \$126,000,000 collected from states for administration of their supplementary payments to the SSI program. This assumes the fee will increase from \$11.56 per check in FY 2016 to \$11.69 in FY 2017 according to increases established by statute. SSA receives the amount collected above \$5.00 from each fee.</p>
<p>“In addition, up to \$1,000,000 to be derived from fees collected pursuant to section 303(c) of the Social Security Protection Act, which shall remain available until expended.”</p>	<p>The language provides for the use of up to \$1,000,000 derived from fees charged to non-attorneys who apply for certification to represent claimants.</p>

## SIGNIFICANT ITEMS IN APPROPRIATIONS COMMITTEE REPORTS

---

The table below includes the significant items in the FY 2016 Joint Committee Report, H.R. 2029, as well as items set forth in House Report 114-195 and Senate Report 114-74.

**Table 3.2— Consolidated Appropriations Act, 2016: Joint Committee Report (H.R. 2029)—  
Significant Items**

<b>Disability Early Intervention Initiative/Functional Assessment of Battery</b>	<b>Actions Taken or To Be Taken</b>
<p>The Disability Early Intervention Initiative will test innovative and evidence-based approaches to improve outcomes for individuals with disabilities who are not yet receiving Social Security disability benefits, but who are likely to be eligible for benefits in the future. The intent of this initiative is to provide a multi-pronged approach, focusing on helping them remain in the workforce. The Social Security Administration (SSA) has partnered with the National Institutes of Health to create a functional assessment tool that is reliable and objective and may inform the disability determination process. One of the major projects of this partnership is the: Functional Assessment Battery. The agreement directs the Social Security Administration (SSA) to provide a report to the Committees on Appropriations of the House of Representatives and the Senate, Committee on Finance of the Senate, and Committee on Ways and Means of the House of Representatives on how the SSA might use the National Institutes of Health's Functional Assessment Battery (FAB) as part of the disability determination process; how it would ensure the validity and accuracy of the FAB before using it for this purpose; and how it would obtain public comment and ensure transparency if the FAB is incorporated into the determination process.</p>	<p>SSA is working to satisfy the requirement.</p>

<b>Disability Early Intervention Initiative/Functional Assessment of Battery</b>	<b>Actions Taken or To Be Taken</b>
<b>Work Incentives Planning and Assistance (WIPA) and Protection and Advocacy for Beneficiaries of Social Security (PABSS)</b>	<b>Actions Taken or To Be Taken</b>
The bill includes not less than \$23,000,000 for the WIPA program and \$7,000,000 for the PABSS program.	We issued PABSS awards notices in October 2015. We plan to issue WIPA award notices in June 2016.
<b>Fraud Risk Performance</b>	<b>Actions Taken or To Be Taken</b>
The Committee strongly encourages SSA to fully implement the recommendations found within the SSA Inspector General report on Fraud Risk Performance Audit. Specifically, the Committee urges SSA to take a risk-based approach to combatting fraud, be more proactive in addressing and mitigating new fraud schemes, and improve the design operating effectiveness of anti-fraud measures. Additionally, the Committee directs SSA to provide a breakout within 60 days of enactment of the funding spent in fiscal year 2015 and the anticipated amount to be spent in fiscal year 2016 on anti-fraud activities. This breakout should include activities that SSA is working on in concert with the SSA Office of Inspector General.	SSA is reviewing the requirement. The agency is including some of this information as part of the 2015 Bipartisan Budget Act Section 845a Report. The report is included in our FY 2017 Congressional Justification – please see last tab.
<b>Report on Medical Listings</b>	<b>Actions Taken or To Be Taken</b>
SSA employs medical listings to make disability determinations, many of which have not been updated for decades. The Committee directs SSA to provide a report within 60 days of enactment to the House Appropriations Subcommittee on Labor, Health and Human Services and Education and the House Ways and Means Subcommittee on Social Security regarding the number of years since the last update and when the agency expects to conduct all of the updates.	SSA is working to satisfy the requirement.
<b>Medical Vocational Guidelines</b>	<b>Actions Taken or To Be Taken</b>
The Committee is encouraged that SSA plans to issue an Advanced Notice of Proposed Rulemaking on the need to update the medical-vocational guidelines, including seeking input	SSA is working to provide a report on its plan for updating the medical vocational guidelines.

**Disability Early Intervention****Initiative/Functional Assessment of Battery****Actions Taken or To Be Taken**

from the Disability Research Consortium; the Institute of Medicine; and other medical, aging, employment, and disability experts. These guidelines play a key role in SSA's disability determination process but have not been updated since they were established in 1978. The Committee directs SSA to provide a report to the Committees on Appropriations of the House of Representatives and the Senate, no later than 60 days after the enactment of this act, on its plan for updating the medical vocational guidelines.

**Report on LAE Expenditures****Actions Taken or To Be Taken**

The Committee directs SSA to provide a report to the House Appropriations Subcommittee on Labor, Health and Human Services, and Education and the House Ways and Means Subcommittee on Social Security within 60 days of enactment detailing how much funding was expended on the following categories in fiscal year 2015:

- Personnel costs by General Schedule grade, Administrative Law Judge personnel costs, Senior Executive Service personnel costs, reemployed annuitant personnel costs, and personnel costs by region
- Information technology costs broken out by hardware/software technology and upgrade/maintenance costs
- Physical infrastructure costs by region and office function
- Overall costs for personnel, time and dollars for the following:
  - OASI, DI and SSI
  - Other SSA missions, including return to work efforts
  - Program Integrity work broken out by OASI, DI and SSI as well as types of spending (data matching, predictive data work and data analytics)
  - Disability Determination Services State costs and federal staff costs

For Personnel costs by General Schedule grade, Administrative Law Judge personnel costs, Senior Executive Service personnel costs, and reemployed annuitant personnel costs, please see Table 3.28 on page 163. For personnel costs by region, please see Table 3.30 on page 165. For Information Technology costs broken out by hardware/software technology and upgrade/maintenance costs, please see Table 3.22 on page 158. For Physical infrastructure costs by region and office function, please see Table 3.13 on page 137 and Table 3.14 on page 138. For Overall costs for personnel, time and dollars for OASI, DI, SSI, and other SSA missions, please see Table 3.7 on page 129. For Program Integrity work broken out by OASI, DI and SSI as well as types of spending, please see Table 3.9 on page 131. For Disability Determination Services State costs and federal staff costs, please see Table 3.12 on page 136.

<b>Disability Early Intervention Initiative/Functional Assessment of Battery</b>	<b>Actions Taken or To Be Taken</b>
<b>Huntington's Disease</b>	<b>Actions Taken or To Be Taken</b>
<p>The Committee urges the Social Security Administration to work with the National Institutes of Health to immediately revise the Huntington's disease (HD) SSDI guidelines, used to determine disability for individuals with the disease, to reflect the most up-to-date medical understandings of the physical, cognitive, and behavioral symptoms. The Committee understands that some believe the current guidelines do not fully recognize the emotional and psychological symptoms of Huntington's disease. Some research sources indicate that the emotional and psychological symptoms appear years before physical symptoms are exhibited. The Committee urges SSA to work with NIH to ensure the SSDI HD guidelines reflect the most current scientific data.</p>	<p>The agency is working to implement the recommendations to revise the HD guidelines used to determine disability for individuals with the disease.</p>
<b>Muscular Dystrophy</b>	<b>Actions Taken or To Be Taken</b>
<p>The Committee is aware that SSA was added to the Muscular Dystrophy Coordinating Committee through the Muscular Dystrophy CARE Act Amendments enacted in September 2014. The Committee requests that the agency provide relevant data within the fiscal year 2017 budget request on the rate at which persons with Duchenne and Becker Muscular Dystrophy utilize SSA programs, particularly those focused on promoting employment and community independence such as the Ticket to Work Program.</p>	<p>Please see page 68 within the SSI section of the CJ for this information.</p>
<b>Continuing Disability Reviews and SSI Redeterminations of Eligibility</b>	<b>Actions Taken or To Be Taken</b>
<p>The agreement includes a total of \$1,542,000,000 for SSA to conduct Continuing Disability Reviews (CDRs) under the Disability Insurance and Supplemental Security Income (SSI) programs, and redeterminations of eligibility under the SSI program. This includes \$1,426,000,000 specified for the base and cap adjustment amounts included in the Budget</p>	<p>SSA will complete program integrity work in FY 2016 in line with this limitation. We plan to complete 850,000 CDRs and 2.522 million redeterminations. As the year progresses, we will continue to analyze our cost assumptions for program integrity work in FY 2016 based on current experience and will report to Congress as appropriate.</p>

<b>Disability Early Intervention Initiative/Functional Assessment of Battery</b>	<b>Actions Taken or To Be Taken</b>
Control Act of 2011, and \$116,000,000 in additional funding provided under SSA's Limitation on Administrative Expenses (LAE) account. The Commissioner may allocate more or less than \$116,000,000 from SSA's regular LAE account for CDRs and redeterminations but only for reconciling estimated and actual unit costs for conducting such activities, and after notifying the Committees on Appropriations of the House of Representatives and the Senate at least 15 days prior to any such reallocation. If less funding is allocated for such activities, the funding will be available for regular activities within the LAE account.	Please see Table 3.8 on page 131 within this section of the CJ for accompanying data on the total costs associated with CDRs and redeterminations for FY 2015 - FY 2017.
<b>Representative Payee Reviews</b>	<b>Actions Taken or To Be Taken</b>
The agreement includes funding for SSA to continue efforts to improve oversight of the representative payee process. In the acquisition of services to conduct and manage representative payee reviews, an eligible entity shall include, but not be limited to, any national organization with significant and demonstrable experience monitoring representative payees, identifying and preventing fraud and abuse, and addressing problems found among individuals with different types of disabilities and among different types of service providers.	SSA's acquisition of services to conduct and manage representative payee reviews will be made using full and open competition procedures.
<b>Medical Improvement Review Standard</b>	<b>Action Taken or To Be Taken</b>
The Committee commends SSA for its work to improve program integrity. However, the Committee is concerned about GAO's testimony to Congress that confusion still exists about the Medical Improvement Review Standard [MIRS] and its exceptions. The Committee directs SSA to submit a report no later than 60 days after the enactment of this act to the Committees on Appropriations of the House of Representatives and the Senate, on its progress in educating Disability Determinations Services in the proper application of the MIRS and its exceptions.	SSA is working to satisfy the reporting requirements.

<b>Disability Hearing Pilot Program</b>	<b>Actions Taken or To Be Taken</b>
The Committee notes that SSA has made positive statements to Congress about its pilot program in Region I that requires administrative law judges to give claimants a 75 day notice before their hearing and requires claimants to submit all evidence 5 days before the hearing subject to good cause exception (also known as "soft" closing of the record). This policy promotes a smoother hearing process, reducing the time it take to hear and adjudicate disability appeals, while still providing assurances that individuals are able to provide all evidence in support of their case. The Committee directs SSA to provide to the Committees on Appropriations of the House of Representatives and the Senate, no later than 60 days after the enactment of this act, an update on this pilot program and any plans to expand the pilot to other regions.	SSA is working to satisfy the reporting requirements.

<b>Vocational Expert (VE) Fees</b>	<b>Actions Taken or To Be Taken</b>
The Committee notes that SSA's OIG has recommended that SSA periodically determine whether VE fees are appropriate to obtain the required level of VE service, which could include benchmark studies with VE fees paid in the national economy or elsewhere by government entities. The Committee strongly encourages SSA to conduct such a review, including comparing fees paid by SSA to those paid by other governmental and non-governmental organizations. The Committee directs SSA to brief the Committees on Appropriations of the House of Representatives and the Senate on its plan to comply with these OIG recommendations.	The agency plans to brief the Appropriations Committees on its plan to comply with OIG recommendations regarding VE fees in March 2016.

<b>Advertising Fees</b>	<b>Actions Taken or To Be Taken</b>
The agreement includes a provision requiring agencies to disclose on advertising materials that such communication is produced at U.S. taxpayer expense.	Please see Table 3.12 on page 136 for this information.

## GENERAL STATEMENT

### LIMITATION ON ADMINISTRATIVE EXPENSES OVERVIEW

---

The LAE account funds the operating expenses of the Social Security Administration and its programs: the OASI and DI programs, the SSI program, certain health insurance and Medicare prescription drug functions, and the Special Benefits for Certain World War II Veterans program. With these funds, SSA provides service to millions of Americans in our field offices, via telephone, or through the Internet at [the Social Security Website](#). The LAE account provides the funds SSA needs to perform its core responsibilities, including completing claims and applications for benefits, conducting hearings to review disputed decisions, ensuring benefits continue to be distributed properly, and maintaining the integrity of the trust funds.

SSA currently employs about 65,000 dedicated public service employees through a national network of 1,500 offices. Combined with over 16,000 state employees in the Disability Determination Services (DDS), they demonstrate their commitment to the American public daily by providing the best service possible. SSA's employees take pride in administering agency programs, realizing that the work they do affects the lives of many Americans.

### FY 2017 PRESIDENT'S BUDGET

---

#### SSA's Programs

For FY 2017, SSA is requesting LAE budget resources of \$13.067 billion. We will continue to handle high volumes of work and focus on providing quality services, while significantly increasing program integrity efforts. Our budget also ensures that we can invest in technology to be as efficient as possible and effectively serve the public.

As the Baby Boomers continue to retire, it is essential that we have the resources to complete their applications, as well as to handle the ongoing work once they begin receiving benefits. We expect to complete over 5.7 million applications for retirement benefits in FY 2017. We will administer about \$813 billion in OASI benefit payments to a monthly average of approximately 52 million beneficiaries including 89 percent of the population aged 65 and over.

We continue to process stable, but high volumes of initial disability claims. Enactment of the FY 2017 President's Budget will enable us to continue to reduce backlogs in program integrity reviews and stabilize initial disability claims pending. This budget will fund the staff at the 54 State Disability Determination Services (DDS) who will complete over 2.8 million initial disability claims in FY 2017. This budget, combined with our improvements to the hearings process, will enable us to complete 784,000 hearings, with an annual average processing time of 555 days in FY 2017. See Table 3.34 in the back of this section for more details on the disability appeal workload. In FY 2017, SSA will pay about \$149 billion in Disability Insurance benefits

to a monthly average of approximately 11 million disabled workers and their family members per month.

The SSI program is a Federal assistance program administered by SSA that guarantees a minimum level of income for aged, blind, or people with disabilities. It is a safety net for individuals with little or no Social Security or other income and limited resources. We estimate we will pay about \$56 billion in Federal benefits to approximately 8.2 million SSI recipients in FY 2017. Including State supplementary payments, SSA expects to pay a total of about \$59 billion and administer payments to over 8.4 million recipients.

SSA assists the Centers for Medicare and Medicaid Services (CMS) in administering the Medicare Hospital Insurance (HI), Supplementary Medical Insurance (SMI), and the Prescription Drug programs. The Affordable Care Act (ACA) (P.L. 111-148) also created additional responsibilities for SSA, such as administering the income related monthly adjustment amount (IRMAA) reduction in Part D Subsidy for high-income beneficiaries.

In FY 2009, Congress appropriated funding through the Medicare Improvements Patients and Providers Act (MIPPA) to SSA for activities related to the implementation of changes to the Low-Income Subsidy (LIS) Prescription Drug program. This funding is available until expended, and we estimate we will spend \$6 million for LIS work in FY 2017.

In FY 2015, Congress passed the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA). This bill prohibits displaying, coding, or embedding Social Security numbers on a beneficiary's Medicare card. In order to fund implementation costs to comply with this provision, SSA will receive \$98 million funded incrementally from FY 2015 to FY 2018.

SSA also collaborates with the Department of Homeland Security in administering the E-Verify program through verifying the employment eligibility of newly-hired employees by electronically checking employee names, Social Security numbers, dates of birth, U.S. citizenship status, and resolving SSA-related discrepancies with the employee when we are unable to electronically verify that information.

### **Program Integrity**

SSA receives special dedicated funding for two types of program integrity work: CDRs, which are periodic reevaluations to determine if beneficiaries continue to meet SSA's standards of disability or have returned to work and no longer qualify for benefits, and SSI redeterminations, which are periodic reviews of non-medical factors of eligibility, such as income and resources.

The Budget Control Act of 2011 (BCA) allows increases to the Federal Government's annual spending caps through FY 2021 for program integrity purposes. If Congress appropriates funds for our program integrity work, the discretionary spending limit may increase by a corresponding amount up to a specified level. The Bipartisan Budget Act of 2015 (BBA) increased the cap adjustments proposed in the BCA by a net \$484 million between FY 2017 – FY 2021. The BBA also expanded the uses of the cap adjustment funds to include cooperative disability units and fraud prosecutions. It also clearly defines the use of funds for work related CDRs. In FY 2017, the BBA allows a maximum cap adjustment of \$1,546 million for program integrity funding

above a \$273 million base. With a \$1,819 million total appropriation for program integrity, we would conduct 1,100,000 full medical CDRs and 2,822,000 SSI redeterminations in FY 2017. At these volumes, we would complete over 250,000 more medical CDRs compared to FY 2016. In FY 2016, we plan to complete 850,000 CDRs and 2,522,000 redeterminations. See Table 3.8 for information on the consolidated accounting of the total funding required for CDRs and redeterminations for FY 2015 through FY 2017.

Our CDRs and SSI redeterminations ensure that beneficiaries continue to meet the eligibility requirements to receive payments. These reviews save billions of program dollars with only a comparatively small investment of administrative funds. Our current estimates indicate that medical CDRs conducted in FY 2017 will yield a return on investment (ROI) of about \$8 on average in net Federal program savings over 10 years per \$1 budgeted for dedicated program integrity funding, including Old-Age, Survivors, and Disability Insurance (OASDI), SSI, Medicare and Medicaid program effects. Similarly, our estimates indicate that non-medical redeterminations conducted in 2017 will yield a ROI of about \$3 on average of net Federal program savings over 10 years per \$1 budgeted for dedicated program integrity funding, including SSI and Medicaid program effects.<sup>1</sup>

The Budget assumes the full cost of performing CDRs in 2017 and beyond, to ensure that sufficient resources are available to account for spending on these activities.

The increased cap funding authorized through 2021 in the BBA, if fully provided in the appropriations process, is estimated to eliminate our backlog of CDRs by the end of 2019. The Budget assumes additional legislation will be passed that continues the cap adjustment through 2026 in order to avoid developing a backlog of reviews during the budget window. Please refer to the Budget Process chapter in the Analytical Perspectives volume for a more details.

## Anti-Fraud

SSA engages in a variety of activities to prevent, detect, and prosecute fraudulent activity. We established an Office of Anti-Fraud Programs (OAFP) in FY 2015. This office provides

---

<sup>1</sup> ROI calculations for the President's budget use estimates and projections that precede the start of the actual budget year by at least eight months. These assumptions are subsequently refined based on the actual appropriation and actual costs incurred through the year for the CDR and non-medical redetermination workloads. For CDRs, the numerator represents the estimated program savings resulting from completion of all planned medical CDRs. The estimated savings do not include any assumption of program savings resulting from work CDRs. The denominator includes that portion of the dedicated PI administrative funding projected for CDRs, including any PI funds that may be needed for work CDRs. (For FY 2017, the CDR ROI is:  $\$8,618\text{M}/\$1,068\text{M}=8.07$ ) For SSI non-medical redeterminations, the numerator represents the estimated program savings resulting from completion of all planned reviews. The denominator includes that portion of the dedicated PI administrative funding projected for SSI non-medical redeterminations. (For FY 2017, the SSI non-medical redetermination ROI is:  $\$2,280\text{M}/\$726\text{M}=3.14$ ) For reports to Congress after the close of a fiscal year, the ROIs are based on the actual work accomplished. For the numerator, program savings for the ten-year budget window still rely on actuarial models that project future savings and may include cases worked that still have appeals pending. For the denominator, we look to our Cost Analysis System for details on the total administrative dollars expended. For SSI non-medical redeterminations, the denominator is all administrative costs incurred for the work completed. For medical CDRs, the denominator includes administrative expenses for all medical reviews conducted, both full medical reviews as well as our CDR mailers. This also includes the costs for hearings and appeals of medical CDR decisions in the subject year.

centralized oversight of and accountability for our efforts to prevent, deter, and detect fraud. OAFP increases our efficiency and enhances our ability to combat fraud by sharing knowledge, using data analytics and industry-standard business processes, and centralizing our deployment of training and communications. Our National Anti-Fraud Committee works with all of the Regional Anti-Fraud Committees to enhance existing fraud prevention efforts and implement new mitigation strategies, while also providing guidance and support to OAFP.

Our efforts include continuing to bolster our Cooperative Disability Investigation (CDI) program. CDI units are highly successful at detecting fraud before we make a disability decision. The CDI program links our Office of the Inspector General and local law enforcement with Federal and State workers who handle disability cases. In FY 2015, the program consisted of 36 units covering 31 states and the Commonwealth of Puerto Rico. We will continue to expand this program in FY 2016 and FY 2017. The BBA requires SSA to expand the CDI program to cover all States and Territories no later than October 1, 2022. This requirement will be subject to the availability of funding and participation of local law enforcement agencies.

Another anti-fraud activity includes Access to Financial Institutions (AFI), which is a program that identifies excess resources in financial accounts - a leading cause of SSI payment errors. AFI verifies bank account balances with financial institutions for purposes of determining SSI eligibility. In addition to verifying alleged accounts, AFI detects undisclosed accounts by using a geographic search to generate requests to other financial institutions. We currently use the AFI system in all 50 States, the District of Columbia, and the Commonwealth of the Northern Mariana Islands for essentially all SSI non-medical redeterminations and full applications where there is an allegation of financial resources above the current AFI resource tolerance level. The BBA expands the use of AFI and grants us the ability to verify financial information for all overpaid individuals (Title 2 or Title 16). The BBA requires the Commissioner to obtain an individual's authorization to obtain financial institution records before determining whether recovery of such individual's overpayment may be waived under the "defeats the purpose" provision.

In addition to these efforts, we will continue to support our centralized fraud prevention units, which are comprised of disability examiners dedicated to reviewing and analyzing fraud cases. We are also strengthening and modernizing our representative payee program to ensure we appoint suitable representative payees for our beneficiaries and that representatives managing funds use these funds appropriately. We will continue to explore data analytics to detect and prevent fraud by determining common characteristics and patterns of anomalous activity, and we will improve death data processing by working to centralize and capture all death information in one system to prevent erroneous payments.

### **Information Technology (IT) Modernization**

IT plays a critical role in our day-to-day operations. Most of our IT funding is used for ongoing operational costs such as our National 800 Number service and our online services, both of which help us keep pace with the recent increases in claims. In FY 2015, our IT infrastructure supported the payment of more than \$930 billion in benefits to nearly 67 million people and the

maintenance of hundreds of millions of Social Security numbers and related earnings records for nearly every American.

However, the database systems our agency uses today are 40 years old and are no longer the best solution to administer our programs. For several years, we worked to modernize our IT in small pieces at a time, but we have exhausted nearly all of these small efforts. We are now at a point where we must undertake a larger, multiyear effort. Our FY 2017 Budget requests multiyear funding of \$300 million, spread over four years, to undertake an IT modernization project that will bring our systems into the modern world.

### **Disability Case Processing System**

By enhancing the technological infrastructure that supports disability case processing nationwide, SSA aims to improve both efficiency and effectiveness by rendering timely and accurate disability decisions. The Disability Case Processing System (DCPS) will replace 54 independently operated, outdated systems across the DDSs, which are the state agencies that make disability determinations for SSA.

The new system will allow for faster and more accurate case processing, reduce administrative costs, and provide structured data that will support our fraud analytics efforts. Implementation will look different in the various sites and does not mean that 100 percent of their staffs will be using DCPS. Our tentative phased implementation schedule includes two early adopters of DCPS in FY 2016. In FY 2017, 12 to 18 of the remaining DDSs will implement DCPS, and in FY 2018 approximately 40 to 46 of the remaining DDSs will implement DCPS. We have not finalized our implementation plan, which is an agile based approach.

## FUNDING REQUEST

Our FY 2017 LAE budget request of \$13.067 billion will allow us to balance our important service and stewardship work, and address the critical agency priorities outlined in Vision 2025. The table below provides dollars and workyears funded by this budget:

**Table 3.3—Budgetary Request**

	FY 2015 Actual	FY 2016 Enacted	FY 2017 Estimate
<b>Budget Authority</b> (in millions)			
<b>Limitation on Administrative Expenses (LAE)</b>	\$11,806	\$12,162	\$13,067
<b>Research and Demonstrations</b>	\$83	\$101	\$58
<b>Office of the Inspector General (OIG)</b>	\$103	\$106	\$112
<b>Total Budget Authority<sup>1</sup></b>	<b>\$11,992</b>	<b>\$12,368</b>	<b>\$13,237</b>
<b>Workyears</b>			
Full-Time Equivalents <sup>2</sup>	63,394	64,860	66,140
Overtime	2,831	674	2,200
Lump Sum	246	298	298
<b>Total SSA Workyears</b>	<b>66,471</b>	<b>65,832</b>	<b>68,638</b>
<b>Total Disability Determination Services (DDS) Workyears</b>	<b>14,925</b>	<b>15,270</b>	<b>16,000</b>
<b>Total SSA/DDS Workyears</b>	<b>81,396</b>	<b>81,102</b>	<b>84,638</b>
OIG Workyears	533	543	564
<b>Total SSA/DDS/OIG Workyears</b>	<b>81,929</b>	<b>81,645</b>	<b>85,202</b>

When states choose to take over administration of their own SSI state supplementation payments, SSA loses some user fee revenue. Over the last 5 years, three states have either fully or partially opted out of SSA's administration of their supplementation payments. Rhode Island partially opted out in January 2011, leaving us with the more difficult categories to administer. Massachusetts and Utah fully opted out in April 2012 and January 2014, respectively. Most recently, New York began administering its own state supplementation program beginning on October 1, 2014. The user fee estimates for FY 2016 and FY 2017 reflect this change. New York represented about 30 percent of the federally-administered SSI state supplementation benefits paid by SSA. The offsetting collections from other LAE funding sources are adjusted to accommodate the user fee revenue changes within our total LAE request.

<sup>1</sup> Totals may not add due to rounding.

<sup>2</sup> FY 2016 and FY 2017 FTE totals do not include FTEs for MACRA implementation.

## PERFORMANCE TARGETS

The President's FY 2017 request will allow SSA to achieve the following key performance targets:

**Table 3.4—Key Performance Targets**

FY 2017 Performance Table	FY 2015 Actual	FY 2016 Enacted <sup>1</sup>	FY 2017 Request
<b>Selected Workload Measures</b>			
Retirement and Survivors Claims Completed (thousands)	5,327	5,586	5,732
Initial Disability Claims Completed (thousands)	2,759	2,695	2,810
Disability Reconsiderations Completed (thousands)	723	702	715
Hearings Completed (thousands)	663	703	784
National 800 Number Calls Handled (millions)	37	34	38
Average Speed of Answer (ASA) (seconds)	617	945	675
Agent Busy Rate (percent)	7.5%	9.5%	7.0%
Social Security Numbers (SSN) Completed (millions)	16	16	16
Annual Earnings Items Completed (millions)	266	264	265
Social Security Statements Issued (millions) <sup>2,3</sup>	50	38	44
<b>Selected Outcome Measures</b>			
Initial Disability Claims Receipts (thousands)	2,756	2,807	2,817
Hearings Receipts (thousands)	746	730	729
Initial Disability Claims Pending (thousands)	621	733	740
Disability Reconsiderations Pending (thousands)	144	136	137
Hearings Pending (thousands)	1,061	1,087	1,033
Average Processing Time for Initial Disability Claims (days)	114	113	113
Average Processing Time for Disability Reconsiderations (days) <sup>4</sup>	113	N/A	109
Annual Average Processing Time for Hearings Decisions (days)	480	540	555
Disability Determination Services Production per Workyear	307	307	314
Office of Disability Adjudication and Review Production per Workyear	95	94	98
Other Work/Service in Support of the Public - Annual Growth of Backlog (workyears)	N/A	(2,000)	(2,700)
<b>Selected Program Integrity Performance Measures</b>			
Periodic Continuing Disability Reviews (CDR) Completed (thousands)	1,972	1,950	2,200
Full Medical CDRs (included above, thousands)	799	850	1,100
Supplemental Security Income (SSI) Non-Medical Redeterminations Completed (thousands)	2,267	2,522	2,822

<sup>1</sup> FY 2016 is a 53-week year for management information purposes. After the close of the year, we will report both 52 and 53-week actual performance data. Our budgeted performance goals are full-year goals based on the workyears we are able to support with funds available in FY 2016.

<sup>2</sup> The Social Security Statements (SSS) Issued measure includes paper statements only; it does not include electronic statements issued.

<sup>3</sup> The original estimate for Social Security Statements Issued measure in FY 2016 President's Budget was 45 million. This has been reduced by ~6.6 million, as a result of the agency sending out the scheduled SSS for FY 2016 October in FY 2015 September. Therefore, the FY 2016 Enacted number has been adjusted to ~38 million.

<sup>4</sup> We developed management information for Average Processing Time for Disability Reconsiderations in FY 2013. FY 2014 was the first full fiscal year for which data was available for this measure. Now that we have had the opportunity to analyze at least two years of actual data, this year we developed a performance target for FY 2017.

SSA's budget is fully integrated with its Annual Performance Plan (APP), which is included as the second to last tab in this *Justification of Estimates for Appropriations Committees*, and online at [our website](#). The budget estimates are linked to key performance above and support all of the more detailed measures outlined in the APP.

---

## RECENT ACCOMPLISHMENTS

---

We continue to be an efficient organization; in FY 2016, our administrative costs are about 1.3 percent of the benefit payments we pay each year. We are proud to have maintained our efficiency. In FY 2015, we:

- Paid over \$930 billion to more than 67 million beneficiaries;
- Handled approximately 37 million calls on our National 800 Number;
- Served about 40 million visitors in our 1,200 field offices nationwide;
- Completed over 8 million claims for benefits and more than 660,000 hearing dispositions;
- Handled over 35 million changes to beneficiary records;
- Issued over 16 million new and replacement Social Security cards;
- Performed almost 2 billion automated Social Security number verifications;
- Posted about 266 million wage reports;
- Handled over 18,000 cases in Federal District Courts;
- Completed over 2.2 million SSI non-medical redeterminations;
- Completed 799,000 full medical CDRs; and
- Completed approximately 3 million overpayment actions.

---

## PRIORITY GOALS

---

We serve the American people in a wide variety of ways. In support of the Administration's performance improvement efforts, we have embraced the power of goal setting as a way to improve our performance and accountability to the American people.

As required by the GPRA Modernization Act of 2010, we established the following ambitious and outcome-focused Agency Priority Goals (APG), linked directly to our overarching strategic goals and objectives set forth in our Fiscal Year 2014-2018 Agency Strategic Plan.

- **Improve customer service and convenience by increasing online services.**
  - In 2016, we will increase the number of transactions by 25 million over 2015. This increase will result in 112.1 million transactions.
- **Increase customer satisfaction with our services.**
  - In 2016, our combined customer satisfaction score for our internet services will remain above the excellent threshold (over 80 points) on average, with an average score of at least 84.5.
  - In 2016, our combined customer satisfaction rating (as Excellent, Very Good, or Good) for our office and telephone services will average at least 80.

- **Reduce the disability hearings pending.**
  - In FY 2016, we will decide 99% of cases that begin the fiscal year at 430 days old or older (our 252,000 oldest cases).
- **Reduce the percentage of improper payments made under the SSI program.**
  - In FY 2016, ensure that 95 percent of our payments are free of overpayment.

We have specific measures and milestones to monitor our progress. Additionally, through our quarterly internal review process, our executives have candid discussions regarding progress, any challenges we must overcome, and strategies that will support goal achievement. APGs are two-year goals to advance progress toward achieving longer-term strategic goals and objectives.

## NATIONAL SUPPORT CENTER

---

In FY 2009, Congress provided \$500 million for the construction and partial equipping of a new National Support Center (NSC) as part of the American Recovery and Reinvestment Act (Recovery Act). We are currently transitioning our nationwide computer operations from the National Computer Center (NCC) to the NSC. Our systems maintain demographic, wage, and benefit information on almost every American. The data housed at the NCC are critical national economic and information resources and essential to providing service to the millions of individuals who count on us each day. While once a state-of-the-art data center designed for mainframe use, the NCC is over 30 years old and the facility infrastructure systems have exceeded their useful life. With these Recovery Act funds, we took timely action to ensure a new facility was built and operational as the NCC nears the end of its functional life.

### **Projected Milestone Schedule**

On December 28, 2012, we received a Presidential waiver allowing us to retain and continue to obligate funds appropriated for expenses for the replacement of our NCC. As of September 30, 2015, we have obligated \$447 million and we expect to spend the remaining ARRA funds by the end of FY 2016. The General Services Administration and the Social Security Administration provided the following schedule of key milestones.

<b><u>Planned</u></b>	<b><u>Actual</u></b>	<b><u>Milestone</u></b>
Aug 2010	Aug 2010	Program of Requirements
Feb 2011	Feb 2011	Recommend Site
Sep 2011	Aug 2011	Acquire Site
Mar 2012	Jan 2012	Award Design-Build Construction
July 2014	July 2014	Complete Construction
Oct 2014	Sept 2014	Final Commissioning/Contingency
Mar 2015	Oct 2014	Begin Transition of IT Services
Aug 2016	TBD	

We began moving the IT services from the NCC to the NSC beginning in October 2014, and we will complete the transfer in August 2016. Preparatory efforts are under way to virtualize and consolidate significant portions of our IT equipment, perform application and asset inventory planning, and formulate a concise migration plan so that we can meet this goal.

**Actual and Planned Obligations for the New NSC**

The following table provides actual and planned obligations for the NSC as of January 7, 2016.

**Table 3.5—Actual and Planned Obligations for the New NSC****(Dollars in thousands)**

<b>FY 2009</b>	<b>FY 2010</b>	<b>FY 2011</b>	<b>FY 2012</b>	<b>FY 2013</b>	<b>FY 2014</b>	<b>FY 2015</b>	<b>FY 2016</b>
<b><u>Actual</u></b>	<b><u>Actual</u></b>	<b><u>Actual</u></b>	<b><u>Actual</u></b>	<b><u>Actual</u></b>	<b><u>Actual</u></b>	<b><u>Actual</u></b>	<b><u>Planned</u></b>
\$1,330.4	\$1,850.8	\$387,699.5	(\$30,856.2) <sup>1</sup>	\$39,191.0	\$59,797.7 <sup>2</sup>	(\$12,451) <sup>3</sup>	\$53,437.8

<sup>1</sup> In FY 2012, there were \$27.5 million in obligations and a recovery from previous construction obligations of \$58.4 million, resulting in a net recovery of \$30.9 million.

<sup>2</sup> In FY 2014, there were \$69.8 million in obligations and a recovery from previous construction obligations of \$10 million, resulting in a net obligation of \$59.8 million.

<sup>3</sup> In FY 2015, there were \$42.7 million in obligations and a recovery from previous construction obligations of \$55.1 million, resulting in a net recovery of \$12.5 million. Numbers don't add due to rounding.

## MAJOR BUILDING RENOVATIONS AND REPAIR COSTS

A number of SSA facilities need renovation or repair to comply with current building codes, including health and safety standards to ensure a safe work environment. SSA is also actively pursuing opportunities to reduce our real estate footprint by reconfiguring and consolidating space for optimal space utilization. This exhibit describes our major building renovations, repairs, and other associated costs in support of these goals.

Building	FY 2016 (in millions)	FY 2017 (in millions)	FY 2018 (in millions)
Altmeyer (Woodlawn, MD)	\$13	\$137	
NCC Third Floor (Woodlawn, MD)	\$22.5	\$3.85	
Security West (Woodlawn, MD)	\$24		\$20.4
Frank Hagel Building (Richmond, CA)		\$12.7	
Addabbo (New York, NY)		\$13.7	
MATSSC (Philadelphia, PA)		\$9.045	

### **Altmeyer Building**

The Arthur J. Altmeyer federal office building is over 55 years old and requires major upgrades to address health and safety issues, meet current accessibility standards, improve space utilization, and provide a comfortable, energy efficient working environment that meets 21<sup>st</sup> century standards. The Altmeyer renovation project involves full interior and exterior renovation of the existing building including infrastructure, electrical system, and space. The improved space utilization would create space for about 300 to 350 additional staff, for a total of 800 occupants.

The renovation for which we received \$150 million in fiscal year 2016 includes the following:

- Taking the building down to the support structure (concrete columns and floor slabs),
- Full abatement of hazards (asbestos, lead paint, etc.),
- Building systems modernizations, and
- Space reconfiguration to achieve an office space utilization rate of 149 square feet per person for post-renovation occupancy.

### *Timeline and Costs*

Timeline	Milestones	Cost (in millions)
FY 2016	Funding appropriated; GSA begins solicitation for design services contractor	\$13
FY 2017	GSA awards contract for design services and begins solicitation for construction contractor	\$137
FY 2019	GSA awards contract for construction services; executives and staff vacate the building; construction begins	N/A
FY 2021	Occupy renovated building	N/A

### **National Computer Center – Third Floor Renovation**

The National Computer Center (NCC) Third Floor Renovation Project follows the 2016 migration of SSA's primary data center operations from that space to the National Support Center. The planned renovation involves approximately 75,000 Usable Square Feet (USF).

The SSA Headquarters Master Plan, completed in September 2013, identified this project as integral to the goal of creating a dense campus and reducing leased space. The renovation will provide office space for approximately 500 people and free up swing space on campus for staff from the Altmeyer Building during that renovation. The office configuration identified in the NCC Feasibility Study provides for a more efficient layout that achieves a utilization rate of approximately 160 USF per person.

GSA accepted an FY 2015 RWA for \$1.7 million from SSA for the design phase of the project and is working with one of their IDIQ Architecture and Engineering firms, WRA, to complete the design. This phase is projected to be completed in August 2016.

#### *Timeline and Costs*

Timeline	Milestones	Cost (in millions)
FY 2016	Construction funding	\$22.5
FY 2017	Furniture design and acquisition and move cost funding needed	\$3.85
FY 2018	Construction and furniture installation completed; occupy renovated space	N/A

### **Security West**

We plan to optimize space for the Office of Disability Operations (ODO) components housed in the Security West building and consolidate with the Office of Central Operations training center when the Security West lease expires in 2020. This consolidation will reduce our real estate footprint, improve operational efficiency, allow greater flexibility for functional groups, and enhance security. This effort supports the vision of the SSA Headquarters Campus Master Plan, completed in September 2013, to make more efficient use of leases and house, and staff more efficiently on the Main Campus and in the surrounding Woodlawn, Maryland area.

A recently completed Program of Requirements (POR) recommends housing staff in multiple leases to provide strategic flexibility and accommodate a limited real estate market. The POR achieves a 40 percent reduction in space; we currently lease 759,222 usable square feet (USF), and the new requirement is 444,300 USF.

*Timeline and Costs*

Timeline	Milestones	Cost (in millions)
FY 2016*	Funding needed for tenant improvements and construction management services.	\$24
FY 2018	GSA awards lease; funding needed for furniture design and acquisition. (\$19.1) Complete design and begin construction; funding needed for move costs. (\$1.3)	\$20.4
FY 2019	Occupy new leased space	N/A

\*Timeline and milestones for FY 2016 are tentative, dependent on available funding

**Frank Hagel Federal Building**

The six-story Frank Hagel Federal Building (FHFB), Richmond, CA, was completed and occupied in 1975. Over time, modifications to the interior space to accommodate staffing and work process changes adversely affected fire egress, heating, ventilation and air conditioning (HVAC) operation, electrical and lighting distribution, resulting in health, safety, and code compliance issues, which potentially expose employees to an unsafe work environment. GSA identified these deficiencies as high risk in a feasibility study/Building Evaluation Report completed in FY 2014.

We initiated a Space Utilization Analysis and Feasibility Study to identify and analyze efficient and cost effective options for housing SSA staff in the area. Study findings document needed renovations.

To address immediate, pressing issues, we plan to renovate two floors, updating the electrical and lighting distribution, HVAC, and fire safety systems, and realigning space. The renovations will bring these systems in compliance with current building and life safety codes. We expect to need similar amounts in future years until we complete renovations.

*Timeline and Costs*

Timeline	Milestones	Cost (in millions)
FY 2017	Renovations	\$12.7

**Addabbo Building**

The Addabbo Federal Building, Jamaica/Queens, NY, which is over 27 years old, needs FY 2017 funding for five repair line items to address issues with aging infrastructure. These include repairing or upgrading main electrical switchgear, step-down transformers, and windows on the

ground and second floors. The emergency control center project improves security by renovating a dysfunctional space, improving lines of sight, and increasing threat protection. The child care center window project adds blast resistant glass to the recently renovated indoor child playground area. These needs were identified through ongoing building evaluations.

*Timeline and Costs*

Timeline	Milestones	Cost (in millions)
FY 2017	Repairs	\$13.7

**Midatlantic Social Security Center (MATSSC)**

The MATSSC, Philadelphia, PA, which is over 40 years old, needs FY 2017 funding for two repair line items to address water intrusion issues. The building has experienced water intrusions from the plaza for many years resulting in numerous leaks in the basement areas, some causing problems with the electrical infrastructure and potential beginnings of structural damage. The other project will address ground water drainage, which places increasing burden on aging and failing sump pumps. Failure to address and resolve these deficiencies could result in building closure.

*Timeline and Costs*

Timeline	Milestones	Cost (in millions)
FY 2017	Repairs	\$9.045

## **SSA-RELATED LEGISLATION ENACTED FEBRUARY 3, 2015 – FEBRUARY 9, 2016**

---

### **FY 2016**

#### ***The Federal Improper Payments Coordination Act of 2015 (P.L. 114-109, enacted December 18, 2015)***

- The bill provides that Federal agencies shall review, as appropriate, SSA's death records through the Do Not Pay (DNP) initiative. However, the bill does not amend section 205(r) of the Social Security Act, and thus does not permit the use of SSA's full file of death information by the DNP system.

#### ***The Bipartisan Budget Act of 2015 (P.L. 114-74, enacted November 2, 2015)***

- The act reallocates funds from the Old-Age and Survivors Insurance (OASI) trust fund to the Disability Insurance (DI) trust fund to ensure payment of full disability benefits into 2022.
- The act also suspends the debt limit until March 15, 2017; partially rolls back the sequester of discretionary spending scheduled for FY 2016 and FY 2017; and reduces the amount of increase in Medicare Part B premiums for certain beneficiaries in 2016.
- The bill provides adjustments to civil monetary penalties (CMPs) and makes reforms to the Social Security Program.

### **FY 2015**

#### ***The Medicare Access and CHIP Reauthorization Act of 2015 (P.L. 114-10 enacted April 16, 2015)***

- The law reauthorizes the Children's Health Insurance Program (CHIP) and repeals the Medicare sustainable growth rate.
- The act also requires the Secretary of Health and Human Services (the Secretary), in consultation with the Commissioner of Social Security (Commissioner) to establish procedures to ensure that a Social Security Number (SSN) or an SSN-derivative is not displayed, coded, or embedded on the Medicare card.

## **MEDICARE ACCESS AND CHIP REAUTHORIZATION ACT (MACRA)**

---

On April 16, 2015, the President signed the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) (Public Law 114-10). Title V, section 501, prohibits displaying, coding, or embedding Social Security numbers (SSN) on beneficiaries' Medicare cards. The Centers of Medicare and Medicaid Service (CMS) will issue Medicare cards with a new Medicare Beneficiary Identifier (MBI) that replaces SSNs. CMS plans to issue the new cards in a phased approach from May 2018 to April 2019.

Congress appropriated the Social Security Administration (SSA) \$98 million to fund the implementation costs to comply with the provisions of MACRA. Beginning fiscal year (FY) 2015, we receive the funding incrementally through FY 2018. The funding is available in the following amounts:

- FY 2015 - \$27 million (available through FY 2018);
- FY 2016 - \$22 million (available through FY 2018);
- FY 2017 - \$22 million (available through FY 2018); and
- FY 2018 - \$27 million (available until expended).

SSA does not anticipate intensive systems changes to support CMS in the SSN Removal Initiative and implementation of MACRA. However, we expect a significant impact on our workload processing components due to undeliverable mail, inquiries from the public, and requests for replacement cards. CMS outreach activities and phased Medicare card issuance will not begin until 2018. Therefore, we do not foresee an impact to our field operations or major costs incurred until that same year. SSA will have limited spending in FY 2015-2017 for planning, inquiries, and system updates.

## **IMPLEMENTATION OF THE BIPARTISAN BUDGET ACT OF 2015**

---

The Bipartisan Budget Act of 2015 (P.L. 114-74) (BBA) was enacted on November 2, 2015. The BBA contained numerous provisions affecting SSA. Below is a brief summary.

### **301. Debt Collection Improvements**

This provision amends the Communications Act of 1934 to authorize the use of automated telephone equipment to call cellular telephones for the purpose of collecting debts owed to the U.S. Government. In addition, it authorizes the Federal Communications Commission, in consultation with the Department of the Treasury, to issue regulations to limit the number and duration of any such calls.

### **601. Maintaining 2016 Medicare Part B Premium and Deductible Levels Consistent with Actuarially Fair Rates**

This section establishes the 2016 monthly Part B premium for enrollees not subject to the "hold harmless" provision. It requires these enrollees to pay an additional \$3 to cover the cost of

setting the premium rate, requires enrollees subject to an Income-Related Monthly Adjustment Amount to pay an additional charge that is higher than \$3, and extends those provisions through 2017 if there is no Social Security cost-of-living-allowance increase that year.

#### 701. Civil Monetary Penalty (CMP) Inflation Adjustments

Section 701 requires the head of each Federal agency to adjust CMPs within its jurisdiction for inflation each year, based on the cost-of-living increase in the Consumer Price Index (CPI). By July 1, 2016, affected agencies are to establish the first inflation adjustment based on the percentage by which the CPI for 2015 exceeds the CPI of the year the CMP was first established, or last adjusted. The provision also requires affected agencies to include information about CMPs and adjustments in their Agency Financial Report.

#### 811. Expansion of Cooperative Disability Investigations Units (CDIUs)

This provision requires SSA to establish CDIUs to cover all 50 States, D.C., Puerto Rico, Guam, the Northern Mariana Islands, the Virgin Islands, and American Samoa, subject to funding and participation of local law enforcement agencies. SSA is to submit annual progress reports to the House Committee on Ways and Means and the Senate Finance Committee until nationwide coverage is achieved.

#### 812. Exclusion of Certain Medical Sources of Evidence

Section 812 excludes evidence provided by people convicted of certain felonies, excluded from participation in Federal health care programs, or assessed with a civil monetary penalty for submission of false evidence. The provision also includes a good cause exception as determined by SSA.

#### 813. New and Stronger Penalties

This provision increases the penalty for conspiracy to commit Social Security fraud and certain offenses committed by people violating positions of trust. It also requires SSA to add new language to applications for benefits, and to update language in publications.

#### 814. References to Social Security and Medicare in Electronic Communications

Section 814 includes electronic and internet communications in the prohibitions from misusing Social Security or Medicare symbols, emblems, or names, and treats each dissemination, viewing, or accessing of a communication as a separate violation. Conforming amendments to regulations at 20 CFR Part 498 are required to reflect this modification.

#### 815. Change to Cap Adjustment Authority

This provision adjusts discretionary spending limits for FY2017 - FY2021. It contains additional specifications on the activities covered by the discretionary spending limits and have specifically included the costs of Cooperative Disability Investigations Units and fraud prosecutions by U.S.

Attorneys. It also clearly defines the use of the fund for work related continuing disability reviews.

#### 821. Temporary Reauthorization of Disability Insurance Demonstration Project Authority

Section 821 extends authority to initiate disability insurance demonstration projects through December 31, 2021, and continues such projects through December 31, 2022.

#### 822. Modification of Demonstration Project Authority

This section requires SSA to ensure all participation in demonstration projects is voluntary, and to obtain informed written consent from all participants. It also revises reporting requirements for demonstration projects, and amends the annual reporting deadline to the House Committee on Ways and Means and the Senate Committee on Finance to September 30, 2016 (formerly June 9).

#### 823. Promoting Opportunity Demonstration Project

This provision requires SSA to establish a five-year demonstration project to test a benefit offset of \$1 for every \$2 of earnings in excess of a specific threshold.

#### 824. Use of Electronic Payroll Data to Improve Program Administration

Section 824 permits SSA to establish exchanges with payroll data providers to obtain wage data to administer the disability and SSI programs and prevent improper payments. It authorizes SSA to require claimants to provide authorization to obtain payroll data. The agency is to publish a Federal Register notice describing exchanges with payroll providers created under this section, and publish regulations implementing SSA's access to and use of information held by payroll providers.

#### 825. Treatment of Earnings Derived from Services

For purposes of an initial determination of Title II disability, this section establishes a rebuttable presumption that earnings were earned in the month in which the services were performed; in any other case, it establishes the rebuttable presumption that earnings were earned in the month in which such earnings were paid.

#### 826. Electronic Reporting of Earnings

This provision requires SSA to establish and implement a system permitting disability insurance beneficiaries to report their earnings electronically.

#### 831. Closure of Unintended Loopholes (Aggressive Claiming)

Section 831 automatically deems a claimant who applies for retirement benefits to have applied for any spousal benefit for which he or she is eligible, and automatically deems a claimant who

applies for a spousal benefit based on age to have applied for his or her retirement benefit if he or she is eligible. It also prohibits a person from receiving retroactive benefits for a period of voluntary suspension or benefits based on the earnings of an individual who has suspended his or her benefits during the suspension, and prohibits an individual whose benefits are suspended from receiving benefits on any other record during the suspension.

#### 832. Requirement for Medical Review

This section requires SSA to make every reasonable effort to ensure that a qualified physician (or psychiatrist or psychologist in mental cases) has completed the medical portion of the case review unless good cause is shown. This provision also removes single decision maker (SDM) authority in all disability processing sites, requiring licensed physicians review all disability determinations.

#### 833. Reallocation of Payroll Tax Revenue

This provision increased the portion of the payroll tax on wages and self-employment income allocated to the DI Trust Fund by 0.57 percent, effective January 1, 2016 through December 31, 2018.

#### 834. Access to Financial Information for Waivers and Adjustments of Recovery

Section 834 requires SSA to obtain a claimant's authorization to obtain financial institution records before waiving overpayment recovery under the "defeats the purpose" provision, and permits SSA to refuse the waiver if the claimant refuses to grant such authorization.

#### 841. Interagency Coordination to Improve Program Administration

This section requires SSA and the Office of Personnel Management to enter into an agreement that will allow SSA to withhold past-due disability benefits to offset any Federal Employee Retirement System disability annuity overpayment caused by such disability benefits.

#### 842. Elimination of Quinquennial Determinations Relating to Wage Credits for Military Service Prior to 1957

This provision eliminates the requirement for quinquennial determinations for pre-1957 military service wage credits after the 2010 determination.

#### 843. Certification of Benefits Payable to a Divorced Spouse of a Railroad Worker to the Railroad Retirement Board

Section 843 allows SSA to electronically certify to the Railroad Retirement Board benefits due to a divorced spouse of a railroad worker.

844. Technical Amendments to Eliminate Obsolete Provisions

This section removes two obsolete provisions of the Social Security Act related to Medicare, the former §226(i) and §226A(c).

845. Reporting Requirements to Congress

This provision requires SSA to submit three new annual reports to Congress: Fraud and Improper Payment Prevention Report, to be submitted with the agency's annual budget; Work-Related Continuing Disability Review Report, to be submitted to the House Committee on Ways and Means and the Senate Committee on Finance; and Overpayment Waiver Report, to be submitted to the House Committee on Ways and Means and the Senate Committee on Finance.

846. Expedited Examination of Administrative Law Judges (ALJs)

Section 846 allows SSA to request additional examinations for ALJs from the Office of Personnel Management, the first exams would be held by April 1, 2016, and other exams no later than December 31, 2022. SSA will pay all costs associated with ALJ exams.

## BUDGETARY RESOURCES

The LAE account represents SSA's administrative budget for carrying out its responsibilities under the Social Security Act. This includes administering the OASI, DI, SSI and Special Benefits for Certain WWII Veterans programs and supporting the Centers for Medicare and Medicaid Services in administering the HI, SMI, and Medicare Part D programs. The President's Budget for the LAE account in FY 2017 is \$13.067 billion.

### AMOUNTS AVAILABLE FOR OBLIGATION

**Table 3.6—Amounts Available for Obligation<sup>1,2</sup>**  
(dollars in thousands)

	FY 2015 Actual	FY 2016 Enacted	FY 2017 Estimate
<b>LAE</b>			
LAE Appropriation	\$11,805,945	\$12,161,945	\$13,067,000
<b>Unobligated Balance, start-of-year</b>	\$469,609	\$180,208	\$262,000

<b>Unobligated Balances, start-of-year</b>	<b>\$0</b>	<b>\$26,983</b>	<b>\$44,150</b>
Expenditure Transfers from Trust Funds	\$27,000	\$22,000	\$22,000
Unobligated Balances, end-of-year	-\$26,983	-\$44,150	-\$61,317
<b>Obligations, MACRA</b>	<b>\$17</b>	<b>\$4,833</b>	<b>\$4,833</b>

### BUDGET AUTHORITY AND OUTLAYS

The LAE account is funded by the Social Security Trust Funds, the General Fund, the Medicare Trust Funds, and applicable user fees. Section 201(g) of the Social Security Act provides that SSA determine the share of administrative expenses that should have been borne by the appropriate trust funds for the administration of their respective programs and the General Fund for administration of the SSI program. SSA calculates the administrative costs attributable to each program using its Government Accountability Office approved cost analysis system. In FY 2009, SSA received additional funds from the General Fund of the Treasury, provided by the Recovery Act and the MIPPA. SSA will also receive \$98 million funded incrementally from FY 2015 to FY 2018 for implementation costs associated with the MACRA provisions.

**Table 3.7—Budget Authority and Outlays**  
(dollars in thousands)<sup>2</sup>

	<b>FY 2015<sup>3</sup></b>	<b>FY 2016<sup>4</sup></b>	<b>FY 2017<sup>5</sup></b>
	<b>Actual</b>	<b>Enacted</b>	<b>Estimate</b>
OASI and DI Trust Funds <sup>6</sup>	\$5,344,291 <sup>7</sup>	\$5,596,112 <sup>8</sup>	\$5,702,038 <sup>9</sup>
HI and SMI Trust Funds	\$1,755,376	\$1,777,800	\$2,001,330
SSA Advisory Board	\$2,300	\$2,300	\$2,500

**Table Continues on the Next Page**

<sup>1</sup> Congress appropriated SSA \$98 million to fund the implementation costs to comply with the provisions of the Medicare Access and CHIP Reauthorization Act of 2015. SSA will receive the funding incrementally. The available funding amount for each fiscal year is as follows: FY 2015 - \$27 million (available through FY 2018); FY 2016 - \$22 million (available through FY 2018); FY 2017 - \$22 million (available through FY 2018); and FY 2018 - \$27 million (available until expended).

<sup>2</sup> Totals may not add due to rounding.

<sup>3</sup> In FY 2015 our administrative costs were about 1.3 percent of the benefit payments we paid.

<sup>4</sup> In FY 2016 our administrative costs are about 1.3 percent of the benefit payments we plan to pay.

<sup>5</sup> In FY 2016 our administrative costs are about 1.3 percent of the benefit payments we plan to pay.

<sup>6</sup> OASDI includes funding for administration of the Special Benefits for Certain World War II Veterans.

<sup>7</sup> The total includes \$2,785,301 in DI and \$2,558,990 in OASI costs.

<sup>8</sup> The total includes \$2,924,160 in DI and \$2,671,952 in OASI costs.

<sup>9</sup> The total includes \$2,964,663 in DI and \$2,737,375 in OASI costs.

## Limitation on Administrative Expenses

	FY 2015 Actual	FY 2016 Enacted	FY 2017 Estimate
SSI Administrative Expenses	\$4,578,978	\$4,648,733	\$5,234,132
SSI State Supplement User Fees	\$124,000	\$136,000	\$126,000
Non-Attorney Representative User Fees	\$1,000	\$1,000	\$1,000
MIPPA – LIS	N/A	N/A	N/A
MACRA	\$27,000	\$22,000	\$22,000
Recovery Act	N/A	N/A	N/A
<b>Total Budget Authority</b>	<b>\$11,832,945</b>	<b>\$12,183,945</b>	<b>\$13,089,000</b>
OASI and DI Trust Funds <sup>1</sup>	\$5,387,876 <sup>2</sup>	\$5,680,158 <sup>3</sup>	\$5,771,443 <sup>4</sup>
HI and SMI Trust Funds	\$1,771,000	\$1,806,100	\$2,026,600
SSI Administrative Expenses	\$4,809,424	\$4,708,042	\$5,282,857
SSI State Supplement User Fees	\$124,000	\$136,000	\$126,000
Non-Attorney Representative User Fees	\$1,000	\$1,000	\$1,000
MIPPA – LIS	\$77	\$5,872	\$5,872
MACRA	\$0	\$4,833	\$4,833
Recovery Act - Workload Processing	\$0	\$0	\$0
Recovery Act - Economic Recovery	\$0	\$0	\$0
Recovery Act - New NSC	\$63,131	\$47,100	\$43,600
<b>Total Administrative Outlays</b>	<b>\$12,156,508</b>	<b>\$12,389,105</b>	<b>\$13,262,205</b>

<sup>1</sup> OASDI includes funding for administration of the Special Benefits for Certain World War II Veterans.

<sup>2</sup> The total includes \$2,750,176 in DI and \$2,637,700 in OASI costs.

<sup>3</sup> The total includes \$2,963,158 in DI and \$2,717,000 in OASI costs.

<sup>4</sup> The total includes \$2,996,443 in DI and \$2,775,000 in OASI costs.

### PROGRAM INTEGRITY

The following table provides a consolidated account of the total funding required for CDRs and redeterminations for FY 2015 through FY 2017. For more information about SSA's program integrity efforts, please refer to page 107.

**Table 3.8—Program Integrity  
(dollars in millions)**

	<b>FY 2015 Actual<sup>1</sup></b>	<b>FY 2016 Estimate<sup>2</sup></b>	<b>FY 2017 Estimate<sup>3</sup></b>
Full Medical CDRs Completed	799,013	850,000	1,100,000
SSI Non-Medical Redeterminations Completed	2,266,992	2,522,000	2,822,000
Funding			
Dedicated Program Integrity Funding	\$1,396	\$1,426	\$1,819
Related LAE Funding <sup>4</sup>	\$9	\$100 <sup>5</sup>	\$59

The following table satisfies SSA's requirement directed by the House Report.

**Table 3.9 - FY 2015 SSA Program Integrity (PI) Spending  
(dollars in thousands)**

	<b>Total PI Obligations<sup>6</sup></b>
OASI	\$ 139,700
DI	\$ 241,100
SSI	\$ 912,600
HI	\$ 52,900
SMI	\$ 59,100
<b>Total</b>	<b>\$ 1,405,400</b>

<sup>1</sup> FY 2015 actual represents the combined costs of CDRs and SSI redeterminations in FY 2015, including the \$1.396 billion in the base and cap adjustment (as authorized by the Budget Control Act) and an additional \$9 million from LAE. The FY 2015 Omnibus authorized the use of up to \$131 million from LAE for Program Integrity activities.

<sup>2</sup> FY 2016 estimate represents \$1.426 billion in the base and cap adjustment (as authorized by the Bipartisan Budget Act) for dedicated program integrity funding and an additional \$116 million from LAE. We estimate needing \$100 million of the \$116 million to fully fund the PI workload.

<sup>3</sup> FY 2017 estimate represents \$1.819 billion in the base and cap adjustment (as authorized by the Bipartisan Budget Act) for dedicated program integrity funding and an additional \$59 million from LAE.

<sup>4</sup> Funding reflects the fully loaded costs of performing CDRs and SSI redeterminations.

<sup>5</sup> The FY 2016 Omnibus authorizes the use of up to \$116 million from LAE; SSA estimates using \$100 million from LAE.

<sup>6</sup> Represents the full cost of completing Continuing Disability Reviews and SSI Redeterminations as authorized by the Budget Control Act of 2011 (PL 112-25). Continuing Disability Review (CDR) costs include the cost of processing Medical and Work CDRs and excludes the cost of Medical CDR appeals, which is not consistent with costs reported in the CDR Report to Congress. For a description of anti-fraud activities, please see the Budget Overview.

## KEY ASSUMPTIONS AND COST DRIVERS

---

We continue to do everything we can to reduce our operating costs. Nevertheless, as our beneficiary population increases each year, our costs continue to rise. While some of our programs have discrete cost-drivers associated with them, the majority of cost-drivers affect all programs.

We formulated this budget to address the following challenges:

- High demand for services due to the aging population, see [Social Security Beneficiary Statistics](#);
- Disability appeals hearings backlog;
- Complex disability process, see [Social Security Disability](#);
- Growth in non-traditional SSA workloads (e.g., Medicare, ACA, and verifications for other programs);
- Combatting waste, fraud and abuse;
- Reducing improper payments and completing cost-effective program integrity work, see [Social Security Improper Payments](#);
- Finding additional efficiencies and streamlining business processes;
- Modernizing our service delivery;
- Modernizing computer systems;
- Cyber threats; and
- Rising infrastructure costs.

Please see the performance table 3.4 for clarity for projected work completed for our major workloads, as well as our productivity numbers.

## ANALYSIS OF CHANGES

The FY 2017 request for the LAE account represents a \$1.1 billion increase over the FY 2016 level. The following tables provide a summary of the changes from the FY 2016 level to the FY 2017 President's Budget.

**Table 3.10—Summary of Changes from FY 2016 to FY 2017<sup>1</sup>**  
(dollars in thousands)

	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>	<b>FY16 to FY17 Change</b>
<b>Total LAE</b>	<b>\$12,367,461</b>	<b>\$13,354,308</b>	<b>+ \$986,847</b>
Appropriation	\$12,161,945	\$13,067,000	+ \$905,055
Amounts Available From Prior Year Unobligated Balances	\$205,516	\$287,308	- \$81,792
<b>Obligations, LAE</b>	<b><u>\$12,205,153</u></b>	<b><u>\$13,329,000</u></b>	<b>+ <u>\$1,123,847</u></b>
Unobligated Balance, end-of- year <sup>2,3</sup>	\$162,308	\$25,308	-\$137,000
<b>Recovery Act Obligations</b>	<b><u>\$53,438</u></b>	<b><u>\$0</u></b>	<b>- <u>\$53,438</u></b>
National Support Center	\$53,438	\$0	- \$53,438
<b>MIPPA - LIS Obligations</b>	<b><u>\$5,872</u></b>	<b><u>\$5,872</u></b>	<b><u>\$0</u></b>
<b>SCHIP Obligations</b>	<b><u>\$1,026</u></b>	<b><u>\$1,026</u></b>	<b><u>\$0</u></b>
<b>MACRA<sup>3</sup></b>	<b><u>\$4,833</u></b>	<b><u>\$4,833</u></b>	<b><u>\$0</u></b>
<b>Obligations, Total</b>	<b><u>\$12,270,321</u></b>	<b><u>\$13,340,731</u></b>	<b>+ <u>\$1,070,410</u></b>

<sup>1</sup> Totals do not include reimbursables and may not add due to rounding.

<sup>2</sup> Unobligated Balance end-of-year reflects \$25,308,063 in FY 2015 Delegated Buildings carryover.

<sup>3</sup> The majority of the FY 2016 unobligated balance, end-of-year comprises funding for the Altmeyer renovation (\$137M). Please refer to the Major Building Renovations exhibit on page 118 for additional information.

<sup>3</sup> Congress appropriated SSA \$98 million to fund the implementation costs to comply with the provisions of the Medicare Access and CHIP Reauthorization Act of 2015. SSA will receive the funding incrementally. The available funding amount for each fiscal year is as follows: FY 2015 - \$27 million (available through FY 2018); FY 2016 - \$22 million (available through FY 2018); FY 2017 - \$22 million (available through FY 2018); and FY 2018 - \$27 million (available until expended).

**Table 3.11—Explanation of LAE Budget Changes from FY 2016 to FY 2017**  
(dollars in thousands)<sup>1</sup>

	FY 2016		Change from FY 2016	
	Federal WYs <sup>2</sup>	Obligations	Federal WYs <sup>2</sup>	Obligations
<b><u>BUILT-IN INCREASES</u></b>				
<b><u>Payroll Expenses</u></b>	65,832	\$6,896,741		\$220,824
Increases due to periodic step increases, health benefits, career ladder promotions, and new employees hired under the Federal Employees Retirement System				125,093
Three-month effect of assumed Federal pay increase effective January 2016 – 1.3%				20,326
Nine-month effect of assumed Federal pay increase effective January 2017 – 1.6%				75,406
<b><u>Non-Payroll Costs</u></b>				
Mandatory growth in non-payroll costs, including higher costs of rent, security, and guard services		\$1,874,854		\$69,114
<b><u>State Disability Determination Services</u></b>				
Mandatory growth in State DDS costs, including pay raises and the cost of medical evidence		\$2,372,662		\$29,667
<b>Subtotal, Built-In Increases</b>				<b>+\$319,605</b>
<b><u>PROGRAM INCREASES</u></b>				
<b><u>Net Increase in WYs<sup>3</sup></u></b>			2,806	\$301,370
<b><u>Non-Payroll Costs</u></b>		\$125,037		\$16,063
<b><u>Net Increase in State Disability Determination Services</u></b>				\$111,670
<b><u>Social Security Statements Mailed</u></b>		\$22,237		\$2,696

Table Continues on the Next Page

<sup>1</sup> Totals may not add due to rounding.

<sup>2</sup> Excludes workyears associated with MACRA funding.

<sup>3</sup> The FY 2017 WYs increase is largely due to the necessary overtime needed to process Program Integrity.

	FY 2016		Change from FY 2016	
	Federal WYs	Obligations	Federal WYs	Obligations
<b><u>Funding for IT<sup>1</sup></u></b>		\$720,413		\$352,196
<b>Subtotal, Program Increases</b>			2,806	<b>+\$783,995</b>
<b>Total Increases</b>			<b>+2,806</b>	<b>\$1,103,600</b>
<b><u>BUILT-IN DECREASES</u></b>				
<b><u>Payroll Expenses</u></b>				
Decrease due to two fewer paid days				-\$48,545
<b><u>PROGRAM DECREASES</u></b>				
<b><u>Decreases in Obligations Funded from Other Prior-Year Unobligated Balances</u></b>		\$180,208		-\$55,208
<b><u>Recovery Act – New NSC Resources</u></b>				
Non-personnel Costs		\$53,438		-\$53,438
<b>Total Decreases</b>				<b>-\$157,191</b>
<b><u>OTHER OBLIGATIONS</u></b>				
<b><u>MIPPA – LIS</u></b>		\$5,872		\$0
<b><u>State Children’s Health Insurance Program (SCHIP)</u></b>		\$1,026		\$0
<b><u>Altmeyer</u></b>		\$13,000		\$124,000
<b><u>Medicare Access &amp; CHIP Reauthorization Act<sup>2</sup> (MACRA)</u></b>		\$4,833		\$0
<b>Total LAE Obligations, Net Change</b>	<b>65,832</b>	<b>\$12,270,321</b>	<b>+2,806</b>	<b>+\$1,070,410</b>

<sup>1</sup> Planned obligations for Information Technology also include obligations funded from prior-year unobligated balances in the amounts of \$180 million in FY 2016 and \$125 million in FY 2017. The FY 2017 IT funding increase represents the amount needed to bring our agency spending to historical levels, and also includes funding for IT Modernization and Cyber Security.

<sup>2</sup> Congress appropriated SSA \$98 million to fund the implementation costs to comply with the provisions of the Medicare Access and CHIP Reauthorization Act of 2015. SSA will receive the funding incrementally. The available funding amount for each fiscal year is as follows: FY 2015 - \$27 million (available through FY 2018); FY 2016 - \$22 million (available through FY 2018); FY 2017 - \$22 million (available through FY 2018); and FY 2018 - \$27 million (available until expended).

## BUDGETARY RESOURCES BY OBJECT

Table 3.12—Budgetary Resources by Object<sup>1,2,3,4</sup>

(dollars in thousands)

	FY 2016	FY 2017	Change
Personnel Compensation			
Permanent positions	\$4,940,108	\$5,167,063	\$226,955
Positions other than permanent	\$139,150	\$145,111	\$5,961
Other personnel compensation	\$104,929	\$203,647	\$98,718
Special personal service payments	\$5,387	\$5,509	\$122
Subtotal, personnel compensation	\$5,189,573	\$5,521,330	\$331,757
Personnel Benefits	\$1,718,899	\$1,860,791	\$141,892
Travel and transportation of persons	\$24,096	\$24,372	\$277
Transportation of things	\$5,751	\$5,816	\$65
Rent, communications, and utilities			
Rental payments to GSA	\$716,412	\$714,659	- \$1,753
Rental payments to others	\$438	\$440	\$1
Communications, utilities, misc.	\$446,651	\$516,724	\$70,072
Printing and reproduction	\$22,386	\$22,633	\$247
Other services (DDS, guards, etc.)	\$3,803,312	\$4,138,146	\$334,835
Supplies and materials	\$28,305	\$28,617	\$312
Equipment	\$197,640	\$252,430	\$54,790
Land and structures	\$73,141	\$210,777	\$137,636
Grants, subsidies and contributions	\$17,305	\$17,495	\$191
Insurance claims and indemnities	\$26,208	\$26,497	\$289
Interest and dividends	\$4	\$4	\$1
<b>Total Obligations</b>	<b>\$12,270,321</b>	<b>\$13,340,731</b>	<b>\$1,070,409</b>
Resources not being obligated in the current year (carrying over or lapsing)	\$213,355	\$86,625	- \$126,731
<b>Total Budgetary Resources</b>	<b>\$12,483,677</b>	<b>\$13,427,355</b>	<b>\$943,679</b>
Payments to State DDS (funded from other services and communications, utilities, and misc.)	\$2,372,662	\$2,514,000	\$141,338

<sup>1</sup> Totals do not include reimbursables and may not add due to rounding.

<sup>2</sup> The obligations include the base LAE appropriation, LIS, SCHIP, NSC, MACRA, and the Altmeyer Renovation. Total budgetary resources in the table reflect FY 2016 and FY 2017 projections of spending by object class. Resources are not managed at the object class level and SSA has the flexibility within the LAE account to modify projected spending during the budget execution process.

<sup>3</sup> As required by the FY 2016 Omnibus Report provisions, we note that the total FY 2015 DDS obligations are \$2.262B, which includes personnel costs as well as medical and other workload support costs.

<sup>4</sup> As required by FY 2016 Omnibus General Provision 524, the Office of Communications estimates \$4 million of FY 2016 funds to be obligated for advertising.

The following tables satisfy SSA's requirement directed by the House Report.

**Table 3.13 — FY 2015 Physical Infrastructure Costs by Component**

## BACKGROUND

### AUTHORIZING LEGISLATION

The LAE account is authorized by section 201(g) of the Social Security Act. The authorization language makes available for expenditure, out of any or all of the Trust Funds, such amounts as Congress deems appropriate for administering Title II, Title VIII, Title XVI, and Title XVIII of the Social Security Act for which SSA is responsible and Title XVIII of the Act for which the Secretary of the Department of Health and Human Services is responsible.

**Table 3.15—Authorizing Legislation**  
(dollars in thousands)

	<b>2015 Amount Authorized</b>	<b>2015 Actual<sup>1</sup></b>	<b>2016 Amount Authorized</b>	<b>2016 Enacted<sup>2</sup></b>	<b>2017 Amount Authorized</b>	<b>2017 Estimate<sup>3</sup></b>
<b>Title II, Section 201(g)(1) of the Social Security Act</b>	Indefinite	\$11,805,945	Indefinite	\$12,161,945	Indefinite	\$13,067,000

<sup>1</sup> The FY 2015 appropriation included \$1,396 million in dedicated funding for program integrity, \$124 million for SSI State Supplement user fees, and up to \$1 million from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).

<sup>2</sup> The FY 2016 appropriation included \$1,426 million in dedicated funding for program integrity, \$136 million for SSI State Supplement user fees, and up to \$1 million from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).

<sup>3</sup> The FY 2017 request includes \$1,819 million in dedicated funding for program integrity, \$126 million for SSI State Supplement user fees, and up to \$1 million from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).

## APPROPRIATION HISTORY

The table below includes the amount requested by the President, passed by the House and Senate Committees on Appropriations, and ultimately appropriated for the LAE account, including any rescissions and supplemental appropriations, for the last 10 years. The annual appropriation includes amounts authorized from SSI State Supplement user fees and, beginning in FY 2007, non-attorney representative user fees.

**Table 3.16—Appropriation History Table**

Fiscal Year	Budget Estimate to Congress	House Committee Passed	Senate Committee Passed	Enacted Appropriation
<b>2007</b>	\$9,496,000,000 <sup>1</sup>	\$9,293,000,000 <sup>2</sup>	\$9,093,000,000 <sup>3</sup>	<b>\$9,297,573,000</b> <sup>4</sup>

<sup>1</sup> Includes a total of \$490,000,000 in funding designated for continuing disability reviews in FY 2007. Total consists of \$289,000,000 in base funding and \$201,000,000 in additional funds. Includes up to \$119,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments. Also includes up to \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).

<sup>2</sup> H.R. 5647.

<sup>3</sup> S. 3708.

<sup>4</sup> Revised Continuing Appropriations Resolution, 2007 (P.L. 110-5).

- 
- <sup>5</sup> Includes a total of \$477,000,000 in funding designated for SSI redeterminations and continuing disability reviews (CDRs). The base and cap adjustment requests for 2008 include both CDRs and SSI redeterminations, whereas previous cap adjustment requests were for CDRs only. Total consists of \$264,000,000 in base funding and \$213,000,000 in additional funds. Includes up to \$135,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments. Also includes up to \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).
- <sup>6</sup> H.R. 3043.
- <sup>7</sup> S. 1710.
- <sup>8</sup> Consolidated Appropriations Act, 2008 (P.L. 110-161). Includes up to \$132,641,550 from user fees paid by states for Federal administration of SSI State Supplement payments. Also includes up to \$982,530 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).
- <sup>9</sup> A total of \$173,264,731 was rescinded by the Consolidated Appropriations Act, 2008 (P.L. 110-161).
- <sup>10</sup> Economic Stimulus Act (P.L. 110-185) provides funds for work related to rebate checks for Title II beneficiaries and disabled veterans.
- <sup>11</sup> Total includes \$504,000,000 in funding designated for SSI redeterminations and continuing disability reviews – \$264,000,000 in base funding and \$240,000,000 in additional funds. Includes up to \$145,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments. Also includes up to \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).
- <sup>12</sup> The House Committee on Appropriations did not report a bill.
- <sup>13</sup> S. 3230.
- <sup>14</sup> Omnibus Appropriations Act, 2009 (P.L. 111-8). Total includes \$504,000,000 in funding designated for SSI redeterminations and continuing disability reviews – \$264,000,000 in base funding and \$240,000,000 in additional funds. After enactment of the FY 2009 appropriation, \$1,378,700 was transferred from LAE to OIG.
- <sup>15</sup> From the General Fund of the Treasury, the Medicare Improvements for Patients and Providers Act (MIPPA) (P.L. 110-275) provides \$24,800,000 for activities related to the implementation of changes to the Low-Income Subsidy program. The MIPPA total does not include \$24,100,000 for Medicare Savings Program outreach and transmittal of data to states. Also not included is the Children's Health Insurance Program Reauthorization Act (P.L. 111-3), which appropriated to SSA \$5,000,000 to provide states the option to verify citizenship or nationality for the purposes of determining Medicaid or Children's Health Insurance Program eligibility.
- <sup>16</sup> The American Recovery and Reinvestment Act (Recovery Act) (P.L. 111-5) provides SSA \$500,000,000 to process growing disability and retirement workloads, \$500,000,000 to replace the National Computer Center, and \$90,000,000 to administer the \$250 economic recovery payments for eligible Social Security and Supplemental Security Income beneficiaries.
- <sup>17</sup> Total includes \$758,000,000 in funding designated for SSI redeterminations and continuing disability reviews – \$273,000,000 in base funding and \$485,000,000 in additional funds. Includes up to \$165,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments. Also includes up to \$500,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).
- <sup>18</sup> H.R. 3293.
- <sup>19</sup> H.R. 3293, reported from Committee with an amendment.
- <sup>20</sup> Consolidated Appropriations Act, 2010 (P.L. 111-117). Total includes \$758,000,000 in funding designated for SSI redeterminations and continuing disability reviews – \$273,000,000 in base funding and \$485,000,000 in additional funds. The enacted amount matches the President's request, after accounting for a technical adjustment resulting from CBO's scoring of user fees. Total includes up to \$160,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments, and \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).

- 
- <sup>21</sup> \$47,000,000 of Recovery Act Economic Recovery Payment administration funds rescinded by section 318 of P.L. 111-226.
- <sup>22</sup> Total includes \$796,000,000 in funding designated for SSI redeterminations and continuing disability reviews – \$283,000,000 in base funding and \$513,000,000 in additional funds. Includes up to \$185,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments and up to \$500,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203). Includes \$1,863,280 to increase SSA’s acquisition workforce capacity and capabilities.
- <sup>23</sup> The House Committee on Appropriations did not report a bill.
- <sup>24</sup> S. 3686.
- <sup>25</sup> Department of Defense and Full-Year Continuing Appropriations Act, 2011 (P.L. 112-10).
- <sup>26</sup> A total of \$22,893,000 was rescinded by the Department of Defense and Full-Year Continuing Appropriations Act, 2011 (P.L. 112-10). The table does not display a \$200,000,000 rescission of no-year IT funds enacted in the Additional Continuing Appropriations Amendments, 2011 (P.L. 112-6) or a \$75,000,000 rescission of no-year IT funds enacted in the Department of Defense and Full-Year Continuing Appropriations Act, 2011 (P.L. 112-10).
- <sup>27</sup> Total includes \$938,000,000 in funding designated for SSI redeterminations and continuing disability reviews – \$315,000,000 in base funding and \$623,000,000 in additional funds. Includes up to \$163,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments and up to \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203). Includes \$1,863,000 to increase SSA’s acquisition workforce capacity and capabilities.
- <sup>28</sup> The House Committee on Appropriations did not report a bill. Appropriations Chairman Rehberg introduced H.R. 3070, which included \$12,041,494,000.
- <sup>29</sup> S. 1599.
- <sup>30</sup> Consolidated Appropriations Act, 2012 (P.L. 112-74). Total includes \$483,484,000 for continuing disability reviews and SSI redeterminations appropriated in the Disaster Relief Appropriations Act (P.L. 112-77).
- <sup>31</sup> A total of \$21,688,000 was rescinded by the Consolidated Appropriations Act, 2012 (P.L. 112-74).
- <sup>32</sup> The FY 2012 enacted LAE Budget Authority is \$11,453 million. However, effective April 1, 2012, Massachusetts will assume control of its State Supplementary payments reducing the estimated SSI user fees by approximately \$7.1 million. The resulting available SSI user fee funding for FY 2012 is approximately \$154 million. The available LAE funding for FY 2012 is approximately \$11,446 million.
- <sup>33</sup> Total includes \$1,024,000,000 in funding designated for SSI redeterminations and continuing disability reviews – \$273,000,000 in base funding and \$751,000,000 in additional funds. Includes up to \$170,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments and up to \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).
- <sup>34</sup> The House Committee on Appropriations did not report a bill. The Committee posted a draft bill which included \$10,684,414,000 for LAE.
- <sup>35</sup> S. 3295.
- <sup>36</sup> At the time the Budget was formulated we had not received a full year appropriation for FY 2013. We were operating under a six month CR (P.L. 112-175) that funded agency operations at \$11,520,000,000 if annualized. This represents a 0.612 percent increase from the FY 2012 enacted level. Funding was reduced to the FY 2012 enacted level of \$11,453,290,000 under a full year CR (P.L. 113-6).
- <sup>37</sup> As per BDR 13-19, SSA was subject to an Across-the-Board (ATB) Reduction/Rescission of .2% of LAE. Both Base and Cap Program Integrity funds were exempt from this reduction.
- <sup>38</sup> Under P.L. 112-175, all non-SSI funding was reduced by 5% after sequestration was triggered by Congress.
- <sup>39</sup> Agency funding post sequestration (P.L. 112-175) and ATB reduction (BDR 13-19) was \$407,723,000 lower than the original CR funding level (P.L. 113-6).

- 
- <sup>40</sup> The House Committee on Appropriations did not report a bill. The LAE appropriation of \$11,697,040,000 for FY 2014 was incorporated into H.R. 3547.
- <sup>41</sup> S. 3533.
- <sup>42</sup> Consolidated Appropriations Act, 2014 (P.L. 113-76). Total includes \$1,197,000,000 for continuing disability reviews and SSI redeterminations. Includes up to \$171,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments and up to \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).
- <sup>43</sup> Total includes \$273,000,000 in funding designated for SSI redeterminations and continuing disability reviews. Includes up to \$173,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments and up to \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).
- <sup>44</sup> The FY 2014 President's Budget included a legislative proposal to create a new Program Integrity Administrative Expenses (PIAE) account and provide a more reliable stream of mandatory program integrity funding. The FY 2014 PIAE request was \$1,227,000,000. With the addition of \$273,000,000 requested for program integrity as part of the LAE, the total program integrity request for FY 2014 was \$1,500,000,000.
- <sup>45</sup> Total includes \$1,396,000,000 in dedicated funding designated for SSI redeterminations and continuing disability reviews – \$273,000,000 in base funding and \$1,123,000,000 in funds outside the discretionary caps as authorized by the BCA, as well as \$131,000,000 from LAE to assist in program integrity work. Includes up to \$124,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments and up to \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).
- <sup>46</sup> The House Committee on Appropriations did not report a bill. .
- <sup>47</sup> The Senate Committee on Appropriations did not report a bill.
- <sup>48</sup> Consolidated and Further Continuing Appropriations Act, 2015 (P.L. 113-235). Total includes \$1,396,000,000 for continuing disability reviews and SSI redeterminations. Includes up to \$124,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments and up to \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).
- <sup>49</sup> Total includes \$1,439,000,000 in dedicated funding designated for SSI redeterminations and continuing disability reviews – \$273,000,000 in base funding and \$1,166,000,000 in funds outside the discretionary caps as authorized by the BCA. Includes up to \$136,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments and up to \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).
- <sup>50</sup> H.R. 3020.
- <sup>51</sup> S.1695.
- <sup>52</sup> Consolidated Appropriations Act, 2016 (P.L. 114-113). Total includes \$1,426,000,000 for continuing disability reviews and SSI redeterminations. Includes up to \$124,000,000 from user fees paid by states for Federal administration of SSI State Supplement payments and up to \$1,000,000 from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).
- <sup>53</sup> The FY 2017 request includes \$1,819 million in dedicated funding for program integrity - \$273,000,000 in base funding and \$1,546,000 in funds outside the discretionary caps as authorized by the BCA. Additionally, the LAE account carves out funding to support the fully loaded costs of performing 1.1 million CDRs and approximately 2.8 million redeterminations, \$126 million for SSI State Supplement user fees, and up to \$1 million from fees collected pursuant to section 303(c) of the Social Security Protection Act (P.L. 108-203).

## ADDITIONAL BUDGET DETAIL

### SIZE AND SCOPE OF SSA'S PROGRAMS

SSA's administrative budget is driven by the programs we administer—both in terms of the amount of work performed and the number of people needed to process it—and by our continuing efforts to improve service, stewardship and efficiency.

Between the three major programs SSA administers—OASI, DI, and SSI—Federal benefit payment outlays totaled \$931.2 billion in FY 2015; under current law, Federal benefit payment outlays are expected to increase to \$978.0 billion in FY 2016 and \$1,018 billion in FY 2017. At approximately 1.3 percent of total outlays, SSA's administrative expenses<sup>1</sup> continue to be a small fraction of overall program spending, demonstrating the agency's cost-conscious approach to managing its resources.

**Table 3.17—Federal Benefit Outlays<sup>2,3</sup>**  
(dollars in billions)

	<b>FY 2015 Actual</b>	<b>FY 2016 Estimate</b>	<b>FY 2017 Estimate</b>
Old-Age and Survivors Insurance	\$733.7	\$772.0	\$812.6
Disability Insurance	\$142.8	\$146.4	\$149.2
Supplemental Security Income	\$54.6	\$59.6	\$56.2
<b>Total Outlays</b>	<b>\$931.2</b>	<b>\$978.0</b>	<b>\$1,018.0</b>

Paralleling the growth in benefit payment outlays, the number of Federal beneficiaries of the three major programs SSA administers is expected to increase from 64.8 million in FY 2015 to 66.5 million in FY 2016 and 68.4 million in FY 2017.

<sup>1</sup> SSA's calculation of discretionary administrative expenses excludes Treasury administrative expenses which are mandatory outlays.

<sup>2</sup> Totals may not add due to rounding.

<sup>3</sup> Totals do not include payments to recipients of Special Benefits for World War II Veterans.

**Table 3.18—Beneficiaries<sup>1,2,3</sup>**  
(average in payment status, in millions)

	<b>FY 2015 Actual</b>	<b>FY 2016 Estimate</b>	<b>FY 2017 Estimate</b>
Old-Age and Survivors Insurance	48.3	50.1	51.8
Disability Insurance	10.9	10.9	11.0
Supplemental Security Income <sup>2</sup>	8.2	8.2	8.2
Concurrent Recipients <sup>4</sup>	-2.6	-2.6	-2.6
<b>Total Beneficiaries</b>	<b>64.8</b>	<b>66.5</b>	<b>68.4</b>

### FULL TIME EQUIVALENTS AND WORKYEARS

The following table summarizes the LAE Federal and State workyears requested for FY 2017.

**Table 3.19—SSA Supported Federal and State Workyears<sup>5,6</sup>**

	<b>FY 2015 Actual</b>	<b>FY 2016 Estimate</b>	<b>FY 2017 Estimate</b>
Federal Full-Time Equivalents (FTEs)	63,394	64,860	66,140
Federal Overtime/Lump Sum Leave	3,077	972	2,498
<b>Total SSA Workyears (excludes OIG)</b>	<b>66,471</b>	<b>65,832</b>	<b>68,638</b>
Total State DDS Workyears	14,925	15,270	16,000
<b>Total SSA/DDS Workyears (excludes OIG)</b>	<b>81,396</b>	<b>81,102</b>	<b>84,638</b>

### SOCIAL SECURITY ADVISORY BOARD

This budget includes \$2.5 million for the Social Security Advisory Board in FY 2017. The *Social Security Independence and Program Improvements Act of 1994* mandated the creation of a seven-member Advisory Board to make recommendations on policies and regulations relating to SSA's major programs: OASDI and SSI. The Board is required by law to meet at least four times per year. For more information about the Social Security Advisory Board, please see their website: [Social Security Advisory Board](#).

<sup>1</sup> Totals do not include recipients of Special Benefits for World War II Veterans.

<sup>2</sup> Does not include recipients who only receive a Federally Administered State supplementary payment and no Federal benefit.

<sup>3</sup> Totals may not add due to rounding.

<sup>4</sup> Recipients receiving both DI and SSI benefits.

<sup>4</sup> Recipients receiving both DI and SSI benefits.

<sup>5</sup> Includes all workyears funded by MIPPA and the Children's Health Insurance Program (CHIP) Reauthorization Act of 2009.

<sup>6</sup> Excludes workyears associated with Medicare Access and CHIP Reauthorization Act of 2015 funding.

## IT FUND TABLES

**Table 3.20— LAE Expired Balances & No-Year IT Account  
(in thousands)**

<b><u>LAE Expired Accounts</u></b>	<b><u>Amounts</u></b>
LAE unobligated balance from FY 2011-2014	\$187,400
LAE unobligated balance available from FY 2015	\$91,300
Total LAE unobligated balance from FY 2011-2015	\$278,700 <sup>1</sup>
Amounts projected for prior year adjustments	-\$128,000 <sup>22</sup>
<b>Total LAE unobligated balance available for transfer from FY 2011-2015</b>	<b>\$150,700</b>
<b>No-Year ITS Account</b>	
Carryover from funds transferred in FY 2014 for FY 2015	\$255,000
Carryover from FY 2014 (Unobligated Balances)	\$8,601
Total carryover from FY 2014 to FY 2015	\$263,601
Funds transferred in FY 2015 for FY 2015	\$205,800
Total FY 2015 no-year ITS funding available	\$469,401
FY Est. 2015 Obligations	-\$438,292
Recoveries in FY 2015	\$0
<b>Total carryover into FY 2016</b>	<b>\$31,109</b>
Funds available for transfer in FY 2016 for FY 2016	\$150,700
<b>Total FY 2016 no-year ITS funding available</b>	<b>\$181,809<sup>3</sup></b>

<sup>1</sup> Reflects adjustments to the unobligated balances for these years. Balances as of 9/30/2015.

<sup>2</sup> We believe it is essential that these funds remain in the expired LAE accounts (FY 2011-2015) to cover potential upward adjustments. Otherwise, SSA could face an anti-deficiency violation.

<sup>3</sup> \$181.8 million is available based on actual carryover, however we have only allocated \$180.3 million to date.

## ITS BUDGET AUTHORITY

---

SSA's FY 2017 Information Technology Systems (ITS) budget provides resources for the acquisition and maintenance of automated data processing (ADP) and telecommunications hardware and software, as well as ADP support services and related contractual services. SSA reviews all information technology (IT) spending to ensure it includes only those projects and activities that are most crucial for the agency's operations and/or have the highest payback. No-year funding is an essential portion of the total annual IT budget.

The SSA CFO and CIO affirm that the CIO had a significant role in reviewing planned IT support for program objectives and significant increases and decreases in IT resources; and the SSA CIO and CFO affirm that the IT Portfolio includes appropriate estimates of all IT resources included in the budget request.

The table below displays ITS budget authority, split by type of funding, and obligations from FY 2015 through FY 2017.

**Table 3.21—ITS Budget by Activity<sup>1</sup>**

<b>Limitation of Administrative Expenses</b>	<b>FY 2015 Actual</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>
One-Year	\$867,582,552	\$720,113,900	\$1,072,609,500
No-Year	\$438,291,745	\$180,300,000	\$125,000,000
Subtotal	\$1,305,874,297	\$900,413,900	\$1,197,609,500
<b>Recovery Act (National Support Center)</b>	\$27,838,363	\$53,437,800	\$0
<b>Total</b>	\$1,333,712,660	\$953, 851,200	\$1,197,609,500

---

<sup>1</sup> Includes base and cap Program Integrity. Excludes Reimbursable Authority. One-year funds include regular one-year, base CDRs, and additional CDRs.

Below are some of our significant accomplishments during FY 2015:

- **Annual Benefit Change and Annual Benefit Statements (COLA and BRI):** On November 21, 2014, the agency implemented Cost of Living Adjustment (COLA) Adjustment and Medicare premium rate changes, and generated Annual Benefit Statements (SSA-1099) for beneficiaries' tax purposes. These changes are made annually and in FY 2015, the 1.7% COLA change alone involved over 58 million accounts.
- **Notices and Special Notice Option (SNO):** Beginning in November 2014, all SSA produced Medicare notices deemed in scope of the *American Council of the Blind v. Astrue* court decision are now available to claimants in different SNO formats. The notices offered are:
  - Target Notice Architecture Automated Notices (TNA) create automated personalized notices for the public in a format similar to MS Word, with customized mainframe fonts for bolding, underlining, special characters and character height. The notice application programs provide the text and fill-in data to TNA's processes in a consistent format. In addition to supplying the notice content, the application programs pass the language of preference to TNA. Most TNA notices are available in both English and Spanish.
  - Central Image Print Architecture Notices (CIPA) enable the personnel in the Office of Disability Adjudication and Review (ODAR) Hearings Offices to send a variety of notice types through an automated print process.
  - AURORA PSC Notices uses a manual notice system that creates and completes Title II notices for the Program Service Centers (PSC) that could not be completed in an automated fashion by batch processing operations.
  - NOTICE.DLL Notices allow the submission of notices in MS Word format to a VSAM file and then subsequently upload and store the notice in ORS (the Online Retrieval System).
  - Document Processing System Notices (DPS) is a manual notice system and a web-based intranet application. Field Offices, Teleservice Centers and some units in Program Service Centers utilize National, Regional and Local templates and UTIs (Universal Text Identifier) to create custom notices to claimants and beneficiaries.
  - Public Information Request System (PIRS) pamphlets utilize a web-based intranet application that provides SSA field office (FO) employees with user-friendly screens for entering requests from the public for SSA's forms and pamphlets.
  - Special Notice Options (SNO) provide formats that are accessible to the blind or visually impaired in a manner other than first-class print mail.
  - Record Specifications (RecSpec) are notices SSA sends only in data streams to a print vendor/SNO vendor. The vendor then disburses the data to the locations specified on the SSA notices.

For fiscal year 2015, this budget supported the printing of over 136 million notices. Included is a summary of the notice counts:

<b>System / Type</b>	<b>FY 2015 Notice Totals</b>
TNA Automated Notices	117,769,859
CIPA Notices	6,503,908
AURORA PSC Notices	2,194,682
NOTICE.DLL Notices	1,272,179
DPS Notices	6,596,685
PIRS Pamphlets	782,208
SNO Notices:	863,680 (total)
Braille	28,112
Data CD	25,525
Audio CD	35,227
Large Print	774,816
RecSpec Notices:	228,560 (total)
Braille	11,617
Data CD	16,852
Audio CD	12,413
Large Print	187,678
<b>Total:</b>	<b>136,211,761</b>

- **Public Facing Integrity Review (PFIR):** On 11/01/14, released Public Facing Integrity Review (PFIR) Release 2.1 into production. This release provided a new web front end for PFIR users who are reviewing and managing cases. Seven (7) new criteria sets were implemented to aid in detecting potential fraud in the Electronic Access process. Existing criteria for My Direct Deposit internet transactions were enhanced. PFIR supports the agency's ability to deter, detect, and investigate instances of internet fraud and abuse.
- **B Stop Fraud Indicator:** Implemented the B-Stop Fraud Identifier. This project developed a fraud indicator that enables SSA to classify alleged Electronic Funds Transfer (EFT) fraud cases via the existing B Stop non-receipt process. This indicator provides the Bureau of Fiscal Service (BFS) with a way to distinguish and prioritize the alleged fraud cases from other non-receipt cases. In addition, for the "B-Stop" Fraud Identifier project, the Payment History (PHUS) Query was updated to display this new fraud indicator.
- **Records Management System for Media Neutral Claims 2:** In compliance with National Archives and Records Administration (NARA) requirements and agency record retention schedules, DCS successfully implemented their destruction software for three systems, Modernized Integrated Disability Adjudicative System (MIDAS), Case Processing Management System (CPMS), and Case Processing Management System Management Information CPMS MI). The agency changed its claims file disposition strategy in May 2015 to simplify the disposition rules and implement big bucket scheduling using simplified categories. Under the new strategy, these systems will implement their destruction software under their projects. This multi-component effort aligns with the National Archives and Records Administration (NARA) General Records Schedule 20 rule 2B.
- **Automated Publishing of Public Information (APPI):** In October 2015, the APPI project was implemented in production. This project provides an automated mechanism whereby SSA-approved data for public consumption is automatically published on SSA.gov, and is accessible via Data.gov. The APPI project continues the Agency's efforts to comply with the President's Open Government Directive as outlined in SSA's 2010 Open Government Plan, which stipulates the agency's goals and objectives to increase openness in its programs and operations. SSA is committed to increasing transparency through information sharing and accountability.
- **Electronic Records Express (ERE):** Effective May 2015, this redesigned project provided a consistent user experience. It reduced the cost of burning and mailing CDs to the Appointed Representatives community and implemented functionality supporting the Digital Recording Acquisition Project (DRAP). This effort also improved support for Management Information (MI) processing and reporting. It allows us to process additional document types for Disability Determination Services (DDS).
- **Legal Automated Workflow System (LAWS):** In March 2015, we released a modernized matter (case) management system that provides an automated electronic workflow for the Office of the General Counsel (OGC). This functionality allows OGC

to share and transfer its workloads between offices and gives them the ability to integrate with agency systems including Appeals Review Processing System (ARPS), Claims File Record Management System (CFRMS), the electronic folder, and Document Management Architecture (DMA). Additionally, in June another release allowed processing without updating the notice of suit date in the Appeals Review Processing System (ARPS).

- **Electronic Bench Book (eBB):** In April, we released eBB 5.0, allowing a printable summary of case information (Case Information Summary) to be used by an Administrative Law Judge (ALJ) during a hearing. Changes were also implemented to support Internet Explorer 11.
- **Annual Wage Reporting and AccuWage TY14:** On 10/24/2014, we released a new version of AccuWage 2014 into production. This release incorporated options allowing users to test both W-2 (Initial) and W-2C (Correction) submissions through one unified interface. AccuWage is a downloadable SSA application that is used by employers and submitters of wage reports to check the file against the specifications for electronically filing forms W2 and W2c. This enhancement will aid in increasing the accuracy of wage files being sent to the agency. On 01/10/2015, we implemented the major architectural release of the multi-year Annual Wage Reporting (AWR) Redesign into production. This release included software to increase processing capability to 100 million W-2s per week and up to 20 million W-2's per day. Core earnings processes written in COBOL (Common Business Oriented Language) were redesigned and replaced with newer technology.
- **Social Security Online Accounting and Reporting System (SSOARS):** On 10/03/2015, we provided an eWork release that supports Benefit Offset National Demonstration (BOND) beneficiaries' transition into normal Work Continuing Disability Review (W-CDR) rules without the need for a final closing Work Review. This release adds new fraud language to notices SSA-3033, SSA-2708, and L725. Corrections were made for a defect that looks up the office address of beneficiaries who have a foreign address.
- **Human Resources Services Portal:** On 11/22/2014, we implemented Human Resources Portal Release 2.0 into production. This release included the implementation of the Minority Serving Institutions Reporting System (MSIRS), which is the first application within the HR Portal. MSIRS is a web-based application used for tracking agency contributions to organizations including colleges and universities. The data collected in MSIRS will generate the agency's Minority Serving Institutions Report. In addition, the HR Portal release included additional hyperlinks related to Human Resources websites.
- **iAppeals Revitalization and Attachment Utility:** We successfully implemented a release on March 14, 2015 to revise and improve the language throughout the iAppeals application. This release provided a look and feel similar to newer eService applications. It revised the introductory pages and consolidated information, providing a central location for navigation instructions and requirements to complete the iAppeal. It also included the development of a new checklist and tutorial video.

The Attachment Utility was successfully implemented on March 14, 2015. This release developed an attachment allowing users to upload supporting documents and house them in a repository. Additionally, Claims Representatives (CR) will be notified of documents pending in the repository they can send to the electronic folder, print, or print and delete. The CR will also be able to change the document type. The attachment utility should be reusable with other Internet Disability Reports (IDR).

- Dynamic Help - Customer Engagement Tools:** On August 1, 2015 we implemented Dynamic Help which provides a context-aware help application (contact SSA menu) for facilitating mySSA user interactions with agency staff over multiple online communication channels while visiting SSA.gov or using an SSA online application. The first iteration will offer Web Callback and may be limited to authenticated [my Social Security](#) users.
- Web Callback – Customer Engagement Tools:** This Agile development project was successfully implemented on September 19, 2015. Web Callback provides architecture and screen(s) to support a web feature that allows [my Social Security](#) user requests for return phone calls from agency technicians. Users can access this tool through the Dynamic Help Menu application interface.
- MySSA Internet 1099/1042S Application (1099):** - To improve the Social Security Benefit Statement (SSA-1099-R/SSA-1042S) process, SSA implemented a new web application that allows immediate online viewing, printing, saving, mailing and downloading of the 1099 and 1042S through the [my Social Security](#) portal. Effective January 31, 2015, the Internet 1099/1042S application was migrated to operate behind eAccess and within the [my Social Security](#) portal. This improvement resulted in improved service to beneficiaries, reduced cost to the agency for mailings, and reduced workloads for operational personnel.
- Machine-Readable Downloadable Social Security Statement:** This project was successfully implemented on July 25, 2015, releasing code to create a machine-readable, downloadable Social Security (SS) Statement that the public can access. It is housed on the [my Social Security](#) portal. The statement contains the same information in the current statement (estimated benefits, earnings history, etc.), but is in a format that is easily read by software applications.
- MySSA Internet Replacement Card (iMRC):** We successfully implemented iMRC in May 2015. The key objective of this release was placement of the existing Internet Medicare Replacement Card (IMRC) functionality within the [my Social Security](#) portal. It entailed application screen changes, Management Information (MI) report changes, and added Google Analytics functionality. This release will allow Medicare beneficiaries to request a Medicare Replacement Card via their [my Social Security](#) portal account. The beneficiary will receive the card by mail. Placing IMRC within the [my Social Security](#) portal supports the Agency Priority Goal to increase the number of MySSA registrations.

- **Title II Treasury Report on Receivables Rel 2:** In September 2015, we implemented the Treasury Report on Receivables Phase II (TROR II) project for FY 2015. The TROR report will replace the existing Aging Report and automatically generate data for Title II Accounts Receivables balances. DCBFQM will use the TROR report to supply data to the Department of Treasury on T2 overpayments. This project will help meet some of the legislative requirements outlined in the DATA Act of 2014.
- **Terminate T2 Beneficiaries Age 115 in Long-Term Suspense-Phase 2:** In September 2015, we released software for Phase 2, which reduces opportunities to commit fraud by resuming and redirecting benefits on suspended claims through automation for beneficiaries that do not have a date of death reported on the Master Beneficiary Record (MBR) and there are no additional beneficiaries in non-terminated payment status on the MBR. Phase 2 also supports the recommendation set forth in the Office of the Inspector General (OIG) audit A-09-09-29111 titled, “Aged Beneficiaries Whose Benefits Have Been Suspended for Address or Whereabouts Unknown.” This project is automating monthly identification, selection and processing of Title II Master Beneficiary Records (MBR) with long-term benefit suspensions (seven years or more) for address or whereabouts unknown. In addition, the beneficiary must be age 115 or older. The nightly batch processes will manage the selected records. These processes will change the suspension status (S) to a termination status (T9) with a reason for termination of “AgeTRM”.
- **International Payments -68 South Korea and Indonesia:** On 05/15/2015, we successfully implemented International Payments for South Korea and Indonesia by adding Routing and Transmittal Number (RTN) 68 to the Daily Update Master Accounting System (DUMAS). This enhancement provided International Direct Deposit (IDD) to beneficiaries in all countries utilizing RTN ‘68’ -- including South Korea and Indonesia.
- **Rep Payee System Redesign Enhancements:** On 09/12/2015, we successfully implemented an override option that allows technicians to post full or partial repayment of misused funds during the 45-day period after release of the Advance Notification for Repayment of the Misused Funds. On 09/30/2015, we successfully improved Electronic Representative Payee Accounting (eRPA) search/display functionality and eRPA management information (MI) to allow users to access all pending records to allow for timely case processing and better fraud detection and prevention.
- **Ticket Operations Provider Support System (iTOPSS):** On 01/17/2015, a new Web application for iTOPSS was implemented. The Employer Network (EN) Portal was updated to request payments, view payments already made, and it added a beneficiary earnings display. We utilize the Global Functions Web application allows the system to assign a ticket and open a Vocational Rehabilitation (VR) case. Among database changes to accommodate new functionality, the new Ticket Rate has been added to the application. On 02/28/2015, the Employer Networks (EN)s were given the capability to use the Portal to update Timely Progress Review (TPR), check which beneficiaries are

assigned to them, request payments, assign and unassign tickets. This release is another milestone in agency's migration from the MaxStar system.

- **Ensuring Release of Withheld Benefits:** In September 2015, we successfully completed the release of a new MI system. The system captures and stores detailed information on Title 2 transactions that could lead to a beneficiary being entitled to retroactive benefits (back pay). For the release, several new software modules and new database tables were created to capture and store the back pay transactions. By implementing the Management Information System for Ensuring the Release of Withheld benefits, Field Office and Processing Service Center management will be able to better manage this workload and ensure and improve the timely payment of Social Security retroactive benefits. On 09/23/2015, we implemented enhancements to support Representative Payee control and tracking and several new Regular Transcript Attainment and Selection (RETAP) alerts were successfully moved into production. New Management Information (MI) was provided via the Management Information Services Facility (MISF), which allows updated tracking reports to include cases processed by the Office of International Operations (OIO). As a result of the release, OIO is provided with data categorized by the regional Federal Benefit Officer's (RFBO) region and reporting Federal Benefit Units (FBUs)."
- **Social Security Electronic Remittance System (SERS):** In December 2014, the national rollout of SERS Release 1.0 was completed. SERS provides field offices with an automated solution to collect, track, record and report fees collected for providing various non-programmatic services to individuals and third parties. The fee for services is paid by check or credit card and is passed in real time to the Social Security Online Accounting and Reporting System (SSOARS). Credit card information is processed in an encrypted manner without storing any credit card information in any SSA system. SERS replaces manual business processes and promotes standardized electronic business practices and fee collection procedures in field offices by providing a streamlined remittance process and an automated system solution to collect fees for services. SERS addresses the agency's vision to eliminate cash transactions, use card swipe and check scanner technology, and adopt processes that are prevalent throughout the banking and retail sectors. In addition, SERS sufficiently addresses OIG audit recommendations and complies with the requirements of OMB Circular A-25, pertaining to user charges.
- **Certificate of Coverage (COC)/WebCOC:** In December 2014, changes were implemented to the COC and WebCOC application to support the addition of the Slovak Republic. These certificates are legal documents which exempt U.S. employees from paying foreign Social Security taxes when temporarily working overseas. Each determination involves research on country- specific provisions of the Totalization agreements.
- **Health Information Technology (HIT) Release 11.0:** SSA's Health IT provides health care organizations the ability to share medical information with us electronically. It streamlines the disability determination process by allowing us to request and obtain medical records electronically, and it enables computerized decision support. HIT has demonstrated the potential to increase efficiencies in the disability program and

dramatically improve service to the public. During the 1st quarter of FY2015, we provided a combination of software releases and partner expansion to further the HIT initiative. The following sites went into the production environment:

10/01/2014 - University of Iowa  
 10/10/2014 - Presbyterian HealthCare – New Mexico  
 10/24/2014 - Carilion Clinic - Virginia  
 11/10/2014 - Sentara Healthcare – Virginia and North Carolina  
 12/01/2014 - Memorial Care - California  
 12/18/2014 – Martin Health – Florida  
 12/19/2014 – Legacy Health – Oregon and Washington

Using the Medical Evidence Gathering and Analysis through Health IT (MEGAHIT) application allows SSA to request, receive, and analyze electronic medical records in a fully automated manner, resulting in faster decisions on disability claims. During the 1st quarter of FY 2015, DCS provided a combination of software releases and partner expansion to further the HIT initiative. The following sites went into the production environment:

01/29/2015 - Mercy Health  
 02/17/2015 - Essentia Health  
 03/11/2015 - Oregon Health & Science SSM Health.

During the 3rd quarter of FY2015 , we again provided a combination of software releases and partner expansion to further the Health Information Technology (HIT) initiative. The following sites went into the production environment: 04/09/2015 - Stanford Hospital and Clinics; 05/04/2015 - Cedars-Sinai Health System Legacy Health. On 05/02/2015, HIT successfully implemented software release 10.2 into their production environment. This release makes Document Conversion Enterprise (DCE) the default document conversion mechanism. It includes changes to support the removal of Windows 2003 servers as required by the Office of Telecommunications and Systems Operations (OTSO).

- **Affordable Care Act (ACA) Release 3.0:** In October 2014, we successfully implemented and modified operational procedures necessary to allow mainframe architecture to be available 24 x 7 for the Affordable Care Act (ACA) application. The implementation of the 24 x 7 mainframe architecture will improve the availability of the verification portion of the ACA application by 25% compared to FY2014. On 11/1/2014, we implemented a release of the Affordable Care Act (ACA)-High Availability Project into production. This release established a new web service process between the Centers for Medicare and Medicaid Services (CMS) and the Social Security Administration (SSA) location in Durham, NC. The web service is used by CMS to receive SSN verifications, citizenship data, death data, and incarceration data at the SSA Durham Location, when the SSA Baltimore, Maryland facility is unavailable. CMS will use this data during the eligibility and enrollment to help determine if an individual qualifies for programs and benefits such as Advanced Premium Tax Credits, Cost Sharing Reductions, Medicaid, Children’s Health Insurance Program, and Basic Health

Plans. On 11/15/2014, the agency successfully processed ACA transactions at both the Baltimore and Durham data centers, around the clock without issue. This improved availability allows CMS to continue the ACA application process without interruption.

- **Providing Current Prisoner Information to Do Not Pay (DNP):** On 02/11/2015, SSA successfully transferred a Do Not Pay (DNP) “Gap” file to the Treasury’s Bureau of Fiscal Service (BFS). The Gap file contained an extraction of prisoner data from the Prisoner Update Processing System (PUPS) from 9/23/2014 through 2/6/2015 and contained 771,609 records. The agency previously sent an initial transfer of prisoner data to BFS on 9/24/2014.

Below is a list of our agency portfolios and their vision statements:

- **Administrative and Mission Support:** The Administrative and Missions Support portfolio aims to develop IT capabilities that support and enable core business functions across the agency. The investments in the Administrative and Missions Support portfolio will improve our responsiveness to the American public through enhancing our services and programs, modernizing our information technology, and building a model workforce.
- **Core Services:** The Core Services Portfolio will provide Innovative Quality Service to the public, Strengthen the Integrity of Our Programs, and Partner with Other Agencies and Organizations to Improve the Customer’s Experience and Align with the Administration’s One-Government Approach. We will transform the way we deliver service to the public and Enhance the Customer’s Experience by striving to Complete the Customer’s Business at the First Point of Contact. Core Services Portfolio investments will enhance and execute plans to modernize our legacy systems and streamline workloads for our frontline employees, maintain system performance, and Continuously Strengthen our Cyber Security Program and IT services.
- **Disability and Appeals:** The Disability and Appeals Process portfolio promotes efficient and effective IT systems that increase the quality, timeliness and consistency of disability decisions and services. These systems will facilitate the accurate collection, processing, and flow, of data and information that will allow our employees to provide quality service to disabled applicants and beneficiaries. The portfolio will help ensure we make the correct disability decision at the correct time, and apply disability policy and procedures consistently across all adjudicative levels.
- **IT Infrastructure:** The Infrastructure Portfolio provides us with the information technology stability and flexibility that we need in order to meet and sustain current operational requirements, adapt to changes in business operations, and plan for future growth and demand in our workloads.

Our reliance on information technology and electronic data continues to increase with each new workload and each new service delivery channel. The portfolio seeks to address the rising demands on our infrastructure by not only continuing to deliver high levels of end-to-end availability, stability, security and performance but also by instituting new and/or enhanced technologies to remain current with industry standards.

Through anticipation of the technology demands of our strategic objectives and investments, the portfolio strives to ensure a ready environment with each application delivery as well as improvements and enhancements to application portfolios.

- **IT Program Integrity:** The Program Integrity Portfolio supports SSA's goals to strengthen the integrity of the Social Security programs, deliver innovative quality services, and ensure reliable, secure and efficient Information Technology (IT) services. We seek to continually improve our comprehensive quality review and financial management programs in accordance with all laws and regulations. This includes accurately and timely paying benefits to our recipients and beneficiaries, detecting and preventing fraud wherever it may occur, and minimizing improper payments.

In January 2015, SSA introduced a chief technology officer to lead SSA's technology change, and balance change with service delivery reliability.

The agency currently manages 14 major OMB 300 exhibits. They are:

- Customer Engagement Tools (CET)
- Disability Case Processing System (DCPS)
- DDS Automation (DDSA)
- Earnings Redesign
- Electronic Services
- Financial Accounting System (FACTS)
- Infrastructure Operations and Maintenance (O&M)
- Infrastructure Modernization
- Intelligent Disability (iDib)
- IT Modernization
- National Support Center (NSC)
- Smart Claims
- SSI Modernization
- Title II

---

**INFORMATION TECHNOLOGY COSTS BY TYPE**

---

The following table satisfies SSA's requirement directed by the House Report.

**Table 3.22 — FY 2015 Information Technology Costs  
(Actual dollars)**

<b>ITS</b>	<b>Costs</b>
Maintenance & Lease	\$317,600,780
Contractor Support	\$503,997,154
Inter Agency Agreements	\$12,869,077
Software	\$44,656,327
Hardware	\$217,757,074
Telecommunications	\$244,532,887
<b>Total<sup>1</sup></b>	<b>\$1,341,413,299</b>

---

**DIGITAL SERVICES TEAM**

---

SSA is working with OMB to provide exceptional digital services. The success rate of government digital services improves when agencies have digital service experts on staff with modern design, software engineering, and product management skills. To ensure the agency can effectively build and deliver important digital services, the Budget includes \$5,500,000 for staffing costs to build a Digital Service team that will focus on transforming the agency's digital services with the greatest impact to citizens and businesses so they are easier to use and more cost-effective to build and maintain.

These digital service experts will bring private sector best practices into the disciplines of design, software engineering, and product management to maximize the agency's most important services. The positions will be term-limited, to encourage a continuous influx of up-to-date design and technology skills to the agency. The digital service experts will be recruited from among America's leading technology enterprises and startups, and will join with the agency's top technical and policy leaders to deliver meaningful and lasting improvements to the services the agency provides to citizens and businesses.

This digital service team will build on the success of the United States Digital Service team inside of OMB, created in 2014. Since launching, this small OMB team has collaborated with Federal agencies to implement cutting edge digital and technology practices on the nation's highest impact programs.

---

<sup>1</sup> Does not include personnel costs.

### SSA E-GOV CONTRIBUTIONS

SSA supports many E-Government initiatives. These initiatives serve citizens, businesses, and Federal employees by delivering high-quality services more efficiently and by providing services that might not otherwise be available. These initiatives are included in the agency's IT budget.

**Table 3.23 – SSA E-Gov Contributions (in thousands)<sup>1</sup>**

	<b>FY 2015 Actuals</b>	<b>FY 2016 Estimate</b>	<b>FY2017 Estimate</b>
Disaster Assistance Improvement Plan	\$56	\$56	\$56
E-Federal Health Architecture LoB	\$100	\$100	\$100
E-Rulemaking	\$17	\$24	\$34
Financial Management LoB	\$67	\$67	\$67
Geospatial LoB	\$25	\$25	\$25
GovBenefits.gov	\$209	\$381	\$378
Grants.gov	\$27	\$26	\$25
Grants Management LoB	\$345	\$353	\$400
Human Resources Management LoB	\$130	\$130	\$130
Integrated Acquisition Environment (IAE)	\$104	\$104	\$857
Budget Formulation LoB	\$55	\$55	\$55
<b>Total</b>	<b>\$1,135</b>	<b>\$1,321</b>	<b>\$2,127</b>

Social Security remains an active participant to the following E-Government initiatives:

**Disaster Assistance Improvement Plan** provides a unified point of access to disaster management-related information, mitigation, response, and recovery information.

**E-Federal Health Architecture Line of Business (LoB)** supports integration of the agency's health information systems into the emerging Nationwide Health Information Network (NHIN).

**E-Rulemaking** improves collaboration across government on regulatory matters and provides a central web-based environment for the public to review and comment on SSA regulatory actions while reducing administration costs.

**Financial Management LoB** reduces non-compliant systems by leveraging common standards and shared service solutions in Federal financial operations.

**Geospatial LoB** maximizes geospatial investments by leveraging resources and reducing redundancies. Offering a single point of access to map related data will allow SSA to improve mission delivery and increase service to citizens.

<sup>1</sup> In FY 2015 and FY 2016, funds were paid from LAE. In FY 2017, funds are paid in the IT budget.

**GovBenefits.gov** helps to promote awareness of SSA's benefit programs to the public, assisting SSA in its strategic goals of delivering citizen-centric world-class service and strengthening public understanding of Social Security programs.

**Grants.gov** provides a single, online portal and central storehouse of information on grant programs for all Federal grant applicants.

**Grants Management LoB** is developing solutions to standardize and streamline the grants management process government-wide. Grants Management LoB is pursuing a consortia based approach to share operations and maintenance costs, and development, modernization, and enhancement costs across agencies, decreasing the burden that any one grant-making agency must bear. Business processes, as available through consortium lead agencies, will decrease agency reliance on manual and paper-based grants processing.

**Human Resources Management LoB** provides common core functionality to support the strategic management of Human Capital government-wide.

**Integrated Acquisition Environment and IAE - Loans and Grants** create a secure environment to facilitate the acquisition of goods and services.

**Budget Formulation LoB** supports the Federal Government's effort to improve agency budgeting through collaboration and information sharing.

**Table 3.24 – Other SSA Expenses/Service Fees Related to E-Gov Projects (in thousands)**

	<b>FY 2015</b>	<b>FY 2016</b>	<b>FY 2017</b>
	<b>Actual</b>	<b>Estimate</b>	<b>Estimate</b>
Recruitment One-Stop	\$368.2	\$368.0	\$406.0
Enhanced Human Resource Integration	\$1,022.3	\$1,074.1	\$1,127.7
E-Payroll	\$16,510.1	\$16,727.2	\$16,867.1
E-Travel	\$772.2	\$850.0	\$850.0
<b>Total</b>	<b>\$18,672.8</b>	<b>\$19,019.3</b>	<b>\$19,250.8</b>

In addition to making annual contributions to the managing partners of certain E-Gov projects, SSA also funds various ongoing business services that are related to E-Gov projects. These funds are part of SSA's ongoing budget and pay for services provided by other agencies under authority of the Economy Act.

**Recruitment One-Stop** provides an online portal ([USAJobs](#)) through which citizens can easily search for employment opportunities throughout the Federal Government.

**Enhanced Human Resource Integration** initiative develops policies and tools to streamline and automate the electronic exchange of standardized human resource data needed for the creation of an official employee record across the Executive Branch.

**E-Payroll** standardizes and consolidates government wide Federal civilian payroll services and processes.

**E-Travel** provides a government wide standard set of world-class travel management services to consolidate Federal travel, minimize cost, and improve customer satisfaction.

## CYBERSECURITY

To address cyber threats, we collaborate with the White House National Security staff, the Federal Chief Information Officer, the Department of Homeland Security's (DHS) United States Computer Emergency Response Team, and various law enforcement agencies.

**Table 3.25 – Cybersecurity Costs (in millions)<sup>1</sup>**

	<b>FY 2017</b>
Detect, Analyze and Mitigate Intrusions	\$21.4
Protecting Networks and Information	\$41.9
Continuous Monitoring	\$22.7
Shaping the Cyber Environment	\$0.9
<b>Total</b>	<b>\$86.9</b>

Our cybersecurity program continues to evolve our detection, protection, and intelligence capabilities for strengthening the agency's defenses against evolving threats and cyber-attacks. Our program incorporates these security capabilities into a comprehensive, multi-layered defensive approach for ensuring the privacy of the American public and proper issuance of nearly a trillion dollars in benefits. For FY 2017, our cybersecurity program plans to focus on the following key areas.

1. **Detect, Analyze, and Mitigate intrusions** – For FY 2017, our budget is focused on improving our incident detection capabilities through the detection, analysis, and mitigation of risky user behavior.
  - **User Behavior Analysis Solution** – In FY 2017, SSA plans to evaluate and procure a User Behavior Analysis (UBA) solution that will improve the agency's ability to detect threats to SSA's network based on suspicious behavior. UBA solution determines risk behavior by analyzing information in several log repositories that regularly monitor computer, user, and network activities. UBA solution will assist the agency with detecting threats such as unusual network activities, and unauthorized user access activities. Finally, the UBA solution will assist the agency by assessing the risk associated with each detected anomalous behavior. UBA solution will accomplish this by providing customized risk scoring and risk thresholds in detected activity.

<sup>1</sup> Does not include non-IT cybersecurity related costs.

2. **Protecting Networks and Information** – For FY 2017, our agency continues to invest in protection of our networks and information through the enhancement of our agency’s internal network access control capabilities.
  - **Network Access Control (NAC)** – In FY 2017, SSA plans to further its internal network protection capabilities for detecting and protecting against unauthorized network devices, and strengthening agency devices by enforcing security compliance to existing agency standards. SSA plans to leverage funding through Department of Homeland Security (DHS) funding for continuous monitoring program development, but our agency plans to prioritize the development of network protections to meet our unique business needs.
3. **Continuous Monitoring** – Our agency continues to mature its continuous monitoring program capabilities by focusing on endpoint security for 2017.
  - **Desired State Software Solution** – In FY 2017, SSA plans to procure a desired state software solution for ensuring the integrity of our endpoints. The desired state solution will actively prevent against threats such as malicious software (e.g. viruses, worms, etc.), and from malicious and improper configuration changes. This desired state solution should actively prevent unauthorized software from installing or executing, and rollback any unauthorized security configuration changes.
4. **Shaping the Cybersecurity environment** – Our agency seeks to strengthen its own cybersecurity workforce by improving access to quality cybersecurity training.
  - **Cyber Training Academy Program – Cyber Academy** – In a continuing effort to evolve the agency’s Information Security Training Program, SSA plans to establish a Cyber Academy designed to meet the training needs of our diverse cybersecurity workforce. The Cyber Academy seeks to provide a broad curriculum of abilities, allowing them to fulfill their required security functions. In addition to enhancing specialized role-based security training for individuals with significant information security responsibilities, the Cyber Academy will provide a better alignment of security training courses with individual’s roles, consistent cybersecurity training throughout the agency, and ensure we support current Federal laws, policies and regulations.

## EMPLOYMENT

The following table provides a detailed view of the full-time equivalent employment levels.

**Table 3.26—Detail of Full-Time Equivalent Employment<sup>1,2</sup>**

	<b>FY 2015 Actual</b>	<b>FY 2016 Estimate</b>	<b>FY 2017 Estimate</b>
Limitation on Administrative Expenses Accounts	63,170	64,560	64,840
Reimbursable Work	224	300	300
	<b>63,394</b>	<b>64,860</b>	<b>66,140</b>

The following table lists the Average Grade and Salary for SSA employees for FY 2015. It includes averages for Executive Service (ES) and General Service (GS) employees.

**Table 3.27—Average Grade and Salary**

	<b>FY 2015 Actual</b>
Average ES Salary	<b>\$172,300</b>
Average GS/WG Grade	<b>11</b>
Average GS/WG Salary	<b>\$69,400</b>

<sup>1</sup> Includes all workyears funded by MIPPA and the Children's Health Insurance Program (CHIP) Reauthorization Act of 2009.

<sup>2</sup> Excludes workyears associated with Medicare Access and CHIP Reauthorization Act of 2015 funding.

The following table satisfies SSA's requirement directed by the House Report.

**Table 3.28 — FY 2015 Personnel Costs by Grade  
(Actual dollars – Table Continues on Next Page)**

<b>General Schedule (GS) Grade</b>	<b>Salaries</b>	<b>Benefits</b>	<b>Total</b>
GS – 1	\$54,865	\$6,171	\$61,036
GS – 2	\$200,828	\$48,209	\$249,037
GS – 3	\$892,208	\$211,359	\$1,103,567
GS – 4	\$10,193,278	\$3,231,083	\$13,424,362
GS – 5	\$114,857,461	\$36,801,767	\$151,659,228
GS – 6	\$88,363,250	\$28,915,018	\$117,278,268
GS – 7	\$171,713,244	\$55,670,791	\$227,384,035
GS – 8	\$507,098,815	\$177,746,920	\$684,845,735
GS – 9	\$318,079,680	\$102,174,938	\$420,254,618
GS – 10	\$31,486,157	\$9,089,048	\$40,575,205
GS – 11	\$1,196,574,979	\$384,972,165	\$1,581,547,143
GS – 12	\$1,055,771,146	\$315,315,140	\$1,371,086,287
GS – 13	\$752,503,392	\$223,406,915	\$975,910,307
GS – 14	\$344,780,854	\$97,887,417	\$442,668,272
GS – 15	\$109,122,817	\$28,851,212	\$137,974,029
<b>Subtotal GS Grades<sup>1</sup></b>	<b>\$4,701,692,976</b>	<b>\$1,464,328,153</b>	<b>\$6,166,021,129</b>
<b>Administrative Law Judge (ALJ)</b>	<b>\$232,875,700</b>	<b>\$63,610,135</b>	<b>\$296,485,835</b>
<b>Senior Executive Services (SES)</b>	<b>\$25,578,455</b>	<b>\$5,879,339</b>	<b>\$31,457,794</b>
<b>Grand Total<sup>2</sup></b>	<b>\$4,960,147,131</b>	<b>\$1,533,817,627</b>	<b>\$6,493,964,757</b>

<sup>1</sup> Includes \$48,213,193 for Reemployed Annuitant (RA) Personnel Costs.

<sup>2</sup> Does not include all payroll costs. Only includes GS Grades (including RAs), ALJs, and SES personnel costs requested in the report language.

**Table 3.29—Historical Staff-On-Duty by Major SSA Component<sup>1</sup>**

	<b>FY 2014 Actual</b>	<b>FY 2015 Actual</b>
Field Offices	29,682	29,400
Teleservice Centers	4,535	4,604
Processing Centers	10,674	10,521
Regional Offices	1,797	1,853
<b>Operations Subtotal<sup>1</sup></b>	<b>46,688</b>	<b>46,378</b>

Systems	3,177	3,197
Headquarters <sup>2</sup>	4,764	5,089
<b>SSA Total</b>	<b>65,102</b>	<b>65,696</b>

The following table satisfies SSA's requirement directed by the House Report.

**Table 3.30 — FY 2015 Personnel Costs by Region  
(Actual dollars)**

<b>Regions</b>	<b>Salaries</b>	<b>Benefits</b>	<b>Total</b>
Boston	\$161,911,411	\$50,157,666	\$212,069,077
New York	\$405,118,301	\$118,946,045	\$524,064,346
Philadelphia	\$470,256,210	\$145,397,961	\$615,654,171
Atlanta	\$797,700,116	\$257,084,761	\$1,054,784,877
Chicago	\$592,478,176	\$184,229,422	\$776,707,598
Dallas	\$427,743,457	\$141,023,761	\$568,767,217
Kansas City	\$235,379,130	\$76,383,728	\$311,762,858
Denver	\$92,201,634	\$29,722,486	\$121,924,120
San Francisco	\$569,974,312	\$177,595,803	\$747,570,114
Seattle	\$155,368,013	\$49,687,732	\$205,055,746
Headquarters	\$1,052,016,371	\$303,588,262	\$1,355,604,632
<b>Total<sup>3</sup></b>	<b>\$4,960,147,131</b>	<b>\$1,533,817,627</b>	<b>\$6,493,964,757</b>

<sup>1</sup> Includes full time, part time, and temporary employees.

<sup>2</sup> Headquarters includes counts for Operations Support Staff, Disability Case Processing System, Office of Appellate Operations, GSA Delegations, and the Social Security Advisory Board.

<sup>3</sup> Does not include all payroll costs. Only includes GS Grades (including RAs), ALJs, and SES personnel costs requested in the report language.

## PHYSICIANS' COMPARABILITY ALLOWANCE

Physicians' Comparability Allowance (PCA) permits agencies to provide allowances to certain eligible Federal physicians who enter into service agreements with their agencies to address recruitment and retention problems (5 U.S.C. 5948). The following worksheet provides details on usage of PCA within SSA from FY 2015-2017.

**Table 3.31—Physicians' Comparability Allowance Worksheet**

		PY 2015 (Actual)	CY 2016 (Estimates)	BY 2017 <sup>1</sup> (Estimates)
1) Number of Physicians Receiving PCAs		2	2	2
2) Number of Physicians with One-Year PCA Agreement		0	0	0
3) Number of Physicians with Multi-Year PCA Agreements		2	2	2
4) Average Annual PCA Physician Pay (without PCA payment)		158,700	158,700	158,700
5) Average Annual PCA Payment		30,000	30,000	30,000
6) Number of Physicians Receiving PCAs by Category (non-add)	Category I Clinical Position			
	Category II Research Position			
	Category III Occupational Health			
	Category IV-A Disability Evaluation			
	Category IV-B Health and Medical Admin.	2	2	2

Maximum annual PCA amount paid to each category of physician:

See tables 3.32 and 3.33 for the maximum annual PCA amount paid to each category of SSA physicians. The amounts shown on the tables have allowed us to successfully recruit and retain our medical officers.

Recruitment and retention problem(s) for each category of physician:

SSA has had no medical officer (MO) accessions and 1 MO separation in fiscal year 2015.

SSA continues to offer PCAs to our MOs in order to recruit and retain the highly specialized physicians that we need. MOs are critical to our mission as they possess specialized skills required to write, revise, update, and develop agency medical policy, including medical policy that is used for evaluating claims for disability benefits under the Social Security disability insurance program or payments under the Supplemental Security Income program.

The PCA helps to compensate for the decrease in salary that a physician accepts when becoming a civil servant. Our MOs accept a reduction in income under the General Schedule (GS) pay scale, which is capped at the GS 15/step 10.

Also, PCAs continue to be a point of importance among our MOs and are a key factor in our ability to retain our current MOs and recruit new ones. If we do not retain the PCA, our MOs may elect to find employment in other areas or agencies where PCAs are offered.

SSA must continue to offer PCAs in order to recruit new physician MOs and retain the ones we have as we compete for their services with other government agencies.

<sup>1</sup> FY 2017 data will be approved during the FY 2018 budget cycle.

Degree to which recruitment and retention problems were alleviated at SSA through the use of PCAs in the prior fiscal year:

SSA was able to retain its medical officers by continuing to offer PCAs.

## MAXIMUM PHYSICIAN'S COMPARABILITY ALLOWANCES

**Table 3.32 Maximum Physician's Comparability Allowances- 1-Year Contract**

CATEGORY	PHYSICIANS WITH 24 MONTHS OR LESS OF SERVICE			PHYSICIANS WITH MORE THAN 24 MONTHS OF SERVICE		
	GS-13	GS-14	GS-15/SES	GS-13	GS-14	GS-15/SES
1. Occupational Health	*	*	*	*	*	*
2a. Disability Evaluation	*	*	*	*	*	*
2b. Administration	\$8,000	\$9,000	\$10,000	\$12,000	\$18,000	\$24,000

**Table 3.33—Maximum Physician's Comparability Allowances - 2-Year Contract**

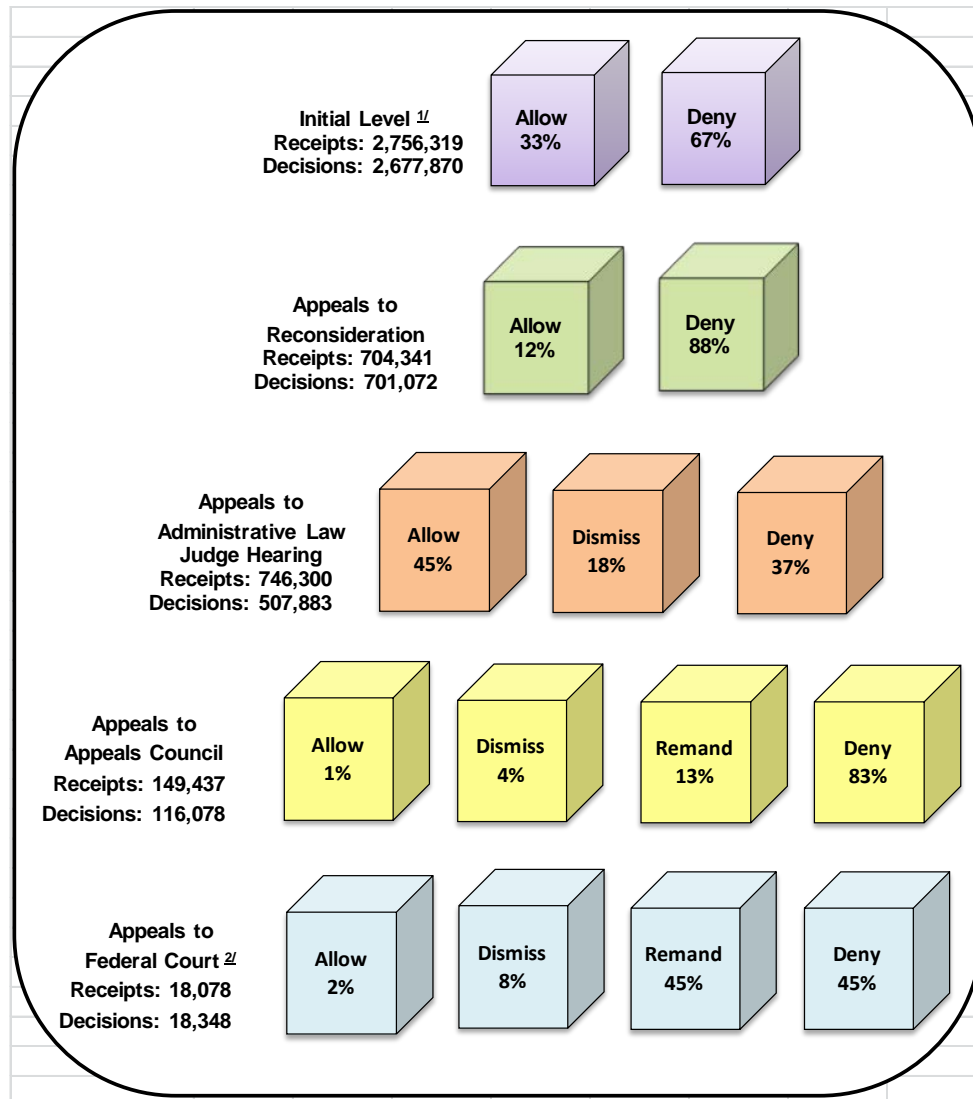

CATEGORY	PHYSICIANS WITH 24 MONTHS OR LESS OF SERVICE			PHYSICIANS WITH MORE THAN 24 MONTHS OF SERVICE		PHYSICIANS WITH MORE THAN 24 MONTHS BUT NOT MORE THAN 48 MONTHS OF SERVICE	PHYSICIANS WITH MORE THAN 48 MONTHS OF SERVICE
	GS-13	GS-14	GS-15/SES	GS-13	GS-14	GS-15/SES	GS-15/SES
1. Occupational Health	*	*	*	*	*	*	*
2a. Disability Evaluation	*	*	*	*	*	*	*
2b. Administration	\$12,000	\$13,000	\$14,000	\$18,000	\$24,000	\$27,000	\$30,000

\* SSA currently is not experiencing any recruitment or retention problems for the categories of Occupational Health and Disability Evaluation; therefore, no related maximum allowances have been established for these categories. Maximum allowances have been set for the category of Administration because the Commissioner has determined that there is a significant problem recruiting and retaining physicians for a few positions in this category in the Office of Disability Policy.

## FY 2015 DISABILITY WORKLOAD

The following table provides data on the FY 2015 disability claims and appeals workload.

**Table 3.34—FY 2015 Workload Data Disability Appeals\***

\*Includes Title II, Title XVI, and concurrent initial disability determinations and appeals decisions issued in FY 2015, regardless of the year in which the initial claim was filed, and regardless of whether the claimant ever received benefits (in a small number of cases with a favorable disability decision benefits are subsequently denied because the claimant does not meet other eligibility requirements.) Does not include claims where an eligibility determination was reached without a determination of disability. If a determination or appeals decision was made on Title II and Title XVI claims for the same person, the results are treated as one concurrent decision.

<sup>1/</sup> About 24% of initial level denials are issued in States that use the Disability Prototype process, which eliminates the reconsideration step of the appeals process. The first level of appeal for these cases is a hearing before an Administrative Law Judge.

<sup>2/</sup> Federal Court data includes appeals of Continuing Disability Reviews.

NOTE: Due to rounding, data may not always total 100%.

Prepared by: SSA, ODPMI (Office of Disability Program Management Information) January 14, 2014; Office of Budget, January 29, 2014  
Data Sources:

A) Initial and Reconsideration Data: SSA State Agency Operations Report

B) Administrative Law Judge and Appeals Council data: SSA Office of Disability Adjudication and Review (ODAR)

C) Federal Court data: SSA Office of General Counsel

## LEGISLATIVE PROPOSALS

1. **Use the Death Master File to Prevent Federal Improper Payments.** SSA receives about 2.5 million reports of death each year from many sources, such as family members, funeral homes, financial institutions, and the States. SSA is authorized to share all of the death information it maintains with Federal and State agencies that administer Federally-funded benefits, State agencies administering State-funded programs, and Federal and State agencies using the information for statistical and research activities. Currently, the Department of the Treasury's (Treasury) Do Not Pay Portal only receives a limited file, which excludes State death information. This proposal would increase the amount of death information available to Federal agencies for use in preventing improper payments by authorizing SSA to share all of the death information it maintains with Do Not Pay.
2. **Authorize SSA to Conduct a New Continuing Disability Review when Fraud Is Involved in a Prior Continuing Disability Review.** SSA is required to redetermine an individual's entitlement to disability benefits if there is reason to believe that fraud or similar fault were involved in the individual's application for benefits. During this redetermination, SSA must disregard any evidence where there is reason to believe that fraud or similar fault were involved in the providing of such evidence. This proposal would apply a similar requirement if SSA believes that fraud or similar fault were involved in a prior continuing disability review (CDR). This proposal would authorize SSA to conduct immediately a new CDR to determine continuing eligibility if there is reason to believe that fraud or similar fault was involved in a prior CDR. During this review, SSA would be authorized to disregard any evidence if there is reason to believe that fraud or similar fault was involved in the providing of such evidence.
3. **Authorize SSA to Use All Collection Tools to Recover Funds in Certain Scenarios, Such as When Someone Improperly Cashes a Beneficiary's Check or Removes a Benefit from a Joint Account.** Current law provides SSA only limited authority to recover certain incorrect payments that do not meet the statutory definition of an overpayment. Such incorrect payments include when someone improperly cashes a beneficiary's check or improperly removes benefit funds from a joint account after a beneficiary's death. For example, payments in excess of the amount due or paid after death are considered overpayments. Specifically, if a benefit payment of this nature is made to a joint account of the deceased worker and the other account holder is entitled to a spousal benefit, based on the deceased worker's record, it is considered an overpayment. However, if the other joint account holder is entitled to benefits on his/her

own record or not entitled to benefits, the improper payment is deemed an incorrect payment; a designation which limits SSA's recovery tools. The Budget proposes a consistent treatment, deeming them both as overpayments and subjecting them to the same broader range of collection procedures. This proposal would authorize SSA to use all of its overpayment collection tools, such as credit bureau reporting and administrative wage garnishment, to recover these incorrect payments.

4. **Allow SSA to Use Commercial Databases to Verify Real Property Data in the SSI Program.** This proposal would reduce improper payments by authorizing SSA to conduct data matches with private commercial databases that maintain data on ownership of real property (i.e., land and buildings), which can be a countable resource for SSI beneficiaries. The proposal would authorize SSA to use that information to automatically determine eligibility for benefits, after proper notification. Beneficiaries would be required to consent to allow SSA to access these databases as a condition of benefit receipt. All other current due process and appeal rights would be preserved.
5. **Increase from \$10 to 10 Percent the Minimum Amount SSA Can Withhold from a Monthly Old-Age, Survivors, and Disability Insurance Benefits to Recover an Overpayment.** When a beneficiary receives more Old-Age, Survivors, and Disability Insurance (OASDI) benefits than he or she should have, SSA can recover this overpayment by reducing the beneficiary's monthly benefit going forward. Depending on the beneficiary's financial circumstances, SSA may decide to recover less than the full amount of the monthly benefit until the overpayment is repaid in full. However, SSA is required to recover at least \$10 per month. This proposal would require SSA to recover at least 10 percent of the monthly OASDI benefit when recovering an overpayment. The SSI program already uses the 10 percent rule to recover overpayments.
6. **Exclude SSA Debts from Discharge in Bankruptcy.** Debts due to an overpayment of OASDI or SSI benefits, and certain Medicare-related debts that SSA also collects, are generally dischargeable in bankruptcy. This proposal would exclude such debts from discharge in bankruptcy, except when it would cause an undue hardship.
7. **Lower Electronic Wage Reporting Threshold to Five Employees.** SSA processes W-2 forms for Treasury. Currently, Treasury requires businesses that file 250 or more W-2s per calendar year to file electronically. This proposal would modify the Internal Revenue Code so that Treasury can require businesses that employ five or more employees to file electronically. This change would be phased-in over three years and would increase the efficiency and accuracy of this process, because electronic returns are completed more rapidly, and are generally more accurate, than scanned or keyed returns.

8. **Move from Annual to Quarterly Wage Reporting.** Employers report wages annually to SSA. However, from 1939 to 1977, SSA received wage reports on a quarterly basis. Increasing the frequency of wage reporting could enhance tax administration. More frequent reporting would also facilitate implementation of automated enrollment of employees in existing workplace pensions and be the foundation for the creation of a system of automatic workplace retirement accounts for workers who do not currently have access to a retirement plan. Furthermore, more frequent reporting may improve program integrity by providing timelier wage data for use by Federal, income-tested programs. This proposal would restructure the Federal wage reporting process by requiring employers to report wages on a quarterly basis<sup>1</sup>.
9. **Modify the treatment of certain debt referrals to the Treasury Offset Program:** The Budget proposal has two parts. First, the proposal would forgive a limited group of older debts that would have been impacted by implementation of the Food, Conservation, and Energy Act of 2008 provision (section 14219 of Public Law 110-246), which eliminated the prior 10-year statute of limitations for collection of legally enforceable, non-tax debts through TOP. This group includes debts from both former childhood beneficiaries and others. For similar debts that would not have been immediately impacted by the implementation of the regulation, SSA will continue to consider forgiveness on a case-by-case basis using its existing administrative authority. Second, going forward SSA will only be able to refer debts for former childhood beneficiaries to TOP if SSA has initiated collections within 10 years of an overpayment being incurred. This is intended to ensure that individuals are not surprised by a TOP collection that occurs years after a debt was incurred when individuals may have difficulty remembering the circumstances of the error.

The Budget proposals ensure that the Administration maintains its commitment to reducing improper payments, while preventing former debtors from being surprised by the abrupt seizure of their tax refunds, sometimes decades after the original overpayments were made. While Congress considers the legislative proposals, SSA will begin the gradual process of restarting TOP referrals for those debts not impacted by the Administration's proposals.<sup>2</sup>

10. **Strengthening Child Support Enforcement and Establishment.** SSA reduces a child's monthly SSI benefit by up to two thirds of any monthly child support payment he or she also receives. The President's Budget includes several proposals aimed at increasing and improving child support collections and program efficiency. By

---

<sup>1</sup> This proposal would have no effect on the reporting of self-employment income.

<sup>2</sup> The budget assumes the proposal costs \$50 million over 10 years. The Office of the Chief actuary is working on a detailed estimate of this proposal.

increasing the amount of child support collected, these proposals would result in savings to the SSI program.

## **Improve Efficiency**

11. **Improve Collection of Pension Information and Transition after ten years to an Alternative Approach based on Years of Non-Covered Earnings.** Current law requires SSA to reduce OASDI benefits when someone also receives a pension based on work that was not covered by Social Security. SSA currently has a matching agreement with the Office of Personnel Management (OPM) to obtain information on Federal government retirees who receive a pension from work not covered by Social Security. However, SSA generally lacks a way to receive similar information from State and local governments. As a result, many of these pensions go unreported, leading to improper payments. The Budget re-proposes legislation that would improve reporting for non-covered pensions by including up to \$70 million for administrative expenses, \$50 million of which would be available to the States, to develop a mechanism so that the Social Security Administration could enforce the offsets for the Windfall Elimination Provision (WEP) and Government Pension Offset (GPO). This proposal would require State and local government pension payers to report information on pensions paid for non-covered work to SSA through an automated data exchange. In addition, the Budget proposes to transition after ten years to an alternative approach, which would adjust Social Security benefits based on the extent to which workers have non-covered earnings. SSA now collects data on non-covered employment and could calculate the offset without any disclosure from the individual.
12. **Establish Workers' Compensation Information Reporting.** Current law requires SSA to reduce an individual's Disability Insurance (DI) or SSI benefit if he or she receives workers' compensation (WC) or public disability benefits (PDB). SSA currently relies upon beneficiaries to report when they receive these benefits. This proposal would improve efficiency and program integrity by requiring States, local governments, and private insurers that administer WC and PDB to provide this information to SSA. Furthermore, this proposal would also provide for the development and implementation of a system to collect this information from States, local governments, and insurers.
13. **Eliminate Dedicated Accounts.** Under current law, if the retroactive SSI benefits due a child exceed six times the maximum monthly SSI benefit, plus any optional State SSI supplement, then SSA must deposit the benefits into a special account, called a "dedicated account." The child's representative payee—who is typically a parent—can expend funds from such an account only for education, health care, and certain other expenses. These restrictions are often considered intrusive and confusing, and oversight

of these accounts is labor-intensive for both SSA and representative payees. This proposal would eliminate dedicated accounts.

14. **Provide Mandatory Funding Dedicated to Modernizing SSA's Information Technology.** This proposal would provide SSA with \$240 million in mandatory funding over fiscal years 2018, 2019, and 2020 dedicated to modernizing SSA's information technology (IT), specifically its core databases, programming languages, and IT infrastructure. These systems are becoming antiquated, and the staff experienced in maintaining these systems are approaching retirement and are difficult to replace. SSA would use the proposed funds to invest in complex, multi-year IT projects necessary to update these systems in accordance with modern design principles.

### **Improve Benefits and Promote Work Opportunity**

15. **Extend SSI Time Limits for Qualified Refugees.** Refugees and certain other humanitarian immigrants who are disabled or elderly are potentially eligible for SSI benefits for up to seven years from the date they attained their immigration status, and without time limit if they become naturalized. Congress acknowledged that humanitarian immigrants might be unable to attain citizenship within the seven-year period of SSI eligibility, even if they apply for naturalization as soon as they are eligible. Accordingly, Congress temporarily extended the time-limited SSI eligibility period from seven years to nine years for fiscal years 2009-2011. However, effective October 2011, the SSI eligibility period for refugees and other humanitarian immigrants reverted to seven years. This proposal would underscore the nation's commitment to refugees, asylees, and other humanitarian immigrants—who come to America with very little and frequently have nowhere else to go—by again extending the time limit from seven to nine years during fiscal years 2017 and 2018.
16. **Conform Treatment of State and Local Government Earned Income Tax Credits and Child Tax Credits for SSI.** When determining someone's eligibility for, and benefit amounts under, the SSI program, SSA excludes Federal earned income tax credits (EITC) and child tax credits (CTC). However, the law requires SSA to count State EITCs and CTCs for SSI purposes. This proposal would simplify administration of the SSI program by excluding State EITCs and CTCs, in the manner in which similar, Federal tax payments are excluded.
17. **Terminate Step Child Benefits in the Same Month as His or Her Parent's Benefits Terminate.** A parent and stepchild may receive benefits on the record of a worker, but if the marriage terminates by divorce, they are no longer eligible for benefits. When a stepchild's parent is divorced, spousal benefits terminate in the month before the month of the final divorce. However, benefits for the stepchild terminate one month later, in the month of the final divorce. This proposal would fix this discrepancy by ending

benefits for the stepchild in the same month as the parent, in the month before the final divorce.

18. **Create an Interagency Coordinating Council on Workforce Attachment.** This proposal would create and fully fund an interagency council comprising Federal agencies involved in improving the well-being of people with health impairments and disabilities, including the Office of Management and Budget; the Departments of Education, Health and Human Services, Labor, and the Treasury; and the Social Security Administration. The council's mission would be to improve workforce attachment for people with health impairments and disabilities, and its duties would include developing and maintaining a strategic plan to improve work outcomes, evaluating and recommending improvements to Federal programs, designing and overseeing demonstration projects, and improving interagency coordination.

**APPROPRIATION LANGUAGE**

For expenses necessary for the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978, [\$29,787,000] \$31,000,000, together with not to exceed [75,713,000] \$81,000,000, to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund.

In addition, an amount not to exceed 3 percent of the total provided in this appropriation may be transferred from the “Limitation on Administrative Expenses,” Social Security Administration, to be merged with this account, to be available for the time and purposes for which this account is available: *Provided*, That notice of such transfers shall be transmitted promptly to the Committees on Appropriations of the House of Representatives and the Senate at least 15 days in advance of any transfer. (*Departments of Labor, Health, and Human Services, and Education, and Related Agencies Appropriations Act, 2016*).

## GENERAL STATEMENT

### OVERVIEW

---

The FY 2017 President's Budget for the SSA Office of the Inspector General (OIG) is \$112,000,000 in total budget authority and 560 FTE. This is \$6,500,000 above the funding received from the Consolidated Appropriations Act, 2016 (P.L. 114-113).

The FY 2017 budget request will support spending at an operating level that will allow our auditors and investigators to meet their productivity goals. The budget request will provide funding for a 560 FTE staffing level, the President's proposed pay raise, payroll increases (e.g., within-grade increases, scheduled promotions, health benefits, etc.), and other related support costs.

OIG employees on duty have dropped from 610 in FY 2006 to 526 at the end of FY 2015, a decrease of 84 employees. Our current budget request assumes OIG will add additional staff in support Cooperative Disability Investigations (CDI) unit expansion, and provides ongoing support for the major initiatives already in place. OIG will continue to meet its homeland security responsibilities through audit and investigative activities that focus on strengthening the enumeration process and combating SSN misuse.

This FY 2017 budget includes \$727,000 for training, which satisfies all FY 2017 training requirements for OIG. OIG will contribute to the Council of the Inspectors General on Integrity and Efficiency (CIGIE) in FY 2017, and \$253,000 has been requested for that purpose.

Table 4.1—Justification

## ONGOING INITIATIVES

---

### Computer Forensic Cyber-Related Investigations

Our *Digital Forensics Team* (DFT) provides forensic support to investigations involving at least one computer, network, electronic data storage, communication, mobile device or other form of digital media; as well as the collection, examination, analysis and reporting of the data acquired. The DFT provides much needed forensic assistance to the field in support of ongoing investigations. In FY 2015, the DFT implemented the initial infrastructure of a “private cloud” based forensics network that will allow the DFT to be at the forefront of digital forensics and provide an overall better solution for the OIG. This infrastructure allows the DFT to maintain a secure central repository for all forensic evidence and DFT case work. Furthermore, it provides an isolated network in support of the newly formed *Intelligence and Analysis Division* (IAD). Moving forward, the DFT will need additional funds to maintain, secure and expand the forensic network to meet the growing demands as they relate to the ever evolving cyber-crime movement. Additional funds will also allow the DFT to increase its infrastructure and data storage capabilities. Data storage is vital to a computer forensics program so we can provide adequate support as components request it.

In addition to traditional forensic services, the DFT works hand-in-hand with SSA to protect SSA’s network and Personally Identifiable Information (PII). With the issuance of *National Security Presidential Directive 54* and the emphasis placed on the *Government’s Trusted Internet Connection* initiative, protecting government networks has become a priority. There has been an increase in cyber based attacks on networks, to include government maintained electronic data; therefore, the potential for computer-based fraud against SSA systems and programs is growing exponentially. Techniques used to compromise computer systems are on the rise nationally, as computer crimes become more prevalent. To be effective, we must keep pace with technological advances. Our FY 2017 budget request includes funds to provide our computer forensic investigators with the equipment, training, and software needed to combat computer crimes.

DFT personnel received basic network intrusion training in FY 2013. In FY 2017, DFT will receive additional skills training. FY 2017 funding will allow DFT to adequately staff the *Computer Security Incident Response Team* and for members to attend additional cyber training, better preparing them to handle cyber-attack situations. It is the goal of the DFT to become

well trained in this area to keep the investigations in-house and protect the PII held within SSA's network.

### **Cooperative Disability Investigations**

The Cooperative Disability Investigations (CDI) Program is a key SSA anti-fraud initiative that plays a vital role in combating fraud, similar fault, and abuse within SSA's disability programs. CDI units, consisting of personnel from SSA, OIG, State disability determination agencies, and local law enforcement investigate initial disability claims and post-entitlement events involving suspected fraud. CDI units investigate claimants as well as third parties who are potentially facilitating disability fraud.

CDI investigations help SSA:

- prevent claimants who do not meet eligibility requirements from receiving benefits;
- terminate the benefits of those who have concealed medical improvement or failed to disclose substantial gainful activity; or
- revisit administrative determinations of claimants who may never have been eligible for benefits.

In FY 2015, the program consisted of 36 units covering 31 states and the Commonwealth of Puerto Rico. We will continue to expand this program in FY 2016 and FY 2017. The *Bipartisan Budget Act of 2015* requires SSA to expand the CDI program to cover all States and Territories no later than October 1, 2022. This requirement will be subject to the availability of funding and participation of local law enforcement agencies. During FY 2016, the CDI Program operated 38 units in 32 states, the District of Columbia, and Puerto Rico. As the CDI program expands, we will add OIG staff to support the CDI mission both in the field and at headquarters, and to replace those resources shifted away from our other investigative priorities.

### **Allegation Management and Fugitive Enforcement**

The Allegation Management and Fugitive Enforcement Division (AMFED) is responsible for receiving, analyzing, and referring allegations of fraud, waste, and abuse in Social Security programs and operations. AMFED is also responsible for managing the fugitive warrant verification and referral process for Social Security's fugitive enforcement operations.

In FY 2015, these processes contributed significantly to the mission of OIG and SSA. AMFED received 89,801 allegations. Through the development of referred allegations, SSA identified \$3,029,573 in benefit overpayments. AMFED matched 160,375 fugitive subjects from incoming Federal, State, and local warrant files and referred them to law enforcement for apprehension and warrant verification. AMFED referred 1,646 fugitive subjects for benefit suspension. Through these data-sharing efforts, law enforcement report that 442 fugitives were apprehended.

## Civil Monetary Penalty Program

Section 701 of the Bipartisan Budget Act of 2015, PL 114-74 (BBA of 2015) amended the Federal Civil Penalties Inflation Adjustment Act of 1990 (the Inflation Adjustment Act) (Public Law 104-410), to improve the effectiveness of civil monetary penalties and to maintain their deterrent effect. The provision requires agencies to: (1) adjust the level of civil monetary penalties with an initial “catch-up” adjustment through an interim final rulemaking; and (2) make subsequent annual adjustments for inflation. Inflation adjustments will be based on the percent change in the Consumer Price Index for all Urban Consumers (CPI-U) for the month of October preceding the date of the adjustment, relative to the October CPI-U in the year of the previous adjustment. The law requires agencies to publish interim final rules with the initial penalty adjustment amounts by July 1, 2016, and the new penalty levels must take effect no later than August 1, 2016. Penalties under the Social Security Act, which were previously excluded by a 1996 amendment to the Inflation Adjustment Act, are now subject to the catch-up and annual inflation increases. SSA penalty levels updated pursuant to section 701 of the BBA of 2015 will apply for 2016 and be subject to annual increase as will all other penalties subject to the Inflation Adjustment Act as amended in 2015.

We continue our emphasis on enforcing Section 1129 of the *Social Security Act*, which authorizes Civil Monetary Penalties (CMPs) against those who make false statements or representations in connection with obtaining or retaining payments under Titles II, VIII, or XVI of the *Social Security Act*. We can also penalize representative payees for wrongful conversion of payments and penalize individuals who knowingly withhold a material fact from SSA. After consultation with the Department of Justice, we are authorized to impose penalties of up to \$5,000 for each false statement, representation, conversion, or omission. A person may also be subject to an assessment, in lieu of damages, of up to *twice* the amount of any resulting overpayment. In addition to providing for an initial catch up adjustment for all CMPs imposed under section 1129 of the *Social Security Act*, the BBA of 2015, amended section 1129 to specifically increase the maximum CMP that may be imposed against an individual who violates their position of trust with an applicant for Social Security benefits from up to \$5,000 to up to \$7,500. A person is considered to be in a position of trust if they receive a fee or other income with respect to benefits under the *Social Security Act*, including a claimant representative, translator, or current or former SSA employee or who is a physician or other health care provider who submits, or causes the submission of, medical or other evidence in connection with an application for benefits.

Our CMP authority allows us to recover fraud losses from those responsible, when prosecutors decline to pursue OIG investigations for criminal prosecution. Many times, our investigations of individuals result in fraud losses below financial thresholds set by U.S. Attorneys’ offices. The Section 1129 program is an effective supplemental tool to prevent and deter fraud, and recover fraud losses, thereby strengthening public trust in the agency. Thus, we remain committed to aggressive enforcement, and we are committed to increasing the number of cases we resolve each year. Thus, we anticipate the number of hearing requests to increase. The increase in Section 1129 cases going to hearings before administrative law judges will likely require additional attorney travel. Also, using authority delegated by the Commissioner of Social Security, we aggressively enforce Section 1140 of the Social Security Act. Section 1140, the consumer protection prong of the agency’s civil monetary penalty program, prohibits people or

companies from misleading consumers by giving the false impression that they are associated with, or endorsed by, SSA when they advertise, solicit services, or otherwise communicate with the public. These communications can take many forms, including mailed or televised advertisements, Internet sites, social media accounts, and mobile applications. Section 1140 also prohibits the reproduction and sale of Social Security publications and forms without authorization. We can impose CMPs of up to \$5,000 for each violation and \$25,000 for each violative broadcast/telecast aired. We continually explore outreach opportunities to educate the public on how to recognize and avoid scams, and we welcome the opportunity to work with companies to develop innovative approaches to combat Section 1140 violations.

---

## SSA'S SIGNIFICANT MANAGEMENT ISSUES

---

OIG annually identifies the most significant management issues facing SSA based on congressional mandates and its audit and investigative work. These issues are:

1. Reduce the Hearings Backlog and Prevent its Recurrence
2. Improve the Timeliness and Quality of the Disability Process
3. Reduce Improper Payments and Increase Overpayments Recoveries
4. Improve Customer Service
5. Invest in Information Technology Infrastructure to Support Current and Future Workloads
6. Strengthen the Integrity and Protection of the Social Security Number
7. Strengthen Planning, Transparency, and Accountability

A summary of each management issue is discussed below:

### **Issue #1: Reduce the Hearings Backlog and Prevent its Recurrence**

While SSA continues focusing on the quality and consistency of hearing decisions, it is facing worsening average processing times and increasing pending hearings.

One part of the disability program, the hearings process, has experienced worsening timeliness and growing backlogs. For instance, the average processing time for a hearing increased from 426 days in FY 2010 to 480 days in FY 2015. In addition, the number of pending hearings grew from about 705,000 cases at the end of FY 2010 to over 1 million cases at the end of FY 2015.

In a September 2015 report on the hearings backlog, we stated SSA had not published a long term, multi-year strategy to address the growing backlog and worsening timeliness; however, SSA had begun implementing 35 initiatives to address these issues. In a separate September report on hearing office average processing times, we discussed large variances in timeliness among hearing offices. For instance, the Miami Hearing Office had an average processing time that was 300 days longer than the average processing time in the Orange, California Hearing Office.

Four factors contributed to the increase in the number of pending claims: (1) an increase in the number of hearing requests, (2) a decrease in the number of available administrative law judges (ALJ), (3) a decrease in ALJ productivity, and (4) a decrease in senior attorney adjudicator

decisions. SSA received about 600,000 hearing requests in FY 2008, over 800,000 hearing requests in each of FYs 2011 through 2014, and about 746,000 hearing requests in FY 2015. Between FYs 2012 and 2015, the number of available ALJs declined about 5 percent. ALJ productivity declined approximately 13 percent between FYs 2012 and 2015. Increased Agency emphasis on decisional quality has led to ALJs spending more time on cases. The Agency has also reduced the number of senior attorney adjudicator decisions due to quality concerns.

## **Issue #2: Improve the Timeliness and Quality of the Disability Process**

SSA needs to address receipt of millions of initial disability and reconsideration claims and backlogs of initial disability claims and continuing disability reviews (CDR), while also protecting its disability programs from fraud and encouraging beneficiaries to return to work.

**Disability Claims Backlog:** SSA completed over 2.8 million initial and 757,000 reconsideration disability claims in FY 2014 and more than 2.75 million initial and 723,000 reconsideration claims in FY 2015. While initial claims have declined in recent years, SSA had over 621,000 initial disability claims pending at the end of FY 2015. Similarly, SSA expects to have approximately 733,000 initial disability claims pending at the end of FY 2016.

**CDR Backlog:** According to SSA, at the end of FY 2015, there was a backlog of more than 726,000 full medical CDRs, down from over 906,000 cases backlogged at the end of FY 2014. As we stated in our August 2014 report on *The Social Security Administration's Completion of Program Integrity Workloads*, SSA had a backlog because it had not completed all full medical CDRs when they became due. Although SSA increased the number of full medical CDRs completed in recent years, it was still lower than needed to eliminate the backlog. As a result, SSA missed potential savings. Had SSA conducted full medical CDRs at historic levels, we estimated it would have identified billions of dollars in additional Federal benefit savings.

**Disability Fraud:** High-profile fraud schemes in New York, Puerto Rico, and West Virginia highlighted how vulnerable SSA's disability programs are to fraud. In New York, criminal facilitators conspired with disability applicants to feign disabilities and submit disability applications with fabricated and/or exaggerated ailments, which led to many individuals receiving disability benefits to which they were not eligible. Similarly, in Puerto Rico, third-party facilitators conspired with claimants to submit medical documentation that fabricated or exaggerated disabilities. In addition, it was alleged that an ALJ in Huntington, West Virginia, conspired with an attorney to grant favorable decisions to disability claimants who were potentially ineligible for benefits.

The fraud schemes revealed that numerous individuals, with the assistance of the same attorney, claimant representative, or other facilitator, could apply for disability benefits, allege similar physical and/or mental impairments, provide similar fabricated or exaggerated medical documentation certified by a common physician or medical facility, and receive disability benefits. These cases highlighted SSA's lack of the information technology (IT) infrastructure and front-end analytical tools necessary to screen applications for "potential fraud warnings" and review or investigate further before approving. For example, SSA was not systematically flagging a string of disability claims from applicants in the same geographic area with a common

claimant representative and similar alleged disabilities. Watchful SSA and Disability Determination Services (DDS) employees caught the patterns in the fraudulent claims in New York and Puerto Rico, but not before the Agency approved those claims and made millions of dollars in payments to the beneficiaries.

**Return to Work:** Historically, about one-half of 1 percent of disabled beneficiaries leave the rolls annually because of a return to work. *The Ticket to Work and Self Sufficiency Program* was created to assist beneficiaries return to work. However, an evaluation of the program concluded that, “. . . rigorous impact analysis failed to provide strong evidence of its impact on employment.” The Ticket program’s lack of strong evidence of improved employment outcomes among beneficiaries, is representative of the various other return to work demonstration projects and programs. As a result, the Agency needs to continue exploring policies that reduce administrative barriers for beneficiaries to return to work, simplify existing work incentives and create new opportunities to facilitate beneficiaries return to work efforts. Furthermore, according to SSA, when medical CDRs result in beneficiaries losing eligibility for SSDI, approximately 20 percent of these individuals return to SSDI within 8 years of the cessation determination.

### **Issue #3: Reduce Improper Payments and Increase Overpayment Recoveries**

SSA is one of several Federal agencies that have a high amount of improper payments. In FY 2014, the last fiscal year for which data was available, SSA reported about \$9.8 billion in over- or underpayments and incurred an administrative cost of \$0.07 for every overpayment dollar it collected. Further, SSA needs to adhere to the requirements in *Executive Order 13520, Reducing Improper Payments and Eliminating Waste in Federal Programs, the Improper Payments Elimination and Recovery Act of 2010* (IPERA) (Pub. L. No. 111-204), and the *Improper Payments Elimination and Recovery Improvement Act of 2012* (IPERIA) (Pub. L. No. 112-248).

**Improper Payment Rates:** Workers, employers, and taxpayers who fund SSA’s programs deserve to have their tax dollars effectively managed. As a result, SSA must be a responsible steward of the funds entrusted to its care and minimize the risk of making improper payments. SSA strives to balance its service commitments to the public with its stewardship responsibilities. However, given the size and complexity of the programs the Agency administers, some payment errors will occur.

For example, according to SSA, in FY 2014,

- The Old-Age, Survivors, and Disability Insurance (OASDI) overpayment error was \$4.6 billion or 0.5 percent of program outlays, and the underpayment error was \$472 million or 0.05 percent of program outlays; and
- The SSI overpayment error was \$3.9 billion or 7 percent of program outlays, and the underpayment error was \$840 million or 1.5 percent of program outlays.

For FYs 2015 through 2017, SSA’s goal was to maintain OASDI payment accuracy at 99.8 percent for both over- and underpayments; and for SSI, the Agency’s goal was to achieve

over- and underpayment accuracy rates of 95 and 98.8 percent, respectively. The Agency only met one of its payment accuracy targets in the last 5 years

**Executive Order 13520, Improper Payments Elimination and Recovery Act (IPERA), and Improper Payments Elimination and Recovery Improvement Act (IPERIA):** In November 2009, the President issued Executive Order 13520 on reducing improper payments. IPERA and IPERIA were enacted in July 2010 and January 2013, respectively, to refine steps agencies should take to address improper payments. As a result, all agencies with high-risk programs—those with significant improper payments—are required to intensify their efforts to eliminate payment errors. The Office of Management and Budget designated SSA’s programs as high-risk.

**Overpayment Recoveries:** Once SSA determines an individual has been overpaid, it attempts to recover the overpayment. According to SSA, in FY 2015, it recovered \$3.4 billion in overpayments at an administrative cost of \$0.07 for every dollar collected and ended the fiscal year with an uncollected overpayment balance of \$18.5 billion.

#### **Issue #4: Improve Customer Service**

SSA faces several challenges, such as increasing workloads and representative payee oversight, as it pursues its mission to deliver services that meet the public’s changing needs.

**Increased Workload with Reduced Staff:** SSA stated that the population aged 65 and older will grow by more than 18 million from 2015 to 2025, and an additional 8 million by 2030, thereby dramatically increasing the demand for its services. In FY 2015, SSA received approximately 5 million retirement, survivors, and Medicare applications; completed 2.7 million initial disability claims; and completed over 663,000 requests for hearings.

In addition to these workloads, in FY 2015, SSA

- completed 723,000 reconsiderations and 150,000 Appeals Council requests for review;
- issued over 16 million new and replacement Social Security number (SSN) cards;
- posted over 275 million earnings items to workers’ records;
- handled nearly 37 million calls to its national 800-Number;
- assisted 41 million visitors in field offices; and
- mailed nearly 350 million notices.

SSA faces a challenge of losing its institutional knowledge because of steady losses of employees through retirement. As of August 2015, approximately 16 percent of SSA employees was eligible for retirement. SSA estimates that 28 percent of its permanent employees will be eligible to retire by 2020, and their retirement could result in various mission-critical skills gaps.

In its February 2015 High-Risk Series report, the Government Accountability Office noted that agencies had taken important steps to better position the Government to close current and emerging critical skills gaps, but agencies will need to implement specific strategies and evaluate their results to demonstrate progress on addressing critical skill gaps. SSA recognizes that identifying and reducing skill gaps at all organizational levels are important to the Agency. SSA developed a long-term vision, expanded the use of online services, improved telephone services, and continued video services expansion during FY 2015. In April 2015, SSA released its Vision 2025 publication, which states where SSA would like to be in 10 years with its workforce, technology, and customer service. Vision 2025 identifies three priorities: a superior customer experience, exceptional employees, and an innovative organization to guide its service delivery efforts today and in the future. SSA has developed milestones in its revised FY 2014 – 2018 Agency Strategic Plan that support Vision 2025 goals.

**Customer Service Expectations:** The dramatic increase in mobile and broadband Internet access is driving public expectation for instantaneous service through multiple delivery channels. Rapid advances in technology introduce new opportunities for service delivery as well as requiring that SSA remain vigilant about potential security and fraud vulnerabilities. Furthermore, customers who seek benefits from SSA also interact with other agencies and private organizations. SSA acknowledges it could improve its customer service through partnerships with these organizations to learn from each other, share data, and develop processes that help customers access services more quickly and easily.

**Representative Payment Program:** SSA appoints representative payees to manage the benefits of incapable beneficiaries and recipients because of their age or mental or physical impairment. SSA acknowledges that representative payees play a significant role in many beneficiaries' lives, and it consistently explores ways to better identify, screen, and appoint representative payees. In January 2015, SSA reported that approximately 6 million representative payees were managing about \$76.8 billion in payments for 8.7 million beneficiaries and recipients. SSA continues finding problems with representative payees who improperly use and account for beneficiaries' payments during their reviews. Likewise, our audits continue to find problems with SSA's *Representative Payment Program*. Our January 2016 report, Volume Individual Representative Payees, summarized previous volume individual payee review findings. Of significance, our reviews noted several payees with prior financial liens and judgments or bankruptcy filings of which SSA had not previously been aware. We also identified several recurring findings, including representative payees collecting unallowable and/or excessive fees. We made two recommendations that SSA enhance its continuous monitoring program to help identify the issues consistently found by the Office of the Inspector General in its audits of high-volume individual representative payees.

## **Issue #5: Invest in IT Infrastructure to Support Current and Future Workloads**

Federal agencies must ensure they wisely invest their scarce resources. SSA faces the challenge of determining how best to use technology to accomplish its mission within its budget and resource constraints, while ensuring its information systems are secure and sensitive data are protected.

**Cyber-security:** Federal information systems—and the information they hold—are increasingly becoming targets of cyber-attacks. Recent breaches at several Federal agencies have underscored the importance of securing Federal systems and protecting sensitive information. The information SSA houses on nearly every U.S. citizen is invaluable to would-be hackers and potential identity thieves. Consequently, the Agency’s information systems may be at particular risk of attack. Given the highly sensitive nature of the personal information in its systems, it is imperative that SSA have a robust information security program.

Our prior audit and investigative work has revealed a number of concerns with the security of SSA’s information systems. Since FY 2012, auditors have concluded that the risk and severity of SSA’s information security weaknesses identified constituted a significant deficiency under the *Federal Information Security Management Act of 2002* (Pub. L. No. 107-347). Those security deficiencies, when aggregated, created a weakness in SSA’s overall information systems security program that the auditors concluded significantly compromised the security of the Agency’s information and information systems. Additionally, other recent audits and evaluations have identified serious concerns with SSA’s information security program.

To address ever-increasing security challenges, it is crucial that SSA implement a well-designed, continuous monitoring strategy to monitor and assess security controls. SSA has issued its *Continuous Monitoring Strategy* but is still implementing it. The Office of Management and Budget and National Institute of Standards and Technology require near real-time, continuous monitoring for risk management and risk-based decision-making.

**IT Physical Infrastructure:** One of SSA’s major IT investments in recent years has been replacing its existing National Computer Center (NCC). The NCC has been in continuous operation as a data center since it opened in 1980 and, while its computing capacity has been expanded over the years, increasing workloads and expanding telecommunication services severely strained its ability to support the Agency’s business. SSA received \$500 million from the *American Recovery and Reinvestment Act* to replace the NCC with a new National Support Center (NSC). SSA must diligently monitor migration activities to ensure a successful transition from the NCC to the new NSC.

**Development and Implementation of Secure Electronic Services:** According to SSA, in FY 2015, the Agency’s field offices saw about 41 million visitors, and it handled over 37 million calls to its national 800-number. To support its increasing workloads, SSA has developed and implemented over 30 electronic services to the public, businesses, and other government agencies. With these expanded services, SSA reported it processed more than 85 million transactions online in FY 2015.

While expanding its inventory of electronic services, the Agency needs to ensure those services are secure. Prior investigative and audit work have identified multiple incidents of fraud committed through SSA’s electronic services.

**Implementation of Major IT Projects:** SSA faces challenges in executing and implementing major IT projects and delivering expected functions on-schedule and within budget.

To simplify system support and maintenance, improve the speed and quality of the disability process, and reduce the overall growth rate of infrastructure costs, SSA is developing the *Disability Case Processing System* (DCPS), which, once implemented, will be used by all disability determination services (DDS). However, despite investing more than \$344 million in DCPS over 7 years, SSA has not yet fully developed and implemented a system. The project has faced schedule delays and increasing stakeholder concerns.

In response to a request from the Chairman of the House Subcommittee on Social Security, Committee on Ways and Means, we evaluated the DCPS project in FY 2015. Our November 2014 report recommended that SSA suspend the development of certain custom-built components of DCPS until the Agency evaluated and determined whether off-the-shelf or modernized SSA-owned software are viable alternatives. In May 2015, we initiated a review to examine SSA's efforts to evaluate those alternatives.

In May 2015, we issued a report with our observations and recommendations for DCPS. In that review, we found that previous Beta versions of DCPS had significant functionality limitations. Those limitations caused delays in processing and required that the DDSs develop various "workarounds" to process claims through the system. DDS personnel expressed many concerns with the efficiency and effectiveness of the rollout as well as SSA management's communication with users.

In 2015, SSA partnered with the United States Digital Service to evaluate the Beta application and concluded that, as built, it would not meet the Agency's needs. SSA discontinued developing the Beta application and began developing a new DCPS system using Agile software development practices. The Agency expects to deliver the first version of the new product by the end of 2016.

## Issue #6: Strengthen the Integrity and Protection of the Social Security Number

SSA issued over 16 million original and replacement social security number (SSN) cards in FY 2015. In addition, the Agency received and processed about 275 million wage items in FY 2015. Protecting the SSN and properly posting the wages reported under SSNs are critical to ensuring SSN integrity and eligible individuals receive the full benefits due them.

**SSN Use:** The SSN is heavily relied on as an identifier in U.S. society and is valuable as an illegal commodity. Additionally, the SSN is critical in accurately recording workers' earnings on which future benefit payments are based. For these reasons, properly assigning SSNs only to those individuals authorized to obtain them, protecting SSN information once the Agency assigns the numbers, and accurately posting the earnings reported under SSNs are critical SSA missions.

**SSN Misuse:** While SSA has improved its enumeration process, given the preponderance of SSN misuse and identity theft in U.S. society, we continue to believe protection of this critical number is a considerable challenge for SSA as well as its millions of stakeholders. Unfortunately, once SSA assigns an SSN, it has no authority to control how other entities collect, use, and protect it. Our audit and investigative work have shown that the more SSNs are unnecessarily used, the higher the probability individuals could use them to commit crimes. For example, some educational institutions unnecessarily collect and use SSNs as a primary student identifier. A March 2015 study revealed that 12.7 million consumers were victims of identity fraud in 2014. Two-thirds of these victims had received a data breach notification in the same year.

We remain concerned about SSN misuse by noncitizens who are not authorized to work in the United States. We are also concerned that some individuals misuse SSNs for identity theft purposes. In addition, recent audit work determined that over 6 million number holders age 112 or older had no death information on their Numident records. The accuracy and integrity of death information is critical because Federal benefit paying entities, the Department of Homeland Security, the Internal Revenue Service, State and local governments, and private industry customers rely on the Death Master File to detect unreported deaths and prevent fraud.

**Earnings:** SSA's programs depend on earnings information to determine whether an individual is eligible for benefits and to calculate the amount of benefit payments. Properly posting earnings ensures eligible individuals receive the full retirement, survivors, and/or disability benefits due them. If employers report earnings information incorrectly or not at all, SSA cannot ensure all individuals entitled to benefits are receiving the correct payment amounts.

SSA spends scarce resources correcting earnings data when employers report incorrect information. The *Earnings Suspense File* (ESF) is the Agency's repository of wage reports on which wage earners' names and SSNs fail to match SSA's records. Per the latest available data, the ESF had accumulated over \$1.2 trillion in wages and 333 million wage items for Tax Years 1937 through 2012. In Tax Year 2012 alone, SSA posted 6.9 million wage items, representing \$71 billion, to the ESF. From Tax Years 2003 to 2012, the ESF grew by approximately \$749 billion in wages and 90 million wage items, representing about two-thirds of the total wages in the ESF and one-third of the total wage items.

## Issue #7: Strengthen Planning, Transparency, and Accountability

Planning, transparency, and accountability are critical factors in effective management. Failure to plan properly to meet its mission and challenges will lessen the Agency's ability to provide its services efficiently and effectively now and in the future. Similarly, mismanagement and waste as well as a lack of transparency for citizens in Government operations, can erode trust in SSA's ability to tackle the challenges it faces.

**Planning:** In the past, the Agency developed multiple-year strategic plans, which included general descriptions of the programs, processes, and resources needed to meet its mission and strategic objectives. SSA has also produced other strategic plans, like the *Information Resources Management Strategic* and *Human Capital Operating Plans*, which covered periods of only a few years. While planning for the next few years is important, a longer term vision is critical to ensuring the Agency has the programs, processes, staff, and infrastructure required to provide needed services 10 to 20 years from now and beyond.

**Transparency:** While the Agency has many performance measures and goals on which it publicly reports, we have questioned the usefulness of some of the measures and goals. We have recommended that SSA develop more outcome-based performance measures and goals, including performance targets based on SSA's long-term outcomes instead of annual budgets.

Similar to our previous comments on the Agency's metrics, SSA's FY 2015 performance measures could be more outcome-based. While many appear to measure outcomes because of the manner in which they are worded, they still mostly measure outputs. For example, one performance measure, *Enhance Our Security Features and Business Processes to Prevent and Detect Fraud*, appears to measure the prevention and detection of fraud. However, the data definition for the measure reveals that SSA is only measuring public fraud referrals. While fraud referrals may help detect and prevent fraud, the fraud referrals are steps in the process, not the desired outcome. The fraud referrals could be erroneous reports of fraud that SSA spends its resources investigating without achieving what it intended to achieve. SSA should measure the percentage of referrals that actually detect or prevent fraud to show the true outcome of the process being implemented. Measuring outputs, or steps in a process, does not inform the public whether SSA is managing towards the outcomes it needs to efficiently and effectively provide its services and meet its mission.

**Independent Auditor's Report:** The FY 2015 *Independent Auditor's Report* contained three significant deficiencies in internal control (the full text of the report can be found in SSA's FY 2015 *Agency Financial Report*). First, the auditor identified three deficiencies in internal control that, when aggregated, were considered to be a significant deficiency in internal controls related to calculation, recording, and prevention of overpayments. Specifically, the auditor noted calculation errors in 24 percent of the overpayment items selected in a statistical sample. In addition, SSA has a systems limitation where overpayment installments extending past 2049 are not tracked and reported. Further, SSA was not reconciling data between systems to detect discrepancies, which could lead to payment errors.

Second, the auditor identified deficiencies in internal control that, when aggregated, were considered to be a significant deficiency in internal controls related to redeterminations. Testing

identified instances where redetermination interviewers did not comply with established control policies, and results were not appropriately recorded.

Third, the auditor identified information systems control deficiencies in four areas that, when aggregated, were considered to be a significant deficiency over information systems controls. The areas included:

- Threat and Vulnerability Management;
- IT Oversight and Governance;
- Change Management; and
- Access Controls.

**SSA's Anti-Fraud Programs:** SSA is under increased scrutiny after a number of highly publicized cases of fraud became the subject of congressional hearings. OIG hired a contractor to complete a fraud risk assessment of SSA's anti-fraud activities and found that SSA did not track all instances of fraud or use a risk-based approach for combatting fraud. The contractor also concluded that the Agency could be more proactive in addressing and mitigating new fraud schemes and improving the design and operating effectiveness of anti-fraud measures.

---

## MONETARY BENEFITS

---

In FY 2015, OIG issued 89 audit reports with recommendations, identifying over \$4.1 billion in questioned costs and over \$3.6 billion in Federal funds that could be put to better use. OIG also received over 121,000 allegations of fraud, effected almost 1,300 criminal convictions, and obtained a return of over \$551 million in monetary accomplishments, comprised of over \$138 million in SSA recoveries, restitutions, fines, settlements, and judgments, and over \$413 million in projected SSA savings. Our FY 2017 funding will enable us to issue timely reports, provide training required by Government Auditing Standards, and cover mission-critical travel.

---

## STRATEGIC PLANNING

---

FY 2015 was the fifth year under OIG's 5-year Strategic Plan (FY 2011-FY 2015). OIG operates within a framework set by three general goals: the *Impact* OIG's investigations, audits, and legal activities have on SSA's effectiveness and efficiency; the *Value* OIG brings to SSA, Congress, and the public; and the strategies OIG uses to cultivate the talents of its *People*. These general goals are further broken down into 15 separate performance measures. All of these measures are designed to support OIG's core mission to inspire public confidence by detecting and preventing fraud, waste, and abuse in SSA's programs and operations. For FY 2015, OIG successfully met or exceeded all 15 of its performance measures. The specific results for FY 2015 are as follows:

**Table 4.2—2015 Performance Measure Results**

<b>Goal</b>	<b>Target</b>	<b>Result</b>
<b><i>Impact</i></b>		
1. Maintain an annual acceptance rate of at least 88% for all audit recommendations.	88%	<b>96%</b>
2. Achieve a 5-year average implementation rate of 85% for accepted recommendations aimed at improving the integrity, efficiency, and effectiveness of SSA.	85%	<b>88%</b>
3. Ensure at least 80% of all cases opened during the FY directly relate to improper payments within SSA's Title II and Title XVI Programs.	80%	<b>96%</b>
4. Achieve a successful conclusion on at least 75% of all Title II and Title XVI cases closed during the FY.	75%	<b>89%</b>
<b><i>Value</i></b>		
5. Generate a positive return of \$8 for every tax dollar invested in OIG activities.	\$8 to 1	<b>\$82 to 1</b>
6. Evaluate and respond to 90% of all allegations received within 45 days.	90%	<b>96%</b>
7. Complete investigative fieldwork on 75% of all cases within 180 days.	75%	<b>91%</b>
8. Respond to 95% of constituent-based congressional inquiries within 21 days.	95 %	<b>98%</b>
9. Take action on 90% of Civil Monetary Penalty (CMP) subjects within 30 days of receipt.	90%	<b>97%</b>
10. Achieve a positive external user assessment rating of 85% for product service quality.	85%	<b>94%</b>
11. Issue 85% of final audit reports within 1 year of the entrance conference with SSA.	85%	<b>91%</b>
12. Complete 85% of requests for legal advice and review within 30 days.	85%	<b>99%</b>
<b><i>People</i></b>		
13. Achieve an annual attrition rate of 5% or less.	≤5 %	<b>1%</b>
14. Conduct an annual employee job-satisfaction survey and implement corrective action plans to identify areas where improvements are needed. (Improvement is indicated when the score of any of the 12 questions relating to job satisfaction is ≤ 75%.)	75%	<b>82%</b>
15. Ensure that 90% of OIG staff receives 40 or more hours of appropriate developmental and skill enhancement training annually.	90%	<b>99%</b>

### TRANSFER AUTHORITY

The budget request includes language providing authority to transfer an amount of up to 3 percent of the total OIG appropriation from SSA's LAE appropriation. This language provides the flexibility to meet unanticipated funding requirements and to ensure that adequate resources are available to meet program objectives. The request is consistent with similar authority to transfer funds between appropriations provided to other departments and agencies in appropriation language.

## BUDGETARY RESOURCES

The OIG annual appropriation consists of appropriations from both the general fund and the trust funds. The President's budget request for FY 2017 consists of \$31,000,000 appropriated from the general fund and \$81,000,000 which will be transferred and expended as authorized by Section 201(g) (1) of the Social Security Act from the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund.

**Table 4.3—Amounts Available for Obligation**

	(In thousands)		
	FY 2015 Actual	FY 2016 Enacted	FY 2017 Estimate
General Funds Annual Appropriation	\$ 28,829	\$ 29,787	\$ 31,000
Trust Funds Annual Transfer	\$ 74,521	\$ 75,713	\$ 81,000
<b>Total Appropriation</b>	<b>\$ 103,350</b>	<b>\$ 105,500</b>	<b>\$ 112,000</b>
<b>Total Budgetary Resources</b>	<b>\$ 103,350</b>	<b>\$ 105,500</b>	<b>\$ 112,000</b>
Total Obligations	\$ 102,576	\$ 105,500	\$ 112,000
Unobligated balance lapsing	\$ 774	\$ 0	\$ 0

## ANALYSIS OF CHANGES

---

The FY 2017 request represents a \$6,500,000 increase over the FY 2016 estimate. These increases can be attributed to an increase in base expenses for employee salaries and benefits, to include a proposed pay increase and for related support costs.

**Table 4.4—Summary of Changes**

	<b>FY 2016 Enacted</b>	<b>FY 2017 Estimate</b>	<b><i>FY16 to FY17 Change</i></b>
General Fund Appropriation	\$ 29,787,000	\$ 31,000,000	+ \$ 1,000,000
Trust Fund Appropriation	\$ 75,713,000	\$ 81,000,000	+ \$ 5,500,000
<b>Total Appropriation</b>	<b>\$ 105,500,000</b>	<b>\$ 112,000,000</b>	<b>+ \$ 6,500,000</b>
<b>Total Obligations</b>	<b>\$ 105,500,000</b>	<b>\$112,000,000</b>	<b>+ \$ 6,500,000</b>

Table 4.5—Explanation of OIG Budget Changes

	FY 2016 Base		Change from Base	
	WYs (FTEs)	Budgetary Resources	WYs (FTEs)	Budgetary Resources
<b><u>BUILT-IN INCREASES</u></b>				
<b>Base Payroll Expenses</b>	<b>543 (540)</b>		<b>+21 (+20)</b>	
• <i>Change in base payroll expenses related to career ladder promotions and within-grade increases</i>	---	\$ 67,482,000	---	+ \$ 2,657,000
• <i>Change in base expenses for employee benefits including health benefits and new employees hired under the Federal Retirement Employees System</i>	---	\$ 24,959,000	---	+ \$ 983,000
• <i>All other payroll changes, including overtime and awards</i>	---	---	---	---
<b>Non-Payroll Costs - All other built-in nonpayroll changes, travel management support and equipment</b>	---	\$ 8,024,000	---	+\$3,020,000

## BUDGET AUTHORITY BY ACTIVITY

---

The table below displays budget authority, split by type of funding, and obligations. This table also includes FTEs.

**Table 4.6—Budget Authority by Activity**

	(In thousands)		
	FY 2015 Actual	FY 2016 Enacted	FY 2017 Estimate
General Funds	\$ 28,829	\$ 29,787	\$31,000
OASDI Trust Fund Transfers	\$ 74,521	\$ 75,713	\$ 81,000
<b>Total Appropriation</b>	<b>\$ 103,350</b>	<b>\$ 105,500</b>	<b>\$ 112,000</b>
<b>Total Budgetary Authority</b>	<b>\$ 103,350</b>	<b>\$ 105,500</b>	<b>\$ 112,000</b>
Obligations	\$ 102,576	\$ 105,500	\$ 112,000
Unobligated balance lapsing	\$ 774	\$ 0	\$ 0
FTEs	528	540	560

## BUDGET RESOURCES BY OBJECT

The table below displays the breakdown of budget resources by object class.

**Table 4.7—Budget Resources by Object**

	FY 2015	FY 2016	FY 2017	<i>FY16 to FY17 Change</i>
Full-time permanent	\$ 62,982,000	\$ 66,884,000	\$ 69,541,000	+ \$ 2,657,000
Other than full-time permanent	\$ 395,000	\$ 400,000	\$ 400,000	\$ 0
Other compensation	\$ 197,000	\$ 198,000	\$ 198,000	\$ 0
Subtotal, Personnel Compensation	\$ 64,574,000	\$ 67,482,000	<b>\$ 70,139,000</b>	+ \$ 2,657,000
Civilian personnel benefits	\$ 26,147,000	\$ 24,959,000	\$ 25,942,000	+\$ 983,000
Total, Compensation and Benefits	\$ 89,721,000	\$ 92,441,000	<b>\$ 96,081,000</b>	+ \$ 3,640,000
Travel	\$ 2,598,000	\$ 2,293,000	\$ 3,010,000	+\$ 717,000
Transportation of things	\$ 32,000	\$ 50,000	\$ 60,000	+\$ 10,000
Rental payments to GSA	\$ 4,631,000	\$ 4,563,000	\$ 4,354,000	- \$209,000
Rental payments to others	\$ 77,000	\$ 100,000	\$ 144,000	+ \$44,000
Communications, utilities, and others	\$ 266,000	\$ 124,000	\$ 124,000	\$ 0
Printing and reproduction	\$ 13,000	\$ 6,000	\$ 6,000	\$ 0
Other services	\$ 3,260,000	\$4,923,000	\$ 6,136,000	+ \$ 1,213,000
Supplies and materials	\$ 245,000	\$ 519,000	\$ 1,070,000	+ \$ 551,000
Equipment	\$ 1,988,000	\$ 747,000	\$ 1,281,000	+ \$ 534,000
Insurance Claims	\$ 0	\$ 1,000	\$ 1,000	\$ 0
Adjustments	-\$ 254,000	-\$ 267,000	-\$ 267,000	\$ 0
<b>Total Budgetary Resources</b>	<b>\$ 102,576,000</b>	<b>\$ 105,500,000</b>	<b>\$ 112,000,000</b>	<b>+ \$ 6,500,000</b>

**BACKGROUND**

**AUTHORIZING LEGISLATION**

The Office of the Inspector General is authorized necessary expenses to carry out the provisions of the Inspector General Act of 1978, as amended.

**Table 4.8—Authorizing Legislation**

	<b>FY 2016 Authorized</b>	<b>FY 2016 Enacted</b>	<b>FY 2017 Authorized</b>	<b>FY 2017 Estimate</b>
<b>Office of the Inspector General (P.L. 114-113)</b>	<b>\$ 105,500,000</b>	<b>\$ 105,500,000</b>	<b>Indefinite</b>	<b>\$ 112,000,000</b>

## APPROPRIATION HISTORY

The table below displays the President's budget request, amounts passed by the House and Senate, and the actual amount appropriated for the period FY 2004 to FY 2016.

**Table 4.9—Appropriation History Table**

<b>Fiscal Year</b>	<b>Budget Estimate to Congress</b>	<b>House Committee Passed</b>	<b>Senate Committee Passed</b>	<b>Enacted Appropriation</b>

## OIG'S ORGANIZATIONAL STRUCTURE AND MISSION

### GENERAL PURPOSE

As mandated by the *Inspector General Act of 1978*, as amended, OIG's mission is to protect the integrity of SSA's programs. By conducting independent and objective audits, evaluations, and investigations, OIG works to ensure public confidence in the integrity and security of SSA's programs and operations, and works to protect them against fraud, waste, and abuse. OIG provides timely, useful, and reliable information and advice to Administration officials, Congress, and the public.

OIG is comprised of five components: The Immediate Office of the Inspector General (IO), Office of Audit (OA), Office of Counsel to the Inspector General (OCIG), Office of Communications and Resource Management (OCRM), and the Office of Investigations (OI).

### Immediate Office of the Inspector General

IO provides the Inspector General (IG) and the Deputy IG with staff assistance on the full range of their responsibilities. IO also administers a comprehensive Quality Assurance and Professional Responsibility program, and conducts Quality Control reviews that ensure the adequacy of OIG compliance with its policies and procedures, internal controls, and professional standards. In addition, IO oversees the Organizational Health Committee (OHC). The purpose of the OHC is to be an agent of positive change by discussing, evaluating, and presenting to senior management employee issues and proposed solutions that affect the operations, administration, and efficiency of OIG. In doing this, the committee acts as a representative of all OIG employees.

## **Office of Audit**

OA conducts and/or supervises comprehensive financial and performance audits of SSA's programs and operations and makes recommendations to ensure that program objectives and operational functions are achieved effectively and efficiently. Financial audits, required by the *Chief Financial Officers' Act of 1990*, assess whether SSA's financial statements fairly present the agency's financial position, results of operations, and cash flow. Performance audits review the economy, efficiency, and effectiveness of SSA's programs and operations. OA also conducts short-term management and program evaluations focused on issues of concern to SSA, Congress, and the general public. Evaluations often focus on identifying and recommending ways to prevent and minimize program and operational fraud, waste, and abuse, as well as inefficiency and ineffectiveness.

## **Office of Counsel to the Inspector General**

OCIG provides independent authoritative legal advice, guidance, and counsel to the IG and senior staff on a wide range of issues, including regulatory strategy, policy directives, and interpretation of new and emerging authorities and agency responsibilities. OCIG reviews materials to ensure sufficiency and compliance with regulatory and statutory requirements. OCIG advises the IG on investigative procedures and techniques, as well as on legal implications and conclusions to be drawn from audit and investigative material. OCIG is also responsible for the CMP program, including imposition of penalties and assessments and the settlement and litigation of CMP cases.

## **Office of Communications and Resource Management**

OCRM provides administrative and management support to OIG by providing information resource management; systems security and software development; and the coordination of budget, procurement, telecommunications, facilities, equipment, and human resources activities. OCRM also administers the Fugitive Felon Program and the OIG Fraud Hotline. OCRM also manages OIG's public affairs programs, develops OIG's media and public information policies, and serves as the primary contact for those seeking information about OIG. In addition, OCRM is responsible for strategic planning, organizational performance management, and reporting.

## **Office of Investigations**

OI conducts and coordinates investigative activity related to fraud, waste, abuse, and mismanagement in SSA programs and operations, including wrongdoing by individuals such as applicants, grantees, or contractors perpetrating criminal activity against SSA programs and operations. OI is responsible for managing DFT and administering the CDI Program. OI also investigates allegations of employee misconduct in the performance of their official duties. This office serves as the OIG liaison to the Department of Justice on all matters relating to investigations of SSA programs and personnel. OI works with other investigative agencies and organizations on special projects and assignments.

## RATIONALE FOR THE BUDGET REQUEST

---

The budget request for FY 2017 is \$112,000,000 and 560 FTEs, which reflects an increase of \$6,500,000 from the FY 2016 annual appropriations level. The FY 2017 funding increase will provide funding for a 560 FTE staffing level, mandatory payroll increases (such as within-grade increases and benefit-rate increases), and for related support costs.

# Acting Commissioner's Message

Transformation and reflection marked this year as we released [Vision 2025](#) and celebrated our 80<sup>th</sup> anniversary. We asked ourselves, “How do we take the best of our past and weave it into an agile, innovative organization capable of meeting our customers’ needs now and into the future?”

Throughout this *Annual Performance Plan for Fiscal Year 2017, Revised Performance Plan for Fiscal Year 2016, and Annual Performance Report for Fiscal Year 2015*, we detail the specific actions underway to transform our agency to meet our future demands. These actions support the goals and objectives defined in our [Agency Strategic Plan for Fiscal Years 2014 – 2018](#) and align with our three vision priorities: providing a superior customer experience, developing and retaining exceptional employees, and building an innovative organization.

As we move into the future, our customers remain our number one priority. Our customers often seek our help when they are most vulnerable. It is our responsibility to provide them with compassionate, accurate service as quickly as we can. We rely on our outstanding employees to provide that service. Every day, I see evidence of their commitment, and I thank these amazing, dedicated public servants for all that they do to serve the public.

Looking toward the future, technology offers us extraordinary opportunities to improve our decision-making processes. To help ensure we are gathering and interpreting the vast array of data available to us, I have established a new Analytics Center of Excellence. We will staff the new center with highly skilled business and data analytics staff that will provide critical analysis as we accelerate data driven-decision making throughout our agency.

As our employees work to meet our customers’ needs, we also face the reality that some individuals seek to commit fraud or breach our computer systems for personal gain. We will not tolerate these actions and will prosecute those responsible. We aggressively combat fraud, and this year, we centralized our efforts by establishing the Office of Anti-Fraud Programs. This office uses various approaches, including data analytics, to help us detect and prevent fraud. We also continue to invest heavily in our cyber security programs, further demonstrating our commitment to protecting our customers’ personal data by meeting or exceeding federal cyber security standards.

Over the past year, we made great strides to move our agency forward. I am proud to report that we met or made significant progress toward all 40 of our fiscal year (FY) 2015 performance measures. Last year, I challenged our leadership to be aggressive in their goal setting. While not all targets were met, I am pleased with our progress and with the hard work employees at all levels demonstrated in doing their best to meet those goals.

We established new agency priority goals for FY 2016-2017, which focus on agency issues:

- Improving customer service and convenience by increasing online services;
- Increasing customer satisfaction with our services;
- Improving the integrity of our programs; and
- Improving customer service by reducing the wait time for a hearing decision.

We have also faced challenges, which we explain in our [Major Management Challenges](#) section. This report also details our progress, notes any changes made to our FY 2016 plans, provides our new measures and initiatives for FY 2017, and notes our risks and mitigation efforts.

In closing, based on internal evaluations, I assure you the performance data in this report is complete, reliable, and accurate.

A handwritten signature in black ink that reads "Carolyn W. Colvin".

Carolyn W. Colvin  
Acting Commissioner

# Chief Strategic Officer's Message

What will a customer's experience be with Social Security in 2025? Imagining the possibilities excited our customers, employees, and other stakeholders over the past year as we sought their input in developing our vision. Released in April 2015, [Vision 2025](#) describes the agency we aspire to be, and now we are developing a roadmap to guide our transformation into the bold, innovative agency we aspire to be.

Our current performance goals, defined in our [Agency Strategic Plan for Fiscal Years 2014 – 2018](#), guide us through 2018. To achieve our vision, we are fine-tuning the initiatives supporting our objectives by focusing our resources on several actions we are referring to as major management priorities. These priorities are enhancing online customer service, reducing the hearings pending, educating the public about Social Security programs, improving succession management, promoting employee development and engagement, transforming the information technology investment process, establishing a program management office, and accelerating the use of data-driven decision-making. Progress in these areas builds a strong foundation for achieving our vision.

Throughout this *Annual Performance Report*, we detail the progress we have achieved toward meeting our goals and objectives, which also supports our major management priorities. Last year, Acting Commissioner Colvin challenged us to set aggressive targets for FY 2015, and we did. I am pleased to say that we met the target for 23 of our 40 performance measures. Results for three of our performance measures were unavailable at the time we published this report. We came very, very close to meeting the targets for the remaining 14 performance measures. Our targets reflect the level of progress we strive to make, not the progress we know we can easily make.

Highlights of our FY 2015 performance include:

- Improved and expanded service delivery options for customers to conduct business in person, by phone, through video interviews and hearings, or online, as evidenced by increased usage of all delivery channels;
- Developed additional aggressive program integrity and fraud prevention efforts, including setting up a new office overseeing our anti-fraud programs;
- Increased the quality of our disability decisions and received our second prestigious Deming Award – again, for specialized training we developed for our hearings staff;
- Exceeded our FY 2015 systems availability target of 99.5 percent;
- Helped our veterans and wounded warriors by delivering medical evidence to the Department of Veterans Affairs faster;
- Continued to dominate the top five positions in the Federal Government's customer satisfaction rankings with our online tools: Retirement Estimator and Extra Help with Medicare, which tied for first place ranking; and
- Continued to exceed our targets for hiring veterans and disabled veterans.

As we look to our future, *Vision 2025* paints a picture of a responsive, highly efficient, and streamlined organization. Becoming that organization requires an aggressive approach to gathering and analyzing agency data, then acting on those findings. By leveraging the power of data analytics, we can assess our progress, identify performance gaps, and allocate our resources effectively to make our vision a reality.

Ruby Burrell  
Chief Strategic Officer

# Making our Vision a Reality

As the Nation's largest safety net, providing benefits to millions of Americans – and the sole income for many – we are entrusted with an enormous responsibility. We face many challenges as we look to the future – increasing numbers of retirees and disabled workers, an aging employee base, increased employee turnover, technological advances, budget uncertainty, and increased customer expectations. We must change the way we operate to meet and exceed our customers' needs in the future.

Over the past several months, we have actively sought out our customers and stakeholders, asking them to help shape the Social Security Administration of the future. The result is [Vision 2025](#), the framework guiding our strategic decisions over the next ten years. Since *Vision 2025*'s release in April 2015, we have been developing the action plans needed to make our vision a reality.

We will address our challenges by focusing on our three vision priorities:

**Superior Customer Experience:** Our customer relationships span a lifetime and are supported by accurate, real-time, and secure online services;

**Exceptional Employees:** Empowered, knowledgeable, compassionate, and engaged employees are proud to contribute in a flexible and rewarding environment; and

**Innovative Organization:** The Social Security Administration is a national model of organizational transformation, agility, and service excellence, built on continuous improvement and forward-thinking strategy.

In fiscal year (FY) 2015, we took the following steps to achieve *Vision 2025*:

- Aligned our current [Agency Strategic Plan](#) with *Vision 2025*;
- Drafted our critical path roadmap defining the activities and initiatives we will undertake over the coming years to lay the foundation for achieving *Vision 2025*; and
- Began implementing initiatives supporting our major management priorities:
  - Enhance Online Customer Services;
  - Reduce the Wait for a Hearing Decision;
  - Educate the Public about Social Security Programs;
  - Improve Succession Management;
  - Promote Employee Development and Engagement;
  - Transform the IT Investment Process;
  - Establish Program Management Office; and
  - Accelerate the Use of Data-Driven Decision-Making.

In FY 2016, we expect to:

- Update our critical path roadmap, as needed;
- Begin developing our change management plan; and
- Continue implementing our initiatives.

In FY 2017, we expect to:

- Begin drafting our new agency strategic plan, based on our strategic roadmap.

Through careful strategic planning and continued dialog with our stakeholders, we will create a more agile, responsive organization, ready to meet the changing needs of our customers throughout their lifetimes.

# Our Mission

## Our Vision

Proudly serving Social Security customers through their lifetime, when and where they need us.

## Vision Priorities

- Superior Customer Experience
- Exceptional Employees
- Innovative Organization

## Our Mission

Deliver Social Security services that meet the changing needs of the public

## Our Motto

Social Security Benefits America

# Our Programs

## Americans Rely on Social Security

Considered by many to be one of the most successful large-scale federal programs in our Nation's history, the programs we administer provide a financial safety net for millions of Americans. In fact, 9 out of 10 individuals age 65 and older receive Social Security benefits. During fiscal year 2015, we paid more than \$932 billion to approximately 65 million beneficiaries.

## Old-Age, Survivors, and Disability Insurance Programs

## Old-Age and Survivors Insurance Program

Today, most retirees plan their retirement dates based on when they can receive their Social Security benefits. Created in 1935, the Old-Age and Survivors Insurance program (which provides what most people think of as their Social Security benefit) provides retirement and survivors benefits to qualified workers and their families. Workers earn credit toward Social Security benefits by working and paying Social Security taxes. Most people need 40 credits, or 10 years of covered work, to qualify for retirement benefits.

A worker qualifies for full retirement benefits between the ages of 65 and 67, depending on the year he or she was born. Reduced retirement benefits are payable as early as age 62. Certain members of retired workers' families may also receive benefits. Spouses (including divorced spouses), minor children, and children who became disabled before age 22 may also be eligible for benefits.

Social Security also provides income for families of workers who die. Survivors benefits were added in 1939, and benefits for disabled widows and widowers were added in 1968. Widows, widowers (and divorced widows and widowers), dependent parents, and children may be eligible for survivors benefits. In fact, 98 of every 100 children could get benefits if a working parent dies. Social Security pays more benefits to children than any other federal program.

## Disability Insurance Program

Becoming disabled before reaching full retirement age is not something most people consider. However, studies show that a 20-year-old worker has more than a 1-in-4 chance of becoming disabled before reaching full retirement age.

People who have worked long enough and paid Social Security taxes and certain members of their families can qualify for Social Security Disability Insurance benefits.

The disability program began in 1956 to provide benefits for workers with disabilities between the ages of 50 and full retirement. The program expanded in 1960 to include workers with disabilities of all ages. Social Security Disability Insurance provides benefits to people who cannot work because they have a medical condition expected to last at least one year or result in death.

## Supplemental Security Income Program

The Supplemental Security Income program, established in 1972, is a federal program providing monthly payments to people with limited incomes and resources who are aged, blind, or disabled. Adults and children under the age of 18 can receive payments based on disability or blindness.

General tax revenue, not workers' Social Security taxes, funds the Supplemental Security Income program.

# Our Organization

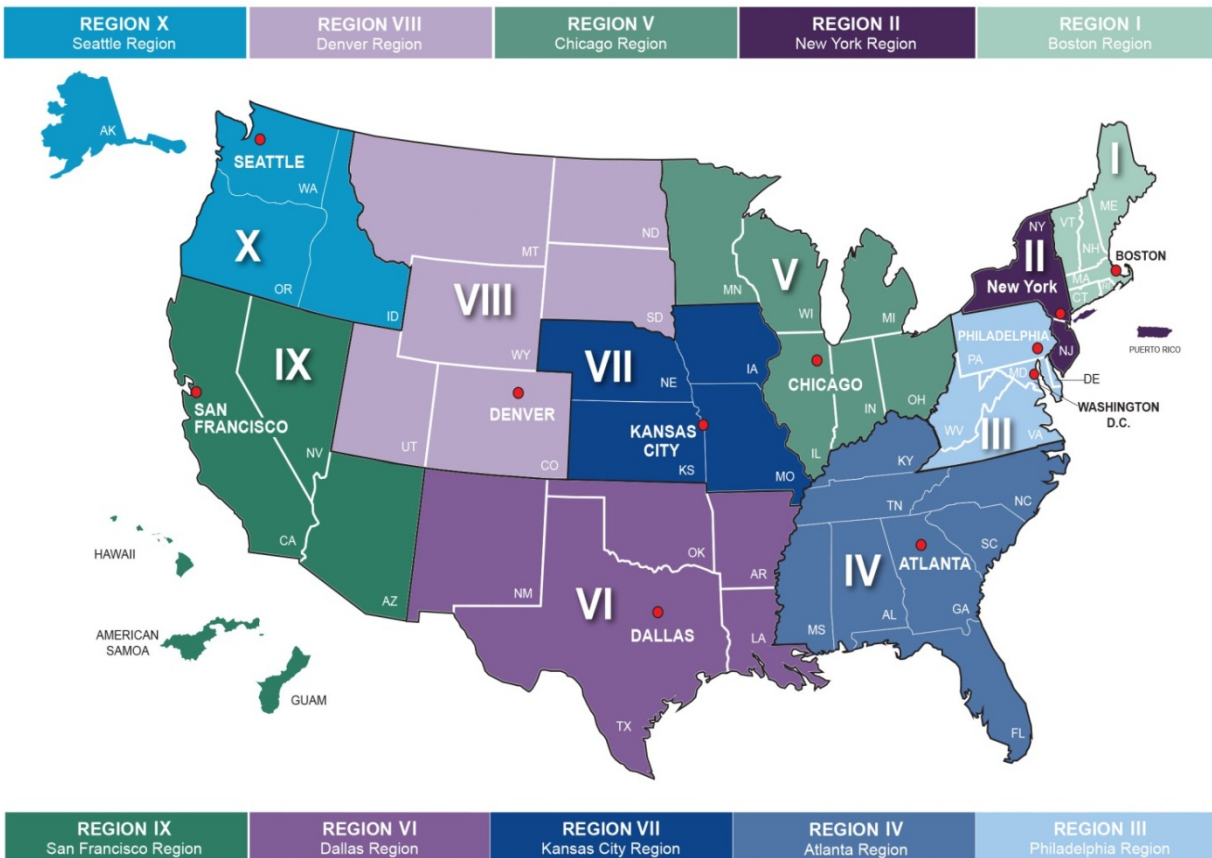

Serving the American public requires a vast network of facilities, technology, and skilled staff. Every day more than 65,000 employees provide a full range of services to our customers. Nationwide, we have a network of more than 1,500 offices, which includes regional offices, field offices, Social Security card centers, teleservice centers, processing centers, National Hearing Centers, the Appeals Council, and our headquarters in Baltimore, Maryland.

Additionally, more than 16,000 state employees at disability determination services (DDS) offices work in 54 jurisdictions and provide services in about 100 offices across the country and U.S. territories. Internationally, we deliver services in the U.S. embassies in more than a hundred countries.

Customers receive in-person service primarily at our field offices and Social Security card centers. Our teleservice centers primarily handle calls to our National 800 Number. Employees in our processing centers typically handle Social Security retirement, survivors, and disability payments. These employees also provide a wide range of other services, including handling telephone calls to our National 800 Number.

We have created strong partnerships with state agencies, and we depend on state employees in DDS offices to make disability determinations. Administrative law judges in our hearing offices and the administrative appeals judges at our Appeals Council decide appeals involving Social Security and Supplemental Security Income issues.

We generally organize our operations into the 10 regions shown on the map below. For more information about our components and their functions, visit our [organizational structure webpage](#).

# Summary of Our Goals and Objectives

## Goal 1: Deliver Innovative, Quality Services

- Strategic Objective 1.1: Develop and Increase the Use of Self-Service Options
- Strategic Objective 1.2: Enhance the Customer Experience by Completing Customers' Business at the First Point of Contact
- Strategic Objective 1.3: Partner with Other Agencies and Organizations to Improve Customers' Experience and Align with the Administration's One-Government Approach
- Strategic Objective 1.4: Evaluate Our Physical Footprint to Incorporate Improved Service Options

## Goal 2: Strengthen the Integrity of Our Programs

- Strategic Objective 2.1: Transform the Way We Record Earnings to Enhance Data Accuracy
- Strategic Objective 2.2: Protect the Public's Data and Provide Secure Online Services
- Strategic Objective 2.3: Increase Payment Accuracy

## Goal 3: Serve the Public through a Stronger, More Responsive Disability Program

- Strategic Objective 3.1: Improve the Quality, Consistency, and Timeliness of Our Disability Decisions
- Strategic Objective 3.2: Maximize Efficiencies throughout the Disability Program
- Strategic Objective 3.3: Enhance Employment Support Programs and Create New Opportunities for Returning Beneficiaries to Work

## Goal 4: Build a Model Workforce to Deliver Quality Service

- Strategic Objective 4.1: Attract and Acquire a Talented and Diverse Workforce that Reflects the Public We Serve
- Strategic Objective 4.2: Strengthen the Competency, Agility, and Performance of Our Workforce to Align with the Needs of the Public
- Strategic Objective 4.3: Foster an Inclusive Culture that Promotes Employee Well-Being, Innovation, and Engagement
- Strategic Objective 4.4: Enhance Planning and Alignment of Human Resources to Address Current and Future Public Service Needs

## Goal 5: Ensure Reliable, Secure, and Efficient Information Technology Services

- Strategic Objective 5.1: Maintain System Performance and the Continuity of Information Technology Services
- Strategic Objective 5.2: Enhance and Execute Plans to Modernize Our Systems
- Strategic Objective 5.3: Incorporate Innovative Advances in Service Delivery
- Strategic Objective 5.4: Continuously Strengthen Our Cyber Security Program

# Cross-Agency Priority Goals

Established by the Government Performance and Results (GPRA) Modernization Act of 2010, Cross-Agency Priority (CAP) goals accelerate progress on presidential priority areas. Multiple agencies actively collaborate to achieve results in these areas.

The Office of Management and Budget established CAP goals based on input from federal agencies and congressional committees. These goals reflect the President’s second-term priorities. The goals were announced in the FY 2015 budget and have a four-year timeframe. There are 15 CAP goals: 7 mission-oriented and 8 management-focused goals. Each CAP goal has two senior leaders – one within the Executive Office of the President and one within key delivery agencies. The Social Security Administration and Office of Management and Budget co-lead the Customer Service CAP goal.

GPRA Modernization Act of 2010 requires us to address CAP goals in the agency strategic plan, the annual performance plan, and the annual performance report. Below, we note examples showing our efforts supporting specific CAP goals. A listing of all CAP goals, plus additional information about the progress all agencies are making toward achieving the CAP goals is available at [performance.gov](http://performance.gov).

Mission-Oriented Goals	
Cybersecurity	<ul style="list-style-type: none"> <li>Continued to meet or exceed all target goals related to: <ul style="list-style-type: none"> <li>Trusted Internet Connection consolidation and capabilities;</li> <li>Information security continuous monitoring;</li> <li>Strong authentication; and</li> <li>Phishing and malware defense.</li> </ul> </li> <li>Expanded use of automation to identify security vulnerabilities, deviations, and inappropriate use.</li> </ul>
Climate Change (Federal Actions)	<ul style="list-style-type: none"> <li>Developed and implemented a comprehensive plan to meet renewable energy and federal efficiency targets; and</li> <li>Took appropriate actions to ensure we mitigate our agency’s effect on climate change.</li> </ul>
Insider Threat and Security Clearance	<ul style="list-style-type: none"> <li>Developed and implemented our insider threat plan; and</li> <li>Created additional oversight mechanisms to ensure data access is limited to authorized personnel.</li> </ul>
Management-Oriented Goals	
Customer Service	<ul style="list-style-type: none"> <li>Co-led federal efforts on customer service improvements, including: <ul style="list-style-type: none"> <li>Creating a Federal Government-wide customer service award program;</li> <li>Piloting a tool to gather customer feedback in select federal offices, including Social Security card centers; and</li> <li>Developing a Washington, DC-based Community of Practice to drive progress on key milestones.</li> </ul> </li> <li>Supported agency-level efforts, including: <ul style="list-style-type: none"> <li>Piloting a regional Customer Service Community of Practice in Denver, CO;</li> <li>Developing and Implementing an online request for a Social Security number replacement card;</li> <li>Launching a viewable/printable replacement Form 1099; and</li> <li>Leveraging leadership from across government to bring best practices, collaboration, and shared problem solving to our agency.</li> </ul> </li> </ul>
Smarter IT Delivery	<ul style="list-style-type: none"> <li>Launched efforts to expand hiring authority for digital service experts;</li> <li>Held events targeting small businesses to facilitate communications and information exchange with industry partners;</li> <li>Began transition to an Agile-based systems development approach;</li> <li>Expanded project management processes to integrate additional best practices; and</li> <li>Conducted additional Stat reviews and implemented lessons learned.</li> </ul>

## Management-Oriented Goals

Strategic Sourcing	<ul style="list-style-type: none"> <li>• Used the Federal Strategic Sourcing Initiatives to decrease costs for a variety of items, including: <ul style="list-style-type: none"> <li>○ Office supplies;</li> <li>○ Domestic delivery services;</li> <li>○ Laptops;</li> <li>○ Workstations; and</li> <li>○ Cell phone services.</li> </ul> </li> </ul>
Benchmark and Improve Mission-Support Operations	<ul style="list-style-type: none"> <li>• Established cost or efficiency benchmarks for: <ul style="list-style-type: none"> <li>○ Acquisition;</li> <li>○ Financial management;</li> <li>○ Human capital;</li> <li>○ Information technology management; and</li> <li>○ Real property.</li> </ul> </li> <li>• Worked with Chief Executive Officer Councils to: <ul style="list-style-type: none"> <li>○ Define and refine individual efficiency benchmarking metrics and collect agency-level data; and</li> <li>○ Collect and validate efficiency and effectiveness metrics.</li> </ul> </li> </ul>
Open Data	<ul style="list-style-type: none"> <li>• Developed and maintained an enterprise data inventory;</li> <li>• Made data easily available to the public;</li> <li>• Prioritized and released valuable data to the public;</li> <li>• Prevented inappropriate disclosure of sensitive information;</li> <li>• Added specific roles and responsibilities for certain types of open data deliverables; and</li> <li>• Regularly reached out to stakeholders to identify their data needs.</li> </ul>
People and Culture	<ul style="list-style-type: none"> <li>• Focused efforts on improving employee engagement including requiring all our components to develop and maintain action plans;</li> <li>• Implemented an Employee Engagement Community of Practice to share best practices and address challenges; and</li> <li>• Participated in several Office of Personnel Management projects, including: <ul style="list-style-type: none"> <li>○ Senior Executive Service reforms;</li> <li>○ Hiring reform forums;</li> <li>○ GovConnect (piloting our “SkillsConnect” under GovProject); and</li> <li>○ Interagency Rotation Program.</li> </ul> </li> </ul>

# Agency Priority Goals

In support of the Government Performance and Results Act (GPRA) Modernization Act of 2010, we established four Agency Priority goals (APG). The APGs are 24-month goals and reflect performance improvement priorities of our executive leadership, as well as those of the Administration.

Our APGs support our overarching strategic goals set forth in our [Agency Strategic Plan for Fiscal Years 2014 – 2018](#). Below, and on the following pages, are the APGs for fiscal years (FY) 2014 - FY 2015 and our new APGs for FY 2016 – FY 2017.

## Agency Priority Goals for FY 2014-FY 2015

FY 2014-FY 2015 Agency Priority Goals	Strategies to Achieve Priority Goals	External Factors	Goal Leader
Improve access to our services by increasing the number of citizens who complete their business with us online.	Migrate existing online services to the <a href="#">my Social Security</a> portal.  Work with external partners to promote direct access to online services.  Conduct a national marketing campaign targeted toward people approaching retirement age and current beneficiaries.	Availability of information technology resources to add additional services to the <a href="#">my Social Security</a> portal and expand direct access through external partners.  Stakeholder and advocacy groups acceptance of the <a href="#">my Social Security</a> portal.	Robin Sabatino Associate Commissioner, Office of Electronic Services and Technology, Office of Operations
Deliver a world-class customer experience by expanding the use of video technology to hold hearings.	Update systems and infrastructure to improve the quality of video hearings.  Increase marketing and educational information.  Pursue policy and business process changes to maximize efficiency.	Availability of information technology resources.  Stakeholder acceptance of video hearings.  Public reaction to regulatory changes regarding video hearings.	Donna Calvert Assistant Deputy Commissioner, Office of Disability Adjudication and Review
Provide the public with access to personalized information by increasing the number of established <a href="#">my Social Security</a> accounts.	Enhance services provided online through the <a href="#">my Social Security</a> portal.  Increase marketing and educational activities to promote <a href="#">my Social Security</a> .  Pilot quick-service customer service stations in field offices.  Increase number of customer service stations in external partner sites that provide the full suite of Social Security online services.	Budget constraints could affect our ability to migrate additional services to the <a href="#">my Social Security</a> portal and impede our ability to implement new features.	Robin Sabatino Associate Commissioner, Office of Electronic Services and Technology, Office of Operations

FY 2014-FY 2015 Agency Priority Goals	Strategies to Achieve Priority Goals	External Factors	Goal Leader
<p>Reduce the percentage of improper payments made under the Supplemental Security Income (SSI) program.</p>	<p>Increase the volume of our program integrity workloads.</p> <p>Enhance and expand use of technology to reduce improper payments.</p> <p>Pursue new initiatives and program improvements to the extent funding is available.</p> <p>Ensure that we design new initiatives to produce measurable outcomes through well-developed evaluation plans.</p>	<p>Dependence upon SSI recipients and deemors (i.e., those whose income and assets are considered for SSI eligibility and payment amount) timely reporting changes in income and resources.</p> <p>Increase in job growth may result in more SSI recipients working and not reporting their wages timely.</p> <p>Budgetary constraints determine the number of redeterminations we may conduct.</p>	<p>Shirleeta Stanton Associate Commissioner, Office of Income Security Programs, Office of Retirement and Disability Policy</p>

## Agency Priority Goals for FY 2016-FY 2017

FY 2016-FY 2017 Agency Priority Goals	Strategies to Achieve Priority Goals	External Factors	Goal Leader/Deputy Goal Leader
Improve customer service and convenience by increasing online services.	<p>Release new electronic services within the <i>my Social Security</i> portal, including enhanced customer engagement tools to assist users while they are in the online service channel.</p> <p>Work with external partner sites like VA hospitals and state agencies to promote direct access to online services.</p> <p>Develop and implement a strategic marketing plan to increase online services.</p> <p>Continue to pilot a quick self-service kiosk model in our field offices, expanding upon the initial effort (subject to budgetary approval).</p>	Additional authentication steps required by Executive Order 13681 may reduce use due to increased complexity of registration and log in.	<p>Nancy Berryhill Deputy Commissioner, Office of Operations</p> <p>Rob Klopp Deputy Commissioner, Office of Systems</p>
Increase customer satisfaction with our services.	<p>Regularly evaluate our Internet Customer Satisfaction survey results to identify improvements opportunities and take appropriate actions.</p> <p>Regularly evaluate our Field Office, Hearing Office, Social Security Card Center, and telephone customer satisfaction survey results to identify improvement opportunities and take appropriate actions.</p> <p>Conduct Post-Call Surveys for customers of our National 800 Number, collect and analyze customer feedback, and take appropriate actions.</p> <p>Implement the Federal Feedback Button Pilot in Card Centers.</p>	<p>Additional authentication steps required by Executive Order 13681 may affect satisfaction both positively and negatively.</p> <p>Customers may be more satisfied knowing that we have enhanced security features, but the additional complexity in registering and logging in may lower satisfaction.</p>	<p>Nancy Berryhill Deputy Commissioner, Office of Operations</p> <p>Michelle King <i>Acting</i> Deputy Commissioner, Office of Budget, Finance, Quality, and Management</p>

FY 2016-FY 2017 Agency Priority Goals	Strategies to Achieve Priority Goals	External Factors	Goal Leader/Deputy Goal Leader
Improve the integrity of our programs by increasing our Supplemental Security Income (SSI) payment accuracy rate to 95%.	<p>Conduct periodic reviews (redeterminations).</p> <p>Maximize the use of data to detect assets like undisclosed bank accounts and non-home real property.</p> <p>Offer a variety of SSI wage reporting tools.</p> <p>Use behavior science insights to improve recipient reporting.</p> <p>Explore additional data exchanges to verify eligibility and payment amount.</p>	<p>Self-reporting by beneficiaries is not always accurate.</p> <p>Increased fraud detection activities may find more overpayments.</p>	<p>Marianna LaCanfora Assistant Deputy Commissioner, Office of Retirement and Disability Policy</p> <p>Erik Jones Assistant Deputy Commissioner, Office of Operations</p>
Improve customer service by reducing the wait time for a hearing decision.	<p>Increase decision-making capacity.</p> <p>Process and decisional quality Improvements.</p> <p>Increase employee engagement.</p> <p>Leverage technology innovations.</p>	<p>Inability to hire sufficient judges and other staff.</p> <p>Declination of video hearings.</p>	<p>Donna Calvert Assistant Deputy Commissioner, Office of Disability Adjudication and Review</p> <p>Mary Horne Assistant Deputy Commissioner, Office of Operations</p>

# Performance Measures at a Glance

## Our FY 2015 Performance Results

We set aggressive targets for our fiscal year (FY) 2015 measures. We met 23 of the 36 measures with available data. While we made significant progress in many areas, we also faced a number of challenges. We did not meet 14 of the 36 measures with available data.

Below is an assessment of our performance results by strategic goal in FY 2015.

## Our Performance Measures

These tables are a summary of our FY 2016 and FY 2017 performance measures and FY 2015 performance results. We organized the measures based on the strategic goals and objectives they support in the [Agency Strategic Plan for Fiscal Years 2014 – 2018](#) and indicated which measures are Agency Priority Goals (APG). While budgeted workload measures support our strategic goals and objectives, their targets and outcomes are budget dependent. We identify our budgeted workload measures as BWM. We identify newly established measures for FY 2016 and FY 2017 as NEW. We identify the measures we discontinued this year by the purple shading in the FY 2016 target and FY 2017 target. A listing of acronyms for the responsible officials is in [Appendix E, Summary of Key Management Officials' Responsibilities](#).

## Strategic Goal 1: Deliver Innovative, Quality Services

### Strategic Objective 1.1: Develop and Increase the Use of Self-Service Options

Strategic Objective 1.1 Lead: DCO

Vision 2025 Priority: Superior Customer Experience

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
1.1a APG	Improve access to our services by increasing the number of citizens who complete their business with us online	87 million transactions	Increase the number of citizens completing business online by 10% over FY 2014  (77.8 million transactions)			DCO	40
		Met					
1.1b APG NEW	Improve customer service and convenience by increasing online transactions by 25 million each year	87 million online transactions		112 million online transactions	137 million online transactions	DCO DCS	40

### Strategic Objective 1.2: Enhance the Customer Experience by Completing Customers' Business at the First Point of Contact

Strategic Objective 1.2 Lead: DCO

Vision 2025 Priority: Superior Customer Experience

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
1.2a APG	Deliver a world-class customer experience by expanding the use of video technology to hold hearings	27%	30% of hearings conducted by video			DCDAR	43
		Not Met					

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
1.2b	Expand the services available under <i>my Social Security</i> by implementing an online Social Security Number Replacement Card application	The online Social Security Number Replacement Card application was released in November 2015 Met	Complete development and begin testing of the online Social Security Number Replacement Card application			DCO	43
1.2c	Maintain high customer satisfaction with our online services	84 Met	Maintain an average customer satisfaction score of at least 80			DCO	44
1.2d APG	Provide the public with access to personalized information by increasing the number of established <i>my Social Security</i> accounts	6.64 million new accounts Not Met	Increase the number of customers who sign up for <i>my Social Security</i> by 15% over FY 2014 (7.06 million new accounts)			DCO	45
1.2e APG NEW	Increase customer satisfaction with our services	84 satisfaction rating with online services 79% satisfaction rating for office and telephone services		84.5 satisfaction rating with online services 80% satisfaction rating for office and telephone services	85 satisfaction rating with online services 82% satisfaction rating for office and telephone services	DCO DCBFQM	46
1.2f BWM	Complete the budgeted number of retirement, survivors, and Medicare claims	5,327,221 Met	5,247,000	5,586,000	5,732,000	DCO	46

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
1.2g BWM	Achieve the target speed in answering National 800 Number calls	617 seconds (10 minutes, 17 seconds)	700 seconds (11 minutes, 40 seconds)	945 seconds (15 minutes, 45 seconds)	675 seconds (11 minutes, 15 seconds)	DCO	47
		Met					
1.2h BWM	Achieve the target busy rate for National 800 Number calls	7.5%	8%	9.5%	7.0%	DCO	48
		Met					

### Strategic Objective 1.3: Partner with Other Agencies and Organizations to Improve Customers' Experience and Align with the Administration's One-Government Approach

Strategic Objective 1.3 Lead: DCO

*Vision 2025* Priority: Superior Customer Experience

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
1.3a	Minimize the average response time to deliver medical evidence to the Department of Veteran Affairs (VA) for wounded warriors and veterans	Delivered medical evidence in 4.2 business days	Deliver medical evidence to the VA within an average of 5 business days	Continue to deliver medical evidence to the VA within an average of 5 business days	Continue to deliver medical evidence to the VA within an average of 5 business days	DCO	53
		Met					

## Strategic Objective 1.4: Evaluate Our Physical Footprint to Incorporate Improved Service Options

Strategic Objective 1.4 Lead: DCBFQM

Vision 2025 Priority: Innovative Organization

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
1.4a	Evaluate our physical footprint as described in our OMB-approved Real Property Cost Savings and Innovation Plan	Reduced our physical footprint by 1.34 million usable square feet	Reduce our physical footprint from our FY 2012 level by 1.86 million usable square feet			DCBFQM DCO DCDAR	56
		Not Met					
1.4b NEW	Assess field and hearing office lease expirations and increase colocation of our field and hearing offices to reduce our physical footprint			Colocate at least 4 permanent remote site hearing offices with field offices	Colocate at least 7 permanent remote site hearing offices with field offices	DCO DCDAR	56

## Strategic Goal 2: Strengthen the Integrity of Our Programs

### Strategic Objective 2.1: Transform the Way We Record Earnings to Enhance Data Accuracy

Strategic Objective 2.1 Lead: DCS

*Vision 2025* Priority: Innovative Organization

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
2.1a	Improve the accuracy and timeliness of the earnings data used to calculate benefits	Implemented the redesigned software to process Forms W-2 within the Annual Wage Reporting system	Implement the redesigned functionality to process Forms W-2 within the Annual Wage Reporting system by 09/30/2015	Implement the redesigned functionality to process Forms W-2c (Corrections) within the Annual Wage Reporting system	Implement Annual Wage Reporting software to provide earnings data to the IRS earlier in the tax season	DCS	60
		Met					

## Strategic Objective 2.2: Protect the Public's Data and Provide Secure Online Services

Strategic Objective 2.2 Lead: DCBFQM

Vision 2025 Priority: Superior Customer Experience

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
2.2a	Enhance our security features and business processes to prevent and detect fraud	The fraud referral process was transferred to the newly established Office of Anti-Fraud Programs. We use Public Facing Integrity Review data to create and implement the routing transit number blocking process <sup>1</sup>	Increase <i>my Social Security</i> potential fraud referrals through the Public Facing Integrity Review system to the Office of Operations by 10% (10,295) (10,295 referrals)	Identify and investigate at least 500 claims presenting characteristics indicative of fraud	Identify and investigate at least 750 claims presenting characteristics indicative of fraud	DCBFQM	63
		Met					

## Strategic Objective 2.3: Increase Payment Accuracy

Strategic Objective 2.3 Lead: DCRDP

Vision 2025 Priority: Innovative Organization

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
2.3a APG	Reduce the percentage of improper payments made under the SSI program	Data available April 2016	No more than 6.2% of all payments made under the SSI program are improper payments (i.e., overpayments and underpayments)			DCRDP	69

---

<sup>1</sup> Due to the sensitivity of this information, we cannot include exact numbers.

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
2.3b	Maintain a high accuracy rate of payments made through the Old-Age, Survivors, and Disability Insurance program to minimize improper payments	Data available April 2016	99.8% (O/P)	99.8% (O/P)	99.8% (O/P)	DCRDP	70
		Data available April 2016	99.8% (U/P)	99.8% (U/P)	99.8% (U/P)		
2.3c APG NEW	Improve the integrity of the SSI program by ensuring that 95% of our payments are free of overpayment	Data available April 2016		95% accuracy rate	95% accuracy rate	DCRDP DCO	70
2.3d BWM	Complete the budgeted number of full medical continuing disability reviews (CDR)	799,013	790,000	850,000	1,100,000	DCO	70
		Met					
2.3e BWM	Complete the budgeted number of Supplemental Security Income (SSI) non-medical redeterminations	2,266,993	2,255,000	2,522,000	2,822,000	DCO	71
		Met					

## Strategic Goal 3: Serve the Public through a Stronger, More Responsive Disability Program

### Strategic Objective 3.1: Improve the Quality, Consistency, and Timeliness of Our Disability Decisions

Strategic Objective 3.1 Lead: DCRDP

Vision 2025 Priority: Innovative Organization

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
3.1a	Ensure the quality of our decisions by achieving the disability determination services (DDS) net accuracy rate for initial disability decisions	98% net accuracy	97% net accuracy	97% net accuracy	97% net accuracy	DCO	76
		Met					
3.1b	Increase our ability to provide timely decisions by reducing the percentage of pending Appeals Council requests for review 365 days old or older	82%	80% of cases pending less than 365 days	81% of cases pending less than 365 days	82% of cases pending less than 365 days	DCDAR	76
		Met					
3.1c APG NEW	Improve customer service by reducing the wait time for a hearing decision			Decide 99% of the cases that begin the fiscal year at 430 days old or older	Decide 99% of the cases that begin the fiscal year at 365 days old or older	DCDAR DCO	77
3.1d BWM	Complete the budgeted number of initial disability claims	2,759,432	2,767,000	2,695,000	2,810,000	DCO	77
		Not Met					
3.1e BWM	Complete the budgeted number of disability reconsideration claims	723,485	739,000	702,000	715,000	DCO	78
		Not Met					

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
3.1f BWM	Complete the budgeted number of hearing requests	663,129	727,000	703,000	784,000	DCDAR	78
		Not Met					
3.1g BWM	Achieve the target number of initial disability claims pending	621,315	621,000			DCO	78
		Not Met					
3.1h BWM	Achieve the target number of disability reconsiderations pending	143,540	143,000			DCO	79
		Not Met					
3.1i BWM	Average processing time for initial disability claims	114 days	109 days	113 days	113 days	DCO	79
		Not Met					
3.1j BWM	Average processing time for reconsiderations <sup>2</sup>	113 days			109 days	DCO	80
3.1k BWM	Average processing time for hearings decisions	480 days	470 days	540 days	555 days	DCDAR	80
		Not Met					
3.1l BWM	Achieve the budgeted goal for disability determination services (DDS) case production per workyear	307	313			DCO	81
		Not Met					

---

<sup>2</sup>We developed management information for Average Processing Time for Disability Reconsiderations in FY 2013. FY 2014 was the first full fiscal year for which data was available for this measure. Now that we have had the opportunity to analyze at least two years of actual data, this year we developed a performance target for FY 2017.

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
3.1m BWM	Achieve the budgeted goal for hearing case production per workyear	95	104			DCDAR	81
		Not Met					

### Strategic Objective 3.2: Maximize Efficiencies throughout the Disability Program

Strategic Objective 3.2 Lead: DCS

*Vision 2025* Priority: Innovative Organization

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
3.2a	Improve the disability determination process by increasing the percentage of initial disability claims using electronically transmitted health records and medical evidence (Health IT)	6.1% (167,626 initial claims)	6% of processed initial disability claims with health IT medical evidence (164,820 initial claims)	8% of processed initial disability claims with electronically transmitted health records and medical evidence (Health IT) (222,000 initial claims)	11% of processed initial disability claims with electronically transmitted health records and medical evidence (Health IT) (308,000 initial claims)	DCS	84
		Met					

### Strategic Objective 3.3: Enhance Employment Support Programs and Create New Opportunities for Returning Beneficiaries to Work

Strategic Objective 3.3 Lead: DCRDP

Vision 2025 Priority: Innovative Organization

Performance Measure		FY 2015 Performance	FY 2015 Target	FY 2016 Target	FY 2017 Target	Responsible Official	Page
3.3a	Increase the number of beneficiaries returning to work by achieving the target number of Social Security Disability Insurance and Supplemental Security Income disability beneficiaries with Tickets assigned and in use, who work above a certain level	Data available April 2016	50,000 beneficiaries	55,000 beneficiaries	60,000 beneficiaries	DCRDP	88

### Strategic Goal 4: Build a Model Workforce to Deliver Quality Service

#### Strategic Objective 4.1: Attract and Acquire a Talented and Diverse Workforce that Reflects the Public We Serve

# Agency Plans and Performance

Setting goals and measuring our achievements are vital to our success. This annual performance report reflects the goals, objectives, and strategies defined in our [Agency Strategic Plan for Fiscal Years 2014 – 2018](#).

We organized this section by our five strategic goals, and the strategic objectives and strategies supporting each goal. The key initiatives under each strategic objective support our strategic goals, objectives, and strategies. We evaluate our performance results by the performance measures and targets following each strategic objective.

We based our FY 2017 plans on full funding of the FY 2017 President's Budget.

## Strategic Goal 1: Deliver Innovative, Quality Services

We have a long history of exemplary customer service marked by high customer satisfaction. Our high level of customer satisfaction is, in part, the result of our success using technology to improve and expand the services we offer the American public.

We serve the public through multiple channels: in person, telephone, online, and by mail. In FY 2015, we assisted about 41 million field office visitors, handled nearly 37 million calls through our National 800 Number and 60 million calls in our field offices, registered over 6.64 million users for [my Social Security](#), processed over 87 million online transactions, and mailed nearly 350 million notices.

Technology will not replace our employees or in-person service for customers who require or prefer more personalized service. Our goal is to provide high quality and timely services while offering customers the convenience of interacting with us from anywhere. At the same time, we will continue providing telephone and field office options for situations requiring personalized service.

## Strategic Objective 1.1: Develop and Increase the Use of Self-Service Options

### **Vision 2025 Priority: Superior Customer Experience**

Over the past few decades, advances in technology have revolutionized the business world, changing the pace of our business processes and increasing our ability to offer innovative service options. In 2007, less than 10 percent of claims were filed online – in FY 2015, more than 54 percent of claims were filed online.

The public expects to complete more business online, and we continue meeting those expectations with new and improved technologies. As we increase the number and types of self-service solutions, paperless processes, and electronic workflows, we will improve our overall efficiency. As we expand our online options, we will ensure our customers' information remains secure.

We are working to increase customer satisfaction by expanding personalized self-service delivery options, which enable customers to access our services at their convenience. We will continue meeting our customers' needs by providing them with choices, offering service online, in person, or by telephone.

### Strategies

- Expand personal services available under [my Social Security](#) to include high-volume workloads, such as Social Security number replacement cards;
- Move our online applications under a single customer account registration;
- Accelerate development of additional online products;
- Expand the availability of online applications using responsive design and the use of self-help personal computers available in our offices or community locations;
- Provide direct access to information and notices for individuals and designated third parties;
- Offer electronic delivery of notices and an option to opt out of paper notices; and
- Increase the public's use of self-service options by aggressively promoting and marketing our online applications and services.

## Progress Update

We took the following steps in FY 2015 to develop and increase our self-service options (see Key Initiatives and Performance Measures for more details):

- Launched Social Security Benefit Statement (i1099) online, reducing mail requests by more than 60 percent;
- Streamlined the online disability application, eliminating 25 duplicate data fields;
- Replaced self-help personal computers with virtual desktop infrastructure and expanded service to 300 new offices, bringing the total 1,684 computers in 790 offices;
- Released the online Social Security Number Replacement Card application in November 2015;
- Continued [my Social Security](#) marketing campaign; and
- Made the following progress on our Social Security Express initiatives:
  - Installed 7 customer service stations and answered 2,102 video calls to assist customer service station users in real time;
  - About 135,000 iClaims were filed using self-help personal computers;
  - Partnered with 93 additional sites to add desktop icons, bringing our total to 261 partner sites with desktop icons; and
  - Designed a website so that third-party sites can download the desktop icon directly, minimizing user error and streamlining the process.

## Next Steps

- Enhance [our website](#) with responsive web design to support access by personal computer, mobile devices, and tablets;
- Expand i1099 application to include an option for beneficiaries to opt out of mailed Social Security Benefit Statements and add downloadable functionality; and
- Continue planning, analysis, and development of new applications to put behind the [my Social Security](#) portal, including:
  - Message center functionality, which will enable secure communications online; and
  - SMART Claim application, which will enable customers to file for retirement, disability, and Medicare benefits at the same time.

## Risks and External Factors

In addition to general privacy, legal, and budget concerns, the following risks or external factors may affect our efforts to develop and increase the use of self-service options:

- Demand for new technologies and online services is greater than our ability to provide them;
- Implementing stronger fraud prevention protocols for [my Social Security](#) account authentication, as called for in Executive Order 13681, could result in increased in-person visits to field offices;
- Adequate training to ensure employees are comfortable with new technologies; and
- Implementation problems with new technologies.

## Key Initiatives

### Expanding Online Access through Social Security Express

Customers without access to a computer might think they cannot use our online services, but our new service options expand access to our online services. Our Social Security Express initiative provides access to our online services, including [my Social Security](#), in our field offices and in external locations. Using these services helps minimize wait times for visitors who must complete their business with us in person.

Currently, we have three major Social Security Express projects underway:

- **Self-help personal computers** are available in 790 offices nationwide. These computers allow our customers to access our online services using computers inside our offices, enabling customers to complete some transactions without waiting to see a representative.

In FY 2014, we purchased a new virtual desktop infrastructure technology, which enables us to troubleshoot these computers remotely. The new technology reduces the amount of staff time required to maintain our current self-help personal computers.

In FY 2015, we added 150 locations. We will continue expanding the program in FY 2016 and FY 2017, adding new locations and additional equipment as needs are defined.

- **Social Security Express Desktop Icons** provide a direct link from a public computer or website to most of the agency's online services. These icons are available to external partner sites, such as libraries and senior centers. Users can access the same services that are available through the self-help personal computers in our field offices. If customers have questions or require assistance accessing online services through the icon links, they can call our National 800 Number or visit a field office for help completing their tasks.

In FY 2015, we designed a process allowing partner sites to download the desktop icon directly to a PC or website and launched the site nationally on May 15, 2015. The installation process is now more efficient, and we have added 134 new partners. Visits to Social Security Express through our icons more than tripled from 19,343 visits in FY 2014 to 61,470 visits in FY 2015.

- **Customer service stations** are stand-alone units, containing a computer with a touch screen monitor and video access, enabling the user to have real-time contact with a representative, if needed. The unit also contains the following features:
  - A scanner, enabling customers to scan and upload identification documents (up to passport size);
  - A printer, enabling customers to print verification letters. (If the customer does not take the document within 15 seconds, the printer retracts the document and stores it for employees to destroy);
  - A signature tablet, enabling customers to write confidential information to video agents rather than speaking it out loud; and
  - A pressure sensitive floor mat that begins the computer session when a person steps on it. If the customer steps away without personally ending the session, the system will begin a 10-second countdown and end the session automatically.

### Enhancing Delivery Options for the Replacement Social Security Benefit Statement

In FY 2014, our i1099 online application only allowed beneficiaries to request a mailed copy of their SSA-1099 or SSA-1042s tax form, or Social Security Benefit Statement. Beginning in February 2015, people who receive benefits and have a [my Social Security](#) account can view, print, and save their Social Security Benefit Statement immediately. In FY 2015, beneficiaries accessed their statements online more than 624,000 times, reducing mail requests by more than 60 percent.

Additional planned features include a downloadable Social Security Benefit Statement and the ability for users to opt out of having their statements delivered by mail.

## Leveraging **my Social Security**

To date, we have over 45,000 web pages, 20 online services, information in 18 languages, and a presence on several social media sites. We host over 12 million visits to our website each month. Our customers are demanding more online services, and we are responding as quickly as possible, while ensuring **my Social Security** remains secure and easy to use.

Current features enable Social Security disability and Supplemental Security Income beneficiaries to access their benefit verification letters, payment histories, and earnings records instantly. Beneficiaries can also change their addresses and direct deposit information online. Since it launched in 2012, **my Social Security** has more than 21 million registered users and consistently ranks as one of the top 10 in customer satisfaction for all federal websites.

Work is now underway on a new feature called SMART Claim that will allow our customers to file a claim for retirement, disability, Medicare, and Supplemental Security Income benefits using a single application within **my Social Security** by the end of FY 2016.

Additional features planned for **my Social Security** and SMART Claim in FY 2015 and into FY 2016 include:

- Social Security number replacement card requests;
- New secure customer engagement tools, including enhancements to click-to-callback, dynamic help assistance, a secure message center, and alerts and notifications;
- An alternate path allowing customers to complete their applications online, if they are unable to register for or do not have a **my Social Security** account;
- Online continuing disability review notification and response options for beneficiaries; and
- A claims appeal path.

We are planning additional enhancements that will allow users to view certain notices online in FY 2017.

## Educating the Public about Our Programs

Ensuring the public understands our programs is part of our social responsibility. Our national marketing campaign uses a wide variety of media channels to tell the public how to access and use our programs. As more of our customers move toward a preference and expectation for online services, we are focusing significant resources on promoting our online options.

We promote our online services through public service announcements on television, radio, billboards, bus posters, and displays in airport terminals, as well as through social media. We engage with the public on our Facebook page, responding to questions, and promoting our services. Over the next several years, we will continue expanding our social media efforts using search engine marketing, paid Facebook advertising, and blogs promoting our online service options.

We encourage people to create **my Social Security** accounts through a variety of communications channels, including our mailed *Social Security Statements*. Additionally, our local offices find creative and cost-effective ways to inform the community about the advantages of using our secure online services.

We also work with a broad network of national organizations, advocacy groups, and other stakeholders to promote our online services. Additionally, we produce webinars and webcasts to increase our customers' awareness of our online services and the benefits of using these services.

Since **my Social Security** provides quick access to documents used in tax preparation, we focused our FY 2015 promotional efforts on tax preparers. We partnered with the Internal Revenue Service (IRS) to include **my Social Security** information in its publications and on its website. We also participated in IRS tax forums. We also worked with TaxACT, a tax preparation software company to provide information to its six million customers. TaxACT plans to place **my Social Security** banner ads and other content throughout its website this year. TaxACT is also working with us to incorporate **my Social Security** into its tax preparation software next year.

Together with the U.S. Department of the Treasury, the Women’s Institute for a Secure Retirement, the American Savings Education Council, and America Saves, we launched the Campaign for a Secure Retirement. The campaign ran from late February 2015 through the conclusion of National *my Social Security* week in July 2015. This nationwide campaign encouraged retirement planning and saving and promoted the online *Social Security Statement* as an important retirement planning tool.

We continued to build relationships with other organizations throughout FY 2015. We participated in approximately 40 national conferences, and we will continue to coordinate *my Social Security* signup events. In the first half of FY 2015, we participated in 981 signup events with over 116,072 individuals attending. These events assisted the public in creating 16,781 *my Social Security* accounts.

As we move into FY 2016 and FY 2017, we will continue marketing our online services. Other plans include:

- Launching an employee education program in FY 2016, focusing on preparing and providing employees with the information and tools they need to communicate our messages;
- Communicating key information related to the disability solvency trust fund issue;
- Simplifying the *Social Security Statement* in FY 2016; and
- Launching the simplified *Social Security Statement* in FY 2017.

### Enhancing Online Appeals

Since 2007, claimants or their representatives have been able to request a reconsideration or hearing for a denied disability claim online. In FY 2015, we improved the existing application to simplify the user experience and enable users to complete the full application online. We also streamlined the application process by reducing redundant keying and providing clearer navigation.

Users can now submit additional forms and documents online. These changes allow users to submit a complete hearing request online, making the process more efficient.

We will work to expand online appeals in FY 2016 and FY 2017 to allow users to request an appeal on a nonmedical claim.

### Implementing Online Social Security Number Replacement Card Application

Replacing Social Security number cards is one of our most requested services. In FY 2015, we issued 11 million replacement cards in field offices and Social Security card centers across the country.

In FY 2014, we began work to enable certain **my Social Security** users to apply online for a replacement Social Security number card. We expect to launch this new feature to select states in FY 2016, enabling users to avoid travel time, wait time, and in-person interviews. In FY 2017, we will continue to expand to additional states.

The application will provide users with a secure way to request replacement Social Security number cards online and will allow our employees more time to process other workloads.

## Appeal Online

If you recently applied for Social Security or Supplemental Security Income disability benefits and were denied for medical reasons, you can file an appeal online.

[www.socialsecurity.gov/disability/appeal](http://www.socialsecurity.gov/disability/appeal)

## Performance Measures – Strategic Objective 1.1

### 1.1a APG: Improve access to our services by increasing the number of citizens who complete their business with us online (Agency Priority Goal)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	13.5 million	16.0 million	21.8 million	46.3 million	70.8 million	87 million		
Target					Increase the number of citizens completing business online by 10% over FY 2013 (50.9 million transactions)	Increase the number of citizens completing business online by 10% over FY 2014 (77.8 million transactions)		
Target Met					Met	Met		

**Results:** We exceeded our target in FY 2015, processing 87 million online transactions. We increased the number of citizens completing their business online by 23 percent over FY 2014.

**Data Definition:** Online services usage for [my Social Security](#) suite, [my Social Security](#) Help Desk-Call Back, Pre-entitlement – Informational Services (excludes visits to Social Security Online, Frequently Asked Questions, and Field Office Locator), Entitlement – Claims & Appeals, and Post Entitlement.

**Data Source:** [Social Security, Office of Electronic Services and Technology Intranet site: eServices Statistics](#)

### 1.1b APG NEW: Improve customer service and convenience by increasing online transactions by 25 million each year (Agency Priority Goal)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	13.5 million	16.0 million	21.8 million	46.3 million	70.8 million	87 million		
Target							112 million transactions	137 million transactions
Target Met								

**Data Definition:** Online services usage for [my Social Security](#) suite, [my Social Security](#) Help Desk-Call Back, Pre-entitlement – Informational Services (excludes visits to Social Security Online, Frequently Asked Questions, and Field Office Locator), Entitlement – Initial Claims and Supporting Info, and Post Entitlement.

**Data Source:** [Social Security, Office of Electronic Services and Technology](#)

## Strategic Objective 1.2: Enhance the Customer Experience by Completing Customers' Business at the First Point of Contact

### *Vision 2025 Priority: Superior Customer Experience*

Whether customers call, visit us in person, or use our website, they expect to get accurate information and quickly complete their business without the need to recontact us. As more customers expect to complete their business online or through other self-service channels, we are focusing on improved call routing, video service delivery, and ongoing employee training to ensure we complete transactions efficiently and accurately at the first point of contact.

### Strategies

- Implement online support options, including click-to-talk, screen sharing, and instant messaging;
- Integrate our online applications, such as the streamlined online disability application; and
- Increase the use of video service.

### Progress Update

We took the following steps in fiscal year (FY) 2015 to help ensure our customers can complete their business during their first contact with us (see Key Initiatives and Performance Measures for more details):

- Completed the nationwide rollout of the Social Security Electronic Remittance System in December 2014;
- Installed 122 of the 133 desktop video units we purchased in FY 2014 in third-party locations;
- Implemented dynamic help and click-to-call back customer service features within the *my Social Security* portal; and
- Implemented a proof of concept to determine if we can use less expensive hardware to provide video service.

### Next Steps

- Continue planning and analysis for customer engagement tools for click-to-chat, click-to-video chat, screen sharing, secure messaging, and online notices within the *my Social Security* portal;
- Continue the planning and analysis phase of SMART claim, allowing customers to apply for all benefits with a single application, including Supplemental Security Income; and
- Expand video service delivery to new locations.

### Risks and External Factors

In addition to general privacy, legal, and budget concerns, the following risks or external factors may affect our efforts to enhance the customer experience by completing customers' business at the first point of contact:

- Upgrading bandwidth for video connections is expensive and time consuming; and
- Hardware for video service delivery is expensive.

## Key Initiatives

### Establishing the Social Security Electronic Remittance System

In early FY 2015, we launched the Social Security Electronic Remittance System nationwide. Previously, customers could only pay for preapproved standard service fees, such as those for copying electronic or paper folders, by check or money order. Our new electronic remittance system also enables payment by credit and debit card. The credit card machines used by the system are equipped with the latest chip-and-PIN technology. Because we must receive payment before we can complete the customer's request, the new system allows us to process transactions immediately. Customers can request service, make payment, and receive service promptly in cases where the files are readily accessible.

In a later phase of this project, we plan to handle other types of collections through this system.

### Expanding Video Service Delivery

Some of our customers live in areas with limited public transportation and have difficulty getting to our field offices. Video service delivery allows us to provide services to our customers at convenient third-party sites, such as hospitals, libraries, community centers, American Indian tribal centers, and homeless shelters. Video services reduce time and costs for traveling to remote locations.

To support a projected increase in disability determination services (DDS) disability hearing workloads (i.e., appeals of continuing disability review decisions), we are relocating 35 existing video units to offices where there is a greater need. In FY 2015, we installed 122 of the 133 desktop units that we purchased in FY 2014. The units will increase our capacity for conducting video hearings, expand video remote interpreting services, and provide video support for other work efforts. In FY 2016, we will explore more cost-efficient technology.

### Providing Real-Time Assistance to Online Users

Delivering world-class customer service to all of our customers, including our online users, is one of our highest priorities. In May 2014, we celebrated 20 years of providing online services.

Our newest service addition to **my Social Security** is a suite of online information and help tools. In FY 2015, we launched a new dynamic help tool and an enhanced click-to-call back option.

- **Dynamic help** presents users with three responses, based on the task the user is performing when he or she requests help. If the user still has questions, he or she can type the question into a specialized search feature that will return related information.
- If the user selects the **call back option**, our enhanced feature displays the user's phone number and allows the user to submit that number or provide an alternate. The user also receives an approximate call back time.

In FY 2016, we plan to release our new secure Message Center, enabling **my Social Security** users to receive alerts, messages, and agency announcements. Later enhancements will enable users to contact us directly through the Message Center.

## Performance Measures – Strategic Objective 1.2

### 1.2a APG: Deliver a world-class customer experience by expanding the use of video technology to hold hearings (Agency Priority Goal)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	20.3%	20.1%	22.8%	26.1%	28%	27%		
Target					28% of hearings conducted by video	30% of hearings conducted by video		
Target Met					Met	Not Met		

**Results:** We did not meet our target for FY 2015. Out of 563,893 hearings, we held 152,880 of those hearings by video.

**Data Definition:** The percentage of total hearings held during the fiscal year that were video hearings. We derived the percentage by dividing the total number of video hearings held during the fiscal year by the total number of hearings held during the fiscal year.

**Data Source:** Case Processing Management System

### 1.2b: Expand the services available under **my Social Security** by implementing an online Social Security Number Replacement Card application

Fiscal Year	2014	2015	2016	2017
Performance	Project timeline was adjusted to accommodate pending changes to regulations and contract	The online Social Security Number Replacement Card application was released in November 2015		
Target	Complete planning and analysis for implementing an online Social Security Number Replacement Card application	Complete development and begin testing of the online Social Security Number Replacement Card application		
Target Met	Not Met	Met		

**Results:** We expanded services available under **my Social Security** by releasing the online Social Security Number Replacement Card application in November 2015. Additionally, we implemented an online Medicare Replacement Card application. We released this application in May 2015.

**Data Definition:** Completion of the planning and analysis portion of the project as defined by the System Development Lifecycle on the Project Resource Guide Intranet website.

**Data Source:** Completed Project Scope Agreement and System Development Plan

### 1.2c: Maintain high customer satisfaction with our online services

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	81	81	82	82	83	84		
Target					Maintain an average customer satisfaction score of at least 80	Maintain an average customer satisfaction score of at least 80		
Target Met					Met	Met		

**Results:** One of our highest priorities is delivering world-class customer service to all of our customers, including our online users. We exceeded our target for FY 2015. A score of 80 or higher is considered to be the threshold for excellence.

**Data Definition:** Average ForeSee Customer Satisfaction scores for the Social Security Administration's (SSA) online services. Note that ForeSee Customer Satisfaction reports their data quarterly, based upon the calendar year. For this measure to be consistent with the fiscal year, we deviate from the ForeSee Customer Satisfaction scores time-period and use the fiscal year quarters. As a result, there may be some deviation from ForeSee Customer Satisfaction scores published documents and the measure reported here.

**Data Source:** Table entitled "SSA Average Satisfaction Score" found on the [Office of Electronic Services and Technology Intranet site](#)

**1.2d APG: Provide the public with access to personalized information by increasing the number of established *my Social Security* accounts (Agency Priority Goal)**

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance				6.32 million new accounts	6.14 million new accounts	6.64 million new accounts		
Target					Increase the number of customers who sign up for <i>my Social Security</i> by 15% over FY 2013 (7.27 million new accounts)	Increase the number of customers who sign up for <i>my Social Security</i> by 15% over FY 2014 (7.06 million new accounts)		
Target Met					Not Met	Not Met		

**Results:** In FY 2015, we increased the number of customers who signed up for *my Social Security* by 8.14 percent over FY 2014. We did not meet our goal.

**Data Definition:** The target is calculated as a percentage increase over the previous year's actual results. Thus, the FY 2015 target was calculated by taking the FY 2014 actual registrations (6.14 million) and increasing it by 15%, resulting in a target of 7.06 million new accounts.

**Data Source:** Social Security Administration, Office of Electronic Services and Technology, Division of Authentication

## 1.2e APG NEW: Increase customer satisfaction with our services (Agency Priority Goal)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
<b>Performance</b>	81 satisfaction rating with online services  78% satisfaction rating for office and telephone services	81 satisfaction rating with online services  81% satisfaction rating for office and telephone services	82 satisfaction rating with online services  81% satisfaction rating for office and telephone services	82 satisfaction rating with online services  80% satisfaction rating for office and telephone services	83 satisfaction rating with online services  Data is not available for office and telephone services	84 satisfaction rating with online services  79% satisfaction rating for office and telephone services		
<b>Target</b>							84.5 satisfaction rating with online services  80% satisfaction rating for office and telephone services	85 satisfaction rating with online services  82% satisfaction rating for office and telephone services
<b>Target Met</b>								

**Data Definition:** Online services satisfaction rating comes from ForeSee’s e-Government Report Card. The satisfaction rating is calculated by averaging the scores of the following online services: SSA Main Website, iClaim, iClaim Disability, Retirement Estimator, iAppeals, Extra Help with Medicare Prescription Drug Plans, Business Services Online, and [my Social Security](#). The average is weighted based on the number of surveys completed on each of the above online services.

For office and telephone services, we define “satisfaction” as an overall service rating of excellent, very good, or good (E/VG/G) on a six-point scale: excellent, very good, good, fair, poor, or very poor. We determine the percent “satisfied” by dividing the number of responders who rate overall service as E/VG/G by the total number of responders providing a rating. We weight the overall satisfaction rate for both office and telephone services to reflect the annual population of customers served through that type of service. We then combine the weighted results for the individual surveys to compute the overall customer satisfaction rate.

**Data Source:** Social Security Administration, Office of Electronic Services and Technology and Office of Quality Review

## 1.2f: Complete the budgeted number of retirement, survivors, and Medicare claims (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	4,700,990 <sup>1</sup>	4,877,955	5,001,092	5,006,855 <sup>1</sup>	5,023,533 <sup>1</sup>	5,327,221		
Target	4,718,000 (4,658,124 rec'd)	4,590,000	4,918,000	5,269,000 (4,952,591 rec'd)	5,131,000 (4,990,259 rec'd)	5,247,000	5,586,000	5,732,000
Target Met	Met	Met	Met	Met	Met	Met		

**Results:** We met our FY 2015 target, completing 5,327,221 retirement, survivors, and Medicare claims.

**Data Definition:** The number of retirement, survivors, and Medicare claims completed in the current fiscal year.

**Data Source:** Social Security Administration's Cost Analysis System

## 1.2g: Achieve the target speed in answering National 800 Number calls (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	203 seconds (3 minutes, 23 seconds)	180 seconds (3 minutes)	294 seconds (4 minutes, 54 seconds)	617 seconds (10 minutes, 17 seconds)	1,323 seconds (22 minutes, 3 seconds)	617 seconds (10 minutes, 17 seconds)		
Target	269 seconds (4 minutes, 29 seconds)	267 seconds (4 minutes, 27 seconds)	285 seconds (4 minutes, 45 seconds)	535 seconds (8 minutes, 55 seconds)	1,020 seconds (17 minutes)	700 seconds (11 minutes, 40 seconds)	945 seconds (15 minutes, 45 seconds)	675 seconds (11 minutes, 15 seconds)
Target Met	Met	Met	Not Met	Not Met	Not Met	Met		

**Results:** We met our FY 2015 target by answering our National 800 Number calls one minute, 23 seconds quicker than our target speed.

**Data Definition:** We calculate the speed of answering by dividing the wait time of all National 800 Number calls answered by agents by the number of all National 800 Number calls answered by agents in the fiscal year. Wait time begins from the time we transfer the caller to the agent queue (waiting for an agent) and continues until an agent answers the call.

**Data Source:** Data generated by Cisco Intelligent Contact Management system

---

<sup>1</sup> Performance results are based on actual receipts because actual receipts were lower than the target.

### 1.2h: Achieve the target busy rate for National 800 calls (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	5.0%	3.0%	5.0%	11.9%	13.5%	7.5%		
Target	8.0%	6.0%	6.0%	16.0%	14%	8%	9.5%	7.0%
Target Met	Met	Met	Met	Met	Met	Met		

**Results:** In FY 2015, our busy rate for National 800 calls was below that of our target of 8 percent. We exceeded our target.

**Data Definition:** We calculate the agent busy rate as the number of National 800 Number busy messages divided by the number of National 800 Number calls requesting agent service in the fiscal year. The caller receives a busy message when the number of calls offered exceeds the number of telephone lines available or when the agent queue has reached its maximum capacity of waiting calls.

**Data Source:** Data generated by Cisco Intelligent Contact Management system

## Strategic Objective 1.3: Partner with Other Agencies and Organizations to Improve Customers' Experience and Align with the Administration's One-Government Approach

### *Vision 2025 Priority: Superior Customer Experience*

Many people seeking benefits from us also interact with other agencies and private organizations. By partnering with other agencies, community-based organizations, tribal governments, and the private sector, we can improve our customers' experiences. We can learn from each other, share data, and develop processes that help our customers access services more quickly and easily.

### Strategies

- Implement Social Security Express to provide service using self-service customer service stations in community locations;
- Provide Social Security services through other government agencies, community-based organizations, tribal governments, and private organizations that serve our customers;
- Increase collaboration with the Department of Defense (DoD) and Department of Veterans Affairs (VA) to improve processes for veterans and service members; and
- Improve information sharing among other government agencies for records, data, and other information.

### Progress Update

We took the following steps in fiscal year (FY) 2015 to improve customers' experience through partnerships with other agencies (see Key Initiatives and Performance Measures for more details):

- Installed three additional customer service stations in the New York and Philadelphia regions, bringing the total to seven;
- Completed 4,274 transactions on our Customer Service Stations (CSS), including answering 2,102 video calls to assist customers in real time;
- Partnered with over 50 community locations to provide video service delivery; and
- Partnered with organizations affiliated with the VA and Health and Human Services to expand our Social Security Express Projects;
- Partnered with the Internal Revenue Service (IRS) to promote each other's online services. The IRS added the SSA Express icon link to 100 of its kiosks in 37 locations across the country; and
- Partnered with the Alaska Online with Libraries to provide 125 video locations across remote Alaska, areas to reduce travel time for claimants and representatives attending hearings before an administrative law judge.

### Next Steps

- Evaluate the customer service station project and, if successful, obtain agreements with additional third-party sites for installation;
- Issue additional desktop icons to local government and private organizations;
- Partner with additional veterans organizations to provide access to our online services;
- Expand data exchanges with the VA and DoD;
- Determine system requirements to exchange information with the VA to receive medical information quicker;
- Increase federal data exchange partnerships from 18 federal agencies to 22 federal agencies;
- Develop and publish the types of data commonly shared among federal agencies; and
- Add links to the IRS web site on our self-help personal computers in up to 16 pilot locations.

## Risks and External Factors

In addition to general privacy, legal, and budget concerns, the following risks or external factors may affect our efforts to partner with other agencies and organizations to improve our customers' experience and align with the Administration's one-government approach:

- The DoD and VA have their own mission-critical work, priorities, and resource limitations;
- Lack of buy-in from potential partners; and
- Problems with new technologies.

## Key Initiatives

### Expanding Our Partnerships with External Organizations

Our Social Security Express initiative currently includes two self-service options that allow the public to complete their business from external partner locations (local, state, or Federal Government agencies such as the VA or the Department of Housing and Urban Development). Those self-service options are:

- A Social Security Express icon installed on the partner sites' desktop computers, enabling access to our online services; and
- A customer service station, containing a desktop computer and a printer, offering limited online services and video assistance from one of our employees.

In FY 2013, we launched the program, and 25 partner sites downloaded the Social Security Express icon to the desktops of their public computers. In FY 2014, we expanded our partnership to 168 sites. We partnered with 93 additional sites in FY 2015. In total, 261 partner sites have installed the Social Security Express icon.

In FY 2014, we installed one customer service station in a field office as a proof of concept and implemented three additional customer service stations in three external partner sites. In FY 2015, we added three additional customer service stations, bringing the total to seven.

The customer service stations allow us to offer our services in locations other than field offices, providing an additional vehicle for service delivery to our customers and reducing foot traffic in our field offices. We will evaluate usage levels and customer satisfaction from our proof of concept. If the proof of concept is successful, we will make modifications based on customer feedback and proceed with a pilot.

We also have partnerships with over 50 community locations to provide video service delivery. We plan to identify new video service delivery sites in FY 2016 focused on serving the Native American population, Wounded Warriors, veterans, and people who are disabled.

### Launching a Federal Data Exchange Community of Practice

We initiated and now lead the Federal Data Exchange Community of Practice, facilitating records, data, and other information exchanges across federal agencies. Our collaborative efforts will help build a larger knowledge base, find solutions for data exchange challenges, identify cross-organizational solutions, prioritize and resolve problems, harmonize policy and processes where possible, share best practices, and build a network of federal data exchange partners.

In FY 2015, we developed a list of the most common types of data regularly shared among federal agencies and the best sources for each type. We plan to share the list through the Federal Data Exchange Community of Practice in FY 2016. We created a site on MAX.gov, hosted by OMB, to share documents, agendas, presentations, and contact lists. Our site has a 94 percent enrollment rate. In FY 2015, we added 11 new agencies to the group, expanding the network by 69 percent. In FY 2016, we will develop a list of prioritized activities and objectives. We plan to implement at least two of those prioritized activities in FY 2017.

### Establishing a State Data Exchange Community of Excellence

Since Congress passed the Affordable Care Act in 2010, the Administration has led efforts to standardize public health program eligibility policies, data use, and information technology tools. The standardization will streamline states' public health business processes, improve service delivery, and enhance data accuracy.

In FY 2015, we established a public-private partnership called the State Data Exchange Community of Excellence whose goal is to advance the Administration's one-government approach. The State Data Exchange Community of Excellence will include federal, state, and private stakeholders, including the Department of Health and Human Services, the Administration of Children and Families, the Centers for Medicare and Medicaid Services, the United States Department of Agriculture, Food and Nutritional Services, the American Public Health Services Administration, and Governor-appointed human service administrators. We are finalizing a tri-agency agreement with Health and Human Services and the Department of Agriculture to share our data through a hub that will help states determine a person's eligibility for certain benefits.

In FY 2016, we will work with federal agencies and the American Public Health Services Association to survey and evaluate data exchange needs in each state. We will also help to develop a prioritized list of activities for the State Data Exchange of Excellence. We plan to implement at least two of those activities in FY 2017.

### Expanding the Virtual Lifetime Electronic Record

In April 2009, the DoD and VA launched the [Virtual Lifetime Electronic Record](#) initiative to create a unified lifetime electronic health record for members of the Armed Services. We are working closely with both agencies to ensure we address service members' and veterans' needs as seamlessly as possible when applying for Social Security benefits by fully automating access to medical records.

In FY 2015, we worked with the DoD and VA to:

- Enhance the clinical content available for health information technology (IT) exchange;
- Implemented eAuthorization, an electronic signature on our Authorization to Disclose Information, Form SSA-827, with all health IT partners; and
- Pilot a health IT exchange.

The health IT exchange will provide our veterans, service members, and their families with a high level of customer service and will enable greater decision support for examiners, thereby improving the overall case processing time. The national rollout plan is scheduled for implementation in FY 2016 in collaboration with the DoD.

### Strengthening the Social Security Number Application Process

Enumeration is our process of assigning Social Security numbers and issuing Social Security cards. Each year we receive approximately 16 million applications for original and replacement Social Security cards. Our employees use the Social Security number application process, a web-based system, to record information and evidence submitted with a Social Security number application. This system is available in all field offices (including Social Security card centers) and Foreign Service posts. It also enables employees to correct individuals' Social Security number records.

As resources permit, we will develop and implement the following enhancements to help us enforce enumeration policy:

- Continue to partner with other Federal agencies to ensure the immigration systems and forms we use are up-to-date and in line with policy;
- Increase Social Security number integrity by improving citizenship documentation when appropriate; and
- Enhance policy and procedure enforcement.

These enhancements ensure accuracy in our Social Security number records, which in turn enables us to make proper payments. Further, in line with the Administration's one-government approach, we partnered with the Department of Homeland Security and Department of State to enumerate noncitizens accurately and consistently.

In FY 2015, we will provide additional processing statistics to help track our performance and improve our enumeration workload. In FY 2016, we plan to expand the Social Security number application process to allow for processing under special circumstances or in emergencies.

In FY 2017, we will provide support and updates to the system as needed, based on discussions we have with the Department of Homeland Security and Department of State. Additionally, we will continue to request enhancements to help ensure the system aligns with policy changes. We will provide faster application processing and stronger information security by enabling Foreign Service Posts to transfer applications electronically. Additionally, we will ensure the system continues to align with policy changes.

## Performance Measures – Strategic Objective 1.3

### 1.3a: Minimize the average response time to deliver medical evidence to the VA for wounded warriors and veterans

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	9.7 days	7.3 days	5.6 days	7.2 days	5.9 days	4.2 business days		
Target					Deliver medical evidence to the VA within an average of 5 days	Deliver medical evidence to the VA within an average of 5 business days	Deliver medical evidence to the VA within an average of 5 business days	Deliver medical evidence to the VA within an average of 5 business days
Target Met					Not Met	Met		

**Results:** We exceeded our FY 2015 target by delivering medical evidence to the VA within an average of 4.2 days.

**Data Definition:** We currently track requests received from the VA for medical evidence. We also track how long it takes us to respond to the request.

**Data Source:** Office of Operations

## Strategic Objective 1.4: Evaluate Our Physical Footprint to Incorporate Improved Service Options

### Vision 2025 Priority: Innovative Organization

Our facility maintenance costs continue to increase despite staff losses. We are concerned about the high upfront costs for facilities and associated services (e.g., rent, utilities, security guard services), especially as more cost-effective and reliable alternatives to in-person service exist. As building maintenance costs continue to increase and customer preferences move to electronic service channels, we are reassessing our facility needs, while still ensuring that we have appropriate levels of in-person service options available.

We are fully committed – now and in the future – to keeping a field office structure providing in-person service for those customers who need or prefer it. Additionally, as technology drives the realignment of our physical footprint, we see opportunities to scale back and colocate some large brick-and-mortar facilities.

### Strategies

- Design space, maintain offices, and reassess the structure of internal facilities to optimize cost and maximize opportunities for improved service delivery; and
- Explore solutions that optimize the operational efficiencies of offices, including colocations.

### Progress Update

We took the following steps in fiscal year (FY) 2015 to evaluate our physical footprint to incorporate improved service options:

- Reduced our usable square feet by 1.34 million from our FY 2012 level.

### Next Steps

- Assess 100 percent of all field office and hearing office new lease actions for possible colocation opportunities;
- Create shared services-claimant only video rooms in field offices to increase hearing capacity without increasing the footprint;
- Continue building judge only video rooms in existing hearing offices to increase hearing capacity without the need to build additional hearing rooms; and
- Increase the number of colocations between hearing offices and field offices.

### Risks and External Factors

The following risks or external factors may affect our efforts:

- The universe of colocation opportunities is limited to the number of lease expirations in any given year:
  - Long-term lease commitments are a barrier to short-term implementation; and
  - Significant lead-time needed to secure new leases.
- Space availability and labor relations issues:
  - Availability of space large enough to colocate in a given market;
  - Compatibility of the Office of Disability Adjudication and Review and Operations service areas; and
  - Complexity of accommodating the different Bargaining Unit agreements with the three separate labor unions representing our field office and hearing office employees.

## Key Initiatives

### Reduce Our Real Estate Footprint

Under guidance issued by the Office of Management and Budget (OMB), agencies are required to create and implement a plan to reduce their real estate footprint. We are committed to adhering to the established baselines while providing excellent customer service.

We will create a five-year plan in FY 2015 to make the most efficient use of our real estate property assets. We will update and submit our plan to OMB each fiscal year. As part of our planning, we will assess all new space actions for colocation opportunities and plan to make the following colocations:

- In FY 2016, we will colocate at least four permanent remote site hearing offices with field offices; and
- In FY 2017, we will colocate at least seven permanent remote site hearing offices with field offices.

## Performance Measure – Strategic Objective 1.4

### 1.4a: Evaluate our physical footprint as described in our OMB-approved Real Property Cost Savings and Innovation Plan

Fiscal Year	2014	2015	2016	2017
<b>Performance</b>	We have issued colocation guidelines to the regions. In FY 2015, we will evaluate each space action for potential colocation opportunities for offices within the same local area whose leases are ending at the same time	Reduced our physical footprint by 1.34 million usable square feet		
<b>Target</b>	Evaluate potential opportunities for collocating and consolidating our public service facilities within and outside of SSA	Reduce our physical footprint from our FY 2012 level by 1.86 million usable square feet		
<b>Target Met</b>	Met	Not Met		

**Results:** While we did not meet our FY 2015 target, we exceeded the Office of Management and Budget requirements to freeze our footprint as of FY 2012. We reduced our physical footprint by 5 percent from our FY 2012 level.

**Data Definition:** Completing the targeted milestones.

**Data Source:** Social Security Administration, Office of Budget, Finance, Quality, and Management

### 1.4b NEW: Assess field and hearing office lease expirations and increase colocation of our field and hearing offices to reduce our physical footprint

Fiscal Year	2015	2016	2017
<b>Performance</b>			
<b>Target</b>		Colocate at least 4 permanent remote site hearing offices with field offices	Colocate at least 7 permanent remote site hearing offices with field offices
<b>Target Met</b>			

**Data Definition:** Completing the targeted milestones.

**Data Source:** Social Security Administration, Office of Disability Adjudication and Review

## Strategic Goal 2: Strengthen the Integrity of Our Programs

Currently, we pay \$78 billion each month in benefits across all our programs. Paying the right person the right amount at the right time is critical, and we take this responsibility very seriously. The payment accuracy rate for our retirement and survivors programs has been over 99 percent for the past several years.

Our disability programs are much more complex to administer, potentially resulting in both overpayments and underpayments:

- **Social Security Disability Insurance** provides benefits to people who cannot work because they have medical conditions expected to last at least one year or result in death. The laws governing this program are complex, and we may not always have timely or accurate information about a beneficiary's medical or work status. Changes in either status may affect continued eligibility for benefits.
- **Supplemental Security Income (SSI)** provides cash assistance to people with limited incomes and resources who are aged, blind, or disabled. A beneficiary's eligibility for payment or the amount of payment can change when his or her living arrangements or income changes. Beneficiaries self-report changes, and reporting delays can result in improper payments.

We are taking a multifaceted approach to ensure we receive accurate information and provide proper payments:

- Using the latest technology to identify fraud and improve debt collection;
- Providing beneficiaries with easy ways to report changes;
- Investing in and enhancing partnerships with our beneficiaries;
- Actively seeking opportunities to share information with other federal and state agencies; and
- Using experts in evaluation methods to review implementation plans for each improper payment initiative.

We want our initiatives to produce clear and measurable outcomes that lead to actionable efforts reducing improper payments and reclaiming overpaid funds.

### Strategic Objective 2.1: Transform the Way We Record Earnings to Enhance Data Accuracy

#### **Vision 2025 Priority: Innovative Organization**

A worker's lifetime earnings determine the amount of his or her Social Security benefits, making it vital that we have accurate earnings records on file. We devote a significant amount of resources to ensure earnings records are accurate.

In fiscal year (FY) 2015, we posted over 275 million earnings items to individuals' records. When we provide workers, employers, and government agencies with the tools they need to accurately report wages, our records are more accurate.

In 2015, employers filed over 89 percent of Forms W-2 electronically. We also received nearly 26 million paper Forms W-2. As we migrate to a more fully electronic earnings record process, we anticipate increased accuracy through fewer manual entries and a more stringent electronic editing process.

We have a multiyear initiative underway that will further modernize our earnings reporting system. This initiative will increase processing capacity and post information faster. In addition, we are working with the Internal Revenue Service (IRS) to enhance earnings data exchanges. Both initiatives will improve wage reporting and make our earnings process more efficient and accurate.

We are also encouraging our customers to verify their earnings information when they review their *Social Security Statements* online or when they receive mailed copies.

## Strategies

- Modernize our earnings system;
- Encourage electronic wage reporting; and
- Encourage workers to review their *Social Security Statements* for earnings accuracy.

## Progress Update

We took the following steps in FY 2015 to transform the way we record earnings to enhance data accuracy (see Key Initiatives and Performance Measures for more details):

- Redesigned software to process Forms W-2 within the Annual Wage Reporting system (AWS);
- Processed larger volumes of earnings data through redesigned AWS:
  - Over 22 million wage items per day;
  - Over 81 million wage items per week; and
  - Exceeded prior tax year volumes of 15 million per day and 72.3 million per week.
- Implemented redesign, platform changes, and business processes into earnings systems resulting in:
  - More efficiency and consistency in service;
  - Improved flow and speed of earnings processes; and
  - Improved accuracy.
- Implemented systems enhancements that are expected to decrease the number of wage reports filed on paper and reduce manual workloads.

## Next Steps

- Continue to modernize and streamline other major components of the Earnings Systems; and
- Continue marketing efforts encouraging people to review their earnings for accuracy.

## Risks and External Factors

The following risk or external factor may affect our efforts to enhance data accuracy:

- Legal restrictions on disclosure of wage reporting data between federal agencies.

## Key Initiatives

### Continue Earnings Redesign

We are redesigning our systems to make our earnings process more efficient and accurate. In addition, we are enhancing earnings data exchanges, improving wage reporting, modernizing our systems, and modifying our software to handle increasing record volumes.

Beginning in FY 2014 and throughout FY 2015, we released several enhancements to the earnings redesign program, continuing our multiyear effort to improve our detection and prevention of potential wage reporting fraud. We replaced outdated technology, streamlined automated business processes, and consolidated and streamlined our earnings reconciliation processes. We also redesigned functionality to process Forms W-2 within the Annual Wage Reporting system.

Increased system processing capacity allows the system to post more data to the Master Earnings File (the administrative file used to store earnings data and to determine an individual's eligibility and benefits payment). The increased capacity also enables posting the data earlier in the year and sharing data with the IRS sooner. In addition, earlier rejection of invalid data improves the quality of data used both internally for benefit calculations and externally by the IRS for tax reconciliation.

## Increasing Electronic Wage Report Filing

Annually, we receive more than 3 million paper wage reports from employers containing nearly 26 million paper Forms W-2. Paper wage reports are more error-prone, labor intensive, and expensive to process. Electronic wage reporting is more accurate, but we must update our electronic applications frequently to reflect IRS tax code and tax form revisions.

Planned enhancements for FY 2015 include a self-registration, self-testing process for all new electronic wage reporting web service users. In FY 2016, we are planning a phased expansion of the electronic wage reporting web service, including expanding the electronic wage reporting status function and allowing submitters to find out why a submission was returned. The phased web service expansion will continue in FY 2017.

We will continue using promotional materials, trade publications, and direct contact with employers and third-party submitters (people who submit wages to us on behalf of employers) to encourage electronic wage reporting. Our market tactics for online wage reporting include promotions at conferences and meetings attended by the wage reporting community.

## Performance Measure – Strategic Objective 2.1

### 2.1a: Improve the accuracy and timeliness of the earnings data used to calculate benefits

Fiscal Year	2014	2015	2016	2017
Performance	We released the Annual Wage Reporting system on 02/08/2014	Implemented the redesigned software to process Forms W-2 within the Annual Wage Reporting system		
Target	Complete construction of at least 50% of the redesigned functionality to process Forms W-2 within the Annual Wage Reporting system	Implement the redesigned functionality to process Forms W-2 within the Annual Wage Reporting system by 09/30/2015	Implement the redesigned functionality to process Forms W-2c (Corrections) within the Annual Wage Reporting system	Implement Annual Wage Reporting software to provide earnings data to the IRS earlier in the tax season
Target Met	Met	Met		

**Results:** In FY 2015, we applied the redesigned annual wage reporting software to process Forms W-2.

**Data Definition:** Construction of the redesigned Annual Wage Reporting functionality is defined as the development of the software to meet the high-level requirements for processing Forms W-2.

**Data Source:** The data source is the aggregate of the base-lined, high-level requirements for the redesigned Form W-2 processing within the Annual Wage Reporting system. The software release certification process will document the software implementation.

## Strategic Objective 2.2: Protect the Public's Data and Provide Secure Online Services

### Vision 2025 Priority: Superior Customer Experience

Our mission is to provide the public with high quality, convenient service while maintaining the confidentiality of the public's information. We are committed to safeguarding the information used in our online services as we keep up with increasing service demands. We take the public's trust seriously and take great pride in securing their personal information. We continually strengthen our record protection systems to combat emerging identity threats.

### Strategies

- Ensure strong authentication technologies and appropriate access to information and services;
- Ensure online services have appropriate security features; and
- Join with other federal agencies to aggressively combat identity theft to prevent unauthorized transactions.

### Progress Update

We took the following steps in fiscal year (FY) 2015 to protect the public's data and provide secure online services (see Key Initiatives and Performance Measures for more details):

- Expanded the use of data analytics and technology to detect and prevent online fraud;
- Applied analytical tools to our online services to determine common characteristics and patterns of anomalous behavior based on data from past allegations and known cases of fraud;
- Built a fraud business process and developed new analytical models to support the online Social Security Replacement Card application (limited release in November 2015);
- Established the Office of Anti-Fraud Programs to provide centralized oversight of and accountability for the agency's initiatives to prevent, detect, and deter fraud; and
- Partnered with other Federal agencies to detect, deter, and prevent fraud.

### Next Steps

- Continue to protect the public's data as we expand and continue secure online services; and
- Continue to design a business plan and procure an enterprise-automated solution (tool), which will enable us to identify patterns of fraud, improve functionality with additional data-driven fraud triggers and real time risk analysis, and further integrate technology into our anti-fraud business processes.

### Risks and External Factors

The following risks or external factors may affect our efforts to protect the public's data and provide secure online services:

- Budgetary concerns;
- Unanticipated workload increases; and
- New and emerging threats.

### Key Initiatives

#### Deploy Management System for Personally Identifiable Information and Federal Tax Information

We developed the Enterprise Test Data Management System to manage and purge personally identifiable information and federal tax information in our test and training systems. Our test and training systems are well controlled and have low risk of exposing sensitive public data. While individuals accessing the data are authorized to view it, when fully implemented, the Enterprise Test Data Management System will provide sanitized test data (data modified to conceal a person's identity) to our test environments (development, validation, integration, and training), further minimizing our risk of unnecessary exposure.

When fully implemented, the system will sanitize the Social Security number, Employer Identification Number, telephone number, email, and bank account data consistently across all validation databases.

We released the basic infrastructure in FY 2013, and in FY 2014, we:

- Developed code to sanitize name fields;
- Developed requirements for enhancing a third-party tool we will use to help sanitize names and addresses;
- Designed, developed, and implemented enhancements to the existing Enterprise Test Data Management System to improve performance and usability; and
- Began requirements analysis and design for future enhancements.

In FY 2015, we implemented the code for sanitizing the name and address information. We expect full implementation in FY 2016.

### **Established the Office of Anti-Fraud Programs**

We take our responsibility for detecting, deterring, and preventing fraud very seriously. We have zero tolerance for fraud, and we work tirelessly to protect the American taxpayers and their investment in Social Security.

In November 2014, we established the Office of Anti-Fraud Programs to provide centralized oversight of and accountability of initiatives to prevent, detect, and deter fraud, such as:

- Centralizing anti-fraud data analytics;
- Monitoring and supporting our anti-fraud initiatives;
- Formulating new anti-fraud initiatives;
- Developing consistent anti-fraud policies and processes;
- Aligning our anti-fraud efforts with industry standards; and
- Supporting the Office of the Inspector General's efforts to investigate fraud.

We continue to expand the use of data analytics and technology to detect and prevent fraud. Specifically, we apply analytical tools to our business processes and use models to determine common characteristics and patterns of anomalous behavior based on data we collect from past allegations and known cases of fraud.

Additionally, we developed numerous analytical models to help us identify fraud. We run our analytical models against our data in online services. These models assist in identifying attempted fraud before we make a payment. Our goal is to avoid the "pay and chase" that has plagued benefit-paying agencies for years by being proactive in preventing fraud. We are currently working with a federally funded research development center on an enterprise-based, automated solution to expand the use of anti-fraud analytics to additional agency programs.

## Performance Measures – Strategic Objective 2.2

### 2.2a: Enhance our security features and business processes to prevent and detect fraud

Fiscal Year	2014	2015	2016	2017
<b>Performance</b>	Using Public Facing Integrity Review data, we were able to create and implement the routing transit number blocking process	The fraud referral process was transferred to the newly established Office of Anti-Fraud Programs. We use Public Facing Integrity Review data to create and implement the routing transit number blocking process. <sup>2</sup>		
<b>Target</b>	Expand the Public Facing Integrity Review system to more rapidly detect a greater variety of fraudulent Internet transactions	Increase <i>mySocial Security</i> potential fraud referrals through the Public Facing Integrity Review system to the Office of Operations by 10% (10,295 referrals)	Identify and investigate at least 500 claims presenting characteristics indicative of fraud	Identify and investigate at least 750 claims presenting characteristics indicative of fraud
<b>Target Met</b>	Met	Met		

**Results:** In November 2015, we established the Office of Anti-Fraud Programs. The Office of Anti-Fraud Programs now receives potential fraud referrals through the Public Facing Integrity Review system.

**Data Definition:** Expand functionality by planning, developing, and implementing new or additional reviews for fraud in existing online applications and new online services, as they are made available to the public.

**Data Source:** Public Facing Integrity Review system

---

<sup>2</sup> Due to the sensitivity of this information, we cannot include exact numbers.

## Strategic Objective 2.3: Increase Payment Accuracy

### Vision 2025 Priority: Innovative Organization

The American public expects outstanding stewardship of general revenues and the Social Security Trust Funds – and as stewards, we are committed to protecting our programs from waste, fraud, and abuse.

Our most important program integrity tools are continuing disability reviews (CDR), which are periodic reevaluations to determine if Social Security Disability Insurance and Supplemental Security Income (SSI) beneficiaries are still disabled, and SSI redeterminations, which are periodic reviews of non-medical eligibility factors such as income and resources.

We estimate that CDRs conducted in 2016 will yield net Federal program savings over the next ten years of roughly \$9 on average per \$1 budgeted for dedicated program integrity funding, including Old-Age and Survivors Insurance, SSI, Medicare, and Medicaid program effects. Similarly, we estimate that nonmedical redeterminations conducted in 2016 will yield a return on investment of about \$4 on average of net Federal program savings over ten years per \$1 budgeted for dedicated program integrity funding, including SSI and Medicaid program effects.

We will continue to perform CDRs and SSI redeterminations, and enhance our program integrity efforts in other areas to improve payment accuracy for our programs. We will:

- Simplify our work incentive policies and procedures;
- Continue to partner with financial institutions to expand on the success of our Access to Financial Institutions initiative to identify financial resources that often go unreported;
- Implement new guidance and expand existing programs to recover more debt;
- Pilot new computer technologies and data searches; and
- Use new computer technologies to analyze agency data in new ways, focusing on the most error-prone aspects of our programs.

Representative payees (people or organizations who receive payments on behalf of beneficiaries who cannot manage their own benefits) play a significant role in many beneficiaries' lives. We are always exploring ways to better identify, screen, and appoint representative payees. We will improve how we monitor representative payees to prevent benefit misuse. We will also coordinate research and initiatives with other federal agencies that serve similar populations.

### Strategies

- Collaborate with other federal agencies, such as the Department of Veterans Affairs and Centers for Medicare and Medicaid Services, to find innovative ways to prevent and reduce improper payments;
- Increase efforts to recover overpayments;
- Enhance predictive models and automation tools to help identify error-prone aspects of benefit eligibility;
- Expand use of data analytics to detect fraud and payment errors; and
- Streamline the representative payee program to better identify potential misuse of benefits.

### Progress Update

We took the following steps in FY 2015 to increase payment accuracy (see Key Initiatives and Performance Measures for more details):

- Expanded the use of data analytics and improved technology to:
  - Identify patterns of fraud in our programs; and
  - Prevent payment errors by identifying missed entitlements to benefits.
- Through data exchange partnerships with the Centers for Medicare and Medicaid Services, we have:
  - Identified over \$49 million in estimated incorrect payments;
  - Referred 1,334 cases to the Office of Inspector General for investigation; and
  - Uncovered 272 out-of-country cases.
- Implemented improvements to the Pre-effectuation Review (PER) model to help identify the most error-prone adult SSI DDS allowances for review;

- Identified 1,352 previously unreported deaths of U.S. beneficiaries abroad, resulting in potential overpayment savings of almost \$7 million;
- Implemented a change to our address verification business process, allowing us to notify more delinquent debtors of a potential offset; and
- Expanded the payee monitoring program to better identify potential benefit misuse – expected to net an increase of 300 additional reviews over FY 2014.

### Next Steps

- Monitor PER workloads on a weekly basis to ensure models and associated business processes are working correctly and as intended;
- Research the use of quarterly reported earnings data in the CDR predictive model to prioritize CDRs that are likely to result in suspension or termination;
- Develop systems, policy, and training to support the non-home real property process;
- Expand automated reciprocal death data exchanges to as many partner countries as possible; and
- Publish agency operating instructions to improve the business process for transmitting information to and from the Department of Veterans Affairs.

### Risks and External Factors

The following risks or external factors may affect our efforts to increase payment accuracy:

- Relying on SSI recipients to timely report changes in their financial circumstances that may change their benefit amounts;
- The inherent complexity of our Title II and Title XVI programs; and
- Balancing high workload demands and program integrity activities with staffing resources.

### Key Initiatives

#### Promoting Use of the Supplemental Security Income Telephone Wage Reporting System and the Supplemental Security Income Mobile Wage Reporting

Unreported and untimely reported wages continue to be a major source of payment error in the SSI program. To improve timely reporting, we implemented the SSI Telephone Wage Reporting system. SSI telephone wage reporting increases efficiency because it reduces unnecessary visits to the field office, lessens manual keying errors, and allows us to automatically process wage reports.

Beneficiaries, their spouses and parents, and their representative payees can report monthly wages directly into the SSI system via a combination of touch-tone entry and voice-recognition software.

During recruitment activities for the SSI Telephone Wage Reporting system and the SSI Mobile Wage Reporting program, we encourage people to sign up for monthly email or text reminders to report monthly wages. We also include this reminder option in our online public information materials. We continue to increase the field office recruiting efforts during claims, redetermination interviews, pre-effectuation reviews, or other wage-related post-eligibility contacts.

In FY 2014, we began allowing people to report wages at any time during the month rather than just the first six days of the month and began using GovDelivery as a means for SSI wage reporters to sign up for email or text reminders. GovDelivery is a web-based public sector communications platform that sends notices, emails, and reminders to customers. As a result, we processed 30 percent more reports using the SSI Telephone Wage Reporting system and SSI Mobile Wage Reporting system than we processed in calendar year 2013. Much of this increase was due to the nationwide implementation of the SSI Mobile Wage Reporting program.

In September 2015, we received 78,970 automated wage reports, an approximately 23% increase over September 2014.

### **Conducting Supplemental Security Income Redeterminations**

Changes in beneficiaries' living arrangements or the amount of their income and resources can affect both their eligibility for SSI and the amount of their payments. To ensure the accuracy of SSI payments, we conduct redeterminations. In FY 2015, we plan to conduct 2.25 million redeterminations and 2.62 million redeterminations in FY 2016.

### **Using Predictive Modeling in the Continuing Disability Review Enforcement Operation**

The Continuing Disability Review Enforcement Operation identifies Social Security disability beneficiaries whose earnings put them at risk of receiving overpayments.

We developed and piloted a predictive model to identify cases that have a high likelihood of receiving overpayments. We prioritize these cases for work-related continuing disability reviews. These reviews determine if the beneficiary's eligibility for benefits has changed.

By prioritizing the work-related continuing disability reviews, we identified and avoided potential overpayments more quickly. In FY 2015, within the first six months of processing, we completed approximately 256,000 work-related continuing disability reviews, resulting in 47,500 cessations or suspensions with overpayments.

We plan to update and re-estimate the predictive model with more recent information so the model parameters capture any recent demographic, program, and economic changes. In addition, we are considering including quarterly earnings data from the Office of Child Support and Enforcement in our model to shorten the response time.

### **Using Predictive Modeling in the Redetermination Process**

We use a statistical scoring model to identify and prioritize redetermination cases having a high likelihood of error. The statistical model uses income, resources, and living arrangement variables to predict likely SSI overpayments.

In FY 2014, the cases we completed resulted in the prevention and recovery of an estimated \$3.9 billion in expected retroactive and five-year future recurring SSI overpayments. If we had relied on a random selection for 2014 cases, rather than using a predictive model, projections indicate that the corresponding savings would be only \$2.4 billion for this period. Results for FY 2015 will be available in February 2016.

We continue to improve our predictive statistical modeling and data mining techniques to determine the potential value of such data in our SSI redetermination modeling and selection process. We will use these advanced analytical techniques to focus on ways to enhance our current redetermination selection model and potentially the redetermination process.

### **Expanding the Access to Financial Institutions**

Excess resources in financial accounts are a leading cause of SSI payment errors. Access to Financial Institutions (AFI) uses an electronic process to verify bank account balances with financial institutions to help determine SSI eligibility and payment amount. In addition to verifying alleged accounts, the process may detect undisclosed accounts by using a geographic search to generate requests to other financial institutions. Along with preventing overpayments, the AFI process will help us eliminate ineligible applicants at the beginning of the application process and reduce the workload in the disability determination services (DDS) offices.

We currently use the AFI system in all 50 states, the District of Columbia, and the Commonwealth of the Northern Mariana Islands. In FY 2013, we lowered the AFI liquid resources (e.g., cash or bank accounts) threshold from \$750 to

\$400 and increased the number of bank searches. This program has proven very cost effective and useful in identifying undisclosed accounts.

We have not yet fully implemented the AFI process. We define full implementation as using AFI on every potential SSI application and redetermination, conducting bank searches, and fully integrating the process with our systems.

### **Expanding Our Cooperative Disability Investigations Program**

Our Cooperative Disability Investigations units work collaboratively with the Office of Inspector General, DDS offices, and state and local law enforcement agencies to resolve allegations of fraud in our disability programs. Cooperative Disability Investigations units help prevent payments to people who are not disabled and reduce improper payments to beneficiaries who have failed to report medical improvement or work activity.

The units have proven to be vital tools in identifying fraud and preventing incorrect disability payments. Since their inception in 1998 through FY 2015, our Office of the Inspector General estimates Cooperative Disability Investigations efforts nationwide generated \$3.2 billion in projected savings to our Social Security disability and SSI programs and \$2.1 billion to non-SSA programs, such as Medicare and Medicaid.

In FY 2014, we opened Cooperative Disability Investigations units in Baltimore, Maryland and Detroit, Michigan. In FY 2015, we expanded the program by adding another nine units in Providence, RI; Little Rock, AK; Milwaukee, WI; Des Moines, IA; Miami, FL; Birmingham, AL; Charleston, WV; St. Paul, MN; and Raleigh, NC. We currently have 37 Cooperative Disability Investigations units covering 31 states, Washington, DC, and the Commonwealth of Puerto Rico.

We plan to add up to three additional units in FY 2016, including the unit that opened in Washington, DC in October 2015.

In FY 2017, we plan to expand the program as need and funding permits.

### **Improving the Death Reporting System Process**

We are enhancing and streamlining our death reporting system to ensure we comply with applicable laws and policies, reduce improper payments, prevent improper release of personally identifiable information, and improve consistency of data in our records. Ultimately, our goal is to have one official agency source of death information available to all our systems.

In FY 2014, we provided a new user interface for death reporting and collecting new, comprehensive management information.

We are on schedule to complete the following by the end of FY 2015:

- Evaluate policies used in our current batch processing to determine priority, matching criteria for identity, error messaging and editing;
- Redesign the batch processing approach based on the evaluation;
- Begin consolidating external death data we receive into a central entry point and update the data into our NUMIDENT database before it is used by other systems; and
- Produce management information reports using production data to evaluate data quality and identify actions needed to improve quality.

Our plans for FY 2016 include:

- Streamline inputting and collecting internal death information from multiple sources into one person-centered path;
- Use the NUMIDENT database as the authoritative source of death data; and
- Provide additional management information reporting.

In FY 2017, we will evaluate the work completed and determine if further enhancements are needed.

### **Implementing Data Exchange and Verification Online**

We have a mission-critical need to share data with partners such as federal, state, local, and foreign government agencies, as well as court systems, the medical community, and employers to help ensure we have correct information. We maintain over 2,500 electronic information exchanges. We provide and receive data essential in making eligibility and entitlement decisions for us and other federal and state agencies.

We implemented the Data Exchange and Verification Online application in FY 2013 to modernize our existing data exchange and verification systems into a new centralized application. The new system is more efficient and enables us to respond more quickly to customized requests and legislative mandates.

During FY 2015, we implemented enhancements begun in FY 2014, as well as began planning and analysis for additional enhancements to the Social Security number verification process. We also redesigned our architecture to support web services, an enhancement that improves access for partnering agencies and supports the one-government approach.

In FY 2016 and 2017, we will continue our planning and implementation of additional data exchanges and enhancements.

### **Implementing Direct Deposit Auto-Enrollment Fraud Prevention**

In an effort to prevent redirection of beneficiaries' payments to another account without their knowledge, we created the direct deposit auto-enrollment fraud prevention service. This service allows beneficiaries who have been victims of fraud, or who think they may become victims in the future, to block changes to their payment information. People who block account changes must come into a field office to make direct deposit or address changes.

### **Implementing New Tools for Debt Collection**

Although we strive to pay benefits accurately and on time, the complexity of our programs and dependence on beneficiaries to report changes can lead to overpayments. When overpayments occur, we use different debt collection techniques (e.g. payment withholding, Treasury Offset Program, Credit Bureau Reporting, Cross Program Recovery) to recover these overpayments.

We continue to enhance our systems to recover program debt. In FY 2015, we improved our External Collection Operation system by implementing an address verification feature. As a result, we have the capability to notify more individuals of potential collection actions. We also are developing another feature that will allow us to store notices in our Online Retrieval System, enabling staff to access the notice during calls from the beneficiary.

### **Implementing Automatic Earnings Reappraisal Operation Delay Pilot**

Since FY 2013, we have used our predictive model to score all pending work-related continuing disability reviews to identify cases with a high risk of incurring large work-related overpayments. We implemented a pilot scoring approach, which showed that we processed the sampled cases more quickly, preventing an even larger overpayment, and properly prevented the release of an underpayment. In FY 2014, the pilot continued to be successful with nearly 15,000 sampled disability beneficiaries.

In FY 2016, the selection will include approximately 12,000 beneficiary records for a recomputation delay. We will evaluate this sample in spring 2016. We will also select a new sample based on an enhanced predictive model to prioritize work-related continuing disability reviews.

We expect an average overpayment exceeding \$20,000 for approximately 20 percent of the pilot cases. We expect to process the sampled cases more quickly, preventing an even larger overpayment. The expected outcomes include increased efficiency of operations and improved payment accuracy.

### **Adding Anti-Fraud Messages in Notices**

Over the past two years, we have been working to add new language to our notices to report suspected fraud and to publicize Office of the Inspector General's Fraud Hotline and website. The anti-fraud language will be included in nearly 300 million notices annually: our manually prepared and automated notices, retirement and disability cost-of-living adjustment notices, disability determination services notices, and most Office of Disability Adjudication and Review notices.

## Performance Measures – Strategic Objective 2.3

### 2.3a APG: Reduce the percentage of improper payments made under the SSI program (Agency Priority Goal)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	9.1%	9.1%	8.1%	9.3%	8.5%	Data available April 2016		
Target					No more than 6.2% of all payments made under the SSI program are improper payments (i.e., overpayment and underpayments)	No more than 6.2% of all payments made under the SSI program are improper payments (i.e., overpayment and underpayments)		
Target Met					Not Met	TBD		

**Results:** We did not meet our FY 2014 target. Our FY 2015 performance data is not available until April 2016. We will discuss our FY 2015 performance in next year's report.

**Data Definition:** We determine the SSI payments free of overpayment and underpayment error by an annual review of a statistically valid sample of all payments issued. We base the payment accuracy on a non-medical review of sampled individuals who received SSI payments during the fiscal year. We determine the overpayment accuracy rate by dividing the total overpayment error dollars by the total dollars paid for the fiscal year and subtracting this percentage from 100 percent. We determine the underpayment accuracy rate by dividing the total underpayment error dollars by the total dollars paid for the fiscal year and subtracting this percentage from 100 percent.

**Data Source:** SSI Payment Accuracy (i.e., Stewardship) Report

### 2.3b: Maintain a high accuracy rate of payments made through the Old-Age, Survivors, and Disability Insurance program to minimize improper payments

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
<b>Performance</b>	99.6% (O/P) 99.8% (U/P)	99.7% (O/P) 99.9% (U/P)	99.8% (O/P) 99.9% (U/P)	99.8% (O/P) 99.9% (U/P)	99.5% (O/P) 99.9% (U/P)	Data available April 2016		
<b>Target</b>	99.8% (O/P) 99.8% (U/P)	99.8% (O/P) 99.8% (U/P)	99.8% (O/P) 99.8% (U/P)	99.8% (O/P) 99.8% (U/P)		99.8% (O/P) 99.8% (U/P)	99.8% (O/P) 99.8% (U/P)	99.8% (O/P) 99.8% (U/P)
<b>Target Met</b>	Not Met Met	Not Met Met	Met Met	Met Met		TBD		

**Results:** Our FY 2015 performance data is not available until April 2016. We will discuss our FY 2015 performance in next year's report.

**Data Definition:** We determine Old-Age, Survivors, and Disability Insurance payment free of overpayment and underpayment error by an annual review of a statistically valid sample of the beneficiary rolls. We determine the overpayment accuracy rate by dividing the total overpayment error dollars by the total dollars paid for the fiscal year and subtracting this percentage from 100 percent. We determine the underpayment accuracy rate by dividing the total underpayment error dollars by the total dollars paid for the fiscal year and subtracting this percentage from 100 percent.

**Data Source:** Old-Age, Survivors, and Disability Insurance Stewardship Report

### 2.3c APG NEW: Improve the integrity of the SSI program by ensuring that 95 percent of our payments are free of overpayment (Agency Priority Goal)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
<b>Performance</b>	93.3% accuracy rate	92.7% accuracy rate	93.7% accuracy rate	92.4% accuracy rate	93.0% accuracy rate	Data available April 2016		
<b>Target</b>							95% accuracy rate	95% accuracy rate
<b>Target Met</b>								

**Results:** Payment accuracy is one of our highest priorities. As a result, we established challenging stretch targets with the understanding that our historical results are lower than our goal.

**Data Definition:** We determine the overpayment accuracy rate by dividing the total overpayment error dollars by the total dollars paid for the fiscal year and subtracting this percentage from 100 percent. We determine the underpayment accuracy rate by dividing the total underpayment error dollars by the total dollars paid for the fiscal year and subtracting this percentage from 100 percent.

**Data Source:** Title XVI Payment Accuracy (Stewardship) Report

### 2.3d: Complete the budgeted number of full medical continuing disability reviews (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	324,567	345,492	443,233	428,568	525,875	799,013		
Target			435,000	422,000	510,000	790,000	850,000	1,100,000
Target Met			Met	Met	Met	Met		

**Results:** We exceeded our FY 2015 target.

**Data Definition:** The number of full medical continuing disability reviews completed in the fiscal year. This number represents only full medical reviews completed by state DDS offices and other agency components and cases where we initiated a review but could not complete one because the individual failed to cooperate.

**Data Source:** Continuing Disability Review Tracking Files

### 2.3e: Complete the budgeted number of Supplemental Security Income (SSI) non-medical redeterminations (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	2,465,878	2,456,830	2,624,170	2,634,183	2,627,518	2,266,993		
Target	2,422,000	2,422,000	2,622,000	2,622,000	2,622,000	2,255,000	2,522,000	2,822,000
Target Met	Met	Met	Met	Met	Met	Met		

**Results:** We exceeded our FY 2015 target.

**Data Definition:** The number of non-disability SSI redeterminations completed in the fiscal year. This number includes scheduled (i.e., identified for review through profiling) and unscheduled reviews (i.e., reviewed because of changes that may affect payment), as well as targeted redeterminations (i.e., limited issue reviews).

**Data Source:** Integrated SSA Unified Measurement System Counts Report

## Strategic Goal 3: Serve the Public through a Stronger, More Responsive Disability Program

From fiscal year (FY) 2007 to FY 2015, initial disability claims increased about 10 percent, and our hearings workload increased over 30 percent. In FY 2015, our average processing time for hearing requests was 480 days, and the number of hearings pending was over one million. Although the agency made measurable progress through 2011 toward eliminating the hearings backlog, severe budget cuts combined with other key factors began to affect our progress adversely. Due to budget constraints, we were unable to open new hearings locations, and we continued to face difficulty in hiring a sufficient number of qualified administrative law judges. As a result, wait times for a disability hearing began to rise again.

While our customers expect us to make timely decisions, they also expect us to make the right decisions, appropriately and consistently applying our rules and regulations. We will continue to balance timeliness with an emphasis on quality and consistency in decision-making. We continue to look for ways to strengthen policies, improve processes, and increase the use of automation.

We recently received our second Deming Award for innovative training – this one for our data-driven, skills-based training program for administrative law judges, which focused on the critical thinking and analytical skills involved in applying our policies. To ensure the special training achieved the desired results, we developed a detailed review of decisional quality, comparing the pre-training hearing decisions to post-training hearing decisions against 84 metrics. After training, we found a 5 percent or greater improvement in 35 of the 84 performance metrics and a 2 - 4.99 percent improvement in 14 of the 84 metrics. Statistically speaking, this training had a significant impact on improving our administrative law judges' performance.

We also strive to provide timely and appropriate services to beneficiaries. We plan to meet the needs of our disability beneficiaries by increasing opportunities for those who want to return to work and by collaborating with other federal agencies to coordinate our disability programs.

### Strategic Objective 3.1: Improve the Quality, Consistency, and Timeliness of Our Disability Decisions

#### *Vision 2025 Priority: Innovative Organization*

We continuously strive to improve the timeliness, quality, and consistency of our disability processing times and decisions. We need to make sure our decisions are accurate and made at the earliest possible point in our process. We also need to ensure our policies are applied consistently across the country.

#### Strategies

- Expand use of management information to identify training needs and areas for improvement;
- Broaden use of case-analysis tools;
- Expand use of predictive modeling;
- Simplify policies;
- Collaborate with Bureau of Labor Statistics to collect updated occupational information; and
- Formalize our pre-decisional quality review processes to increase national uniformity.

#### Progress Update

The Social Security Administration, in consultation with the Office of Management and Budget, has highlighted this objective as a **focus area for improvement**. We took the following steps in FY 2015 to improve the quality, consistency, and timeliness of our disability decisions (see Key Initiatives and Performance Measures for more details):

- Completed Administrative Law Judge (ALJ) focus reviews to provide ALJs with feedback and training resources to improve the quality of decisions;

- Added the ability for all sites to process electronic adult initial continuing disability review in the electronic case analysis tool;
- Released the Electronic Bench Book version 5.0;
- Established a medical experts committee to advise on advancements relevant to making disability decisions;
- Made the inline quality review process more comprehensive;
- Increased hearing capacity by adding additional video hearing sites;
- Completed deliverables on the Bureau of Labor Statistics project; and
- Prepared for the receipt of data collected by the Bureau of Labor Statistics in September 2015.

### Next Steps

- Examine opportunities to develop new applications to address existing and emerging management information needs;
- Continue leveraging management information to identify training needs;
- Add functionality to the Electronic Case Analysis Tool to support additional claim types;
- Develop more functionality in the Electronic Bench Book;
- Continue development and testing of predictive modeling projects in the Office of Disability Adjudication and Review;
- Update research base for the vocational factors considered in disability evaluations; and
- Develop and submit at least three rules for public comment, five final rules, and three Social Security Rulings to update the medical listing of impairments.

### Risks and External Factors

The following risks or external factors may affect our efforts to improve the quality, consistency, and timeliness of our disability decisions:

- Hiring sufficient ALJs;
- Sufficient resources to add new functionality to our electronic tools;
- Ability to recruit and retain qualified data analytics staff to fill predictive modeling and data analysis gaps;
- Balancing high workload demands and quality assurance activities with staffing resources; and
- Ability to recruit and retain a skilled staff to process workloads.

### Key Initiatives

#### Enhancing the Electronic Claims Analysis Tool

We continue to enhance our web-based Electronic Claims Analysis Tool, which guides adjudicators through the sequential evaluation process for determining disability. Throughout the application, there are links to the policy that support each step of the process. The tool produces a detailed, policy-compliant explanation of the determination and stores the supporting documentation. A subsequent reviewer can then review the explanation to understand the decision maker's analysis and conclusions throughout the adjudication processes.

All disability determination services sites use the tool for initial and reconsideration level disability claims. In FY 2015, we enhanced functionality for processing electronic adult initial level continuing disability reviews. In FY 2016, we plan to add functionality to process childhood continuing disability reviews, as well as add enhancements in response to policy changes and input from its users. In FY 2017, we plan to add functionality to process adult reconsideration continuing disability reviews.

#### Expanding Use of Electronic Bench Book

The Electronic Bench Book is a policy compliant, web-based application that aids in documenting, analyzing, and adjudicating disability hearing cases consistently with our regulations. The Electronic Bench Book allows users to perform file reviews, capture hearing notes, and document decisional instructions. The Electronic Bench Book guides users through each step of the sequential evaluation process. We expect the systematic process will reduce errors,

improve consistency, and reduce remands to the Appeals Council while helping enhance and execute agency plans to modernize our systems.

Approximately 2,200 unique hearing office users are accessing the Electronic Bench Book each week and administrative law judges are using it to process decisional instructions on approximately 1,500 cases per week. Enhancements released in April 2015 enabled users to generate a case information summary with a single click. Additional backend and performance enhancements were implemented in June 2015.

In FY 2016, we plan to deliver a decision writing feature that fully integrates with MS Word giving decision writers both pre-population of some of the decision language as well as full word processing and editing capabilities. We also plan to streamline the application for ease of use and work on adding more templates.

In FY 2017, we plan on adding more templates and implementing instruction refinements.

### **Developing an Occupational Information System**

Currently, we rely on occupational information found in the Department of Labor's Dictionary of Occupational Titles to determine whether adult disability applicants can do their past work or any other work. The Department of Labor no longer updates its Dictionary of Occupational Titles because a new job placement tool called the Occupational Information Network has replaced it.

We have been working with the Bureau of Labor Statistics to develop a new web-based occupational information system. Our new web-based system will be easier to use and will increase the quality of disability decisions by providing current information about specific job requirements. Unlike the old system, which was a job placement tool, the new system will contain information needed to help us determine disability.

The new system will contain information about occupations' specific vocational preparations, physical demands, and environmental conditions. Unlike the prior system, the new system will contain the mental and cognitive requirements of occupations, enabling more standardized decisions for claimants with mental impairments.

Our policy experts worked with the Bureau of Labor Statistics in 2013 to define current mental and cognitive work demands. In 2014, the Bureau of Labor Statistics started testing the collection of the mental and cognitive work demands.

In early FY 2015, we conducted a large-scale preproduction test that included all data elements. In the summer of 2015, testing included direct observation of several occupations to help determine if the data collection methodology is valid. In September 2015, we used production data in disability adjudication. Fully populating the new system with occupational data will take about three years.

In FY 2016, we will continue analyzing the data from the FY 2015 preproduction test. We will use the data to develop a new information technology platform. We are planning a limited implementation in FY 2017. Testing and further reviews will continue into FY 2019. Full implementation is scheduled for late FY 2019.

### **Updating the Medical Listing of Impairments**

The medical Listing of Impairments (Listings) is one of the most effective tools used to make disability decisions. The Listings allow us to find a claimant disabled when his or her impairment meets specified medical criteria, without the need to consider age, education, or work experience. The Listings improve the consistency and accuracy of our decisions throughout all levels of the disability process.

We update the Listings on a three-to-five year cycle. During each cycle, we seek input from medical experts and other stakeholders to ensure the Listings reflect current approaches in medicine, science, technology, and the work environment.

In FY 2014, we published four rules for public comment, one final rule, and three Social Security Rulings in an effort to update and revise medical policy. In FY 2015, we developed and submitted four final rules and one Social Security Rulings for the medical listings for publication in the Federal Register. In both FY 2016 and FY 2017, we plan to develop and submit four final rules, two Social Security Rulings, and targeted updates for the medical listings for publication in the Federal Register.

### **Conducting Inline Quality Reviews**

The inline quality review of hearing level claims promotes consistency and continuous improvement in case processing by ensuring that:

- Case files are properly prepared and scheduled;
- Records are adequately developed; and
- Draft decisions are legally sufficient.

We initially conducted inline quality reviews on cases where senior attorney adjudicators drafted fully favorable decisions and on cases where files were prepared and ready to be scheduled for a hearing. We began the review in 2010, and in November 2013, we expanded the reviews to include cases drafted by decision writers. We increased the number of inline quality reviews from 2,590 in FY 2013 (0.4 percent of all hearing decisions) to 13,258 in FY 2014 (2.4 percent of all hearing decisions).

In FY 2015, we expanded the list of questions reviewers must answer when deciding if errors exist. There are now more than 100 questions. Because the reviews are more comprehensive than before, we are able to address more issues proactively. In FY 2015, we conducted almost 13,000 reviews (2.4 percent of all hearing decisions). Additionally, analyzing the findings from the reviews enables us to identify trends and areas for targeted training.

In FY 2016 and FY 2017, we will continue to review support staff work for quality and policy compliance. We also plan to explore adding more quality review specialists, as budgets permit.

### **Reducing the Pending at the Appeals Council**

As we decide more cases at the hearing level, the Appeals Council receives more requests for review of hearing decisions. Historically, we received approximately 100,000 requests for review annually. However, from FY 2011 until FY 2013, requests for reviews grew to 175,000 annually. While we saw a reduction in requests to 155,000 in FY 2014 and 149,000 for FY 2015, we finished FY 2015 with more than 150,000 cases waiting for review.

The Appeals Council replaced staff losses in FY 2015, and we continue to seek resources to expand the Appeals Council to address customer wait times.

We are focusing on decreasing the percentage of pending Appeals Council requests for review over 365 days old. In FY 2014, we completed about 162,000 Appeals Council requests for review, and in FY 2015, we completed over 150,000 cases. We will continue to adjust Appeals Council staff levels to reduce the Appeals Council backlog and meet any changes in capacity at the DDS and the hearings levels.

### **Hire Sufficient Administrative Law Judges to Ensure Public Access to Agency Services**

From FY 2008 to FY 2010, the Office of Disability Adjudication and Review made significant progress in reducing the pending of claimants waiting for an Administrative Law Judge (ALJ) hearing. However, our inability to hire ALJs in sufficient numbers due to the Office of Personnel Management (OPM) delays coupled with the Federal Government shutdown and budget constraints caused a public service crisis. Now more than one million claimants are waiting for a hearing, more than any other time in history.

We received a new list of ALJ candidates from the OPM in March 2014, but the lengthy hiring process resulted in us beginning FY 2015 with 35 fewer judges than we had at the beginning of FY 2014. We hired more ALJs as FY 2015 progressed, though not as many as we had budgeted for due to hiring setbacks. We ended the year with nearly 1,530 ALJs on duty, about 85 more than we had at the beginning of the year.

We expect to bring our pending cases below one million by the end of FY 2017.

## Performance Measures – Strategic Objective 3.1

### 3.1a: Ensure the quality of our decisions by achieving the DDS net accuracy rate for initial disability decisions

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	98% net accuracy	98% net accuracy	98% net accuracy	98% net accuracy	98% net accuracy	98% net accuracy		
Target	97% net accuracy	97% net accuracy	97% net accuracy	97% net accuracy	97% net accuracy	97% net accuracy	97% net accuracy	97% net accuracy
Target Met	Met	Met	Met	Met	Met	Met		

**Results:** We have consistently met the target for this measure since FY 2010.

**Data Definition:** Net accuracy is the percentage of correct initial state disability determinations and is based on the net error rate (i.e., the number of corrected deficient cases with changed disability decisions), plus the number of deficient cases not corrected within 90 days from the end of the period covered by the report, divided by the number of cases reviewed.

**Data Source:** Disability Quality Assurance Databases

### 3.1b: Increase our ability to provide timely decisions by reducing the percentage of pending Appeals Council requests for review 365 days or older

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance			88%	91.1%	84%	82%		
Target			80% of cases pending less than 365 days	81% of cases pending less than 365 days	79% of cases pending less than 365 days	80% of cases pending less than 365 days	81% of cases pending less than 365 days	82% of cases pending less than 365 days
Target Met			Met	Met	Met	Met		

**Results:** We exceeded our FY 2015 target. At the end of FY 2015, 82 percent of our cases were pending less than 365 days. We have consistently met the targets for this measure since FY 2012.

**Data Definition:** The percentage of Appeals Council cases that are pending less than 365 days at the end of the fiscal year. The percentage is derived by dividing the number of Appeals Council cases pending 365 days or more by the total number of Appeals Council cases pending.

**Data Source:** Appeals Review Processing System

### 3.1c APG NEW: Improve customer service by reducing the wait time for a hearing decision (Agency Priority Goal)

Fiscal Year	2015	2016	2017
Performance			
Target		Decide 99% of the cases that begin the fiscal year at 430 days old or older	Decide 99% of the cases that begin the fiscal year 365 days old or older
Target Met			

**Data Definition:** For FY 2016, we will decide 99 percent of those cases that are 430 days old or older at the beginning of the fiscal year. For FY 2017, we will decide 99 percent of those cases that are 365 days old or older at the beginning of the fiscal year. We derive the percentage by dividing the total number of those targeted cases disposed during the fiscal year by the total number of those targeted cases identified during the fiscal year.

**Data Source:** Case Processing and Management System

### 3.1d: Complete the budgeted number of initial disability claims (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	3,161,314	3,390,936	3,206,869	2,987,883	2,861,895	2,759,432		
Target	3,081,000	3,273,000	3,173,000	2,962,000	2,947,000	2,767,000	2,695,000	2,810,000
Target Met	Met	Met	Met	Met	Not Met	Not Met		

**Results:** We did not meet our FY 2015 target.

**Data Definition:** The number of Social Security and SSI initial disability claims that state DDS offices and other agency components complete in the current fiscal year up to the budgeted number.

**Data Source:** National DDS System and Disability Operational Data Store

### 3.1e: Complete the budgeted number of disability reconsideration claims (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	735,067	828,010	808,521	803,194	757,198	723,485		
Target			787,000	787,000	778,000	739,000	702,000	715,000
Target Met			Met	Met	Not Met	Not Met		

Results: We did not meet our FY 2015 target.

**Data Definition:** The number of Social Security and SSI disability claims completed at the reconsideration level in the state DDS offices and other agency components in the current fiscal year up to the budgeted number.

**Data Source:** National DDS System and Disability Operational Data Store

### 3.1f: Complete the budgeted number of hearing requests (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	737,616	795,424	820,484	793,580	680,963	663,129		
Target	725,000	815,000	875,000	793,000	735,000	727,000	703,000	784,000
Target Met	Met	Not Met	Not Met	Met	Not Met	Not Met		

Results: We did not meet our FY 2015 target.

**Data Definition:** The number of hearing requests completed in the current fiscal year.

**Data Source:** Case Processing Management System

### 3.1g: Achieve the target number of initial disability claims pending (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	842,192	759,023	707,700	698,127	632,656	621,315		
Target	1,041,000	845,000	861,000	804,000	642,000	621,000		
Target Met	Met	Met	Met	Met	Met	Not Met		

Results: We made very good progress in reducing initial disability claims pending.

**Data Definition:** The number of Social Security and SSI initial disability claims pending in state DDS offices and other agency components at the end of the fiscal year.

**Data Source:** National DDS System and Disability Operational Data Store

### 3.1h: Achieve the target number of disability reconsiderations pending (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	157,977	164,049	197,788	173,472	170,255	143,540		
Target			184,000	220,000	174,000	143,000		
Target Met			Not Met	Met	Met	Not Met		

**Results:** We came very close to meeting our target for FY 2015.

**Data Definition:** The number of Social Security and SSI disability claims pending at the reconsideration level in state DDS offices and other agency components at the end of the fiscal year.

**Data Source:** National DDS System and Disability Operational Data Store

### 3.1i: Average processing time for initial disability claims (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	111 days	109 days	102 days	107 days	110 days	114 days		
Target	132 days	118 days	111 days	109 days	109 days	109 days	113 days	113 days
Target Met	Met	Met	Met	Met	Not Met	Not Met		

**Results:** We did not meet our target for FY 2015.

**Data Definition:** The number of Social Security and SSI initial disability claims that state DDS offices and other agency components complete in the current fiscal year up to the budgeted number.

**Data Source:** Management Information Central

### 3.1j: Average processing time for reconsiderations (Budgeted Workload Measure)<sup>3</sup>

Fiscal Year	2014	2015	2016	2017
Performance	108 days	113 days		
Target				109 days
Target Met				

**Data Definition:** We count the average number of days it takes to process a reconsideration disability claim from the date a reconsideration claim is filed in a field office to the time the state DDS office makes a determination.

**Data Source:** Social Security Unified Management System Appeals/Management Information Central

### 3.1k: Average processing time for hearing decisions (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	426 days	360 days	353 days	396 days (September only)	422 days	480 days		
Target	485 days	373 days	321 days	389 days (September only)	415 days	470 days	540 days	555 days
Target Met	Met	Met	Not Met	Not Met	Not Met	Not Met		

**Results:** We did not meet our FY 2015 target.

**Data Definition:** The average processing time is the cumulative processing time for all hearing requests processed divided by the total number of hearing requests processed in the fiscal year.

**Data Source:** Case Processing Management System

---

<sup>3</sup> We developed management information for Average Processing Time for Disability Reconsiderations in FY 2013. FY 2014 was the first full fiscal year for which data was available for this measure. Now that we have had the opportunity to analyze at least two years of actual data, this year we developed a performance target for FY 2017.

### 3.1l: Achieve the budgeted goal for disability determination service case production per workyear (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	273	287	324	322	311	307		
Target	268	275	322	320	319	313		
Target Met	Met	Met	Met	Met	Not Met	Not Met		

**Results:** We did not meet our FY 2015 target.

**Data Definition:** The average number of all state DDS cases produced per workyear expended. A workyear represents both direct and indirect time, including overhead (time spent on training, travel, leave, holidays, etc.). It includes the time of staff on the DDS payroll, including doctors under contract to the DDS. The DDS case production per workyear is a national target.

**Data Source:** National DDS System and Disability Operational Data Store

### 3.1m: Achieve the budgeted goal for hearing case production per workyear (Budgeted Workload Measure)

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	105	109	111	109	102	95		
Target	108	107	114	111	106	104		
Target Met	Not Met	Met	Not Met	Not Met	Not Met	Not Met		

**Results:** We did not meet our FY 2015 target.

**Data Definition:** The average number of hearings completed per direct workyear used. A direct workyear represents actual time spent processing cases. It does not include time spent on training, ALJ travel, leave, holidays, etc.

**Data Source:** Office of Disability Adjudication and Review's Monthly Activity Report, Case Processing and Management System, Payroll Analysis Recap Report, Travel Formula, and Training Reports (Regional reports on new staff training, ongoing training, and special training).

## Strategic Objective 3.2: Maximize Efficiencies throughout the Disability Program

### Vision 2025 Priority: Innovative Organization

We remain committed to meeting the public's needs by using technology and tools that are cost effective for the taxpayer and convenient for our customers. We have a history of finding smarter, more cost-effective ways of doing business. With workloads still at high levels, we continue to explore new technologies and business processes to help cut costs, operate more efficiently, and provide the service that our customers expect and deserve.

### Strategies

- Enhance our ability to share workloads among our offices to maximize resources;
- Increase process automation; and
- Expand the use of health information technology (IT).

### Progress Update

We took the following steps in FY 2015 to maximize efficiencies throughout the disability program (see Key Initiatives and Performance Measures for more details):

- Implemented Agile practices in developing the consolidated Disability Case Processing System;
- Implemented the national skills-based routing system to increase field office telephone answering capability;
- Implemented data analytics and predictive modeling to identify disability applicants with severe medical conditions; and
- Expanded our health IT partnerships.

### Next Steps

- Continue developing a Disability Case Processing System capable of processing all case types by the end of FY 2016 (additional enhancements planned for FY 2017);
- Continue our participation in national and federal health IT policy and standards workgroups, ensuring our requirements are included; and
- Continue expanding the use of health IT for disability claims processing to increase the amount of medical evidence received and the number of states with participating providers.

### Risks and External Factors

The following risks or external factors may affect our efforts to maximize efficiencies throughout the disability program:

- Medical community's response time to our request for records – not all providers have the same electronic capabilities, so we must continue to provide a full range of response options, including traditional methods of obtaining medical records;
- The industry does not have electronic health record policies and standards that provides the specific health information we need for disability determinations; and
- Developing DCPS has been more complex and challenging than initially anticipated.

### Key Initiatives

#### Developing the Disability Case Processing System

In an ongoing effort to improve our effectiveness and efficiency in making timely, accurate disability decisions, we are modernizing our disability case processing system technology. The Disability Case Processing System will replace 54 independent legacy systems currently used throughout the disability determination services (DDS) offices nationwide.

The Disability Case Processing System will yield substantial benefits to the government and citizens by providing:

- Faster and more accurate case processing;
- Improved service to citizens;
- Reduced administrative costs; and
- Structured data that will support our fraud analytics efforts.

Developing the new system has been more complex and challenging than initially anticipated. Based on feedback from users, increasing program cost estimates, and extended timelines, we conducted a review of the project in early 2014. We implemented corrective actions later that year, including appointing a single accountable executive, restructuring the organization, and increasing user engagement.

In FY 2015, we focused our efforts on planning and analysis activities and implemented an Agile development approach. The Agile methodology uses shorter development cycles with frequent checkpoints. These shorter cycles help us identify issues earlier and enable us to be more responsive to changing user needs and priorities. We plan to develop and deploy the core product in FY 2016, adding additional functionality to process all types of disability cases throughout FY 2016 and 2017.

### Using Health Information Technology to Expedite Disability Decisions

Obtaining medical records electronically from health care organizations increases efficiencies in our disability determination process and dramatically improves service to the public by:

- Reducing the time to obtain medical records;
- Decreasing the time to complete a disability claim;
- Helping offset increasing workloads and staffing constraints; and
- Enabling computerized decision support.

We request more than 15 million medical records from about 500,000 providers for approximately 3 million initial disability claims annually. Our primary goal is to increase the volume of medical evidence received via health IT by expanding existing partnerships and adding new partners.

In FY 2015, we expanded our health IT partnerships from 3,143 to more than 7,000 providers and increased the number of organizations from 28 to 48. We also increased the number of states, plus the District of Columbia, with participating health IT providers from 29 to 33. We increased the percentage of initial disability claims with health IT medical evidence to 6.1 percent, exceeding our performance goal of 6 percent.

## Performance Measure – Strategic Objective 3.2

### 3.2a: Improve the disability determination process by increasing the percentage of initial disability claims using electronically transmitted health records and medical evidence (Health IT)

Fiscal Year	2014	2015	2016	2017
Performance	3% (84,779 initial claims)	6.1% (167,626 initial claims)		
Target	2.5% of initial disability claims processed with health IT medical evidence (75,000 initial claims)	6% of processed initial disability claims with health IT medical evidence (164,820 initial claims)	8% of processed initial disability claims with electronically transmitted health records and medical evidence (Health IT) (222,000 initial claims)	11% of processed initial disability claims with electronically transmitted health records and medical evidence (Health IT) (308,000 initial claims)
Target Met	Met	Met		

**Results:** We met our FY 2015 target.

**Data Definition:** Percent of initial disability claims processed with health IT medical evidence.

**Data Source:** Health IT Management Information Database for number of initial level health IT cases, Performance Management Reports for number of initial level disability cases

## Strategic Objective 3.3: Enhance Employment Support Programs and Create New Opportunities for Returning Beneficiaries to Work

### *Vision 2025 Priority: Innovative Organization*

To increase the numbers of beneficiaries returning to work, we must create clear, consistent employment incentives. The complexity of our rules and the fear of incurring an overpayment (because of earnings) discourage beneficiaries' attempts to work. We continue to:

- Look for ways to simplify work incentives and minimize improper payments due to earnings;
- Strengthen our employment support programs, including the Ticket to Work program; and
- Provide help for beneficiaries who want to work through the Work Incentive Planning and Assistance program.

To encourage beneficiaries' work efforts and prevent potential work-related overpayments, we updated our Supplemental Security Income (SSI) work incentive notices in 2013 to provide more information on our work incentive policies and clearly explain beneficiaries' reporting responsibilities. We encourage young people who receive SSI benefits to work and reduce their dependency on disability benefits. Recent agency-funded research has found that policy changes and improved services to young adults who receive SSI can sharply improve employment outcomes.

We focus our employment support efforts on ensuring that people who use those supports not only work, but also work at their maximum capacity, reaching self-sufficient earnings whenever possible.

We are working with other federal agencies to develop early intervention demonstration proposals that would provide resources and support to workers with disabilities to help them stay in the labor force as long as possible.

### Strategies

- Partner with the Departments of Education, Labor, and Health and Human Services to implement Promoting Readiness of Minors on SSI (PROMISE);
- Simplify work incentive policies and improve programs such as Ticket to Work and Vocational Rehabilitation Cost Reimbursement program; and
- Develop return-to-work demonstration proposals.

### Progress Update

We took the following steps in FY 2015 to enhance employment support programs and create new opportunities for returning beneficiaries to work (see Key Initiatives and Performance Measures for more details):

- Initiated the national evaluation of the PROMISE project;
- Promoted the use of Ticket to Work program to disabled beneficiaries:
  - Enhanced marketing campaign;
  - Resumed targeted ticket mailings in April 2015; and
  - Designed virtual job fairs to connect beneficiaries with federal contractors.
- Held a technical panel to develop a process to identify individuals with mental illnesses who are at risk of becoming beneficiaries; and
- Implemented new real-time online services to employment support service providers to assist them in providing better service to beneficiaries returning to work.

### Next Steps

- Continue evaluating and overseeing work incentive programs:
  - PROMISE project; and
  - Ticket to Work.

## Risks and External Factors

The following risk or external factor may affect our efforts to enhance employment support programs and create new opportunities for returning beneficiaries to work:

- Failure to achieve the work incentive programs' target numbers.

## Key Initiatives

### Improving Employment Support Programs

Many disabled beneficiaries want to work and, with adequate support, some beneficiaries attain self-sufficiency. The Ticket to Work program and the Vocational Rehabilitation Cost Reimbursement program help beneficiaries transition to employment.

Employment networks coordinate and deliver employment services under the Ticket to Work program. In addition to helping beneficiaries find jobs, the employment network staff also helps beneficiaries stay employed, advance in their jobs, and remain off the disability rolls.

We monitor the business practices of employment networks to ensure they provide quality services. We continue to develop clear performance goals to ensure employment networks support beneficiaries in gaining and sustaining long-term employment, economic security, and financial independence. We survey beneficiaries who are working with employment networks annually and provide the satisfaction results on a website. Beneficiaries can use the survey results and other information on the website to evaluate and select an employment network that best meets their needs, interests, and employment goals.

In June 2015, we began to conduct comprehensive reviews of employment networks. We will use the results of these reviews to ensure the networks are providing quality service to beneficiaries.

We are expanding our Internet Ticket Operation Support System (iTOPSS) to centralize the systems support for various applications in our return to work programs. Our partners can use iTOPSS to assign Tickets, request payment, report on beneficiaries' progress, receive marketing files, and access reports about their programs. Many actions in iTOPSS are real time, enabling both our partners and our beneficiaries to have access to the most current information available.

We are improving our beneficiary outreach and education efforts by expanding our Ticket to Work call center, Internet information, and social media tools (e.g., YouTube, Facebook, and Twitter). All our work incentive seminar events are now available via webinars.

While there were 84,027 new Tickets assigned during FY 2014 (a 26 percent increase in new Ticket assignments over the prior year), the net number of Tickets assigned or in use dipped from 321,218 at the end of FY 2013 to 316,363 at the end of FY 2014. However, the number of beneficiaries using Tickets who were removed from the disability rolls because they successfully returned to work increased from 8,682 to 10,529.

In FY 2014, we reported how many participating beneficiaries earned at least at the trial work level (\$770 per month in FY 2014) within a year of starting the program. In FY 2015 and beyond, we will report the number of disability beneficiaries who use their Tickets and earn above trial work level, regardless of how quickly they did so. Our reporting will provide data on beneficiaries each year (not cumulative) and will tell us how many program participants have earnings at least at the trial work level or higher in the reporting year.

We joined with many other federal agencies to plan for and implement new regulations published by the Department of Labor in FY 2014. The regulation encourages businesses awarded federal contracts to hire people with disabilities. As part of that effort, we began using our outreach tools to link beneficiaries participating in our employment support programs with federal contractors seeking to hire people with disabilities.

In FY 2015, our marketing contractor developed plans to host virtual job fairs to connect beneficiaries participating in the Ticket to Work program with federal contractors seeking to hire people with disabilities. We will also work with other federal agencies to help keep more people with disabilities in the workforce and off disability benefits.

In FY 2016 and FY 2017, we will continue to improve our outreach and job matching activities, focusing on bringing more beneficiaries and potential beneficiaries into the federal contractor workforce. We will continue hosting virtual job fairs and expect to see an increase in the number of working Ticket participants. The history of the Ticket programs suggests that Ticket assignments lag behind the Ticket mailings by up to 18 months. Therefore, we expect a measurable increase in assignments in FY 2016 and FY 2017.

### **Improving Employment Support Outreach to Targeted Working-Age Beneficiaries**

Historically, we told our beneficiaries about our work incentive programs by mailing them a paper ticket and brochure when they began receiving benefits. We stopped the mailings in June 2011 and resumed them in April 2015. We expect these mailings will increase awareness of the program and result in an increase in participation in FY 2016 and FY 2017.

We also make automated telephone calls to beneficiaries we determine are the most likely to return to work. The calls tell individuals about their eligibility for the employment services and support available through the Ticket to Work program. In FY 2015, we expect to send tickets to 60,000 beneficiaries ages 18-56.

## Performance Measures – Strategic Objective 3.3

### 3.3a: Increase the number of beneficiaries returning to work by achieving the target number of Social Security Disability Insurance and Supplemental Security Income disability beneficiaries with Tickets assigned and in use, who work above a certain level

Fiscal Year	2015	2016	2017
Performance	Data available April 2016		
Target	50,000 beneficiaries	55,000 beneficiaries	60,000 beneficiaries
Target Met	TBD		

**Results:** Our data will not be available until April 2016. We will report our performance for FY 2015 in next year's report.

**Data Definition:** The total number of Social Security Disability Insurance, Supplemental Security Income, and concurrent beneficiaries who used their Ticket to sign up with an employment network or state vocational rehabilitation agency and who have recorded quarterly earnings in the Office of Child Support Enforcement database that are at or above three times the trial-work-level.

**Data Source:** Office of Child Support Enforcement earnings database

## Strategic Goal 4: Build a Model Workforce to Deliver Quality Service

Our employees are the cornerstone of our organization and are critical to fulfilling our public service mission. Their commitment, along with our partners in disability determination services (DDS) offices across the country, allows us to provide dedicated and compassionate services to the public. We provide consultation, products, and services that foster solutions to critical workforce issues.

It is critical we maintain a quality workforce by creating a work environment that supports excellent service. Especially with our economic challenges, our employees are our most vital and valued asset. Their training, developmental opportunities, and institutional knowledge-sharing are a high priority, and we continue to invest in these areas.

As our employees' expectations change, we continue to seek ways to be an employer of choice. We are expanding flexible workplace options, such as telework, and creating more opportunities for skills development.

### Strategic Objective 4.1: Attract and Acquire a Talented and Diverse Workforce that Reflects the Public We Serve

#### **Vision 2025 Priority: Exceptional Employees**

We have one of the most diverse workforces among agencies our size. We take great pride in knowing our employees reflect the diversity of the people we serve.

To remain an employer of choice for top talent, we are improving our hiring processes by using modernized recruitment strategies, such as social networking tools and virtual job fairs. We will retain this talent by updating our human resources programs, and equipping employees with the essential tools and support needed to complete their work and communicate with people of all ages, education levels, and cultural backgrounds.

#### Strategies

- Compete for top talent through modernized recruitment strategies;
- Use hiring flexibilities and programs to expand qualified applicant pools;
- Market and expand use of hiring authorities for veterans and individuals with disabilities; and
- Bridge knowledge gaps with core competencies for mission-critical positions.

#### Progress Update

We took the following steps in fiscal year (FY) 2015 to attract and acquire a talented and diverse workforce (see Key Initiatives and Performance Measures for more details):

- Implemented modernized recruitment strategies such as:
  - Social networking tools;
  - Virtual job fairs; and
  - Promoting workplace flexibilities like telework.
- Used the following Pathways Programs for recruitment:
  - The Internship program;
  - The Recent Graduates program; and
  - The Presidential Management Fellows program.
- Hired a recruitment manager to support agency recruitment efforts.

#### Next Steps

- Implement agency recruitment plan;
- Develop marketing strategies;
- Share employment opportunities with veteran service groups; and
- Share employment opportunities with vocational rehabilitation agencies, employment networks, and college and university service coordinators.

## Risks and External Factors

The following risk or external factors may affect our efforts to attract and acquire a talented and diverse workforce that reflects the public we serve:

- Competition with the private sector to attract and retain talented individuals; and
- Lack of knowledge about federal job opportunities.

## Key Initiatives

### Focusing on the Employment of Veterans and Individuals with Disabilities

We honor the courage and sacrifice the men and women in our armed forces made during their active service. We also respect the skills gained during their service. Offering veterans career opportunities provides us with experienced employees and allows us to honor their service.

We also recognize the rich talent pool that exists among individuals with disabilities. We benefit from their experience as we develop strategies to improve our service to the American people.

Each fiscal year we establish goals for recruiting veterans and individuals with disabilities. Despite recent hiring limitations and budget constraints, we achieved or exceeded our commitments to hiring veterans and disabled workers.

In FY 2015, veterans represented 39.32 percent of our total hiring. Disabled veterans represented 18.57 percent of our total hiring. In FY 2016 and FY 2017, our hiring goals are 25 percent for veterans and 17.50 percent for disabled veterans. We expect to meet or exceed those goals.

We also employ individuals with targeted disabilities at nearly twice the rate of the Federal Government as a whole. In FY 2015, employees with targeted disabilities represented 2.02 percent of our total workforce.

In FY 2015, to assist with hiring and retaining both veterans and individuals with disabilities, we:

- Developed resources to guide recruiters, hiring officials, and managers throughout the hiring process;
- Issued a reminder to all employees about the reasonable accommodation process and the benefits and protections of self-identifying as an employee with a disability;
- Collaborated with federal, state, and local veteran support networks to communicate employment and internship opportunities, including the:
  - **Non-Paid Work Experience program**, offered by the Department of Veterans Affairs (VA) for disabled veterans, and
  - **Operation War Fighter Internship program**, offered by the Department of Defense for injured service men and women who are still on active duty, but awaiting medical discharge.
- Continued to participate in the Vocational Rehabilitation Internship Program (VRIP), which provides unpaid work experience to clients of state vocational rehabilitation agencies;
- Enhanced our web tool used by staff nationwide to request reasonable accommodation for customers. Staff can now track the status of their requests;
- Hosted events during National Disability Employment Awareness Month highlighting contributions made by our employees with disabilities. Events were also held showcasing assistive technology and explaining the reasonable accommodation process;
- Participated in job fairs, meetings, and other events targeted to veterans and individuals with disabilities;
- Worked with the VA to establish a national approval for a GI Bill on-the-job training benefit for five front-line positions, including benefit authorizer, claims authorizer, claims representative, service representative, and teleservice representative.

By working with groups like the VA, the Wounded Warrior program, vocational rehabilitation agencies, college and university disability services offices, armed forces job fairs, disability advocacy organizations, and other employment

networks supporting veterans and individuals with disabilities, we aim to create awareness of our employment opportunities.

For FY 2016 and FY 2017, we plan to expand the existing initiatives and add more initiatives. We will focus on developing retention strategies to support our hiring efforts.

### Highlighting the Pathways Programs (for Students and Recent Graduates to Federal Careers)

Students and recent graduates infuse our workplaces with new enthusiasm, talents, and perspectives. Our Pathways programs offer opportunities through three specific programs:

- **The Internship program** provides students in high schools, colleges, trade schools, and other qualifying educational institutions with paid opportunities to explore federal careers while completing their educations;
- **The Recent Graduates program** provides developmental experiences to individuals who, within the previous two years, graduated from qualifying educational institutions; and
- **The Presidential Management Fellows program** provides entry-level positions and leadership development for advanced degree candidates and recent advanced degree graduates.

Hiring through these programs enables us to offer participants clear career paths, along with meaningful training and development opportunities. These programs enhance our ability to attract and hire a talented and diverse workforce that reflects the public we serve.

In FY 2015, we hired about 15 percent of our new employees through the Pathways programs. As our budget allows, we will continue participating in the Pathways program to attract new employees.

## Performance Measures – Strategic Objective 4.1

### 4.1a: Maintain the target veteran and disabled veteran new hire percentage to improve their representation in our workforce

Veterans Hiring

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	17.33%	26.72%	36.78%	46.60%	41.28%	39.32%		
Target			26.72%	18.00%	25.00%	25.00%		
Target Met			Met	Met	Met	Met		

Disabled Veterans Hiring

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	8.72%	13.59%	15.49%	18.10%	19.68%	18.57%		
Target			14.59%	15.00%	16.49%	17.50%		
Target Met			Met	Met	Met	Met		

**Results:** We have exceeded our target for both veteran and disabled veteran hiring over the past four years.

#### Data Definition:

**Veteran Hiring:** For a given fiscal year, the percentage of overall permanent hires who are veterans (e.g., an employee who has been discharged or released from active duty in the armed forces under honorable conditions, has a 5-point or 10-point Veterans' Preference, has creditable military service, has an annuitant indicator, or has an appointment under either the Veterans Recruitment Appointment, the Veterans Employment Opportunities Act of 1998, or the 30 percent or more disabled veteran hiring authorities).

**Disabled Veteran Hiring:** For a given fiscal year, the percentage of overall permanent hires who are disabled veterans (e.g., an employee who has been discharged or released from active duty in the armed forces under honorable conditions and has a 10-point preference due to a service-connected disability). This category is a subset of the overall veterans hiring statistic.

Data includes full-time permanent and part-time permanent employees only.

**Data Source:** Federal Personnel and Payroll System Datamart

#### 4.1b: Strengthen workforce diversity by maintaining the representation of employees with targeted disabilities

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	1.9%	1.9%	1.9%	1.9%	2.0%	2.0%		
Target			2%	2%	2%	2%	2%	2%
Target Met			Not Met	Not Met	Met	Met		

**Results:** We met our FY 2015 target.

**Data Definition:** The percentage of the on-duty workforce, as of the end of the fiscal year (September 30), who self-identified as an individual with a targeted disability (e.g., an employee who has self-identified with one or more of the following physical or mental impairments: deafness, blindness, missing extremities, partial paralysis, complete paralysis, epilepsy, severe intellectual disability, psychiatric disability, or dwarfism).

Data includes full-time permanent and part-time permanent employees only.

**Data Source:** Federal Personnel and Payroll System Datamart

## Strategic Objective 4.2: Strengthen the Competency, Agility, and Performance of Our Workforce to Align with the Needs of the Public

### Vision 2025 Priority: Exceptional Employees

No matter how much automation we use to help us work more efficiently, we must equip our employees with the information and tools they need to perform every task well. Providing our employees with ongoing training ensures our employees can deliver outstanding service and meet our customers' needs.

### Strategies

- Ensure effective use of the agency's performance management systems to manage employee performance;
- Expand supervisor proficiencies;
- Prepare employees for future leadership opportunities;
- Develop methods to share subject matter expertise;
- Reduce skills gaps in mission-critical positions; and
- Provide employees with continued access to training and developmental experiences.

### Progress Update

We took the following steps in FY 2015 to strengthen the competency, agility and performance of our workforce (see Key Initiatives and Performance Measures for more details):

- Enhanced employee-management communications:
  - Acknowledged employee work contributions through monetary and honor award recognitions;
  - Expanded program efforts for knowledge management, managerial, and leadership development; and
  - Implemented Skills Connect pilot as part of our GovConnect initiative.
- Launched National Mentoring Program pilot;
- Implemented supervisor proficiencies plans and leadership initiatives:
  - Established internal leadership development programs; and
  - Rolled out Leadership Essentials for New Supervisors.
- Procured an updated Learning Management System with competency modeling capability;
- Worked with Office of Personnel Management to develop a framework for competency/skills development and assessment;
- Implemented Equal Employment Opportunity (EEO) One Stop, a comprehensive online library of up-to-date, legally compliant, uniform information about EEO laws, policies, and procedures, for employees, managers, and EEO practitioners nationwide; and
- Launched wEEO Radio, an innovative mechanism to disseminate EEO training to managers nationwide via bi-monthly "radio broadcasts" (teleconferences) in a talk show format.

### Next Steps

- Evaluate Skills Connect pilot and prepare for agency-wide launch;
- Assess merit-based execution of the Performance Culture gauged by evaluation of performance and award actions;
- Continue to enhance Performance Assessment and Communications System training; and
- Develop continuous learning programs for experienced supervisors and managers that will include an assessment and job coaching.

## Risks and External Factors

The following risks or external factors may affect our efforts to strengthen the competency, agility, and performance of our workforce to align with the needs of the public:

- Inability to replace employees at or near the attrition rate in previous years has resulted in ongoing skills gaps;
- Limited training and developmental opportunities for interested employees; and
- Insufficient training and support provided to current management and leaders.

## Key Initiatives

### Creating Management Training

We are building a cadre of leaders whose skills are transferable throughout our organization. Our Leadership Essentials for New Supervisors training integrates technical skills with leadership competencies, while emphasizing performance management.

In FY 2015, we assigned new supervisors to the LENS training. Following training, we conducted competency gap assessments to target future training.

In FY 2016, we will revise the curriculum based on participant feedback. Participants also have access to online resources, including a management discussion forum. We expect the forum will improve communication and knowledge sharing. Further enhancements planned for FY 2017 include automatically enrolling new supervisors within a month of their promotions.

### Reducing Skills Gaps

Identifying and reducing skill gaps at all levels of the organization is important for our success.

In FY 2015, we began developing competency assessments for two mission critical occupations in our operations area: the 105 Series Social Insurance Specialists and the 962 Series Contact Representatives. Additionally, we worked to reduce skills gaps in three other positions throughout the organization:

- Human Resources Specialists throughout the nation;
- Legal Assistants in our Office of Disability Adjudication and Review; and
- Social Insurance Specialists in our Office of Retirement and Disability Policy.

In FY 2016 and FY 2017, we will reassess the new models, conduct gap reduction activities, and continue to develop new models for other mission critical occupations.

Our efforts also align with the Cross-Agency Priority goal “Create a Culture of Excellence and Engagement to Enable Higher Performance”. More information on Cross-Agency Priority goals is available on [performance.gov](http://performance.gov).

### Focusing on Career Development Programs

Our future depends on developing employees’ leadership and management skills throughout their careers. One way we identify and develop potential leaders, helping ensure we have a strong succession management pipeline, is through our National Career Development Programs:

- **The Leadership Development Program** prepares employees for General Schedule (GS)-11 through GS-13 leadership positions. We will announce and select employees for this program in FY 2016; and
- **The Advanced Leadership Development Program** prepares employees for GS-14 and GS-15 leadership positions. The 2014 class will end in FY 2017.

These programs target employees with proven leadership potential. We strengthen their leadership skills through developmental assignments and formal training.

To help our experienced managers prepare for senior-level positions, we offer the Senior Executive Service Candidate Development Program. This program is a key element of our succession management strategy for filling future executive-level leadership vacancies.

In addition to our formal leadership programs, many of our employees gain leadership skills through progressively higher positions requiring greater levels of responsibility, accountability, and employee interactions.

### **Using SkillsConnect to Share Talent Across Our Agency**

The Office of Personnel Management recently partnered with federal agencies to implement GovConnect. GovConnect is a federal initiative designed to create a culture of excellence based on collaboration and teamwork within and across agencies.

SkillsConnect is our GovConnect pilot. SkillsConnect enables employees to use their existing skills, establish networks, and gain exposure to opportunities outside their own work areas. Participating employees remain in their current positions, and may work on a project for up to 20 percent of their workday for up to six months, depending on the project.

Our SkillsConnect pilot began in January 2015. One-third of our agency, approximately 21,000 employees, participated in the pilot. Based on our evaluations, which we started at the end of July 2015, we will work with stakeholders and make updates needed before launching the initiative agency-wide in FY 2016.

### **Enhancing our Human Resources Services Portal**

Our Human Resources (HR) business processes rely on several standalone applications, most requiring separate security access. Our enhanced portal provides one-stop shopping for our managers, employees, and specialists to access HR information and applications. Access is role-based, and where possible, we have implemented single sign on.

In FY 2015, we added links to existing services and information. We are also building a nationally available version of a regional application that interfaces with the federal personnel and payroll system data.

We expect to release an electronic version of SSA-7B Employee Record, by the end of the FY 2016. This application will allow managers and supervisors to view information displays with interactive functionality for their employees. We are planning additional releases in FY 2017.

### **Marketing Availability of On-Demand Training and Development**

We continue to promote our electronic libraries, online and distance training, and just-in-time training for employees. Our comprehensive online library delivers agency-specific content and training on new skills. It provides over 3,500 interactive courses, 49,000 eBooks, 4,800 leadership videos, 13,940 information technology desktop application videos, and 480 audio books. Most of the training sessions are less than an hour long, and employees can choose the format and training pace that accommodates their job, work location, and personal commitments.

In FY 2015, we used infomercials to advertise, educate, and inform employees of our available human resource services, programs, and soft skills training offerings.

### **Supporting Employees through Mentoring**

Mentoring is a dynamic developmental and learning partnership through which one person (mentor) shares knowledge, skills, information, experience, perspective, and wisdom to foster the personal and professional development of another (mentee) through ongoing communication.

To support our employees and help prepare them for future job requirements, we piloted our National Mentoring Program, which is open to all employees. Mentoring programs increase morale and organizational productivity and help participants plan their career paths.

The primary goal of the National Mentoring Program is to foster relationships that enhance personal and professional growth and development. Through the mentoring relationship, mentors have the opportunity to coach, guide, and share experiences, knowledge, and skills, which will help to foster an inclusive culture that leads to greater retention of well-experienced and empowered employees.

Our goals for the mentoring program are to:

- **Promote a “Knowledge-sharing Culture” to Support Succession Planning Efforts** - Mentoring facilitates knowledge sharing, while developing top talent and a pipeline of well-qualified candidates;
- **Facilitate Skill and Competency Development to Support Employee Talent Development** - Mentoring facilitates self-improvement, serving as a conduit for employee development, career planning, and sustaining optimum skills, competencies, and performance; and
- **Increase Employee Engagement to Improve Employee Morale and Retention** - Mentoring helps foster an inclusive culture and can lead to a greater retention of well-qualified and empowered employees.

## Performance Measures – Strategic Objective 4.2

### 4.2a: Strengthen workforce competence by improving our talent management index score

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	61%	62%	59%	55%	57%	59%		
Target						Increase the talent management index score to 60%	Increase the talent management index score to 61%	Increase the talent management index score to 63%
Target Met						Not Met		

**Results:** We did not meet our FY 2015 target; however, our talent management score increased from 57 percent in FY 2014 to 59 percent in FY 2015.

**Data Definition:** During a given year, the Office of Personnel Management uses data from seven Federal Employee Viewpoint Survey questions to determine the extent to which employees perceived the organization has the talent necessary to achieve organizational goals. The seven survey questions follow:

Question 1 - I am given a real opportunity to improve my skills in my organization.

Question 11 - My talents are used well in the workplace.

Question 18 - My training needs are assessed.

Question 21 - My work unit is able to recruit people with the right skills.

Question 29 - The workforce has the job-relevant knowledge and skills necessary to accomplish organizational goals.

Question 47 - Supervisors/team leaders in my work unit support employee development.

Question 68 - How satisfied are you with the training you receive for your present job?

**Data Source:** Office of Personnel Management – Federal Employee Viewpoint Survey

## Strategic Objective 4.3: Foster an Inclusive Culture that Promotes Employee Well-Being, Innovation, and Engagement

### Vision 2025 Priority: Exceptional Employees

We have consistently ranked among the Top 10 Best Places to Work among large agencies in the Federal Government. Our employees believe strongly in our mission and in the work that they do for the American people.

We care about the well-being of our workforce and support their engagement at work. We know that the more effort we place on employee safety, collaboration between management and labor representatives, and agency-wide communication, the better the opportunities we will have to generate creativity and innovation.

### Strategies

- Promote work-life balance and employee well-being through workplace flexibilities;
- Ensure access to employee services (e.g., financial literacy, career development, work-life resources) regardless of location;
- Provide employees and managers with support to navigate complex personnel matters (e.g., employee conduct, performance, reasonable accommodations);
- Promote safety of employees through ongoing safety training and emergency preparedness activities;
- Engage labor organizations to promote collaboration and transparency; and
- Develop practices that facilitate open communication and understanding in order to enhance employee engagement and appreciation of our diversity.

### Progress Update

We took the following steps in FY 2015 to foster an inclusive culture that promotes employee well-being, innovation, and engagement (see Key Initiatives and Performance Measures for more details):

- Expanded employee telework participation;
- Promoted work-life balance support offered to employees;
- Used Diversity and Inclusion Council to pilot the National Mentor Program;
- Established an Employee Engagement Community of Practice;
- Switched to new digital emergency radio system;
- Surveyed employees to find out their experiences with diversity and inclusion;
- Established a program to identify and overcome barriers hindering our diversity and inclusion efforts; and
- Collaborated with our three labor unions on workplace issues and held reoccurring forums.

### Next Steps

- Identify and market potential career paths for employees;
- Expand the number of eligible employees participating in telework;
- Research and develop plan for reducing realty costs through initiatives like hoteling and shared workplaces;
- Continue labor management and employee relations forums; and
- Establish a web-based platform and electronic message board for employees to collaborate on work topics and engage in idea sharing.

### Risks and External Factors

The following risks or external factors may affect our efforts to foster an inclusive culture that promotes employee well-being, innovation, and engagement:

- Some employees are unaware of work-life support options or unable to take advantage of them;
- Lack of computers available to support telework expansion;
- Varying expectations and needs of a multigenerational workforce;
- Low employee morale; and
- Reaching labor agreements.

## Key Initiatives

### Improving the Employee Satisfaction

Our employees are essential to meeting our challenges and achieving agency goals. Therefore, it is important that we foster an environment that embraces employee engagement. Employee satisfaction is a priority for our agency. The Office of Personnel Management's (OPM) Federal Employee Viewpoint Survey (FEVS) results allows us to gauge employee satisfaction in various categories, such as work environment, workloads, employee development, employee programs, and leadership.

In response our FEVS results, we conduct a comprehensive analysis and, as a result, developed the Improving Employee Satisfaction Plan. The Plan summarizes the FEVS results and identifies our strengths, areas for improvement, and includes action steps. We update the Plan annually, after we receive our FEVS results.

We develop our action steps using the following information:

- Comprehensive analyses of the survey results to identify strengths, trends, and areas for improvement;
- Action-planning guidance from OPM, the Partnership for Public Service, and the Corporate Executive Board;
- Extensive review of current research, benchmarking studies, and best practices; and
- Input collected from our components, labor unions, advisory councils, management associations, the Human Capital Executive Steering Committee, and previous Improving Employee Satisfaction-related workgroups.

Our 2015 FEVS results showed that we have talented, dedicated, and hardworking employees who understand how their work relates to our mission. The results also identified employee development, work-life balance, effective leadership, and communication as areas that need our attention.

Our Plan serves as a roadmap for agency-wide change and improvement in employee engagement and satisfaction.

### Creating Management and Labor Forum Meetings and Predecisional Involvement Opportunities

We are committed to fostering a collaborative labor-management relationship with our three unions (American Federation of Government Employees, International Federation of Professional and Technical Engineers, and National Treasury Employees Union) through discussions during forums. Working with our unions before we make decisions on workplace issues is crucial for strengthening the labor-management relationship. The input and support of employees and management are critical to meeting our long-term public service commitment. We will continue to work collaboratively with employee representatives to ensure we deliver the highest quality service to the American people.

In FY 2015, we:

- Coordinated joint labor-management events, developed forum improvement objectives, and are working on areas of improvement reflected by the Federal Employee Viewpoint Survey (FEVS) Results;
- Developed an Executive Steering Committee consisting of union and management co-chairs, under the direction of Federal Mediation and Conciliation Service. There is also a relationship by objective committee, which meets monthly to discuss National forum improvements, plan agendas, and brainstorm ideas for improving relationships at all levels in the Agency;
- Met quarterly at the regional level to discuss specific issues affecting the region. In addition, Office of Disability Adjudication and Review forums met bimonthly;
- Established labor-management workgroups to address complex issues, plan joint labor-management relationship training and develop actions plans to improve work processes and communication; and
- Met with labor and management forum members to get pre-decisional input on our Skills Connect pilot, Job Experience Learning Program, and National Mentoring Program. We entered into an agreement on

SkillsConnect, and we entered into a memorandum of understanding on the job experience program and on the mentoring program.

In FY 2016 and FY 2017, we will continue using labor-management committees, workgroups, and forums to foster collaborative labor-management relationship with our unions. We plan to build additional relationships across regions and increase our pre-decisional involvement sessions.

### Highlighting Diversity and Inclusion

We serve a diverse nation and strive to recruit, promote, and retain a workforce that draws from all segments of society. We have a long-standing history of being among the most diverse federal agencies – a goal we achieved through careful planning and recruitment efforts.

Our *Diversity and Inclusion Strategic Plan*, developed in FY 2012, highlights proven best practices for attracting, hiring, and retaining a diverse workforce. The plan also describes how we can foster a work environment that draws on our collective talents, respects individual differences, and leverages diversity.

To sustain our commitment, we instituted a Diversity and Inclusion Council with representation from all levels of the agency, including senior leadership, labor, management associations, and Advisory Councils. The Council's ongoing mission is to provide overarching guidance and support for our diversity and inclusion efforts by recognizing employees' unique perspectives and contributions.

Our human resources staff collaborates with the Council on training, marketing, employee engagement, and outreach. Council members serve as role models and champions on initiatives that promote inclusiveness and leverage the diversity of our workforce.

Our diversity and inclusion practices help ensure we have a workforce that is representative of our customers and that we support Executive Order 13583, *Establishing a Coordinated Government-Wide Initiative to Promote Diversity and Inclusion in the Federal Workforce*.

We celebrate our individual differences and encourage full employee engagement by supporting these diverse Employee Advisory Councils within our workforce:

- American Indian and Alaska Native Advisory Council;
- Black Affairs Advisory Council;
- Hispanic Affairs Advisory Council;
- National Lesbian, Gay, Bisexual, and Transgender Advisory Council;
- National Women's Advisory Council;
- Pacific Asian American Advisory Council; and
- Veterans and Military Affairs Advisory Council.

Our Advisory Councils work with our Diversity and Inclusion staff and our executive leadership through the Diversity and Inclusion Council to help create an inclusive environment for our employees and provide excellent customer service to the diverse public we serve. The Advisory Councils provide ideas on improving services and promoting our programs in their respective communities.

Each year, we hold up to 12 commemorative programs or exhibits, recognizing groups that are under-represented in the Federal Government. In FY 2015, we held the first Unity Celebration, honoring workforce diversity beyond the under-represented groups and featuring exhibits highlighting our employees' varied nationalities.

## Supporting Work-Life Balance

Our Work-Life programs help our employees balance the demands of the workplace and their personal lives.

Telework provides employees with more flexibility and lower commuting costs, while still meeting the agency's needs. In recruiting, we find telework is a sought-after option, helping make us an employer of choice.

We have also seen an upward trend in our FEVS results related to telework satisfaction. Additionally, telework helps us address workspace issues. We will continue to expand telework, as equipment and job functions allow.

We are actively making other efforts to increase our ranking to place within the Top 5 Best Places to Work in the Federal Government. We promote family friendly policies, work/life services, and employee seminars on personal topics like financial literacy, fitness, stress management, and career development. We have also increased career opportunities across components.

In FY 2014, the agency implemented a new telework policy allowing employees to work in alternate locations, other than their official work locations. In FY 2015 and FY 2016, we will continue to increase participation in the agency's telework program.

## Establishing an Employee Engagement Community of Practice

Developing and maintaining a strong partnership with our employees is essential to our success. Our new Employee Engagement Community of Practice helps strengthen our existing employee engagement and mission performance culture. The new Community of Practice will have representatives from each deputy commissioner-level office.

Our employee engagement score in the FEVS Engagement Index will be one of the measures we review to determine the Community of Practice's success.

To strengthen employee engagement, the Community of Practice group will focus on five key areas:

- **Discuss key FEVS/Improving Employee Satisfaction (IES) actions** from components and identify actions that could help other components;
- **Identify and share best practices** within components and work units with high engagement scores;
- **Identify areas needing attention** and help develop action steps;
- **Sustain successful approaches** by identifying supporting human capital policies and establishing strong outcome metrics; and
- **Monitor/update component IES plans** quarterly using HRStat, a quarterly, data-driven review of key performance metrics. Component-level IES plans will be tracked as part of the Community of Practice's work.

## Performance Measures – Strategic Objective 4.3

### 4.3a: Become one of the Top 5 Best Places to Work among large agencies in the Federal Government

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	Top 10 Ranking	Top 10 Ranking	Top 10 Ranking	Top 10 Ranking	Top 10 Ranking	Top 10 Ranking		
Target					Achieve a Top 10 Ranking	Achieve a Top 10 Ranking	Achieve a Top 5 Ranking	Achieve a Top 5 Ranking
Target Met					Met	Met		

**Results:** We met our FY 2015 target. Since 2007, our employees have ranked us in the top 10 [Best Places to Work in the Federal Government](#). In FY 2015, we ranked number 6 out of 19 large federal agencies.

**Data Definition:** During a given year, the Partnership for Public Service uses responses to three Federal Employee Viewpoint Survey questions to develop index scores. The Partnership for Public Service ranks Federal Government agencies based on the calculated index scores using a proprietary formula. The rankings provide a rating of employee satisfaction and commitment across government. The three Federal Employee Viewpoint Survey questions follow:

Question 40 - I recommend my organization as a good place to work.

Question 69 - Considering everything, how satisfied are you with your job?

Question 71 - Considering everything, how satisfied are you with your organization?

**Data Source:** The Partnership for Public Service

#### 4.3b: Increase workplace flexibilities by expanding telework opportunities for employees

Fiscal Year	2014	2015	2016	2017
Performance	104% increase over FY 2013 levels (8,547 employees)	13,514 employees participating in telework		
Target	Increase the percentage of employees participating in telework by 100% over FY 2013 levels (8,200 employees)	Increase the number of employees participating in telework to 16,400 by the end of the fiscal year		
Target Met	Met	Not Met		

**Results:** In FY 2015, 13,514 employees participated in telework.

**Data Definition:** The agency is increasing the number of employees nationwide who telework (as reported to the Office of Personnel Management annually). We define telework as working arrangements in which employees work officially assigned duties at an alternative duty station.

**Data Source:** Office of Personnel Management, Annual Telework Data

#### 4.3c NEW: Increase employee engagement as measured by the employee engagement index score

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
Performance	70%	72%	69%	67%	66%	68%		
Target							69%	70%
Target Met								

**Results:** Our Employee Engagement Index score increased from 66% in FY 2014 to 68% in FY 2015.

**Data Definition:** During a given year, the Office of Personnel Management uses responses from 15 Federal Employee Viewpoint Survey questions to develop the Employee Engagement Index scores. The Office of Personnel Management calculates the index scores by first determining the percent positive for each question in the subfactor indices. Then the unrounded percent positive scores are averaged across the questions in the index to get the index score. This subfactor index score is then rounded for reporting purposes. To create the overall Employee Engagement Index score, the unrounded subfactor index scores are averaged. This overall index score is then rounded for reporting purposes. The rankings provide a rating of employee satisfaction and commitment across government. The subfactor indices and Federal Employee Viewpoint Survey questions follow:

Subfactor Index: Leaders Lead (five items)

Question 53 - In my organization, leaders generate high levels of motivation and commitment in the workforce.

Question 54 - My organization's leaders maintain high standards of honesty and integrity.

Question 56 - Managers communicate the goals and priorities of the organization.

Question 60 - Overall, how good a job do you feel is being done by the manager directly above your immediate supervisor/team leader?

Question 61 - I have a high level of respect for my organization's senior leaders.

Subfactor Index: Supervisors (five items)

Question 47 - Supervisors/team leaders in my work unit support employee development

Question 48 - My supervisor/team leader listens to what I have to say.

Question 49 - My supervisor/team-leader treats me with respect.

Question 51 - I have trust and confidence in my supervisor.

Question 52 - Overall, how good a job do you feel is being done by your immediate supervisor/team leader?

Subfactor Index: Intrinsic Work Experience (five items)

Question 3 - I feel encouraged to come up with new and better ways of doing things.

Question 4 - My work gives me a feeling of personal accomplishment.

Question 6 - I know what is expected of me on the job.

Question 11 - My talents are used well in the workplace.

Question 12 - I know how my work relates to the agency's goals and priorities.

**Data Source:** Office of Personnel Management – Federal Employee Viewpoint Survey

## Strategic Objective 4.4: Enhance Planning and Alignment of Human Resources to Address Current and Future Public Service Needs

### Vision 2025 Priority: Exceptional Employees

Large multilayered organizations often lack the agility to keep up with the frequent changes required to address public service needs. We will analyze our current workforce and develop strategies to meet our future organizational needs. Using workforce restructuring and reshaping programs, we will develop approaches to streamline and align our workforce. Our approaches will be supported by data analysis and forecasting to ensure we are prepared for the near term and for future service delivery needs.

### Strategies

- Use workforce restructuring and reshaping programs (e.g., Voluntary Early Retirement Authority) to adjust and align the workforce with agency needs;
- Use human resource management information and data analytics to conduct effective workforce planning and forecasting that assists leaders in making data-driven decisions;
- Conduct data-driven performance reviews to assess, monitor, and track alignment of human capital programs with service delivery needs; and
- Utilize effective management principles to optimize organizational structures and workforce composition as we automate processes and expand self-service.

### Progress Update

We took the following steps in FY 2015 to enhance planning and alignment of human resources to address current and future public service needs (see Key Initiatives and Performance Measures for more details):

- Drafted Retirement Wave report analysis to address workforce challenges;
- Restructured agency workforce;
- Held first integrated performance improvement officer/HRStat session;
- Approved analytics projects for the analytics hub pilot; and
- Released two video-on-demand training sessions on:
  - Performance management; and
  - The importance of communication for managers.

### Next Steps

- Continue transition to competency-based human capital management;
- Produce an annual workforce analysis performance report using HRStat;
- Integrate at least one process or program into HRStat Review process;
- Pilot at least one project for the analytics hub;
- Continue to hold quarterly HRStat data driven reviews;
- Conduct a comprehensive study of new hire population;
- Release third video installment on performance management for managers; and
- Use Federal Employee Viewpoint Survey for HR performance data analyses.

### Risks and External Factors

The following risks or external factors may affect our efforts to enhance planning and alignment of human resources to address current and future public service needs:

- Ability to recruit and retain subject matter expertise in data analytics;
- Insufficient human resources staff to align agency priorities with public needs; and
- Limited access to latest technology supporting data-driven performance.

## Key Initiatives

### Implementing HRStat Review Process

Our HRStat reviews provide the information we need to determine our strengths and weaknesses, monitor program implementation, and evaluate our performance of our human capital initiatives and metrics. HRStat also enables us to track interim results of our human capital planning.

As part of our HRStat approach, we conduct quarterly data-driven human capital reviews. Senior executives review each quarter's outcomes to monitor our human capital outcomes.

For our initial FY 2015 HRStat session, we reviewed metrics and developed goals. We expect to meet or exceed established targets in 75 percent of the measures.

We also integrated our Human Capital Operating Plan initiatives into our HRStat review process. During quarterly review sessions, we monitor progress and develop strategies to address challenges.

By FY 2016, we expect HRStat to be implemented as a core business process.

### Using Applicant Flow Data

We must attract, develop, and retain a world-class workforce that delivers results for the American people. We strive to provide a level playing field and the opportunity for employees to achieve their potential.

One tool we use to examine our recruitment efforts is Applicant Flow Data. Applicants using [USAJobs.gov](https://www.usajobs.gov) can provide demographic information, including sex, ethnicity, and race, and how they learned about the position. Applicant Flow Data refers to the analysis of this information to determine selection rates among different groups for particular jobs.

We use this information to:

- Examine the fairness and inclusiveness of recruiting efforts;
- Determine whether recruitment efforts are reaching all segments of the population, consistent with federal equal employment opportunity laws;
- Identify barriers to employment and best practices at each stage of the hiring process: application, qualification, referral, and selection; and
- Target resources to address strategic challenges.

Collecting demographic data, including Applicant Flow Data, is an integral part of the process we use to identify barriers (in compliance with the policy guidance provided in the Equal Employment Opportunity Commission's Management Directive 715).

In FY 2016 and FY 2017, we will continue to analyze the data by components, regions, major occupations, and grade levels. As we identify differences in selection rates among different groups in a particular component or region, we will work to address those challenges.

### Implementing the Human Capital Operating Plan

Human capital is a major concern for leaders across the government. Federal leadership faces the challenge of recruiting, retaining, and developing a talented workforce in a tight fiscal climate. In the face of increasingly complex and demanding realities, we must have employees with the right skills, in the right places, at the right times to achieve our mission.

The Human Capital Operating Plan represents our commitment to renew our focus on human capital and succession management. The plan aligns with, and supports, the goals of our [Agency Strategic Plan for Fiscal Years 2014 – 2018](#) and [Vision 2025](#). Our plan includes a mandate to build a model workforce to deliver quality service as one of our five strategic goals.

Our plan includes an analysis of our current and future workforce, identifies agency-specific initiatives, milestones, and outcome metrics, and focuses on the following key areas:

- Transform the agency into an employer of choice;
- Transition to competency-based human capital management;
- Expand leadership and core competency skill development; and
- Establish an integrated and collaborative human capital management framework.

Human capital management encompasses the process of managing how people are hired, developed, deployed, motivated, and retained. It builds upon the traditional model of HR by focusing on results. It also seeks to align HR decisions and investments more directly with our agency's mission, goals, and objectives.

We must adopt a more proactive and data-driven approach toward managing human capital to meet the needs of our future workforce. Further, we must commit adequate training resources to ensure staff remains fully prepared to provide quality service both now and in the future.

This initiative, coupled with the resources and governance structure to monitor success, provides a solid foundation for achieving a reimagined, revitalized effort toward the attraction, acquisition, development, engagement, and retention of our greatest asset – our employees.

### Analyzing Retirement Wave Analysis

We continue to face the challenge of a workforce that is decreasing while service demands increase. Our employees are essential to providing outstanding service to the public. Steady losses of employees from retirements present a unique opportunity to reshape our workforce. With just over 16 percent of our workforce eligible to retire, we will continue to build generational bridges and create an environment that focuses on developing a culture of continuous learning.

In FY 2015, we developed the FY 2015-2024 *Retirement Wave Report*. This report provides valuable workforce data that our decision-makers can use for human capital and financial management decisions. We analyzed and provided information on actual retirements, retirement eligibility, and retirement projections. This analysis gives an outlook on how our workforce may change over time. We will look for ways to prevent gaps and build the succession bench to guarantee continuity of the quality of service to the American public.

## Performance Measures – Strategic Objective 4.4

### 4.4a: Lay the foundation for building a 21st century workforce by meeting or exceeding targeted Human Resources measures

Fiscal Year	2014	2015	2016	2017
Performance	77%	83%		
Target	Achieve 75% of the human capital metrics	Achieve 75% of the human capital metrics	Achieve 78% of the human capital metrics	Achieve 80% of the human capital metrics
Target Met	Met	Met		

**Results:** We achieved 83% of the human capital metrics, exceeding our goal of 75%.

**Data Definition:** After the end of the fiscal year, we determine the number of initiatives that met or exceeded the established target. We divide the number of metrics where we achieved the selected targets by the total number of initiatives that we monitored throughout the fiscal year.

**Data Source:** Office of Personnel Management’s Federal Employee Viewpoint Survey, Federal Personnel and Payroll System, Human Resources Operational Data Store, Office of Personnel Management’s Applicant Satisfaction Survey, Office of Personnel Management’s Manager Satisfaction Survey.

## Strategic Goal 5: Ensure Reliable, Secure, and Efficient Information Technology Services

As the demand for our agency's services increases, the American public expects to interact with us using every technology available to them. Online and mobile service options are in high demand for those who prefer electronic channels, yet some people and some services still require in-person assistance at a field office.

A robust and cost-effective information technology (IT) environment is at the core of every service our agency provides for the American public and for our employees. We support our mission-critical business and service operations by designing, deploying, and maintaining one of the Nation's most sophisticated IT infrastructures.

With advances in technology, come increased security risks. Ensuring information and systems security is vital, and enhancing our cyber security protection is an ongoing task. When fully operational, our new data center, the National Support Center, will serve as the hub for our information technology operations. The National Support Center opened in September 2014, and we expect to complete the full systems migration by the end of 2016. We have planned carefully to ensure there is no service interruption during the transition.

### Strategic Objective 5.1: Maintain System Performance and the Continuity of Information Technology Services

#### **Vision 2025 Priority: Innovative Organization**

Technology is essential to everything we do. If our systems experience a problem, our productivity and service immediately decline. Maintaining strong IT performance is vital, despite rising IT demands, increasing cyber security risks, and constant industry changes.

We rely on a large and complex technology infrastructure. Our infrastructure includes dual data centers, extensive national databases, hundreds of software applications, large supporting computing platforms, and thousands of networked computers, printers, telephones, and other devices. Change to our IT infrastructure is constant, and we will ensure responsive, reliable performance.

Our two data centers, the National Computer Center and the Second Support Center, maintain beneficiary demographic, wage, and benefit information, enabling us to promptly and accurately make benefits payments. The National Computer Center has been in continuous operation since 1980.

As part of the *American Recovery and Reinvestment Act of 2009*, Congress approved funding to build a new data center. All current production data center operations now housed in our aging National Computer Center will transition to the new National Support Center in 2015 and 2016. The new center will provide increased capacity and improved operational reliability and efficiency.

#### Strategies

- Successfully transition to the new National Support Center; and
- Maintain responsive, reliable system performance.

#### Progress Update

The Social Security Administration, in consultation with the Office of Management and Budget, has determined that performance toward this objective is making **noteworthy progress**. We took the following steps in FY 2015 to maintain system performance and the continuity of information technology services (see Key Initiatives and Performance Measures for more details):

- Set up new IT infrastructure at the National Support Center, as scheduled; and
- Maintained system continuity, as planned.

## Next Steps

- Continue transition plan to the National Support Center; and
- Maintain current systems reliability metrics throughout the transition to the National Support Center.

## Risks and External Factors

The following risk or external factor may affect our efforts to maintain system performance and the continuity of information technology services:

- New legislation, changing technology, and high volumes of workloads may affect planned activities.

## Key Initiatives

### Enhancing Our Infrastructure

Our new National Support Center will dramatically increase our computing power, reduce our energy consumption, and provide the foundation for future infrastructure enhancements. We completed the IT infrastructure set up in April 2015, and by August 2016, all IT services should be completely migrated to the new center.

We designed the facility to be Leadership in Energy and Environmental Design Gold certified. Minimal staffing, lighting most areas only when staff are present, and managing the infrastructure remotely will help reduce energy costs. Innovative heating and cooling systems will also help reduce costs. For example, when outside temperatures are below 55 degrees (about 145 days each year), there will be practically no cooling costs.

Over the next several years, we will implement several technologies including high-speed disc replication, dynamic load balancing with high bandwidth connectivity between data centers, additional data center capacity, and automatic failover and staging systems.

### Maintaining Systems Performance While Transitioning to the National Support Center

Moving our data infrastructure is no simple task. The transition is a complex process and the nature of our business requires continuous operation. Our goal is to provide uninterrupted service during the transition from our National Computer Center in Baltimore to the new National Support Center in Western Maryland.

Our service migration began in October 2014 and will continue until August 2016. Our multiyear strategy includes using the latest technological advances to enhance the capacity, flexibility, and performance of our IT environment and infrastructure.

Our migration project recently received the 2015 Project Management Excellence Award from the Government Information Technology Council. A panel of government and industry representatives selected the winner, based on six criteria: significant mission outcomes, cost savings, risk management, customer experience, innovative approach, and quality assurance.

### Improving Information Technology Cost and Performance

We use proven technologies to lower IT cost and improve performance. As part of our capital planning and investment control process, we evaluate the cost of IT projects in terms of their return on investment.

We adopt new technologies to provide stable and high-performing environments, like:

- **Server consolidation:** Buying fewer, larger servers;
- **Server virtualization:** Dividing one large server into smaller sections which operate as individual servers, running their own operating systems and applications;
- **Data deduplication:** A specialized data compression process used to identify data chunks and reference them, instead of repeat them;
- **Hot aisle containment:** Installing a physical barrier to direct hot air exhaust to the air conditioning return system, increasing cooling efficiency;
- **High density computing:** Maximizing a computer's performance as much as possible in the smallest amount of space possible with as little heat as possible; and
- **Cloud computing:** Internet-based, instead of hard-drive based.

## Performance Measures – Strategic Objective 5.1

### 5.1a: Provide uninterrupted access to our systems during scheduled times of operation

Fiscal Year	2010	2011	2012	2013	2014	2015	2016	2017
<b>Performance</b>	99.84% availability	99.89% availability	99.9% availability	99.96% availability	99.97% availability	99.96% availability		
<b>Target</b>			99.5% availability	99.5% availability	99.5% availability	99.5% availability	99.5% availability	99.5% availability
<b>Target Met</b>			Met	Met	Met	Met		

**Results:** We have consistently exceeded this target since FY 2012. In FY 2015, we provided uninterrupted access to our systems 99.96 percent of the time during scheduled times of operation.

**Data Definition:** We define enterprise availability as a weighted total availability of service channel mission-critical applications for all our customers. We consider an application available when the end user can perform all business functions within the application with reasonable response times. The weighting takes into account the relative impact that an outage could have on our customers, considering both the functionality and the service hours that are potentially affected. Six different service channels (i.e., online, electronic disability process, Internet, telephone, data exchange, and weekend online services) and accompanying applications are included. Mission-critical services in our enterprise availability include:

- Self-service Internet benefits applications;
- Automated telephone menu data applications;
- Email and case processing systems used by our direct support staff or by our partnering disability determination services staff; and
- External business services, including application services between us and other federal agencies, as well as data exchange systems used by our governmental or business partners.

**Data Source:** Hewlett-Packard OpenView Service Center (data is limited to Critical Application Severity 1 outages)

## Strategic Objective 5.2: Enhance and Execute Plans to Modernize Our Systems

### Vision 2025 Priority: Innovative Organization

Our information technology (IT) solutions are constantly evolving as we meet our business needs with stable, modern technologies. We support and employ technologies championed by the Federal Chief Information Officer Council and the Federal Information Technology Reform Plan, such as:

- Digital government;
- Shared services;
- Modular development;
- Near 24/7 system availability; and
- Cloud (Internet-based) computing architecture.

We are revising our computer code, once dominated by older programming languages (e.g., Common Business Oriented Language and Assembler Language Code) to provide a better balance of more modern code while maintaining older, highly functioning code. Improving the presentation and usability of our older systems, while removing technical risks, continues to be our focus.

As funding permits, we invest in new business applications, while improving existing applications and infrastructure. We incrementally modernize our older software applications based on business opportunity and technical risk. We continue to enable newer, more adaptable technologies, when appropriate, while maintaining the code base and systems supporting the services we provide the American public every day.

### Strategies

- Refresh IT planning activities to effectively prioritize and manage IT investments;
- Employ technology to extend service, mitigate risk, and reduce cost; and
- Assess application portfolios, focusing on cost, business value, and technology sustainability.

### Progress Update

We took the following steps in FY 2015 to enhance and execute plans to modernize our systems (see Key Initiatives and Performance Measures for more details):

- Enhanced our annual application portfolio management review by combining data collection and detail analysis; and
- Implemented additional fraud detection algorithms to detect potential fraud.

### Next Steps

- Expand use of our application portfolio management process to applications developed outside the Office of Systems;
- Expand antifraud applications, identifying both internal and external threats; and
- Convert selected databases to relational database technology.

### Risks and External Factors

The following risks or external factors may affect our efforts to enhance and execute plans to modernize our systems:

- Modernization of some systems is delayed because they are currently stable and running smoothly;
- Subject matter experts who fully understand underlying business processes behind legacy systems are approaching retirement – thus we may lose institutional knowledge before those systems are migrated into new platforms; and
- Legislative changes and other federal mandates often require reallocation of scarce resources.

## Key Initiatives

### Modernizing Older Software Applications

We manage our IT application portfolio the same way individuals manage their investment portfolios. First, we evaluate existing software applications to ensure they meet our business goals while fitting into our overall IT plan. Then we use those evaluations to retire, modernize, or maintain the applications.

Our application portfolio management practice includes ongoing reviews of all our applications.

Modernization efforts include:

- Updating database designs by converting them to relational databases;
- Eliminating the use of Assembler Language Code;
- Replacing outdated user interfaces;
- Upgrading infrastructure; and
- Integrating our services more completely.

### Improving Information Technology Governance and Architectural Planning

IT governance and architectural planning covers a wide range of systems development and planning activities related to standards and regulations, systems management, life-cycle support, user groups, performance and availability, and new technologies. Governance helps ensure that we adhere to our policies and to federal IT requirements.

We provide IT governance and planning through our:

- Architecture Review Board;
- Infrastructure Review Board;
- Design Review Board;
- Enterprise data architects;
- Solutions architects;
- Security Architects; and
- Enterprise Architects.

These groups provide support for the design, installation, and maintenance of the hardware and software needed to ensure a reliable, efficient, and effective environment for all of our platforms.

### Enhancing the **my Social Security Portal**

We plan to redesign the **my Social Security** portal to enhance our customers' experience, provide greater protection for the public's data, and expand our secure online service options.

The redesign will provide critical enhancements to the **my Social Security** portal, allowing for new tabs for additional online services. The new tabs will group similar online services within the **my Social Security** portal, making the portal easier to navigate and enhancing our customers' experience.

The redesign will also add more robust anti-fraud and authentication capabilities to the **my Social Security** portal. The enhancements will provide users with a secure way to request replacement Social Security number cards online. As we expand our online service options, we are committed to providing secure online services both now and in the future.

Enhancing the **my Social Security** portal is vital to the success of our online services. We are adding responsive design so that our online services are available to our customers across a variety of devices (i.e. customer service stations, tablets, mobile devices, etc.). Enhancements will affect both current and future applications scheduled for release in FY 2016. Additionally, the redesign will plan for services coming behind the portal to ensure appropriate space is available.

In FY 2016 and FY 2017, the redesign project will include:

- Enhancing security for the online Social Security number replacement card functionality;
- Enhancing online fraud detection capabilities;
- Adding responsive design to the **my Social Security** portal; and
- Adding tabs within the portal to group services to improve the customer experience.

## Performance Measures – Strategic Objective 5.2

### 5.2a: Enhance systems performance and reliability by upgrading the telecommunications infrastructure in our offices

Fiscal Year	2014	2015	2016	2017
Performance	Upgraded infrastructure to better incorporate new technologies	Refreshed 100% of our network connection devices		
Target	Complete the infrastructure upgrade to incorporate modern technologies that support future Internet and network capacity needs and new capabilities	Refresh 50% of our network connection devices by September 30, 2015		
Target Met	Met	Met		

**Results:** We exceeded our goal by refreshing 100% of our network connection devices.

**Data Definition:** This target provides for the design, installation, implementation, monitoring, and maintenance of our Wide Area and Local Area Networks and the connectivity to these network services to end users nationwide. It also provides the communication medium through which our employees receive data such as voice and video, administers the Network's services agency-wide, and the exchange of data with other federal and state agencies. The projects in this initiative involve the National 800 Number, Satellite and Wireless Communications Solutions, Video Conferencing, fax, Voice over Internet Protocol, Electronic Messaging, and the procurements of system hardware and software services.

**Data Source:** Our Wide Area and Local Area Networks and Connectivity Plan

## 5.2b NEW: Improve customer service by using information technology to provide new online services to users of **my Social Security**

Fiscal Year	2015	2016	2017
Performance			
Target		Implement new fraud and authentication capabilities to enable customers to obtain replacement Social Security Cards securely through the <b>my Social Security</b> portal	Modernize the <b>my Social Security</b> portal framework to speed the integration of service offerings and to better group available functions together to focus on targeted user groups
Target Met			

**Data Definition:** This target improves access to our online services by providing citizens a way to request and obtain a Social Security replacement card through the **my Social Security** portal.

**Data Source:** Social Security Administration, Office of Systems

## Strategic Objective 5.3: Incorporate Innovative Advances in Service Delivery

### Vision 2025 Priority: Innovative Organization

Advances in computer technology, the increase of high-speed networks, and widespread use of mobile technology have reshaped our service channels. Our customers expect us to provide exceptional service, regardless of the technology they use.

We are constantly reviewing emerging technologies, and we are planning effective, efficient service delivery options based on our research. As we develop new options, we are targeting areas where reengineering is most needed.

We actively participate in the Federal Chief Information Officers Council and leverage the expertise of industry experts, as well as our own business and technical staffs, to develop the most effective solutions for our customers and our employees. Additionally, we are participating in the Federal Strategic Sourcing Initiative for Desktops and Laptops to support our infrastructure enhancement efforts.

### Strategies

- Deliver accurate, convenient, and flexible agency systems and services in a cost-conscious manner;
- Explore the use of emerging technologies to improve service and increase efficiency; and
- Engage and benchmark private and public IT communities to ensure the timely identification of important Key Initiatives.

### Progress Update

We took the following steps in fiscal year (FY) 2015 to incorporate innovative advances in service delivery (see Key Initiatives and Performance Measures for more details):

- Tested several new emerging technologies in our lab;
- Developed an agency-wide strategy for video service delivery; and
- Continued participation in the Federal Chief Information Officers Council.

### Next Steps

- Continue to support and maintain the testing lab with current devices based on trending internal and external usage patterns.

### Risks and External Factors

The following risks or external factors may affect our efforts to incorporate innovative advances in service delivery:

- The public demands more sophisticated, integrated service channels to supplement our traditional structure; and
- Implementing and maintaining customer service stations may not be cost effective.

### Key Initiatives

#### Enhancing our National 800 Number Infrastructure

With our new National 800 Number infrastructure fully implemented, enhancements for FY 2014 focused on strategic planning and day-to-day management of our call centers to improve performance.

Those enhancements improved speech recognition, enabling callers to complete their business using our automated services.

In FY 2015, we implemented a set of standard indicators designed to help us gauge how our agents are performing. In addition, we developed tools to help managers work with agents to improve their customer interaction skills.

Source: Pew Research Center Internet Project Survey, October 2015.

By the end of FY 2016, under our new National 800 Number infrastructure, we plan to enhance customer service delivery with the use of post-call customer surveys, training, quality management, and performance monitoring.

Additionally, the enhancements will include speech analytics that will allow us to better manage customer expectations and help detect fraud.

#### **Expanding Video Conferencing Capabilities throughout the Agency**

We expanded video conferencing throughout the agency, including hearing offices, field offices, disability determination services offices, and individual employee workstations. We currently use desktop video units to provide video conferencing between sites and in rural areas where there is no local office. These units reduce travel time and costs while improving case production and allowing for more flexible scheduling. We continue to explore cost saving alternatives in equipment, service, and software.

## Performance Measures – Strategic Objective 5.3

### 5.3a: Enhance our IT infrastructure by implementing innovative systems accessibility and performance capabilities

Fiscal Year	2014	2015	2016	2017
<b>Performance</b>	Bandwidth-on-Demand capabilities are operational at over 75% of agency sites	Reduced our open systems infrastructure size to 1,000 servers		
<b>Target</b>	Implement Bandwidth-on-Demand, which will provide the ability to increase telecommunications capacity to quickly meet the changing service needs of our offices and clients	Reduce open systems infrastructure size from 1,500 servers to 1,000 servers by September 2015	Deploy new applications with a modern look and feel, accessible from the web or over mobile devices	Develop and implement our plan (strategy, policy, business model, and security requirements) for the establishment of an agency cloud service
<b>Target Met</b>	Met	Met		

**Results:** We are down to 1,000 open system servers as of September 2015.

**Data Definition:** This target provides for the design, installation, implementation, software, monitoring, and maintenance of our Wide Area and Local Area Networks and the connectivity to these network services to end-users nationwide. It also provides the communication medium through which our employees receive data such as voice and video, administers the network's services agency-wide, and the exchange of data with other federal and state agencies. The projects in this initiative involve the National 800# Call Center, Satellite and Wireless Communications Solutions, Video Teleconferencing, Fax, Voice over Internet Protocol, Electronic Messaging, and the procurements of system hardware and software services.

**Data Source:** Our Wide Area and Local Area Networks and Connectivity Plan

**5.3b: Explore the use of emerging technologies by establishing a testing lab to promote research and development of innovative technology solutions that provide more effective and flexible ways for the public to conduct business with us online and for our employees to complete their work**

Fiscal Year	2104	2015	2016	2017
Performance	We are actively supporting new agency electronic initiatives such as customer service stations and an upgraded environment for self-help personal computers	Conducted three new research projects		
Target	Identify and implement new innovative tools to expand the capabilities of the testing lab to develop solutions that accommodate evolving customer preferences.	Conduct three new research projects in emerging technologies such as predictive analytics, cloud, shared services, self-help personal computers, real-time chat, digital analytics, and cognitive computing by September 30, 2015		
Target Met	Met	Met		

**Results:** We met our FY 2015 target.

**Data Definition:** Because of today's volatile and unpredictable mobile, tablet, and personal computer environment, we must conduct compatibility testing with a multitude of devices, browsers and operating systems to ensure our online customers are able to conduct business successfully with us no matter what device they use. By monitoring the advances being made in delivery channels and by monitoring the use of these channels to access our services, we determine which devices to purchase and test in our testing lab, focusing on the devices with the highest percent of use.

**Data source:** Industry and national trends. Google Analytics

## Strategic Objective 5.4: Continuously Strengthen Our Cyber Security Program

### Vision 2025 Priority: Superior Customer Experience

Given the sensitive nature of the highly personal information and data within our systems, data integrity, security, and protecting individual privacy are critical to sustaining public trust in our services. New services and delivery channels expose us to modern threats. We must be vigilant and continue to strengthen our cyber security intelligence and protections.

We maintain a comprehensive, agency-wide information security program of controls that protect our information and communications assets. We continually review policies and processes, taking appropriate corrective action to prevent misuse and unauthorized access to assets and sensitive data, including personally identifiable information.

### Strategies

- Maintain information security preparedness;
- Continually adjust security processes and procedures to reflect changes in technology, the sensitivity of our data and systems, and awareness of actual and potential internal and external threats;
- Perform risk-based systems reviews to enhance continuous monitoring and data loss prevention strategies; and
- Enhance our audit trail, integrity review, and fraud prevention processes.

### Progress Update

We took the following steps in FY 2015 to strengthen our cyber security program (see Key Initiatives and Performance Measures for more details):

- Implemented several new processes and capabilities to strengthen our cybersecurity program, including:
  - Security awareness training campaign;
  - Continued implementation use of Personal Identity Verification credentials; and
  - Continuous dashboard monitoring.

### Next Steps

- Implement new technical architecture to strengthen our audit trail system capabilities and help prevent fraud; and
- Continued compliance (meet or exceed targets) with all applicable cyber security guidance, best practices, mandates, and requirements related to the Cross-Agency Priority goals.

### Risks and External Factors

The following risk and external factor may affect our efforts to strengthen our cybersecurity program:

- As the agency continues to shift its business model to enable the public to use more online services, the potential for fraud will increase. Sufficient resources are essential to safeguard personal information and protect the public trust against online security threats.

### Key Initiatives

#### Protecting Our Systems and Data

We continue to strengthen our information security program to meet the standards and requirements of the *Federal Information Security Management Act of 2002*, as amended by the *Federal Information Security Modernization Act of 2014*, by training our employees and implementing effective cybersecurity technologies.

Our systems and data are constantly at risk from emerging threats and technology. We deploy new tools and techniques as threats are discovered. Software flaws pose an ongoing risk, potentially making our systems vulnerable

to malicious or accidental actions. In response, we have added additional licenses for a tool our developers use to scan their code and repair it before release if security flaws are found.

Threats to data and systems can also come from within an organization. We are rolling out an agency-wide automated access control system, replacing our current paper-based system. The new system will improve timeliness in granting and removing user access, improve accuracy in assigning access to information resources, and provide clearer audit records. We are also analyzing new technologies to review employee activity. Our changing service delivery channels and other system changes require ongoing updates to our monitoring systems.

Finally, employee security awareness and training remains a high priority. Agency-wide on-demand video training helps raise employee awareness on protecting our systems and data. Because our work often involves personal interactions, we must always be on guard against a threat known as social engineering, where people pretend to be coworkers, repair technicians, or any other role, where they could access our systems or data. We have invested heavily in special training for all of our employees to help them recognize and prevent social engineering activities and other types of activities that can cause system problems.

### **Implementing Audit Trail System New Architecture Phase II**

Our audit trail system ensures we protect our records and funds by collecting and maintaining detailed information about both internal and external transactions. The system stores data from programmatic and select Internet applications, allowing us to review transactions for signs of fraud and abuse.

The new audit trail system architecture will strengthen our fraud detection and prevention efforts by capturing details of transactions most vulnerable to fraud. The proposed architecture was approved in February 2014 and a WebSphere user interface was piloted in March 2015. Additional enhancements are planned before a full roll out in FY 2016.

### **Implementing an Information Security Program**

We maintain a comprehensive, agency-wide information security program to protect information and communications assets. We review our policies and processes continually to ensure adequate safeguards are in place to prevent misuse and unauthorized access to our systems and data. We are also strengthening the security of our systems by implementing consistent management controls at all of our data facilities.

We have completed the following activities supporting both the federal Cybersecurity Cross-Agency Priority Goals and the Department of Homeland Security's Federal Network Security Compliance and Assurance program:

- Established Trusted Internet Connection Access Provider designation through the Department of Homeland Security;
- Participated in the National Cyber Protection System, a collaboration between the Department of Homeland Security and other federal agencies to share security resources;
- Collaborated with the Department of Homeland Security to develop monthly security assessments of our public-facing network;
- Defined and implemented an information security continuous monitoring strategy to manage information security risks;
- Participated in the Department of Homeland Security's Continuous Diagnostics and Mitigation program to ensure we have an accurate view of our risks and the effectiveness of our controls. We share our computer security information across the federal civilian government agencies to help ensure they are aware of the threats to their infrastructures and can swiftly take corrective measures; and
- Implemented personal identity verification credentials, as defined in Homeland Security Presidential Directive 12, as a secure form of identification within our systems (with the exception of DDS systems, which are still in progress).

New services and delivery channels expose us to modern threats. We must be consistently diligent and continue to strengthen our cybersecurity intelligence and protections. We continually adjust our information security program to reflect changes in technology, the sensitivity of covered information and information systems, and internal or external threats to information and communications.

## Performance Measure – Strategic Objective 5.4

### 5.4a: Provide secure and effective services to the public by improving cyber security performance

Fiscal Year	2013	2014	2015	2016	2017
<b>Performance</b>	<p>Homeland Security Presidential Directive 12 Compliance – result 85%</p> <p>Information Security Continuous Monitoring – result 96%</p> <p>Trusted Internet Connections Consolidation – result 100%</p> <p>Trusted Internet Connections 2.0 Capabilities – result 96%</p>	<p>Homeland Security Presidential Directive 12 Compliance – result 87%</p> <p>Information Security Continuous Monitoring – result 98%</p> <p>Trusted Internet Connections Consolidation – result 100%</p> <p>Trusted Internet Connections 2.0 Capabilities – result 94%</p>	<p>Hardware Asset Management – result 100%</p> <p>Software Asset Management – result 100%</p> <p>Vulnerability and Weakness Management – result 100%</p> <p>Unprivileged Network Users – result 86%</p> <p>Privileged Network Users – result 99%</p> <p>Anti-Phishing Defense – result 100%</p> <p>Malware Defense – result 100%</p> <p>Blended Defense – result 100%</p>		
<b>Target</b>		<p>Meet the performance requirements of the Department of Homeland Security's Federal Network Security Compliance and Assurance program and the Cyber Security Cross-Agency Priority Goals</p>	<p>Meet the performance requirements of the Department of Homeland Security's Federal Network Security Compliance and Assurance program and the Cyber Security Cross-Agency Priority Goals</p>	<p>Achieve an average of 97% for the following Cyber Security Cross-Agency Priority Goals:</p> <p>Anti-phishing defense; Malware defense; Blended defense (anti-phishing and malware defense measures); Hardware asset management; Software asset management; and Vulnerability and weakness management.</p>	<p>Achieve an average of 99% for the following Cyber Security Cross-Agency Priority Goals:</p> <p>Anti-phishing defense; Malware defense; Blended defense (anti-phishing and malware defense measures); Hardware asset management; Software asset management; and Vulnerability and weakness management.</p>
<b>Target Met</b>		Met	Met		

**Results:** We met our FY 2015 target and are compliant in all areas of the Department of Homeland Security's Federal Network Security Compliance and Assurance program and the Cyber Security Cross-Agency Priority Goals.

**Data Definition:** Define and implement strong controls to continuously monitor the security status of network, systems, and information and ensure that individuals with access to our network resources are using strong authentication to connect.

Data Source: [Cybersecurity Cross-Agency Priority Goals on Performance.gov](#)

# Appendix A:

## Our Management and Performance Challenges

As we strive to improve our performance, we face a variety of challenges. Each year the Office of the Inspector General (OIG) identifies what it sees as our top management and performance challenges. In addition, our management identifies challenges, which often overlap with the OIG report.

Below is a listing of the challenges we have collectively identified. To avoid redundancy, the OIG report findings are listed first, since they also reflect challenges our leadership has identified. The management challenges identified by our leadership follow. Key initiatives we are undertaking to address these challenges are listed below each item.

### Challenges Identified by OIG

In fiscal year (FY) 2015, OIG identified seven top management and Social Security Administration (SSA) Management Issues. (Responsible official acronyms are listed in [Appendix F, Summary of Key Management Official's Responsibilities](#).) To read the full OIG report, please refer to the [Fiscal Year 2015 Inspector General Statement on SSA's Major Management and Performance Challenges](#).

### Improve the Responsiveness and Oversight of the Hearings Process (DCDAR)

**Challenge:** While SSA continues focusing on the quality and consistency of hearing decisions, it is facing worsening average processing times and increasing pending hearings.

Actions we are undertaking to address this challenge include:

- Expanding Video Service Delivery (pg. 42);
- Expanding Use of Electronic Bench Book (pg. 73); and
- Hiring Sufficient Administrative Law Judges to Ensure Public Access to Agency Services (pg. 75).

### Improve the Timeliness and Quality of the Disability Process (DCO, DCORDP, DCBFQM)

**Challenge:** SSA needs to address receipt of millions of initial disability and reconsideration claims and backlogs of initial disability claims and continuing disability reviews, while also protecting its disability programs from fraud and encouraging beneficiaries to return to work.

Actions we are undertaking to address this challenge include:

- Expanding Video Service Delivery (pg. 42);
- Expanding the Virtual Lifetime Electronic Record (pg. 51);
- Establishing the Office of Anti-Fraud Programs (pg. 62);
- Enhancing the Electronic Claims Analysis Tool (pg. 73);
- Developing an Occupational Information System (pg. 74);
- Updating the Medical Listing of Impairments (pg. 74);
- Developing the Disability Case Processing System (pg. 82);
- Using Health Information Technology to Expedite Disability Decisions (pg. 83); and
- Improving Employment Support Programs (pg. 86).

## Reduce Improper Payments and Increase Overpayment Recoveries (DCRDP, DCBFQM, DCO, DCS, DCDAR, OCSO)

**Challenge:** SSA is responsible for issuing over \$932 billion in benefit payments annually, to approximately 65 million people.<sup>4</sup> Given the amount of overall dollars involved in SSA's payments, even the slightest error in the overall process can result in millions of dollars in over or underpayments.

Actions we are undertaking to address this challenge include:

- Expanding Our Cooperative Disability Investigation Program (pg. 67);
- Promoting the use of Supplemental Security Income Telephone Wage Reporting System and the Supplemental Security Income Mobile Wage Reporting (pg. 65);
- Using Predictive Modeling in the Continuing Disability Review Enforcement Operation (pg. 66);
- Using Predictive Modeling in the Redetermination Process (pg. 66);
- Expanding the Access to Financial Institutions Initiative (pg. 66);
- Improving the Death Reporting System Process (pg. 67);
- Implementing Data Exchange and Verification Online (pg. 68); and
- Implementing New Tools for Debt Collection (pg. 68).

## Improve Customer Service (DCDAR, DCO, DCBFQM, DCS)

**Challenge:** SSA faces several challenges, such as increasing workloads and representative payee oversight, as it pursues its mission to deliver services that meet the public's changing needs.

Actions we are undertaking to address this challenge include:

- Expanding Online Access through Social Security Express (pg. 35);
- Enhancing Delivery Option for the Replacement Social Security Benefit Statement (pg. 36);
- Implementing Online Social Security Number Replacement Card Application (pg. 39);
- Providing Real-Time Assistance to Online Users (pg. 42);
- Hire Sufficient Administrative Law Judges to Ensure Public Access to Agency Services (pg. 75);
- Modernizing Older Software Applications (pg. 114);
- Improving Information Technology Governance and Architectural Planning (pg. 114);
- Enhancing our National 800 Number Infrastructure (pg. 117); and
- Expanding Video Conferencing Capabilities throughout the Agency (pg. 118).

## Invest in Information Technology Infrastructure to Support Current and Future Workloads (DCS)

**Challenge:** SSA faces the challenge of determining how best to use technology to accomplish its mission within its budget and resource constraints, while ensuring its information systems are secure and sensitive data are protected.

Actions we are undertaking to address this challenge include:

- Developing the Disability Case Processing System (pg. 82);
- Using Health Information Technology to Expedite Disability Decisions (pg. 83);
- Enhancing Our Infrastructure, Improving Information Technology Cost and Performance (pg. 111);
- Modernizing Older Software Applications (pg. 114);
- Improving Information Technology Governance and Architectural Planning (pg. 114);
- Enhancing the [my Social Security](#) Portal (pg. 114)

---

<sup>4</sup> The figures were updated to reflect FY 2015 data, and differ from the OIG report.

- Enhancing our National 800 Number Infrastructure (pg. 117); and
- Expanding Video Conferencing Capabilities throughout the Agency (pg. 118).

## **Strengthen the Integrity and Protection of the Social Security Number (DCS)**

**Challenge:** Protecting the Social Security number and properly posting the wages reported under Social Security numbers are critical to ensuring eligible individuals receive the full benefits they are due.

Actions we are undertaking to address this challenge include:

- Increasing Electronic Wage Reporting Filing (pg. 59); and
- Deploying Management System for Personally Identifiable Information and Federal Tax Information (pg. 61).

## **Strengthen Planning, Transparency, and Accountability (COSS, CSO, DCHR, DCS, DCBFQM, DCO)**

**Challenge:** Planning, transparency, and accountability are critical factors in effective management. Failure to plan properly to meet its mission and challenges will lessen the Agency's ability to provide its services efficiently and effectively now and in the future. Similarly, mismanagement and waste, as well as a lack of transparency for citizens in Government operations, can erode trust in SSA's ability to tackle the challenges it faces.

Actions we are undertaking to address this challenge include:

- Using Predictive Modeling in the Redetermination Process (pg. 66);
- Using Predictive Modeling in Continuing Disability Review Enforcement Operation (pg. 66);
- Protecting Our Systems and Data (pg. 121);
- Implementing Information Security Program (pg. 122); and
- Implementing Audit Trail System New Architecture Phase II (pg. 122).

## **Additional Challenges Identified by Our Leadership**

### **Prevent Waste, Fraud, and Abuse**

Waste, fraud and abuse erode the public's trust in our ability to efficiently and effectively provide vital services. Prevention is critical to conserving valuable resources and meeting our mission to meet the changing needs of the public.

Actions we are undertaking to address this challenge include:

- Establishing the Office of Anti-Fraud Programs (pg. 62);
- Promoting Use of the Supplemental Security Income Telephone Wage Reporting System (pg. 65);
- Increasing Social Security Income Mobile Wage Reporting (pg. 65);
- Improving the Death Reporting System Process (pg. 67);
- Expanding the Access to Financial Institutions Initiative (pg. 66);
- Expanding Our Cooperative Disability Investigation Program (pg. 67);
- Implementing Direct Deposit Auto-Enrollment Fraud Prevention (pg. 68); and
- Adding Anti-Fraud Messages in Notices (pg. 68).

### **Have Enough Employees with the Right Skills in the Right Place at the Right Time**

Having exceptional employees with the right skills in the right place at the right time is critical to our vision for a superior customer experience and an innovative organization. Employee turnover challenges our ability to develop and retain empowered, knowledgeable, compassionate, and engaged employees.

Actions we are undertaking to address this challenge include:

- Highlighting the Pathways Programs (pg. 95);
- Reducing Skills Gaps (pg. 95);
- Using SkillsConnect to Share Talent Across Our Agency (pg. 96);

- Marketing Availability of On-Demand Training and Development (pg. 96); and
- Supporting Employees through Mentoring (pg. 96).

## **Innovate the Future of Service Delivery**

We must innovate the future of service delivery to better serve the American public. We are constantly improving current, and developing new service delivery options. Our customers expect exceptional customer service, regardless of the service delivery option they use to complete their business with us.

Actions we are undertaking to address this challenge include:

- Expanding Online Access through Social Security Express (pg. 35);
- Enhancing Delivery Option for the Replacement Social Security Benefit Statement (pg. 36);
- Implementing Online Social Security Number Replacement Card Application (pg. 39);
- Providing Real-Time Assistance to Online Users (pg. 42);
- Developing the Disability Case Processing System (pg. 82);
- Using Health Information Technology to Expedite Disability Decisions (pg. 83).
- Enhancing Our Infrastructure (pg. 111);
- Improving Information Technology Cost and Performance (pg. 111);
- Modernizing Older Software Applications (pg. 114);
- Improving Information Technology Governance and Architectural Planning (pg. 114);
- Enhancing our National 800 Number Infrastructure (pg. 117); and
- Expanding Video Conferencing Capabilities throughout the Agency (pg. 118).

## **Keep Pace in the Disability Program with Medicine, Technology, and World of Work**

Medicine, technology, and the world of work are constantly evolving. We must keep pace creating a more agile, responsive organization committed to meeting the public's needs and maximizing efficiencies throughout the disability program.

Actions we are undertaking to address this challenge include:

- Developing an Occupational Information System (pg. 74);
- Developing the Disability Case Processing System (pg. 82); and
- Using Health Information Technology to Expedite Disability Decisions (pg. 83).

# Appendix B:

## Program Evaluations

We routinely evaluate our programs by conducting a variety of studies and surveys to determine if our programs are effective. We continue to build on our collection of program data, research, and analyses to identify our program strengths and weaknesses. We use information from program evaluations to develop strategies to address the major challenges we face and to improve the day-to-day administration of our programs. We complete many of our evaluations annually while others may be one-time efforts.

We list the evaluations under the strategic goal they support from our [\*Agency Strategic Plan for Fiscal Years 2014 – 2018\*](#).

### Strategic Goal 1 – Deliver Innovative, Quality Services

#### Field Office Telephone Service Evaluation

We conduct an annual evaluation of the telephone service in our field offices. Each year, since 1999, we select a random sample of over 100 field offices across the country for the evaluation. We monitor about 2,000 randomly selected calls over the course of the year to assess the accuracy of the information representatives provide and the actions they take. The representatives do not know when we monitor their calls. We use the results of our Field Office Telephone Service Evaluation to identify training needs and clarify operating instructions for our representatives.

We assess the accuracy of the information representatives provide and the actions they take based on our program policies and operating guidelines. We use three measures of accuracy in our Field Office Telephone Service Evaluation:

- **Payment Accuracy** – indicates the percentage of calls free of payment error. A payment error occurs when a representative's information or action (or failure to give information or take action) has the potential to affect a caller's payment or eligibility for benefits adversely;
- **Service Accuracy** – reflects the percentage of calls free of service error. A service error occurs when a representative does not meet the caller's need for information, causes the caller inconvenience, or creates an unnecessary additional workload; and
- **Access and Disclosure Accuracy** – reflects the percentage of callers properly identified to permit release of personal information from our records. We previously included access and disclosure errors in the calculation of service accuracy.

Our latest published accuracy rates are for fiscal year (FY) 2014. Payment accuracy was 96.2 percent, which was comparable to the FY 2013 rate of 96.8 percent. Service accuracy was 89.2 percent, not significantly lower than the FY 2013 rate of 90.4 percent. Access and disclosure accuracy in FY 2014 was 64.8 percent. This rate was significantly lower than the FY 2013 rate of 70.3 percent by almost 6 percentage points, and reversed the improvement in access and disclosure accuracy that field offices (FO) had maintained from FY 2011 through FY 2013. The FY 2014 rate was not significantly different from the FY 2010 rate of 61.6 percent.

## National 800 Number Telephone Service Evaluation

We monitor calls to our National 800 Number to evaluate both the accuracy of the information our telephone agents provide and the actions they take. Each year, since 1989, we monitor about 3,000 calls handled by agents in our 35 call centers nationwide. We randomly select and monitor calls throughout the year based on a statistical sampling methodology. Our agents do not know when we monitor their calls. We use the results of our annual National 800 Number Service Evaluation to identify training needs and improve operating instructions for our agents.

This evaluation identifies the specific causes of error and the operating policies that our agents did not follow. It uses the same standards of payment, service, and access and disclosure accuracy as our Field Office Telephone Service Evaluation discussed above. Our latest published accuracy rates are for FY 2014. The payment accuracy rate rose significantly from 96 percent in FY 2013 to 97.8 percent in FY 2014, returning to the level sustained from FY 2011 to FY 2012. Service accuracy was 90.8 percent in FY 2014, significantly lower than the rate in FY 2013 (92.4 percent). The access and disclosure accuracy was 94.2 percent in FY 2014. This rate was significantly lower than the FY 2013 rate of 95.7 percent, but was in line with the FY 2012 rate of 94.5 percent. Updates expected in February/March 2016.

## Online Authentication Survey

The Online Authentication Survey (OAS) focused on the satisfaction of customers who visited a field office to complete their *my Social Security* account registrations after encountering a problem during the online process. The OAS measured satisfaction with key aspects of the service experience and obtained an overall rating of the online account registration process using our standard six-point rating scale: excellent, very good, good (E/VG/G), fair, poor, or very poor. In addition to addressing satisfaction with the online registration process, the survey also assessed satisfaction with service received during the field office visit or on the telephone.

Our FY 2015 results are not yet available. Our FY 2014 survey found that responder perceptions of the process for resolving an online registration problem and creating an account improved significantly compared with FY 2013. Responders gave a rating of 86 percent E/VG/G for their “start-to-finish” experience creating the account, up from 77 percent E/VG/G in FY 2013. Improved perceptions of telephone service in connection with the account registration contributed to the overall improvement. The rating of telephone service overall rose by 11 percentage points to 71 percent E/VG/G in FY 2014, following the introduction of the *my Social Security* 800 number Help Desk. Ratings of other aspects of the telephone experience, such as ease of access, also improved by a margin of 6 to 17 percentage points. Responders continued to report a high degree of satisfaction with the service they received when they visited the field office, rating the in-person service experience at 91 percent E/VG/G.

## Service Satisfaction Surveys

We measure satisfaction with our services by surveying people who use them. The Service Satisfaction Surveys we conduct reflect the public’s perception of the services we provide in person or by telephone at our National 800 Number, and in our FOs. In addition to obtaining ratings of various aspects of service, the surveys elicit factual information about customer experiences, and ask about their preferences for conducting future business, including the potential for Internet use. The surveys also address customers’ need for special accommodations due to medical condition. The feedback helps us identify strengths and weaknesses in our service delivery so we can make necessary improvements. In addition to reporting satisfaction rates from our surveys here, we make them available to the public on [Data.gov](https://data.gov).

## Telephone Service

Results from our FY 2015 surveys of telephone callers showed that overall satisfaction with our FO telephone service remained stable, while satisfaction with our national 800 number service improved significantly. Callers rated the 800 number service overall at 71 percent excellent, very good, or good (E/VG/G), up from 66 percent E/VG/G in FY 2014. Callers rated FO telephone service overall at 77 percent E/VG/G, in line with the FY 2014 rating of 79 percent E/VG/G.

The rise in satisfaction with 800 number access (53 percent, up from 44 percent E/VG/G) contributed to improvement in callers' overall satisfaction in FY 2015. Satisfaction with access to FO telephone service held steady in FY 2015 at 72 percent E/VG/G.

Customers who conducted their business over the telephone were equally satisfied with the quality of service employees provided whether they called the 800 number or a FO, giving ratings ranging from 87 to 90 percent E/VG/G.

## In-person Service

The Office Visitor Survey (OVS) includes two separate segments, the FO and hearing office (HO) segment, and the Social Security Card Center (SSCC) segment.

FO visitors reported favorable impressions of in-person service, providing an overall rating of 90 percent E/VG/G. In addition to their office waiting time rating of 75 percent E/VG/G and their employee attribute ratings of 91 to 92 percent E/VG/G, FO visitors gave positive ratings for other key aspects of their experience. HO visitors were also highly satisfied with the service they received when they visited an HO. HO visitors rated both overall service and office waiting time at 85 percent E/VG/G. Rating of employee attributes from HO visitors ranged from 88 to 94 percent E/VG/G. We cannot compare the FY 2015 FO and HO visitors' satisfaction rates to the previous fiscal year because we were not able to conduct the FO and HO segment due to the Government furlough in October 2013.

Overall satisfaction with in-person service in SSCCs increased significantly in FY 2015, up from 86 percent to 91 percent E/VG/G. In FY 2015, SSCC visitor's waiting time rating of 74 percent E/VG/G also reflected significant improvement over their FY 2014 rating of 67 percent E/VG/G. In addition, SSCC visitor's already favorable ratings of employee courtesy and the clarity of their explanations both rose by 3 percentage points to 93 percent E/VG/G.

## Retirement Applicant Survey

We conducted the Retirement Applicant Survey (RAS) for the first time in FY 2014 as a complement to our biennial Prospect Client Survey. The RAS fills a gap in the agency's knowledge about customer perception of one of its core business processes. The survey measured satisfaction of retirement benefit applicants who filed online, in person, or on the telephone, and explored their future preferences for conducting Social Security business. The RAS found an exceptionally high level of satisfaction with the retirement application process, with respondents rating their overall experience at 96 percent E/VG/G. Applicants were pleased with the ease and speed of the process, regardless of the filing method they used, and gave high marks to agency staff.

About 7 out of 10 respondents indicated that they use the Internet, and over half (53 percent) of those Internet users said they had already created a [my Social Security](#) account. Among the remaining Internet users who had not yet created a [my Social Security account](#), the majority (62 percent) said they would be very or somewhat likely to create one, with 21 percent choosing the top response of very likely.

## Strategic Goal 2 – Strengthen the Integrity of Our Programs

### Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds

The Social Security Act requires the Board of Trustees of the Old-Age and Survivors Insurance and Disability Insurance Trust Funds to report annually to Congress on the actuarial status and financial operations of the Trust Funds. [The 2015 Annual Report of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Federal Disability Insurance Trust Funds](#), issued in July 2015, includes projections for years 2015 to 2089. The 2015 report showed a slightly improved projected long-term financial status of the Social Security program as compared to the Trustees' 2014 report.

Highlights in the report included:

- Non-interest income fell below program costs in 2010 for the first time since 1983. Program costs are projected to exceed non-interest income throughout the remainder of the 75-year projection period;
- The combined Old-Age and Survivors Insurance and Disability Insurance Trust Fund reserves are still growing and will continue to do so through 2019. Beginning in 2020, the cost of the program is projected to exceed total income, and the trust fund reserves will begin to decline;
- The projected point at which the combined Trust Fund reserves will become depleted, if Congress does not act before then, comes in 2034 – extended one year from the estimate in last year’s report;
- The projected point at which the Disability Insurance Trust Fund reserves will become depleted is 2016 – unchanged from the estimate in last year’s report; and
- The projected actuarial deficit over the 75-year long-range period is 2.68 percent of taxable payroll – improved from 2.88 percent in last year’s report.

## Annual Report of the Supplemental Security Income Program

We report annually to the President and to Congress the status of the Supplemental Security Income (SSI) program. The report’s purpose is to provide the necessary data to manage the SSI program effectively. The [2015 SSI Annual Report](#), issued in August 2015, includes projections for years 2015 to 2039.

Major findings of the report included:

- By 2039, the end of the 25-year projection period, we estimate that the Federal SSI recipient population will reach 9.1 million. The projected growth in the SSI program over the 25-year period is largely due to the overall growth in the U.S. population, though the growth in the SSI recipient population is projected to be somewhat slower than the growth in the U.S. population.
- As a percentage of the total U.S. population, the number of Federal SSI recipients decreased slightly from 2.53 percent in 2013 to 2.51 percent in 2014. We project this percentage to gradually decline throughout the 25-year projection period, reaching 2.33 percent of the population in 2039.
- We estimate that Federal expenditures for SSI payments in calendar year 2015 will increase by \$1.0 billion to \$55.2 billion, an increase of 1.9 percent from 2014 levels.
- In dollars adjusted by the Consumer Price Index to 2015 levels, we project Federal expenditures for SSI payments will increase to \$60.8 billion in 2039, a real increase of 0.5 percent per year.
- Federal SSI expenditures expressed as a percentage of the Gross Domestic Product (GDP) were 0.31 percent in 2014. We project that expenditures, as a percentage of GDP will decrease to 0.30 percent of GDP in 2015, and continue to decline thereafter to 0.21 percent of GDP by 2039.

## Preeffectuation Review of Disability Determinations

Public Law 96-265, Public Health and Welfare, Section 221-c, requires us to review at least 50 percent of all Social Security Disability Insurance (SSDI) and concurrent SSDI/SSI adult disability favorable initial and reconsideration determinations made by the state disability determination services (DDS). In addition, Public Law 109-171, Deficit Reduction Act, requires we review at least 50 percent of all SSI adult initial and reconsideration favorable determinations made by the DDS.

We select Preeffectuation Review (PER) cases from all 54 DDS jurisdictions (the 50 states, plus U.S. territories) using a statistical model to identify allowances with a higher probability of containing substantive errors (i.e., potential to ultimately reverse the determination from allowance to denial).

Three agency components work in conjunction with the Centers for Medicare and Medicaid Services to produce a report to Congress on the lifetime savings resulting from PER.

The most recent PER Report to Congress for FY 2013 shows estimated program savings of \$668 million, which include Medicare and Medicaid savings. Preliminary data for FY 2014 indicates that more than 6,500 DDS determinations were reversed, but the program savings information is not yet available. We will make the FY 2014 and FY 2015 results available in a future Annual Performance Report.

## Retirement, Survivors, and Disability Insurance Stewardship Review

Stewardship findings provide the basic measure we use to report on the accuracy of the Old-Age, Survivors, and Disability Insurance (OASDI) payments. We base the FY 2014 report findings on non-medical reviews of monthly samples of OASDI payments issued from October 2013 through September 2014. We also provide payment accuracy rates for the current and previous reporting periods. We will publish the FY 2015 findings in the FY 2016 Annual Performance Report.

Overall, the OASDI accuracy rate was 99.5 percent for overpayments in FY 2014 based on improper payments totaling a projected \$4.6 billion (i.e., 99.5 percent of all dollars paid were free of overpayment errors).

Accuracy for OASDI underpayments was 99.9 percent in FY 2014, based on unpaid dollars projected at \$4.72 billion (i.e., underpayment dollar errors, as a percentage of total dollars paid, were 0.05 percent).

Comparable accuracy rates for FY 2013 were 99.8 percent for overpayments and 99.9 percent for underpayments. The changes in the overall OASDI overpayment and underpayment accuracy rates are not statistically significant.

## Supplemental Security Income Stewardship Review

The review evaluates non-medical factors of eligibility and measures the accuracy of payments made to people receiving SSI benefits. The primary objective is to measure the accuracy of payments we issued and to report these accuracy rates as required by the *Improper Payments Information Act of 2002* and the *Improper Payments Elimination and Recovery Act of 2010*.

We reviewed 4,015 SSI cases in FY 2014. Accuracy rates are derived using data from the review of SSI cases with a payment made in at least one month of the fiscal year under review. Any difference between what we actually paid and what the quality review determines we should have paid is expressed as an overpayment or underpayment error. The overpayment accuracy rate is the percentage of all dollars paid that are free of overpayment errors. The underpayment accuracy rate is the projected dollar value of underpayment errors represented as a ratio of all dollars paid. The overpayment and underpayment accuracy rates are calculated and reported separately.

In FY 2014, the overpayment accuracy rate was 93.0 percent based on overpaid dollars totaling a projected \$3.9 billion. This represents an increase of 0.6 of a percentage point from the FY 2013 overpayment accuracy rate of 92.4 percent, but this increase is not statistically significant.

In FY 2014, the underpayment accuracy rate was 98.5 percent based on underpaid dollars totaling a projected \$0.8 billion. This represents an increase of 0.2 of a percentage point from the FY 2013 underpayment accuracy rate of 98.3 percent. We will publish the FY 2015 findings in the FY 2016 Annual Performance Report.

## Strategic Goal 3 – Serve the Public through a Stronger, More Responsive Disability Program

### Office of Quality Review Denial Review

In FY 2015, we conducted an internal control review of medically denied disability applications adjudicated by the DDS and Federal Disability Case Processing Sites (FDCPS). We conducted this review to identify whether denial decisions by the DDS and the FDCPS were policy compliant and supported by the medical and vocational evidence in the case file.

We reviewed 52,165 cases from 52 DDS sites (all 50 states, the District of Columbia, and the Commonwealth of Puerto Rico) and 9 FDCPSs. To select the cases, we used a statistical model to identify cases that matched the profile for highly error-prone medically denied disability applications. Out of the 52,165 cases we reviewed, 4,935 (9.5 percent) contained a substantive error (i.e., an error that could result in a change in the determination of the case).

Our review of denials in FY 2015 resulted in the reversal of 2,849 DDS denial determinations to allowances. These reversals resulted in claimants receiving their benefits at an earlier stage in the process.

## Quality Review Assessment of Senior Attorney Advisor Disability Decisions

In our FY 2014 Quality Review Assessment of Senior Attorney Advisor (SAA) Disability Decisions, we agreed with 80 percent of the 627 sampled SAA decisions, because a preponderance of the evidence supported those decisions. We disagreed with 20 percent of the allowance decisions for two main reasons: there was not enough information in file to support the decision or there was conflicting information in file. We cannot compare the FY 2014 findings with prior year reports, because we made substantial changes to our review process.

## Disability Case Review of Administrative Law Judge Hearing Decisions

The disability case review is an ongoing, post-effectuation quality review of administrative law judge (ALJ) hearing decisions. The last year for which we have data is FY 2014.

For the FY 2014 Disability Case Reviews of ALJ decisions, we agreed with 84 percent of the 431 sampled ALJ allowance decisions because a preponderance of the evidence supported those decisions. This reflects improvement, but is not a statistically significant increase from the 82 percent agreement rate in FY 2014.

We agreed with 98 percent of the 433 sampled ALJ denial decisions based on a preponderance of evidence. When comparing this finding to the 94 percent agreement rate reported in FY 2013, the difference is statistically significant.

## Disability Scorecard Surveys

The disability scorecard surveys measure customer satisfaction with the disability application process at the initial and hearing levels. We conduct the initial and hearing level surveys in alternate years. Our survey samples include both SSDI and SSI claimants in the following groups that reflect different stages of the process:

- **Mid-process** – after an initial disability application is filed but before a decision is made;
- **Initial awards and denials** – after the initial level decision on the application; and
- **Hearing awards and denials** – after the hearing level decision on the application.

We ask those surveyed for an overall rating of the service we provided during the disability application process. Survey findings consistently show that respondent opinion is influenced greatly by the outcome of the application for disability benefits. Our latest results are for FY 2014, when we conducted the initial level segment of the disability scorecard surveys. The results of the Mid-Process Survey show that respondents are for the most part satisfied with the initial disability process at the time they file but before a decision is made, rating overall service 81 percent excellent, very good, or good (E/VG/G). In FY 2014, awarded responders were highly satisfied with the service they received rating overall service 91 percent E/VG/G. At just 51 percent E/VG/G, denied responders rated overall service the lowest of the three groups of responders, no doubt influenced by the unfavorable decision on the claim. In FY 2015, we are conducting the hearing level surveys. We anticipate publishing results in early FY 2017.

## Strategic Goal 4 – Build a Model Workforce to Deliver Quality Service

### Federal Employee Viewpoint Survey (formerly the Annual Employee Survey/Federal Human Capital Survey)

The U.S. Office of Personnel Management sent the 2015 Federal Employee Viewpoint Survey to approximately 19,000 of our employees. Our employees had from May 6, 2015 through June 12, 2015 to take the survey. Over half of our permanent employees completed the survey.

We use the Federal Employee Viewpoint Survey results as a tool for measuring employee satisfaction and engagement throughout our agency. We also use the results to develop both departmental and agency-wide action plans to address areas targeted for improvement. Traditionally, results demonstrate that employee job satisfaction is one of the strengths of our agency.

For more information about survey results, see the [Federal Employee Viewpoint Survey](#).

## Management Directive-715

The directive provides policy guidance and standards for establishing and maintaining effective affirmative action programs. The Equal Employment Opportunity Commission (EEOC) Management Directive-715 requires federal agencies to conduct an annual self-assessment of their Equal Employment Opportunity (EEO) program to ensure it meets the requirements for each of the six essential elements of a model program. The assessment occurs in the first quarter of a fiscal year, with the report due to the EEOC in the second quarter of the fiscal year.

Below, we present our FY 2014 results, which were not available when we published our *FY 2014 Annual Performance Report*.

The Equal Employment Opportunity Commission's (EEOC) evaluation of our EEO complaint process and anti-harassment programs and its Program Evaluation Report suggested additional opportunities for our leadership to demonstrate their commitment to EEO principles. The Acting Commissioner meets each month with the OCREO Associate Commissioner (SSA's EEO Director) to improve communications and oversight. The Acting Commissioner also designated a Senior Advisor from her immediate staff to monitor OCREO's actions toward becoming a model EEO program. The OCREO Associate Commissioner and the Senior Advisor meet regularly to keep the Senior Advisor apprised of OCREO's efforts to address each of the recommendations in the Program Evaluation Report.

The Acting Commissioner and our executives also support and encourage the following four cross-component workgroups created in FY 2014 to address several recommendations from the Program Evaluation Report:

- **Anti-Harassment Workgroup** – to clarify the existing Anti-Harassment Policy and prepare Standard Operating Procedures for processing harassment allegations;
- **Alternative Dispute Resolution Workgroup** – to increase management and employee use of mediation for early, reasonable resolution of EEO complaints;
- **Standard Operating Procedures Workgroup** – to create a process that will ensure the consistent use of legally compliant and universally applied EEO processes and procedures; and
- **Uniform EEO Training Workgroup** – to create a standardized package of EEO training materials for agency-wide use, to provide consistent, legally compliant EEO training to all agency managers and employees.

In response to our FY 2014 Management Directive-715 self-assessment, we took the following actions to strengthen our EEO program:

- Revised our anti-harassment policy and developed standard operating procedures to:
  - Implement and enforce uniform policy throughout the agency;
  - Assign oversight responsibility to the Office of Human Resources;
  - Designate harassment prevention officers, investigators, and independent reviewers;
  - Avoid conflict of interest; and
  - Establish a uniform tracking system to allow the Office of Human Resources to identify patterns or trends.
- Drafted a policy on the "Role of the Office of the General Counsel in the Equal Employment Opportunity Process" to clarify the role of the Office of the General Counsel at each stage of the EEO process;
- Initiated a benchmarking program to examine best practices, collaborate with other federal agencies, and improve our EEO program.
- Worked with a contractor to evaluate our vacancy announcement process. The contractor also created a survey to collect employee perceptions on diversity, inclusion, and EEO to ensure that our programs, initiatives, and outreach efforts are meeting our employees' needs; and
- Began training headquarters managers on Alternative Dispute Resolution (ADR) to resolve workplace disputes in a positive and constructive manner. We will offer training to field office managers and will refresh the ADR video on demand.

We will discuss the results of our FY 2015 assessment in our FY 2016 Annual Performance Report.

## Center for Section 504 Compliance

We ensure agency compliance with Section 504 of the Rehabilitation Act of 1973, which prohibits discrimination against individuals with disabilities and requires federal agencies to provide meaningful access to their programs and activities to individuals with disabilities. In FY 2014, we developed an Intranet application, iAccommodate, to track the accommodations that our employees provide to individuals with disabilities.

In FY 2015, we released iAccommodate 2.1, which improves our ability to track accommodations. iAccommodate 2.1 integrates with the Visitor Intake Process (VIP) and the Case Processing Management System (CPMS), offering quick links to document accommodations provided. Screen enhancements included in iAccommodate 2.1 improve usability and management information, allowing us to create detailed management information charts that analyze Section 504 accommodations by component, region, or specific office code.

## The Diversity and Inclusion Survey

The Diversity and Inclusion (D&I) Survey measures employee perceptions of diversity, inclusion, and equal employment opportunity (EEO) in the agency, allowing us to determine whether employee perceptions are supported by actual statistical data. The results will ensure that we are making informed decisions about our programs, training initiatives, and outreach efforts.

The Barrier Obliteration Program (BOP) will proactively identify and eliminate real and perceived barriers to EEO. Collaborating with a contractor, we are analyzing D&I Survey results; Workforce Profiles; and data on EEO complaints, awards, appraisals, promotions, hiring, and separations, among other EEO datasets. The analysis will identify any potential triggers or barriers to EEO in individual Deputy Commissioner-level components. If identified, we will work with the contractor and individual components to prepare an Action Plan to reduce and potentially eliminate them.

## Strategic Goal 5 – Ensure Reliable, Secure, and Efficient Information Technology Services

### Federal Information Security Management Act Report

The Federal Information Security Management Act (FISMA) is part of the E-Government Act of 2002. FISMA is a framework requiring federal agencies to ensure they provide adequate security and privacy protections for federal information systems and information. We must submit an annual FISMA status report to the Office of Management and Budget.

Our report summarizes the results from security and privacy reviews conducted on our major information systems and programs, progress on correcting identified weaknesses, and the results of other work performed during the reporting period using the Office of Management and Budget's performance measures. Several bills are pending in Congress intended to strengthen FISMA. As Congress considers new cybersecurity legislation, we will continue our efforts to meet and exceed existing information security requirements for protecting federal information systems and personally identifiable information.

For more information, please refer to the complete report, [\*FY 2011 Report to Congress on the Implementation of the Federal Information Security Management Act of 2002\*](#).

# Appendix C:

## How We Ensure Our Data Integrity

We are committed to providing clear, reliable, and valid data. We have internal controls to ensure that our data are quantifiable, verifiable, and secure. Our internal systems and controls include:

- Audit trails;
- Integrity reviews;
- Separation of duties;
- Restricted access to sensitive data;
- Reviews at all levels of management; and
- Validation and verification in our System Development Life Cycles.

We designed these controls to safeguard the integrity and quality of our vast data resources. These controls ensure that our data contain no material inadequacies. These same controls support the Commissioner's Federal Managers' Financial Integrity Act Assurance Statement.

### Data Integrity Systems and Controls

We gather performance data using automated management information and other workload measurement systems. In fiscal year (FY) 2010, we initiated a new data quality program designed to assess, measure, and monitor the quality of performance data.

We evaluate the data in terms of four quality dimensions:

- Accuracy – measuring how well data adheres to specification (e.g., definitions, rules, and policies);
- Consistency – measuring consistency in internal and external reporting of data;
- Completeness – measuring missing occurrences or attributions of the data; and
- Timeliness – measuring the currency of the data (i.e., data are up to date, and reporting occurs on time).

We conduct these quality evaluations based on established internal methodologies. As we introduce new performance measures, we perform a comprehensive data assessment using these four quality dimensions. From the assessment results, we establish a baseline. After the baseline, we automate continuous monitoring to sustain high-quality data. Continuous monitoring allows us to follow data trends and proactively remediate potential issues.

In FY 2013, we performed baseline assessments for the following performance measures:

- Increase the percentage of claims filed online;
- Net disability determination services accuracy by state;
- Medicare determinations by state; and
- Enumeration accuracy.

We conducted these assessments in addition to continuously monitoring previously base lined performance measures, thereby expanding data quality program.

In our data quality program, we also derive several accuracy and public satisfaction measures from surveys and work samples. These measures provide confidence levels of 95 percent or higher.

As part of our fiduciary responsibility to the public, we use an Audit Trail System (ATS) to protect our records and taxpayer funds from improper use. The Audit Trail System collects and maintains detailed information about SSA and public transactions. We store the data from programmatic and select internet applications, so we can review transactions for fraud and abuse.

## Audit of Our FY 2015 Financial Statements

The Chief Financial Officers Act of 1990 requires the Office of the Inspector General (OIG) or an independent external auditor that it selects to audit our financial statements. OIG selected Grant Thornton, LLP to conduct the FY 2015 audit. The auditor found we present fairly the basic financial statements, in all material respects, in conformity with accounting principles generally accepted in the United States of America for Federal entities. The auditor also found that management fairly stated that our internal control over our financial reporting was operating effectively.

The audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. The audit did not find instances of noncompliance with laws, regulations, or other materials tested.

## Role of the Office of the Inspector General

The Office of the Inspector General (OIG) plays a key role in protecting our programs and operations from waste, fraud, and abuse. OIG conducts independent and objective audits, evaluations, and investigations. OIG provides timely, useful, and reliable information and advice to agency officials, Congress, and the public.

OIG's Office of Audit conducts performance audits and makes recommendations to make sure we achieve our program objectives.

In late FY 2014, OIG issued an audit, evaluating two of our Government Performance and Results Act (GPRA) Modernization Act of 2010 performance indicators: (1) Recruit and hire veterans and disabled veterans, and (2) Employ individuals with targeted disabilities. In early FY 2015, OIG issued another audit evaluating one GPRA Modernization Act of 2010 performance indicator, Minimize average wait time for initial disability claims.

The reports are:

- [Performance Indicator Audit: Recruiting and Employment Indicators \(A-13-14-14033\)](#); and
- [Performance Indicator Audit: Minimize Average Wait Time for Initial Disability Claims \(A-07-14-24004\)](#).

The objectives of these audits were to:

- Document the sources of data collected to report on the performance indicators;
- Identify and test critical controls of systems from which the specified performance data were gathered;
- Test the adequacy, accuracy, reasonableness, completeness, and consistency of the underlying data for the specified performance indicators; and
- Recalculate the values reported for the indicators to verify accuracy.

For the performance indicators, recruit and hire veterans and disabled veterans, and employ individuals with targeted disabilities, OIG stated:

"Underlying data used for reporting SSA's FY 2012 Recruiting and Hiring Veterans and Disabled Veterans was adequate, reasonable, complete, and consistent; and we were able to recalculate the performance reported for both PIs using data provided by SSA. However, we were unable to test the underlying data for Employing Individuals with Targeted Disabilities because updated employee disability status information replaced the previous disability data in the FPPS, and the Agency was not required to maintain the forms submitted by employees. Furthermore, the Agency did not include employees converted from temporary to permanent employment in its performance reporting for recruiting and hiring veterans and disabled veterans. However, starting in FY 2015, the Agency will adopt a new OPM performance model. Lastly, SSA incorrectly identified the data source for both PIs in certain performance reports."

For the third performance indicator, minimize average wait time for initial disability claims, OIG stated:

"Underlying data used to report the PI were adequate, accurate, reasonable, complete, and consistent; and we were able to recalculate the performance reported for the PI using data provided by SSA. Our assessment of the PI did not identify any significant exceptions related to the accuracy of presentation or disclosure of the information related to the PI in the AFR or to the PI's meaningfulness.

However, during our evaluation of the effectiveness of the control environment over the business process, we found claims representatives did not always ask the applicants all of the questions SSA policy requires to verify identity. Because not all of the required identity questions were asked, there is an increased risk of an individual using the identity of another person to file a fraudulent claim to obtain benefits.”

These and other OIG reports are located on [OIG's webpage](#).

# Appendix D:

## Changes to Performance Measures

### Results for Discontinued Fiscal Year 2014 Performance Measures

Results for these measures were not available until after we published our

[Annual Performance Report 2014-2016](#).

#### 2.3b: Maintain the low percentage of improper payments made under the Old-Age, Survivors, and Disability Insurance Program

Fiscal Year	2009	2010	2011	2012	2013	2014	2015	2016
Performance	0.5%	0.6%	0.4%	0.3%	0.3%	0.6%		
Target						No more than 0.4% of all payments made under the Old-Age, Survivors, and Disability Insurance program are improper payments (i.e., overpayment and underpayments)		
Target Met						Not Met		

**Results:** We did not meet our FY 2014 target. Our improper overpayment rate was 0.5 percent and our total improper underpayment rate was 0.1 percent.

**Data Definition:** We determine Old-Age, Survivors, and Disability Insurance payment free of overpayment and underpayment error by an annual review of a statistically valid sample of the beneficiary rolls. We determine the overpayment error rate by dividing the total overpayment error dollars by the total dollars paid for the fiscal year. We determine the underpayment error rate by dividing the total underpayment error dollars by the total dollars paid for the fiscal year.

**Data Source:** Old-Age, Survivors, and Disability Insurance Stewardship Report

### 3.3a: Achieve the target number of beneficiaries participating in the Ticket to Work program who begin earning above a certain level

Fiscal Year	2014	2015	2016
Performance	1,420 beneficiaries		
Target	1,300 beneficiaries		
Target Met	Met		

**Results:** We exceeded our target for FY 2014.

**Data Definition:** The number of Social Security Disability Insurance, Supplemental Security Income and concurrent beneficiaries who have achieved trial-work-level earnings for the first time within 12 months after assigning their Ticket to an employment network or to a state vocational rehabilitation agency operating as an employment network. Beneficiaries achieving trial-work-level earnings prior to Ticket assignment will not be counted in this measure, nor will beneficiaries who place their Ticket in use with vocational rehabilitation. Ticket assignments that occur in the previous fiscal year may be counted if trial-work-level earnings are first achieved within the reporting period.

**Data Source:** Office of Child Support Enforcement earnings database and the Disability Control File

## Performance Measures Established in Fiscal Year 2016

<b>1.1b APG NEW</b>	Improve customer service and convenience by increasing online transactions by 25 million each year
<b>1.2e APG NEW</b>	Increase customer satisfaction with our services
<b>1.4b NEW</b>	Assess field and hearing office lease expirations and increase colocation of our field and hearing offices to reduce our physical footprint
<b>2.3c APG NEW</b>	Improve the integrity of the SSI program by ensuring that 95 percent of our payments are free of overpayment
<b>3.1c APG NEW</b>	Improve customer service by reducing the wait time for a hearing decision
<b>4.3c NEW</b>	Increase employee engagement as measured by the employee engagement index score
<b>5.2b NEW</b>	Improve customer service by using information technology to provide new online services to users of <a href="#">my Social Security</a>

## Carryover Performance Measures with Title Changes

Fiscal Year 2016 New Title		Fiscal Year 2015 Old Title
<b>2.1a</b>	Improve the accuracy and timeliness of the earnings data used to calculate benefits	Redesign our earnings system to improve the accuracy and timeliness of the earnings data used to calculate benefits
<b>3.1a</b>	Ensure the quality of our decisions by achieving the DDS net accuracy rate for initial disability decisions	Ensure the quality of our decisions by achieving the DDS decisional accuracy rate for initial disability decisions
<b>3.2a</b>	Improve the disability determination process by increasing the percentage of initial disability claims using electronically transmitted health records and medical evidence (Health IT)	Improve the disability determination process by increasing the percentage of initial disability claims with health information technology (IT) medical evidence
<b>4.1b</b>	Strengthen workforce diversity by maintaining the representation of employees with targeted disabilities	Achieve the target on-board representation of employees with targeted disabilities
<b>4.2a</b>	Strengthen workforce competence by improving our talent management index score	Reduce skills gaps for leaders and potential leaders to improve leadership competencies
<b>4.4a</b>	Lay the foundation for building a 21 <sup>st</sup> century workforce by meeting or exceeding targeted human resources measures	Achieve target number of human capital metrics to ensure progress toward building a model workforce

# Appendix E:

## Summary of Key Management Officials' Responsibilities

**Commissioner of Social Security (COSS), Carolyn W. Colvin (Acting)**, manages all agency programs and staff. Also serves as the Chief Operating Officer, responsible for improving agency management and performance.

**Deputy Commissioner of Social Security (DCOSS), VACANT**, an appointed position, authorized to act on behalf of the COSS.

**Chief Strategic Officer (CSO), Ruby Burrell**, advises and assists the Commissioner to ensure that we achieve our mission and goals through strategic and performance planning, measurement, analysis, regular assessment of progress, and the use of performance information to improve the results achieved. The CSO also oversees our transparency efforts and serves as the **Performance Improvement Officer**.

**Chief Actuary (CAct), Stephen C. Goss**, plans and directs program actuarial estimates and analyses for our programs and for any proposed changes in programs and trust funds. The CAct provides technical and consultative services to the COSS, the Board of Trustees of the Social Security Trust Funds, Congress, and their respective staffs.

**General Counsel (GC), Andy Liu**, advises the COSS, DCOSS, and all subordinate organizational components (except the Inspector General) on legal matters.

**Inspector General (IG), Patrick P. O'Carroll Jr.**, promotes economy, efficiency, and effectiveness in administering our programs and operations, and prevents and detects fraud, waste, abuse, and mismanagement.

**Deputy Commissioner for Budget, Finance, Quality, and Management (DCBFQM), Michelle King (Acting)**, directs our comprehensive management programs including budget, quality reviews and studies, financial policy, acquisition, grants, facilities supply management, and security and emergency preparedness. The DCBFQM also serves as the **Chief Financial Officer**.

**Deputy Commissioner for Communications (DCCOMM), Douglas K. Walker**, conducts our national public information and outreach programs and fosters the transparency of our operations.

**Deputy Commissioner for Disability Adjudication and Review (DCDAR), Theresa L. Gruber**, administers our nationwide appeal and review program in accordance with relevant federal laws.

**Deputy Commissioner for Human Resources (DCHR), Reginald F. Wells, Ph.D.**, administers our human resources programs, including training, human capital initiatives, personnel and employee relations, labor management, and civil rights and equal opportunity. The DCHR also serves as the **Chief Human Capital Officer** and as the senior accountable official on employee engagement initiatives.

**Deputy Commissioner for Legislation and Congressional Affairs (DCLCA), Judy L. Chesser**, develops and conducts our legislative program, serves as our liaison to Congress, and analyzes legislative and regulatory initiatives.

**Deputy Commissioner for Operations (DCO), Nancy A. Berryhill**, directs our network of field offices, National 800 Number Teleservices Centers, and Processing Centers. The DCO oversees the disability determination services.

**Deputy Commissioner for Retirement and Disability Policy (DCRDP), Virginia P. Reno**, advises the COSS on the major policy issues and is responsible for all major activities in the areas of program policy planning, policy research and evaluation, statistical programs, and overall policy development, analysis, and implementation. The DCRDP serves as liaison with the Centers for Medicare and Medicaid Services. The DCRDP also serves as the accountable official for improper payments and leads our efforts to improve the clarity, tone, and readability of our notices.

**Deputy Commissioner for Systems (DCS), Robert W. Klopp**, directs the strategic management of our systems and databases, which includes the development, validation, and implementation of new systems. The DCS directs operational integration, strategic planning processes, and implementation of a systems configuration program. The DCS also serves as the **Chief Information Officer** and the **Chief Technical Officer**, responsible for managing our information technology (IT) investment process and assessing the performance of our major IT investments.

## Glossary of Acronyms

### A

AFI	Access to Financial Institutions
APG	Agency Priority Goals
ASA	Average Speed of Answer
ATS	Audit Trail System

### C

CAct	Chief Actuary
CAL	Compassionate Allowances
CAP	Cross-Agency Priority
CDR	Continuing Disability Review
CFO	Chief Financial Officer
CHO	Chief Human Capital Office
CIO	Chief Information Officer
COSS	Commissioner of Social Security
CSO	Chief Strategic Officer

### D

DCBFQM	Deputy Commissioner for Budget, Finance, Quality, and Management
DCCOMM	Deputy Commissioner for Communications
DCDAR	Deputy Commissioner for Disability Adjudication and Review
DCHR	Deputy Commissioner for Human Resources
DCLCA	Deputy Commissioner for Legislation and Congressional Affairs
DCO	Deputy Commissioner for Operations
DCOSS	Deputy Commissioner of Social Security
DCPS	Disability Case Processing System
DCRDP	Deputy Commissioner for Retirement and Disability Policy
DCS	Deputy Commissioner for Systems
DDS	Disability Determination Services
DoD	Department of Defense

### E

eCAT	Electronic Claims Analysis Tool
EEO	Equal Employment Opportunity
EEOC	Equal Employment Opportunity Commission
E/VG/G	Excellent/Very Good/Good

### F

FISMA	Federal Information Security Management
FPPS	Federal Personnel and Payroll System
FY	Fiscal Year

<b>G</b>	
GAO	Government Accountability Office
GC	General Counsel

**Social Security Administration**  
**Fiscal Year 2015**  
**Bipartisan Budget Act of 2015 Section 845(a) Report**

**Bipartisan Budget Act Reporting Requirements**

Section 845(a) of the Bipartisan Budget Act of 2015 requires us to include in our annual budget a report on our activities to prevent fraud and improper payments for each (FY) fiscal year from 2016 through 2021. The report must contain:

- The total amount spent on fraud and improper payment prevention activities;
- The amount spent on cooperative disability investigation (CDI) units;
- The number of cases of fraud prevented by CDI units and the amount spent on such cases;
- The number of felony cases prosecuted under section 208 and the amount spent by our agency in supporting the prosecution of such cases;
- The number of such felony cases successfully prosecuted and the amount spent by our agency in supporting the prosecution of such cases;
- The amount spent on and the number of completed:
  - Continuing disability reviews (CDR) conducted by mail;
  - Redeterminations conducted by mail;
  - Medical CDRs conducted pursuant to section 221(i) of the Act and pursuant to 1614(a)(3)(H);
  - Redeterminations conducted pursuant to section 1611(c); and
  - Work-related CDRs to determine whether earnings derived from services demonstrate an individual's ability to engage in substantial gainful activity;
- The number of cases of fraud identified for which benefits were terminated as a result of medical CDRs, work-related CDRs, and redeterminations, and the amount of resulting savings for each such type of review or redetermination; and
- The number of work-related CDRs in which a beneficiary improperly reported earnings derived from services for more than three consecutive months, and the amount of resulting savings.

Below we provide a brief overview of our programs and anti-fraud activities. Then, we provide the information required by section 845(a) of the Bipartisan Budget Act. This report also meets the requirements of the FY 2016 Omnibus Appropriations report provisions.

Currently, we do not have the data necessary to track the amount spent on the following:

- Fraud and improper payment prevention activities;
- Cooperative Disability Investigation (CDI) Unit investigations;
- Felony cases prosecuted under section 208 including the amount spent supporting these prosecutions;
- Cases of fraud identified by redeterminations, medical and work-related CDRs including the resulting savings of each; and
- Number of work-related CDRs in which a beneficiary improperly reported earnings for more than three consecutive months including the resulting savings

In FY 2016, we will begin discussing how to capture and track the information.

### **Overview of Our Programs**

Considered one of the most successful large-scale Federal programs in our Nation's history, the Old-Age, Survivors, and Disability Insurance (OASDI) programs provide social insurance for the vast majority of our population. Workers earn coverage for retirement, survivors, and disability benefits by working and paying Social Security taxes on their earnings. About 9 out of 10 individuals age 65 and older receive Social Security benefits. The disability insurance (DI) program provides benefits to people who cannot work, because they have a medical condition expected to last at least one year or result in death. Individuals who have worked long enough and paid Social Security taxes and certain members of their families can qualify for DI benefits.

We also administer the Supplemental Security Income (SSI) program, which provides monthly payments to people with limited income and resources who are aged, blind, or disabled. Adults and children under the age of 18 can receive payments based on disability or blindness. General tax revenues fund the SSI program.

During FY 2015, we paid a total of more than \$931 billion to a monthly average of almost 65 million OASDI and SSI beneficiaries.

### **Our Anti-Fraud Efforts**

As good stewards of our resources and the Social Security and SSI programs, it is our duty to work aggressively to prevent and detect fraud and recover improper payments whether fraudulent or not.

To efficiently and effectively detect, deter, and mitigate fraud, waste, and abuse in our programs, we established the Office of Anti-Fraud Programs (OAFP) in November 2014 to provide centralized oversight and accountability of our anti-fraud initiatives. This office drives our anti-fraud efforts by sponsoring new initiatives, supporting component anti-fraud efforts,

centralizing anti-fraud analytics capabilities, and supporting the Inspector General's efforts to investigate fraud. OAFP is an integral and critical component in our efforts to implement a strategic plan that supports a comprehensive approach to fraud prevention and aligns anti-fraud efforts with the United States Government Accountability Office (GAO) report, [\*A Framework for Managing Fraud Risks in Federal Programs\*](#). The GAO report identifies leading practices for managing fraud risks and identifies control activities to prevent, detect, and respond to fraud in Federal programs.

In FY 2015, OAFP had several key accomplishments including: the use of data analytics to enhance fraud detection and the development of analytical tools to determine common characteristics and patterns; the delivery of two major national training programs: mandatory anti-fraud training and refresher training on fraud or similar fault, which supplemented local and regional anti-fraud initiatives; the coordination of a National Anti-Fraud Conference to bring together stakeholders from across the agency to share best practices and discuss FY 2016 priorities; and the successful partnership with the National Anti-Fraud Committee (NAFC), which is the focal point for SSA's anti-fraud efforts.

### **Bipartisan Budget Act Reporting Requirements**

#### Total Expenditures on our Fraud and Improper Payment Prevention Activities

In FY 2015, our operating expenses for our strategic goal to "Strengthen the Integrity of Our Programs" were \$2.007 billion. The expenditures under this goal include both our program integrity initiatives and our specific anti-fraud efforts. It is difficult to distinguish between specific efforts to reduce fraud and our overall efforts to reduce improper payments. While fraud may cause some improper payments, most improper payments are not fraud related. As a result, we do not currently have the data necessary to compute the expenditures specifically for only our anti-fraud-related activities. In 2016, we will begin discussing how we may track our anti-fraud expenditures and identify resource implications for developing separate tracking metrics. Since all fraud is improper, but not all improper payments is fraud, it is important that we have a clearly defined set of definitions and metrics.

#### Total Expenditures on Cooperative Disability Investigation (CDI) Units, the Number of Cases of Fraud Prevented by CDI Units, and the Amount Spent on Such Cases

The CDI program is a key anti-fraud initiative that plays a vital role in combating fraud, similar fault, and abuse within our disability programs. CDI units, consisting of personnel from our agency as well as the Office of the Inspector General (OIG), disability determination services (DDS), and State and local law enforcement, investigate initial disability claims and post-entitlement events involving suspected fraud. CDI units investigate claimants as well as third parties who are potentially committing or facilitating disability fraud.

The mission of the CDI program is to investigate questionable statements and activities of claimants, medical providers, and other third parties to obtain material evidence that is sufficient to resolve questions of potential fraud in the agency's disability programs.

We continue to expand our CDI program as resources allow. We currently have 37 units, covering 31 States, Washington, DC, and the Commonwealth of Puerto Rico. We plan to open additional units in FY 2016 and more in the following years.

In FY 2015, we spent approximately \$28 million<sup>1</sup> on CDI units, which includes personnel costs, training, travel, and equipment. CDI investigations resulted in 6,513 claims ceased or denied in FY 2015 with SSA savings of over \$406 million.<sup>2</sup>

We do not track CDI-related costs on a per investigation basis. Consequently, the amount spent on investigations resulting in the cessation or denial of a claim is not available at this time. Tracking such data will require enhancements to OIG's case management system, and we will work with OIG to assess the feasibility of tracking such expense data in the future.

For FY 2016, we plan to spend approximately \$31 million<sup>3</sup> on CDI units.

The Number of Felony Cases Prosecuted Under Section 208 and the Amount Spent by the Social Security Administration in Supporting the Prosecution of Such Cases; the Amount of Such Felony Cases Successfully Prosecuted and the Amount Spent by the Social Security Administration in Supporting the Prosecution of Such Cases

Our OIG examines and investigates allegations of fraud, waste, abuse, and mismanagement in our programs and operations. These allegations may involve issues such as benefit fraud, Social Security Number misuse, violations by our employees, or fraud related to grants and contracts. OIG's investigations often result in criminal or civil prosecutions or the imposition of civil monetary penalties (CMP) against offenders. These investigative efforts improve our program integrity by recovering funds and deterring those contemplating fraud against the agency in the future.

The determination as to whether to proceed with a criminal prosecution under section 208 of the Social Security Act [42 U.S.C. 408] based upon an OIG investigation rests with the appropriate United States Attorney's Office. The United States Attorney may decide to prosecute the case not under section 208 but another Federal Criminal statute applicable to the facts of the OIG investigation. If an OIG investigation is declined for prosecution by the appropriate United States Attorney's Office, it may be prosecuted in the appropriate State Court.

In FY 2015, OIG investigations resulted in the successful felony prosecution of 178 subjects under section 208, resulting in approximately \$8.2 million in restitution ordered to our agency. In FY 2015, OIG investigations also resulted in successful prosecution of 1,064 subjects

---

<sup>1</sup> This figure includes OIG funds.

<sup>2</sup> The 6,513 claims ceased or denied do not represent the number of cases of fraud prevented by CDI units as defined by statute.

<sup>3</sup> This figure includes OIG funds.

under other statutes such as 42 U.S.C. 1383 – SSI fraud; 18 U.S.C. 641 – Theft of Government Property; and 18 U.S.C. 1001 – False Statements resulting in over \$44.7 million in additional restitution ordered to our agency.

Limiting the reporting of cases prosecuted to section 208 likely underrepresents the number of OIG cases involving fraud against our programs that resulted in a successful prosecution, as the prosecuting attorney has discretion when seeking criminal charges. A successful prosecution is prosecution that results in a conviction including pretrial diversions. In many investigations involving fraud against our programs, which a prosecutor could have charged under section 208, the subjects were convicted under other criminal statutes as noted above. Furthermore, OIG may seek other remedies related to Social Security fraud, such as CMPs or civil actions.

In total, OIG efforts during FY 2015 resulted in over \$224 million in investigative accomplishments, including over \$63 million (this figure includes the \$8.2 million in restitution stated above) in recoveries, restitution, fines, settlements, and judgments; and over \$167 million in projected savings from investigations resulting in the suspension or termination of benefits. The timeframe for savings are based on the type of investigation and whether the claim was in pay at the time of the investigation. We use a calculation of the monthly benefit amount or amount of reduction in benefits multiplied by 60 months for Title II and Title XVI program savings. For Title II and Title XVI initial claim disability cases, we use a set figure based on the program affected. For Title II and Title XVI in-pay disability cases, we use a calculation of the monthly benefit amount multiplied by 61.6.

Since the determination as to whether to proceed with a criminal prosecution based upon an OIG investigation rests with the appropriate United States Attorney's Office, we cannot quantify how many cases will be prosecuted and their resulting restitution.

In FY 2016, we will begin discussing the feasibility of capturing this information in the future. As noted previously, since all fraud is improper, but not all improper payments are fraud, it is important that we have a clearly defined set of definitions and metrics.

The Department of Justice (DOJ) is the Federal agency responsible for prosecuting defendants who have violated Federal law. However, due in part to a lack of prosecutorial resources, DOJ declines many cases for prosecution. For more than a decade, OGC has worked with OIG to develop the Fraud Prosecution Project. The goal of this initiative is to increase the number of prosecutions for crimes involving Social Security matters. To support this project, OGC has provided attorneys to serve as Special Assistant United States Attorneys (fraud prosecutors) in many of the Federal districts where we have regional offices and at our Headquarters in Baltimore, MD.

By early 2015, OGC hired fraud prosecutors in the new locations reflected in the chart below. Seattle, Puerto Rico, and Chicago were existing locations where we had to backfill. Kansas City was a part-time position that we converted to full-time and hired accordingly. With previously existing sites, OGC now has fraud prosecutors in 24 locations.

Location	Start Date / Entry on Duty
Alexandria, Virginia	Internal Hire – No Start Date Necessary
Chicago, Illinois	Internal Hire – No Start Date Necessary
Concord, New Hampshire	Internal Hire – No Start Date Necessary
San Juan, Puerto Rico	09/08/14
Boise, Idaho	09/21/14
Kansas City, Kansas	09/21/14
Los Angeles, California	09/21/14
Richmond, Virginia	09/21/14
Salt Lake City, Utah	09/21/14
San Antonio, Texas	09/21/14
San Diego, California	09/26/14
Detroit, Michigan	09/29/14
Baltimore, Maryland	10/27/14
Seattle, Washington	10/27/14
Albany, New York	11/03/14
Cleveland, Ohio	01/26/15

By early 2015, OGC accomplished all the hires provided. This effort doubled the number of fraud attorneys that were available at the start of 2014. With the new locations and new attorneys on board, OGC attorneys secured 171 convictions in FY 2015 resulting in total restitution of \$16,469,595. The estimated FY 2015 costs of these 25 Special Assistant United States Attorneys prosecuting fraud was \$3,953,000, which includes the salary and benefit costs of these attorneys. As the attorneys gain experience, the return on this investment will increase.

#### Program Integrity Expenditures and Numbers

##### ***Periodic Continuing Disability Reviews***

The American public expects and deserves for us to be outstanding stewards of the Social Security Trust Funds and general revenues that finance our programs – and as such, we are committed to ensuring that program rules and eligibility standards are fully enforced. One of our

most important program integrity tools are CDRs, which are periodic reevaluations to determine if beneficiaries still qualify to receive benefits. We conduct periodic CDRs to ensure that only those beneficiaries who remain disabled, based on our strict standard of disability, continue to receive monthly benefits. Almost all medical CDRs are scheduled based on a beneficiary's likelihood of experiencing medical improvement rather than on suspicion or evidence of fraud. The primary purpose of a CDR is to determine if a beneficiary continues to be entitled to benefits because of his or her medical condition; a finding of medical improvement does not mean that the beneficiary committed fraud. However, our ability to perform additional CDRs may allow us to detect potentially fraudulent or suspicious activities. It should also be noted that there are no improper payments associated with the medical CDR process. Benefits for individuals who have medically improved are only improper if the agency fails to suspend payment after the CDR appeals process has been fully completed, or the individual had failed to cooperate with the CDR.

For case reviews that we initiate centrally when a medical review diary matures, we conduct periodic CDRs using one of two methods. We send some cases to the DDS for a full medical review; we complete others using the mailer process. We decide whether to initiate a full medical review or send a mailer after profiling all cases to identify the likelihood of medical improvement. We send cases with a higher likelihood of medical improvement to DDSs for full medical reviews. For those cases with a lower likelihood of medical improvement, we send mailers to obtain more information from the beneficiaries, which we evaluate to determine if there is any indication of medical improvement. If we find an indication of medical improvement, we send the case to a DDS for a full medical review. Otherwise, we set a new medical review diary and schedule the case for a future CDR. Each year, we refresh the case priority selections based on the results of a predictive statistical scoring model.

We conduct some CDRs outside the centralized process based on events such as voluntary or third party reports of medical improvement. We always send these CDRs to the DDSs for a full medical review. In addition, there is a subset of cases where the medical review diary matures, but we curtail further development for technical reasons, such as the suspension or termination of benefits for non-medical reasons. Our current estimates indicate that medical CDRs conducted in FY 2017 will yield a return of investment (ROI) of about \$8 on average in net Federal program savings over 10 years per \$1 budgeted for dedicated program integrity funding, including Old-Age, Survivors, and Disability Insurance (OASDI), SSI, Medicare and Medicaid program effects.

### ***Work-Related Continuing Disability Reviews***

We use the term “substantial gainful activity” (SGA) to describe a level of work activity and earnings. When a beneficiary is receiving disabled worker benefits from the SSDI program, we review his or her case to determine if the beneficiary is performing SGA, and if eligibility for benefits should continue. We commonly refer to this process as a “work CDR.”

We learn about work activity through two primary ways. Some work CDRs are triggered when beneficiaries report their work or earnings as required by law. SSDI beneficiaries must report any changes in work activity, and we must determine whether such work constitutes SGA. We

are planning to expand the options for a SSDI beneficiary to report work activity by creating an internet reporting process. Currently SSDI beneficiaries generally report work activity through the local field office or by calling the national 800 number. An internet reporting application will also assist us by conveniently loading information about work activity directly into our work CDR systems and generating a receipt to the beneficiary. Providing a more convenient method for beneficiaries to report work will also reduce the burden on SSA staff to take reports and manually enter the data.

Other work CDRs are triggered through the Continuing Disability Review Enforcement Operation (CDREO). The CDREO is an automated process that identifies work activity by matching earnings reported to the Internal Revenue Service (IRS) and posted to our Master Earnings File with the information in our other records. We are working on a business process to incorporate more earnings data sources into the CDREO process. The recent Bipartisan Budget Act provides us the opportunity to contract with third party payroll providers to obtain payroll data. Third party payroll data is timelier than IRS data, and will allow us to learn about unreported work activity more quickly.

When we learn of work activity, we analyze the work activity to determine if we must investigate. After we review the earnings, we may screen out many work reports and CDREO alerts because they do not meet the requirements for a work CDR. In addition, many CDREO alerts may identify payments that are not earnings from work activity (e.g., sick pay or long-term disability benefits); these payments also do not require a work CDR.

Please see the below table for actual CDR workload volumes for FY 2015:

<b>FY 2015 Actual Volumes</b>	<b>Title II</b>	<b>Title XVI</b>	<b>TOTAL</b>
Full Medical CDRs	301,317	497,696	799,013
CDR Mailers	983,332	189,467	1,172,799
Work-Related CDRs	247,772	-	247,772

In FY 2015, we spent \$560 million<sup>4</sup> on Periodic CDRs, which includes the cost of CDR Mailers. We spent an additional \$215 million<sup>5</sup> on Work-Related CDRs.

Please see the below table for enacted CDR workload volumes for FY 2016:

---

<sup>4</sup> Includes \$278 million in costs allocated to DI, retirement and survivors insurance (RSI), and hospital insurance/supplementary medical insurance (HI/SMI) and \$282 million in costs allocated to SSI

<sup>5</sup> Includes about \$105 million in costs allocated to DI, \$61 million in costs allocated to RSI, and \$49 million in costs allocated to HI/SMI

<b>FY 2016 Enacted Volumes</b>	<b>Title II</b>	<b>Title XVI</b>	<b>TOTAL</b>
Full Medical CDRs <sup>i</sup>	500,000	350,000	850,000
CDR Mailers	800,000	300,000	1,100,000
Work-Related CDRs (YTD) <sup>ii</sup>	55,569	-	55,569
<i>i/ Volumes above are based upon the funding provided in our FY 2016 appropriation (PL-114-113).  The FY 2016 workload estimates are 350,000 Title II CDRs and 500,000 Title XVI CDRs.  We have the authority to reallocate funds based upon Section 201 (g) of the Social Security Act.  ii/ We do not develop official volume projections for Work-Related CDRs, therefore we  have included our most recent FY 2016 YTD figures, which are through December.</i>			

In FY 2016, we anticipate spending a total of \$825 million<sup>6</sup> on Full Medical CDRs, CDR Mailers, and Work-Related CDRs. Since Work-Related CDRs are not an agency-controlled workload, we do not develop official volume projections for that workload in a given fiscal year. Historically, work CDR volumes are consistently 250,000 – 300,000 annually. However, in formulating the budget, we fully incorporated the projected costs of Work-Related CDRs into the total projected costs for CDRs.

### ***Redeterminations***

Another important program integrity tool is SSI redeterminations, which are periodic reviews of non-medical eligibility factors such as income and resources.

Changes in beneficiaries' living arrangements or the amount of their income and resources can affect both their eligibility for SSI and the amount of their payments. To ensure the accuracy of SSI payments, we conduct redeterminations. To select redeterminations, we use a predictive statistical model, which we implement each year to prioritize redeterminations to focus on reviews most likely to result in the correction of improper payments. Redeterminations are a key activity in ensuring the integrity of the SSI program and maintaining and improving payment accuracy. Our estimates indicate that non-medical redeterminations conducted in 2017 will yield a ROI of about \$3 on average of net Federal program savings over 10 years per \$1 budgeted for dedicated program integrity funding, including SSI and Medicaid program effects.

Effective October 2008, we ceased conducting redeterminations via mail, as we determined they were not cost effective.

In FY 2015, we spent \$630 million to conduct 2,266,993 redeterminations pursuant to section 1611(c).

In FY 2016, we plan to spend \$701 million to conduct 2,522,000 redeterminations pursuant to section 1611(c).

---

<sup>6</sup> Includes \$496 million in costs allocated to DI, RSI, and HI/SMI and \$329 million in costs allocated to SSI

The Number of Cases of Fraud Identified for which Benefits were Terminated as a result of Medical CDRs, Work-Related CDRs, and Redeterminations, and the Amount of Resulting Savings for Each Such Type of Review or Redetermination

For 2015, OIG reported overall savings of \$475 million from all investigations resulting in the suspension or termination of benefits. This figure is reported in its Semiannual Report to Congress. However, OIG does not track the number of instances of fraud where benefits were terminated because of a medical CDR, work-related CDR, or redetermination. Neither our fraud referral form nor the OIG case management system captures this specific event. Therefore, we cannot provide FY 2015 volumes or resulting savings.

We plan to work with the OIG to assess our policies and procedures to determine if the tracking of such data is feasible and what requisite systems modifications would be needed.

The Number of Work-Related CDRs in which a Beneficiary Improperly Reported Earnings Derived from Services for More Than Three Consecutive Months, and the Amount of Resulting Savings

Because SSDI beneficiaries are not required to report monthly, the only way an SSDI beneficiary can “improperly” report earnings is to not report at all when there is a change in work activity. We use the CDREO process to learn of unreported work activity. As mentioned earlier, we plan to expand options for beneficiaries to report earnings electronically and pursue new sources of earnings data for the enforcement process.

**Other Reports of Interest**

We have provided below additional agency reports of interest.

- Fiscal Year 2015 Agency Financial Report  
(<https://www.socialsecurity.gov/finance/>)
- Annual Performance Report 2014 - 2016  
(<https://www.socialsecurity.gov/agency/performance/>)

## **Fraud and Similar Fault in Disability Claims (Policy Interpretation) SSR**

### **PURPOSE:**

On 3/14/2016, we published a new Social Security Ruling (SSR), **SSR 16-1p, on Fraud and Similar Fault (FSF) Redeterminations in Disability Claims**. The SSR explains the process for SSA and State agency adjudicators to make fraud and similar fault redeterminations on Title II and Title XVI disability claims when there is reason to believe that FSF is involved at the time of application.

We also revised **SSR 00-2p**, and in its place, published **SSR 16-2p, Titles II and XVI: Evaluation of Claims Involving the Issue of “Similar Fault” in the Providing of Evidence**, to maintain consistency with definitions in the new SSR. While we revised SSR 00-2p, its purpose remains to explain the rules that govern the evaluation and adjudication of claims when there is reason to believe that “similar fault” was involved in the providing of evidence in support of the claim. The revision of SSR 00-2p pertains to similar fault in claims pending final determination and pending redetermination.

### **BACKGROUND:**

Enacted in 1994, sections 205(u) and 1631(e) (7) of the Act direct us how to treat claims involving evidence submitted through fraud or similar fault. In 2000, we issued SSR 00-2p “to explain the rules that govern the evaluation and adjudication of claims when there is reason to believe that similar fault was involved in the providing of evidence in support of the claim.”

Fraudulent activities since publication of SSR 00-2p reveal vulnerabilities in SSA’s disability program and support the initiative to develop this new SSR. To strengthen SSA’s disability program, this new SSR will explain the process for SSA and State agency adjudicators to make fraud and similar fault redeterminations on Title II and Title XVI disability claims when there is reason to believe that FSF is involved at the time of application. The new SSR will build on, rather than replace or limit, existing standards and criteria for development and evaluation of disability claims.

### **HIGHLIGHTS OF THE SSRs:**

- Explains how SSA will make FSF redeterminations for disability claims involving FSF at the time of application
- Establishes SSA’s definition of fraud that is binding on all SSA components and agents
- Clarifies definition of knowingly and preponderance of the evidence
- Clarifies differences between fraud and similar fault
- Clarifies who we may find committed fraud and similar fault
- Addresses appeal rights and subsequent applications
- Provides instructions for disregarding evidence when there is reason to believe that fraud similar fault was involved in providing that evidence

**First 100 Days Calendar**  
**Major Reports, Events, Decisions, and Regulations**  
**January - April 2017**

	Item #	Name of Item	Type	Lead	SSA Due Date	Description
<b>January</b>	<b>JANUARY</b>					
	1	Cost-of-Living Adjustment (COLA)	Event	OCACT	1/1/2017	The 0.3 percent COLA will begin with benefits payable to more than 60 million Social Security beneficiaries in January 2017. Increased payments to more than 8 million Supplemental Security (SSI) recipients will also begin with their January payment. Some other adjustments that take effect in January include an increase in the earnings limits for beneficiaries who receive retirement benefits and an increase in the maximum earnings subject to Social Security taxes. The development of the average wage index determined the increase in primary insurance amount benefit factors and the taxable maximum.
	2	Annual Report to Congress on Overpayment Waivers - Required by the Bi-Partisan Budget Act of 2015 (BBA) Section 845	Report	DCBFQM/ OFPO	1/1/2017	BBA of 2015 was enacted November 2, 2015; H.R. 1314; Public Law No. 114-74. Section 845(c) requires us, no later than January 1 of each calendar year, to submit an annual report that must contain: <ul style="list-style-type: none"> <li>• The number and total value of overpayments we recovered or scheduled to be recovered during the previous fiscal year for the Old-Age, Survivors, and Disability Insurance (OASDI) and Supplemental Security Income (SSI) programs, including the terms and conditions of repayment of such overpayments; and</li> <li>• The number and total value of OASDI and SSI overpayments we waived during the previous fiscal year.</li> </ul> The Commissioner signs the report and releases it to Congress (Committee on Ways and Means of the House of Representatives, and Committee on Finance of the Senate).
	3	ODAR Monthly State of Services Report	Report	ODAR	1/5/2017	The monthly ODAR State of Services (SOS) report includes management information and data about workloads, issues, successes, and progress on our goals. SOS also includes ongoing initiatives, such as updates to our CARES plan to reduce the hearings pending and wait time for a hearing.
	4	SSA/AFGE Labor-Management Forum	Event	DCHR/OLMER	1/11/2017	Monthly meeting between the AFGE General Committee and SSA leadership from DCHR, DCBFQM, DCDAR, and DCO, in support of Executive Order 13522 – <i>Creating Labor-Management Forums to Improve Delivery of Government Services</i> .
	5	Updating the Listing of Impairments	Regulation	ORDP	1/17/2017	We have published revisions to the criteria for the Listing of Impairments (Listings) evaluating mental disorders and HIV infection. These revisions reflect our program experience and advances in medical knowledge that have occurred since we last updated the Listings.
	6	National Instant Criminal Background Check System (NICS)	Regulation	ORDP	1/18/2017	We issued rules to implement provisions of NICS Improvement Amendments Act of 2007 that require Federal agencies to provide relevant records to the Attorney General for inclusion in the National Instant Criminal Background Check System. This rule is effective January 18, 2017 with a compliance date of December 19, 2017
	7	QuickPay Report	Report	OFPO	1/20/2017	OMB directive M-16-07, Reporting of Accelerated Payment to Small Business Subcontractors, requires agencies to report quarterly on the progress of accelerating payments to small business subcontractors. OMB M-12-16, issued on July 11, 2012, was effective for one year after its release. On July 11, 2013, OMB issued M-13-15, which extended the original policy by one year. On July 10, 2014, OMB issued M-14-10 extending the policy to December 31, 2016 and indicating that agencies should continue to provide six-month reports. We are anticipating OMB will extend the policy again. The Associate Commissioner for Financial Policy and Operations signs the report, which is then uploaded to MAX.gov.
	8	Operations Executive Meeting	Event	DCO	01/23/2017 - 01/27/2017	This meeting gathers the regional and headquarter Operations executives to coordinate all aspects of service delivery, including strategic direction, workload planning, staffing/budgeting, policy implementation, fraud prevention etc. in order to ensure consistent and accurate service across our front-line employees in our Field Offices, Tele-Service Centers, and Program Service Centers as well as in all of our State Disability Determination Services Offices.

**First 100 Days Calendar**  
**Major Reports, Events, Decisions, and Regulations**  
**January - April 2017**

	Item #	Name of Item	Type	Lead	SSA Due Date	Description
January	9	Quarterly Report on the Status of Balances of Appropriations	Report	DCBFQM/ OB/OFPO	1/30/2017	This report provides the status of balances of appropriations accounts and is required by Division H, Section 526 of the Consolidated Appropriations Act, 2016 (P.L. 114-113). DCBFQM signs it, and the Office of Budget (OB) releases it to Congress (House and Senate Appropriations Committees).
	10	Bipartisan Budget Act (BBA) - Promoting Opportunity Demonstration (POD)	Event	DCDRP	1/31/2017	The BBA instructed SSA to carry out the Promoting Opportunity Demonstration. We will award the contract to conduct the evaluation by January 1, 2017, and we will award the contract to implement POD shortly thereafter. Per the BBA, we will also notify the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate via a written report.
	11	EEOC-Management Directive 715	Report	DCHR	1/31/2017	In accordance with Section 717 of Title VII and Section 501 of the Rehabilitation Act, the Directive provides policy guidance and standards for establishing and maintaining effective affirmative programs of equal employment opportunity and effective affirmative action programs under Section 501 of the Rehabilitation Act. Agency Heads are responsible for ensuring compliance with this Directive and those implementing instructions issued by EEOC in accordance with existing law and authority.
	12	Annual Report on the Results of Periodic Representative Payee Site Reviews and Other Reviews	Report	DCRDP	1/31/2017	This is an annual report. According to the Social Security Protection Act of 2004, within 120 days after the end of each fiscal year, the Commissioner shall submit to the House Committee on Ways and Means and the Senate Committee on Finance a report on the results of reviews of our representative payees and all problems identified, including any corrective action taken or planned to correct such problems.
	13	Annual Report to Congress on Fraud and Improper Payments Required by the BBA Act of 2015 Section 845(a)	Report	DCBFQM/ OAFP	1/31/2017	Section 845(a) of the BBA of 2015 requires us, no later than January 31 of each fiscal year from 2016 through 2021, to submit an annual report on our activities to prevent fraud and improper payments to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate. The Associate Commissioner for OB releases the final report to the Office of Management and Budget (OMB).
	14	Annual Report to Congress on Actual Expenses for Union Official Time	Report	DCBFQM/ OB	1/31/2017	This report is typically due the beginning of the second week in January. This annual report complies with requirements of the House Committee on Appropriations' Conference Committee Report 105-205. The report provides total agency costs for union representational activities. As required by annual appropriations acts, Treasury's general fund reimburses the Social Security trust funds, with interest, for the portion of expenses attributable to the trust funds. The final report is signed and released by the Commissioner, and copies are delivered to each member of the House Appropriations Committee, Subcommittee on Labor, Health and Human Services, Education and Related Agencies.
	15	Quarterly High-Dollar Report to the IG	Report	DCBFQM/ OFPO	1/31/2017	As part of Executive Order (EO) 13520, each agency head is required to submit a quarterly report on high-dollar overpayments identified by the agency. The report describes any actions the agency has taken, or plans to take, to recover improper payments as well as any actions the agency intends to take to prevent improper payments from occurring in the future. We submit an Accountable Official's Quarterly High-dollar Overpayment Report to the Office of the Inspector General (OIG), as required by EO 13520, <i>Reducing Improper Payments and Eliminating Waste in Federal Programs</i> . This report is due to the OIG by 30th of the month after each quarter ends.
	16	Conference Spending Report	Report	DCBFQM/ OFPO	1/31/2017	OMB required annual report which provides information on conference expenses in excess of \$100,000 during the fiscal year.
	17	BBA Provisions Report as Required by the BBA Act of 2015 - due to OMB monthly	Report	MULTIPLE	1/31/2017	This is a monthly report due to OMB providing the status of the projects required by the BBA Act of 2015.
	12/22/2016					

**First 100 Days Calendar**  
**Major Reports, Events, Decisions, and Regulations**  
**January - April 2017**

	Item #	Name of Item	Type	Lead	SSA Due Date	Description
January	18	Deadline for Employers to File Earnings Reports	Event	DCS	1/31/2017	The legislative Combined Annual Wage Reporting (CAWR) Program is a joint venture between IRS and SSA. The IRS is responsible for collecting taxes from employers for its tax administration purposes. SSA is responsible for collecting earnings reports from employers in order to fulfill our core mission to pay benefits to the public. Both agencies are obligated to share data. Recent legislation was passed that requires employers to file earnings reports by January 31 of the tax year, advancing the reporting deadline from March 31 to January 31. SSA is positioned to react to this recent legislation. SSA's Earnings Redesign initiative is a multi-year IT investment, managed by OMB Major IT Investment guidelines. One of the goals is to support earlier employer filing deadlines through redesigned software that allows the processing of increased volumes of up to 100 million W-2/W-2cs per week and 20 million W-2/W-2cs per day. In FY17, the Annual Wage Reporting (AWR) system will begin processing employer filings in December, rather than the traditional January timeframe. This will allow employers to start submitting reports earlier, in anticipation of the compressed filing deadline. The improvements that we have already implemented will allow us to handle the increased volume. In addition, in September, 2016, we released an online version of the AccuWage software which checks employer reports for errors. Employers will have the opportunity to correct errors before the filing deadline expires. We also seek to mitigate software performance risks by stress testing all of our system's components in anticipation of very large volumes of data coming to SSA within a short time period.
	19	End of the Affordable Care Act (ACA) open enrollment period	Event	DCS	1/31/2017	The open enrollment period for the Affordable Care Act (ACA) ends on 1/31/17. This will lift the moratorium on making any programmatic changes and relax the strict availability requirements for ACA, during the open enrollment timeframe.
	20	OIG Review of Supplemental Security Income Overpayments the Social Security Administration Cannot Prevent Because of the 1970 Goldberg-Kelly Supreme Court Decision	Report	DCBFQM/ALS	TBD	OIG's objective is to quantify the SSI overpayments SSA cannot prevent because of the Goldberg-Kelly provisions. Based on the 1970 U.S. Supreme Court decision in Goldberg v. Kelly, we are required to provide written advance notice to an SSI recipient of (1) a non-medical adverse action and (2) the right to request an initial appeal on that action within 10 days from receipt of the notice and continue receiving uninterrupted payments during the appeal. Any delays in taking this action have the potential to result in overpayments due to our inability to change a recipient's payment amount for the following month.
	21	OIG Review of Cross-referred Social Security Numbers	Report	DCBFQM/ALS	TBD	Generally, SSA assigns an individual one Social Security Number (SSN) to track his/her earnings and any benefits he/she may receive. If SSA assigns an individual more than one SSN, the agency generally cross-refers it electronically in its records. OIG's objective is to determine: (1) the validity of payments SSA issued simultaneously under multiple, cross-referred SSN; and (2) whether death information input on the Numident record of one SSN was also recorded on the Numident record of cross-referred SSN(s).
	22	FY 2017 Congressional/Budget Operating Plan	Report	DCBFQM/OB	TBD	This report provides the agency's operating plan including budgeted performance goals for the enacted funding level. It is due 30-45 days after enactment of our annual appropriation. The Commissioner signs it, and OB releases it to Congress and posts it to the Internet for the public.
	23	Small Business Procurement Scorecard Progress Report	Report	OSDBU/DCBFQM	1/30/2017	An agency's explanation and documentation to support that its current fiscal year agency plan was appropriately carried out in pursuit of the agency's small business goal achievement. The report information is normally sent the Small Business Administration (SBA) via email from our Chief of Staff. The agency certifies information in the Federal Procurement Data System - Next Generation (FPDS-NG) which goes to the Office of Federal Procurement Policy (OFPP) in OMB.
	24	The U.S.-Brazilian Social Security Agreement	Decision	DCRDP	TBD - currently with OMB for review	The United States and Brazil signed a new agreement on social security on June 30, 2015. Before the agreement may enter into force, however, the President must submit it to the U.S. Congress for a statutorily-required 60 session day review period. SSA's Office of the Chief Actuary projects that the agreement will exempt U.S. businesses and workers in Brazil from \$694 million in Brazilian social security taxes over the first 7 years it is effective.

January	25	Final FY2018 Agency IT Investment Portfolio Summary and Major IT Investment Business Cases	Report	DCS/CIO	TBD (January/ February)	OMB requires agency IT budget and management information reporting in two parts, the Agency IT Portfolio Summary and supporting Major IT Business Cases. The Agency IT Portfolio Summary is a complete report of all IT resources within the agency. Major IT Business Cases describe the planning, budgeting, acquisition, and management of major IT Investments. <a href="https://www.whitehouse.gov/sites/default/files/omb/assets/egov_docs/fy18_it_budget_guidance.pdf">https://www.whitehouse.gov/sites/default/files/omb/assets/egov_docs/fy18_it_budget_guidance.pdf</a>
	26	DCPS Implementation Strategy	Decision	DCO	Jan –April 2017	This is SSA's initiative to develop a common case processing system for all DDSs that we expect will simplify systems support and maintenance, improve the speed and quality of the disability process. The Agency is currently building an in house system using Agile development. We need to make decisions regarding the DCPS implementation strategy, i.e. next states to rollout DCPS.
	27	SSA/OPM Bi-weekly Meeting	Meeting	ODAR	Bi-Weekly Jan-April 2017	SSA and OPM meet bi-weekly to discuss potential ALJ selective placement factors.
	28	Expansion of CDI Units	Decision	DCO	Jan – April 2017	Once we receive our budget, we need to determine expansion of CDI units.
FEBRUARY						
February	29	National Social Security & SSI Disability Advocate Meeting	Event	OCOMM	Jan/Feb	This is a quarterly meeting with a specific group of advocates to discuss issues and concerns with current policy. Topics include: <ul style="list-style-type: none"> <li>* Advocate Recommendations on Hearing Backlogs</li> <li>* Continuing Improper Disallowance Adjudications Among the State DDSs</li> <li>* Due Process Issues for Title II and Concurrent Beneficiaries at Payment Centers <ul style="list-style-type: none"> <li>1. Failure to acknowledge representatives</li> <li>2. Overpayment issues</li> <li>3. EXR issues</li> <li>4. Payment continuation</li> <li>5. Incarceration</li> </ul> </li> </ul>
	30	SSA/AFGE Labor-Management Forum	Event	DCHR/OLMER	2/1/2017	Monthly meeting between the AFGE General Committee and SSA leadership from DCHR, DCBFQM, DCDAR, and DCO, in support of Executive Order 13522 – <i>Creating Labor-Management Forums to Improve Delivery of Government Services</i> .
	31	SSA/AFGE Union-Management Meeting (UMM)	Event	DCHR/OLMER	2/7/2017	Bi-monthly meeting between AFGE and SSA, in accordance with Article 29 of the SSA/AFGE National Agreement.
	32	Agency Priority Goals - Quarterly Update	Report	OCSO	2/10/2017	Agency Priority Goals (APGs) are governed by the GPRA Modernization Act of 2010 and OMB Circular A-11. APGs are two year goals that are a part of our agency's Strategic Plan and are integrated into our Annual Performance Report. APG Leaders and Deputy Goals Leaders provide executive Leadership, guidance and direction in achieving our APGs and meet quarterly with the Performance Improvement Officer and Chief Operating Officer to discuss progress and actions needed. OCSO submits Quarterly updates to OMB via Performance.gov.
	33	SSA/IFPTE Labor-Management Forum	Event	DCHR/OLMER/ DCDAR	2/14/2017	Bi-monthly meeting between ODAR leadership and IFPTE, in support of Executive Order 13522 – <i>Creating Labor-Management Forums to Improve Delivery of Government Services</i> .
	34	SSA/Joint ODAR Labor-Management Forum	Event	DCHR/OLMER/ DCDAR	2/15/2017	Bi-monthly meeting between ODAR leadership and all three unions (AFGE, NTEU, and IFPTE), in support of Executive Order 13522 – <i>Creating Labor-Management Forums to Improve Delivery of Government Services</i> .
	35	Implementation of Jantz Settlement Agreement	Event	DCHR/ODAR	2/16/2017	The Jantz Settlement Agreement requires that, by 2/16/2017, the agency centralize certain aspects of the reasonable accommodation program. The agency is introducing the Employer of Choice for Employees with Disabilities initiative. This new initiative establishes and promotes best practices throughout SSA for employing individuals with disabilities.

	Item #	Name of Item	Type	Lead	SSA Due Date	Description
February	36	BBA Provisions Report as Required by the BBA Act of 2015 - due to OMB monthly	Report	MULTIPLE	2/28/2017	Section 845(c) of the Bipartisan Budget Act of 2015 requires us to implement several provisions in the BBA Act. This is a monthly Report due to OMB providing status of those projects.
	37	President's Budget Justification of Estimates for Appropriations Committees	Report	DCBFQM/ OB	TBD	The Congressional Justification presents and justifies the President's Budget for SSA and includes OCSO's Annual Performance Plan and Report. It is usually due the 1st Monday in February (NOTE: this is a transition year, and we have not received a budget timeline for FY 2017). The Commissioner signs it, and OB releases it to Congress (House and Senate Appropriations Committees) and posts it to the Internet for the public.
	38	Agency Security Classification Costs Estimates	Report	DCBFQM/ OSEP	TBD	EO 13526 requires executive branch agencies to report financial costs related to their security programs to National Archives and Records Administration's (NARA) Information Security Oversight Office. We submit these costs annually via the Agency Security Classification Costs Estimates report (Standard Form 716), which addresses a range of security categories, including personnel security, physical security, classification management, operations security, and training. The Information Sharing and Safeguarding Senior Official (OSEP Associate Commissioner) signs and releases this report to NARA.
	39	GAO Review on the Federal Government Efforts to Reduce the Use of Social Security Numbers	Report	DCBFQM/ ALS	TBD	At the request of the Chair of the House Committee on Oversight and Government Reform and the Chair of the Subcommittee on Social Security from the House of Committee on Ways and Means, GAO plans to review: (1) to what extent have agencies developed and executed plans to eliminate the use and display of SSNs; (2) what government-wide initiatives have been undertaken to assist agencies in eliminating their unnecessary use of SSNs and what have been their results; and (3) what remaining challenges have agencies identified to reducing the continued use of SSNs as personal identifiers.
	40	GAO Review of the Social Security Administration's Fraud Risk Management Efforts	Report	DCBFQM/ ALS	TBD	At the request of the Chairman of the Subcommittee on Social Security, Committee on Ways and Means, U.S. House of Representatives, GAO plans to review: (1) To what extent have we established an organizational culture and environment conducive to fraud risk management?; (2) To what extent have we conducted and documented a fraud risk assessment of our programs, at both the point of applications and post-entitlement?; (3) To what extent have we determined whether our existing control activities address our fraud risks and what, if any, opportunities we have to improve controls to address our fraud risks?; (4) What efforts, if any, do we have underway to monitor our fraud prevention and detection activities and use the results to continuously improve our activities?
	41	Small Business Procurement Agency Plan	Report	OSDBU/ DCBFQM	TBD	This plan is in conjunction with our agency's SBP Scorecard that we submit in January. This is an agency plan based on the final version of the Success Factors. The plan should address our agency's efforts for meeting the 7 success factors - no supporting documentation required. (SBA sends Anomaly Report to agencies.) Addresses the agency's efforts and action for the current fiscal year small business goal achievement.
	42	ODAR Monthly State of Services Report	Report	ODAR	TBD	The monthly ODAR State of Services (SOS) report includes management information and data about workloads, issues, successes, and progress on our goals. SOS also includes ongoing initiatives, such as updates to our CARES plan to reduce the hearings pending and wait time for a hearing.
	43	Small Business Agency Mentor-Protégé Report	Report	OSDBU/ DCBFQM	TBD	This is in conjunction with our agency's SBP Scorecard. Identifies whether an agency has a federal mentor-protégé program.

**First 100 Days Calendar**  
**Major Reports, Events, Decisions, and Regulations**  
**January - April 2017**

	Item #	Name of Item	Type	Lead	SSA Due Date	Description
<b>March</b>	<b>MARCH</b>					
	44	Summary Performance and Financial Information Report for FY 2016	Report	OCSO	3/1/2017	The Summary of Performance and Financial Information is a high level summary of the performance and financial information included in the Agency Financial Report. Beginning with FY 2016, the summary is an optional report. If the agency opts to continue to produce the SPFI, the draft is due to OMB for review concurrent with the final draft APR and would be published concurrent with FY 2018 congressional budget justification.
	45	Security West and Falls Church Leases	Decisions	DCBFQM/OFLM	3/1/2017	There are pending lease issues that will need budget and staffing decisions in the first 100 days. The Security West lease prospectus is awaiting congressional action. The agency needs to finalize the Falls Church housing plan before proceeding. Both of these leases involve variables out of our control (e.g., General Services Administration (GSA) approvals, congressional action); therefore, the March 1 date is an estimate. Decisions could be needed sooner or later than March 1.
	46	Annual Performance Report - Final for FY 2016 - 2018	Report	OCSO	3/1/2017	The APR is a legislative requirement that details our Agency Performance plan for FY 2018, Revised Performance Plan for FY 2017 and agency Performance Report for FY 2016. The APR sets our agency priorities and planned activities for the next two years, the performance measures and targets we will use to evaluate progress and reports our performance results for the immediate past fiscal year. The APR is published with the FY 2018 congressional budget justifications on Performance.gov and the agency internet site. Normally the final draft is due to OMB in mid-January and the final report is published in February. This year the dates have been extended to the March 2017 - May 2017 timeframe. Exact due dates have not been provided yet.
	47	National Association of Disability Representatives (NADR) Conference	Event	ODAR	3/5/2017 - 3/8/2017	During the NADR conference, ODAR provides updates on ALJ hiring, IT innovations, rulings, regulatory changes and practice improvements to Professional Security Claimants Representatives (members and non-members). The collaboration is imperative to provide quality service to the public.
	48	SSA/AFGE Labor-Management Forum	Event	DCHR/OLMER	3/8/2017	Monthly meeting between the AFGE General Committee and SSA leadership from DCHR, DCBFQM, DCDAR, and DCO, in support of Executive Order 13522 – <i>Creating Labor-Management Forums to Improve Delivery of Government Services</i> .
	49	Managing Government Records Program and Reporting	Report	DCS	3/17/2017	OMB/NARA M-12-18 Requires each agency to designate an official responsible for overseeing records management program. We are required to submit an annual report to NARA.
	50	Evaluation of Medical Evidence	Regulation	ORDP	3/27/2017	We are proposing a number of revisions to our medical source and opinion regulations that will redefine categories of medical evidence and make it easier to understand and use our rules of evidence. The effective date is tentative.
	51	Trustees Report Release	Report	OCACT	3/28/2017	The Social Security Act established the Board of Trustees to oversee the financial operations of the OASI and DI Trust Funds. The Board is composed of six members. Four members serve by virtue of their positions in the Federal Government: the Secretary of the Treasury, who is the Managing Trustee; the Secretary of Labor; the Secretary of Health and Human Services; and the Commissioner of Social Security. The President appoints and the Senate confirms the other two members to serve as public representatives. These two positions are currently vacant. The Deputy Commissioner of the Social Security Administration serves as Secretary of the Board. The Social Security Act requires that the Board, among other duties, report annually to the Congress on the actuarial status and financial operations of the OASI and DI Trust Funds. The 2017 report is the 77th such report.

	Item #	Name of Item	Type	Lead	SSA Due Date	Description
March	52	No FEAR Act Report	Report	DCHR	3/29/2017	On May 15, 2002, Congress enacted the "Notification and Federal Employee Antidiscrimination and Retaliation Act of 2002," which is now known as the No FEAR Act. One purpose of the Act is to "require that Federal agencies be accountable for violations of antidiscrimination and whistleblower protection laws. DCHR provides a briefing to the Acting Commissioner or Commissioner. DCHR will sign/release this report to the Equal Employment Opportunity Commission (EEOC) . The annual due date is 180 days after fiscal year.
	53	Draft FY 2018-2022 Real Property Efficiency Plan to OMB	Report	DCBFQM/ OFLM	3/31/2017	The draft report is due to OMB, with a copy to the General Services Administration (GSA), approximately 90 days after GSA submits the Federal Real Property Profile, which is typically by December 31. This report is required by OMB and documents the agency's annual square foot reduction targets; notes initiatives we undertook to achieve set targets; and provides information on future actions we will take to continue to meet the Reduce the Footprint mandate. The report is signed by the Commissioner; the Chief Financial Officer; and the agency's Senior Real Property Official. The Commissioner releases the report to the Controller for OMB.
	54	BBA Provisions Report as Required by the BBA Act of 2015 - due to OMB monthly	Report	MULTIPLE	3/31/2017	Section 845(c) of the Bipartisan Budget Act of 2015 requires us to implement several provisions in the BBA Act. This is a monthly Report due to OMB providing status of those projects.
	55	Plain Writing Compliance Report	Report	DCCOMM	3/31/2017	As a part of the Plain Writing Act of 2010, we are required to submit an annual compliance report. The report highlights our plain writing efforts, our supporting activities, and the improvements in our written communications. The report is posted in the plain writing section of our webpage and submitted to the Center for Plain Language for grading.
	56	Draft FY 2018-2022 Real Property Efficiency Plan to OMB	Report	DCBFQM/ OFLM	3/31/2017	The draft report is due to OMB, with a copy to the General Services Administration (GSA), approximately 90 days after GSA submits the Federal Real Property Profile, which is typically by December 31. This report is required by OMB and documents the agency's annual square foot reduction targets; notes initiatives we undertook to achieve set targets; and provides information on future actions we will take to continue to meet the Reduce the Footprint mandate. The report is signed by the Commissioner; the Chief Financial Officer; and the agency's Senior Real Property Official. The Commissioner releases the report to the Controller for OMB.
	57	Federal Information Security Management (FISMA)	Report	DCS	3/31/2017	The Federal Information Security Management Act (FISMA) is United States legislation that defines a comprehensive framework to protect government information, operations and assets against natural or man-made threats. FISMA was signed into law part of the Electronic Government Act of 2002.
	58	Non-Work Report	Report	DCLCA	TBD	The report is due no later than 3 months after the end of the fiscal year. However, because we maintain earnings records on a calendar year basis, we report on a calendar, rather than fiscal year basis. Accordingly, we issue the report no later than 3 months after the close of the calendar year.
	59	FY 2017 Budget Scrub	Event/ Decisions	DCBFQM/ OB	TBD	In February, OB will perform its first budget scrub exercise. Scrubs typically involve re-estimating the agency's annual payroll costs based on the most recent actual payroll data available as well as communicating with component budget staffs for their latest funding needs or returns. DCBFQM will then meet with the Commissioner in early March for necessary decisions on any available resources.
	60	National Counterterrorism Budget Report Data Call	Report	DCBFQM/ OSEP	TBD	This is an annual report required by the National Counterterrorism Center (NCTC). This report provides information regarding the agency's counterterrorism initiatives and helps the NCTC keep track of Federal department and agency resources committed in support of the National Strategy for Counterterrorism. The Office of the Inspector General signs and releases the report to the National Counterterrorism Center.

**Major Reports, Events, Decisions, and Regulations**  
**January - April 2017**

	Item #	Name of Item	Type	Lead	SSA Due Date	Description
March	61	OIG Review of Manually Issued Old-Age Survivors and Disability Insurance Underpayments Less Than \$6,000	Report	DCBFQM/ ALS	TBD	OIG's objective is to determine whether we accurately issued manual OASDI underpayments less than \$6,000. They also plan to review a sample of OASDI underpayments less than \$6,000 issued manually during calendar years 2014 and 2015. In addition, OIG will review all beneficiaries in its population issued five or more underpayments. Specifically, OIG plans to determine whether the underpayments were accurate and supported.
	62	Small Business Agency Corrective Actions Reports	Report	OSDBU/ DCBFQM	TBD	This is in conjunction with our agency's SBP Scorecard that we submit in January. This is a corrective action plan based on SBA's review. Reports on whether an agency achieved the prime and subcontract goals established for the agency. Includes justification for a failure to achieve such goals.
	63	Spring Unified Agenda	Report	DCLCA	TBD	The Regulatory Flexibility Act requires that agencies publish semiannual regulatory agendas in the Federal Register describing regulatory actions they are developing that may have a significant economic impact on a substantial number of small entities (5 U.S.C. 602). The spring Unified Agenda publication appears in the Federal Register and consists of agency regulatory flexibility agendas. Agency regulatory flexibility agendas contain only those Agenda entries for rules that are likely to have a significant economic impact on a substantial number of small entities and entries that have been selected for periodic review under section 610 of the Regulatory Flexibility Act. Due to OMB bi-annually March and Sept. Exact due date TBD by OMB. The fall plan (Sept) includes a regulatory agenda.
	64	CFCAA - Conference Report to OIG	Report	DCBFQM/ OFPO	TBD	The Consolidated Appropriations Act, 2016 requires us to provide the IG with an annual report compiling all agency-sponsored conferences with costs greater than \$100,000. Note that most of the information is the same as the "regular" conference report we prepare and release to the internet in January of every year. The Commissioner releases the report to the Inspector General.
	65	National Disability Forum	Event	OCOMM/ORDP	TBD	The Disability Forum is an open forum of Social Security that gives all interested stakeholders an opportunity to share their unique insights on topics of particular interest to SSA early in the process and directly with policy makers. Further, it provides an opportunity for stakeholders to hear from one another. Open to anyone interested, the Disability Forum is not intended to be a means for reaching agreement on an issue, and SSA's participation is only for the purpose of gaining insight through listening.  This inclusive and collaborative approach helps us develop responsive, effective, and efficient policies in order to empower individuals with a disability, minimize their financial hardship, and ensure proper use of Disability Trust funds. The activities under the Disability Forum supplement, but do not replace, the rule-making process followed by SSA under the Administrative Procedure Act.
	66	ODAR Monthly State of Services Report	Report	ODAR	TBD	The monthly ODAR State of Services (SOS) report includes management information and data about workloads, issues, successes, and progress on our goals. SOS also includes ongoing initiatives, such as updates to our CARES plan to reduce the hearings pending and wait time for a hearing.
	67	Multi-Factor Authentication	Event	DCS	TBD (March-April)	President Obama signed an executive order on cybersecurity on October 17, 2014. The order focuses on protecting citizens from identity theft and directs federal agencies to provide more secure authentication for their online applications. Specifically, the order requires multi-factor authentication for any agency application that discloses personal information. Citizens accessing MySSA will enter the username and password, but then be required to enter a one-time passcode. This numeric code will be sent to the enrolled mobile phone number or email.

	Item #	Name of Item	Type	Lead	SSA Due Date	Description
<b>April</b>	<b>APRIL</b>					
	68	Pre-Effectuation Review (PER) Report	Report	DCLCA	4/1/2017	Per the Social Security Act, we are required to report to the House Committee on Ways and Means and the Senate Committee on Finance, by April 1, on the pre-effectuation reviews conducted during the previous fiscal year. However, the required data is not available for analysis until later in the year. Although not required, we also report the results of SSI-only reviews conducted during the year.
	69	Medicare Outreach Letters (SSA-L447 & L448)	Report	DCRDP	04/04/2017	Under Section 1144 of the Social Security Act, the Commissioner of Social Security shall conduct outreach efforts to identify individuals entitled to benefits under the Medicare program who may be eligible for medical assistance. Our spring Outreach letters include the SSA - L447 and SSA - L 448. The SSA L447 is mailed to Medicare beneficiaries whose income appears to be less than 135 percent of poverty level and who have low-income prescription drug coverage subsidy (LIS), but do not participate in the Medicare Savings Program (MSP). The SSA-L488 is mailed to Medicare beneficiaries whose income is low enough for both LIS and MSP, but they have neither.
	70	SSA/AFGE Union-Management Meeting (UMM)	Event	DCHR/OLMER	4/4/2017	Bi-monthly meeting between AFGE and SSA, in accordance with Article 29 of the SSA/AFGE National Agreement.
	71	SSA/AFGE Labor-Management Forum	Event	DCHR/OLMER	4/12/2017	Monthly meeting between the AFGE General Committee and SSA leadership from DCHR, DCBFQM, DCDAR, and DCO, in support of Executive Order 13522 – <i>Creating Labor-Management Forums to Improve Delivery of Government Services</i> .
	72	Small Business Agency Scorecard Comments	Report	OSDBU/DCBFQM	4/12/2017	This is in conjunction with our agency's SBP Scorecard that we submit in January. This is an opportunity for agencies to submit a comment (eventually made public) after SBA notifies the agency of its scorecard grade.
	73	Expedited Reinstatement	Regulation	ORDP	4/17/2017	We simplified our policies for evaluating unsuccessful work attempts and made it easier for previously entitled beneficiaries to apply for expedited reinstatement. We expect these changes will result in simplified case processing and faster and better determinations and decisions. The Unsuccessful Work Attempts regulation was effective November 16, 2016, and the Expedited Reinstatement regulation will be effective on April 17, 2017.
	74	SSA/IFPTE Labor-Management Forum	Event	DCHR/OLMER/DCDAR	4/18/2017	Bi-monthly meeting between ODAR leadership and IFPTE, in support of Executive Order 13522 – <i>Creating Labor-Management Forums to Improve Delivery of Government Services</i> .
	75	SSA/Joint ODAR Labor-Management Forum	Event	DCHR/OLMER/DCDAR	4/19/2017	Bi-monthly meeting between ODAR leadership and all three unions (AFGE, NTEU, and IFPTE), in support of Executive Order 13522 – <i>Creating Labor-Management Forums to Improve Delivery of Government Services</i> .
	76	Operations Executive Meeting	Event	DCO	04/24/2017-04/28/2017	This meeting gathers the regional and headquarter Operations executives to coordinate all aspects of service delivery, including strategic direction, workload planning, staffing/budgeting, policy implementation, fraud prevention etc. in order to ensure consistent and accurate service across our front-line employees in our Field Offices, Tele-Service Centers, and Program Service Centers as well as in all of our State Disability Determination Services Offices.
	77	BBA Provisions Report as Required by the BBA Act of 2015 - due to OMB monthly	Report	MULTIPLE	4/28/2017	Section 845(c) of the Bipartisan Budget Act of 2015 requires us to implement several provisions in the BBA Act. This is a monthly Report due to OMB providing status of those projects.
	78	Quarterly High-Dollar Report to the IG	Report	DCBFQM/OFPO	4/28/2017	As part of Executive Order 13520, each agency head is required to submit a quarterly report on high-dollar overpayments identified by the agency. The report describes any actions the agency has taken, or plans to take, to recover improper payments as well as any actions the agency intends to take to prevent improper payments from occurring in the future. We submit an Accountable Official's Quarterly High-dollar Overpayment Report to the Office of the Inspector General (OIG), as required by Executive Order 13520, Reducing Improper Payments and Eliminating Waste in Federal Programs. This report is due to the OIG by 30th of the month after each quarter ends.

**First 100 Days Calendar**

	Item #	Name of Item	Type	Lead	SSA Due Date	Description
April	79	Quarterly Report on the Status of Balances of Appropriations	Report	DCBFQM/ OB	4/28/2017	This report provides the status of balances of appropriations accounts and is required by Division H, Section 526 of the Consolidated Appropriations Act, 2016 (P.L. 114-113). DCBFQM signs it, and OB releases it to Congress (House and Senate Appropriations Committees).
	80	GAO Review of SSA's Infrastructure and Service Delivery	Report	DCBFQM/ ALS	TBD	The Chair of the House Committee on Ways and Means, Subcommittee on Social Security asked GAO to review: (1) our efforts and plans to achieve financial efficiencies through reorganization of our physical infrastructure, and (2) our efforts to modernize service delivery through automated options, such as online services.
	81	GAO Review of SSA's Oversight of Administrative Law Judges	Report	DCBFQM/ ALS	TBD	The Chair of the House Committee on Ways and Means, Subcommittee on Social Security requested GAO to review: (1) To what extent do allowance rates vary among Administrative Law Judges and what factors, if any, are associated with this variation; and, (2) What actions has SSA taken to ameliorate oversight and ensure accurate and timely disability determinations at the hearings level.
	82	Information Collection Budget Report	Report	DCLCA	TBD	Annual report for Congress/OMB, which includes the total paperwork and information collection burden that federal government and individual agencies are placing on the public. Exact due date TBD by OMB.
	83	Minority Serving Institutions Performance Report	Report	DCHR	TBD	This Annual Performance Report on Executive Agency Actions to Assist Minority Serving Institutions (MSIs) pursuant to Executive Order (EO) 13515, EO 13532, EO 13555 and EO 13592. We submit our report to the Dept. of Education, usually in March.
	84	ODAR Monthly State of Services Report	Report	ODAR	TBD	The monthly ODAR State of Services (SOS) report includes management information and data about workloads, issues, successes, and progress on our goals. SOS also includes ongoing initiatives, such as updates to our CARES plan to reduce the hearings pending and wait time for a hearing.
	85	National Social Security Month	Event Designation	OCOMM	Month of April	Consider proclaiming April as "National Social Security Month." A presidential recognition would carry more weight and interest than if SSA self-recognized this. This would provide us with the opportunity to conduct marketing and outreach related to our programs and benefits. The benefits establishing a month dedicated to all things Social Security are: <ul style="list-style-type: none"> <li>• Amplifies importance of Social Security to the public</li> <li>• Provides national focus and visibility</li> <li>• Reinforces relevance of Social Security beyond retirement</li> <li>• Capitalizes on built-in focus of Financial Literacy Month and peak PSA distribution/awareness</li> <li>• Provides more lead time and flexibility for Public Affairs Specialists and OCOMM to create local and national outreach efforts that can: <ul style="list-style-type: none"> <li>– Be executed anytime during the month (not just during a designated time period)</li> <li>– Focus on anything Social Security e.g. retirement, survivors benefits, early career, mid-career, marriage, etc.</li> <li>– Be audience specific and leverage Audience Communications Packets</li> <li>– Leverage National Social Security Month for speaking engagements, exhibits, conferences, events at local venues e.g. housing units, libraries, assisted living facilities, etc.</li> </ul> </li> </ul>
	86	Strategic Objective Review	Report	OCSO	April 2017 (Internal); 5/16/17 to OMB	Per Circular A-11 Part 6 Section 270.9, the review should engage in long term strategy, annual planning and budget formulation. The Strategic Objective Review allows the SSA Commissioner, SSA Senior Executives, OMB and Congress to understand how the agency is performing from a strategic standpoint.
	87	ODAR Executive Meeting	Event	ODAR	Jan-April TBD	This meeting gathers ODAR executive leadership to discuss sensitive issues and management challenges that are outside the scope of our weekly regional video calls.

**First 100 Days Calendar**  
**Major Reports, Events, Decisions, and Regulations**  
**January - April 2017**

	Item #	Name of Item	Type	Lead	SSA Due Date	Description
April		FY 2017 Congressional/Budget Operating Plan	Report	DCBFQM/ OB	TBD Contingent on Annual Appropriations	This report provides the agency's operating plan, including budgeted performance goals, for the enacted funding level. It is due 30-45 days after enactment of our annual appropriation--due dates vary, but the report normally is due at the end of January or beginning of February. The Commissioner signs it, and OB releases it to Congress and posts it to the Internet for the public. Note: We have not received a budget timeline for FY17, so the SSA due date is an estimate.

*Positive: Social Security is doing a good job; employees are courteous and helpful; process was smooth and efficient.*

*Negative: Processing time is too long; employees are not helpful or concerned; interview was rushed; was given misinformation; need clearer written explanations; hard to get through on the phone.*

**TAB B**

**TABLE FOR ESTIMATING  
APPROXIMATE SAMPLING VARIABILITY**

SAMPLE SIZE	PERCENTAGE ESTIMATE									
	5%	10%	15%	20%	25%	30%	35%	40%	45%	50%
50	±6.0	±8.3	±9.9	±11.1	±12.0	±12.7	±13.2	±13.6	±13.8	±13.9
100	4.3	5.9	7.0	7.8	8.5	9.0	9.3	9.6	9.8	9.8
150	3.5	4.8	5.7	6.4	6.9	7.3	7.6	7.8	8.0	8.0
200	3.0	4.2	4.9	5.5	6.0	6.4	6.6	6.8	6.9	6.9
250	2.7	3.7	4.4	5.0	5.4	5.7	5.9	6.1	6.2	6.2
300	2.5	3.4	4.0	4.5	4.9	5.2	5.4	5.5	5.6	5.7
350	2.3	3.1	3.7	4.2	4.5	4.8	5.0	5.1	5.2	5.2
400	2.1	2.9	3.5	3.9	4.2	4.5	4.7	4.8	4.9	4.9

To use this table, locate the nearest sample size and percentage estimate. If you need to estimate the sampling variability for a percentage estimate greater than 50 percent, subtract the percentage estimate from 100 percent and use the result.

For example, to determine the sampling variability for the percentage of disability claim manager awarded respondents rating overall service excellent/very good/good, go to the row which is closest to 342 (350) and then to the column which is closest to 6 percent (100 percent-94 percent) and read the sampling variability (±3.1 percent). This means that the approximate 95-percent confidence level interval around the 94-percent estimate ranges from 90.9 percent (94 percent - 3.1 percent) to 97.1 percent (94 percent +3.1 percent).

## Appendix VI: OWA Survey Results

### ***DCM EVALUATION - PHASE II EMPLOYEE/SITE COORDINATOR/MANAGER SURVEY RESULTS***

The Disability Process Redesign Team (DPRT) asked the Office of Workforce Analysis (OWA) to evaluate the human resource and service impacts of the DCM test including the current level of DCM comfort in the job, perceived learning curve, impacts on fraud, etc. To determine these impacts, OWA, with DPRT input, developed questionnaires and surveyed participants in both Phase I and Phase II of the test.

DCMs, Mentors/Coaches, Managers and Medical Consultants were asked to complete surveys in March 1999 for Phase I. OWA prepared a report of Phase I survey results in April 1999 for DPRT. The Lewin Group (the contractor hired to evaluate Phase I) incorporated many of the OWA survey results/findings into their overall evaluation report.

In addition, the Lewin Group was responsible for preparing the evaluation plan for Phase II, which began on November 1, 1999. This plan recommended that OWA survey test participants again. However, this time Lewin suggested only surveying DCMs who participated in Phase I and site coordinators/managers. Surveying just the DCMs who participated in Phase I would allow comparisons to be made. In addition, Lewin recommended removing questions that were not relevant to Phase II such as those soliciting reaction to the initial training, the mentoring/coaching process, etc. These questions were removed and additional questions were added to address issues more relevant to Phase II such as the ongoing availability of technical assistance, pending and receipt volumes, etc. After DPRT review and comment, OWA mailed the surveys to the participants in May 2000.

We received 157 DCM survey responses (68 State and 89 Federal) and 40 Site Coordinator/Manager responses (14 State, 23 Federal and 3 Combined). Some sites returned more than 1 site coordinator/manager survey (e.g., site coordinator and field office manager may have completed a survey).

Complete survey results are attached at tab A, however, major findings are provided below. Where appropriate, comparisons between Phase I and Phase II findings are made.

#### DCM Findings

##### **1. Are employees comfortable performing the DCM functions?**

*About half (53.6 percent) of the respondents reported they are "very comfortable" performing the DCM functions. Over 96 percent of Federal and State DCMs indicated they are either "very comfortable" or "somewhat comfortable." This is about 10 percent higher than the Phase I results.*

Close to half of the Federal respondents and over half of the State respondents believe it takes over a year to achieve a high level of comfort. This is much higher than the DCMs

originally thought it would take when they were surveyed in Phase I. Furthermore, when asked what they thought the learning curve was (time to become proficient), the majority thought 1-2 years, with 14 percent of Federal DCMs and 30 percent of State DCMs indicating the learning curve is more than 2 years.

As was the case in Phase I, over 85 percent of the DCM respondents had over 5 years of claims adjudication experience (48 percent with over 10 years experience).

**2. Has the DCM process impacted the potential for fraud (either claimant or employee) or employee physical security?**

*The majority of DCM respondents indicated the new process has no impact on the potential for claimant/employee fraud or employee physical security. This is consistent with Phase I results.*

In fact, several commented that they were able to pick up on inconsistencies between claimant statements made during the interview and information found in the medical records. For example, a claimant alleged she lived alone and medical records indicate she lived with a spouse. This may not have been discovered if multiple people were working on different parts of the claim.

Though most did not see an impact on the potential for employee fraud, several DCMs did see an increase in the potential since one person works on the entire case and has access to both SSA and DDS systems.

Many commented that at the beginning of the test, they did have a lot of anxiety surrounding physical security. As there have been no instances of violent outbreaks (other than an occasional angry claimant), their fears have eased somewhat. However, most still acknowledge the potential for security concerns, as they are the single-point of contact.

**3. How has the transition to DCM impacted job satisfaction?**

*Fifty-five percent of Federal DCMs and 46.4 percent of State DCMs stated his/her job satisfaction has improved significantly. Another 25.8 percent and 33.3 percent respectively felt it had improved somewhat. This, again, is consistent with the Phase I survey results.*

However, 11.6% of the Federal DCMs indicated his/her job satisfaction had decreased either somewhat or significantly in Phase II, compared to 7.2% in Phase I. Fewer State DCMs stated job satisfaction had decreased - going from 15.4% in Phase I to 13.0% in Phase II (although still a higher percentage than Federal DCMs).

Similarly, the most frequently cited reasons attributing to the increased job satisfaction for both Federal and State DCMs were the same as those identified in the Phase I survey. These include having control of the case from beginning to end, increased claimant

interaction, increased knowledge and better customer service (particularly for terminally ill (TERI) cases). The increase in pay was also a major factor for Federal employees.

Again, the areas in which the DCMs are most unhappy varied between Federal and State DCMs. Federal DCMs identified the increased workload expectations, the lack of access to DDS doctors, having to make up leads when they take time off and the uncertainty regarding the future of the test as the top areas of dissatisfaction.

State DCMs cited having to rely on others to trigger claims, discrepancies between Federal and State sites (especially pay), lack of clerical support and lack of State management support. Many of these were also identified in the Phase I survey. It is important to note that several of these issues are not directly related to the DCM process but more related to structural/environmental issues (such as legal constraints, site management and availability of support) that would have to be dealt with prior to a real-world implementation.

It is also interesting to note that in Phase II the number of areas of dissatisfaction far outnumbered the areas of satisfaction identified. The DCMs had lengthy and well-thought-out narrative comments - many even took the time to type pages of comments.

#### 4. Are DCMs able to obtain timely technical assistance when needed?

*Yes, over 86 percent of respondents stated they could receive the assistance they need "most of the time" or "always."*

However, there were far more State DCMs reporting they are "not usually" able to get technical assistance (14.5 percent compared to 4.8 percent for Federal DCMs). Surprisingly, overall the majority of time (59.9 percent) the technical assistance comes from another DCM. However, the State DCMs rely more heavily on other FO staff and Federal DCMs rely most heavily on another DCM.

Seventy-four percent of State DCMs further indicated that the person triggering his/her claims is "usually" or "always" the same person providing the technical assistance.

**5. Do employees believe local management supports DCMs and/or the DCM process?**

*Results were mixed. Fifty-two percent of State DCMs felt local management support was fair to poor; while 63.1 percent of Federal DCMs felt local management support was good or excellent.*

While DCMs were surveyed about local management support, many provided narrative comments regarding the lack of support/interest/communication from other levels of management, specifically the Regional Office, DDS and FO managers (DDSs unable to get cases triggered timely, FOs unable to get MC support/input timely) and Central Office.

**6. Has the DCM process impacted workload factors such as claimant cooperation in MER development and obtaining CEs?**

*Yes. Mirroring the results from the Phase I survey, about 75% of the State DCMs felt claimant cooperation in obtaining MER has increased with the DCM process and over 50% felt CE cooperation had improved.*

In fact, no one believed claimant cooperation had decreased with the DCM process. The primary reasons cited for this improved cooperation are the fact that the DCMs are building a better rapport with the claimants and explaining the process more clearly. Therefore, claimants have a better understanding of the importance of obtaining MER and keeping CE appointments.

**7. Has the DCM process impacted the volume of unproductive leads?**

*Yes, although about half of the Federal DCMs believe the DCM process has not changed the number of unproductive leads, 36.6% believe there are now fewer unproductive leads. These results are very similar to Phase I results with 48.4% indicating no change and 38.9% indicating fewer.*

This, again, is believed to be a result of improved communication and rapport with the claimants.

**8. Do DCMs feel the current volume of leads they receive is appropriate?**

*While over 60 percent of both State and Federal DCMs stated they are able to keep up with the volume of leads they are currently receiving, about a third of all respondents feel they are receiving too many. In addition, about 50 percent of State DCMs indicated the optimal number of leads is 7-9 per week, which is less than they are currently receiving.*

Several employees commented that because of the large volume of leads they receive every week, they spend the majority of time interviewing and do not have much time left to adjudicate. They also stated that the volume of "no shows" is less than what was

anticipated - which means they are conducting more full interviews than expected. In fact, the amount of time spent interviewing was one of the things about being a DCM that both State and Federal employees stated they dislike most frequently. Furthermore, both State and Federal DCMs are very concerned and upset that they must "make up" leads when they take time off, as this does not occur in the current process.

**9. Do DCMs believe the average volume of claims they have pending is appropriate?**

*Responses differed between Federal and State responders. The majority of Federal DCMs indicated they average 61-80 claims pending and the "optimal" number of claims would be 41-60 (52.9 percent). However, over 40 percent felt the optimal level was 61-80 claims.*

*The majority of State DCM responses (50.7 percent) show they average 41-60 claims pending and also believe this is the "optimal" number (56.5 percent). Only 17.4 percent thought 61-80 was optimal.*

It is interesting to note that in the Phase I survey significantly more of both Federal and State DCMs thought the optimal number of claims pending was between 26-40. This seems to indicate that as DCMs gained experience, expertise and comfort in the new process they also felt better able to handle a larger workload.

It should also be noted that several people commented in the narrative section that pendings are still growing due to a combination of the large number of leads, the lower than expected no show rate and having to make up leads for periods of leave. In addition to the number of claims pending, it is critical to monitor the age of claims pending to ensure they are still being processed timely.

**10. Do DCMs believe they have gotten over the learning curve and are currently at the maximum level of production?**

*Yes, 53.1 percent of Federal DCMs and 62.1 percent of State DCMs feel their current level of productivity is the highest level they can achieve.*

However, 43.2 percent of Federal and 28.8 percent of State DCMs believe they will still be able to increase productivity slightly.

Many respondents caveated their responses by saying that although production is up, the "quality" of decision-making and level of service being provided has suffered. They do not spend the same amount of time reviewing the claim or working with the claimant as they were able to in Phase I due to the increased emphasis being placed on "numbers." It should be noted that no actual decline in accuracy rates have been observed by QA reviewers - this is merely the perception of DCMs.

**11. Are Claims Support Specialists (CSS) and/or support personnel being used more consistently in Phase II than they were in Phase I?**

*It is not clear if CSSs are being utilized more consistently; however, DCMs identified more functions being done by CSSs, though primarily clerical in nature.*

In fact, many respondents (9) commented in the narrative section that they would prefer having more lower-graded clerical support rather than higher-graded paraprofessionals. DCMs feel they have a greater need for clerical assistance than adjudication assistance and several DCMs said many CSSs are "not receptive to doing "lower-graded" clerical functions." In support of this, most of the "other" functions the DCMs would like clericals to perform were clerical in nature.

**12. How do DCMs picture the DCM process interfacing with the current process and/or the prototype process?**

*The most frequent response in both the Federal (17) and State (10) sites was that DCMs could continue to process TERI cases and other "easy" allowances or sensitive cases.*

DCMs feel they are able to provide particularly good customer service in these types of cases because processing time is very low (sometimes processed the same day).

Several also stated the process is good the way it is. Still others expressed that they do not believe it interfaces at all with the current process.

## Management Findings

### **1. What areas do site coordinators/managers believe cause the most problems for the DCMs?**

*State site coordinators/managers cited SSI entitlement factors, getting someone to trigger cases and time management as 3 of the top problem areas for State DCMs. Federal site coordinators/managers identified RFC completion, not having access to medical staff and SSI entitlement factors (especially for former T2 CRs) as the top three problem areas. Combined site coordinators/managers listed SSI entitlement factors, desk/time management and the lack of time to review medical records.*

These are very similar to what the DCMs identified as things they "dislike" about being a DCM and/or the DCM process.

Most site coordinators/managers listed SSI as a problem area and most of them felt it was due to the lack of, or inefficient training being given on the topic.

### **2. What areas do site coordinators/managers believe DCMs are performing especially well?**

*State site coordinators/managers thought processing cases timely (especially TERI cases) and interviewing skills were two things the DCMs do well. Federal site coordinators/managers rated the level of public service, processing time and quality very highly. Combined site coordinators/managers also thought DCMs have very good interviewing skills.*

These, again, were things DCMs stated they like about the DCM process.

### **3. What difficulties/challenges are site coordinators/managers encountering?**

*State site coordinators/managers indicated getting cases triggered and keeping morale up considering the heavy workload. Federal site coordinators/managers most frequently cited they are having difficulty ensuring the DCMs are not overwhelmed with the volume of work. The combined site coordinators/managers also identified the heavy workload, not knowing the future of the test and having "State administrators threatening to pull the State DCMs from the test."*

### **4. How do site coordinators/managers picture the DCM process interfacing with the current process and/or the prototype process?**

*State, Federal and combined site coordinators/managers all agree DCMs would be good for processing TERI cases and other quick and obvious allowances. Some Federal site coordinators/managers also commented that DCMs could make the shift to prototype without much work. Some also stated that DCM would be ideal in a metropolitan office if the DDS was nearby and DDS management supported the process.*

It is also interesting to note that several site coordinators/managers and DCMs felt the DCM process, as it is today, could not be rolled out on a large scale basis because they do not believe an average DE or CR would be able to do this job.

**5. What were the site coordinators/managers comments regarding CSS utilization?**

*Managers comments in this area mirrored those of the DCMs. They do auxiliary claims, etc. but also felt DCMs would be better served by clerical support.*

Caveats to the Analysis

As identified in the Phase I survey findings, the following caveats should continue to be considered when interpreting the Phase II survey data:

1. Most of the DCMs selected had 5-10 year claims adjudication experience (either medical or non-medical aspects). They have been described as the "best of the best." Therefore, the results received in this test do not necessarily represent what will occur if the process is rolled out.
2. The survey (opinion) data are largely subjective and, thus, might not paint an accurate (objective) picture. These data should be analyzed in conjunction with quantitative processing time, productivity and quality data.
3. As seen in other piloting situations, participants are generally "happier" in the new position for several reasons including: after being in the same job for many years participants are now experiencing a change of environment, increased pay, as well as seeing the possibility that the position will lead to a permanent promotion.
4. Wide variations in workflow processes and clerical support between sites make comparison of data more difficult.

## Reactions/Conclusions

1. Based on the data from the mark sense forms, the DCMs have increased job satisfaction compared to their previous positions. However, the voluminous narrative comments received indicate there are several significant areas of dissatisfaction with the process that were not as prevalent in Phase I.

The fact that DCMs identified so many more things they dislike about the DCM process than things they like and more dislike in Phase II than they did in Phase I, would lead one to believe that overall job satisfaction had declined - however, this contradicts what was actually reported. (Federal DCMs identified 49 discreet things they "like" about being a DCM and 74 things they "dislike." State DCMs identified 35 different things they "like" and 70 things they "dislike.") This seems to indicate that, although the DCMs are happy with the general principles of DCM, the increased workload and emphasis on productivity, as well as the uncertain future of the test etc. create a lot of anxiety and apprehension for the test participants (both DCMs and site coordinators/managers). In fact, several DCMs stated they will not apply for a permanent position if it is rolled out.

In addition, though the current cadre of DCMs have an overall higher level of job satisfaction, several of the DCMs and site coordinators/ managers do not believe an average CR/DE could perform the full range of functions required for this job.

2. It is true that many cases were processed quickly. Additional analysis needs to be conducted and other factors considered when looking at this statistic. For example, presumptive disability, TERI and other dire need cases already receive expedited handling and are processed much quicker than the majority of cases under the current process. Analysis would need to be done to determine if a higher percentage of these cases are handled in the DCM test. OWA staff accompanied DPRT on several site visits and discovered that some Federal sites are receiving additional TERI cases, etc from the FO (in addition to the ones they receive via the normal leads process). It is not clear how many offices or how many cases are involved but it may warrant further investigation.

In addition, processing time should be analyzed in conjunction with other performance indicators. For example, processing time might be low but the age and volume of the pending cases might be high. Several DCMs commented that with the high volume of leads they have less time to adjudicate and pendings are increasing. As the test continues, it will become even more important to monitor the size and age of pending workloads to determine if service is impacted.

3. In order to maintain high levels of quality, DCMs should be given access to necessary training. As DCMs are required to know all aspects of claim adjudication, it is imperative that they stay abreast of policy and/or regulatory changes, as well as receive ongoing refresher training on some of the more complicated aspects of claims processing. Many DCMs commented that they would like to receive ongoing, periodic refresher training and also felt they were left "out of the loop" of several training sessions that were made available to DEs and/or CRs.

4. It appears DCMs have a greater need for clerical support than paraprofessional support and many are using CSSs primarily for clerical functions. Although CSSs are supposed to be completing auxiliary and representative payee applications, during the site visits, OWA staff found instances where auxiliary claims backlogs were growing because the CSSs did not have time to get to them. Again, it is not clear how frequently this occurs and DPRT did discourage this practice when it was discovered. However, this needs to be monitored and evaluated. Perhaps it would be more efficient to have DCMs complete the auxiliary applications and have additional clerical support.
5. If these experienced adjudicators (with over 5 years of prior claims adjudication experience) require, at a minimum, in excess of a year to become comfortable with the job, a newly trained DCM with no prior experience would be expected to take substantially longer to become fully proficient and productive.
6. The impact of the training required for national rollout of this process would be substantial - in terms of time and money. Employees would be pulled out of his/her current position for an extended period of time (backing up current workloads), they would be less than 100 percent productive in the new position for at least a year and the dollar cost of the training phenomenal. Careful consideration of these impacts should be made prior to any rollout decisions.

## Appendix VII: Comment Themes & Responses

As with prior redesign efforts, the draft DCM report was released for component and stakeholder comment. The major themes of the comments and how they were addressed are outlined below:

### *Positive Themes:*

Several stakeholders commented test findings were encouraging in that DCMs were successful in carrying out both medical and non-medical aspects of initial claims processing, based upon accuracy results.

Commenters were encouraged with the positive results from customer and employee job satisfaction surveys.

**Theme:** The draft report did not provide recommendations to SSA Executives regarding the next course of action for the DCM process.

**Response:** “Conclusions & Recommendations” were added to the final report.

**Theme:** The report did not address why the allowance rate at the reconsideration level was higher for the DCM group.

**Response:** Reconsideration data was sufficient in terms of volume but some claimants denied at the initial level still had their reconsideration appeal window open at the time the draft report was released. The reconsideration data was rerun and updated through August 10, 2001 based on claims clearances. The update resulted in the cumulative allowance rate through the reconsideration level being comparable. See the “*Allowance Rate*” section for more information.

**Theme:** Ultimate program costs were incomplete due to the lack of hearing level data.

**Response:** Updated hearing level data was included as part of the final report. As of August 2001, DCM had a 9.1% higher hearing filing rate, which is statistically significant. The DCM allowance rate was 3.3% higher than the control group; however, given the low volume of clearances and the high sampling variability, the ultimate allowance rate data has not yet stabilized. This is not unexpected given the test ended in November 2000, and not enough time has passed to allow many DCM claims to be processed through the hearing level. Experience from the Prototype test has shown that hearing data does not stabilize for at least one year following the end of the testing period.

<i>Theme:</i>	Commenters said the methodology used to evaluate productivity and cost was too complex and questioned the validity of the results. There was criticism because a “range” of productivity & costs were presented rather than pinpoint a figure.
---------------	--

**Response:** There is no doubt that the cost and productivity sections of the evaluation were the most difficult to assess. During the comment period staff continued to validate and update both the data and approach used for these areas of the evaluation. Informational discussions were held with components to help in this assessment. There is general agreement that cost and productivity of the DCM process can not easily or precisely be calculated due to the complexities of data collection created by both the test structure and our current infrastructure. The following points summarize issues related to the DCM productivity and cost analysis:

- There is no single measure to determine the impact of blending federal and state functions. Assumptions were developed to build the DCM cost/productivity models;
- Claim Support Specialist positions were not consistently used from site to site, impeding our ability to fully assess the impact of their support;
- DCM workloads were not representative of the national-level workload mix. This was due to the fact that Title XVI childhood claims were excluded from the DCM workload;
- There was no control group to use as a direct comparison point for the cost/ productivity assessments. The DCM process was compared to the current process at the national level.
- Modified FO-based (WUPWY) and DDS-based (PPWY) productivity models were used to assess DCM production. Because WUPWY and PPWY calculations do not measure workyears per workloads using the same methodology, DCM productivity was shown under both calculations in a range. This range can not be averaged to produce a single number.

**Theme:** The equity in the comparisons for processing time, customer satisfaction, and employee job satisfaction was questioned due to the variables that existed between the DCM and control groups of cases. The DCM group had smaller caseloads and the ability to alter receipts if workloads were perceived to be unmanageable -- where the control group had larger caseloads and did not have the same ability to alter receipts. Also, the control group experienced delays due to insufficient resource availability at the DDSs.

**Response:** The "Processing Time" section of the report was modified to address these issues and includes a chart comparing average DCM pending to average disability examiner (DE) initial case pending.

**Theme:** Commenters had conflicting opinions regarding test results. Some commenters said test results were downplayed while others said results were overstated.

**Response:** Our objective was to report results fairly and objectively. Based upon comments received, modifications were made to the evaluation report that, hopefully, more fully portray circumstances experienced during the test as impartially as possible.

**Theme:** Pay disparities between federal and state employees are downplayed.

**Response:** The Executive Summary of the report was modified to highlight the issue of pay disparities between federal and state employees. This issue is also included in the "Impacts and Issues" section of the report.

**Theme:** The report does not include specific data breakouts by site type (individual, federal, and state).

**Response:** The intent of the DCM initiative was to test for efficiencies in the process *not* to compare DCM sites or site types to each other. Site level displays of data are not being supplied below the national level.

**Theme:** The report does not recognize that DCM denial accuracy fell below the federal regulatory threshold.

**Response:** Although denial accuracy for the DCM group was statistically comparable to the control group, the accuracy section of the report was updated to note that DCM denial accuracy fell below the regulatory threshold.

**Theme:** Commenters suggested wording modifications/deletions to the Office of Quality Assurance (OQA) and the Office of Workforce Analysis (OWA) reports (appendices V & VI).

**Response:** These documents have been officially released by the components and were source documents for information contained in the main body of the DCM evaluation report. Wording changes to said documents would be inappropriate.

**Theme:** Several commenters referenced whether DCMs were "*cream of the crop*."

**Response:** There is no doubt that DCMs were highly qualified individuals, as one would expect. However, not all the DCMs were within the top 5 - 10 percent of the workforce. Federal DCMs competed and were selected for the position just like any other federal position. State DCMs selection methods varied by State and included filing competitively, volunteering, and non-competitive selection.

## Appendix VIII: Key to Abbreviations

In the interest of conserving space, many abbreviations are used in the report & spreadsheets and are defined as follows:

<i>Term</i>	<i>Explanation</i>
#	Number (quantity) of items in that category.
%	Percentage of items in a category.
All or Allow	Allowances.
Case or Decision	DDS definition of a Medical Decision.
CE	Consultative examination-Additional evidence garnered at SSA initiative and expense needed to adequately evaluate a disability allegation.
Claim	Field office definition of an application for benefits.
Clsd Pd	Closed period of disability-an applicant who was disabled, and is potentially due payments in the retroactive period of the application, but is not disabled at the time of adjudication.
Cohort	A cohort is a subgroup of claims based on the original filing month.
Conc Concurrent	Concurrent claims: A claim for both Title II and Title XVI benefits; treated as one medical decision but two claims.
Control Control Group	DCM type claims randomly selected from parallel field offices using the current CR/DE process. Used for comparison purposes versus the DCM group of claims.
CSS	A claims support specialist & federal employee used as paraprofessional support for the DCM process.
Cum	Cumulative figures.
DCM	Disability Claims Manager, also used to refer to the site where DCMs are located, cases handled by a DCM, and the overall process employing DCMs to make medical decisions.
DI	Disability Insurance (Title II).
DPRT	Disability Process Redesign Team -- the component with oversight responsibility for the DCM test and evaluation.
Exclusion	Any case that is removed from the assessment universe for any reason.
FDCM	A federal disability claims manager.
Hearing	Second appeal level, except in Prototype states where the reconsideration step was eliminated, in which case it is the first appeal level.
IDA	Index of Dollar Accuracy.
Immune Def	Immune Deficiency related disability allegation.
Lead	The original contact from a potential applicant for benefits. Within the test, the lead was the original "purified" applicant that was selected randomly to participate in the DCM test group or the control group of claims.
MC	A medical consultant employed by the DDS.
MD Med	Medical Denial(s)-An application denied because the principal does not meet the SSA definition of disability.
MER	Medical Evidence of Record-An applicant's existing medical evidence at the time of the application.
MIICR	Management Information Initial Claims Report.

<i>Term</i>	<i>Explanation</i>
NA or N/A	Not Applicable-Whatever data is in the cell either cannot be computed (i.e. divided by 0) or makes no sense (i.e. processing time for cases that are excluded from processing time).
NDDSS	The National DDS case control system; data derived from this system is medical decision data rather than claims data.
Current Process	The historical process: a claims representative (CR) in a field office takes an application and makes the non-disability decision, a disability examiner (DE) in a DDS makes the disability decision.
OAT, Time, or OATime	The total number of days to adjudicate a claim from the initial application date until final clearance.
Paraselect	Clearance information from the field office case control system; data is based on claims clearances and has little medical information
Pending or Pndg	Cases filed that are still awaiting a decision.
PPWY	Production Per Work Year.
Prototype or Proto	The full process model pilot being used in 20% of cases nationally. Three DCM states (AL, CO, MI) are also prototype states.
Recon	Reconsideration, first appeal level of a decision in the current process, but eliminated in the Prototype states.
Reversed	Cases denied initially then allowed under appeal.
RIC	Regional implementation coordinator -- provided test oversight with respective regions and link between DPRT and the sites for communication and data collection.
SDCM	A state disability claims manager.
SC	Site coordinator.
SSIICR	Supplemental Security Income Initial Claims Report.
Site or J-Site	A DCM field location, whether in a DDS, a FO, or an autonomous location, all of which have field office codes beginning with a "J".
SSI	Supplemental Security Income (Title XVI).
S.V. or SV	Sampling variability -- measures how closely the sample results approximate conditions in the universe of cases being sampled.
T16	Title XVI (SSI) Claims
T2	Title II (SSA) Benefits
TD or Tech	Technical Denial(s)-An application denied for non-medical reasons such as excessive income or insured status.
WUPWY	Work Units Per Work Year.

#### 4) CAS Charts:

The following figures are from the Cost Analysis System SC3-Sum Report for Fiscal Year 2000.				
Workloads Processed are Initial Disability Claims				
Current Process	Organizational Component	Workload Processed	Work Years	PPWY
Title II	Sum Total	1,577,815	10,807.85	145.99
	OC		6.44	
	ODCHR		61.88	
	OLCA		5.24	
	CCEA		-	
	OACT <sup>1</sup>		5.49	
	OS		256.33	
	ITS <sup>2</sup>		-

	ORQAPA <sup>4</sup>		0.00	
	OFPO <sup>4</sup>		0.00	
	OFAM <sup>4</sup>		0.00	
<sup>1</sup> There are OACT costs for Title II, but not for Title XVI. <sup>2</sup> There are no ITS personnel costs, only dollar costs. <sup>3</sup> This includes all regional costs. <sup>4</sup> Staffing for these components are all included in the FAM total.				

This chart shows the compiled staffing figures, based on the prior two charts.<sup>12</sup>

<sup>12</sup> The current process staff and production figures include some actions not within the parameters of the DCM test (for example, disabled child claims). The effect these actions have on this PPWY is unknown.

## **T-2 Summary Calculation:**

These figures are based on the pro-rata share of the agency component work years, except for the DCM sites and DDS Support Time.

DCM Title II	Organizational Component	Workload Processed	Work Years	PPWY
Title II	Sum Total	38,075	242.19	157.21
	OC		0.16	
	ODCHR		1.49	
	OLCA		0.13	
	CCEA		-	
	OACT		0.13	
	OS		6.19	
	ITS <sup>1</sup>		-	
	DCM Sites		169.57	
	RC		13.00	
	DCOSS		0.45	
	PSC		0.44	
	DIO		8.95	
	OCRO		1.35	
	ODISP		0.05	
	FDDS		0.61	
	ODCP		0.40	
	OCOMM		0.39	
	DDS Support		27.80	
	FAM		11.08	
	OQAPA <sup>2</sup>		-	
	ORQAPA <sup>2</sup>		-	
	OFPO <sup>2</sup>		-	
	OFAM <sup>2</sup>		-	

<sup>1</sup> There are OACT costs for Title II, but not for Title XVI.

<sup>2</sup> There are no ITS personnel costs, only dollar costs.

<sup>3</sup> This includes the pro rata share of all regional costs other than the direct DCM site costs.

<sup>4</sup> Staffing for these components are all included in the FAM total.

PPWY was determined by totalling "Workyears" assigned to each component (242.19). Total workyears were divided into the Title II claims production (38,075) to determine PPWY for Title II (157.21).

To determine DCM PPWY--staffing and workload data from the above "CAS Charts-Current Process" workload allocations were apportioned to the DCM on a pro-rated basis:

- All organizational component staffing work years, other than the DCM Sites, RC, and DDS Support, were determined by taking the "Workyears" figure for the component from the above "*Current Process*" Title II chart .

- “Workyears” were divided by the Workload Processed (1,577,815 claims) to determine workyears attributed to “other” component support. (For example, the Current Process Title II chart shows OC support as 6.44 work years. This, divided by 1,577,815 claims processed, provides the fractional overhead for this component’s support.)
- These fractional workyear numbers were multiplied by the number of claims processed by DCMs (38,075) to determine the workyears attributed to each organizational component for DCM support. (For example, the above fractional support, times 38,075 Title II claims processed by DCMs, equals the OC support charge of .16 work years shown above).
- “DCM Sites” workyears (169.57) are the volume of workyears from the first page of this PPWY calculation (workyears associated with DCM Title II clearances).
- “RC” workyears represent Regional support to the DCM. These were determined as follows:
  - Total regional staff was taken from the CAS, SC 3 SUM Report, Activity 02 (Category 2100, RC-S).
  - Appropriate overhead was determined by subtracting workyears directly supporting disability claims workloads. This figure was obtained from the CAS, C2-15A DET Report for Activity 2. Workyears attributed to category 1-4 were used.
  - The difference was divided by the volume of disability claims processed nationally (current process) to determine the proportionate workyear per claim support.
  - This number was multiplied by the volume of Title II claims processed by the DCM to determine the total amount of RC support.

## 5) DDS Support:

“DDS Support” workyears include administrative, medical and clerical support provided to the DCM by DDS staff. These were determined as follows:

- Medical support was determined by multiplying the number of DCM medical decisions by 64.4 minutes per decisions (DDS assistance for MC time, QA reviews and CE exams).

This number (work minutes) was divided by 60 to determined work hours, and by 2080 to determine workyears.

Workyears were then apportioned to Title II and XVI as previously explained.

- **Other Overhead support**

Other DDS overhead support was determined as follows:

- DDS staff hours (full and part time) were divided into hours worked by administrative personnel and other staff, to determine the national overhead percent. (Data was taken from the SAOR , FD: 14 Report for FY 2000.)
- The overhead percent was applied to the DDS (DSA) staffing used in the Title II Disability Claims process (SC 3 SUM, Activity 02 report).
- The resulting overhead number was divided by the number of disability claims processed by DCMs (1,577,815) to determine workyears per claim.
- Workyears per claim were multiplied by the number of Title II disability claims processed by DCMs to determine total workyears of DDS overhead support.
- The workyears for medical support and overhead were totalled to determine “DDS Support” workyears.

**6) Title XVI PPWY Calculation:**

DCM Title XVI	Organizational Component	Workload Processed	Work Years	PPWY
Title XVI	Sum Total	25,758	132.62	194.22
	OC		0.09	
	ODCHR		0.90	
	OLCA		0.08	
	CCEA		-	
	OACT		-	
	OS		3.84	
	ITS <sup>1</sup>		-	
	DCM Sites		99.16	
	RC		2.91	
	DCOSS		0.27	
	PSC		1.33	
	DIO		-	
	OCRO		0.07	
	ODISP		1.25	
	FDDS		0.53	
	ODCP		0.24	
	OCOMM		0.24	
	DDS Support		15.71	
	FAM		6.00	
	OQAPA <sup>2</sup>		-	
	ORQAPA <sup>2</sup>		-	
	OFPO <sup>2</sup>		-	
	OFAM <sup>2</sup>		-	
<sup>1</sup> There are OACT costs for Title II, but not for Title XVI. <sup>2</sup> There are no ITS personnel costs, only dollar costs. <sup>3</sup> This includes the pro rata share of all regional costs other than the direct DCM site costs. <sup>4</sup> Staffing for these components are all included in the FAM total.				

PPWY for Title XVI was determined in the same way as Title II (applying the same formulas but using data relative to Title XVI.). PPWY was determined by totalling "Workyears" assigned to each component (132.62). Total workyears were divided into the Title XVI claims production (25,758) to determine PPWY for Title XVI (194.22).

## 7) Combined Title II/XVI Calculation:

DCM Combined	Organizational Component	Workload Processed	Work Years	PPWY
Total	Sum Total	63,833	374.81	170.31
	OC		0.25	
	ODCHR		2.40	
	OLCA		0.20	
	CCEA		-	
	OACT		0.13	
	OS		10.03	
	ITS <sup>1</sup>		-	
	DCM Sites		268.74	
	RC		15.91	
	DCOSS		0.73	
	PSC		1.78	
	DIO		8.95	
	OCRO		1.42	
	ODISP		1.30	
	FDDS		1.14	
	ODCP		0.63	
	OCOMM		0.63	
	DDS Support		43.51	
	FAM		17.08	
	OQAPA <sup>2</sup>		-	
	ORQAPA <sup>2</sup>		-	
	OFPO <sup>2</sup>		-	
	OFAM <sup>2</sup>		-	
<sup>1</sup> There are OACT costs for Title II, but not for Title XVI. <sup>2</sup> There are no ITS personnel costs, only dollar costs. <sup>3</sup> This includes the pro rata share of all regional costs other than the direct DCM site costs. <sup>4</sup> Staffing for these components are all included in the FAM total.				

This chart is comparable to the *Current Process, Total Sheet* discussed above. It shows the combined Title II and XVI workloads, workyears assigned, and final PPWY.

PPWY was determined by totalling "Workyears" from the Title II and XVI calculations ( $242.19 + 132.62 = 374.81$ ). Total workyears were divided into the total claims production ( $38,075$  Title II +  $25,758$  Title XVI =  $63,833$  total claims) to determine the final Production Per Work Year of  $170.31$  initial disability claims.

## COST

### 1) Dollar Cost Calculation:

The section that follows provides technical charts and assumptions related to the determination:

The cost model was built similarly to the PPWY model. The CAS was used to determine individual component costs in the current process. These costs were prorated to the DCM process based on the number of claims processed.

- Expected salary increases for both the DCMs and CSSs were factored into DCM cost projections. Expected salary differences between the current process and the DCM were determined by comparing the average claims representative salary (G2 11 Step 5) with a projected average DCM salary (GS 12 Step 5). The increase was averaged with the projected salary increase for the CSS position using a ratio of 2 DCMs per CSS. The CSS increase was computed by comparing an average Service Representative salary of GS 8 step 5 versus the CSS salary of GS 9 step 5.<sup>13</sup>
- The national per-claim personnel and other costs were determined by dividing personnel and other costs by the number of claims processed. This was then allocated to the DCM by multiplying the number of DCM claims processed by the determined national unit costs per claim.
- Regional and DDS personnel costs were determined by allocating overhead costs in the same manner staff support was determined.
- Personnel and other costs were totaled to determine total costs. This was divided by the total claims processed by the DCM to determine cost per claim.

<sup>13</sup> Due to individual state variability, DPRT was not able to determine an actual salary increase that could be expected for the SDCM position. The expected FDCM salary increase was applied to SDCM wages.

**2) Sources of data:**

- Office of Personnel Management pay charts for the Rest of the United States, FY 2000, were used to determine projected salary costs.
- The Cost Analysis System, FY 2000 SC-3 SUM and C2-15A, was used to determine claim processing costs in the current process and to extrapolate costs to the DCM.
- The Cost Analysis System SC-3 SUM, C2-15A DET report and the State Agency Operations Report (SAOR) for FY 2000 were used to calculate additional Regional and DDS support costs.
- A DPRT Database, based on data provided by test-state DDSs, was used to determine MER and CE costs.

### 3) Sample Calculation of Cost Per Claim:

Hours per Work Year  2,080  Standard SSA practice	DCM Staffing & Salaries			Total staffing data is from the weekly staffing reports maintained by the DCM team. Validation by T&A data is difficult due to mix of staff.	
	Position	Staff	Hours		
	SC	24.24			
	SDCM	76.39			
	FDCM	99.27			
	Other	6.55			
	CSS	47.23			
	Total Staff	253.69	567,313.50		Staff and hours worked from DPRT staffing reports.
Non-DIB Hrs		8,342.46	Hours used for work other than initial disability claims		
Work Years		268.74	Total Hours less Non-DIB hours, divided by 2080.		
Claims Cleared by DCMs	Category	Count	These are claims, not medical decisions.		
	DIB	38,075			
	DIB Aux				
	DI/BI	25,758			
To calculate pay differential we have used the journeyman's pay rate for the DCM and CSS positions, assuming that the grade structure will remain the same. We have also assumed that the state DCM will receive a commensurate raise. Personnel costs include salary plus benefits.					
Pay Differential for Federal DCM at 2:1 Ratio Using OPM Schedule					
		Average			
GS 11/5	\$ 47,412	GS 8/5	\$ 35,476 \$ 43,433		
GS 12/5	\$ 56,823	GS 9/5	\$ 39,184 \$ 50,943		
Difference	19.85%	Difference	10.45% 17.29%		
Personnel Costs (Including Benefits) for DCM Sites vs the Current Process					
Site	Nation	Cost/WY	DCM Difference	Cost/WY	
Field Office	8,679.00	\$ 58,436.30	17.29%	\$ 68,540.45	
State Agency	8,574.55	\$ 54,650.39	17.29%	\$ 64,099.92	
Average Cost				\$ 66,320.19	
				Medical Evidence	
To properly credit the time required to process DCM cases, the work done in the DDS to support the DCM process must be added to the work years required to produce the DCM workload.	Minutes Allocated for Work Done by DDS Staff	Category	Decisions	X 64.4	\$10.92
		Title 2	20,485	1,319,243.0	\$223,697.73
		Title 16	9,930	639,462.1	\$108,430.53

		Total	43,511	2,802,108.4	\$475,140.12
				Additional Cost/WY	
We use 64.4 minutes per case for the DDS support.	DDS Time Allocated by Title	Category	Minutes	Work years	\$ 34,844.61
		Title II	1,740,944.64	13.95	\$486,077.96
		Title XVI	1,061,163.76	8.50	\$296,280.71
Data is from the PPWY calculation spreadsheet. The same definitions apply.					
		Title II		Title XVI	
		FO	DDS	FO	DDS
Clearances		38,075	27,033	25,758	16,478
Work Years		169.57	13.95	99.16	8.50

The following charts illustrate the method used to calculate cost per claim processed. The calculation uses the productivity data calculated above, and incorporates the same assumptions and principles used in the productivity calculation.

#### 4) Other Cost Factors:

This portion of the cost per claim calculation provides background data for the rest of the calculation.<sup>14</sup>:

- The pay differential for federal DCMs and CSSs was used to estimate the cost increase that could be expected for the DCM. (Averaged on a 1:2 ratio equals 17.29%)
- Personnel costs for the DCM were determined by dividing current process personnel costs from the SC-3: SUM for disability claims workloads by the staffing associated with those workloads. The cost per work year was increased by the expected pay differential computed above to determine the expected average DCM salary. (\$66,320.19)
- A cost for medical evidence has been added to this sheet to reflect the determined extra costs incurred by the DCM over the Control for requests for medical evidence (MER and CE) (\$10.92 per case equals \$475,140.12)
- Per the Office of Disability, the average salary for support personnel involved with medical consultation, quality assurance, and consultative examination support exceeds the average DDS salary. The 64.4 minutes per medical decision associated with these activities have been charged at this higher salary.(\$89,495)

<sup>14</sup> As referenced in the "Productivity" section of this report, adjustments in cost were made to accommodate certain support provided the DCM from outside the test. These adjustments included regional and DDS overhead, medical consultant time, quality assurance time, and consultative exam/clerical support in the DDS. Adjustments were not made for outside triggering support for SDCMs as these practices varied by site and the amount of time "saved" by SDCMs would have been relatively insignificant.

## 5) CAS Charts:

The following figures are from the Cost Analysis System SC3-Sum Report for Fiscal Year 2000.						
Current Process	Organizational Component	Workload Processed	Costs			Cost per Case
			Personnel	Other	Total	
Title II	Sum Total	1,577,815	\$ 624,701,054	\$ 329,262,136	\$ 953,963,190	\$ 604.61

<sup>1</sup> There are OACT costs for Title II, but not for Title XVI. <sup>2</sup> There are no ITS personnel costs, only dollar costs. <sup>3</sup> This includes all regional costs. <sup>4</sup> Staffing for these components are all included in the FAM total.						

The above chart shows the costs associated with processing Title II disability claims in the current process. The current process completed 1,577,815 claims in fiscal year 2000. These claims were processed with an average cost of \$604.61 per claim. This chart lists personnel costs, other costs, total costs and cost per case associated with the various components contributing to processing these claims. This data, as indicated, is taken from the Cost Analysis System, SC-SUM Report.

Current Process	Organizational Component	Workload Processed	Costs			Cost per Case
			Personnel	Other	Total	
Title XVI	Sum Total	1,493,390	\$ 500,120,022	\$ 312,097,871	\$ 812,217,893	\$ 543.88

<sup>1</sup> There are OACT costs for Title II, but not for Title XVI. <sup>2</sup> There are no ITS personnel costs, only dollar costs. <sup>3</sup> This includes all regional costs. <sup>4</sup> Staffing for these components are all included in the FAM total.						

This chart totals the Title II and Title XVI costs and claims processed from their respective charts. It shows total claims processed of 3,071,205 and a cost per case of \$575.08.

## 6) Title II Calculation:

These figures are based on the pro-rata share of the agency component costs, except for the DCM sites, DDS Support costs, and RC Support costs. The "DCM Sites" category includes all personnel in the DCM site, whether federal, state, or combined. The "DDS Support" category includes credit for the work done in the state agencies in support of their DCM sites: 64.4 minutes per decision and costs associated with DDS oversight.						
DCM Sites	Organizational Component	Workload Processed	Costs			Cost per Case
			Personnel	Other	Total	
Title II	Sum Total	38,075	\$ 16,189,304	\$ 8,240,784	\$ 24,430,088	\$ 641.63
	OC		\$ 15,935	\$ 9,748	\$ 25,683	\$ 0.67

	OFPO <sup>4</sup>		\$ -	\$ -	\$ -	\$ -
	OFAM <sup>4</sup>		\$ -	\$ -	\$ -	\$ -
<sup>1</sup> There are OACT costs for Title II, but not for Title XVI. <sup>2</sup> There are no ITS personnel costs, only dollar costs. <sup>3</sup> This includes the pro rata share of all regional costs other than the direct DCM site costs. <sup>4</sup> Staffing for these components are all included in the FAM total.						

The DCM processed 38,075 Title II initial disability claims with a cost per case of \$641.63.

The costs charged to the DCM process were calculated in the same manner as staffing in the above PPWY Calculation. Using Current Process costs, a cost per case in the current process was determined by dividing the respective component costs by the volume of claims processed.

- The DCM was charged with proportionate costs based upon the number of claims processed by the DCM.
- The only costs not determined in this manner were the personnel costs associated with the DCM sites, RC, and DDS Support. Staffing costs for these categories were based on the staffing numbers determined in the PPWY calculation in the "Key Issue: Productivity and Cost Efficiency" section.

- The projected DCM average salary determined on the first page of this calculation was multiplied by the DCM staff counts to determine DCM personnel costs.
- DDS support personnel costs were determined by applying the average DDS salary from the first page of this sheet to the staffing from the appropriate PPWY sheet. The DCM cost adjustment factor was not used for this calculation as support personnel salaries would likely not be increased under the DCM. The extra salary costs associated with medical and CE support were added.
- DCM additional support reflects the apportioned cost per case for DCM support plus the added cost the DCM incurred for MER and CE.
- RC personnel costs were apportioned on a per claim basis, using the same calculations as those in the PPWY calculation. Specifically identified RC support costs were apportioned on a per claim basis in the current process. This unit cost was then applied to the claims processed by the DCM to determine RC support.

**7) Title XVI Calculation:**

DCM Sites	Organizational Component	Workload Processed	Costs			Cost per Case
			Personnel	Other	Total	
Title XVI	Sum Total	25,758	\$ 9,037,410	\$ 5,634,509	\$ 14,671,919	\$ 569.61
	OC		\$ 9,629	\$ 5,892	\$ 15,521	\$ 0.60

	FAM		\$ 1,210,890	\$ 49,253	\$ 1,260,143	\$ 19.74
	OQAPA <sup>4</sup>		\$ -	\$ -	\$ -	\$ -
	ORQAPA <sup>4</sup>		\$ -	\$ -	\$ -	\$ -
	OFPO <sup>4</sup>		\$ -	\$ -	\$ -	\$ -
	OFAM <sup>4</sup>		\$ -	\$ -	\$ -	\$ -
<sup>1</sup> There are OACT costs for Title II, but not for Title XVI. <sup>2</sup> There are no ITS personnel costs, only dollar costs. <sup>3</sup> This includes the pro rata share of all regional costs other than the direct DCM site costs. <sup>4</sup> Staffing for these components are all included in the FAM total.						

The combined Title II and Title XVI costs indicate a total cost per case of \$612.57. This is based on a total of 63,833 initial disability claims processed by the DCM sites and the estimated costs associated with this processing.

## 9) Medical Costs

### MER and CE Costs

- The control group paid for MER in 12% fewer cases than the DCM. The control group also experienced a 7% lower MER cost per case with paid MER. .
- The control group paid for CEs in 11% fewer cases than the DCM. The control group experienced a 2% higher CE cost per case with paid CE. .
- The DCM combined MER and CE cost per medical decision was 14% greater than the control.

INFORMATION

The attached report provides the final results of the DCM Phase II customer survey. In addition to detailing the findings of the DCM survey, the report includes comparisons with customer satisfaction in the current disability process, as measured by the fiscal year 2000 Market Measurement Program (MMP) customer segment survey of initial disability (DI) applicants.

The DCM survey was conducted by staff in the Regional Offices of Quality Assurance and Performance Assessment over the telephone during August and September 2000. The findings are based on the responses of 344 awarded (89-percent response rate) and 296 denied (72-percent response rate) claimants who experienced the DCM process. Individuals were selected for the survey based on DCM medical decisions made from April 30 through June 30, 2000 and contacted for the survey interview after the notice of decision was released.

As in previous surveys of disability applicants, the DCM survey found that the perception of overall service was most strongly affected by the outcome of the claim. While awarded respondents rated service very highly, at 94 percent excellent, very good or good (E/VG/G), denied respondents gave a significantly lower rating of only 68 percent.

However, ratings of other aspects of service leave an impression of a process that, in many respects, is well received by all customers. This is particularly evident in ratings of employee attributes – helpfulness, courtesy, job knowledge and time spent with the

claimant. Awarded respondents gave almost perfect 97 or 98 percent E/VG/G ratings for these aspects of service. Denied respondents, traditionally much less satisfied with all aspects of service, gave surprisingly high attribute ratings of 88 to 96 percent, with job knowledge as the top-rated aspect of service. And, in fact, comparison with results of the MMP Initial DI survey showed that DCM ratings for all employee attributes were significantly higher than in the current process for awarded and denied claimants alike.

Other comparisons with the Initial DI survey results also reflect a positive customer perspective on the DCM process. Ratings of processing time, the number of contacts to complete the application and decision notice clarity were all significantly higher for both awarded and denied DCM respondents than for the corresponding groups in the Initial DI survey. The 94-percent overall satisfaction rate of awarded respondents compared favorably with the Initial DI rate of 91 percent, although the difference was not statistically significant. For denied claimants, however, the 68-percent satisfaction rating from DCM respondents represented a statistically significant improvement over the 55-percent rate of their current process counterparts.

If you would like to discuss the findings in this report or have further questions, please call me on extension 53815. Members of your staff may contact Robyn Proctor on extension 50311.

## Appendix V-2: OQA Customer Satisfaction Survey Results

### *Disability Claim Manager Phase II Customer Satisfaction Survey*

#### *Survey Methodology*

- The disability claim manager (DCM) Phase II customer satisfaction survey was developed in coordination with the Disability Process Redesign Team and built on experience gained in earlier Office of Quality Assurance and Performance Assessment (OQA) surveys of disability applicants. Questions obtained details about the claimant's experience filing for benefits through a DCM, addressing the logical sequence of events in the application process. In addition, the survey elicited ratings of aspects of service universally important to initial claims customers, using SSA's 6-point world-class service scale which ranges from excellent to very poor. These ratings can be compared with baseline data from OQA's fiscal year (FY) 2000 Market Measurement Program (MMP) Survey of Initial Disability (DI) applicants, which measured customer satisfaction with the current disability process.
- The sample for the survey was selected from final DCM award and medical denial decisions made in the 2-month period from April 30, 2000 through June 30, 2000. Both title II and title XVI decisions were included. Staff in the Regional Offices of Quality Assurance and Performance Assessment conducted the interviews by telephone in August and September 2000. Individuals were contacted after the notice of award or denial was released to ensure that the process was complete from the claimant's perspective. Shown below are the very high response rates they achieved.

<u>Strata</u>	<u>Completed Surveys</u>	<u>Response Rate</u>
DCM Awards	344	89%
DCM Denials	296	72%

The discussion that follows highlights key survey results, noting statistically significant findings as appropriate. Typical comments provided by respondents are shown in italics in the pertinent sections.

The complete DCM survey results, presented separately for awards and denials, are included in tab A. Survey results are presented there in an annotated questionnaire showing the number of responders and response percentages for each question. Tab A also provides comparison with findings from the MMP Initial DI survey, which were recalculated to exclude title XVI children's cases and technical denials so that results would better parallel the DCM sample. Tab B contains a table for estimating sampling variability for individual responses.

#### Satisfaction With the DCM Phase II Process

- Not unexpectedly, outcome was the main driver of satisfaction with the DCM Phase II process, affecting the ratings of almost all aspects of service. The impact was especially

### **Factors Affecting Overall Satisfaction**

- When asked for further explanation, DCM respondents who were dissatisfied with overall service cited long processing times, employee shortcomings and unclear or incomplete explanations as the reasons for their rating. Denied respondents also often attributed the rating to disagreement with the decision and a perception that their medical condition was not adequately evaluated.
- Along the same lines, cross-tabulation of survey results indicated that poor ratings of employee performance, clarity of explanations and processing time had a strong negative impact on overall satisfaction for both awarded and denied respondents. For example, even the ratings of awarded respondents, who were so highly satisfied with overall service, reflected a distinct difference based on satisfaction with processing time. Of the awarded respondents who rated processing time E/VG/G, 97 percent were satisfied with SSA service overall. In contrast, only 50 percent of awarded respondents who were dissatisfied with claims processing time rated overall service as highly.

*"The amount of time it took to process my application caused a hardship because I cannot work."*

Similarly, the ratings of denied respondents were strongly affected by satisfaction with DCM explanations of how the medical condition was evaluated. Denied respondents who were satisfied with these explanations rated overall service 77 percent E/VG/G compared to 49 percent for those who did not think the explanations were clear.

*"I feel the explanation given me was not very good. It was not very clear and I did not understand it."*

- Awarded respondents who indicated their calls to the DCM were returned the same day or the next day rated overall service very highly, 97 percent and 95 percent E/VG/G, respectively. (Eighty percent of awarded respondents said the call was returned by the next day.) If the DCM returned the call more than 1 day after the respondent left the message, however, satisfaction dropped to 78 percent E/VG/G. A similar pattern was noted for denied respondents where ratings dipped from 69 percent E/VG/G to 33 percent E/VG/G for the same timeframe.

*"Had to leave messages and the person would not call me back until two or three days later."*

- Only 43 percent of awarded and 25 percent of denied respondents knew the DCM was the person who made the medical decision on the claim. No difference was seen in the overall satisfaction of awarded respondents whether or not they had been advised of this fact. For denied respondents, however, the knowledge of the DCM's role had an unexpected impact on overall service ratings. Denied respondents who were aware that the DCM made the medical decision reported significantly higher E/VG/G ratings for overall service (81 percent) than those who were unaware of this fact (66 percent). Denied respondents in

the first group may feel more satisfied because the process was more personal, giving them direct access to the decisionmaker.

*"Liked having one person take care of everything."*

*"I think that having one person to go through the whole process with is better. Being able to call SSA and have someone to ask for was very important."*

### **Comparison of DCM Phase II Process and MMP Initial DI Claims Experience**

- DCM Phase II survey results can be compared to findings from the MMP Initial DI survey, which measured the satisfaction of initial claimants in the current disability process. The Initial DI survey was conducted by mail in FY 2000 with 747 awarded and 432 denied disability applicants. The sample excluded all claims processed under disability redesign, whether in the DCM process or prototype. In order to match the makeup of the DCM sample for this comparison, survey responses from title XVI children's claims and any nonmedical denials were removed from the MMP Initial DI data tabulations.
- The DCM process promoted the use of the telephone to file the benefit application. As a result, based on survey responses, a much larger proportion of DCM claims were filed over the telephone (about three-quarters of both awards and denials) than in the current process (less than half). While a small proportion of DCM respondents who filed over the telephone visited the office at some other time, the majority of both awarded (61 percent) and denied (67 percent) participants dealt with the DCM entirely over the telephone throughout the claims process.
- The difference in filing method may have produced some of the statistically significant differences in completion of medical forms that are also reflected in the survey data. DCM participants, especially awardees, were more often asked (93 vs. 84 percent) and more often able (60 vs. 45 percent) to complete the medical forms on their own. However, DCM participants less often requested their own medical reports (24 percent awards; 17 percent denials) compared to current process applicants (39 percent awards; 38 percent denials). This difference may be a function of the DCM process, which calls for immediate initiation of medical development by the DCM.
- Significantly fewer DCM than Initial DI respondents reported that they had been sent for a consultative examination in connection with the disability claim, indicating there may be some differences in the types of disabilities and availability of medical evidence for the two populations. This was true for both awarded (a 23-percentage point difference) and denied claimants (15-percentage point difference).
- These findings suggest there may be some inherent differences in the characteristics of individuals participating in the DCM process in terms of the nature of their impairments and their ability to negotiate the claims process. Whether these potential differences had any effect on levels of satisfaction or understanding of the DCM process compared to the current process cannot be discerned from the survey data, but the possibility should be kept in mind.

### **Comparison of DCM Phase II Process and MMP Initial DI Satisfaction**

- Awarded respondents in both surveys were similarly satisfied with SSA service overall. While the 94-percent satisfaction rate of awarded respondents in the DCM survey was slightly higher than the 91-percent rate found in the Initial DI survey, the difference was not statistically significant. The 68-percent satisfaction rate of denied DCM respondents, on the other hand, was significantly higher than the 55-percent E/VG/G rating of their counterparts in the current process.

*"My entire experience with Social Security was excellent from beginning to end."*

- In the DCM survey, both awarded and denied respondents were significantly more satisfied with all aspects of employee performance compared to the Initial DI respondents.

SATISFACTION WITH EMPLOYEE ATTRIBUTES				
E/VG/G RATINGS	AWARDS		DENIALS	
	DCM	INITIAL DI	DCM	INITIAL DI
Caring/helpful	97%*	94%	88%*	82%
Courtesy	98*	94	94*	83
Knowledge	98*	94	96*	85
Time spent	98*	94	88*	82

\* Statistically significant difference compared to the current process.

*"The employees were more caring and attentive now than they used to be before."*

- DCM awarded and denied respondents generally rated the clarity of explanations slightly higher than their current process counterparts. For the most part, the differences were not statistically significant. However, DCM denied respondents did give a significantly higher rating to the explanation of how their medical condition was evaluated, an important element of the process.

SATISFACTION WITH EXPLANATIONS				
E/VG/G RATINGS	AWARDS		DENIALS	
	DCM	INITIAL DI	DCM	INITIAL DI
Information/documents needed to file	99%*	96%	89%	84%
Disability rules and requirements	95	94	77	72
Application process: How medical condition was evaluated	94	91	71*	60
Changes to report	95	94	NA	NA
Effect of return to work	92	89	NA	NA

\* Statistically significant difference compared to the current process.

*"The interviewer I worked with showed much more interest in helping us with the paperwork and answering all of our questions than the previous time I applied."*

- Compared to the Initial DI survey, both strata of DCM respondents were much more satisfied with the number of contacts made about their application, as well as with the claims processing time.

SATISFACTION WITH CONTACTS AND PROCESSING TIME				
E/VG/G RATINGS	AWARDS		DENIALS	
	DCM	INITIAL DI	DCM	INITIAL DI
Number of contacts	94%*	87%	80%*	61%
Processing time	86*	80	65*	54

\* Statistically significant difference compared to the current process.

*"I was very surprised and pleased that my claim was handled so quickly."*

*"Thought the new system was supposed to be faster but it wasn't."*

- Survey respondents were asked to rate the decision notice in terms of the clarity of the reason for the decision and the explanation of the appeal rights. As for most other aspects of service, DCM respondents gave significantly higher ratings than current process respondents for both items. This was true for both awards and denials and despite the fact that the notice language was not different for DCM cases.

SATISFACTION WITH NOTICE CLARITY				
E/VG/G RATINGS	AWARDS		DENIALS	
	DCM	INITIAL DI	DCM	INITIAL DI
Reason for decision	94%*	89%	64%*	46%
Appeal rights	98*	95	86*	68

\* Statistically significant difference compared to the current process.

Those respondents who rated the clarity of the notice fair, poor or very poor were asked to explain why. In both surveys, the most frequent reason behind the low ratings of denied respondents was disagreement with the decision. However, in DCM, the percentage of respondents (36 percent) who said they disagreed with the decision was significantly lower than in the Initial DI survey (50 percent). This seems to indicate that getting clearer explanations of the process from the same employee is having a positive impact on claimant perceptions.

*"Despite my personal outcome in filing, I believe the actual process works very well."*

## TAB A

**DISABILITY CLAIM MANAGER (DCM)  
PHASE II SATISFACTION SURVEY  
ANNOTATED QUESTIONNAIRE**

**Appointments**

1. How would you rate how soon you could get an appointment for your interview?  
Would you say it was:

AWARDS			DENIALS	
DCM (R = 326)	INITIAL DI (R = 443)		DCM (R = 275)	INITIAL DI (R = 235)

- Differences in filing methods may have produced some of the statistically significant outcomes in completion of medical forms<sup>13</sup>. DCM participants, especially awardees, were more often asked and able to complete their own medical forms, and less often requested their own medical evidence. *(See Appendix V for detailed survey results.)*

Shown below are the customer satisfaction results of the DCM Phase 2 customer survey as compared to the customer satisfaction in the current disability process, as measured by the fiscal year 2000 Market Measurement Program (MMP) customer segment survey of initial disability (DI) applicants.

Survey results are displayed in two categories:

- Claimants who rated service as excellent (E); and
- Claimants who rated service as excellent, very good, or good (E/VG/G)

Question	DCM E	MMP E	DCM E/VG/G	MMP E/VG/G
Adjudicator explained rules/requirements: claim allowed	30%	36%	95%	94%
Adjudicator explained rules/requirements: claim denied	11%	16%	77%	72%
Adjudicator caring/helpful: claim allowed	47%*	40%	97%*	94%
Adjudicator caring/helpful: claim denied	24%	22%	88%*	82%
Adjudicator courteous/respectful: claim allowed	53%*	44%	98%*	94%
Adjudicator courteous/respectful: claim denied	28%	22%	94%*	83%
Adjudicator job knowledge: claim allowed	47%	42%	98%*	94%
Adjudicator job knowledge: claim denied	25%	22%	96%*	85%
Amount of time spent with claimant: claim allowed	37%	41%	98%*	94%
Amount of time spent with claimant: claim denied	22%	18%	88%*	82%
How long it took to handle application: claim allowed	24%	26%	86%*	80%
How long it took to handle application: claim denied	7%	8%	65%*	54%
Clear notice with reason: claim allowed	25%*	34%	94%*	89%
Clear notice with reason: claim denied	7%*	7%	64%*	46%
<b>Overall Service: claim allowed</b>	<b>38%*</b>	<b>37%</b>	<b>94%</b>	<b>91%</b>
<b>Overall Service: claim denied</b>	<b>8%</b>	<b>8%</b>	<b>68%*</b>	<b>55%</b>

\*Statistically significant difference

#### Overall Rating:

Awarded respondents in both surveys were similarly satisfied with SSA service overall when combining responses of good through excellent. When looking at excellent respondents only, awarded claimants in the DCM group rated overall service better.

<sup>13</sup> See Appendix V, questions 20 through 24 for a description of medical forms.

Aggregated denied respondents rated the DCM process better overall than that of their counterparts in the current process.

*Claimant satisfaction with employee attributes:*

Both awarded and denied respondents were significantly more satisfied with all aspects of DCM employee performance.

*Claimant satisfaction with processing time, and clarity of explanations and notices:*

DCM respondents were much more satisfied with processing time, explanation of documents needed to file and notice clarity.

## 6. Employee Job Satisfaction

**Evaluation Question:** *Do DCMs report a higher level of job satisfaction as compared to their prior positions?*

**Summary Results:** Based on OWA Phase 2 survey results<sup>14</sup> of DCM job satisfaction, both federal and state DCMs indicated significant improvements in job satisfaction relative to their prior positions. These results are consistent with Phase 1.

**Evaluation Question:** *Is the level of DCM job satisfaction observed in Phase 1 maintained over time?*

**Summary Results:** Comparing OWA survey results from Phase 1 (vs.) Phase 2, there were no significant changes in DCM job satisfaction. However, federal DCM job satisfaction decreased slightly during Phase 2. Conversely, state DCM job satisfaction increased slightly.

### Methodology:

During Phase 1 OWA worked with Lewin and DPRT to develop questionnaires and surveyed all of the test participants to determine if they preferred the DCM job to their prior CR/DE position<sup>15</sup>. Survey topics included: levels of DCM job comfort, job satisfaction, reactions to training, mentoring effectiveness, and learning curves.

Based on the Lewin Group recommendations only those DCMs and site coordinators/managers who participated in Phase 1 were surveyed in Phase 2<sup>16</sup>. Per Lewin the survey was modified to include only questions relevant to Phase 2. The survey was mailed to the participants in May 2000. The results were evaluated and compared, then assessed for overall job satisfaction.

<sup>14</sup> Reference appendix VI, "DCM EVALUATION- PHASE 2, EMPLOYEE/SITE COORDINATOR/MANAGER SURVEY RESULTS", Office of Workforce Analysis, July 2000

<sup>15</sup> Response rate for DCMs on the Phase 1 survey was 89.5% (188 of 210)

<sup>16</sup> Response rate for DCMs on the Phase 2 survey was 89.7% (157 of 175)

**Results:**

The following table reflects responses to the specific question asked in the surveys, *"Compared to my work as a DE/CR working as a DCM has impacted my job satisfaction as follows:"*

	FDCM		SDCM		COMBINED	
	PHASE 1	PHASE 2	PHASE 1	PHASE 2	PHASE 1	PHASE 2
IMPROVED	85.6%	83.7%	79.7%	82.6%	82.4%	83.1%
NO IMPACT	7.2%	4.7%	4.8%	4.3%	6.0%	4.5%
DECREASED	7.2%	11.6%	15.4%	13.0%	11.5%	12.3%

The most frequently cited reasons for increased job satisfaction were:

- Control of the case from receipt to clearance
- Increased claimant interaction
- Increased job knowledge
- Better customer service (particularly for terminally ill cases)
- FDCMs also cited their increase in pay

The most frequently cited reasons for dissatisfaction by FDCMs were:

- Increased workload expectations
- Lack of direct access to medical consultants
- Need to catch-up on interviews lost during periods of leave
- Uncertainty regarding the test duration

The most frequently cited reasons for dissatisfaction by SDCMs were:

- Need to rely on federal employees to trigger cases
- SDCM and FDCM pay discrepancies
- Lack of clerical support
- Lack of state management support

The OWA report indicates several of the reasons for dissatisfaction were not related to the DCM process but to..." structural/environmental issues (such as legal constraints, site management and availability of support)..." Other impacts possibly affecting the level of DCM job satisfaction for FDCMs included the uncertainty regarding the DCM test duration and the impacts of long-term travel status.

## 7. Support Staff Assistance

**Evaluation Question:** *What types of support staff (clerical/paraprofessional), if any, are needed by DCMs?*

**Summary Results:** Based upon OWA survey results, both DCMs and site coordinators (SCs) did not perceive the need for paraprofessional type support. Both believed the DCM would be better served by clerical support. These survey results were supported by anecdotal information obtained during site visits.

### Methodology:

OWA worked with Lewin and DPRT to develop survey questionnaires for DCM test participants. As part of the survey questions, DCMs were asked about what type of support functions were most important to the DCM process.

### Background:

When the DCM test was originally envisioned, it was perceived that certain technology enablers would be in place, limiting the need for clerical support. Since the DCM test was conducted before the development of this support, a paraprofessional position (the CSS) was created to provide support to the DCM similar to that provided to DEs in the DDS. In addition, the CSS was expected to assist with non-disability (FO) workloads such as auxiliary claims, representative payee actions, etc.

Due to the manner in which CSS staff was assigned to the test, and the varied use of this staff, there was no valid way to separate CSS support from the DCM test. Work clearances completed by CSSs could not separately be captured. CSSs comprised 20 percent of the total staff hours; however, less than 2 percent of the work credits captured by the DCM sites would have been performed solely by CSSs. Other clerical work performed by CSSs was not measured (e.g., scheduling appointments, following up on evidence, etc.).

The survey asked the DCMs and SCs to list:

- The most important functions claims support specialists (CSS) or support personnel perform;
- The additional duties that could/should be assigned to the CSS/support personnel to make DCMs more productive.

Information gathered during site visits and survey responses support the conclusion that DCMs had greater need for clerical support than paraprofessional support<sup>17</sup>.

<sup>17</sup> See Appendix VI, "DCM EVALUATION- PHASE 2, EMPLOYEE/SITE COORDINATOR/MANAGER SURVEY RESULTS", Office of Workforce Analysis, July 2000

## 8. DCM in the Prototype Process

**Evaluation Question:** *How do key outcomes for the DCM/Prototype model compare to those of the Prototype process, as represented by the control group?*

### Summary Results:

#### Accuracy of adjudication:

- Pre-Effectuation Review (PER): DCM/Prototype accuracy was comparable to the control group.
- Disability Quality Assurance (DQA): The sample size did not allow a statistically valid comparison.
- Non-Medical Accuracy: The sampling did not provide the data to conduct a separate assessment of Prototype.

#### Processing time:

- In total, DCM and control case processing times were comparable. The DCM processed medical denials more quickly than the control group. The control processed allowances more quickly.

#### Allowance Rates:

- Initial claim allowance rates were statistically comparable.
- The reconsideration process is not included in Prototype procedures.
- Claimants denied in the DCM group requested a hearing 14.2 percent more often than claimants in the control group, which is statistically significant. DCM claimants were allowed 0.8 percent more often as compared to the control group, which is not statistically significant. Though given the low volume of clearances and the high sampling variability ultimate allowance rate data has not yet stabilized.

Sufficient or separate data was not available to assess the following key issues under Prototype:

- Customer satisfaction
- Employee job satisfaction
- Productivity and cost

### Methodology:

There were no differences in methodology for Prototype data collection. Where the data collected allowed a statistically valid comparison, Prototype data is being presented. The DCM/Prototype sites comprised less than 20% of the staffing and work produced in the DCM test.

**Results:**

- **Customer Satisfaction:** The OQA survey of customers did not isolate Prototype responses. No conclusions on DCM/Prototype could be made.
- **Employee Job Satisfaction:** The OWA Phase 2 survey did not isolate Prototype responses. No separate conclusions on DCM/Prototype could be made.
- **Accuracy of adjudication:**
  - Disability Quality Assurance (DQA) Review: No DCM/Prototype conclusions could be made since sample sizes were too small to allow a useful comparison. The sample sizes were 46 allowance and 65 denial cases reviewed for the DCM group and 38 allowance and 59 denial cases reviewed for the control group.
  - Pre-Effectuation Review (PER): The DCM and control PER accuracy rates were statistically comparable. The S.V. was 1.6%.

PER PROTOTYPE ACCURACY RATES

DCM vs. Control Group  
PER Prototype Accuracy Rates

	Number of Cases Reviewed	Number of Error Free Cases	Accuracy Rate
DCM	879	861	98.0%
Control Group	739	712	96.4%
Sampling Variability (S.V.)			1.6%
Difference in Accuracy Rates			1.6%

- Non-medical Accuracy: The OQA report on Title II and Title XVI non-medical accuracy did not delineate Prototype accuracy. No separate comparison for Prototype could be done in this area.

- **Allowance Rates:**

- **Initial Allowances:** The DCM and control group initial allowance rates were statistically comparable based upon an S.V. of 1.58%. DCMs processed 2,286 allowances from 6,108 claims and the control group processed 3,329 allowances from 8,912 claims. The monthly allowance rates were compiled base upon claim application months.

- The DCM processed a much larger ratio of their claims than did the control.
- DCM and control prototype allowance rates for Title II claims were statistically comparable. DCM and control prototype allowance rates for Title XVI claims were also statistically comparable.<sup>18</sup>
- The allowance rate trend line for prototype is similar to that of the current process. The DCM experienced a generally higher allowance rate for the first seven months of the test, and the control experienced a higher allowance rate for the last six months of the test.

<sup>18</sup> Title II S.V. for the difference of 2.0 PPT was computed using DCM 3,882 decisions, 1,576 allowances; Control 4,862 decisions, 1,960 allowances. The Title XVI S.V. for the difference of 2.4 PPT was computed using DCM 2,226 decisions, 710 allowances; Control 4,050 decisions, 1,369 allowances.

- **Reconsideration Rates:** The reconsideration process is not part of the prototype environment.
- **Hearing Rates:** The following graphs depict data through mid August 2001, and show the percent of hearing requests and decisional outcomes:

Claimants denied in the DCM group requested a hearing 14.2 percent more often than claimants in the control group. DCM claimants were allowed 0.8 percent more often as compared to the control group. Though given the low volume of clearances and the high sampling variability ultimate filing and allowance rate data has not yet stabilized.

- **Processing Time:**

Overall median processing times for both Title II and Title XVI Prototype claims were roughly comparable to the current process with one and a half days difference in Title II and less than one day difference in Title XVI. DCM medical denials were processed more quickly than control medical denials. Control allowances and technical denials were processed more quickly than the comparable DCM claims.

The above time lines show the DCM and Control average processing times maintained a relatively consistent relationship from February through July. The control then experienced a lower processing time for the remainder of the test period.

- **Productivity and Cost:** Productivity and cost in DCM/Prototype were not separately assessed.

## 9. Environmental Factors

**Evaluation Questions:** The Lewin Group suggested a series of questions related to the potential “fit” of a DCM process. Their specific questions were:

*How can the DCM be best configured to fit within the SSA/DDS environment? Are there feasible changes to that environment that would enable the DCM to become the approach to processing initial claims? Alternatively, should the DCM's role be limited to use in special situations that fit in the current environment and, if so, what situations?*

**Summary Results:** Lewin recognized that the Phase 2 Evaluation could not provide definitive answers to these questions. However, environmental factors were considered as part of the overall evaluation of the DCM process. These included the federal and state relationship, availability of technological enablers and other Agency initiatives that are currently underway.

### The Current Environment:

Throughout the redesign of the disability process, SSA reiterated its commitment to maintain the existing federal and state relationship. The infrastructure created by this relationship is a complex blend of federal and state government rules, regulations, systems and procedures. Each State's pay scale is different, and SSA has no authority or control over salaries for state DDS employees. While the DCM concept was tested in a federal/state environment, national implementation of the process, as tested, would require legislative change.

Legal parameters that would prevent full implementation of the DCM concept as tested are:

*Sections 205(b)(1) and 1631(c)(1)(A) of the Social Security Act (the Act) that require the Commissioner to make findings of fact and decisions as to the rights of any individual applying for payments under title II and title XVI of the Act. The effect of these sections is to preclude non-Federal employees from making the determination that an individual is or is not entitled to benefits. However, under sections 221(a)(1) and 1633(a) of the Act, the determination of whether or not an individual is under a disability shall be made by a State agency, notwithstanding any other provision of law, in any State which notifies the Commissioner that it wishes to make disability determinations. The Act provides only limited circumstances in which the Commissioner may perform the disability determination function for a class or classes of cases in a State without the State's consent.*

In order to test the DCM concept with both federal and state employees, SSA obtained agreements from State DDS Directors to allow federal employees to make disability determinations. The medical portion of the file was then co-signed by the FDCM and DDS program physician. The SDCMs were able to fully develop the non-medical aspects of the case; however, a SSA employee was required to finally adjudicate or “trigger” the case. Continuation of any form of the DCM process, without legislative change, would require ongoing collaborative agreements between SSA and State partners and federal “triggering” of benefit payments.

Anecdotal Feedback: Site reports and anecdotal information provided some good insights that could help determine a potential future role for some DCM-like skills or functions. These included:

- Specialized use: The Denver, Colorado combined DCM site was located in the downtown area, more easily accessible to homeless claimants. DCM outreach to homeless claimants could be particularly effective because of the DCM’s ability to identify source needs for both medical and non-medical aspects of the case, limiting the need for re-contacts. There is an added benefit in sites; such as is the case in Denver, where a consultative exam provider is located in the same building. There is a future potential for having DCM type position in offices where one-stop shopping could be accomplished.
- Potential for DCM to process other workloads: SSA could explore options to capitalize on the attributes of the DCM to expand to other types of disability workloads, tailored to local and regional needs, i.e. DCMs in flexible disability units or processing continuing disability reviews (CDRs). And, for example, the NY Regional Office has been working with the NJ DDS Director, management and the unions to continue to use the skills of the DCMs in the NJ sites.
- Technical Expert (TE) for Disability: The National Council of Social Security Managers Association (NCSSMA) suggested creating a specialized TE as an alternative position designed to provide flexible support to the disability program.

Broadened Agency Focus and Changing Claims Environment:

The DCM model was conceived more than five years ago as part of an aggressive plan to improve the disability claims process from initial level through final administrative appeal. Process support was expected from a set of enablers, which included advanced technology, process unification and a simplified disability decision methodology.

Five years later, SSA has moved forward in some areas and revised its timelines and goals in others. New initiatives, along with policy and procedural changes, have also impacted the claims environment. The potential of the DCM must be considered in the context of this changing environment, consistent with the goals and direction of the Agency. Activities impacting the disability claims environment include:

- Electronic claims environment: Technological support was viewed as a major factor in the viability of the original DCM concept. Integrated computer systems for all SSA components and DDSs were envisioned, as well as electronic medical evidence. Work is still underway to both define and achieve an electronic claims environment. Providing electronic services on the Internet is now a factor to incorporate in future plans.
- Simplified disability decisional methodology: The Agency used results from early research to modify its approach to changing the disability evaluation process. Instead of a radical change, as envisioned by the disability redesign plan, the current focus is on updating and revising the medical impairment listings to reflect the latest developments in medical and disability evaluation. Process unification has taken on greater significance and is requiring more time to process a case than originally expected.
- Return to Work Initiatives: The Agency has developed a number of new initiatives to encourage disability beneficiaries to return to the workforce, including the “Ticket to Work” program. Other initiatives involve—expanding the availability of employment and rehabilitation services, creating a model service delivery system, and helping youth with disabilities enter the workforce.
- New Agency positions: Structural and operational changes within field office and/or DDS environments must be factored into any decisions made relative to the disability program. Since release of the redesign plan, two new Agency positions have been established. The new positions are:
  - Employment Support Representative (ESR) as a field office expert for work incentive issues; and
  - Technical Expert (TE) as a focal point for ensuring high quality case processing and the point person for handling the most complex claims through adjudication.
- Changes in Legislation or Regulations: Some of the most sweeping regulations expected to impact the Agency relate to the Health Insurance Portability and Accountability Act (HIPAA). These regulations relate to the transmission and protection of individual’s medical information and will pose significant implications and challenges for the Agency.
- Disability process changes already underway: Currently, about 25% of the national disability claims workload is processed in DDS prototype locations; and, plans are underway for a phased rollout beginning in fiscal year 2003.

Additionally, the Agency continues to gain experience based on implementation of the Hearing Process Improvement Plan (HPI). Significant progress is needed to reach target goals for improvements expected through HPI implementation.

- (2010) Service Vision: SSA released the (2010) Service Vision as an approach to meet the dramatic demographic, human resource, and technology challenges facing the Agency in the coming decade. One of the service principles of the Vision is that customers complete their transactions at the first point of contact, eliminating hand-offs and more fully utilizing human resources through enabling technology.

All of these developments must be considered as decisions are made about the potential of the DCM.

## IV. Test Impacts and Issues:

The chart below provides a summary of impacts and issues, which must be considered in looking at environmental factors impacting the DCM process.

<i>Element</i>	<i>DCM Test</i>	<i>Current Process</i>	<i>Impact</i>
<b>Training</b>	<p>DCMs with medical experience (e.g., SDCMs) received a total of 15 weeks of training:</p> <ul style="list-style-type: none"> <li>- 4 weeks of T2 training plus 2 weeks OJT in a FO.</li> <li>- 6 weeks of T16 training, via IVT, plus 3 weeks OJT in a FO.</li> </ul> <p>Coaches with Title 2 and Title 16 expertise from FOs were assigned to assist state DCMs located in DDS sites for Phase 1.</p> <p>DCMs with programmatic experience (e.g., FDCMs) received a total of 30 weeks of training:</p> <ul style="list-style-type: none"> <li>- 8 weeks of traditional classroom medical training.</li> <li>- 5 ½ months of OJT in a DDS.</li> <li>- Additional cross-Title training was provided as needed.</li> </ul> <p>Coaches from the DDS were designated to assist the FDCMs while they were in the DDS and continued to be available to them as needed for Phase 1<sup>19</sup>.</p>	<p>New CRs are given 14 weeks of T2 training and 15 weeks of T16 training via IVT to become generalist CRs. Many CRs specialize in only T2 or T16 and only receive that portion of the training. Currently, CR trainees report to their permanent duty station and are generally assigned an on-site mentor to provide assistance on an as-needed basis.</p> <p>New DEs receive approximately 8 weeks of classroom training provided in the DDS. This is followed by a structured mentoring period on-site in the DDS. There are state to state variations in the content and length of training for DEs.</p>	<p>The CR T2 and T16 training packages were modified to focus mainly on initial disability claims related topics for the DCMs. Since T16 childhood claims weren't included in the DCM test, DCMs didn't receive the related programmatic or medical training. This reduced the length of both programmatic and medical training for DCMs. To train an incumbent CR or DE to be a DCM would take about 18 weeks of training followed by a period of mentoring while learning the job.</p> <p>Providing coaches (or mentors) for DCMs was a challenge. Since coaches had to travel to DCM sites from remote locations or DCMs trainees had to work in other locations where the coaches were, it was more complex to provide coaches for DCM trainees than mentors for CRs and/or DEs in the current process.</p>
<b>Systems Functionality</b>	<p>Establishing connectivity between DCM sites and DDS computer systems required special configurations. Once operational, minimal systems-related issues were reported, outside of</p>	<p>Cases going through the current process would not have experienced these connectivity-related problems.</p>	<p>There was negligible impact on productivity and/or processing time data related to systems functionality. Expansion of the DCM process could impact systems resources for connectivity.</p>

<sup>19</sup> The Training Review Group (TRG) published a report in December 1998, which provides some recommendations for refinements to the DCM training and coaching process.

<i>Element</i>	<i>DCM Test</i>	<i>Current Process</i>	<i>Impact</i>
	the norm.		
<b>Medical Consultant Access</b>	<p>MC accessibility was provided in various ways based on the process and resources of the parent DDS. Less than ¼ of DCM sites had on-site MC access every day. Other DCM sites provided access via:</p> <ul style="list-style-type: none"> <li>• Intermittent MC visits to the sites;</li> <li>• DCM visits to the MC;</li> <li>• Phone access; or</li> <li>• Written correspondence.</li> </ul>	There are state variances in the procedures for interacting with MC resources. These vary from written correspondence to MC appointments. Some MC support is available every day.	The differences in access to MC resources caused delays in some DCM sites. In about half of the sites there were differences between how the DCM and DE accessed MC support. Despite differences in access, processing time was faster.
<b>Workload Intake</b>	DCM sites had controlled intake of work and the ability to reduce intake if workloads were perceived to be unmanageable, thus creating an artificial workload environment.	The current process has minimal ability to limit the volume of incoming claims. Additionally, due to funding constraints imposed upon the DDS community nationally, states were forced to backlog a high volume of initial cases for FY' 2000 & 2001.	The DCM sites did not experience the same workload pressures as in the current process. Also, there is a potential impact on control case processing time due to the funding constraints imposed upon the DDSs.
<b>Case Movement</b>	For sites where MC access was not available on-site, cases had to be transported to the MC for consultation and /or clearance. Cases that required mailing added 1 to 4 days time. To circumvent US Postal mailing time, some site used the services of a special courier.	In the current process there is no external movement for MC sign-off. There is case mailing between field office and DDS locations; however, special couriers are not utilized.	<p>Delays caused by case mailing were not measured.</p> <p>The Agency is moving to an electronic environment, which could reduce or eliminate such delays.</p>
<b>Intake to the DDS Case Control System</b>	<p>About half of the DCM sites had the capability to directly input receipt of cases onto the DDS system.</p> <p>Other DCM sites routed case data through DDS intake units for input to the system, which delayed the initiation of medical record requests.</p>	In the current process, the DDS receipts the case into its case control system prior to routing the case to an examiner.	About a third of the DCM sites estimated some delay in initiating medical evidence requests because of the need to route the file for receipt into the case control system. While there was no time study for these activities, anecdotally, the delays ranged from 1 to 3 days.
<b>RFC Preparation</b>	<u>Physical RFCs</u> : Over half of the DCM sites reported that they prepared RFCs	Individual DDS policies regarding RFC preparation by DEs varied from state	Preparation of both mental and physical RFC forms varied, similar to the

<i>Element</i>	<i>DCM Test</i>	<i>Current Process</i>	<i>Impact</i>
	on most/all cases, and only one site reported preparing no physical RFCs. <u>Mental RFCs/PRTFs:</u> About 1/3 of the DCM sites reported that they prepared all mental RFCs/PRTFs. There was a mix of sites that either prepared some or no mental RFCs/PRTFs.	to state. The DCM sites generally mirrored their respective parent DDS's approach to preparing both physical and mental RFCs.	current process. (no net impact)
<b>Trigger of Title II/Title XVI Claims (for State DCMs)</b>	Due to the existing legal constraints, FO adjudicators needed to "trigger" claims completed by SDCMs. This was typically done remotely. The "triggering" process added negligible task time to each case. The delay caused from case movement was estimated at 2-5 days based upon anecdotal information.	There is no triggering issue.	Triggering claims was a cumbersome hand-off for the state DCMs, particularly when there was no on-site access to a federal adjudicator. Triggering time was not considered in test process calculations due to the negligible amount of task time added to each case. The impact is isolated to state sites. The delay caused from case movement was estimated at 2-5 days based upon anecdotal information. Legislative changes would be needed to eliminate this hand-off.
<b>Clerical/ Claims Support</b>	Claims Support Specialists (CSSs) were not evenly assigned.	Clerical support is different in the current process than the DCM. Where clerical support exists, it is based on other staffing, workload and resource considerations.	CSS time was factored into the DCM formula to compare DCM productivity & cost to the current process. There was no measure to determine specific support the CSSs provided. This support varied from site to site.
<b>Site Management</b>	The role and technical skills of each DCM Site Coordinator (SC) varied between sites. Some were devoted to the DCM unit full-time, while others spent only a fraction of their time on DCM related activities.	Each FO & DDS has a certain number of full-time managers and supervisors assigned based on the number of employees in any given location. Management is factored into the overhead equation to assess productivity in the current process.	DCM site coordinators were factored into the productivity calculation, based on the percent of time devoted to DCM units. The supervisory staff ratio for DCMs at 1:10.5 was higher than the field ratio.
<b>Employee Status</b>	Over half of the FDCMs were in long-term travel status away from home during the testing	Under normal circumstances, employees in FOs and DDSs are assigned to positions in	Attrition calculations differ between DDS DEs and FO CRs. DCM staff was very stable for the first

<i>Element</i>	<i>DCM Test</i>	<i>Current Process</i>	<i>Impact</i>
	timeframe. Anecdotal reports indicated that the temporary nature of the DCM test contributed to the overall attrition rate.	permanent duty stations.	9 months of the test experiencing 1.2 % attrition through May and 4.7 % through June. Overall FDCM attrition was about 18% (as compared to CR attrition at 7 ½%); and overall SDCM attrition was about 19% (as compared to DE attrition at 16 ½%).
<b>Federal/ State Parameters</b>	Participating states agreed to provide temporary authority for FDCMs to make medical determinations (with co-signature and review by an MC).	Legislation provides federal employees with the authority to make the non-medical determination on disability cases as well as to take final action on adjudicating the case. Legislation also provides States with the authority to make medical determinations on disability cases.  SSA Regulations provide the latitude to move the state jurisdiction back to SSA in certain situations, including those situations where there is voluntary agreement.	To continue or expand the DCM process would require state agreement for FDCMs and federal support to trigger cases developed by SDCMs.
<b>Federal/ State Pay Disparity</b>	Federal employees were temporarily assigned to the DCM position and most received promotions. There were variances in personnel classifications for SDCMs and a much smaller percentage received temporary pay increases.	There are significant salary disparities from State to State, as well as between federal and state jobs.	Significant pay disparities already are in existence between federal and most state employees. With the addition of FDCM and CSS promotions, pay differences are even greater. Having both federal and state employees perform the same job exacerbates the issue.

## V. General Conclusions:

- There was a mix of outcomes from the DCM test. Although the DCM process showed improvement in a number of areas; overall test results do not make a compelling business case for continuing DCM efforts or for making resource commitments to implement the process.
- Case processing costs for both salary and medical evidence were substantially higher for the DCM process.
- Training and infrastructure changes needed to support additional testing and/or rollout would add further to the costs. The combination of costs would further strain Agency resources.
- The long-standing legislative and regulatory structure of the federal/state relationship would require redefinition to accommodate the DCM process.
- Pursuing further testing of the DCM within our current paper claims environment would not provide additional data to help determine if or how DCM attributes could fit into an automated, paperless process.
- There were valuable insights and lessons learned from the DCM test experience that can be used as a resource, as more detailed planning is undertaken for the (2010) Service Vision.

*Cross-training* employees to specialize in both state/federal functions is a viable concept, however, it requires a significant investment of resources (both in dollar and human capital).

*Combining FO/DDS functions* emphasizes the need for a unified *measurement system* to capture workload receipts, pending and clearances.

*Knowledge sharing* between federal and state DCM staff increased awareness & appreciation levels for their respective functions. Federal DCMs relayed that their training and test experience underscored the need for *improving* the content of the medical *data collection form* (3368) and they expressed a strong interest in sharing this knowledge with their co-workers in field offices.

*Sharing state/federal resources* helped identify training needs, improved communication and moved the Agency closer to the “One SSA” concept.

Knowledge and experience gained as a result of the DCM pilot can help in our continuing efforts to improve customer service. Applying such insights, however, must take place within the context of the Agency’s long range Service Vision and in alignment with other initiatives. Clearly there are aspects of the DCM initiative that support the Vision (e.g.,

providing customers with a single point of contact). A number of other key Agency initiatives may also contribute to the Vision, but none of these initiatives can be considered in isolation. DCM experience, along with other national, regional, state and local initiatives, could collectively help shape the future path of the Agency as we seek to broaden our case processing options.

## **Appendix II-1: Random Lead Process for the DCM and Control Groups**

### **Scheduling Appointments**

The DCM workload was restricted to adult disability claims, so a basis for comparison to a control population of the same type of claims was required. Further, Lewin recommended that the lead selection process be randomized, and that lead selection be limited to the same demographic sources for lead cases and control cases.

To obtain a consistent mix of leads for all DCM sites and control groups, the national teleservice center (TSC) system was utilized to assign leads. Leads were scheduled and randomly assigned by TSR or FO personnel to ensure comparability of cases assigned to the DCM and control sites. To ensure random assignment of leads further required that no FO or DCM site screen the leads prior to their being scheduled for the DCMs and the control groups.

To achieve a random assignment of leads, the leads were scheduled by TSRs or FO staff into pre-identified appointment slots using one of the methods described below. Once they are scheduled, DCM leads can be screened to ensure that the lead is appropriate for DCM processing. Leads not in the test universe were referred to the SC for appropriate action.

### **Random Assignment Protocol**

Based on the number of leads needed to support the DCM sites and their respective control groups, the participating Area Director selected specific field offices (FO) as the source of leads for the test and control cases. These could be limited to certain FOs, certain districts, or selected from throughout the state. The number of leads from a given office could be adjusted during the life of the test so long as it was done proportionately for both the DCM and control group. In most sites, the lead and control sources remained constant throughout the test.

Control group leads were pulled from the same offices in the same proportions as the DCM leads. Any changes to the areas served by the DCM required the same changes to the control group. The control group leads were normally pulled the same day as the DCM leads, but always within the same week.

There were four acceptable mechanisms for assuring the randomness of the DCM leads and the control cases:

1. A field office designated as a DCM lead source could change their appointment calendars to provide leads at one-minute intervals for the DCM site and control group. For example, the office might set up appointments at 10:01 for an SDCM lead, 10:02 for an FDCM lead, and 10:03 for a control lead.
2. The office could assign DCM leads using terminal digits from the applicant's SSN. The field offices involved transferred the subject leads to the FDCM or SDCM site, and reported the control SSNs to the appropriate Site Coordinators.

3. The office could use specific time slots on the appointment calendars that are designated for the DCM sites and control groups. For example, 10:00 may be an FDCM, 11:00 an SDCM, and 12:00 a control. FO personnel and DCM sites knew which lead on the FO calendar at a specific time belonged to whom.
4. The FO could update their appointment screen remarks to instruct anyone scheduling an appointment for an adult disability claim in the office to schedule the appointment directly onto the DCM calendar.

Only one of the four methods described could be used to assign leads. Any of these methods assured random leads.

## Appendix II-2: Verification that leads were random:

To verify that the leads were selected randomly, the seventh digit of the lead SSN was checked for distribution in the DCM and control groups. The distribution was found to be random.

A comparison of the age of applicants who filed for disability was made between the DCM and control groups to ensure that the claims resulting from leads were random. The comparison was found to be random.

## Appendix IV: Productivity and Cost Technical Notes

### Productivity and Cost Background

The current process for handling disability claims consists of two distinct parts—a FO process and a DDS process.

- **The FO measure (WUPWY):**

- Takes work credits (time devoted to a specific workload item based on national sampling);
- Multiplied by the volume of workload clearances; and
- Divided by the volume of work years used.
- Overhead is considered in both the work-credit and work year numbers.

- **The DDS measure (PPWY)**

- Converts work hours into work years; and
- Divides this number into the volume of medical case clearances to determine a production volume per work year.
- Overhead is factored into the work year calculation.

DPRT staff revised the current FO and DDS productivity formulas to allow for a comparison of the DCM to both the field office (WUPWY) and DDS (PPWY) measurement systems.

### Methodology

As mentioned, productivity was determined using modified PPWY and WUPWY calculations. Since the DCM combines the DDS and FO processes, adjustments were needed under both approaches to account for differences in the DCM. The field office measure (WUPWY) was adjusted to incorporate work credits for DCM medical case processing; and, the DDS measure (PPWY) was adjusted to include programmatic (non-medical) aspects of the case.

### Staffing:

- Trainees added in Phase 1: Thirteen federal DCM back-fills were selected during Phase 1, resulting in a mix of journeyman and trainee positions working side-by-side in the new process. Eight of the DCM back-fills completed classroom training before the start of Phase 2, four completed training shortly thereafter, and one completed training late in phase 2. Because of the long learning curve (estimated at over one year), the addition of DCM “trainees” added a complexity in evaluating productivity. These backfills were counted in two ways.
  - 1) During Phase 2 Operation: Progress reports released periodically as a site management tool recognized the “trainee” status of the back fills, and **excluded** trainee time from site parity calculations. These calculations were

used to help determine the volume of application leads each site needed to schedule in order to achieve “parity” with the current process.

- 2) For the DCM evaluation: Calculations in the evaluation section **include** trainee time to better reflect how trainees are considered in the current claims environment. The DCM new-hire rate (7.42%) was lower than both the current process claims representative (9.22%) and disability examiner (11.68%) new-hire rates.
- Incorporating CSS positions: The addition of the CSS position also increased the complexity of productivity calculations. CSSs provided support for work done by the DCMs and processed other related work, such as auxiliary claims. CSS support to DCM sites were based upon a 1:2 ratio in calculating productivity. If the DCM site had a less than 1:2 CSS ratio the actual ratio was used, if great than 1:2 a maximum of 1:2 ratio was used. CSS time above this ratio was not spent on DCM support activities. There was no standardized use of CSS support and work specifically attributable to the CSS could not be identified
  - Staffing Model Calculations: As noted, two staffing models were developed to look at the impact of DCM back-fills and long term leave used during the test. The first model, “Phase 2 Operation Model”, was developed to serve as a management tool to estimate the volume of intake and clearances a site needed to approximate parity with the current process. The second model, the “Evaluation Model”, was developed to reflect an approach that is more reflective of how staff is counted in the current claims processing environment.
- 1) **“Phase 2 Operation Model”**: This model helped sites monitor their performance and determined the targeted volume of leads that would be expected to result in a workload volume reasonably comparable to the current process. The following guidelines were used to determine staffing that was counted for productivity estimation purposes:
    - Staff on duty included any DCM, SC, CSS, or other clerical staff assigned to a DCM test site. Part-time hours were shown as a fraction of full-time. For example, a person working 32 hours per week in a 40 hour per week site was shown as .8. CSS staff time was determined on a 1:2, CSS to DCM, ratio. (CSS time above this ratio was spent on production unrelated to the DCM. This time and work produced was not credited to the DCM process).
    - Back-fills (13 DCMs and 4 CSSs) were not counted in staff on duty for productivity calculations until they completed their training and learning curve (DCMs were assumed to have a 12-month learning curve).

- Total staff hours considered weeks in the month, times hours in a workweek,<sup>1</sup> times staff on duty.
  - Overhead hours were included in the productivity calculation (referred to as plowback), and therefore were not deducted from staff hours. This included hours spent on normal leave usage, training, meetings, etc.
  - Employees were removed from staffing if they were absent for four consecutive weeks or more (i.e. a long-term illness), or for the percentage of time they expended on other duties to which they were assigned (i.e. union negotiations, outside training classes, etc.). This block of time totaled 5,184 hours (<1% of total staff hours used) and was excluded under this model.
- 2) **Evaluation Model:** The “Evaluation Model” is the same as the “Phase 2 Operation Model”, except trainees were counted as staff on duty for the productivity calculation with their entry-on-duty date. Also, employees are not excluded for absences related to leave or other duties. The staffing mix used in the Evaluation Model more closely reflects a mix of trainees to journeyman staff, as compared to the field office and DDS staff-mix at the national level. In FY 2000, DDS’s experienced an examiner trainee rate of about 6.8%. CRs in field offices experience about a 9% rate of new hires. The DCM trainee ratio was 6.4%. This model provides a better comparison to the current process.

#### STAFFING TOTALS PER STAFFING MODEL

<sup>1</sup> This was usually 40 hours, but three sites had a workweek of less than 40 hours.

**Attrition:** The DCM experienced a 1.2 percent attrition rate through the first 7 months of the Phase 2 evaluation period. From June through August the attrition rate was about 3.2%. September through November attrition increased to 13.9%. The overall DCM attrition rate of about 17% was significantly greater than the current process claims representative and disability examiner combined attrition rate of 10.1% (attrition in the 15 states involved in the test). However, about 2/3 of DCM attrition occurred late in the test period and may have been influenced by the impending end of the test.

	Nov-00	23.5	66.5	90.0	5.5	38.3

This chart shows the average staffing on duty during the months of Phase 2. SC time translated into 24 positions; and, other jobs in the test accounted for 231 positions. These figures support a supervisory ratio in the DCM process of about 1:10 ½.

<sup>2</sup> The staffing counts in these charts do not take into consideration the actual staffing charged to certain sites where a percentage allocation was made (SDCMs in Michigan were actually involved in DCM 70% of the time). This adjustment was made when calculating productivity.

Staff hours to use in the productivity and cost calculations were determined by multiplying weekly staff counts under each model by the hours of work per site. Hours were totaled over the 56-week test duration to determine total staff hours. Staff hours were used in both the PPWY and WUPWY calculations to determine productivity.

STAFFING	Phase 2 Operation Model	Evaluation Model
TOTAL HOURS USED	528,473.3	567,313.5

The *Evaluation Model* resulted in 7.3% more staff time charged to the DCM project as compared to the *Phase 2 Operation Model*.

### Productivity: WUPWY and PPWY Calculations

The following chart summarizes DCM productivity results for both the WUPWY (FO) and PPWY (DDS) calculations:

## WUPWY

### 1. Calculations:

- WUPWY productivity was determined by multiplying the number of clearances in each DOWR workload category by the respective DOWR/DOWS national work-credit time.
- Work credits were also given for the number of medical decisions by DCM sites.
- These work credits (divided by 60 to convert to work credit per hour) were divided by total staff time used (in hours) to determine the productivity percentage. This number was compared to the national productivity (at 100%) as a comparison to the current process.
- This productivity calculation considers total work produced by DCM staff (i.e. CSS and SC time), not just the volume of claims.

### 2. Sources of data:

- DOWR/DOWS data was used for the volume of clearances. Clearances of all field office workload items, captured by the DOWR and cleared by DCM units,

were credited. For DOWR purposes, concurrent claims counted as a Title II and a Title XVI clearance.

Workload credits (time values for workload clearances) were also taken from the DOWR/DOWS. Calculations incorporated overhead (plowback) time<sup>3</sup> and are computed in minutes.

- NDDSS data was used for volume counts of medical clearances. Concurrent claims counted as one medical decision.
- DPRT Database data was used to determine DCM staff hours.
- Cost Effective Management System (CEMS) and an OWA baseline study data were used to determine adjustments needed to reflect the amount of DDS support for medical decisions. Adjustments were:
  - Minutes<sup>4</sup> subtracted from national task times to compensate for support provided by the DDS in MC time, CE scheduling, and QA reviews.
  - Minutes added to DCM clearances in Prototype sites to recognize the additional time required for claimant conferences and rationale development.

### **3. Clearance Credits for Medical Decisions**

Medical decision clearances are unique to DDS processing and are not captured as part of the field office (WUPWY) calculation. Since the DCMs make medical determinations, time calculations were built to reflect these medical clearances. The chart below reflects a summary of time calculations developed to account for medical clearances.

<b>DCM MEDICAL CASE CREDITS</b>		
<b>SITE TYPE</b>	<b>DECISION TYPE</b>	<b>MINUTES CREDITED</b>
<b>DCM</b>	<b>All Cases</b>	<b>347.2</b>
<b>DCM/Prototype</b>	<b>Allowances</b>	<b>422.2</b>
<b>DCM/Prototype</b>	<b>Medical Denials</b>	<b>457.2</b>
<b>DCM/Prototype</b>	<b>No Decision<sup>5</sup></b>	<b>347.2</b>

<sup>3</sup> "Plowback" time adds the indirect costs (such as leave, training, management, and etc.) back into the calculation as overhead

<sup>4</sup> These adjustments to the task times were based on 3/99 (2-quarter) CEMS data for the DDS adjustments and on the budget assumptions for prototype adjustments.

<sup>5</sup> "No Decision" cases are those cases on the NDDSS that were returned to the initiating office by the DDS without a medical decision. If the file is not returned to the DDS for additional action within 45 days, the NDDSS counts this as a cleared "No Decision" case.

Charts below provide more detail as to how the summary calculations were built.

Computation of Medical Decision Work Credit in Current Process		
Item	Credit	Source
Title II Medical Decisions	502.25	9/99 SAOR (Plowback) <sup>6</sup>
Title XVI Medical Decisions	326.53	9/99 SAOR (Plowback)
Concurrent Medical Decisions	371.33	9/99 SAOR (Plowback)
Average for All Decisions	411.6	DPRT Calculation(weighted)
Average time was used for DCM credit to correct for variations in SAWS data		

Adjustments Made to DCM Cases to Account for DDS Direct Support			
DDS Support Items	Time	Plus/Minus	Source
Medical Consultant Time	34.8	Minus	3/99 CEMS <sup>7</sup>
Quality Assurance Time	14.0	Minus	3/99 CEMS
Consultative Examination Sched.	15.6	Minus	OWA Baseline Study
Total Adjustment <sup>8</sup>	64.4	Minus	

DCM Medical Decision Case Credit for Non-prototype States		
Calculated Base Credit	DDS Adjustment	DCM Credit
411.6	(64.4)	347.2

Adjustments for DCM Prototype Cases				
Item	Time	+/-	Source	Applies to
Rationale	75	Plus	Prototype	Allowances and Medical Denials
Claimant Conference	35	Plus	Prototype	Medical Denials
DCM Medical Decision Case Credit for Prototype Cases				
	Nation	No Decision	Allowances	Medical Denials
Adjustments		Basic DCM Credit (Nation less DCM Adj.)	Basic DCM Credit Plus Rationale	Basic DCM Credit Plus Rationale and Claimant Conference
Work Credit	411.6	347.2	422.2	457.2

DCM medical clearances in Prototype sites are given a different time credit than those cleared in a non-prototype site because of the differences in development time (i.e. time for claimant conference and enhanced rationale). The appropriate multiplier was applied

<sup>6</sup> Derived from the most recent SAOR data available

<sup>7</sup> Derived from the most recent Cost Effectiveness Management System (CEMS) data available.

<sup>8</sup> DPRT considered an adjustment for the time involved in triggering cases for SDCMs and other support activities provided by DDSs. Due to the limited number of sites this involved, the varied practices, the insignificant amount of time per case, and the inability to quantify these activities, no further adjustments were made.

to the volume of decisions to determine total credit under WUPWY for the DCM medical workload.

The following table shows the work units credited to the DCM for medical decisions made during the evaluation period.

<b>Work Credits For Medical Clearances From NDDSS Counts</b>			
<b>Item</b>	<b>Item Credit</b>	<b>Item Count</b>	<b>Work Credits (Minutes)</b>
Prototype Allowances	422.2	2543	1073655
Prototype Medical Denials	457.2	4110	1879092
Prototype No Medical Decision	347.2	230	79856
Non-Prototype (All Cases)	347.2	36628	12717242
Total		43511	15749844

#### **4. Other Workload Counts**

The DOWR/DOWS field measure system records were used to determine the volume of workload clearances for each category along with the corresponding time credits.

<b>DEFINITION OF DOWR/DOWS ITEMS</b>			
<b>Item</b>	<b>Definition</b>	<b>Credit</b>	<b>Count</b>
1	Retirement Claims	140.5	150
2	RSI Nondisabled Dependent Claims	73.7	204
4	Disability Insurance Claims	207.0	36227
5	DI Nondisabled Dependent Claims	93.3	2555
6	RSDI Representative Accountings	62.2	46
7	SSI Representative Accountings	32.6	35
8	SSI Aged Applications	160.5	65
10	SSI Blind/Disabled Applications	197.3	23485
11	SSI Redeterminations (Limited Issue)	30.1	18
12	SSI Continuing Disability Reviews	105.2	17
13	RSDI Earnings Enforcement	39.9	64
15	RSDI Change of Payee	61.1	77
16	RSDI Medical Continuing Disability Reviews	108.9	79
17	RSDI Work Continuing Disability Reviews	374.5	24
18	Health Insurance Workload	18.2	129
19	Supplementary Medical Insurance Workload	135.4	147
21	RSDHI Reconsiderations	51.6	29
23	Earnings Disagreements/Earnings Discrepancies	50.8	106
24	SSI Change of Payee	32.7	84
26	SSI Overpayment Decisions and Collections	26.8	114
27	RSDI Overpayment Decisions and Collections	70.7	320
28	SSI Redeterminations (Low and Middle Error Profile)	139.0	101

29	SSI Reconsiderations	60.3	5
30	SSI Redeterminations (High Error Profile)	139.0	52
31	RSDHI Class Actions	279.2	0
32	SSI Class Actions	225.9	8
36	RSDHI Hearings Requests	73.7	32
37	SSI Hearings and Appeals Requests	135.4	16
50	SSI Income and Resource Reports	12.2	661
51	SSI Status Changes	12.2	657
52	RSDHI School Program	51.1	39
53	Food Stamp Applications and Recertifications	21.3	23
54	Health Maintenance Organizations Disenrollments	34.0	169
57	RSDI Payments and Checks Cleared	78.9	151
59	Benefit Verification Services	3.6	3557
60	RSDHI Status Changes	6.6	3191
63	SSI Payments and Checks Cleared	50.1	259
64	DI Technical Denials	207.0	1848
65	SSI Aged Abbreviated Applications	160.5	18
66	SSI Blind and Disabled Abbreviated Applications	197.3	2273
79	Social Security Number Workload	12.2	1068

DCM clearances were multiplied by the credit (in minutes) to determine work credits for the DCM for their field office equivalent work.

## 5. WUPWY Calculations:

WORK CREDITS PRODUCED (IN MINUTES)			
Disability Claims	Medical Decisions	Non- Disability Work Produced	Total
12,963,580	15,749,844	500,546	29,213,970

- “Disability Claims” work credits were determined by adding the work credits produced in DOWR categories 4, 10, 64 and 66 (refer to the above *Definition of DOWR/DOWS Items* chart for the volume and item work credit for these DOWR categories).
- “Medical Decisions” work credits were determined by adding the work credits produced in non-prototype and prototype medical decisions. This is reflected in the above *Work Credits For Medical Clearances From NDDSS Counts* chart.
- “Non-Disability Work Produced” is the sum of all work credits earned in all categories other than the four “Disability Claims” categories.

Total work credits (29,213,970 minutes) were divided by 60 to determine work-hours earned (486,899.5). Work hours earned were then divided by the staff hours used

(567,313.5) to produce the work to determine the WUPWY percent (85.8%). Non-disability workload items cleared by DCM units (DCM/CSS) comprised less than 2% of total work cleared.

## PPWY

### 1) Calculations:

**PPWY:** The second productivity measurement method is the PPWY (based on the DDS workload measurement system). The measurement includes direct and indirect time plus overhead support. PPWY (initial disability claims processed per work year) is normally expressed as a production number, as shown on this chart. PPWY for the DCM was 170.31 as compared with PPWY in the current process of 158.04 (refer to the following *CAS Charts, Current Process, Total* sheet). The PPWY was determined by dividing the number of disability claims cleared<sup>9</sup> by DCMs during the test, by the volume of work years used. The following guidelines were used in this productivity calculation:

- DCM staff hours were divided by 2080 to determine total work years (272.65 work years).
- Work years used by the DCM sites to produce **non-disability** work items (4.01) were deducted from total work years to determine the volume of work years devoted to

<sup>9</sup> Disability claims cleared includes technical denials and decisions adopted from one title to another. Concurrent medical decisions are counted as two decisions, one for each title.

initial disability claims. (268.74 work years, DOWR/DOWS data was used to determine the volume and time spent on non-disability claims work)

- DCM work years were allocated to Title II and Title XVI based on the percentage of work years produced under each Title.
- DDS support to DCM sites was translated into work years (43.51) and proportioned between Titles II and XVI workloads.
- CAS Report (the SC-3) data was used to identify what SSA component overhead support considered for these workload items under the current process. Comparable overhead support was factored into the DCM.<sup>10</sup> (Total of 46.65 work years).
- CAS Report (C2-15A) data was used to determine appropriate regional support to allocate to the DCM. (15.91 work years)
- The total of direct (268.74) and support (106.07) work years was divided into DCM disability claims clearances to determine PPWY.

#### Monthly PPWY:

#### MONTHLY PPWY CALCULATION

Monthly PPWY is computed in the same manner as the Overall PPWY figure discussed above (example below). Monthly PPWY uses staffing and associated production figures for a given month to calculate the PPWY for that month.

<sup>10</sup> DPRT assumption was that SSA components would provide a similar level of support to a DCM case as in the current process. The CAS does not segregate workloads; therefore the comparison is not exact.

## 2) **Sources of data:**

- DPRT Database data was used for DCM staffing numbers.
- DOWR/DOWS data was used to determine non-disability workload items cleared, and corresponding unit times. Clearances, other than initial disability claims, were deducted from DCM work hours in the PPWY calculation.
  - DOWR/DOWS counts provided the volume of disability claims cleared. Concurrent claims counted as a Title II and Title XVI clearance.
  - NDDSS data provided the volume of medical decisions. Only initial disability claims were counted. Concurrent claims counted as one medical decision.
- CEMS data and results from the OWA baseline study were used to determine DDS support time:
  - Minutes<sup>11</sup> added to compensate for support provided by the DDS for MC time, CE scheduling, and QA reviews.
  - CAS reports (SC-3 SUM, C2-15A DET) and the State Agency Operations Report (SAOR) for FY 2000 were used to adjust for regional and other DDS staff support.

---

<sup>11</sup> Adjustments to task times were based on CEMS data for the DDS adjustments; and on budget assumptions for the prototype adjustments.

### 3) Sample Calculation of PPWY:

Hours per Work Year	DCM Staffing & Salaries			Total staffing data is from the weekly staffing reports database maintained by the DCM team.	
	Position	Staff	Hours		
	Site Coordinators	24.24			
	State DCMs	76.39			
	Federal DCMs	99.27			
	Other Staff	6.55			
	CSS	47.23			
					Total staff from staffing reports, based on 56 weeks of actual hours per week
	Total Staff	253.69	567,313.50		
					Hours used for work other than initial disability claims
Non-DIB Hours		8,342.46			
			Total Hours less Non-DIB hours, divided by 2080.		
DI Work Years		268.74			

Claims Cleared by DCMs	Category	Count
	DIB	38,075
	DI/BI	25,758

Program	FO Hours	DDS Hours	Total Hours	Percentage	Work Years
Title II	5.966	6.543	12.510	63.10%	169.57
Title XVI	5.784	5.029	10.814	36.90%	99.16

To properly credit the time required to process DCM cases, the work done in the DDS to support the DCM process must be added to the work years required to produce the DCM workload.	Minutes Allocated for Work Done by DDS Staff	Category	Decisions	64.4
		Title 2	20,485	1,319,243.0
		Title 16	9930	639,462.1
		Concurrent	13096	843,403.3
		Total	43511	2,802,108.4
We use 64.4 minutes per case for the DDS support.	DDS Time Allocated by Title	Category	Minutes	Work years
		Title II	1,740,944.64	13.95
		Title XVI	1,061,163.76	8.50

This chart, and the ones that follow, show PPWY calculations for the DCM staffing under the *Evaluation Model*. The same procedures were used to determine PPWY for the *Phase 2 Operation Model*.

- Staffing numbers were taken from the DPRT database. Total staff (253.69) represents the average staff on duty during the 56 week test period.
- Total staff hours (567,313.5) represent the total hours DCM staff worked during the test period.
- Non-Disability hours (8,342.46) represent the number of hours the DCM staff worked on non-disability workloads. The volume and time calculations were taken from the DOWR.
- Non-disability time was deducted from the total to determine the number of hours and workyears DCMs spent on initial disability claims (268.74).

- Claims cleared by DCMs were the number of DIB (Title II disability) and DI/BI (Title XVI disabled or blind) claims cleared by DCM sites, based on DOWR counts. DOWR categories 4,10, 64 and 66. (This includes technical denial cases.) (38,075 and 25,758)
- The CAS was used to allocate workyears to the respective Titles (63.1% for Title II and 36.9% for Title XVI)
- The proportion of hours was then applied to the DCM staffing “DI Work Years” to determine the apportioned workyears. ( 169.57 and 99.16)
- DDS support for the DCM was calculated by taking task times from the most recent CEMS data (64.4 minutes per decision) and multiplying by the number of medical decisions made by DCMs. This was apportioned to the respective titles and crediting half the work credit for concurrent medical decisions to each title, dividing the minutes by 60 to determine work hours, and then dividing by 2080 to determine workyears.

(For example,to determine Title II: (20,485 T II decisions + 50% of 13,096 concurrent decisions) times 64.4 minutes equals 1,740,944.64 minutes of work. Divided by 60 to determine hours and by 2080 to determine workyears. This totals 13.95 workyears of support attributable to Title II)

## **SOCIAL SECURITY**

Office of the Commissioner  
Office of Strategic Management

DATE: October 2001

TO: Larry Massanari  
Acting Commissioner of Social Security

Attached is the final evaluation report for the Disability Claim Manager (DCM) test. This cover memorandum contains summary results from the DCM process assessment along with my recommendations.

### **Background**

The DCM concept was included as part of the Agency's disability redesign plan released in September 1994. The position was a key feature of the plan, providing a focal point for the claimant through the initial-level claims process, with authority to develop and adjudicate both medical and programmatic aspects of the case.

The concept was envisioned as the last piece of the redesign process to be put into place, dependent on the development of support through technological improvements and a simplified decision methodology. Testing was undertaken to determine the feasibility of the position and potential impacts on customer and employee satisfaction, accuracy, processing time, allowance rates, productivity, and costs—while enablers continued under development.

In August 1996, SSA management, the American Federation of Government Employees (AFGE), and the Disability Determination Services (DDS) met and agreed upon a collaborative approach to launch the three-year DCM pilot. Both federal and state employees were selected to become DCMs and training began in November 1997. Formal evaluation of the process began in November 1999 and ran through November 2000. DCM sites continued operation through June 2001 to allow for a smooth transition to close test site operations.

### **Assessing Results**

Test results were mixed. DCMs were able to learn the scope of the job and there were positive outcomes in a number of areas including employee job satisfaction, customer service satisfaction for denied claimants, and processing time. Results also indicated that operating costs were higher as compared to the current process. Additionally, substantial resource investments were required for training and for building an infrastructure to support DCM case processing units.

Along with DCM test outcomes, other factors must be considered in formulating recommendations and/or making decisions. These include potential impacts of changing our current federal/state relationship. Agreements with participating states were necessary to permit testing the DCM process. Implementation of this process would require statutory and regulatory changes to authorize federal employees to make medical determinations (without obtaining state agreements) and to authorize state employees to effectuate federal benefit entitlements.

Additionally, to completely assess next steps for the DCM, changes that have occurred within SSA since the original test was launched must be considered. These include:

- Status of enablers: Expected technological support is still not available. Work is underway to both define and achieve an electronic disability claims process, which was considered an enabler of the DCM process. Achieving this support is still years away.

Research in the area of a simplified methodology has moved the Agency in another direction. Instead of a radical change, as envisioned in the original redesign plan, the focus is on updating and revising the medical listings to reflect the latest developments in medical science. Additionally, the Agency anticipates that these revisions will require major investments in adjudicator training to implement regulatory changes over the next several years.

- Agency focus: The President's Management Agenda and OMB's guidance have underscored the need for SSA to give priority focus to three specific areas: implementing the *Ticket to Work* program, updating disability medical listings, and implementing the prototype process. These areas will continue to receive priority attention and resources over the next several years.
- Release of SSA's Service Vision: In August 2000, SSA released a Service Vision as a longer-term planning tool for addressing future workload challenges as members of the baby boom generation reach their peak years of disability risk and then begin to retire; and, as customer service expectations change based in part, to rapidly changing technology. SSA is currently developing more specific details to describe the Service Vision and preparing analyses to integrate its concepts into the Agency's budget and planning processes. Technological enhancements are seen as primary enablers of the Vision and will require development time and substantial Agency investments.

Results of the DCM test must be weighed along with all of these factors; considered within the context of our current environment; and benchmarked against the goals and direction of the Agency's Service Vision.

## Recommendations

Although there are a number of positive outcomes in the DCM test, overall results do not show the level of significance to substantiate priority resource investments. Any further testing and/or rollout of the DCM would require major resource commitments in training, higher operational costs, and new infrastructures necessary to support the process. These added costs would more severely strain budgets as the Agency works to implement significant changes in the disability program over the next several years. Considering DCM test results and outcomes, start-up costs, the lack of enablers, and environmental factors, I recommend that the Agency:

- 1. Does not pursue additional testing or implementation of the DCM process at this time.*
- 2. Consider DCM test results and experiences in Agency planning for our Service Vision*
- 3. Share DCM results and experiences to enhance local and regional service improvement initiatives.*

The attached report provides a full assessment of DCM test outcomes along with environmental factors and impacts. The Agency has benefited from this testing effort and DCM experiences need to be utilized as a planning resource. I want to thank the DDSs who agreed to participate; I want to recognize regional, local and site management and all union officials who provided ongoing support; and I want to commend test participants who remained committed during a long, complex and uncertain undertaking. Collaboration has been critical to testing and I gratefully acknowledge everyone who supported this effort. Of special note, I want thank the DCM team staff, who worked tirelessly in the development, evaluation and coordination of all aspects of the DCM test over the last several years.

## SOCIAL SECURITY

Office of the Commissioner

October 19, 2001

Mr. Witold Skwierczynski, President  
AFGE Council 220  
P.O. Box 617576  
Chicago, IL 60661-7576

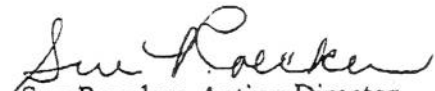

Dear Mr. Skwierczynski:

As stated in my letter to you dated August 15, 2001, I would provide you with a more specific response regarding AFGE comments on the *DCM Draft Evaluation Report*.

We have considered all of the union's comments. Based on your input as well as the suggestions made by other stakeholders, we have made a wide variety of modifications to the report. Major comment themes and how these themes were addressed are outlined in Appendix VII of the final report.

We have enclosed a copy of the *DCM Final Evaluation Report* and have sent an electronic copy to you via e-mail. If you have any questions regarding this matter you may contact Mr. Vince Sabatino on (410) 966-8331.

Sincerely,

  
Sue Roecker, Acting Director  
Office of Strategic Management

Enclosure

Al Siemek

## Executive Summary

### Background

The Disability Claim Manager (DCM) position was created as part of the Agency's overall disability process redesign plan as a potential means to improve the initial disability process. Under the DCM model a single individual:

- Acts as the key contact for claimants throughout the initial claims level;
- Explains their role as a primary point of contact, and advises claimants what they will be asked to do and what they may expect from SSA;
- Explains the disability process and programs requirements, including the definition of disability; and
- Assumes responsibility for processing both the medical and programmatic aspects of the initial disability claim.

The DCM model is a significant change from the current process where a SSA claims representative (CR) is responsible for the initial contact with claimants, collecting non-medical information and disability source information, while a DDS disability examiner (DE) has responsibility for collecting and evaluating medical evidence. The current process, as governed by the Social Security Act and underlying regulations, splits case processing and adjudication responsibilities.

The initial phase of the test (Phase 1) focused on training and acquiring on-the-job experience. The formal evaluation (Phase 2) began November 1, 1999 and ended November 24, 2000. The test involved six regions, 36 DCM site locations (20 federal, 13 state, and 3 combined federal/state sites). Phase 2 started with 193 DCMs (110 federal and 83 state). DCM workloads consisted only of initial adult disability claims, excluding Title XVI Childhood claims. A control group, consisting of the same type of claims, was identified for comparative purposes.

### DCM Test Results and Assessment Factors

The impact of DCM test results were assessed in nine areas including accuracy, processing time, allowance rates, productivity and cost, claimant satisfaction, employee job satisfaction, position support needs, and DCM in prototype. A summary of results is described below.

**Accuracy of Adjudication:** Overall performance accuracy for medical disability determinations was comparable between the DCM and control group, though DCM denial accuracy fell below the regulatory threshold. DCM non-medical case and dollar accuracy for Title II was comparable to the FY 2000 Index of Dollar Accuracy (IDA) review. DCM Title XVI non-medical case accuracy was significantly higher. Title XVI dollar accuracy was comparable.

**Processing Time:** Median processing time for DCM claims was about 10 days faster for Title II and 6 days faster for Title XVI. Factors that may have impacted processing time results in both the DCM and control groups include:

- DCM sites' ability to control the volume of appointments/claims;
- Insufficient resources received by the DDSs nationwide to process all their receipts during the test period;
- Movement of state DCM claims for triggering;
- Limited accessibility of medical consultant resources by DCM staff in some sites; and
- Overtime provided to process control cases in some sites, while overtime was not available to process DCM cases.

Data analysis could not provide the degree of impact any of these factors had on processing time.

**Allowance Rates:** The initial allowance rate for the DCM group (43.8%) was comparable to the control group (43.6%).

- 1) Claimants from the DCM group filed for reconsideration 2.2% less often than claimants in the control group. The allowance rate for reconsiderations for DCM cases was 1.7% higher. The cumulative allowance rate *through reconsideration* was comparable (47.4% for DCM and 47.1% for control).
- 2) Results to date show a higher volume of DCM claimants requested hearings; however, hearing data has not yet stabilized and no conclusions were drawn.

**Productivity and Cost Efficiency:** Assessments of cost and productivity were the most complex part of the evaluation. Because the Agency has no single measure to capture productivity and cost for blended federal and state functions, Agency measurement tools and assumptions were used to build unique productivity and cost models to roughly estimate DCM cost/productivity as compared to the current process. More precise productivity and cost calculations for the DCM model were not possible due to the difficulties inherent in the current split management information (MI) processes.

Productivity models in the evaluation include both a modified FO-based calculation and DDS-based calculation to estimate results. These two models were used as a means of comparing the DCM process to the current process at the national level (not compared to the control group).

**Productivity Results:** Estimated productivity of the DCM process derived from the calculation models reflected a range between 14 percent less to 8 percent more than the current process.

**Case Processing Costs:** Estimated DCM costs to process an initial claim were higher than the current process. Cost assessments were based on the models used

to determine productivity. Cost calculations were estimated within a range about 7-21% higher than the current process. To a large extent, DCM case processing costs are driven by the level of productivity; but are also impacted by higher salary and medical evidence costs.

- **Staff Salaries:** Staff selected for federal DCM and Claim Support Specialist (CSS) positions, as well as some state DCMs, received temporary promotions.
- **Medical Costs:** Based on case information collected through the DDS on both DCM and control group cases, quantifiable data showed that medical evidence costs were higher for DCM cases.

Higher salary and medical evidence costs support a conclusion that DCM case processing would be more costly, even if productivity were comparable.

**Additional Cost Considerations:** Cost comparisons between the DCM and the current process do not identify or consider start-up cost factors. Additional costs include: outlays associated with building an infrastructure to support the DCM process; federal and state cross-training; mentoring and coaching time; and loss of productivity during the training and learning curve. Ongoing costs to maintain the DCM infrastructure and technical skills would also be higher than the current process.

**Customer Service Satisfaction Results:** Denied claimants were more satisfied with the DCM process than claimants denied in the current process, as represented by the FY 2000 Agency survey of initial disability applicants. Customer satisfaction survey results were comparable overall for those claimants awarded benefits. Both awarded and denied claimants rated the DCM process higher in categories of helpfulness, courtesy, job knowledge and time spent with the claimant.

**Employee Job Satisfaction Results:** Employee job satisfaction was higher for both state and federal DCMs as compared to their former positions. Job satisfaction remained essentially the same when comparing survey results from Phase 1 to Phase 2.

**Support Staff Assistance:** The DCM, as envisioned in the redesign plan, was expected to be the final piece of the new process to be put into place. Enablers, including major support from technology, were expected to provide a foundation for the new position. The DCM process was tested in advance of any enablers to determine the feasibility of the position and potential impacts and benefits of the process. Because enablers were **not** available, the Claim Support Specialist (CSS) position was created to provide some of the support needed for the process. The contributions of CSS support to the DCM process could not be discreetly identified. Additionally, the use of the CSS positions varied from site to site. DCMs and site coordinators identified a greater need for clerical support than paraprofessional support (CSS).

**DCM in the Prototype Process:** There were 7 DCM sites in 3 states (AL, CO and MI) operating under Prototype guidelines. There were no marked differences between DCM and the control group outcomes for initial allowance rates, processing times, and pre-effectuation review (PER) accuracy. Results thus far show a higher volume of claimants from the DCM group requested hearings, although hearing data has not yet stabilized.

**Environmental Factors:** Environmental factors were considered as part of the overall evaluation of the DCM process. Critical factors include:

*Consideration of Federal and State Relationship:* Both federal and state employees were trained and utilized as DCMs. Agreements were needed from both the state DDSs and AFGE to conduct the test. Implementation of a DCM process, as tested, would require regulatory and statutory changes to permit federal employees to make medical determinations and to permit state employees to make non-medical eligibility determinations. Additionally, there are significant pay disparities between federal and state employees that were exacerbated in a test where federal and state employees performed the same job functions for differing rates of pay.

*Technological Enablers Still in Development:* Work is still underway to both define and achieve an electronic disability claims process that supports case processing for all SSA/DDS components. This is a long-term effort.

*Other Considerations:* Over the last several years SSA has made significant resource commitments to support a number of initiatives currently underway and has expanded its mission to help disabled beneficiaries return to work. An evaluation of the DCM process must be considered in the context of this changing environment, consistent with the goals and direction of the Agency. These considerations include prototype testing, updating the medical listings, and implementing the *Ticket to Work* program.

### **General Conclusions**

- There was a mix of outcomes from the DCM test. Although the DCM process showed improvement in a number of areas; overall test results do not make a compelling business case for continuing DCM testing efforts or for making resource commitments to implement the process.
- Case processing costs for both salary and medical evidence were substantially higher for the DCM process.
- Training and infrastructure changes needed to support additional testing and/or rollout would add further to the costs. The combination of costs would further strain Agency resources.

- The long-standing legislative and regulatory structure of the federal/state relationship would require redefinition to accommodate the DCM process.
- Pursuing further testing of the DCM within our current paper claims environment would not provide additional data to help determine if or how DCM attributes could fit into an automated, paperless process.
- There were valuable insights and lessons learned from the DCM test experience that can be used as a resource, as more detailed planning is undertaken for the (2010) Service Vision.

*Cross-training* employees to specialize in both state/federal functions is a viable concept, however, it requires a significant investment of resources (both in dollar and human capital).

*Combining FO/DDS functions* emphasizes the need for a unified *measurement system* to capture workload receipts, pending and clearances.

*Knowledge sharing* between federal and state DCM staff increased awareness & appreciation levels for their respective functions.

*Sharing state/federal resources* helped identify training needs, improved communication and moved the Agency closer to the "One SSA" concept.

Knowledge and experience gained as a result of the DCM pilot can help in our continuing efforts to improve customer service. Applying such insights, however, must take place within the context of the Agency's long range Service Vision and in alignment with other initiatives. Clearly there are aspects of the DCM initiative that support the Vision (e.g., providing customers with a single point of contact). A number of other key Agency initiatives may also contribute to the Vision, but none of these initiatives can be considered in isolation. DCM experience, along with other national, regional, state and local initiatives, could collectively help shape the future path of the Agency as we seek to broaden our case processing options.

## I. Disability Redesign Overview

SSA and State Disability Determination Services (DDSs) have continually worked to provide high-quality, responsive service to the public. Despite these efforts, in the early 90's disability workloads became the Agency's most challenging problem. Even with improvements in productivity by all components, SSA was having difficulty providing a satisfactory level of service to claimants for disability benefits. SSA needed a longer-term strategy for addressing service delivery problems in the disability claims process.

Throughout the 90's, agencies were called upon to establish customer service standards equal to the *best in business* to guide their operations. Federal agencies were encouraged to identify "the customers who are, or should be serviced by the agency," and survey these customers "to determine the kind and quality of services they want and their level of satisfaction with existing services". SSA looked at their disability customers, including those filing for Disability Insurance (DI) and/or Supplemental Security Income (SSI) disability benefits and potential filers for those benefits. Focus groups conducted throughout the country, representing a demographically diverse cross-section of customers indicated that they:

- Waited too long for a decision—this was the most common complaint; the claim process was a struggle characterized by stress, fear, and the anger associated with running out of funds;
- Did not understand the program or process—what happened to the claim after initial contact with SSA was unclear and applicants did not understand the decision rendered on their claim. Many believed the decision was reached arbitrarily; and
- Wanted more information and personal contact—many voiced a preference to deal with one person for all claim business, and an overarching desire was to receive accurate, consistent information from all SSA sources.

In response to these customer concerns, SSA formed a team to explore "reengineering" as a method for updating and streamlining the disability process. The team analyzed the current process, benchmarked with successful private and public organizations, and collected data and information from both external and internal disability customers. The team developed a "redesign" plan, which was a high-level description of how a new process would work. The plan, released in the fall of 1994, provided the framework for improving the disability claims process—from initial contact through final administrative appeal. The five primary objectives for the plan were:

- To be user friendly for claimants and those who assist them;
- To allow cases that should be allowed as early in the process as possible;
- To ensure that decisions are made and effectuated quickly;
- To ensure that the process is efficient; and
- To provide employees with a satisfying work environment.

## Current Process:

SSA's current disability claims process consists of an initial determination and up to three levels of administrative appeal if an individual is dissatisfied with the decision. The 1,300 Social Security field offices (FOs) located throughout the country generally take initial disability claims. Local FO staff request and evaluate information about the programmatic aspects of each person's claim, such as whether or not the individual has worked enough to be eligible for DI (Title II) benefits or whether the individual meets the income and resource limits for SSI (Title XVI) benefits. FO staff also obtains information about the claimant's impairments, including medical and vocational sources and information.

If the claimant fails to meet the non-medical eligibility criteria, the claim is denied and no decision is made regarding the claimant's impairments. Otherwise, the claimant's medical information is forwarded to the federally funded, but state-administered, DDS, in the State where the claimant lives. DDS staff obtains and reviews necessary medical and other evidence. An adjudicative team consisting of a disability examiner (DE) and a program physician (medical consultant) make the disability determination based on Social Security regulations. The claimant is notified of the medical decision and the file is returned to the FO for any necessary payment effectuation actions or folder retention, completing the initial application process.

An individual who is dissatisfied with the initial determination may request a reconsideration of the decision. If the decision at the reconsideration level remains unfavorable, a claimant may then request a hearing before a federal administrative law judge (ALJ), and, if still dissatisfied, the individual may request an Appeals Council review. Each level of review involves multi-step procedures for evidence collection, review, and decision making. If the Appeals Council affirms the denial, the applicant can begin a civil action in U.S. district court.

## Redesigned Disability Process:

SSA's redesign plan contained a series of improvements including:

*Process Streamlining:* SSA's current four-level administrative process is streamlined to two levels, eliminating both the reconsideration and request for Appeals Council review levels of appeal. Applicants who receive an initial claim denial (level one) have 60 days to request a hearing before an independent ALJ (level two).

*New position at the initial level to act as the claimant's primary point of contact:* A new position, the disability claim manager (DCM), was created as the key contact for claimant throughout the initial level, eliminating steps caused by numerous employees handling discrete parts of the claim. The DCM handles both disability and programmatic aspects of the claim, using the expertise of other staff as needed.

*Claimants better able to understand the program and are more involved in the process:*

Claimants are provided a more intensive explanation of the disability program and process, have additional opportunities to interact with the decision-maker, and can more fully participate in the process itself.

*Process unification:* The objective of overall process unification is to achieve similar results on similar cases at all stages of the process through consistent applications of laws, regulations and rulings.

*More effective utilization of the experience and expertise of staff:* Changes in the adjudicative process would free time for the most highly specialized staff (physicians and ALJs) to work on those cases and tasks that make the best use of their talents.

Since release of the redesign plan, SSA has tested a series of initiatives to determine the potential for customer service improvements. The Agency has moved to operationally test the most successful features from prior testing into larger state prototypes (process models), which are currently underway in 10 States. When complete information is available the Agency will be able to make decisions on the future of the prototype model. Plans call for national phased implementation of this process in fiscal year 2003. This model:

- Provides greater decisional authority to the DE and makes more effective use of the expertise of the medical consultant (MC) in the disability determination process. The DE has the authority to decide when and how to use MC support on some cases. The Statute continues to require sign-off by the DE/MC team on Title II/Title XVI less-than-favorable decisions in cases having an indication of a mental impairment, or involving Title XVI childhood disability. This process maximizes the effective use of agency resources, focusing state medical and psychological consultants on duties and responsibilities commensurate with their professional training and experiences.
- Enhances documentation and explanations of decisions in the case file.
- Affords claimants with an opportunity to speak with the disability decision-maker at the initial level, if evidence is insufficient to make a fully favorable determination.
- Eliminates the reconsideration step of the administrative review process and provides claimants, who are dissatisfied, the option of appealing directly to the ALJ at the hearing level.

While moving ahead with the prototype process SSA concurrently tested the DCM concept. Following is a brief background of the DCM process and test.

## II. Disability Claim Manager Test Background

### The DCM Test:

Under the DCM model, a single individual has responsibility for both the medical and non-medical aspects of the initial disability determination process. This model is a significant change from the current process, where a SSA claims representative (CR) is responsible for the initial contact with claimants, collecting non-medical eligibility information and medical source information while a DDS disability examiner (DE) assumes responsibility for collecting and evaluating the medical evidence. This bifurcated process splits case processing responsibilities and often results in confusion for claimants.

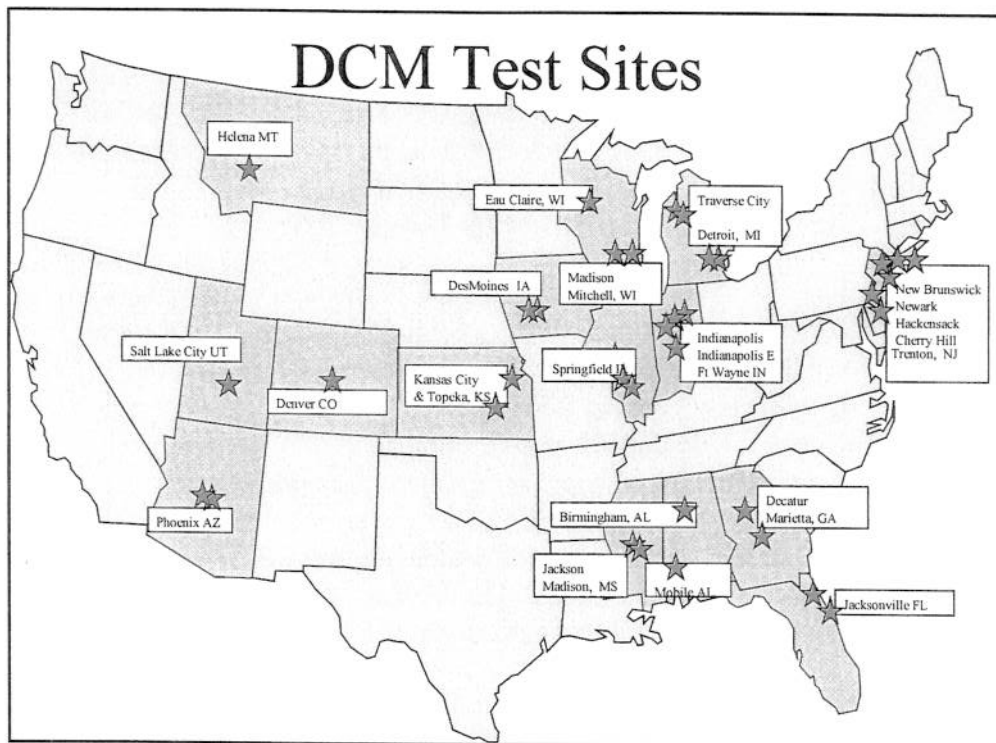

The DCM combines functions from both the CR and DE positions and provides claimants with a focal point throughout the initial disability process. The DCM explains the disability programs to the claimant, including the definition of disability and how SSA determines whether a person meets the requirements. The DCM also explains their role as primary point of contact, and conveys what the claimant will be asked to do and what the claimant may expect from SSA.

The position has been developed as one of the redesign initiatives under leadership of the Disability Process Redesign Team (DPRT). DPRT envisioned moving to the DCM through an incremental approach, in which employees would initially operate in a team environment and would perform some DCM functions as they developed additional skills and abilities. Additionally, support for the DCM process was expected through interrelated technological improvements, a simplified decision methodology, and a single set of standards for decision-making. These enablers were to provide a foundation upon which to build the DCM position.

Early in 1996 SSA accelerated the DCM pilot to determine the feasibility of the position, while continuing to develop expected enablers. The model was developed as a “proof of concept” test to determine whether a single individual could successfully perform the broad range of job functions. DPRT convened a workgroup to develop the position and make recommendations about procedures, personnel, training, and testing of the new position.

Mutual stakeholder agreement was needed in order to conduct the DCM test, since it combines federal (non-medical factors of entitlement) and state (medical entitlement) responsibilities. Stakeholder groups, comprised of representatives from SSA management, AFGE, and the DDS, met and agreed upon a collaborative approach to launch the DCM pilot.

Fifteen states agreed to participate in the test and SSA and AFGE agreed on 33 sites. For the test, 115 federal DCMs (FDCM) and 104 state DCMs (SDCM) were selected. The DCM units were primarily set up within FOs for the FDCMs and DDS locations for the SDCMs, although six sites combined federal and state employees. Subsequently, three of the six combined sites each separated into one federal and one state site, yielding the final total of 36 DCM sites. *(See Appendix I for more detailed information on the DCM sites.)*

***DCM Test Phases:*** The DCM concept was tested in two phases. Phase 1, which focused on training and the learning curve, began in November 1997 and ended in June 1999. Because the Phase 1 assessment supported the viability of the position, the project continued to Phase 2 for a formal evaluation of the overall concept. Phase 2 began November 1999 and ended in November 2000.

During the test, DCMs processed only initial, adult disability claims. Title XVI childhood disability claims and disability claims that required manual processing were excluded from DCM processing during Phase 1. Only childhood claims were excluded during Phase 2 because additional training would have been required for the DCMs, which would have delayed the start of Phase 2.

***DCM Training:*** Because the DCM position combines the technical knowledge of both a CR and a DE, there was a significant investment in up-front training. DCM training and the learning curve were achieved before the beginning of the Phase 2 evaluation.

*Programmatic Training for State DCMs:* The SDCMs received programmatic technical training based on the standard Office of Training claims representative training packages. The duration of training was 15 weeks, which included:

- 4 weeks classroom Title II training followed by 2 weeks of on-the-job (OJT) training; and
- 6 weeks Title XVI training followed by 3 weeks OJT.

*Medical Training for Federal DCMs:* The FDCM medical training was based on the standard Office of Training disability examiner package. Total training time was 30 weeks, which included:

- 8 weeks of medical classroom training;
- OJT in their State DDS for 5 ½ months; and
- Additional programmatic (crossover) training, as needed.

*Coaching:* Once the formal OJT was completed, the trainees reported to selected DCM sites where coaches were assigned to the trainees. Coaches reviewed DCM progress and provided case feedback and advanced training through Phase 1.

*Federal DCM Backfills:* Before the completion of Phase 1, thirteen FDCMs were selected to fill vacated positions. Eight of the “backfills” received training prior to the start of Phase 2, while the remaining five received training during the evaluation phase. All of the backfills received classroom training. FDCMs generally provided OJT for the backfills in the sites, although two states opted to provide trainees’ OJT in the DDS. Anecdotal information indicated this training was adequate, although coaching the backfills during Phase 2 may have impacted DCM productivity at the site level.

*Claim Support Position Added to the DCM Process:* The claim support specialist (CSS) position was created as paraprofessional support for the DCM process since testing began prior to the development of needed process enablers such as major support from enhancements in technology. The functions of the CSS included:

- Medical case processing support for the FDCMs and following up on medical information.
- Claims support for both federal and state DCMs.
  - handling appointment calendars;
  - processing auxiliary claims and representative payee applications;
  - resolving earnings discrepancies and SSN issues plus other support activities.

Seventy-five CSSs were selected for the test based on the expectation that a ratio of roughly 1:2 would be needed to provide the level of support needed by FDCMs. Fifteen of these CSS positions were originally expected to support FDCMs in Disability Processing Centers (DPCs). DCM sites were never established in DPCs, so the 15 CSSs were absorbed in other DCM sites. CSSs were also expected to provide varying levels of support to state DCM units, although for-the-most part CSSs were not co-located with SDCMs. Placement of CSSs was not done based on a DCM to CSS ratio per site, but

rather where there was workspace available. This resulted in an uneven distribution of CSSs. CSSs were not used in a consistent manner throughout the DCM sites. Additionally, the work produced by CSSs could not be isolated in MI reports. CSS time and work clearances were captured as part of the cost and productivity analysis in evaluating the DCM process. The CSSs supported work done by the DCMs and impacts of the CSS were assessed based on anecdotal information.

***Federal and State Relationship:*** Both federal and state employees were trained and utilized as DCMs. Agreements were needed from both federal and state leaders and AFGE to conduct the test and determine workflow and adjudication processes. These agreements were made only for conducting the test. The evaluation was not designed, nor intended, to provide data as a comparison of federal and state DCMs--results combine federal and state experience. Implementation of a DCM process, as tested, would require regulatory and statutory changes to permit federal employees to make medical determinations and to permit state employees to make non-medical eligibility determinations.

***Outside Contractor Support:*** SSA contracted with the Lewin Group to provide external, independent support in assessing the DCM test. SSA asked Lewin to provide advice and support to the DCM project manager regarding the design and adequacy of the test protocol, test procedures, creation of a database, and data collection processes. At the conclusion of Phase 1, Lewin made recommendations for improvements before beginning Phase 2 and, assisted DPRT with the analysis and assessment of the DCM learning curve and early test findings. Their Phase 1 report showed the DCM as a viable approach to processing claims, in the limited sense that certain key outcomes were within the ballpark of outcomes under the current process. Also, there was substantial anecdotal evidence that claimants were more satisfied with the DCM process than with the current process. Further, DCMs were more satisfied with their current work than in their previous positions (generally CR and DE). The Lewin Group concluded that the DCM had the potential to improve the process for both claimants and employees.

DPRT refined the DCM test before the start of Phase 2 testing to incorporate recommendations made by the Lewin Group and to better replicate the current process. DCM appointments (leads) were assigned randomly as in the current process, and leads included all initial **adult** disability cases. (The only exclusion continued to be SSI childhood disability claims.) For Phase 2, a control group was established to reflect a comparison of randomly assigned leads of the same type and from the same source as the DCM group.

## **Evaluation Methodology:**

**Evaluation Roles and Responsibilities:** Internal SSA components, DDSs, regional staff, local management, and the Lewin Group provided continuing support throughout the testing operation.

- ***Disability Process Redesign Team (DPRT):*** DPRT worked with the SSA components, state management and unions, federal management, and AFGE to design and

implement the Phase 2 evaluation plan. DPRT staff monitored test site operations and ensured that test and data collection procedures were followed throughout the course of Phase 2. As part of the monitoring function, DPRT staff provided regular feedback (progress reports) to the test sites and staff regarding their ongoing activities and assisted regional staff with resolution of issues where national procedures were involved. DPRT developed and maintained an analytical database and conducted activities associated with the process evaluation and was responsible for compiling the evaluation results into a draft report.

- Regional Implementation Coordinators (RICs): There was a RIC in each of the six regions participating in the DCM test. They provided the link between DPRT and the sites for communications and data collection. Additionally, RICs coordinated travel, training and site visits. They worked in partnership with AFGE regional and site representatives as well as DDS management in oversight activities and were instrumental to the evaluation effort.
- Site Coordinator (SCs): Each site was assigned a site coordinator who was responsible for establishing workflow and coordinating efforts with the area director's office to obtain DCM appointment leads. SCs also worked with the RICs and local union representatives on a routine basis and reported information not routinely collected in the claims process to support the evaluation.
- Office of Quality Assurance and Performance Assessment (OQA): OQA was responsible for reviewing and providing information on the accuracy of DCM and control group medical and non-medical decisions. OQA worked with DPRT to develop, implement, and analyze the findings from claimant surveys conducted for the DCM group of claims. Results from the DCM claimant survey were compared with customer satisfaction in the current disability process, as measured by the fiscal year 2000 Market Measurement Program (MMP) customer segment survey of initial disability (DI) applicants.
- Office of Workforce Analysis (OWA): OWA developed, implemented, and analyzed the findings from the employee and management surveys and provided valuable insights on the assessment of productivity and cost. OWA staff also participated in site visits conducted during Phase 2.
- Other SSA Components: Other components of SSA were involved in the design and implementation of the Phase 2 evaluation. Staff from Operations (DCO) and the Office of Disability (OD) assisted DPRT in coordinating activities with the regions and the DDSs, respectively. SSA's national 800 Number Teleservice Centers and FO staff participated in the random assignment of leads to test and control groups through the 800-number leads system. Staff from the Office of Information Management (OIM) was consulted regarding the sources, formats, and means for collecting data from SSA's administrative systems. Area directors in DCM states were instrumental in establishing sufficient numbers of DCM test and control group leads for Phase 2 and obtaining the participation of all impacted local FOs.

- *The Lewin Group, Inc.*: The Lewin Group provided design recommendations for the evaluation, which were delivered to SSA in January 2000. They reviewed and presented an assessment of the findings and interpretations of the Phase 2 evaluation report and remained available for consultation.

### Test and Control Group Samples:

Phase 2 was a blind test and employed a random assignment of appointments (leads) for both the test and control sample groups (DCM and current process sample groups). DCM leads were identified for DCM processing, while the control group leads were handled under the current process with no special identifiers. Randomness was accomplished by:

1. Utilizing SSA's national 800 number leads system;
2. Having the same type and source of leads for the test and control groups; and
3. Having teleservice representatives (TSRs) and/or FO staff schedule leads into pre-identified FO calendar appointment time-slots using one of several methods.

The methods of lead assignments used were:

- Pre-established times slots on the relevant FO calendars that were for the DCM and control groups only;
- Selected terminal digits for the DCM group and separate selected terminal digits for the control group;
- DCM appointment calendar. When a TSR pulled up the FO calendar to schedule an appointment, the remarks on the calendar directed them to schedule the appointment directly on the DCM calendar. Corresponding control cases were assigned by terminal digit. *(See Appendix II-1 & 2 for detailed information on the random lead process and verification.)*

The Lewin Group recommended using the lead as the starting point for data analysis. The Agency does not normally capture information from the point the lead is taken and there is no automated historical record of this data. For the evaluation of the DCM process, the claim (rather than the lead) was used as the basis for analysis for two reasons:

- Clientele actions: If the client's application process was started in either the DCM or control groups, the client could disrupt the test, unknowingly, by filing or returning their claim to an office which differed from the location identified on the appointment calendar. For example an appointment taken over the phone by a DCM is returned in person to a field office; and
- Manual reporting of leads: Lead reports were maintained by the DCM sites and were subject to human error. Discrepancies were identified in some of the site reports.

Client actions and discrepancies identified with manual reporting of leads made the use of any lead data analysis inaccurate.

**Data Collection:**

Data pertinent to the key issues of the test were collected and analyzed using standard SSA and DDS statistical data and terminology where possible. The specific types of data collected and their sources are covered in greater detail in the Key Issues and Appendices sections of the report. Data observations for the areas of processing time, accuracy (medical), and allowance rates were based on comparing the DCM claims to a specified volume of control claims.

Three of the fifteen States participating in the DCM test (Alabama, Colorado and Michigan) also functioned as “Prototype” states during Phase 2. In these States the disability claims process in the DDSs was modified. Specifically:

- More authority and responsibility was given to disability examiners in making disability determinations;
- More extensive analysis, case documentation, and detailed rationales were required;
- An opportunity for a pre-decisional “claimant conference” was offered before any less-than-fully-favorable decision; and
- The reconsideration step was eliminated.

Having some DCM sites located in prototype states provided a unique opportunity to evaluate the DCM in the prototype environment. Although there were only seven DCM sites in prototype states, there were sufficient cases for making statistically valid comparisons in some evaluation areas. Results of these comparisons for prototype states are located in a separate section titled, “*DCM in the Prototype Process*”.

**Monitoring Activities:**

Site Visits: During Phase 2 of the DCM test, DPRT with the assistance of regional staff, OWA and AFGE visited 18 DCM sites in 10 states. Between January and May 2000 a cross-section of site types were visited, including all prototype DCM sites. During these visits DPRT discussed business practices with the DCM site’s staff, local management and union. A summary of the results, which included best practices and recommendations for improvement, was communicated to the staff at the conclusion of the visit. DPRT also compiled the best practices into a document and shared them with all DCM sites nationwide.

Surveys: A variety of surveys were conducted by DPRT to obtain information in several different areas:

- Staffing - Regions were polled to verify staffing, ensure that staffing was being properly allocated, and to validate staffing arrivals and departures throughout the evaluation phase.
- Site Characteristics - Phone surveys with all SCs were conducted to discuss specific issues related to the functioning of their sites and to identify local workflow variations between DCM sites and the current process.

- *Ad Hoc Surveys* - At various times during the evaluation period DPRT staff members held discussions with RICs and/or SC to assess specific issues or areas of concern.

*Teleconferences*: Regular monthly conference calls were held to resolve issues and provide updates. These calls included all appropriate DPRT, regional office, DDS and regional line management, site coordinators, union representatives, and other headquarters component staff.

*Weekly Lead and Control Feedback*: Regions and sites were provided with a variety of weekly feedback reports. These data were provided to the sites for use in work planning and caseload management. This information also was used by DPRT to ensure work volumes and staffing levels were accurately captured.

*Monthly Reports*: Monthly reports were provided to the RICs and SCs summarizing processing information on a site, state, regional, and national basis. These reports provided information on case processing volumes, processing times and productivity data. DPRT reviewed this data to look for processing trends requiring resolution. It is important to note these reports compared the DCMs with state and/or national data rather than to the control group since there were insufficient data for control group cases until the end of Phase 2. For the evaluation, however, control-group comparison data was being used to the fullest extent possible.

## **Key Evaluation Issues:**

The following sections reflect results from the Phase 2 DCM evaluation. Data results are divided into nine "Key Issues." The methodology for each key issue is discussed in the appropriate section, along with the results and analysis.

- 1. Accuracy of Adjudication**
- 2. Processing Time**
- 3. Allowance Rates**
- 4. Productivity and Cost Efficiency**
- 5. Customer Service Satisfaction**
- 6. Employee Job Satisfaction**
- 7. Support Staff Assistance**
- 8. DCM in the Prototype Process**
- 9. Environmental Factors**

Each key issue includes specific evaluation question(s) suggested by the Lewin Group as key factors in assessing the DCM process. Summary results are displayed in response to each question or series of questions. Additional detail regarding the results is also provided for each key issue with specific data referenced in the Appendices of the report.

The "Key Issue" sections on processing time, medical case accuracy, and allowance rates relate to DCM claims, excluding the claims processed by DCMs in prototype sites. In the areas of technical case accuracy, productivity/cost, customer service satisfaction and employee satisfaction, all case data is combined. Data results from the DCMs in

prototype sites are displayed separately in the section titled, "*DCM in the Prototype Process*".

### III. Key Issues:

#### 1. Accuracy of Adjudication

*Adjudication accuracy was measured by assessing the correctness of both disability (medical) decisions and technical (non-medical) decisions.*

**Evaluation Questions:** *Do the DCMs continue to achieve acceptable levels of adjudication quality? Will DCMs continue to produce high-quality decisions when they are under more pressure to perform and without assistance from coaches?*

##### **Summary Results:**

- **Allowance Accuracy:** The DCM (medical) disability case accuracy (96.9%) for allowances was statistically comparable to that of the control group (96.8%).
- **Denial Accuracy:** The DCM accuracy rate for denials (90.1%) was statistically comparable to the control group (93.3%). Although the difference in the DCM and the control group accuracy rates for denials is not statistically different, it must be noted that the DCM denial accuracy fell below the regulatory accuracy threshold of 90.6%.
- **PER Accuracy:** The DCM accuracy rate of 96.3% was statistically comparable to the control group (97.1%).
- **Programmatic (Non-Medical) Accuracy:** Technical case accuracy and dollar accuracy rates for Title II DCM awards was statistically comparable to the fiscal year 2000 Index of Dollar Accuracy (IDA)<sup>1</sup> review. The awarded DCM Title XVI case accuracy was significantly higher than the IDA review, with dollar accuracy being comparable. There is no denial comparison data available for the IDA review.

<sup>1</sup> IDA results displayed are for initial adult disabled recipients only. Non-medical accuracy outcomes include Prototype results, for both DCM and IDA, since Prototype data could not be delineated.

## Methodology:

The Office of Quality Assurance (OQA) randomly selected DCM and control group cases and conducted reviews using the same standards and procedures as the current process.

- **Disability Quality Assurance (DQA) Reviews:** As required by law, SSA performs a quality review of disability decisions made by each DDS to determine their rate of accuracy. OQA reviews a sufficient case sample volume to provide statistically reliable measurements for the universe of DDS cases<sup>2</sup>. DCM and control group cases were included in the universe of all cases sampled and subjected to the same method of random case sampling and review. OQA isolated the DCM and control group data by performing a match run of Phase 2 DCM and control group SSNs against the OQA databases.
- **Pre-Effectuation Review (PER):** By law PER is performed on 50 percent of all Title II and concurrent Title II/Title XVI initial disability allowances. Targeted cases are identified by certain case characteristics and selected for PER. DCM cases were subjected to the same selection process and procedures; and, at the same rate of selection as in the current process.
- **Programmatic (Non-Medical Claim) Accuracy Results:** OQA conducted a study to assess the accuracy of the non-medical aspects of Title II & XVI disability (DI) claims. For each case sampled, all non-medical factors of eligibility were verified and redeveloped through personal contacts with the recipients/payees and, as necessary, contacts with collateral sources. This is the same procedure used in the current process as part of the ongoing IDA review. For this review, OQA sampled 466 Title II and 452 Title XVI DCM award cases and compared the results with the Agency's 2000 IDA review results, which included 596 Title II & 624 Title XVI adult disability claims. DCM findings were not compared to the control group. DCM/Prototype cases are included in this assessment.

It is important to note that IDA results are normally weighted to project the results to the universe of disability claims, however, the results presented here are NOT weighted. Raw case numbers and percentages are used to compare DCM to IDA using the sampling variability as the point of reference for the comparison. This is consistent with the way the results are presented for the medical portion of the Accuracy section of this report.

## Results:

The following charts display results of medical and technical (non-medical) reviews for DCM and the corresponding control group cases. The DCM and control group selections provided a sufficient number of cases to yield a statistically reliable comparison<sup>3</sup>.

<sup>2</sup> A Description of the Disability Quality Review Process, OQA, ODPQ, 02/10/99.

<sup>3</sup> Sampling variability (S.V.) measures how closely the sample results can be expected to approximate conditions in the universe of cases being sampled. Results are not weighted because it does not involve making projections to the universe of cases.

Errata sheet for page 15:

The data tables are in the correct position.

The two graphs are erroneously displayed in reverse order.

	Number of Cases Reviewed	Number of Error Free Cases	Accuracy Rate
DCM	384	372	96.8%
Control Group	190	184	96.9
Sampling Variability (S.V.)			3.0%
Difference in Accuracy Rates			0.1%

	Number of Cases Reviewed	Number of Error Free Cases	Accuracy Rate
DCM	394	355	90.1%
Control Group	252	235	93.3%

## 2. Processing Time

**Evaluation Question:** Can the DCM process reduce processing times and meet or exceed program processing time goals?

**Summary Results:** Claims completed through the DCM process had significantly faster median processing times for both Title II and Title XVI claims than the control group.

Median <sup>4</sup> Processing Time				
	Title II		Title XVI	
	DCM	Control	DCM	Control
Allowance	64	74	83	77
Denial	73	87	73	86
Technical Denial	1	0	1	0
Overall	67	77	67	73

Note: Processing times are based on claims counts, not on case counts. This means that concurrent filings are counted twice -- once for Title II and once for Title XVI.

### Methodology:

Processing time<sup>5</sup> for the DCM group was compared to the control group. Claims for both groups were excluded from the processing time results if any of the following conditions existed:

- A processing time exclusion applied based on existing Agency standards, such as a missing application date; or
- The claim was filed before Phase 2 began (11/1/1999) or was adjudicated after the evaluation phase ended (11/30/2000); or
- The claim was filed more than 30 days before the randomly identified lead was reported to DPRT.

All other adjudicated claims were included in the assessment of processing time.

The Lewin Group recommended using the “median” calculation to assess processing time in order to account for the volume of claims pending at the close of the data collection period. Processing time was also calculated based on the mean (average). (*Detailed processing time data is displayed in Appendix III 1 - 4.*)

<sup>4</sup> The median is the number in the middle of a set of numbers; that is, half the numbers have values that are greater than the median, and half have values that are less.

<sup>5</sup> Processing time was measured from the application date (or protective filing date) to either date of the denial notice or the date the system completes processing of an award. The MIICR was used for Title II data and SSICR for Title XVI. Overall processing time for DCM and control groups was calculated using the same method(s) as the Agency uses for its Tracking Reports and Performance Plans. Refer to MIM-II 8140 & 8151 (Title 2) and 8530 (Title 16) for more information on processing time computations, and MIM-II 8530 (Title 2) and 8510 (Title 16) processing time exclusions and exceptions.

**Results:**

The median processing time for DCM claims was faster than the control group (on average 10 days faster for Title II and 6 days faster for Title XVI).

**Impacts:**

There were a number of factors that may have impacted processing time for both the DCM and Control groups. These factors included that:

- The DCM sites had the ability to alter receipts if workloads were perceived to be unmanageable where the control group did not have the same ability;
- Some DCM sites needed to mail claims for medical consultant input and sign-off;
- DDSs did not receive sufficient resources to process all their receipts during the test period. This caused a significant increase in the initial case backlogs in the DDSs. This increase in backlogs may have adversely effected control group processing time;
- Claims had to be transported to field offices for payment authorization by some state locations; and
- Some of the control group of cases could have been worked on overtime, while overtime was not available to the DCM group.

Several other factors may have impacted processing time including receipts and pending levels and staff on duty. Data analysis did not provide the degree of impact any of these factors had on processing time.

For the first 4 months of the test, the pipeline of cases moved into the process. By the end of February 2000, DCM pending reached an average of 50 cases per DCM and receipts averaged 5 per week. This receipt level was maintained through June. In July there was a sharp drop in receipts, due in part to the need for sites to reduce intake volumes as backlogs built. For comparative purposes the charts below show average DCM receipts and pending for the life of the test. Also included is the average DE initial case pending for the 15 DDSs participating in the DCM test. The DE initial workload does include childhood cases where the DCM pending does not. It is not equitable to compare the volume of pending between the DCMs and DEs since the DCM processes the entire claim and the DE processes the medical portion. What's notable was the proportion of DCM pending did not keep pace with the DE pending for the last 6 months of the test. The last 6 months of the test was also when average DCM receipts declined and average DCM processing time continued to climb.

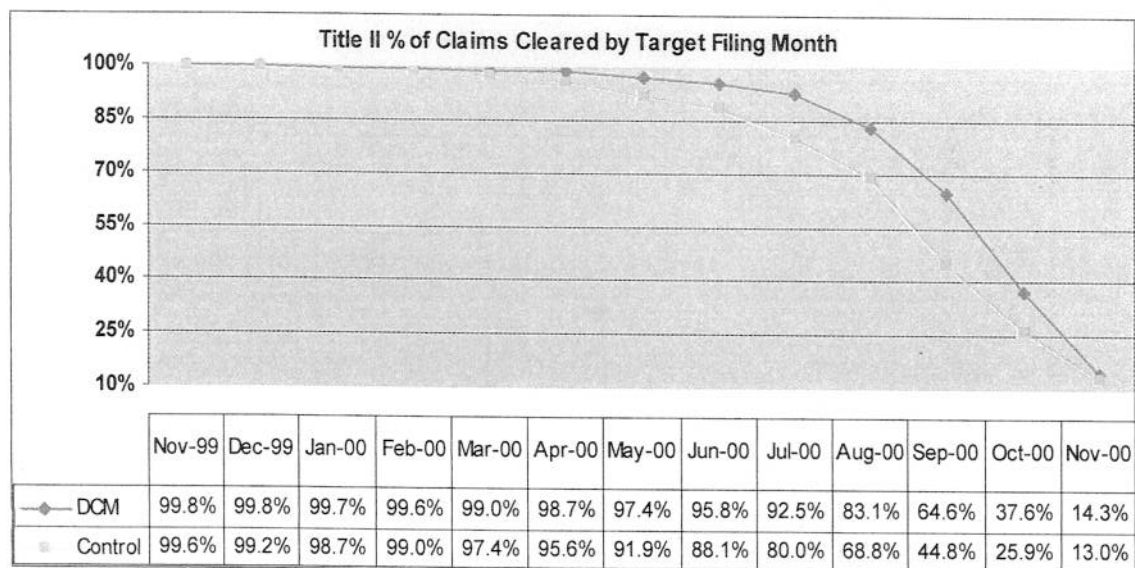

Average DCM staffing remained relatively stable through August 2000. There was a 1.2% attrition rate through May, and 3.2% from June through August. From September through November the attrition rate was 13.9%. Overall the attrition rate was 17%, significantly higher than the combined DE/CR attrition rate 10.1% for the 15 states involved in the test.

Average Monthly DCM Staff	DCMs
11/99 - 5/2000	188
6/2000	183
7/2000	182
8/2000	180
9/2000	173
10/2000	161
11/2000	157

As depicted below, for the first 6 to 7 months of Phase 2 the percentage of claims cleared per month was similar for both groups. Beginning May/June the gap broadened between the percentage of claims cleared in the DCM and control groups. This gap was due, in part, to an increased volume of control claims taken starting in June to ensure a sufficient volume of claims in the control group. At the same time, DCM sites reduced intake volumes due to increasing pending levels. The following graphs and chart depict processing time from several different aspects.

The charts below show average processing time for the DCM and control groups.

**Claims Processing Time by Filing/Cohort Month:** The charts below show the percentage of claims cleared within day parameters (0-30 days, 0-60 days, 0-90 days etc.)<sup>6</sup>.

File/ Cohort Month	Title II DCM Claims						Title II Control Claims

<sup>6</sup> The DCM group had 2,805 Title II & 2136 Title XVI claims pending at the close of the data collection period. The control group had 4944 Title II & 4293 Title XVI claims pending at the close of the data collection period.

### 3. Allowance Rates

**Evaluation Questions:** *What affect will the DCM model have on initial allowances? Appeals? Reversals? Will final allowance rates be substantially higher than under the current process? Will re-filings be reduced?*

**Summary Results:**

- Initial-level: The allowance rate for the DCM group (43.8%) was statistically comparable to the control group (43.6%).
- Reconsideration level: Claimants denied at the initial level in the DCM group requested reconsideration on their claims 2.2 percent less often than claimants in the control group, which is statistically significant. DCM claimants were allowed 1.7 percent more often as compared to the control group, which is also statistically significant.
- Cumulative allowance rates (initial claim through the reconsideration level only): The cumulative allowance rates through reconsideration were comparable.
- Hearing level: Claimants denied at reconsideration in the DCM group requested a hearing 9.1 percent more often than claimants in the control group. The DCM allowance rate was 3.3 higher. Given the volume of clearances and the high sampling variability hearing data has not yet stabilized, and no conclusions were drawn.
- Re-filers: Re-filing volumes for DCM and control groups were too low to make an accurate comparison.

**Results:**

- a. **Initial Allowances:** The following charts show the decisional outcomes of test claims processed through the initial level. These include decisions reached through May 2001. Monthly allowance rates are determined based on claims application dates.

- The DCM group had a higher allowance rate for claims filed in the first six months and the control had a higher allowance rate for claims filed in the last six months of the test. It is possible that this was due in part to the widening gap in the percentage of monthly clearances between the two groups. This gap occurred as the volume of control cases was increased (for test purposes) and the rate of DCM receipts declined starting in June. It may be more appropriate to examine allowance rates on a month-to-month basis, where the percentage of claims cleared for an individual month was more comparable.

- The DCM overall initial allowance rate was statistically comparable to the control group over the life of the test<sup>8</sup> (.2% calculated difference).
  - The above breakout of allowance rates shows the DCM allowance rate for Title II was about 1.1% higher than the control, however the control allowance rate for Title XVI was about 2.4% higher.
- b. **Reconsideration data:** The following graphs depict data through mid August 2001, and show the percent of reconsideration requests and decisional outcomes.

- The DCM reconsideration request rate was significantly lower than the control group reconsideration rate. The DCM model yielded a reconsideration request rate of 37.3% (based on a volume of 6,046 reconsideration requests filed on 16,211 initial denials). The controls had 6,838 reconsideration requests from 17,308 initial denials, for a rate of 39.5%<sup>9</sup>.
- The reconsideration allowance rates for the DCM group of claims (17.6%) was significantly higher than the control group of claims (15.9%)<sup>10</sup>.
- The cumulative allowance rates, though the reconsideration level only, were comparable. The rate for the DCM group was 46.9 percent and for the control group 46.6 percent.<sup>11</sup>

<sup>8</sup> The SV for the difference between the initial claim allowance rates was .80%, based upon a DCM sample size of 29,452 decisions and 12,904 allowances and a control group sample size of 30,041 decisions and 13,110 allowances.

<sup>9</sup> The reconsideration filing-rate S.V. is 1.04%.

<sup>10</sup> Reconsideration allowance rates are based upon a DCM claims sample size of 5,129 and 901 allowances and a control group claims sample size of 5,610 decisions and 893 allowances. The SV for the difference between the reconsideration allowance rates is 1.41%.

<sup>11</sup> Cumulative allowance rates were calculated by totaling initial and reconsideration allowance decisions divided by all initial decisions, excluding no decisions and technical denials. The SV for the difference between the rates is .80%.

- c. **Hearing data:** The following graphs depict data through mid August 2001, and show the percent of hearing requests and decisional outcomes:

- The DCM hearing request rate was 9.1% higher than the control group. The DCM group had a hearing request rate of 50% (based on a volume of 2,112 hearing requests filed on 4,228 reconsideration denials). The controls had 1,930 hearing requests from 4,717 reconsideration denials, for a rate of 40.9%. The SV for the difference in hearing request rates is 2.07%.
  - The hearing allowance rate for the DCM group was 87.3% compared to 84% for the control group. The SV is 6.18% based on a volume of 248 allowances out of 284 hearings held for the DCM group, and for the 179 allowances out of 213 hearings held for the control group.
  - Hearing data has not yet stabilized and no conclusions were drawn.
- d. **Re-filings:** Due to the short duration of the test period, data on re-filing is limited. Refilings have been identified for 31 DCM cases and 25 control cases. The volumes are insufficient to draw conclusions.

#### 4. Productivity and Cost Efficiency

**Evaluation Question:** *Can DCM productivity achieve parity with current process productivity?*

**Summary Results:** The DCM process is a blend of FO and DDS functions. The Agency has no single mechanism to accurately measure productivity of the DCM process. For the DCM test, current DDS and FO based formulas were modified to provide a means to compare DCM productivity to the current process.

A series of productivity assessments were conducted using DCM-related staffing models and apportioned overhead support along with work clearances produced by the DCMs and CSSs. Results from these comparisons showed DCM productivity ranged from about 14 percent less to 8 percent more than the current process.

**Evaluation Questions:** *What effect does the DCM have on disability claims processing cost? Does the DCM impact the cost of obtaining Medical Evidence of Record (MER) and Consultative Examinations (CEs)? What effect does the DCM have on appellate processing costs?*

**Summary Results:** The productivity assessment was a key factor in determining DCM cost per claim processed. Additionally, the cost determination was effected by estimated salary increases; DCM support (CSS, DDS medical support, supervisory ratios, etc.); medical case costs (MER and CE); and associated overhead costs. Dependent on the productivity and staffing models used, the DCM administrative cost to process an initial claim ranged from about 7 to 21 percent higher than the current process.

There was an insufficient volume of cases through the appeals process to determine the impact and related administrative costs of the DCM process beyond the initial level.

Note: Costs reflected in this section do not factor in costs associated with creating an infrastructure to support the DCM process, training and mentoring, etc.

#### Productivity and Cost Background:

This section provides evaluation results for productivity and costs. These two areas were the most difficult to assess because of the differences in how FO and DDS productivity and costs are calculated in the current process.

The current process for handling disability claims consists of two distinct parts—a FO process and a DDS process. Each of these processes has its own unique productivity

measurement system: Work Units Per Work Year (WUPWY) in FOs and Production Per Work Year (PPWY) in DDSs.

The DCM model merged both the FO and DDS processes; however, the Agency does not have a single productivity benchmark that can reflect the combination of these two processes. With some assistance from the Lewin Group, DPRT staff revised the current FO/DDS productivity formulas to allow for a comparison of the DCM to the current, national process -- not the control group. *(Refer to the "Technical Notes" section in Appendix IV for additional detail regarding productivity calculations using the modified DDS (PPWY) and FO (WUPWY) systems.)*

### **Methodology:**

Adjustments were needed in the production and cost calculation methodologies to be able to adequately capture the full scope of the DCM process. SSA's Cost Analysis System (CAS)<sup>12</sup> was used as the primary data source in determining both productivity and cost.

The DDS productivity measure includes an adjustment to recognize programmatic (non-medical) aspects of the case cost. Likewise, the FO based formula was adjusted to include task times for making disability determinations.

The DDS system served as the general model for estimating the cost-per-claim in the DCM process. Adjustments were made to account for the apportioned costs of regional and DDS staff support to the DCM. All workloads processed by DCM staff were used in the cost calculation along with: DCM-related staff time, salary, support provided by other SSA and DDS components, costs of obtaining MER and CEs; and productivity levels.

### Added Complexities

The focus of Phase 1 was to complete training and move through the learning curve in preparation for the Phase 2 formal evaluation. All DCMs were expected to be at a journeyman level at the start of Phase 2, having had more than a year's experience in the process. Phase 2 was designed to evaluate fully trained, experienced DCMs. Two factors added to the complexity of the evaluation:

- Thirteen federal DCM back-fills were selected during Phase 1. Although these back-fills completed training during the first phase, they entered Phase 2 with varying levels of process experience. During the operation of Phase 2, experience of these backfills was considered when assigning leads to the DCM sites. In the evaluation, DPRT conducted analysis using the staff model utilized during the Phase 2 test operation as well as a second staff model better replicating how staff is considered in the current process. A determination was made that for

<sup>12</sup> The CAS is an automated management information system that provides a wide range of information on workloads, costs, WY expenditures and production rates of SSA and its principal component organizations. The CAS, SC3-SUM report expresses production rates in a production per work year (PPWY) format. Cost is expressed in a cost-per-claim-processed basis.

evaluation purposes, the most appropriate model would be the one that most closely resembles the treatment of staff in the current process (called the Evaluation Model).

- Staff time and work clearances done by CSSs during the test also added complexity to the assessment of DCM productivity and cost since their contribution could not be separately determined.

Note: A more complete discussion and comparison of these staffing models (Phase 2 Operation Model and the Evaluation Model) is contained in Appendix IV.

### Productivity

The following chart shows DCM productivity based on the modified DDS and FO calculations displayed in monthly trendlines. The national level of productivity, at 100%, is identified for comparison purposes.

- = Productivity calculation using the modified DDS-based method, with trendline
- = Productivity calculation using the modified FO-based system, with trendline

- The above trend lines show productivity over the life of the test.
- Using the DDS-based calculation, productivity averaged about 108%; using the FO based formula, productivity averaged about 86%.
- Complexities associated with both productivity calculations do not allow a more precise estimate. Sensitivity analysis conducted on both the modified DDS and FO calculations did show that changes in assumptions had a greater impact in the FO formula.

The following points relate to these productivity calculations:

1. The modified FO calculation used FY 99 SAOR data to determine appropriate work credits to be assigned for medical decisions. Medical determinations comprised 53% of the work-unit credits in this calculation. Additionally, adjustments were made for prototype cases to account for the additional work associated with the rationale and claimant conference requirements.
2. Both calculation models contain a 64.4 minute adjustment to account for DDS support (i.e., medical consultant, CE, and quality assurance reviews) provided to the disability determination portion of the process.
3. The modified FO system used Agency DOWR/DOWS work-credits to determine field office work cleared by DCMs and CSSs during the test. These credits were counted in the same manner as the current field structure.
4. Over 98% of the DCM process' credited work involved initial disability claims. The remaining 2% was attributable to non-claims actions cleared by either the DCM or CSS.

Below are factors that contributed, in part, to productivity levels during Phase 2:

- DPRT, RICs, and DCM sites placed additional emphasis on claims intake in January and February 2000. *Refer to "Key Issue: Processing Time" for additional data on average DCM intake.*
- For the first 4 months of the test, the pipeline of workloads built reaching an average pending level of 50 cases per DCM by the end of February. Pending levels continued to build through June 2000. Starting July through the end of the test the average pending levels per DCM decreased. *(Refer to "Key Issue: Processing Time" for additional data on average DCM pending.)*
- Staffing during the first 9 months of the test was stable. Staffing losses increased significantly toward the end of the test period (DCM sites lost about 14% of staff from September through November 2000). See *"Cost and Productivity Technical Notes"* for additional data on DCM staffing.

## Cost

Cost calculations considered a combination of:

- Salary costs: Salary costs were factored into the overall cost calculation. Expected salary increases for state/federal DCMs and CSSs were averaged into the overall calculation;
- Support provided by the DDSs, regional offices and from other SSA components: The national per-claim personnel and other costs were determined by dividing national costs by the number of claims processed. This factor was then applied to the volume of processed DCM claims. DDS and regional personnel costs were factored in the same way.
- MER and CE: Test states with available data reported MER and CE costs to DPRT. DPRT matched this data with DCM and control cases processed and compiled the database. Costs were determined for MER and CE and then combined for total medical costs per case processed. The average medical cost per medical decision (total decisions) for the DCM was \$88.47 as compared to \$77.55 for control cases (a 14% difference).

The following charts show cost per DCM claim versus the current process; and cost per DCM claim expressed as a percent of the current process. The current cost per claim is compared to the DCM cost per claim, calculated in each of the two productivity methods.

The higher DCM cost per claim versus the current process was a factor of the expected salary increases associated with the DCM, and added MER and CE costs. In addition, costs were affected by the different measures used to calculate DCM productivity.

- The modified DDS method for computing productivity yielded a DCM cost per claim about 7% higher than the current process.
- Applying the modified FO productivity method yielded a DCM per claim cost about 21% greater than the current process.

The following assumptions were applied to DCM productivity and cost determinations:

- Due to the manner in which CSS staff was assigned to the test, and the varied use of this staff, there was no valid way to separate CSS support from the DCM test. CSS support was estimated based on a 2:1 DCM to CSS staffing ratio. If the ratio of CSS staff was less than 2:1, the actual ratio was used. If the CSS ratio was greater than 2:1, CSS support defaulted to a 2:1 ratio as CSS time above this ratio was not spent on DCM support activities. Actual CSS hours devoted to the test could not be more precisely determined.
- The DCM supervisory staff ratio was determined by compiling data from weekly DCM site reports. The DCM supervisory ratio was computed at approximately 1:10. The current FO structure supervisory ratio is about 1:13. Supervisor (Site Coordinator) time devoted to the DCM was estimated based on site reports.
- Certain DDS-specific support time was charged to the DCM based upon 3/99 CEMS and OWA baseline study data. This time (64.4 minutes per medical decision) was based on the most recent data available.
- DCM salary increases were estimated using expected federal employee salary increases. Due to the varying legal and personnel issues involved with state salaries, the same percent salary increase was assumed for state DCMs.
- Most other component staff support, salary costs, and other costs were assigned to the DCM on a per claim basis in the same proportion as the current process.

#### Appellate Costs

There was an insufficient volume of claims processed through appeal to draw conclusions regarding cost beyond the initial level.

## 5. Customer Service Satisfaction

**Evaluation Question:** *To what extent does the DCM model improve claimant satisfaction?*

**Summary Results:** Claimants who were awarded disability benefits rated both processes excellent overall, but denied claimants rated the DCM process significantly higher than claimants denied in the current process. (The current process was not represented by the control group, but represented by the Fiscal Year 2000 Market Measurement Program Survey of Initial Disability applicants.)

Additionally, the survey results indicate the DCM process was rated higher in many areas of claimant satisfaction as compared to the current process for both awarded and denied claimants. This was particularly evident in ratings of employee attributes such as helpfulness, courtesy, job knowledge and time spent with the claimant. Denied respondents, traditionally much less satisfied with all aspects of service gave surprisingly high attribute ratings, with job knowledge as the top-rated aspect of service. Claimants who were denied benefits reported that the DCM explained the process very well, processed their claims timely and conveyed a clear understanding of the decision.

### Methodology:

Phase 2 DCM customer service was measured by the Office of Quality Assurance (OQA). Staff in the Regional Offices of Quality Assurance and Performance Assessment conducted a DCM customer survey by telephone during August and September 2000. In addition to detailing the findings of the DCM customer survey, the OQA report included comparisons with customer satisfaction in the current disability process, as measured by the fiscal year 2000 Market Measurement Program (MMP) customer segment survey of initial disability applicants. The MMP survey excluded all claims processed under disability redesign, whether in the DCM process or prototype. The results were recalculated to exclude SSI children's disability cases and technical denials to allow a true comparison to the DCM process.

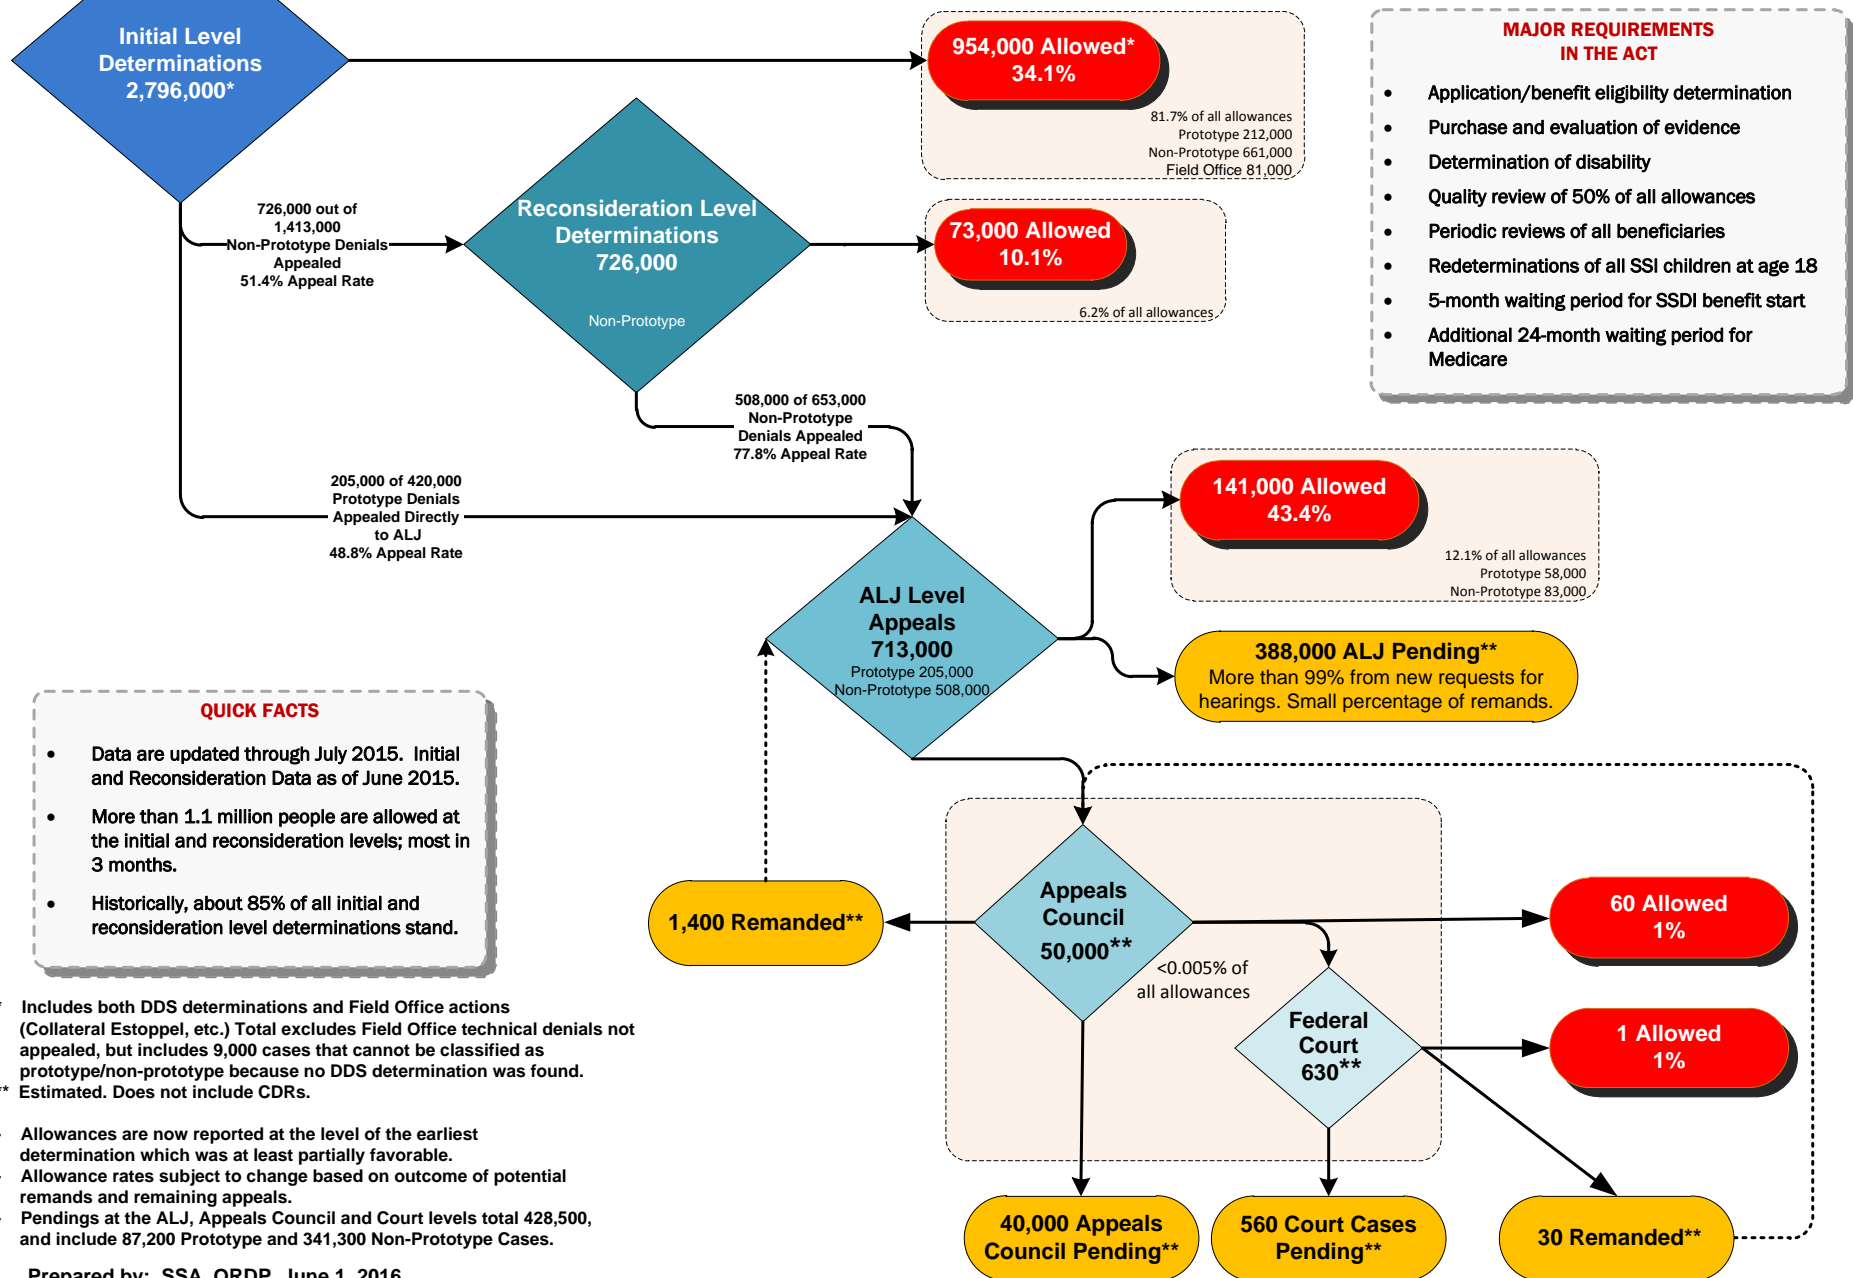

### Results:

OQA noted in their report that:

- As expected, decisional outcomes have a significant impact on survey result outcomes. This is evident in the large gap between the respondents' level of satisfaction in the awarded and denied categories.
- The DCM model promoted the use of the telephone to take applications, and as a result a much larger proportion of DCM claims were filed by telephone (75%) than the current process (less than 50%).

# 2013 Longitudinal Disability Claims and Appeals Data

Based on claims filed in Calendar Year 2013

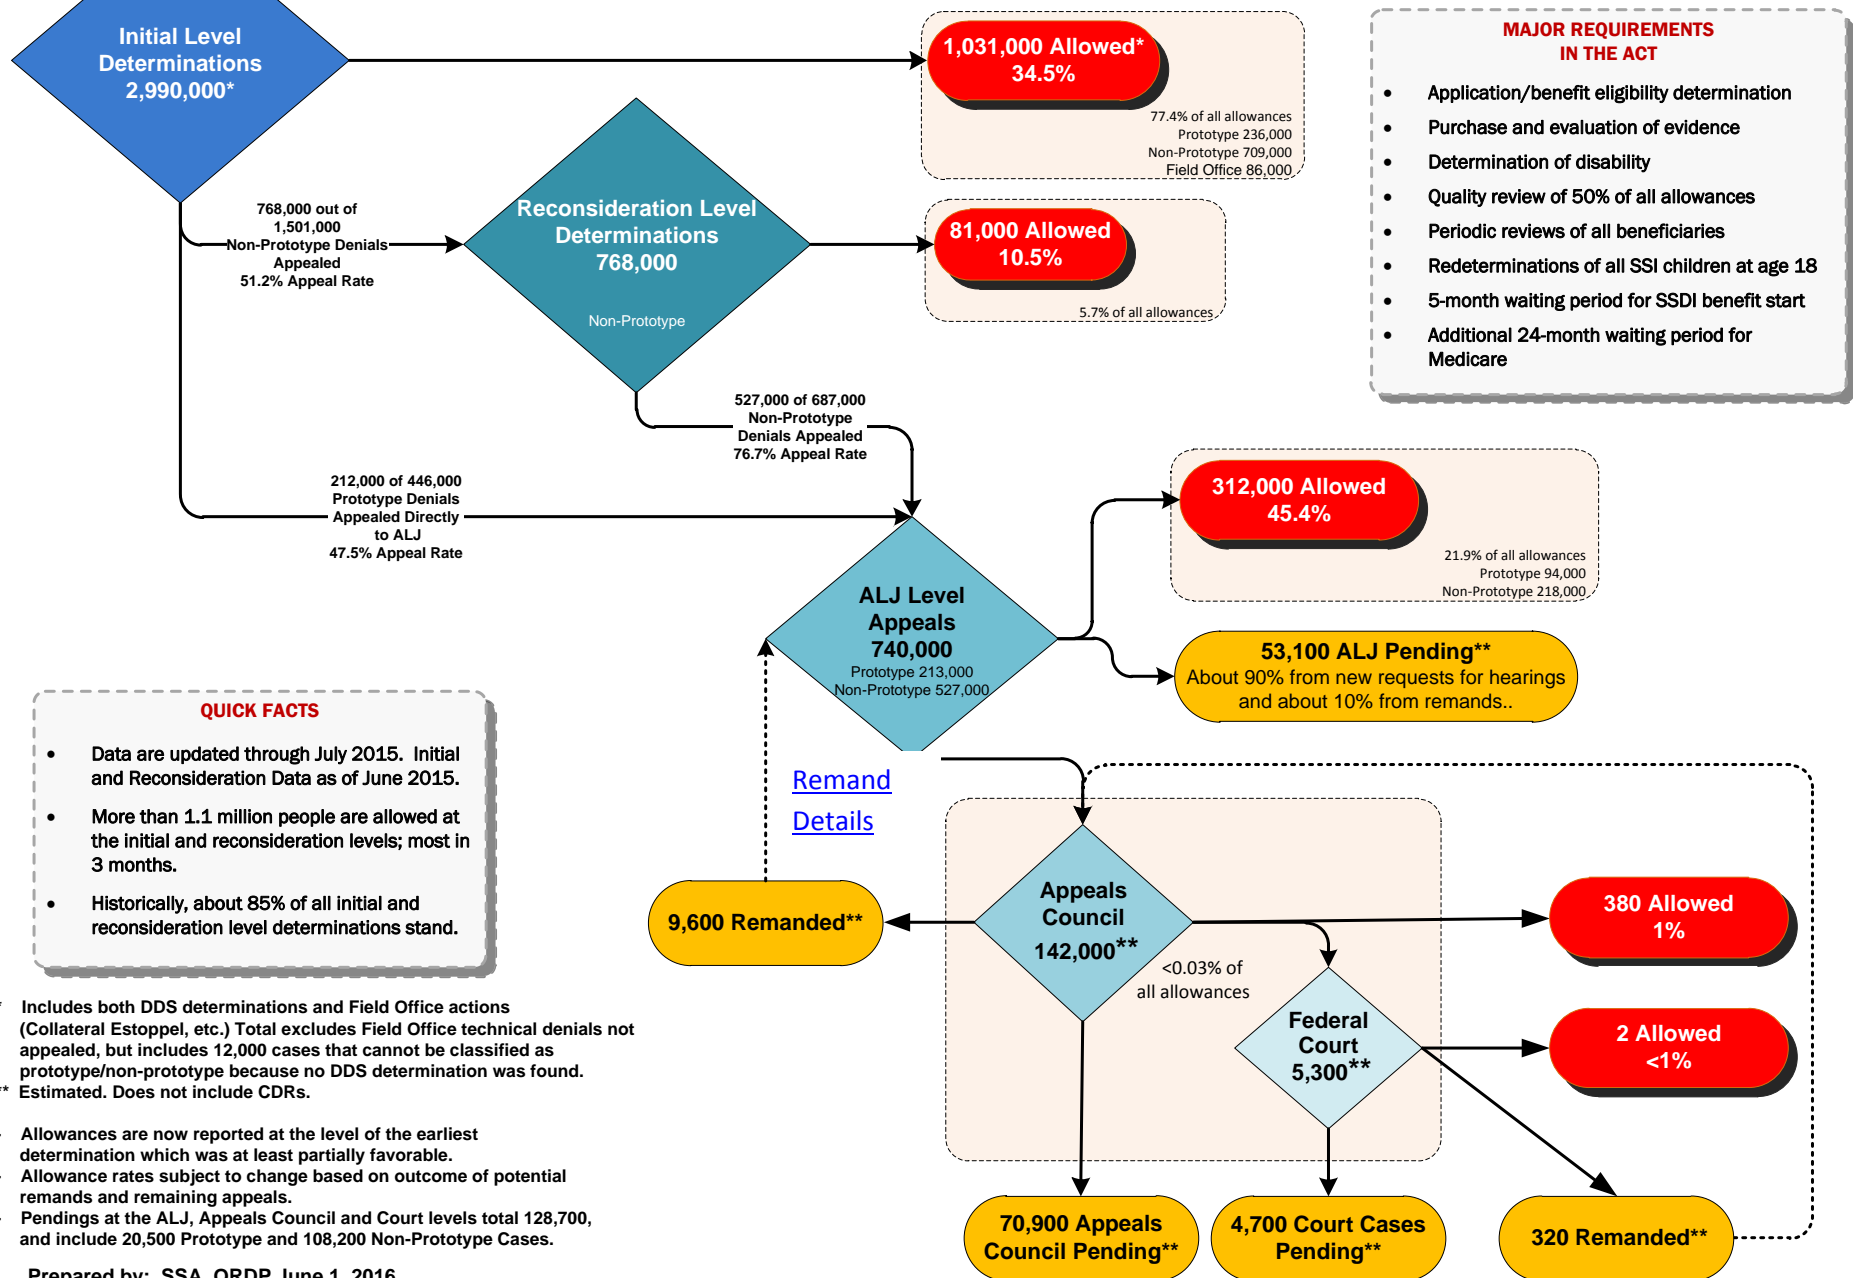

\* Includes both DDS determinations and Field Office actions (Collateral Estoppel, etc.) Total excludes Field Office technical denials not appealed, but includes 9,000 cases that cannot be classified as prototype/non-prototype because no DDS determination was found.  
\*\* Estimated. Does not include CDRs.

- Allowances are now reported at the level of the earliest determination which was at least partially favorable.
- Allowance rates subject to change based on outcome of potential remands and remaining appeals.
- Pendings at the ALJ, Appeals Council and Court levels total 428,500, and include 87,200 Prototype and 341,300 Non-Prototype Cases.

**Disability Waterfall Chart by Cohort (2013) Q&A**  
**Office of Retirement and Disability Policy (ORDP)**  
**December 5, 2016**

**Question: Why are the number of remands only 30 for a federal court case workload of 630 cases, when ODAR said that the remand rate from the courts was about 50%?**

Answer: The waterfall chart is a snapshot taken in June 2016 of all claims filed during 2013. We wait for about three years to chart outcomes in order for the vast majority of claims to get fully through the process.

Of the 630 cases filed in Federal Court, 560 were still pending as of the date the chart was created. A small number were allowed and 30 had already been remanded.

Waterfall charts from prior cohort years show a similar pattern; once cases work through all appeals, the ultimate remand rate has consistently been about 50%.

This is consistent with figures provided by ODAR.

## **DESCRIPTION OF OPERATIONS EMPLOYEES BY POSITION TYPE**

### **REGIONAL OFFICE (RO) POSITIONS**

**Regional Commissioner (RC), SES:** The RC, as the principal Social Security Administration (SSA) official in a major geographic segment of the United States, provides executive-leadership and/or coordination for the Retirement, Survivors, Disability and Health Insurance (RSDHI), Black Lung Benefits and Supplemental Security Income (SSI) programs. The RC represents SSA and directs its relationships within HHS and with other Federal and non-Federal agencies and organizations. The RC serves as principal line official for program operations and as an advisor to other top officials on regional program and administrative matters. The RC serves as the principal SSA spokesperson for regional interests and concerns.

**Deputy Regional Commissioner, SES:** The deputy RC shares with the Regional Commissioner responsibility for all functions within the regional organization including planning, decision making and implementation of policies objectives and goals relating to present and future operations. Assumes responsibility for all component functions within the regional organization and acts on all matters within the Regional Commissioner's jurisdiction with full commitment authority.

**GS-15 Regional Communications Director:** The Regional Communication Director represents the views and concerns of the Administration in providing regional leadership, management direction, and expert advice in developing and administering a comprehensive Social Security Administration (SSA) national public information and external affairs program. Serves as principal advisor to the Regional Commissioner and Deputy Commissioner for Communications on all aspects of informational programs and communications policy and technology.

**GS-15 Executive Officer:** This position is located in the Office of the Regional Commissioner (ORC), Office of the Deputy Commissioner, Operations. The Executive Officer serves as staff director and key advisor to the Regional Commissioner (RC). The incumbent assists the RC in planning and implementing comprehensive regional programs, coordinates regional program administration, provides substantive and procedural guidance to the regional executive staff and provides overall coordination to the immediate staff of the RC. Assists the RC in the overall management of the region. Implements many RC decisions personally and follows up with executive staff on other decisions to ensure that they have been implemented. Provides confidential advice to the RC on especially sensitive or complex issues.

**GS-15 Operations Training Vision Manager:** Serves as the principal advisor to the Lead Executive for Training on a broad range of operational training initiatives and planning activities with national impact. The incumbent provides both short- and long-term strategic and tactical planning for training for Operations, and oversight of Operations entry-level training, ASC/SLC training, and management training, and other national training activities. Provides authoritative studies, information, evaluations and recommendations on all phases of Operations training needs, resources and systems needed for use in establishing priorities, allocating resources, formulating Operations policies, and managing future training in Operations. Acts as DCO focal

point for planning and implementation of Operations Training Vision (OTV) issues, which have a major impact on the agency through the program's DCO administrators. Supervises a small staff of 7-10 analysts, studio technicians, web and content designers, and training experts.

**GS-14 Equal Employment Manager:** The Equal Employment Manager manages the equal opportunity program for a region. As the SSA regional authority on equal opportunity, develops, administers, and evaluates all such programs in the region. Coordinates SSA's activities in these areas for the employment and advancement of minorities and women and develops programs aimed at assuring quality of services provided by SSA to the broad cross section of the public within the region. Serves as advisor to both regional and headquarters management on the development and interpretation of policies and guidelines. Recommends strategies to resolve controversial agency wide issues.

**GS-13 Public Affairs Specialist (PAS):** The PAS represents the views and concerns of the Agency in performing a wide variety of duties in the operation of a comprehensive SSA public information and external affairs program in one of ten SSA regions.

**GS-13 Executive Assistant:** As a key member of the Regional Commissioner's (RC's) staff, the Executive Assistant provides a variety of high-level coordinative, consultative and advisory services relating to social insurance program administration, operations and management issues in the regional office. The Executive Assistant assists the RC in the evaluation and implementation of plans for achieving immediate and long-range goals and objectives and provides staff advice in support of planning

**GS-13 Support Services Specialist:** The Support Services Specialist is assigned to a specific SSA region and develops authoritative recommendations regarding support services program policy throughout the region. The Support Service Specialist is a recognized expert providing advice and consulting services on new developments and advances in a variety of administrative service areas such as building management, property management, space management, lease administration, procurement, telecommunications, equipment and supply management. Ensures that the full-range of logistic and facility needs of leased or owned buildings in the region are met.

**Assistant Regional Commissioner for Management and Operations Support (ARC-MOS), SES:** The Assistant Regional Commissioner for Management and Operations Support (ARCMOS) provides executive leadership and direction to the region in the areas of program policy, systems, finance, human resources and management support, and provides executive leadership and direction for assigned Office of Operations-wide initiatives. Through subordinate supervisors or team leaders is accountable for the evaluation, implementation and management of program policies and procedures; service delivery and related initiatives; legislative changes; management planning and analysis; systems support and automation; management information; workforce planning and utilization; program training and staff development; position and organization management; facilities, space, procurement and property management; personnel administration and management; labor relations; security and integrity. The ARC-MOS provides executive leadership, direction and oversight responsibility to the regional disability program, including technical, financial and administrative support of the State Disability Determination

Services (DDS). The ARC-MOS also has executive responsibility for the administrative and personnel administrative support for other regional components, e.g., Regional Office of Quality Assurance and Performance Assessment, Office of Hearings and Appeals, and Office of the General Counsel.

**Assistant Regional Commissioner for Processing Center Operations (ARC-PCO), SES:**

Serves as a member of the Regional Commissioner's Executive Staff, participating in the overall direction of Social Security matters in one of the major or geographical service areas of the country. Provides executive leadership and direction in planning and carrying out the Processing Center's total mission, including processing claims for certification of retirement, survivors and disability benefit payment to a large segment of the nation's population.

**GS-15 Deputy Assistant Regional Commissioner (DARC-MOS, DARC-PCO):** The deputy serves as full deputy and "alter ego" to the Assistant Regional Commissioner and is responsible and accountable for the overall program management, direction, planning, objectives, policy-making and coordination of the functions of the office. The deputy shares responsibility with the ARC as the region's executive for assigned DCO-wide initiatives.

**GS-15 Center Director:** The Center Director directs one or more of the following regional programs: Disability, Program Support, Security and Integrity, Automation, Human Resources or Materiel Resources.

- Disability includes: providing management, leadership, oversight, supervision and guidance to (and through) Disability Program Administrators, supervisors and team leaders to regional office staff responsible for the evaluation, implementation and management of the national disability program in the assigned region. Through staff and directly, provides program coordination and administrative guidance to State Disability Determination Services (DDS) administrators.
- Program Support includes: providing leadership and direction in the development and application of Retirement and Survivors Insurance (RSI), and Supplemental Security Income (SSI) program polices and other operational procedures such as enumeration, Medicare, and attorney fee agreements, etc.
- Automation includes: providing leadership and direction in programmatic systems, management information, the creation and use of new web-based tools and automation resources and expert support to all SSA staff and offices in the region.
- Security and Integrity includes: providing leadership and direction region-wide, including Office of General Counsel (OGC), Office of Disability Adjudication and Review (ODAR) and Office of Quality Performance (OQP) evaluation, implementation, and management of systems security, program and administrative integrity, and fraud prevention and detection.
- Human Resources includes: recruiting, retention, succession planning and staffing; labor and employee relations; classification and pay; employee benefits and work/life

initiatives; HR administration, timekeeping and payroll services; entry level, technical, management and common needs training; and employee/career development.

- **Materiel Resources** includes: region-wide responsibility for budget and financial management; purchasing and procurement; health and safety; leasing and office environment; space and physical security; facilities and supply management; and travel and staffing plans.

**GS-14 Deputy Center Director:** The Deputy Center Director serves as full deputy and "alter ego" to the Director for the Center for Automation or Center for Program Support and is responsible and accountable for the overall program management, direction, planning, objectives, policy-making and coordination of the Center. Assumes full responsibility for operations in the absence of the Center Director and acts on all matters with full authority of commitment within assigned jurisdiction.

**GS-14 Disability Program Administrator:** The incumbent serves as the Federal official responsible for ensuring that Disability Determination Services (DDS) and/or federal disability processing units perform in a satisfactory manner and are in compliance with negotiated agreements and Federal regulations. Also responsible for ensuring SSA field offices in the state(s) fulfill their responsibility for providing information to the DDS and coordinate with state agencies as necessary.

**GS-13 Supervisory Management and Program Analyst:** Supervisory Management and Program Analysts serve as a first line supervisor in the SSA Regional Office with responsibility for organizing and leading staff members, coordinating staff projects, assessing results and performance of a staff. Supervises a staff of employees involved in planning, developing, implementing and monitoring a variety of projects, processes and analyses relating to one or more of the following: financial management; facilities management (building, space and property management, health and safety); management information; management planning and analysis; training; personnel management; administrative management.

**GS-13 Supervisory Social Insurance Specialist:** The Supervisory Social Insurance Specialist provides supervision and guidance to and through team leaders or comparable personnel to Center for Disability (CD), Center for Program Support (CPS), Center for Security and Integrity (CSI), or Center for Automation (CA) staff responsible for one or more regional programs. All professional, technical and clerical staff under the supervision of the Supervisor Social Insurance Specialist provides support to regional, field, program service center, and teleservice center involved in carrying out the retirement, survivors, disability and supplemental security income and supporting administrative programs. Provides advice and information to management regarding the Agency and the Region's program(s) assigned.

**GS-13 Financial Management Specialist:** The Financial Management Specialist serves as the regional expert in the management of SSA financial resources in an assigned region. The Financial Management Specialist also serves as financial advisor to regional management and provides leadership in the analysis, development, and application of policies, practices, and evaluative criteria for the management of the financial resources of the region.

**GS-12 Social Insurance Specialist:** Provides analytical staff support to the Regional Commissioner (RC) and Assistant Regional Commissioner (ARC) for Management and Operations Support. Independently or as a member of a team, plans, develops, implements and monitors a variety of projects and analyses relating to operations/program analysis, program integration, systems and automation support.

**GS-12 Management Analyst:** The Management Analyst provides analytical staff support to the Regional Commissioner (RC) and Assistant Regional Commissioner (ARC) for Management and Operations Support. Independently, or as a member of a team, plans, develops implements and monitors a variety of projects and analyses relating to one of the following: financial management; management information; management planning; personnel management and administrative management.

**GS-13 Human Resources Specialist/ Technical Expert:** The Human Resources Specialist/ Technical Expert serves as a recognized training expert and technical authority and provides expertise in developing, planning, administering and evaluating the Social Security Administration's Human Resources programs. The expert shares in Agency policy making and provides a variety of high-level coordinative and analytical services to regional management, and SSA as a whole, related to regional and national initiatives.

**GS-12 HR Specialist:** The HR Specialist serves as a Human Resources Professional and Consultant to management in one or more human resource programs, such as recruitment, placement, classification, labor relations, employee relations, EEO, employee benefits and information systems.

**GS-13 Lead IT Specialist:** The Lead IT Specialist serves as a team leader in the Regional Office. The Lead IT Specialist leads a group of Information Technology (IT) Specialists who provide support for (1) computer and systems support activity within the components serviced including the administration and support of Local Area Networks (LAN) and Intelligent Workstations (IWS) and (2) implementation and operation of claims and post-entitlement processing systems, management information systems, administrative, programmatic or other comparable systems.

**GS-12 IT Specialist:** The Information Technology (IT) specialist provides has responsibility for various computer projects designed to increase the effectiveness and efficiency of selected administrative and managerial tasks, and processes used by the component, through the reconfiguration of existing data bases, the establishment of standard interfaces for new data bases, the improvement of existing information systems, the design and development of new information systems, and the utilization of innovative design approaches which involve interactive computer enhanced information systems, integrated data bases and communications utilities.

**GS-12 CDI Program Specialist:** The CDI Specialist serves as a program expert for the detection and prevention of fraud and abuse and the development and adjudication of claims filed under programs administered by SSA. The CDI program is a joint effort among Federal and State agencies to identify and prevent fraud in SSA's social insurance and need-based benefit programs.

## **PROGRAM SERVICE CENTER (PSC) POSITIONS**

**GS-13 Module Manager (MM):** The MM provides leadership and supervision to all subordinate supervisors, team leaders, and employees through both oral and written communications. This position is responsible for providing technical direction and leadership to technical employees and may include a small clerical staff. The MM manages the activities and operation of the module/unit to ensure the work of the unit meets all established goals.

**GS-11/12 Assistant Module Manager (AMM):** The AMM serves as full assistant to the module/unit manager, and first line supervisor to technical and administrative employees in the Module/Unit. This position is responsible for providing technical direction and leadership to technical employees and may include a small clerical staff. The AMM assists the MM in managing the activities and operation of the module/unit to ensure the work of the unit meets all established goals.

**GS-12 Claims Technical Expert (CTE):** See Description Above

**GS-5/7/9/11 Claims Specialist (CS):** See Description Above

**GS-11/12 Disability Processing Specialist (DPS):** The DPS serves as an authoritative specialist and program expert in the adjudication of Social Security disability and non-disability cases on the disability staff of the Regional Office or Program Service Centers. The DPS handles the full range of disability determination workload in the Agency, as assigned from field offices, PSCs, OCO and as mutually agreed from Office of Disability Adjudication and Review and state Disability Determination Services. The DPS acts as the technical resource for questions from DDS, PCO and field on all disability related issues, which include complex cases.

**GS-10 Post Entitlement Technical Expert (PETE):** The PETE is responsible for assisting management in improving the timeliness and accuracy of work processed in the module, and for assuring that work assignments, including paperless processing, of Benefit Authorizers and other module personnel are completed timely and in accordance with established procedures. The PETE ensures uniform and proper application of laws, regulations, policies and procedures under titles II, XVI and XVIII of the Social Security Act pertaining to the full range of post-adjudicative issues.

**GS-5/7/9 Benefit Authorizer (BA):** The BA makes final determinations on the full range of post-adjudicative actions, entitlement and non-entitlement to benefits, continuing entitlement to benefits, and the payment amounts thereof. Adjusts established benefits and makes payments through the system or Single Payment System. Initiates and responds to telephone contacts, including the 800 number, to resolve issues or discrepancies and/or explain or obtain information.

**GS-7/8/9 Debt Specialist:** The Debt Specialist reviews and makes final determinations based on facts and applicable laws and regulations, on a variety of overpayment issues in titles II, XVI and XVIII cases. The specialist contacts debtors or field office personnel to develop or explain

complex technical program overpayment issues, waivers and reconsideration requests and to obtain refunds, refund agreements or implement the next step in the recovery process.

**GS-4/5/6 Debtor Contact Representative (DCR):** The DCR performs technical and clerical duties involving contacting debtors for the purpose of examination, collection, control, documentation and disposition of overpayments from all SSA-administered programs as well as assisting the public through SSA's national 800 number.

**GS-9 Lead Customer Service Representative (LCSR):** See Description Above

**GS-5/7/9/11 Customer Service Representative (CSR):** See Description Above

## **TELESERVICE CENTER (TSC) POSITIONS**

**GS-14/15 Teleservice Center/ Mega Teleservice Center Director:** The Director of a teleservice center provides leadership, management direction, and expert advice in its overall management and operation. The director administers both a comprehensive nationwide information and referral program for the public through SSA's 800 number network, and an immediate claims-taking or similar function. The TSC consists of several hundred Customer Service Representatives, as well as Claims Specialists, and other clerical, administrative and support staff.

**GS-12/13/14 Teleservice Center Manager:** Serves as Manager of a teleservice center, responsible for directing and administering a comprehensive information and referral program for the public on all Social Security programs and other State/Federal agency benefits. Directs a staff of technical employees including Customer Service Representatives. Where applicable, also directs an immediate claims-taking unit staffed Claims Specialists.

**GS-9/11/12 Teleservice Center Supervisor:** The Teleservice Center Supervisor provides first-line supervision and technical direction over the workload processing, procedures, systems, security and personnel in a unit of an SSA Teleservice Center.

**GS-9/11/12 Teleservice Center Management Support Specialist (MSS):** The Teleservice MSS provides analysis, advice, consultative services and management support to leadership, managers and supervisors throughout and in the Teleservice Center offices in a region or throughout a Mega Teleservice Center.

**GS-9/11/12 Systems Coordinator (SYSCO):** See Description Above

**GS-5/7/9/11 Claims Specialist (CS):** See Description Above

**GS-9 Lead Customer Service Representative (LCSR):** See Description Above

**GS-4/5/6/7/8 Customer Service Representative (CSR):** See Description Above

## AREA DIRECTOR'S OFFICE (ADO) POSITIONS

**GS-15 Area Director:** The Area Director plans, directs and coordinates the activities of SSA field offices (FOs) and/or teleservice centers (TSCs), within an assigned geographical area. The incumbent also provides executive leadership, vision, oversight, and guidance to managers regarding program operations, personnel administration and general management. The incumbent coordinates and oversees area-wide activities to ensure consistency with Agency policies, procedures and public service indicators. The incumbent develops strategies and implements initiatives to ensure the administration of programs, policies, and objectives are met in the most effective, efficient, accurate, and fiscally responsible manner possible.

**GS-14 Deputy Area Director:** The incumbent serves as full deputy and "alter ego" to the Social Insurance Administrator (Area Director), and is responsible and accountable for the overall program management, direction, planning, objectives, policy-making and coordination of the Office of the Area Director. The incumbent assumes full responsibility for operations in the absence of the Social Insurance Administrator (Area Director) and acts on all matters with full authority of commitment within assigned jurisdiction. The incumbent performs confidential and sensitive assignments for the Area Director and speaks on his/her behalf at internal and external meetings and conferences.

**GS-13 ADO Supervisor:** In an assigned Area, this position provides technical and administrative supervision to a number of specialized temporary projects and to both temporary and continuing staff assigned to the Area Director's Office, such as the Special Disability Workload (SDW) cadres, Area Work Incentives Coordinator (AWIC), the Automation Training Specialists (ATS), Area Systems Coordinators (SYSCOs) or others. Often the employees are out-stationed in District Offices complicating the supervisory responsibilities of this position. At least 25 percent of the incumbent's time is spent supervising work at the GS-12 grade level.

**GS-13 Area Administrative Assistant:** The incumbent performs and coordinates a wide variety of special projects and studies concerning SSA program administration. Leads the work of ad hoc teams responsible for conducting studies and activities having area, regional and/or national impact. Serves as area level focal point and assists the AD in coordinating and monitoring the accomplishment of major management, operational and program goals and initiatives. Coordinates area activities with regional office staff. Implements many of the AD's decisions personally and follows-up with the area's DMs and others to ensure appropriate implementation. Identifies issues requiring resolution and negotiates with DMs, AFGE representatives and members of the Area Office staff to achieve desired results.

**GS-12 Area Operations Analyst:** The incumbent provides operational, management and program analysis and other staff support to the Area Director. Serves as a workload coordinator for the area. Assists in the coordination of operations, security and appraisal activities associated with the functioning of field installations within the AD's designated geographic area of responsibility. The incumbent continuously monitors office performance and after analysis, provides and negotiates acceptance of recommendations that result in more effective operations and better service to the public. Provides information and assistance to district management in a variety of areas. May handle some or all of the ADO's administrative responsibilities in budget, overtime, FTE control and training.

**GS-5/7/9 Management Analyst:** The incumbent serves as the primary liaison between the area field offices and the regional office for the Area Director (AD) on activities relating to staffing, budget, and other administrative issues. Within established guidelines, the incumbent exercises appropriate judgment, establishes work priorities to meet various problems and situations, and ensures that priorities are maintained.

**GS-11/12 Area Work Incentives Coordinator:** The incumbent provides staff support to the Area Director (AD) to ensure consistency of interpretation, coordination, application and dissemination of the Social Security Administration's (SSA) work incentives provisions, focusing on those contained in the Ticket to Work and Self-Sufficiency Program and the Work Incentives Outreach Program statutes. In conjunction with other AWICs, participates in the development, administration and assessment of Area policies and procedures to ensure that they are consistent with, and supportive of, Regional and National work incentive goals. The incumbent serves as the Area expert on Title II and Title XVI work incentives and processes and return to work issues, and as the focal point for their dissemination throughout the Area to entities such as: field office (FO) management and key staff; employment support agencies, organizations and advocacy groups; and Ticket partners, Program Navigators, grantees, private employers and congressional staffs.

- **NOTE:** While this position is organizationally located under the Area Director's Office (ADO), incumbents in this position are out-stationed in the Field Offices (FOs).

**GS-12 Public Affairs Specialist:** This position supports an Area Director's office whose jurisdiction encompasses a major metropolitan area or an equivalent serviced population. The incumbent is responsible for the planning, developing, organizing and implementing of all major media and special interest group contacts throughout the Area Director's jurisdiction. By developing, implementing, maintaining and modifying a proactive and aggressive public information/public relations (PI/PR) program, the incumbent ensures that the public is properly informed as to the solvency, direction and purpose of SSA programs.

- **NOTE:** While this position is organizationally located under the Area Director's Office (ADO), incumbents in this position are out-stationed in the Field Offices (FOs).

**GS-12 Plan for Achieving Self-Support (PASS) Specialist:** The incumbent serves as an expert on the Plan to Achieve Self Support (PASS) provision of the Supplemental Security Income program. Independently provides technical guidance in self-support plan development; approves or denies self-support plans; and initiates, coordinates and conducts training and outreach seminars on PASS and other work incentive opportunities.

- **NOTE:** The incumbent may work for a Program Service Center, Area Director's Office, Field Office or a Regional Office.

## **FIELD OFFICE (FO) POSITIONS**

**GS-14 (Level 1 Office); GS-13 (Level 2 Office) District Manager (DM):** The DM is responsible for administering all phases of the programs of the Social Security Administration within a designated service area. He/she plans, organizes, directs and controls program activities in one or more offices; provides managerial and administrative oversight over all resources of the office, including facility services, equipment, security, and staff; exercises responsibility for public information/public relations, regularly conducts negotiations, and may maintain liaison with most of the principal administrators of State agencies; coordinates social security program matters with a substantial number of large employers, colleges, institutions, and other governmental agencies; participates in local programs related community activities.

**GS-13 (Level 1 Office); GS-12 (Level 2 Office) Assistant District Manager (ADM):** The ADM serves as full deputy and "alter ego" to the District Manager and is responsible and accountable for the overall program management, direction, planning, objectives, policy-making, and coordination of a field office. The ADM assumes full responsibility for operations in the absence of the District Manager and acts on all matters with full authority of commitment within assigned jurisdiction.

**GS-12 Operations Supervisor (OS):** The OS provides administrative and managerial assistance in all phases of the programs administered by the Social Security Administration. Participates in planning, organizing, directing and accomplishing management objectives as part of the management staff; provides first-line supervision of the performance and conduct of subordinate staff by providing technical guidance, training and administrative oversight to a typical staff of Technical Experts, Claims Specialists, Customer Service Representatives, and other support staff.

**GS-11/12 Management Support Specialist (MSS):** The MSS functions as a leader of Claims Specialists and other employees in area field offices and provides administrative support; in many offices, the MSS duties mirror those of an Operations Supervisor, however an MSS can only participate in employee performance discussions and not sign off as the official appraiser.

**GS-9/11/12 Systems Coordinator (SYSCO):** The SYSCO provides direction and support to assigned organizations for all matters pertaining to the delivery of Social Security programs and services using automated and electronic processing systems. This involves testing (i.e. piloting, proof of concepts), implementing and maintaining systems including all related hardware/software, telecommunications, and security protocols. Responsibilities may also include automation training encompassing the use of new hardware devices, automated tools, workload processing or control systems, and related management information. The SYSCO serves as a liaison on systems issues among local, regional, and headquarters staff, other SSA components and outside entities such as Disability Determination Services, private employers, vendors, and state/local government agencies.

- **NOTE:** The position is located in multiple components throughout the Operations structure, including Field Offices (FOs), Program Service Centers (PSCs), and Teleservice Centers (TSCs).

**GS-12 Claims Technical Expert (CTE):** The CTE provides a focal point for ensuring high quality case processing by technical leadership for Title II, Title XVI, and/or Title XVIII claims issues, by consultation and technical mentoring of other employees, and by coordination of new initiatives and workload projects. In addition, the CTE serves as an expert who develops and adjudicates claims, reconsiderations, and post-entitlement workloads including the most complex claims for SSA programs and cases associated with high profile or sensitive workloads, domestically and/or internationally.

- **NOTE:** The position is located in multiple components throughout the Operations structure, including Field Offices (FOs), Program Service Centers (PSCs), and Teleservice Centers (TSCs).

**GS-5/7/9/11 Claims Specialist (CS):** The CS is a keystone position of the Social Security Administration that authorizes entitlements to programs administered by the agency. The CS reviews and authorizes claims and other complex determinations for benefits under Titles II, XVI and/or XVIII of the Social Security Act.

- **NOTE:** The position is located in multiple components throughout the Operations structure, including Field Offices (FOs), Program Service Centers (PSCs), Foreign Service Posts (FSPs), Workload Service Centers (WSCs), Workload Support Units (WSUs), Teleservice Centers (TSCs) and the Office of Central Operations (OCO) Processing Centers (PCs). Performs duties involved in one or more of the following: Title II, Title XVI, XVIII, a generalist in Title II, XVI, and XVIII, a field representative, a foreign claims specialist, a claims authorization specialist in a PSC or PC, a specialist in a WSC/WSU, or a combination of the above.

**GS-9 Lead Customer Service Representative (LCSR):** The LCSR serves as the work leader and provides technical assistance and guidance to Customer Service Representatives located in multiple components throughout the Operations structure.

- **NOTE:** The position may be located in multiple components throughout the Operations structure, including Field Offices (FOs), Program Service Centers (PSCs), Foreign Service Posts (FSPs), Workload Service Centers (WSCs), Workload Support Units (WSUs), Teleservice Centers (TSCs) and the Office of Central Operations (OCO) Processing Centers (PCs). Performs duties involved in one or more of the following: a service representative in an FO, a teleservice representative in a TSC, a customer service technician in a PSC or OCO or a combination of the above.

**GS-4/5/6/7/8 Customer Service Representative (CSR):** The CSR is one of Social Security's cornerstone positions; the CSR provides a full range of assistance to beneficiaries, recipients, and the public, by telephone, in person, by correspondence, and/or through digital media, regarding all programs administered by the agency, using a wide variety of systems tools and applications.

- **NOTE:** The position may be located in multiple components throughout the Operations structure, including Field Offices (FOs), Program Service Centers (PSCs), Foreign Service Posts (FSPs), Workload Service Centers (WSCs), Workload Support Units

(WSUs), Teleservice Centers (TSCs) and the Office of Central Operations (OCO) Processing Centers (PCs). Performs duties involved in one or more of the following: a service representative in an FO, a teleservice representative in a TSC, a customer service technician in a PSC or OCO or a combination of the above.

**GS-4/5 Claims Assistant (OA):** The Claims Assistant serves as a development clerk in the field office by providing assistance to beneficiaries and inquirers as well as providing a full range of support for claims representatives and service representatives and other technical/professional positions in these offices.

**GS-6/7/8 District Office Administrative Assistant (OA):** The OA performs a variety of administrative, secretarial and clerical duties in support of the District Manager and his subordinate supervisors; keeps informed of changes in personnel regulations, policies, and procedures; alerts supervisors and employees to significant changes; initiates personnel actions for the office to establish new jobs, fill vacancies, and effect promotions.

## **DEPUTY COMMISSIONER FOR OPERATIONS SUPPORT STAFF (DCOSS) POSITIONS**

**Deputy Commissioner, Operations, SES:** The Deputy Commissioner, Operations, shares full responsibility with the Commissioner for the full range of operations functions to assure efficient and effective delivery of services to the public. The incumbent provides executive leadership, direction and coordination for the development of policies, positions and perspectives regarding the delivery of social welfare and social insurance services to the public. He/she develops operations goals and objectives and identifies current and emerging problems. The incumbent recommends, negotiates and implements actions to ensure that Social Security operations are effectively and efficiently administered.

**Assistant Deputy Commissioner, Operation, SESs:** The Assistant Deputy Commissioner, Operations (DCO) shares functional responsibilities with the Deputy Commissioner for Operations by providing executive leadership in managing the SSA operations organization. He/she assists the Deputy Commissioner in establishing overall goals and objectives, and identifies current and emerging problems. He/she provides executive leadership, direction and coordination to the development of policies, positions and perspectives with respect to the delivery of social welfare and social insurance services to the public.

**Senior Advisor to Deputy Commissioner, Operations, SES:** The Senior Advisor to the Deputy Commissioner for Operations is a key senior executive in the immediate Office of the Deputy Commissioner, Office of Operations with responsibility for representing the policy views and goals of the Deputy Commissioner for Operations. In this capacity, s/he is responsible for providing a variety of high-level advisory, coordinative, analytical and consultative services to the Deputy Commissioner and/or Assistant Deputy Commissioner for Operations and others relating to a wide range of sensitive and complex RSDI and SSI program operations and Disability Determination Services issues. This includes responsibility for overall planning and development of proposals for improvements in Agency claims processing operations, developing

consistent and equitable management philosophies, and interpreting and clarifying Agency goals in light of the overarching Agency mission.

**GS-15 Executive Officer (DCO Front Office):** The Executive Officer is responsible for providing overall direction to a staff in the immediate office of the Deputy Commissioner for Operations (DCO) responsible for providing comprehensive and authoritative staff assistance to the Deputy Commissioner. As a member of the Deputy Commissioner's top staff, directs special studies and projects either upon specific assignment by the Deputy Commissioner or upon own initiative. These special studies and projects may involve review, evaluation and recommendations for improvement in existing organizations, policies, issues and practices as well as analysis and recommendations for proposed areas. Consults and coordinates with other offices of SSA on matters of mutual concern. Serves as a personal representative of the Deputy Commissioner on various interagency and Administration-wide committees, task forces, work groups, etc., to resolve problems or plan activities of interagency and agency-wide concern/interest.

**GS-15 Senior Program Advisor (DCO Front Office):** Serves as a senior advisor to the Deputy Commissioner for Operations (DCO) and the Assistant Deputy Commissioners (ADC) on a broad range of operational initiatives and activities that have nation-wide impact. Because of Operations' size and complexity, the incumbent provides high level coordination and collaboration for complex, sensitive and unprecedented issues including but not limited to resource management, operating policy, program policy, procedures, federal state relationships, Congressional concerns, and national budget impact issues including state budget considerations, economic impact issues and sustainability. Supplies advice and guidance, not only to the DCO and Assistant Deputy Commissioners (ADCs), but also to other members of the Executive Staff, on a wide variety of Operations related policies, procedures and issues. Resolves problems that have a major impact on the Agency through the programs it administers. Serves as a special assistant to the DCO and ADCs for the overall management, direction and coordination of DCO program components and activities, including liaison for SSA region\field operations and DCO Headquarters components.

**GS-14 Project Manager (DCO Front Office):** Serves as a program expert and project manager in the Office of the Deputy Commissioner for Operations (DCO), providing program expertise, management and direction for cross-cutting activities to ensure the effectiveness and efficiency of operations under the authority of the Deputy Commissioner, nationwide. Provides technical advice and assistance to the Deputy Commissioner, Assistant Deputy Commissioner, ACs, Regional Commissioners and other DCO managers in planning, formulating and implementing administrative management policies. Provides advice on and evaluates various aspects of DCO operations to ensure effective workload or position management, work power utilization and management planning and analysis to ensure the overall effectiveness and efficiency of the regional offices, field offices, program service centers, teleservice centers and headquarters staff.

**GS-13 Executive Assistant (DCO Front Office):** Provides technical and administrative advice and assistance to the Deputy Commissioner, operations, in a wide range of sensitive and complex assignments. Carries out, coordinates and prepares reports on a variety of special projects and assignments on behalf of the Deputy Commissioner which include studies or assignments that do not fall within the jurisdiction of a specific component, at times including several SSA offices

and the regions, or that involve controversial, sensitive or confidential matters or matters of extreme urgency and highest priority. Requests, organizes, and researches background and briefing material on management and operational matters for use by the Deputy Commissioner. Receives Deputy Commissioner correspondence after initial secretarial screening. Analyzes the correspondence both to keep on top of evolving issues and to determine what needs the Deputy's personal attention. Resolves many issues and problems or develops information to the point of a decision by the Deputy.

**Associate Commissioner (Office of Public Service and Operations Support, Office of Customer Service, Office of Electronic Services and Technology, Office of Disability Determinations), SES:**

- **OPSOS:** The Associate Commissioner (AC) for the Office of Public Service and Operations Support, is responsible for providing operations analysis, program integration and management planning and analysis in support of the Deputy Commissioner, Operations, (DCO) and for conducting studies and analyses related to the overall effectiveness and efficiency of the regional offices, district/branch offices, teleservice centers, processing centers and the Office of Central Operations. The incumbent directs and/or coordinates all internal management support functions to ensure effective position management, manpower utilization and management planning and analysis.
- **OCS:** The Associate Commissioner for Customer Service is responsible for providing leadership in the design, implementation, oversight, and re-engineering of business processes that affect the customer experience. The incumbent plans, organizes and directs all activities of the Office of Customer Service and is directly responsible for the accomplishment of the organization's mission by monitoring service delivery and performance, analyzing customer feedback, and identifying solutions that improve the customer's experience through a wide range of service delivery channels. The incumbent provides broad operational support in the areas of service delivery plans, operational strategies, and quality. This includes national oversight and direct support for SSA's Call Answering Sites, Field Offices (FOs), Workload Support Units (WSUs), and Program Service Centers (PSCs). This also includes evaluating SSA's telephone service to the public delivered by the National 800 Number (N8NN) and field office networks.
- **OEST:** The Associate Commissioner for Electronic Services and Technology is the agency's lead executive for the development and implementation of programmatic electronic services that advance the efficient delivery of services to the public. This includes coordinating the overall agency requirements and fostering a collaborative framework among various agency components involved with electronic service delivery. The incumbent oversees the work of an organization responsible for defining the Office of Operations' requirements for software, hardware, and electronic service delivery support and, in collaboration with the agency's Office of Systems, for ensuring that the most state-of-the-art

technology is integrated into the operations across all components of the Office of Operations.

- **ODD:** The Associate Commissioner for Disability Determinations is the executive responsible and accountable for all operational standards, instructions, operational and procedural advice, technical support, and management direction to Social Security Administration headquarters, regional office and field components, and State agencies in support of the SSA-administered disability programs. The incumbent oversees the processing of State agency workloads on a temporary or transitional basis and evaluates the impact of policy and procedural changes on State agency operations.

**Deputy Associate Commissioner (OPSOS, OCS, OEST, ODD), SES:** Incumbent serves as full deputy and “alter-ego” to the Associate Commissioner. In the absence of the Associate Commissioner, the incumbent assumes full responsibility for Office operations and acts on any and all matters with full authority of commitment on matters within the jurisdiction of the Associate Commissioner.

**GS-15 Senior Advisor, Senior Customer Contact Officer, or Project Leader (OPSOS, OEST, OCS, ODD, DCPS-CPO):** The incumbent serves as the principal technical advisor to the Associate Commissioner and the Deputy Associate Commissioners on agency-level program issues and concerns that are of major significance. The incumbent directs major ad hoc initiative for the Associate Commissioner and/or the Deputy Commissioner for Operations (DCO), which usually cut across functional, program and/or interdisciplinary lines and deal with very broad agency-wide concerns that are of major significance. The incumbent handles sensitive and complex issues with discretion and good judgment in all phases of staff activities.

**GS-15 Senior Budget Advisor (OPSOS):** Serves as the focal point for Operations for near-term and long-term strategic planning activities and initiatives affecting nation-wide Operations activities. Ensures that the DCO budget process focuses resources on priority initiatives that support DCO’s strategic objectives and goals. Directs the tracking of DCO performance in relation to established performance measures.

**GS-15 DCO Staff Director, HR (OPSOS):** Serves as the Deputy Commissioner for Operations’ (DCOs’) Senior Advisor and Staff Director for Human Resources (HR). The incumbent is a functional leader and focal point for the resolution of a wide range of difficult and intractable HR management issues for the Associate Commissioner (AC) for the Office of Public Service and Operations Support (OPSOS) and, through that position, to the DCO. DCO HR management issues encompass the following areas: recruitment, retention, merit promotion, technical training, management and leadership training, employee development, awards pay, payroll processing and administration, benefits, work/life issues, performance management, employee relations, classification and personnel administration, HR automation, competitive sourcing, equal employment opportunity and other human capital initiatives. The work involves providing leadership and supervision to a small staff of subordinate employees and functional leadership to the Regional Human Resource Centers nationwide on a wide range of DCO HR management program policies, initiatives, legislative, litigation and procedural changes.

**GS-15 Chief Program Officer (Disability Case Processing System Staff—DCPS):** This position is located in the Chief Program Office for Disability Case Processing Systems (DCPS), Office of the Deputy Commissioner for Operations (DCO). The DCPS program is a multi-year effort to simplify disability determination processing by transitioning from multiple DDS legacy systems to a modern, common case processing system. The incumbent directs major ad hoc initiatives for DCPS, which usually cut across functional, program and/or interdisciplinary lines and may include, but not limited to, any of the following matters: audits, policies related to SSA programs, quality of service, service delivery methods, facilities and security matters, labor relations, staffing, component workflow and controls, and other assigned projects. The incumbent handles sensitive and complex issues with discretion and good judgment in all phases of staff activities. The incumbent is responsible for exercising executive leadership for the consistent support and efficient planning of DCPS's comprehensive planning and resource support necessary to ensure accomplishment of this multi-year initiative.

**GS-15 Supervisory Management/Program Analyst, Division or Center Director (OPSOS, OCS, DCPS-CPO, OEST, ODD):** As a Staff Director provides leadership to staffs involved in internal management support functions to ensure effective position management, workforce utilization and management planning and analysis. Serves as a principal advisor to the AC and Deputy AC on matters related to the ongoing operations of assigned functions.

**GS-15 IT Specialist (Chief Scrum Master) (DCPS-CPO):** Incumbent provides executive leadership, direction and authoritative advice to the Chief Program Officer (CPO) and Deputy CPO. Serves as the Chief Scrum Master and the Agile software development program manager for the Disability Case Processing System (DCPS) program, which is a multi-year IT project to create the program. Through the analysis, planning, and documentation of the DCPS requirements, the incumbent works to ensure compliance with policies, standards, and infrastructures that establish the framework for the DCPS program, which is both national and international in scope. Incumbent leads, coordinates, communicates, integrates and works to ensure alignment with critical agency priorities and the agency's strategic plan. Responsible for ensuring the work efforts achieve the outcome specified within the agency's strategic plan, including appropriate strategic, life cycle management and capital IT investment plans. Work includes project prioritization, evaluation and monitoring, cost schedule management, risk management, quality management and resource allocations.

**GS-15 IT Specialist (Chief Architect) (DCPS-CPO):** The primary purpose of this position is to serve as the Chief Architect and technical overseer for the DCPS program, to ensure integration of the new technology and system into legacy systems and provides national technical leadership into the acquisition of new technical capabilities.

**GS-15 Operations Analyst Expert (OEST):** The incumbent serves as the Operations national lead for regional applications development initiative and may direct other major ad hoc initiatives for the Associate Commissioner or the Deputy Commissioner for Operations (DCO), which usually cut across functional, program and/or interdisciplinary lines and deal with very broad agency-wide concerns that are of major significance. The incumbent serves as the principal technical adviser to the AC and the Deputy AC for assigned projects/studies. The ad hoc projects usually cut across functional, program and/or interdisciplinary lines and deal with very broad agency-wide concerns that are of major significance. The incumbent plans and carries out infrastructure and application projects and initiatives, while ensuring integrated service delivery. Develops and assesses infrastructure project plans and logistics from the point

of view of regional support staffs and end users. The incumbent evaluates project proposals from both the technical and requirements perspective-enabling executives to make key decisions regarding IT strategy.

**GS-14 Executive Officer (DCPS-CPO, OPSOS, OCS, OEST, ODD):** Provides assistance to the Associate Commissioner (AC) and Deputy Associate Commissioner in the overall management and direction of the office. Performs a variety of high-level coordinative, analytical, consultative and advisory services relating to the management and operations of the Office. Acts for or assists the AC/Deputy in managing, coordinating, monitoring, formulating, evaluating and implementing plans for achieving immediate and long-range Office goals and objectives. Provides advice, guidance and assistance to the AC/Deputy in planning, formulating and directing the development and implementation of policies, procedures and systems needed to support office operations.

**GS-14 Deputy Division Director (ODD, OPSOS, OEST):** Serves as full deputy and "alter ego" to the Director, and is responsible and accountable for the overall program management, direction, planning, objectives, policy-making and coordination of the Division. Assumes full responsibility for operations in the absence of the Director and acts on all matters with full authority of commitment within assigned jurisdiction. The incumbent performs confidential and sensitive assignments for the Director and speaks on his/her behalf at internal and external meetings and conferences. The incumbent fulfills the responsibility of this position by either fully sharing with the manager the direction of all phases of the Division's workload or by having continuing responsibility for managing a major part of the Division's workload with total authority and responsibility equally divided between the division director and the deputy.

**GS-14 Technical Expert/Advisor, Lead Program Analyst (ODD, DCPS-CPO, OPSOS, OEST):** Serves as a principal and technical advisor to the Division Director on broad agency-wide initiatives that are of major significance. Provides a variety of high level coordinative, analytical, consultative and advisory services to management related to very visible and complex program initiatives. Provides oral and written reports and conducts briefings on behalf of the Division Director.

**GS-14 Systems Security Technical Specialist (OPSOS):** The incumbent of this position serves as a systems security specialist sharing technical expertise with all DCO regions, components and headquarters DCO Division of Systems Security and Program Integrity (DSSPI) responsible for the tracking, mitigating and validating of system vulnerabilities within DCO. The incumbent is responsible for advising, consulting, and being on the cutting edge of systems security technical policy development and communication in the SSA Operations systems security area; and, its training and awareness programs. In addition, the incumbent provides a variety of analytical, consultative, systems security related and advisory services to Office of Public Service and Operations Support (OPSOS) management.

**GS-14 Team Leader/Project Manager (ODD, DCPS-CPO, OPSOS, OEST):** Plans, organizes and provides direction to a team or teams of specialists providing program expertise, management direction and oversight for cross-cutting segments of operational and programmatic activities for DCO. Ensures that work assignments/projects are carried out by arranging the work among employees to allow timely completion and adequate work for each employee; keeps up

with the status of the work, making appropriate adjustments in accordance with priorities and reports to the AC/Deputy on controversial issues that may arise. Ensures final implementation of approved recommendations.

**GS-14 Branch Chief (DCPS-CPO, OCS):** Provides technical direction and supervision to subordinate staff. Sets priorities and establishes schedules for completion of work, and makes assignments based on priorities, relative difficulty of the assignment and the varying capabilities of the employee. Furnishes advice to the Division Director and other officials on unique or complex programmatic systems problems and issues, and identifies and recommends improvements and changes. Participates with the Division Director in planning and setting overall objectives, plans and policies and contributes to the development, as well as budget/resource projections. Makes decisions on work problems presented by branch members. Collaborates with other branch chiefs and supervisors within DCO to negotiate and/or coordinate work-related changes impacting other organizations. Advises higher echelons of the status of the work assigned, how it relates to the overall mission and what impact or conflicts exist.

**GS-13/14 Operations Leadership Development Program Candidate (DRIVE Program):** The purpose of the program is to provide the candidate, through developmental assignments, with the opportunities to develop the SSA Executive Core Qualifications necessary to become a potential future Operations leader. The candidate participates in the program for one year and selects two developmental assignments along with formal training experiences. are individually tailored to enable the candidate to experience/achieve the goals outlined in the approved Individual Development Plan (IDP). As the program is designed to hone leadership abilities, work assignments maybe supervisory in nature. The length and scope of assignments will vary with the background, work experience and needs of the candidate.

**GS-13/14 IT Specialist (DCPS-CPO):** Serves as a principal planner and advisor to the Office of the Chief Program Officer (CPO) management, working with senior technical and managerial representatives in the development of integrated systems directives, standards, specifications, policies, implementation strategies, management guidelines, procedures, or practices and/or in new developments and advanced techniques in an IT specialty area. Designs and conducts comprehensive agency-wide studies and evaluations, and plans, organizes, and directs studies to develop long range (e.g., 5 to 10 year) IT forecasts and recommendations affecting broad areas of future operations.

**GS-11/12/13 Program/Management Analyst (DCPS-CPO, OPSOS, OEST, ODD):** Serves as a senior analyst in the DCOSS Division, with responsibility for planning, coordinating, and conducting broad studies and analyses related to a variety of initiatives. Conducts analysis of SSA-wide initiatives and identifies activities, issues, potential conflicts and interdependencies that affect the mission, goals and strategic objectives of DCO. Provides expert advice and guidance to OPSOS and DCO management.

**GS-13 Management and Program Analyst (OCS):** The incumbent initiates, plans and independently completes major complex/technical studies of initiatives related to the effective management, operation and future direction of tele-services provided by the national 800 number and FOs. Prepares and reviews written reports and decision papers and conducts briefings, making recommendations for consideration by the Associate Commissioner, Deputy Associate

Commissioner and Center Director. Plans and initiates studies and strategies to implement new and expanded services on the national 800 number network including computer telephone integration. Evaluates pilots and tests to ascertain technological/cost/program efficiency, effectiveness, customer demand and customer satisfaction. Identifies dependencies, impacts and requirements for national rollout.

**GS-13 Systems Analyst (OEST):** The purpose of the position is to contribute to the development of applications and automated business processes that improve the organization's efficiency in accomplishing a wide variety of functions and activities and to provide technical support to management and staff. The incumbent will assist and support the senior systems analyst, in research, technical assessment and security analysis of automated systems.

**GS-13 Financial Specialist (ODD):** The incumbent serves as a senior analyst, with responsibility for monitoring, analyzing, and formulating a variety of fiscal and budgetary issues relating to the disability determination services (DDS). Also, provides guidance and direction to lower level analysts in OFDO regarding DDS financial activities. This includes advice and guidance on DDS fiscal and budgetary matters, preparing fiscal related instructions, procedures, regulations and guides for regional offices and DDSs. The incumbent also has responsibility for major projects and initiatives for which OFDO is responsible. Participates in the development, administration and assessment of policies and procedures related to DCO's management planning and analysis programs.

**GS-13 Program Expert (DCPS-CPO):** The incumbent serves as a senior analyst and/or a recognized program expert in Disability Case Processing System (DCPS) Staff. Responsible for major projects and broad studies pertaining to the development, evaluation, interpretation and maintenance of disability evaluation policy and procedures for administration at all Federal and State levels of the Social Security Disability Insurance Program and the Supplemental Security Income Program for the blind and disabled under title II and title XVI of the Social Security Act.

**GS-12 Management and Acquisition Analyst (DCPS-CPO):** The incumbent serves as a Management Analyst with the responsibility for analyzing, planning, developing, evaluating, coordinating and monitoring management and procurement activities. Duties includes the continuing review of existing systems, requests for enhancements to existing systems and requests for new systems. The employee performs a variety of coordinative and advisory services relating to administration, management, and acquisition operations of Disability Case Processing System (DCPS).

**GS-9/11 Administrative Specialist/Staff Assistant (DCPS-CPO, OCS, ODD):** Serves as a staff assistant in the Office of the Associate Commissioner. Provides staff assistance to the Associate Commissioner by performing a wide variety of coordinative, liaison, administrative, and workflow control services essential to the effective operation of the office.

- Diana Andrews, Assistant Deputy Commissioner
- Tom Grzymiski, Assistant Deputy Commissioner
- Herb Strauss, Deputy Chief Information Officer & Senior Agency Official for Cybersecurity
- John Morenz, Chief Technology Officer

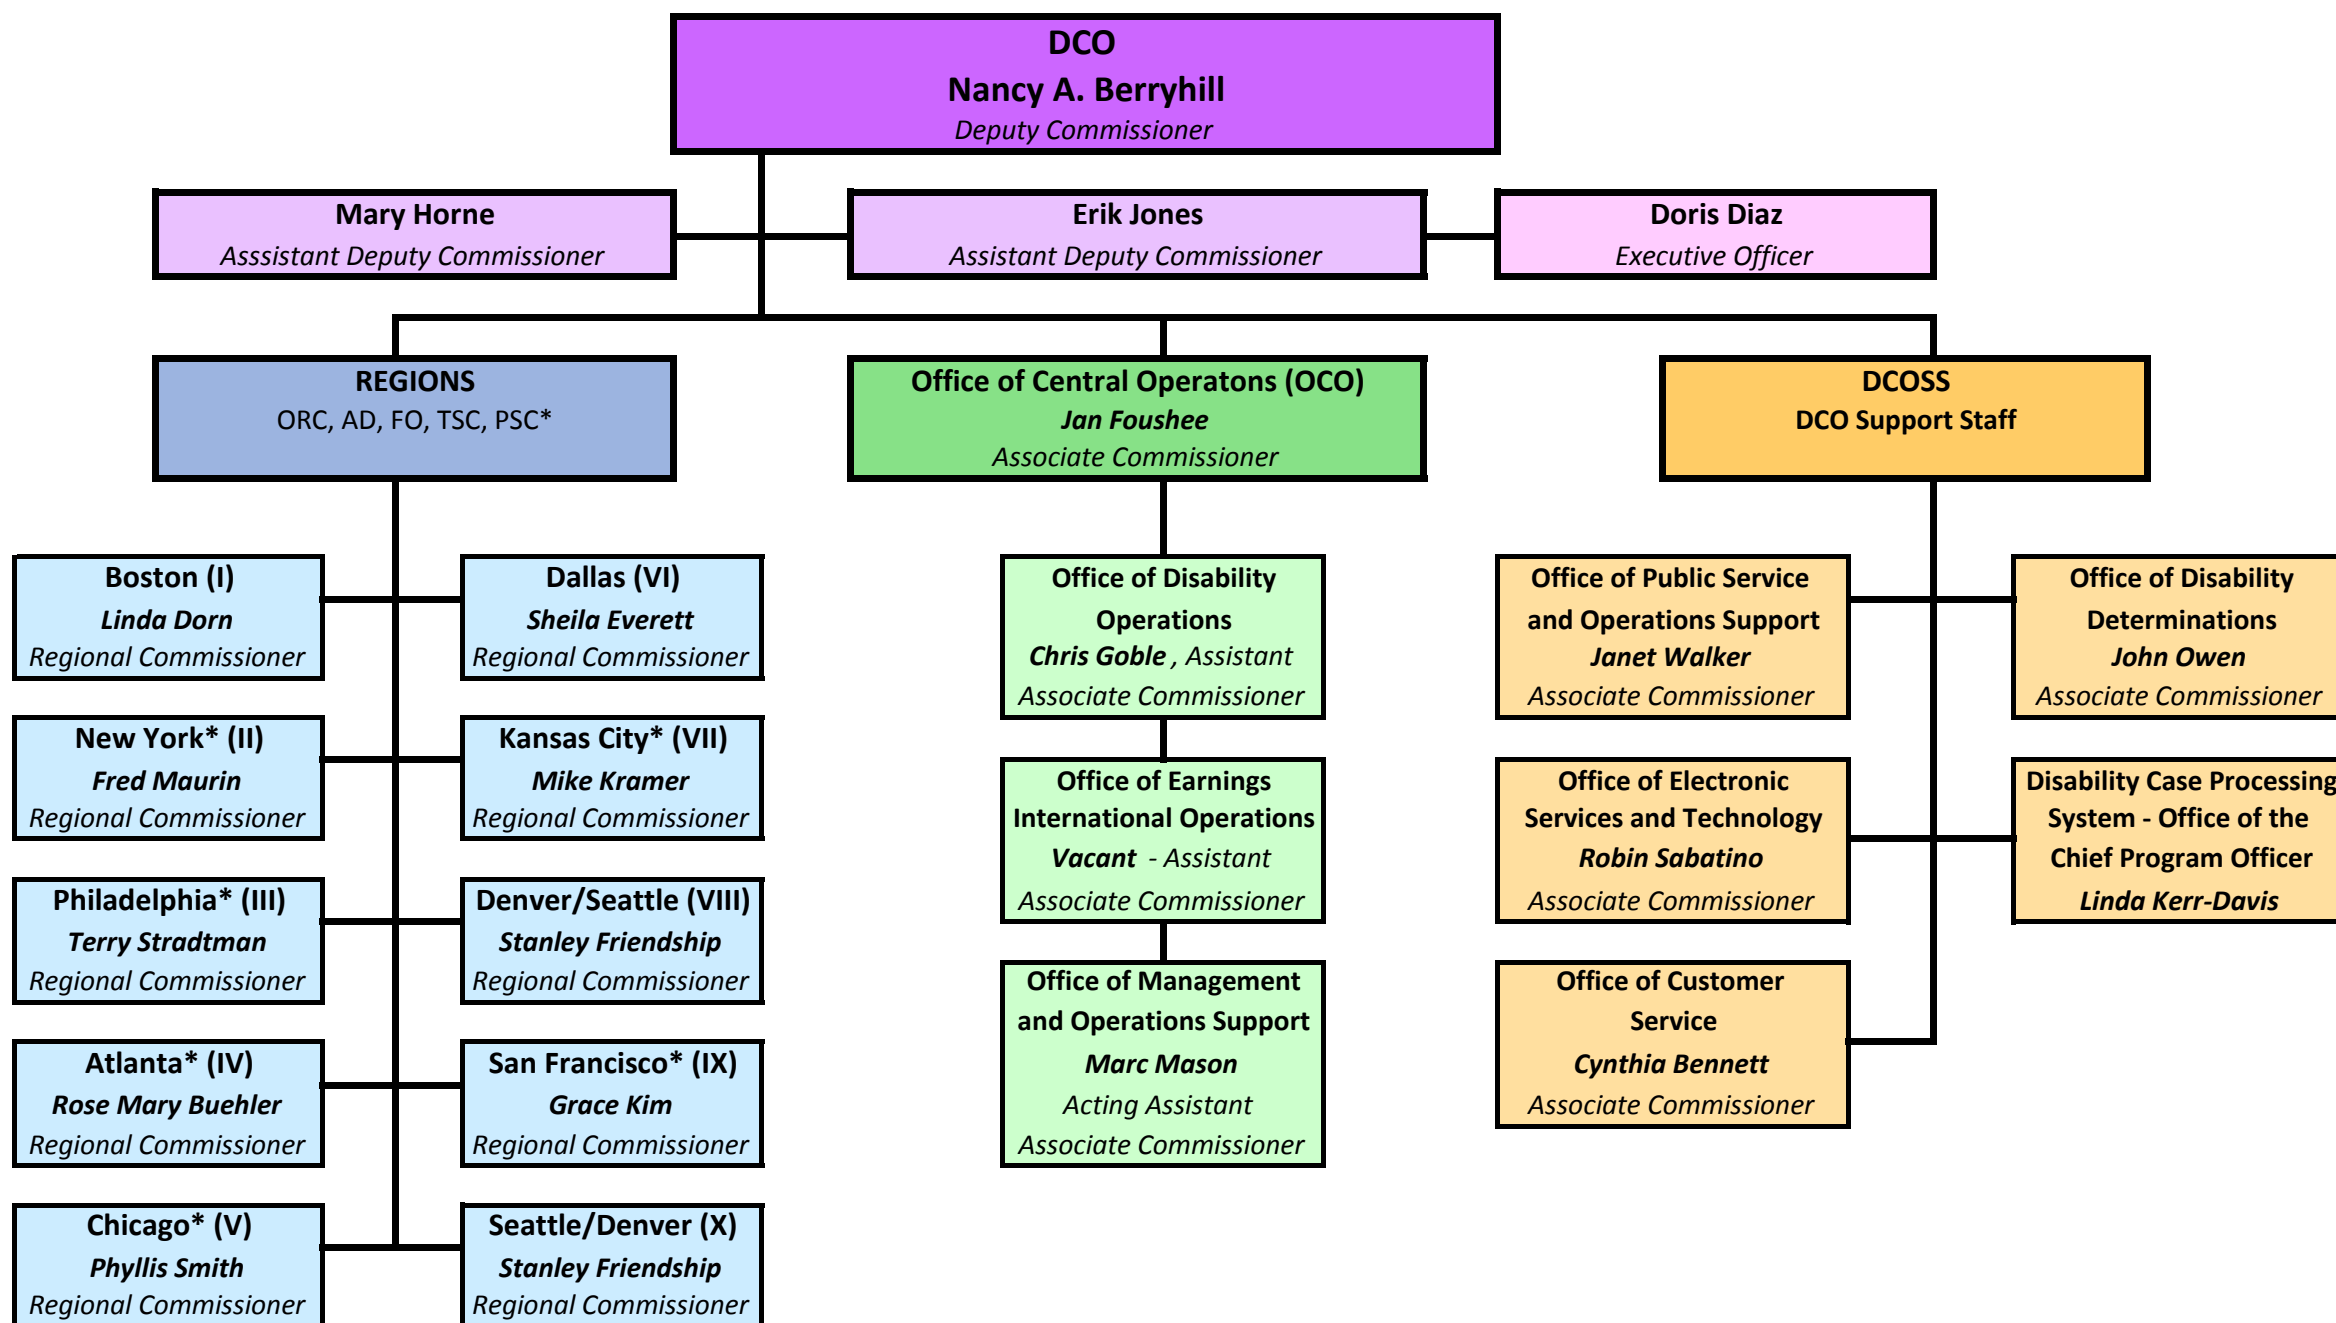

### ➤ Reporting Structure & Functional Overview

- Office of IT Business Support (OITBS) – Sylviane Haldiman — Customer-facing component that interfaces with our business customers and identifies their needs to capture their business requirements and clearly describe what we can do to support these requirements.
  - The following Associate Commissioner-Level components report to OITBS:
    - Office of IT Enterprise Business Support
    - Office of IT Financial Management and Support
    - Office of IT Programmatic Business Support
- Office of Software Engineering (OSE) – Diana Andrews — Develops and provides the software systems and services the business community requires.
  - The following Associate Commissioner-Level components report to OSE:
    - Office of Benefit Information Systems
    - Office of Disability Information Systems
    - Office of Enterprise Information Systems
    - Office of Systems Architecture
- Office of Systems Operations and Hardware Engineering (OSOHE) – Tom Grzymiski — Designs, builds, tests, delivers, operates, manages, and monitors the agency's IT infrastructure.
  - The following Associate Commissioner-Level components report to OSOHE:
    - Office of Hardware Engineering
    - Office of Systems Operations
- Office of Cybersecurity – Herb Strauss — Manages the agency's Cybersecurity Program to protect our information technology resources and data, manage risk and enable the agency's business mission.
  - The following Associate Commissioner-Level component reports to the Office of Cybersecurity:
    - Office of Information Security
- Office of the Chief Technology Officer – John Morenz — Ensures that the agency IT architecture can support the agency's growing and changing needs by leading

technology initiatives to improve the digital services we offer and by developing more effective user interfaces for customer- and business-facing applications.

- 5,647 Staff
  - 3,247 federal employees
  - 2,400 contractors
  
- Staff Locations
  - Main Headquarters complex, Woodlawn, MD
  - National Computer Center, Woodlawn, MD
  - Meadows East Building, Woodlawn, MD
  - Research Triangle Park, Durham, NC
  - 2 Data Centers
    - National Support Center (NSC) in Urbana, MD
      - Occupied in 2015
    - Second Support Center (SSC) in Durham, NC
      - Occupied in 2010
  - 6 Remote Operation Communication Centers
    - Birmingham, AL in the Southeastern Program Service Center (PSC)
    - Chicago, IL in the Great Lakes PSC
    - Kansas City, MO in the Mid-America PSC
    - New York, NY in the Northeastern PSC
    - Philadelphia, PA in the Mid-Atlantic PSC
    - San Francisco, CA in the Western PSC

## **Data Analytics in Disability Adjudication**

### **Prepared by the Office of Adjudication and Review**

The Appeals Council has used a panoply of data analytics and computer analysis techniques to supplement our subject matter expertise in investigating, isolating, and resolve issues in disability adjudication. For many years the data analytics used were largely descriptive of the main features of the collected data – numbers of cases processed, processing time averages, etc. In the last 10 years, the Council has branched into exploratory (finding unknown relationships in data), inferential (estimating characteristics from some data and applying it more broadly to a larger population), causal (determining how a change in one variable relates to changes in others) and predictive analytics (using historical information to predict future events). The Council also has actively participated in building a variety of tools to assist adjudicators in case processing. Most recently, the Council has begun exploring machine learning techniques.

The specific technique used to identify or resolve a problem in adjudication is dependent on the type of issues involved. The techniques are selected from what might be described as a continuum of math and computer analysis techniques that range from summarization of information to machine learning. More specifically, we have used algebraic functions, multivariable calculus, descriptive and inferential statistics, as well as supervised and unsupervised machine learning. The techniques we use are dependent upon the types of problems we are attempting to solve. We typically use SAS, R, Matlab, and/or Excel, and our staff has done some computer programming in Python and JavaScript in support of our natural language processing efforts. We also have had good success in visualizing our results. Our subject matter expertise has enabled us to use the analytical results to improve management of the program, training of the staff, and development of analytical tools, and has helped inform policy construction.

Several data analytics efforts currently underway hold some promise for assisting with the hearings workload. Council staff is working with the Analytics Center for Excellence (ACE) to develop national and regional scheduling models to overcome problems with local hearing scheduling. The Council is undertaking a naïve Bayes analysis to score pending hearing level cases on the basis of complexity, which perhaps can be used to identify cases for fast-track processing. The Council is working with the ACE and the Office of Research, Evaluation and Statistics (ORES) on a Bayesian univariate probit analysis of the hearing workload to identify cases that can be paid without a hearing. The Council is also analyzing the regulation basis codes of the hearing workload to identify cases that were determined in a non-policy compliant

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

manner at the initial and reconsideration levels so those cases can be informally remanded for policy compliant determinations. The Council also has a developed natural language processing and machine learning powered tool to assist in the analysis of the policy compliance of hearing decisions, and has worked with ORES to identify cases for selective sampling review based on specific known types of policy non-compliant decisions in order to take corrective actions in those cases. Additionally, the Council has tested a Bayesian multivariate probit analysis shown capable of identifying clusters of cases with similar characteristics. This technology enabled differential case management at the Council, and had the effect of reducing processing time and improving quality. A new analysis of the current workload will be conducted upon completion of the Bayesian univariate probit analysis of the hearing workload. Finally, the Council is well positioned to develop a Bayesian belief network, that ultimately could facilitate machine learning, natural language processing, and likely more sophisticated artificial intelligence applications having the potential to read and analyze the medical evidence, which would greatly speed case processing while improving quality and reducing costs.

# Cyber Security Critical Priorities

## 1. Identity Management (IdM)

### Ecosystem

Unify multiple discrete IdM initiatives and activities to enable desired security and business outcomes

## 2. Federal Cyber Marathon

Become the Exemplary Model for FISMA, FITARA, Federal Cyber Strategy, President's Management Council, Cross Agency Priority goals

## 3. Policy Ecosystem & Security One Stop

Comprehensive Policy development and IT Security Services to our customers

## 4. IT Modernization

Enable Business IT initiatives, e.g. cloud, big data, data analytics, via security assessments, authorizations, and services

## 5. Cyber Defense Operations Center (CDOC)

State-of-the-art continuous monitoring, intrusion detection, vulnerability assessments and incident response

## 6. Security Integrity Center (SIC)

Process Security Operational Workloads, to ensure highest standards of data security using advanced technologies and capabilities

## 7. Cyber Workforce Framework

Attract, Engage, Retain and Develop the Best People

## 8. Cyber Academy

Optimize Education and Training of Our Cybersecurity Staff for Multiple Disciplines

## **Information on Sampling and Response Rates for Satisfaction Surveys**

### **Online Surveys**

The sampling rate for the online surveys varies with the eService. High-volume services have lower sampling rates (e.g., main site is at 5 percent, mySSA is at 15 percent, and iClaim is at 25 percent). Lower volume services are sampled at a higher rate (e.g., “Extra Help” Medicare Part D Subsidy is at 100 percent, Business Services Online is at 50 percent).

Response rates are typically in the mid-70 percent range, with FY 2016 being between the low of 67 percent (iAppeals) to a high of 79 percent (“Extra Help”).

### **800 Number Caller Survey**

We attempted to reach a random sample of 4,000 callers who contacted the national 800 number during a 4-week period in March 2016. We conducted the survey by telephone with 1,408 customers representing a 41 percent response rate after adjustment of the initial sample size to 3,439 based on elimination of “out of scope” calls.<sup>1</sup>

### **Field Office Caller Survey**

We attempted to reach a random sample of 4,000 callers who contacted one of 110 randomly selected FOs during a 4-week period in April 2016. We conducted the survey by telephone with 1,185 customers representing a 37 percent response rate after adjustment of the initial sample size to 3,217 based on elimination of “out of scope” calls.

### **Field and Hearing Office Visitor Survey**

We attempted to reach a random sample of 5,890 customers who visited 1 of 52 FOs or 13 HOs (both randomly selected each year) during a 4-week period from late October through mid-November 2015. We conducted the survey by mail with 1,967 customers representing a 37 percent response rate after adjustment of the initial sample size to 5,371 based on elimination of “out of scope” calls.

---

<sup>1</sup> “Out of scope” calls are mainly those originating from business or public telephones (where it is generally impossible to identify the person who made the call) and calls from nonworking numbers. Other “out of scope” calls include those made by callers who were unable to participate due to an impairment, language barrier, or permanent unavailability (death, in jail, hospitalized, etc.), numbers blocked by caller ID, telephone numbers belonging to facsimile machines, and calls that were made by mistake.

## **Social Security Card Center Survey**

We attempted to reach a random sample of 5,000 customers who visited one of the SSCCs during a 4-week period in March and April 2016. We conducted the survey by mail with 1,003 customers representing a 21 percent response rate after adjustment of the initial sample size to 4,798 based on elimination of “out of scope” calls.

## **DCO (Non-Headquarters) Components and Facilities**

### **Regional Offices (RO)**

The Office of the Regional Commissioner (ORC) serves as the principal SSA component in each of SSA's ten regions. Each ORC ensures effective SSA interaction with other Federal and local government agencies, State welfare agencies, State Disability Determination Services (DDS) and regional and local organizations. The ORC also issues supplementary operating policies and procedures for SSA's programs that target their specific regional needs. The ORC directs a region-wide network of Area Director Offices (ADO), Field Offices (FO), teleservice centers (TSC) and, in each of the six regions where present, a Program Service Center (PSC). It provides overall management direction for the provision of personnel services and administrative support to SSA regional components and implements a regional SSA public affairs program.

### **Area Director's Offices (ADO)**

Area Directors ensure FO managers are carrying out their assigned responsibilities fully and effectively and provide support for sensitive issues. The office ensures sound working relationships are established and maintained between field offices and many entities, such as DDSs, large employers, unions, medical associations and organizations, Federal, State, and local agencies, and major information media. The ADO facilitates the administration of programs to obtain the advantages of coordinated, area-wide effort in such fields as public affairs, community relations, recruiting, training, career development, equal opportunity and parallel functions. There are 51 Area Offices throughout the nation.

### **Field Offices (FO) – Primary Customer: Walk-in Visitors**

Field offices are geographically located to provide citizen's access to in-person, face-to-face Social Security services. Technicians in each SSA FO are trained to handle the wide scope of SSA responsibilities. These may include: providing general information on all the programs SSA administers; providing speakers for informational events; serving those who wish to file for retirement, survivor, disability, or Medicare benefits; providing assistance to resolve issues involving address or bank changes, lost checks, and applying for or replacing Social Security number cards. The FO also offers citizens the opportunity to complete business via local telephone service, Video Service Delivery for transacting business with other SSA entities and ability to use a Self-Help computer to complete SSA business. There are approximately 1200 FOs throughout the nation.

**Card Centers – Primary Customer: Walk-in Visitors**

Card centers are unique SSA FOs designed for one exclusive purpose – receive and process applications for Social Security numbers (i.e., Enumeration) and replacement cards. Card centers are located in metropolitan areas with high volume demand for Social Security card processing requests. We have 14 card centers in the following areas: several cities in California and New York; Phoenix, AZ; Orlando, FL; Minneapolis, MN; Las Vegas, NV; and Philadelphia, PA.

**Workload Support Units (WSU) – Primary Customer – Internet User**

Since the inception of iClaim (filing a claim online) in 2000, we have seen the public's service channel preferences continue to evolve to include online service as the faster and more convenient service channel. In support of that shift and expectations that trend will continue, our Workload Support Units (WSU) process work generated through the internet – just as a field office, but virtually – and perform other work that does not require face-to-face contact, increasing customer convenience and reducing FO traffic. We have 16 WSUs nationally.

**Teleservice Center (TSC) Primary Customer – Callers**

The Teleservice Center (TSC) is the primary public contact point for most persons who call SSA via the nationwide "800" telephone number (1-800-SSA-1213). Telephone technicians assist the public when they call our 800 number to obtain information, schedule appointments, or resolve issues with benefits. These employees assist the public by answering a wide variety of questions, conducting interviews, investigating situations, and resolving problems.

TSCs are national network, linked together on SSA's 800 number network, and calls are routed to different locations at different times of the day, or different days of the week, depending on call volumes and available resources. SSA's 800 number network is a very complex and sophisticated system and handles millions of calls every year. There are 26 TSCs located throughout the United States and in Puerto Rico.

**Processing Center Operations (PCO)**

Processing Center Operations (PCO) is comprised of eight organizations: six Program Service Centers (PSC), the Office of Disability Operations (ODO) and the Office of Earnings and International Operations (OEIO). PCO is a centralized organization with a complex structure and mission that touches a wide-range of service objectives. Multiple organizational components, comprised of well over a hundred positions, process the most complex workloads in the Agency for

approximately 11-12% of SSA beneficiaries, including claims, appeals, attorney fee payments, debt collection, evaluation of medical/vocational evidence, records maintenance, continuing eligibility, inquiries, remittance and accounting functions. In addition, PCO provides support to callers contacting the National 800 Number and for the Agency's online and electronic services.

### **Office of Central Operations (OCO)**

In addition to serving as the lead component for OCO and OEIO, subcomponents within the OCO organization maintain records of workers' earnings, furnish earnings statements, resolve individual and employer earnings problems, service domestic claims, and handle foreign claims around the globe.

Other components within the jurisdiction of OEIO include the Foreign Benefit Units (FBU). The different laws, customs, languages and conditions abroad, together with the difficulties that can arise in dealing with claimants and beneficiaries abroad by mail, often make it difficult to administer the Social Security program effectively outside the U.S. SSA customers who live outside the United States are serviced by Department of State (DOS) personnel located in US Embassies, Consulate Generals and Consulates.

OEIO utilizes these Foreign Service Posts (FSP) to assist with our business, including taking and developing claims. FSP employees are nationals of the host country and are called Foreign Service Nationals (FSN). FSN positions function like standard SSA Field Office (FO) service, claims and field representatives. OIO can structure requests for assistance to these FSPs in the same way as a developmental request to any SSA FO. However, because the FSNs do not have SSA adjudicative authority, they must send completed claims packages to OIO for review and final adjudicative action.

### **State DDS (DDS)**

The State Disability Determination Services (DDS) are responsible for the development and evaluation of medical and vocational documentation for Social Security and Supplemental Security Income claims, leading to a determination of whether or not an individual is disabled. These determinations may include consideration of the individual's age, education, and past work experience. Determinations involving vocational factors consider the availability of jobs in the national economy. The DDS is 100% federally funded by the Social Security Administration.

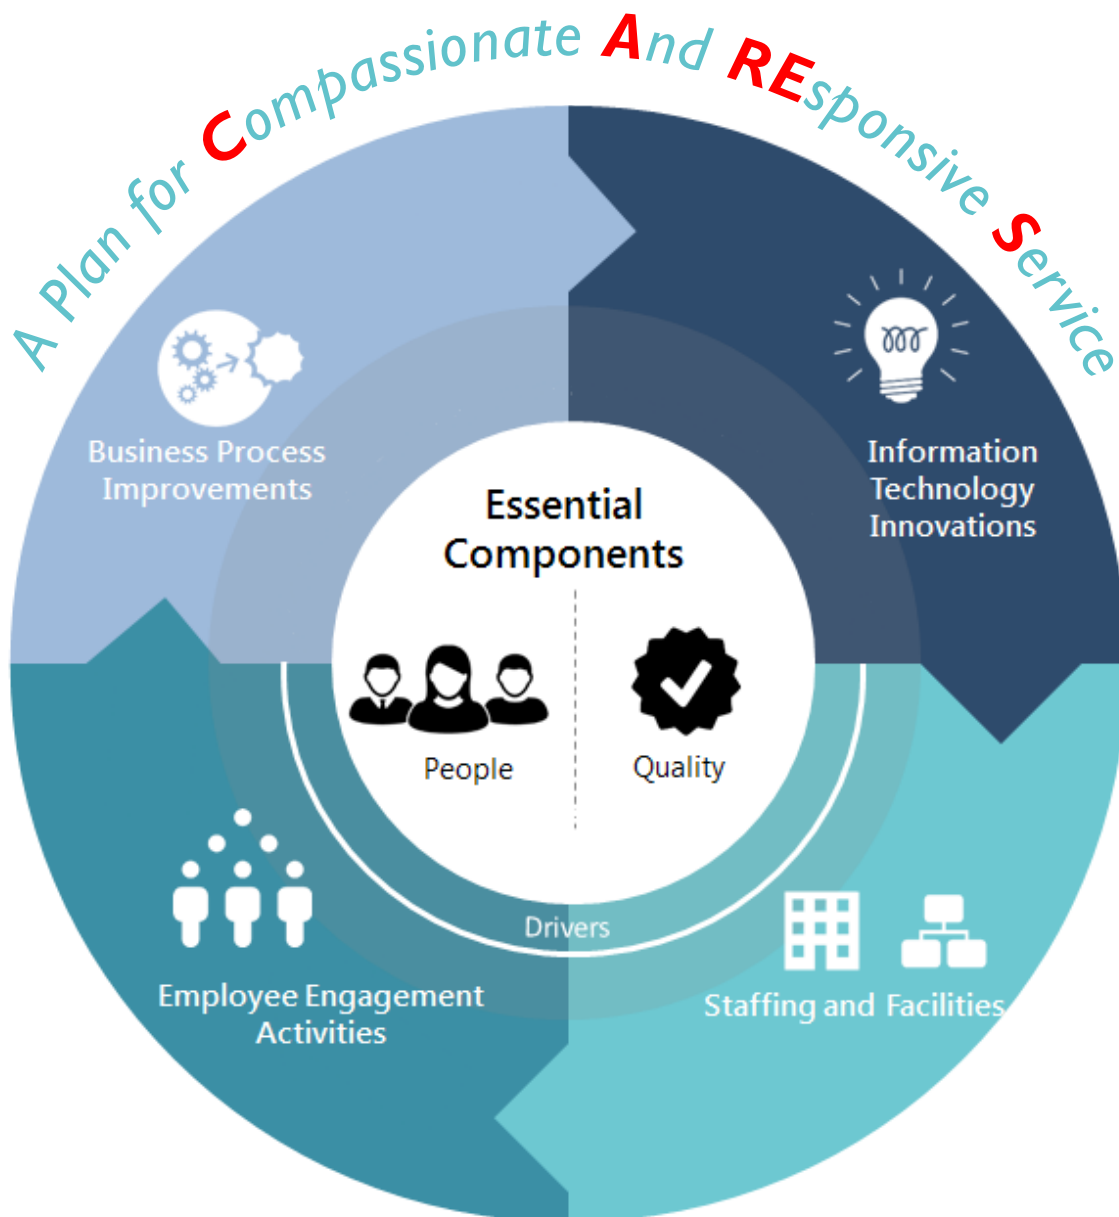

The overall objective of the DDS is to provide accurate, timely, and cost-effective disability determinations in accordance with Title II and Title XVI of the Social Security Act to disabled citizens while facing challenges that include attrition and periods of limited or no hiring authority.

## **Congressional Proposal on the Treasury Offset Program (TOP)**

This report is publically available on our website:

# Leading the Hearings and Appeals Process into the Future

# Leading the Hearings and Appeals Process into the Future: A Plan for **C**ompassionate **A**nd **R**esponsive **S**ervice (CARES)

## Executive Summary

The Social Security Administration (SSA) is facing a significant public service crisis in our hearings and appeals process. At present, and for the first time in our history, more than one million people are waiting for a hearing decision. The situation is urgent. Our ability to decrease the number of hearings pending, reduce the average wait time for a hearing, and significantly improve our service to these claimants requires adequate and sustained funding. In addition to the necessary funding, we are committed to continue to use data analysis, to listen to our employees and partners, and most importantly, to remain dedicated to providing a high quality, modern and timely disability appeals process now and into the future.

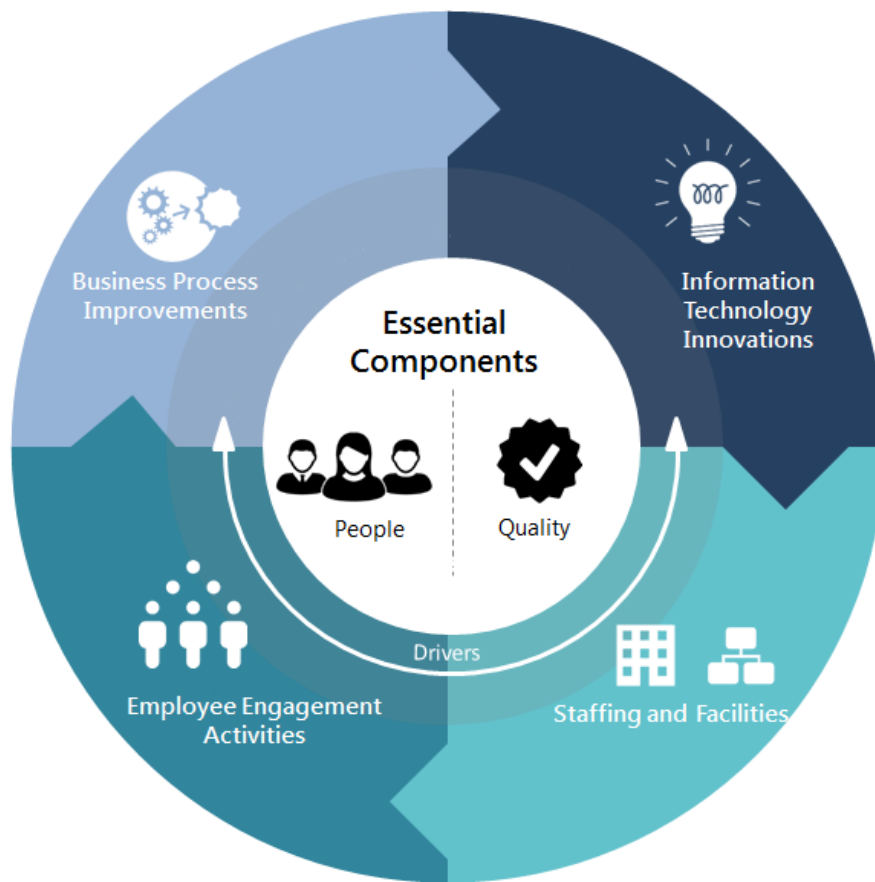

These challenges require both immediate tactical initiatives to address the over one million cases pending a hearing, and initiatives to ensure the hearings and appeals process is efficient, effective, and sustainable. The CARES plan outlines our current comprehensive and multi-layered approach to deal with the immediate crisis of the growing number of hearings pending and increasing wait times. It will also help to serve as a foundation to explore potential future initiatives, as we continue our efforts to identify ways in which we can better serve our customers.

We have built our plan on two essential components: **people and quality**—engaged, well-trained people providing quality service. We have also identified several broad categories of drivers that will help our employees provide quality service to the people who need us most. These drivers include:

- ▶ [Business Process Improvements](#);
- ▶ [Information Technology Innovations](#);
- ▶ [Staffing and Facilities](#); and
- ▶ [Employee Engagement Activities](#).

We are pursuing a number of innovations, new or enhanced practices, and quality initiatives to address our critical priority. We believe that we can combine our current plans with potential future initiatives to transform our hearings and appeals process, so we are well positioned to better serve the American public for years to come.

We have outlined a myriad of tactically important steps we can take, right now, to address our service crisis. However, we need adequate and sustained funding to execute the CARES plan. We also commit to an ongoing search for the ways in which we can serve our customers better. We will continue to use data analysis to inform, listen to our employees and partners, and most importantly, remain vigilant in our goal to serve. In our pursuit to meet the needs of the more than one million people waiting, we must consider every constructive avenue for change.

### A History of Hearing Pending Levels and Wait Times

Our disability programs are complex, resource-intensive, and require robust administration. Disability claims and appeals require our employees to understand our rules and regulations, analyze the merits of each case, and make difficult decisions. While we automate where we can, the disability programs we administer require a sufficient number of well-trained, engaged employees to assist the American public with their disability appeals.

Over the history of our disability programs, there have been many initiatives to reform or improve the hearings and appeals process. However, despite any streamlining we have achieved, we have been continuously affected by external influences that slowed our hearings process. These external influences have been instrumental in increasing the number of hearings pending as well as a rise in wait times for our customers.

Administrative Law Judges (ALJs) are our primary decision makers in the hearings process. From 1999 through 2008, the Office of Personnel Management's (OPM) ALJ registry was not updated because of an adverse ruling in litigation commonly referred to as the Azdell litigation. However, due to severe staffing shortfalls in the early 2000s, SSA received temporary authority to hire an additional 126 ALJs from the old register. While we hired this limited number of judges, it unfortunately did not keep pace with the growing number of pending cases and the attrition of approximately 100 ALJs each year, who leave primarily to retirement. The inability to hire ALJs, the number of retiring ALJs, and several years of insufficient funding caused pending levels and wait times to rise dramatically. As we

look at resolving the current crisis of over one million Americans waiting for their hearing, it is imperative that we not only replace ALJ attrition losses, but also increase the number of ALJs to reduce the number of hearings pending.

In 2007, our pending level rose to 750,000 hearings, nearly triple the number pending in 2000. The average processing time almost doubled to 500 days between 2000 and 2007. As a result, we developed an aggressive plan to reduce the growing hearings backlog by 2013. At the same time, the economy entered a recession, which contributed to a significant increase in disability applications. This increase in applications exacerbated the number of hearings pending and wait times. We worked diligently to address the growing backlog by shifting funding from our other priorities to the hearings and appeals workloads and successfully implementing many important initiatives to improve service, including:

- Completing implementation of the electronic folder eliminating our paper-intensive disability process;
- Hiring additional ALJs;
- Expanding our national video-conferencing network, allowing us to hold more hearings via video;
- Establishing National Hearing Centers, which use video technology to hold hearings to assist backlogged offices;
- Opening National Case Assistance Centers to help offices prepare cases and write hearing decisions;
- Creating a national standardized electronic business process;
- Adopting the aged case initiative and enforcing the first-in/first-out approach to reduce the number of aged cases; and
- Providing program training to ALJs and other hearing office staff through easily accessible computer systems on a large range of topics.

Although we made measurable progress through 2011 toward eliminating the hearings backlog, severe budget cuts adversely affected our progress. Decreased budget allocations drove our difficult decision to curtail plans to open additional new hearing offices that would have increased adjudicatory capacity. We also continued to face difficulty in hiring a sufficient number of qualified ALJs. As a result, wait times for a disability hearing and the number of pending hearings began to rise again. Now, we are mindful of these lessons learned and the ongoing impact of changes in our operational landscape.

### **Defining the Numbers: Cases Pending and Wait Times**

Although the terms ‘pending’ and ‘backlog’ have often been used interchangeably to describe our appeals crisis, they are not the same. We can express the ‘backlog’ as a mathematical equation. The backlog, which constitutes only a part of the total pending, is the extent to which the number of pending cases prevents us from meeting our timeliness expectations. We define the hearings backlog as the number of pending cases that push the average wait time over 270 days. Currently, we have over one million people awaiting a hearing, which is about twice as many as our business process and staffing levels allow us to handle.

We base our 270-day timeframe on our statutory and regulatory timeframes for our hearings process, and the amount of time necessary for our employees to complete each stage of the process. We believe

that we will be successful in providing timely, quality hearing decisions and we will consider that we have been successful with our plan once we have met our average national processing time of 270 days.

In the past, we provided the number of pending cases to inform decision makers and the public as to how efficiently the program was working. However, this measure is not necessarily meaningful to our claimants who are likely more concerned about how long they will wait for a hearing than how many people are waiting. Using average wait time, also referred to as processing time, is a better, meaningful service metric that will help us more readily define success by providing a tangible measure for our customers. A similar analogy to this expectation is individuals waiting in line at a store with building checkout lines. People begin to get upset if there are not enough cashiers on the registers. The real concern is not how many other people are waiting but how quickly the line is moving and how long it will take to be served.

## Definition of Success

When the national average waiting time for a hearing decision is 270 days, we will consider the portion of our pending hearings that are considered a ‘backlog’ eliminated. We plan to achieve this goal by the end of fiscal year (FY) 2020, but the success of this plan will require adequate and sustained funding as well as OPM’s ability to provide enough qualified ALJs timely.

Our plan requires sustained, adequate funding in the future to expand the number of ALJs and increase the number of hearings we complete. In order to meet our hiring goals, we are working in close collaboration with OPM to provide a larger and continuously refreshed register of qualified ALJ candidates. We also need an immediate re-announcement of the ALJ examination. If we meet our hiring goals, we will increase our hearing decisions in FY 2017 to approximately 784,100, nearly 18 percent more than our FY 2015 levels. If we are successful with these hiring plans, we believe that by FY 2018, our ALJ corps will be at the appropriate levels to address the continued growth in pending hearings and wait times for a hearing.

Our projections show that we will need to hire at least 250 new ALJs in FY 2016, FY 2017 and FY 2018 to reach an average wait time of 270 days by FY 2020. This need to hire ALJs also requires hiring support staff for each ALJ. Currently, we have approximately 4.5 support staff for every ALJ. We have been committed to increasing the number of qualified ALJs for the past several years, but with limited and sporadic success, as illustrated in the chart below.

We believe the Bipartisan Budget Act of 2015 will help to address certain delays we have experienced when seeking a new register of ALJ candidates, but we will continue to review and study additional ways to augment our capacity and our efficiency.

As shown below, having sufficient ALJs has a direct impact on the time claimants wait for a hearing decision. Sustained funding and the ability to hire sufficient ALJs and support staff will allow us to achieve an average wait time of 270 days by the end of FY 2020.

We have learned from our history of pending hearings and wait times that sufficient case processing is directly dependent on having a sufficient number of qualified ALJs. However, as we think broadly about the future of our programs and our customers, we know that we cannot base a sustainable plan to reduce the number of pending hearings and wait times solely upon ALJ hiring ability. Through our CARES plan, and with sustained and adequate funding and support from OPM, we expect to begin to eliminate the backlog in FY 2017 and to eliminate it by FY 2020. We also expect that we will reduce the average wait time for a decision from the over 500 days currently to no more than 270 days in FY 2020, and we expect to cut the number of pending cases in half.

### Definition of Success for the Appeals Council

Our CARES plan is a comprehensive look at ODAR workloads including the Appeals Council (AC) in the Office of Appellate Operations (OAO), which among other activities is responsible for the final level of administrative review. The AC reviews ALJ decisions and dismissals and handles certain Federal court actions. There is a direct correlation between the number of cases handled and types of action taken by the hearing offices and AC workload levels. OAO anticipates a significant rise in the number of requests for review it receives from the hearing level as more ALJs are hired, trained, and issue dispositions.

The longer-term goal is to process requests for review in an average of 180 days. Staffing is the single factor that most strongly affects OAO's success in delivering timely service and continuing its important quality work. However, as we implement this plan, we are incorporating other measures we can take to assist in reducing wait times and number of pending cases at the hearings and the appeals levels.

## The CARES Plan

We built our CARES plan around two interdependent components: **people and quality**—engaged, well-trained people providing quality service. We consider the CARES plan a living document, which we will change as we gain more experience with each initiative, begin new initiatives, and adapt to the changes in our operational environment.

### *People*

Our employees have a strong commitment to public service. They understand that when they took the oath to become Federal employees, they accepted the responsibility to serve the American public. Our employees have a long tradition of serving our customers and a firm understanding that *who we serve is why we serve*. As we work to address the million people waiting for a hearing decision, it is important to note that our plan requires an emphasis on the people – our employees – who provide that service every day. Thus, our plan also includes initiatives that will help empower and engage our employees, provide them with improved tools to do their jobs, and foster an environment where they are best equipped to provide compassionate and responsive service.

*Who we serve is  
why we serve.*

### *Quality*

We are part of a rich organization whose “signature” is one of compassion and dignity in responsive service. Inherent in compassionate and responsive service to the American people is quality. We define high-quality decisions as policy-compliant and legally sufficient decisions. We have always had to operate in a high production environment, and the hearings process is no exception. Regardless of whether they ultimately receive benefits, the millions of people who apply for our benefits deserve timely decisions that are high quality. Quick decisions without quality or quality decisions without timeliness are not compassionate or responsive service.

### *The Importance of Investing in Quality*

Quality requires an investment, but that investment pays off. Employees who do quality assurance work can prevent additional work by limiting appeals and remands – allowing SSA to process the case once, not multiple times. ODAR quality reviews identify trends that may require policy clarifications or targeted training and feedback.

For example, beginning in 2011, we limited the number of cases that could be assigned to an ALJ. That limit helps ensure that ALJs take the time to follow SSA policy and procedures in their decisions. In addition, we provide desktop training and feedback tools to ODAR employees and ALJs, such as the *How MI Doing* tool. While there are administrative costs for expanded quality measures, many of our employees appreciate the convenience of this added assistance.

## *Tactical and Strategic Initiatives*

Our plan includes several broad categories of drivers that will propel our efforts to address the service crisis at the hearings and appeals levels. These include:

- ▶ [Business Process Improvements](#);
- ▶ [Information Technology Innovations](#);
- ▶ [Staffing and Facilities](#); and
- ▶ [Employee Engagement Activities](#).

### **Business Process Improvements**

We continue to look for opportunities to make the hearings and appeals process more efficient while ensuring quality decisions. Part of our strategy for moving forward includes frequent benchmarking with other agencies to both share information about our strategies and to learn about successful strategies they have used. We are also looking at ways to streamline our processes, eliminate duplication, and efficiently utilize our limited resources to provide better and faster service to the public.

In this section, we provide brief descriptions of our tactical initiatives and actionable strategies. Please note that this list of initiatives is not exhaustive – potential new initiatives may be added, and existing initiatives may be modified or removed depending on their success.

***Pre-Hearing Triage Initiatives:*** This set of initiatives aims to increase overall hearings adjudication and disposition capacity through new and innovative techniques and providing additional adjudication resources. Under this category, we plan to:

- ✓ Increase our use of Senior Attorneys where appropriate;
- ✓ Expand the use of pre-hearing conferences that explain the hearings process to and better prepare unrepresented claimants for their hearing;
- ✓ Test the use of predictive modeling in both hearing offices and the AC levels;
- ✓ Test the use of screening and data analytics tools (e.g. SmartMands); and
- ✓ Provide additional staff time and assistance to heavily impacted or backlogged hearings offices.

***Case Readiness Initiatives:*** Through this set of initiatives, we will improve the support provided to ALJs in case development and preparation. One key effort is our **1,000 Plus Page Initiative**, in which staff will review and prepare cases with 1,000 pages or more of evidence prior to the ALJ review and hearing.

***Optimized Hearing Office and Case Assistance Center Models:*** Under this strategy, we will address support staff efficiency by strengthening and streamlining hearing office and centralized case assistance business process models. Through these efforts, we plan to enhance information sharing among our hearing offices, national hearing centers, and our centralized case assistance centers. For example, in FY 2016, we will build and foster a more collaborative virtual working environment to support interaction between ALJs and geographically dispersed support staff. We will pilot the use of collaborative technologies to facilitate a virtual team model through a concept called the **Virtual Hallway**.

***Proactive Quality:*** In addition to the pre-effectuation and post-effectuation quality reviews that the AC conducts, we are testing an inline quality review process at the hearing level that promotes consistency and continuous improvement in case processing by ensuring: (1) case files are properly prepared; (2) cases are properly scheduled; (3) the record is adequately developed; and (4) a legally sufficient draft decision is prepared. Most importantly, our inline quality review initiative is designed to correct identified errors before a final decision is issued.

***Natural Language Processing Capabilities:*** Currently, the AC uses natural language processing (NLP) in its data analytics studies. NLP offers a way to extract select information from electronic disability records, converts unstructured information in text into structured or numerical data, and facilitates robust data analysis. The AC is testing the use of NLP to scan ALJ decisions for language that suggests a higher likelihood of an error so we can select and identify those cases for a pre-effectuation quality review. SSA is conducting a study with NIH researchers to explore automated ways to extract meaningful information from scanned images of medical records and identify duplicate documents.

## **Information Technology Innovations**

We designed our technology investments to provide faster, streamlined, and more efficient IT tools for our employees, external stakeholders, and the public. Specifically, any IT improvements we make must help to remove inefficiencies in our case processing systems, drive policy-compliance and consistency across offices, and/or provide self-service options that allow us to provide customer choice and redirect staff away from manual workloads. We will measure the success of any IT investment we make in the hearings and appeals process by the extent to which that investment helps to reduce the wait time for our customers and eliminate the number of backlogged cases.

Under this category of improvements, we plan to:

- ✓ Expand the use of video hearings in order to balance workloads and eliminate service inequity across the country;
- ✓ Provide online electronic folder access for medical and vocational expert contractors (MEs and VEs) to eliminate staff time to produce CD copies of case folders;
- ✓ Reduce the number of hearings level cases that turn into paper; and
- ✓ Develop an online Appeals Council (AC) Request for Review (iAppeals for Appeals Council) that will eliminate paper requests for review, reduce the potential for lost cases, and improve the efficiency of the AC's business process.

## **Staffing and Facilities**

### ***Staffing***

We are aggressively pursuing opportunities to increase our decision-making capacity. It is important to note that our plan depends on sufficient funding so we can hire a sufficient number of ALJs and support staff. As emphasized earlier, any significant setbacks in ALJ hiring will pose a serious challenge to reducing the number of pending hearings and wait times. We hope that with the recent passage of the Bipartisan Budget Act of 2015 and our close collaboration with OPM (our partner in the ALJ hiring process) we will have a sufficient quantity of qualified ALJ applicants across the country. We are also exploring ways to attract and recruit a greater number of prospective ALJ candidates

especially for harder-to-fill geographic locations. However, to make continual progress, we need a larger and continually updated list of qualified ALJ candidates and sufficient, sustained funding from Congress.

Concurrently, we are actively pursuing ways other organizations across SSA can help augment our adjudicative and non-adjudicative capacities to help with our growing appeals workloads. We realize that when we make the difficult decision to move work from one part of the agency to another, other important workloads are affected. To help address our current public service crisis, we plan to temporarily augment capacity by:

- ✓ Collaborating with the Office of Quality Review (OQR) who will assist ODAR in critical case processing activities; and
- ✓ Utilizing Appeals Council (AC) Administrative Appeals Judges (AAJs) to hold hearings and issue decisions on a subset of cases.

In the OAO that runs the AC, we will also focus on hiring appropriate staff and Administrative Appeals Judges (AAJs) to address the growing post-hearing appeals workloads and to reallocate current staff as necessary to help address the increased number of cases that will result from the increased decisions at the hearing level.

In addition to our focus on staffing, we are working to streamline the structure of work where it makes sense. For example, we recently realigned the Limited Income Subsidy Appeals Unit (SAU) from ODAR to the Office of Operations because of closer alignment with other Office of Operations workloads.

### ***Facilities***

We have a multipronged approach to better utilize our space, ensuring that we maintain focus on incorporating the staff we need into the space we currently have available. By increasing space options, we will provide greater access to hearings for claimants and reduce wait times.

We plan to:

- ✓ Repurpose vacant space that is already federally-owned or leased for the hearings operation;
- ✓ Make more efficient use of existing ODAR space; and
- ✓ Co-locate our hearing offices with field offices and continue to add “shared services” rooms in our field offices allowing claimants to participate in an ALJ hearing from the convenience of the local field office.

### **Employee Engagement Activities**

Increasing meaningful employee engagement is critical to our ability to serve the public and meet the demands of our growing workloads. A highly engaged workforce will increase innovation, quality, productivity, and performance.

We are using the results of the 2014 and 2015 Federal Employee Viewpoint Survey (FEVS) for ODAR employees and creating a plan of action to improve employee engagement.

Specifically, we plan to:

- ✓ Enhance communication and help build a shared set of goals across ODAR;
- ✓ Implement an internal ODAR development program, covering all positions and grade levels, in order to attract, retain, and develop employees for technical, management, and leadership positions; and
- ✓ Increase availability for telework under current collective bargaining agreements.

*I am always inspired by what our employees do every day – the amount of work that you do, the quality and accuracy of your work, and the compassion in which you deliver services. That is what makes our organization one of the best in government.*

*~ Acting Commissioner Carolyn Colvin*

### Other Long-Term Plans

We will continue to evaluate options and initiatives to improve service to our customers, as well as flexibilities or improvements in rulemaking. For example, in the past year we instituted new rules related to scheduling and appearing at hearings and the submission of evidence. We will continue to examine ways in which we can improve our service to provide a high quality, modern and timely disability appeals process.

**We're committed to new ways of doing business.**

### Conclusion

We have built our CARES plan around a set of two interdependent components—**people and quality**—and integrated those two components with a complementary set of tactical initiatives. Our plan builds on successful initiatives from past efforts and renews our commitment to finding new strategies to dramatically reduce wait times for the public and reduce the number of pending cases. However, this plan will not have a significant impact on the more than one million people waiting for a disability hearing decision without adequate and sustained funding – this is critical.

This plan offers a blueprint for steps we will take in the short-term but also lays out the path for evaluating potential future changes. With the unprecedented challenge of more than one million people waiting for a hearing decision, we cannot maintain the status quo.

# Office of Budget, Finance, Quality, and Management

## Mission

The Office of Budget, Finance, Quality and Management (BFQM) provides leadership on key agency programs and initiatives, including:

- Administration of a comprehensive financial program of budget policy, formulation and execution;
- Accounting policy and operations;
- Acquisition and grants program;
- Internal control program;
- Audit resolution and liaison;
- Agency anti-fraud initiatives;
- Quality review and business innovation;
- Agency-wide facilities, publications, and logistics management; and
- Physical Security, continuity of operations, and emergency preparedness.

The Deputy Commissioner for Budget, Finance, Quality, and Management provides support and guidance to the agency in numerous oversight roles, including:

- Chief Financial Officer;
- Chief Infrastructure Assurance Officer;
- Senior Procurement Executive;
- Senior Sustainability Officer;
- Senior Real Property Official;
- Senior Debt Management Official;
- Agency Environmental Executive;
- Agency Continuity Coordinator;
- Agency Management Control Officer;
- Designated Agency Safety and Health Official;
- Designated Official for Enterprise Risk Management;
- Program Manager for the Agency's Continuity of Government; and
- Designated Official for the Agency's Occupant Emergency Organization.

All SES Separations from FY 2012 - FY 2016						
Type of Separation	FY12	FY13	FY14	FY15	FY16	Total
Early Out Retirement	1	1				2

## **TREASURY OFFSET PROGRAM (TOP) STATUS DECEMBER 2016**

### **Background**

Before 2008, legislation permitted administrative offset under TOP only for non-tax debts 10 years or less delinquent. In 2008, however, the Food, Conservation, and Energy Act of 2008, Public Law 110-246, 122 Stat. 923 (2008) (also known as the “Farm Bill”), eliminated this statute of limitations. Subsequently, in 2009, the Department of the Treasury (the Treasury) amended its regulations to remove the time limitation for offset of tax and non-tax payments under TOP. We issued conforming regulations in October 2011. In June 2012, we began notifying individuals with debts 10 or more years delinquent that we would refer the debts to TOP, and we started referring eligible debts in September 2012.

### **Litigation**

In April 2014 and February 2015, two groups of plaintiffs filed separate lawsuits in Maryland and in the District of Columbia, respectively, challenging our use of TOP to recover delinquent debts 10 years old or older. The plaintiffs alleged they received no prior notice that the Treasury would offset their tax refunds to recover their delinquent title II and title XVI debts. They also alleged the Treasury offset their payments for debts for which they were not liable, and that our records were inadequate to prove they owed the debts.

In response to public concerns, we took immediate action to suspend referrals to TOP for debts 10 years or more delinquent, and initiated a review of our policies and procedures. In January 2015, we suspended offset of childhood debtors’ delinquent debt from TOP as we continued to explore policy options. Our review found we correctly applied the law and our regulations, policies, and procedures when we referred debt to TOP. Our Inspector General’s July 2015 audit report concluded the same.

The Maryland and District of Columbia courts dismissed the plaintiffs’ lawsuits in March 2016 because the plaintiffs’ claims were moot; i.e., the debts were administratively waived. The plaintiffs appealed these dismissals to the Court of Appeals for the Fourth Circuit and the Court of Appeals for the District of Columbia Circuit, respectively. The appeals remain pending.

### **Legislative Proposal**

We drafted a legislative proposal that would allow us discontinue using TOP for the debts of former childhood beneficiaries. The Office of Management and Budget recommended a proposal to forgive a defined group of debts 10 or more years delinquent and not use TOP for former childhood beneficiaries if we did not initiate collection action for 10 years. OMB’s legislative proposal is in the Fiscal Year 2017 President’s Budget. OMB also requested that SSA restart TOP immediately for former childhood beneficiaries not within the defined group.

### **Status**

On November 8, 2016, our Acting Commissioner determined that we should no longer use TOP for debts 10 years or more delinquent, and that, through a Federal Register notice, we should offer refunds to individuals whose 10-years-or-more delinquent debts were recovered through TOP.

Data

Debtors Currently Suspended from TOP Collection		
Description of Debtors	Number of Debtors	Value of Debt (In Millions)
10 or More Years Delinquent Title II as of June 2016	221,530	\$441.6
10 or More Years Delinquent Title XVI as of June 2016	83,311	\$230.7
Less Than 10 Year Delinquent Former Childhood Beneficiaries (BIC C's) as of October 2016	71,094	\$319.5

The Parties agree to extend the current National Agreement until March 31, 2018. The Agreement will automatically renew itself from year to year thereafter. However, either party may give written or electronic notice of its intent to add, amend, reopen, modify or terminate existing Articles of the Agreement not more than 120 or less than 90 calendar days prior to the expiration date. Such notice must be accompanied by a list of the Articles that either party intends to add, amend, reopen, modify or terminate. Ground rule negotiations will then begin no later than 30 calendar days after receipt of the notice provided by either party. Ground rule negotiations will be conducted in accordance with Article 4, Section 2 (i.e., number of bargaining days, number of negotiators, payment of travel and per diem).

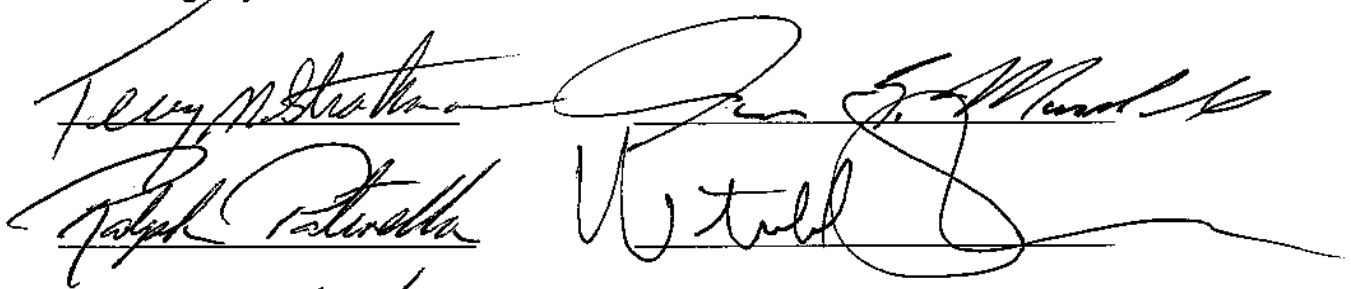

As part of this extension, the Parties agree to incorporate the following revisions to the 2012 National Agreement effective on April 1, 2017. Specifically:

AFGE agrees to the following changes to the 2012 National Agreement:

- Management has the discretion to not grant a ROC award to any employee who was subject to a disciplinary action of a reprimand or greater. (Article 17, Section 5.A)
- No administrative leave on a day when an office is closed and employee is scheduled to Telework on that day. (Article 41, Section 6)

For the Agency:

For the Union:

The image shows two columns of handwritten signatures. The left column, under 'For the Agency:', contains two signatures: the top one appears to be 'Terry M. Strathman' and the bottom one 'Ralph R. Strathman'. The right column, under 'For the Union:', contains two signatures: the top one appears to be 'John J. Marshall' and the bottom one 'W. T. Tull'. Each signature is written in dark ink on a white background.

# Administrative Law Judge Work Analysis Study

## Executive Summary

Social Security Administration (SSA) Administrative Law Judges (ALJs) are expected to process adult disability cases as efficiently as possible to reduce the Agency's case backlog and produce timely decisions for claimants. ALJs are also expected to render *high quality legally sufficient decisions*. Numerous Agency policies and memoranda from the Office of the Chief Administrative Law Judge (OCALJ) emphasize that ALJs must carefully read all case materials, make every reasonable effort to obtain relevant evidence for each case, and write well-documented decisions explaining their ruling.

These are not unreasonable expectations. However, the SSA's Office of Disability and Adjudication Review (ODAR) has implemented production quotas that appear to be based entirely on reducing the case backlog and reducing the number of days it takes for claimants to receive a ruling on their case. The quotas appear to have been set without regard to the amount of time (hours) required for an ALJ to carefully process adult disability cases.

One benchmark that ODAR has set is the requirement that each ALJ schedule a certain number of hearings per month. This benchmark is enforced by linking it with the opportunity for the ALJ to telework.

A February 18, 2014 memo from Chief Administrative Law Judge Debra Bice provided this rationale for the benchmark:

*Considering the necessity for quality, timely, and policy compliant hearings and decisions, and historical data, **scheduling** an average of at least fifty (50) cases for hearing per month will **generally** signify a reasonably attainable number for the purposes of this contractual provision. I want to emphasize that this provision concerns the number of hearings **scheduled**, not cases heard or dispositions issued. Accordingly, if you **schedule** at least an average of fifty (50) cases for hearing per month during a twelve-month rolling cycle, then management generally will determine you have scheduled a reasonably attainable number of cases for hearing for the purposes of this contractual provision. Conversely, if you schedule fewer than an average of fifty (50) cases for hearing per month during a twelve-month rolling cycle, then management likely will determine you have not scheduled a reasonably attainable number of cases for hearing, unless there are extenuating circumstances. [Author note: Bold, underlined print appeared in the original.]*

The **scheduled hearings benchmark** was officially implemented on October 1, 2015. It is being phased in across 3 successive 6-month telework cycles. For the first 6-month cycle, ALJs who wish to telework must schedule 40 hearings per month, on average, or face restrictions on their eligibility to telework. The benchmark increases to 45 scheduled hearing per month, on average, for the 2<sup>nd</sup> telework cycle, then to 50 scheduled hearings per month, on average, for the 3<sup>rd</sup> and all subsequent telework cycles.

Another performance standard ODAR established relates to **case disposition**. Specifically, since 2007, each ALJ is expected to achieve 500-700 case dispositions per year. Dispositions include cases that are dismissed and cases for which the ALJ renders a decision (favorable/award or unfavorable). The SSA's public data archive shows that, for the past three

fiscal years, 18% of cases were dismissed, leaving 82% requiring an ALJ's decision. Some portion of case decisions can be made on-the-record (OTR) which means that the ALJ is able to render a favorable decision based entirely on reading the case file without conducting a hearing although the ALJ must still read the entire case file and write a decision. (Data on the percentage of OTR decisions issued per fiscal year is not, apparently, publically available although experienced ALJs report that the percentage of OTR decisions issued per fiscal year is very small.)

Each of the preceding metrics may be very relevant for tracking and monitoring organizational- or unit-level performance, but the process by which the quotas were established for individual ALJs appears not to relate to actual ALJ work requirements. Performance standards for ALJs should take into account the amount of time realistically required to do all of the activities involved in adjudicating cases such as reading the case file, conducting a hearing, developing additional needed information about the case, drafting decision instructions for a decision writer, and editing the draft decision. Performance standards should also take into account other work activities, such as engaging in professional development and training, and performing general case management and office duties, that ALJs must do in addition to processing adult disability cases.

The Association of Administrative Law Judges (AALJ) contracted with Human Resources Research Organization (HumRRO) and its subcontractor, the Dunnette Group, Ltd., in the fall of 2014 to study the amount of time and factors involved in adjudicating adult disability cases. We designed and completed a *work analysis* study to capture the type of information necessary to create performance standards for ALJs. It is the only study to date that uses a work analysis approach to gather information about the amount of time required for ALJs to process adult disability cases.

**Work analysis** has a long tradition in the fields of industrial-organizational psychology, industrial engineering, human factors, and human resources. It provides the foundation for personnel performance management systems. The design involved identifying the many work activities that ALJs must perform – experienced ALJs helped us identify activities that ALJs do when adjudicating adult disability cases and to identify other work activities ALJs perform. One commonly used work analysis approach is to simply survey job incumbents about time spent on various work activities. In this study, it was important to estimate time spent for a range of easy to difficult cases. Therefore, we designed a simulated case processing task and accompanying survey to collect information from ALJs about how long it takes to perform case processing and other activities. To standardize ALJs' frame of reference in rating time spent on case processing, we asked them to read and render a decision on each of three recent closed cases that varied in length. Thirty-one (31) ALJs read the entire case files, rendered a decision, wrote decision instructions and recorded their time. They then estimated the amount of time they spend on the other adult disability case processing phases as well as professional development and training, general case management, and office duties.

Assuming that the ALJ carefully complies with SSA directives regarding legally sufficient decisions, our study shows that it takes 5.69 hours of ALJ labor, on average, to render a decision for a case that is 206 pages in length. As shown in the Executive Summary Table 1, it takes 7.09 hours to render a decision for a case that matches the FY2014 national case size average of 652 pages. Finally, it takes 8.60 hours, on average, to render a decision for a lengthy case (1,065 pages). As a point of comparison, in FY2014, the majority of adult disability cases consisted of more than 500 pages and 12% of them consisted of more than 1,000 pages.

We calculated the number of hours ALJs could spend processing each case if they rendered 500 decisions per year. Our study indicates that, after subtracting authorized rest breaks, holidays, and annual leave, and the average number of work hours ALJs spend on activities such as professional development and training, ALJs have about 2.5 hours, on average, to spend on each case if they render 500 decisions per year. This seems nearly impossible given that it takes on average a little more than 5½ hours for ALJs to render a legally sufficient decision for a short case (206 pages), slightly more than 7 hours to render a legally sufficient decision for a case of average size (655 pages), and a little more than 8½ hours to render a legally sufficient decision for a long case (1065 pages).

We understand that the annual quota of 500-700 case dispositions includes both dismissals and decisions, and that about 18% of cases are dismissed. Clearly, dismissals would require less than 5.69 (or 7.09 or 8.60) hours to process. Still, the dismissal rate would have to be much higher than 18% to reduce the average time available per case for those that require a decision to only 2.5 hours.

**Executive Summary Table 1. Amount of Time Needed to Render a Decision per Case Based on 2015 Work Analysis Study versus Amount of Time Available per Case to Render 500 Decisions in a Year**

	Case Size		
	Short (206 pages)	Average (655 pages)	Long (1065 pages)
Time required, on average, to render a decision in accordance with SSA directives regarding legally sufficient decisions	5.69 hours	7.09 hours	8.60 hours
Time available per case, on average, for full-time ALJ after accounting for rest breaks, holidays, leave, and other work activities that ALJs perform	2.5 hours	2.5 hours	2.5 hours

*Note.* Data in first row are based on work analysis study in which 31 ALJs adjudicated the same three closed case files. Data in the second row was calculated by subtracting time spent on authorized rest breaks, federal holidays, authorized annual leave, and work activities unrelated to adjudicating specific cases from the 2,087 work hours available in a year for full-time federal government employees.

Next, we calculated the number of adult disability cases of average size that each ALJ could reasonably decide in a year, after taking into account that ALJs, like other federal government employees, have authorized rest breaks, holidays, and annual leave time, and spend work time on activities such as professional development and training, general case management activities, and general office duties – activities separate from processing individual cases.

The work analysis study data indicate that the number of case decisions that an ALJ could render ranges from 70 to 342 per year (with an average of 191 and a median of 195), assuming a case of average size and following SSA policy directives regarding legally sufficient decisions. A challenging goal could be set higher than the average decision rate, but not so high that most ALJs could not reach it. Among the ALJs in the work analysis study, 25% could render decisions for at least 233 cases per year (this is the 75<sup>th</sup> percentile in the distribution). Thus, a challenging annual goal for **case decisions** is 233 cases per year. A challenging goal for **case dispositions** is 277 per year, assuming that the national dismissal rate continues to be 18% of all cases. Executive Summary Figure 1 illustrates the results.

### Executive Summary Figure 1 Annual Case Dispositions: SSA-Assigned Quota versus a Challenging Goal Based on 2015 Work Analysis Study

Our work analysis study also provides data relevant to the monthly benchmark for scheduling hearings. Using an annual case disposition goal of 277, a challenging *monthly benchmark for scheduling hearings* would be 23 hearings on average per month ( $277 \div 12$ ) as shown in Executive Summary Figure 2.

### Executive Summary Figure 2 Monthly Hearings Benchmark: SSA-Assigned versus a Challenging Goal Based on 2015 Work Analysis Study

The challenging goals we describe are lower than current SSA-assigned quotas which are (a) 500-700 case dispositions per year and (b) an average of 40 scheduled hearings per month (with the amount increasing to 50 hearings per month within 18 months). Our work analysis study suggests that the ***SSA scheduling benchmark of 40 hearings per month, on average, is not reasonably attainable if SSA policy directives regarding legally sufficient decisions are followed.***

We understand that some ALJs are able to achieve the annual case disposition quota and the hearings scheduled benchmark. They are powerfully motivated to do so for a variety of reasons, including the following:

- SSA management *expects* ALJs to meet the case disposition production quota unless, in conjunction with their manager, it is determined that there are good reasons why an ALJ should not be required to meet it (e.g., *Social Security Disability Programs*, May 17, 2012; *Social Security Disability Programs*, September, 13, 2012; U.S. SSA OIG, 2010).
- ALJs can be counseled or disciplined if their performance does not meet management expectations for the number of case dispositions they should be able to achieve.
- Productivity data for each ALJ is available to the public through SSA data archives. ALJs with lower productivity levels may be subject to negative publicity or public pressure. (For example, see [http://www.ssa.gov/appeals/DataSets/archive/03\\_FY2015/03\\_September\\_ALJ\\_Disposition\\_Data.html](http://www.ssa.gov/appeals/DataSets/archive/03_FY2015/03_September_ALJ_Disposition_Data.html).)
- ALJs who wish to telework must meet monthly case scheduling benchmarks or they may face restriction on their ability to telework. (See memos from Chief Administrative Law Judge Bice [February 18, 2014; Appendix C] and from HOCALJ Walters [July 17, 2015; Appendix D])

Years of research on goal setting clearly shows that, in many different types of jobs and educational settings, people accomplish more when they work toward specific, difficult goals, as opposed to having no goals at all or only broad, ambiguous goals such as “do your best” (Locke & Latham, 2013). Certainly, SSA has established specific, difficult production and hearings scheduled goals for ALJs. However, goal attainment is also strongly impacted by the extent to which individuals commit to achieving the goals and believe they have the ability and the resources necessary to accomplish them.

Our work analysis study indicates that the SSA’s goals would be very difficult for many ALJs to meet. Kerr and LePelley (2013) report that stretch goals can have a positive impact on performance, but only if people accept them and believe they can be accomplished. If people do not believe they can achieve stretch goals, their motivation and performance often decreases.

Another danger associated with establishing easily counted goals, such as the number of case dispositions and number of hearings scheduled, is that these goals may conflict with an equally important but harder to count goal, namely, decision quality. This is the classic speed-quality tradeoff. SSA requires ALJs to maximize both speed and quality goals. As far back as 1975, Steven Kerr published an article in the *Academy of Management Journal* entitled, “*On the folly of rewarding A, while hoping for B*” (Kerr, 1975). For ALJs, it appears that the SSA is rewarding case processing production (A) while hoping for high quality decisions (B).

In an article entitled “*Goals gone wild: The systematic side effects of overprescribing goal setting*,” Ordóñez, Schweitzer, Galinsky, and Bazerman (2009) showed that goal setting can

lead to unintended side effects such as neglect of all nongoal areas, increasing the incidence of unethical behavior, corrosion of organizational culture, and reduced motivation among employees, among others. It appears that, over the past few years, the SSA has already experienced some of these unintended side effects including excessively high allowance rates for some ALJs, too many decisions containing errors or of low quality, and low morale among ALJs.

Our study also sheds some light on one likely way in which ALJs accomplish the monthly hearings scheduled benchmark and annual case disposition quota – by working uncompensated hours. According to two independent samples of 31 and 98 ALJs, many ALJs work outside of normal work hours, on holidays, and in lieu of using their authorized annual leave. Most use less than ¼ of their authorized sick leave. Why would they do this? Likely because they care deeply about producing high quality decisions and because they are under tremendous pressure to meet the annual case disposition production quota and the monthly scheduled hearings benchmark.

In conclusion, our study indicates that the requirement to schedule 40 cases per month, on average, is not reasonably attainable, nor is it reasonable to expect ALJs to achieve 500-700 case dispositions annually while also complying with SSA directives on legally sufficient decisions. Obviously, opinions could vary about how challenging “reasonably attainable” goals should be, and some might prefer more or less stringent challenges. The point is that a ***work analysis approach can provide the necessary foundation for an informed discussion about where benchmarks and goals should be set.***

Our study developed and piloted a solid methodology for ALJ work analysis. While our data are based on responses from a relatively small number of ALJs, it is the only study to our knowledge that attempts to establish production goals *based on the amount of labor required to actually adjudicate cases.*

If the SSA conducts its own work analysis study, it could:

- Perform a qualitative study of case processing practices used by the most productive ALJs *who are also producing legally sufficient decisions.*
- Carry out a simulated case processing study similar to the one we designed only with a larger sample of ALJs.
- Develop a modeling tool to estimate the number of cases that ALJs can reasonably process taking into account (a) proportion of cases likely to be dismissed, (b) proportion of likely OTR decisions, (c) case size, (d) case complexity, (e) competence of available decision writers, and (e) assumptions about the number of work hours available for case processing.

We understand that this study would not be easy, but the necessary research could be done. It could start with the variables that we examined, and then add more as they become available. Importantly, the modeling tool should be dynamic, because the factors listed in the third bullet above can and do vary over time and differ across regions and HOs.

Finally, our study also generated ideas and changes in the current SSA ALJ work situation that would reduce the amount of ALJ time needed to adjudicate adult disability cases. SSA could pursue these and other ideas to increase the efficiency of ALJs.

# FEDERAL EMPLOYEE VIEWPOINT SURVEY

## Office of Human Resources Summary Fact Sheet

This summary presents the 2012-2016 Federal Employee Viewpoint Survey (FEVS) results for the Social Security Administration (SSA). The Best Places to Work rankings and scores are available for 2003 through 2016.

### Background

Federal Regulation ([\*SEC. 1128. EMPLOYEE SURVEYS. page 250 of the National Defense Authorization Act for Fiscal Year 2004\*](#)) requires agencies to conduct an annual survey of their employees. The FEVS fulfills that requirement.

### Analysis Methodology

We used the percentage of positive responses from FEVS questions to conduct a comparative analysis of survey results. Per OPM guidance, percent positive results include responses recorded in the two categories of “Strongly Agree/Agree,” “Very Satisfied/Satisfied,” or “Very Good/Good”.

We use index scores to measure the degree to which employees are satisfied with various aspects of their work. Index scores are points of comparison across organizations and a means of measuring global progress from year to year.

### Summary Tables

#### Global Satisfaction

The Global Satisfaction Index indicates how satisfied employees are with their job, pay, organization, and their willingness to recommend their organization as a good place to work.

**Table 1 – 2012 through 2016 Global Satisfaction Index Scores**

Year	Global Satisfaction
2016	66
2015	69
2014	66
2013	65
2012	69

## Employee Engagement

This index measures key principles that keep employees engaged in their work. These principles include how effectively leaders lead, how well supervisors support and respond to employees, and intrinsic work experiences, such as innovation and connection to the agency's mission.

**Table 2 – 2012 through 2016 Employee Engagement Index Scores**

<b>Year</b>	<b>Employee Engagement</b>	<b>Leaders Lead</b>	<b>Supervisors</b>	<b>Intrinsic Work Experiences</b>
2016	67	58	71	71
2015	68	60	73	73
2014	66	57	71	71
2013	67	59	70	71
2012	69	62	71	73

## Human Capital Assessment and Accountability Framework (HCAAF)

The HCAAF identifies human capital systems that together provide a consistent, comprehensive representation of human capital management for the Federal government.

**Table 3 – 2012 through 2016 HCAAF Index Scores**

<b>Year</b>	<b>Leadership &amp; Knowledge Management</b>	<b>Results–Oriented Performance Culture</b>	<b>Talent Management</b>	<b>Job Satisfaction</b>
2016	63	52	57	67
2015	65	53	59	68
2014	62	50	57	66
2013	62	50	55	66
2012	65	52	59	68

## New Inclusion Quotient (New IQ)

The New IQ comes from the concept that individual behaviors, repeated over time, create habits necessary for inclusiveness. This index monitors the five Habits of Inclusion: Fair, Open, Cooperative, Supportive, and Empowering.

**Table 4 – 2012 through 2016 New IQ Index Scores**

Year	New IQ	Fair	Open	Cooperative	Supportive	Empowering
2016	59	46	59	59	77	57
2015	60	46	59	61	78	58
2014	58	42	56	58	77	57
2013	58	43	54	59	75	57
2012	60	45	57	62	75	59

## Best Places to Work Rankings and Scores

The [Best Places to Work in the Federal Government®](#) rankings offer a comprehensive assessment of how Federal public servants view their jobs and workplaces, providing employee perspectives on leadership, pay, innovation, work–life balance, and other issues. The Partnership for Public Service bases these rankings, in part, on agency FEVS scores.

**Table 5 – 2003 through 2016 Best Places to Work Rankings and Scores**

Year	Ranking	Score
2016	9th out of 18 large agencies	63.1
2015	6th out of 19 large agencies	66.0
2014	6th out of 19 large agencies	63.2
2013	6th out of 19 large agencies	63.0
2012	6th out of 19 large agencies	66.4
2011	6th out of 33 large agencies	70.1
2010	6th out of 32 large agencies	71.6
2009	9th out of 32 large agencies	67.0
2007*	7th out of 30 large agencies	66.5
2005	21st out of 30 large agencies	60.6
2003	15th out of 28 large agencies	61.7

\*Noted as the most improved

# FEDERAL EMPLOYEE VIEWPOINT SURVEY

## Senior Executive Service Results

### Office of Human Resources Summary Fact Sheet

---

This summary presents the 2010-2016 Federal Employee Viewpoint Survey (FEVS) results for the Social Security Administration's (SSA) members of the Senior Executive Service (SES).

#### Background

Federal Regulation ([\*SEC. 1128. EMPLOYEE SURVEYS. page 250 of the National Defense Authorization Act for Fiscal Year 2004\*](#)) requires agencies to conduct an annual survey of their employees. The FEVS fulfills that requirement.

#### Analysis Methodology

We used the percentage of positive responses from FEVS questions to conduct a comparative analysis of survey results. Per OPM guidance, percent positive results include responses recorded in the two categories of "Strongly Agree/Agree," "Very Satisfied/Satisfied," or "Very Good/Good".

We use index scores to measure the degree to which employees are satisfied with various aspects of their work. Index scores are points of comparison across organizations and a means of measuring global progress from year to year.

#### Summary Tables

##### SES Global Satisfaction

The Global Satisfaction Index indicates how satisfied employees are with their job, pay, organization, and their willingness to recommend their organization as a good place to work.

**Table 1 – 2010 through 2016 Global Satisfaction Index Scores**

Year	Global Satisfaction
2016	81
2015	77
2014	76
2013	80
2012	81
2011	79
2010	76

## SES Employee Engagement

This index measures key principles that keep employees engaged in their work. These principles include how effectively leaders lead, how well supervisors support and respond to employees, and intrinsic work experiences, such as innovation and connection to the agency's mission.

**Table 2 – 2010 through 2016 Employee Engagement Index Scores**

<b>Year</b>	<b>Employee Engagement</b>	<b>Leaders Lead</b>	<b>Supervisors</b>	<b>Intrinsic Work Experiences</b>
2016	83	81	86	84
2015	75	67	80	79
2014	80	72	85	83
2013	82	75	84	86
2012	80	75	80	84
2011	80	79	79	84
2010	76	67	78	81

## SES Human Capital Assessment and Accountability Framework (HCAAF)

The HCAAF identifies human capital systems that together provide a consistent, comprehensive representation of human capital management for the Federal government.

**Table 3 – 2010 through 2016 HCAAF Index Scores**

<b>Year</b>	<b>Leadership &amp; Knowledge Management</b>	<b>Results–Oriented Performance Culture</b>	<b>Talent Management</b>	<b>Job Satisfaction</b>
2016	84	73	77	83
2015	71	64	74	78
2014	75	69	74	80
2013	79	68	75	79
2012	75	70	71	82
2011	80	67	64	78
2010	70	63	66	82

### SES New Inclusion Quotient (New IQ)

The New IQ comes from the concept that individual behaviors, repeated over time, create habits necessary for inclusiveness. This index monitors the five Habits of Inclusion: Fair, Open, Cooperative, Supportive, and Empowering.

**Table 4 – 2010 through 2016 New IQ Index Scores**

<b>Year</b>	<b>New IQ</b>	<b><i>Fair</i></b>	<b><i>Open</i></b>	<b><i>Cooperative</i></b>	<b><i>Supportive</i></b>	<b><i>Empowering</i></b>
2016	79	75	80	82	84	75
2015	71	67	76	71	75	67
2014	75	72	78	74	82	68

2011	77
2010	74

## Monitoring ALJ Behaviors and the Focused Review Process

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

### **Early Monitoring System:**

The Early Monitoring System (EMS) monitors the ALJ corps for statistical anomalies in a variety of areas. The Decision Statistical Index Tool (hereinafter the “EMS tool”) measures the performance of ALJs in the following categories: agree rate less than 50 percent; allowance rate greater than 85 percent; allowance rate less than 20 percent; high dispositions per day above 3.0; low dispositions per day below 1.0; dismissal rate; partial rate on decisions; on-the-record decision rate; percentage of cases with more than 3 hearings; bench decision rate on 1 favorable; average time in ALJ-controlled statuses in the agency’s Case Processing & Management System (CPMS) (ALJ controlled statuses: ALJ DWR, ALPO, ARPR, ALJ Writing, Edit, and ALJ SIGN) and overall interest score based upon these preceding factors. EMS also looks at pairings between judges and representatives, and judges and experts.

### Focused Reviews:

The focused review process was established to help ensure that administrative law judges (ALJs) and managers have the necessary information to provide timely and legally sufficient decisions. The process includes a thoughtful approach to referrals, being mindful that assessing policy compliance is the primary purpose of the review, that the agency has limited resources, and that the process is not disciplinary but educational and informational. Referrals are based on algorithms, including the Early Monitoring System (EMS); inquiries from inside and outside the agency; results from own motion reviews; or other information. The reviews are not limited to review of an individual adjudicator’s work. The goal is to help ALJs and hearing offices provide services to the public in the form of quality adjudication and decisional articulation.

### Sample of Sanitized Representative Focused Review Summaries:

- **ALJ A:** Referred for a focused review due to low number of dispositions and a low agree rate. The Office of the Chief Administrative Law Judge (OCALJ) prepared a training package based on the results of the focused review for the subject ALJ.  
**Outcome:** The ALJ refused to meet with the Hearing Office Chief Administrative Law Judge (HOCALJ) and Regional Chief Administrative Law Judge (RCALJ) to discuss the results of the review or the proposed training, and subsequently retired.
- **ALJ B:** Referred for a focused review due to a high allowance rate and a low agree rate. A review and a re-review were completed and ALJ underwent two training sessions and was assigned a mentor.  
**Outcome:** ALJ has shown sustained improvements with an agree rate that has improved over 40 percent.

**ALJ C:** Referred for a focused review due to a high allowance rate and a high number of bench decisions. ALJ completed training.

**Outcome:** While allowance rate has remained high, ALJ's agree rate has improved and there has been a significant decrease in bench decisions.

- **ALJ D:** Referred for a focused review due to low agree rate. A review and a re-review were completed and the ALJ underwent training. Regional management continued to work with OCALJ to address ongoing issues.  
**Outcome:** ALJ's agree rate improved 15 percent, and ALJ retired.
- **ALJ E:** Referred for a focused review due to a high allowance rate, low agree rate, and low productivity. A review and a re-review were completed, and ALJ underwent training including collaborative training with two ALJs.  
**Outcome:** ALJ demonstrated moderate sustained improvement and ALJ will retire at the end of calendar year 2016.
- **ALJ F:** Referred for a focused review due to reports of policy noncompliance from Regional office and an agree rate of less than 70 percent. A review and re-review were completed and ALJ completed training following each review.  
**Outcome:** ALJ's agree rate has improved almost 20 percent and Regional office continues to work with OCALJ to address ongoing policy compliance issues.
- **ALJ G:** Referred for a focused review due to a low allowance rate. The focused review revealed minor policy noncompliance issues. ALJ completed training.  
**Outcome:** ALJ continues to have an agree rate above the national average. Regional management has reported no ongoing concerns related to this ALJ.
- **ALJ H:** Referred for a focused review due to a low agree rate. ALJ completed prepared training, and attended refresher training as well.  
**Outcome:** During the fiscal year in which the review and training took place, ALJ demonstrated an increase in agree rate of over 10 percent.
- **ALJ I:** Referred for a focused review due to a low allowance rate. The report revealed minimal policy issues. OCALJ developed training materials.  
**Outcome:** ALJ continues to have an agree rate that exceeds agency expectations.
- **Medical Expert:** Referred for a focused review after study regarding potential medical expert rotational issue showed that 50 percent of this medical expert's invoices from the agency were based on payments for cases of two ALJs in one hearing office. Agency sent a cure letter to the medical expert.  
**Outcome:** Medical Expert is no longer an expert with the agency.

## EXECUTIVE SUMMARY

For more than 80 years, Social Security has represented a promise between generations that has kept millions of people above the poverty line in their old age and disability-prone years, providing critical resources for housing, food, and medication. Every application, inquiry, and visitor matters to us, because the work we do could be the difference between a person having a roof over his or her head or being homeless.

In the last year, we provided financial protection for nearly 64 million individuals who receive almost a trillion dollars annually, in Social Security retirement, disability, and survivors' benefits, and Supplemental Security Income (SSI) payments.

Our dedicated employees are unwavering in their commitment to serve every customer with the utmost professionalism and compassion, in the service channel of the customer's choice.

In publishing our *Vision 2025* last year, we identified three essential pillars that underpin our aspirational picture of Social Security over the next decade: **a superior customer experience**, offered by **exceptional employees**, through an **innovative organization**. We have begun to map out our 10-year path, identifying critical priorities and foundational steps toward fulfilling our vision. Already, we have seen significant progress in implementing our critical priorities, which include advancing customer engagement, improving service delivery in our disability programs, investing in our employees, modernizing our information technology (IT), and accelerating data-driven decisions. We have added several key online services in our continuing quest to provide customer choice in accessing our services and we have invested in the development of our workforce even through a constrained fiscal climate, to ensure they can continue to offer the highest quality service to the American public. We are pursuing new foundational initiatives, such as our enterprise program management office and our enhanced IT investment program (ITIP), to position Social Security to implement key twenty-first century service delivery improvements.

Despite our notable progress, we are facing an unprecedented funding shortfall as we enter fiscal year (FY) 2017, which will severely challenge our ability to maintain the service on which the American public has come to depend. If we are to meet the evolving demands and needs of an aging Baby Boom population, which is retiring and potentially becoming disabled in significant numbers, we will need adequate and sustained funding, and must identify new and creative ways to address increased traffic and surging caseloads.

The President's FY 2017 budget for Social Security would go a long way towards realizing our strategic objectives, including reducing our pending disability cases and hearing decisions, preventing and decreasing improper payments, and enhancing online services, all while covering our basic fixed costs and other obligations. However, the stark reality of a potential year-long Continuing Resolution (CR) for the balance of FY 2017, puts our long-term vision and service delivery objectives at grave risk. Hiring freezes, loss of institutional knowledge through attrition, stagnated Information Technology initiatives, and furloughs are real and tangible barriers to meeting our customers' needs.

The next Administration and agency leadership will inherit a Social Security workforce that is competent, compassionate, and committed to continuing our long tradition of outstanding service. However, without sufficient resources, these exceptional employees will not be able to deliver on the program's decades-long social contract. The first and most critical imperative for our new leaders, therefore, is to secure sufficient funding to serve the American public at a level it has earned, expects, and deserves.

# OUR AGENCY

## OUR MISSION AND VISION

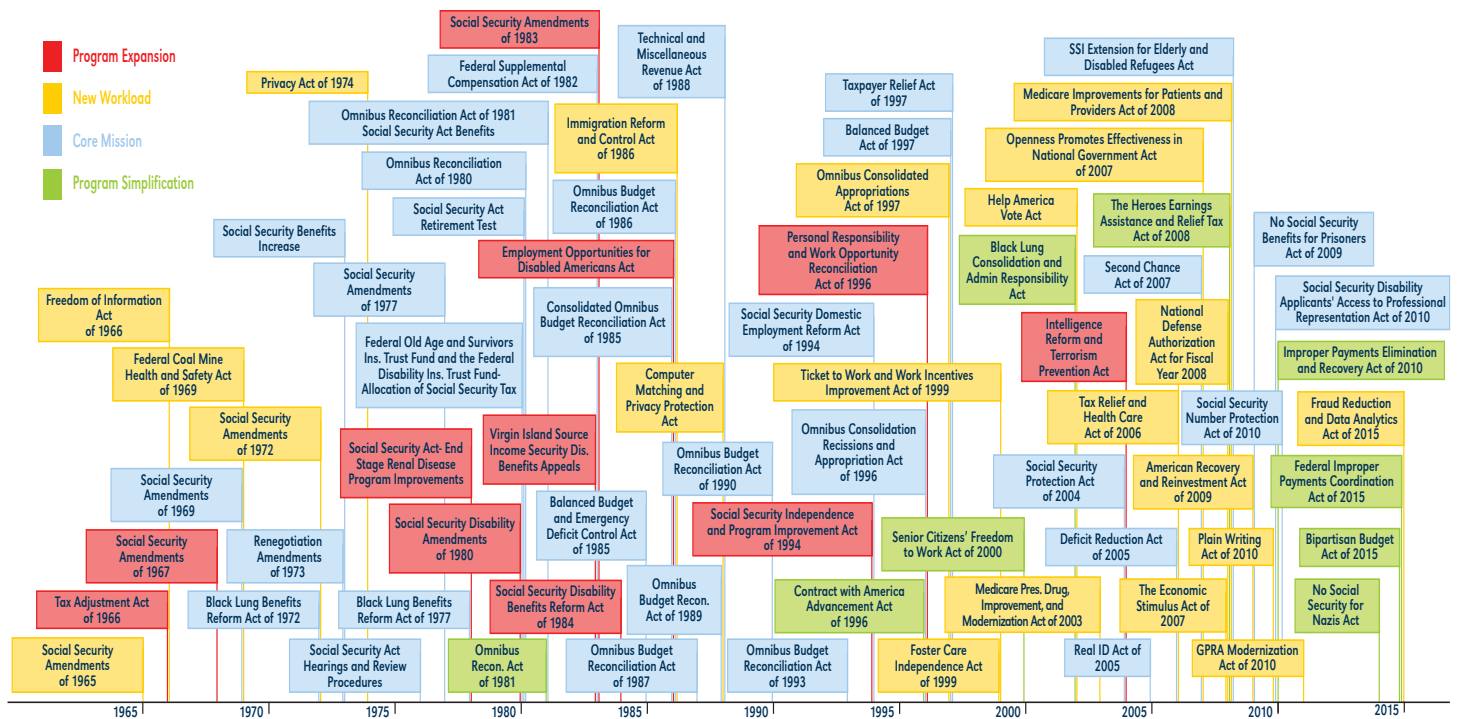

### MISSION

Our mission is to deliver Social Security services that meet the changing needs of the public.

### HISTORY AND CULTURE

Great satisfaction comes from knowing that the people who need our benefits most – retirees, people with disabilities, children, and families – receive the help they need. Social Security continues to give Americans hope and support with expanded programs that offer more than even President Franklin D. Roosevelt envisioned over 80 years ago, when he signed the Social Security Act into law.

### Social Security Administration Legislative History: 1965 through the Present

## VISION 2025

**Vision 2025**, released in April 2015, serves as our “north star” to guide us as we position our agency to deliver services now and in the future.

Defining Vision 2025 is the first step in our long-range strategic planning process for envisioning, planning, and achieving success – the “aspirational” picture of the future of our agency. The Vision reflects considerable input from a broad range of audiences and serves as the framework for addressing three priority areas:

- Superior Customer Experience;
- Exceptional Employees; and
- Innovative Organization.

Social Security’s executive leadership team and the Executive Vision Council collaborated to identify foundational efforts aligned with the Vision 2025 framework. From this collaboration, our Agency Critical Priorities emerged. Our priorities for FY 2016-2017 is to build on the work we began in previous years, and reflect the most important work we must do in service of our aspirational vision for 2025. Unlike our day-to-day activities of delivering services and managing the agency, this work represents our long-term commitment to our strategic direction for the organization.

The strategic roadmap for realizing Vision 2025 consists of three elements: Agency Strategic Plans (ASP), short-term agency critical priorities, and long-range recommendations. Work on the FY 2018-2022 ASP is already underway, with a draft due to the Office of Management and Budget (OMB) in June 2017, and an anticipated publication date of January 2018. Each year for the foreseeable future, we plan to prepare a list of short-term agency critical priorities identifying key areas

of immediate focus that support longer-term strategic goals and objectives in the then-current ASP. We continue to develop and refine the long-term recommendations, which will be an ongoing effort.

The strategic roadmap is a living communications tool describing the desired outcomes of Vision 2025 and providing an overview of current and recommended transformational initiatives for the next 10 years. We will update and refine the roadmap continuously to reflect the agency’s operating environment, changes to external factors, and our increasing understanding of customer preferences.

For more information, visit [Appendix G: Agency Critical Priorities for 2016-2017](#).

## OUR ORGANIZATIONAL STRUCTURE

Serving the American public requires a vast network of facilities, technology, and skilled staff. Every day more than 60,000 employees provide a full range of services to our customers. Nationwide, we have a network of more than 1,500 offices, which includes regional offices, field offices, Social Security card centers, tele service centers, processing centers, hearing offices, National Hearing Centers (NHC), the Appeals Council, and our headquarters in Woodlawn, Maryland.

Additionally, more than 16,000 state employees at disability determination services (DDS) offices work in 54 jurisdictions and provide services in about 100 offices across the country and U.S. territories. Internationally, we deliver services in the U.S. embassies in more than one hundred countries.

Customers receive in-person service at our field offices and Social Security card centers. Our tele service centers primarily handle calls to our National 800 Number Network (N8NN). Employees in our processing centers typically handle complex claims and post-entitlement work that is not automated or requires manual handling. The Foreign Benefits Unit (FBU) serves customers living abroad.

There are two records management sites, which are located in Kansas City, MO and in Boyers, PA. We are in the process of digitizing paper records of wages, claims, and post-entitlement actions.

We have created strong partnerships with state agencies, and we depend on state employees in DDS offices to make disability determinations. Administrative Law Judges (ALJ) in our hearing offices and the Administrative Appeals Judges (AAJ) at our Appeals Council decide appeals involving Social Security and SSI issues.

### ORGANIZATIONAL OVERVIEW

Our organization is comprised of employees at headquarters and in the regions. Following is a pie chart that shows all permanent agency employees by component. The main pie shows the four largest components. The smaller pie expands all other components. Additional graphs showing headquarters and regional demographics are shown in the following sections.

*Note: Data as of 9/30/16 from Workforce at a Glance report.*

For more information about our components and their functions, view [Appendix A: Agency Organizational Chart](#) or the information in [Appendix C: Contact Information for Key Executives and Management Responsibilities](#).

## HEADQUARTERS COMPONENTS

Our headquarters offices are primarily located on campus at 6401 Security Blvd., Woodlawn, MD, in the southwest suburbs of Baltimore. There are additional offices in outlying buildings in the Baltimore Metro area. We also occupy space in Washington D.C. at the International Trade Commission Building at 500 E Street, SW, and 400 Virginia Ave, SW.

Below is a high-level break down of our headquarters organizational structure.

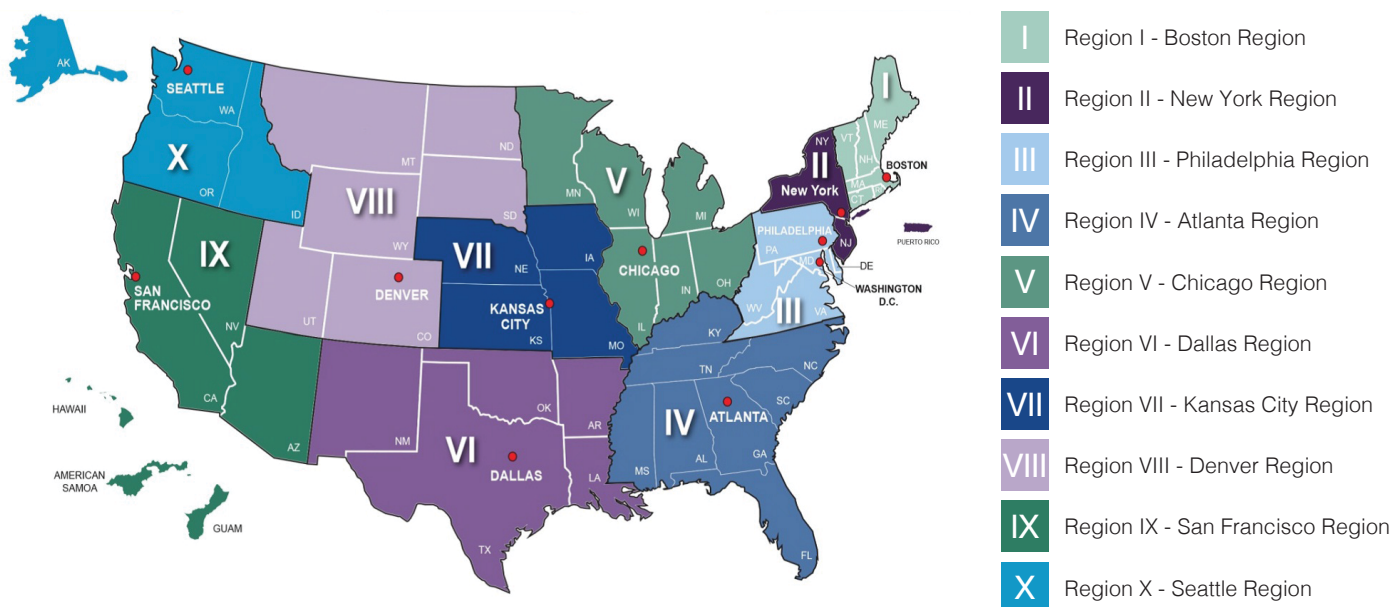

- **Office of the Commissioner (COSS)**
- **Agency Level Offices**
  - Chief Actuary (OCACT)
  - Chief Strategic Officer (OCSO)
  - General Counsel (OGC)
  - Inspector General (OIG)\*
- **Deputy Commissioner Level Offices**
  - Budget, Finance, Quality, and Management (DCBFQM)
  - Communications (DCCOMM)
  - Disability Adjudication and Review (DCDAR)
  - Human Resources (DCHR)
  - Legislation and Congressional Affairs (DCLCA)
  - Operations (DCO)
  - Retirement and Disability Policy (DCRDP)
  - Systems/Chief Information Officer (DCS/CIO)

*\*The Inspector General (IG) is under the general supervision of the Commissioner of Social Security, but the IG may not be prohibited from initiating, carrying out, or completing any audit or investigation, or from issuing any subpoena. The OIG at Social Security was established on March 31, 1995, pursuant to the Social Security Independence and Program Improvements act of 1994.*

## REGIONAL STRUCTURE

We generally organize our operations into the 10 regions shown on the following map. Our regional structure also includes:

- 10 Regional Offices;
- 51 Area Directors Offices;
- 1,212 Field Offices;
- 164 Hearing Offices;
- 5 Hearing Centers;
- 4 National Case Assistance Centers;
- 14 Card Centers;
- 32 Call Centers;
- 11 Quality Review Field Sites;
- 8 Processing Centers;
- 54 State DDSs;
- 6 Federal Benefits Units in Rome, Manila, London, Frankfurt, Mexico City, and San Jose (Costa Rica).

## FIELD OFFICES

Our more than 1200 field offices comprise our largest contingent of front-line employees, whose daily work puts them in direct touch with millions of customers. They are claims representatives, service representatives, and other technical experts who process the full gamut of benefits claims, SSN applications, and post-entitlement actions. In FY 2016, we received over 42 million field office visits. Below is a five-year historical look at the number of field office visits.

## N8NN CALLS

We received over 77 million phone calls to our toll-free network, 1-800-772-1213 (TTY 1-800-325-0778), in FY 2016. Our tele service representatives handle calls on every aspect of our programs, such as requests for specific claims information, explanation of notices, directions to offices, and requests for appointments. Below is a five-year historical look at the number of phone calls we received to our N8NN.

### N8NN Calls Received and Field Office Visitors by FY

Note: There were 53 weeks in FYs 2011 and 2016.

## PAYMENT CENTERS (PC)

The PC process a diverse variety of adjudication, post entitlement, and manual workloads, such as awards, address changes, retroactive payments, overpayments, and attorney's fees, just to name a few. We have eight PC:

- PC 1: North Eastern (NEPSC)
- PC 2: Mid-Atlantic (MATPSC)
- PC 3: South Eastern (SEPSC)
- PC 4: Great Lakes (GLPSC)
- PC 5: Western (WNPSC)
- PC 6: Mid-America (MAMPSC)
- PC 7: Office of Disability Operations
- PC 8: Office of International Operations

## HEARING OFFICES

We have 164 hearing offices and 5 national hearing centers. Our case technicians, decision writers, judges and a range of support staff handle appeals from claimants whose cases are denied at the earlier stages of our claims process.

We also have four national case assistance centers that support decision writing and case pulling. We have more than 1,600 ALJs presiding over 700,000 hearings each year. Upon claimant request or on the Appeals Council's own motion, the Council reviews ALJ decisions and dismissals involving claims for benefits filed under Titles II (2) and XVI (16). In FY 2016, the Office of Appellate Operations (OAO) processed 159,000 requests for review, up 5.53 percent from FY 2015. OAO also reviews federal court appeals of hearing decisions.

## ONLINE PRESENCE

Our website has come a long way since it first went live in May 1994. Today, we have over 20 online services and, each month, millions of Americans rely on our website to learn about our programs and services, and to conveniently and securely apply for benefits.

Online services, like the Retirement Estimator, Retirement Application, and Extra Help Application (for assistance paying for Medicare prescriptions), continue to rank as the best in government and higher than many top-rated private sector companies. Thanks to the popularity of these [online services](#), more than half of all retirement applications are filed online. Our Frequently Asked Questions (FAQ) service is in demand, too, receiving more than two million hits each month.

[my Social Security](#), which launched in 2012 with the online [Social Security Statement](#), is a free online account that offers the public quick, convenient, and secure access to their personal Social Security record. If a person receives benefits or has Medicare, they can use a [my Social Security](#) online account to:

- Request a replacement Social Security card if they meet [certain requirements](#);
- Get a [benefit verification letter](#);
- Check their benefit and payment information and earnings record;
- [Change their address and phone number](#);
- [Start or change direct deposit](#) of their benefit payment;
- Get a [replacement Medicare card](#); and
- Get a [replacement SSA-1099 or SSA-1042S](#) for tax season.

Those who do not receive benefits can use a [my Social Security](#) online account to:

- Request a replacement Social Security card if they meet [certain requirements](#);
- Get a [Social Security Statement](#) to review:
  - Estimates of retirement, disability, and survivors benefits;
  - Earnings once a year to verify the amounts we post are correct;
  - The estimated Social Security and Medicare taxes they've paid; and
- Get a [benefit verification letter](#).

In addition to our focus on providing online services, we continue to look for other online opportunities to help the public. Social media has become an important communication channel for us in recent years. Our use of social media supports our mission to “deliver Social Security services that meet the changing needs of the public,” and our vision of “proudly serving Social Security customers throughout their lifetime, when and where they need us.” For more information, visit our [social media hub](#), or any of our specific channels, such as:

## OUR WORK

Social Security is an earned benefit — a benefit that is critically important to the people who receive it. It is a foundation of economic security when workers and their families face what President Franklin D. Roosevelt called “the hazards and vicissitudes of life.” It is the nation’s most effective poverty prevention program, keeping 21 million people out of poverty. In fact, 9 out of 10 individuals age 65 and older receive Social Security benefits. During FY 2016, we paid more than \$932 billion to more than 60 million beneficiaries.

### CORE WORKLOADS

Social Security benefits have been a foundational element of the nation’s economic security system for more than 80 years. Initially intended to protect against poverty in old age, we have expanded significantly since the first lump-sum payment in 1937.

#### FIRST SOCIAL SECURITY BENEFICIARY

Ida May Fuller worked for three years under the Social Security program. On January 31, 1940, she received the program’s first monthly retirement check, in the amount of \$22.54.

### OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE PROGRAMS (OASDI)

#### OLD-AGE AND SURVIVORS INSURANCE (OASI)

Today, most retirees plan their retirement dates based on when they can receive their Social Security benefits. Created in 1935, the OASI program (which provides what most people think of as their Social Security benefit) provides retirement and survivors benefits to qualified workers and their families. Workers earn credit towards Social Security benefits by working and paying Social Security taxes. Most people need 40 credits, or 10 years of covered work, to qualify for retirement benefits.

A worker qualifies for full-retirement benefits between the ages of 65 and 67, depending on the year he or she was born. Reduced retirement benefits are payable as early as age 62. Certain members of retired workers’ families may

also receive benefits. Spouses (including divorced spouses), minor children, and children who became disabled before age 22 may also be eligible for benefits.

#### Who Receives Old-Age, Survivors, and Disability Insurance Benefits?

Social Security also provides income for families of workers who die. Survivors benefits were added in 1939 and benefits for disabled widows and widowers were added in 1968. Widows, widowers (and divorced widows and widowers), dependent parents, and children may be eligible for survivors benefits. In fact, 98 percent of children could get benefits if a working parent dies. Social Security pays more benefits to children than any other federal program.

Source: [Social Security Office of the Chief Actuary](#), as of September 30, 2016

## DISABILITY INSURANCE (DI)

Becoming disabled before reaching full retirement age (FRA) is not something most people consider. However, studies show that a 20-year-old worker has more than a 1-in-4 chance of becoming disabled before reaching FRA.

The disability program began in 1956 to provide benefits for workers with disabilities between the ages of 50 and full retirement. The program expanded in 1960 to include workers with disabilities of all ages.

People may qualify for Social Security DI benefits if they have worked long enough and paid Social Security taxes, and cannot work because they have a medical condition expected to last at least one year or result in death. Certain members of their families also may qualify for DI benefits. We have a robust, five-step sequential evaluation process, based on the statutory definition of disability, to determine when an adult claimant is disabled, and ensure that only disabled individuals receive DI benefits.

First, we determine if the claimant is working. In FY 2016, if the claimant's monthly earnings average is at or below \$1,130, we look at their medical condition. To have a disability under Social Security's definition, the claimant's medical condition must significantly limit their ability to do basic work activities—such as lifting, standing, walking, sitting, and remembering—for at least 12 months. If the claimant's medical condition is severe, we determine if the claimant's impairment(s) meets the severity of a listed impairment that we recognize as qualifying for DI benefits.

If the severity of the claimant's impairment(s) does not meet the level of a listed impairment, we decide whether the claimant's impairment(s) prevents him or her from performing past work. If it does prevent a claimant's performance of past work, we will consider whether there is other work the claimant can still do. We consider other factors like age, education, past work experience, and the claimant's skills.

This thorough evaluation process is important to ensure that we make quality decisions the first time, and that only qualified individuals receive DI benefits.

### Who Receives Supplemental Security Income Benefits?

### SSI

The SSI program, established in 1972, is a federal program providing monthly payments to people with limited income and resources who are aged, blind, or disabled. Adults and children under age 18 can receive SSI payments based on disability or blindness.

General tax revenue, not workers' Social Security taxes, funds the SSI program.

Source: [Social Security Office of Retirement and Disability Policy](#), as of September 30, 2016.

## SSN AND EARNINGS RECORDS

Since we began in 1936, we have issued more than 472 million unique SSNs. Today, babies born in the United States receive a SSN at birth. Qualifying foreign-born workers may also receive SSNs. We also complete millions of actions to keep our number holders' records current and accurate. In FY 2016, we completed requests for more than 16 million new and replacement Social Security cards. In November 2015, we began processing replacement SSN cards online via our [Internet SSN Card Replacement application](#) for people who meet certain criteria in some states. We continue to expand the number of participating states in FY 2017.

We also receive regular updates from employers on the earnings of the working population and post those reported earnings to the workers' records. We link earnings records to SSNs and resolve any discrepancies. In FY 2016, we posted over 250 million earnings items to workers' records.

## SOCIAL SECURITY STATEMENT

The *Social Security Statement* informs people who have worked under the Social Security program of their reported earnings, estimates of the tax contributions they and their employers have paid, and estimates for retirement, disability, and survivor's benefits for which they may be eligible.

Workers age 18 or older can access their *Social Security Statement* online by [signing up](#) for a [my Social Security](#) account. We also mail *Social Security Statements* to workers attaining ages 25, 30, 35, 40, 45, 50, 55, 60, and older who are not receiving Social Security benefits and do not yet have a my Social Security account. In FY 2016, we mailed 47.9 million paper Statements. In the same timeframe, the public accessed their online Statement 40.6 million times.

## SPECIALIZED WORKLOADS

In addition to our core workloads, we also support other work across the federal government. These additional duties include:

### MEDICARE

We administer a number of aspects of the Medicare program, which provides health insurance for the aged and disabled. We process applications for Medicare Part A and Medicare Part B and determine whether applicants are entitled to Medicare coverage. We also explain basic coverage information when our customers have questions. For example, we explain Medicare Part A covers inpatient hospital care and Medicare Part B covers doctors' services and other outpatient services. We determine eligibility for low-income subsidies under the Medicare Prescription Drug Program (also known as Medicare Part D). As appropriate, we respond to inquiries, send notices, handle name changes and death notifications, and issue original and replacement Medicare cards. We also deduct Medicare premiums from the benefits of Social Security beneficiaries. The Centers for Medicare and Medicaid Services (CMS) reimburses us for some of the Medicare work we perform.

We also conduct outreach to identify persons who may be eligible for Medicare Savings Programs, which are state programs that assist low-income Medicare beneficiaries to pay some of their Medicare premiums. We send out approximately three million notices a year to Medicare beneficiaries who may be eligible for Medicare Savings Programs.

### HOMELAND SECURITY AND IMMIGRATION

The Department of Homeland Security (DHS) offers a free, voluntary, online program, known as E-Verify, which allows employers to confirm the employment eligibility of new hires. We support DHS by confirming whether new hires' names, SSNs, and dates of birth match the information in our records and by providing DHS with citizenship information contained in our records. Using that information, DHS checks its database to confirm the current work authorization of all non-citizens. Once these checks are complete, DHS informs the employer whether a new hire is authorized to work.

### OTHER ACTIVITIES MANDATED BY CONGRESS

We also perform many other workloads mandated by Congress, including activities related to: the Employee Retirement Income Security Act of 1974 (ERISA); the Coal Act; Supplemental Nutrition Assistance Program (formerly Food Stamps); and SSN Verifications for a wide-range of non-program purposes.

## AFFORDABLE CARE ACT (ACA)

The ACA outlines provisions that create additional responsibilities for our agency. These responsibilities include:

- Calculating Medicare Part D premiums for high income participants (implemented January 2011);
- Collecting and reporting increases in the Hospital Insurance tax on high-income taxpayers;
- Revising W-2 reporting requirements for the cost of employer sponsored health coverage; and
- Verifying SSNs and allegations of citizenship for health exchange participation.

In addition to verifying SSNs and allegations of citizenship, CMS requested that we provide data on the following elements to help determine initial eligibility: death, incarceration, monthly, and annual Title II income benefit amounts, quarters of coverage, and a disability indicator. CMS also requested that we provide specific data elements currently available in the data exchange required to process ACA redeterminations and renewals.

To further streamline processes, we are also leading data exchange efforts through a public-private partnership (P3) State Data Exchange Community of Excellence (CoE). For more information on our data exchange efforts, visit our [Data Exchange website](#).

We developed and maintain a secondary ACA verification service support site at our Second Service Center (SSC) in Durham, NC, to ensure uninterrupted service during scheduled and unscheduled systems shutdowns.

In addition, we participate in a wide range of outreach activities on the national and regional level to support enrollment in healthcare coverage under the ACA. We coordinate our outreach activities with the White House and the Department of Health and Human Services (HHS), and build on the HHS marketing plan. We share ACA information nationwide, in many instances with navigators and assisters provided by HHS. We direct particular attention towards target cities and populations that remain eligible to secure coverage in the marketplace, but have not done so. On a national level, we share information on ACA through various channels including multiple social media platforms, national conferences, conference calls with the advocate community, and large-scale notices to beneficiaries.

## DATA EXCHANGES

We support the work of other agencies by exchanging data, which streamlines processes across the federal government. For more information, go to the Policy Improvements section on the [Expansion of Data Exchanges](#).

# OUR EMPLOYEES

## THE HEART OF OUR AGENCY

We have over 60,000 dedicated and talented employees who make up our workforce, represented by various labor and management organizations. Our workforce is distributed across America in our headquarters facilities, vast network of field and hearing offices, SSN card and processing centers, and tele service centers.

Our employees are our greatest asset, and we must protect, engage, and support them in order to continue to meet ever-changing customer expectations and workload demands.

Through their compassion and dedication, our employees reflect the “heart of the agency,” providing a high-quality, personalized customer experience to our customers. Our talented workforce includes employees who serve customers directly on the front line, as well as those in supporting roles. We are empowered, knowledgeable, and equipped to meet our customers’ needs at the first point of contact. Direct and personal conversations have always been at the center of our service delivery model. This is what makes our agency and our employees unique. Our employees understand the critical role we play when a customer experiences challenging situations, such as the loss of income due to the death of a family member, severe disability, or other situations that bring customers to us in their moments of greatest need.

## WORKFORCE SNAPSHOT

The tables below represent a snapshot of our workforce as of September 30, 2016. The data includes full-time and part-time permanent career employees.

### Workforce Population

		NUMBER	PERCENTAGE
Full-Time Status	Full-Time (FTP)	62,532	98.63%
	Part-Time (PTP)	870	1.37%
Total Employees		63,402	
Supervisory Status	Non-Supervisory	56,763	89.53%
	Supervisory	6,639	10.47%
Component	*Field	50,960	80.37%
	Office of Central Operations	4,296	6.78%
	HQ	8,146	12.85%

\* Field employees include all employees who do not work in headquarters or the Office of Central Operations (OCO). Field employees come from DCO, DCBFQM, DCDAR, OGC, and OIG.

Note: Data as of 9/30/16 from Workforce at a Glance report.

### Generational Information by Number of Employees

*Note: Data as of 9/30/16 from Workforce at a Glance report.*

### Age of the Workforce

The following chart shows our employees by age. The average age of all employees is 46 years old. The average age of our new hires is 38 years old. The average age of separating employees is 52 years old.

*Note: Data as of 9/30/16 from Workforce at a Glance report.*

## OUR CUSTOMERS

We take considerable pride in administering benefits and providing financial protection for nearly 61 million individuals who receive almost a trillion dollars annually in OASDI benefits. These include payments to retirees, spouses, disabled workers, children, and surviving family members, delivering on our agency's promise to secure today and tomorrow. We also make payments under our SSI program, to people with limited income and resources. Our rich history is founded on simple, yet profound principles, reflected in the integrity and compassion of our employees. It is this narrative and tradition upon which we build as our agency evolves and reorients our customer-centered focus to meet the emerging service needs of the public.

At Social Security, we remain true to our core principles and continue to provide critical services to those who need us most. We are committed to serving all of our customers efficiently, effectively, and compassionately, and to preserving the integrity of the Social Security programs for future generations. Our customers reflect the full diversity of the American public in age, education, income, ethnicity, race, and ability. They are:

- 39 million retired workers who, after a lifetime of work and contribution, rely on Social Security benefits for a portion of their income. For one out of five beneficiaries aged 65 and older, Social Security benefits are their sole source of income, and for two out of three, Social Security is half or more of their total income. Our benefits help individuals and families make ends meet and provide them with independence in their elder years.
- Four million children, including disabled adult children, and four million additional survivors dealing with life's most devastating losses.
- Nearly nine million workers who have faced a life-changing disability, leaving them unable to provide for themselves and their families.
- 8.4 million elderly, blind, or individuals with disabilities, living in poverty and relying on SSI to meet life's basic needs.
- Medicare beneficiaries who either have reached their senior years or become disabled. They can obtain medical treatment and services based on the contributions they have made while working, plus any necessary premiums.
- Our nation's current workforce, paying into Social Security in the form of taxes on their wages and income.
- Employers, businesses, non-profits, advocates, oversight groups, and other stakeholders who benefit from our services and provide critical support to us and to all of our customer groups.
- Government agencies, national and international, federal, state, municipal, territories, and Indian Nations.

We are with our customers through life's journey, when and where they need us.

## NOTABLE RECENT ACCOMPLISHMENTS

In the last couple of years, we have made great strides towards our aspirational Vision 2025 and the Agency Critical Priorities. For example, we have improved our customers' experience by releasing an online application for the public to request a replacement Social Security Number card. In addition, to improve our disability process, we have streamlined and clarified our policies.

We updated our critical infrastructure when we migrated to a new state-of-the-art data center that has won numerous design awards and creates a sustainable, efficient environment for at least the next 20 years.

We transformed our IT investment process by creating an enterprise-wide executive IT investment board to make informed funding decisions on projects of greatest benefit to our agency's mission. We also established a program management office that provides project management services for our critical projects, thereby increasing their likelihood of success.

We modernized some of our IT processes using an Agile development model and our Agency Cloud Initiative. In cybersecurity, we have focused our efforts in several areas, including the Cross Agency Priority (CAP) Goals for Cybersecurity, Strong Authentication for Online Services, and the DHS' Continuous Diagnostics and Monitoring (CDM). We also continue to implement cybersecurity best practices, including our robust Incident Response and our Security Operations Center (SOC), a defensive Enterprise Penetration Testing Program, and Malware and Anti-Phishing Defenses.

With adequate and sustained funding, we will continue this great work in FY 2017 and beyond. Below are more detailed descriptions of some of our recent accomplishments.

### STRONG CROSS-AGENCY COLLABORATION

We have collaborated across multiple federal agencies to advance a "one government agenda" to improve public service and achieve sensible, effective outcomes. Our active participation in the collective conversation has enabled us to modify our own business processes and policies, to the benefit of our customers, employees, and organization.

#### FEDERAL INTERAGENCY REENTRY COUNCIL

As a participating agency in the [Federal Interagency Reentry Council](#), Social Security continues to work with other federal agencies including the Department of Justice, Bureau of Prisons to increase transparency about government programs and services available to individuals preparing to return to the community. Our dedicated reentry web page, <https://www.ssa.gov/reentry/>, includes SSA-related information about accessing Social Security benefits and resource and links to other federal agencies. Family members and advocates can readily access information for their relatives or clients about filing for or reinstating benefits, veterans' services and healthcare.

#### ELDER JUSTICE COORDINATING COUNCIL

As part of the Patient Protection and the ACA, the Elder Justice Act was signed into law on March 23, 2010. The Elder Justice Act provides federal resources to "prevent, detect, treat, understand, intervene in, and where appropriate, prosecute elder abuse, neglect, and exploitation." The Elder Justice Coordinating Council is directed by the Office of the Secretary of Health and Human Services and the Secretary serve as the Chair of the Council. The Administration on Aging leads the overall Council efforts. We are one of 11 member agencies on the council, and we are constantly seeking opportunities to raise public awareness about the growing incidence of elder abuse and financial exploitation. The following areas are our most recent key accomplishments to date.

## Strengthening Communication with the Judicial System

We are collaborating with key stakeholders at the state court level to develop a communications protocol that will include notifying us when judges remove guardians who also serve as representative payees.

## Public Awareness

We are constantly seeking opportunities to raise public awareness about the growing incidence of elder abuse and financial exploitation. Through partnerships with other federal entities, we have worked to raise public awareness at various national and local aging conferences. We also developed an interdisciplinary training series for use by staff and other organizations who serve seniors and members of the public, which is designed to educate staff, broaden community awareness, and provide key resources to those seeking to reduce the incidents of elder abuse, neglect and financial exploitation.

## Working Interdisciplinary Networks of Guardianship Stakeholders Collaboration

We expanded our representation on the American Bar Association-sponsored Working Interdisciplinary Networks of Guardianship Stakeholders (WINGS). This organization currently exists in 16 states and provides technical assistance to court officials in states to create innovative, consensus-driven WINGS. We, along with the WINGS groups, engage in outreach, education and training, and serve as an ongoing forum to address the issues that frequently arise in adult guardianship, such as abuse, neglect, exploitation, and misuse of our benefits.

## DATA EXCHANGE AGREEMENTS

Through our agreements, we provide: over 2 billion SSN verifications annually; Social Security eligibility data to states to administer federal and state funded programs, and to federal agencies such as CMS to administer Medicare Parts A and B; death data to federal agencies administering federal benefit programs to prevent improper payments to deceased beneficiaries; and earnings information to federal agencies for eligibility determinations.

We also receive data such as: prisoner data from over 2,300 institutions to prevent payments to incarcerated individuals, birth data from states to administer enumerations; and eligibility data from other agencies benefit programs such as wage data from the Office of Child Support Enforcement and Social Security Access to State Records Online for Title II and XVI benefit entitlement, eligibility, and payment amounts.

## DATA EXCHANGE COMMUNITY OF PRACTICE

The Federal Data Exchange Community of Practice, with more than 30 participating agencies, has provided increased awareness of other agencies' experiences, programs, and best practices of data sharing services; a forum to discuss the workings and value of those programs; introduction to a network of individuals who manage those programs; and invaluable sharing of information that influences the data sharing programs of every agency.

The State Data Exchange Community of Excellence, through its collaboration with the 50 states, is simplifying and streamlining how states receive federal data used to administer income maintenance programs that assist the public. Members of both groups include policy makers from the executive and legislative branches of government, governor appointed state representatives, and leaders and private organizations dedicated to improve public service and the citizen experience through data sharing.

## DATA EXCHANGE HUB

The Executive Office of the President (EoP), National Economic Council (NEC), OMB, and HHS have expressed interest in developing an agreement that provides the flexibility to consider adding additional human service programs to the ACA HUB data flow.

We are working with HHS and CMS to effectuate an Information Exchange Agreement (IEA) between CMS and our agency that permits use of Social Security data for TANF and SNAP by November 30, 2016. We also expect to effectuate a model state IEA with three early-adopter states (PA, MT, and OR) by December 31, 2016. We will consider any legal provisions before adding additional human services programs, including subsidized childcare as we move forward.

## U.S. INTERAGENCY COUNCIL ON HOMELESSNESS

We are an active participant in the U.S. Interagency Council on Homelessness (USICH). The mission of the USICH is to coordinate the Federal response to homelessness and to create a national partnership at every level of government and with the private sector to reduce and end homelessness.

In collaboration with USICH, the U.S. HHS' Substance Abuse and Mental Health Services Administration, and the U.S. Department of Veterans Affairs (VA) developed a document outlining the following strategies to help people experiencing homelessness to apply for and receive SSI/SSDI benefits.

Key strategies include:

- Assisting People Experiencing Homelessness with the SSI/SSDI Application Process;
- Coordinating with SSA Field Offices, Community Organizations, and other Federal Agencies;
- Coordinating with Other Benefits and Entitlements;
- Working with Veterans and Other Special Populations; and
- Assisting SSI/SSDI Beneficiaries Post-Entitlement.

For more information, please visit Social Security's [Homelessness web site](#).

## CUSTOMER SERVICE ENHANCEMENTS

In support of Vision 2025, we are steadfastly committed to offering customers choices in how they conduct business with us, including in-person, phone, mail, and online. We recognize the growing customer demand for online service, and focus on adding more web-based options. These efforts also align with the President's Management Agenda and supporting CAP Goals, in particular, [the Customer Service CAP Goal](#) to "Deliver smarter, better, faster service to citizens." Below is a sampling of recent online service enhancements.

### INTERNET SOCIAL SECURITY NUMBER REPLACEMENT CARD (ISSNRC) APPLICATION

In November 2015, the agency launched the ISSNRC application which allows adult customers age 18 and over with a [my Social Security](#) account, a domestic mailing address, and a valid state ID or driver's license, to apply for a replacement Social Security card online.

The ISSNRC application fulfills "no change" (e.g., name or date of birth has not changed) replacement card requests, which will reduce foot traffic in field offices and allow representatives to focus on more taxing workloads and customers who need or want in-person service. The application also educates and informs the public about the limited and appropriate use of the card and actions they should take to protect their identity. Each year, we issue about 10 million SSN replacement cards in-person, of which more than seven million require no change to our records. Because we issue nearly two million replacement cards annually to those under 18 years of age, the potential universe of online replacement cards is about five million.

The ISSNRC application is currently available in 14 states (Arizona, Idaho, Iowa, Kentucky, Maryland, Michigan, Mississippi, Nebraska, New Mexico, North Dakota, Pennsylvania, South Dakota, Washington, and Wisconsin) and the District of Columbia, and we plan to expand to additional states in FY 2017.

When fully implemented, this online service will shorten wait times for the public in our more than 1,200 field offices across the country and allow staff more time to assist customers who have more complex service needs. In FY 2018, we expect to issue up to 1.5 million replacement cards through this safe and convenient online option. We have also contracted with the American Association of Motor Vehicle Administrators (AAMVA) to help continue our nationwide rollout through FY 2017.

iSSNRC aligns with the first pillar of **Vision 2025**, Superior Customer Experience, and supports the Agency Critical Priorities of enhancing online customer service and advancing customer engagement.

## CUSTOMER SERVICE CAP GOAL

The Customer Service CAP Goal was established in March 2014 to improve customer service across federal government agencies. Customer Service is one of 15 CAP Goals developed to support the Administration's management agenda. Our Acting Commissioner, Carolyn W. Colvin, serves as a Goal Leader for this initiative, along with Lisa Danzig, the Associate Director for Personnel and Performance at OMB.

The objective of the customer service CAP Goal is to increase public satisfaction and promote positive experiences with the federal government by making it faster and easier for individuals and businesses to complete transactions and receive quality services.

Staff from Social Security and OMB identified the high-level CAP Goal strategies after consulting with dozens of other federal agencies and external organizations.

Highlights of the plan include:

- An online and in-person network that federal employees anywhere can join and share ideas and tools for improving customer satisfaction;
- A nationwide award program for teams and individuals who excel at customer service; and
- A better way to improve transparency and measure customer satisfaction across the federal government.

To date, we have achieved significant progress on each of these strategies.

## I1099 APPLICATION

An SSA-1099 is a tax form we mail each year in January to people who receive Social Security benefits. It shows the total amount of Social Security benefits a beneficiary received in the previous year and is used to report Social Security income for tax filing purposes.

In FY 2015, we launched a secure online application that allows most of our beneficiaries to immediately view, print, save, and download their replacement form SSA-1099 using their *my Social Security* account at <https://www.ssa.gov/myaccount/>.

In building this application, we cut through the usual "red tape" of lengthy and sometimes inefficient systems development. Using an Agile approach and streamlined process, we released the application on an expedited schedule, in time for the FY 2015 tax season. As a result of this new self-help service, we received 60 percent fewer requests for these forms through other methods, such as calls and mail.

## POLICY IMPROVEMENTS

In the past year, we have made considerable headway in updating our policies to keep pace with changes in legislation, medicine, healthcare delivery, and technology; to simplify and streamline our policies; and to rely on evidence-based research and data when formulating our policies and procedures. For example, we are successfully

implementing numerous complex provisions from the Bipartisan Budget Act (BBA) of 2015, one of the largest pieces of Social Security legislation in decades, as well as the Achieving a Better Life Experience (ABLE) Act and the Supreme Court's decision to recognize same-sex marriages across the nation.

We published final regulations to simplify work incentive policies and to update the listings of impairments that guide our medical determinations of disability. In order to increase payment accuracy and prevent improper payments, we are leveraging our existing and new data exchange agreements to improve program administration and better serve our beneficiaries. In short, our policy accomplishments serve to modernize and improve our programs, while always remaining evidence-based.

## SNAPSHOT OF THE BBA IMPLEMENTATION

The BBA addressed the funding shortfall in the SSDI program, ensuring that the program can continue to provide workers with disabilities and their families the full benefits they have earned. The BBA included other important program changes to protect benefits, support economic security for disabled individuals, and pay accurate benefits. The Budget provides the funding needed to implement these changes as well as the fully authorized level of program integrity funding called for by the legislation.

We are pleased to report that as of October 5, 2016, 15 out of 24 of the agency's BBA provisions have been successfully implemented, and we are on track to implement the remaining nine provisions. We work cooperatively with OMB, and report monthly on our implementation plans, policy or regulatory approach, business processes, contractual support, IT, and budget needs, projections, and milestones.

See [Appendix F: Complete Listing of Bipartisan Budget Act Implementation Provisions](#), for a complete listing of all provisions.

## IMPLEMENTATION OF SAME-SEX MARRIAGE POLICIES

The U.S. Supreme Court issued a decision in *Obergefell v. Hodges*, holding that all states must permit and recognize same-sex marriage. As a result, we may now recognize same-sex couples as married in all states for purposes of determining entitlement to Social Security benefits and eligibility or payment amount for SSI. While we issued instructions shortly after the court's decision, we have spent the last year sorting through complex legal and policy challenges to ensure comprehensive instructions. We continue to work toward automating the new policy and finalizing rules related to child claims. For more information, visit our [Same-Sex Couples webpage](#).

## UPDATED THE LISTING OF IMPAIRMENTS

The listings are special rules that provide us with a mechanism to identify claims that we should clearly allow. In keeping with our focus on ensuring that our policies remain current with medicine, health care delivery, and technology, we published three comprehensive revisions and one targeted revision, which will complete 93 percent of the comprehensive body system updates and putting us on track to update all listings by 2020 with a three to five-year cycle of review.

## IMPLEMENTATION OF THE ABLE ACT

With the implementation of the ABLE Act, individuals who were blind or disabled prior to age 26 can create a new type of tax-advantaged account to fund disability-related expenses that has limited effect on the individual's eligibility for the SSI program and other federal means-tested programs.

## EXPANSION OF DATA EXCHANGE EFFORTS

We maintain over 3,100 current and new data exchange agreements with all levels of government to pursue data critical to reducing improper payments, decreasing administrative costs, and supporting other federal, state, and local agencies through a 'One Government' approach to provide data vital to their program needs.

Most recently, we obtained data from the DHS to conduct a study to determine if we can identify SSI recipients who leave the U.S. for 30 days or more to reduce one of the top ten causes of improper payments in the SSI program. We also established an ongoing data exchange with the Department of Education to provide data for student loan forgiveness, enabling approximately 387,000 DI recipients to have been deemed eligible to have up to \$7.7 billion in student loans discharged. Further, we initiated the first government Federal Data Exchange Community of Practice and State Community of Excellence to facilitate collaboration with federal and state governments about overarching data exchange challenges and opportunities.

## INFRASTRUCTURE: NEW DATA CENTER

We opened our first data center in 1980, the National Computer Center (NCC). Predictably, over the span of 30 years of operations many of the NCC's infrastructure systems were past their life cycle, and in FY 2009 Congress appropriated \$500 million to construct a new data center.

We used our appropriated funding to construct a new data center, the National Support Center (NSC), in Urbana, Maryland. The NSC is a modern, energy efficient facility that will meet the IT needs of the agency for at least the next twenty years. General Services Administration (GSA) successfully managed construction of the NSC. We completed the migration of equipment and IT processing to the facility in August 2016. The program, though complex and challenging, was completed on schedule and under cost.

In addition to the NSC, we also have a second data center, the Second Support Center (SSC), located in Durham, NC. Together, the NSC and SSC are co-processing data centers, each with full failover capabilities.

The NSC is a state-of-the-art facility housing modern and efficient equipment and technologies. The data center has received numerous accolades, including:

- Winner of the GSA 2016 Design Excellence Award in Engineering
  - Winner of the 2015 Government Information Technology Executive Council's Project Management Excellence Award
  - Featured participant in the Department of Energy's Better Buildings Challenge
  - A leading example and participant in the Data Center Optimization Initiative
  - Leadership in Energy and Environmental Design (LEED) Gold Certified
- Some noteworthy NSC building design efficiencies and best practices include:
- Best in class uptime and reliability – Uptime Institute certified the NSC at Tier Three.
  - Instant-on LED lighting throughout the complex
  - Modernized cooling systems for IT equipment
  - Energy efficient equipment throughout facility
  - Solar heated water, rainwater reclamation, free cooling 200 days per year (under 55 degrees)
  - Indigenous grasses - less mowing - reduces fuel costs and air pollutants

## DATA-DRIVEN DECISIONS: ANALYTICS CENTER OF EXCELLENCE (ACE)

We established the ACE in July 2015 to expand our capability to use advanced analytics techniques to unlock the power of our data to drive strategy and performance, improve our business processes, and improve our service to our customers. We recognized the need to get more value from our vast data assets and use them to drive how our agency makes decisions and sets policies.

ACE, a component of the Office of the Chief Strategic Officer (OCSO), is a centralized group of highly skilled resources that offers a wide spectrum of data analytics services.

ACE seeks to nurture and promote a culture of evidence-based policies and decision-making across the agency. ACE will accomplish its mission by offering five core services that will:

- Assist with increasing agency analytics competency and capabilities; and
- Deliver actionable analytics through collaborating with business owners and technology experts to perform insightful analyses of agency data.

ACE uses advance data mining and analytical techniques and methods including natural language processing, text mining, scoring and optimization models, and predictive and prescriptive analytics to derive value-added insights from our data and promote innovation through advanced analytics. In addition, we developed critical priorities around data-driven decisions as part of our path to move forward to achieve our Vision 2025. We recently announced the Agency Critical Priorities and one amongst them is “Modernize our Information Technology and Accelerate Data Driven Decisions.”

## MANAGEMENT: ENTERPRISE PROGRAM MANAGEMENT OFFICE (EPMO)/IT INVESTMENT PROCESS (ITIP)

### EPMO

We established the EPMO to support our agency's mission-critical projects. By implementing the EPMO, we increase the opportunity for project success. Additionally, by providing expertise to projects across the agency, the EPMO provides more transparency, better alignment with agency goals, and earlier achievement of either success or failure, reducing the overall investment in projects that are not a success.

EPMO is an effective and innovative organization meeting the changing needs of our customers by delivering projects on time, within budget and scope, and through collaborative partnership with our stakeholders. EPMO supports the third pillar of Vision 2025, Innovative Organization.

We launched our EPMO service model in February 2016 – providing services on 50+ small, medium, and large engagements. EPMO is currently managing 10 efforts, such as the Altmeyer Modernization Project, Death Data Improvement (DDI), and Leadership Succession Planning.

On the DDI project, EPMO provided full project management support, as well as mentoring and coaching services, which had a measurable positive effect on managing timelines, resources, communications, and stakeholder engagement. EPMO also added value to the project through coaching and mentoring Office of Retirement and Disability Policy (ORDP) staff to benefit future phases of the project.

### ITIP

With many competing priorities, it is critical that we invest our IT resources wisely. Consequently, transforming how we manage and invest our IT resources has been one of our highest priorities. ITIP is our solution.

Consistent with the Federal Information Technology Acquisition Reform Act ([FITARA](#)), ITIP focuses on up-front project planning with outcomes tied to specific agency goals. Improved project planning and documentation will allow us to assess project costs and timelines with greater accuracy. In addition, an enterprise-wide executive IT investment board will meet throughout the year to make informed funding decisions on projects that provide the greatest benefit to our agency's mission. The development of ITIP aligns with the third pillar of [Vision 2025](#), Innovative Organization, and supports the Agency Critical Priorities.

As a result of ITIP, we will be better able to deliver the right project on time and within budget, and provide the best tools for our employees and superior service to the American public.

## **IT: AGILE/CLOUD**

### **AGILE PROJECTS**

We have implemented the Agile Lifecycle (ALC) for use in our work environment. Instead of long development timelines, Agile projects implement short, incremental development cycles called "Sprints" that establish a pattern of frequent delivery of defined portions of the final product. This incremental approach allows teams to demonstrate the capabilities of the emerging product to the user community ensuring alignment between users needs and the product team's efforts. Sprints also demonstrate the team's ability to reliably and predictably deliver deployed software.

### **AGENCY CLOUD INITIATIVE (ACI)**

Similarly, our ACI allows the Office of Systems to be more responsive to customers' requirements, and operate more efficiently while providing a quality infrastructure that achieves maximum performance from the server infrastructure. The Hybrid Cloud Environment will ensure the reliability, availability, and security of systems supporting our business units while optimizing servers, configurations, and processes for efficiency and cost effectiveness. The ACI provides a simple way to access servers, storage, databases and a broad set of application services over the internet, and maintain the network-connected hardware required for these application services, while we provision what our users require via web applications.

## **CYBERSECURITY**

Protecting our network and our information is extremely important to both our agency and to the public as we hold the Personally Identifiable Information (PII) of hundreds of millions of citizens and residents of the United States. We are pleased to report that our cybersecurity program continues to meet or exceed key government-wide performance standards. However, to remain strong, we need to continue to evolve our cybersecurity program to reflect changes in technology, changes to business processes, and changes in the complexity of internal or external threats. Continued investments in cybersecurity projects and initiatives will ensure we have the resources needed to accomplish our agency's mission and thus maintain public confidence in the agency's ability to protect their privacy. We are proud to share a number of initiatives, which reflect upon our diligent focus on cybersecurity.

### **PRESIDENT'S MANAGEMENT COUNCIL (PMC) CYBERSECURITY ASSESSMENT**

The PMC Cybersecurity Assessment was developed by OMB and the National Security Council (NSC) for agency Deputy Secretaries as an executive evaluation of their agencies' cyber-hygiene standards. Progress is reported quarterly and the results are used to inform management and support the adoption of the National Institute of Standards and Technology (NIST) Cybersecurity Framework. These assessments evaluate each of the five NIST Framework areas – Identify, Protect, Detect, Respond, and Recover – using select information from agencies' quarterly FISMA submissions. Agencies then receive an overall rating based on a composite of the five function areas. In FY

16 Quarter 33, our agency was the only one to have been rated as “exceeding government-wide target” in all five functional areas.

## CAP GOALS FOR CYBERSECURITY

These goals focus on the implementation of the continuous monitoring of hardware assets, software assets, configurations and vulnerabilities, the implementation of multi-factor authentication (MFA), and malware and anti-phishing defenses. Our agency meets all nine of the CAP Cybersecurity Goals.

## STRONG AUTHENTICATION FOR ONLINE SERVICES

Strong authentication is important in ensuring that individuals using our online services are able to do so securely. As part of the government’s focus on strengthening security for online services, President Obama signed an executive order (EO) on cybersecurity on October 17, 2014. The order focused on protecting citizens from identity theft and directed federal agencies to provide more secure authentication for their online applications. Specifically, the order requires multifactor authentication for any agency application that discloses personal information. In FY 2017, we will implement a change to *my Social Security* to meet the requirements in the EO. Individuals accessing their *my Social Security* accounts will enter their unique username and password, and as an added security feature, they will be required to enter a one-time numeric passcode. In order to ensure that our online services are available to a broad population of our users, we will send the numeric code to a mobile phone number or the email address provided by the individual when he or she established their account.

## DHS’ CONTINUOUS DIAGNOSTICS AND MONITORING (CDM)

CDM represents a new approach to identify, in near-real-time, deviations from an agency’s implemented security controls and enables more accurate and automated compliance reporting to OMB. At Social Security, we have been an early adopter of CDM tools and capabilities and meeting DHS’ milestones. We have aggressive timeframes to implement DHS’ CDM program to improve our continuous monitoring and cybersecurity posture. The incentive for success in this area is great because failure to do so could put our data and IT resources at greater risk for hackers.

## OUR CYBERSECURITY BEST PRACTICES

We are often asked to share some of our best cybersecurity practices with other federal agencies. The following section outlines some of those practices.

**Incident Response and our SOC:** We have a robust Incident Response Plan that details the roles and responsibilities of agency personnel involved in a response to a cyber-incident or breach. These roles include personnel from all facets of the agency, including our SOC. The agency has an internal SOC staffed without interruption that monitors the agency’s network environment to identify and detect suspicious activities, react to potential cybersecurity incidents, and ensure uninterrupted service delivery.

**Enterprise Penetration Testing Program:** One of our most effective information security defenses is our Enterprise Penetration Testing program, which we implemented in 2012. It has become a cornerstone of our cybersecurity program to defend against hacks and data breaches. Penetration testing is the method of evaluating the security of a computer system or network by simulating an attack from malicious outsiders who do not have authorized access to our systems and insiders who have some level of authorized access. The process involves analyzing the system for potential vulnerabilities that result from system misconfigurations and software flaws, both known and unknown. We have a dedicated team of cybersecurity professionals that performs tests in an attempt to “hack ourselves” on a scheduled and on-going basis. The penetration testing process provides us with a third layer of defense beyond our basic cyber hygiene practices of software patching and vulnerability scanning.

**Malware and Anti-Phishing Defenses:** Our defenses for malware and phishing are a critical component of our cybersecurity program and build on our layers of defense and risk based approaches. We take a holistic approach, incorporating malware and phishing defenses into the various layers of protections at the perimeter, network, end-point, data, prevention, and response layers. We deploy a variety of technologies to detect potentially malicious activity at our gateways to the external world as well as within our internal network. We configure our infrastructure and place controls on user activity to limit the impact of potentially suspicious actions. One of our best practices in this area is the implementation of an enterprise wide social engineering program that tests our employees' ability to recognize suspicious email messages and phone calls. We test all employees once a quarter with phishing exercises to continuously reinforce their skills.

We test all employees once a quarter with phishing exercises to continuously reinforce their skills.

## ANTI-FRAUD PROGRAM

We have expanded the use of data analytics to enhance detection of transactions indicative of fraud. We apply predictive and rule-based models to our online services business processes; identify transaction anomalies and evolving patterns of activities in our workloads; and prevent transactions indicative of fraud from advancing. Our primary mission is to take the appropriate administrative actions and return the legitimate number holders' account to a pre-transaction state while stopping or recovering erroneous payments.

For FY 2016, we identified 36,684 transactions indicative of fraud. Through research and analysis, we identified 8,594 incidents highly indicative of a fraudulent transaction and referred 1,460 allegations to OIG. Using appropriate administrative actions defined in our program policy, we prevented and/or recovered \$11,524,554 in erroneous payments.

In addition, we continued to expand the Cooperative Disability Investigations (CDI) program—one of our most effective measures to guard against fraud. The CDI program links the OIG and local law enforcement with Federal and State workers to investigate suspicious disability claims before making a decision to award benefits—in effect, proactively stopping fraud before it happens. We currently have 38 CDI units covering 33 States, Washington DC, and Puerto Rico. Our total programmatic savings are \$269 million.

We have increased fraud prosecutions by hiring additional Social Security fraud attorneys. These attorneys serve as Special Assistant U.S. Attorneys dedicated to Social Security fraud. The goal of this initiative is to increase the number of prosecutions for crimes involving Social Security matters.

The Social Security Act authorizes the imposition of civil monetary penalties (CMP) to preserve the financial integrity of the program and to protect the public from schemes to mislead and otherwise defraud consumers. In FY 2016, OIG resolved 244 cases and imposed more than \$12 million in CMP against individuals who made false statements to us to retain Social Security benefits or payments.

## SECURITY AND EMERGENCY PREPAREDNESS

We have robust programs in place to ensure the safety and security of our employees and the public we serve, and to ensure there is no interruption of the services we provide to our customers.

### INCIDENT COMMAND CENTER (ICC)

The ICC, located at headquarters, is a state-of-the-art control center that ensures situational awareness of incidents affecting, or having the potential to affect, Social Security operations agency-wide. The ICC serves as the agency's central hub for the collection, analysis, and dissemination of security-related information to senior leadership. This

information assists in decision-making and enables us to promote the safety and security of our employees, visitors, and facilities throughout the country.

### **WORKPLACE AND DOMESTIC VIOLENCE PROGRAM**

In response to the April 2012 Presidential memorandum, Establishing Policies for Addressing Domestic Violence in the Federal Workforce, we established a national program, backed by policy and standard operating procedure, for reporting and managing workplace violence risk, including domestic violence, sexual assault, and stalking affecting the workplace. In January 2016, the Office of Personnel Management (OPM) recognized us as one of three “Promising Practices” agencies for making significant strides in implementing support to employees. Twenty Federal agencies have reached out to us for consultations and materials as they develop their own domestic and workplace violence programs.

### **ACTIVE SHOOTER AWARENESS PROGRAM**

With the significant increase in active shooter incidents in the last few years, we have leaned forward to educate our employees on actions they can take if such situations occur at our facilities. We currently have a training video on active shooter awareness that provides employees with information on actions they can take if they are involved in an active shooter situation. To ensure all employees receive training and know what they can do if confronted with an active shooter, we have developed mandatory annual training that our managers will deliver to their employees annually.

### **CONTINUITY OF OPERATIONS (COOP) PROGRAM**

Because of the importance of the service we provide to the American people, we do our best to ensure there is no interruption in service, even during a national emergency. We take our COOP responsibilities very seriously, achieving great success in the last two COOP exercises evaluated by the Federal Emergency Management Agency (FEMA). For the 2016 exercise, we achieved green scores across the board and received the highest score possible – 10 – from FEMA on our participation in the exercise.

### **PHYSICAL SECURITY COMPLIANCE AND RISK SURVEYS**

The safety of our employees and visitors is paramount. To enhance the agency’s security posture and reduce the risk of security incidents, we perform Compliance and Risk Surveys (CARS). These risk assessments identify the physical security countermeasures needed to protect employees, equipment, and the agency’s mission in our more than 1,500 offices. The surveys help us identify mitigation strategies to address numerous undesirable events, such as active shooters, vehicle-borne improvised explosive devices, insider threats, and workplace violence. To adapt to evolving threats and comply with federal standards promulgated by the Interagency Security Committee, we must complete an average of 350 CARS yearly.

### **PHYSICAL SECURITY SYSTEMS STANDARDIZATION AND SUPPORT SERVICES (PS5) PROGRAM**

We developed the PS5 program to reduce costs and improve risk mitigation. The PS5 initiative will modernize and standardize the electronic physical security systems installed in field and hearing offices. By replacing outdated and sometimes non-functional security equipment, and leveraging integration and advances in security technology, PS5 will enhance the safety and security of employees and the public. In FY 2017, we will install PS5 equipment in 90 field and hearing offices and complete 30 security designs for future installations.

**INSIDER THREAT PROGRAM**

The Insider Threat Program works to deter possible threats to the agency. These threats include espionage, terrorism, violent acts against the government, unauthorized disclosure of national security information, or the loss or degradation of agency resources or capabilities. OSEP chairs the Insider Threat Hub, a closely coordinated group of stakeholders from human resources, information technology, legal, and security fields that collectively analyze and respond to insider threat concerns.

# BUDGET OVERVIEW

## FY 2017 BUDGET OUTLOOK

### FY 2017 PRESIDENT'S BUDGET - \$13.067 BILLION

The President's Budget would provide funding to improve service to the public. With full funding of the President's Budget, we can do more work to reduce backlogs and processing times. This funding level would allow us to dedicate resources to both service delivery and program integrity activities.

The President's Budget would allow us to maintain normal service hours to the public in our offices, improve overall service in field offices, and reduce wait times and busy signals on our National 800 Number Network. It would allow us to continue to hire more ALJs and support staff to execute our Compassionate and Responsive Service (CARES) plan and complete more continuing disability reviews (CDR) and SSI non-medical redeterminations. Additionally, the FY 2017 President's Budget will further our expansion of IT tools, bring about more streamlined services for the public and secure our vital networks.

The President's Budget also fully funds the dedicated program integrity efforts required in the 2015 BBA, providing \$1.819 billion for efforts that ensure that beneficiaries continue to meet our strict disability criteria.

Overall, the President's FY 2017 Budget Request for our agency will improve our customer service and ensure that Americans can get their questions answered, get help applying for Social Security benefits, and receive the benefits they have earned without delay or errors. The FY 2017 budget is pivotal to strengthening our services and positioning us for the future.

### FY 2017 CONTINUING RESOLUTION (CR)

The current CR includes an across-the-board cut of .496 percent, which if annualized, would provide us with \$11.959 billion for operational expenses, a \$53 million cut from our base FY 2016 level.

The CR is forcing us to make very tough choices in order to continue to serve the public. We are operating conservatively and delaying critical decisions until we receive full-year funding. We have:

- An agency-wide hiring freeze;
- Extremely limited overtime for critical work processes, program integrity, health and safety, emergencies, and system upgrades only. In FY 2016, we used about 1,900 workyears of overtime, and normally we use about 2,800 to 3,200 workyears of overtime. Overtime is essential to balancing service and program integrity work. We can only afford about 600 workyears for FY 2017, if we receive a yearlong CR at the current level with the across-the-board reduction;
- Restricted funding for all other costs, such as mission-critical training and travel, which includes travel for our claimants and attorneys, as required by law. Travel has been cut to an all-time low from about \$64 million in FY 2010 to only \$23 million projected for FY 2017; and
- IT funding is at the lowest level since FY 2012.

The CR will cause further service degradation, as we are already in a fragile state. Our ability to balance service and stewardship will be limited, and we will have to make difficult choices in prioritizing workloads. In fact, we may need to furlough later in the fiscal year if the CR continues. If we have to operate at a rate below FY 2016 and absorb our inflationary cost growth of over \$300 million:

- We would need to extend the hiring freeze for the remainder of FY 2017. Field office customers will face longer wait times in offices and the time it takes to schedule an appointment will increase. In addition, it will be difficult for field representatives to process cost-effective program integrity work;
- Wait times on our National 800 Number Network will continue to increase as tele service staffing would decline, and people were already waiting over 13 minutes to speak to an agent at the end of FY 2016. The number of call agents could decrease to a level that exposes us to significant service degradation. We would expect our Agency Busy Rate (ABR) to double from 7.5 percent in FY 2015 to over 15 percent in FY 2017. Similarly, our Average Speed of Answer (ASA) would increase from approximately 10 minutes in FY 2015 to over 18 minutes in FY 2017;
- Backlogs in our Program Service Centers (PSC) will continue to rise. Under a full-hiring freeze with little overtime, pending cases in the PSCs will climb dramatically in FY 2017—as of September 2016, there were approximately 3.5 million actions pending. These cases will age further and result in multiple follow-ups from the public. Delays in overpayment actions and benefit adjustments lead to an increase in improper payments and can negatively affect the public, especially for people who have no other source of income;
- The DDS offices also are facing challenges. In a hiring freeze, we can expect to lose over 10 percent of our employees in the DDSs. On top of their work, the BBA will add 600,000 more physician medical reviews and increase the number of cases requiring medical documentation review, at a time when we will have fewer staff on board. The DDSs will also continue to process a high level of CDRs in FY 2017, as we continue our effort to eliminate the CDR backlog;
- Our CARES plan, which would reduce the hearings wait time to 270 days, will be delayed, as we would fall short of hiring needs for ALJs and support staff. Presently, the current wait time for a hearing decision is almost 542 days. It is a moral imperative that we continue to make progress in this area. Even at shorter wait times, families have lost homes as they fall behind in mortgage payments, disabling conditions have deteriorated because claimants cannot pay for medical treatment, and in worst-case scenarios, individuals have died while waiting for a hearing decision. With more than one million people waiting for a hearing decision, it is vital that we have the capacity to process more hearing decisions to prevent the financial and medical hardship associated with delays in the hearings process;
- To manage the challenges we face under reduced funding levels, we may need to consider further reducing field office hours to the public and possibly explore field office closures and consolidations; and
- There would be no funding for IT development and modernization to make us more efficient. Deep cuts in our IT funding would result in the possibility of interruptions in service and loss of productivity.

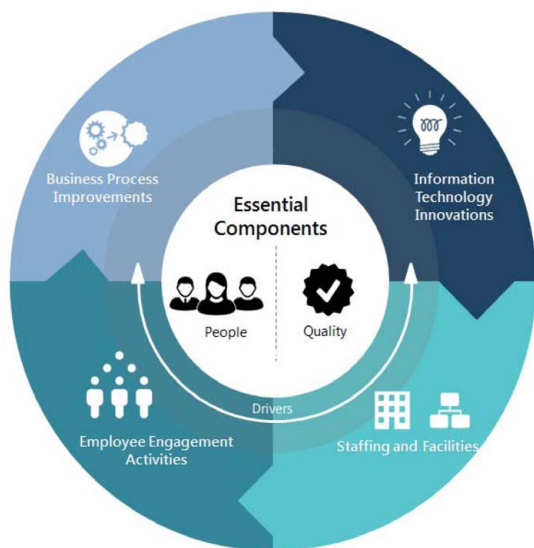

## CHALLENGES WE FACE

In the current fiscal climate, we will face many challenges in the new fiscal year and those that follow. Aside from tighter budgets, we also are experiencing growing workloads, increased scrutiny from Congress, and a loss of institutional knowledge.

Our most critical challenges are not new, and each year we focus our resources and efforts to meet those challenges head on and make as much progress as possible given our limited budget. Some of our most critical challenges include: reducing the number of pending disability cases at the hearing level; reducing improper payments; modernizing our IT legacy systems; continuing to create a superior customer experience; managing our human capital with growing workloads and shrinking budgets; keeping pace with the serious threat of cybersecurity; and ongoing legislative and regulatory issues. In addition, although not we do not bear the lead responsibility for ensuring the solvency of the Social Security trust funds, we would point out the critical need for Congress and others to act in this regard.

Following are detailed descriptions of some of our most critical challenges.

### PENDING DISABILITY CASES/HEARINGS

We are facing a significant public service crisis in our hearings and appeals process. At present, and for the first time in our history, more than one million people are waiting for a hearing decision. The situation is urgent. Our ability to decrease the number of hearings pending, reduce the average wait time for a hearing, and significantly improve our service to these claimants requires adequate and sustained funding. In addition to the necessary funding, we are committed to continue to use data analysis, to listen to our employees and partners, and most importantly, to remain dedicated to providing a high quality, modern and timely disability appeals process now and into the future.

These challenges require both immediate tactical initiatives to address the over one million cases pending a hearing, and initiatives to ensure the hearings and appeals process is efficient, effective, and sustainable.

Our plan for **C**ompassionate **A**nd **R**esponsive **S**ervice (CARES) outlines our current comprehensive and multi-layered approach to deal with the immediate crisis of the growing number of hearings pending and increasing wait times. It will also help to serve as a foundation to explore potential future initiatives, as we continue our efforts to identify ways in which we can better serve our customers.

### REDUCING IMPROPER PAYMENTS

We continue to identify and prevent improper payments and fraud by using our data in new ways to identify anomalies, and by using data from government agencies and the private sector. We have identified several leading causes of improper payments as outlined below and possible ways to combat these issues:

## COMBATING THE LEADING CAUSES OF IMPROPER PAYMENTS

### Wages

- BBA 824 (use of electronic payroll data) – We are working to define a business process that will allow SSSA to establish electronic exchanges with payroll data providers to administer the DI and SSI programs and reduce improper payments; the provision also authorizes us to require claimants to provide authorization to obtain payroll data. We reached stakeholder consensus on the scope of the authorization and are developing budget estimates. We plan to award a contract by July 2017.
- BBA 825 (treatment of earnings derived from services) – This provision permits us to count Title II wages as earned when paid in post-entitlement cases, thereby simplifying a number of processes related to work reporting and work incentives. We implemented BBA 825 in September 2016 with eWork systems changes and are now revising POMS and preparing IVT training.
- BBA 826 (electronic reporting of earnings) – Implementation of BBA 826 will provide an online option for DI beneficiaries and SSI recipients to report their earnings. We have AC concurrence on the business processes. Planning and analysis activities are now underway.

### Financial Accounts

We currently use the Access to Financial Institutions (AFI) process in SSI initial claims and high error profile redeterminations to confirm account balances in disclosed accounts and to detect undisclosed accounts.

- In March 2016, we implemented section 834 of the BBA, which expands the use of AFI in certain OASDI and SSI waiver requests to determine whether an individual without fault in causing the overpayment has the financial resources to repay it.
- We are working to automate the 834 process to ensure better consistency, linking it with efforts to automate the SSA-632 waiver form.

### Non-Home Real Property

- We are integrating third party data with the Modernized SSI claims System (MSSICS) to detect unreported non-home real property in the SSI program.
- We completed high-level requirements in FY 2016; development and testing continue in FY 2017 with test data to the vendor starting in October 2016.
- On track for implementation in September 2017.

### Absence from the U.S.

SSI recipients who leave the U.S. for a full calendar month or longer are ineligible for payments. We are working with the Department of Homeland Security, Customs and border Protection to conduct a study of its Arrival and Departure Information System (ADIS) data to determine whether it could help reduce improper payments in this area.

- We are finalizing a study plan and methodology; with help from the Dallas and San Francisco Regions, we will start case review to determine whether we can integrate arrival and departure data into SSI business process.

### Government Pension Offsets

Combined Windfall Elimination Provision (WEP) and Government Pension Offset (GPO) are the leading cause of overpayments in OASDI program. At OMB's direction, we submitted a comprehensive corrective action plan (CAP) to address the root causes of errors through training, policy clarification, and automation.

- In September 2016, we released just over 3,000 alerts to the PCs. These are actionable cases where either WEP or GPO appears to be missing for an individual who is dually entitled on his/her own record and the record of a spouse. We anticipate additional automation and training efforts in FY 17-18, resources permitting.

Additionally, we identified problems with the accuracy of our Death Master File (DMF), an extract of records for individuals reported as deceased. In 2015, OIG identified 6.5 million aged number holders who were likely deceased but were not in the Death Master File. Other agencies and companies rely on this data for death verification, creating a fraud risk.

One of the ways we combat fraud is with our CDI Program, one of our most successful anti-fraud initiatives. CDI units are collaborative, staffed with federal, state and local law enforcement (funded by us), and working closely with Assistant United States Attorneys in each state. CDI has contributed to a projected \$3.5 billion in savings for our disability programs. Today the CDI program consists of 38 units covering 33 states, the District of Columbia, and Puerto Rico.

However, we must have adequate funding to continue these efforts and to fulfill the requirements under The BBA of 2015 to have CDI coverage for all 50 States by 2022.

In addition, we must continue to find ways to fund IT projects that will save money while at the same time improve service and eliminate overpayments and underpayments. Many audits on improper payments result in unfavorable publicity on the Hill and in the media. Many of these improper payments would be eliminated with systems changes.

## MODERNIZATION OF IT LEGACY SYSTEMS

We face the challenge of determining how best to use technology to accomplish our mission within our budget and resource constraints. Our infrastructure is antiquated and cumbersome, resulting in inefficient business processes, increased training needs, and manual processes. We are facing numerous technology driven issues as we move forward in our service to the public:

- Current systems have insufficient storage and speed. As we transition to more web-based programming, the agency's network infrastructure must be more robust.
- Bandwidth is an impediment to rolling out forward-thinking initiatives, like soft phones and video service delivery. Quantum Leap WAN Modernization will build upon the existing network platform to provide the foundation for new IT tools that will transform the way SSA provides services to beneficiaries. Quantum Leap provides 100 Mbps bandwidth speeds for SSANet that will transform the way SSA provides services to beneficiaries.
- Hardware and software is not always compatible with current technology, leading to programs that are developed based on system capabilities rather than user needs.

Generally, our approach to modernizing our IT systems has been to replace components of systems rather than the system as a whole. This approach tends to reduce risk by reducing interdependencies in a single development effort and by reducing the scope of the modernization effort. For several years, we worked to modernize our IT in small pieces at a time, reducing our technical debt, but we have exhausted nearly all of these interdependent small efforts. This incremental and opportunistic approach worked well given the ebb and flow of annual funding. However, we are at a point where this approach is no longer viable; technology is advancing faster than we can incrementally modernize; tackling modernization of the intertwined legacy software requires a concerted effort sustained over several years.

Large-scale modernization of IT systems and infrastructure requires adequate, sustained funding. Our IT will continue to be an issue without budgetary commitment to a full-scale modernization effort. Our Chief Information Officer (CIO) testified before the House Ways and Means Committee, Social Security Subcommittee on July 14, 2016, where he emphasized the importance of IT Modernization and the need for sustained funding. On August 29 2016, we hosted an interactive Congressional IT Day for House Ways and Means staff where we provided a roadmap of our IT Modernization plan, including detailed cost and schedule projections.

We continue to train staff in technologies deployed to support the agency infrastructure. For example, we have developed a Modern Development Environment (MDE) consisting of the programming tools required to develop

modern, service-based, elastic, and scalable applications. The MDE approach is in place on several mainstream development projects and is the basis for our first modern product: Disability Case Processing System (DCPS). DCPS will bring uniformity across the 54 disparate state DDS systems now in place. This product will result in a system built using agile and MDE methods, developed in a modern programming language, and deployed in the cloud.

At the same time, we have a continued need to maintain that current IT skill set while expanding our service capability for planned and future technologies. This forward-looking approach to human capital is key for acceptable operations. Repeated hiring freezes, while employees continue to retire, gives us a smaller workforce to maintain legacy systems. This is becoming increasingly difficult to do while moving forward with IT modernization efforts. There needs to be continued emphasis to overcome this challenge and successfully manage the change from a staffing, skill set, and organization perspective.

## HUMAN CAPITAL MANAGEMENT

### INCREASING WORKLOAD

According to a [GAO analysis](#), we can expect retirement and disability beneficiaries to increase by 29 percent from 2014 to 2025, resulting in a significant demand on our services, employees, workloads, and infrastructure\*. In FY 2016, we received over 5.5 million retirement and survivors insurance applications and 2.6 million initial disability claims. At the same time, one-third of SSA employees are projected to retire between now and FY 2020. This represents a loss of intellectual capital, which may result in a workforce talent shortage and an inability to meet customer needs.

We must ensure that our leadership development and selection processes are cost effective and result in outstanding leaders being appointed to leadership roles. As we know, outstanding leaders have the ability to inspire the people they lead, resulting in more and better public service with fewer full-time equivalents (FTE) necessary to perform the same amount of service.

### LOSS OF INSTITUTIONAL KNOWLEDGE

We face a challenge with losing institutional knowledge because of ongoing losses of employees through retirement. As of September 30, 2016, approximately 16 percent of SSA employees were eligible for retirement. We estimate that 20 percent of permanent employees will be eligible to retire by 2020, and their retirement could result in various mission-critical skills gaps. Hiring freezes also adversely affect our ability to build a steady pipeline of qualified candidates for key leadership positions across the organization. We have taken a deliberate and proactive approach to address this challenge using national and regional developmental programs to identify existing leadership bench strength to ensure continuity in key positions.

#### Retirement Eligibility

The following pie graphs show supervisors and non-supervisors eligible for optional retirement.

Note: Data as of 9/30/16 from Workforce at a Glance report.

The next set of graphs shows the number of supervisors and non-supervisors eligible for optional retirement in the next five years. Combined, approximately 27 percent of all employees will be eligible for optional retirement in the next five years.

*Note: Data as of 9/30/16 from Workforce at a Glance report.*

### HIRING FREEZE

We ended FY 2016 under a hiring freeze with limited exceptions. ALJs were excepted and we managed to hire 264 of them. Unfortunately, we were unable to hire the corresponding support staff for those ALJs, affecting our ability to issue decisions. At a 4.5-to-1 support staff ratio that that would need more than 1,100 staff. For the start of FY 2017, we are freezing both support staff and ALJ hiring. If the freeze continues and the Office of Disability Adjudication and Review (ODAR) is unable to hire in FY 2017, ODAR will not meet the FY 2020 average processing time goal of 270 days, and we would expect service degradation to continue.

### MEETING ALJ HIRING NEEDS

We value our partnership with OPM and are committed to collaborating in finding ways to improve the ALJ hiring process. In the past, we have participated in various workgroups to evaluate and improve the process. Recently, in late May 2016, we participated in a two-day innovation meeting at OPM. Currently, we are meeting with OPM on a bi-monthly basis to discuss the ALJ hiring process. We employ about 1,500 ALJs, 85 percent of all ALJs in the federal government.

For example, the ALJ hiring process focuses on adversarial and litigation-centered competencies when qualifying ALJs. However, our hearings are non-adversarial and require different skills. Based on our hard work with OPM and OMB in FY 2017, we hired 264 ALJs, exceeding our goal of 250 hires. Although this is a promising outcome, we must continue to work with OPM and OMB to improve the ALJ candidate rating process to ensure candidate ratings closely match the ability of the candidate to meet the standards we require at SSA.

## CUSTOMER SERVICE

### SERVICE DEGRADATION THROUGH FRONTLINE STAFFING LOSSES

As the population has aged, the demand for SSA services has grown substantially, yet frontline staffing has declined, creating unprecedented challenges to deliver the level of customer service the public expects and deserves. Until the agency replaces outdated, antiquated systems with a more modernized IT environment, Operations employees will still manually process the bulk of SSA's workloads, which requires maintaining an adequate staff on the front lines. From callers now waiting on hold for more than 13 minutes on the National 800 Number to one out of eight field office visitors waiting more than an hour, service delays are causing hardships for many vulnerable individuals, including veterans.

A great deal of work, including many actions that affect the amount of an individual's monthly benefit and the agency's overall payment accuracy rate, is not being processed, as an unprecedented 3.5 million cases are now pending in our Program Service Centers. Despite implementing efficiencies to work smarter and some limited automation of work processes as diminished agency funding allows, we rely heavily on our frontline employees to accomplish much of the work.

An already tenuous situation has worsened with the imposition of a hiring freeze. Hiring freezes and rising attrition rates make it difficult to recruit and retain dynamic, qualified individuals who have the talent and ability to succeed in the agency. The work at SSA is complex and most frontline, operational positions are technical in nature. It can take two to three years before a newly hired individual becomes proficient.

### BALANCING OUR WORKLOADS

In recent years, Congress has directed more resources to program integrity work. As a result, there are fewer resources available to handle other critically important work. The Office of Operations is handling an unprecedented amount of program integrity work this year, including 2.8 million SSI redeterminations of eligibility and 950,000 CDR.

The focus on program integrity workloads has decreased the resources available to process other important workloads, such as the processing of millions of retirement, survivors, disability claims, and post-entitlement workloads. As a result, backlogs have been created in certain parts of the organization, i.e. processing centers.

### UNPRECEDENTED GROWTH OF PROCESSING CENTER PENDING WORKLOADS

Since 2012, pending workloads have increased by three million actions. At the close of FY 2012, the total pending was over 1.7 million actions. At the end of FY 2016, over 3.5 million actions were pending.

There are several contributing factors to the upward trend in the pending workloads. The PCs process our most difficult and complex cases—ones that our field offices and claims processing systems cannot handle. Most of these cases require significant research and manual actions.

In addition, over the years, the PCs have experienced limited hiring and overtime and, in some years, hiring freezes. Most often, these losses come from our ranks of most experienced benefit authorizers through retirements and other attrition. Even when hiring is possible, the benefit authorizer training class is nine months, and it takes up to two years of on-the-job training and mentoring for individuals to become proficient. Additionally, the training and mentoring of this staff requires that we pull our more seasoned employees off their daily workloads.

### MEETING CUSTOMER EXPECTATIONS FOR ONLINE SERVICES

While the need for face-to-face or telephone service will always exist, in order to stay relevant, we must continue our efforts to meet the public's demands and serve them in the way they prefer. Our current electronic gateway needs to

be streamlined and simplified. We need to create products that satisfy a wide range of customer service needs. As our customers rely more on their ability to conduct SSA business online, the agency must ensure that any new features added to the suite of online services enhance the user's experience so that they can stay in the self-service channel to complete their business.

## **DELIVERING SERVICES WITH A SMALLER FOOTPRINT**

The government-wide reduce the footprint initiative requires us and all federal agencies to provide service in fewer and smaller brick and mortar buildings. We continue to review and evaluate our service delivery methods through Service Area Reviews, which is a process that establishes national guidelines to facilitate the review of field offices service areas they provide, and workload analysis. However, any discussion regarding the closing of a Social Security office is highly sensitive and must be balanced with our commitment to serving the public. We continue to look at potential co-locations with other agency components and with other government agencies, including the IRS. The GAO is currently conducting a review of our infrastructure and service delivery. The report will be published in spring 2017.

## **CYBERSECURITY**

Cybersecurity threat is one of the most serious national security, public safety, and economic challenges we face as a nation. The cybersecurity challenge in the Federal government as well as Social Security is not simply a technology issue. It is an organizational, people, and performance issue requiring creative solutions to address emerging and increasingly sophisticated threats and new vulnerabilities introduced by rapidly changing technology.

At Social Security, we seek to improve our cybersecurity program through ongoing information security awareness training at all levels of our organization, timely detection of the vulnerabilities and the threats which could affect our operating environment and the evaluation and testing of new technologies designed to combat the latest known threats. Within a cybersecurity environment that is in a constant state of change, we face a host of challenges. We have increased the amounts that we expend on our cybersecurity program over the last three fiscal years. However, as our resources become constrained due to a reduced budget and the loss of cybersecurity talent, we struggle to maintain and improve our vitally important cyber defenses and to protect the data that we maintain on all of our citizens.

## **KEEPING PACE WITH INCREASED THREATS**

As the cybersecurity threat level evolves and escalates, Social Security, like all organizations, must respond with newer and innovative defenses that improve our ability to respond quickly. In order to keep pace with these changes, our future cybersecurity program must include the use of more analytics tools to identify threats faster and the use of automation to respond and remediate incidents more quickly. This is a fundamental change in the way we have managed information security in the past. The technologies we have relied upon over many years are ineffective when it comes to identifying previously undetected threats making it increasingly imperative that we implement technologies that help us predict and detect new and previously undiscovered threats. We hope to achieve this capability through analytics and automation. Success in this endeavor requires that have a steady funding source and a cadre of talented staff who understand data science and the threat environment. Both of which are equally important and in a precarious standing in the coming year.

## **RECRUITING AND RETAINING CYBERSECURITY TALENT**

In support of the Cybersecurity National Action Plan, the Cybersecurity Act of 2015, and the National Initiative for Cybersecurity Education, we must expand our cybersecurity positions codes, update Agency Position Descriptions, analyze our gaps in cybersecurity certifications, and enhance our current cybersecurity workforce through training,

recruitment, retention, and skill gap analysis. While all these initiatives are important, compliance for these initiatives is only part of the larger issue we are facing in this area. We are experiencing an 8 percent attrition rate with a 1 percent hiring rate for our cybersecurity staff. Additionally, we are currently understaffed to implement mandated federal directives and new technology solutions to address cyber threats.

We are competing with the private sector for cybersecurity talent and are restricted by outdated civil service laws that make it difficult to attract and hire highly skilled Information Security (INFOSEC) personnel who can command a high salary with competitive benefits in the private sector.

## **AGING INFRASTRUCTURE**

The aging nature of our legacy applications poses a cybersecurity risk for products that are no longer supported. Outdated and especially unsupported IT increases our vulnerability to cyber threats. Outdated technology is harder to defend because it does not have modern defense capabilities. For more than 30 years, we have been predominantly a user of mainframes for our mission-critical systems. In order to have more flexibility, we have incrementally moved away from mainframe dependent applications to more web-based applications. However, in doing so, we increased the vulnerabilities of our legacy applications due to their increasing interaction with newer web-based environments. The strength of veracity of our Cybersecurity program is directly tied to IT modernization. The sooner we can move away from incremental development of our legacy systems to more agile and modern IT development of our infrastructure, the more we can invest in security tools and processes that address today's threat environment.

## **FOCUSING ON COMPLIANCE VERSUS RISK**

Cybersecurity in the Federal government has largely had a compliance focus versus a risk focus. Much of the current laws that we are required to follow stress compliance over the elimination of threats. Fortunately, we are starting to see initiatives that align with our risk based approach to cybersecurity. However, the change in this direction is slow and it is difficult to make great strides in adopting new technologies and processes while trying to address the traditional compliance approach that we are still evaluated against. One example is our compliance with Federal Information Security Management Act (FISMA) and the Financial Statement Audit. For the past three years, our OIG has determined that we have a "Significant Deficiency" condition. It is comprised of issues related to access controls, change management, threat and vulnerability management, and IT governance. While we make progress each year, each year brings new findings as the cyber landscape evolves and we must constantly balance our limited resources between compliance and addressing new vulnerabilities.

## **SOLVENCY**

### **BOARD OF TRUSTEES**

The Social Security Act established the Board of Trustees to oversee the financial operations of the OASI and DI Trust Funds. The Board is composed of six members. Four members serve by virtue of their positions in the Federal Government. The President appoints and the Senate confirms the other two members to serve as public representatives. The two Public Trustees positions will have been vacant for two years by the time the new Administration transitions.

## Current Board of Trustees Members

NAME	TITLE
<b>Jacob J. Lew</b>	Secretary of the Treasury and Managing Trustee of the Trust Funds
<b>Carolyn W. Colvin</b>	Acting Commissioner of Social Security and Trustee
<b>Virginia P. Reno</b>	Deputy Commissioner for Retirement and Disability Policy, SSA, and Acting Secretary, Board of Trustees
<b>Sylvia M. Burwell</b>	Secretary of Health and Human Services and Trustee
<b>Thomas E. Perez</b>	Secretary of Labor and Trustee
<b>Vacant</b>	Public Trustee
<b>Vacant</b>	Public Trustee

*\*Vacant positions previously held in 2015 by Trustees –Charles P. Blahous, III and Robert D. Reischauer*

## OASDI TRUST FUND SOLVENCY

The Social Security Trustees project that the OASI fund will be able to pay full benefits until 2035 and that the DI fund will be depleted in 2023, less than 10 years from now. The combined theoretical OASI and DI trust funds will be depleted in 2034. If Congress does not enact legislative change, scheduled tax revenues will be sufficient to pay only about three fourths of the scheduled benefits after trust fund depletion.

Policymakers have developed numerous proposals and options that have financial effects on the OASDI Trust Funds with the intent of addressing the long-range solvency problem. We have prepared memoranda for many of these proposals. Each memorandum provides an actuarial analysis showing the estimated effect on the financial status of the OASDI program. A complete list of the proposals and memoranda are available on our website.

Given the recent reallocation of funds from the OASI trust fund to the DI trust fund, the relative immediacy of the DI reserve depletion, and the size of the combined shortfall (approximately 2.66 percent of payroll), we expect Congress will continue considerable oversight of the DI program. The next Administration likely will be engaged in extensive discussions with the Hill about potential options.

## 2017 OASDI TRUSTEES REPORT

The Social Security Act requires that the Board, among other duties, report annually to the Congress on the actuarial status and financial operations of the OASI and DI Trust Funds. The 2017 report will be the 77th such report.

Our actuaries provide their expert input to the process each year, including recommendations, preparing the demographic, economic, beneficiary, and cost projections required for the report.

We will release this report at the end of March 2017, almost immediately after the change in Administration. The Trustees appointed by the next Administration, will be required to opine on the assumptions and methods used in the 2017 OASDI Trustees Report.

You can read the [2016 Trustees Report on our website](#).

# CONGRESSIONAL RELATIONS

Our Office of Legislation and Congressional Affairs (OLCA) serves as the focal point for all legislative, congressional, and regulatory activity for us. With the exception of the House and Senate appropriations committees, OLCA serves as the focal point of SSA's interactions with Congress.

Among other things, OLCA ensures that committees and committee staff are appropriately apprised of key agency developments; prepares agency witnesses for Congressional hearings; develops agency legislative proposals; and provides confidential, technical assistance to Committees, Members, and Hill staff.

OLCA assembles our agency's legislative proposals and promotes our agenda. It also incorporates approved agency legislative proposals into the broader framework of the President's annual budget. To the extent possible, OLCA provides extensive training and documentation on policies to ensure the agency complies and implements the policies on time.

## OVERSIGHT COMMITTEES

1. **Senate Finance Committee - Chairman Orrin Hatch; Ranking Member Ron Wyden.** Key issues: confirmation of nominees, solvency, the Disability Insurance (DI) program, ALJ hearings, improper payments, representative payees, Disability Case Processing System (DCPS), and service delivery.
2. **House Ways and Means Committee - Chairman Kevin Brady.** Key issues: Windfall Elimination Provision, solvency, improper payments, fraud.  
**Ranking Member Sander Levin** - Key issues: solvency, implementation of same-sex marriage Supreme Court decision, service delivery.
  - **House Ways and Means, Social Security Subcommittee - Chairman Sam Johnson.** Key issues: fraud in the DI program, IT modernization – getting rid of COBOL, implementing the Bipartisan Budget Act of 2015, representative payee program, DCPS, the DI program in general, SSA's implementation of NICS.  
**Ranking Member Xavier Becerra.** Key issues: service delivery, adequate resources and budget, benefit adequacy, the DI program.
  - **House Ways and Means Subcommittee on Human Resources - Chairman Vern Buchanan/Ranking Member Lloyd Doggett.** Key issues: the Supplemental Security Income program.
3. **Senate Homeland Security and Government Affairs Committee. Chairman Ron Johnson.** Key issues: Wisconsin hearing offices, SSA's death information.  
**Ranking Member Tom Carper:** SSA's death information, improper payments.  
**Senator James Lankford, HSGAC member:** The DI program in general, DI fraud, ALJs, the administrative appeals process.
4. **House Oversight and Government Reform Committee - Chairman Jason Chaffetz/Ranking Member Elijah Cummings.** Key issues: cybersecurity, FISMA, FITARA, ALJs, DCPS.
  - **HOCR Subcommittee on Information Technology - Chairman Will Hurd.** Key issues: cybersecurity and SSA's IT modernization efforts.
5. **Senate and House Labor HHS Subcommittee – Senate Chairman Roy Blunt/ Ranking Member Patty Murray and House Chairman Tom Cole; Ranking Member Rosa DeLauro** – Although SSA's budget comes primarily from the Trust Funds, the amounts allowed for administration are set by the Appropriations Committee and compete with other agencies under the Budget caps.
6. **Senate and House Budget Committees – Senate Chairman Mike Enzi/Ranking Member Bernie Sanders and House Chairman Tom Price; Ranking Member Chris Van Hollen.** The annual budget resolution sets the caps for funding of federal agencies.

## OTHER GOVERNMENTAL ENTITIES WITH SPECIAL INTEREST OR SUBJECT MATTER EXPERTISE

- Congressional Budget Office (CBO): CBO is the nonpartisan budget review office in the Legislative branch. CBO analysts review and offer alternative estimates to Congress regarding the President's Budget and the estimates we provide in our Congressional Justification.
- Government Accounting Office (GAO): GAO is the nonpartisan auditing and investigative arm of Congress. They have recently conducted audits regarding SSA's IT modernization plan and service delivery challenges.

## IMPLICATIONS OF CHANGES IN NEW CONGRESS

The elections could bring major shifts in Congress depending on which party controls the White House, the Senate, and House. In addition, some of the Chairs of Committees will change because Members have retired or sought higher office. We expect further clarity of the congressional outlook after Election Day.

## SOCIAL SECURITY ADVISORY BOARD

The Social Security Advisory Board is a bipartisan, independent federal government agency established in 1994 to advise the President, the Congress, and the Commissioner of Social Security on matters of policy and administration of the OASDI programs. The Board has seven members, with three appointed by the President, two by the Senate, and two by the House of Representatives.

For more information, visit the [Social Security Advisory Board's website](#).

## APPENDIX B: BIOGRAPHIES OF KEY EXECUTIVES

### ACTING COMMISSIONER OF SOCIAL SECURITY

#### CAROLYN W. COLVIN

On June 20, 2014, President Obama nominated **Carolyn W. Colvin** as the Commissioner of Social Security. Since February 14, 2013, Carolyn W. Colvin has served as the Acting Commissioner. Prior to this designation, she served as the Deputy Commissioner, confirmed by the United States Senate on December 22, 2010 as President Obama's nominee. In addition to her role as the Acting Commissioner of Social Security, Ms. Colvin serves as a Trustee to the Social Security Board of Trustees and a National Academy of Public Administration's Fellow.

Throughout her career, Ms. Colvin has managed programs that help people with their healthcare and financial needs. She previously held key executive positions at Social Security Headquarters: Deputy Commissioner for Policy and External Affairs (1994–1996), Deputy Commissioner for Programs and Policy (1996–1998), and Deputy Commissioner for Operations (1998–2001).

Prior to returning to SSA, Ms. Colvin was the Director of Human Services for the District of Columbia (2001–2003); the Director of the Montgomery County Department of Health and Human Services ([HHS]; 2003–2007); the Chief Executive Officer of AMERIGROUP Community Care of the District of Columbia (2007–2008); and, the Special Assistant to the Secretary of Maryland's Department of Transportation (2009–2011). In addition, Ms. Colvin served as the Secretary of Maryland's Department of Human Resources (1989–1994).

Ms. Colvin has received numerous awards and recognition for her managerial expertise and creativity. These awards include the Sun Magazine's 50 Women to Watch in 2014; the Innovations in Aging Leadership Award presented by the Maryland, Virginia and District of Columbia Departments of Aging (2012); the Clifford R. Gross Award for Outstanding Federal Government Public Service presented by the Maryland Chapter of the American Society of Public Administration (2012); Maryland's Top 100 Women Award from the Daily Record (2005); and the Women of Achievement Award from Suburban Maryland Business and Professional Women (2005). She has served on a variety of boards and commissions, including the National Committee to Preserve Social Security and Medicare.

Ms. Colvin earned her honorary doctorate, graduate and undergraduate degrees in business administration from Morgan State University. Additionally, she completed the Senior Executives in State and Local Government Program at Harvard University, the Maryland Leadership Program, and the Greater Baltimore Leadership Program. Ms. Colvin is from Maryland and currently resides in Anne Arundel County. She has one son and six grandchildren.

## CHIEF OF STAFF

**Stacy L. Rodgers** has a broad range of management experience in both the private and public sectors. Stacy brings more than 28 years of experience in working with Federal, state and local government agencies and non-profit organizations. She has successfully designed and implemented innovative human service programs and initiatives for municipal and state agencies.

In February 2011, Stacy was appointed by the Obama Administration and initially served as the Senior Advisor to the Deputy Commissioner of the Social Security Administration (SSA). In December 2014, Stacy became agency Chief of Staff, appointed by Acting Commissioner, Carolyn Colvin. Stacy also serves as the agency's Liaison to the White House.

Among her various duties Stacy provides senior oversight for day to day operations for the agency's more than 64 thousand member staff, over 1,400 field and hearing offices nationwide and 12 billion dollar operating budget. The agency serves over 65 million Americans, distributing over \$78 billion dollars in monthly benefits.

Stacy also represents the Agency on numerous federal interagency working groups, including the US Interagency Council on Homelessness, the Federal Re-Entry Council and the President's Management Council.

In February 2008, Stacy was appointed as the Deputy Secretary for Programs for the Maryland State Department of Human Resources, Maryland's human services agency. She oversaw the agency's 23 county departments of social services, the State's Child Support Enforcement and Public Welfare Programs and the Agency's Office of Grants Management. During her tenure as Deputy Secretary, Stacy worked to improve systems that ensure the delivery of timely and quality services.

Stacy earned a Bachelor of Arts Degree in Psychology from the University of Maryland, Baltimore County, and a Master's Degree in Public Administration from the University of Baltimore. She is also a graduate of the Harvard University John F. Kennedy School of Government Executive Leadership Institute, the National Forum for Black Public Administrators' (NFBPA) Mentor Program and Executive Leadership Institute.

Stacy's passion for service also extends beyond the workplace. Stacy contributes her time, resources and talents to numerous faith and civic organizations including the Providence Baptist Church where she is a dedicated member. She is a national board member of the NFBPA and serves as dedicated mentor and resource person for young professionals.

Stacy's personal mission statement is very simple: "To serve and help those in need".

## DEPUTY CHIEF OF STAFF

**Mr. Lopez** is an experienced leader who has gained a broad perspective of the Social Security Administration (SSA) through the various leadership roles he has held in Headquarters, Regional Office and Dallas Region Field Offices. Mr. Lopez currently serves, as the Deputy Chief of Staff in the Office of the Commissioner, SSA. Previously, he was a participant in the Senior Executive Service Candidate Development Program (SESCDP) and served in leadership roles as Senior Advisor to the Acting Commissioner and Chief of Staff, Acting Deputy Associate Commissioner in the Office of Applications and Supplemental Security Income Systems (OASSIS). Prior to his selection to the SESC DP, Mr. Lopez served as Area Director for Dallas Region, Area I, encompassing the state of Arkansas and northern Oklahoma. He also served as Area Director for Area II, the state of Louisiana, and Area V, north Texas. Mr. Lopez completed an assignment in the Office of Public Service and Operations Support as the Human Resources Management Staff Director, where he led various national key initiatives and projects.

Mr. Lopez began his career as a Claims Representative in El Paso, TX. He then moved on to Regional Training Center Instructor in Dallas, TX. Later, he served as Operations Supervisor, Assistant District Manager, District Manager, Project Manager in the Center for Programs Support and Center for Disability, and Deputy Director and Acting Director in the Center for Programs Support.

In addition to these positions, Mr. Lopez has participated in various national workgroups such as the Non-Disability Appeals Cross-Component Workgroup, Field Office Staffing Allocation workgroup, Co-Lead of the national workgroup to rewrite Field manager position descriptions, and Leading by Example: Relationships Matter workgroup.

Mr. Lopez has received numerous awards throughout his career including the Commissioner Citation, Deputy Commissioner Citations, and Regional Commissioner Citation. He is a graduate of the University of Texas El Paso.

## EXECUTIVE SECRETARY

As Social Security's Executive Secretary, **Darlynda Bogle** performs a variety of high level, sensitive, and complex duties requiring involvement in substantive matters and in policy, program, and operational areas. She is also responsible for providing executive leadership, direction, and coordination of the Office of Executive Operations, and directs the review of documents for the attention and approval of the Commissioner and Chief of Staff. She facilitates the proper integration of Agency decision-making by ensuring that all components are aware of priorities, initiatives, and issues.

Since May 2016, Darlynda has also served as SSA's Transition Director, overseeing the agency's efforts in preparation for the 2016 Presidential Transition.

Darlynda began her career at Social Security in May 1989 as an attorney in the agency's Office of General Counsel. In her first several years, she took on varying leadership positions in policy and program departments, including an eight-year stint during the 1990s in the Commissioner's Office, where she helped lead the agency's work in support of Vice President Gore's Reinventing Government Initiative. In July 2003, Darlynda moved to the Office of Communications, leading product development (videos, publications, web messaging) for several national marketing campaigns. In March 2010, Darlynda became Director of the agency's Transparency and Citizen Engagement team, leading efforts to carry out President Obama's Open Government Initiative. In September 2013, she accepted her SES appointment as Deputy Chief Strategic Officer, where her primary responsibility was to help drive short and long-term strategic planning and innovation; advance performance improvement; and facilitate open and transparent communications and operation. Darlynda moved to the Executive Secretary position in June 2015.

Darlynda lives in Columbia, Maryland with her husband, David. They have three adult sons, and one grandson. Darlynda is a proud alumna of the University of Michigan, where she earned both her bachelor's and law degrees, and ran on the university's first Women's Varsity Track and Field Team.

## EXECUTIVE COUNSELOR TO THE COMMISSIONER

**Frank Cristaudo** serves as the Executive Counselor to the Commissioner of Social Security. With a \$12 billion budget and 65,000 employees serving in more than a thousand offices across the country and around the world, the Social Security Administration (SSA) issues to 65,000,000 people each year almost a trillion dollars in payments, nearly 25% of the Federal budget. More than 40,000,000 customers visit SSA offices for service annually and more than 30,000,000 customers speak with SSA customer service representatives by telephone. Previously, Frank held a number of positions with the agency including Chief Administrative Law Judge. As Chief Judge, he led a workforce of 9,000 including more than 1,400 Federal Administrative Law Judges (ALJs), one of the largest judicial systems in the world. He also served as the agency's Chief Counsel for the Boston Region. Frank is a frequent lecturer on leadership, ethics, professionalism, and disability adjudication, and is the author of internal SSA publications "27 Practices for Effective Leadership in Public Service" and "The Vocational Expert Manual: The Use, Questioning, and Testimony of Vocational Experts."

He is a graduate of Columbia University's Persuasion: Influencing Without Authority, Harvard University Kennedy School's Driving Government Performance: Leadership Strategies that Produce Results, the Federal Executive Institute's Leadership for a Democratic Society, and the Center for Creative Leadership's Developing the Strategic Leader programs.

Prior to his appointment as an ALJ, Frank practiced law and successfully argued a number of Social Security cases before the Court of Appeals for the Third Circuit. He also served as the Chief Counsel for a municipality, as a Municipal Court Judge, and as an instructor at LaSalle University and Rowan University. He has a B.A. from McDaniel College and a J.D. (cum laude) from Widener University School of Law.

## CHIEF ACTUARY

**Steve Goss** is currently Chief Actuary at the Social Security Administration. He directs work on estimates of the future cost and income of the Social Security program under both present law and possible legislative changes. He also directs work on the development of economic, demographic, and revenue projections that underlie projections for Social Security, Medicare, and other programs.

Mr. Goss joined the Office of the Chief Actuary in 1973 after graduating from the University of Virginia with a Master's Degree in Mathematics. He graduated from the University of Pennsylvania in 1971 with a bachelor's degree in mathematics and economics. He has worked in areas related to health insurance as well as pension, disability, and survivor protection.

Mr. Goss has written articles and actuarial studies on several topics and has made presentations and participated in panel discussions at numerous conferences. He has worked closely with members of the executive branch, members of congress and their staff, and numerous commissions, as well as with private organizations.

Mr. Goss is a member of the Society of Actuaries, the American Academy of Actuaries, the National Academy of Social Insurance, the Social Insurance Committee of the American Academy of Actuaries, and the Social Security Retirement and Disability Income Committee of the Society of Actuaries.

## DEPUTY COMMISSIONER FOR BUDGET, FINANCE, QUALITY, AND MANAGEMENT

**Michelle King** was named the Deputy Commissioner for Budget, Finance, Quality, and Management (BFQM) in June 2016. In this role, Michelle serves as the agency's Chief Financial Officer and is accountable for an over \$940 billion program budget and an over \$11 billion administrative budget. Michelle is also responsible for providing executive leadership for the following agency programs and operations: acquisition and grants; anti-fraud programs; audit liaison; budget; financial policy and operations; facilities and supply management; media management; quality improvement; quality review; and security and emergency preparedness.

Michelle has served in several leadership capacities in BFQM. Prior to her current appointment, Michelle was the Acting Deputy Commissioner for BFQM from November 2015 to her current appointment and Acting Assistant Deputy Commissioner from May 2015 to November 2015. She also previously served as the Associate Commissioner for the newly established Office of Anti-Fraud Programs (OAFP). In this role, Michelle provided executive oversight and accountability for SSA's anti-fraud initiatives. Michelle was responsible for implementing the agency's anti-fraud framework, providing a comprehensive approach to agency fraud detection and prevention, and aligning agency efforts with industry standards. Michelle served as the Deputy Associate Commissioner for the Office of Budget, prior to joining OAFP.

Michelle has also held various senior executive leadership positions throughout the agency including Associate Commissioner for the Office of Income Security Programs in the Office of Retirement and Disability Policy and in the Office of Public Service and Operations Support in the Office of Operations.

Michelle was hired by SSA as a bilingual Claims Representative in 1994 and worked in the Sterling, Illinois field office until 1998. She then served at SSA headquarters as a Program/Management Analyst formulating and executing Operations budgets, where she subsequently advanced to the positions of Supervisory Management Analyst, Senior Budget Advisor, and Director of the Division of Resource and Management Information in the Office of Operations. Michelle served on assignment as the Acting Deputy Associate Commissioner for Regional Operations (ARC-MOS) in the Kansas City Region. In 2007, Michelle was appointed to the Senior Executive Service as the Deputy Associate Commissioner of Public Service and Operations Support. Michelle was the lead Executive for the Ready Retirement initiative from 2007 – 2009 developing the agency's online retirement, disability, and Medicare application, iClaim. The Ready Retirement initiative also focused on educating the public about filing for benefits and policy simplification.

Michelle earned her Masters of Public Administration (MPA) from Northern Illinois University in 1997 with a concentration in Public Policy and Organizational Development. She graduated cum laude with a dual BA in Political Science and Public Administration from Augustana College in Rock Island, Illinois in 1993 and earned a minor in Speech Communications.

Michelle has an Executive Leadership certificate from American University. She is also a graduate of the Duke Executive Leadership and Federal Executive Institute's Leadership in a Democratic Society programs.

Michelle is a sustaining member of the Junior League of Baltimore and involved in many community service projects and initiatives. She is also an avid physical fitness enthusiast and enjoys cycling, swimming, and running with her Golden Retriever, Wrigley. Michelle resides in Columbia, MD.

## DEPUTY COMMISSIONER FOR COMMUNICATIONS

**Douglas K. Walker** is the Deputy Commissioner for Communications, where he directs SSA's external and internal communications activities nationwide. He is responsible for planning and coordinating the agency's relationships and communications with other Federal agencies, State and local governments, special interest and advocacy groups, and the general public.

Mr. Walker has a broad background in association and public sector relations, government relations, marketing and outreach, with expertise in message development, digital marketing, and crisis management and communication.

Prior to his appointment with SSA, Mr. Walker was the Executive Vice President for Operations at Integrated Media, Inc. From 1999 to 2012, Mr. Walker held several positions at the National Education Association. His Federal sector experience includes communications positions with the U.S. Office of Personnel Management (1993-1998) and the Department of Labor (1999), as well as staff positions in the U.S. House of Representatives and the U.S. Senate (1987-1990).

Mr. Walker earned a Bachelor's Degree in Communications from Howard University and completed the Senior Executive Fellows program at Harvard University's John F. Kennedy School of Government.

## DEPUTY COMMISSIONER FOR DISABILITY ADJUDICATION AND REVIEW

**Theresa Gruber** was named the Deputy Commissioner for the Office of Disability Adjudication and Review (ODAR) in July 2015. In this role, she is responsible for providing executive leadership for the agency's hearings and appeals functions, overseeing an organization of over 10,000 employees.

Theresa began her career with the Social Security Administration in 1991 in

the Edina, Minnesota Field Office. She advanced through various programmatic, technical, and management positions including Claims Representative, Assistant District Manager, Acting Assistant Regional Commissioner, and Assistant Deputy Commissioner.

In January 2011, Theresa was named the Assistant Deputy Commissioner for the Office of Operations. She assisted the Deputy Commissioner in providing executive leadership for the agency's largest organization. The Office of Operations and its over 47,000 employees serve as the primary contact between the public and the agency. Nation-wide, the organization includes 10 regional offices, 54 area director offices, 1257 field offices, 33 teleservice centers, and 8 processing centers.

In June 2014, Theresa was named the Chief Program Officer for DCPS. In this role, she served as the single accountable executive for delivery of the Disability Case Processing System.

During Theresa's 20-year career, she has provided exemplary leadership and public service. Theresa previously served as the Assistant Deputy Commissioner for ODAR. Her major accomplishments include overseeing the reduction in the ODAR disability hearings backlog. She provided key leadership for the development and implementation of the agency's Internet-based services used by the public to conduct business with Social Security and assisting with the development of RSI and SSI programs. Theresa also played a critical role leading the implementation of the electronic disability process.

Theresa has received many awards during her career, including citations from the Dallas and New York Regional Commissioners, two Deputy Commissioner Citations, and a Commissioner's Citation for her leadership in the implementation of the electronic disability process nationwide. Theresa holds a Bachelor of Arts degree from St. Mary's University of Minnesota.

## GENERAL COUNSEL

**Andy Liu** joins the Social Security Administration from Crowell & Moring, where he was a partner and member of the Steering Committee in the firm's White Collar & Regulatory Enforcement Group, as well as a partner in the firm's Government Contracts Group. He also co-chaired the firm's False Claims Act practice. Andy's practice focused on representation of corporate and individual clients in all phases of criminal and civil matters including internal and government investigations, compliance counseling, False Claims Act litigation and other complex civil litigation and criminal proceedings.

In addition to his 17 years in private practice, Andy also spent several years as a Trial Attorney with the United States Department of Justice's Civil Rights Division where he handled cases under a variety of federal statutes. He was twice awarded the Department of Justice's Special Achievement Award.

Andy has also been active in Bar activities, having served as a board member of the Asian Pacific American Bar Association of the Greater Washington, D.C. Area and as vice-chair of the Committee for Civil Rights and Equal Opportunity for the ABA's Section of Individual Rights and Responsibilities. He has also served on the Board of Directors of the Lawyers' Committee for Civil Rights under Law, the Board of Directors of Asian Americans Advancing Justice – AAJC, and as Chair of the Board of the Asian Pacific American Legal Resource Center. Andy received a B.S.M.E. from Lehigh University in 1988 and an M.S.M.E. degree from the University of Texas at Austin in 1992. In 1995, he received his J.D. from Georgetown University Law Center where he served on the Georgetown Journal of Legal Ethics.

In his spare time, Andy spends time with his wife and two teenage children and attending as many of their sporting events as possible.

## DEPUTY COMMISSIONER FOR HUMAN RESOURCES

**Reginald F. Wells** was named Deputy Commissioner of the Social Security Administration's (SSA) Office of Human Resources effective July 15, 2002 after serving short tenures as Deputy Associate Commissioner for Disability Program Policy and Senior Advisor in the Office of Disability and Income Security Programs. Dr. Wells also serves as the Chief Human Capital Officer and Chief Diversity Office for SSA, as well as the Chair of the Baltimore Federal Executive Board. In his capacity as Deputy Commissioner for Human Resources, Dr. Wells oversees a staff complement of 368 employees with an operating budget of \$130 million.

Dr. Wells served as Deputy Commissioner of the Administration on Developmental Disabilities from October 1994 to April 2002. He shared with the Commissioner full responsibility for planning and directing 25 federal staff and programmatic activities, including the University Centers, Developmental Disabilities Councils, Protection and Advocacy Systems and Projects of National Significance with a program budget of over \$122 million.

From October 1997 to May 1998, Dr. Wells served as the Acting Commissioner of the Administration on Developmental Disabilities in the United States Department of Health and Human Services' Administration for Children and Families (ACF).

Prior to his appointment in the Administration on Developmental Disabilities, Dr. Wells had 10 years of extensive public sector experience with the District of Columbia's (D.C.) Department of Human Services. During his tenure, he served as both Deputy Commissioner and Acting Commissioner for the D.C. Commission on Social Services. The Commission on Social Services had a staff complement of 2,600 employees and an operating budget of \$450 million to offer a broad array of social services, including services for people with developmental disabilities; child welfare services; juvenile justice services; emergency shelter; vocational rehabilitation; Aid to Families with Dependent Children and JOBS.

Previously, Dr. Wells managed Essex County's New Jersey long-term care/geriatrics facility; was instrumental in operating the 1,100 bed psychiatric hospital; monitored and evaluated citizen services; and worked as a research associate for the National Center on Black Aged.

Throughout his career, Dr. Wells has received many awards and recognitions. These include the 2011 Chief Human Capital Officer of the Year, 2010 Warner W. Stockberger Achievement Award, 2006 Presidential Rank Award for Meritorious Executives; the U.S. Secretary's Award for Distinguished Executives; the Distinguished Public Service Award from the Government of the District of Columbia; and Special Recognition Awards from the U.S. Administration on Developmental Disabilities and the D.C. Rehabilitation Services Administration.

His current and past professional and volunteer affiliations include: Goodwill Industries of the Chesapeake, Inc.; Covenant House Washington; District of Columbia ARC; DC Developmental Disabilities Council and DC Medical Care Advisory Committee.

Dr. Wells is licensed as a nursing home administrator in New Jersey and the District of Columbia.

In 1980, Dr. Wells received a Ph.D. in Social and Organizational Psychology from Temple University in Philadelphia. He also earned his M.A. in psychology from Temple University and B.A. in psychology and sociology from American International College.

## ACTING INSPECTOR GENERAL

**Gale Stallworth Stone** currently serves as the Acting Inspector General for the Social Security Administration. Under her direction, the SSA Office of the Inspector General (OIG) inspires public confidence in the integrity and security of SSA's programs by conducting independent and objective audits, evaluations, and investigations. Ms. Stone has served in this role since May 29, 2016.

Mrs. Stone was appointed to the position of Deputy Inspector General on February 24, 2013. In this capacity, she provided leadership and guidance in the planning, policy and program development and management of the OIG.

Mrs. Stone has been a part of the Social Security Administration's OIG since its inception in March 1995. She previously held various positions at the U.S. HHS OIG. Since 1995, Mrs. Stone has held a number of leadership positions within the SSA OIG. Most recently, she served as the Deputy Assistance Inspector General for Audit, with primary responsibility for financial and information technology audits. She is also currently servicing a 4-year appointment to the Information Security and Privacy Advisory Board, which advises the National Institute of Standards and Technology.

Mrs. Stone began her Federal career as a cooperative education student in the Birmingham, Alabama office of the HHS OIG. Over the years, Mrs. Stone has received numerous awards, including a 1996 Hammer Award, a 2002 Inspector General Award, and recognition from the former President's Council on Integrity and Efficiency including a 2004 Glenn Roth Award, a 2006 Award for Excellence, a 2007 Barry Snyder PCIE/ECIE Joint Award, and a 2015 Presidential Rank Award.

Mrs. Stone is a cum laude graduate of Huntingdon College in Montgomery, Alabama. She also holds a Master of Science Degree in Information Systems from The Johns Hopkins University, and she is a Certified Public Accountant.

## DEPUTY COMMISSIONER FOR LEGISLATION AND CONGRESSIONAL AFFAIRS

**Judy Chesser** has served at the Social Security Administration as Deputy Commissioner for Legislation on three occasions during the Administrations of Presidents Clinton and Obama. She also served as the Director of the Washington Office for the City of New York for Mayors Koch, Dinkins and Bloomberg as well as the Director of the Washington Office for the New York City Health and Hospitals Corporation, the largest public hospital system in the nation.

In addition, Judy was Director of Public Policy, Counsel and Acting Executive Director for the United Cerebral Palsy Associations (UCP), the national association with over 100 affiliates in 43 states. Previously she served in the legislative offices of the Department of Housing and Urban Development. She was Assistant to the Chief Counsel and National Political Director of the United Auto Workers and a lobbyist for a Coalition of Labor Unions, Mayors and former high level Defense Department officials regarding budget ceilings.

She is an attorney and served in the General Counsel's Office at the Securities and Exchange Commission and taught law at CUNY law school as an adjunct professor. She graduated cum laude from Boston College Law School where she was on the Law Review. Judy has a BA degree from The Maxwell School, Syracuse University.

She is a Member of the National Academy of Social Insurance, a Trustee for the Committee of 100 on the Federal City, on the Board of Tenleytown Neighbors Association, and the Mid-Atlantic English Springer Spaniel Rescue. She and her husband are owned by two rescues a Springer and a Llewellyn Setter.

## DEPUTY COMMISSIONER FOR OPERATIONS

**Nancy A. Berryhill** became Deputy Commissioner for Operations in July 2013. Prior to that, Nancy was the Regional Commissioner for the Social Security Administration's Chicago Region since March 3, 2011, and the Regional Commissioner for the Social Security Administration's Denver Region since January 2006. While in the Denver Region, Nancy developed numerous innovative agency solutions such as video service delivery, use of webinars, and the first American Indian outreach guide.

Nancy began her career with the Social Security Administration as a student employee. Throughout her distinguished career with Social Security, she has held many positions including Service Representative, Claims Representative, Operations Supervisor, District Manager, Area Director for the State of Illinois and Deputy Regional Commissioner in Denver.

Nancy was selected to the Senior Executive Service Program in October 2002 and completed her program in October 2003 when she was appointed to the Senior Executive Service. As part of her SES assignments, Nancy worked for the Department of Homeland Security and in the Office of the Commissioner of the Social Security Administration.

A native of Chicago, Illinois, Nancy obtained her degree in Computer Science at the Control Data Institute in Chicago. Nancy is a graduate of the Kennedy School of Government at Harvard University.

Nancy has been the recipient of many agency awards including the Commissioner's Citation, the agency's highest and most distinguished award. In 2010, Nancy received the Presidential Rank Award of Meritorious Executive. Her work and achievements consistently demonstrate professional excellence, exceptional leadership, integrity, and commitment to public service.

## DEPUTY COMMISSIONER FOR RETIREMENT AND DISABILITY POLICY

**Virginia Reno** is the Deputy Commissioner for Retirement and Disability Policy. As the Deputy Commissioner, she directs and manages the planning, development, and issuance of operational policy and instructions for the RSDI and SSI programs and initiatives to improve the economic well-being of beneficiaries. In addition, she is the principal advisor to the Commissioner of Social Security on major policy issues and activities in the areas of strategic policy planning, policy research and evaluation, statistical programs, and overall policy development and analysis.

Prior to accepting her current role, Ms. Reno served as Vice President for Income Security at the National Academy of Social Insurance (the Academy), where she was recognized for her expertise on Social Security, retirement policy, private pensions, and disability policy. A founding member of the Academy, Reno led its work on retirement income, workers' compensation, disability insurance and related programs.

Reno directed the Academy's landmark study, *Uncharted Waters: Paying Benefits from Individual Accounts in Federal Retirement Policy*, which was highly regarded by experts on all sides of Social Security policy debates. She also directed the Academy's comprehensive review of Social Security disability programs, culminating in a final report that became the blueprint for many of the changes enacted in the Ticket to Work and Work Incentive Improvement Act of 1999.

Before her work at the Academy, Reno held research and policy positions at the U. S. Social Security Administration (SSA), where she was staff director of the Policy Council that advised the Commissioner of Social Security on legislative, regulatory and administrative issues. Before that, she served in SSA's office of research and statistics, where she directed the program analysis staff. She has worked for four major commissions on Social Security, including serving as a senior advisor to the 1983 Greenspan Commission.

Reno has published numerous research articles on Social Security, disability policy, private pensions, retirement policy, the income of the elderly, public opinion about Social Security, labor force participation of women, and the treatment of women and families in benefit and tax systems. She has testified frequently in Congressional committees, and twice received the SSA's Commissioner's Citation, including once from Robert M. Ball. Reno received her B.A. from the Honors College of the University of Oregon and served in the U.S. Peace Corps in Liberia.

## DEPUTY COMMISSIONER FOR SYSTEMS AND CHIEF INFORMATION OFFICER

**Rob Klopp** started at the Agency as the CTO in January of 2015 and assumed the role of CIO and DC of Systems the following August. Rob was recruited by the United States Digital Services team specifically to support the Agency.

He comes to Baltimore from the Silicon Valley where he has worked for both large software enterprises and for smaller start-ups. You may know of some of the start-ups. Greenplum, for example, was acquired by EMC and Teradata is now a leading company in the relational database and data warehouse markets. Rob spent nearly two years based in Switzerland as the EMC/Greenplum CTO for Europe, the Middle East, and Africa. Other start-ups were too small to make the news. He also worked in the consulting services space for EDS, now part of HP, and for what is now KPMG, as well as in his own boutique consultancy. He founded a little software start-up that was sold to a large database company. Finally, Rob started his career out of college in the Government arena with the State of California where he was a mainframe systems programmer.

Within these firms, Rob has filled both technical and executive roles; sometimes facing the engineering and product side of the business and sometimes facing the end-users, but always with both feet grounded in the technology.

## CHIEF STRATEGIC OFFICER

**Ruby Burrell** is currently the Chief Strategic Officer of the Social Security Administration's established Office of the Chief Strategic Officer. The Chief Strategic Officer works across the agency to infuse strategic thinking and promote innovation to improve agency performance and service delivery.

Most recently, Ms. Burrell was the Associate Commissioner for Field Site Operations in the Office of Quality Performance where she was responsible for directing and managing quality assurance and evaluation of SSA programs in the field.

As the former Associate Commissioner for the Office of Disability Determinations (ODD) in Operations, Ms. Burrell led an organization that was responsible for the operational aspects of the disability determination function in the Disability Determination Services (DDS). In that role, she was responsible for managing the \$2.3 billion national DDS budget and was an advocate for the 10 regional offices and the DDSs in 54 States and territories.

Ms. Burrell is a strategic thinker who has envisioned and led some of the most transformational initiatives at SSA. She was the Lead Agency Executive for Independence Day Assessment (IDA) activities throughout the agency, facilitating the transition to a fully electronic disability claims process. She also co- led the development of the vision for our Disability Claims Processing System (DCPS) which will eliminate the need for 5 different legacy systems and create one common processing system for disability claims.

Prior to her position with ODD, Ms. Burrell served as the Deputy Associate Commissioner for the Office of Public Service and Operations Support responsible for providing operational analysis and support related to programs, budget, human capital, and security to the Deputy Commissioner for Operations and the 48,000 Operations employees.

She graduated with honors from Virginia State University with a BS degree in Psychology. She also completed some graduate work at the University of Virginia.

Ms. Burrell has over 30 years of experience in service delivery at SSA. She started as a front-line claims representative, responsible for processing retirement, disability, and survivor claims. She then progressed to mid-level and senior level management positions and was SSA Area Director in Washington, D.C. during the terrorist attacks on September 11, 2001, and led the effort to provide SSA support to the families of the victims of the attack on the Pentagon. She received high praise from the Department of Defense and SSA for her leadership and humanitarian efforts. She was selected for the SSA Senior Executive Service.

Candidate Development Program in October 2002 and she became a member of the Senior Executive Service in October 2003.

## REGIONAL COMMISSIONER, ATLANTA REGION

Prior to becoming the Regional Commissioner in SSA's Atlanta Region, **Rose Mary Buehler** proudly served as the Assistant Regional Commissioner for Processing Center Operations in Birmingham, Alabama. Rose Mary is a graduate of Class V of the Senior Executive Service Candidate Development Program (SES CDP). During the program, her assignments included Deputy Regional Commissioner in the Denver Region, Deputy Associate Commissioner for the Office of Electronic Services, Operations, and Deputy Associate Commissioner for the Office of Earnings, Enumeration, and Administrative Systems, Systems. Rose Mary also had an external assignment as the Community Development Director for Positive Maturity, Inc., a United Way partner agency.

Rose Mary began her career with the Social Security Administration in July 1990 as a Claims Representative in the Jackson, MS District Office. She moved through the ranks to increasingly responsible positions throughout the Atlanta Region, including the Alabama Area Director. Rose Mary also functioned as the Chair of the Atlanta Region's Hurricane Katrina Public Service Restoration Team.

She participated on numerous national and regional workgroups covering such topics as PolicyNet, IVT training, Integrity Reviews, and Succession Management Planning. Rose Mary also performed as a national and regional IVT instructor for topics such as PCACS and Workload Management. She is the recipient of three Commissioner Citations, two individual awards, and one as a member of the Hurricane Katrina Recovery Team, as well as an Atlanta Regional Commissioner's Citation Team Award.

Rose Mary is a graduate of Mississippi College, where she received a Bachelor of Science in Business Administration with a concentration in Communications. She is married and has two stepdaughters and three grandchildren.

## REGIONAL COMMISSIONER, BOSTON REGION

**Linda M. Dorn** has served as the Regional Commissioner for the Boston Region since September 2014. She is responsible for the service operations in the six New England States: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont.

She joined the Social Security Administration (SSA) in August 2002 in the Chicago Region as a Project Manager and also served as Deputy Director in the Center for Disability. During her career, Linda has held many executive leadership positions in SSA Headquarters, with assignments in the Office of the Commissioner, Office of Quality Review, Office of Systems and the Office of the Deputy Commissioner for Operations. In December 2010, she received her first appointment in the Senior Executive Service as the Associate Commissioner for Disability Determinations. She joined the Boston Region in March 2013 as the Deputy Regional Commissioner.

Prior to joining SSA, Linda served the State of Michigan as Director of the Michigan Disability Determination Services (DDS) within the Michigan Family Independence Agency. She began her state government professional career as a Disability Examiner.

Linda received both her bachelor's and master's degrees from Michigan State University.

## REGIONAL COMMISSIONER, CHICAGO REGION

**Phyllis M. Smith** has served as the Acting Regional Commissioner for the Chicago Region since January 2015. As the principal Social Security official for Illinois, Indiana, Michigan, Minnesota, Ohio and Wisconsin, she provides leadership for the effective operation of all Social Security programs within the region. She directs about 9,000 federal and state employees in SSA's mission of service delivery and manages an annual budget of over \$300 million. She is responsible for 221 field offices, 8 Area Director's offices, 6 teleservice centers, the Great Lakes Processing Center, and the Regional Office.

Phyllis's accomplishments include having been named the Deputy Regional Commissioner for the Chicago Region, Assistant Regional Commissioner for Management and Operations Support, and having served as the Assistant Regional Commissioner for Processing Center Operation at the Great Lakes Program Service Center.

Phyllis began her SSA career as a Title XVI Claims Representative and served in increasingly responsible positions, primarily in the Chicago Region, before her appointment to Senior Executive Service. These positions included Operations Supervisor, Program Specialist in the Center for RSI/SSI, Area Administrative Assistant, Hearings Office Director in the Office of Disability and Adjudication Review, and Executive Officer.

As a native of Indiana, Phyllis takes great pride in being able to lead the Chicago Region. Her work and achievements consistently demonstrate professional excellence, exceptional leadership, integrity, and commitment to public service.

## REGIONAL COMMISSIONER, FOR DALLAS REGION

**Sheila Everett** serves as the Regional Commissioner of the Dallas Region. Sheila holds a Bachelor's degree in Educational Psychology and a Master's Degree in Vocational Rehabilitation Counseling from Mississippi State University. She began her career at the Mississippi Disability Determination Services (DDS), serving the last eight years as Director. Under her leadership, Mississippi was the first state to implement Social Security's electronic disability folder. She also served as National Council of Disability Determination Directors (NCDDD) President for two years.

In April 2005, she joined the Social Security Administration and worked in the Atlanta Region on regional and national disability projects. In SSA headquarters, she was the Senior Advisor for the Office of Disability Determinations (ODD), the Deputy Associate Commissioner for the Office of Disability Programs (ODP), and the Associate Commissioner for the Office of Medical and Vocational Expertise (OMVE).

In addition to her Mississippi background, Sheila also has strong family ties to Texas and is excited about the opportunity to provide leadership to the Dallas region.

## REGIONAL COMMISSIONER, DENVER AND SEATTLE REGIONS

**Stanley C. Friendship** is the Regional Commissioner for the Social Security Administration, Denver and Seattle Regions. With direct oversight of the region's field offices and Teleservice Centers, Stanley ensures that every member of the public receives prompt, high quality, and technically accurate service.

Stanley began his career with Social Security as an Access Student in Everett, Washington, more than thirty years ago with the hope of making a difference in the people's lives he served. During his tenure with the agency, he has held several progressively more challenging positions in the field office environment: Claims Development Clerk, Service Representative, Claims Representative, Branch Manager, Assistant District Manager, District Manager, and Area Director. He also spent several years in the Teleservice Center as a Unit Supervisor, Section Chief, and TSC Manager. He has worked as an analyst in both the central and the regional office. Stanley recently completed the Senior Executive Service Candidate Program, where he held positions as Acting Deputy Regional Commissioner for the Denver Region; Executive Assistant at GSA; Division Director for the Division of Operations Analysis and Customer Service, and Acting Associate Commissioner of the Office of Central Operations.

Throughout his career, Stanley has promoted diversity and has actively shared his passion for public service with his clients and colleagues. He strongly advocates developing employees for higher level opportunities knowing that succession management will be so important in the future. He maintains that it is critical for Social Security to have employees who not only produce high quality work but also contribute their unique ideas to improve and streamline the work of the agency.

Stanley was born and raised in New Orleans, Louisiana. He earned an Associate's degree from Bellevue Community College as well as a Bachelor of Arts degree in Social Work from the University of Washington. He is married with one daughter, and he is also the proud grandfather of three granddaughters. In his free time, Stanley enjoys his other job as a professional drummer.

## REGIONAL COMMISSIONER, KANSAS CITY REGION

**Mike Kramer** serves as the Regional Commissioner in the Kansas City Region and has direct supervision and oversight of the Region's field operations in Iowa, Kansas, Nebraska and Missouri.

Mike began his career with Social Security in 1991 as a Claims Representative in the Topeka, Kansas field office after receiving a Bachelor's degree in Political Science from Washburn University. In 1995 he earned a Master's degree in Public Administration from the University of Kansas. Mike moved to the regional office (RO) in 1999 and held a variety of analyst, team leader and project manager positions. He also served as the manager of the Independence, Missouri cluster before returning to the RO as the Deputy ARC MOS.

Mike is a graduate of Kansas City's Employee Development Program and Class V of the Senior Executive Service Candidate Development Program. He served in Headquarters as the Deputy Associate Commissioner for both Facilities Management and Security and Emergency Preparedness before returning to Kansas City as ARC MOS in 2012. In 2015, Mike completed a 6-month assignment as Acting Assistant Deputy Commissioner for Operations.

## REGIONAL COMMISSIONER, NEW YORK REGION

**Frederick M. Maurin** is the fourth Regional Commissioner of the Social Security Administration's New York Region. Appointed to the Senior Executive Service in March 2011 as Deputy Regional Commissioner of the New York Region, he became the Region's primary official in July 2014.

As Regional Commissioner, Mr. Maurin has direct authority over the Social Security Administration's operations in New York, New Jersey, Puerto Rico and the U.S. Virgin Islands. This encompasses an annual administrative budget of approximately \$400 million for more than 3900 employees in 103 field offices, four teleservice centers, four Social Security Card Centers, the Northeastern Program Service Center and the Regional Office administrative staff. Throughout the region, more than seven million beneficiaries receive more than \$88 billion in Social Security and Supplemental Security Income benefits annually.

Mr. Maurin began his career with the Social Security Administration in 1972 as a Claims Representative. He subsequently advanced through progressively responsible supervisory and management positions in the New York Region, including Operations Supervisor, Assistant District Manager, District Manager, and Area Director. As Area Director for New Jersey, he supervised the operations of 28 Field Offices and more than 700 employees. Prior to that, he served as Area Director in New York City and the Lower Hudson Valley where he directed 18 Field Offices. Mr. Maurin served as Acting Regional Commissioner for the Philadelphia Region from October 2011 to May 2012, with direct authority over the Social Security Administration's operations in Delaware, Maryland, Pennsylvania, Virginia, West Virginia and the District of Columbia, as well as the Mid-Atlantic Program Service Center.

During 2010, he served as a congressional aide in the Washington, DC office of Congressman Charles B. Rangel of New York.

## REGIONAL COMMISSIONER, PHILADELPHIA REGION

**Terry Stradtman** became the Regional Commissioner for the Social Security Administration's Philadelphia Region on May 6, 2012. He was appointed to the Federal Senior Executive Service in 2007.

Terry is a native of Sandusky, Ohio. He began his career with SSA in 1979 as a claims representative in the Sandusky field office. In 1983, he transferred to an Operations Analyst position in the Frederick, Maryland field office. Since becoming an Operations Supervisor in 1986, Terry has held a number of progressively responsible managerial and executive level positions in the Philadelphia Region and Headquarters.

In 1990, Terry was selected as the District Manager of the Baltimore Mondawmin Field Complex and was the manager of the SSA's first IWS/LAN field office. He subsequently was the Director for the Baltimore Teleservice MegaCenter for four years, which at the time was SSA's largest teleservice center with over 590 telephone agents. In 1999, he was selected as the Area Director for SSA field offices in Maryland, Delaware, and parts of Virginia and West Virginia. In August 2007, he joined the Office of Systems as the Deputy Associate Commissioner for the Office of Retirement and Survivors Insurance Systems (ORSIS) where he led agency efforts to implement the Economic Recovery Payment legislation. He was selected as the Associate Commissioner for the Office of Earnings, Enumeration and Administrative Systems (OEEAS) in May 2010. In January 2011, Terry was selected as the Associate Commissioner for Office of Central Operations (OCO) in Operations.

Terry is a graduate of SSA's Mid-Level Management Program in 1995 and the agency's SES Candidate Development Program in March 2004.

Terry holds a Bachelor of Arts degree in Political Science from The Ohio State University. Over the years, he has received numerous Regional Commissioner, Associate Commissioner, Deputy Commissioner, and Commissioner Citations for his leadership abilities. Terry currently lives in Pennsylvania with his wife and daughter. In his spare time, he enjoys following Ohio State football and basketball, along with watching his daughter play soccer at the collegiate level.

## REGIONAL COMMISSIONER, SAN FRANCISCO REGION

**Grace Kim** is the Regional Commissioner in San Francisco. Grace began her Federal service in 1989, when she joined the Chicago Office of the General Counsel (OGC) for the Department of Health and Human Services. When the Social Security Administration became an independent agency in 1995, Grace continued her career with the SSA's Chicago OGC. As an attorney for HHS and SSA, Grace has represented the agency in a wide array of cases in Federal District Court and the Courts of Appeals, including a class action involving hundreds of class members.

Grace also has handled cases before various adjudicators and tribunals including bankruptcy cases in Federal court, legal opinions, Privacy Act and disclosure matters, state and local coverage matters, and a wide range of requests for legal advice. In 2001, Grace became a Supervisory Attorney and oversaw a portion of the Office's program litigation workload and employment cases.

In 2006, Grace became the Deputy Regional Chief Counsel, and beginning in 2011, the Acting Regional Chief Counsel in Chicago. In December 2012, Grace was appointed to the Senior Executive Service as Regional Chief Counsel for the San Francisco Office. Grace received her B.A. from the University of Michigan in 1986 and her J.D. from Loyola University Chicago School of Law in 1989.

## SENIOR ADVISOR BEATRICE M. DISMAN

**Beatrice M. Disman** is nationally recognized for her Executive leadership, communication and political skill. She has over four decades of Executive experience leading complex large organizations and planning and implementing major legislation affecting the American public.

Ms. Disman retired from the Social Security Administration (SSA) in July 2014 as the Regional Commissioner of the agency's New York region. She was the third Regional Commissioner to hold this position in the New York region and the first as an independent agency. As Regional Commissioner, Ms. Disman had direct authority over SSA's operations in New York, New Jersey, Puerto Rico and the U.S. Virgin Islands. This encompassed an annual administrative budget of approximately \$400 million for more than 3900 employees in 123 locations serving more than seven million beneficiaries who received more than \$88 billion in Social Security and Supplemental Security Income benefits annually. At the request of the Commissioner of Social Security, Ms. Disman was asked to plan and implement the responsibilities given to Social Security in the Medicare Prescription Drug Act of 2003, the Medicare Improvements for Patients and Providers Act of 2008 and the Affordable Care Act of 2010. In this capacity, she had extensive interactions with other Executive Branch agencies and with Congress.

Ms. Disman returned to SSA in October 2014 as a Senior Advisor to the Acting Commissioner, to provide executive leadership, advice and mentoring by working with the Deputy Commissioners and other Agency staff in such diverse areas as the disability program, anti-fraud initiatives, management challenges, and special projects.

Ms. Disman earned a BA in History and Political Science from Brooklyn College, an MA in American Diplomatic History from Ohio State University Graduate School and an MBA from New York University's Graduate School of Business. She has also completed the LEGIS Fellows Program, serving as Legislative Assistant to a U.S. Senator, and completed a Program for Senior Managers in Government at Harvard University's John F. Kennedy School of Government. Ms. Disman is also an alumna of the Federal Executive Institute in Charlottesville, VA.

Throughout her distinguished career, Ms. Disman has received numerous awards and commendations, including the New York State Medal of Honor, presented on behalf of the Governor for her tireless efforts to assist the families of victims from the attacks of September 11th. Ms. Disman has received three Presidential Rank Awards, numerous citations from Commissioners of Social Security and the Commissioner's Leadership Award. In 2005, she was one of two executives to receive a newly created Commissioner's Trailblazer Award for leadership, tenacity, and creativity.

Chairman Emeritus of the New York Federal Executive Board, Ms. Disman served as its Chair from 1997 to 2003, leading the collaborative effort among 150 federal agencies throughout the City of New York especially the period after September 11th. She is a member of the National Academy of Social Insurance. A tireless advocate for many social issues, Ms. Disman continues to serve her fellow New Yorkers in leadership roles in her local Community Board.

## SENIOR ADVISOR GREG PACE

**Greg Pace** is a Senior Advisor to the Acting Commissioner of Social Security. In that role, he provides the Acting Commissioner with a broad array of executive level consultative and representational services.

Greg was appointed to the Senior Executive Service in 1994. Prior to his current assignment, Greg served in several senior executive positions: Senior Advisor to the Deputy Commissioner of Social Security (2011-2012); Deputy Chief Information Officer (CIO) for SSA (2005-2011); Acting CIO for SSA (2009); member, Federal CIO Council (2005-2011); Deputy Associate Commissioner, Office of Enterprise Support, Architecture and Engineering, SSA (2002-2005); and, Deputy Director, Office of Systems, Planning and Integration, SSA (1994-2002). Greg is a graduate of the Department of Health and Human Services' SES Candidate Development Program.

Prior to becoming a senior executive, Greg also served the agency in several senior level management and technical positions in the areas of information technology, technology innovation, program policy, and operations. Greg joined SSA as a computer specialist in 1974. He was recruited from private industry to help the agency engineer and deploy a national network of computers and terminals to support the implementation of the agency's Supplemental Security Income Program.

In addition to his normal duties, Greg has lectured and provided consultant services to the World Bank, the International Social Security Association, and the Inter-American Center for Social Security Studies. Some of the countries that he provided services to include: Romania, Uganda, Ghana, Nigeria, Antigua, St. Christopher, and Bermuda.

Greg has received several awards and commendations including a Presidential Rank Award and two Commissioner Citations.

### SENIOR ADVISOR JANE L. ROSS

**Jane L. Ross**, Ph.D. is a senior policy advisor to the Acting Commissioner of Social Security since 2014. From 2001 to 2012 she was a member of the National Academy of Sciences, National Research Council, Division of Behavioral and Social Science and Education.

From 1998 to 2001, Jane was the Deputy Commissioner for Policy at SSA. In this role, she led SSA efforts to conceptualize and analyze policies addressing major national issues. Major efforts included proposals for the long-range financing of the Social Security programs; policies to improve the management and integrity of the Supplemental Security Income program; and options to reduce poverty among aged women.

From 1992 to 1998, Jane was the Issue Area Director and Assistant Director for Income Security Issues and the United States General Accounting Office. In this role, she led an organization of roughly 100 staff that researched and produced reports and testimony at the request of Congressional committees and individual members of Congress. Areas of particular concentration included state implementation of the Welfare Reform Law of 1996; management analyses of the Social Security Administration; areas of vulnerability in the Supplemental Security Income Program and long-range solvency of the Social Security system.

Jane has a B.A. in International Relations, and M.A. in Economics, and a Ph.D. in Economics from American University.

## APPENDIX F: COMPLETE LISTING OF BIPARTISAN BUDGET ACT OF 2015 IMPLEMENTATION PROVISIONS

On November 2, 2015, the President signed into law H.R. 1314, the Bipartisan Budget Act (BBA) of 2015, which became Public Law 114-74. In addition to reallocating funds from the Old-Age and Survivors Insurance (OASI) trust fund to the Disability Insurance (DI) trust fund, the legislation makes several reforms to the Social Security Program. All 24 provisions are provided in the following table:

TITLE		SUMMARY REQUIREMENTS	EFFECTIVE DATE	IMPLEM ENTED	SSA REG	SYS CHANGE	ACTIONS
301	Debt Collection Improvements (long-term)	Amends the Communications Act of 1934 to authorize the use of automated telephone equipment to call cellular telephones for collecting debts owed to the U.S. Government. In addition, authorizes the Federal Communications Commission (FCC), in consultation with the Department of the Treasury (TD) to issue regulations to limit the number and duration of any such calls.	8/1/16	√			Implemented 8/1/16. No action needed. This regulation is for the Federal Communications Commission and the Department of the Treasury.
601	Maintaining 2016 Medicare Part B Premium and Deductible Levels Consistent with Actuarially Fair Rates (short-term)	Establishes the 2016 monthly Medicare Part B premium for enrollees not subject to the “hold harmless” provision. Requires these enrollees to pay an additional \$3 to cover the cost of setting the premium rate; requires enrollees subject to an Income-Related Monthly Adjustment Amount (IRMAA) to pay an additional charge that is higher than \$3; extends those provisions through 2017 if no Social Security COLA increase that year.	11/2/15	√		√	Implemented 11/18/15, working with CMS. Systems resources are needed each year when the Medicare Part B rates are announced.
701	Civil Monetary Penalty (CMP) Inflation Adjustments (mid-term)	Requires the head of each Federal agency to adjust CMPs within its jurisdiction for inflation each year, based on the cost-of-living increase in the Consumer Price Index (CPI). NLT 07/01/2016, establish first inflation adjustment based on the percentage by which the CPI for 2015 exceeds the CPI of the year the CMP was first established, or last adjusted. Include information about CMPs and adjustments the Agency Financial Report.	8/1/16	√	√		Implemented 8/1/16. Published the Interim Final Rule on 6/27/16. Annual adjustment due by January 15 beginning in 2017. Must publish 2017 rates by December 15.

TITLE		SUMMARY REQUIREMENTS	EFFECTIVE DATE	IMPLEM ENTED	SSA REG	SYS CHANGE	ACTIONS
811	Expansion of Cooperative Disability Investigations Units (CDIUs) (long-term)	Requires the COSS to establish CDIUs to cover all 50 States, D.C., Puerto Rico, Guam, the Northern Mariana Islands, the Virgin Islands, and American Samoa; subject to funding and participation of local law enforcement agencies. Required to submit annual progress report to House Committee on Ways and Means, and Senate Finance Committee until nationwide coverage achieved.	10/1/22				Coverage provided to Washington DC effective October, 2015. Collaborating with OIG to provide coverage to one additional state/territory in FY 2016. Expansion requirement of no later than 10/1/22 is subject to the availability of funding.
812	Exclusion of Certain Medical Sources of Evidence	This provision requires SSA to exclude evidence provided by people convicted of certain felonies, excluded from participation in Federal health care programs, or assessed with a civil monetary penalty for submission of false evidence; includes good cause exception as determined by the COSS.	11/2/16		√	√	The final rule was published on 9/23/16 and will be effective on November 2, 2016. Added new flag and document type in the electronic disability folder.
813	New and Stronger Penalties	Increases the penalty for conspiracy to commit Social Security fraud and certain offenses committed by people violating positions of trust.	11/2/15	√	√		Effective upon enactment. Plan to publish regulations in 2017 (post-implementation). New rates take effect January 15, 2017.
814	References to Social Security and Medicare in Electronic Communications	Includes electronic and internet communications in the prohibitions from misusing Social Security or Medicare symbols, emblems, or names; treats each dissemination, viewing, or accessing of a communication as a separate violation.  Current regulations at 20 CFR part 498 need to be amended to reflect this legislative modification	11/2/15	√	√		Effective upon enactment. Plan to publish regulations in 2017 (post-implementation).
815	Change to Cap Adjustment Authority	Adds costs of CDIUs, fraud prosecutions by U.S. Attorneys, and work-related continuing disability reviews to the activities covered by the discretionary spending cap adjustments for SSA program integrity; adjusts discretionary.	11/2/15	√			Effective upon enactment. This provision increased the authorized funding dedicated for Program Integrity (PI) activities in FYs 2017-2019 and reduced the authorized funding for PI activities in FY 2021. It also expanded the activities which may be funded by this funding source. We are still awaiting the appropriated levels for FY 2017 and FY 2018.
821	Temporary Reauthorization of Disability Insurance Demonstration Project Authority	Extends authority to initiate DI demonstration projects through 2021, and continue such projects through 2022. BBA 822 requires the COSS to ensure all participation in demonstration projects is voluntary, and obtain informed written consent from all participants; revises reporting requirements for demonstration projects.	11/2/15	√			Effective upon enactment. On 9/19/16, released a Request for Information on a potential demonstration on musculoskeletal impairments.

TITLE	SUMMARY REQUIREMENTS	EFFECTIVE DATE	IMPLEM ENTED	SSA REG	SYS CHANGE	ACTIONS
822	Modification of Demonstration Project Authority	Requires the COSS to ensure all participation in demonstration projects is voluntary, and obtain informed written consent from all participants; revises reporting requirements for demonstration projects.  Submit annual report to the House Committee on Ways and Means and the Senate Committee on Finance by September 30 (formerly June 9).	11/2/15	√		Effective upon enactment. Annual report due to Congress on 9/30/16. Released on 9/22/16.
823	Promoting Opportunity Demonstration Project	This provision requires the COSS to establish a five-year demonstration project to test a benefit offset of \$1 for every \$2 of earnings in excess of a specific threshold. We are currently in the process of awarding implementation and evaluation contracts for POD and plan to begin recruitment for the demonstration in 2017.	1/1/17		√	Evaluation Request for Proposals (RFP) released and closed. Implementation RFP released 8/18/16 and closes 9/22/16. Plan to award contracts for implementation and evaluation in 12/16; Operations workload will begin in 2017. Developing and implementing Systems changes in FY 2017.
824	Use of Electronic Payroll Data to Improve Program Administration	Permits the COSS to establish exchanges with payroll data providers to obtain wage data to administer the disability and SSI programs and prevent improper payments; authorizes the COSS to require claimants to provide authorization to obtain payroll data.  NOTE: Individuals who provide authorization will be afforded protection from certain sanctions and penalties. Refusal to provide authorization or revocation of such authorization will negate this protection (in contrast to provisions in current law regarding access to financial data, failure to provide authorization for payroll data could not be used as a basis to deny benefits.)	11/2/16		√	√  We have obtained inter-component concurrence on our business process. Consequently, we will be moving forward to the next phase of the project and start working on defining the systems requirements. We continue working on the draft NPRM and the statement of work.
825	Treatment of Earnings Derived from Services	For purposes of an initial determination of Title II disability, establishes a rebuttable presumption that earnings were earned in the month in which the services were performed; in any other case, establishes the rebuttable presumption that earnings were earned in the month in which such earnings were paid.	9/24/16	√	√	√  Implemented Systems changes to eWork on 9/24/16. Provided training on the new policy/ procedure and published POMS. May publish regulations in 2017.
826	Electronic Reporting of Earnings		9/30/17		√	Continuing planning and analysis through FY 2016.

TITLE		SUMMARY REQUIREMENTS	EFFECTIVE DATE	IMPLEM ENTED	SSA REG	SYS CHANGE	ACTIONS
831	Closure of Unintended Loopholes (Aggressive Claiming)	Automatically deems a claimant who applies for retirement benefits to have applied for any spousal benefit for which he or she is eligible; automatically deems a claimant who applies for a spousal benefit based on age to have applied for his or her retirement benefit if he or she is eligible. Prohibits a person from receiving retroactive benefits for a period of voluntary suspension or benefits based on the earnings of an individual who has suspended his or her benefits during the suspension; prohibits an individual whose benefits are suspended from receiving benefits on any other record during the suspension.	4/30/16	√	√	√	Deemed Filing implemented 1/1/16 and Voluntary Suspense implemented 4/30/16. Will begin effort to automate the process in 2017, subject to funding. NPRM targeted for FY 2017.
832	Restrictions on who can be Medical Consultants (MCs)		11/2/16		√	√	Transition to only physicians being MCs and new Medical Advisor role will be implemented without regulation by 11/2/16. Published a proposed rule to implement BBA 832 on 9/9/16 as part of the Medical Evidence rule. Federal Register Notice extending SDM published on 8/25/16. Will publish a rule extending DEA until 2018 discontinuation by early November 2016. Planning and implementing necessary Systems changes.
	Requirement for MC/Psychological Consultant (PC) review in all claims. Ends Single Decision Maker (SDM)/Disability Examiner Authority (DEA)	Eliminates Single Decision Maker authority in the 19 states and 1 Federal site where the authority existed and Disability Examiner Authority in all states for QDD/CAL decisions. BBA 832 states that when there is evidence indicating the existence of a physical impairment, we must make every reasonable effort to ensure that a qualified physician has completed the medical portion of the case review and any applicable medical assessments. BBA 832 also states that when there is evidence indicating the existence of a mental impairment, we must make every reasonable effort to ensure that a qualified psychologist or psychiatrist has completed the medical portion of the case review and any applicable medical assessments. This requirement applies to all initial claims, reconsiderations, and continuing disability reviews (CDR).					
833	Reallocation of Payroll Tax Revenue		11/1/16-12/31/18	√			Effective upon enactment. No action needed.
834	Access to Financial Information for Waivers and Adjustments of Recovery	Requires the COSS to obtain a claimant's authorization to obtain financial institution records before waiving overpayment recovery under the "defeats the purpose" provision; permits SSA to refuse the waiver if the claimant refuses to grant such authorization.	3/1/216	√		√	Implemented 3/1/16. Drafting the business process for the automation phase and will automate in 2018.

TITLE		SUMMARY REQUIREMENTS	EFFECTIVE DATE	IMPLEM ENTED	SSA REG	SYS CHANGE	ACTIONS
841	Interagency Coordination to Improve Program Administration	Requires SSA and the Office of Personnel Management (OPM) to enter into an agreement that will allow SSA to withhold past-due disability benefits to offset any Federal Employee Retirement System (FERS) disability annuity overpayment caused by such disability benefits.	11/2/16			√	Working with OPM regarding the legal agreement. Implementation in 2017 pending OPM funding.
842	Elimination of Quinquennial Determinations Relating to Wage Credits for Military Service Prior to 1957	Eliminates the requirement that the COSS make quinquennial determinations for pre-1957 military service wage credits after the 2010 determination.  We notified the Appropriation Committee about this change and it is reflected in the FY 2017 President's Budget.	12/30/15	√			No action needed.
843	Certification of Benefits Payable to a Divorced Spouse of a Railroad Worker to the Railroad Retirement Board	Allows the COSS to electronically certify benefits due to a divorced spouse of a railroad worker to the Railroad Retirement Board.	11/2/15	√	√		Implemented 1/14/16. Continuing post-implementation activities. Released an emergency message and will publish POMS by end of the calendar year. NPRM targeted for FY 2017.
844	Technical Amendments to Eliminate Obsolete Provisions	Removes two obsolete provisions of the Social Security Act related to Medicare — the former §226(i) and §226A(c).	11/2/15	√			Effective upon enactment. Reviewed regulations and POMS.
845	Reporting Requirements to Congress	Requires SSA to submit three new annual reports to Congress:  1. Fraud and Improper Payment Prevention Report  2. Work-Related Continuing Disability Review Report  3. Overpayment Waiver Report  Include Report with annual budget.  Submit report to House Committee on Ways and Means and the Senate Committee on Finance.  Submit report to the House Committee on Ways and Means and the Senate Committee on Finance.	1/1/16				Will submit to Congress: -Fraud and Improper Payment Prevention Report with the annual budget for FY 2016-2021. -Work-Related Continuing Disability Review Report annually to the House Committee on Ways and Means and the Senate Finance Committee (Hill staff are aware this information is not immediately available at the end of a given year). -Overpayment Waivers Report, not later than January 1 each year, to the House Committee on Ways and Means and the Senate Finance Committee.
846	Expedited Examination of Administrative Law Judges (ALJs)		11/2/15-12/31/22				On 3/29/16, OPM opened the ALJ exam by posting the ALJ announcement on USA Jobs. There is no further action for SSA.

## APPENDIX G: AGENCY CRITICAL PRIORITIES FOR 2016-2017

### SUPERIOR CUSTOMER EXPERIENCE

#### I. Advance Customer Engagement

Our goal in advancing customer engagement is to improve the customer experience. When we reflect on the ways we advanced our customers' engagement through our 2015 – 2016 Critical Priorities, we delivered a myriad of options for customers to conduct SSA business with us. We set out on a path to reach this aspirational vision in the spring of 2015. We remained true to our commitment to improve the customer's experience by providing more options that resulted in:

- Decreased walk-in traffic to our field offices by automating the SS5 process;
- Over 100,000 customer requests through our Click to Callback service; and
- Flexible online options that offer more Medicare enrollment choices.

By reducing paper workloads and increasing automation of manual workloads, we sought to allow you the opportunity to focus more on serving customers' needs and less on back-office tasks. Our Agency Critical Priorities for 2016-2017 will expand customer engagement by providing options to allow the customers to choose how they engage with us — in-person, online, or over the telephone.

In doing so, we will continue to use technology to expand our service offerings through our Application Status (IAPS) Enhancements aimed to reduce the burden on field offices to answer Claims status questions. We will further reduce manual and paper workloads by expanding iAppeals to non-medical appeals. Finally, we will experiment with a new service concept called "Customer Connect", which seeks to anticipate customer needs and offer automated, just-in-time service based on customer data.

#### Activities

- Application Status (myAPS)
- Multifactor Authentication
- Message Center
- Click-to-Chat
- Registration, Appointment and Services for Representatives (RASR)
- Non-Medical iAppeals
- Redesign of *my Social Security*
- iSSI
- Expanded CET

#### II. Advance Service Delivery in Our Disability Programs

Advancing service delivery in our disability program means improving service through innovation, greater consistency and simplified, up-to-date policy. Our 2015-2016 Critical Eight Priorities focused on advancing service delivery for persons with disabilities by addressing timely, high quality hearing and appeals decisions. We recognize the financial, well-being and hardship impact of extended waits for disability decisions. Our applicants with disabilities are among the most vulnerable of the populations we serve. We continue to work aggressively to reduce wait times for hearing decisions. We deployed the following key initiatives as part of our 2015-2016 priorities to resolve this public service:

- Launched our plan for **C**ompassionate **A**nd **RE**sponsive **S**ervice (CARES), which increased our capacity to hear and decide cases, implemented innovations in our business process, and used innovative technology to better triage work and better balance workloads across the nation.
- Expanded the National Adjudication Team with more Senior Attorneys to prepare case summaries and on-the-record decisions.
- Initiated the 1,000+ page pilot designed to streamline large case files in ODAR.

Through this Agency Critical Priority, we will continue providing you with tools to make the right decision at the earliest point possible in the most effective and efficient manner. Building upon our work from the Critical Eight Priorities, this will include:

- Continuing the development of the Disability Case Processing System (DCPS), which will improve consistency, ensure continued quality, and provide greater transparency into processing of disability determinations at the Disability Determination Services (DDS).
- Developing ways to enhance and streamline our medical and vocational policies across the agency.
- Timely, high quality decisions are at the heart of our initiatives to reduce wait times and better serve the public. Our success is critical to the individuals with disabilities and their families.

#### Activities

- **C**ompassionate **A**nd **RE**sponsive **S**ervice (CARES)
- Disability Case Processing System (DCPS)
- Enhancing Medical and Vocational Policies

### III. Enhance Knowledge of Social Security Retirement and Disability Programs

Today, about 168 million people work and pay Social Security taxes and about 60 million people receive monthly Social Security benefits. Helping the public understand their benefits is at the core of maintaining support for the most successful domestic program in the history of our nation. This is why educating the public about our retirement and disability programs remain an essential element of our critical priorities.

As part of our 2015 - 2016 Critical Eight Priorities, we made significant advances in how we connected with the public. We leveraged existing technology to connect via electronic means including social media and other outlets. This increased awareness and excitement resulted in our receiving:

- More than 27,000 hits on our internal website;
- Over 250,000 subscribers to our Social Security Matters Blog; and
- Nearly 180,000 Twitter followers.

While we have initiated new and creative ways to connect with the public, we believe that YOU are our best spokesperson for educating them. Therefore, we want you to be knowledgeable, prepared, and comfortable sharing information about our programs and services with those we serve, members of the community, including your family and friends.

We are building on the work we started with the Critical Eight Priorities to accomplish even more through our 2016-2017 Agency Critical Priorities. To accomplish this, we are expanding our One Voice initiative to provide you with readily available information and tools to help you to feel confident talking about our programs and services.

## Activities

- Brand Strategy: Securing Today and Tomorrow
- One Voice

## IV. Enhance Quality and Payment Accuracy for Our Customers

Across Social Security we share one common goal: to make the right payment to the right person at the right time. It's the heart of our mission, and the foundation of our programs. As good stewards of taxpayer dollars, we must do quality work and accurately administer our programs.

This priority dedicates our focus towards strengthening the quality of our work to ensure the accuracy of our payments. We identified the leading causes of improper payments and significant quality issues and selected workloads where we, collectively, can make meaningful progress over the next 12 months. Because of your dedication and efforts, we continue to thrive in this area. Our payment accuracy rates are very high, especially for our retirement and survivors programs, where more than 99 percent of our payments are error-free.

Many of you have provided recommendations on improving our quality and accuracy. Whether you submitted your ideas through the Commissioner's Challenge Committee (C<sup>3</sup>), or gave recommendations to your component leadership or office manager, we appreciate your valuable input. We have incorporated many of your ideas as part of this Agency Critical Priority for 2016-2017.

Building on our current efforts and processes, we will focus on two key areas: (1) combating the leading causes of improper payments, and (2) improving quality and program integrity. We will work on a range of efforts across these two-targeted areas (reflected below). This will allow us to improve our business processes and find ways to work more efficiently. Additionally, we will begin to use data from external sources in our business processes and gradually depend less on self-reporting by our beneficiaries. Last, we will clarify our instructions for staff who process the most complex cases and modernize our policies to support more timely and accurate decisions.

## EXCEPTIONAL EMPLOYEES

### V. Invest in Our Employees

As we often say, you, our employees are our most valuable asset and the foundation of the agency. Our customers rely on you every day to deliver the compassionate, quality service we are known for. Whether you directly serve our customers from the American public, or provide support to the employees who do, we want to ensure you have the skills, expertise, and opportunity to be successful in achieving your career goals and aspirations.

We aspire to be an employer of choice attracting and retaining employees who commit to our mission, represent and appreciate the diversity of the public we serve, pledge to provide quality customer service, and enjoy a lifetime career with our agency. As part of our 2015-2016 Critical Eight Priorities, we initiated the following career development efforts to support you in reaching your career goals:

- Launched our SkillsConnect Pilot Program which matched over 380 applicants with over 65 projects.
- Implemented the SSA Mentoring Program - over 2,000 employees participated.
- Our Job Experience Learning Program (JELP) with over 280 participants since the program's launch.

We must continue to develop a strong talent pool across the agency to sustain our organization now and into the future. In support of our vision and building on the work initiated as part of the Critical Eight Priorities, we will expand and improve our recruitment, training, and development programs through our 2016-2017 Agency Critical Priorities. We remain committed to making training and development opportunities available across the agency.

Over the next 12 months, through our 2016-2017 Agency Critical Priorities, we will develop expanded career planning tools and resources to provide you with greater visibility into potential career paths and options. These tools will help you explore career options with the agency and actively plan your personal career path.

Our expanded efforts will also include our continued focus on employee engagement and succession planning. We want our employee engagement initiatives to result in a stronger, more fulfilling relationship with the agency for all employees. As such, we will focus on strengthening our collaborative efforts and cultivating an environment where you feel appreciated and valued.

We place a high priority on career growth and developing future leaders. Our succession-planning activities will focus on strengthening the leadership pipeline and identifying advancement and leadership opportunities at all levels of the organization. We must be able to identify talented individuals and help them prepare to assume key leadership positions across the agency.

### Activities

- Employee Development
- Employee Engagement
- Headquarters Detail Portal
- Leadership Education And Development for Supervisors (LEADS)
- MySSA Career
- Streamlined Individual Development Plan (IDP)
- Succession Planning

## INNOVATIVE ORGANIZATION

### VI. Upgrade Our Foundational Infrastructure

The demands for our services continue to grow at a rate that challenges our resources. In order to serve our customers more effectively, we must be innovative in our use of technology and continue to emphasize efficiency and quality-enhancing solutions. We are proud of the great strides we made in this area through our 2015-2016 Critical Eight Priorities. Our efforts over the past 16 months helped us to launch the following key efforts to assist with improving our infrastructure:

- IT Investment Process (ITIP) represents our commitment to a transparent and effective process for investing in IT, which allows us to properly plan and construct our IT projects.
- IT Investment Review Board (IT IRB) reviews and prioritizes the agency's IT investments.
- Enterprise Program Management (EPMO) will assist with program management of our most critical projects and promote program management skills within the agency.
- Provided training to our employees to learn about the ITIP and about project planning and management process.

We will continue this important work over the next 12 months, working to refine and improve on these key initiatives. Our continued work in this area will help us to make wiser IT investments and provide more efficient and effective program management agency-wide. It will also help us to manage large projects in a consistent way to ensure we produce the desired outcome; and provide transparency so that we know how our resources are being used.

Additionally, our work involves making smart and sound decisions about which automation investments can produce the greatest good —considering the needs of both our employees and the public.

### Activities

- IT Investment Process (ITIP)
- Enterprise Program Management Office (EPMO)
- Innovative Organization

## VII. Modernize Our Informational Technology and Accelerate Data Driven Decisions

We must modernize our information technology (IT) in service of our aspirational vision of 2025. Like many government agencies, our current information technology makes it challenging to meet the changing service needs of the public. Modernization will help us to improve our efficiency, expand the skill sets for current employees and recruit additional technical experts to join us. Most importantly, IT modernization will help all of us better serve our customers—whenever and wherever they need us. A major part of modernizing our IT is also making better use of the data we have. Through our

2015-2016 Critical Eight Priorities, we were able to make the following significant enhancements to IT:

- Established and approved the structure for the Enterprise Data Warehouse (EDW) to provide you with easy-to-use integrated data and tools in support of data-driven decision-making.
- Populated the EDW with data from eight initial sources including Numident, Integrate Client, ROME, VIPr, iAccomodate, CHIP, Global Reference Tables, and DOORS.
- Established the Analytics Center of Excellence (ACE) to help train and employ you to utilize data to make informed decisions.

While EDWs, ACEs, and ITs might sound like alphabet soup to some, however, these efforts are powerful new resources. The EDW will help improve your access to and use of data. The ACE will help train and empower staff to effectively use data in everyday decision-making.

Here's an example of how ACE and use of the EDW helped us to make better decisions and to be more efficient: Last year, we created a marketing campaign for the new Internet Medicare Replacement Card application behind **my Social Security**. Using **my Social Security** sign-up data, we sent 17 million e-mails to every **my Social Security** account holder announcing the new service. This year, we are able to take a more targeted approach to our marketing campaign. With access to the EDW, we targeted **my Social Security** account holders by age (from the Numident), beneficiary status (from the MBR and SSR) and location (from **my Social Security** sign-up data) reducing the overall number of emails by half by focusing only on the target audience.

These modernization efforts from our Critical Eight Priorities will improve our efficiency through our 2016-2017 Agency Critical Priorities. This means better IT products to you, our employees, and our customers faster.

### Activities

- Enterprise Data Warehouse (EDW)
- Analytics Center of Excellence (ACE)

Securing today  
and tomorrow
