June 22, 2018

Thank you for your December 6, 2016 Freedom of Information Act (FOIA) request for a copy of the Social Security Administration (SSA) briefing materials – to include internal documents – related to the Presidential transition (i.e., for Agency Review Teams/Agency Landing Teams). Per your letter, you are primarily interested in records from July 1, 2016 to the date of your request.

We identified 119 documents responsive to your request; however, we are withholding 7 documents in full under the FOIA Exemptions 5 (deliberative process), 6 (personal privacy), and 7(E) (law enforcement techniques and procedures). Of the 112 documents (2,180 pages) saved on the enclosed CD, we have redacted portions of 25 documents pursuant to the same FOIA Exemptions: 5, 6, and 7(E).

Pursuant to the FOIA Exemption 5, we are withholding and redacting advice, opinions, recommendations, predecisional discussion, and evaluative remarks that are part of the government decision-making process. Release of such predecisional advisory communications would harm the quality of agency decision-making and the policy of encouraging frank, open discussion among agency personnel before making a decision (5 U.S.C. §552(b)(5)).

The general purposes of the deliberative process privilege are to prevent injury to the quality of agency decisions and to protect government agencies' decision-making processes. The deliberative process privilege allows agencies to freely explore alternative avenues of action and to engage in internal debates without fear of public scrutiny (*Missouri ex rel. Shorr v. United States Army Corps of Engineers*, 147 F.3d 708, 710 (8<sup>th</sup> Cir. 1998)). Exemption 5 protects not merely documents, but also the integrity of the deliberative process itself, where the exposure of that process could result in harm.

Under the FOIA Exemption 6 (5 U.S.C. § 552(b)(6)), we are withholding and redacting third parties' personally identifiable information. When we receive a request from a member of the public to release personal information about another individual from our records, we must balance the individual's privacy interest in withholding the information against the public interest in disclosing the information. We must determine whether disclosure would affect a personal privacy interest. Individuals clearly have a substantial personal privacy interest in the personal

details furnished to the government. On the other hand, the only public interest we must consider is whether the information sought would shed light on the way an agency performs its statutory duties. We may not consider the identity of the requester or the purpose for which the information is requested. While the public has an interest in knowing how SSA administers the Social Security Act, disclosing records containing personal information about named individuals would not shed light on how the agency performs its statutory duties. Therefore, disclosing this information would be a clearly unwarranted invasion of personal privacy, and the FOIA does not require disclosure.

Finally, under the FOIA Exemption 7(E) (5 U.S.C. § 552(b)(7)(E)), we are withholding and redacting information related to law enforcement techniques and procedures under. Exemption 7(E) exempts from mandatory disclosure records or information compiled for law enforcement purposes when production of such records “would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law.”

The enclosed CD is automatically encrypted. We will send you the password in a separate letter.

If you have questions, or would like further assistance with your request, you may contact our FOIA Public Liaison by email at [FOIA.Public.Liaison@ssa.gov](mailto:FOIA.Public.Liaison@ssa.gov); by phone at 410-965-1727, by choosing Option 2; or facsimile at 410-966-0869.

You may also contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration for dispute resolution services. OGIS is an entity outside of SSA that offers mediation services to resolve disputes between FOIA requesters and Federal agencies. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road – OGIS, College Park, MD 20740-6001; email at [ogis@nara.gov](mailto:ogis@nara.gov); telephone at 202-741-5770; toll-free at 1-877-684-6448; or facsimile at 202-741-5769.

If you disagree with this decision, you may file a written appeal with the Executive Director for the Office of Privacy and Disclosure, Social Security Administration, G-401 WHR, 6401 Security Boulevard, Baltimore, Maryland 21235. Your appeal must be postmarked or electronically transmitted to [FOIA.Public.Liaison@ssa.gov](mailto:FOIA.Public.Liaison@ssa.gov) within 90 days of the date of our response to your initial request. Please mark the envelope or subject line with “Freedom of Information Appeal.”

Sincerely,

Monica Chyn  
Acting Freedom of Information Act Officer

Enclosure

## **Strengthening the SES Bench Survey**

Executive Summary and Frequency Report

March 2015

**Report Preparation:** (b) (6)

**Transition Team Member Document—Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

**Note: In the comments in Tab A, individuals' names have been redacted where "xxxxx" is shown.**

# **Executive Summary**

## **Background**

The Office of Retirement and Disability Policy (ORDP) requested the assistance of the Office of Measurement, Evaluation, and Community Outreach (OMECO) to conduct an online survey of SES-eligible SSA employees nationwide. The survey collected feedback about barriers employees experience or perceive about filing for SES positions, particularly the SES Candidate Development Program (CDP).

ORDP sent a survey invitation to SES eligible employees (GS-14s and above as well as GS-13s who have completed a one-year temporary promotion at the GS-14 level). The survey was open from February 11 to February 27. There were 1,624 responses to the survey.

## **Goals and Objectives**

The purpose of the online survey was to:

- Strengthen the SES Bench
- Prepare for succession management
- Identify challenges to SES selection
- Identify employee perceptions of the CDP

## **Findings**

The Strengthening the SES Bench Survey asked respondents to express their concerns about filing for the SES CDP.

### **Demographics**

The survey responses included 1,557 respondents who said they did not apply for the most recent SES CDP. Most of the respondents were at the GS-14 level (72.8%) and most (75.0%) said they hold a supervisory or management position currently.

About 47.1% of respondents said they have worked at SSA for 21 or more years. Another 34.7% said they worked at SSA for 11-20 years.

Field employees accounted for 33.8% of respondents (DCO field and HQ employees totaled 39.5% of the responses). DCS and DCDAR represented 14.0% and 12.8% of responses respectively.

Survey respondents were 54.6% female.

White employees represented 70.3% of the respondents and 91.0% were non-Hispanic. Bachelor or Graduate degrees were held by 86.4% of respondents.

### **Issues and Concerns**

When asked how familiar they were with the SES CDP, 21.3% said they were very familiar with it and 63.6% said they were somewhat familiar with it.

When asked if an SES member had ever explained the SES to them, 33.8% said they had. In addition, 34.7% said that an SES member had told them to consider filing for the CDP or an SES position. In contrast, 8.0% said they had been discouraged to apply for the CDP or an SES position.

When asked if they had ever applied for an SES CDP or an SES position, 8.6% of respondents said they had. When asked if they plan to apply at some point in the future, 17.1% said they would. Another 50.6% said they were not sure if they would ever apply, while 32.2% said they would not.

Respondents were provided a list of 17 possible issues that could affect their decisions to not apply for the most recent CDP and asked to rate them on a 5-point scale of influence. The most influential factors identified (as measured by the mean score) were work/life balance concerns (mean score 2.55), the mobility requirement (mean score 2.53), and being happy in their current role at SSA (mean score 2.25).

An open-ended question asked for other reasons they did not apply for the last SES CDP. Respondents did not limit their reasons to issues other than the 17 previously listed, but they did provide much more detail. The 794 verbatim responses were categorized and sorted into 23 unique categories and an “Other” category. The most frequently occurring category, with a frequency of 13.7%, is called “Poor Impressions.” Respondents were very open about their very negative impressions of the program. The other most frequently cited categories were “Age/Near Retirement” (11.1%) and “Selection Bias” (10.5%).

A final question asked respondents for anything else they would like to say about why they did not apply. The 412 responses were similar to the question above, but the frequency of occurrence of the categories was different. There were 14 unique categories and an “Other” category. In this question, the most frequent responses were Work/Life Balance (12.4%), Mobility (11.7%), Lack of Information (11.2%), and Poor Impressions (10.0%).

This survey indicates that negative opinions about the SES program are common. Work needs to be done to create a better impression of the process and position. In particular, we recommend:

- Educating employees about the SES program
- Improving impressions of the SES Bench
- Improving impressions of the SES CDP selection process.

All responses to the open-ended questions in the survey are provided in Tab A. The data is categorized and presented verbatim so that no bias is introduced to their answers.

What other issues, if any, influence your decision to not apply for the most recent SES CDP or a future SES CDP?

Response
<i>Poor Impressions</i>
changing internal environment
Current leadership landscape too uncertain
impact of budget constraints on ability to achieve expectations
current direction agency is headed
Distrust of SSA's current leadership
I prefer to deal with reality; must tell the emperor when he has no clothes.
ambitious, back-stabbing, climb to the toppers
An SES position should be encouraged to take risk to make operations better not be so concerned that a risk could cost them their career.
Appears that you have to be a sycophant to be recommended
Arriving at this Agency 15 yrs ago, I was excited about going as far as I could go, including SES. But several unexplained experiences from decisions, actions, or statements by SESers have caused me to question whether I want to assume the character.
At SSA, SES members are the problem, not the solution.
Attitudes & behavior of current CDP in my component.
Based on past selections to the program, it does not appear to be based on knowledge, qualifications, or experience
Caliber of SSA SES corps is not inspiring
concern about ability to work effectively with other SES execs who do not want to hear differing opinions
concern about current SES execs appearance of lack of focus on mission and more focus on ego
concern about the current SES core's level of leadership/competence
Credibility of SES selection process based on selection of some current SESers
Current SES staff say program is not working well, and they cannot recommend it.
Current SESer complain about restrictions
Current SESers are poor leaders/behavior does not garner respect
Current SESers in our Region aren't role models I would care to follow
Discouraged by current caliber of SES corps.
Do not believe the agency wants people who will positively change things, they want "yes men"
Do not want to sell my soul to SSA

Doesn't appear to be based on competence
Don't believe in the system and selection process
have heard many SES members complain, but none praise, the SES experience
I do not respect the SES executives that run my component. They disrespect current processes and do not take the time to learn how we do business before making radical changes. I do not want to work the way they work.
I do not think SSA senior leaders are leading the agency in a good direction and I would not want to be forced to emulate them.
I find a lack of integrity to subordinate mgrs, by telling them to hold others accountable, but not supporting them when there is a formal challenge. I back my supervisors, and SESers don't.
I find that many of the SES don't take their position serious
I have little respect for many of the SESers I've dealt with.
I see the environment in which the SES function, it is dysfunctional and cronyism is rampant.
lack of confidence in current management to make fair selections
Lack of confidence in current SSA leadership on all levels
lack of executive level leadership demonstrated
Lack of professionalism among executives
Lack of respect for and observed bad behavior of some existing Execs.
Lack of strong role models among agency SES
Many SES employees seem harried and unhappy
Many, but not all, SES executives that I am familiar with are more concerned with their own advancement than service delivery. I want to make a real difference in the lives of the people we serve, not personally gain from service.
My experience with SES corp
Not pleased with the way SESers see themselves
Of the SESers I have worked with, I find that the SES standards motivate SESers to act primarily from self-promotion and not really care about how their decisions impact subordinate mgrs - many hours are devoted to enhance SES profile, but no benefit.
Past Selections
Personal experiences w mgmt./SES personnel
Privileged demeanor of some current SES members
Concerns about predictable and consistent expectations from the top
External mandates coming to the agency have caused Executive Management to say "yes" to everything and not take a close look at what is right and how to best manage the workload within SSA
having to work closely with political appointees
Lack of focus on the real needs & work of the agency
Lack of follow-up of those in the position

lack of good role models
Lack of partnership/cooperation from other SESrs
Limited confidence in current executive team.
many SES are smart but little leadership experience
My current SES/xxxxx has told us that he takes no interest in the work my staff performs. Therefore, we do not feel that he would supporting any of us for whatever developmental program we would apply, as it would require effort on his part.
Not persuaded true diversity is valued and respected
Numerous conversations among peers, the consensus is, in the beginning we were eager to get into a GS-15 or SES, however after a few years in middle management, there is no longer an interest in SES. The leadership environment is not collaborative.
Perception
Recent SES reassignments/retirements etc. seem to indicate a culture of tension within the agency. The culture does not seem positive or productive.
Seeing some of the candidates that are selected - they may appear to be effective from above, but as their subordinate I feel they are not good leaders
SES cadre are not people I want to work with.
SES infighting / politics is discouraging
SES position has become more focused on saving their job than ensuring the right thing is done for the agency/people they serve.
SES put their own career advancement above all else.
SES role is like a concierge, not a leader.
SES staff seem to be more interested in advancing themselves rather than the agency
SES/Management usually turns out to be adult babysitting.
SESers appear to function as managers not as leaders with vision
SESers too steeped in maintaining the status quo
Several poor quality SES give the position a bad reputation; particularly when it comes to dishonesty
some current SES employees are barely competent
Some in the SES program aren't very good managers - seems like when some fail technical roles - they try the management ladder leading to SES
SSA current direction
SSA current management
SSA does not have a very good succession plan.
SSA SES members are not impressive, or even competent.
SSA's SES culture
Tainted perspective of SES- focus on individual goals and not those benefitting the entire agency

Talent level of many SES selections of the past few years seems marginal. Not a group I aspire to belong to.
The behavior of some current SES
The manner in which the most recent SES program was shared on the all Managers call was very discouraging for many. The perceived negatives were mostly shared and none of the positives of being selected for the program.
The process has been explained by others as overly cumbersome
The quality of SSA's management is not known to be the best in the federal government.
The SES candidates are only interested in getting permanent positions. They do not focus on core work. I do not want to be peers with people who are so focused on their own egos, positions, and status.
The SES program forces non-supervisory GS grade employees to write SESers' achievements. SESers forcible take others work as their own. SES management cannot stand on its own successes; they are elevated on the backs of lower grades.
The SES program punishes those by forcing them to accept an antiquated management doctrine which is then exhibited upon the body of employees who they manage. Your practices and styles are outdated and not in par with industry standards.
to demoralized by SES in ORD
too jaded by the process
too many SESers are idle
Tremendous lack of control at the executive level, very little actual authority to make decisions
untrustworthiness required for success
viewing other non-substantive SES Leaders
Workloads within the agency have gotten unmanageable because of Executive Managements' inability to push back based on appropriate prioritization, so executive management is being held accountable to deliver without a balance of staff to support the work
seems like unable to say no or to disagree and be true to yourself
SES executives not held accountable for poor results
The expectation to need to be a GS-15 first, at least at SSA HQ.
There are too many executives now
Too many supervisor lack business knowledge, and technology skills to understand who is good.
too much change all the time
Too removed from real work.
was told if not selected for SES after completing development program would be fired
do not respect senior leadership
Don't respect a lot of the SES people
Have little respect for SES process
lack of respect for how it's administered at SSA

lack of respect for those in SES positions
<i>Age/Near Retirement</i>
Age
Age
Age
Age
Age
Age
Age (37) + work/life balance; I feel I still have enough time to do this in the future; no rush but preparing for it.
Age (61) and health
age and years to retirement
Current age
my age
my age
My relatively advanced age
42 years of employment looking to retirement
44 years with SSA
About to retire
Approaching Retirement
Close to end of career.
Close to retirement
Close to retirement
close to retirement
Close to retirement
close to retirement
considering retirement
Currently close to retirement
Expect to retire in 2015

expect to retire within next couple of years
I am approaching retirement age
I am in my 39th year of service
I am less than 5 years from retirement.
I am nearly 65 and anticipate retiring within the next 2 years.
I am now to close to retirement to consider
I am planning to retire next year
I am retirement age- not worth it at this point
I am retirement eligible and I believe that fact can influence the selection process.
I am retiring at the end of the year
I am retiring soon
I am retiring within a year
I expect to retire within the next 6 years.
I plan to retire this year.
I'm probably going to retire in a year or two.
I'm within 2 years of retirement

Retiring relatively soon
To close to retirement
Too close to retirement
too close to retirement
too close to retirement
Too close to retirement
too close to retirement by the time I found out about it
Too late in career, past retirement age
Too late in my career to participate.
too near retirement
Very close to retirement
will be retiring
Will retire soon
will retire soon
will retire this year
Will retire within next 2 years
will retired in a couple of years
my next career goal is retirement

Not learning the ins and outs of SES & application process until I was almost in my retirement years
Opportunity coming too late in career
time left in career
not sure how much longer I will work before I retire
<i>Selection Bias</i>
Age appears to be a deterrent
Not enough younger GS 15's to the program
age bias in selection process
Age discrimination
Age discrimination
Ageism
focus on youth for hiring and promotions
only 1 or 2 candidates over 50 selected
When I applied before, the XO pulled me aside and told me that because I had too many years of service and could retire soon, I would not be considered. So even though I had all the points needed, I was not selected to be in the program.
I have been in my position for nearly 10 years. I have managed Executive Oversight projects at SSA and other large-scale projects. I am told how knowledgeable I am, but I cannot break through to the next level. I have no doubt that my age factors in.
Race
Race -- geared towards Caucasians; the lack of diversity and inclusion of Asian representation in the program is glaringly offensive and disappointing
lack of Hispanic SES women in top positions
I'm an ethnic minority and do not believe I will receive a fair chance
Entrance into the program is quite frequently based on the applicants' "associations" and not "qualifications." Although this has been rampant in ODAR, I hear it definitely happens in other DC components as well.
I have applied for 11 vacancies in the past year and only interviewed for 2 jobs-both were selections of friends, personal relationships--all vacancies should be selected by outside contractors to avoid cronyism
Optics: There is the sense that optics dictates selection regardless of merit.
Agency only seems to be selecting diverse candidates
appearance candidates are pre-selected
Appearance of favoritism
Appears they are looking for specific individuals
As with the findings of the recent MSPB report, preselection/favorites is prevalent

Best candidate not always picked
Candidates seem preselected
CDP selections seem to have bias on specific factors
Component candidate recommendations seem to be rooted in favoritism
Cronyism
Culture of nepotism
Ambiguity and inconsistency in the certification process. Those that are favored or well liked seem to receive priority certification and assistance and those that are just as deserving but not in the limelight are left to their own devices.
Current management team has pre-determined who will and will not be included based upon friendships and relationships
executives currently grooming people they want to promote to SES/Executive positions, non-competitive informal process which dominates over the competitive one
Extreme Favoritism at SSA
favor certain people
Favoritism
Favoritism
favoritism from AC and DC
History of questionable selections for prior CDP classes
HR should seek out high performers, supervisory endorsements are too political
I do not think the program is especially interested in an aging, white, Jewish male.
I think the Assessment Center is biased.
it seems to be pre-selected
Not a member of the "executive clique"
Not on the most favored list of current SESers
Not sure applicants are selected on abilities
Perceived preselections already made
Pre-selection
Preselections
Seems biased
seems too much 'in-breeding'
Selection criterion is not based upon merit
selection process fairness

Selection process is not objective
selection process political
Selection seem weight to certain individuals.
selections process not fair
SESCDP favors candidates on the East coast as more opportunities are located in that area.
subjective selection criteria
Fairness
Have seen a lot of cronyism.
i am white male and therefore not eligible based on not being politically connected
I don't believe that the best candidates are selected
I was indirectly told that they are not interested in hiring white males
In my organization, I do not feel that choices to promote people to management positions are done based of the best qualified candidate, but more for internal political reasons.
It appears that most executives already choose who they want to put forward in the program. then they move that person forward by bringing them up to the 9th floor to do briefings so they can get the face time. Being afforded the opportunity is not equal.
It is not open to people who do not come from a field office
Leadership had already picked their favorite
Leadership qualities are not used to identify candidates, cronyism, and personality supersede courage and strategic thinking. Lack of courage hides under the guise of political savvy
Management already knows who they want for those positions; no sense applying if you're not one of the people they are encouraging to apply.
Management selects who they want to participate
Many "appear" to be pre-selected based on their sponsorship.
Not convinced it is really an open opportunity. It seems like some folks are "sponsored" and then are selected. I have been told that they also receive help with the application process. So there seems to be a lack of fair and open competition.
Perceived extreme unlikelihood of being selected
prejudice against people with experience
I am smart enough and a good leader, but I lack political savvy - I think this agency looks for yes people and shies away from those who are honest and state things as they see them
Perception that agency/COSS does not look favorably/value DCS employees
questionable current selectees qualifications
Seems geared towards people who are ALREADY in a management position, and as a result, non-management candidates, who are interested in applying but lack prior management/supervisory experience, have no chance. So, in essence, it is very unfair.
Too many younger, more "favored" candidates

Too much emphasis on diversity in selections
Upper Management plays favorites
my agency does not promote based on quality of work
SES collaboration
Generational differences between selecting officials and myself
<i>Work/Life Balance</i>
uncertainty of assignments and having to change jobs/locations based on needs of program would have a negative impact on my family/children
Late in my career, sacrifice away from family not worth it for CDP
Spouse also career track oriented - need to account for her professional development when applying for positions
spouse disabled/can't have unpredictable schedule
Taking care of ill parent
The need to take care of a disabled child does not permit me to be away from home for extended periods of time. Absent that factor, I would have applied.
Understanding that you can be placed anywhere in the country as needed - family first - important consideration
Very interested in the remote training at Harvard, etc...just can't leave my children.
Working spouse.
4 very, very ill parents that required my time for caregiving; however, sadly the death of two of the ill parents make me hope that it is not too late to consider future SES.
Aged parents have increased needs
being away from family for four week training
Cannot be separated from children during CDP assignments
Care of my children
caring for a critically ill family member
CDP not family friendly
Elder care
Eldercare
Family
Family
Family
family life - young children

Family responsibilities
family/home constraints and obligations
Have elderly parent and mentally challenged sister that i am responsible for
Have young children and want to be home
having 2 young children
i have a child at home who needs me daily
I have an 11th grader
I have an 8th grader
I want to wait until my children are grown
I'm a single parent with sole responsibility over my son. The time/location to where I am must be placed has to allow me to drop/pick him up timely. I do not see this as feasible under the program.
Impact on family with children still in school
My family comes first, i devote enough time to work. Can't commit any more time.
My family situation is not highly mobile due to having school aged children
New family
Previous years, 1 mo away from family. i have a toddler. if i could bring him and place in daycare, my interest would greatly increase
Recent changes to family life (young children at home)
Requirement to spend as much as 6-months away from family during CDP rotation
Requirements to travel to other locations for assignments. I have a young family and that does not work for me.
residential training program after selection would be burden on family
School age children.
SES does not appear to be family-friendly; very demanding; assumed to be long hours - on call 24-7
Single parent
Single parent with teenage daughter and do not have family close by to help with her care since you have to be mobile during program
small children at home
Young children
Young Children
Young children
Young Children - want stability for them
Young children at home

Young children at home; absence would create hardship on family
Young kids
husband's work schedule
Leaving Family for A Year would be tough
Minor child and husband at home
Need for flexibility; such as situational telework for SES. I have very young children and no support network, so all delays, sick days, etc...fall on me.
not family friendly
Work/life balance
Work/Life balance
work/life balance
Work/life balance
Work/Life balance concern
I do not think SES executives are allowed to have work/life balance. The executive who claim to have a work/life balance are probably people who enjoy working nights and weekends, rather than having personal time.
It appears one's entire life is consumed by work, including evenings and weekends.
It's referenced above, but work/life balance and family responsibilities are a key reason that I'm not interested. Our RC travels frequently and that would not work for me on a long-term basis.
SES needs outweigh own personal needs
The inability for SES to work credit hours; affects work/life balance
local family responsibilities
<i><b>Mobility</b></i>
All positions are in very large metropolitan areas. no interest in living in a large metro area
Although lengthy travel is not an issue, it is important that I remain stationed in my current city
always have to be in a metropolitan area
Concrete, buses, taxis, lack of green grass, fresh air, mountains...
Location
moving to Baltimore for an extended period
SES positions are all in large metro areas with expensive housing
Unknown locations

Will there be SES vacancies in my region?
Rarely move SESers to other agencies
type of position avail/ what components
Being transferred to another State without employees agreement
assignments other than home area
Do not want to live in a metro area.
Don't want to live where SES positions available
Geographic location of SES positions
no control over location or placement
Ability to remain in current location
being required to move with 3 days notice for an SES position
changing assignments during developmental program and possibility of having to work in a different location (geographically)
Geographic mobility
I am interested in the SES CDP, however, as a single mom, I do not have the flexibility to complete assignments and/or relocate outside of my current work location.
I am not able to move for a job.
I do not want to have to move.
Inability to leave the area due to spouse's job
My spouse works as a manager in local government and is not mobile. I am unwilling to live separately for career advancement.
My wife has a career so I cannot agree to be mobile
need to move
not looking to relocate for a job
Potential mobility issues related to spouse's job
Probably have to move
Relocation
Relocation
Relocation
Relocation to Baltimore
required detail out of state
required extreme mobility

required to move to Baltimore
required travel
Requirement to be mobile
Requirement to be mobile at this time, since child is in the last two years of high school.
Requirement to work in Central Office
The fact that you can be placed anywhere in the country and have no choices
The requirement to do a rotation in another region.
There are few regional SES positions and only 2 or 3 planned in the future for any of our regional offices. I'm not interested in moving or going to Baltimore. I can influence activities at the local level in my current position.
To be mobile
TRAVEL
Travel
Travel and little information available about exactly what this entails, especially AFTER the CDP
lack of mobility outside state due to small children
Mobility
Mobility - I have 2 special needs children and a support system in place which makes me immobile. Without the mobility requirement, I am extremely interested.
mobility in selecting assignments
mobility is issue #1; I have a disabled spouse and I cannot stay overnight at training sites or move to other locations
Mobility/location uncertainty for execs who may not be as mobile due to various reasons
physical disability-need for new personal assistant in HQ, finding doctors in Baltimore area , accessible housing
month-long training in Boston
must be away from home for extremely long periods of time
must take field assignment
Virtual assignments would be critical.
Virtual participation
requirement for long term training assignments outside of commuting area
Requirements to complete long term assignments outside of normal commuting area
<i>Lack of Information</i>
Inadequate Guidance

Lack of guidance to participate
lack of information
lack of information about program or posting
Lack of information about the process/position
Lack of information on the ability to apply to be stationed in a particular area
Lack of information.
Lack of knowledge of program requirements.
lack of knowledge of the program
do not understand the program/process
Don't understand it.
Field persons in smaller cities have less information and opportunities to gain knowledge from experienced persons
FO management is not notified timely of the SESCDP to apply and secure the required recommendation/documentation.
I don't know about the program or its benefits to me or the Agency
I don't know much about it or why it would benefit me.
I improved marketing having information sessions to clear up some concerns and expectations of the program
Insufficient information from management
It would be more appealing if there was some idea of what positions might be available upon completion of the program.
lack of explanation about process
Lack of leadership motivating employees to apply
Lack of leadership promoting SES CDP
Lack of managers advocating SES CDP
Lack of performance discussion from management
no interaction w/ SES ees
No one has ever explained the requirements
No opportunity to discuss with current SES
Not aware generally
not aware if applicable to me
Not enough information about the program to make a decision
Not knowing about selection criteria

Not really understanding the application process.
requirements have never been communicated to me
SES discussion should be included in the PACS discussion for all GS 14 - 15
To my knowledge no one has specifically gone in to details concerning the SEP CDP process and responsibilities
Very little knowledge of the program or process
Missed the announcement
Notice of openings
I was not aware of this program until now
Also I think the current SES personnel could meet with their staff to explain the parts of the job and paint a good picture of what the SES job does for the Agency
Did not even know about it
Did not know about it
Did not know about it, so none of these apply.
Was not aware of position
Was not aware of posting
I was unaware of the solicitation for applicants
Lack of information from Management
<i>Process</i>
Interview process is flawed and unnecessary
Interview Process is intimidating
Application process overly burdensome
Conversations regarding the application process with leadership
current work and priorities hinders ability to devote enough/appropriate time to application
Day long assessment center
Have applied for CDP before twice. I am not interested in repeating rigorous Assessment Center exercise again.
Candidates are not supported during process.
unrealistic performance expectations as it relates to ratings
interview process
Believe I could do an SES job without going through the program

Documented Executive level experience in the private sector should be enough to certify someone for SES
The process is not merit-based. Too much emphasis on "political acumen" and little emphasis on other executive competencies.
Extensive selection process
DC scoring process
Easier to change agencies and get a 15 than go through SES Program
Lack of understanding of financial management by Leadership
Lack of vision by SES personnel during prior SES interview process (which I interpreted to be the way that they want SES members to think)
Not being part of a development program
Obstruction from Office of Executive Services
Private sector experience is discounted
Process
process is all about who you know and therefore to political
process not based on merit
process within component is rigged
Public Financial Disclosure reporting requirements
ridiculous requirements
Selection Process
Selection Process
Selection process/who makes the decision to select
Selections
The CDP program places too little emphasis on peer review for candidate qualification. The current process over emphasizes requirements of time in service, superior evaluation, specialty examinations for candidate qualification.
too much weight placed on a subjective assessment center as opposed to the applicant's real life demonstrated leadership
unknown selection process
Other Federal Agencies Appoint Individuals to SES
unknown mentorship
Way too much paper work to complete for very limited number of positions- let me get selected first then require that.
CDP not engaging/innovating
CDP not flexible
CDP was not shared as an option

Hard to find time to do good job on application
too long of a program
Provide support and guidance to executives for agency new initiatives in mobility, resiliency, unified communication and automation.
<i>Not Worth It</i>
Ability to work from an alternative duty station
ADS
Not able to work comp/credit
Telework availability
Don't like the fact that you lose the right to earn credit hours and are expected to work 24/7
no work from home opportunities that make it enticing.
Expectation of 24/7 work
Expectation that SES would add to my work hours but not much difference in pay.
long work hours
Fewer civil service protections.
Flexibility
not interested in having a 24/7 job, not worth the time taken away from personal life
As a GS-15, there is no additional compensation for going into the CDP while GS-14's get promoted to a GS-15 while in the program
Because of issue #1, the minimal pay increase is almost laughable.
Noting enticing about working myself to death.
Does not seem rewarding
I'm a grad of the SSA Advanced Leadership Program. Had sufficient exposure to the demands of SES to know I don't want it. Not enough \$\$ for the add'l responsibility/time.
insufficient incentive
Lack of Job Protection/Increased Vulnerability to Political Attack is a critical issue late in your career
more pain than gain
My current salary is commensurate with many SES positions, so my interest in about personal and professional growth. I am not currently persuaded entry into the SES CDP would satisfy that interest.
Not worth the headaches
Program Expects much and returns little compared to a GS-15
Rewards not worth effort

SES I know express concern that they were more influential before SES
Several current SES tell me that pay increase is not much but work increase is
So many meetings!
The increased responsibility and accountability does not seem to match the benefit.
The increased scrutiny of your assignments and decisions seems overly burdensome.
There are a lack of protections for discrimination complaints for the accused. As a manager, I am deeply concerned that an allegation can be made against me that would have a profound negative impact on me and my family. This concern deepens as an SESer
There is too much responsibility for average level of reward
Expectations
SES responsibilities are not always accompanied by the authority necessary to carry out those responsibilities.
I would never adhere to the unwritten dress code!
Pay
Pay/benefits not adequate
In my geographical area, the pay differential between GS 14 and SES is not proportionate to the added responsibilities.
Not enough pay for the responsibility
Don't want to take on the stress of that position.
Stress
stress level of current SES
Fear of the "Unknown"
lack of consistent, nationwide employment and personal protections for gay and lesbian persons, coupled with the requirement to be fungible, make the SES a frightening prospect
<i>Political Environment</i>
Current Political climate
Being SES means you have to become overly "political" (in terms of internal, organizational politics) and, to some extent, have to trade away at least some integrity in the process of satisfying the higher-ups. I'm just not willing to do that.
Changes in administration and influence on executive level politics
Do not like agency politics
Heavy involvement in political motivations instead of doing the right thing
High level of office politics at SES level
Highly Political Environment

Negative political environment at SES level
Not interested in playing politics at such a high level
Not interested in politics
Political
Political
Political association of SES positions
Political Factors
political posturing of SES CDP candidates
Political Process
Political selection process
politicization of federal employees, and in particular SES
Politics
Politics
Politics
politics involved
politics involved in developing and archiving strategic goals
Politics of the ERB selection process
Politics: The DCs already know who they are going to select, so why bother anymore.
SES position has become too politically controlled.
SSA politicization
The politics-driven decision making
Too many political issues I personally like to stay out of between components
Too much politics negatively impacts progress
Too Political
Too political
too political
Too political; too much seems to do with who likes you or if you are in the in group
dissatisfaction with the political nature of the agency
I have seen too many SESers fall out of favor and lose positions due to politics/whims of those in power

Inability to affect and lead true change within the agency
Inability to effectuate change, regardless of position
Lack of camaraderie at SES level
Lack of interest in dealing with the political realities at the highest levels of our organization.
Not pleased and often do not agree with current leadership and their practices and priorities from the top (i.e. COSS) down so don't want to be included in it, wouldn't fit in well
<i>Management Support</i>
current supervisor not supportive in any way
Do not believe my previous supervisor was fair or impartial. He would not have supported me and did not support me giving me the lowest rating I have ever received.
If management wanted me to apply they would have asked me to do so.
Influence - is anyone encouraging me as potential?
Lack of management support -- which, in turn, is often, the result of unconscious bias
Lack of support
Lack of upper management support
My previous supervisor did not complete my PACS until December 2015, the day before I started a two week vacation. He is supposed to be considering changing my PACS, since January 2015, but I have not received any information.
No sponsor.
Requirement that DCDAR recommend or concur.
SES CDP application requires an executive recommendation, but most FO management are too far removed from executives to request a recommendation.
uncertain of mgmt support
Uncertain of Support at Headquarters Level
unknown position of recommending officials
Senior leadership is not always honest with GS 15 managers. One executive encouraged me to apply and the other discouraged me to apply
The SES CDP is not encouraged or promoted from management.
general lack of mentorship in my office
Guidance
no support from component leaders
No support from local mgmt.

No support from Mgmt
Past Supervisor REFUSED to support me in development opportunities
Lack of understanding value of CPA to financial and operations management
Management de-values employees with experience, skills and actual substantive knowledge of social security laws, rules and regulations.
Support
bad prior relationships with management
Management Support
Management support
I was a Supervisor but I did not get my managers support while in the position so I stepped aside.
<i>Unlikely to be Selected</i>
Regional candidate already identified
Don't feel I have a managerial temperament or skills
don't schmooze well
not sure if i fit in as an SESer
SES folks I admire have calmer temperaments than I do.
unable to make decisions
I have successfully led several agency efforts resulting in my direct report executives receiving high SES scores- -I can't even get an interview when I score high on the BQ list
lack of experience in ECQs
Experience
I'm not sure that I would have a fair shot at being selected given that I am a GS-14. I understand it's not impossible to be selected, but it seems like a longshot.
Extremely unlikely to be selected
I am not treated as a valuable employee now.
I do not think that SSA agency leadership is looking for SES candidates like me.
I filed for the Advanced Leadership program in 2012 and got through to be interviewed and due to budget constraints, the program was cancelled. I applied again in 2014 (with two additional years of experience) and didn't make it through to be interviewed.
I have thought of applying to a CDP, but as a Technical 14, I feel I would not be selected due to lack of SSA management experience at the 14 level.
If I cannot get a 15 where they know and appreciate me, how am I going to advance elsewhere?
Inequitable treatment demonstrates that applying would be futile

lack of networking skills in the government I feel would hold me back
Lack of SES positions in my current geographical location
lack of SES positions in Region where live, especially in component
My AC told me she would support me if I applied in the ALP which came out at the same time. Ultimately the results were not positive.
My prior supervisor relationship with a key SESer would have resulted in me not being considered so I did not waste my time.
Not enough experience in my view outside of Systems; feel I need to be more well-rounded first
Recently had temp GS 15 position which was not extended (due to ratios??), very disheartening
unsure if prior experiences qualify me for CDP
<i>Pathing</i>
It appears difficult for those who are not in a supervisory position to be selected for SES, even if they have management experience outside of their SSA career. A path for those not in supervisory positions but qualified would help.
I lack a supervisor job at SSA; however, in previous jobs have led up to 16 employees with success
Lack of leadership dev opportunities to set the stage for SES
need more experiences to enhance application
no established venture for dialoguing with current SESer about the process
No Technical path
No technical track in SES
Career preparation. I believe that a track towards SES should be established. SES seems to be a big secret until the moment the application process is presented and then you get an overview. Mentorship, training, and supplemented education s/b provided
for an attorney, very little opportunities exist
GS 14's are not really considered unless they worked in the Field Offices for several years. It just appears that HQ GS 14's have a harder time getting into the program.
Lack of training
little supervisory experience at the time
need exec training classes
Not sure if expectations require supervisory responsibilities, more interested in Research and Development of Predictive Analytics efforts to combat fraud.
ODAR attorneys do not get the budget experience required. This shuts many good applicants out of the process.
Not given opportunities to excel at Executive Level
Wish to retain my highly technical expertise as well as become an SESer.
If someone is interested in the program, it would be nice to have some training available to develop yourself

towards the goal.
My current position is demanding and stressful and doesn't allow time for training, education, etc. It seems that this Agency just seems to expect you to "get it" from years of trial and error. There should be established tracks. I'm a technical resource not management, therefore, it seems SES doesn't apply to me. But, I would be interested in pursuing higher levels in my career if it is offered for technical resources.
<i>Timing</i>
Asked to help with continuity during middle and upper-management changes.
Closing out the "NSC Project"
Completing the current enterprise telephony projects on-time and under budget.
Current commitment to new data center project.
Very happy with current leadership training opportunities that I have been provided recently.
I was already involved in a leadership development program at the time the CDP was offered. I wanted to finish my current program before trying for the CDP.
I was on military duty for most of the application period and DCHR refused to extend it so that I could get all of the required documents, specifically the SES endorsements. I had an RC willing to do the endorsement, but there was not enough time.
i was personally extremely busy at the time of the opening and did not have the time to complete application.
no one else to take my current role to allow training and time commitment
Timing
Timing
Timing not right last time
Wasn't eligible (time in grade)
Will probably apply next time
Would love to do SES had I come into government earlier in my career rather than later. Unfortunately, I don't foresee having adequate career time left for SES development and subsequent placement. This I regret. A shorter-term opportunity would be great.
My experience did not meet the criteria at that time.
lack of time in current
Additional time needed at GS-14 level
Felt I needed to go through the ALP first
<i>Placement</i>
Position changes that appear as punishment
frequent changes in assignments

Changing Leadership
Constant changes of leadership in these positions
Constant movement of SES positions at SSA
Disenchanted with constant changes and movement of Executives.
Number of yrs that current CDP candidates are eligible for placement, but are not placed in permanent positions.
Worried about SES CDP placement and was it a fit for my skillset or capacity
I do not believe in your method of imparting functional and applicable management practices by moving people to other agencies. You create a false sense of security for management practices as a "well-rounded" manager.
I have known of folks that had to leave the agency to get a position after completing the program
Several individuals from former CDP classes remain in acting SES roles. They receive all the responsibilities and duties of an SES, but none of the benefits. They are remanded to GS-15 pay, parking, and privilege.
Some SES land in positions they are not interested in
agency philosophy of executive fungibility and lack of regard for value of knowledge and technical expertise
I do not agree with moving SE to components where the SE lacks expertise
No idea of where you will end up after program
SES can be pulled or put elsewhere with little regard for the time invested in current assignment
<i>New Job</i>
New manager
new to present job
Came into federal service too late in my career
I was new to my component
ONLY BEEN HERE FOR 3 MOS
Recent Promotion...it would be wrong to leave so soon
Recently acquired new responsibilities and would like to learn them
Recently promoted to current position (less than 3 years)
Was brand new to OEST and did not think new managers could, in good faith, recommend me without yet knowing me very well
I have been in my current position since October 2014.
I was promoted into current position in the last 6 months
I was recently promoted to a new position during the last solicitation for the CDP and did not feel the time was right.
I would like to wait another year due to new position just acquired

<i>Mentorship</i>
lack of mentor
Lack of Mentor
Lack of Mentor for current position
Lack of mentor program to learn about process, prepare, develop skills etc.
lack of mentorship or support
lack of strong mentors
Mentor
Mentor choices
Mentor program is a poor idea, most not competent
Mentoring
Enhanced Mentorship
Need mentoring in our component
<i>Not Interested</i>
no interest
no interest at all
Not interested
Not interested
Not interested
Not interested in applying.
not interested in managing an org other than systems
No longer feeling the ability to be a cheerleader for the agency or suggest people work here
Not tolerance for the verbal diarrhea
no desire to be a leader in the agency as it is now
I do not want to go back to managing people.
I want to stay in OGC.

### *Time Involved*

I do not want a job that requires that much of my time.

I was extremely busy with the affairs of my office at the time of the solicitation.

insufficient time to apply

Not enough time to put an application together

Time

Time away from family for Harvard training and regional rotation.

time commitment

Uncertainty about the length of time I would be located away from my family while I was going through the program.

current workload makes it hard to find time to apply

demands of my current position are overwhelming - time factor

Current workload

### *Like My Job*

Decision not to apply has mostly been related to staying with chosen career path

Happy with current role

I have project commitments I feel obligated to see through

I like really knowing the work that I do. So many at the highest levels seem clueless.

Involved in a project that i feel responsible for - do not want to abandon it until it is complete

prefer a Technical role, not Management

Wanted to invest more time in current organization, which is very new.

current goals and initiatives I am involved in; would not have time to do work on them if I get on the SES CDP

I only want to work in tech positions.

### *Education*

degree qualifications

Is a college degree required

Lack of a Degree/education

lack of formal degree
My Highest Education Level
No Advanced Degree
Only have bachelor's degree, many have master's or JDs
I do not have a college degree
<i>Competition</i>
limited number of SES positions within the agency where I currently reside
Management competition
Many of the individuals selected are very ambitious. It is more important to me to perform well in my current position than trying to build a resume for my next assignment.
Only very few get selected for the program.
Ratio of applicants to selections
small pool of applicants selected
Too few allocations for my component.
willingness of Management to reach out to a select few and not all
<i>Health Issues</i>
lack of success re others I know w disabilities similar to mine who participated in LDPs over the years
health concerns
Health Issues
Health issues
I have serious health problems.
my disability
now having health issues
<i>Not Eligible</i>
New in GS14 position

Recent promotion to GS14. Wanted to have one year of experience at this level.
not eligible at the time
not eligible at time it was open
Not eligible the last time
Not ready yet, only 6 months in GS-14 position.
Not sure I was eligible for last advertised CDP.
<i>Other</i>
1811's don't appear to get selected very often
Did know about the program
Did not acquire and submit an executive reference statement.
I am passionate about our mission at SSA. Not interested in working for another agency.
Demographics
I did not apply for SES, but did apply for ALP. If SES application was similar to ALP, there is no way to describe your abilities with the limited space given on the application.
morale of SSA employees
My greatest talents are research and writing.
Opportunities
spiritual beliefs
Too tired
insufficient staff resources to meet expectations
I am acting in an SES position, and hope to compete for it.

Please tell us if there is anything else you would like us to know about why you don't apply for the CDP or SES positions.

**Response**

*Work/Life Balance*

At one time the SES factored into my career goals, however I NOW value and enjoy my home life and will not sacrifice soccer practices, soccer games, lacrosse games and other family functions for the benefit of ANY employer.

At this point I am not ready as I have small children. but from what I do see, I would be a concerned a bit as I hear that SES applicants are 'handpicked' (preselection)

At this point in my life I have 4 school age children in high school or college. The thought of having to be move at any time is not very unsettling to my spouse. I am interested in virtual assignments.

Being away from the family for an extended period is not good way of balancing your work life with your family life.

Don't see the SES as a family-friendly career option, since balance is not generally what is expected in the SES positions. The need to be on the BlackBerry 24/7 is a difficult choice for those with young children or other family responsibilities. (Note: Work life balance is discussed and even suggested, but not modeled.) Most who have excelled in the SES appear to be single people with no family responsibilities. It may just be that the mobility requirement self selects these individuals, but the perception is there none-the-less.

For married individuals with families I believe the SES program is nearly impossible.

Four very ill parents for the past 5 years have taken up much of my time and I was unable to apply. I also feel that my lack of supervisory skills at the government will take me out of the pool of candidates even though I teach college and at my last non-government job I had up to 16 employees. Finally, I feel that due to my current job, I don't get "out and about" enough and do not network as I have in other government-held jobs.

Getting my children out of high school who are 14 & 16.

Going into the SES program would require a move to a much larger location and my standard of living would go down compared to current standard, even with the promotion and the pay increase. This is a factor but I have not made a decision to not seek the SES CDP, but it must be considered since I have 3 school age children in the home.

I am interested in the program. The burden on my family and perceived need for more professional development are the main reasons I did not apply.

I am not willing to be away from my family for long periods for my job. I also don't have the time to even apply for something like this because of my current Branch Chief responsibilities. I have to weigh my life against the job.

I am very interested in applying, but I have an autistic son who lives with his mother. His mental well-being requires that I remain nearby to him. I cannot commit to SES that I will relocate at the whim of whomever makes that decision.

I am very much interested in the CDP and/or applying for an SES position; however, the current demands of my very young family will not allow me to put forth the commitment level I feel that an SES position requires.

Unfortunately, my flexibility is driven

by the needs of my children, and not my career at this point. Perhaps once my children are older, then I will again have flexibility and the time that I need to invest to hold a position at the SES level. Thank you.

I believe I would be an asset to the agency as an SESer. I am interested in serving and have been encouraged by SESers to apply. However, I am very concerned about the possibility of having to relocate and work/life balance. I just don't have the option of leaving my current residence. Thank you.

I consider my lack of knowledge about the CDP and SES to be my responsibility. I believe that if I sought out information it would be available. It's my best guess that the responsibilities of the positions are not manageable due to work-life-balance concerns at this time. My current position is a perfect fit now.

I feel that individuals in an SES position have a hard time maintaining a work life balance.

I had two issues with the first that I am a single parent and can't leave my child for a development assignment. The second, my understanding from OPM is that private sector experience at the level of Vice President can be considered for SES certification. However, at Social Security I am told the only way to be considered is by application and acceptance into the SES program. However, I have personal knowledge of two external hires that

were promoted into the SES program and they did not have Executive experience in the private sector. It would be beneficial to allow candidates to pre-certify their private sector experience.
I have 3 young children, which does not afford me the time commitment it appears to be a current SESer. Executives seem too involved in the details of SITAR projects and struggle to provide clear guidance, which can lead to months of a decision making process because we have to wait to get on somebody's calendar. Many agency priorities shift quickly and agency seems more reactionary instead of being proactive. Much of the work we do in Systems currently seems like work Operations could handle. Systems should focus more on Software Development, but currently we handle a fair amount of Business Process Development.
I have been and continue to be encouraged to seek promotion to the SES however, the expectations and commitments needed to be in the SES conflict with a balanced family life. I plan to explore the SES much later in my career.
I have young children. This is my main concern.
I intend to apply in the future; I did not apply this time because my son was too young and our family needed flexibility.
I made most of my statements in the survey. I do however appreciate this survey. But I'll add that I already have a demanding position--I like my work--but its demanding at all times. Being able to handle the demands sufficiently requires constant connection (via blackberry, email, phone, etc.) which leaves very little time for personal health, family interaction, or even outside social needs. I have young daughters. I believe that children need their fathers in their lives and especially daughters need fathers. I already and spread thin and don't spend enough time with them. My mom has stage 4 ovarian cancer and it has spread to her stomach. I am caring for her daily and ensuring she has as much quality of life as I can give her. My long hours at work has already kept me apart from my wife for lengths of time and the weekends I play catchup on administrative things (bills, repairs, etc.). I many times question my world view on things and the manner in which the Agency responds to some things. It makes you cautious wondering if you have made the right decision, when you have really put in work to make the right decision only to find out that it wasn't the right decision by someone else's standards. Government is tricky. The political aspects are hugely challenging. My background is Accounting, I am trained to know that there is always a clear answer in numbers, but in political dialogue or new interviews, nothing seems direct or absolutely true. I would want to hone those skills before or during consideration of an SES position. It just seems that the "it factor" is an invisible thing floating around and those who get hit by it know it, feel confident and go for it. Others just have aspirations for the position. My character is to be an honest, good leader but one that can still be human, take care of his family, and be away from work when I am away from work. One of the survey questions asked if I were ever influenced by an SESer to not consider the SES. The answer is NO, but certain actions or what appear to be responsibilities appear to make the position seem overwhelmingly stressful. It also appears to be one that is for individuals who like to talk, debate, negotiate, state their position. I like to simply discuss and find a workable or best solution. It never seems that simple. What is provided in terms of organization, skills, time management, and people management does the Agency provide to ensure that these individuals are equipped with the right tools? I don't have time now for a simple course in something I'm interested because it falls on a date that an important meeting is scheduled on or because of something else work-related that is a priority. I wonder if I need to take any specialized courses to prepare myself for the SES role? Additionally, I know that there is a whole different perspective in the field offices; i.e., the front line. I seem to think that every administrative person should work a tour in the field--it provides for a more well-rounded employee. I have not had that opportunity. While we offer such opportunities today, I don't feel they are designed for GS-14, GS-15 grade levels. It's been said that you are too high a grade to justify pursuing duties at a lower level, even though it's in an entirely new and different area of the agency. You are in reality "brand new" in that area, regardless of your current grade level. Even certain training is refused to higher grade levels. Overall, I have a great deal of respect for those who are in and have pursued the position. I don't like failing and I'd like to have a good sense that I am confident in the skills and tools I have to at least consider it. Sorry for the length of my response, I wanted to respond honestly because I have contemplated pursuing the SES but I feel I want to make sure that I am equipped with the most and best of qualifications I can before going in.
I think SES is a great program but, since 1999 (and I did not become a mgr until 2001), I have had extraordinary demands for parent care (my own parents and now my mother-in-law) which makes taking on the responsibility of an SES impractical.
I think that although the agency is generally family friendly, applicants with young children or other family obligations may be disinclined to apply for the CDP positions due to mobility and family care issues. This potentially excludes a large portion of viable candidates until/unless there is more widespread support for teleworking and virtual detail opportunity. At this time, employees considering applying are essentially forced to choose either family or career for not just the duration of the CDP, but also potential future SES assignments.

I would love to contribute to the Agency's mission at the SES level, but I have young children; I cannot be away from them during the CDP. I am very concerned about the family-friendliness of the SES. From afar, it seems the real-life expectations are designed by and for empty-nesters; that you devote your life--literally--to the SES, and that family and personal life come last.
Issue of work-family balance - some executives very for the balance, other execs say they are but really are NOT. SSA needs to examine this more closely and make it clear whether or not they support family balance with executive career - or if they will just continue to say they are and still expect work to come first/family second.
Mainly just want to be home every night at a decent hour to be with children as they grow and mature; have a desire to be a good father figure unimpeded by SES workload demands.
Mainly work/life balance and requirement to be mobile. Have family responsibilities and a life other than work.
Mainly, the family support. I currently have a 1 year old and a 5 year old that require more support from me at this stage of their life. Once they are a few years older, I will have more flexibility with my work life to be able to full-fill the requirements and availability to apply and be considered for the program.
My answers on the previous page sum up my main reasons for not applying. My reasons are two-fold. Family responsibilities (have a special needs child in middle school, the next few years are very important) and I don't feel the pay of SES is worth the added responsibilities and stress that come with it. I would like to advance a step further in my career, but not eager to make it happen until my family obligations are more resolved.
My concern is my family. I do not believe I can fully commit to this type of position and still be there for my family. At this time in my life the money and status are not that important and may never be.
My life would not be my own. I would have to move on a moment's notice away from family and friends. SES members seem to work 24 hours per day 7 days a week, there is no perceived work/life balance. I do not have a graduate degree and was once told that it is necessary to have one, or be pursuing one to be SES acceptable. I am in a region where there aren't many opportunities outside of the work I do in the field. It is my understanding that the ACOSS is only interested in people who have worked in more than one component, so it appears most acceptable candidates are located in the Baltimore/Washington area.
My personal situation makes it difficult to be away from family for an extended period of time.
Seems like the program is not meant for people with a young family. I have no desire to be away from my kids during the CDP
Some SESs have mentioned the long days, long hours and no weekends with the family due to professional obligations. Sacrificing family for professional development does not sound as something I am willing to do right now. Thank you for the opportunity to provide feedback.
The biggest challenge by far would be trying to figure out daycare/school arrangements if I were gone for several months on assignment outside of my city; spouse works full time and job is not flexible to allow for both pick up and drop off. Also unsure about missing out on my child's life for several months. If I lived in Baltimore this would not be a barrier. Living in a region now with no extended family nearby to help out with child arrangements makes it difficult.
The impression that I have of executive level positions is that there is not sufficient life/work balance. In addition, SES positions appear to be far more political in nature than I desire at this point in my career. Instead of stating facts, we often seem to be in constant spin-mode.
The main reason I did not apply for SES this year was because my only child is in the last two years of high school. Plan to apply next year or the year after.
The most important factor affecting my decision to apply or not apply is the ability to maintain a work/life balance. From what I have seen, the SES cadre is unable to effectively manage work and family OR the cadre does not have a relatively young family to balance.
The primary reason is personal. I have two young children at home. As circumstances change, so will my ability to apply.
The reason why I did not apply for the CDP or SES position is more personal than professional. There is some expectations that I want to be able to fulfill at that point of my career. At this moment, I have two small kids and I want to be part of their life. I would like to apply for the SES in the future, but I am not willing to miss some stages of their life.
The responsibility level appears scary and more demanding. I already have a demanding job and the SES would be worse. I'm not sure I want that added stress coupled with home/life responsibilities.
The SES CDP plan runs contrary to our agencies stated belief of work-life balance. I have a young family and am not interested in being away for six months for the potential of getting a SES position. However, every executive I spoke to went out of their way to emphasize the mobility requirement of the program. I know I would be a great

executive and have a lot to offer the American public. However, I don't see my opportunity ever coming in my remaining 20 years with the agency. It is more important to me be a good parent and spouse than it is to join the CDP. It is even more discouraging that there are never SES positions opened competitively in DCO. It was even more demoralizing that the last such vacancy announcement (ARC MOS in Atlanta) was cancelled with no explanation. Applying for a SES job is a lot of work and this was really discouraging.

The SES program merely caters to those that are single and have no children. Also the amount of working hours that an SES position demands is not realistic for working parents. Also it seems to favor those in HQ and Regional components. The length of time required to be in the SES is not reasonable as you are required to be away from home for the duration of the program. I have been told on several occasions from my Area Director and other colleagues that I should apply and I currently have a 5.0 PACS rating but there is no flexibility whatsoever for working moms with young children to be involved in a development program such as this. If some of the program could be done in a home component or online courses, etc. I would highly consider applying for the program and positions.

The SES program, in general, needs to evolve with current everyday reality. Many "upcoming" and future SESers are in young families with dual income parents, in some cases with one parent working in the federal government and the other in private sector. This generation may be interested in the program, but unable to relocate for the program due to young family commitments. Thanks for seeking input!

The Work/Life balance is a real concern. I am dedicated to my job and set professional expectations for myself high. However, I am just as dedicated to my children. The balance is a concern.

There does not appear to be support or encouragement for those who do not fit a "scripted" mold within SSA Operations. Observations are, that those who have had potential to have a true impact, find themselves moved on to someplace else. Also, there have been multiple opportunities in the region that I sit and because I was not in the program, I could not be considered. I was very mobile for most of my career and now I am more concerned about my quality of life. I prefer where I am because it keeps me close to aged parent(s).

There is a culture throughout the agency's SES executives that discourages work/life balance. SES executives in other components regularly send emails in the middle of the night and over the weekends. Within OLCA, it is apparent that executives regularly work long hours during the week and over the weekends. I am happy to devote myself to work during normal working hours; however, I will not sacrifice my family for my work. Further, I do not wish to put myself and my family in the position of having to physically relocate at a moment's notice.

There was a DCO call with managers that explained the role of the SES CDP that I felt was very helpful to me. I am interested in the future but am not ready for that challenge at this time in my life with my family (kids in high school).

This concern is captured indirectly in the survey, but I wanted to reiterate it. It is related to work-life balance. I am not afraid of hard work while I am at work, and I firmly believe in the importance of what we do every day. But the existing culture is one in which executives must appear to be on duty at all times, in which seemingly all issues are critical and require immediate attention. For instance, it is common for executives to regularly send email very late at night and very early in the morning on weekends. This behavior too common to brush off as being simply idiosyncratic; it appears to be an expectation and part of the culture.

While I covet the opportunity to obtain "exposure" to other areas of the agency, due to family obligations (children entering college, ageing parents), I am unable to relocate to fulfill a development assignment. My preference is to remain at the Headquarters complex.

## Mobility

Lack of positions in desirable geographic locations.

As a management member of SSA, i fully understand the need to take a position at Central Office as a part of my development program but as a mother and a daughter dealing child and elder care, i don't see that is doable. I hope this requirement will change for the future candidate like myself. I know we have many qualify candidates did not apply for the program for the same reason.

As a parent with small children coupled with strong roots in the area, it is extremely difficult to commit to the mobility requirements of these positions.
At this point in my career, I am not interested in being mobile.
At this point in my life I am not mobile to the degree required by the program. At some point in the future this will change. I also have been in my current position permanently less than 2 years and am still enjoying it and not ready to move on yet.
Centralization of SES positions in Baltimore is a concern.
Family concerns and being mobile.
I am a care giver for my Mom and need flexibility and need to stay close to my home location.
I am a single parent with a young child, and family I need to stay near in my hometown. I cannot currently consider a position that would require me to move, or to frequently relocate on a temporary basis.
I am concerned of relocation if selected. while I would not necessarily need to stay in my current state i would prefer to remain in the current region if possible. this preference may evolve in the coming years once my son graduates from college within three years.
I am not interested in applying for CDP or SES positions at this time because I am unwilling to relocate while raising a school age child. Work/Life balance is also important to me and it is unrealistic to expect this from an executive position. My financial needs are satisfied and my ego doesn't need the next promotion.
I am very, very eager to apply for this program but it is my understanding that these positions are located in HQ. Unless partial telework is available, I could not apply for this position.
I believe the agency needs to re-exam where SES positions have to be located. If work is portable (i.e. telework, transferring work within the agency) why can't human capital be portable. For example, with technology is it absolutely critical that an SES position only be located within a RO or CO? For that matter this should apply to any position at RO or CO, can that position not be done virtually at some other location.
I did not apply primarily because I know I could not fulfill the current requirements for travel and training during the program. I would love to participate in a CDP, and would do so if I could remain at my duty station (or commuting area) for the length of the program.
I do not wish to relocate my family, or be apart from my family for any extended period of time. That is why I have never applied for the SES program.
I have a good team currently and am committed to helping them succeed as I think our work has an impact on meeting agency goals. I also have elementary school children and am not able to move at this point. I need to know that I can stay in Chicago. (My team reports to HQ but is physically located mainly in Chicago.) Occasional travel is acceptable, but long term assignments away from Chicago would not be possible at this time.
I have almost 40 years of service with SSA; most of it in the Regional Office. During the early part of my career, regional leadership positions were primarily filled from within by experienced managers and leaders who "grew up" in the Region. However, the last dozen years or so, our SES positions have been filled almost entirely through the CDP or by recent CDP graduates from Headquarters. With aging parents and other family responsibilities, I have been unable to commit to being mobile, and therefore have not applied for the CDP. I think in some cases the agency is losing the opportunity to fill senior regional positions with the most qualified candidate because the assumption now seems to be that regional SES positions are to be filled by CDP graduates.
I have family obligations that require my physical presence in my current location. I am not able to be away for long periods of time. I do not like the idea of having to move from job to job at the Commissioner's request. I still have a lot to offer the agency right where I am. Maybe down the road as my family obligations change I would reconsider.
I have school age children and I have moved them multiple times. I plan on staying in my current position until my youngest child graduates from high school in 2020.
I intend to - either when my children move out of the house or when the mobility requirement is relaxed, whichever comes first.
I started to file a few years back, but was not interested then in moving out of this area, and also, as an attorney, this Agency offers very little in the way of promotional opportunities. One cannot be hired into the 905 series and ever get to be an RMO - our system does not permit the excepted service - even if from 40 years ago, to be considered for a career position.
I would apply for this position if I could stay in my current location. I am a mother of 3 very young children who need me at home. Otherwise, I would be highly interested in applying.

If we continue to discuss how portable work is, why do SES candidates have to travel? Particularly in metro areas.
It is an unfortunate reality that many highly qualified, talented GS-15s are not interested in applying for the SES CDP. For many, living in Baltimore is a significant drawback-both financially and with regard to family responsibilities and commitments. In an age of teleworking and in an agency where work is highly mobile, SSA is woefully behind the times in its structure; those who lead in Central Office must be centralized. Therefore, the agency misses a number of talented leaders from its top ranks. Additionally, isolating the agency's top leaders removes them the reality of what is needed by those we serve.
It is apparent that the sacrifice required of Field candidates, being away from family for 12-18 months is a significant barrier, much more so than for someone already in Baltimore. In addition, the final placement may well involve a full family decision to relocate, again, not a factor for many in Baltimore.
It was stated that the positions would probably be outside of the Philadelphia region
It's not something most FO management seriously think about. Even if they did it would involve a major move life change. The agency rarely offers any type of advance opportunities or details to FO management that does not involve a move.
Mobility is the biggest factor closely followed by potential reassignment.
Mobility limits my current availability for many HQ SES positions. The first 13 years of my career I was extremely mobile and rose through the ranks from a GS-7 to a GS-15 in under 9 years of service. However, due to family situations, I am not currently mobile. I have applied for the SES program twice. I made the BQL/passed the assessment center as a GS-14 applicant back in 2008. However, I did not make the BQL (failed assessment center) as a GS-15 applicant in 2012. In 2012, I had almost 4 years of GS-15 leadership experience (Director and Deputy AC level) where I was fully supported by my executive leadership. However, a subjective assessment center knocked me out of the process for consideration. While there have been outstanding selections to the CDP, I have witnessed where a number of selections to the SES CDP have been made where the selectees have never served in a supervisory/leadership role where they are truly "leading people," yet they "passed" a subjective assessment center process. While a number of these non-leaders go on to be outstanding SESers, In my opinion, demonstrated experience, coupled with superior recommendations from executive line leadership should hold considerably more weight than a subjective assessment center. An assessment center, in my opinion, only measures your ability to do well with fictitious scenarios and "what if" situations. This doesn't represent the real life challenges of leadership in my humble opinion.
Mobility of SES position every 5 years or so - as an 1811, does this mean another agency because there are no options within SSA? Also doesn't appear SSA/OPM select 1811s from this agency.
Mobility requirements are my only issue restricting me from applying for SES vacancies.
Moving around the country won't work for me or my family.
My primary barrier to applying is the requirement to be mobile for such a long stretch of time. I felt it is unfair to saddle my family with all of the household responsibilities for that length of time while I am gone.
My understanding is that when you receive an SES assignment/appointment that you need to be ready to move anywhere in the country. Declining appointments can be detrimental to further career advancement. At this time I need to consider the well-being of my family. I have young children and a spouse who is a professor at a university. Before putting in for the SES program, I need to be sure that I can meet SSA mobility requirements. I have worked with a handful of SES participants in the past, and regardless of their intent, the total effect on their personal and family lives were often profound.
Nothing besides the mobility factor- I am unable to relocate my family to Baltimore or any other far away location. This factor is the only reason I do not apply for an SES position.
Problem with mobility due to childcare responsibilities. Also, no one in my management has ever approached me and suggested I apply, despite stellar reviews and numerous awards year after year. Moreover, the one time I applied (8 years ago), someone in upper management nixed it. However, there was never any discussion about why or what I needed to do to get their support.
Relocating from some field locations to Baltimore as an SES would actually result in a loss of money by many employees because of the cost of living differences. I think that is a big reason for the low interest in SES positions by some of the best of the best employees. As such, SSA is missing out on some great SES candidates due to locating the majority of the positions in Baltimore. In today's electronic world, you don't need to sit in the overwhelmingly huge SSA complex in Baltimore to be an effective member of the SES. Hopefully, more

progressive and forward thinking management will fix that old mindset of "relocating to Baltimore" in the future.
Relocation and work/life are the most influential factors in not considering SES or CDP positions.
Requirement to be mobile, i.e., move to another region
Still have young children and don't want to be in a position to have to pick up and move if directed to do so.
That's it. I simply do not wish to live in any heavily populated city or metro area.
The mobility factor and perceived expectations of prior OCO/RO experience.
The mobility requirement seems anti-family. Work-family balance is extremely important to me and seems to be lost in the CDP and SES expectations. Removing this requirement would open a whole new set of resources that have never applied to the program before.
The primary reason for not applying is the requirement to accept relocation.
The requirement to be mobile, I assume means out of state. Mobile in my home area is not a problem.
The top reason I do not apply is that I am unwilling to move across the country multiple times, which seems required for these types of positions. It places those with a family at a definite disadvantage.
There doesn't seem to be any control over assignments and unfortunately at this point in my life I can't uproot myself to complete some of the rotations.
You must go work wherever they need you, which may be another region. This could happen frequently and you have to go.
<i>Lack of Information</i>
A bit more information on these positions would be greatly appreciated.
Although I don't know the actual responsibilities for many of the SES positions, for those positions that I know (such as Area Directors, Assistant Regional Commissioners, Center Directors in Regional Offices, etc.) I simply don't have the confidence in handling the SES responsibilities.
Certainly the lack of specific information about the positions is a big thing. Along with that, a concern of how much moving around is involved since I have a family that would prefer not to unreasonably uprooted. They support me, but I don't like to unfairly burden them.
Didn't know I could as a GS-14
For succession planning purposes, I believe it would benefit SSA to provide more information about the SES career path to GS-14s.
How are potential candidates notified about the CDP program, as I do not recall having seen a formal solicitation.
I am not very familiar with the program and or the process to follow. In my current position I have never been formally mentored or attended any type of training. I have learned the job mostly by doing/trials and errors.
I did not know as a GS-14 I could apply always told had to be a GS-15 to apply for the CDP or SES programs.
I don't really know enough about the program to know if it is of interest or if my upper management would support me. In my career I have always felt support with exception of the last year to year and half. This leaves me feeling somewhat uncertain about my future with SSA.
I feel that I am not prepared to apply for an SES position and I have never heard of the CDP. If I knew there was a development program to prepare me for SES, I would have looked further into it and applied.
I feel training on the process would be beneficial. In addition, a clear understanding on how executives get appointed without going through the program would be beneficial; and what SES positions one can apply for as a GS-15 would be helpful.

I have never had the positions explained to me. I do not know what the expectations are in the positions.
I think if I had pertinent information about the program highlighting it's goals, purpose and specialty, I would certainly be more enlightened.
I think the best way to learn about these programs is word of mouth from peers and superiors and that does not happen. The agency just sends out the email announcements so it is difficult to feel like one should really consider it. I also feel like I would like to be an Area Director before looking at an SES position.
I would benefit from conversations with those who have experienced the application and interview process.
I would have been extremely interested in this type of career development earlier in my career. However, I never heard anything about such programs then. At this point, career development would be better devoted to people with more time left to pay back the cost of the development.
I would like to know more about the program.
I'm very little aware of this program. I need some guidance. If a proper guidance is provided, I can certainly apply for the program. I am confident I can overcome any challenges to justify the requirements of CDP and duties of SES positions.
I'd like to know what this program is, what the agency is looking for when selecting candidates, and whether OGC employees have appropriate agency exposure to fit well in these positions.
Information is shared when the program opens. The Agency's succession planning should be viewed for improvement and leaders should actively promote this process.
Insufficient marketing of this program resulted in diminished program awareness.
It appears many SES positions are already assigned so I don't even know the consideration process, let alone apply.
It would be really helpful to have information about what it all entails and the requirements for travel and flexibility etc.
It would be wonderful if the agency would sponsor a workshop that outlines the steps necessary to apply for the program, program requirements, etc.
Lack of clear information about how SES position will interface with duties and performance requirements of HOCALJ position, lack of information about who can answer questions.
Managers need to be educated and mentored more on the process.
MORE (any) information about the program and notification of when it's posted.
More information provided to individuals in management
More information should be provided to potential candidates about the program.
More marketing of the program and information dissemination would help.
My component was moved from OQP to OEST in 2013, and the SES solicitation occurred within 6 months of the move. I did not feel my new management (which changed twice after the initial move) would have enough experience with me to recommend me. I also had concerns about what happens after the CDP. The CDP is now 12 months and requires relocation for at least some of that time. But what happens after that? There was no information about the long-term commitment involved (if the CDP were completed successfully). After the program, are you then required to report to any assignment you are given, anywhere in the country, of any duration? This was a huge factor for me. I did not want to commit to a program like SES without knowing if long-term, I could fulfill the requirements. .You need applicants that are fully prepared to go the distance. If we don't have a complete picture of the SES process, that is difficult to attain.
Never been given any information about the process or of how to pursue. Developmental opportunities are limited in OIG.
no real training or information regarding the programs
Not enough detailed information about the process and the assignments needed for the program.
Not enough information.

Not sure what I would be getting into.
Now is the time for aspiring leaders to think about the SES but we have not put encouraged a lot of interest in the SES corps other than announce a program. We should have SES interview available on VOD; SES forum; SES stories published
Opportunities are needed to prepare for entrance into SES that would give interested parties needed experiences for the program - i.e. taking an certificate program for executive leadership - virtual assignments etc.
Other than the announcement, Field Management persons(especially those in smaller cities) are not provided much information about development opportunities. In addition, we do not work directly with executives who have participated and are willing to share their experience. We must research and figure out available development programs. While we may have access to the information on the intranet, as direct contact persons, we are usually totally occupied with current job responsibilities during the work day. It's difficult to work on self-development when I am constantly working directly with the public, managing two offices, training employees and responding to emails. This year, I took the information home and researched; however, by then, I was not able to meet the time frame. Maybe next time?
Program should be promoted more early in a manager's career so they know more about career options.
There is no clear development track to prepare for a candidate to prepare/identify themselves as "ready" for the SES. It is "understood" that the Region will only support a single candidate and that person had already been identified.
There is no mentorship program that's readily apparent for someone interested in moving up.
There is not enough emphasis on advertising the program. In addition, there is not a strong recruiting plan to solicit Hispanic candidates. Thank you.
There is very little information out there concerning these positions. They are not generally discussed. It seems the thought is as a GS-14 you have gone as high as you should go.
There should be a virtual collaboration to promote the CDP or SES program to engage and motivate employees to apply for the program. Employees are very interested in both the CDP and SES CDP programs. I believe that better marketing of the CDP or SES program on a virtual platform such as a VOD could be beneficial for the agency to attract the interest of employees as a potential recruiting and marketing tool.
Was not aware of the program.
<i>Poor Impressions</i>
As stated when I look at the ranks among the SES Hispanic women and note that they have selected only one or two, that is very discouraging to me. Lack of leadership that could mentor other female Hispanics.
It seems very political in nature.
A number of years ago, I applied for the ALP at the urging of my immediate supervisor. I felt extremely positive about the process and my performance. In the end, the person selected from my component was obviously less qualified and less suited for the program than I was. This has colored my perception of development programs.
Be the change that you want to see in the world is a quote that I have lived by in working at SSA. Some of our current SESers may need to be changed in order to attract new talent and new ideas.
Changes in the SES/CDP resulting from recent reforms.
Commissioner realigns SES too often in Systems for no clear reason. Pay is poor given the commitment and responsibility. Retirement under FERS is worse, no pay benefit. Many SES are still acting after 2 or more years with no permanent assignment. See Commissioner's staff, minorities are favored. Even agency wide 68% women and 50% minority, we stil have a Diversity goal? xxxxx and xxxxx are still not permanent and are women. Selection process is political. Mentoring plays favorites, not competence. Many in the field say the new SES don't

know the business or technology. The agency needs leaders, not mentoring followers. People like me who have had multiple ideas implemented with over ten million in savings are not recognized or rewarded with promotions. The agency is very ungrateful to its champions. Management fears to promote them and take their job after xxxxx did this to xxxxx. The management dynamic still exists today. SES needs a major overhaul.
I am a team player and I have become tainted in my view over the years that SES managers are just concerned about their own "numbers" so they qualify for their bonuses. SES is less appealing to me because of the unabashed, self-serving interest in these individual outcomes. The lack of honest motivation to place the aggregate good of the agency first is concerning.
I don't have the personality for the politically correct games and politics played at that level and generated by the ACOSS
I don't think the program attracts the best people in the agency. It attracts those who want to 'network' and move around.
I don't want to sell my soul just to get ahead.
I have the sense that past Commissioners of SSA have valued loyalty more than competency, and this creates political tension among the members of the SES corps, and as a result among components. Because my salary is already comparable to SES pay, an endeavor into SES would be for the sole purpose of personal and professional growth that enables me to be a member of a team whose primary mission is to foster collaboration in providing world class service to the American people. Sadly, I am not confident this is what current SES at SSA is about.
I have worked alongside many Senior Execs over the past decade. Right now, the Senior Execs with whom I interact do not appear to enjoy their jobs.
I have worked in several components (not just the current one selected) and have seen the failures at the SES level (DCPS being an example). It is not encouraging to see the incompetence at the SES level or the fact that they are not held accountable.
I hope you take the results of this survey seriously, and I hope my peers use this as a vehicle to tell you the honesty of our reluctance to engage the SES program. Smart people in this agency deserving of SES don't apply because the program is flawed (see my issues earlier in this survey). Finally, I watched a friend in SES get bounced all over the country and live out of hotels for 2 years. I would like you to calculate those expenses footed by the public because your program is unsuccessful. Then apply those expenses to paying SSI or Retirement. Horrible frustrated and disappointed with SES.
I question the integrity of our current leaders.
I think it is a great development opportunity but what I see in this office is someone of a turn off. More about how much power rather than caring about agency and employees. Not all but some, need to find a better way to evaluate service delivery and dealing with staff. This was a turn off for me but I still believe it is a good program and will help the agency produce some good leaders.
I think it's an old boys and girls club who protect each other--even the incompetent ones. In general, SESers don't point fingers because they don't want fingers pointed at them. Why they put up with the likes of xxxxx, xxxxx and others is beyond me. It took a Commissioner with guts (xxxxx) to get rid of them, but there are more left who are not 'executives' in my mind.
I would have no concerns regarding the expectation to change positions as needed, when such changes are based on merit and business need. Of mild concern are position changes that occurs as a result of a change in political appointee, or changes that seem to be made as a means to punish.
I'm not certain I believe the rumor I listed on the previous page; however, I have some concerns about the political atmosphere and my ability to navigate through - I tend to be (politely) upfront and honest and expect the same from others.
In recent years, the integrity and behavior of individuals coming through the SES CDP process reflect a sense of entitlement, arrogance, and lack of respect towards federal employees, including managers who have worked their way up through the ranks and served this agency for years. I have seen execs abuse their power, take the position that they can do whatever they want to do, and manage by personality, not responsibility. It's a pool I prefer not to swim in. In my office, the SES CDPs have made statements that adversely affected morale, compromised performance management, and compromised the value of the office directors. In my prior office the SES undermined the integrity of the management team by pitting one director against another, removed a director from his position to promote a female friend, and allowed that person to create a hostile work environment that affected employees and management.
It appears at this level sr. staff must put aside common sense to fit in, or go along with the program. for example it is common knowledge that managers were told to mark down employees during PAC reviews to avoid giving

deserving staff outstanding ratings. Aside from being not nice and unfair, it's dumb to do this to high performing staff. easily confirmed--ask and look at drop in outstanding ratings over the last few years. also distrust in programs being put in place to raise moral are cosmetic, rather than dealing with real issues of trust. I don't have the stomach and would be unable to smile and comply with unfair practices.
It seems that there are people who just get put into an SES position but others have to go through the curriculum. There is no real explanation for this so it makes me feel that the process is unfair.
I've seen individuals who were selected for an SES Development Program, completed it (uncertain if they were certified) and then they retire, begs the question is the agency getting their return on investment? I think not. Conversely, young, inexperienced preselects get into the SES program who have no experience or knowledge about supervising/managing people. In addition, I have had a very negative experience (probably should have resulted in a grievance/complaint) with several current SES members and question how these individuals were ever selected for leadership positions, their ethics and integrity are definitely in question.
Leadership skills are lacking in the new SESers in our Region. It is not motivating to do things because they will yield a higher performance rating for an SESer. Maybe more classes on what motivates a TEAM and what should motivate a leader of value would be helpful within the program.
Most executives do not display good work/life balance, making the SES unattractive to individuals with family responsibilities. The pervasive lack of balance among the current SES cadre results in cultural pressure for potential entrants and situations in which individuals who do not conform to the cultural norm miss accelerated deadlines and critical decision points that impact their organizations. In effect, unless the cadre collectively slows down and exercises balance, individuals who do exercise balance risk becoming outliers and slowing overall organizational performance. The lack of balance exhibited by the SES cadre also exerts pressure on senior managers and technical employees to prioritize work activities and disrupt their own work/life balance. Cultural attitudes and norms create more of a barrier and negative perception of the SES than any of the technical requirements.
Most intelligent people have weighed the cost benefit analysis of SES and decided it confers no real benefit for them, which is why all agencies are having a hard time recruiting for SES. In fact, many talented people have no desire to advance above a GS-14 level for the same reasons. The unfortunate outcome of this is the people applying and getting the positions do so for the purported "prestige" afforded to the position as opposed to wanting the position itself. This has resulted in lackluster management. The mobility agreement is reason alone not to sign up for SES, as it allows retaliation against an individual without recourse for standing up for their beliefs in terms of what is best for the agency and the public we serve.
My limited sense of the SES process is that it selects leaders with a conservative management bias more concerned with personally not failing than in risking innovative approaches that might be controversial, but could change the paradigm.
Not overly impressed with some of the current individuals who are SES.
Public financial disclosure requirements, SES culture in SSA
SES comes across like a middle school clique
The most distressing part of the SES culture that I have observed is how much it is geared to self-promotion. It has become very obvious to me, and it has helped me understand when we are required to spend time and effort doing action items that are, essentially, taking us away from the important work of the agency. Subordinate staff dare not express that these workgroups or projects are detrimental, because the SESers I have worked with do not receive constructive feedback from their staff. As a manager, I routinely feel "used" as an enhancement for the SES performance review. In the meantime, I will continue to do my best in service to the public and make every effort to help my staff do their best in fulfilling our duty to those we serve.
the process does not identify leaders, it identifies those with ambitions but no courage
The public service gets lost in the politics. I do desire to serve the public - genuinely. My observation indicates that the SES positions are about serving other appointees and other individuals' political motivations. Service to the public is lost.
The SES system is a relic of bygone age. It is inefficient and rule-bound. The federal government needs to scrap it and start over.
There are a number of reasons that I am not particularly interested in the CDP or the SES. While I think there is an absolute need for strong leaders with a commitment to public service and the goals of the agency, I don't necessarily see that the CDP grows those skills. So much of it is project and task oriented so that folks can check a success off a list, but my observation is that the CDP does not foster the team building and communication necessary to truly

solve the problems of the agency. Generally, I think team building and communication are skills that folks either inherently have or they don't have - it is hard to grow these kinds of skills and made much more difficult in a program that appears to measure more individual success rather than team success. In addition, I work for DCDAR and the only role within the agency that I am interested in is that of adjudication. I would consider applying directly for an SES position (not through the CDP program), but only if I were sure that doing so would improve public service - I have no interest in career advancement solely for the purpose of advancing myself.
There are too many executives already.
There is an incongruity between the promise of resources and what is committed given the expected outcomes, particularly with new and sometimes poorly focused initiatives. This is challenging enough when you are responsible for a third or a quarter of the office workload. When you are responsible for the totality of the office workload, I'm concerned about the erosive impact that would have on an individual over the long-term.
Too many political appointees and too much turnover in DC level and above leadership at SSA. We risk turning into CMS which will be a shame given our past accomplishments and proud IT culture.
Too political; success measurements are too focused on simplistic goals rather than process and the system at work.
Viewing the recent COSS broadcast 2/06/15 (Quarterly SES VOD) helped convince me I would prefer not being part of SES.
A lot of the movement just pushes the agency backward. I cannot tell you how many SESers I have educated on various topics only to have them replaced or move on, only to be left with educating someone else. In my opinion, this lack of consistency proves to be counterproductive to the agency.
<i>CDP Process</i>
1) One of my concerns is that the process for how candidates are selected for the interview section is not transparent. While a summary of scores in the written and assessment sections of the process is provided to candidates, there is no explanation as to how those scores result in candidates being selected for an interview or not. This part of the process can be improved by providing candidates their numeric score and the cut-off score for interviews. This would not only improve the transparency of the process, but address concerns that the selection process has favoritism and that candidates are selected for reasons other than their application scores. 2) I am also concerned that several SES CDP slots are filled by external candidates, which results in fewer slots available for SSA employees. It is extremely rare for the agency to hire managers externally at the GS-12-15 levels, and a major reason is because knowledge of SSA's business is vitally important for employees to do those management jobs well. Why is this SSA knowledge not as valuable at the SES CDP level when external candidates can be placed in SES positions?
A fundamental flaw in the selection process is that my reviews influence it. I am reviewed by someone who doesn't understand enough detail about what I do to thoroughly review me, but my 3's and 5's influence my possible selection to SES. If I'm always reviewed by the same individual (with no 360 review where the supervisor isn't reviewed by those they supervise), how fair can the selection process be?
Another reason I didn't apply is that there is no immediate feedback. A candidate seems to be kept in the dark for a majority of the time. In addition, my family is young and cannot leave the geographic area because of the logistics. If I was to be relocated, I would expect it to be within driving distance to my home. Or, at least, the ability to make it home a few days of the week and especially the weekends.
Applied for ALP several times and got burned out realizing the selection process is somewhat corrupt.
Appointments seem somewhat arbitrary. It seems that knowing how to fill out the application is far more important than your qualifications.
Based on what I have heard and read about the SES selection program, it rewards the candidates who are most

willing to endure a very elaborate and time-consuming process. This is not good for the candidates or the agency. SES candidates should be selected based on demonstrated performance in their current and previous positions.
Doesn't appear to consider experience without going through the entire process. No "bye" round for people with a lot of experience.
Few GS-14s are selected. Promotion to a 15 isn't readily available. Most recent CDPers haven't been permanently appointed. Insufficient # of SES positions in an agency as large as SSA.
First, from my experience with my SES leaders, the CDP program has worked for SSA. However, it has increasingly become a full-throttle project-driven culture of I need a project that I can complete successfully in my short time here. It's more project management than leadership. This doesn't engage and motivate all managers and leaders to apply for the CDP. Secondly, the CDP program needs to loosen its rigid model and adapt the ways of the private sector to accomplish the same thing, like family-friendly schedules, self-paced programs, etc.
From my experience, my promotions from TSR to Level One Manager were all based on my ability to do my job well. I never had to participate in an interviewing panel to get to the next level, except when I was first hire. Now, every position I apply for requires me to interview, usually in front of a panel. The lack of experience in this area has stunted my growth. I would like to find a SES willing to be an informal mentor to me. Someone who can give me honest feedback and assist me with improving my interviewing skills. I have a wealth of experience and I am capable of learning quickly.
From what I see, we spend a lot of money on training individuals who are never placed in SES positions. Is this because candidates refuse to relocate or accept positions? Having read some online material about posted by participants, many indicate they will not relocate to as required by the program primarily for personal reasons. How do you enforce the requirement? This is a waste of resources and training and an abuse of the program. I am very interested in the program, however it seems that selections are based on who you know. Connections. From what I understand, the interview portion is very intense. Some agencies provide detailed training on applying, this is a great idea.
I am interested in SES. However, I have heard it is a very time intensive and cumbersome application process. It is rigorous as well, which has somewhat dissuaded me from applying.
I am very interested in applying, but again, due to the cumbersome application process, small pool of applicants selected, and lack of mobility, I have not applied.
I have been reluctant to apply for SES positions because of the application process and interview challenge.
I know many African Americans who were selected to participate in SES CDP but none were ever selected for SES position. Glass Ceiling still exists.
I think senior management should select/recruit top talent for the SES ranks. Existing SES ranks considered by some to be generally weak and over populated.
I think the programs should have more selections, greater frequency (availability), and a simpler selection process. I would encourage more NTE/Details at SES positions for current GS 14/15, along with the development programs. I think it would increase the pool of candidates/interest without the 18-24 months commitment of the development programs. Details could serve as trial run that could lead to the development programs or longer probation period post details.
Initial application process is very involved.
Interesting to compare SSA SES with other agencies which seem to be more geared to developing Federal employees who will change agencies over career. Not the case of SSA.
It seems an overly complicated example of bureaucracy that does not yield the desired effect. I've known countless SES employees in my 36+ years with the agency, many of whom lack vision, basic leadership skills, communication skills, and business acumen we think our leaders should possess. As a result, I can only conclude that, despite all the paperwork, interviews, and dollars invested, there must be other factors at work that ultimately result in the selections. We pay lip service to process analysis and process improvement, and continue to chase numbers and encourage internal competition. We make changes in processes, introduce new technology, and thrust employees into a new environment without taking time to change our culture. We then wonder why we fail to secure buy-in and why we continue fall short of a collaborative relationship with the Union. There is a need for SES but perhaps the process for determining our future leaders needs a hard look.
Lack of consistency with the CDP program itself - some are 24+ mos. with no certification, some are less than 12 mos. with immediate certification, along with arbitrary selections midstream and little to no transparency with the process.
Make the application simpler and then weed out the applicants.

Per OPM, the certification process is not a long and protracted process. So, why does SSA take so long to certify its candidates. The whole process needs to be revamped and, perhaps, not just run by one person.
Process is very complicated
Recent selections and eventual placement have left me disappointed and baffled as far as the qualities of a good leader and executive. Age over experience seems to have been the theme; inexperience has resulted in repeating failed processes. An individual with experience and enterprise historical perspective would have not tried a failed process twice. More emphasis should be placed on identifying and mentoring potential leaders and training them through FEI rather than a competitive and lengthy selection process that has often resulted in individuals getting a career position, not completing the program and not providing broad, experienced based leadership.
Rotational experiences do not appear to be as productive for everyone as the time requirement would merit.
Selectees seem to have more to do with the components represented on the ERB rather than the actual scores/qualifications of the candidates that make the BQL.
selection process in current component is very discouraging.
Technical requirements can provide a barrier to applying for some SES positions.
The Agency should actively seek out candidates for the position who have higher degrees other than a JD. Agency should also explore avenues to seek out candidates who have different managerial styles.
The onsite process needs to be more objective. Lack of knowledge in management and financial skills when answering by observers detracts from scoring for specialists
The process is arduous, cumbersome and too long.
The process is extremely cumbersome, and I do not feel that appropriate selection criteria is used to make selections. The time investment to go through the application process is too high to simply get a "no thanks" back.
Though I withdrew my application in 2011 for SES because of family conflict reasons, I did find that when I arrived at SSA with seven years' experience as state government executive, but found that the SES candidacy culture dismissive of executive skills and experience developed outside of Federal service. While this is understandable in terms of organization culture continuity, it may indicate a problematic blind spot in choosing agency leaders.
Too much emphasis is placed on the candidate's performance during the assessment center and the interview. The candidate's body of work experience and recommendations from colleagues and executives should carry more weight.
With the concept of corporate work, outstationed employees and even telework becoming the new norm in our Agency, I strongly feel that the SES CDP would see more applications from more highly qualified individuals if the need to relocate on a permanent basis was reduced or altogether removed from the program. I think that within reason, a candidate should expect to have some outstationed and travel duties, but to the extent possible, I see no reason why a potential SES employee couldn't be stationed offsite and travel as necessary. If you look at other corporate models, it is not uncommon for the director of a territory to be situated in a location outside of their "home" area. They connect with their respective leadership teams by means of technology. If the agency doesn't make a change toward this direction independently, I believe that technology, along with other public and private sector competition, may force some of these changes upon us.
With the expansion of virtual details in many areas of the Agency perhaps it is time to modernize the SES program to include virtual assignments and details while understanding that exposure in the various components (physically present onsite) is beneficial and should be incorporated.
30 years of military experience, with 3 combat tours in Iraq, reporting directly to the highest level General Officers (Equivalent to high level SES), has given me more of the following than an 18 month SES CDP could: leadership challenges, interactions with senior employees outside their department and/or agency, interagency training experiences, executive level development assignments, and mentoring.
If possible, more allocations per component, based on the number of GS-14s or GS-15s that applied from a particular component.
The interviewing process seems a little awkward. Maybe that could be looked at and changed.

## *Selection Bias*

A concern that those known or promoted by executives in the Agency have the inside track to selection. Not clear that the selection process is an open competition.

again the process is flawed selectees are generally from my observation UNABLE to lead because most are not selected based on merit only based on the old paradigm of who know and who can be selected who will support and agree with the person in charge.

Age, primarily. Served in senior management role in industry so some of the factors are familiar, as I was a change agent within a company in a "brown fields" industry. Investment in a younger person is considered a better ROI.

Agency preference for youth and naivety over experience.

Components filter their recommendation towards favored employees so we need to remove this obstacle. SES responsibilities favor those with minimal family responsibilities and the incentive (personal or monetary) is insufficient for the sacrifice. I believe that once in the SES one cannot control choosing preferred assignments, but rather is assigned to posts where needed; perhaps a fast-track and a gradual program is needed as an incentive.

Experience and longevity are no longer respected factors under the current informal process within OAO. This process denies access to the vast majority of people who would otherwise be interested in SES as attorneys and adjudicators. Special projects and responsibilities are given to a few without competition, and without acknowledgement that those projects lead to promotion or change in position to SES. The current chief AAJ position is stated to be non-competitive and several appointments are from the youngest and newest AAJs. There was no special training such as completion of leadership development program, nor prior management experience required. Thus, there is the perception that experience is irrelevant, and even experience gained by working in different components is not valued. The current system in OAO is arbitrary and leaves some of our best minds sitting on the sidelines while relatively inexperienced people are given positions and subsequently developed. There are no failures in the current system, so no vetting and weeding out of those not well suited to leadership. The formal process of selection and development should be the mandated and only process so that the public may benefit from placing individuals in leadership decision-making roles who have proven their qualifications to lead and did not obtain their position first by virtue of proximity to current leaders. The current selection and post selection training process results in the organization having to repeat mistakes, deal with rookie leader mistakes, and the morale issues that come when people who were better suited to the role are left on the sidelines and subject to supervision by those selected who may or may not rise to the challenge. Merit system selection has been bypassed and should not have been. Experienced individuals have a body of knowledge and experience that should be evaluated to see whether it has led to a matured and ready leader. We need more great leaders, not succession planning conducted by a few who select based upon unknown and unknowable variables from a very small pool of individuals.

Few positions and pre-selections

Having worked with senior executives in the past, I find the selection process to be more political then actually selecting qualified individuals. Please do not encourage Senior Executives encourage employees to apply unless they are going to support these individuals as there is a concerted effort to submit the application, family support, and huge disappointments at the end. The agency wastes plenty of money and time reviewing documentation that is not warranted when the DCs already know who they are to select. The agency needs to reevaluate the process, save money and time for all. This is the 21st century, and coming from the private sector, their process in selecting future leaders is expedited seamlessly with less cost.

I aspire to one day hold an SES position. I feel that an SES position would allow me to share the experience that I have gained in frontline operations, and exercise proactive leadership that our changing agency requires. I am discouraged that the SSA SESCDP does not encourage FO management to apply for the program. Current SES staff who worked in the field do not actively advocate for the program and reach out to current FO managers to prepare them for the application process. When they do, it is usually right before the application is due. This almost sets FO managers up for failure when an executive nomination is needed, and a short time line does not permit a proper request. The exclusivity of SES gives the impression that it is a members only group, and those who are selected are given the information to apply, while others are intentionally left in the dark. FO management are not even notified of who were selected into SESCDP/ALP to contact for guidance, or to look up to as mentors, which is very sad, as this information is promptly shared within HQ. I was quite discouraged when prior SESCDP classes were opened off the street candidates with no SSA experience, but employees whose leadership was cultivated within the agency were not given notification of how to apply, or that the posting existed on usajobs.gov. While outside perspectives and experience is valuable, so is the morale of the existing work force. Having a level and accessible playing field

would make the acceptance of outside candidates over current SSA managers much easier to entertain. The majority of SES positions are on the East coast, which is an easy transition for applicants who are local to the area and can easily commute home to family and friends. For applicants who are at a distance, decisions of leaving or relocating family must be made. The SES seems to be sacrifice, at the expense of family and stability, for career success. SSA has a lot of talent, and all of that talent is not unique to the Baltimore/Washington, D.C. area. If the majority of SES candidates come from the HQ area, it is not necessarily the best of the best, but actually the best of those who were local/mobile. Many of the people who are much smarter than me, have ideas that could take the agency to a better, more efficient and proactive place, are my colleagues on the frontlines who will likely never be given the opportunity to join the ranks of SES. With the integration of telework and virtual work sharing, I wonder if the possibility of creating additional SES vacancies outside of the Baltimore/Washington D.C. area has been considered. I see the SES as an opportunity to create positive change within the federal workforce. Sadly, I do not feel that the opportunity is accessible to me as an FO manager. I appreciate that this feedback was solicited, and offer my opinion not in complaint, but in hopes that my perspective and the perspectives of others will be used to create a program that prepares the next generation of SES leadership within SSA, and creates a diverse group of candidates. Thank you.
I have the impression that the SES program is geared towards younger people, and that as a person in my later 50s I would not be selected.
I see the recent selections and for the most part they seem to be for individuals who have far less experience than I do. Unfortunately, I believe the agency no longer values employees with experience and knowledge of SSA's programs. In the 1990s I worked in SSA Operations and was selected for a very competitive rotational program. I know I have the experience, knowledge, management and leadership skills to be in an SES position, but I don't want to spend the time to apply when I believe there are few selections of candidates over a certain age.
I think the selection process is weighted toward applicants who have already completed formal developmental programs.
I think the SES doesn't necessarily pick up the "best and brightest" but rather the people who are most mobile and well connected. The agency is missing out on contributions from innovative thinkers because of the mobility requirement.
I think unlike other federal agencies, SSA is only interested in creating SES from its field office personnel so those who come to SSA with advanced degrees in economics and public management are never encouraged to try for SES because the deck is stacked against them from the beginning.
I was told indirectly that they are not interested in promoting white males. They only want minorities.
I would be interested in the CDP or SES positions, however, it appears that selections are based on location (HQ) and/or the influence of current SES developing protégés based on interpersonal relationships. I hope these programs are streamlined, become more transparent, and diverse in the future.
If you are not one of the "favorites" of management, you do not stand a chance in the process. It is clearly rigged for those with support from management. I would not have that support.
I'm not within the demographic currently being pursued for those positions.
It appears if upper management does not tap you on the shoulder and say apply for SES; you are wasting your time. It appears to be a pre-selection process; thus omitting very talent and strong employees throughout the agency.
It appears that most selections are from the Regional Office who enjoy most details.
It appears to be predetermined.
It has been a long tradition that candidates are chosen who have a certain relationship with SES in the organization. Basically, if you don't have anyone who has stated that they are willing to sponsor and help you develop then you are wasting your time.
It is my perception that SES members are looking for people with similar character traits and personality to join their ranks. During my time with SSA, I have learned that our most underutilized asset is our diversity. Unfortunately, I do not think that this view is shared by those in prominent positions within SSA. As a result, I do not think that I would be an effective SES member.
It seems to be targeted to Regional Office employees only. The field is sent an email about the program but developmental opportunities aren't really offered. Money may be factor.
Management is not really interested in its' experienced employees or those who have a truly intelligent and rationale opinion to share. Management also only wants a select few (those who tend to parrot their decisions and choices)to be involved in molding the direction of the agency and in policy considerations for the future.

Qualifications seem somewhat ambiguous. I have never been approached by any senior level people encouraging me to pursue this option, yet I know of other who have been approached. Not sure why some are chosen and others are not.
Seems the program has in the past been preselected based on affiliation with other current SESers.
Selections for CDP are suspect. Instead of selecting people who have excellent people skills who others will indeed want to work for, some are selected for other skills (e.g., project management or technical knowledge). There should be a place for those folks but NOT leading and inspiring others.
The candidate that will be selected for a position at SSA is a fait accompli prior to the job posting. A 'fair and open' application process is required to comply with the rules, but it is just a facade that wastes everyone's time except that of the pre-selected candidate. If someone wanted me to join the SES CDP they would have told me to apply. Absent that, why in the world would I waste my time?
The main concern I have is that unless you are sponsored by someone in a "good" political position, you will not be selected. My second concern is the requirement to work in various locations/being mobile. Not something I wanted to do while raising a family. Additional Comments: - At the GS14 level the next logical step is the GS15. As an Outstanding employee there is no opportunity for promotion within the Office of Systems. We "hear" that we are too top heavy and that there are sufficient GS15s already.
The only time I applied several years ago, I scored very high. When I did a follow-up session on my application and non-selection, I was told there was an emphasis on selecting minorities, and that was the difference--just not enough spots for non-minority males. Not sure it's worth going through that again.
The process is not fair, especially if your management is not supportive. If you are not in favor in your component, you will not receive support and therefore are not considered.
The process seems to be rigged. It's not what you know, but who you know. Candidates seen to be pre-selected and the process does not appear to be competitive.
There is a common belief that the SES program is a "club", and you need to be of a certain look, background, social group, etc., to REALLY have a chance for selection.
Very prevalent impression it is a foregone conclusion in the regions that the ultimate selection(s) are known long before the process ends.
Why bother, selectees are preselected and there is very little diversity in the process. The exclusivity in the selection of candidates essentially excludes minority women.
With only a few token slots given to "over 50" candidates and non-diverse candidates, it was not worth the application work which takes hours. The results do not show fairness. Its the same with the ALP program.
As noted in previous page. There is the expectation to be a GS-15 prior to SES. While that is somewhat of a reasonable expectation, GS-15 competitive positions are few and far between. So GS-14s are limited in their ability to apply for, or at least their expectation of being selected for, the SES candidate program.
<i>Not Worth It</i>
A GS-14 and GS-15 make almost just as much money. I've seen the way the execs treat others and I have absolutely no interest in being subject to their demands 24/7.
All the SES positions work late every day and on weekends. Private sector positions with that level of responsibility make several times more a year.
As stated - prior to going through the Advanced Leadership Program I was certain SES was in my future. However, after seeing how hard they work and their add'l demands, for not all that much more money - NO THANKS. I also, as a single, childfree man would worry I'd be sent somewhere I did not want to work/live. xxxxx
Considering how much bad press there is in the US regarding the SES programs (such as at the VA), why does it behoove me to apply for this program when I can be fired on sight for something I have not have had any involvement with? Rather, I can stay at a GS-14/15, keep my job security, keep my location secure, and be able to have a work/time balance happiness. And since the pay does not match the stress you'd be under, it doesn't make sense either.
Entry-level positions in the private sector earn more; spineless and reckless politicians insult and denigrate SES officials; the responsibilities and liabilities are enormous, without commensurate respect nor compensation.
Expectation you give 200% and work 24/7 when assigned in headquarters. No one should have to commit to that degree. It is possible to balance both and be an outstanding employee.

Expending the resources and effort to participate in the CDP and SES is not worth the current rewards received. The application process discourages participation. Guidance, involvement, engagement, and mentorship are needed by agency executives for the development of future leaders. As it stands, the CDP and SES is not suited to what I want for a future career trajectory.
Having worked in a field office for 35+ years, I feel there's more of a need to stay in the field to help serve our claimants on the "front line".
Having worked with SES's at another federal Agency (within DoD), it doesn't appear that, at least at the AC/DAC level, that SES's here at SSA have any real authority -- it seems like almost everything has to go up to DC/ADC level for even the most minor of things. At DoD, being an SES is equivalent to being a flag-officer and is a BIG DEAL, and they have the authority to approve things. Here at SSA, not so much - and unfortunately that lack of authority permeates downwards so that front-line supervisors don't have any real authority either. I think we're all just cogs in this huge bureaucracy with multiple layers of "supervision" with little authority. So I don't see the value of growing into an SES at this Agency -- perhaps another one where SES's have real authority.
High stress position; at this point within SSA, rank and file SESers appear to have limited ability to influence outcomes in the agency.
I achieved my career goals. I am not interested in becoming an SES. I am happy at my current grade level and my current job responsibilities.
I am a congressional affairs person. SES would remove me from the work I know how to do best and enjoy.
I am at a place in my career tenure that would make me question whether SES would be worth disrupting my life, changing locations, etc.
I don't want the perceived pressure that would come with an SES position. I already have enough pressure in my current position.
I do not think the rewards are sufficient for the difficulties and burdens that likely follow.
Inadequate salary, bonus money, and fringe benefits compared to comparable positions in private industry. When you become SES, the increase in responsibility and the demands on your time go up way more than the relatively minor increase in compensation. It is not worth it.
It seems like SES requires a lot of training and job flexibility as well as increased paperwork and the pay is not seem commensurate with the work.
Life change is so drastic and pay is not commensurate with the change.
Not interested in late hours, being away from family.
Notwithstanding personal reasons captured earlier in the survey, I have worked with and for multiple SES members and find the expectations as to what can/should be accomplished extremely grueling for the individual. They all accomplish great things, but the time constraints and sheer volume of expectations seems to wear upon them.
Personal risk (such as congressional oversight, political scrutiny, etc.) outweigh the benefit of public service.
Reasons for not applying are not specific to SSA. I've been in several other agencies. The responsibilities, workload, politics involved, and requirement to be mobile (both within the agency and geographically) far outweigh any increase in pay/prestige that comes with being SES. It is just not worth it.
The amount of additional tasks SESers are required to do (many of which seem like fluff), along with the increased risk due to lack of predictability in the location of work/role you fill, and huge increase in time commitment outside of normal hours and negligible increase in pay make the tradeoffs tilt highly in favor of the negative.
The current mood in Washington is to target and fire SESers, and the pay increase is minimal. As with people who go into politics, you wonder about their state of mind. And to date, the people who have gone through the SES program are less impressive than those who were promoted without it. Grooming is nice, but in the field promotions for excellent work is better. I expect your better leaders will not be pondering the program but rather step up to meet a need when called upon.
The money isn't worth the headaches!
The SES positions are fine for those with management goals. I would rather see the GS-16/17/18 slots brought back. I think SES gives up a lot of protection for their slots.
Very little financial reward for some severe life balance loss.

Having to find your own assignments seems like a lot of work. SES staff is constantly moved around the agency.
No guarantees where you will end up! Very political
For the time being, I am trying to assist OIG combat fraud, abuse and misuse in the position I am currently in with the tools and responsibilities assigned to me. Not sure if SES expectations would allow me the same degree of flexibility to accomplish the same or more regarding upcoming efforts to combat fraud, abuse and misuse with Predictive Analytics tools and methodologies that I am learning about.
<i>Age/Near Retirement</i>
I am 72 years old.
I felt that my age would be a factor in the decision making process. Also I did not want to apply for a position when someone who was younger and could serve longer would possibly be displaced.
I'm too old -- will be 69 later this year.
Ask I indicated I feel it is too late in my career to participate/apply for a SES position.
At age 60 I am too close to retirement to start in such a program.
At the end of my career.
At this point I am too close to retirement to be SES. Also the mobility clause really influenced me not to apply. Where I live has a major influence on my work life balance.
At this stage of my career I am not interested in SES positions.
Considering retirement.
I am at the tail end of my career and would not want to shortchange the agency by only having a short-term commitment. The opportunity to apply for CDP or SES positions came along too late in my career.
I believe this is a great program. As I am considering retirement in the not so distant future, it would not be fair to take time away from others to review paperwork etc. when I'm possibly leaving.
I have been with SSA for 38 1/2 years, and plan to stay for 42 years. I do not know whether it would be in SSA's best interest to train me and when I might leave in 3 to 4 years.
I plan to retire in the next 3-5 years and don't really think there is any point.
I wish I had received the encouragement in the past, but I never had a supervisor talk with me about the program. I have 30 years' experience in management and have much to offer. I am now looking forward to retirement.
I work to live; not live to work. SESers are expected to do the opposite. SSA's lack of succession planning will make managing much more difficult in the future. For example, I informed my executives months ago of my plans to retire. Any organization with a sound succession plan would have placed someone under my wing. Unfortunately, SSA is waiting until I retire to replace me and letting nearly 40 years of experience walk out the door without any knowledge transfer.
It is too late in my career.
just an FYI for the survey that I am new to my current position and within 5 years of intended retirement. Thanks!
my time in the government- I possibly have about 2 years left to have 41 years.
Nearing retirement within the next few years.
Plan on retiring in the next couple of years. I don't believe it would be beneficial to the agency
Planned retirement after 40 years' service on 07/03/15

Prior to 2013 family commitments kept me close to home, since then my decision to retire within the next two years made my applying for the SES inappropriate.
when I was younger, I didn't have the mobility==now that I'm older and more mobile, I will be retiring!
Will be retiring soon
<i>Timing</i>
As soon as my children are a little older I plan to apply for the CDP. If an SES position becomes available in OGC, I will apply for it. I may apply for other SES positions in the future.
Being an executive is not the same as being a glorified technician, though at times, with some, it's hard to distinguish between the two. Introspection is important to me. Ensuring I know how to do my GS-15 job well before moving on is also important in order for me to be an effective executive. Thinking you are ready vs. being ready or two different things. I want to make sure I can contribute as an SESer; so I'd like to learn as much as I can as a GS-15 before making the leap.
From my understanding, the SES Positions is for managers will plenty of years of experience. I have just begun my DM position and am striving to learn this position well before I seek elsewhere.
I am a single parent and my child is leaving for college in the fall. I would then probably apply, however I am not a "yes" man which would probably hurt my candidacy.
I am currently participating in a regional LDP. It is not time to consider SES, but the program is on my radar.
I am highly interested in the SES CDP. I have great skills that would translate well into future growth and success for me personally and for the benefit of the agency.
I am not sure if I can apply for SES positions without first completing the CDP first. I have received encouragement from my previous four supervisors as well as from my subordinates to strongly consider the SES. Therefore, I plan to apply in the future. Thank you for including me in the survey and for taking the survey.
I am very busy in my current job, so I don't always pay attention that a position has been posted. Also, at this point in my career, I would consider applying directly for an SES position rather than applying for the SES CDP.
I feel I would benefit from more time in various lateral positions in order to be well rounded and better prepared for a future SES role.
I feel my career at SSA is still in the beginning stage and that some experience as a supervisor would help before applying for the CDP or SES positions. I am currently in a supervisory position since August and would definitely consider applying for the CDP or SES positions in the future.
I feel that I need more time to develop my managerial expertise as a HOCALJ.
I have been encouraged by SES to apply. I fully intended to apply for the last class and even filled out the application. However, DCHR would not accommodate the fact that I was on military duty for the first half of the application period. When the process requires SES endorsements, those SES who want to give endorsements need adequate notice and time to draft endorsements.
I plan to apply for the next SES/CDP. I made significant improvements in the process in my current office, but I still have work to do. Thank you for the opportunity to comment on the SES/CDP process.
I promoted to my target position GS-14 Level 1 Manager in my hometown office/district in 11/2013. I participated in Region 9's leadership development program in 07/08. Since, I have served in 9 different positions/offices/locations (two states and two different components i.e. Field/Teleservice). For now, I am working on learning my new job, developing my skills and abilities to prepare for SES. As well, I am working on completing my degree in anticipation of an SES career.
I simply do not feel I am ready to be SES.
I was hoping to get into the SSA or SSA OIG LDP programs first and then tackle the SES CDP program in a few years. My resume shows completion of extensive leadership training opportunities and dozens of Agency and outside Agency awards. I really wish to advance into leadership and managerial roles and supervise employees, but I encumber a very technical position and many SESers and upper level management here in SSA tell me supervising employees is a huge headache. I need opportunity as a very technical person - if given the opportunity, I can guarantee you I will shine and exceed expectations.

I would like to apply in the future. Recently, I felt that I lacked the necessary experience to be considered after having reviewed the sample answers.
I'm relatively new to my current position (10/13). I have a lot more I can accomplish here before I feel a strong urge to seek new challenges.
I'm very grateful to be a part of this agency and have been blessed to have several promotions over the years. I feel very strongly that I must master one position before moving on to the next. CDP and SES just seem to come up at times where I have just been promoted or started a new position. I certainly appreciate the opportunities, but to leave a staff so soon after just being placed there is a detriment to the team itself. And, I don't feel like I can be a true benefit to the next position without taking the time to learn. So, I guess it's just a matter of mismatched timing, but that is certainly not the fault of the CDP or SES programs.
It would add a lot of stress to my life -which on a personal level is changing, so now is not the right time for me.
Just now in a position professionally and personally that allows for serious consideration for applying for such a challenging assignment.
Maybe later in life the role will fit me. For now, the personal, not financial, pay off does not justify the toll/cost.
Need some more experience and skills before I consider applying.

### *Management Support*

Director and executive management in my area to do encourage, or mentor the process to apply for CDP or SES positions. We tend to get caught up in the day to day work and do not make time for opportunities such as these.
First, this question is worded to ask why I don't apply when I usually do apply when I know my supervisor will support me and I will receive a fair opportunity to compete. Several SES officials have suggested I apply; however, I had a supervisor who in my opinion clearly showed favoritism based on race. Therefore, I would not have been supported and my accomplishments, performance and skills would have been overlooked. Unfortunately, some of our leaders do not understand that a small number of people still make decisions and judgment about others based on race, ethnicity, gender and other factors that should have no place in the decision making process.
I feel that some members of management are reluctant to support employees' participation in leadership development programs, including SES, because they see the programs as taking employees away from performing their day-to-day jobs. This reluctance, when it exists, protects the individual component and its productivity for the short-term, but harms the overall component and agency interests in the long-term, to the degree people with excellent leadership potential do not pursue these opportunities.
I have a strong feeling that the SES application process is biased toward minorities and strongly influenced by affiliation with certain groups, e.g. Advisory Councils. I have worked hard, produced results, achieved a Outstanding overall performance rating but I've never been approached by anyone regarding the SES. Several colleagues have told me that they have been approached by SESers. I assume that's how it works. I find value in my job every day and am quite content not to apply since I have not been approached/sponsored. Thanks for seeking input.
I have been under my current supervisor for 4 years and they are not supportive and does not appreciate the efforts I put into my current position. I have received all 5 for the previous 6 years prior to my current position and am not supported.
I have been with the Agency over 40 years and have worked in management over half that time. Never was I encouraged to seek any candidate program nor was it really explained. In addition, I am not physically mobile, so going to other locations is sometimes a hindrance. I have enjoyed a wonderful career with the Agency and I am thankful for all the opportunities that have been afforded me.
I have had outside my division SES'ers discuss the program with me and encouraged me to apply. But never my own executives, so I suspected that they would not support me.
I have never been approached to consider being a candidate for the SES program.
I was not encouraged to apply and therefore, interpreted that as not having the support of my supervisor. I am very interested in the development that the SES Program provides.
I will never be in a position to apply for an SES position because the organization of which I am a part is not the least bit interested in helping me develop my career. Age discrimination is rampant in SSA. It begins the moment a supervisor decides who they want to groom for promotion and who they will leave behind. Once the younger people

get the significant assignments, it is easy to justify their promotions. If the older individuals are not ever assigned significant work, they are not ever part of the competition. If I sound bitter, it is because I am.
I would likely have applied a number of years ago if I thought that I would have had the support of management. However, I had such a negative experience that I decided I would not have a chance at being selected. So, I am waiting to retire.
If past supervisor wouldn't support us for ALP or Excellence in Govt, there was no way we could get in the front door of SES.
Main concern is getting the development and support of current leadership.
My observation is that candidates for CDP or SES positions who are not "informally sponsored" by a recommending official will not have their application even considered for selection. Folks who submit well written and thoughtful applications supported by very good performance reviews but are not the "it" applicant, will not receive consideration based on merit. Hence, no recent applications from me.
My observation is that candidates for CDP or SES positions who are not "informally sponsored" by a recommending official will not have their application even considered for selection. Folks who submit well written and thoughtful applications supported by very good performance reviews but are not the "it" applicant, will not receive consideration based on merit. Hence, no recent applications from me.
One of the SESers for whom I work said "Why would you want to go SES--you have the best job in the agency right now." The other was relatively new to our component and did not know me very well professionally. He was given the task of writing my recommendation to the program. When I reviewed the recommendation, I did not feel it was sufficiently positive for me to go forward with my application, although I had already documented all the core skills necessary to apply. For the 13 years prior to coming to SSA, I was a DDS director for a medium-large state. Both the DDS and I were frequently given awards by SSA for performance, management skills, collaboration, and innovation. During my first few years in this component I was managing a project which was then--and is now recognized as a "game changer" for the component. I have personally received 5 Commissioner Citations from three different Commissioners. Yet the recommendation I received from someone who had managed me a year or so was, in my opinion, tepid. I was clearly not the person that senior management wanted to put forward as the component's candidate. I have no desire to put that kind of effort into another application.
References from SES level executives not readily available, especially for employees who work in the field office component.
sometimes when you do your job very well and are surrounded by people who do not work, the tendency is for your management to be interested in solving their own problems by blocking high performers from leaving for new opportunities; high performers need a way to get into the development programs -- without direct line mgmt approval -- e.g., have people qualify on their own merit, instead of merit plus recommendation.
Supervisor never talked about it.
The AC in my office is very selective as to whom they support for promotions (i.e. Per promoted staff, they were called to file for a promotion and then were promoted). I do not see my AC supporting me. I am not encouraged to file the way others have.
The reason I haven't applied to an SES CDP is because my current Associate Commissioner does not support my upward mobility. I have a Master's Degree and I'm an extremely hard worker, but the culture in Operations is that you have to be the AC's friend or part of their outside the workplace clique, before I am "inducted" into the family. There is fear placed in the heart of employees to speak up against wrongs. Just recently, the Commissioner visited our organization and we were told beforehand that we had to tell our staff to not ask questions. All questions staff wanted to ask had to be vetted through the AC and then the Director selected who she wanted to ask the question. Because of this barrier, so many good questions went unasked of the Commissioner. There are great leaders, such as the Commissioner in this Agency, who want to make a change, but there are bad ones as well at the Executive levels. This is very unfortunate for some very hard working employees, who might have without knowing burned a bridge with an Executive; especially a high powered one. I think Executives need to be always professional and nurture all their employees regardless of personal feelings of like and dislike. I doubt in the current environment that employees who are not supported by their AC and/or Deputy Commissioner will ever move into the SES ranks. Usually GS-14s are not supported in HQ, because they still have to "pay their dues" at the GS-15 levels according to some Executives.
The requirement for a letter of recommendation from a current SES member is difficult for a field manager who does not interact regularly with SES. I took it to mean that if someone in SES had not invited me to apply and offered to write such a letter, met once or twice to write a letter, nor would I expect them to have the personal knowledge of my abilities required to make such a recommendation. I had intended to apply based on the outreach on the DCO

call, but then realized I had not been "sponsored." I was prepared to complete every other part of the application, but that one stumped me.
There is a total lack of management encouragement other than pro forma statements. Those they want they encourage.
<i>Not Interested</i>
Wanting to stay in my current field, Information Technology.
-honestly i have no interest. I am retired military and this is a lifestyle maintenance job until i fully retire. But if i did, the next 2 points would influence my decision. -if current AC of Component I work in represents a typical SSA SES, I want nothing
I didn't consider it.
I have been very satisfied with every position I have held from a grade 7 benefit authorizer, to grade 11 claims, 12 quality reviewer, 13 program leader, and now branch chief. I have had a very satisfying career. This is my last job. I have no desire to advance my career and am far from complacency in my current position. Agency resources continue to dwindle and over the last couple of years, more and more administrative responsibilities are being placed on management. I feel we're constantly being backed into a corner, trying to accomplish the day to day work; addressing issues through crisis management and handling the "flavor" of the month priorities. More and more work is being "thrown over the fence" and accountability is a thing of the past. Although, I wonder if accountability was ever there; the blame game is our best defense. Poor performers cannot be dealt with effectively because of the administrative burden. Morale amongst our top performers is severely affected as a result. Burn-out is inevitable if not already there. Yes, without question, these are turbulent times in the government. As a result, I feel our goals/priorities are becoming more and more unrealistic or attainable. We seem to have time/resources to invest in fixing things after that fact; but not the time to properly plan/execute the first time. Lately, I've been questioning my effectiveness as a manager.
I have no interest in an SES position
I have no interest in any senior management position; I have never had an interest in any senior management position.
I see myself primarily as an adjudicator and would not like to lose that skill.
I would rather be a an ALJ or an AAJ.
I'm happy with my work-life situation.
I'm pretty much stretched to the limit now as it is.
It's actually quite simple: I'm not interested. You all make it sound as if everyone should care for an SES position. You should have had as first question in the survey whether the person is even interested in the SES program, and if not, be done with it.
I've think I've accomplished as much if not more than if I was in the SES program. It is a matter where the right place for me to be to best help this Agency.
Just not interested at this point in my life. Happy with current position.
long term goal position has not been SES but uncertain about where that job is headed
never had an interest
satisfied with current position and still learning to be a good manager
Although I am not interested in an SES position, I think that Agency leaders could reach out to potential applicants to encourage participation. Obviously, mobility is a factor that applicants need to consider.

### *Unlikely to be selected*

Current SES vacancies indicate you must have been in the GS-15 grade for 52 weeks. I was interested in applying for the CDP, but I was told it would be highly unlikely a GS-14 would be chosen unless he/she was already in Central Office.

Experience applying for other positions suggest I would not be selected.

Have never made it to the interview stage of the ALP (have tried twice) so I believe I would not have the necessary skills to get further in the SES application process either.

I am an introvert by nature. Based on my observations of people in the SES candidate program or in those positions, introverts do not fare well.

I am not sure I am "in the know" or, have backing/support from executives who make decisions.

I didn't think I'd make the cut since I wasn't sure my background/experiences were strong enough.

I enjoy practicing law. In my observation, SES folks are more managers than practitioners. Essential to the operation of an organization, but it would be a major shift in professional focus to no longer practice.

My main concern was the amount of time I would need to invest in the application process weighed against everything I had going on in my home life and work life at the time. Combined with the fact that the number of 14s selected are extremely limited and I can't cite supervisory experience (being a tech 14), my chances seemed so low that it wasn't worthwhile.

The last application I sent (for the ALP) I was not selected and received no feedback. Really this is a lot of information to submit and receive absolutely no feedback. Also, my current supervisor is very unsupportive on any career development on my part. And lastly, my impression is there is a fair amount of what I might call pre-selection for these positions--true or not that is my impression.

I do not think I would be given a fair chance to succeed in the program.

### *Pathing*

A mentoring program for those considering SES would be helpful to prepare for and become oriented to expectations and challenges of SES

If the budget/financial experience continues to be a requirement, many exceptional ODAR attorneys will never be eligible for the program. Also, the agency needs to make more opportunities in general for excepted service employees.

I'm in a technical role, not managerial role. My understanding is that SES is for a managerial career.

It seems that the goal of maintaining a certain staff to supervisor ratio is at cross-purposes with the leaning of the SES program to selecting those in supervisor roles. It would be good to create other paths to the SES opportunity.

many programs limit excepted service participation which is generally what all agency attorneys are hired under

### *Education*

Do not feel by only having an associate's degree that my package would get more than a cursory look. My experience level comes from practical experience not from sitting in a class.

I have not finished my undergraduate degree, and I believe the agency looks down on employees that don't at least have an undergraduate degree.

I would love the opportunity, but it seems that because I do not have a college degree, there is no chance of getting selected. I would think the many years of experience would count...

## *Other*

All SES participants should spend time in Field Office operations, learning about our delivery of services to the public.

I believe SSA is not developing and maintaining the expertise needed to keep this agency performing at the high level expected by the public. We are losing highly technical staff and we are not preparing younger staff to take over the technical duties. The agency's efforts to reduce the supervisor to employee ratio is also short sighted for the same reason. We need younger managers "waiting in the wings" to take over when "seasoned" managers retire.

I cannot stress enough the significance of the lack of consistent, nationwide protections for gay and lesbian persons influences many of us not to apply. There is no federal law that consistently protects LGBT individuals from employment discrimination; there are no state laws in 29 states that explicitly prohibit discrimination based on sexual orientation, and in 32 states that do so based on gender identity. In addition, our marriages may not be recognized in all States, much less our families should we have children. The thought of being sent to work in certain States is absolutely terrifying when you consider that you could lose recognition of your children, your job, your right to visit your spouse in the hospital, etc.

I have done my research and am informed.

I have great respect for our agency leadership. I would really like the process to yield the very best candidates to move the organization forward.

I would like to be part of the SES program.

I would suggest establishing a portal for the Agency's SES staff to record mini presentation on the SES process, roles with the Agency and challenges along with relevant leadership competencies. These presentations could be viewed by interested applicants throughout the agency. Also, quarterly "brown bag" Lync sessions should be established to allow for live Q&A with SES personnel.

I'd like to see more diversity in the SES ranks. Conversations about the SES program should happen more frequently for effective succession planning.

If I do end up in an SES position, it will be within my component, and the selection will be based on component-specific skills, so I have no interest in the CDP. There haven't been any SES openings here in the time I've been working, so I haven't had to give serious thought to applying for one yet. I will consider it carefully when the time comes.

Many of these programs are specifically developmental, or promotion-oriented. It would be nice to have such programs available to those who are not looking to change jobs, but want to learn more about how SSA works and gain additional experience to make us better at the job we already have.

No. However, this survey was nicely organized and worded. Great Job!

Overall, I think there is a lack of good leadership development programs at SSA. I have not received adequate training for my management position. There should be structured program for all managers, including a mentor. The training should not be offered via VOD. It should be periodic in person training where managers can network and share problems.

thanks for having this survey

I have been acting in an SES position in OGC for more than two years. I love my job, enjoy working with attorneys, and want to stay in OGC. I hope to be able to compete for my position sometime in the future.

*OGC: Here to Serve*  
*Excellence Integrity Judgment*

## OGC SIGNIFICANT LITIGATION BRIEFING

# Litigation Overview

- The litigation OGC handles falls under two broad categories: Program litigation and General Law litigation.
  - Program litigation involves challenges to, and issues concerning, SSA programs.
  - General Law litigation involves challenges and issues that are unrelated to SSA programs.

# Program Litigation

# Types of Program Litigation

- Although most program litigation involves individual claims for benefits, some litigation may involve multiple claimants
  - Class actions
  - *Qui tam* cases
  - Other cases (*e.g.*, constitutional challenges)

# Types of Program Litigation (cont'd)

- Class actions—generally involve a challenge to an agency rule or policy that affects a large number of claimants
- *Qui tam*—an action brought under the False Claims Act that allows a whistleblower to receive part of the funds recovered by the Government
- Other significant cases—may involve a single plaintiff or just a few claimants, but involves an important issue (*e.g.*, constitutional issue, same-sex marriage)

# DOJ Staffing

- Most individual program litigation cases are handled by U.S. Attorneys' Offices or OGC attorneys (as Special Assistant U.S. Attorneys)
- Significant litigation may involve:
  - U.S. Attorneys' Offices
  - DOJ Civil Division, Federal Programs Branch
  - DOJ Civil Division, Civil Fraud Section
  - DOJ Civil Division, Appellate Staff

# Program-related Class Actions

- Historically, class actions tended to involve challenges to disability program policy
- Examples
  - Evaluation of pain
  - Treating physicians' opinions
  - Continuing disability review standards
- 1980s—Saw a historically high number of program-related class actions—over 40

# Program-related Class Actions (cont'd)

- In the last two years there has been a significant increase in number of class actions and significant litigation against SSA
- Fiscal year 2014—4 class actions or other significant program cases filed
- Fiscal year 2015—18 class actions or other significant program cases filed
- Fiscal year 2016—9 class actions or other significant program cases filed (not including over 100 individual fraud redetermination cases that may involve constitutional and statutory claims)

# Program-related Class Actions (cont'd)

- Most current class actions don't involve challenge to disability program policy
- Broad range of issues including:
  - Same sex marriage
  - Treasury Offset Program
  - Windfall Elimination Provision
  - Fraud redeterminations

# Same-Sex Marriage

- Murphy (D. D.C); Williams (N.D. Ill.)
  - Title II surviving spouse benefit applicants from states without same-sex marriage, after Windsor but before Obergefell
  - Murphy: Agency issued fully favorable decision to named plaintiff; plaintiff dismissed case in March 2016
  - Williams: Appeals Council issued fully favorable decision after court remand
- Held (N.D. Cal.)
  - Class action: SSI claimants whose marriages were recognized after Windsor, resulting in overpayments caused by the delay in recognition
  - District court dismissed due to lack of jurisdiction; while case was pending appeal, SSA made a policy change that addressed issues raised in the case, and plaintiffs voluntarily dismissed their appeal

# Treasury Offset Program

- Grice (D. Md.) and Heard (D. D.C.)
  - Class actions challenging collection of delinquent overpayment debt from beneficiaries' tax refunds
  - Court initially denied SSA's motion to dismiss on jurisdictional grounds
  - After SSA waived named plaintiffs' overpayments in both cases, the district courts dismissed cases as moot
  - Cases are pending appeal in the Courts of Appeals for the Fourth Circuit (Grice, now captioned Hart v. Colvin), and D.C. Circuit (Heard)

# Fraud Redeterminations

- Martin (E.D. Ky.)
  - Class action: due process challenge to suspension of benefits for claimants connected to Eric Conn and challenge to fraud redetermination process
  - District court dismissed for lack of jurisdiction, and plaintiffs' appealed to the Court of Appeals for the Sixth Circuit
  - Case is briefed and will be argued on December 2
- Justiniano (D. P.R.)
  - Class action: challenge to redetermination process for fraud cases in Puerto Rico
  - District court dismissed the case for lack of jurisdiction on August 3, 2016, and no appeal was filed

# Fraud Redeterminations

- Robertson (S.D. W. Va.)
  - Case involves same issue that was raised in Martin
  - On October 5, the district court dismissed the case for lack of jurisdiction and denied plaintiffs' motion for class certification
  - On October 18, plaintiffs filed an amended complaint, raising similar issues to the complaint the court dismissed

# Fraud Redeterminations

- Individual Cases Involving Redetermination Process
  - Redetermination hearings in Eric Conn fraud case have resulted in over 100 civil actions seeking judicial review of the agency's unfavorable redetermination decision
  - District courts have reached conflicting results on the validity of the process

# Fraud Redeterminations

- On October 12, in Hicks (E.D. Ky.), District Judge Amul Thapar granted plaintiff's motion for summary judgment and held that the agency's fraud redetermination process denied plaintiff due process because she was not allowed to challenge the finding that there was reason to believe fraud was involved in her application.
  - The court issued orders in six other cases adopting the reasoning of Hicks.
  - The agency's Rule 59(e) motion seeking reconsideration of the court's order is pending.

# Fraud Redeterminations

- On November 15, in Carter (E.D. Ky.), a consolidated case involving nine plaintiffs, District Judge Danny Reeves granted the agency's motion for summary judgment and upheld the constitutionality of the fraud redetermination process against a due process claim identical to the claim made in Hicks.
- On October 6, in Perkins (E.D. Ky.), District Judge Joseph Hood denied plaintiff's motion for a preliminary injunction. The court found that plaintiff had not established a likelihood of success on his claim that the redetermination process violated the statute and due process.

# Disability Policy

- Consultative Examiners
  - Hart (N.D. Cal.)
    - District court certified a class of individuals who had a consultative examination by a specific CE provider in California
    - Parties agreed to settle the case, and the district court gave preliminary approval to the settlement on November 9, 2016. The court will hold a final approval hearing on March 16, 2017
  - Keovongsa (S.D. Cal.)
    - Class action challenge to use of a specific CE provider in Southern California
    - District court dismissed the case on June 20, 2016

# Disability Policy

- Use of Vocational Experts
  - Ash (E.D. Wis.)
    - Challenge to SSA's use of vocational expert evidence.
    - District court dismissed case as to all but two plaintiffs on March 28, 2016, and allowed plaintiffs to amend their complaint
    - Plaintiffs filed an amended complaint, and SSA's motion to dismiss is pending a court decision

# ALJ Bias

- Ahmed, Smith, Seibel (W.D. Wash)
  - Class actions: Allege bias by three ALJs in Seattle Hearing Office
  - Ahmed dismissed for failure to exhaust remedies
  - No class certified in other cases, but review of individual claims by court is pending

# Windfall Elimination Provision (WEP)

- Mitchael (E.D. Ark.)
  - Challenge to application of WEP to dual-service National Guard technicians in Eighth Circuit prior to Petersen decision and Acquiescence Ruling (AR) 12-1(8)
  - Court of Appeals for the Eighth Circuit affirmed decision to dismiss for lack of jurisdiction on January 13, 2016
- Crawford (M.D. Ala.); Martin (N.D. Ala.); Bauer (M.D. Fla.)
  - District court challenges to application of WEP to dual-service National Guard technicians
  - In Eleventh Circuit, so not covered by AR 12-1(8)
  - Decisions on motions to dismiss pending

# Windfall Elimination Provision (cont'd)

- Greenberg (D.D.C.)
  - Class action: challenge to application of WEP to recipients of pension from Israeli National Insurance Institute
  - SSA agreed that WEP should not apply and quickly settled case
  - SSA is currently implementing settlement, recalculating benefits retroactive to 2004
- Beeler (S.D. Ind.); Barnes (W.D. N.C.); Turnbull (D.D.C.)
  - Class actions: challenges to application of WEP to recipients of benefits under the Canadian Pension Plan (Beeler and Barnes) and pension plans of Canada, United Kingdom, Norway, Germany, and Greece (Turnbull)
  - Barnes was voluntarily dismissed on May 23, 2016. A motion to dismiss in Beeler is pending. Turnbull is only recently filed, so there has been no response by the agency to the complaint yet.

# Representative Sanctions

- Manbeck (S.D.N.Y.)
  - SSA sought to sanction Manbeck for refusing to do business electronically
  - Manbeck argued that ALJ appointment process is unconstitutional because Commissioner does not directly appoint ALJs
  - SSA withdrew proposed sanctions, and district court dismissed the case as moot
- Nassiri (S.D. Cal.)
  - Class action: challenge to alleged searches of Vietnamese immigrant claimants by armed SSA agents, supposedly to pressure claimants to recant testimony in prior rep. sanctions case against Manbeck
  - Partially dismissed, and class certification denied, but remains active. Renewed motion to dismiss pending

# Hearing Office Scheduling

- Johnson (S.D. Fla.)
  - Challenge to delay in scheduling hearings in Miami HO
  - Several plaintiffs have voluntarily withdrawn after having hearings scheduled
  - Motion to dismiss is pending

# Due Process

- Amin
  - Challenge by 11 plaintiffs to New York City field offices' failure to timely document reconsideration requests in SSI cessation cases and waiver requests in SSI overpayment cases
  - Plaintiffs allege they have unable to have benefits continued in full while appeals were pending
  - Government's motion to dismiss is pending

# Qui Tam Cases - Background

- Involve alleged fraud against Federal Government or its agencies
- Whistleblower sues in Federal district court
- Department of Justice decides whether to intervene in the case
- Whistleblower gets reward – percentage of the damages recovered and attorneys' fees

# General Law Litigation

# General Law Litigation

- All of our current significant General Law cases are discrimination complaints brought by SSA employees before the Equal Employment Opportunity Commission (EEOC).
  - one active
  - two pending
  - one where the settlement is being implemented.

# Significant Active General Law Litigation

- (b) (6) v. SSA
  - Complainants originally alleged that SSA discriminated against African-American men at Headquarters based on race and gender in promotions and awards decisions.
  - Successful agency motion practice narrowed the scope of alleged discrimination and reduced the agency's possible liability from more than \$8.5 million to \$2 million.
  - Pre-class certification fact and expert discovery has concluded.
  - The motion to certify the class is fully briefed and has been pending before the EEOC since July 2016.

# Significant Inactive General Law Litigation

- (b) (6) v. SSA
  - This is a breach of settlement action that arose from an earlier class action settled in 2002. This action alleged that the agency violated the settlement agreement.
  - The EEOC found in the class's favor on the breach allegation and remanded the case to an Administrative Judge to distribute compensation to each class member.

# Significant Inactive General Law Litigation (cont'd)

- (b) (6) v. SSA – cont'd.
  - In August 2014, the Department of Justice Office of Legal Counsel issued a legal opinion concluding that the EEOC did not have authority to order SSA to pay money damages for the alleged breach. Despite this opinion, the EEOC Administrative Judge has ordered the case to proceed.

# Significant Inactive General Law Litigation (cont'd)

- **(b) (6)** v. SSA
  - Complainants challenged SSA's promotions of African-American women in positions at the GS-5 through GS-13 grades at Headquarters between 2003 and 2013 as discriminatory based on race and gender.
  - After a hearing in 2008, the Administrative Judge ruled only those at the GS-11 to GS-12 levels were affected.
  - In 2014, both SSA and Complainants appealed the Administrative Judge's decision to the EEOC Office of Federal Operations in 2014, where both appeals are currently pending.

# Significant General Law Litigation Under Implementation

- **(b) (6)** v. SSA
  - Complainants challenged SSA's agency-wide promotions of employees with targeted disabilities (e.g., total deafness, blindness, missing extremities, paralysis, epilepsy, intellectual disability, psychiatric illness, dwarfism) from 2003 to 2014.
  - Complainants alleged that the agency discriminated against employees based on their disabilities in making selections for competitive promotions from best qualified lists.
  - We settled this class action in September 2014 and the EEOC Administrative Judge granted final approval of the settlement in March 2015. The settlement became effective August 16, 2015 after the appeals period lapsed.

# Significant General Law Litigation Under Implementation (cont'd)

- (b) (6) v. SSA – cont'd.
  - SSA distributed lump sum payment (i.e., class settlement funds, “holdback” funds for late claims, administrative expenses, attorneys’ fees, and incentive awards) to the class on August 31, 2015.
  - Approximately 700 current and former employees were deemed eligible to receive settlement payments and have received those payments.
  - The Office of Human Resources is implementing the programmatic requirements of the settlement including (including such things as an improved reasonable accommodation decision process).

### *Promising Opportunities*

- (b) (5)
- **Significant improvement in representative payee monitoring.** Our Representative Payee Program allows an individual family member, friend or other third party to manage the benefits of a beneficiary, when we deem that beneficiary to be incapable of managing his own benefits. This has historically been a challenging aspect of our mission because we do not have sufficient funding to comprehensively monitor the performance of all representative payees. In 2016, we modernized our site review program and will use a skilled contractor to double the number of site reviews, while strategically focusing on the highest-risk representative payees.
- (b) (5)
- **National Disability Forum.** The National Disability Forum will provide the new administration with an early opportunity to interact with an array of external stakeholders. This inclusive and collaborative approach helps us develop responsive, effective, and efficient policies in order to empower individuals with a disability, minimize their financial hardship, and ensure proper use of Disability Trust funds.

Transition Team Member Document–Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.

# A Brief Overview of the Disability Process

- Disability is the gateway to retirement from the workforce for many unfortunate people
- There are up to four levels of administrative review. Claims are typically filed in local field offices or online
- Disability claims are considered at the initial and reconsideration stages by 54 State agencies known as the Disability Determination Services (DDS)
- Hearings and appeals are handled by federal employees in SSA's Office of Disability Adjudication and Review

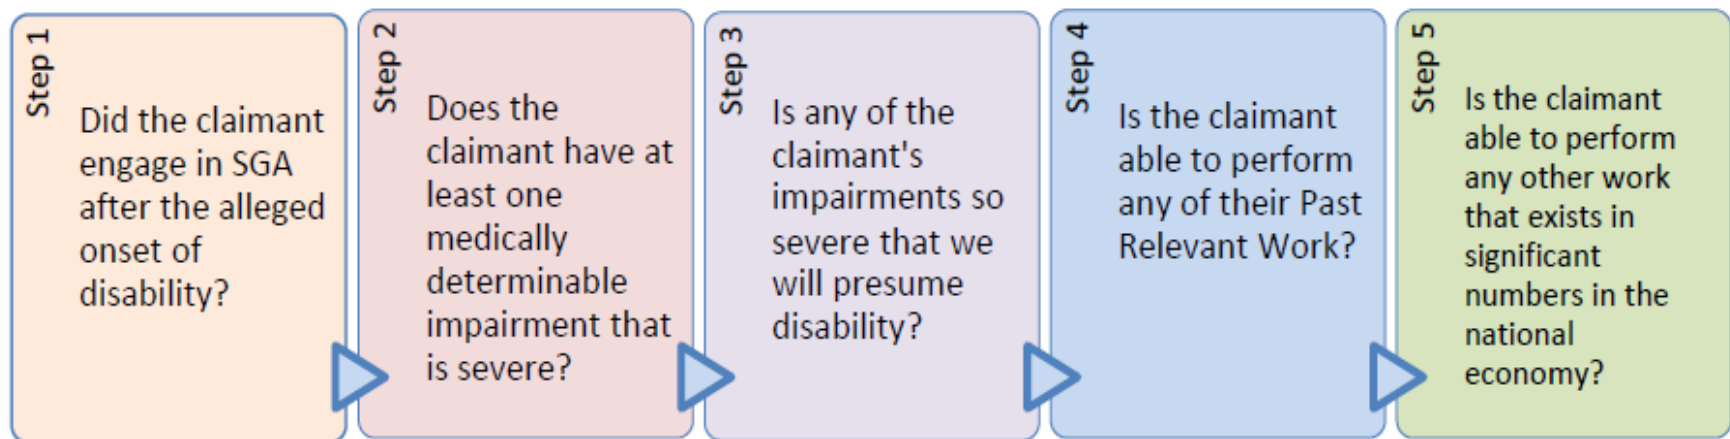

# Levels of Administrative Review and Describing Regulations

## What are the five steps?

The initial adult sequential evaluation is composed of five steps which must be considered in sequence, but the process is stopped at any step at which a finding of disabled or not disabled can be made (20 CFR 404.1520(a) through (g) and 416.920(a) through (g)).

# Telework in ODAR

Securing today  
and tomorrow

December 14, 2016

# Telework in AFGE

## HISTORY

- Originally called Flexiplace as part of 2000 ODAR-AFGE MOU
- 2012 AFGE CBA added new Article 41 – Telework
- Article 41 Sidebar required component MOU, completed June 4, 2015, expanded telework to Legal Assistants through VPN

## CURRENT

- AFGE eligible teleworkers may telework 1-3 days per week
- Awaiting rollout of Softphones to enable telephonic workloads such as hearing scheduling

# Telework in NTEU

## HISTORY

- Originally called Flexiplace as part of 1996 ODAR-NEU Flexiplace agreement
- 2014 ODAR-NTEU CBA revised to Article 17-Telework
- NTEU re-opened Article 17 in 2016. The parties went to impasse and ODAR was compelled by FSIP to propose a 4<sup>th</sup> day of telework pilot for NTEU decision writers

# Telework in IFPTE

## HISTORY

- Originally called Flexiplace in 2000 ODAR-IFPTE CBA
- 2013 CBA revised to Telework
- Limited to 8 days per month but additional days can be approved by HOCALJ

## CURRENT

- HOCALJs originally limited telework to 8 days but 2016 arbitration decision required local decisions
- HOCALJs have approved additional days but typically limited to 2 additional days per month (10 total)
- ALJs must schedule a reasonably attainable number of cases

# Teleworking ALJs

Region	ALJs	Teleworking ALJs	Non-teleworking ALJs	Average days per pay period per ALJ	ALJs recalled to cover hearings	ALJs denied telework for scheduling
1	61	39	22	4	0	0
2	138	71	67	4	0	0
3	173	96	77	4	0	1
4	425	251	174	4	0	1
5	257	122	125	4	0	6
6	177	99	78	4	0	0
7	79	35	44	2	0	1
8	50	26	34	4	0	0
9	178	109	69	4	0	1
10	59	34	25	4	0	3
NHC	58	48	10	2	0	0
Total	1655	930	725	4	0	12

# CURRENT TELEWORK STATISTICS

ODAR Employees participating in scheduled telework:

- Total: 7,336
  - 841 ALJs
  - 6,495 Non-ALJs
- Managers are currently allowed to telework up to 2 days per week.

# Management Rights When Suspending Telework or Calling Employees Back

- AFGE – Contract provides recall of employees on a telework day for specific in-office work need or IT issues. Telework may be suspended for in-office work or training. Telework can be terminated for 1-year for poor performance, diminished performance or not meeting eligibility factors.
- NTEU – Employees may be recalled under the same conditions as AFGE employees. Telework may be suspended for in-office work or training. Telework can be terminated for 6 months for poor performance, diminished performance or not meeting eligibility factors.
- IFPTE – ALJ telework may be suspended if the ALJ does not schedule a reasonably attainable number of cases, or has overdue cases in controlled statuses. Telework can be terminated for 1-year due to disciplinary actions.

# Administrative Law Judge and Decision-Writer Metrics

Securing today  
and tomorrow

December 14, 2016

# Capturing Business Process Data

We documented our business process in guides and flow charts:

- Identifying all important tasks and who performs them
- Charting how work moves from one step in the process to the next
- Creating status codes for each step in the process
- Identifying outputs at every step in the process

# Setting Performance Expectations

- We captured data about each work output and the time spent performing the work enabling us to calculate how long each task takes, as well as the number of people needed to do each task
- We set performance expectations based on the time needed to perform the tasks
- We set parameters that helped us derive the time values
- We disambiguated the time values for different categories of work using an iterative process that ensured that all values fell within the established parameters

# Case Crediting Based on Work Complexity

## Scale of Weighted Actions

Each type of case was assigned a time value, representing the average time needed to process the average case of that type as follows:

• Fully Favorable Decision – Step 3 or Other	3.03
• SGA Unfavorable Decision	3.17
• Non-Severe Unfavorable Decision	3.78
• Fully Favorable Decision – Step 5	3.94
• Fully Favorable Decision - CDR	9.76
• Unfavorable Decision - Other	10.50
• Unfavorable Decision - CDR	10.63
• Non-Disability Fully Favorable Decision	10.85
• Non-Disability Unfavorable Decision	11.18
• Non-Disability Partially Favorable Decision	11.39
• Partially Favorable	12.00
• Unfavorable Decision – DA&A	14.63

# Numeric Based Performance Standards Should Drive ODAR Decision Writer Productivity Higher

# Calculating Quarterly Goals – Branch Inputs

We obtain information from our branch chiefs to calculate quarterly goals. Specifically, we:

- Categorize staff by leave category
- Include training curves and mentoring
- Exclude leave earned, holidays, meeting time, approved time for EEO counselors and union officials, and employees on details
- Provide a discount for employees on performance assistance plans
- We then derive monthly goals for each branch

# Divisional Productivity Goals

Branch <small>(goals are shown in whole dispositions)</small>	1st Quarter staff available <small>In persons</small>	1st Quarter unadjusted performance goal <small>In dispositions</small>	1st month monthly goal <small>24 / 61</small>	2nd month monthly goal <small>18 / 61</small>	3rd month monthly goal <small>19 / 61</small>	Simple Weekly Divide <small>Divide quarterly goal evenly by 12 weeks as usual for any quarter.</small>	Sum of monthly goals

# Results – Increased Dispositions

Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.

# ALJ Discipline

Securing today  
and tomorrow

December 14, 2016

- 
- Most ALJs are hardworking, dedicated public servants.
  - Nonetheless, the ALJ construct is complex -
    - ALJs are difficult to hire
    - ALJs may not be performance managed in any traditional sense
    - ALJS are extremely difficult to suspend or remove

- Reprimand - RCALJ has delegated authority
- Suspension – Associate CALJ and above has delegated authority to file charges with MSPB. Only MSPB has authority to suspend.
- Removal – CALJ and above have delegated authority to file charges with MSPB. Only MSPB has authority to remove.

- Even when ALJ conduct or performance is so egregious that the agency must refrain from allowing the ALJ to continue to hear and decide cases, immediate removal or immediate suspension or removal from federal service is not possible
- Unlike with any other employee, SSA typically places the ALJ on administrative leave for lengthy periods of time at a grievous cost in terms of
  - Continued payment of salary and benefits
  - Management and attorney personnel required to handle the years long discipline process
- It can take 2 - 3 years, sometimes more, to suspend or remove an ALJ as the action winds through the MSPB process

- From 2013 to current, SSA formally disciplined more than 60 ALJs
- Since Terrie and Donna took office :
  - 3 removals completed
  - 3 removals pending before the MSPB
    - (another will be signed this week if not settled)
    - Several others are in development and we expect these to move more quickly than past removals building on past success
  - 2 suspensions
  - 16 reprimands

- In addition, we have sent 100s of directives and cure letters to ALJs regarding serious delinquency of their duties, some of which have led to telework restrictions or other discipline
  - We have increased our use of directives in the last several years
  - Nearly 140 judges have been sent at least one seriously delinquent letter
  - 8 ALJs have had telework suspended as a result

- Of the 4 ALJs that are currently on administrative leave pending the ultimate outcome of their removal complaints
  - One has been on administrative leave since 12/18/13 (current dollar amount close to \$500,000)
  - One has been on administrative leave since 5/12/14 (current dollar amount over \$400,000)
  - One has been on administrative leave since 10/2/15 (current dollar amount over \$200,000)
  - One has been on administrative leave since 12/14/16 (removal charge will be filed this week if not settled)

# ALJ Administrative Leave

- From 2013-2015, SSA paid nearly \$2.3 million in salary to ALJs on administrative leave who had engaged in egregious conduct or extreme poor performance.

FY	Total hours administrative leave granted	Total cost of administrative leave
FY13-FY15	30,044.50	\$2,283,718.78

# Policy Issues and Options

Securing today  
and tomorrow

December 14, 2016

# Data Analysis and Policy Development

- Sometimes training alone cannot resolve the core underlying issues related to why cases are remanded
- We have seen that various courts interpret some of our policies in different ways, raising the potential need for clarification of those policies
- Arraying data showing reasons for remand by adjudicator or district court in heat maps helps identify both outlier behaviors as well as issues more related to policy construction than training

# Procedural and Policy Change

- Our current practice is to mobilize and analyze data about a problem, determine if we can address it with training, and then, as necessary, progress through changes in sub-regulatory guidance, before moving on to regulatory or legislative proposals
- We publish changes to HALLEX and POMS, the operational instructions for disability adjudicators, on an almost daily basis
- Multiple Social Security Rulings are published annually
- Regulatory changes and legislative proposals are pursued as necessary

# Opportunities for Change

- Business Process
  - *NLP, PHC Expansion, new HO business model*
- Management
  - *Service delivery goals set at unit/office/regional/national levels*
  - *Greater management authorities*
- Sub Regulatory Policy Change
- Regulatory Proposals
  - *Final—National Uniformity (expansion of Boston rules nationwide)*
  - *Pending Regulations*
    - *Medical Evidence*
    - *Representative Conduct*
- Legislative Proposals

# Program Improvement Ideas

- Application Rate
- State Agency Decision-making
- Hearing Level Processing
- AC and Federal Court Review
- Substantive Policy and Data Capture
- Structural Improvements
- Program Integrity

# The Office of Disability Adjudication and Review

Securing today  
and tomorrow

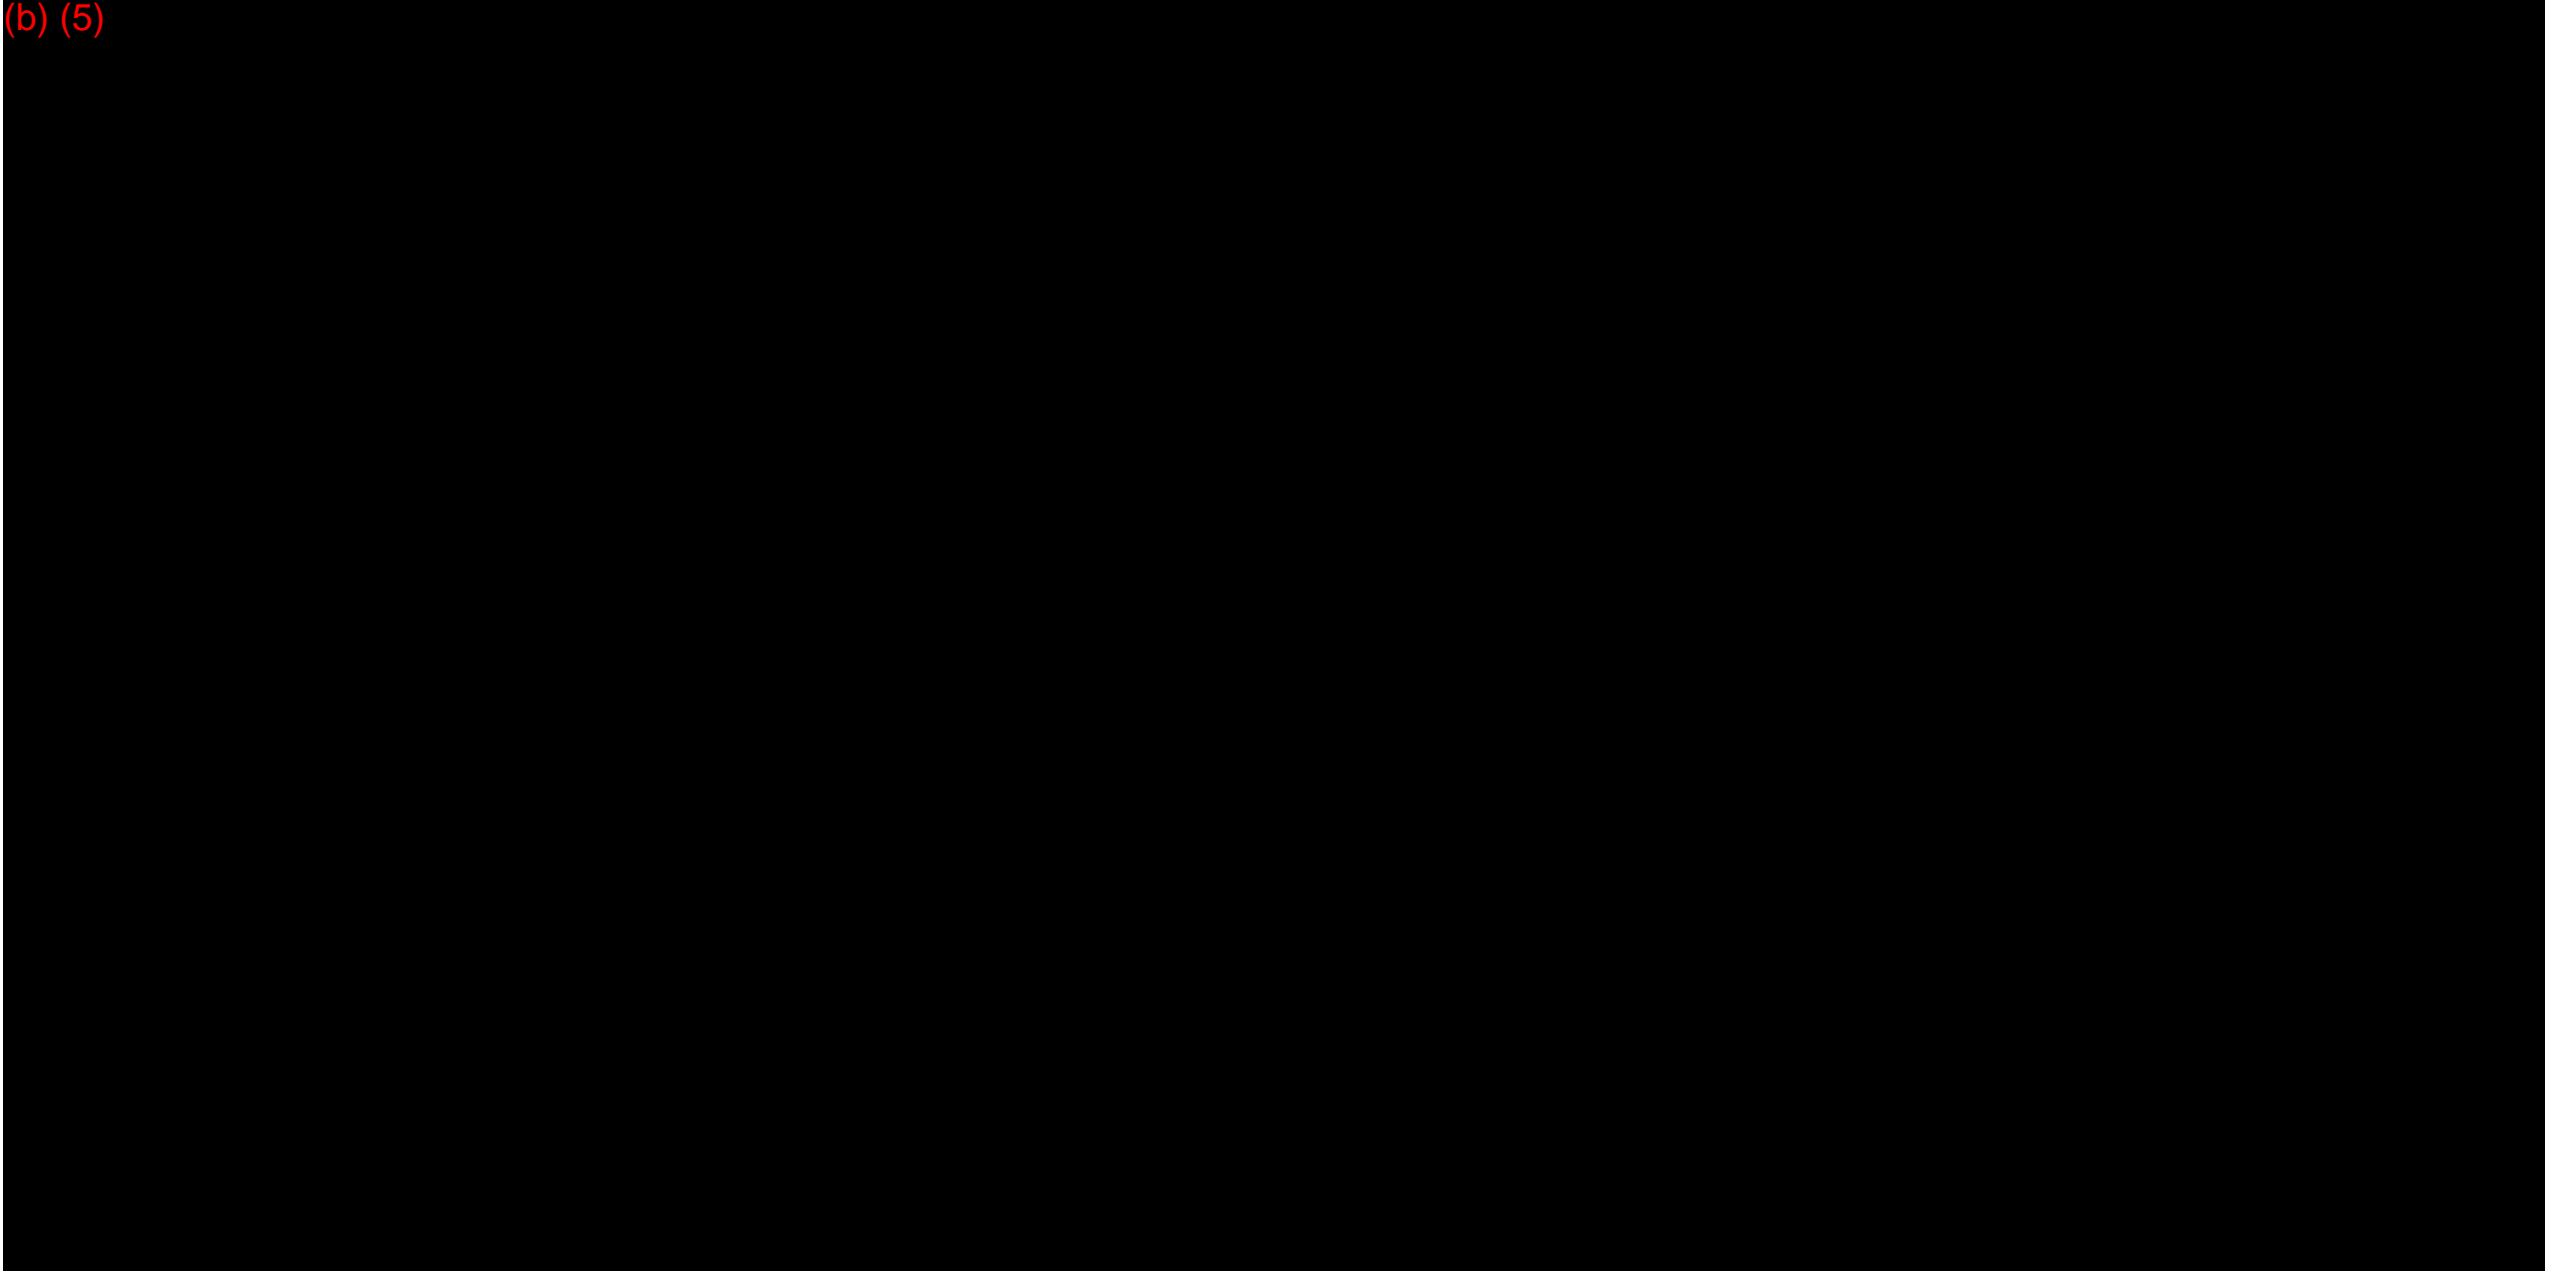

December 14, 2016

(b) (5)

## ODAR Hearings Backlog Proposed Scenario <sup>1/</sup>

(b) (5)

### **New CR Provision**

SEC. 172. The fifth proviso under the heading 'Social Security Administration—Limitation on Administrative Expenses' in division H of Public Law 114–113 shall be applied during the period covered by this Act by substituting 'shall be used for activities to address the hearing backlog within the Office of Disability Adjudication and Review' for 'shall be for necessary expenses for the renovation and modernization of the Arthur J. Altmeyer Building'.

The above new CR provision refers to the language below from SSA's FY 2016 appropriation:

### **FY 2016 Altmeyer Provision**

*Provided further*, That, (b) (5), to remain available until expended, shall be for necessary expenses for the renovation and modernization of the Arthur J. Altmeyer Building:

Tom and David:

- A one-page document describing the status of our three collective bargaining agreements. As we noted during our briefing and in the document, SSA’s Office of Labor-Management and Employee Relations is the agency lead on collective bargaining agreements. (non-public document)
- Data relative to ALJ productivity (non-public documents):
  1. A chart reflecting Hearing Receipts and Dispositions (FY04-16)
  2. A chart reflecting Hearings Dispositions Per Day Per Available ALJ (FY04-16)
  3. (b) (5) [REDACTED]

We look forward to working with you and the opportunity to discuss these documents at your convenience. We will continue to forward promised documents as we develop and/or clear them. Please let us know if you have any questions or would like to discuss more fully.

Terrie Gruber  
Deputy Commissioner, Office of Disability Adjudication and Review

Donna L. Calvert  
Assistant Deputy Commissioner, Office of Disability Adjudication and Review

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

## ODAR Bargaining Unit Contract Updates

Please note: The Office of Labor Management and Employee Relations (OLMER) is the lead on term bargaining and may have more detailed information.

### **IFPTE CBA:**

Covers non-management Administrative Law Judges (ALJ). Currently 1456 bargaining unit ALJs.

- Last negotiated September 30, 2013. Final settlement of CBA with IFPTE was signed October 14, 2015. Ratification was completed on December 18, 2015.
- CBA will expire on September 30, 2017.

### **NTEU CBA:**

Covers Attorney Advisers (Decision Writers) nationwide (except for hearing offices in the Atlanta Region), and Legal Assistants and Paralegals in the Denver Region. Currently 1717 total employees in the NTEU bargaining unit.

- Last negotiated June 2, 2014.
- NTEU had re-opener provision, which they utilized for Article 17 – Telework. Resulted in a September 2016 decision from Federal Service Impasses Panel providing a pilot program for a 4<sup>th</sup> day of telework.
- CBA will expire June 2018.

### **AFGE CBA:**

Covers non-attorney (paralegal decision writers and legal assistants) nationwide (with exception of Denver Region) including National Hearing Centers (NHCs) and National Case Assistance Centers (NCACs), and attorney adviser decision writers in Atlanta Region hearing offices. Also includes analysts and legal assistants in the Office of Appellate Operations (OAO). Currently 5456 total employees in the ODAR AFGE bargaining unit.

- OLMER is better POC for detailed info.
- Last negotiated July 16, 2012.
- Expired July 2016 but extended until March 2017.
- Negotiation preparations are currently underway, however, AFGE has requested to roll CBA for extended period. We defer to OLMER on latest status.

Per our office conference of Friday, March 5, 2010 enclosed please find the newest RFC which I would like to have Dr.  complete at your next visit at the VA Fort Smith.

Remember; please remind her that the column entitled "marked" is the important column that will get you on disability. I do not mind a few "moderates" or a couple of "extremes"; but, the "marked" column is the important one for purposes of finding you disabled.

Please return the completed form to be at your earliest convenience. If you have any comments or questions regarding any of the foregoing, please do not hesitate to contact me. Thank you for your kind consideration herein. I look forward to hearing from you regarding this matter.

Sincerely,

(b) (7)(E)

### *Promising Opportunities/Quick Wins*

- **Expansion of Internet Social Security Number Replacement Card (iSSNRC)** - Including more states in SSA's iSSNRC process would improve customer service and have a positive impact on Operations by reducing traffic in field offices.
- **Expansion of Multifactor Authentication (MFA)** - Scheduled release on April 29, 2017 to coincide with the debut of the redesigned *my* Social Security web portal.
- **Release of New Customer Engagement Tool** - Scheduled release in Fall of 2017; Will allow for two-way communication with millions of my Social Security account holders, improving service while keeping more customers in the online channel using our self-service options.
- **Collocation of Grand Island, Nebraska SSA Field Office and IRS Audit Division Office—Reduce the Footprint Initiative** - Management and the labor union recently approved the combined floor plan. Construction to start in December 2016. The goal is to have the IRS space ready by March 2017.
- **Release of SMART Claim** - The release for the myAps portion of SMART Claim is planned for December 2016 and the iSSI portion of SMART Claim is currently planned for release in mid-year FY 2017. SMART Claim- Internet based Supplemental Security Income (iSSI) will allow the public to apply for SSI benefits online.
- **National Remittance and Accounting Unit (RAU)** - Our Remittance Process still relies on having a paper payment coupon with each payment received. Funding has been approved in FY17 to begin moving to a fully electronic environment.

### *Pending Decisions and Actions*

(N/A)

### *Promising Opportunities*

- Compliance with the new Freedom of Information Act (FOIA)
  - To comply with the new FOIA law, we are updating our FOIA regulations, procedures, and training. We are working with the Environmental Protection Agency to procure FOIA Online, a web based application that will aid in processing FOIA requests. These procedural changes should improve the position by which SSA responds to FOIA requests.

### *Key Partners*

- OGC collaborates with the Office of Retirement and Disability Policy, the Office of Disability Adjudication and Review and the DOJ to represent SSA in program and general litigation before federal district and appellate courts.
- OGC develops and implements privacy and disclosure policy to protect the records of members of the public.
- OGC partners with the Office of Inspector General to combat fraud and protect the SSA Trust Fund.

### *Promising Opportunities/Quick Wins*

- **Natural Language processing (NLP) and Related Technologies** - The Appeals Council is testing the use of NLP to scan ALJ decisions for language that suggests a higher likelihood of an error so we can select and identify those cases for a pre-effectuation quality review.
- **Video Usage**- We continue our effort to increase the number of sites that can accommodate video hearings, including co-locating video facilities in field offices and partnering with the Veterans Administration and other government entities. If we expand in this area, we will provide better service to claimants and reduce costs by sharing common space with other SSA components.
- (b) (5)
- **Career Development Programs** - Our Plan for Compassionate and REsponsive Service (CARES) outlines our current comprehensive and multi-layered approach to deal with the immediate crisis of the growing number of hearings pending and increasing wait times. We have created the COMPASS career development program under the CARES initiatives to provide more flexibility in our hearing offices. The COMPASS program is a component-wide career development program that will provide virtual details to employees depending on their respective grade levels. We have begun the recruiting effort and expect to roll out the program in the second and third quarters of FY 2017.

### *Promising Opportunities/Quick Wins*

- Accelerate Data – Driven Decisions
  - Continue supporting the agency Performance Management Process by providing data analytics in setting, monitoring and analyzing SSA Agency Priority Goals
  - Promote advanced analytics literacy with enhancement to existing intranet website for a dynamic user experience
  - Host Analytics Community of Interest events and additional analytics training (Gerald Ray Academy)
  - Conduct in-depth analytics maturity assessments and deliver roadmaps for expanding analytics capacity in agency components

Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.

Last Update 11/13/16

- Improve Agency Performance and Integrate Strategy and Performance
  - Increase agency awareness of program performance management principles
  - Continue to participate in interagency performance community initiatives and activities
  - Strengthen the Performance Management Process
  - Ensure development of outcome based performance measures that support ASP goals and objectives
- Implement a successful Enterprise Risk Management (ERM) program

### **Key Partners**

- Agency Employees–Provide subject matter expertise on program performance and progress in achieving agency goals
- Agency Priority Goal Leaders and Deputy Goal Leaders–Provide executive leadership, guidance and direction in establishing and achieving agency priority goals
- Office of Management and Budget–Provides guidance, direction and clearance on mandated deliverables
- Social Security Advisory Board (SSAB)–Provides advice regarding strategic planning and performance initiatives
- Open Government Steering Committee–Provides executive support related to Open Government initiatives
- Improper Payment Oversight Board–Provides executive support related to Improper Payment initiatives
- Executive Internal Control Committee (EICC)–Provides executive oversight and guidance to ensure agency controls are operating as intended, to guide activities to strengthen controls, and to manage issues relate to the annual Agency Financial Audit
- National Anti-Fraud Committee (NAFC)–Provides executive support and guidance for agency anti-fraud activities to ensure the integrity of Social Security programs
- Information Technology Investment Review Board (IT IRB)–Reviews and approves all significant Information Technology Investments, ensuring they align with agency strategy, priorities and goals
- Executive Resources Board (ERB)–Provides executive support to senior-level personnel decisions
- Contract Review Board–Provides executive review of high value agency contracts to identify potential savings and efficiencies
- Vision 2025 Advocacy Groups– Provide ideas and insights to improve our services , comprised of various advocacy groups: Leadership Council of Aging Organizations (LCAO), umbrella group of advocates for seniors, National Social Security and SSI Advocates, umbrella group of advocates for beneficiaries
- Labor Unions–Represent agency bargaining unit employees, provide insight into the issues and challenges the labor unions deem critical to delivering the agency’s mission
- Analytics Community of Interest–Provides guidance for analytics decisions, comprised of analytics practitioners, executives and those interested in promoting agency data analytics to derive value from our information assets

- **Enterprise Risk Management (ERM):** Continue developing our agency's implementation ERM. ERM is in response to OMB Circular A-123, requiring Federal agencies to integrate risk management and internal control functions into the daily management practices. Agencies are also required to establish and implement an assessment process based on the Government Accountability Office's (GAO) Standard for Internal Control in the Federal Government (Green Book). ERM will improve the effectiveness of management processes and decision-making within the agency.

Last update 11/18/16

Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.

### Key Partners

- **Office of Management and Budget (OMB)** – This agency is tasked with the government-wide management of the Executive branch. It represents the White House and its policies are binding on all Executive branch agencies. OMB examiners will confer with SSA on our priorities, critical issues, and possible legislative proposals.
- **House and Senate Labor HHS Subcommittee Staff** – Each house of Congress has an appropriations committee, which is further divided into twelve appropriations subcommittees; SSA falls under the Labor, HHS, Education, and Related Agencies Subcommittee.
- **House and Senate Budget Committees** – Each house of Congress has a budget committee that reviews the President's Budget. These committees draft Congress' annual budget resolution and propose improvements to Congressional budget processes.
- **Congressional Budget Office (CBO)** – CBO is the nonpartisan budget review office in the Legislative branch. CBO analysts review the President's Budget and offer their alternative estimates to Congress, including estimates SSA provides in the Congressional Justification.
- **Government Accountability Office (GAO)** – GAO is the nonpartisan auditing and investigative agency of Congress in the Legislative branch. They have recently conducted audits regarding SSA's IT modernization plan and service delivery challenges.
- **Social Security Advocacy Groups** – These are organizations, such as the National Council of Social Security Management Associations and AARP, that provide advocacy services and support to employees and beneficiaries of Social Security.
- **Labor Unions** – AFGE, NTEU, and ITEFA are Federal employee unions that provide workers at SSA and other government agencies with legislative advocacy and legal representation.
- **General Services Administration (GSA)** – We work with GSA for budgetary obligations, master housing, and leasing for all GSA owned, delegated, and leased properties nationwide.
- **Department of Homeland Security (DHS)** – We work with the Federal Protection Service (FPS) for our physical security nationwide. We also work with the Federal Emergency Management Agency (FEMA) for our nationwide emergency management (Continuity of Operations). We work with the Interagency Security Committee for our security standards.
- **Federal Bureau of Investigation (FBI), Department of Defense (DOD), and the Central Intelligence Agency (CIA)** – We work with these agencies for our nationwide Insider Threat and Counter Intelligence programs.
- **Social Security Advisory Board (SSAB)** – We work with the SSAB on matters of policy and administration of the Old-Age, Survivors, and Disability Insurance and the Supplemental Security Income programs.
- **Department of the Treasury (Treasury)** – We partner with Treasury, as our disbursing agent, to make benefit and administrative payments and to recover overpayments.

## Project Health and Financial Data<sup>1</sup>:

Agency Cloud Infrastructure (ACI) (8353)		Schedule	Cost	Status: Completed and in-flight	
Budget:	\$ 14,247,200.69	Cost Actuals:	\$ 12,881,660.86	FY18 Anticipated Cost:	(b) (5)
<b>Description:</b> Agency Cloud Infrastructure (ACI) enables a modern platform to support modern and emerging technologies more easily. We will be able to increase and decrease storage needs, as necessary, ensuring that we pay for what we need at any given time. We have created a modern development environment, which takes advantage of Platform as a Service, Infrastructure as a Service, and Software as a Service to allow our developers to do their jobs better and faster, in a DevOps environment. The vision for ACI is to provide a suite of Cloud Offerings with a consistent platform across the software lifecycle to provide relevant and modern services. To date more than 250 servers have been provisioned in Amazon Web Services (AWS) supporting the cloud infrastructure, Enterprise Data Warehouse (EDW), KNOT (Oracle Tools Environment), Disability Case Processing System (DCPS), and Multi-Channel Communication, reducing typical acquisition time to allow projects to begin working immediately.					
<b>Remarks:</b> 12% cost overburn in FY16; ; variances between 10% and <30% are reported as yellow on the Federal IT Dashboard					

Benefit Rate Increase/Cost of Living Adjustment (BRI/COLA) (6681/8013/9031)		Schedule	Cost	Status: Cyclical	
Budget:	\$ 3,675,230.47	Cost Actuals:	\$ 1,541,883.83	FY18 Anticipated Cost:	(b) (5)
<b>Description:</b> BRI/COLA is a legislative annual cyclical operation to apply updated annual rates to the Title II Master Beneficiary Record (MBR). SSA is required by law to pay the cost-of-living adjustment (COLA) to Title II beneficiaries. Even when the COLA equals 0.0%, active records on the Title II Master Beneficiary Record (MBR) must be updated to reflect Medicare Part B premium amounts. The timely update of the MBRs allows SSA to ensure the timely and accurate payment delivery of Title II payments to 60 million beneficiaries each month.					
<b>Remarks:</b> 22% cost underburn in FY16; variances between 10% and <30% are reported as yellow on the Federal IT Dashboard					

Customer Engagement Tools (CET) (8188/8189/8190/8191)		Schedule	Cost	Status: Completed and in-flight	
Budget:	\$ 13,435,984.03	Cost Actuals:	\$ 5,496,870.82	FY18 Anticipated Cost:	(b) (5)
<b>Description:</b> CET adds new infrastructure within SSA's Enterprise Architecture to allow interactions over multiple communication channels to facilitate business between the agency and the public. Both Dynamic Help, Click to call back and Message Center have been implemented to date. Click to chat is scheduled for FY17.					
<b>Remarks:</b> 21% cost underburn in FY16; variances between 10% and <30% are reported as yellow on the Federal IT Dashboard					

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only**

<sup>1</sup> Financial Data encompasses FY16 – FY18 budget and labor cost data in investment management tool as of report date. Prior FY data and associated Special Expense Item (SEI) costs not included. Cost variances based on FY16 budget vs FY16 cost actuals.

<b>Electronic Access Mandatory Multifactor Authentication (MFA) (8211)</b>		<b>Schedule</b>	<b>Cost</b>	<b>Status: Completed and in-flight</b>	
<b>Budget:</b>	<b>\$ 4,355,611.97</b>	<b>Cost Actuals:</b>	<b>\$ 2,687,712.95</b>	<b>FY18 Anticipated Cost:</b>	<b>(b) (5)</b>
<b>Description:</b> MFA supports the multi factor authentication requirements in Executive Order 13681 and requires two-factor authentication for applications behind Electronic Access. The 1 <sup>st</sup> release of MFA was successfully implemented and based on external pressure – was rolled back. We are on track for a release with increased features in April 2017.					
<b>Remarks:</b> 61% cost overrun in FY16; ; variances >30% are reported as red on the Federal IT Dashboard					

<b>Electronic Case Analysis Tool (eCAT) (8309/5548/6717/8088)</b>		<b>Schedule</b>	<b>Cost</b>	<b>Status: Ongoing</b>	
<b>Budget:</b>	<b>\$ 5,815,189.49</b>	<b>Cost Actuals:</b>	<b>\$ 3,778,794.01</b>	<b>FY18 Anticipated Cost:</b>	<b>(b) (5)</b>
<b>Description:</b> eCAT is a policy compliant web-based application designed to assist the user throughout the sequential evaluation process. The tool aids in documenting, analyzing, and adjudicating the disability claim in accordance with SSA regulations. eCAT utilizes “intelligent pathing” and quality checks to assist the user in addressing critical policy issues relevant to the claim. eCAT is a critical component of the Disability Case Processing System (DCPS). It continues development of functionality necessary to support DCPS as it is developed and rolls out nationally and other functionality needed to support programmatic and policy updates/changes.					
<b>Remarks:</b> 16% cost overrun in FY16; ; variances between 10% and <30% are reported as yellow on the Federal IT Dashboard					

<b>Health Information Technology (HIT) (9148/6026/6718)</b>		<b>Schedule</b>	<b>Cost</b>	<b>Status: Ongoing</b>	
<b>Budget:</b>	<b>\$ 10,070,117.32</b>	<b>Cost Actuals:</b>	<b>\$ 1,139,078.89</b>	<b>FY18 Anticipated Cost:</b>	<b>(b) (5)</b>
<b>Description:</b> The Health Information Technology (HIT) project completed nationwide implementation of the electronic medical exchange with the Department of Defense (DOD) on 2/1/2016. This effort was the culmination of many years of close coordination between SSA and DOD. From November 2015 through September 2016, DOD has processed over 15,800 electronic requests for medical evidence from SSA, reducing the amount of time it takes to receive DoD-held medical evidence from an average of 5 weeks to minutes. The agency’s Health IT team is also continuing to work closely with Veterans Administration (VA) to begin the electronic exchange of medical evidence in the first quarter of Fiscal Year 2017. Both of these efforts are part of SSA’s joint plan of action to improve the sharing of medical information between SSA, DoD and VA, intended to improve service to Wounded Warriors, Service members, and Veterans.					
<b>Remarks:</b> 30% cost overrun in FY16; variances >30% are reported as red on the Federal IT Dashboard					

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only**

HR Portal (6556/8054)		Schedule	Cost	Status: Completed and in-flight	
Budget:	\$ 5,560,609.44	Cost Actuals:	\$ 2,948,521.76	FY18 Anticipated Cost:	(b) (5)
<b>Description:</b> The HR Portal provides employees with a web-based operation for viewing HR applications. Two services were in an initial release. In FY16, we continued to enhance HR Portal data and services, using agile software development methodologies with the implementation of multiple releases of Employees Reports and the initial e7B release on 06/11/16. The Agile teams adoption of modern methodologies and automated testing tools such as Cucumber and Selenium helped drive team collaboration, facilitated multi-cycle regression testing, and resulted in the delivery of a quality product.					
<b>Remarks:</b> 11% cost overrun in FY16; ; variances between 10% and <30% are reported as yellow on the Federal IT Dashboard					

Internet Application Status (iAPS) Enhancements (8197)		Schedule	Cost	Status: Completed	
Budget:	\$ 2,109,477.98	Cost Actuals:	\$ 3,431,724.53	FY18 Anticipated Cost:	(b) (5)
<b>Description:</b> myAPS provides secure status on benefit claims at the initial, reconsideration and hearing level. It is functional behind the mySocialSecurity portal. It includes usage and local Management Information (MI). There were technical challenges due to the interaction between numerous siloed legacy systems into modern software that affected the schedule and the cost.					
<b>Remarks:</b> Finished beyond original schedule. 78% cost overrun in FY16; variances >30% are reported as red on the Federal IT Dashboard					

Internet SSN Replacement Cards (iSSNRC) (5886/8314)		Schedule	Cost	Status: Completed and in maintenance	
Budget:	\$ 3,323,310.68	Cost Actuals:	\$ 2,144,778.45	FY18 Anticipated Cost:	(b) (5)
<b>Description:</b> The addition of the online Social Security number replacement card requests to the MySocialSecurity portal was implemented. Each year the agency provides 10 million replacement cards and providing this service online diverts customer traffic away from field offices and reduces operational workloads.					
<b>Remarks:</b> Variances less than 10% are reported as green on the Federal IT Dashboard					

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only**

Investment Management Tool (IMT) (8365)		Schedule		Cost	Status: Completed and in-flight	
Budget:	\$ 6,200,378.77	Cost Actuals:	\$ 2,132,184.22		FY18 Anticipated Cost:	(b) (5)
<b>Description:</b> OS worked with the IT Investment Process (ITIP) team to gather requirements and implemented the agency’s IT Investment Management Tool (IMT). IMT is a standard Portfolio and Project Management (PPM) tool used in support of the agency’s Capital Planning and Investment Control (CPIC) process. In the past year, functionality was developed to support project management and the budget formulation processes used by the agency’s IT Investment Review Board (ITIRB) during prioritization and selection of IT investments. Customers across the agency are able to submit their IT requests for labor and non-labor resources using one central application. IMT provides customers with project management information used to monitor performance and supports external reporting. It has created needed transparency into the budget and planning areas.						
<b>Remarks:</b> 13% cost overrun in FY16; ; variances between 10% and <30% are reported as yellow on the Federal IT Dashboard						

SMART Claim iSSI (8194)			Schedule	Cost	Status: In-flight	
Budget:	\$ 2,735,848.91	Cost Actuals:	\$ 2,282,885.58		FY18 Anticipated Cost:	(b) (5)
<b>Description:</b> iSSI incorporates the capability to apply for SSI (T16) online. The functionality will be added to the current iClaim, includes management information and ensures a single submission application.						
<b>Remarks:</b> 42% cost underburn in FY16; variances >30% are reported as red on the Federal IT Dashboard

# Transition Team DCPS2 Update

December 13, 2016

**Linda Kerr-Davis**  
Chief Program Officer

**Michelle Minton**  
Chief Product Owner

**John Garrigues**  
Deputy Chief Program Officer

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

# Agenda

- Purpose – Why build DCPS?
- Historical Timeline
- DCPS2 Road Map
- Early Adopter Release (EAR)
- Site Status
- Tracking Velocity
- Costs and Timelines
- External Oversight
- OIG Audit Reports
- User Feedback

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

# Purpose – Why build DCPS?

- Improve service to the American public
  - Optimized productivity
  - Enhance accuracy and consistency
- Control cost
  - Code ownership
  - Change management
- Improve security
  - Effective disaster recovery
  - Fewer entry points
- Improve workforce agility
  - Better tools for employees
  - Borderless processing (workload sharing)

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

# DCPS Historical Timeline

- 2007 Project started
- 2010 Contract awarded
- 2014 CPO established
- 2015 DCPS1 terminated and Agile started
- 2016 Through Line delivered
- 2016 Early Adopter Release (next week)

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

# DCPS2 Early Adopter Release (EAR)

- Provides the capability for a DDS to expedite adult physical fully favorable Initial Claims (Quick Disability Determination and Compassionate Allowance functionality)
- Deliver by end of December 2016
- Deliver to two or more DDSs
- Major Features planned following EAR are:
  - Enhanced Functionality
  - Technical Debt
- Will continue to iteratively deliver value-added software through continuous integration and continuous deployment

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

# Site Status

- Will deploy throughout FY17 based on capacity and functionality fit with DDS business process
- 11 sites have asked for DCPS2 (20% of all DDS sites)

Region	Site(s)	Size	SDM	Legacy	Structure
Chicago	Ohio	Large	No	IDS	Central
Philadelphia	Delaware	Small	No	MIDAS	Central
Boston	Maine	Small	Yes	IDT	Central
Boston	Rhode Island	Small	No	IDS	Central
Chicago	Indiana	Medium	No	IDS	Central
Denver	South Dakota	Small	No	IDS	Central
Kansas City	Nebraska	Small	No	Indep	Central
Kansas City	Missouri	Medium	Yes	MIDAS	Decentral
Kansas City	Iowa	Small	No	IDS	Central
Philadelphia	Virginia	Medium	No	IDS	Decentral
Seattle	Washington	Medium	Yes	IDS	Decentral

# Tracking Velocity

Estimate of 5x reference from April 2016 report.

Actual velocity (pace of development) of DCPS2 development.

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

# Cost Breakdown

Shutdown &  
Restart  
July to Sept '15

## Preparation for DCPS2 development activities (July through September 2015)

	FY15 (3 months)
SEI (includes CTR) <sup>1</sup>	\$ 8,584,534
Non-SEI CTR <sup>2</sup>	\$ -
SSA WY Total Costs <sup>3</sup>	\$ 3,369,413
Travel	\$ 133,954
<b>Total DCPS</b>	<b>\$ 12,087,901</b>

Agile  
Sprints  
FY 16 - 21

## DCPS2 development activities (FY16 through FY21)

	FY16	FY17	(b) (5)
SEI (includes CTR) <sup>1</sup>	\$ 17,116,177	\$ 16,653,526	
Non-SEI CTR <sup>2</sup>	\$ -	\$ -	
SSA WY Total Costs <sup>3</sup>	\$ 13,309,075	\$ 9,003,588	
Travel	\$ 232,970	\$ 214,580	
<b>Total DCPS</b>	<b>\$ 30,658,223</b>	<b>\$ 25,871,694</b>	

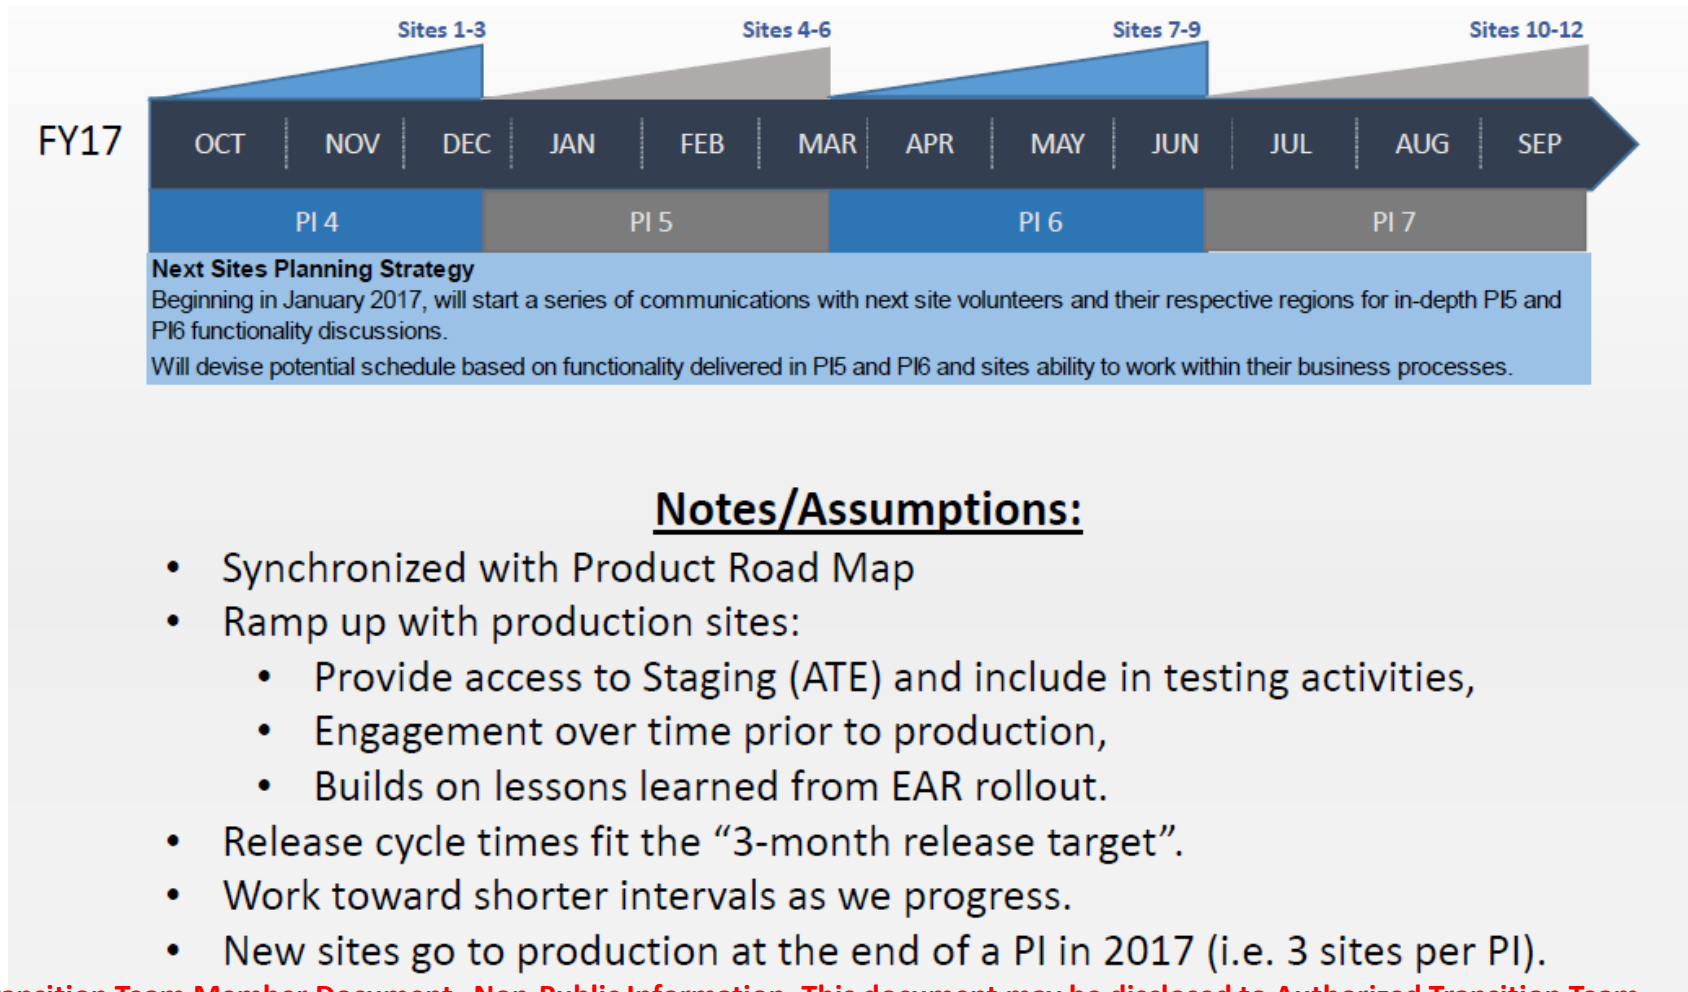

<sup>1</sup> FY 16 SEI costs = \$17,105,557.41 from R327 + \$10,620.05 from R392D2 (small IT purchase SEI). FY17 and FY18 estimates are based on our FY17 risk based budget. FY 19 estimate is extrapolated from the FY18 submission. FY21 and FY21 estimates plan for 1 Agile development team from contractor resources plus \$1.7M for infrastructure costs.

<sup>2</sup> The "Non-SEI CTR" category is historical in nature, but will be displayed in order to remain consistent in our reporting.

<sup>3</sup> WY Costs are based on Actual expenditures where possible, and based on forecasts from Prism/IMT when no actuals are available. In FY15, 1 WY= \$139,578. In FY16, 1 WY = \$141,000. In FY17, 1 WY = \$145,642.

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

# FY17 Site Onboarding Timeline

## Notes/Assumptions:

- Synchronized with Product Road Map
- Ramp up with production sites:
  - Provide access to Staging (ATE) and include in testing activities,
  - Engagement over time prior to production,
  - Builds on lessons learned from EAR rollout.
- Release cycle times fit the “3-month release target”.
- Work toward shorter intervals as we progress.
- New sites go to production at the end of a PI in 2017 (i.e. 3 sites per PI).

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

# Timeline Projections

Group – Deploy in:	# of DDSs	% Sites
Group 1 - Dec 2016	3	6%
Group 2 - March 2017	3	11%
Group 3 - June 2017	3	17%
Group 4 - Sept 2017	3	22%
Group 5 - Dec 2017	7	35%
Group 6 - March 2018	7	48%
Group 7 - June 2018	8	63%
Group 8 - Sept 2018	8	78%
Group 9 - Dec 2018	3	83%
Group 10 - March 2019	3	89%
Group 11 - June 2019	3	94%
Group 12 -Sept 2019	3	100%
Total	54	

- Deployment of DCPS is broken down into twelve groups of varying numbers of sites.
- Deployment is immediately followed by a Transition period which allows 12 months to transition.
- Groups will Retire Legacy 12 months after deploying DCPS2.
  - Caveat: the first four groups will have extended Transition periods due to the fact that they will not have the full product for the entire 12-month Transition time. We anticipate an additional 9 months to allow sufficient time for these groups to transition.

**Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized Transition Team Members only.**

# Legacy Cost Projections

Blue represents All Legacy Costs and the impact to the costs associated with legacy systems as DCPS is deployed according to the rollout schedule.

Red represents the total cost of DCPS2 development activities, including the ongoing Agile development after rollout to all sites.

# Recent External Oversight

- May 26, 2016 HOCR Hearing
- June 28, 2016 Demo for HWM

# User Feedback from Early Adopter Release Demonstration, 12/6/16

- “Thrilled, excellent start.”
- “Great promise, clean interface.”
- Recognized the important milestone reached with more functionality to come
- Several members excited to take the product.
- “OMG, this looks really good!”
- Utilizes disability terms
- Intuitive
- Great user engagement including Early Adopters
- Professional looking product and lends credibility
- Definitely different than what we seen before
- Navigational tracking

3. Enhance Communication (Tammy Farmer/Patrick DeFalco)
4. Leadership Training (Tammy Farmer/Patrick DeFalco)
5. Expand Telework (Tammy Farmer/Patrick DeFalco)

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements – <i>Pre-hearing Triage</i>
TITLE:	National Adjudication Team (NAT)
LEAD(s):	Steve Nash; Katrice Kendle
PILOT/PERMANENT?	Pilot
STAKEHOLDERS:	AFGE, NTEU
ISSUE:	Pursuant to 20 CFR <a href="#">§404.942</a> , SSA attorney advisors have the authority to conduct prehearing proceedings and issue decisions in certain situations. OMB extends this authority to up to 7,500 fully favorable on the record (OTR) decisions annually. Because of quality concerns from past efforts with senior attorney decisions, senior attorney adjudication is under great scrutiny.
PLAN:	The NAT will screen cases and issue decisions when the evidence supports a fully favorable allowance, removing these cases from the hearings backlog. OCALJ in-line quality review staff in Region 3 reviews an appropriate number of draft OTR decisions to ensure OTR decisions are supported and legally defensible. For cases the NAT cannot adjudicate, they provide a summary of the issues of the case and work with the claimant's representative to gather evidence. This summary and more complete record will allow the ALJs to focus on the relevant issues of the claim.
TIMELINE:	<ul style="list-style-type: none"> <li>• 04/2015 - NAT began 1 year pilot:</li> <li>• 08/2015 – In-person Training</li> <li>• 10/2015 – Added support staff for senior attorneys</li> <li>• 10/2015 – Developed NAT extension strategy (Bridge NAT)</li> <li>• 04/01/2016 - Announced Bridge NAT positions (selected 59 adjudicators, 7 quality support senior attorneys, 3 LCTs).</li> <li>• 04/11/2016 – Training for 3.5 days in St. Louis</li> <li>• 04/18/2016 – 1 week of virtual training</li> <li>• 06/2016 – Began assigning cases to all NAT adjudicators, 5 of which only received cases from Puerto Rico.</li> <li>• 07/2016 – Onboarded the leader of the permanent NAT organization, Prabhydal Mundian. Began outreach and marketing efforts to remind all ALJs where to locate NAT summaries. Began gathering data on the number of development items that have been added in total to the case files for cases the NAT is not able to pay.</li> <li>• 08/2016 – Cases in Decision Writing status increased dramatically in ODAR. NAT deployed 30 attorneys to assist with overall decision writing for 8 week period.</li> <li>• 10/2016 – Transitioned NAT adjudicators back into NAT from their decision writing assignments; resumed in-line quality review of NAT draft decisions.</li> </ul>

## ODAR CARES PLAN INITIATIVES

PILOT LOGISTICS:	<p>Pilot 1 (April 2015 through April 2016):</p> <ul style="list-style-type: none"><li>• 20 Senior Attorneys Nationwide</li><li>• 3 Senior Attorney Quality Support Staff</li><li>• 1 Lead Case Technician</li><li>• 5 Senior Case Technicians (added October 2015) – Baltimore NHC</li></ul> <p>Bridge NAT (April 2016 through early 2017)</p> <ul style="list-style-type: none"><li>• 59 Senior Attorneys in the Adjudication Group</li><li>• 10 Members of the Quality and Support Group</li><li>• 2 Lead Attorneys</li></ul> <p>3 Year NAT (permanent) Early 2017</p> <ul style="list-style-type: none"><li>• staffing to be determined</li></ul>
OUTCOMES:	<p>Pilot 1 (April 2015):</p> <p>Yield: 560 OTRs and over 4684 case summaries prepared for ALJs thru 2/16</p> <p>Bridge NAT (Begin April 2016):</p> <p>July 2016 Stats: 9,160 Case Summaries prepared; 1,045 OTRs to date</p> <p>As of September 30, 2016 – Completed Close to 10,500 case summaries and adjudicated over 1,400 OTRs since April 2015.</p> <p>3 Year NAT:</p> <p>Expected Yield: TBD</p>

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements – <i>Pre-hearing Triage</i>
TITLE:	Pre-Hearing Conference Expansion
LEAD(s):	Steve Nash
Pilot/Permanent?	Pilot
Stakeholders:	IFPTE, AFGE, NTEU
Issue:	We currently lose 11.3% of scheduled hearings due to claimant no shows and unrepresented claimants that ask to have their hearing postponed to seek representation.
Plan:	<p>Pre-hearing conferences (PHCs) aim to assist unrepresented claimants in advance of their hearing by explaining the benefits of representation and beginning the gathering of relevant evidence to better prepare them for their hearing. Senior Attorneys will conduct the PHCs. There are three general outcomes expected from a PHC:</p> <ol style="list-style-type: none"> <li>1. The claimant obtains a representative who can assist in developing their file;</li> <li>2. The claimant does not obtain a representative. Based on discussion at the PHC, the Hearings Office begins developing the case file to ensure a more complete set of evidence and facts is available to the ALJ at the hearing;</li> <li>3. We identify that the claimant may have abandoned their claim and can schedule these claims for hearing in an efficient manner.</li> </ol>
Timeline:	<p>05/2015 - Began Phase 1 pilot.  11/2015 – Finalized Phase 2 pilot participants, training materials, trainers, and training dates.  11/2015 – Conducted PHC training with first group of Phase 2 participants.  12/2015 – Determine resources needed to develop critical functions for PHC improvements through ITIP.  01/2016 – Complete iTIP pre-launch business case.  02/2016 – Began Phase 2 Pilot expanding from five to 36 offices.  Spring 2016 - Negotiate Systems change for CPMS to improve timeliness of scheduling a PHC.  Spring 2016 – Work with each phase-2 pilot to ensure its PHC program is properly supported from a resource, policy and business process perspective.  06/2016 – Assess results of sub-pilots to determine success of centralization of PHC.  09/2016 – Begin discussions with Phase 3 PHC offices (25).  01/2017 – CPMS update to facilitate PHC MI; followed by formally expanding PHCs.  02/2017 – Data call to discuss next phase of PHC pilot offices.</p>
Pilot Logistics:	<p>Phase 1 Pilot Offices:</p> <ul style="list-style-type: none"> <li>• New York, NY</li> </ul>

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements – <i>Pre-hearing Triage</i>
TITLE:	SmartMands
LEAD(s):	Robbie Watts; Donna Sasser
Pilot/Permanent?	Pilot
Stakeholders:	AFGE
Issue:	<p>Pursuant to 20 CFR <a href="#">§404.941</a>, after a hearing is requested but before it is held, we may, for the purposes of a prehearing case review, forward the case to the component of our office (including a State agency) that issued the determination being reviewed. That component will decide whether it should revise the determination based on the majority of the evidence. A revised determination may be fully or partially favorable to the beneficiary. If the component reviewing the determination cannot make a favorable determination, they must return the case to ODAR, where it returns to its spot in the queue.</p> <p>We often refer to this practice as ‘remanding’ the decision back to the organization that made the last decision to review the case for possible revision. We began using these remands to expand the use of staff in an effort to reduce the wait times for a disability determination at the hearings level.</p>
Plan:	The SmartMands initiative builds on past practices of remanding cases with a more robust and data-driven selection process. ODAR, in coordination with ORDP/ODP, ORDP/ORES, and OAO is in the process of developing several models to identify appropriate claims for remand. Once identified, ODAR will transfer the claims to two teams in DCO/OCO with the statutory adjudication authority. If the claim cannot be adjudicated without a hearing, it will be sent back to ODAR and returned to the hearing queue.
Timeline:	<ul style="list-style-type: none"> <li>- FY 2015 through 1<sup>st</sup> Quarter 2016– Develop business processes, early predictive models and case characteristics, and identify cases.</li> <li>- 11/2015 – Began sending cases (150/week) to OCO; sent 500 cases by end of November 2015.</li> <li>- 03/2016 – DC-level check in. DCO agreed to continue pilot. SmartMands group began sending 375 cases per month to OCO.</li> <li>- 08/2016 – Discussed expansion of SmartMands by 1) Continue with OCO if resources permit; 2) research current use of OC-2 report, currently available for HOs to assign cases that have SmartMands profiles; 3) Explore using SmartMands data with the NAT.</li> <li>- 09/2016 – DC-level check in. DCO will report if resources available for FY2017 SmartMands assistance from OCO.</li> <li>- 10/2016 – Number of cases per week to OCO raised to 250, with 750 claims sent during the past month. (10/25). As of October 31, 2016, 3,816 remands had been processed, with 355 remands resulting in reversals.</li> </ul>

## ODAR CARES PLAN INITIATIVES

Outcomes:	Through August 31, 2016, OCO recommended reversals on 9.2% of the more than 3,000 remands processed, of which 7.9% were fully favorable reversals and 1.3% were partly favorable.
-----------	---

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements – <i>Case Readiness</i>
TITLE:	1,000+ Page Case Review
LEAD(s):	Jennifer Horne
Pilot/Permanent?	Pilot
Stakeholders	IFPTE, NTEU, AFGE
Issue:	<p>Administrative Law Judges (ALJs) review cases before holding hearings to identify issues and determine whether expert testimony is needed; to give instructions on further prehearing development; and to prepare questions for the hearing. These reviews can be time-consuming, especially if a case has a substantial amount of medical evidence.</p> <p>As of November 2015, the data indicates that about 4% of all cases have over 1,000 pages of medical evidence:</p> <ul style="list-style-type: none"> <li>• 968,326 pending cases nationwide as of November 3, 2015; 26,922 cases, or approximately 4%, have 1000+ pages in the F section</li> <li>• The Regional distribution of these 26,922 <i>1000+ page</i> cases is as follows: <ul style="list-style-type: none"> <li>➤ Region 1: 1,315 (<b>5.2%</b> of 25,030 total <i>1000+page</i> cases)</li> <li>➤ Region 2: 979 (<b>.9%</b> of 107,272 total <i>1000+page</i> cases)</li> <li>➤ Region 3: 3,076 (<b>2.7%</b> 112,376 total <i>1000+page</i> cases)</li> <li>➤ Region 4: 5,935 (<b>2.2%</b> 269,019 total <i>1000+page</i> cases)</li> <li>➤ Region 5: 5,173 (<b>3.5%</b> of 148,690 total <i>1000+page</i> cases)</li> <li>➤ Region 6: 2,678 (<b>3%</b> of 89,169 total <i>1000+page</i> cases)</li> <li>➤ Region 7: 754 (<b>1.8%</b> 41,256 total <i>1000+page</i> cases)</li> <li>➤ Region 8: 817 (<b>3%</b> of 26,548 total <i>1000+page</i> cases)</li> <li>➤ Region 9: 4,645 (<b>4.5%</b> of 104,152 total <i>1000+page</i> cases)</li> <li>➤ Region 10: 1,098 (<b>3.6%</b> of 30, 123 total <i>1000+page</i> cases)</li> <li>➤ NHC: 452 (<b>3.1%</b> of 14,691 total <i>1000+page</i> cases)</li> </ul> </li> </ul> <p>This pilot aims to find time savings for the case readiness. Senior Attorneys and Decision Writers will conduct a prehearing review of cases with large medical files, summarize the information and provide an analysis for the ALJ.</p>
Plan Pilot 1.0:	<p>We will pilot the initiative in the 7 offices listed below, beginning in the second quarter of Fiscal Year 2016. We will evaluate the results of this preliminary pilot to determine whether any process changes are needed for a nationwide roll-out. We will also assess a number of outcomes to determine the success of this initiative, including decreased average case review time; decreased average processing time; and decreased postponements.</p>

## ODAR CARES PLAN INITIATIVES

	<p>7 Offices in Pilot 1.0:</p> <ul style="list-style-type: none"><li>• Dayton, OH</li><li>• Fort Worth, TX</li><li>• Richmond, VA</li><li>• Baltimore, MD</li><li>• Las Vegas, NV</li><li>• Manchester, NH</li><li>• Minneapolis, MN</li></ul>
Plan Pilot 2.0	<p>The model in Pilot 2.0 changed. In this model, DWs review the case pre-hearing <i>and</i> write the draft for the case, post-hearing. Expanded pilot to 22 offices total. Pilot 2.0 is planned to run through October 2016, but initiative leads will review timeline and provide updates as resources may be affected.</p> <p>22 Offices in Pilot 2.0 (began July 1, 2016):</p> <ul style="list-style-type: none"><li>• New Haven, CT</li><li>• Hartford, CT</li><li>• Newark, NJ</li><li>• South Jersey, NJ</li><li>• Albany, NY</li><li>• Wilkes-Barre, PA</li><li>• Baltimore, MD</li><li>• Birmingham, AL</li><li>• Valparaiso, IN</li><li>• Milwaukee, WI</li><li>• Cleveland, OH</li><li>• Minneapolis, MN</li><li>• Houston-Bissonnet, TX</li><li>• San Antonio, TX</li><li>• Kansas City, MO</li><li>• Creve Coeur, MO</li><li>• Billings, MT</li><li>• Salt Lake City, UT</li><li>• Colorado Springs, CO</li><li>• Las Vegas, NV</li><li>• Fresno, CA</li><li>• Tacoma, WA</li></ul> <p>NOTE: In August, Decision Writing overall in ODAR was on the rise. # ODAR CARES PLAN INITIATIVES

## **April 1, 2016:**

- ✓ Followed up with SAAs
- ✓ Followed up with HOs
- ✓ Stopped assigning cases
- ✓ Circulated draft review and analysis of pilot 1.0

## **May 1, 2016:**

- ✓ Began analysis of pilot 1.0
- ✓ Developed project plan for pilot expansion
- ✓ Completed pilot expansion plan

## **June 1, 2016:**

- ✓ Roll out pilot 2.0
- ✓ Continue analysis of pilot 1.0

## **July 1, 2016 through September 2016:**

- ☐ Finalized data for pilot 1.0
- ☐ Continued data collection and analysis for pilot 2.0
- ☐ Developed next steps – expansion plan or national rollout?

## **October 2016:**

- ☐ Implement next steps – timeline continuation dependent upon next steps
- ☐ 10/19/2016: Began assigning cases for Pilot 2.0

## **January 2017:**

- ☐ Complete Data analysis for Pilot 1.0

## **June 2017:**

- ☐ Evaluate final data for Pilot 2.0

Outcomes for  
Pilot 1.0

Initial findings:

- Baseline task time of reviewing a 1000+page case:  
6 hours to 2 days, depending on the size of the case.
- Task-time at January 2016 evaluation of 1,000+page initiative:  
Estimate of 25% more time at the beginning of the pilot
- Amount of pages reduced due to 1000+page initiative (on average):  
17% of the cases have duplicates
- Of the 350 cases reviewed in the first pilot, we prepared dispositions for

## ODAR CARES PLAN INITIATIVES

	<p>195. Of those 195 dispositions, we were able to adjudicate an on-the-record decision for 13.</p> <ul style="list-style-type: none"><li>• Also, we saw an average of a 16-day difference in those cases between the hearing held date and the date the decision was issued to the claimant. Claimants are getting their decisions 16 days faster!</li><li>• There were 0 cases that had to be continued with another hearing, which allows for the scheduling of more cases. Because 13 cases were able to be decided on the record, this allowed more hearing slots to open up.</li></ul>
Expected outcomes for Pilot 2.0:	<p>Increase productivity, lower APT, continue increase quality in ALJ, SAA and support staff output.</p> <ul style="list-style-type: none"><li>• Impact on productivity, both ALJ and SAA <b>TBD</b></li><li>• Impact on APT <b>TBD</b></li><li>• Impact on quality, ALJ and SAA <b>TBD</b></li><li>• Impact on support staff quality (identify pulling problems – duplicates?) <b>TBD</b></li><li>• Impact on morale, both ALJ and SAA <b>TBD</b></li></ul>

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements – <i>Pre-hearing Triage</i>
TITLE:	Targeted Virtual Assistance Team
LEAD(s):	Judge Nicholas LoBurgio, David Pinnt
Pilot/Permanent?	Pilot
Stakeholders:	IFPTE, NTEU, AFGE
Issue:	Hearing Offices (HO) experience short- and long-term problems with case processing. The long-term issues are addressed by assignment of cases to National Hearing Centers (NHC) and National Case Assistance Centers (NCAC) to reduce case processing time. Some HOs require quicker, more intensive assistance to address specific issues. Examples include a spike in aged cases, an extended illness of an Administrative Law Judge (ALJ), or sudden attrition.
Plan:	<p>We will develop a small team of ALJs, Attorneys, and Legal Assistants to review, schedule, develop, hear, write and issue decisions on a specific subset of cases affecting an office's performance. The team will address specific short-term problems in a designated HO over a period of 1-3 months and then move to another office. The team will also be an available resource with much shorter lead-time to handle cases previously scheduled by a HO, but who require day-to-day assistance in "covering" hearings when an ALJ is not available due to an unforeseen emergency or illness.</p> <p>We will begin with a pilot program targeting aged cases in the Denver Region to test the validity of this approach to case processing. If successful, we will roll it out on a national basis.</p>
Timeline:	<p>11/2015 3 ALJs (2 HOCALJs and 1 line ALJ) selected, 6 NCAC DWs selected 180 Region 8 cases selected.</p> <p>12/2015 Cases scheduled and reviews of cases by DWs initiated.</p> <p>02/2016 Hearings being held in person and video.</p> <p>03/2016 All hearings held.</p> <p>05/2016 All decisions drafted and signed.</p> <p>06/2016 Evaluation of pilot.</p>
Pilot Logistics:	Pilot 1 – Aged Cases – 11/2015 - Denver Region – Colorado Springs HO Hearings being held via video and in-person. DWs communicate virtually with ALJs. 180 cases selected.
Outcomes:	<p>As an average, the cases in this study were drafted and closed (from DWPC-Mail) in <b>6.9 days</b>.</p> <p>The national average (using the E21, Average Days by Status, and combining DWPC, EDIT, SIGN &amp; MAIL) is <b>33 days</b>. In the Colorado Springs HO, the average for</p>

## ODAR CARES PLAN INITIATIVES

	<p>the same process is <b>20 days</b>.</p> <p>Lessons learned for Regions wanting to pilot a program such as the Targeted Virtual Assistance Team were provided on ODAR HQ Regional Call and with initiative leads for CARES monthly check in.</p>

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements
TITLE:	Optimized Hearing Office and Case Assistance Center Models and Virtual Hallway
LEAD(s):	Katrice Kendle
Pilot/Permanent?	Pilot
Stakeholders:	IFPTE, NTEU, AFGE
Issue:	<p>ODAR opened the first National Case Assistance Centers (NCACs) in 2010. As the NCAC universe grew, the concept of a centralized case assistance center has proven itself in the hearings operation. One area of growth we see is improving efficiencies with case assignment between HOs and NCACs as well as solidifying the relationships between decision writers and administrative law judges (ALJs). Strong relationships between ALJs and writers is key to efficient case processing.</p>
Plan:	<p>We will build from our success in FY2015 where a pilot with the St. Louis NCAC and Dallas Regional Office (RO) aimed to improve communication. Specifically, relationships between the offices were established prior to participating in high volume transfers. In the pilot, we paired groups of NCAC writers with specific offices to create familiar, positive relationships virtually with the offices they were assisting. Furthermore, we used video conferencing technology to provide face-to-face availability between offices which created a more comfortable working relationship environment.</p> <p>In FY 2016 we will pair up NCACs (and Regional Case Assistance Centers (RCACs) , as needed) with a smaller universe of hearing offices and National Hearing Centers (NHCs) they assist. In addition to building these virtual teams, we will utilize technology that will encourage multiple modes of communication to facilitate a better working relationship. We refer to the improvements in modes of communication as the <b>Virtual Hallway</b>.</p>
Timeline:	<ul style="list-style-type: none"> <li>11/2015 - began testing Lync (Skype) video between Baltimore NHC and St. Louis NCAC (1 ALJ with 1 writer)</li> <li>11/2015 began partnering ALJs and writers from the 'Virtual Case Assistance Team' aged case initiative with video capability.</li> <li>12/2015-02/2016--Briefed union partners on the Virtual Hallway concept</li> <li>02/2016 – Update provided at OEM. Met with RCACs to update them and include them. Announced to regions the centralized unit partnerships and scheduled calls with respective NCAC that will provide long term assistance.</li> <li>04/2016 – OESSI and OTSO partnered to brief the unions at the April 20<sup>th</sup> forum on video and softphone technology. The briefings involved demonstrations and Q&amp;A.</li> <li>05/2016 – All NCAC offices were aligned with regions.</li> <li>Ongoing – Each month DWM will provide information regarding the status of the alignments. Once received, the regions will be notified of changes. **There have been no changes through July 2016.</li> <li>07/2016 – VH workgroup members briefed RMOs on the proposed video rollout.</li> </ul>

## ODAR CARES PLAN INITIATIVES

	<p>Stressed that video implementation would be voluntary on the part of the employee.</p> <ul style="list-style-type: none"> <li>• 07/2016 - Calls were scheduled for those regions identified to rollout in Phase 1. There were 3 phases total, which included all NCAC, RCACs, Regions, NAT, and Falls Church; however, Falls Church may be delayed due to bandwidth issues. Since that time, it has been determined that a proof of concept will be developed following employee interest and bandwidth analysis. OESSI is working to establish a schedule to complete bandwidth analysis for all of ODAR and the solicitation of interest in Skype technology will help inform this process. 8/2016—briefed the unions at the forum on the status of Skype video proof of concept and next steps</li> <li>• 9/2016—sent a solicitation of interest to the Regions to help inform a proof of concept for future video rollout within ODAR</li> <li>• 9/2016 – Provided update at OEM</li> <li>• 9/2016 - the Richmond NCAC will be working with the Seattle region/Seattle hearing office specifically to receive training on their frequent remands. The Richmond NCAC will work on the continuity of staff who assist the Seattle hearing office as well. All Richmond staff will receive the training.</li> <li>• TBD - begin piloting soft phone technology, pending Agency rollout</li> <li>• The responses to the solicitation for the video POC came in from all of the 10 Regions and the NHC. The team will meet with OESSI on 10/25/16 to discuss next steps for developing the POC and what to communicate to the Regions and NHC as an update.</li> </ul>
Pilot Logistics:	<ol style="list-style-type: none"> <li>1. Baltimore NHC and St. Louis NCAC - video pilot 1 writer, 1 ALJ--<b>ENDED</b></li> <li>2. Virtual Case Assistance Team – Virtual Hallway tool (video capability) pilot 3 ALJs, 6 Attorneys <b>ENDED</b></li> <li>3. OESSI – Soft Phone pilot <b>TBD</b></li> </ol>
Expected Outcomes:	<p>Reduce the communication barriers, as well as identifying workload assignment efficiencies can provide a positive impact on addressing high pending within the component.</p> <p>The goal of centralized units is to provide optimal service to its internal ODAR customers in support of addressing the service delivery crisis currently experienced by ODAR claimants.</p> <p>Success will be measured by direct feedback from the offices receiving support. There are several modes to obtain feedback that range from informal emails to formal survey submissions. In addition, quality communication with prompt responses to routine inquiries may positively affect case status time, average processing time, and ultimately better and faster service to claimants.</p>

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements
TITLE:	Natural Language Processing
LEAD(s):	Gerald Ray
Pilot/Permanent?	Pilot
Stakeholders:	IFPTE
Issue:	At SSA, we collect massive amounts of data about our claimants as they go through the claims process. When we take a claim, our representatives are taking unstructured data from an individual or a medical source and converting the information to structured data. For example, when one of our technicians convert a medical impairment into a four-digit diagnosis code (DIG)—pneumoconiosis becomes DIG 5050—we are converting unstructured data into structured data. However, we have not yet taken real advantage of identifying many types of unstructured data and converting it to structured data for the purpose of data analytics.
Plan:	<p>Natural language processing (NLP) will allow us to extract information from our disability records by converting unstructured typewritten information into usable structured data. Computers using NLP can convert vast amounts of unstructured information quickly and consistently for our employees, allowing them to take actions on a case. Before instituting NLP, we need to work on consistency in recording our findings, as there are multiple words, abbreviations, and formats we can use to describe the same finding in the hearings operation.</p> <p>By developing an improved screening process and exploring new methods to improve our disability evaluation processes, we will be primed to use NLP on more structured data and improve our overall efficiencies for case processing. For example, we will be able to identify cases similar to the ones that were paid in the past, and from that we can run NLP to identify similar cases in the hearings backlog, thereby identifying cases that an adjudicator can likely pay without a hearing to assist with reducing the hearing backlog.</p>
Timeline:	<p>January 2015: Began developing multiple algorithms to extract the useful data from our records.</p> <p>3<sup>rd</sup> Quarter FY 2015: Began mining eCAT data sets. Ongoing activity.</p> <p>2<sup>nd</sup> Quarter FY 2016: Completed the extraction of data from the electronic case analysis tools and have written the natural language processing algorithms that identify more than 180 of the most common decision drafting issues. Actively working to integrate these algorithms into Document Generating System (DGS) so they can be run at the time decisions are prepared. Exploring how to integrate the algorithms into the Appeals Council Analysis Tool, to highlight decision drafting issues for analysts before they conduct their reviews</p> <p>3<sup>rd</sup> Quarter FY 2016: Developed clustering analysis using eCAT data in conjunction with CPMS and ARPS data.</p>

## ODAR CARES PLAN INITIATIVES

	<p>4<sup>th</sup> Quarter FY 2016:</p> <ul style="list-style-type: none"><li>• Continued to develop NLP application.</li><li>• Finishing validation of the algorithms.</li><li>• Worked closely with OESSI to implement the use of Insight in OAO and exploring ways to roll the technology out to the hearing operation.</li></ul> <p>FY 2017 Outlook: Implement at least one test case of Insight in Hearing Office</p> <p>Nov 2016: Validation should be completed on 12/2/16. A pilot of 1 or 2 people in the hearing office is projected to begin in Jan/Feb 2017. A concurrent pilot will happen at the AC level.</p>
Challenges:	<ul style="list-style-type: none"><li>• Limited staffing for algorithm development (OAO only has one programmer who can do this)</li><li>• Time needed to properly mine the data and test the results.</li><li>• IT funding and resources</li></ul>
Pilot Logistics:	The NLP pilot will evolve as results from the initial portions are completed and evaluated. As a result, a formal pilot plan is not conducive to this initiative.
Expected Outcomes:	<p>Improved screening processes.</p> <p>Once cases are identified and worked, the case screening time will result in a 30% - 50% reduction. The exact percentage reduction will be dependent upon available resources in the hearings operation.</p>

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements
TITLE:	Proactive Quality
LEAD(s):	Gerald Ray
Pilot/Permanent?	Permanent
Stakeholders:	AFGE
Issue:	<p>The Appeals Council (AC) is the final stage of administrative review in the Social Security disability program. Currently, the AC conducts five types of reviews that provide the data necessary to ensure decisional quality, specifically:</p> <ul style="list-style-type: none"> <li>• Requests for review – the AC reviews and acts upon 100% of dismissals and decisions (mostly unfavorable to the claimant) which have been appealed by claimants</li> <li>• Random sample review – the AC randomly selects, reviews and acts upon between 3,500 and 7,000 unappealed decisions (mostly favorable to the claimant) and captures information about the quality of those decisions that is statistically valid from a regional perspective</li> <li>• Selective sample reviews – the AC selects, reviews and acts upon unappealed decisions (mostly unfavorable to the claimant) selected based on the likelihood of error</li> <li>• Reopenings – the AC reviews and acts upon cases referred because of potential errors that affect the effectuation of benefit payments</li> <li>• Focused reviews – the AC reviews but does not act upon cases involving issues known to be problematic in disability adjudication, or cases involving individuals who data shows are acting differently in some meaningful way than other individuals in similar cases</li> </ul>
Plan:	<p>The AC will continue to robustly administer its existing efforts, while at the same time continuing work on new and improved quality assurance methodology.</p> <p>Additionally, the AC has developed the ability to use natural language processing to identify anomalies in case processing. The AC is refining its capabilities in this regard to enable the ability to identify the 200 or so most common errors in adjudication. As this work progresses, the AC will focus more on selective sample reviews and less on focused reviews and random sampling in its quality assurance efforts. The AC has evaluated the use of selective sample reviews and determined them to be about 99.7% accurate</p>
Timeline:	<p>3<sup>rd</sup> Quarter FY 2015: The AC began using NLP for selective sample reviews. This process will be ongoing.</p> <p>June 2016 Update: OAO's Division of Quality has improved and refined its selective sampling model to the point where we can focus on particular types of cases.</p> <ul style="list-style-type: none"> <li>• Also, significant process improvements have been made that allow them to</li> </ul>

	<p>process the same volume of work with fewer adjudicators.</p> <p><b>Selective Sampling:</b> DQ completed review of 1,163 selectively sampled cases that were identified through use of natural language processing with the assistance of ODAR's OESSI and the National Institutes of Health. This review looked at favorable hearing decisions with findings of medical equivalence at Step 3 of the sequential evaluation process.</p> <p><b>Focused Reviews:</b> In FY 2016, DQ performed 16 post-effectuation focused reviews (which do not affect awarded benefits) of 14 ALJs and 2 disability adjudication issues. (In FY 2015, DQ had performed 16 new and 5 follow-up focused reviews of 16 ALJs, 3 medical sources, and 2 disability adjudication issues.)</p> <p><b>In-line Quality Review of Analyst Recommendations:</b> In an OAO-wide program, technical assistants (TAs) reviewed the quality of analyst recommended actions, as OAO continued its review of 1% of analyst recommendations prior to disposition. These actions included RR denials, remands, dismissals, favorable and unfavorable actions, bureau protests, requests for voluntary remand, and final decisions after remand. TAs found that the recommended action was clearly not justified in 72 of the 1,503 cases or 4.79%. OAO will use data collected from the reviews to identify areas for training, clarification of procedures, and Appeals Council consistency issues. Analyst recommendations in 171 court cases were also reviewed.</p> <p><b>In-line Quality Review of Appeals Officer Actions:</b> In an OAO-wide program, a cadre of AOs completed review of 1,308 cases in their peer review program and found clear error in actions taken in 33 cases (2.25%). In 210 cases (16.06%), they found other errors requiring correction such as failure to note incorrect addresses, improper exhibiting of evidence, and failure to consider additional evidence and contentions submitted to the AC. The in-line quality review process serves to continually ensure that the AC meets its duty to provide quality service as well as policy compliant decisions.</p> <p><b>Quality Review of Administrative Appeals Judge</b>  <b>Actions:</b> In FY 2016, OAO developed a business process for examining the quality and consistency of decision-making by every AAJ. Under the process scheduled to start in FY 2017, a newly created AAJ Peer Review Panel will look at every AAJ's action in at least one closed case every month. Cases for review will fall into seven categories of one- and two-AAJ actions involving remands, dismissals, and denials of requests for review, and AC decisions. About nine AAJ volunteers will comprise the peer review panel with membership changing every six months. Reviewers will use a web-based tool developed by DITI to collect structured data about a variety of quality issues including whether the AAJ(s) action correctly concluded that the ALJ action was (or was not) supported by substantial evidence (<a href="#">OAO newsletter 9/2/16</a>).</p>
Pilot Logistics:	TBD - Will be piloted within OAO

## ODAR CARES PLAN INITIATIVES

Expected Outcomes:	Improved quality and the ability to reduce the most common errors in adjudication. The heat maps that currently reflect the over 200 common errors will continue to be updated during the process. The intent is for this process to be a permanent part of decisional quality and not a pilot.

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements
TITLE:	Case Processing Unification
LEAD:	Judge Monica LaPolt
Stakeholders	CALJ Association, ODARMA, AFGE, NTEU, IFPTE
Issue:	Hearing offices in close physical proximity will unify case processing tasks to strengthen day-to-day hearings office operations, increase case processing efficiencies and shorten the average wait time for claimants.
Pilot Plan:	In the first phase, offices will schedule hearings jointly. As the program rolls out, offices will handle master docket jointly. Ultimately, some offices may evolve to the point where they have a unified service delivery area and draw from one pool of cases for all aspects of case processing.
Pilot logistics/Business Process:	<p>The pilot will run for 90-120 days in the following offices:</p> <ul style="list-style-type: none"> <li>- Region 3 — Philadelphia and Philadelphia East ODARs <ul style="list-style-type: none"> <li>o Four employees in Region 3 are performing scheduling tasks under the Pilot, which allows two employees to handle other workloads.</li> </ul> </li> <li>- Region 7 -- Columbia will schedule for St. Louis area cases, including cases being heard in Creve Coeur ODAR, Kansas City ODAR and St. Louis ODAR <ul style="list-style-type: none"> <li>o Three to 5 employees in Region 7 will perform scheduling tasks, which allows 6-9 employees to handle other workloads.</li> </ul> </li> <li>- Region 9—Phoenix and Phoenix North ODARs <ul style="list-style-type: none"> <li>o Five employees in Region 9 will perform scheduling tasks, which allows one employee to handle other workloads.</li> </ul> </li> </ul> <p>The goal is to establish parameters for the next stage of the pilot by the end of December 2016.</p>
Timeline:	<ul style="list-style-type: none"> <li>• March 2016: Workgroup/discussions begin <ul style="list-style-type: none"> <li>o Discussions/presentations to stakeholders: local bar associations, Unions, representative groups in pilot areas.</li> </ul> </li> <li>• July 2016: Scheduling began in all 3 regions.</li> <li>• October 2016: Assess preliminary success of project; determine viability of rolling out second round of offices</li> </ul>
Expected Outcomes:	<p>The unified approach will create a more even, efficient, predictable scheduling process allowing for all hearing slots requested by judges to be scheduled. The process will allow for a higher disposition rate due to a higher number of hearings.</p> <p>Ensuring that all experts, VHRs and representatives are available for the hearings</p>

## ODAR CARES PLAN INITIATIVES

	<p>will improve our scheduled-to-heard ratio, again increasing the number of dispositions and</p> <p>should result in using less staff for scheduling, allowing other case readiness actions to be performed.</p> <p>After the pilot has ended, we will determine if the program should continue and if we should institute the program to other offices.</p>
--	---

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements
TITLE:	Large Hearing Office Organizational Remodel
LEAD(s):	Fay Adams (original lead: Judge Nicolas LoBurgio – Denver RCALJ)
Stakeholders	CALJ Association, ODARMA
Issue:	<p>The large pending caseload has necessitated the need to hire more ALJs into Hearing Offices (HOs) with the goal of having approximately 1,800 ALJs on board by 2018. However, the size of the agency’s “footprint” has not increased, therefore more ALJs and support staff are being placed in existing HOs. This results in the increase of more “super” sized HOs. The present management structure of HOs (a HO Chief ALJ [HOCALJ], a Hearing Office Director [HOD] and multiple Group Supervisors [GS]) may not be the optimum design to accomplish the mission. This is especially true when viewing the responsibilities of the non-ALJ managers, specifically the HOD. For example, more ALJs translates into more hearings, resulting in other increases: more invoices (VHR, ME, VE—all evaluated and approved by HOD); more requests for medical evidence, supplies, rep travel, and claimant travel (all bills reviewed and signed by HOD); and increased IT workloads, equipment and issues for the Hearing Office Systems Administrator, who is supervised by the HOD. A larger staff means more union involvement, personnel issues, EEO, grievances etc.</p>
Plan:	<p>We need to consider a new view of the management structure with the idea that the HOD should act as the Chief Operating Officer of the HO. We need to determine what functions a HOD must perform, whether other HO management can perform other functions currently performed by the HO , and whether an Administrative Officer-type position might be ease the burden on the HOD. A workgroup consisting of HODs of large HOs, HOCALJs, RMOs, RCALJs and OCALJ will analyze the current functions and organizational structure of the HO and, if necessary, design a new model for the large HO.</p>
Timeline:	<ul style="list-style-type: none"> <li>February 2016: identified work group members</li> <li>March 2016: first meeting held and divided members into sub-groups: RCALJs/HOCALJs/OCALJ lead: Judge LoBurgio and HODs/RMOs/OCALJ lead: Darrell Fennel</li> <li>April 2016: Fay Adams (Dallas RMO) assumed project lead role for this workgroup.</li> <li>April through September 2016: Workgroup continues to gather feedback and data regarding HOD and HO management duties to determine if/how additional management support could work. Developing proposal for Executive</li> </ul>

## ODAR CARES PLAN INITIATIVES

	<p>consideration.</p> <ul style="list-style-type: none"><li>• August 2016: Prepared a current organizational chart and a proposed organizational chart to include assistant positions for the HOCALJ and the HOD. Developed draft proposal to prepare for OCALJ and DC/ADC briefings.</li><li>• October 2016: Workgroup will report out and provide recommendations to OCALJ and DC/ADC, including proposed position with duties and pilot locations.</li><li>• October 2016 – Position Description finalized, with OCALJ and OEOHR sign offs.</li><li>• January 2017 – Hearing Office Management Specialist Announcement tentatively planned for January pending approval. Proposal as of November 2016 is to establish the position in 50 offices, graded at 11-12.</li></ul>
Pilot Locations:	TBD
Expected Outcomes:	The goal is to create an organizational structure that enhances the ability of top HO management; allowing them to address the strategic issues facing HOs (e.g., aged cases, high pending and high APT). Expected outcome in pilot/large offices is increased efficiency in case management.

# ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements
TITLE:	ODAR CARES – New Report Category in DART
LEAD(s):	Deb Plunkard POC
Pilot/Permanent?	Permanent
Stakeholders:	ODARMA
Issue:	<p><b>Background:</b></p> <p>Various reports in the Disability Adjudication Reporting Tool (DART) have been developed in WebFOCUS and provide users with reports that can be sorted, filtered, and further refined. DART does not replace the CPMS MI reports on the CPMS menu; rather, it supplements CPMS MI to help meet ODAR's total MI needs. Currently, we have approximately 200 reports and have the following challenges:</p> <ul style="list-style-type: none"> <li>• Users may not be aware or familiar with newly created reports;</li> <li>• Current initiatives are not easily locatable in the current report's menu.</li> </ul> <p>Therefore, creating this new section for CARES should focus their attention to the reports in this category that assists them with CARES initiatives.</p>
Plan:	<p>Sample Menu:</p>  <p><b>OC1</b> - Obtainable Dispos of Cases Based on Current Status  <b>OC2</b> - CARES Screening Tool  <b>OC3</b> - Aged Milestone Reporting  <b>OC4</b> - Missing Notice of Hearing -- within 31 days of hearing date  <b>OCH</b> - CARES WebSite Hits 🔒  <b>M20</b> - Triage Report  <b>R3</b> - Pre Hearing Conference Reporting</p>
Timeline:	<ul style="list-style-type: none"> <li>• Immediate implementation once we get approval to move the changes into Production</li> <li>• No training required</li> <li>• 03/02/2016 ODAR CARES Reports developed</li> <li>• 03/15/2016 ODAR CARES Reports launched <ul style="list-style-type: none"> <li>○ OC1 Report: Obtainable Dispos of Cases Based on Current Status <ul style="list-style-type: none"> <li>▪ To identify Aged (with additional options for non-aged) cases that are ready to close (after writing statuses). Also displays the case with the oldest status days of each category.</li> </ul> </li> <li>○ OC2 Report: CARES Screening Tool</li> </ul> </li> </ul>

## ODAR CARES PLAN INITIATIVES

	<ul style="list-style-type: none"> <li>▪ To assist in identifying Aged/Non-Aged Cases that are up to SCHD status so managers can assign to the Senior Attorneys mobilized to help get these cases reviewed and ready.</li> <li>○ OC3 Report: Aged Milestone Reporting <ul style="list-style-type: none"> <li>▪ Provides Summary and case level information relating to the OCALJ Milestones for Aged Cases. Milestones are pulling, scheduling, and unassigned writing (UNWR) and provides information on all pending Aged cases. Additional insight on potential setbacks such as jail and fraud cases are displayed as well as particular status end dates – added for guidance on why they may or may not be on the report.</li> </ul> </li> <li>○ OC4 Report: Missing Notice of Hearing – within 31 days of hearing date <ul style="list-style-type: none"> <li>▪ To identify if the Notice Sent Date is missing and the case is scheduled in 31 days. It looks at eView for fully electronic cases to determine if the notice is in the EF, as well as the waiver and reminder notices. It will also show paper cases (with a link and without) to eView where the Notice Sent Date is not in CPMS. This should provide the office an opportunity to contact the claimant, possibly send a waiver of the 20-day notice and prevent the hearing from being postponed as a no show and possibly have to be rescheduled.</li> </ul> </li> <li>• 03/29/2016: All Manager’s Call describing CARES Reports</li> </ul>
Outcomes:	<p>Provides the user community with a quick look at specific reports under the ODAR CARES section that will assist them as follows:</p> <ul style="list-style-type: none"> <li>• Low-hanging fruit by identifying the cases that can quickly be processed out for a disposition.</li> <li>• Targets users to reports that identify certain cases processes to triage cases towards closure.</li> <li>• Focuses users to target Aged Cases.</li> </ul> <p>Update August 2016:</p> <ul style="list-style-type: none"> <li>• M20 is the most popular CARES report with over 4,000 runs since March 25<sup>th</sup>. The M20 is a triage report that looks at cases that may be able to be moved (i.e., overdue development, untimely filings, scheduled past the scheduled date, etc.).</li> <li>• The OC3 report has 3,500 runs. (This report looks at our aged case milestones.)</li> <li>• The OC4 (missing notices) and OC1 (obtainable dispositions) have over 2,000 runs each.</li> <li>• The OC1 (screening report) has close to 1,000 runs.</li> </ul>

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements – <i>Case Readiness</i>
TITLE:	DeDooop – Software Program
LEAD(s):	Lisa Seefeldt/OESSI
Pilot/Permanent?	Pilot
Stakeholders	CALJ Association, ODARMA, IFPTE, NTEU, AFGE
Issue:	As of November 2015, the data from the 1000+ Page Case Review Pilot indicated that about 4% of all cases have over 1,000 pages of medical evidence. The pilot offices began their reviews in November and found that many of the numerous pages reviewed during the case reviews were duplicate medical reports. Duplicate medical evidence and other documentation need to be reviewed and removed/identified in accordance with policy. The removal/identification of such documentation will enable an efficient and effective review of the folder by the SAA and/or ALJ.
Plan:	DeDooop is a software solution that can scan case files, identify medical evidence that appears to be duplicative, and suggest those pieces of evidence for removal by the user. We plan to develop and pilot this software to determine if this is a viable solution to the issue of duplicative evidence.
Timeline:	<ul style="list-style-type: none"> <li>As of July 2016, DeDooop began the iTip process. A business vision has been approved and a workgroup completed the As Is and To Be documentation.</li> <li>Next steps: dependent upon IT funding.</li> </ul>
Expected Outcomes:	<p>Expected Outcomes:</p> <ul style="list-style-type: none"> <li>Increase productivity, lower APT, continue increases in quality in ALJ, SAA and support staff output.</li> <li>Amount of pages reduced due to review of duplicate documentation (on average)</li> <li>Improved Task-time evaluation of 1,000+page initiative</li> </ul>

# ODAR CARES PLAN INITIATIVES

CATEGORY:	Business Process Improvements/IT Innovations
TITLE:	National FIFO
LEAD(s):	Judge Monica LaPolt (OSUG Proposal Team: Renu Agarwal (OCALJ), Deb Plunkard (OCALJ), Andy Wernicke (LCT-LA), Doug Stults (HOCALJ-OK), Andrea Maldonado (GS-Omaha), Matt Pellum (RSA, NHC-STL), Catrina Dickson (OESSI), William Margelis (AA-Morgantown))
Stakeholders	OCALJ, OESSI, OBFS – eventually AFGE, NTEU, IFPTE with bigger vision
Issue:	<p>Hearings workloads and office staffing are distributed unevenly across the country. Some offices have more work than they can do while other offices have excess staff. While individual offices work the oldest cases assigned to their offices first, there could be older cases in the country that wait longer for decisions. Additionally, there are regional and national case assignment centers (RCACs and NCACs) that require cases be manually processed, not precise and may not necessarily meet the FIFO requirements.</p> <p>Our current process to redistribute work is tedious and manual.</p> <ul style="list-style-type: none"> <li>• The original hearing office sends a request to the regional office to ask for assistance.</li> <li>• The regional office has to canvas the region in search of a hearing office that can accept the workload.</li> <li>• Once an assisting hearing office is determined, the cases need to be updated to a specific status in order for them to be sent to the assisting office.</li> <li>• The assisting office then has to perform status updates to “receipt in” those cases.</li> <li>• The hearing office management then individually, or batch, assigns those cases to their own employees.</li> <li>• Once the employees complete their tasks, the assisting office then has to perform further status updates in order to send the cases back to the owning office.</li> <li>• The original office then has to receipt the cases back in and assign it to the next person.</li> </ul> <p>At a minimum, it takes one day to send the original request to the region, two days for the region to locate available resources and several more days to transfer the cases. The delay is multiplied each time a task is sent to another office (e.g., pulling and writing). In this age of electronic folders and digital processing, there must be a better way to redistribute work.</p>

## ODAR CARES PLAN INITIATIVES

Plan:	<p>We will develop an iTip proposal to develop software to control and assign case processing tasks automatically to available workers across the country based on the age of the case.</p> <ul style="list-style-type: none"><li>• All tasks (e.g. screening, workup, holding the hearing, writing, mail) will be controlled on a national level.</li><li>• When a worker has finished one task, they will automatically receive the next available case, regardless of HO jurisdiction.</li><li>• Tasks will be assigned in order – priority cases (TERI, QDD, Congressional) will be assigned first, followed by those cases with the oldest hearing request date.</li><li>• Management will be able to set maximum assignments and manage their employees' workload accordingly.</li><li>• Individual cases will be able to be put back into the "pool" or original office if the office/individual is unable to process (i.e, ALJ instructions are not in Eview).</li><li>• The system will contain parameters (e.g., judicial circuit, video opt out, paper, etc.) to narrow the assignment of selected tasks.</li></ul> <p>By breaking the work into tasks, the next available resource can complete the next task on the case. With this national case distribution plan, cases will be processed first in, first out on a NATIONAL basis. Making it such that there will no longer be cases waiting for a task such as workup for over a year or more in one office and only 60 days in another. Mailing of cases could conceivably be completed on the west coast if entered on the east coast at the end of their day and would be processed more timely.</p> <p>The National FIFO vision will be folded into the overall ODAR Hearings Operation Case Processing product vision being developed by OESSI.</p>
Timeline:	<ul style="list-style-type: none"><li>• April 2016 – Select project lead and workgroup members</li><li>• April 2016 – September 2016 - Develop business case (to include business process, alternatives analysis, costs, benefits and timelines)</li><li>• September 2016 – Finalize 'to be' process, prepare for Exec review and iTIP vision</li></ul>
Pilot Locations:	<p>11/30/2016 - A potential scenario for National FIFO pilot has been identified in Region 10. Further development of the proposed business process is needed before the pilot will commence.</p>

## ODAR CARES PLAN INITIATIVES

Outcomes:	<ul style="list-style-type: none"><li>• Balanced workloads</li><li>• Reduced case processing time</li><li>• Reduced aged cases</li><li>• Consistent National case processing</li></ul>
-----------	--

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Information Technology Innovation
TITLE:	ME/VE Access
LEAD(s):	(b) (6) /Lisa Seefeldt---POC Magan Mohrmann
Pilot/Permanent?	Pilot
Stakeholders:	IFPTE, AFGE, NTEU
Issue:	<p>ODAR adjudicates claims for individuals who have filed a request for hearing before an Administrative Law Judge (ALJ). ALJs may request that an expert provide medical or vocational expert testimony as a part of the process.</p> <p>When a hearings office (HO) contracts with a medical or vocational expert, HO staff burn the appropriate eFolder exhibits to an encrypted CD. We typically mail the CD to the expert. If new evidence is added to the eFolder prior to the hearing, we burn an updated CD and send that to the expert. The expert uses the CD to prepare for the hearing. Each year ODAR burns hundreds of thousands of CDs for Medical Experts (ME) and Vocational Experts (VE). We provide a workstation in every hearing room so that the expert can view the appropriate exhibits from the CD during the hearing.</p>
Plan:	<p>We envision a process where MEs and VEs will be able to access evidence from the claimant's eFolder electronically over the Internet. All of our experts will register for a mySocialSecurity account and be authenticated at the highest security level. ODAR will store the expert's account key or SSN in our CPMS expert table.</p> <p>The expert will bring his/her own laptop to the hearing and log into the secure website to view the applicable evidence during the hearing. Systems is currently developing the software. The Blanket Purchase Agreements (BPAs) are being modified to require the experts to register, view background evidence over the internet and bring their laptops to the hearing. We are working with OIS to provide wireless access (Wi Fi) in hearings rooms so that the experts will be able to access the internet. It will take some time to wire all hearings offices for wifi, so experts will need to download the folder onto their laptop before the hearing. We will still need to burn CDs for new exhibits and for "emergency" requests for experts on the day of the hearing.</p>
Timeline:	<p>Wi-Fi in Hearing Offices</p> <ul style="list-style-type: none"> <li>• Gain stakeholder buy in at International Association of Rehabilitation Professionals conference 10/23/15</li> <li>• Met with OIS to discuss wireless – 10/19/15.</li> <li>• Identify wireless pilot sites – 12/15</li> <li>• Request funding for wireless pilots – 01/16</li> <li>• Completed pilot site survey – 2/24</li> <li>• Prepare training materials – TBD – pending infrastructure work</li> </ul>

## ODAR CARES PLAN INITIATIVES

	<ul style="list-style-type: none"> <li>• Register pilot participants – TBD – pending infrastructure work</li> <li>• Train and implement – TBD – pending infrastructure work</li> <li>• Expand to additional pilot sites – TBD – pending infrastructure work</li> <li>• Release 2 – TBD – pending infrastructure work</li> <li>• Full implementation – TBD – pending infrastructure work</li> </ul> <p>ME/ VE Access to eFolders (Release 1)</p> <ul style="list-style-type: none"> <li>• UAT testing with ME/ VEs (8) 2/28-3/11</li> <li>• ARA held and executive summary approved; eGSC 3/1/16</li> <li>• Finalize User Guides during UAT</li> </ul> <p>ME/VE Access to eFolders (Release 2)</p> <ul style="list-style-type: none"> <li>• UXG testing complete; recommendations pending</li> <li>• UXG compensation requests to RO contacts</li> <li>• BPD exec agreement over RQID feature; defer for ME/ VEs</li> <li>• Review Use Cases and finalize requirements</li> <li>• Begin drafting User Guides</li> </ul> <p>Update 8/8/16:</p> <ul style="list-style-type: none"> <li>• Began rollout of ME/VE access late April 2016.</li> <li>• Through November 2016, 20 experts (2 per region) each month will be invited to participate in the pilot.</li> <li>• National release scheduled for December 2016 – There are approximately 1400 ME/VEs nationwide who will receive information in December that they are eligible to register for electronic folder access.</li> <li>• After the December release, experts will be encouraged to register and use eFolder access for their claims.</li> <li>• In an effort to facilitate an expedited and smooth rollout, we may consider requiring ME/VEs register for a mySocialSecurity account.</li> </ul> <p>Update 9/13/16:</p> <ul style="list-style-type: none"> <li>• As of September 9, 2016, 37 experts were enrolled.</li> </ul> <p>Update 10/28/16:</p> <ul style="list-style-type: none"> <li>• January 2017 – Begin national implementation of ME/VE access.</li> <li>• End of FY 2017 – Stop burning CDs for ME/VEs.</li> </ul>
Pilot Logistics:	<p>Wi-Fi in Hearing Offices</p> <ul style="list-style-type: none"> <li>• Wireless access will have to be provided in hearing room pilot sites</li> </ul> <p>ME/ VE Access to eFolders (Release 1)</p> <ul style="list-style-type: none"> <li>• Pilot group will be solicited from among UXG/ UAT testers</li> <li>• We will couple April 30 pilot of software with Wi-Fi testing</li> </ul>
Outcomes:	Wi-Fi in Hearing Offices

## ODAR CARES PLAN INITIATIVES

	<ul style="list-style-type: none"><li>• The new process will save approximately 58 WYs, the cost of CDs, packing materials and postage as well as the cost of the extra workstation in every hearings room.</li></ul> ME/ VE Access to eFolders (Release 1) <ul style="list-style-type: none"><li>• Successful implementation will result in cost savings of over \$5.6 million/year and a time savings of 55.37 WYs</li></ul>

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Information Technology Innovation
TITLE:	Reduce CD Burning in Hearings Offices
LEAD(s):	(b) (6) ; POC: Magan Mohrmann
Pilot/Permanent?	Permanent
UNION(s):	AFGE, NTEU, IFPTE
Issue:	<p>ODAR burns millions of CDs for representatives at a cost of over 2 million dollars per year (i.e., ~20 work years (WY) plus supplies). Since 2009, ODAR has registered more than 13,000 individual appointed representatives to allow representatives to view their claimants' electronic folders (eFolders) securely over the internet. These 13,000 representatives are associated with 90% of the appeals with representatives pending in ODAR. However, despite having access to their claimants' eFolders, some appointed representatives continue to request CDs from hearing office (HO) staff and a number of them never even registered for the eFolder access. For example, there are currently 3,553 representatives in CPMS, associated with 2% of the pending workload, who never registered for Appointed Representative Services (ARS). This number probably represents owners of firms and not all of the attorneys who work for them. We anticipate that we may need to register <b>up to 10,000 representatives</b> with publication of the Federal Register Notice (FRN) discussed below.</p>
Plan:	There are multiple options which are either long-range or would create more work for the hearing offices. The most expeditious and lowest cost option is to mandate that reps who receive direct fee payment use the eFolder.
Timeline:	<ul style="list-style-type: none"> <li>• FRN <ul style="list-style-type: none"> <li>○ Draft comprehensive FRN mandating that all direct fee representatives must use the eFolder – 11/25/15</li> <li>○ Receive OGC comments on draft – 12/11/15</li> <li>○ Send FRN to OR for official review – 1/18/16</li> <li>○ Receive final FRN and ACOSS memo – 2/17/16</li> <li>○ Proposed publication date – 3/21/2016</li> <li>○ Registration grace period for HO in-person enrollment –120 days following publication</li> <li>○ Non-substantive changes made to FRN by Deputy Commissioner - 3/15/2016</li> <li>○ FRN pulled back from OFR – 3/15/2016</li> <li>○ Send FRN to ACOSS for signature – week of 3/21/2015</li> <li>○ FRN to OR for return to OFR for new publication date – week of 3/28/2016</li> <li>○ FRN published -- 4/18/16</li> <li>○ FRN effective -- 8/16/16</li> </ul> </li> <li>• HALLEX <ul style="list-style-type: none"> <li>○ Updated HALLEX out for all component review – 2/1/16</li> <li>○ HALLEX review due – 2/19/16</li> <li>○ Published HALLEX – week of FRN publication</li> <li>○ Reviewed updated FRN for possible HALLEX updates – week of 3/21/2016</li> </ul> </li> <li>• eBP <ul style="list-style-type: none"> <li>○ Developed new business process– 1/25/16</li> <li>○ eBP updates – 2/19/16</li> </ul> </li> </ul>

## ODAR CARES PLAN INITIATIVES

	<ul style="list-style-type: none"> <li>○ Published eBP updates – close to effective date (July 2016)</li> <li>● Notices <ul style="list-style-type: none"> <li>○ Drafted notice (HA-L32) changes – 2/8/16</li> <li>○ Requested DGS changes – 2/8/16</li> <li>○ Implement DGS changes – October 2016</li> <li>○ Prepared Dear Colleague letter for distribution in lieu of HA-L32 changes- 3/7/2016</li> <li>○ Mailing list and hard copy to OCALJ for central print mass mailing – 3/14/2016</li> </ul> </li> <li>● Communications - external <ul style="list-style-type: none"> <li>○ Developed Communications plan – 2/1/16</li> <li>○ Submitted OCOMM video request – 2/8/16</li> <li>○ Requested ssa.gov ARS webpage updates – 2/15/16</li> <li>○ Drafted flyer for reps – 2/15/16</li> <li>○ Executive review of Dear Colleague letter – 2/22/16</li> <li>○ Call with NOSSCR leadership – 3/15/16</li> <li>○ Brief at NADR conference – 3/15/2016</li> <li>○ Sent Dear Colleague letters electronically– week of publication</li> <li>○ Updated Internet ARS pages – week of publication</li> <li>○ Posted OCOMM video – early April 2016</li> </ul> </li> <li>● Training &amp; Communications – internal <ul style="list-style-type: none"> <li>○ Requested OCO refresher training – 2/8/16</li> <li>○ Brief RO ARS workgroup – 2/22/16</li> <li>○ Brief unions via OCALJ– 3/15/2016</li> <li>○ Brief All ODAR Managers – 3/15/2016</li> <li>○ Updated ARS training materials – 3/18/2016</li> <li>○ Delivered OCO &amp; RO/HO refresher training – prior to publication</li> </ul> </li> <li>● Registration <ul style="list-style-type: none"> <li>○ External event – NADR conference in Atlanta 3/13-3/16 ; NOSSCR conference in Miami 6/1/16-6/4/16</li> <li>○ HO registration – publication date thru effective date</li> <li>○ As of 8/27/2016, 775 representatives enrolled (including Charles Binder) – equivalent to 95% of cases pending with representatives. The remaining 5% of represented cases have reps that do not have ARS access. Approximately 2% are “friends and family members”.</li> </ul> </li> </ul>
Outcomes:	We will save substantial money and staff time by requiring representatives to download their claimants’ folders themselves, rather than asking ODAR staff to perform this service for them.

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Information Technology Innovations
TITLE:	Eliminating Paper Folder Exceptions (Maintaining the Electronic Folder)
LEAD(s):	(b) (6) —POC Jamye Pritchett, Don Nguyen
Stakeholders:	AFGE/IFPTE/NTEU
Pilot/Permanent?	Permanent
Issue:	ODAR receives a volume of requests for hearing on electronic folders that are transferred by the field office to the hearing level where one portion of the electronic record on a concurrent case is missing. If the missing portion is not associated within a defined period, the file must be converted to paper.
Plan:	<p>We plan to make a series of incremental enhancements to our Information Technology systems to automate numerous exclusions, thus eliminating some of the primary exceptions to maintaining the electronic folder.</p> <p>Additionally, we will work with DCO and DCRDP to update our current policies and procedures to stop printing entire electronic folders when one claim becomes exclusion.</p>
Timeline:	<ul style="list-style-type: none"> <li>• <b>EDCS Edit</b> – In July 2015, we added an edit to EDCS to prompt the FO to transfer both portions of a concurrent case at the same time. This edit saves valuable time for our hearing office staff.</li> <li>• <b>T16 Exclusions</b> – On December 12, 2015, we provided the ability to maintain electronic processing in some scenarios for both claims of a concurrent case when one claim (T16 is paper). Training was delivered via VOD. The release was instantly popular with users (hundreds of cases were kept electronic within the first week of implementation).</li> <li>• <b>Remaining T16 Exclusions</b> – On June 18, 2016, we expanded the functionality and reach of the December 2015 release. Field Offices can now add any T16 claim/appeal to a concurrent appeal. This release captures a significant bucket of the remaining exclusions including, Stand Alone Title 16 claims/appeals. A collaborative team (ODAR, Operations, and Policy) created and delivered training via VOD. <ul style="list-style-type: none"> <li>○ The June 2016 systems were successfully implemented into production. This release captured a significant bucket of the remaining exclusions including Stand Alone T16 claims/appeals.</li> </ul> </li> <li>• <b>Policy changes</b> – A multicomponent workgroup is underway to recommend modifying existing policy to allow for electronic processing of concurrent claims and dual entitlement cases that share the same medical evidence. This will significantly reduce the number of cases that must be converted to paper.</li> </ul>

## ODAR CARES PLAN INITIATIVES

	<ul style="list-style-type: none"><li>• <b>Automating queries in eView</b> – In FY 16, hearing office staff will be able to launch the most frequently used mainframe queries directly from QueryMaster so that they can be automatically uploaded to the electronic folder. (June 2016) Issue new policies and procedures to maintain electronic processing and stop printing entire electronic folders if one claim becomes an exclusion. (June 2016)</li></ul> <p>08/2016:</p> <ul style="list-style-type: none"><li>• User Acceptance Testing (UAT) was successfully completed.</li><li>• Training was delivered via VOD as part of a collaborative effort with DCO, policy, and systems.</li><li>• A new workgroup is looking into making changes to EDCS/eView to allow multiple pending cases to be worked electronically.</li></ul> <p>TBD: Work with OCALJ on updating eBP and finalize.</p> <p><b>FY 17 Automation Enhancements (Strategy)</b> – Identify and implement efforts to capture remaining buckets of exclusions electronically. TBD: long term goal - The agency is committed to find a solution for the remaining electronic processing solution. This effort utilizes iTIP and includes the remaining buckets of exclusions:</p> <ul style="list-style-type: none"><li>• Multiple pending</li><li>• Non-dib/non-medical</li><li>• Expedited reinstatements</li><li>• Res Judicata, and SGA scenarios</li></ul>
Outcomes:	We anticipate that the FY 16 releases will prevent up to 10,000 cases from turning into paper. We estimate that automating queries in eView will save up to 7 minutes per case.

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Information Technology Innovation
TITLE:	iAppeals for the Appeals Council
LEAD(s):	DCO = Agency Lead; (b) (6) /OESSI = ODAR Lead
Pilot/Permanent?	Permanent
Stakeholders:	
Issue:	<p>SSA hosts an internet service to allow claimants, their appointed representatives, and third parties to file appeals online. The current software supports appeals of disability determinations through the ALJ level. The software does not support non-medical appeals or Appeals Council level appeals. Both of these workloads are extremely labor intensive and paper bound. Two iAppeals projects were submitted through the SITAR process for FY 16. One would allow the public to file non-medical appeals over the internet; the other would allow the public to file Appeals Council (AC) appeals over the internet. DCS convened a meeting in late August to discuss SITAR priorities with ORDP, DCO and ODAR. The group discussed the two iAppeals proposals. Everyone agreed that the non-medical project would have the greatest impact so should be completed first. ODAR proposed that if OAO could use the same front end as non-medical appeals, we would merge the two projects.</p> <p>As a result, ODAR made a few minor tweaks to DCO's iAppeals business process description (BPD). We circulated the revised BPD to all affected components and on 11/27/15 received component concurrence to combine the Planning and Analysis effort for non-disability iAppeals with OAO iAppeals, with the understanding that non-dib is the priority and must be implemented by 12/16.</p>
Plan:	<p>The project will make minimal modifications to non-dib iAppeals and dib iAppeals to allow reps/claimants/third parties to submit iAppeals over the internet, attach evidence via the attachment utility, and route the appeal to OAO.</p> <p>We will continue to work with DCO through the Planning and Analysis (P&amp;A) phase. At the end of P &amp; A, DCS will provide an estimated timeline and resource requirements to incorporate OAO requirements into the project.</p>
Timeline:	<ul style="list-style-type: none"> <li>• 11/2015 - Received component concurrence on the OAO iAppeals minimal BPD and to combine the P&amp;A effort with non-dib</li> <li>• 01/2016 - Began P&amp;A meetings</li> <li>• TBD: Complete P&amp;A</li> <li>• TBD: Receive estimate on resource impact and timeline for OAO iAppeals</li> </ul>

## ODAR CARES PLAN INITIATIVES

Pilot Logistics:	Allowing claimants and representative to file AC level appeals online is consistent with the Critical 8 element of Enhancing Online Customer Service. The workload will be more manageable and will allow OAO to better serve the public.
------------------	---

## ODAR CARES PLAN INITIATIVES

TITLE:	ERE Uploads without Barcodes (Allow users with access to eFolder to upload documents without a barcode)
LEAD(s):	(b) (6) POC: Magan Mohrmann
Pilot/Permanent?	Permanent
UNION(s):	AFGE, NTEU, IFPTE
Issue:	<p>Currently, we send appointed representatives a barcode to fax or upload documents to the electronic folder.</p> <ul style="list-style-type: none"> <li>• The barcode links the document to the correct case; but it contains a “generic” document type (representative supplied evidence) with the representative’s name as the source of the document.</li> <li>• When the representative uploads the document, they key the 16 digit “document id” from the barcode. This is extremely error prone. If the representative miskeys the number, HO staff must manually locate the document in an “orphan” queue and associate it with the correct case.</li> <li>• When HO staff pulls the case, they re-index the documents with the correct document type and the actual source of the evidence.</li> </ul> <p>The current process is labor intensive and error prone.</p> <p>When appointed representatives, or experts, access an electronic case, SSA knows which case they opened. It should be possible to automate the process of associating the document with the correct case, without requiring the issuance or keying numbers in barcodes. We could ask the representative to select the appropriate document type and key the appropriate source name.</p> <p>Because of the importance of the CARES initiatives to reduce the number of people waiting for a hearing, the Office of Systems agreed to work with ODAR to modify ERE and ARS in the 12/16 release to allow registered eFolder users to upload documents into the eFolder without using a barcode/request id.</p>
Plan:	Work with the Office of Systems to automate the process.
Timeline:	<p>02/17/2016 - Negotiated with systems to implement the functionality</p> <p>04/22/2016 - Completed planning and analysis</p> <p>12/2016 - Implement the software for ARS</p> <p>TBD - Implement the software for ME/VE access</p>
Outcomes:	Save ODAR approximately 11 WYs/year.

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Information Technology Innovation
TITLE:	Expanding Video Hearings
LEAD(s):	Lisa Seefeldt and Wendi Gibson
Pilot/Permanent?	Permanent
Stakeholders:	IFPTE, NTEU, AFGE, Appointed Representatives, Claimants
Issue:	<p>Video hearings play a critical role in SSA's disability adjudication process, and require strong and sustained investment beyond equipment replacement. Video is a key component of ODAR's ability to manage the disability hearings workload and enable us to hold hearings when participants are in various locations. Since 2004, ODAR has held over 1.25 million hearings via video. Today, more than one out of every four hearings is by video.</p> <p>Video provides claimants the option of participating in a hearing more conveniently located to where they live. Additionally, it allows us to move work from overloaded offices to those with hearings capacity and broadens the pool of experts available for expert testimony. We hold video hearings in hearing offices (HO), permanent remote sites (PRS), claimant only video sites (COV), and National Hearing Centers (NHC). Claimants may also attend a hearing via a certified Representative Video Project (RVP) site.*</p> <p>*Note: in addition to these agency sites, claimants also attend video hearings at jails/prisons, State video networks, and Alaska Owl sites.</p>
Plan:	<p>We plan to work in conjunction with OSOHE and OBFS to refresh aging equipment and increase availability of Judge only Video (JOV). In addition to this, OESSI is working with the Office of Systems to accelerate a bandwidth analysis and possible bandwidth upgrades.</p> <p>We will also continue to work with OSOHE to establish connections to jails/prisons.</p> <p>The Agency Video Service Delivery Workgroups Project Scope Management Agreement (PSMA) is now completed. It consists of 5 distinct efforts that will make video usage much easier and more readily available.</p> <ul style="list-style-type: none"> <li>• Enterprise Bandwidth Demand Analysis: assess and confirm bandwidth requirements in order to document required network upgrades.</li> <li>• Improve Video Usability / Architecture Enhancements: improve usability of VTC resources while implementing architecture enhancements including making significant changes to the existing video architecture while also incorporating new processes and tools for improved usability.</li> <li>• Improve Availability &amp; Accuracy of VTC Inventory/Asset Management Capabilities: improve business processes and technical capabilities for improved accuracy and completeness of agency video inventory data.</li> <li>• Improve Availability &amp; Accuracy of VTC Reporting Capabilities: improve</li> </ul>

## ODAR CARES PLAN INITIATIVES

	<p>business processes and technical capabilities for improved availability and accuracy of agency video reporting data.</p> <ul style="list-style-type: none"><li>• Explore Enterprise Scheduling Options: reserve/schedule cross-component video resources including shared services rooms</li></ul>
Timeline:	<ul style="list-style-type: none"><li>• OSOHE plans to refresh existing video equipment on a 5-year schedule. The oldest generation was replaced in 2016.</li><li>• Refreshment of 394 HDX 9001/9002 video units began January 4, 2016 with 393 completed to date. This refreshment was completed by the end of FY 2016.</li><li>• In FY 2017, OSOHE plans to refresh 218 HDX 9006 video units.</li></ul>
Outcomes:	Increase video availability and stay up-to-date with video equipment.

## ODAR CARES PLAN INITIATIVES

Category:	Staffing and Facilities
TITLE:	Adjudication Augmentation Strategy
LEAD(s):	Pat Jonas/Gerald Ray/Kelly Salzmann
Stakeholders:	AFGE and IFPTE
Pilot/Permanent?	We consider this a temporary strategy to address the backlog of hearings pending rather than a pilot.
Issue:	We are facing an unprecedented service crisis with over one million people waiting for an answer on their claims that are pending at the hearing level of our administrative review process. We attribute much of the growing wait times and number of pending hearings to a combination of inadequate funding and a lack of qualified ALJ candidates on the Office of Personnel Management register.
Plan:	<p>In an effort to address this crisis, we have decided to utilize some of the flexibilities offered by the Appeals Council (AC) to assist with the requests for hearing currently pending as well as to limit the number of cases remanded back to the hearing level allowing for focused processing on initial requests for hearing. We are able to hire AC Administrative Appeals Judges (AAJ) directly without OPM involvement. With the temporary assistance of AAJs, we would be able to divert resources to the AC and more quickly hire AAJs and the necessary support staff .</p> <p>This Adjudication Augmentation Strategy will utilize existing regulatory authority for the AC's AAJs to hold hearings in subsets of cases that would otherwise require a hearing before an Administrative Law Judge (ALJ). In an effort to ensure the success of this initiative, we will begin with a measured approach to a specific category of cases.</p> <p>The first group of cases where we will use the AC to hold hearings would be non-disability cases with a pending hearing request. As of the end of the first quarter of FY 2016, the hearing level had just over 10,000 non-disability cases pending a hearing decision. Using the authority in 20 CFR 404.956 and 416.1456, the AC would remove the request for hearing in these cases, hold the hearing, and issue the decision. While all ALJs share the responsibility for handling non-disability cases, the AC has AAJs who only handle non-disability appeals. Because ALJs do not commonly adjudicate these types of cases, the AC has historically had a higher rate of granting review– between 35 and 38% in FYs 2013 - 2015.</p> <p>The second group of cases where the AC will assist the hearings-level consists of two categories of cases: 1)those cases in which the Appeals Council intends to remand the case back to an ALJ; and, 2) cases remanded by a United States District Court. We expect these workloads to result in about 30,000 cases a year. Using the authority to obtain additional evidence and issue a decision under 20 CFR <a href="#">404.976(b)</a>, <a href="#">416.1476(b)</a>, <a href="#">404.979</a> and <a href="#">416.1479</a>, instead of remanding the case to an ALJ for a supplemental hearing, the Appeals Council would hold the supplemental hearing, obtain necessary evidence, including medical and vocational expert evidence, and issue a final decision on behalf of the Commissioner. If the AC handles this set of cases instead of remanding them back to an ALJ, it will provide faster decisions to claimants who have waited the longest for a final decision from the agency, and it will keep these cases from adding to the number of</p>

## ODAR CARES PLAN INITIATIVES

	<p>pending hearings.</p> <p>The AC may not be able to hold supplemental hearings in all types of cases. Examples of types of cases that would be excluded are remands for lost folders and hearing recordings and where a United States District Court expressly orders that the case be remanded to an ALJ.</p>
Timeline:	<p>Original Timeline:</p> <p>Q3 FY 2016: Begin holding non-disability hearings</p> <p>Q3 FY 2017: Begin holding supplemental hearings as the result of AC and court remands</p> <p>02/2016: Posted AAJ and support staff positions to USA Jobs</p> <p>05/2016: Hearing on use of AAJs for hearings with Committee on Homeland Security and Government Affairs (Regulatory and Federal Management Subcommittee)</p> <p>08/2016 update: Due to recent budget constraints, ODAR does not have the resources to implement the AAS as originally envisioned.</p>
Outcomes:	<p>Depending on the numbers of supplemental hearings held by the AC, the potential impact is to prevent 30,000 cases from being remanded to the hearing level and to relieve the hearing level from having to process 10,000 non-dib cases.</p>

# ODAR CARES PLAN INITIATIVES

CATEGORY:	Staffing and Facilities
TITLE:	Collaboration Plan for Office of Quality Review (OQR) and ODAR
LEAD(s):	Sherianne Laba and LaShonn Alexander
Pilot/Permanent?	Pilot
Stakeholders:	AFGE/NTEU/ IFPTE
Issue:	In an effort to assist ODAR with reducing pending cases, OQR will share resources on initiatives that will utilize personnel most effectively in addressing the growing number of hearings pending. OQR will remission staff for ODAR activities for this collaborative effort.
Plan:	<p>The workloads and initiatives for which OQR will provide resources include:</p> <ol style="list-style-type: none"> <li>1. Enhanced Dismissal Writing Unit— OQR reviewers will prepare notices of dismissals for Administrative Law Judges (ALJs) based on instructions provided by ALJs.</li> <li>2. Non-Disability (Non-DIB) Analytical Unit—OQR reviewers will assist ALJs by preparing an analytical case summary for the file after work-up and adding additional documents necessary for the ALJ's decision.</li> <li>3. Disability (DIB) Aged Case Analytical Unit---OQR reviewers will assist the ALJ by preparing a case summary for the file after work-up and adding additional documentation.</li> <li>4. Electronic Folder Transaction/"TO DO" Unit---OQR administrative and clerical personnel will assist SCTs and CTs with To-Do items which will allow ODAR staff to spend time on case development and pulling.</li> <li>5. Unrepresented Claimant Case Preparation and Analysis Unit—Identify cases early in the process where the claimant cannot be located. Take necessary action to dismiss and/or further develop the case.</li> <li>6. Smartmands Project—Conduct second-level quality review of 400 informal remands not allowed by OCO.</li> </ol>
Timeline:	<ul style="list-style-type: none"> <li>• 12/15/15 through 12/21/15 - AFGE Discussions</li> <li>• 01/07/16 - OQR Solicitations for Details released by open until 1/15/16</li> <li>• 1/25/16 - OQR Selections made the week of;</li> <li>• 2/1/16- ODAR/OQR deliver training during the week;</li> <li>• 2/8/16 - Targeting to be fully operational.</li> <li>• 2/2016 Training completed for Aged Case Analysis, Dismissal and unrepresented claimant training complete</li> <li>• 3/2016 OQR staff will begin dismissal writing</li> <li>• 3/2016 solicitations for GS 7 temp promotion (3/14 open for 2 weeks)</li> <li>• 4/2016 – Selections for GS7/8 promotional opportunity have been made.</li> <li>• 11/2016- There will be a short term collaboration for FY 17 that involves four offices (2 in region 2 and 2 in region 3). They will analyze aged cases and provide that analysis to the ALJs in those cases. The project began October 31 and will run through January 31.</li> </ul>

## ODAR CARES PLAN INITIATIVES

Pilot Logistics:	N/A – the EFT/To do assist will continue for a minimum of 120 days. The length will be based on the number of volunteers who express and interest. The remainder of the projects will continue through the end of FY 2016

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Staffing and Facilities																														
TITLE:	ALJ Hiring																														
LEAD(s):	Barbette Smith																														
Stakeholders:	IFPTE																														
Permanent/Pilot?	Permanent																														
Issue:	<p>ODAR needs additional ALJs to address ODAR's expanding workload and hearings backlog. The ALJ hiring process is complex and requires a great deal of staff time to efficiently process ALJ applications. The hiring process often requires input from the Chief ALJ, the Deputy Chief ALJ, an Associate Chief ALJ, one Branch Chief, one Special Projects Officer, one Management Analyst, and one Management Support Specialist. Depending upon the number of new ALJ candidates, for each round of hiring, we may use up to 15 HOCALJs for interviews, four HOCALJs for folder review, and one Associate Chief ALJ for selections. We selected a Special Projects Officer (SPO) specifically to coordinate the ALJ hiring activities. The new SPO reported on October 5, 2015.</p> <p>ODAR judges participated as OPM Administrative Law Judge (ALJ) Structured Interview (SI) Panel members for the FY 2015 Proctored Component of the ALJ examination in August and September 2015. In FY 15, we hired 202 new ALJs who have reported for duty as shown below.</p> <table border="1"> <thead> <tr> <th>Enter on Duty Date</th><th>Number of ALJ Hires</th></tr> </thead> <tbody> <tr><td>January 25, 2015</td><td>46</td></tr> <tr><td>March 22, 2015</td><td>39</td></tr> <tr><td>May 17, 2015</td><td>20</td></tr> <tr><td>June 28, 2015</td><td>45</td></tr> <tr><td>August 9, 2015</td><td>6</td></tr> <tr><td>August 17, 2015</td><td>4</td></tr> <tr><td>August 23, 2015</td><td>2</td></tr> <tr><td>September 20, 2015</td><td>29*</td></tr> <tr><td>September 27, 2015</td><td>3*</td></tr> <tr><td>October 4, 2015</td><td>2*</td></tr> <tr><td>January 24, 2016</td><td>5**</td></tr> <tr><td>February 7, 2016</td><td>1**</td></tr> <tr> <td>*updated due to changes in reporting dates **One of the six will EOD February 7, 2016.</td><td></td></tr> <tr> <td>TOTAL</td><td>202</td></tr> </tbody> </table> <p>In FY15, 110 ALJs left the agency through attrition. With departures and new appointments, we have, 1,499 ALJs on duty as of September 30, 2015.</p>	Enter on Duty Date	Number of ALJ Hires	January 25, 2015	46	March 22, 2015	39	May 17, 2015	20	June 28, 2015	45	August 9, 2015	6	August 17, 2015	4	August 23, 2015	2	September 20, 2015	29*	September 27, 2015	3*	October 4, 2015	2*	January 24, 2016	5**	February 7, 2016	1**	*updated due to changes in reporting dates **One of the six will EOD February 7, 2016. TOTAL	202																														
Plan:	<p>ODAR has been actively hiring ALJs. In FY 15, we have hired 202 new ALJs and are continuing the hiring process. In support of the CARES plan, we projected needing to hire 250 ALJs a year in FY 2016, FY 2017 and FY 2018.</p> <p>Due to budget cuts and an insufficient number of acceptable candidates, ODAR reduced</p>																														

## ODAR CARES PLAN INITIATIVES

	the hiring target for FY 2016 from 250 to 225.
Timeline:	<p>Enter on duty (EOD) updates:</p> <p>6/13/16 – 1 ALJ transfer</p> <p>6/27/16 – 40 new ALJs (included 3 new ALJs from the prior round) and 2 ALJ transfers</p> <p>7/11/16 – 8 new ALJs</p> <p>7/25/16 – 47 new ALJs</p> <p>8/4/16 – 1 new ALJ</p> <p>8/8/16 – 4 new ALJs</p> <p>Other updates:</p> <p>7/1/16 – Request sent to OPE for 79 certificates.</p> <p>07/31/2016 - 151 ALJs were hired.</p> <p>08/2016 – Began third round of interviews</p>
Outcomes:	ALJ hiring has a direct impact on the time claimants wait for a hearing decision. Sustained funding and the ability to hire at least 250 ALJs in FY 2016, at least 250 ALJs in FY 2017, and at least 250 ALJs in FY 2018 will allow us to achieve an average wait time of 270 days by the end of FY 2020.

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Employee Engagement Activities
TITLE:	Compass Program – Discovery Path
LEAD(s):	Tammy Farmer
Pilot/Permanent?	Permanent (but will be rotating development program)
Stakeholders	NTEU, AFGE, IFPTE
Issue:	The objective of this initiative is to provide ODAR employees, separate from any formal development program, continual access to career building informational and educational programs that will enhance their skills sets and ability to compete for future promotions.
Plan:	Will provide a web-access portal for ODAR employees to use, with new programs being added on an ongoing basis.
Timeline:	<ul style="list-style-type: none"><li>• March 31, 2016 - Discovery website launched</li></ul>
Outcomes:	Expected improvements in FEVS scores related to Employee Engagement and career education.

# ODAR CARES PLAN INITIATIVES

CATEGORY:	Staffing and Facilities
TITLE	Capacity and Co-Location Plan
LEAD(s):	Reggie Jackson/Joe Lytle/(b) (6)
Pilot/Permanent?	Permanent
Stakeholders:	Public/Community at Large, Congress, DCBFQM, DCO, Unions
Issue:	<p>ODAR must align our space with future staffing needs to support multiple service channels, telework, co-location and additional space needs. The CARES Plan is based the President's budget, and includes growing the ALJ corps to over 1,900 judges, a net increase of 375 judges by FY 2020. Additionally, support staff will increase by a net 1,700 employees. However, this is dependent upon sustained and adequate funding through FY 2020. ODAR (and SSA at large) must also re-evaluate the real estate footprint of our offices in accordance with OMB requirements. As our staff grows, we will continuously assess our footprint in order to optimize space to meet the OMB requirements.</p>
Plan:	<p>OBFS receives requests from Regional Offices (RO) about space needs, office improvements, and office structure changes. OBFS will require that an RO supports each request with data showing a direct service need.</p> <p>Factors of analysis for service delivery:</p> <ul style="list-style-type: none"> <li>• Service need</li> <li>• Impact on agency footprint</li> <li>• Budget</li> <li>• Impact to the public</li> </ul> <p>OBFS will then evaluate the space requests using the following phases:</p> <ul style="list-style-type: none"> <li>• Phase I – Service need within the existing foot of ODAR;</li> <li>• Phase II – Footprint expansion of ODAR within but no Agency footprint expansion; and</li> <li>• Phase III – Footprint expansion of the Agency needed due to dire service needs.</li> </ul>
Timeline:	<ul style="list-style-type: none"> <li>• July 2016 – Obtained approval from Acting Commissioner Colvin to establish 6 new offices utilizing existing agency space and convert 2 site types (e.g. changing a video hearing center to a satellite office) within their current space. <ul style="list-style-type: none"> <li>○ Working with regions on 8 space actions were approved to move forward</li> </ul> </li> <li>• September 2016 - Ongoing analysis of service delivery including budget, staffing, and space; <ul style="list-style-type: none"> <li>○ Assessment in progress on FY 2017 and FY 2018 co-located/blended sites</li> <li>○ Continued progress contingent upon sustained and adequate funding</li> </ul> </li> <li>• TBD FY 2017 – Approval of 5 proposed co-located/blended sites to be completed</li> <li>• TBD FY 2018 – Approval of 5 proposed co-located/blended sites to be completed</li> </ul>
Outcomes:	<ul style="list-style-type: none"> <li>• FY 2016 – 8 proposed co-located/blended sites to be completed (locations will be</li> </ul>

Transition Team Member Document – Non-Public Information This document may only be disclosed to authorized Transition Team members

## ODAR CARES PLAN INITIATIVES

	<p>reported to CARES team when plan in place for each site)</p> <ul style="list-style-type: none"><li>• FY 2017 – 5 proposed co-located/blended sites to be completed (locations pending analysis and final budget)</li><li>• FY 2018 – 5 proposed co-located/blended sites to be completed (locations pending analysis and final budget)</li><li>• As of November 2016 – 26 new SSR sites established since November 2015, with a total now at 157 SSR sites.</li></ul>

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Employee Engagement Activities
TITLE:	Employee Engagement Initiatives—Compass – Voyage
LEAD(s):	Tammy Farmer
Pilot/Permanent?	Permanent (as part of rotating ODAR development program)
Stakeholders	NTEU, AFGE, IFPTE
Issue:	The Voyage Program will provide eligible full-time and part-time ODAR employees at the GS-4 through GS-11 grade level a combination of details and mentoring outside their current positions. The goal is to improve their ability to compete for higher graded vacancies.
Plan:	<p>Offer a variety of developmental assignments, virtual training, and self-instructional training, including:</p> <ul style="list-style-type: none"> <li>• Two six-month detail assignments</li> <li>• Designated mentors</li> <li>• Individual Development Plans</li> <li>• Virtual training courses and workshops</li> <li>• Temporary promotions and opportunities to perform work at higher grade levels</li> </ul>
Timeline:	<ul style="list-style-type: none"> <li>• 07/18/2016: Voyage Program GS-5 through GS-8 vacancies announced (for GS-4 through GS-7 employees).</li> <li>• 08/01/2016: Voyage Program GS-9 through 12 vacancies announced (for GS-8 through GS-11 employees).</li> <li>• 10/24/2016: Applications still in process, with BQ lists received. Structured interviews pending managerial availability.</li> <li>• Week of 11/28/2016 – final selections expected to be made.</li> <li>• Week of 12/4/2016 – selectees notified.</li> <li>• Week of 12/11/2016 – ODAR wide notice provided of selections.</li> <li>• Week of 1/23/2017 – Start of 1-year program.</li> </ul>
Outcomes:	Expected increase in FEVS scores and overall employee job satisfaction based on new opportunities provided.

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Employee Engagement Activities
TITLE:	Compass – Summit Path
LEAD(s):	Tammy Farmer
Pilot/Permanent?	Permanent (as part of rotating ODAR development program)
Stakeholders	NTEU, AFGE, IFPTE
Issue:	The objective of this initiative is to provide competitive, structured 12-month development opportunities for ODAR employees at the GS-14 and GS-15 levels, as well as ODAR ALJs and AAJs, to make them more competitive for future regional and national leadership positions.
Plan:	Will include temporary rotational assignments, either temporary promotions or reassignments, structured mentoring, and opportunities to perform leadership responsibilities.
Timeline:	<ul style="list-style-type: none"><li>• TBD: Launch of Summit (for GS-14 through GS-15 employees) (budget delays)</li></ul>
Outcomes:	Expected increase in FEVS scores and overall employee job satisfaction based on new opportunities provided.

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Employee Engagement Activities
TITLE:	Employee Engagement Initiatives—Compass--Expedition
LEAD(s):	Tammy Farmer
Pilot/Permanent?	Permanent (as part of rotating ODAR development program)
Stakeholders	NTEU, AFGE, IFPTE
Issue:	The objective of this initiative is to provide competitive, structured 12-month development opportunities for ODAR employees at the GS-12 through GS-14 levels to make them more competitive for future local and regional management positions.
Plan:	Will include a series of details and assignments, structured mentoring, personally designed Individual Development Plans (IDPs), temporary promotion opportunities and performance of work responsibilities at higher graded levels.
Timeline:	<ul style="list-style-type: none"><li>TBD: Launch of Expedition (for GS-12 through GS-14 employees) (budget delays)</li></ul>
Outcomes:	Expected increase in FEVS scores and overall employee job satisfaction based on new opportunities provided.

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Employee Engagement
TITLE:	Hearing Office Case Analyst Pilot (HOCA)
LEAD(s):	Tammy Farmer/Patrick DeFalco
Stakeholders	ODARMA, AFGE, NTEU
Pilot/Permanent?	Pilot
Issue:	<p>With over a million cases pending, ODAR, as well as its counterparts throughout SSA, is focusing on the urgency of the situation – the precision in our hearings operation to deliver the hearing decisions we need to make – and our accountability to the American people to provide superior customer service. Additionally, GS-8 support staffs are in need of developmental opportunities to "bridge" to positions within ODAR at a higher grade. The GS-9 HOCA will focus on the area of case readiness in our 163 hearing offices nationwide. We need to have cases reviewed for quality and accuracy to examine and analyze the sufficiency of documentation and development in accordance with the regulatory provisions of Titles II, VIII, and XVI of the Social Security Act, as amended, as well as compliance with other standardized business processes. The position will also provide needed case analysis and centralize complex workloads in order to assist ALJs with issuing timely decisions.</p>
Plan:	<p>The Hearing Office Case Analyst Position has been developed to pilot throughout the country for a two-year period. Initially, there will be approximately 163 allocations, which will enable almost every office to have at least one position. OEOHR will work with the SPOs to announce the vacancies. A selection package will be provided and will include assessment criteria, interview questions and supervisor reference checks. Regional Offices will coordinate selections with Hearing Offices.</p>
Timeline:	<ul style="list-style-type: none"> <li>• 04/2016: HOCA Position Description finalized, signed off and provided to OPE</li> <li>• 05/2016: OEOHR provided management assessment criteria, selection criteria and interview process information</li> <li>• 05/2016: HOCA Vacancies announced</li> <li>• 06/2016: HOCA Training Cadre established</li> <li>• 06/2016: HOCA selections made nationwide</li> <li>• 06/2016: All Manager's Call used to address vacancies, selections and training</li> <li>• 07/2016: HOCA Training Pre-Requisites released</li> <li>• 07/2016: HOCA Basic Training Classes held</li> <li>• 08/2016: HOCA Basic Training Classes completed</li> <li>• 08/2016: HOCA Connect SharePoint site under development</li> </ul>

## ODAR CARES PLAN INITIATIVES

	<ul style="list-style-type: none"><li>• 09/2016: HOCA Mentoring Plan to be completed</li><li>• 09/2016: HOCA Pilot Evaluation Plan under development</li><li>• 10/2016: HOCA Connect launched 10/13; HOCA PACS materials released on 10/17; OESSI working on management reports to track workloads; and supplemental training under development.</li></ul>
Pilot Locations:	Hearing Offices nationwide
Outcomes:	<ul style="list-style-type: none"><li>• Provide needed support to ALJs in the area of case readiness to help reduce pending hearings and increase efficiency in hearings held and decisions issued.</li><li>• Establish additional career opportunities in the form of a bridge position for future advancement of support staff.</li><li>• Allow for further training and enhanced employee knowledge.</li><li>• 2 Year Pilot will be evaluated at quarterly intervals through numerical measurements and management survey data.</li></ul>

# ODAR CARES PLAN INITIATIVES

CATEGORY:	Employee Engagement Activities
TITLE:	Employee Engagement Initiatives--Communication
LEAD(s):	Tammy Farmer/Patrick DeFalco
Pilot/Permanent?	Permanent ongoing initiative
Stakeholders	NTEU, AFGE, IFPTE, ODARMA, HOCALJ Association
Issue:	The objective of this strategy is to develop ongoing methods of communicating with employees to engage them in the mission of the agency. The Social Security Administration's story is a powerful one that we want to leverage to inspire and engage all employees.
Plan:	<p>Communication is key to employees feeling engaged and involved in the organization and its goals. Employees want to be informed and play an active part in ODAR's mission to work through the backlog and address our expanding workloads.</p> <p>Enhancing communication will help build a shared set of goals across ODAR. The key deliverables under this strategy include:</p> <ul style="list-style-type: none"> <li>• National and Regional Town Hall Meetings- share mission and communicate initiatives/changes</li> <li>• Providing employee personal development resources</li> <li>• Communicating engagement initiatives</li> <li>• Providing managers with necessary resources to effectively lead</li> <li>• New Hire Orientation- inspire commitment to mission/invest in employees</li> </ul>
Timeline:	<ul style="list-style-type: none"> <li>• 05/2016: Completed Health/Wellness Employee Message</li> <li>• 05/2016: Released Smart Hiring Guidance</li> <li>• 06/2016: FEVS Marketing Plan completed</li> <li>• 07/2016: New Hire Orientation video script for DC and ADC developed</li> <li>• 08/2016: Wellness website development begun</li> <li>• 08/2016: New Hire video from DC and ADC recorded</li> <li>• 08/2016: Training needs survey with OQI developed and released</li> <li>• 08/2016: Initiated Work/Life Balancing Message</li> <li>• 11/2016: FEVS Scores Messages</li> </ul>
Outcomes:	<ul style="list-style-type: none"> <li>• FEVS scores for diversity, inclusion and engagement for 2016 to be compared to 2015 to monitor improvement</li> <li>• Results of Training Needs Survey to be analyzed for needed improvements or adjustments</li> <li>• Employee Engagement Taskforce to transition into advisory role</li> </ul>

# ODAR CARES PLAN INITIATIVES

The top of the page features a decorative header with the text "ODAR CARES PLAN INITIATIVES" in a dark blue, serif font. Below the text, there are three thick, wavy blue lines that sweep across the top of the page, creating a dynamic, flowing effect.

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Employee Engagement Activities
TITLE:	Leadership Training
LEAD(s):	Tammy Farmer/Patrick DeFalco
Pilot/Permanent?	Permanent
Stakeholders	ODARMA, HOCALJ Association
Issue:	We plan to invest in our management team so they will have the tools necessary to develop and support our most valuable resource--engaged, productive employees. Our leadership initiatives will encourage leading with integrity, with a focus on "service over self."
Plan:	<p>ODAR created an Employee Engagement Task Force to address this issue develop appropriate training. The key deliverables under this strategy include:</p> <ul style="list-style-type: none"> <li>• Providing comprehensive leadership training entitled "Better Together" for all ODAR managers that focuses on diversity, inclusion and the "New IQ." Approximately 1,000 managers will be trained on topics including analyzing the value of FEVS, building inclusive teams to build a more effective and productive office.</li> <li>• We will supplement this year's training with resources and additional training in future fiscal years, as resources allow.</li> </ul>
Timeline:	<ul style="list-style-type: none"> <li>• 03/2016: "Better Together" Leadership Curriculum developed by Employee Engagement Taskforce</li> <li>• 05/2016: Innovative delivery method developed utilizing "grouping" of office management teams either in person (when in close proximity) or via VTC to save travel money while maintaining interactive nature of training</li> <li>• 06/2016: Total of 58 training sessions in all 10 regions, the NHCs, the NCACs, the ROs and HQ scheduled</li> <li>• 06/2016: Held Train the Trainer in Falls Church for all 11 instructors with 4 HQ sessions for 125 managers</li> <li>• 07/2016 - 09/2016: In-Person and Video Sessions held nationwide for all ODAR managers</li> <li>• 11/2016: Employee Engagement Task Force After Action report presented to DC Gruber and ADC Calvert.</li> <li>• 12/2016: Employee Engagement Task Force After Action report presented to RCALJ/RMO.</li> </ul>
Outcomes:	Comprehensive evaluation forms completed by all leadership training participants. Data tracked using "Survey Monkey" and analyzed. Results are overwhelmingly positive, with average scores greater than 4 on a 5 point scale for both content and instructors.

## ODAR CARES PLAN INITIATIVES

CATEGORY:	Employee Engagement Activities
TITLE:	Expand Telework
LEAD(s):	Robert Jandrich/Tom Nanni
Pilot/Permanent?	Permanent
Stakeholders	NTEU, AFGE, IFPTE
Issue:	The objective of this strategy is to increase availability for telework under current collective bargaining agreements.
Plan:	Engage with IFPTE, NTEU, and AFGE to increase availability for telework under current collective bargaining agreements.
Timeline:	<ul style="list-style-type: none"><li>• June 4, 2015 - Initial AFGE-ODAR Telework MOU</li><li>• October 13, 2015 - AFGE-ODAR Telework Settlement Agreement</li><li>• October 16, 2015 - ODAR/OEOHR Memo Expanding Telework for NTEU Legal Assistant Positions</li><li>• March 31, 2016 - AFGE-ODAR Telework Clarification Agreement</li><li>• September 14, 2016 - NTEU-ODAR Article 17 (Telework) bargaining – FSIP Decision regarding 4<sup>th</sup> day of telework issued. Finalization of new Article language pending.</li></ul>
Outcomes:	ODAR completed the initiative related to expanding telework since the release of the CARES plan in January. ODAR met all of the telework bargaining agreements with relation to the government-wide mandate on telework.

Office of Facilities and Logistics Management (OFLM)

We are the agency's liaison with the General Services Administration (GSA), Public Buildings Service (PBS) for budgetary obligations, master housing, and leasing for all GSA owned, delegated, and leased properties nationwide. We directly manage our headquarters space and provide guidance to our regional offices regarding space planning, layout, utilization, and occupancy to ensure compliance with agency Space Allocation Standards (SAS) and Office of Management and Budget (OMB) Memorandum M-12-12 Section 3: Freeze the Footprint and Reduce the Footprint (RTF).

We continually seek opportunities to reduce our agency's real estate footprint, typically when leases expire, by right-sizing new lease requirements to meet our SAS. Additionally, we are working with GSA to improve space utilization in our large delegated facilities, as GSA is hoping to provide additional space within these facilities for other Federal tenants to help these agencies achieve their RTF goals.

Despite an increasing need for our services, we made great strides to do more with less space—our footprint is shrinking. We successfully met the mandates of the Freeze the Footprint (FTF) initiative. At the end of fiscal year (FY) 2015, we reduced 1.41 million usable square footage (USF), or 5.3 percent, compared to our FY 2012 baseline.

By the end of FY 2016, preliminary assessments indicate we reduced our portfolio by approximately 94,000 USF. Additionally, our RTF Plan calls for an additional 450,000 USF reduction in office space from FY 2017 through FY 2021. Reductions from our large sites will be a key component in achieving these reductions, dependent on budget approval for those projects. Moreover, while we have been shrinking our real property footprint for several years, in FY 2016, our overall year-over-year rent went down for the first time. This is a particular accomplishment given that rent escalates year-over-year due to market conditions and inflation.

We are pursuing several large expiring-lease replacement actions, including the Security West building in Woodlawn, MD; the International Trade Commission (ITC) building in Washington, DC (which includes an office for the Commissioner); and the Dallas Regional Office in Dallas, TX. Collectively, these lease-replacements will reduce our real estate footprint by over 360,000 USF.

We are also working with GSA on improving our space utilization in Federally-owned, delegated buildings, including the Frank Hagel Federal Building, in Richmond, CA; the Addabbo Federal Building in Jamaica, NY; the Mid Atlantic Social Security Center in Philadelphia, PA; and the Harold Washington Social Security Center in Chicago, IL.

## **NAPA Report & Vision 2025 Crosswalk**

### **Superior Customer Experience**

NAPA	First, SSA must improve its operational efficiency while continuing to provide access to quality service for all of its customers. The Panel believes that SSA should employ virtual channels (e.g., online, phone, videoconference) as the primary means of service delivery in the future while remaining committed to providing personal service delivery options as necessary and appropriate, including traditional in-person service delivery in the field as well as virtual options for providing direct assistance and face-to-face interaction. (Page 7)
Vision 2025	In 2025, we provide highly-personalized interactions and tailored services to our customers at their point of need and in real-time. Our customers have choices in terms of when, where, and how they receive services. We satisfy an inter-generational customer base with a range of preferences in technology and interactions, by offering a variety of service delivery methods, such as in-person at our field and hearing offices, on the phone, over real-time video or chat, or by self-service. We interact responsively with our customers face-to-face, in written communications, and through digital alternatives for connecting customers to our employees for assistance. (Page 13)
NAPA	Second, aggressive adoption of technology solutions should create opportunities both to improve customer service and to free up resources for face-to-face interaction and direct assistance where needed. Technology solutions should be well designed and so user-friendly that they become customers' choice for conducting most transactions. (Page 7)

## **NAPA Report & Vision 2025 Crosswalk**

Vision 2025	For those customers who choose self-service options, we design our technology to support the ultimate goal of providing a seamless, superior customer experience across all methods of contact. From better computer-telephone integration to systems designed around our customers as individuals – not as cases or claims – we invest in the right technology to better understand our customer’s life journey and create the personalized, relevant and efficient experience customers need. We prioritize our technology investments based on customer needs, ease of use, and improving access to our services, and work to eliminate antiquated systems. (Page 14)
NAPA	We employ a robust regime for providing information security and protecting customers’ personal information over the entire data life cycle. (Page 42)
Vision 2025	Our customers are confident their personal information is protected, no matter which method of service they select. We incorporate leading cybersecurity practices and real time identity verification into all technology and systems. (Page 14)
NAPA	Our integrated and diverse service delivery workforce is able to identify customer needs and manage transactions to completion efficiently and effectively. (Page 43)
Vision 2025	We actively listen to all of our customers, and we rely on secure, accurate, real-time information and analytics to better understand our customers’ preferences. Through this understanding, we respond to and anticipate our customers’ needs, and thoughtfully craft appropriate service options. (Page 10)

## **NAPA Report & Vision 2025 Crosswalk**

### **Exceptional Employees**

NAPA	Our labor-management relations have a strategic focus on improving agency performance. (Page 43)
Vision 2025	As an employer of choice, we implement human resource management best practices and work with our labor unions to develop an effective talent management and rewards strategy. (Page 22)
NAPA	We employ a flexible grade and compensation structure to facilitate career paths that encourage employee retention by providing employee development opportunities across the organization or with partner organizations. (Page 43)
Vision 2025	In 2025, we attract top talent and support our employees through active and continuous engagement, empowerment to make decisions that best serve our customers, and developmental opportunities that span the government. We also offer dynamic career paths and multiple opportunities for professional growth. (Page 10)

### **Innovative Organization**

NAPA	We simplify programmatic, administrative, and operational policies in order to facilitate customers' applications for benefits and our processing of them. (Page 40)
Vision 2025	Our program rules are simplified to provide clear meaning for both customers and employees, thus enabling efficient processing of benefits. (Page 19)

## **NAPA Report & Vision 2025 Crosswalk**

NAPA	Our employees access integrated customer data, enabling efficient delivery of services across our programs and with other related government programs. (Page 41)
Vision 2025	Our data-sharing activities supply accurate, relevant and real-time data to prevent improper payment and ensure integrated customer service for social insurance programs and external partners. (Page 20)
NAPA	Our work processes are fully automated, except for those decisions that require some human judgment. We use expert systems to guide employees. (Page 41)
Vision 2025	Our flexible and automated tools are designed to support Social Security programs by integrating policy, process, and data into our systems to support our knowledgeable employees. (Page 16)
NAPA	Our work is “portable” (e.g., electronic case files enable matching workload with available workforce capacity, advancing telework). (Page 41)
Vision 2025	Access to advanced portable technologies provides flexibility to our employees, empowering them to serve Social Security customers from various locations in a way that accommodates their personal lives. (Page 16)
NAPA	We systematically employ data analytics to inform the development of more efficient business processes and ensure program integrity. (Page 41)
Vision 2025	Technology and data analytics give us faster access to more and better data. We have also streamlined our processes and procedures to minimize errors. (Page 20).
NAPA	We maximize data sharing with external partners. (Page 42)

## **NAPA Report & Vision 2025 Crosswalk**

Vision 2025	Our data-sharing activities supply accurate, relevant and real-time data to prevent improper payment and ensure integrated customer service for social insurance programs and external partners. (Page 20)
NAPA	We use a disciplined and responsive management process to enable planning and implementation of new business solutions, utilizing industry best practices to rapidly meet IT and other business requirements. (Page 42)
Vision 2025	Through the creation of a network of integrated internal systems, we will operate as a unified organization, sharing information and using data across service areas and teams. Our IT investment approach will reflect prioritization of our current and emerging business needs. (Page 22)
NAPA	We embrace change and recognize the importance of purposeful risk (e.g., encouraging new development opportunities and potentially high-yield initiatives). (Page 44)
Vision 2025	We will engrain informed risk-taking and continuous improvement in our culture, and welcome both as positive contributions. (Page 22)
NAPA	We institutionalize long-term, strategic thinking throughout the organization (e.g., planning, organizational structure, and business processes). (Page 44)
Vision 2025	We will implement new ways for our leaders to engage in strategic planning to identify solutions, prioritize initiatives, measure the right efforts, and hold ourselves accountable for achieving this vision and related successes. (Page 23)
NAPA	Clear policy direction and automated decision support empower employees and improve efficiency while ensuring quality and program integrity. (Page 44)

## **NAPA Report & Vision 2025 Crosswalk**

Vision 2025	Our program rules are simplified to provide clear meaning for both customers and employees, thus enabling efficient processing of benefits. (Page 19)

## **Estimated Average Ongoing Cost to Operate a Field Office**

- We estimate that the average annual cost to operate a field office is between \$2M and \$2.5M per office.
- This figure includes average costs for rent, guards, utilities not funded by GSA, supplies, maintenance, security, and personnel.
- Individual office costs may vary greatly based on office location and size.
- This figure does not include one-time start-up costs for office infrastructure and IT hardware/software nor does it include non-personnel costs incurred for workload processing.
- The costs for support functions at the regional office and headquarters (including areas of the agency for policy issues, budgetary/financial matters, centralized IT infrastructure support, human resources, etc.) that provide a supporting role to field offices are also excluded.

*Response prepared by Office of Budget, Finance, Quality and Management*

# **Social Security Solvency: Background and Options for the Future**

---

Steve Goss, Chief Actuary

Karen Glenn, Deputy Chief Actuary

December 14, 2016

Transition Team Member Document--Non-Public Information. This document may be disclosed to  
Authorized Transition Team Members only.

# Outline

---

- ◆ The aging issue
- ◆ Implications for solvency and sustainability
  - Annual deficits, reserve depletion
  - Comparison to CBO projections
- ◆ Implications for the federal budget
- ◆ Solutions
  - Adjustments to changing conditions

# Developed nations are “aging”

---

## ◆ “Macro Aging”

Changing age distribution—older

- Mainly from permanent drop in birth rates after 1965

## ◆ “Micro Aging”

People are living longer

- Lower death rates
- Higher life expectancy

# Implications of “macro aging”

*Lower birth rates shift age distribution*

# Implications of “macro aging”

*Aging (change in age distribution) mainly due to drop in birth rates*

# OASDI annual cost as percent of taxable payroll: rises with the aged-dependency ratio

*79% of scheduled benefits still payable at trust fund reserve depletion*

# Recent House Ways and Means Committee Hearing: Comparing Trustees' and CBO Projections of OASDI Actuarial Status

# Trust Fund operations have no effect on total federal debt, and no net effect on publicly-held debt

# So—what if we project federal debt consistent with the law?

# Solutions for the Social Security financial shortfall

---

- ◆ “Macro Aging” changes the age distribution: more beneficiaries per worker
  - This will affect all retirement income
  
- ◆ Social Security has exactly the same challenge
  - The older age distribution requires:
    - Beneficiaries receive 25% less,
    - Workers pay 33% more,
    - Increase “Normal Retirement Age” by 5 years,
    - Or some combination

# Ways to lower Social Security cost

---

## ◆ Lower benefits

- Reduce the factors in the PIA formula (currently 90, 32, 15 percent)
  - » Could exempt disabled workers
- Increase normal retirement age
  - » By a set formula, as was done in the 1983 amendments
  - » Or by indexing to life expectancy – note this solves less than 20% of the long-range shortfall
  - » Proposals that increase the NRA lower OASDI cost, but **increase** DI cost
- Increase the number of years used in calculation (currently 35)
- Could exempt long-career low earners from any of these proposals to lower benefits

# Ways to lower Social Security cost

---

- ◆ Lower benefits mainly for high earners
  - Reduce PIA above some level
  - Often combined with increasing PIA below some level, subject to work year requirements
  - Could also increase taxes on benefits for high earners

# Ways to lower Social Security cost

---

- ◆ Lower benefits mainly for the oldest old
  - Reduce the COLA
    - » Use a chained version of the CPI-W
    - » Would on average reduce the annual COLA by 0.3 percentage point
    - » Eliminates about 21% of the long-range shortfall
  - Note some have suggested **raising** the COLA
    - » Use the CPI-E (based on purchases of consumers over age 62)
    - » Would on average increase the annual COLA by 0.2 percentage point
    - » **Increases** the long-range shortfall by about 14%

# Ways to increase Social Security revenue

---

## ◆ Raise tax rate on all earners

- Increasing rate from current 12.4 percent to 15.3 percent is projected to eliminate the long-range shortfall

## ◆ Raise tax on highest earners only

- Increase taxable maximum amount
  - » Taxable maximum is \$118,500 in 2016; covers about 83 percent of all earnings
  - » In 1983, this ratio was about 90 percent!
  - » Increasing the taxable maximum to cover 90 percent of earnings (about \$275,000 in 2016) would eliminate 30 to 40 percent of the long-range shortfall
- Some tax on all earnings above the maximum
  - » At a lower rate?
- What about benefit credit?

# Ways to increase Social Security revenue

---

- ◆ Tax employer-sponsored group health insurance premiums
  - Affects only middle class if taxable maximum remains where it is
  - Eliminates about 37 percent of the long-range shortfall
- ◆ Cover all newly hired state and local government employees
  - Eliminates about 6 percent of the long-range deficit
- ◆ Tax certain investment income

# Ways to increase Social Security revenue

---

- ◆ Invest a portion of trust fund reserves in marketable securities
  - Currently the law requires investment in “interest-bearing securities backed by the full faith and credit of the United States”
  - Invest 15 percent, 40 percent, more?
  - How would this affect financial markets?
- ◆ Maintain larger trust fund reserves
  - Added interest/yield can lower needed taxes

# Other provisions

---

## ◆ Increase benefits for adequacy or equity

- Increase benefits for those age 85 or older
- Enhance minimum benefits
- Caregiver credits
- Provide surviving spouses 75 percent of the couple's benefits
- These options would all add to the long-range shortfall

## ◆ Personal accounts

- Often require a large transition “investment”
- Ryan approach: option for personal account to partially or completely replace OASI, with some type of guarantee

Go to: [www.ssa.gov/OACT](http://www.ssa.gov/OACT) for more proposed changes

# Many comprehensive proposals scored

*Example 1: Simpson/Bowles Fiscal Commission of 2010*

---

- ◆ Raise Normal Retirement Age
  - “Hardship exemption” for steady low earners
- ◆ Make PIA formula more progressive
- ◆ Raise taxable maximum to cover 90% of earnings
- ◆ Would have produced “*sustainable solvency*”

Go to: [www.ssa.gov/OACT/solvency/FiscalCommission\\_20101201.pdf](http://www.ssa.gov/OACT/solvency/FiscalCommission_20101201.pdf)  
[www.ssa.gov/OACT/solvency/BowlesSimpsonRivlinDomenici\\_20110202.pdf](http://www.ssa.gov/OACT/solvency/BowlesSimpsonRivlinDomenici_20110202.pdf)

# Many comprehensive proposals scored

*Example 2: Sam Johnson, December 2016*

---

- ◆ Make PIA formula more “progressive”
- ◆ Change to mini-PIA approach
- ◆ Raise the Normal Retirement Age
- ◆ Lower the COLA
  - Based on chain-weighted CPI for most beneficiaries
  - No COLA if prior year’s MAGI is above certain thresholds
- ◆ Add a new minimum benefit
- ◆ Eliminate taxation of OASDI benefits in 2054 and later
- ◆ Would produce “*sustainable solvency*”

Go to: [https://www.ssa.gov/OACT/solvency/SJohnson\\_20161208.pdf](https://www.ssa.gov/OACT/solvency/SJohnson_20161208.pdf)

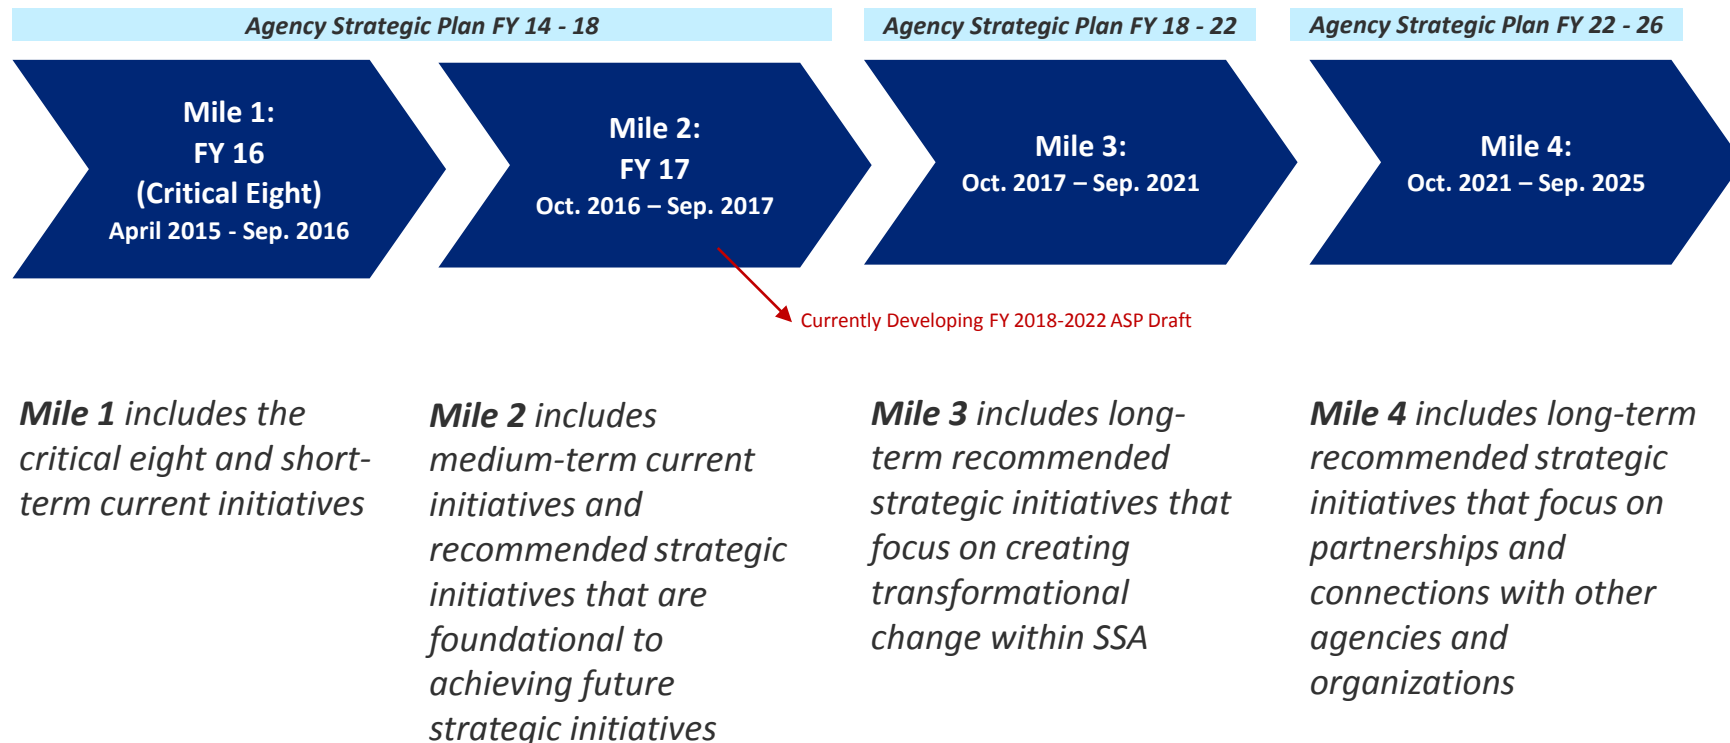

# For more information...

<http://www.ssa.gov/oact/>

---

## Preface

---

This document outlines what initiatives are necessary to realize Vision 2025 and recommends the steps SSA should take to implement these initiatives.

**Section 1: Vision Roadmap** (*what needs to change*)

Describes SSA's desired outcomes of Vision 2025, and provides an overview of current transformational SSA initiatives that will help the agency realize the Vision, as well as recommended transformational initiatives based on gaps in SSA's current initiatives. Together, the current and recommended transformational initiatives provide an updated Vision Roadmap that charts SSA's path over the next 10 years.

**Section 2: Vision Roadmap Execution Strategy** (*how to realize the change*)

Describes key next steps to establish the structure and accountability needed to manage SSA's transformational initiatives.

The contents of this document includes change management principles and tactics, and provides a set of tools and strategies that position SSA to successfully realize Vision 2025.

# SSA must continue to serve its customers throughout their lifetime, when and where they need them\*

1935

The Social Security Program was established through President Roosevelt's signing of the Social Security Act

Social Security's mission was to serve as a social insurance system covering all major personal economic hazards with special emphasis on unemployment and old age insurance

2015

SSA has evolved into an agency that:

Employs **65 thousand people**

Provides **one trillion dollars** in annual benefits and financial protection

Directs benefits to **65 million people**

39 million  
retired workers

4 million  
children

4 million  
survivors

Medicare  
beneficiaries

Over the next 10 years, SSA's beneficiaries are projected to **increase by 32%\*\***, while **one-third\*\*\*** of its workforce is due to retire, leaving a knowledge gap

2025

Vision 2025 is the first step and a call to action to preserve and fulfill the agency's social contract which set its foundation 80 years ago

**Superior  
Customer  
Experience**

**Exceptional  
Employees**

**Innovative  
Organization**

# Section One: Vision Roadmap

---

## Vision Roadmap Overview

---

The **Vision Roadmap** explains how the Social Security Administration (SSA) should pursue and **achieve the aspirations** identified in its Vision 2025 narrative.

Deloitte based **Version One** of the roadmap on detailed **external research**, conversations with Deloitte subject matter experts, an initial analysis of current SSA initiatives, and some **SSA employee and external constituent feedback**. Deloitte then conducted a more **in-depth analysis** of current initiatives and **extensive feedback** from employees across the country to develop **Version Two** of the roadmap.

The level of uncertainty around the **recommended initiatives** increases as ones moves further along the roadmap; therefore, the intent is not to prescribe SSA with all the right answers, but rather to **show SSA how it can transform**. It is important SSA complements this proposed approach by **monitoring changing trends and adapting its strategy** and pace accordingly.

.

# In April 2015, SSA launched a bold 10-year Vision, which includes an ambitious set of priorities to better serve its customers

## Vision 2025 Priorities

### Superior Customer Experience

In 2025, we are focused on understanding the customer's experience over their lifetime. Through this understanding, we respond to and anticipate our customers' needs, and thoughtfully craft appropriate service options.

### Exceptional Employees

In 2025, we attract top talent and support our employees through developmental opportunities, active engagement, and empowerment to make decisions. Our employees reflect the "heart of the agency," providing a high-quality, personalized customer experience through compassion and dedication to our mission.

### Innovative Organization

In 2025, we are recognized by the public and across government for our agility and effectiveness in fulfilling our mission. We meet the changing needs of our customers and keep pace with the transitions they experience in their lives.

# SSA developed goals to realize the Vision's priorities

## Superior Customer Experience

*SSA delivers a customer experience that meets or exceeds service expectations*

## Exceptional Employees

*Every SSA employee operates in a flexible and highly-engaging working environment that supports and develops them in providing quality customer service*

## Innovative Organization

*SSA is an adaptive organization that embraces changes to meet the future needs of its customers and employees*

### **Illustrative measures\* include:**

*Forrester's Customer Experience Index\*\**

*OPM Employee Engagement Index*

*An organizational efficiency index\*\**

### **Achieving these goals means SSA will:**

- Provide **superior customer service to** customers (including individuals, businesses, government agencies, and private corporations)
- Empower its employees with the knowledge and tools to **consistently meet customer expectations** through quality service
- Create an environment where employees are aligned and directly **contribute to SSA's mission**
- Adapt its operating model to **quickly respond** to changing environmental factors and customer and employee needs

# Realizing the Vision priorities will require action across nine objectives\*

Vision Priorities

## Superior Customer Experience

*SSA delivers a customer experience that meets or exceeds service expectations*

### Vision Objectives

#### Consolidated Customer Experience Management

SSA transforms its ability to direct all customer experience improvement efforts and develops a deep understanding of all customers.

#### Omni-Channel Customer Experience

SSA improves the quality of its existing service channels, develops new service channels, and integrates all channels to provide a seamless experience across channels and services.

#### Customer Empowerment and Choice

SSA provides customers with the services that are critical to them and empowers them to interact with SSA in the manner that they choose.

## Exceptional Employees

*Every SSA employee operates in a flexible and highly-engaging working environment that supports and develops them in providing quality customer service*

### Vision Objectives

#### Employee Engagement

SSA has a deep understanding of what motivates employees and rolls out cultural change initiatives to increase employees' involvement.

#### Employee Development

SSA prioritizes employee development through development plans, access to compelling learning and development opportunities, and a culture of knowledge-sharing.

#### Employee Empowerment

SSA has a work environment that provides employees with the flexibility and authority to make a tangible impact on their work environment and SSA's mission.

## Innovative Organization

*SSA is an adaptive organization that embraces changes to meet the future needs of its customers and employees*

### Vision Objectives

#### Continuous Improvement

SSA has established feedback and improvement mechanisms that are driven by data and inform advancement of SSA's processes, policies, and programs.

#### Adaptive Culture

SSA has an organizational structure and leadership team that recognizes, adapts, and develops change in innovative and impactful ways.

#### Customer-Centric Infrastructure

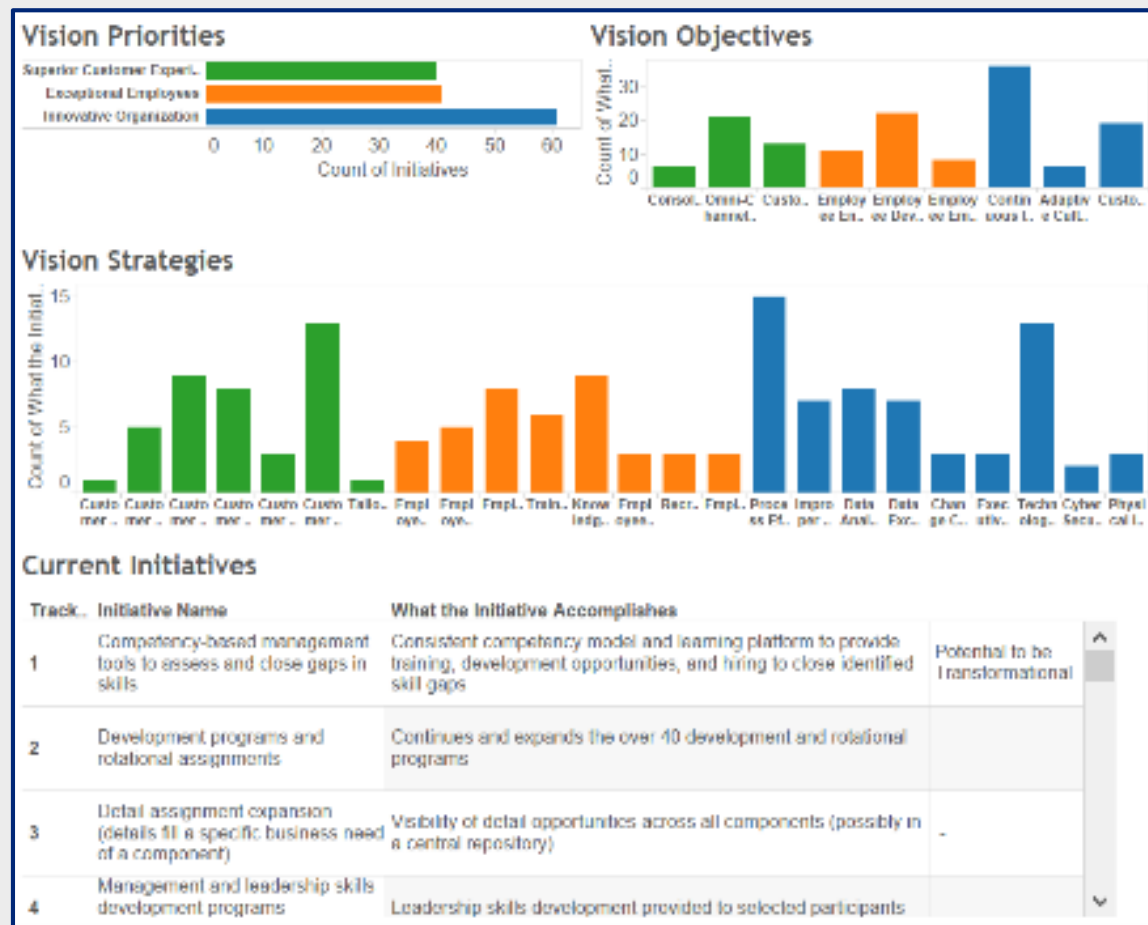

SSA has modernized, secure, and flexible IT and physical infrastructures that are driven by customer need and aim to meet or exceed customer expectations.

# SSA already invests in many initiatives across these nine objectives

## Current Initiatives

**142** current initiatives aligned to Vision 2025

**51** with potential to be transformational

## SSA's Critical Eight

(included in dashboard)

- Enhance Online Services
- Reduce the Wait for a Hearing Decision
- Educate the Public about Social Security Programs
- Improve Succession Planning
- Promote Employee Development and Employee Engagement
- Transform the IT Investment Process
- Establish the Enterprise Program Management Office
- Accelerate the Use of Data-Driven decision-making

*We developed an interactive dashboard that allows users to see the alignment of current initiatives to the Vision*

# But gaps still remain to realize Vision 2025

**We developed outcomes for the vision objectives**

**We determined current initiatives that support vision objectives**

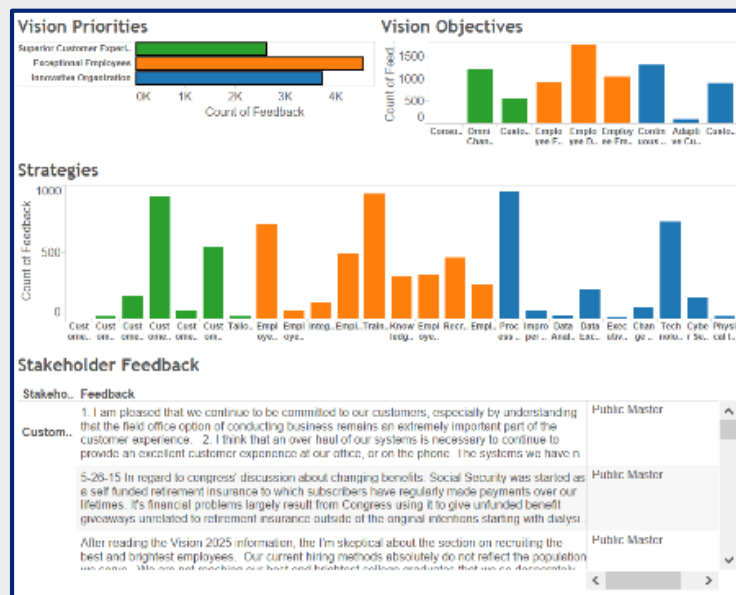

**We compared the current initiatives to the vision objectives to determine the gaps**

# We analyzed stakeholder\* input and leading practices to develop recommended initiatives

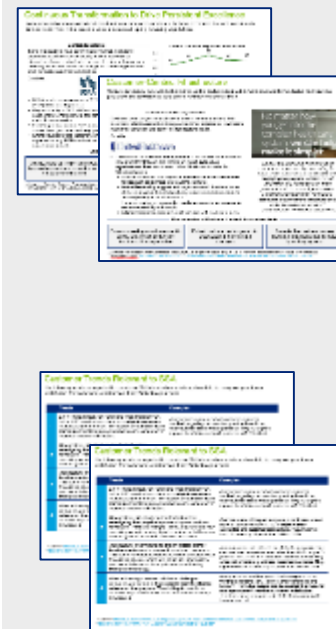

## Stakeholder Input

**Over 10,500\*\*** responses with thoughts and recommendations aligned to Vision 2025

We developed an interactive dashboard that allows users to see the alignment of stakeholder input to the Vision

## External Organization Research\*\*\*

41

cases of organizations that have undergone similar transformational change

59

trends in the external environment for customers, employees, and organizations

12 \* Stakeholders include: employees, customers, and external constituents (e.g., advocacy and congressional groups); SSA collected feedback representing over 29,000 employees

\*\* 10,500 inputs refer to the number of unique responses that align to a Vision priority in the stakeholder feedback spreadsheet

\*\*\* Refer to Appendix B for external research on case studies and trends

# Current initiatives, recommended initiatives from stakeholder\* input, and leading practices form the Vision Roadmap

Tracking #	Initiative Name	What the Initiative Accomplishes	End
10	Anti-fraud infrastructure	Strengthen anti-fraud program, office, and committee	2025
11	Anti-fraud system architecture	Customer benefit of fraud detection and prevention to fraud	2025
12	Beneficiary payment and reporting	Streamline processes, improve beneficiary payment, and reporting to improve the accuracy and timeliness of benefit payments	2025
13	Business continuity	Disaster threat and abuse detection and prevention	2025
14	Customer engagement strategy	Recognize employee accomplishments across competency	2025
15	Rewards and recognition	Equip employees with online tools for improving engagement and retention	2025
16	Employee engagement toolkit	Develop employee engagement tools (TTC) across	2025
17	Customer Channel Improvement	Improve customer in field office through SSP software	2025
18	Queueing system improvements	Improve to reduce and social security statements including technology capabilities	2025
19	Customer communications improvements	Customer web-based system for easier use and increase the quality of disability decisions through providing current information about specific job requirements	2025
20	Occupational information system	Customer and maintain electronic information technology systems that provide disability beneficiaries access to a self-directed employment support structure	2025
21	Returns to work online information system	Improve self service options in field offices	2025
22	Self-help PC enhancements	Enables credit card payments in field offices	2025
23	Social security electronic remittance system	Examines the performance of employment networks through regular contact and site visits and determines improvements	2025
24	Improving employment support programs	Seeks to identify methods to reduce hearing wait times to an average of 75 days without conflicting customer	2025
25	Critical Flight: Reduce the Wait for a Hearing Decision		2025

## Current Initiatives

Initiatives currently underway that support realizing the Vision

## Stakeholder Inputs

Ideas and recommendations from stakeholders for SSA changes needed

## External Research

Case studies and trends for how other organizations achieved transformation

SSA Vision 2025 - Vision Roadmap January 2016			
Area	Initiative	Impact	Timeline
Customer Service	Improve customer service through digital transformation	Reduce wait times, improve customer satisfaction	2016-2025
Employee Engagement	Improve employee engagement through digital transformation	Reduce wait times, improve employee satisfaction	2016-2025
Business Process	Improve business process through digital transformation	Reduce wait times, improve business process	2016-2025
Technology	Improve technology through digital transformation	Reduce wait times, improve technology	2016-2025
Security	Improve security through digital transformation	Reduce wait times, improve security	2016-2025

Human Resources	Improve human resources through digital transformation	Reduce wait times, improve human resources	2016-2025
Finance	Improve finance through digital transformation	Reduce wait times, improve finance	2016-2025
Legal	Improve legal through digital transformation	Reduce wait times, improve legal	2016-2025
Public Affairs	Improve public affairs through digital transformation	Reduce wait times, improve public affairs	2016-2025
Information Management	Improve information management through digital transformation	Reduce wait times, improve information management	2016-2025

## Vision Roadmap

Series of initiatives that address SSA gaps to realize Vision 2025

# The Vision Roadmap structures initiatives through waves aligned to Agency Strategic Plans (ASPs)

While “one government” – connecting government services across agencies – is listed in wave three, SSA may be able to work with other agencies on this goal sooner, depending on the type of initiative and coordination required.

SSA should follow a **repeatable process, within and across waves**, to:

- **Establish** a strong foundation to support transformation
- **Develop** a plan to test and expand the transformation initiatives
- **Pilot** the transformation initiatives with targeted services, channels, and/or customer segments
- Leverage the results of the pilot to **revise** the plan
- **Scale** the initiatives to other parts of SSA and across government, where applicable, promoting a risk-aware culture that supports a one-government philosophy

We recommend SSA monitor trends and think continuously about the “art of the possible.” The four-year ASP cycle allows for a refresh of initiatives and priorities to adapt the pace of transformation.

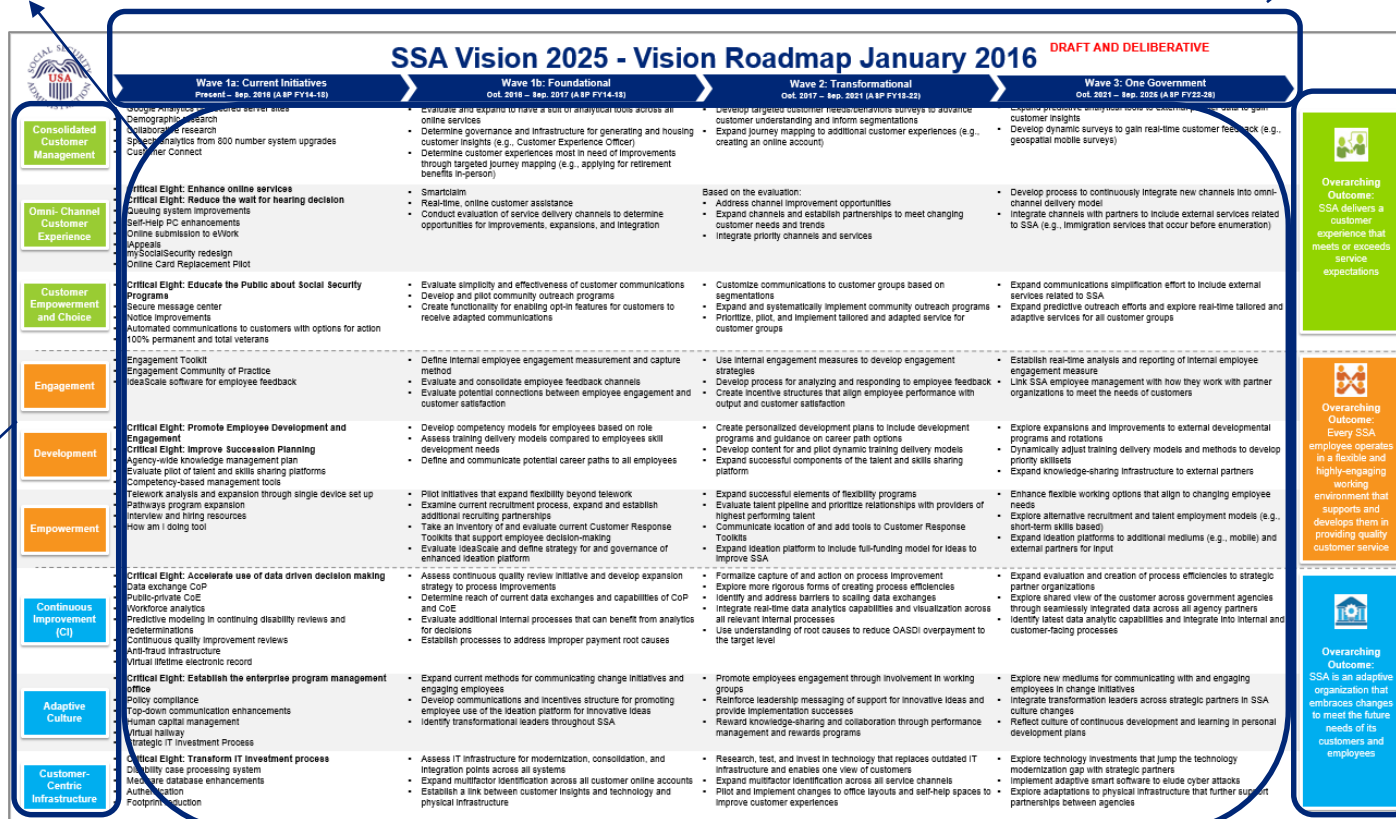

# The Vision Roadmap sequences the activities SSA should undertake over the next 10 years

The initiatives on the Vision Roadmap only include those that we believe will have a significant impact on realizing the Vision and are truly transformational.

## Vision 2025 Roadmap January 2016

**79 Recommended and 51 Current Transformational initiatives\*** are aligned by objective and define the activities SSA should undertake

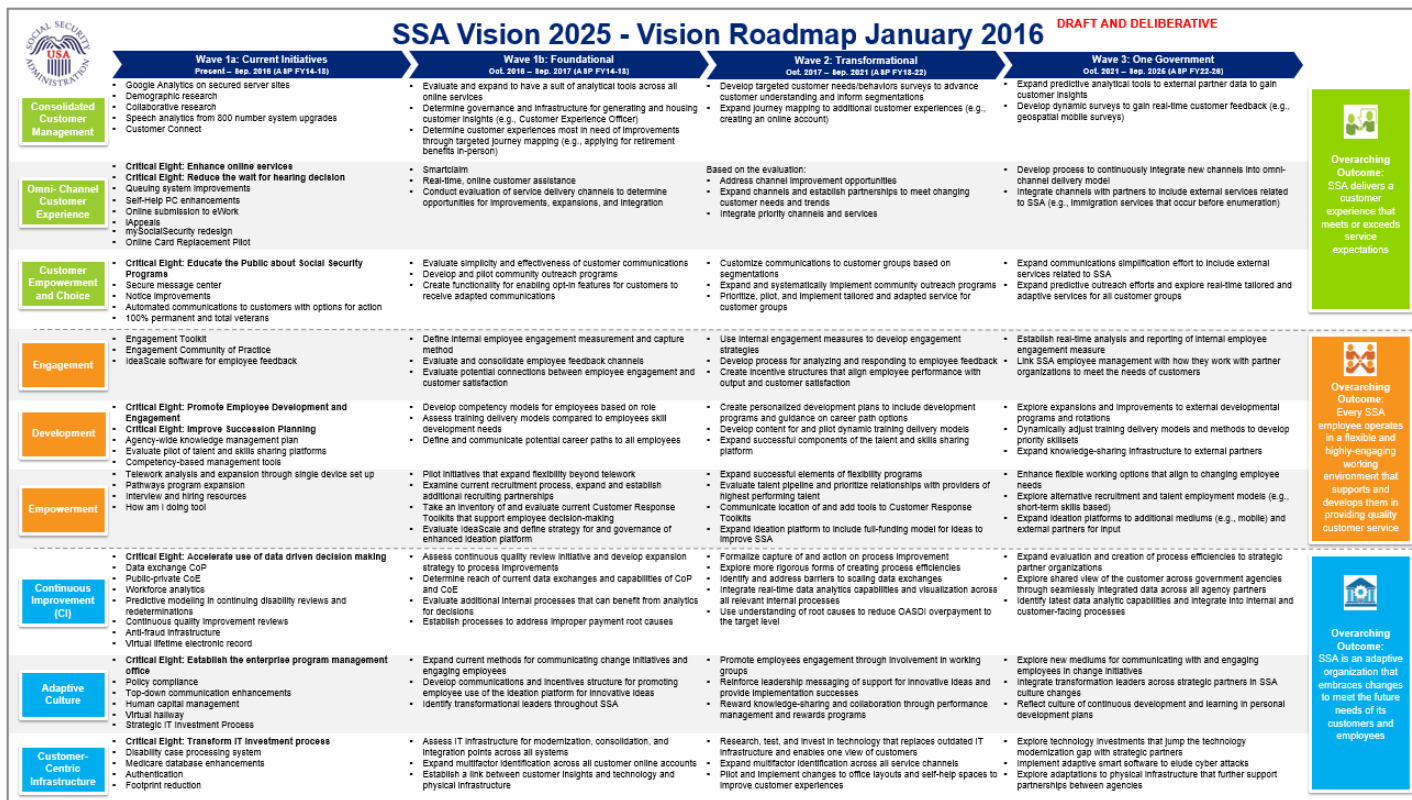

**Vision Waves**  
aligned to ASPs

**Vision Objectives** represent the focus areas for each of the Vision priorities

**Vision Goals** represent the overarching 10-year goal for each Vision priority (one per priority)

Document

## Superior Customer Experience

In 2025, we are focused on understanding the customer's experience over their lifetime. Through this understanding, we respond to and anticipate our customers' needs, and thoughtfully craft appropriate service options.

# SSA set bold objectives for providing superior customer experience

## Superior Customer Experience:

*SSA delivers a customer experience that meets or exceeds service expectations*

### Vision Objectives

#### Consolidated Customer Experience Management

SSA transforms its ability to direct all customer experience improvement efforts and develops a deep understanding of all customers.

**By 2025...** SSA has a consolidated management structure for collecting and analyzing customer data across all channels and proactively provides relevant insights from predictive data analysis on customer needs and behaviors to inform decisions made across SSA.

#### Omni-Channel Customer Experience

SSA improves the quality of its existing service channels, develops new service channels, and integrates all channels to provide a seamless experience across channels and services.

**By 2025...** A beneficiary can begin an application for benefits on her smart phone, transition to complete it on her computer without interruption, and if she encounters a problem, call an SSA employee that has access to a live version of her in-progress application.

#### Customer Empowerment and Choice

SSA provides customers with the services that are critical to them and empowers them to interact with SSA in the manner that they choose.

**By 2025...** Individuals applying for benefits receive proactive notifications about their application, have a clear understanding of the process, and receive all of their information online because they have selected that as their desired method of communication.

# We developed strategies and quantifiable outcomes\* for each objective

## Superior Customer Experience:

*SSA delivers a customer experience that meets or exceeds service expectations*

**Overall Measure: Forrester's Customer Experience Index**

## Vision Strategies

### Consolidated Customer Experience Management

- **Customer Experience Management:** Creates a structure for managing customer experience and distributing insights on customer behavior, characteristics, and needs across the agency
- **Customer Data Analytics:** Develops a comprehensive understanding of customer groups through data collection and analysis to respond to and predict customer needs and behaviors

**Outcomes:** SSA has mechanisms to collect data and apply data-driven decisions for customer preferences, behaviors, and needs across all SSA services and channels

### Omni-Channel Customer Experience

- **Customer Channel Improvement:** Enhances customer experience through improvements to existing methods of customer interaction
- **Customer Channel Expansion:** Delivers more services through existing channels or creates new channel options for customer to use
- **Customer Channel Integration:** Links information across multiple channels for seamless customer interactions when switching between channels

**Outcomes:** Customers can interact with all SSA services using a combination of digital, in-person, and self-service channels interchangeably

### Customer Empowerment and Choice

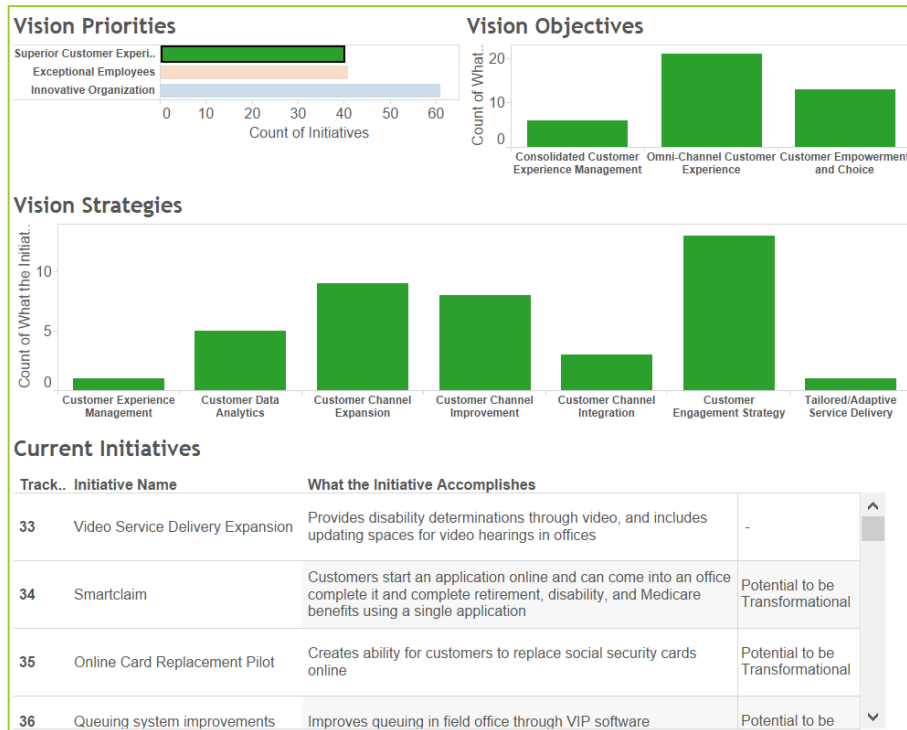

- **Customer Engagement:** Develops a unified strategy for creating and providing information to customers
- **Tailored/Adaptive Service:** Creates personalized outreach and service delivery methods for customers based on customer behaviors, demographics, and service use

**Outcomes:** All customers receive personally tailored information through their preferred channel

# SSA currently invests in many initiatives to achieve these outcomes

## Superior Customer Experience Current Initiative Analysis

*We developed an interactive dashboard that allows users to see the alignment of current initiatives to the Vision.*

### Consolidated customer experience management current initiatives will...

- Establish a **governing body** to manage aspects of customer experiences (e.g., customer connect)
- Develop an **understanding of customer demographics** and **begin to capture customer online behavior** (e.g., Google analytics for secured server sites and demographic research)

### Omni-channel customer experience current initiatives will...

- Improve specific aspects of service delivery** in a channel (e.g., improvements to queuing and self-help options in field offices)
- Expand channels across **online, kiosk, and self-help channels** (e.g., pilot for replacing social security cards online)
- Integrate a few aspects to services** across online, in-person, and telephone support (e.g., Smartclaim allows customers to start a claim online and come into the office to finish)

### Customer empowerment and choice current initiatives will...

- Simplify communications** based on component needs and provide **proactive information on select services** (e.g., notice improvements and proactive automated calling for customers most likely to have returned to work)
- Adapt service delivery to better serve Veterans** (e.g., offers expedited service to veterans for disability processing)

# Gaps remain in realizing these outcomes

## Overarching Superior Customer Experience Gap: Integrating customer experience across all channels seamlessly

### Consolidated Customer Experience Management

**Outcome:** SSA has mechanisms to collect data and apply data-driven decisions for customer preferences, behaviors, and needs across all SSA services and channels

#### Gaps:

- SSA **does not consistently collect, analyze, and use targeted customer data** across all channels **to support decision-making**
- SSA **does not have a mature governance structure** for managing customer insights throughout the agency

### Omni-Channel Customer Experience

**Outcome:** Customers can interact with all SSA services using a combination of digital, in-person, and self-service channels interchangeably

#### Gaps:

- SSA **lacks comprehensive end-to-end evaluation of customer experience across service delivery channels** to inform improvements, expansions, and integrations
- SSA **lacks integration initiatives that provide a seamless experience across services and channels**

### Customer Empowerment and Choice

**Outcome:** All customers receive personally tailored information through their preferred channel

#### Gaps:

- SSA **does not consistently use customer data analytics to develop personalized service delivery for customers**
- SSA's communications **are not always simple and clear** for customers or employees

# We subjectively determined the scale of these gaps

Subjective measurement of the gaps are provided below based on Vision objective outcomes and current initiatives qualitative outcomes. Customer empowerment and choice is further along the continuum as SSA offers some tailored services and has made an effort to reach customers through different marketing campaigns.

## Scoring Criteria

3: Significant progress towards achieving objective; minimal gaps remain

2: Progress towards achieving objective; gaps remain

1: Minimal progress towards achieving objective; significant gaps remain

## Consolidated Customer Experience Management

## Omni-Channel Customer Experience

## Customer Empowerment and Choice

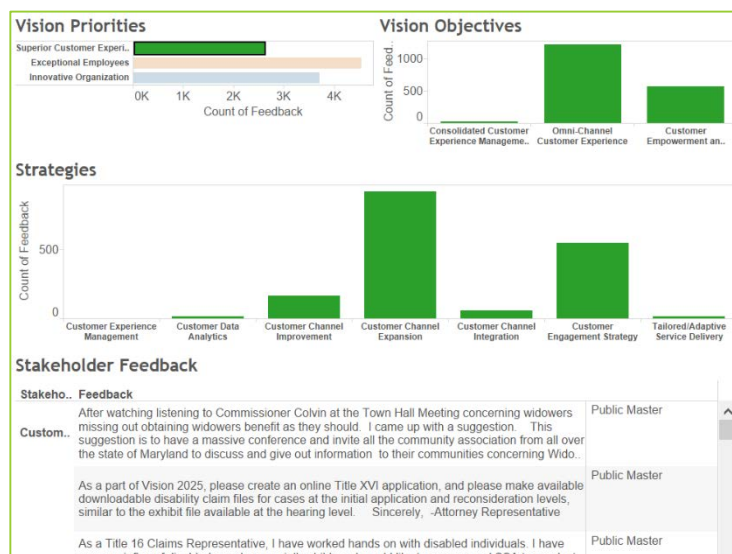

## Superior Customer Experience

Average Score:

# We used input from SSA stakeholders\* to help identify initiatives to fill gaps

We developed an interactive dashboard that allows users to see stakeholder input aligned to the Vision

## Consolidated Customer Experience Management

- **Utilize consistent customer data** both internally and externally to determine customer needs and deliver service that best meets those needs
- **Increase access to customer data** to be able to service customers at the first point of contact; current applications either ask for information that may not be needed or require employees to contact customers to clarify or ask for additional information

## Omni-Channel Customer Experience

- **Increase number of services options** (e.g., video conference assistance, iPhone and Android applications, kiosks, etc.); simple online transactions will benefit customers and also allow front line employees to spend more time addressing the inconsistencies/ complexities that generate office traffic
- **Ensure consistency of customer experience**, information, and satisfaction with self-help services vs. in-person (e.g., no wrong door for customers to go to for services)
- Be able to **provide customers services they need when they need them** (e.g., offer 24/7 customer service)
- **Allow for transactions to be completed at the first point of contact, no matter the channel**

## Customer Empowerment and Choice

- **Provide consistent and easy-to-understand SSA information** and messaging in all customer communication from both the agency (e.g., website, Notices) and external stakeholders (e.g., from advocacy groups, non-profits); misinformation or misinterpretation can have severe impact on customers by causing stress, anxiety, or fear
- **Allow customers to choose their method of engagement with SSA**
- **Educate customers throughout their lifetime**, capitalizing on community outreach opportunities and utilizing SSA marketing to deliver more targeted messages to various customer audiences through a diverse set of communication vehicles

## We also used leading practices from external research

Create a **governing body that has the authority to manage customer experience** across the organization (e.g., USAA's Executive Vice President of Member Experience)

Use **tools to increase the understanding of customers** and to inform adaptation to service delivery (e.g., Barclays' use of segmentation and focus groups to inform tailored services)

**Evaluate channels for expansion and integration** based on customer needs (e.g., Citi's expansion to a mobile application)

**Educate customers** on channel options based on an understanding of customer preferences informed by research and analysis (e.g., HM Revenue and Customs' revenue collection service online campaign)

Expand service delivery **channels to include strategic partners** experiences for customers (e.g., Nevada DMV's kiosks in partner locations)

# Current initiatives, stakeholder\* input, and leading practices create the Vision Roadmap for realizing superior customer experience

# Detailed descriptions of Wave 1a initiatives currently underway

**Key: Strategy**

- Initiative
- Initiative

## Consolidated Customer Experience Management

### Wave 1a: FY16

#### Customer Experience Management

- Customer Connect - Simplifies how customers connect with employees, connects public to SSA, and aims to serve changing needs of customers

#### Customer Data Analytics

- Google Analytics on secured server sites - Collects page view data from Google Analytics to obtain additional management information and user/behavioral statistics
- Demographic research - Analyzes demographic/economic trends to improve old age, survivor and disability insurance (OASDI) and Supplemental Security Income (SSI) effectiveness
- Collaborative research - Researches issues such as improving service to disabled veterans and reducing homelessness with the Veterans Administration
- Speech analytics from 800 number system upgrades - Establishes an infrastructure that enables understanding of voice of the customer

## Omni-Channel Customer Experience

#### Channel Improvement

- Critical Eight: Enhance online services - Broadens the number of services customers can access online and improves existing offerings
- Critical Eight: Reduce the wait for a hearing decision - Identifies methods to reduce hearing wait times to an average of 270 days without sacrificing customer service quality
- Queuing system improvements - Improves queuing in field office through VIP software
- Self-Help PC enhancements - Improves self service options in field offices

#### Channel Expansion

- Online submission to eWork - Allows online work report submissions via the My SSA portal for SSDI beneficiaries
- iAppeals - Makes Internet versions of the SSA-561 (Request for Reconsideration) (i561) and HA-501 (Request for Hearing by Administrative Law Judge) (i501) available and customers can complete steps through multiple visits
- mySocialSecurity redesign - Creates adaptability of eService applications within mySocialSecurity through upgrades to the portal and architecture and creates the ability to support mobile devices
- Online Card Replacement Pilot - Creates ability for customers to replace social security cards online

## Customer Empowerment and Choice

#### Customer Engagement Strategies

- Critical Eight: Educate the Public about Social Security Programs - Uses multiple engagement channels to ensure that the public is aware of, and educated about, the importance of Social Security and its options
- Secure message center - Allows mySocialSecurity account users to receive alerts, messages, and agency announcements through customer engagement tools
- Notice improvements - Improves readability of notice language for disability and Title 16 notices
- Automated communications to customers with options for action - Provides notices and options for customers to control their accounts to prevent fraud, provides alerts for when changes to accounts occur, and lists program details

#### Tailored/Adaptive Service

- 100% permanent and total veterans - Provides expedited disability case processing for veterans

# Recommendations for maximizing impact of some current initiatives

The recommendations below are based on insights gained during interviews with component representatives.

Current Initiative	Recommendations to maximize impact...
Google Analytics on secured server sites	Support decision-making with data analytics
Speech analytics from 800 number system upgrades	Implement software and establish processes to analyze and use voice of the customer data to inform customer experience changes
Customer Connect	Determine reach of insight and role in the future of the organization
Critical Eight: Enhance online services	Collect lessons learned from channel expansion, improvements, and integration projects
Critical Eight: Reduce the wait for a hearing decision	Examine the multiple pilots for lessons learned for continuous improvement and integrate any customer insights learned from the Compassionate and Responsive Service Plan
Queuing system and Self-Help PC enhancements	Evaluate the in-office experience as a whole as compared to customer needs who frequent in-office instead of online service channels
iAppeals	Document lessons learned from making forms available online and reasons for delays in implementation
Online Card Replacement Pilot	Document lessons learned from state agency partnerships and capture and use data analytics for customers using pilot service
Critical Eight: Educate the Public about Social Security Programs	Evaluate education campaigns and communications to determine if they reach the target audiences to adapt methods for future education efforts
Notice improvements	Evaluate notice holistically and coordinate across components in clarification and simplification efforts

# Wave 1b focuses on recommended initiatives that further build the foundation for transformation

	Wave 1a FY16	Wave 1b FY17	Wave 2 FY18-22	Wave 3 FY22-25

# Wave 1b initiatives come from current initiatives, stakeholder\* input, and leading practices

Initiative	Why we are recommending initiatives
Evaluate and expand to have a suite of analytical tools across all online services	<b>External Research:</b> GSA has teams dedicated to customer experience that collect data and report on customer satisfaction metrics. BBVA processes data in real time across all channels
Determine governance and infrastructure for generating and housing customer insights (e.g., Customer Experience Officer)	<b>External Research:</b> USAA created an Executive Vice President to manage customer experience and consolidated all marketing, sales, channel management, and service functions under that role. United Healthcare appointed a Vice President to manage customer satisfaction and create customer-centric culture across the organization <b>Stakeholder Input:</b> Indicates a desire for more centralized resources
Determine customer experiences most in need of improvements through targeted journey mapping (e.g., applying for retirement benefits in-person)	<b>External Research:</b> United Healthcare developed detailed journey maps to deeply understand customers and shared these journey maps with its employees
Smartclaim	<b>Current initiative</b>
Real-time customer assistance	<b>Current initiative</b>
Conduct evaluation of service delivery channels to determine opportunities for improvements, expansions, and integration	<b>External Research:</b> Las Vegas Department of Motor Vehicles expanded channels to online and self-service options based on customer needs. Citi researched customers to understand what new channels they demanded most and what services they wanted added to existing channels
Evaluate simplicity and effectiveness of customer communications	<b>Stakeholder Input:</b> Indicates frustration from both customers and employees on inconsistent and difficult-to-understand SSA customer communications messaging
Develop and pilot community outreach programs	<b>Stakeholder Input:</b> Employees reported the desire to be empowered to conduct more outreach in their local communities to educate customers
Create functionality for enabling opt-in features for customers to receive adapted communications	<b>External Research:</b> HM Revenue & Customs allowed customers to opt-in to online tax filing instead of paper forms. Companies House went one step further and offered incentives for customers to opt-in to online channels instead of paper forms

# Detailed descriptions of Wave 1b current and recommended initiatives

**Key: Strategy**

- Initiative
- Initiative

## Consolidated Customer Experience Management

### Wave 1b: FY17

#### Customer Experience Management

- Develop a strategy, process, and infrastructure for capturing, analyzing, and managing customer data (from digital and non-digital channels) and for using this data to gain useful insights into the customer experience
- Establish a governance structure that consolidates the customer experience management to a governing body that is empowered to work across components and regions and provide customer insights to employees
- Develop robust customer satisfaction measures and measurement processes that enable in depth analysis across SSA

#### Customer Data Analytics

- Conduct targeted journey mapping to identify customer pain points and improvement opportunities for a select group of services (e.g., applying for retirement benefits in-person, applying for a replacement social security card online)

#### Channel Improvement

- Establish an evaluation structure for determining improvements to existing channels
- Conduct evaluation of channels and document improvements that address the root causes of customer complaints and inefficiencies

#### Channel Expansion

- Establish an evaluation structure for determining expansion of services to existing channels or offering new channels
- Conduct evaluation to determine expansion opportunities (e.g., mobile, additional services offered online, etc.)

#### Channel Integration

- Smartclaim - Allows customers to start an application online and come into an office to complete it for retirement, disability, and Medicare benefits, through a single application
- Real-time customer assistance - Allows anyone navigating the SSA website to communicate with a representative through click-to-communicate technologies and screen-sharing
- Establish a structure for evaluating current channel integration efforts scalability and new areas of integration
- Conduct evaluation to determine integration opportunities and determine technology, processes, and training necessary to integrate the offline and online channels for opportunities

#### Customer Engagement Strategies

- Develop a customer-centric communications program that evaluates the simplicity and effectiveness of communications
- Develop and implement strategies for increasing communications effectiveness (e.g., offering communications in additional languages)
- Determine community outreach organizations that have the most contact with SSA customers and method of contact
- Pilot improvements to customer empowerment through community outreach (e.g., working with a community outreach organization that provides guidance and information on how to apply for benefits)

#### Tailored/Adaptive Service Delivery

- Identify the customer touch points that present the greatest opportunity for tailored content and service delivery for one service (e.g., disability claims)
- Create infrastructure for supporting customer choice and tailored content delivery through enabling the functionality for customers to choose the level and channel of information they receive (e.g., when signing up for an online account they can select the method and amount of communications they receive)

## Omni-Channel Customer Experience

## Customer Empowerment and Choice

# Wave 2 recommended initiatives focus on creating transformation

<b>Customer Empowerment and Choice</b>	<ul style="list-style-type: none"> <li>Critical Eight: Educate the Public about Social Security Programs</li> <li>Secure message center</li> <li>Notice improvements</li> <li>Automated communications to customers with options for action</li> <li>100% permanent and total veterans</li> </ul>	<ul style="list-style-type: none"> <li>Evaluate simplicity and effectiveness of customer communications</li> <li>Develop and pilot community outreach programs</li> <li>Create functionality for enabling opt-in features for customers to receive adapted communications</li> </ul>	<ul style="list-style-type: none"> <li>Customize communications to customer groups based on segmentations</li> <li>Expand and systematically implement community outreach programs</li> <li>Prioritize, pilot, and implement tailored and adapted service for customer groups</li> </ul>	<ul style="list-style-type: none"> <li>Expand communications simplification effort to include external services related to SSA</li> <li>Expand predictive outreach efforts and explore real-time tailored and adaptive services for all customer groups</li> </ul>

# Wave 2 initiatives come from stakeholder\* input and leading practices

Initiative	Why we are recommending initiatives
Develop targeted customer needs/behaviors surveys to advance customer understanding and inform segmentations	<p><b>External Research:</b> USPS created surveys and focus groups to understand customers' use of postal products and services. Barclays conducted customer segmentation to better understand their customer groups and pinpoint underserved groups</p> <p><b>Stakeholder Input:</b> Employees stated the need for SSA to understand different customer segments and their needs</p>
Expand journey mapping to additional customer experiences (e.g., creating an online account)	<p><b>External Research:</b> United Healthcare developed detailed journey maps to deeply understand customers and shared these journey maps with its employees</p>
Address channel improvement opportunities	<p><b>External Research:</b> Nationwide improved its online services by adding in a live-chat help feature that automatically identifies and helps customers when they are having trouble</p>
Expand channels and establish partnerships to meet changing customer needs and trends	<p><b>External Research:</b> Las Vegas Department of Motor Vehicles expanded channels through partnerships with dealers to improve customer experience and reduce wait times. Citi researched customers to understand what new channels they demand most and what services they want added to existing channels</p>
Integrate priority channels and services	<p><b>External Research:</b> An American loan provider integrated its call center with its digital channel which allows call center employees to directly access and view a customer's web session. BBVA implemented a multi-year overhaul of channel management systems to create integration and real time processing of data across all channels</p> <p><b>Stakeholder Input:</b> Employees emphasized the need to integrate application systems so customers do not need to provide the same information multiple times</p>
Customize communications to customer groups based on segmentations	<p><b>External Research:</b> Barclays used segmentation to send targeted messages to an underserved population. Nationwide individually tailors communications to meet customers online needs through an online live chat feature</p>
Expand and systematically implement community outreach programs	<p><b>Stakeholder Input:</b> Employees reported the desire to be empowered to conduct more outreach in their local communities aimed to educate customers</p>
Prioritize, pilot, and implement tailored and adapted service for customer groups	<p><b>External Research:</b> Barclays used segmentation to adapt services to meet an underserved populations' needs</p>

# Detailed descriptions of Wave 2 initiatives

**Key: Strategy**

- Initiative
- Initiative

## Consolidated Customer Experience Management

### Wave 2: FY18-22

#### Customer Data Analytics

- Incorporate lessons learned from the initial journey mapping to replicate and expand the process for the remaining SSA services, including:
  - SAA field office locations
  - SSA 800 Number and Field Office call center support services
  - All other SSA online services
- Determine objectives of customer segmentations (e.g., improve customer experience through understanding behaviors of customers submitting earning reports)
- Develop targeted customer needs/behaviors surveys to inform segmentations of customers for determined objectives

#### Channel Improvement

- Pilot and scale improvements to channels from the channel improvement evaluation
- Enhance the customer experience across channels through improvements that mitigate customer pain points identified through journey maps

#### Channel Expansion

- Pilot and scale providing services through additional channels (e.g., offering retirement benefit applications online) and creating new channels (e.g., mobile application for services) based on evaluation
- Use information from customer data analytics to provide insights on changing customer needs during expansion efforts
- Establish strategic infrastructure partnerships with government agencies and large corporations in related industries to offer SSA services via these partner locations (e.g., apply for a replacement card at a Post Office)

#### Channel Integration

- Implement the necessary technology, training, and processes to integrate priority SSA services across relevant channels, which requires an understanding of the backend IT requirements of customer-facing technologies

## Omni-Channel Customer Experience

## Customer Empowerment and Choice

#### Customer Engagement Strategies

- Use information gained through customer data analytics to customize communications and outreach efforts to different customer groups
- Scale current successful pilots and determine additional outreach groups that connect with SSA customers and expand community outreach programs based on lessons learned from initial pilots

#### Tailored/Adaptive Service Delivery

- Expand identification of impactful points for tailored content delivery to all services and channels
- Pilot and scale tailored customer experiences for service delivery across channels
- Explore additional ways to tailor service delivery and content to customer based on improved understanding of customers from data analytics (e.g., tailored service delivery and content based on customer survey responses to a preset list of questions that answer why customers are using the service)

# Wave 3 initiatives focus on further advancing “one government” strategies

	Wave 1a FY16	Wave 1b FY17	Wave 2 FY18-22	Wave 3 FY22-25
<b>Consolidated Customer Experience Management</b>	<ul style="list-style-type: none"> <li>Google Analytics on secured server sites</li> <li>Demographic research</li> <li>Collaborative research</li> <li>Speech analytics from 800 number system upgrades</li> <li>Customer Connect</li> </ul>	<ul style="list-style-type: none"> <li>Evaluate and expand to have a suite of analytical tools across all online services</li> <li>Determine governance and infrastructure for generating and housing customer insights (e.g., Customer Experience Officer)</li> <li>Determine customer experiences most in need of improvements through targeted journey mapping (e.g., applying for retirement benefits in-person)</li> </ul>	<ul style="list-style-type: none"> <li>Develop targeted customer needs/behaviors surveys to advance customer understanding and inform segmentations</li> <li>Expand journey mapping to additional customer experiences (e.g., creating an online account)</li> </ul>	<ul style="list-style-type: none"> <li>Expand predictive analytical tools to external partner data to gain customer insights</li> <li>Develop dynamic surveys to gain real-time customer feedback (e.g., geospatial mobile surveys)</li> </ul>

# Wave 3 initiatives come from stakeholder\* input, leading practices, and additional Deloitte recommendations

Initiative	Why we are recommending initiatives
Expand predictive analytical tools to external partner data to gain customer insights	<b>Deloitte Recommendation:</b> As new methods for capturing, analyzing, and visualizing data continue to develop over the next 10 years, these methods can be evaluated and then expanded to use with partner organizations to gain a deeper understanding of SSA customers
Develop dynamic surveys to gain real-time customer feedback (e.g., geospatial mobile surveys)	<b>External Research:</b> BBVA uses channel integration to capture real-time data across all service channels <b>Deloitte Recommendation:</b> As new methods for collecting customer experience data continue to develop, these methods can be evaluated and integrated to advance SSA's knowledge of customer needs, preferences, and behaviors
Develop process to continuously integrate new channels into omni-channel delivery model	<b>Deloitte Recommendation:</b> As channels become integrated, it will be important to set up a process to evaluate and add additional channels into the integrated structure
Integrate channels with partners to include external services related to SSA (e.g., immigration services that occur before enumeration)	<b>Deloitte Recommendation:</b> As SSA expands channel service offerings and establishes external partnerships, there may be an opportunity for SSA to integrate back-end customer service transactions across partnership organizations to seamlessly reduce customer touchpoints and meet customer needs
Expand communications simplification effort to include external services related to SSA	<b>Deloitte Recommendation:</b> There is an opportunity for SSA to work with partners to streamline communications across multiple touchpoints from SSA and partners
Expand predictive outreach efforts and explore real-time tailored and adaptive services for all customer groups	<b>External Research:</b> Nationwide uses customer data to automatically identify customers having trouble with their online channels and proactively live chats customers to assist them with any issues <b>Deloitte Recommendation:</b> As SSA's understanding of customers advances, SSA can create the ability to expand predictive efforts to anticipate customer needs and better control the overall customer experience

# Detailed descriptions of Wave 3 initiatives

**Key: Strategy**

- Initiative
- Initiative

## Consolidated Customer Experience Management

### Wave 3: F22-25

#### Customer Data Analytics

- Expand predictive analytical tools to capture a deeper understanding of all customers and their actions across external partners
- Account for changes in customer trends in real-time to act on opportunities to immediately enhance the customer experience (e.g., geospatial mobile surveys that are triggered by customer proximity to SSA offices)

## Omni-Channel Customer Experience

#### Channel Expansion

- Develop and implement agile approach for expanding service delivery features in response to changing technology threats and opportunities
- Expand channels with partners to include partner administration of defined services (e.g., immigration services that occur before enumeration directly link to the enumeration process and partners have the ability to provide full service)

#### Channel Integration

- Develop systems to support inter-agency data-sharing initiatives that give customers the ability to share data across agencies so they do not need to repeatedly provide the same information to several agencies
- Integrate new channels into SSA's existing omni-channel delivery model and continually assess and improve integration capabilities

## Customer Empowerment and Choice

#### Customer Engagement Strategies

- Use strategic partnerships with agencies to create combined simplified communications that anticipate the needs of customer who are receiving services from multiple government agencies

#### Tailored/Adaptive Service Delivery

- Tailor every customer transaction from beginning to end based on insights gained from real-time behavior analysis
- Provide targeted outreach to customers who may soon become eligible for SSA programs by performing predictive analytics on public and private data

# These waves combined create the Vision Roadmap for superior customer experience

## Consolidated Customer Experience Management

- Google Analytics on secured server sites
- Demographic research
- Collaborative research
- Speech analytics from 800 number system upgrades
- Customer Connect

- Evaluate and expand to have a suite of analytical tools across all online services
- Determine governance and infrastructure for generating and housing customer insights (e.g., Customer Experience Officer)
- Determine customer experiences most in need of improvements through targeted journey mapping (e.g., applying for retirement benefits in-person)

- Develop targeted customer needs/behaviors surveys to advance customer understanding and inform segmentations
- Expand journey mapping to additional customer experiences (e.g., creating an online account)

- Expand predictive analytical tools to external partner data to gain customer insights
- Develop dynamic surveys to gain real-time customer feedback (e.g., geospatial mobile surveys)

## Omni-Channel Customer Experience

- Critical Eight: Enhance online services
- Critical Eight: Reduce the wait for a hearing decision
- Queuing system improvements
- Self-Help PC enhancements
- Online submission to eWork
- iAppeals
- mySocialSecurity redesign
- Online Card Replacement Pilot

- Smartclaim
- Real-time, online customer assistance
- Conduct evaluation of service delivery channels to determine opportunities for improvements, expansions, and integration

- Based on the evaluation:*
- Address channel improvement opportunities
  - Expand channels and establish partnerships to meet changing customer needs and trends
  - Integrate priority channels and services

- Develop process to continuously integrate new channels into omni-channel delivery model
- Integrate channels with partners to include external services related to SSA (e.g., immigration services that occur before enumeration)

## Customer Empowerment and Choice

- Critical Eight: Educate the Public about Social Security Programs
- Secure message center
- Notice improvements
- Automated communications to customers with options for action
- 100% permanent and total veterans

- Evaluate simplicity and effectiveness of customer communications
- Develop and pilot community outreach programs
- Create functionality for enabling opt-in features for customers to receive adapted communications

- Customize communications to customer groups based on segmentations
- Expand and systematically implement community outreach programs
- Prioritize, pilot, and implement tailored and adapted service for customer groups

- Expand communications simplification effort to include external services related to SSA
- Expand predictive outreach efforts and explore real-time tailored and adaptive services for all customer groups

## Exceptional Employees

In 2025, we attract top talent and support our employees through developmental opportunities, active engagement, and empowerment to make decisions. Our employees reflect the "heart of the agency," providing a high-quality, personalized customer experience through compassion and dedication to our mission.

# SSA set bold objectives for creating exceptional employees

## Exceptional Employee:

*Every SSA employee operates in a flexible and highly-engaging working environment that supports and develops them in providing quality customer service*

### Vision Objectives

#### Employee Engagement

SSA has a deep understanding of what motivates employees and rolls out cultural change initiatives to increase employees' involvement.

**By 2025...** SSA employee feedback and engagement measurement is captured across multiple channels and real time analysis creates recommendation for changes to improve how employees are engaged across SSA.

#### Employee Development

SSA prioritizes employee development through development plans, access to compelling learning and development opportunities, and a culture of knowledge-sharing.

**By 2025...** SSA employees have personalized development plans that assess their core competencies for their role, provide potential career paths to work towards, and list development programs the employees can apply for or participate in.

#### Employee Empowerment

SSA has a work environment that provides employees with the flexibility and authority to make a tangible impact on their work environment and SSA's mission.

**By 2025...** An SSA field office employee has a new idea for improving their local office, he/she submits the idea through a platform, present it to leadership, and receive authorization and funding to pilot and scale his/her idea from senior leaders.

# We developed strategies and quantifiable outcomes based on objectives

## Exceptional Employee:

*Every SSA employee operates in a flexible and highly-engaging working environment that supports and develops them in providing quality customer service*

**Overall Measure: OPM Employee Engagement Index**

## Vision Strategies

### Employee Engagement

- **Employee Engagement Strategies:** Develops a unified strategy to increase employee connection to the organization across components and participation in decision-making
- **Employee Feedback Mechanisms:** Captures, monitors, and acts on employee ideas, issues, and organization insights
- **Integrated Employee/Customer Management:** Aligns employee engagement efforts to fulfilling customer needs

**Outcome:** SSA maintains outstanding employee engagement as measured by SSA specific metrics

### Employee Development

- **Employee Development Plans/Programs:** Defines competency models and offers programs that focus on developing employee skills
- **Training:** Develops and delivers comprehensive trainings in a way that builds employee skillsets
- **knowledge-sharing:** Encourages and supports employees in sharing information, expertise, and insights across the agency

**Outcome:** SSA has personalized, comprehensive development plans for every employee

**Outcome:** All SSA employees have access to the knowledge and expertise of their colleagues on demand

**Outcome:** All employee training programs are based on employee and agency-desired skill sets

### Employee Empowerment

- **Employee Flexibility:** Creates channels for employees to work from a variety of locations and makes intentional shifts in workload
- **Recruitment:** Develops a strong recruiting pipeline of top talent and removes barriers to filling roles
- **Employee Ownership/Accountability:** Provides employees with tools to make decisions and creates accountability structures for their work

**Outcome:** All SSA employees have the flexibility to do their jobs in the manner that best serves SSA's mission

**Outcome:** All SSA managers have the authority to hire new talent and are held accountable for their performance

# Many current initiatives support these outcomes

## Exceptional Employee Current Initiative Analysis

*We developed an interactive dashboard that allows users to see the alignment of current initiatives to the Vision.*

### Employee Engagement current initiatives will...

- Provide **engagement tools** to employees and **support engagement strategies within components** (e.g., employee engagement community of practice)
- Capture **employee feedback across online and in-person channels** (e.g., IdeaScale)

### Employee Development current initiatives will...

- Provide **developmental programs at the agency and component level** and begin to use competency tools (e.g., agency mentorship program)
- Offer **trainings across positions and topic areas** (e.g., management and supervisor training)
- **Provide platforms for knowledge-sharing** across the agency (e.g., Skills Connect and web-based knowledge-sharing platforms)

### Employee Empowerment current initiatives will...

- Expand employee flexibility through **telework and workload adjustments** (e.g., single device setup that enables telework capabilities)
- Provide **hiring resources** to managers and advertise development opportunities to potential recruits (e.g., Pathways Program)
- Provide **real-time performance feedback** to employees (e.g., how am I doing tool)

# Gaps remain in realizing these outcomes

## Overarching Exceptional Employee Gap: Linking employee and customer management

### Employee Engagement

**Outcome:** SSA maintains outstanding employee engagement as measured by SSA specific metrics

#### Gaps:

- SSA lacks a comprehensive set of measures for understanding **employee engagement** and analysis to inform engagement strategies
- SSA **lacks a process to consolidate, regularly analyze, and use employee feedback** across engagement channels
- SSA does not have a comprehensive understanding of **correlation of employee engagement with other key performance areas, most importantly customer satisfaction** (e.g., correlation between employee engagement with other key performance measures including customer experience)

### Employee Development

**Outcome:** SSA has personalized, comprehensive development plans for every employee

**Outcome:** All SSA employees have access to the knowledge and expertise of their colleagues on demand

**Outcome:** All employee training programs are based on employee and agency-desired skill sets

#### Gaps:

- SSA **does not have agency-wide competency models, development plans, or defined career paths** to provide guidance to employees and allow employees to work in different components
- SSA has knowledge-sharing platforms but there is **limited awareness, promotion, and use** by employees
- SSA's training delivery methods **may not effectively develop specialized skills**

### Employee Empowerment

**Outcome:** All SSA employees have the flexibility to do their jobs in the manner that best serves SSA's mission

**Outcome:** All SSA managers have the authority to hire new talent and are held accountable for their performance

#### Gaps:

- SSA has few efforts underway to **improve workplace flexibility beyond telework**
- SSA **emphasizes production outputs over customer experience and employee development**
- SSA **employees lack decision-making ownership and authority** to test and implement new ideas
- SSA **does not have flexibility for management to hire rapidly** to fill immediate needs

# We subjectively determined the scale of these gaps

Subjective measurement of the gaps are provided below based on Vision objective outcomes and current initiatives qualitative outcomes. Employee engagement is further along the continuum as SSA does have some mechanisms to understand what motivates employees and connects them to the organization (e.g. engagement community of practice).

## Scoring Criteria

3: Significant progress towards achieving objective; minimal gaps remain

2: Progress towards achieving objective; gaps remain

1: Minimal progress towards achieving objective; significant gaps remain

## Employee Engagement

## Employee Development

## Employee Empowerment

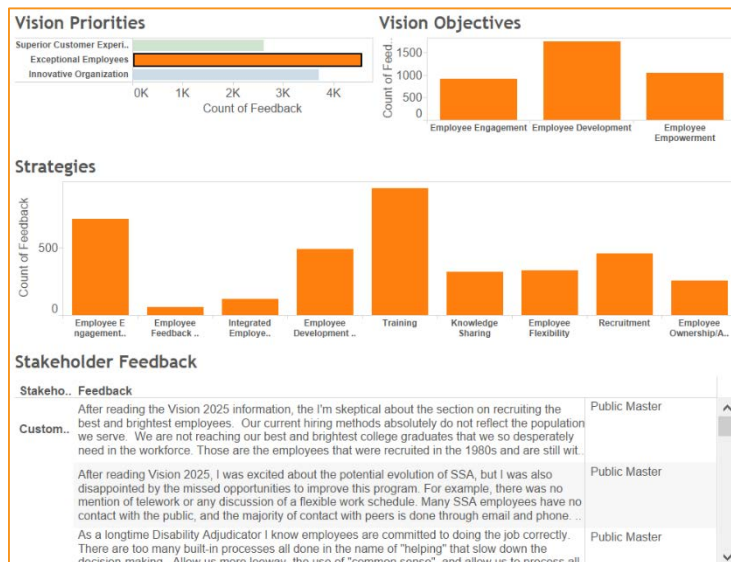

## Exceptional Employees

Average Score:

# We used input from SSA stakeholders\* to help identify initiatives to fill gaps

We developed an interactive dashboard that allows users to see stakeholder input aligned to the Vision

## Employee Engagement

- **Demonstrate that SSA values employee feedback** and acts on voiced concerns, ideas, recommendations
- **Provide formal and informal incentives** to motivate employees and encourage desired behaviors (e.g., performance rewards and recognition)
- **Improve communication** between management and employees (e.g., encourage managers to be more transparent with their teams)
- **Communicate early and often** as process or technology changes or updates occur (e.g., clearly articulate how employee input led to the change)
- **Shift focus across components to “One SSA”** (e.g., enhance engagement in activities to agency-wide instead of component focused)

## Employee Development

- Build and implement more **cross-component training** and rotations for all employees (e.g., expand JELP)
- **Reward and increase management accountability in developing employees** (e.g., provide a tool for managers to reference when discussing performance expectations and role opportunities across the agency)
- **Increase mentoring opportunities** at all levels
- Enhance **training delivery methods** to best meet employee needs (e.g., VOD/ online training is not always the most effective for learning new information or processes)
- **Build and promote clear career paths** for employees and make employees aware of the various development options

## Employee Empowerment

- Hire top talent to fill the needs of the agency and institute **faster hiring processes** and effective retention strategies
- **Allow employees to work directly with employees in other components** (e.g., empower employees to collaborate to solve problems and serve customers)
- **Encourage employees to use creativity** and available resources to service customers without focusing solely on output
- Provide **workplace flexibility** options (e.g., telework)
- **Increase visibility into agency processes** and promote **accountability** at lower levels of the organization (e.g., provide a tool that allows employees to view the information they need to make informed decisions on policy/ processes/ procedures)

## We also used leading practices from external research

Provide **formal education, training**, on-the-job development experiences, and leadership development (e.g., NASA's dedicated training and development strategy)

**Create location flexibility for employees to do their jobs where it best meets the needs of customers** and serves the organization's mission (e.g., Miami-Dade's case workers used mobile technology to do work in the field instead of home or in the office)

United Kingdom's

Department  
for Work &  
Pensions

**Engages employees to submit improvement and innovation ideas** through an ideation platform and funds pilots for promising ideas (e.g., U.K. Department for Work and Pensions' Bright Ideas portal)

**Use competency models** to create clarity in employee development and performance outcomes (e.g., BlueCross BlueShield's leadership competency framework)

**Create recruiting strategies** that are informed by data and accomplish organizational goals (e.g., Federal Bureau of Investigation's recruiting strategy with universities)

# Detailed descriptions of Wave 1a initiatives currently underway

**Key: Strategy**

- Initiative
- Initiative

## Wave 1a: FY16

### Engagement

#### Employee Engagement Strategies

- Engagement Toolkit - Equips employees with online tools for improving engagement and satisfaction
- Engagement Community of Practice – Reviews FEVS data and develops engagement action plans and works with components on improving engagement

#### Employee Feedback Mechanisms

- IdeaScale software for employee feedback - Uses IdeaScale across the organization to capture feedback on targeted topics

### Development

#### Employee Development Plans/Programs

- Critical Eight: Promote Employee Development and Engagement - Develops programs and opportunities for employees to grow and advance
- Competency-based management tools to assess and close gaps in skills - Creates a competency model and learning platform to provide training, development opportunities, and hiring to close identified skill gaps

#### knowledge-sharing

- Critical Eight: Improve Succession Planning - Identifies and creates developmental opportunities necessary to ensure continuity in leadership and other critical agency positions
- Agency-wide knowledge management plan - Plans for structure around information and knowledge-sharing to fight the knowledge gap when employees retire
- Talent and skills sharing platform pilot - Creates a platform to develop and share skills and talent to create an agile and engaged workforce

### Empowerment

#### Employee Flexibility

- Telework analysis and expansion through single device setup (SDS) - Improves employee flexibility by enabling employees to work from different locations; includes technology to enable telework

#### Recruitment

- Interview and hiring resources - Develops materials that guide management during the hiring process
- Pathways program expansion - Attracts talented workforce with meaningful training and development opportunities

#### Employee Ownership/ Accountability

- How am I doing tool - Provides real-time performance related feedback to employees

# Recommendations for maximizing impact of some current initiatives

The recommendations below are based on insights gained during interviews with component representatives.

Current Initiative	Recommendations to maximize impact...
Engagement Toolkit	Communicate location and value of tools to employees and evaluate use of tools across agency
Critical Eight: Promote Employee Development and Engagement	Capture lessons learned and evaluate potential for cross-component expansion of established programs
Agency-wide knowledge management plan	Monitor and support this initiative as it has the potential to create agency-wide insights and management of knowledge-sharing
Evaluate pilot of talent and skills sharing platforms	Determine outcomes of the pilot and document lessons learned since it is a part of an overarching GovConnect from OPM and could have cross-agency connections
Competency-based management tools	Evaluate further to see if it creates incentives and connections to customer experience and adaptive culture
Pathways program expansion	Determine effectiveness of these programs for recruiting the right talent and developing a pipeline
How am I doing tool	Evaluate further to see if the measurements in the how am I doing tool goes beyond output measures and include customer satisfaction or other measures important to Vision 2025

# Wave 1b focuses on recommended initiatives that further build the foundation for transformation

	Wave 1a FY16	Wave 1b FY17	Wave 2 FY18-22	Wave 3 FY22-25

# Wave 1b initiatives come from stakeholder\* input and leading practices

Initiative	Why we are recommending initiatives
Define internal employee engagement measurement and capture method	<b>Stakeholder Input:</b> Employees indicated there is a need to focus on employee engagement particularly during times of change. They also indicated that the Federal Employee Engagement Survey does not accurately reflect engagement
Evaluate and consolidate employee feedback channels	<b>Stakeholder Input:</b> Employees indicated a desire to understand where their feedback is going and how it is being used
Evaluate potential connections between employee engagement and customer satisfaction	<b>External Research:</b> Edward Jones recognized the connection between work responsibilities and meaningful outcomes, so the organization invests heavily in rewards, flexibility, and development <b>Stakeholder Input:</b> Customers report inconsistent service quality depending on employee interactions
Develop competency models for employees based on role	<b>External Research:</b> BlueCross BlueShield aligned strategic goals, performance reviews, and leadership development with defined competencies <b>Stakeholder Input:</b> Employees want to see a competency model developed and trainings mapped to the model
Assess training delivery models compared to employees skill development needs	<b>Stakeholder Input:</b> Employees frequently reported their desire for more cross-component training as well as clear training plans aligned with career paths
Define and communicate potential career paths to all employees	<b>Stakeholder Input:</b> Employees reported that development options and opportunities across the agency are not clear and are not promoted to all employees; frequently opportunities are known by word-of-mouth rather than formal publication
Pilot initiatives that expand flexibility beyond telework	<b>External Research:</b> GSA invested in flexibility, including desk sharing, hot desking, open environment, and alternative work schedules. Miami-Dade County equipped case workers with camera-enabled smartphones and laptops to support paperwork completion in the field
Examine current recruitment process, expand and establish additional recruiting partnerships	<b>External Research:</b> The Federal Bureau of Investigations improved recruiting effectiveness by partnering directly with marketing students and professors at universities to deploy targeted messaging at identified top feeder schools <b>Stakeholder Input:</b> Managers want faster hiring processes
Take an inventory of and evaluate current Customer Response Toolkits that support employee decision-making	<b>Stakeholder Input:</b> Employees reported a desire to be empowered by being able to access the customer information they need, as well as work directly with other components <b>External Research:</b> The Consumer Financial Protection Bureau provides information to employees in order for them to provide accurate counseling services to workforce with disabilities
Evaluate IdeaScale and define strategy for and governance of enhanced ideation platform	<b>External Research:</b> The United Kingdom's Department for Work and Pensions developed an ideas platform for innovation and improvements, and the United States Citizen Immigration Services developed innovation challenges for employees to solve problems that interest them

# Detailed descriptions of Wave 1b recommended initiatives

**Key: Strategy**

- Initiative
- Initiative

## Wave 1b: FY17

### Engagement

#### Employee Engagement Strategies

- Host working group sessions with employee segments on the topic of engagement to identify the key drivers of employee engagement within SSA, including: effectiveness of leadership, supervisor/staff relationships, and alignment of daily work to agency mission objectives
- Analyze and incorporate feedback into an initial employee engagement measure

#### Employee Feedback Mechanisms

- Develop structure and frequency for polling, collecting, managing, and analyzing SSA employee engagement measurement
- Identify and evaluate feedback mechanisms for consolidation across components based on criteria (e.g., reach and purpose of feedback mechanism)

#### Integrated Employee/Customer Management

- Evaluate points of connection between SSA employees and customers for customer satisfaction and employee incentives and actions (e.g., timing constraints that may force an employee to prioritize immediate task over customer)

### Development

#### Employee Development Plans/Programs

- Conduct an analysis of best practices in both public and private sector organizations to identify examples of competency models used to set skills and role expectations
- Evaluate competency models for the ability to adapt existing competency-based tools initiative into a competency model for SSA roles and align competency model to performance management
- Develop potential career path options for employees across all components

#### Training

- Evaluate enterprise-wide training needs including ability of training to fill knowledge and skill gaps
- Assess current training delivery models for ability to develop core skills (e.g., ability of in-person lecture-style training to develop employee data analysis and modeling skills)

### Empowerment

#### Employee Flexibility

- Use and promote all OPM flexible workplace options
- Determine how flexibility tools can support employees by performing research and interviews (e.g., mobile devices' ability to support field personnel mobility outside of field offices)
- Pilot selected flexibility initiatives based on research, evaluate effectiveness on service delivery quality and employee empowerment, and scale initiatives

#### Recruitment

- Evaluate current recruiting methods, determine barriers to getting the proper talent, and create strategies to resolve
- Identify and establish relationships with potential top recruiting pipeline organizations to expand recruiting efforts

#### Employee Ownership/ Accountability

- Determine successful attributes of IdeaScale and launch an enhanced ideation platform and governance structure for collecting and acting on employee ideas for improvements to the organization
- Identify components and channels where tools exist to support employee decision-making in response to customers and evaluate the usefulness, reach, and ability to expand these tools

# Wave 2 recommended initiatives focus on creating transformation

	Wave 1a FY16	Wave 1b FY17	Wave 2 FY18-22	Wave 3 FY22-25
Engagement	<ul style="list-style-type: none"> <li>Engagement Toolkit</li> <li>Engagement Community of Practice</li> <li>IdeaScale software for employee feedback</li> </ul>	<ul style="list-style-type: none"> <li>Define internal employee engagement measurement and capture method</li> <li>Evaluate and consolidate employee feedback channels</li> <li>Evaluate potential connections between employee engagement and customer satisfaction</li> </ul>	<ul style="list-style-type: none"> <li>Use internal engagement measures to develop engagement strategies</li> <li>Develop process for analyzing and responding to employee feedback</li> <li>Create incentive structures that align employee performance with output and customer satisfaction</li> </ul>	<ul style="list-style-type: none"> <li>Establish real-time analysis and reporting of internal employee engagement measure</li> <li>Link SSA employee management with how they work with partner organizations to meet the needs of customers</li> </ul>

Empowerment	<ul style="list-style-type: none"> <li>Telework analysis and expansion through single device set up</li> <li>Pathways program expansion</li> <li>Interview and hiring resources</li> <li>How am I doing tool</li> </ul>	<ul style="list-style-type: none"> <li>Pilot initiatives that expand flexibility beyond telework</li> <li>Examine current recruitment process, expand and establish additional recruiting partnerships</li> <li>Take an inventory of and evaluate current Customer Response Toolkits that support employee decision-making</li> <li>Evaluate IdeaScale and define strategy for and governance of enhanced ideation platform</li> </ul>	<ul style="list-style-type: none"> <li>Expand successful elements of flexibility programs</li> <li>Evaluate talent pipeline and prioritize relationships with providers of highest performing talent</li> <li>Communicate location of and add tools to Customer Response Toolkits</li> <li>Expand ideation platform to include full-funding model for ideas to improve SSA</li> </ul>	<ul style="list-style-type: none"> <li>Enhance flexible working options that align to changing employee needs</li> <li>Explore alternative recruitment and talent employment models (e.g., short-term skills based)</li> <li>Expand ideation platforms to additional mediums (e.g., mobile) and external partners for input</li> </ul>

# Wave 2 initiatives come from stakeholder\* input and leading practices

Initiative	Why we are recommending initiatives
Use internal engagement measures to develop engagement strategies	<b>External Research:</b> The Department of Veterans Affairs uses the VA All Employee Survey in addition to the Federal Viewpoint Survey to gauge employee engagement and develop strategies for improvement <b>Stakeholder Input:</b> Employees indicated there is a need to focus on employee engagement particularly during times of change and that the Federal Employee Engagement Survey does not accurately reflect engagement
Develop process for analyzing and responding to employee feedback	<b>External Research:</b> Department for Work and Pensions launched a Bright Ideas portal to encourage innovation and improvements, which are reviewed by colleagues and stakeholders
Create incentive structures that align employee performance with output and customer satisfaction	<b>Stakeholder Input:</b> Indicates the need to reward employees for going above and beyond serving customer needs vs. rewarding output
Create personalized development plans to include development programs and guidance on career path options	<b>External Research:</b> BlueCross BlueShield aligned strategic goals, performance reviews, and leadership development with defined competencies <b>Stakeholder Input:</b> Employees feel they are not aware of all career options across the agency
Develop content for and pilot dynamic training delivery models	<b>Stakeholder Input:</b> Employee feedback discussed the need for more engaging training delivery methods to better meet employee needs (e.g., VOD/ online training is not always the most effective for learning new information or processes)
Expand successful components of the talent and skills sharing platform	<b>External Research:</b> NASA has technical knowledge capture and transfer capabilities through the NESC Academy online tool for knowledge-sharing. Department of State implemented Flex Connect that provides employee profiles with skills to match roles <b>Stakeholder Input:</b> Indicated desire for more cross-component training and development rotations
Expand successful elements of flexibility programs	<b>External Research:</b> Federal Highways Administration implemented alternative duty locations to fill national positions at regional hubs. GSA invested in flexibility including, desk sharing, hot desking, open environment, and alternative work schedules. Miami-Dade County equipped case workers with camera-enabled smartphones and laptops to support paperwork completion in the field
Evaluate talent pipeline and prioritize relationships with providers of highest performing talent	<b>External Research:</b> The Federal Bureau of Investigations uses data analytics to identify universities with diverse student bodies and develops partnerships to enhance recruiting effectiveness
Communicate location of and add tools to Customer Response Toolkits	<b>Stakeholder Input:</b> Employees feel there are tools, websites, shortcuts, decision trees, etc. but they are not in a centralized location for easy access and use
Expand ideation platform to include full-funding model for ideas to improve SSA	<b>External Research:</b> The department for Work & Pensions provides funding and pilot support for ideas submitted through the Bright Ideas portal after they are reviewed and selected by colleagues and stakeholders. United States Citizenship and Immigration Service incentivized innovation challenges with low cost rewards (e.g., personal phone calls from Area Directors)

# Detailed descriptions of Wave 2 initiatives

Key: **Strategy**

- Initiative
- Initiative

## Wave 2: FY18-22

### Engagement

#### Employee Engagement Strategies

- Pilot, refine, and scale the internal employee engagement measure that captures key engagement information and distribute to all employees at set timeframes
- Transition from FEVS measure for engagement to the internally developed and refined employee engagement measure

#### Employee Feedback Mechanisms

- Consolidate feedback that is applicable to agency-wide efforts (e.g., feedback on the Vision)
- Create process for analyzing employee feedback to generate and provide insights to relevant stakeholders

#### Integrated Employee/Customer Management

- Align customer and employee engagement efforts so they clearly reinforce one another
- Expand performance measures to capture the impact of employee-focused initiatives on the customer experience

### Development

#### Employee Development Plans/Programs

- Transition competency model from role-based to employee-specific through personalized development plans
- Provide employees with guidance on potential career paths and development program opportunities within personalized development plans
- Consolidate similar employee development programs as they are incorporated into personalized development plans

#### Training

- Develop additional training content based on skill development needs of employees
- Research and pilot various training approaches based on role and desired outcome (e.g., developing customer experience skills may require in person simulation training instead of online)
- Capture and analyze training effectiveness data

#### knowledge-sharing

- Evaluate employee use of the talent and skills sharing platform current initiative (e.g., do employees use it to share best practices, collaborate across components, and better serve customers)
- Expand successful aspects of the talent and skills platform to additional mediums of communication through investing in infrastructure that enables knowledge-sharing across the organization

### Empowerment

#### Employee Flexibility

- Evaluate pilots and expand flexibility efforts across the entire organization with necessary training and process changes (e.g., field offices can establish “pop-up” SSA offices using mobile tech in disadvantaged communities to improve access)

#### Recruitment

- Analyze all talent needs and establish an annual cycle for recruiting from strategic partners that provide the best talent

#### Employee Ownership/ Accountability

- Expand to an enterprise ideation platform and institute enterprise processes to fund and support employee ideas through implementation
- Provide employees with personalized communications for resources available in customer response toolkits that directly apply to the decisions they make
- Add additional decision-support tools to customer response toolkits to expand ownership and accountability for decisions

# Wave 3 initiatives focus on further advancing “one government” strategies

	Wave 1a FY16	Wave 1b FY17	Wave 2 FY18-22	Wave 3 FY22-25
Engagement	<ul style="list-style-type: none"> <li>Engagement Toolkit</li> <li>Engagement Community of Practice</li> <li>IdeaScale software for employee feedback</li> </ul>	<ul style="list-style-type: none"> <li>Define internal employee engagement measurement and capture method</li> <li>Evaluate and consolidate employee feedback channels</li> <li>Evaluate potential connections between employee engagement and customer satisfaction</li> </ul>	<ul style="list-style-type: none"> <li>Use internal engagement measures to develop engagement strategies</li> <li>Develop process for analyzing and responding to employee feedback</li> <li>Create incentive structures that align employee performance with output and customer satisfaction</li> </ul>	<ul style="list-style-type: none"> <li>Establish real-time analysis and reporting of internal employee engagement measure</li> <li>Link SSA employee management with how they work with partner organizations to meet the needs of customers</li> </ul>

Empowerment	<ul style="list-style-type: none"> <li>Telework analysis and expansion through single device set up</li> <li>Pathways program expansion</li> <li>Interview and hiring resources</li> <li>How am I doing tool</li> </ul>	<ul style="list-style-type: none"> <li>Pilot initiatives that expand flexibility beyond telework</li> <li>Examine current recruitment process, expand and establish additional recruiting partnerships</li> <li>Take an inventory of and evaluate current Customer Response Toolkits that support employee decision-making</li> <li>Evaluate IdeaScale and define strategy for and governance of enhanced ideation platform</li> </ul>	<ul style="list-style-type: none"> <li>Expand successful elements of flexibility programs</li> <li>Evaluate talent pipeline and prioritize relationships with providers of highest performing talent</li> <li>Communicate location of and add tools to Customer Response Toolkits</li> <li>Expand ideation platform to include full-funding model for ideas to improve SSA</li> </ul>	<ul style="list-style-type: none"> <li>Enhance flexible working options that align to changing employee needs</li> <li>Explore alternative recruitment and talent employment models (e.g., short-term skills based)</li> <li>Expand ideation platforms to additional mediums (e.g., mobile) and external partners for input</li> </ul>

# Wave 3 initiatives come from stakeholder\* input, leading practices, and additional Deloitte recommendations

Initiative	Why we are recommending initiatives
Establish real-time analysis and reporting of internal employee engagement measure	<b>Deloitte Recommendation:</b> As data analytics are used more within the organization, monitoring and evaluating employee engagement in real-time can provide leadership with the information and insights needed to adjust employee engagement strategies more frequently and create the ability to track the impact of actions taken
Link SSA employee management with how they work with partner organizations to meet the needs of customers	<b>Deloitte Recommendation:</b> As the link between employee engagement and customer satisfaction is better understood and partner organizations have more interaction with SSA, expanding employee management to include partner interactions can strengthen those partnerships
Explore expansions and improvements to external developmental programs and rotations	<b>Stakeholder Input:</b> Employee feedback reports interest around participating in external developmental programs or rotations to build their knowledge, skills, and professional experience
Dynamically adjust training delivery models and methods to develop priority skillsets	<b>Deloitte Recommendation:</b> As training delivery models continue to advance, exploring the best methods to train employees for key skills can ensure maximum knowledge retention
Expand knowledge-sharing infrastructure to external partners	<b>Deloitte Recommendation:</b> As SSA continues to exchange data and share talent and customers with partner organizations, a platform with increased capability for knowledge-sharing across partners can continue to advance employee knowledge and skills
Enhance flexible working options that align to changing employee needs	<b>External Research:</b> GSA continues to explore flexible working options to meet employee needs through a core belief that “Work is what we do, not where we are”
Explore alternative recruitment and talent employment models (e.g., short-term skills based)	<b>Deloitte Recommendation:</b> As workforce demographics and external trends continue to change, SSA’s workforce will need to be adaptive and agile, which may require SSA to explore different models for talent and recruitment
Expand ideation platforms to additional mediums (e.g., mobile) and external partners for input	<b>Deloitte Recommendation:</b> As technology continues to advance and the way people interact with it change, platforms for knowledge-sharing should reach employees and partner organizations through mediums that are user-friendly and convenient

# Detailed descriptions of Wave 3 initiatives

Key: **Strategy**

- Initiative
- Initiative

## Wave 3: FY22-25

### Engagement

#### Employee Engagement Strategies

- Analyze and track the employee engagement measure across all employees segments to continuously inform employee engagement strategies and align with changing needs and trends

#### Employee Feedback Mechanisms

- Determine which aspects of the employee engagement measure is most beneficial and begin capturing and reporting in real-time

#### Integrated Employee/Customer Management

- Determine SSA employee roles that have consistent interactions with partner organizations
- Create incentive structure for SSA employees to effectively work with partner organization to meet customer needs

### Development

#### Employee Development Plans/Programs

- Support staff in professional and personal learning
- Expand opportunities for external development programs and rotations with strategic partners (e.g., a six-month externship with an outreach organization)

#### Training

- Determine complex on-the-job scenarios where employees frequently encounter problems/roadblocks
- Develop immersive simulation training for these employees to help them better navigate these environments (e.g., employee training takes place in a virtual reality environment where employees interact with customer avatars to meet their changing and evolving needs)

#### knowledge-sharing

- Determine key expertise areas where partner organizations can share knowledge and develop employees
- Establish infrastructure for facilitating knowledge exchange across SSA and partners

### Empowerment

#### Employee Flexibility

- Shift flexibility options as technology advances continue and employee needs change
- Continually assess organizational structure in ability to facilitate employee flexibility

#### Recruitment

- Research trends in alternative recruitment and hiring models and determine feasibility and fit for SSA (e.g., short-term contracts for a specific skill)
- Pilot and scale feasible alternative models that fit talent needs

#### Employee Ownership/ Accountability

- Determine barriers to participation in the ideation platform and expand reach through exploring additional medium (e.g., mobile application or mobile messaging)

# These waves combined create the Vision Roadmap for exceptional employees

	Wave 1a FY16	Wave 1b FY17	Wave 2 FY18-22	Wave 3 FY22-25
Engagement	<ul style="list-style-type: none"> <li>Engagement Toolkit</li> <li>Engagement Community of Practice</li> <li>IdeaScale software for employee feedback</li> </ul>	<ul style="list-style-type: none"> <li>Define internal employee engagement measurement and capture method</li> <li>Evaluate and consolidate employee feedback channels</li> <li>Evaluate potential connections between employee engagement and customer satisfaction</li> </ul>	<ul style="list-style-type: none"> <li>Use internal engagement measures to develop engagement strategies</li> <li>Develop process for analyzing and responding to employee feedback</li> <li>Create incentive structures that align employee performance with output and customer satisfaction</li> </ul>	<ul style="list-style-type: none"> <li>Establish real-time analysis and reporting of internal employee engagement measure</li> <li>Link SSA employee management with how they work with partner organizations to meet the needs of customers</li> </ul>

## Innovative Organization

In 2025, we are recognized by the public and across government for our agility and effectiveness in fulfilling our mission. We meet the changing needs of our customers and keep pace with the transitions they experience in their lives.

# SSA set bold objectives for creating innovation throughout the organization

## Innovative Organization:

*SSA is an adaptive organization that embraces changes to meet the future needs of its customers and employees*

### Vision Objectives

#### Continuous Improvement

SSA has established feedback and improvement mechanisms that are driven by data-sharing and inform advancement of SSA's processes, policies, and programs.

**By 2025...** SSA actively uses data analysis to evaluate internal processes, identifies key parts of the processes that cause backlogs and extended wait-times, implements pilots, and scales successful pilots to significantly reduce the time spent on processes.

#### Adaptive Culture

SSA has an organizational structure and leadership team that recognizes, adapts, and develops change in innovative and impactful ways.

**By 2025...** SSA employees see the transformational ideas they submit for change evaluated and acted upon, receive communications on progress of change initiatives across SSA, and feel innovation is important to leadership and fostered throughout the organization.

#### Customer-Centric Infrastructure

SSA has modernized, secure, and flexible IT and physical infrastructures that are driven by customer need and aim to meet or exceed customer expectations.

**By 2025...** A customer walks into a field office, is welcomed, and easily knows where to go in the office. The customer inquires about a pending case and the field office employee is able to quickly address the question by using a one view capability and is also able to inform the customer of additional relevant information.

# We developed strategies and quantifiable outcomes\* based on objectives

## Innovative Organization:

*SSA is an adaptive organization that embraces changes to meet the future needs of its customers and employees*

**Overall Measure: An organizational efficiency index\*\***

### Vision Strategies:

#### Continuous Improvement

- **Process Efficiency:** Identifies and streamlines inefficiencies in processes to reduce the time to complete transactions and serve customer needs
- **Improper Payments/Fraud Prevention:** Reduces and prevents payments made in error and fraudulent activities
- **Data Exchange:** Shares data with external organizations to create efficiencies and better outcomes for customers
- **Data Analytics:** Develops a comprehensive understanding of data across processes and services to gain insights into operations and to inform decision-making

**Outcome:** SSA has the ability to digitally exchange data with all appropriate federal and state agencies

**Outcome:** All SSA improper payments caused by internal errors are eliminated

**Outcome:** All internal processes have been evaluated and streamlined

**Outcome:** All agency decisions are supported and backed up by data

#### Adaptive Culture

- **Change Culture:** Promotes change and encourages employees to create innovative ways to meet customer needs
- **Executive Accountability:** Establishes organizational structures to create visibility and hold leadership accountable to achieving change across the agency

**Outcome:** All employees feel SSA leaders support a culture that rewards risk and innovation

#### Customer-Centric Infrastructure

- **Technology Modernization:** Updates systems and architecture to better engage SSA employees and position them to serve changing customer behaviors and needs
- **Cyber Security:** Maintains security of customer and employee data through secure technology infrastructure that proactively mitigates threats
- **Physical Infrastructure:** Designs physical locations to support employees in meeting customer needs and creating a superior customer experience

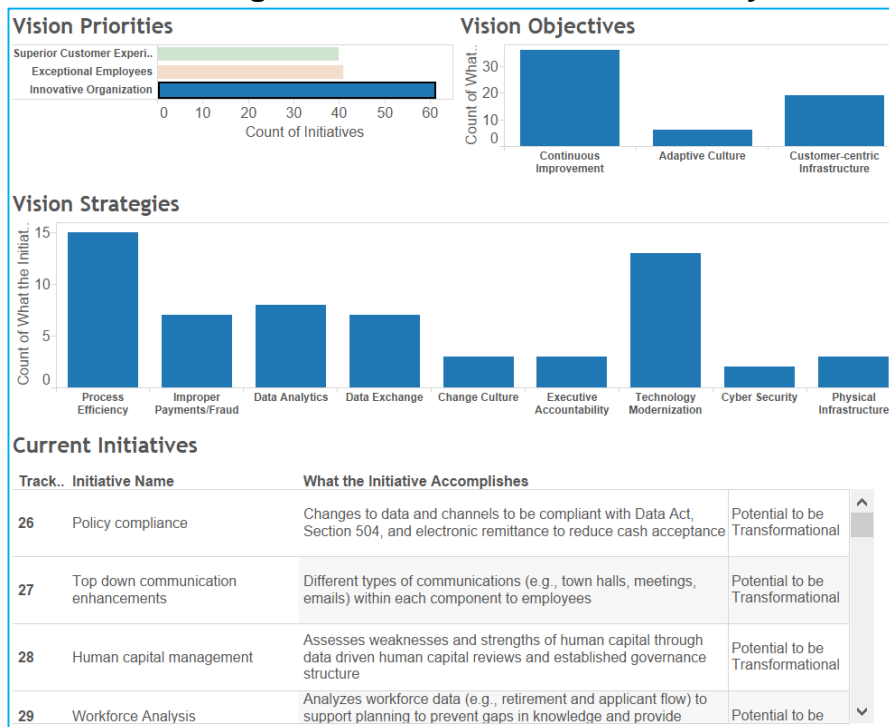

**Outcome:** SSA has one-view of customer data across the agency

**Outcome:** SSA's cyber security capabilities are in line with leading industry practices (e.g., use of maturity model)

**Outcome:** SSA field offices are designed and operate based on customer needs

# Many current initiatives support these outcomes

## Innovative Organization Current Initiative Analysis

We developed an interactive dashboard that allows users to see the alignment of current initiatives to the Vision.

### Continuous Improvement current initiatives will...

- Create **process efficiencies in specific services and internal processes** (e.g., automation in disability reviews)
- Work to **address reasons for errors** in payments and create **methods for locating and addressing fraud** (e.g., Anti-fraud office)
- **Establish data-sharing partnerships** with state governments, other federal agencies, and financial institutions (e.g., financial data exchange)
- Focus data analytics efforts on **aspects of workforce** (e.g., workload, retirements and applicant trends) and **use predictive analytics** in disability case processing and fraud prevention

### Adaptive Culture current initiatives will...

- Provide transparency and oversight for **IT investments and policy mandates** (e.g., Strategic IT Assessment and Review Board)
- **Improve communications** from leadership to employees around changes (e.g., top-down communications methods like town halls)

### Customer-Centric Infrastructure current initiatives will...

- Begin to **modernize outdated technology** and **consolidate systems for disability processing** (e.g., modernization to support paperless processing)
- **Create access controls** for all online services and employee information access (e.g., information security program)
- **Change physical footprints while establishing new spaces** (e.g., ODAR office expansion)

# Gaps remain in realizing these outcomes

## Overarching Innovative Organization Gap: Customer-centric technology modernization

### Continuous Improvement

**Outcome:** SSA has the ability to digitally exchange data with all appropriate federal and state agencies

**Outcome:** All SSA improper payments caused by internal errors are eliminated

**Outcome:** All internal processes have been evaluated and streamlined

**Outcome:** All agency decisions are supported and backed up by data

#### Gaps:

- SSA **lacks a mature continuous process improvement mechanism** and culture
- SSA's data exchanges are **limited in sharing capabilities and data quality**
- SSA **is not fully employing an analytics-driven approach to analyze internal processes**
- SSA does not proactively identify and **prevent all root causes of non-fraudulent improper payments**

### Adaptive Culture

**Outcome:** All employees feel SSA leaders support a culture that rewards risk and innovation

#### Gaps:

- SSA **has not fully built a culture of transformational leadership** to lead cultural change initiatives that create a safe environment for risks and innovation
- SSA's **employees feel they lack direct involvement in developing solutions** that lead to organizational change
- SSA has **not fully aligned executive accountability measures with transformation**

### Customer-Centric Infrastructure

**Outcome:** SSA has one-view of customer data across the agency

**Outcome:** SSA's cyber security capabilities are in line with leading industry practices (e.g., use of maturity model)

**Outcome:** SSA field offices are designed and operate based on customer needs

#### Gaps:

- SSA's technology **lacks a agile and streamlined system architecture**
- SSA's technology investments are **not always driven by customer need**
- SSA **does not consistently use customer insights to drive strategies for physical infrastructure design and investment**
- SSA's cybersecurity needs to continually **adapt to the changing cybersecurity environment**

# We subjectively determined the scale of these gaps

Subjective measurement of the gaps are provided below based on Vision objective outcomes and current initiatives qualitative outcomes. Adaptive culture is further along the continuum as SSA has published a transformational vision and recognized the importance of transformational leadership.

## Scoring Criteria

3: Significant progress towards achieving objective; minimal gaps remain

2: Progress towards achieving objective; gaps remain

1: Minimal progress towards achieving objective; significant gaps remain

## Innovative Organization

Average Score:

## Continuous Improvement

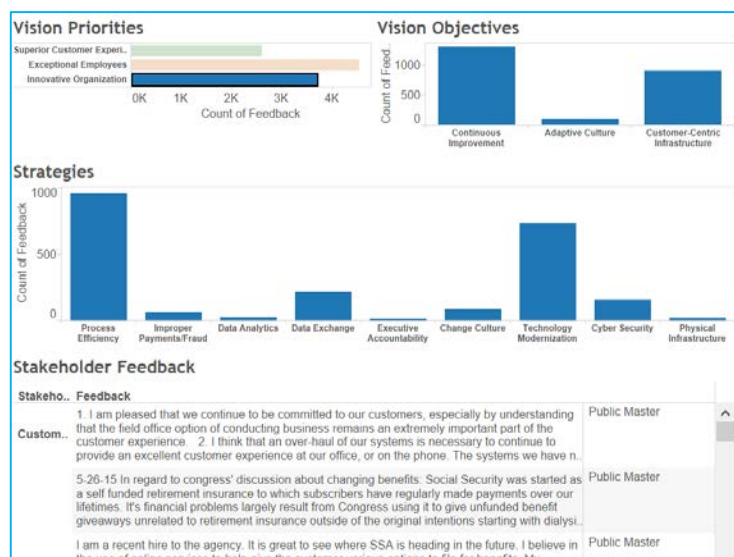

## Adaptive Culture

## Customer-Centric Infrastructure

# SSA stakeholders\* provided input that help fill existing gaps

We developed an interactive dashboard that allows users to see stakeholder input aligned to the Vision

## Continuous Improvement

- **Increase data-sharing across state and federal agencies** and hospitals to improve the customer experience (e.g., integrate medical records and State DDS files)
- **Increase accuracy** of reporting systems to maintain accurate records and **increase use of data analytics to drive decision-making**
- **Update rules and regulations** for programs in coordination with any process and technology improvements in order to make adjudication or determinations simpler (e.g., reduce the number of exceptions to policy and program requirements)
- **Find opportunities to streamline processes** (e.g., incorporate automated decision-making tools for program determinations)

## Adaptive Culture

- **Provide greater support to employees to try new ideas or innovate** in an environment where it's ok to fail (e.g., currently employees feel there is little "air cover" from management/ leadership due to the focus on daily output)
- **Encourage employees to think of ways to continuously improve** (e.g., communicate how employee feedback led to improvements across the agency)
- **Utilize more well-designed pilots** when rolling out new process and/ or technology changes
- **Minimize the stratification across levels** of the agency (e.g., eliminate positional barriers enforcing "command and control" hierarchy)

## Customer-Centric Infrastructure

- **Build one view of the customer** to share and streamline information across components and other agencies through integrated back-end systems
- **Increase stability and reliability of technology systems for both customers and employees** (e.g., constant patches and repairs of legacy systems results in new changes being rolled out frequently, making things more complicated and causing system outages)
- **Enhance cybersecurity methods and strategies** to promote confidence in customers and employees in using online services

# We also used leading practices from external research

**Integrate continuous improvement** across the organization (e.g., Environmental Protection Agency uses Lean and Six Sigma methods across headquarters, regional offices, and state environmental agencies)

**Unify databases** to improve process efficiencies, data quality, and analysis capabilities (e.g., a large financial institution overhauled database structure and implemented a new reporting application to use newly unified databases)

**Use analytics tools to support decision-making** and drive improvements (e.g., Department of Veterans Affairs' weekly analytic tool that predicts likelihood of patient hospitalization)

**Assess risk across the organization** by monitoring threats and vulnerabilities and instituting issue resolution structure (e.g., Department of State's automated and dynamic scorecard that constantly assesses risk across the organization)

**Create accountability for transformation** for executives and leaders across the organization (e.g., Department of Veteran Affairs transformational leadership strategies)

**Exchange data to support fulfilling mission outcomes** (e.g., USAID's data exchange with other agencies to predict famine across the world)

# Current initiatives, stakeholder\* input, and leading practices create the Vision Roadmap for becoming an innovative organization

# Detailed descriptions of Wave 1a initiatives currently underway

## Key: Strategy

- Initiative
- Initiative

## Wave 1a: FY16

### Continuous Improvement

#### Process Efficiency

- Continuous quality improvement reviews - Compiles recommendations for improvement and then plans, evaluates, and implements outcome-based process and automation improvements across service delivery components

#### Improper Payments/Fraud Prevention

- Anti-fraud infrastructure - Stands up anti-fraud program, office, and committee

#### Data Analytics

- Critical Eight: Accelerate use of data-driven decision-making - Uses collected data to identify patterns and improve customer service and investigates new ways data can be leveraged to anticipate customer and agency needs
- Workforce analytics - Analyzes workforce data (e.g., retirement and applicant flow) to support planning, prevent gaps in knowledge, and provide updates to diversity and inclusion councils
- Predictive modeling in continuing disability reviews and redeterminations - Identifies Social Security disability beneficiaries whose earnings put them at risk of receiving overpayments and prioritizes cases that have a high likelihood of error

#### Data Exchange

- Data exchange Community of Practice - Collaborates on data exchange activities, shares best practices, finds common solutions to data exchange challenges, and builds a network of federal data exchange partners
- Public-private Center of Excellence - Meets with private, state, and Federal stakeholders to identify ways to streamline health and human services by approaching data as a strategic resource, identifying needs, and leveraging technology to share data
- Virtual lifetime electronic record - Automates access to medical records across DoD, VA, and SSA for Veterans and service members

#### Change Culture

- top-down communication enhancements - Provides different types of communications (e.g., town halls, meetings, emails) within each component to employees
- Human capital management - Assesses weaknesses and strengths of human capital through data-driven human capital reviews and established governance structure
- Virtual hallway - Connects employees across offices virtually using technology

#### Executive Accountability

- Critical Eight: Establish the enterprise program management office - Improves oversight and transparency to develop and deploy projects on time, within budget, and with quality results
- Policy compliance - Changes to data and channels to be compliant with mandates
- Strategic IT Investment Process - Provides governance and oversight of IT investments

#### Technology Modernization

- Transform the IT Investment Process – Streamlines the IT investment process to be responsive to customer needs
- Disability case processing system - Replaces 54 systems to provide common functionality and consistent support to each disability determination system (DDS)
- Medicare database enhancements - Structures the Medicare databases to enhance internal and external processing of cases

#### Cyber Security

- Authentication - Ensures the privacy and security of personal information but currently does not support all online services

#### Physical Infrastructure

- Footprint reduction - Reduces physical space and creates shared spaces (e.g., consolidated field and hearing offices)

### Adaptive Culture

### Customer-Centric Infrastructure

# Recommendations for maximizing impact of some current initiatives

The recommendations below are based on insights gained during interviews with component representatives.

Current Initiative	Recommendations to maximize impact...
Critical Eight: Accelerate use of data-driven decision-making	Document lessons learned from data-driven decision-making pilots and expansions
Predictive modeling in continuing disability reviews and redeterminations	Document lessons learned and software used to create predictive modeling capabilities
Anti-fraud infrastructure	Use customer analytics and fraud analytics to inform strategies for physical location expansion efforts (e.g., 6 offices instead of 9 offices are currently controlled by budget instead of strategy)
Virtual lifetime electronic record	Increase number of target electronic record
top-down communication enhancements	Coordinate across components to ensure consistent messaging and tone to support culture initiatives and leadership messaging
Human capital management	Determine if human capital review is flexible and adaptive to include changes to performance measures of employees and if HRStat results are used to make decisions and communicate results across components
Virtual hallway	Document lessons learned from virtual pilots and connectivity between offices
Strategic IT Investment Process	Ensure IT investments are evaluated based on ability to integrate and facilitate superior customer experience and ease of service delivery
Critical Eight: Transform IT investment process	Ensure strategic criteria used to evaluate IT investments includes customer-centric measures
Disability case processing system	Document lessons learned from integration efforts

# Wave 1b focuses on recommended initiatives that further build the foundation for transformation

	Wave 1a FY16	Wave 1b FY17	Wave 2 FY18-22	Wave 3 FY22-25
Continuous Improvement	<ul style="list-style-type: none"> <li>Critical Eight: Accelerate use of data-driven decision-making</li> <li>Data exchange CoP</li> <li>Public-private CoE</li> <li>Workforce analytics</li> <li>Predictive modeling in continuing disability reviews and redeterminations</li> <li>Continuous quality improvement reviews</li> <li>Anti-fraud infrastructure</li> </ul>	<ul style="list-style-type: none"> <li>Assess continuous quality review initiative and develop expansion strategy to process improvements</li> <li>Determine reach of current data exchanges and capabilities of CoP and CoE</li> <li>Evaluate additional internal processes that can benefit from analytics for decisions</li> <li>Establish processes to address improper payment root causes</li> </ul>	<ul style="list-style-type: none"> <li>Formalize capture of and action on process improvement</li> <li>Explore more rigorous forms of creating process efficiencies</li> <li>Identify and address barriers to scaling data exchanges</li> <li>Integrate real-time data analytics capabilities and visualization across all relevant internal processes</li> <li>Use understanding of root causes to reduce OASDI** overpayment to the target level</li> </ul>	<ul style="list-style-type: none"> <li>Expand evaluation and creation of process efficiencies to strategic partner organizations</li> <li>Explore shared view of the customer across government agencies through seamlessly integrated data across all agency partners</li> <li>Identify latest data analytic capabilities and integrate into internal and customer-facing processes</li> </ul>

# Wave 1b recommended initiatives come from stakeholder\* input and leading practices

Initiative	Why we are recommending initiatives
Assess continuous quality review initiative and develop expansion strategy to process improvements	<b>External Research:</b> The Environmental Protection Agency integrated continuous improvement across headquarters, regional offices, and state environmental agencies to make process and quality improvements
Determine reach of current data exchanges and capabilities of CoP and CoE	<b>External Research:</b> USAID improved its ability to predict when and where famines could occur across the world using inter-agency data exchange and analysis agreements between USGS, NASA, and NOAA <b>Stakeholder Input:</b> Indicates the desire to increase internal and external data-sharing collaboration
Evaluate additional internal processes that can benefit from analytics for decisions	<b>External Research:</b> The Department of Veterans Affairs expanded analytics to create a Care Assessment Needs score that predicts the likelihood of hospitalization or death within 90 days to a year to proactively identify high-risk patients and provide targeted interventions before hospitalizations
Establish processes to address improper payment root causes	<b>External Research:</b> United States Department of Labor has fought rising improper payments by defining seven strategies for reducing improper payments, sharing best practices across the organization, and determining root causes at the organization and state level. United States Department of Agriculture targeted aspects of improper payments to reduce through a study to track improper payments, redesigned review processes, and designed a prototype with OPM
Expand current methods for communicating change initiatives and engaging employees	<b>External Research:</b> The Department of Veterans Affairs made leaders accountable for employee engagement and also communicated progress of changes and improvements to all levels of the organization by using a communications cascade to push messaging through managers to front line staff <b>Stakeholder Input:</b> Employees want to know how their feedback leads to process and technology improvements
Develop communications and incentives structure for promoting employee use of the ideation platform for innovative ideas	<b>External Research:</b> The United States Customs and Immigration Services incentivized staff with creative, low-cost rewards (e.g., Area Directors would personally call and thank an outstanding employee) for participating in change initiatives

# Wave 1b recommended initiatives come from stakeholder\* input and leading practices

Initiative	Why we are recommending initiatives
Identify transformational leaders throughout SSA	<b>External Research:</b> The Department of Veterans Affairs made leaders accountable for employee engagement, engaged leaders as teachers to demonstrate the behaviors needed to move the organization toward the desired future state, focused on leader performance and building a leader performance scorecard to hold executives accountable for the change, and equipped leadership with an Employee Engagement Playbook to support their ability to meet performance goals
Assess IT infrastructure for modernization, consolidation, and integration points across all systems	<b>External Research:</b> A large financial institution with disparate databases and poor data quality revised and unified the standards for encoding financial data and overhauled their database structure. The United States Department of Health and Human Services determined they could integrate network security systems to create a single clearinghouse that improved security capabilities <b>Stakeholder Input:</b> Indicates the need for increased system stability and reliability
Expand multifactor identification across all customer online accounts	<b>Stakeholder Input:</b> Current initiatives interview with Operations revealed that multi-factor identification will continue to be rolled out across online accounts to enhance security of customer data
Establish a link between customer insights and technology and physical infrastructure	<b>External Research:</b> USAA uses it's consolidated customer experience structure to inform organizational decisions to reinforce customer-centricity including, evaluation of technology investments based on customer impact

# Detailed descriptions of Wave 1b initiatives

**Key: Strategy**

- Initiative
- Initiative

**Wave 1b: FY17**
**Continuous  
Improvement**
**Process Efficiency**

- Determine capabilities and reach of the continuous quality review initiative and assess ability to scale to a process improvement tool
- Set infrastructure for collecting, managing, and implementing process improvement ideas

**Improper Payments/Fraud Prevention**

- Assess the thoroughness of current improper payment prevention to develop an understanding of internal capability gaps
- Expand understanding of root causes of improper payments categorized by OMB\* to include additional organizational details that are able to be analyzed to determine solutions to improper payments

**Data Analytics**

- Assess level of data analytics capabilities and use across the organization (e.g., predictive analytics in disability cases, ACE)
- Identify areas where increased understanding of data will support workload management, understanding of customers, and management of internal processes (e.g., real-time wait-times for offices available online, visualization of budget, finance, and quality data to identify trends, geospatial analytics for field office to anticipate changes in customer base)

**Data Exchange**

- Assess current organizational data-sharing capabilities, including, alignment of data exchanges to fulfilling a specific organizational need, ability of technology to make accurate and seamless exchanges, and governance structure for managing exchanges
- Identify existing and new data exchanges that have potential to increase payment accuracy and customer experience (e.g., financial institution and prison data exchanges)

**Adaptive  
Culture**
**Change Culture**

- Expand communications from component agency-wide focus for change initiatives (e.g., communications reach the field and all components in a manner that supports unified change)
- Investigate structures for engaging employees in implementation of change initiatives and develop engagement plan
- Communicate ideation platform's purpose, capabilities, and value to all employees and provide incentives for its use

**Executive Accountability**

- Identify and gain support from leaders that creates a safe environment for employees to innovate, take risks, and support ambition
- Increase transparency through communications of SSA's objectives, goals, and progress measures

**Technology Modernization**

- Review all systems for high maintenance costs, redundancies, inability to integrate with other systems, and missing capabilities that if updated, would support customer-centric view of information, agency-wide data analysis, and improved efficiencies\*\*
- Develop strategy for large scale technology modernization across the agency that supports customer-centricity

**Cyber Security**

- Inventory all privileged and unprivileged IT access across the enterprise for all systems
- Deploy alternate systems and honeypots to learn latest tactics threatening SSA's infrastructure
- Provide secure interfaces to communicate data and processes for health and citizen information exchanges
- Secure PII/SSN by deploying multi-factor identification across all online channels (e.g., text/email sent in addition to password entry)

**Physical Infrastructure**

- Establish Link between physical infrastructure changes and targeted strategies from customer data (e.g., a field office gains video capabilities based on consolidated customer data analytics that indicated it would improve customer experience in that area)

# Wave 2 initiatives focus on creating transformation

	Wave 1a FY16	Wave 1b FY17	Wave 2 FY18-22	Wave 3 FY22-25
Continuous Improvement	<ul style="list-style-type: none"> <li>Critical Eight: Accelerate use of data-driven decision-making</li> <li>Data exchange CoP</li> <li>Public-private CoE</li> <li>Workforce analytics</li> <li>Predictive modeling in continuing disability reviews and redeterminations</li> <li>Continuous quality improvement reviews</li> <li>Anti-fraud infrastructure</li> </ul>	<ul style="list-style-type: none"> <li>Assess continuous quality review initiative and develop expansion strategy to process improvements</li> <li>Determine reach of current data exchanges and capabilities of CoP and CoE</li> <li>Evaluate additional internal processes that can benefit from analytics for decisions</li> <li>Establish processes to address improper payment root causes</li> </ul>	<ul style="list-style-type: none"> <li>Formalize capture of and action on process improvement</li> <li>Explore more rigorous forms of creating process efficiencies</li> <li>Identify and address barriers to scaling data exchanges</li> <li>Integrate real-time data analytics capabilities and visualization across all relevant internal processes</li> <li>Use understanding of root causes to reduce OASDI** overpayment to the target level</li> </ul>	<ul style="list-style-type: none"> <li>Expand evaluation and creation of process efficiencies to strategic partner organizations</li> <li>Explore shared view of the customer across government agencies through seamlessly integrated data across all agency partners</li> <li>Identify latest data analytic capabilities and integrate into internal and customer-facing processes</li> </ul>
Adaptive Culture	<ul style="list-style-type: none"> <li>Critical Eight: Establish the enterprise program management office</li> <li>Policy compliance</li> <li>top-down communication enhancements</li> <li>Human capital management</li> <li>Virtual hallway</li> <li>Strategic IT Assessment and Review Board (SITAR)</li> </ul>	<ul style="list-style-type: none"> <li>Expand current methods for communicating change initiatives and engaging employees</li> <li>Develop communications and incentives structure for promoting employee use of the ideation platform for innovative ideas</li> <li>Identify transformational leaders throughout SSA</li> </ul>	<ul style="list-style-type: none"> <li>Promote employees engagement through involvement in working groups</li> <li>Reinforce leadership messaging of support for innovative ideas and provide implementation successes</li> <li>Reward knowledge-sharing and collaboration through performance management and rewards programs</li> </ul>	<ul style="list-style-type: none"> <li>Explore new mediums for communicating with and engaging employees in change initiatives</li> <li>Integrate transformation leaders across strategic partners in SSA culture changes</li> <li>Reflect culture of continuous development and learning in personal development plans</li> </ul>
Customer-Centric Infrastructure	<ul style="list-style-type: none"> <li>Critical Eight: Transform IT investment process</li> <li>Disability case processing system</li> <li>Medicare database enhancements</li> <li>Authentication</li> <li>Footprint reduction</li> </ul>	<ul style="list-style-type: none"> <li>Assess IT infrastructure for modernization, consolidation, and integration points across all systems</li> <li>Expand multifactor identification across all customer online accounts</li> <li>Establish a link between customer insights and technology and physical infrastructure</li> </ul>	<ul style="list-style-type: none"> <li>Research, test, and invest in technology that replaces outdated IT infrastructure and enables one view of customers</li> <li>Expand multifactor identification across all service channels</li> <li>Pilot and implement changes to office layouts and self-help spaces to improve customer experiences</li> </ul>	<ul style="list-style-type: none"> <li>Explore technology investments that jump the technology modernization gap with strategic partners*</li> <li>Implement adaptive smart software to elude cyber attacks</li> <li>Explore adaptations to physical infrastructure that further support partnerships between agencies</li> </ul>

# Wave 2 initiatives come from stakeholder\* input, and leading practices

Initiative	Why we are recommending initiatives
Formalize capture of and action on process improvement	<b>External Research:</b> The Environmental Protection Agency uses formal process improvement strategies (e.g., Lean Six Sigma) to evaluate and implement continuous improvement efforts
Explore more rigorous forms of creating process efficiencies	<b>External Research:</b> The Environmental Protection Agency integrates continuous improvement across headquarters, regional offices, and state environmental agencies to make process and quality improvements and uses formal process improvement strategies to evaluate and implement continuous improvement efforts including Lean Six Sigma
Identify and address barriers to scaling data exchanges	<b>External Research:</b> USAID improved its ability to predict when and where famines could occur across the world using inter-agency data exchanges and overcoming data and expertise barriers <b>Stakeholder Input:</b> Reported need to continue growing data-sharing capabilities with federal and private organizations
Integrate real-time data analytics capabilities and visualization across all relevant internal processes	<b>External Research:</b> A large financial institution unified the standards for encoding financial data and overhauled their database structure to unify databases, which enabled creation of new reports and dashboards to visualize data and support data-driven decisions <b>Stakeholder Input:</b> Indicates the desire to increase use of data analytics to drive decision-making across the agency
Use understanding of root causes to reduce OASDI** overpayment to the target level	<b>External Research:</b> United States Department of Labor has fought rising improper payments by defining seven strategies for reducing improper payments, sharing best practices across the organization, and determining root causes at the organization and state level
Promote employees engagement through involvement in working groups	<b>External Research:</b> The United States Customs and Immigration Services created outlets for employees to participate in and create changes including innovation challenges <b>Stakeholder Input:</b> Employees want the opportunity to be directly involved in transformation

78 \* Stakeholders include: employees, customers, and external constituents (e.g., advocacy and congressional groups)

\*\* <https://www.ssa.gov/finance/2015/Improper%20Payments.pdf>

Case studies can be found in Appendix B: External research (includes further details and descriptions of impacts)

## Wave 2 initiatives come from stakeholder\* input, and leading practices

Initiative	Why we are recommending initiatives
Reinforce leadership messaging of support for innovative ideas and provide implementation successes	<b>External Research:</b> The Department of Veterans Affairs made leaders accountable for employee engagement, engaged leaders as teachers to demonstrate the behaviors needed to move the organization toward the desired future state, focused on leader performance and building a leader performance scorecard to hold executives accountable for the change, and equipped leadership with an Employee Engagement Playbook to support their ability to meet performance goals
Reward knowledge-sharing and collaboration through performance management and rewards programs	<b>External Research:</b> The United States Customs and Immigration Services incentivized staff with creative, low-cost rewards (e.g., Area Directors would personally call and thank an outstanding employee) for participating in change initiatives
Research, test, and invest in technology that replaces outdated IT infrastructure and enables one view of customers	<b>External Research:</b> The Australian government's Centrelink integrated its systems with citizen's electronic medical files through the national eHealth system to create common views of the customer, which has helped Australia have one of the quickest disability claims processing times in the world despite one of the highest disability rates among comparable countries <b>Stakeholder Input:</b> Employees shared the need to streamline information to build a centralized customer view
Expand multifactor identification across all service channels	<b>External Research:</b> Intel launched a pilot to assess its cybersecurity maturity with the National Institute of Standards and Technology's (NIST) Cyber Security framework to create a unified understanding of its cybersecurity capabilities and gaps, which informed the creation of new tools and dashboards to manage cybersecurity
Pilot and implement changes to office layouts and self-help spaces to improve customer experiences	<b>External Research:</b> Las Vegas Department of Motor Vehicles piloted and expanded channels to online and self service options based on understanding of customer needs. <b>Stakeholder Input:</b> Employees reported issues with current self-help kiosks in field offices

# Detailed descriptions of Wave 2 initiatives

**Key: Strategy**

- Initiative
- Initiative

## Wave 2: FY18-22

### Continuous Improvement

#### Process Efficiency

- Refine capture of process improvement ideas into formal structure that includes agency-wide support for improvements, set frequency for reporting on progress of improvements, and rewards structure for working on improvements
- Explore implementing lean six-sigma methodology into internal processes to improve efficiency (e.g., conduct value streaming of internal reporting activities that do not relate to mandates)

#### Improper Payments/Fraud Prevention

- Pilot and scale initiatives focused on reducing old age, survivor, and disability insurance (OASDI) overpayment (e.g., investing in data analytics software to gain visibility into customers at a higher risk of receiving overpayments)

#### Data Analytics

- Expand data analytics to all internal processes that handle organizational, customer, and/or employee data
- Advance capabilities of existing data analysis to real-time where information is most time pressing, to visual where trends in are more important than the numbers themselves, and to automate reporting where consistent manual reporting exists

#### Data Exchange

- Identify and implement agency-wide changes to improve scalability of data exchanges and use, including:
  - Integrate/combine related database exchanges and provide access to all information (based on access rights) through a single unified enterprise database and analytics platform
  - Develop a standard data naming and metadata convention for entire agency and data exchanges

### Adaptive Culture

#### Change Culture

- Engage employees interested in organizational culture changes through working groups led by transformational leaders
- Increase employee ownership of culture changes through development of measures to define and report on success of changes
- Create incentives for establishing a collaborative environment within components and for use of cross-component knowledge-sharing tools

#### Executive Accountability

- Send communications to employees showcasing leadership buy-in to ideation platforms and the impact of employees whose ideas were funded through to implementation

### Customer-Centric Infrastructure

#### Technology Modernization

- Submit well-researched ideas based on the technology strategy that facilitate large-scale modernization of systems to the IT investment process to improve customer centricity
- Test and build the infrastructure that supports “one view” of the customer through streamlined data sources and a central management (CRM) system that provides customer profile, case history, and other necessary information

#### Cyber Security

- Explore mobile multifactor identification of customers across all service channels (e.g., biometric capabilities)
- Pilot citizen-driven, opt-in services designed to securely validate information internally and externally on demand
- Implement government leading processes enforcing least-privileged access, account monitoring, and account management

#### Physical Infrastructure

- Use information gathered from consolidated customer experience data to inform pilots of changes to office layouts, self-help spaces, and office locations to improve customer experience

# Wave 3 initiatives focus on further advancing “one government” strategies

	Wave 1a FY16	Wave 1b FY17	Wave 2 FY18-22	Wave 3 FY22-25
Continuous Improvement	<ul style="list-style-type: none"> <li>▪ Critical Eight: Accelerate use of data-driven decision-making</li> <li>▪ Data exchange CoP</li> <li>▪ Public-private CoE</li> <li>▪ Workforce analytics</li> <li>▪ Predictive modeling in continuing disability reviews and redeterminations</li> <li>▪ Continuous quality improvement reviews</li> <li>▪ Anti-fraud infrastructure</li> </ul>	<ul style="list-style-type: none"> <li>▪ Assess continuous quality review initiative and develop expansion strategy to process improvements</li> <li>▪ Determine reach of current data exchanges and capabilities of CoP and CoE</li> <li>▪ Evaluate additional internal processes that can benefit from analytics for decisions</li> <li>▪ Establish processes to address improper payment root causes</li> </ul>	<ul style="list-style-type: none"> <li>▪ Formalize capture of and action on process improvement</li> <li>▪ Explore more rigorous forms of creating process efficiencies</li> <li>▪ Identify and address barriers to scaling data exchanges</li> <li>▪ Integrate real-time data analytics capabilities and visualization across all relevant internal processes</li> <li>▪ Use understanding of root causes to reduce OASDI** overpayment to the target level</li> </ul>	<ul style="list-style-type: none"> <li>▪ Expand evaluation and creation of process efficiencies to strategic partner organizations</li> <li>▪ Explore shared view of the customer across government agencies through seamlessly integrated data across all agency partners</li> <li>▪ Identify latest data analytic capabilities and integrate into internal and customer-facing processes</li> </ul>

Customer-Centric Infrastructure	<ul style="list-style-type: none"> <li>▪ Critical Eight: Transform IT investment process</li> <li>▪ Disability case processing system</li> <li>▪ Medicare database enhancements</li> <li>▪ Authentication</li> <li>▪ Footprint reduction</li> </ul>	<ul style="list-style-type: none"> <li>▪ Assess IT infrastructure for modernization, consolidation, and integration points across all systems</li> <li>▪ Expand multifactor identification across all customer online accounts</li> <li>▪ Establish a link between customer insights and technology and physical infrastructure</li> </ul>	<ul style="list-style-type: none"> <li>▪ Research, test, and invest in technology that replaces outdated IT infrastructure and enables one view of customers</li> <li>▪ Expand multifactor identification across all service channels</li> <li>▪ Pilot and implement changes to office layouts and self-help spaces to improve customer experiences</li> </ul>	<ul style="list-style-type: none"> <li>▪ Explore technology investments that jump the technology modernization gap with strategic partners*</li> <li>▪ Implement adaptive smart software to elude cyber attacks</li> <li>▪ Explore adaptations to physical infrastructure that further support partnerships between agencies</li> </ul>

# Wave 3 initiatives come from stakeholder\* input, leading practices, and additional Deloitte recommendations

Initiative	Why we are recommending initiatives
Expand evaluation and creation of process efficiencies to strategic partner organizations	<b>External Research:</b> The Environmental Protection Agency works with other agencies to improve operations and processes by providing toolkits on conducting lean improvement events
Explore shared view of the customer across government agencies through seamlessly integrated data across all agency partners	<b>Deloitte Recommendation:</b> As data quality increases and agencies become more connected through data exchanges, SSA may have the opportunity to participate in infrastructure allowing for common customer views across agencies
Identify latest data analytic capabilities and integrate into internal and customer-facing processes	<b>Deloitte Recommendation:</b> As new ways to analyze and visualize data are created, the products can be evaluated for potential to increase SSA's analytics capabilities and support decision-making across the agency
Explore new mediums for communicating with and engaging employees in change initiatives	<b>Deloitte Recommendation:</b> As technology continues to advance and the way people interact with it changes, mediums through which employees are engaged can be evaluated to expand employee access to participation in change activities
Integrate transformation leaders across strategic partners in SSA culture changes	<b>Deloitte Recommendation:</b> As leaders are held accountable for employee engagement across agencies and partnerships strengthen, there is potential for transformational leaders to lead changes and engage employees across agencies
Reflect culture of continuous development and learning in personal development plans	<b>Deloitte Recommendation:</b> As the organization transforms, development plans can reflect the values of SSA and foster a culture of continuous development
Explore technology investments that jump the technology modernization gap with strategic partners	<b>External Research:</b> The Federal Bureau of Investigations switched from development of a case management system using a waterfall methodology to agile development to improve functionality <b>Stakeholder Input:</b> Indicated SSA's legacy infrastructure causes frustration and overall inefficiencies, especially as it compares to that of other organizations
Implement adaptive smart software to elude cyber attacks	<b>External Research:</b> The Department of State implemented an automated and dynamic scorecard to constantly assess risk across the organization and to constantly updates based on new threats and vulnerabilities to guide actions <b>Deloitte Recommendation:</b> As cyber security threats continue to advance, there will be more risk to customer privacy and SSA can maintain a robust cybersecurity infrastructure to prevent data breaches and cyber security incidents
Explore adaptations to physical infrastructure that further support partnerships between agencies	<b>Stakeholder Input:</b> Indicated the need to adapt in-person service models as service delivery methods evolve

# Detailed descriptions of Wave 3 initiatives

**Key: Strategy**

- Initiative
- Initiative

## Wave 3: FY22-25

### Continuous Improvement

#### Process Efficiency

- Implement and evaluate initiatives that reduce waste in cross-agency processes involving SSA
- Create actionable toolkits on inter-agency continuous improvement best practices from lessons learned

#### Improper Payments/Fraud Prevention

- Use data exchange and analytics in expansion of fraud prevention to include strategic partnerships

#### Data Analytics

- Inventory analytical trends in modeling, automation, visualization, etc. to identify capabilities to invest in and pilot for all processes
- Develop additional automated and predictive analytic capabilities across SSA, focused on customer and employee needs

#### Data Exchange

- Participate in developing cross-government, unified data standards for agencies to use
- Design platform to seamlessly integrate data received into SSA employee-facing software in order to automate workflows and inform decision-making where possible
- Establish formal cross-government data-sharing infrastructure with agencies using similar customer data that enable one view of customer records (e.g., same customer record view across the Veterans Administration, Department of Defense, Internal Revenue Service, and SSA)

### Adaptive Culture

#### Change Culture

- Adapt performance management and personal development plans to include foundations of culture (e.g., continuous personal and professional development, knowledge-sharing across components and expertise, continuous improvement efforts)
- Identify latest communication medium and employee usage (e.g., 100% of employees in a specific group currently have iPhones, so iMessage is a potential new medium for communications to reach this group)
- Pilot and scale using new mediums to engage employee groups in cultural change

#### Executive Accountability

- Identify transformational leaders across commercial and government partners who currently work with SSA
- Integrate transformational leaders into cultural changes impacting data exchange, shared physical infrastructure, shared customer experiences across agencies, and other areas of interaction between SSA and partner organizations

### Customer-Centric Infrastructure

#### Technology Modernization

- Identify breakthrough technologies that support employee collaboration, customer service, and organization agility
- Scale technology modernization

#### Cyber Security

- Implement smart software and infrastructure designed to constantly change and elude attacker's efforts against endpoints
- Deploy advanced, automated, intelligent customer identity verification systems for SSA services

#### Physical Infrastructure

- Gather insights from advanced employee and customer understanding to make physical infrastructure adaptable to meet their current and future needs
- Further integrate physical locations with additional partners (e.g., expansion of Internal Revenue Service and SSA shared spaces)

# These waves combined create the Vision Roadmap for innovative organization

	Wave 1a FY16	Wave 1b FY17	Wave 2 FY18-22	Wave 3 FY22-25

# Section Two: Vision Roadmap Execution Strategy

---

## Vision Roadmap Execution Strategy Overview

---

This section provides an overview of the **next steps** for prioritizing vision objectives and transformational initiatives, and planning, implementing, and monitoring/tracking those **transformational initiatives**.

The distinction of a *transformational* initiative is intentional – **these initiatives are those specifically aimed to achieve Vision 2025 goals across the agency**. As such, we recommend they be managed and tracked separately from the rest of SSA's initiatives.

We recommend following nine steps to set up the structure and accountability for managing SSA's transformational initiatives. These steps involve **key roles and elements for agency-wide strategic planning**, and help SSA establish the fundamental principles necessary for transformation:

- **Clear decision-making**
- **Strong accountability**
- **Quality approach to performance evaluation**

# SSA continues to make significant progress in realizing the Vision

Over the past year, SSA has used the following process to develop a strategy for realizing Vision 2025. The last step in this process is to execute against this strategy and take action.

## What are our goals and aspirations?

- What are your **primary goals** as an agency?
- What is your **desired impact** on your customers, employees, and organization?
- How do your **goals support the desired impact** you want to have?

## Where will we focus?

- Which areas are most impactful** in helping meet those goals?
- On **which customer and employee groups or organizational aspects** can you have the greatest impact?

## How will we succeed?

- What are the gaps in achieving your focus areas?
- What role** should SSA leadership play? OCSO? Regions? Field Offices? Other key stakeholders?
- How will you change culture and **incentivize behavior**?

## What capabilities will we need?

- Who** must do **what**?
- What **existing initiatives** do you have to effectively support your goals?
- What **initiatives should you develop**?

## Next Steps

## What are our priority next steps?

- Based on your priorities, objectives, and strategies, what should your **priority initiatives** be?
- Which initiatives will have the **highest impact** in the short-term?
- In **what sequence** can these priority initiatives be accomplished?

# We offer the following keys to successful governance

Realizing Vision 2025 requires a strong accountability structure for transformation across the agency. The following are leading practices for accountability structures and transformation:

- **Accountability needs to sit at all levels of the agency, from the top, down to initiative owners**
- **Accountability and responsibility** for transformational initiative management and governance **needs to be clearly defined upfront**. All stakeholders involved must be fully aware of the responsibilities and expectations of their role
- **Data-driven reviews** must provide leaders with the critical information they need to determine status and make decisions. **Any difficulties in capturing and providing information in a timely manner may delay the decision-making process**
- **Integrating risk management** throughout the process will help SSA identify potential risks and develop corresponding mitigation strategies

## Lessons Learned from other Organizations

As part of its ongoing effort to manage and shape the veterans' experience, the **Veteran's Affairs** (VA) relies on agency leaders to be transformation champions. VA holds these champions accountable by using data to track key performance measures and to identify common transformation issues. This has resulted in increased transparency of the transformation progress and insight into transformation issues which inform decision-making.

### *Key Takeaways for SSA:*

- Leadership accountability sits at the heart of change
- Data-driven decision-making and collective leadership responsibility to act lead to meaningful progress

In 2010, **USAA** created a new position to drive improvements to customer experience across the organization: the Executive Vice President of Member Experience. This position reports directly to the CEO and leads all operations relating to customer experience (marketing, sales, channel management, and service functions). The result of this reorganization was not only an increase in customer experience index scores, but also an organizational culture shift towards customer-centricity.

### *Key Takeaways for SSA:*

- Instituting a formal leadership role for driving a specific organizational change creates executive accountability for achieving that change (e.g., improved customer experiences)

# We identified the key next steps to realize the Vision Roadmap

Executing the Vision Roadmap includes taking steps in three key areas: focus and prioritize goals and transformational initiatives; plan for and integrate the initiatives into current operations; and continuously monitor and communicate on initiative progress. SSA has already made headway in these steps through the Critical Eight.

	Area	Key Element	Steps
Within 2 Months	<b>Focus and Prioritize</b>	<b>Accountability Structure and Performance Measures</b>	<ul style="list-style-type: none"> <li>Develop an accountability structure</li> <li>Validate the Vision Roadmap outcomes</li> <li>Develop transformational initiative performance measures</li> </ul>
		<b>Prioritized Vision Objectives and Transformational Initiatives</b>	<ul style="list-style-type: none"> <li>Prioritize the Vision objectives and the corresponding transformational initiatives for the current wave</li> </ul>
Within 6 Months	<b>Plan and Budget</b>	<b>Transformational Initiative Planning</b>	<ul style="list-style-type: none"> <li>Assign owners to prioritize and sequence transformational initiatives and have them develop transformational initiative plans</li> <li>Develop an integrated master schedule for implementation</li> </ul>
		<b>Budget for Transformational Initiatives</b>	<ul style="list-style-type: none"> <li>Submit funding request for transformational initiatives (Note: requires a two-year lead time)</li> </ul>
Ongoing	<b>Monitor and Communicate</b>	<b>Continuous Evaluation and Reporting</b>	<ul style="list-style-type: none"> <li>Develop an executive dashboard to monitor and evaluate transformational initiatives to understand progress towards milestones and outcomes</li> <li>Report on the progress through status reports/ meetings</li> </ul>
		<b>Data-Driven Reviews</b>	<ul style="list-style-type: none"> <li>Conduct formal, quarterly reviews of transformational initiative progress</li> </ul>
		<b>Communications</b>	<ul style="list-style-type: none"> <li>Provide ongoing updates and briefings to agency internal and external stakeholders to show progress, build trust, and develop visibility into transformational initiatives</li> </ul>

# Step One: Identify and assign key roles and responsibilities

SSA must first establish clear roles and responsibilities to hold SSA leaders accountable for the execution of the Vision Roadmap. In finalizing this accountability structure, SSA should determine how existing structures (e.g., EPMO and ITIP) can be leveraged to manage the Vision 2025 transformational initiatives.

Key Role	Summary of Responsibilities	Proposed SSA Alignment
<b>Leadership Role</b>	<ul style="list-style-type: none"> <li>Provides direction on key issues relating to the agency</li> <li>Approves budget for transformational initiatives</li> <li>Leads quarterly data-driven initiative progress review meetings</li> </ul>	(A)COSS
<b>Transformation Champion Role</b>	<ul style="list-style-type: none"> <li>Responsible for agency transformation (Commissioner-appointed)</li> <li>Chairs the Transformation Leadership Committee</li> <li>Presents leadership with progress reports and action plans</li> </ul>	DC-level representative (e.g., Chief Strategic Officer)
<b>Transformation Leadership Committee</b>	<ul style="list-style-type: none"> <li>Decides on Vision objectives and transformational initiative prioritization and sequencing</li> <li>Participates in formal quarterly data-driven initiative progress reviews</li> </ul>	DCs representing all components
<b>Consultative Group Role</b>	<ul style="list-style-type: none"> <li>Provides input on transformational initiatives based on the knowledge, skills, and experience they bring from respective components</li> <li>Serves as a sounding board for the Transformational Leadership Committee, including preparing for and following up on progress reviews</li> </ul>	Champions of Change (i.e., EVC)
<b>Convener and Coordinator Role</b>	<ul style="list-style-type: none"> <li>Facilitates collaboration across the organization to make strategic decisions</li> <li>Gathers and analyzes data to compile progress measures on transformational initiatives for data-driven review process</li> <li>Provides information for, and facilitates decisions on, prioritization discussions</li> </ul>	OCSO
<b>Transformational Initiative Owner Role</b>	<ul style="list-style-type: none"> <li>Manages and implements all aspects of assigned initiatives</li> <li>Reports to Convener and Coordinator on measures for assigned initiatives</li> </ul>	Initiative Owners

## Step Two: Validate the Vision outcomes with key SSA leadership groups

The current Vision Roadmap is informed by industry best practices and customized based on SSA employee and external constituent feedback. SSA should now validate Roadmap outcomes with SSA leadership

### Step A: Confirm the current state gaps to achieving Vision 2025 goals

**Recommended approach:** Conduct three (1 per Vision priority) multi-hour working sessions with component representatives to discuss and validate the following questions:

- Do we have the right outcomes for our Vision 2025 objectives? (*Reference: Vision Objective Outcomes*)
- Does the current initiative analysis accurately represent all current initiatives that can help us meet our objectives? If not, what additional current initiatives contribute to these goals? (*Reference: current gap analysis in Vision Roadmap*)
- Are we addressing all the capability gaps that will prevent us from meeting our objectives? (*Reference: Vision Roadmap details*)

**Desired outcome: Together, these Vision 2025 outcomes get us to where we want to be in 2025**

#### Session Considerations

- These working sessions will only be successful with the right participants to go through each priority.
- We recommend a similar participant group to the goal-setting workshop on 7/16/2015 (mostly **GS-15's**, **ADC** participation), with components most involved in each priority providing more representation.
- Each session should also have a **DC champion**, and all **ADCs** most associated with the priority should be invited to participate.

### Step B: Socialize and validate the Vision 2025 outcomes with ACOSS and Senior Staff

**Recommended approach:** Brief SSA leadership on results of the three working sessions, clearly articulating the inputs and steps taken to develop the Vision objectives and outcomes:

- External research, stakeholder feedback, current initiative analysis, and working Sessions to finalize and confirm the objectives and outcomes in each priority

**Desired outcome: SSA leadership endorses Vision 2025 objectives and outcomes**

#### By the time the Administration changes...

- SSA needs to be equipped with a plan of action to achieve Vision 2025, and the agility to shape and message the strategy based on new leadership's priorities (e.g., conduct scenario planning for potential nominees)
- SSA should be able to demonstrate meaningful progress towards meeting the Vision objectives

## Step Three: Define metrics to track progress towards goals and outcomes

Once the Roadmap is validated, SSA should develop specific measures for the Vision goals and objectives. These measures should be used for internal (e.g., ongoing initiative monitoring and SOR) and where appropriate, external (e.g., Congressional reporting and Agency Priority Goals) progress reporting

### Characteristics of an Effective Metric

**Good metrics demonstrate impact, support decision-making, and are feasible to collect:**

- **Demonstrate Impact**
  - Links organizational activities and outcomes to clearly demonstrate impact
- **Support decision-making**
  - Data is reliable and available at regular intervals
  - There is a baseline and/or historic data which allows a deeper understanding of trends and drivers of performance
  - Data can be rolled up to see overall picture
- **Feasible to Collect**
  - Data is verifiable; data collection and analysis is not costly and is automated where possible

### Steps to Developing Metrics

**Metrics should be logically linked to the Vision and measure collective progress towards achieving the Vision goals.**

The following series of questions can be used to guide the development of metrics at any level of the Roadmap (priority goals, Vision objectives, and initiatives):

- ✓ Are the **inputs** into a program tracked?
- ✓ Have the specific **activities** of a program (using these inputs) been defined?
- ✓ Are the possible **direct outcomes** of an activity identified and are they measured?
- ✓ Has the **desired impact** of the program been defined?
- ✓ Does the **metric** serve its intended purpose?

#### SSA Next Steps

- Evaluate existing metrics
- Validate those measures with the objectives and strategies
- Build metrics as needed for objectives and strategies (*note: can be done in parallel with Steps 2 and 4*)

## Step Four: Validate prioritization criteria

Prioritization scoring criteria allows SSA to rank objectives, strategies, and initiatives based on different factors. We provided a set of scoring criteria in the Vision 2025 Level of Effort Assessment\*, which ranks impact, complexity, and cost. SSA will need to confirm which scoring criteria will be used before going forward.

### Step A: Validate Prioritization Criteria

#### Proposed Scoring Criteria

##### Impact:

- **Customer:** Measures the direct impact on the customer experience
- **Employee:** Measures the direct impact on SSA's workforce
- **Cross-Component:** Measures the reach of the initiative across the organization
  - (3 = All HQ & field; 2 = multiple, but not all components; 1 = only one component)
- **Ecosystem:** Measures the direct impact to entities other than SSA

##### Risk Analysis:

- **Execution Risk:** Measures the complexity of implementing the initiative
- **Business Risk:** Measures the risk to the organization of attempting to implement the initiative and failing to do so

##### Cost Impact:

- **Investment Costs:** Measures the costs associated with initial initiative set-up and implementation
  - (3 = can fall into current budget; 2 = requires minimal additional investment; 1 = requires significant additional investment)
- **Recurring Costs:** Measures the recurring costs associated with maintaining the initiative
  - (3 = can fall into current budget; 2 = requires minimal additional investment; 1 = requires significant additional investment)

# Step Four (cont'd): Prioritize Vision objectives, strategies, and initiatives

SSA should prioritize Vision objectives for each fiscal year and then prioritize strategies in the context of the Vision objectives to help the Transformation Leadership Committee determine which initiatives to include for each budget cycle.

## Step B: Prioritize Objectives and Initiatives

1. Determine which **Vision Objectives** you want to prioritize for the current cycle
2. Apply **scoring criteria** to the transformational initiatives within that objective for the current wave (e.g., Employee Development Wave 1a (FY16-FY17) initiatives)
3. Use **visualization tool** to better analyze scoring results for each of the initiatives within each of the prioritized Vision objectives
4. Based on results, **determine which transformational initiatives will be prioritized for the fiscal year**

### Prioritization Assumptions and Considerations

- SSA should aim to pursue and successfully implement all transformational initiatives within the specified wave
- Prioritization allows SSA to sequence initiative implementation in a given wave and, more importantly, allows SSA to focus on a subset, not all, of its goals, objectives, and transformational initiatives if it faces budget and/or resource constraints or political pressures
- As SSA prioritizes initiatives, it must consider which other initiatives, prioritized or not, are necessary to achieve those initiatives and prioritize those as well

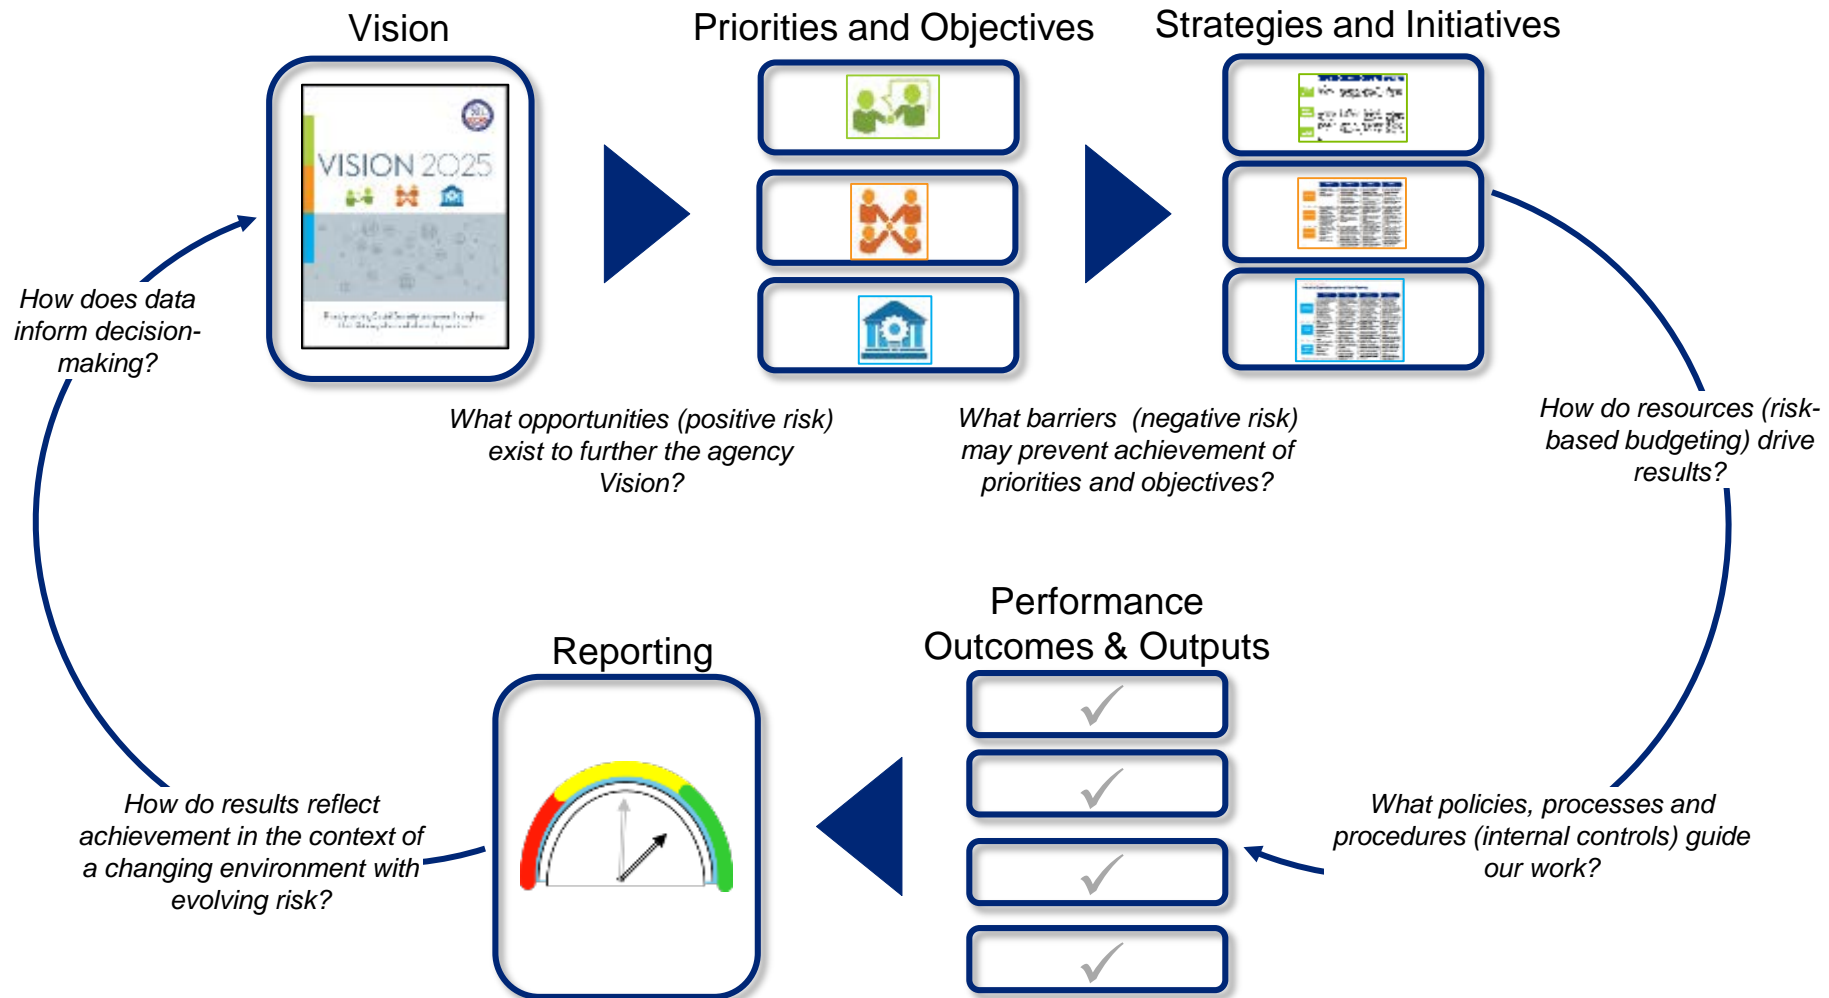

### Prioritization Process

# Step Four (cont'd): Identify the risks of not meeting the Vision and understand the risks that could impact its realization

SSA should consider the following questions to manage risk throughout Vision implementation.

# Step Five: Develop initiative plans

Once prioritized, the Transformation Champion role should assign an owner(s) to plan the implementation of the initiative, including the development of an initiative plan that justifies a budget request.

## Overview of Initiative Plan Content\*

- What is the initiative?
- Who owns it?
- What are the estimated start and end dates?

- Who are the key implementation team members and what are they responsible for?

- Which other initiatives is this initiative dependent on?

<b>Initiative Name</b>		<b>Initiative Description</b>	
<b>Vision 2025 Strategy</b>			
<b>Owner</b>		<b>Initiative Measures</b>	
<b>Start Date</b>			
<b>End Date</b>			
<b>Team Members</b>	<b>Team Roles</b>	<b>Resources Needed</b>	
<b>Overview of Implementation Timeline and Key Milestones</b>			
<b>Dependencies</b>			

- What is the initiative's objective?
- What is the initiative's goal?

- How will the initiative be measured?
- What metrics will be used to track progress?

- What are the estimated initiative costs?
- What are the projected internal and external resources needed?

- What are the initiative's main activities?
- What are key milestones and estimated timing for reaching them?

# Step Five (cont'd): Consolidate initiatives into an integrated master schedule

Transformational initiatives will be increasingly multidimensional and complex. As such, they should not be managed as discrete projects, rather at an enterprise-wide, interrelated level to track collective progress towards achieving outcomes.

## Overview

An **Integrated Master Schedule** is a consolidated view of all ongoing initiatives' schedules, key dependencies, and milestones.

## Who?

The **Convener** role manages the budget, Transformational Initiative Integrated Master Schedule (IMS), and reporting of all transformational initiatives across the agency.

## What?

Once the **Initiative Owners** finalize their schedules, the Convener creates an IMS. The IMS incorporates key milestones, activities, and dependencies from each initiative-schedule. The Convener then sets a baseline to allow for measurement of actual progress against planned progress.

## How?

The primary tool required is **Microsoft Project**.

## Approach

1. Determine which schedules and associated interdependent stakeholders need to be coordinated through the IMS
2. Identify the information flows and feedback mechanisms needed to update the schedule and projections
3. Assign owners of the data that feeds into the IMS
4. Define the IMS major milestones and activities
5. Use IMS to:
  - Provide insight and understanding of risks across initiatives during implementation
  - Inform schedule reviews and focus teams on critical activities
  - Identify changes and potential issues to prompt appropriate action

**Key Dependency: Timely and accurate information from the initiative owners will be necessary for the IMS to provide accurate progress of the transformational initiatives**

## Step Six: Monitor, evaluate, and report on progress toward outcomes

Ongoing data collection and analysis, status reports, and a dashboard should be used to track progress towards reaching the Vision objective outcomes. These reporting capabilities allow leaders to react quickly to initiatives that may be off-track. You should integrate risk management discussions throughout these reviews\*.

### Step A: Define method for capturing data

Using the metrics that you identified in Step Two, determine the procedures for data collection and reporting that can show whether initiatives are on or off-track.

- What data should be collected to populate each measure?
- What is the best source for this data?
- Can this data be automatically collected or is a level of manual intervention necessary?
- Who is responsible for collecting the data?
- How often should the data be collected?

### Step B: Develop monitoring dashboard

Create a dashboard to provide the insight and information needed to manage transformational initiatives holistically and view progress on achieving goals.

#### Dashboard Benefits:

- Uses performance metrics to monitor and analyze initiative performance
- Displays trends on initiative progress in an interactive and user-friendly fashion
- Illustrates if goals are on or off-track
- Gauges overall likelihood of achieving goal

### Step C: Utilize Dashboard to build initiative reporting capabilities

Develop a status reporting cycle to summarize and communicate initiative status to all key strategic planning roles (see *Appendix E*) and external constituents and report on agency's overall progress towards reaching Vision 2025 goals.

#### Initiative Team Huddles

- Share brief updates on initiative status
- Discuss initiative activities for the week
- Identify any dependencies or risks

#### Monthly Status Report/ Initiative Owner Meeting

- Report on initiative measures and progress since last meetings
- Review dashboard and report on “story behind the numbers”
- Determine actions to get back on track, if applicable
- Identify and discuss any cross-initiative dependencies and/or risks

#### External Progress Report

- Communicate strategy for achieving goal
- Illustrate actual vs. predicted performance-to-date on goal
- Assess status and impact of past and upcoming milestones

98 Note: see GAO report “Managing for Results: Agencies Report Positive Effects of Data-Driven Reviews on Performance but Some Should Strengthen Practices” for more information on the impact of data-driven reviews.

\* See Appendix E for more information on integrating risk management into monitoring and evaluation

# Step Seven: Conduct formal strategic reviews quarterly and annually

SSA's Strategic Objective Review (SOR), the agency's formal review process, should allow SSA leadership to monitor and evaluate progress against long-term outcomes and, based on performance results, refine the strategy as needed.

## Strategic Review Cycles

### Quarterly

#### *Who should be involved?*

- Transformation Leadership Committee, Convener and Coordinator Role, and Initiative Owners

#### *What should be done?*

- Conduct review of performance on key measures for strategic goals
- Discuss strengths, development areas, risks, and opportunities
- Determine any necessary action based on performance

### Annually

#### *Who should be involved?*

- Leadership Role, Transformation Leadership Committee, and Convener and Coordinator Role

#### *What should be done?*

- Conduct holistic review of strategy in light of shifting internal and external trends
- Adjust strategy/development of annual strategy
- Celebrate strategic accomplishments of past year
- Communicate strategic priorities and key initiatives for coming year

## Strategic Review Activities

### Before

- 6 weeks:** Initiative Owners identify information required to prepare for strategy review
- 6-3 weeks:** Initiative Owners collect information from staff, including performance measure data linked to key initiatives and staff input on discussion topics
- 3-2 weeks:** Initiative Owners aggregate information and identify key trends and discussion points for management
- 1 week:** Initiative Owners send summary of performance data, key initiatives, and key trends to Conveners for distribution and advance review

### During

- Identify key trends in performance on each initiative, including organization capacity
- Refine initiative approach to maintain strong performance and address lagging performance
- Review overall strategy and confirm relevance
- Gain consensus on key decisions

### After

- Document key decisions and share with staff by email and weekly huddle
- Modify planning for all-staff retreat as applicable

# Step Eight: Adjust approach as necessary in response to review

During monthly meetings and quarterly and annual reviews, SSA will need to make decisions and take action based on initiative status and progress results.

## Initiative On or Ahead of Track

If transformational initiatives are on or ahead of track, there are certain actions that you can take to learn from the success and reevaluate your ambition level.

- **Success Factors:** Gain a deeper understanding of *what* is working well, and *why* it is working in this context
  - Identify what is driving progress
  - Assess whether there are cultural/programmatic factors associated with drivers that are unique to program
- **Scalability:** Evaluate if successful aspects of the program can be scaled to other programs
- **Further Enhancement:** Conduct an external scan to see if best practices from similar programs can be adopted to further improve progress
- **Ambition Level:** Assess whether more ambitious targets should be adopted, or if program should be expanded

## Initiative Off Track

If transformational initiatives are off track, you may need to determine the factors causing the delay and develop strategies to correct it. In some instances, it may be better to adopt a “fail fast” approach and discontinue the initiative.

- **Delay Drivers:** Based on collected data, identify the key drivers of the problem
- **Strategy Review:** Assess whether the problem can be corrected through operational adjustments, or if strategy needs to be updated
- **Revised Approach:** If strategy needs to be updated, consider the following:
  - Have there been internal/external shifts that affect effectiveness of the programs?
  - Have capabilities of SSA shifted?

## Step Nine: Engage and communicate with employees

SSA can gain support for Vision 2025 across SSA through informative progress updates to employees that build trust in the direction of the agency and provide opportunities for employees to actively contribute to realizing Vision 2025.

Vehicle	Description
<b>IdeaScale</b> 	Bring together employees to develop tactical operational solutions for strategic initiatives and facilitate two-way communication between current initiative owners and employees who have feedback pertaining to each initiative.
<b>Initiative Spotlight</b> 	Work with strategic initiative owners to develop summary reports and/or videos updates that spotlight a current initiative and include: overview of initiative, purpose of the initiative, initiative owners, key contributions to the initiative from SSA employees, status update, and future activities.
<b>Executive Talking Points</b> 	Provide SSA leadership with Vision 2025 talking points to ensure accurate and consistent messaging to internal and external audiences.
<b>Opt-in Vision 2025 Updates</b> 	Allow employees to opt-in for Vision 2025 updates, including: additional information on initiative status; notes from SSA leaders on their role in Vision 2025; messages from regional leadership and field employees on “what Vision 2025 means to them.”
<b>Vision 2025 Video Series</b> 	Create short videos featuring SSA leaders discussing the importance of Vision 2025, how employees have and will continue to contribute to the Vision, and key elements of the path forward.
<b>Town Halls</b> 	Conduct quarterly virtual meetings with all Regional Leadership teams to: provide Vision 2025 status updates and an overview of employee feedback; discuss their role in realizing Vision 2025; provide materials that can be directly shared with field employees; and recognize employees who have been particularly innovative and supportive.
<b>Annual Vision 2025 Award</b> 	Institute an annual Vision 2025 award presented by SSA leadership to an employee nominated by Regional Leadership teams for contributing directly to realizing the Vision.

## Step Nine (cont'd): Plan communications schedule

Communications need to be planned and scheduled throughout the fiscal year, with each communication vehicle having an assigned point of contact to lead the communications development and execution.

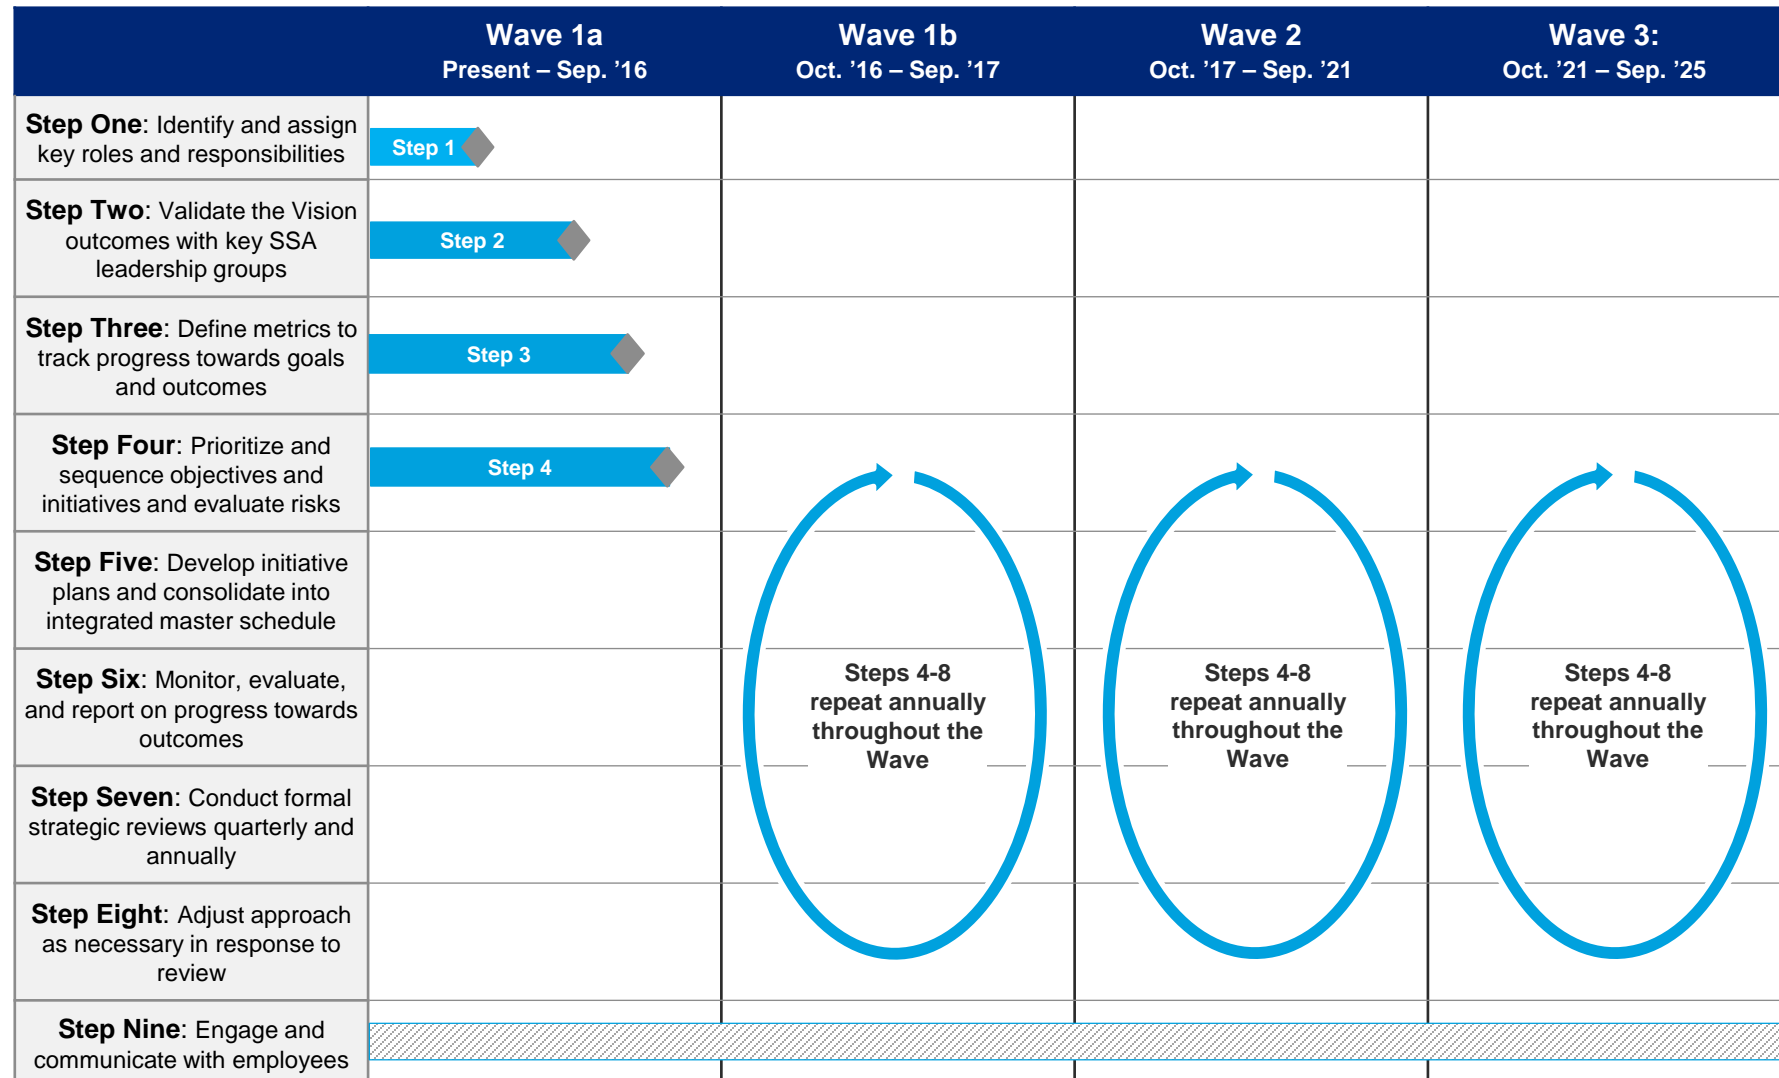

**Sample Vision 2025 Communications Timeline\***

Communication Vehicle	Q1	Q2	Q3	Q4
IdeaScale				
Initiative Spotlight				
Executive Talking Points				
Opt-in Vision 2025 Updates				
Vision 2025 Video Series				
Town Halls				
Annual Vision 2025 Award				

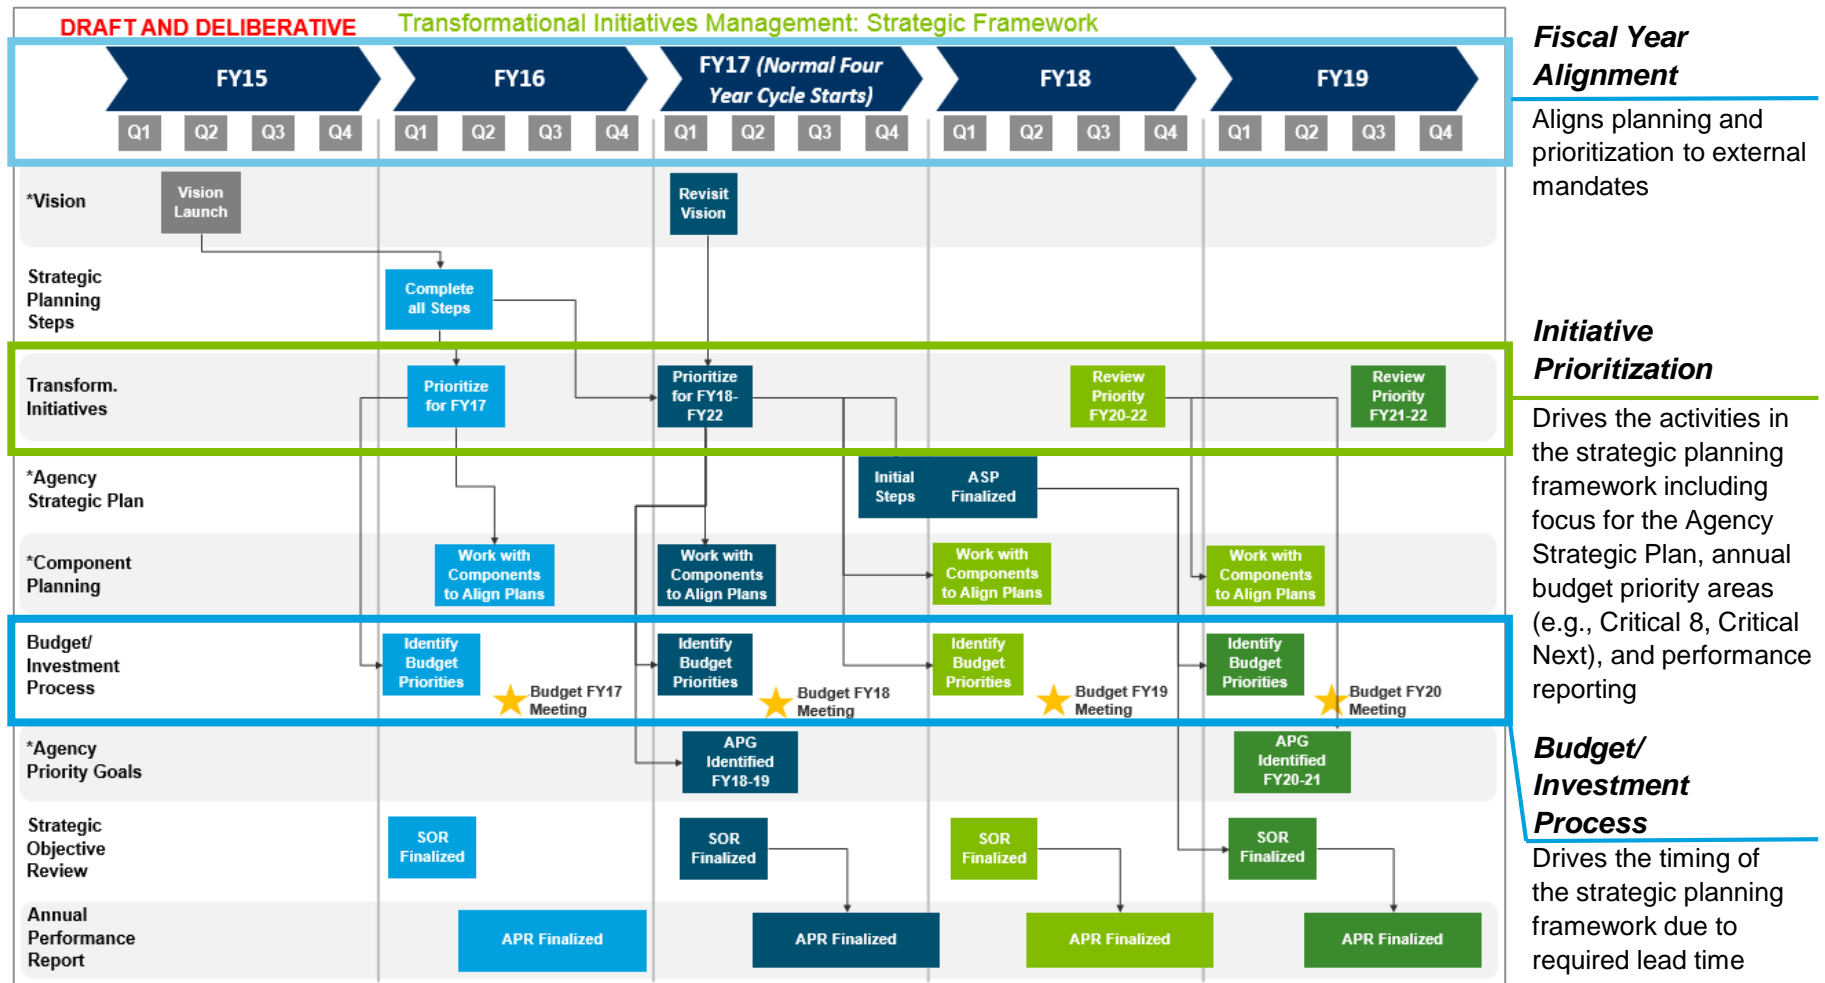

# These nine key steps will help SSA establish a governance structure

There are nine key steps that will help SSA establish a governance structure centered around clear decision-making, strong accountability, a quality performance evaluation, and risk management. Steps 1-4 set the foundation in Wave 1a; Steps 4-8 are an annual repeated cycle in Waves 1b-3; and Step 9 is ongoing.

# Management of these transformational initiatives needs to fall into a larger agency strategic framework that supports external mandates

The framework includes mandated strategic documents with specified timeframes, used to prioritize strategic conversations across the agency. Embedding Vision 2025 into current agency processes will help keep Vision 2025 at the forefront of SSA's strategic planning. A full size of the strategic framework can be found in Appendix E.

# Keys to success

Vision 2025 is more than a document, it paves the way for transformation. SSA has taken significant steps towards realizing Vision 2025 through identified long-term goals and development of a Roadmap with transformational initiatives to achieve those goals. SSA's leadership team will need to keep the following in mind as it drives forward:

**1****Build Vision 2025 Engagement Across the Agency**

Visible endorsement of Vision 2025 by SSA leadership will empower management and employees to make Vision 2025 a success. Overall employee engagement in Vision planning and execution will foster each individual employee's connection to the Vision and its goals, and build agency-wide commitment to transformation.

**2****Fully Integrate with the Critical Next**

Vision 2025 should serve as the primary strategic document that informs all Critical Next discussions leading up to the meeting in March 2016.

**3****Prepare for the Next Administration**

By 2017, Vision 2025 should be embedded in the agency such that it remains a top agency focus during the upcoming administration change. Vision 2025 will not change, though how it is presented and shaped will need to be nimble based on the new administration and their transition team's priorities.

**4****Develop a "Strategic Hub" within SSA**

OCSO should be the agency authority for strategic planning and fulfill various needs, such as: serve as facilitator for component strategic planning conversations; provide initiative owners with ongoing employee feedback; and identify and bridge any gaps in strategy planning.

**5****Seek Employee Feedback and Continuously Report Progress**

Quantitative and qualitative input from groups and individuals directly impacted by SSA policies and programs will continue to be a critical part of strategic planning efforts and will be invaluable as SSA prioritizes goals and initiatives.

# Section Three: Call to Action

# Social, technology, and environment macro factors that will likely change how SSA operates over the next 5-10 years stress the need to take action

## Social

- **Crowdsourcing:** Crowdsourcing methodology elicits perspectives and insights from a wide range of individuals
- **Urbanization:** 2.5 billion people from the developing world are estimated to live in urban areas by 2050
- **Rise of the Global Citizen:** Globalization, improved education, and talent demands will continue to drive migration across the globe
- **Lifelong Skills Development:** Iterative learning and training is required well past traditional education to retain professional relevance
- **Online Education:** Over 250 million people have signed up for Massive Open Online Courses (MOOCs) in the last 3 years
- **Wealth Inequality:** The gap in wealth between the richest and poorest Americans continues to increase disparity
- **DIY Movement:** As technology and other tools become more readily available, the DIY movement will expand to the public sector
- **Aging Populations:** By 2020, 20 percent of the developed world's population is estimated to be aged 65 or above
- **Socially Conscious Consumer:** Increasingly, consumers believe they have a responsibility to the environment and society
- **Human-Centered Design:** Federal agencies are increasingly recognizing the need for a customer-centric approach to their work

## Technology

- **Adoption of Internet of Things:** The ecosystem of electronic devices connected to the internet that can be accessed remotely continues to grow
- **Automation:** With improvements in tech and robotics, both physical and knowledge-based tasks will increasingly be automated
- **Augmented Reality:** 3D technology is expected to continue to evolve, with applications beyond entertainment
- **Cloud Accessibility:** As cloud computing becomes cheaper, organizations are increasingly foregoing localized networks in favor of renting cloud space
- **Blockchain Systems:** The technology behind Bitcoin creates a shared, trusted, decentralized, and public ledger to automate financial transactions
- **API Economy:** Application Programming Interfaces (APIs) continue to be made public, allowing companies to "piggy back" off each other
- **Artificial Intelligence:** Augmenting the processing capabilities of machines for human-like intelligence
- **Commercial Use of Drones:** As the FAA sets regulations over drones, and as companies invest in drone tech, their use will open up new opportunities

## Environment

- **Climate Change Vulnerabilities:** As the climate change continues, natural disasters will increasingly put vulnerable populations in danger
- **Increased Recycling:** Recycling rates have gone up as consumer expectations increasingly view the practice as a norm

# Additionally, industry, economic, and political macro factors may change the landscape in which SSA operates

## Industry

- **Enterprise Science:** Big data and algorithms are being used in predictive and preventative data-driven policies and operations
- **Redesigning Recruiting:** Firms are examining new methods of talent acquisition with regards to niche skillsets as well as diversity & inclusion
- **New Talent Deployment:** New forms of talent management include shorter assignments, virtual mobility, freelance talent, and open-source talent
- **Open Data:** Expectations of government transparency are growing while personal data is becoming more ubiquitous
- **Non-Linear Careers:** The increasingly distributed nature of work breaks up the traditional career into a “patchwork” of different jobs and projects
- **Behavioral Economics:** Insights from behavioral economics, psychology, and analytics equip federal agencies to tackle complex issues
- **Adoption of “Lean Startup” Principles:** Rapid iteration, scaling to meet needs, and the use of prototypes, are being adopted by government agencies
- **Digitizing Public Services:** Citizen-facing public services are increasingly being optimized on digital and mobile platforms for convenience
- **Cybersecurity:** As data is more ubiquitous and people more interconnected, protecting sensitive information becomes an imperative
- **Business Ecosystems:** Business challenges increasingly require breaking down traditional industry siloes for coordinated action
- **Workforce On-Demand:** With the rise of on-demand companies like Uber, new models of contracting labor are being commoditized

## Economic

- **Sharing Economy:** Consumers increasingly engage in peer-to-peer commerce allowing them to maximize underutilized assets (e.g., AirB&B)
- **Data as Currency and Asset:** By 2020 more than 80 percent of consumers will collect, track, barter or sell their personal data
- **Student Debt:** Student debt for a college education has increased 4-fold by aggregate volume over the last 20 years and is expected to rise annually
- **Dynamic Pricing:** Pay-as-you-go and surge pricing systems are disrupting traditional pricing models
- **Declining Infrastructure:** America received a D+ for infrastructure in 2013 with an estimated investment requirement of \$3.6 trillion
- **Shared Value Economy:** Companies are looking at social and environmental outcomes in addition to profit as measures of shareholder value

## Political

- **Polarization of U.S. Politics:** Deadlock between Democratic and Republican politicians has led to more frequent impasses
- **Criminal Justice Reform:** Recent incidents of police brutality, excessive incarceration, and racial discrimination (e.g., Ferguson) have elevated criminal justice reform

# Direct trends impacting SSA's beneficiary and employee populations require SSA to act now

SSA program beneficiaries are projected to **increase by 32% from 2015-2025**.<sup>1</sup> This increase will result in a significant demand on SSA's services, employees, and infrastructure.

Employee data past 2012 is based on GAO projections

**One-third of SSA employees are projected to retire between FY 2011 and FY 2020.** This represents a loss of intellectual capital, which may result in a workforce talent shortage and an inability to meet customer needs.

# Appendix

# Appendix A:

# Methodologies

# A.1 Indices

# Exceptional Employee Indices

The majority of the benchmarking research in this presentation is based on data from the Federal Employee Viewpoint Survey (FEVS). The data from FEVS feeds into both OPM Indices and Best Places to Work in the Federal Government Indices.

## Benchmarking Methodology

- This presentation incorporates both OPM and Best Places to Work in the Federal Government indices
- We selected each index based on what best matched the goals and needs of SSA
- When neither index met the needs of SSA, we independently identified appropriate questions from the FEVS and conducted additional benchmarking research

# Employee Engagement Indices

Both OPM and Best Places to Work in the Federal Government have indices that are candidates for measuring employee engagement. The pros and cons of each index is outlined below.

## OPM Employee Engagement Index

**Description:** A holistic index that incorporates fifteen questions from the FEVS to assess engagement as it's affected by leaders, supervisors, and the intrinsic work experience.

### Pros:

- A more sophisticated index that incorporates several additional factors, which will allow SSA to better understand and assess employee engagement
- Composed of sub indices (Leadership, Supervisors, Intrinsic Experience) so SSA can develop a more nuanced understanding of the drivers of employee engagement

### Cons:

- A more complex index, which may make it difficult to explain and message to some audiences
- A less popular index, which means it may not be suited for *communicating* the results of employee engagement efforts

## Best Places Overall Index

**Description:** The main index for the Best Places to work in the Federal Government. Incorporates three questions to assess the quality of the work experience.

### Pros:

- A simple index, which makes it easier to explain to some audiences
- A very popular index, which means it may be suited for *communicating* the results of employee engagement efforts

### Cons:

- This index does not incorporate several questions that address employee engagement, so it will provide far less insight into the effectiveness of efforts
- This index does not include sub indices, which further limits its potential as a measurement and tracking tool

## Conclusion

- **We recommend the use of OPM's employee engagement index for the measurement of employee engagement**
- Though the main index from Best Places to Work in the Federal Government is superior from a marketing perspective, it is a far less comprehensive index, which will significantly reduce the insight SSA can develop if used
- Best Places to Work could be used to market the outcome of efforts, while OPM is used to monitor their impact internally

# Customer Satisfaction Indices

A customer satisfaction index is a good tool for determining how ambitious SSA wants to be in improving customer satisfaction. Though there are several different published indices, few of them incorporate government agencies. In examining the indices available, this presentation incorporates Forrester's Customer Experience Index.

## ✓ Forrester Customer Experience Index (CXi)

### Pros:

- Unified cross-industry measurement of customer satisfaction enables comparison across organizations in several different industries
- CXi is supplemented with multiple case studies and additional research, which helps SSA draw deeper insight when examining scores
- Index scores are based on a holistic assessment of the customer experience

### Cons:

- This index only began to measure most government agencies in 2015, which means it lacks historical trend information for the government

## American Customer Satisfaction Index (ACSI)

### Pros:

- Has several years of government data to draw on, which allows SSA to develop insights based on historical trends
- Is the official customer satisfaction index for the government

### Cons:

- This index does not publish easily comparable aggregate or specific information regarding scores, which makes cross organizational comparison challenging
- This index focuses on IT and technology satisfaction, rather than holistic satisfaction

## Internally Developed Measure Based on Internal Data

### Pros:

- Has the flexibility to be tailored to SSA specific measures that may not be broadly applicable to other organizations
- Offers the ability to control frequency of measurement

### Cons:

- This index can not be used to benchmark other organizations (unless it includes a measure that uses data publically available for other organizations)
- This index would require baseline data to establish realistic targets for out years

# Employee Engagement Index

The Employee Engagement Index is a subset of questions from the FEVS that measures employees responses to the three areas below.

## Employee Engagement Index

**Leaders Lead:** “Reflects the employee’s perceptions of the integrity of leadership, as well as leadership behaviors such as communication and workforce motivation”

**Supervisors:** “Reflects the interpersonal relationship between worker and supervisor, including trust, respect, and support”

**Intrinsic Work Experience:** “Reflects the employees’ feelings of motivation and competency relating to their role in the workplace”

**Employee Engagement Index Trends**  
**Government Wide**

**Employee Engagement Index Trends**  
**SSA**

# Employee Engagement Index Relative Rankings

In recent years, SSA has had a downward trend on the Employee Engagement Index.

## Engagement Scores by Departments/Large Agencies

(Click here for Engagement Index)

## SSA Key Takeaways

- The downward trend of employee engagement over the past three years resulted in SSA moving from the second quartile in 2010 to third quartile in 2014 in relative rankings among other large agencies and departments
- The “Leaders Lead” subcomponent of the index has declined at the fastest rate and is at the lowest level compared to the other subcomponents
- The “Supervisors” and “Intrinsic Work Experience” subcomponents of the index have seen small gains since 2013
- Employee engagement is an important factor for SSA to consider because “a growing body of evidence in the public and private sector has shown a strong relationship between high levels of employee engagement and improved organizational results”

# Illustrative Innovative Organization Metrics

SSA can use a range of potential metrics to measure progress toward becoming an innovative organization.

Continuous Improvement	Adaptive Culture	Customer-Centric Infrastructure
<b><u>Process Efficiency</u></b> <b>Defined:</b> Total time and cost reductions to processes from continuous improvement initiatives	<b><u>Culture Change</u></b> <b>Defined:</b> Percentage of employees participating in continuous improvement, using knowledge-sharing platforms, or contributing to the innovative ideas platform	<b><u>Technology Modernization</u></b> <b>Defined:</b> Number of databases that have been integrated to improve customer experience (excluding databases that are intentionally separated for security)
<b><u>Data Exchange</u></b> <b>Defined:</b> Percent of customer records that are automatically updated based on external data exchanges (e.g., disability determinations where SSA uses an Electronic Health Record / Total number of disability determinations)	<b><u>Executive Accountability</u></b> <b>Defined:</b> Percentage of leaders whose performance is linked to degree to which they embrace change, risk, and innovation	<b><u>Cybersecurity</u></b> <b>Defined:</b> Assessment of cybersecurity maturity as measured via any qualified cybersecurity maturity model (e.g., NIST's cybersecurity framework)
<b><u>Data Analytics</u></b> <b>Defined:</b> Percent of initiatives that use automated data-driven monitoring and reporting		<b><u>Physical Infrastructure</u></b> <b>Defined:</b> Number of square feet shared with other agencies to improve customer experiences (e.g., total field office sq. ft. for shared IRS/SSA spaces)
<b><u>Improper Payment/Fraud Prevention</u></b> <b>Defined:</b> Percent of improper payments per benefit program		

# Illustrative Organizational Efficiency Index

Measure	Targets	Achieved	Score	Weighting
<b><u>Process Efficiency</u></b> <b>Defined:</b> Total time and cost reductions to processes from continuous improvement initiatives	1: \$A to \$B million in savings and <X hours reduced 2: > \$B million in savings and >Y hours reduced 3: >\$C million in savings and >Z in hour reduced	\$C million in savings; Y hours reduced	2	20%
<b><u>Culture Change</u></b> <b>Defined:</b> Percentage of employees participating in continuous improvement, using knowledge-sharing platforms, or contributing to the innovative ideas platform	1: A-B% of employees using knowledge-sharing platforms; X-Y% of employees contributing to innovative ideas platform 2: B-C% of employees using knowledge-sharing platforms; Y-Z% of employees contributing to innovative ideas platform 3: >C% of employees using knowledge-sharing platforms; >Z% of employees contributing to innovative ideas platform	B% of employees using knowledge-sharing platform; Y% of employees contributing to innovative ideas platform	2	40%
<b><u>Technology Modernization</u></b> <b>Defined:</b> Number of databases that have been integrated to improve customer experience (excluding databases that are intentionally separated for security)	1: A-B databases integrated 2: B-C databases integrated 3: >C databases integrated	A databases integrated	1	40%

**Index Score: 1.6**

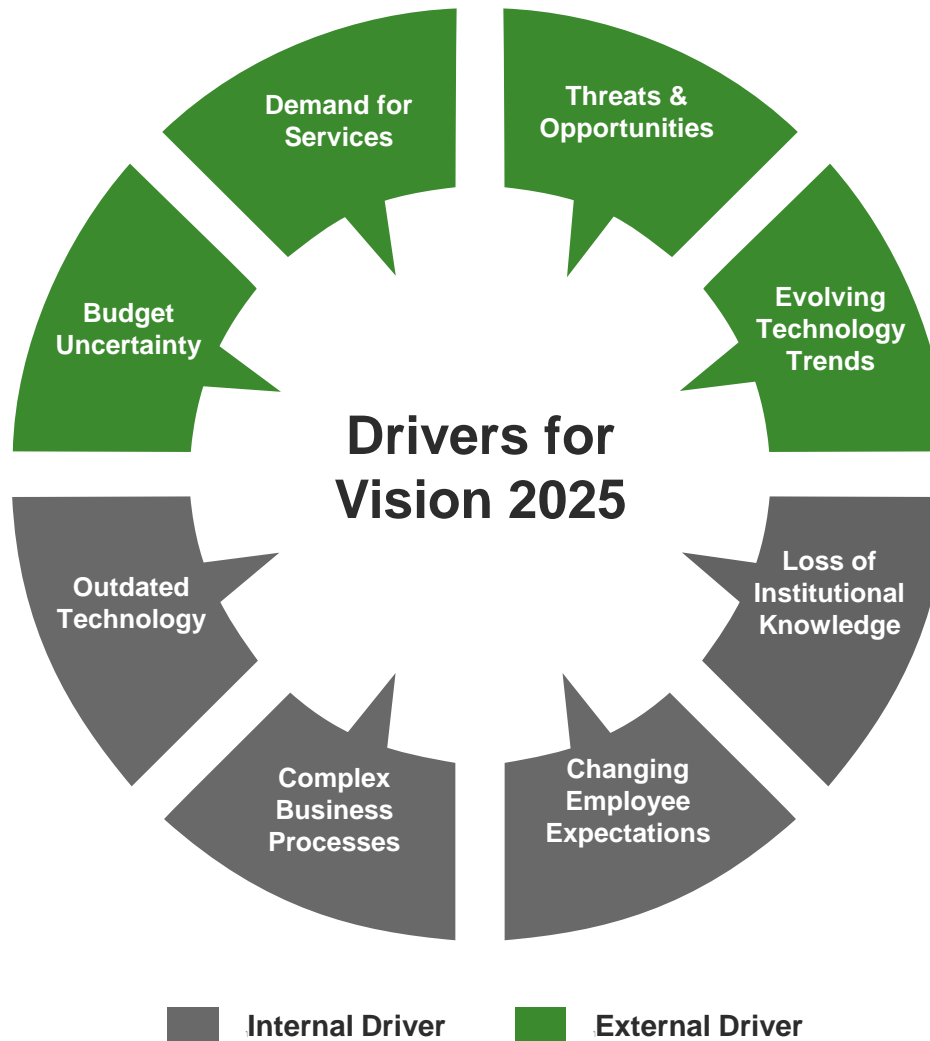

## A.2 Roadmap Development

# Methodology for Vision Roadmap version one

Through a five-step approach, we developed a recommendation for how SSA can “*proudly serve Social Security customers throughout their lifetime, when and where they need us.*”

# We used internal and external drivers to focus external research efforts

# We focused on organizations that have undergone large transformations

We developed over **30 case studies\*** through secondary research that provided proven examples of how ambitiously other organizations have pursued similar transformational efforts.

Industries researched included:

- ✓ **Federal Government**
- ✓ **State Government**
- ✓ **International Government (e.g., UK)**
- ✓ **Insurance**
- ✓ **Financial Services**
- ✓ **Technology**
- ✓ **Health Care**

We also documented **trends** focused on customer experience, employees, and innovative organizations to increase understanding of the context for transformation.

**Documented trends that provide factors for influencing the environment in which SSA operates**

We then **examined how organization achieved** similar transformations to identify initiatives SSA may want to pursue.

# Methodology for Vision Roadmap version two

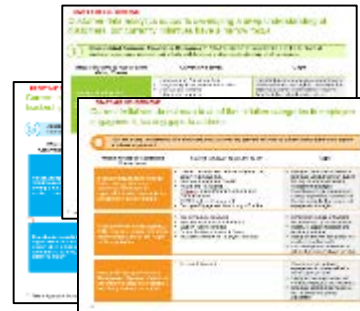

## Step 1

Reviewed current initiative inventory that lists current initiative names, descriptions, and owners generated from strategic documentation as part of phase one

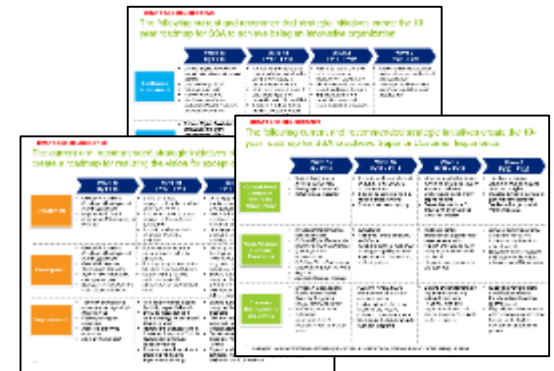

## Step 2

Conducted interviews with seven component representatives selected by the EVC and updated and consolidated current initiatives inventory based on their input

## Step 3

Assessed current initiatives against Vision objectives based on analysis of interviews with components, additional strategic documents from components, and stakeholder feedback from regional working sessions to determine initiative gaps

## Step 4

Recommended strategic initiatives to fill gaps based on version one of the roadmap, SSA stakeholder recommendations from feedback collected, and current initiative interviews. Mapped current initiatives, critical eight initiatives, and recommended strategic initiatives to the Vision Roadmap using the following criteria:

**Wave 1a** includes the critical eight and short-term current initiatives

**Wave 1b** includes medium-term current initiatives and recommended strategic initiatives that are foundational to achieving future strategic initiatives

**Wave 2** includes long-term recommended strategic initiatives that focus on expansion within SSA

**Wave 3** includes long-term recommended strategic initiatives that focus on expansion to outside of SSA

# Methodology for verification and consolidation of current initiatives

## Step 1

Reviewed current initiative inventory that lists current initiative names, descriptions, and owners generated from strategic documentation as part of phase one

Name	Description	Owner
Initiative 1	Description 1	Owner 1
Initiative 2	Description 2	Owner 2
Initiative 3	Description 3	Owner 3
Initiative 4	Description 4	Owner 4
Initiative 5	Description 5	Owner 5

## Step 2

Conducted interviews with seven component representatives selected by the EVC and updated and consolidated current initiatives inventory based on their input

- Initial current initiative set included **309 initiatives** from 25 strategic documents\*
- Interviews with seven components provided additional information on current initiatives including:
  - Outcome
  - Owner and other collaborators
  - Alignment with Vision 2025
  - Related and redundant initiatives
  - Level of initiative (e.g., overarching initiative versus a small project that could be combined with initiatives)
- Current initiatives were consolidated to **142 current initiatives** based on these interviews and review of additional strategic materials sent by components
- Of the 142 initiatives, **51 current initiatives** were labeled as potential to be transformation based on outcomes and context from interviews
- The complete list of 142 current initiatives should be reviewed using the interactive dashboard to verify labeled transformational initiatives and identify additional transformational initiatives

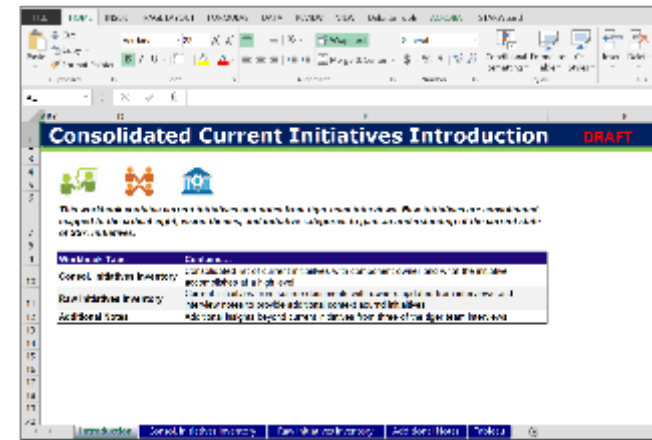

## A.3 Analysis Details

# Current initiative analysis Workbook and Dashboard Overview

The **Consolidated Current Initiatives Workbook** contains current initiatives and notes from tiger team interviews. Raw initiatives are consolidated, mapped to the Vision priorities, Vision objectives, strategies, and the Critical eight to understand SSA initiatives that align to Vision 2025 and their outcome. The spreadsheet contains the following tabs:

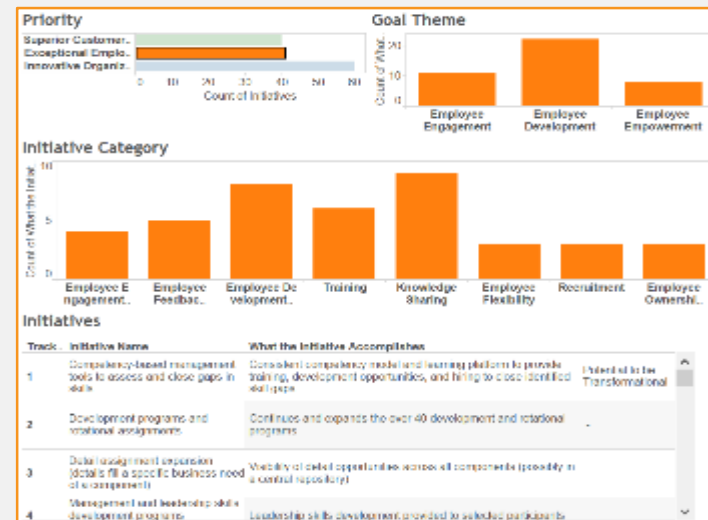

1. Consolidated Initiatives Inventory
2. Raw Initiatives Inventory
3. Additional Notes
4. Tableau Data

## Overview of Tabs

1. **Consolidated Initiatives Inventory** – lists all current initiatives and the following information:
  - Overview of what the initiative accomplishes
  - Ranking of how transformational the initiative is
  - Component owner
  - Alignment (if applicable) to Vision priority, Vision objective, Strategy, and Critical Eight
2. **Raw Initiatives Inventory** – contains a more detailed initiative description and notes from tiger team interviews
3. **Additional Notes** – provides key takeaways and insights from component tiger team meetings, as well as key initiative implementation dates
4. **Tableau Data** – data utilized for the Current Initiatives Tableau dashboard

## Dashboard Functionality

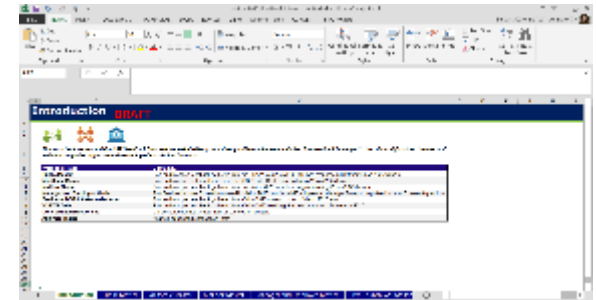

The **Tableau dashboard** contains all the current initiatives in the spreadsheet. Click on each Vision priority, Vision objective, and strategy to filter the view of current initiatives.

# Vision 2025 Feedback Master spreadsheet overview

The **Vision 2025 Feedback Master spreadsheet** provides the structure to consolidate and analyze all stakeholder feedback. Once the raw data (input/idea) is entered into the appropriate worksheet, code the data by:

1. Priority
2. Vision objective
3. Critical Eight relevance
4. Strategy

## Coding Instructions

1. Identify if the data applies to any of the **Vision 2025 priorities**:

- Superior Customer Experience
- Exceptional Employees
- Innovative Organization

2. Within the identified priority, decide whether the data falls under a priority **Vision objective**:

*Superior Customer Experience:*

- Consolidated Customer Experience Management
- Omni-Channel Customer Experience
- Customer Empowerment and Choice

*Exceptional Employees:*

- Employee Engagement
- Employee Development
- Employee Empowerment

*Innovative Organization:*

- Continuous Improvement
- Adaptive Culture
- Customer-Centric Infrastructure

3. Determine if the data is relevant to a **Critical Eight initiative**

*Note: This column should code data by the current priority agency-wide initiatives (e.g., FY17's Critical Next). The spreadsheet will need to be updated with priority initiatives as they are determined.*

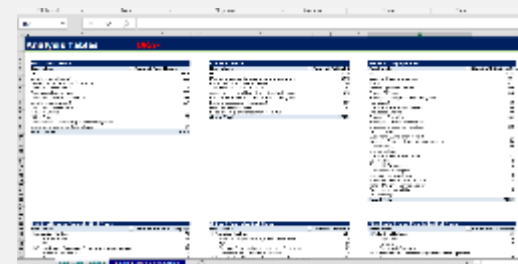

4. Determine if the data applies to a Vision objective's **strategy** (see Vision Roadmap for strategy descriptions)

## Analysis Instructions

In the worksheet tab titled "Analysis Tables", pivot tables are set up to automatically provide data coding counts. The following counts are provided:

- Vision Objectives
- Critical Eight Initiatives
- Strategies
- Strategies by Vision Objective
- Critical Eight Initiatives by Vision Objective
- Stakeholder Mentions by Vision Objective

These counts can be used for analysis purposes to provide insight into stakeholder feedback trends, as well as quantifiable analysis behind ideas and recommendations.

# Vision Roadmap by the Numbers

## Three Vision Priorities

**Nine** Vision Objectives

**25** Vision Strategies

**17** Vision Outcomes\*

**142** current initiatives aligned to Vision 2025

**51** current initiatives with potential to be transformational

**79** recommended transformational initiatives\*

**Over 29,000** employees represented in feedback

# Appendix B:

## External Research

## B.1 Case Studies

# Continuous Transformation to Drive Persistent Excellence

Some organizations have already achieved customer experience excellence, but have recognized the need to continually transform and invest in the customer experience exceed rapidly increasing expectations.

## Maintain Excellence

Some organizations have achieved and maintained customer experience excellence by continually seeking new ways to integrate customer centricity into their org structure and processes, investing in customer centric technology, and innovating to *exceed* ever increasing customer expectations.

Consider...

- USAA created a new position in 2010: Executive Vice President (EVP) of Member Experience
- Reports directly to CEO; USAA consolidated all marketing, sales, channel management, and service functions (9,000 staff) under the new position
- Following reorganization, EVP promoted customer centricity across the organization and deeply researched the customer
- Efforts have reinforced customer centricity across the organization (e.g., USAA evaluates all tech investments based on customer impact)

Forrester Customer Experience Index Scores

## Characteristics of Goals focused on Maintaining Strength

Organizations can maximize impact by providing customer senior leaders with operational control

Organizations need to honestly assess whether they are ready for the radical transformations required by customer centricity

Prioritize understanding the customer and cultural change at the outset of customer-centric organizational change

# Overhaul Organizational Structure and Operations

Many organizations have managed to improve their Forrester customer experience index (CXi) scores by dozens of points over a few years. It may be possible for SSA to achieve similar improvements.

## Radical Improvement

Many organizations have achieved drastic customer satisfaction improvements by developing a deep understanding of their customer and changing their organization to serve them. Radical changes often require significant resource investments and the organizational commitment to see the change through.

Consider...

- United Healthcare Appointed VP to manage customer satisfaction at the beginning of 2011
- VP given authority to work across organizational boundaries and at all levels
- VP built a customer-centric culture across traditional organizational boundaries
- VP developed a detailed Journey Map to deeply understand customers
- VP messaged customer's journey to line personnel

Forrester Customer Experience Index Scores

## Characteristics of Transformative Customer Satisfaction Goals

Create senior leaders responsible for the customer experience and empower them to work across the organization

Build a customer-centric culture at every level of the organization

Develop a deep and nuanced understanding of the journey your customer takes

# Maintain and Capitalize on Existing Capabilities

Most organizations have managed to maintain or improve their CXi scores by 5-10 points over a few years. It may be possible for SSA to achieve similar improvements.

## Significant Improvement

Many organizations have maintained strength or achieved significant customer satisfaction improvements by focusing on practical goals that align with existing organizational capabilities. By taking advantage of existing organizational units and capability, this approach is practical and relatively low risk.

Consider...

- Implemented strategic focus on customer satisfaction in 2011 after a drop from 2010
- Implemented a series of department/office-specific customer experience initiatives between 2011 and 2014
- Relied on traditional tools and processes (e.g., POS survey, focus groups) to understand the customer's needs
- Ownership of customer satisfaction distributed across the organization; partially centralized in 2014

## Forrester Customer Experience Index Scores

## Characteristics of Goals focused on Maintaining Strength

Make the customer experience a strategic priority for the organization

Identify high impact department/office-specific initiatives and execute them via an existing governance structure

Identify and empower customer experience owners across the organization

# Achieve Improved Understanding of Customer Experience

Some organizations maintain a deep and nuanced understanding of the quality of their customer experience by designing meaningful measurements and collecting/ publishing the relevant data, even when it's not a positive story.

## Customer Experience Measurement

Consider...

**General Services  
Administration**

- GSA was an early adopter of customer satisfaction measurement in the government, and has been collecting certain measurements, like leased-space satisfaction, since the late 90s
- GSA has specific teams dedicated to understanding the quality of their customer experience
- GSA reports on customer satisfaction metrics even when it fails to achieve its targets
- GSA can implement targeted improvement plans by measuring program specific success

Select GSA Customer Satisfaction Measures

“**Loyalty Index**” is created by averaging responses to questions like “How likely are you to recommend [program office] to others?”. 1=“Not at all likely” and 10=“Very likely”.

## Characteristics of Customer Experience Measurement

Develop and use both an overarching customer experience measurement and program specific measurements

Don't shy away from reporting, even when the data doesn't say what you want it to say

Minimize the bias in customer experience metrics by ensuring the sample is representative

# Channel Choice

Some organizations improve their customer experience by allowing customers to choose their preferred channel to complete transactions and by expanding access to new channels based on customer demand.

## Channel Choice

Channel choice means a customer can select the service channel that best meets their needs given their individual circumstances. This may involve creating new channels (e.g., mobile) when existing's channels don't meet customer needs and expectations.

Consider...

### DEPARTMENT OF MOTOR VEHICLES

Department of Motor Vehicles offices around the nation have been improving the customer experience by creating new channel options. The Las Vegas DMV launched an online portal, placed service kiosks at partner locations, and created a program with auto dealerships for customers to complete registrations and receive license plates in the mail, resulting in:

*Processed online*

**717,940**

*transactions from May 2013  
(launch month)– March 2015*

*Processed*

**577,771**

*kiosk transactions  
in FY2014*

*Served*

**1,734,367**

*customers at DMV  
locations in FY2014*

### Key Gallup Survey Findings on Channel Choice using Banking Channel Preferences

- **Customers can't always use the channel they prefer** – At financial institutions, customers use a non-preferred channel 11%-30% of time
- **Customer experience drops when they can not access a preferred channel** – At a selection of financial institutions:
  - Satisfaction dropped by up to 18%
  - Engagement dropped by up to 13%
- **Customers vary widely in preferences** - “Randomly selected sample of 3,000 retail banking customers; customers used more than 750 unique combinations of channels to accomplish their banking needs”

## Characteristics of Channel Choice Goals

Recognize core drivers of customer channel frustrations and works to address those drivers

Explore enabling technologies and policy changes that enable channel choices

Provide the flexibility to meet the unique needs of each customer

# Channel Nudges

Many organizations help customers move to the channels that may better meet their needs by providing subtle nudges that educate them on advantages of each channel and encourage them to make the jump.

## Channel Education

Channel education occurs when an organization makes a concentrated effort to inform customers about the channels available to them and the advantages of each channel. The most successful education efforts tailor their messaging based on customer preferences. There is little use in educating customers on things they don't care about.

Consider...

HMRC is the UK's revenue collection service. HMRC performed detailed customer research to understand existing preferences. They then educated their customers on how online tax filing better met these preexisting preferences.

*Prior to communication*

**77%**

**aware** they can pay online

*After communication*

**98%**

**actually file** online

## Channel Incentives

Channel incentives occur when an organization provides subtle encouragement to use a specific channel. This can help a customer overcome ingrained habits when a channel that better meets their needs is available for their use. Incentives are about helping the customer use the channel that is right for them given their specific circumstances.

Consider...

Companies House manages the incorporation and dissolution of corporations in the UK. Corporations were able to perform their annual filings through paper-based and online channels. By reducing the online filing fee they saw online use increase.

*Prior to fee reduction*

**5%**

used online channel

*After fee reduction*

**30%**

used online channel

## Characteristics of Channel Nudging Goals

Develop a deep understanding of the customer and demonstrate how specific channels address their challenges

Do not penalize the use of any specific channel

Provide encouragement to overcome the bias toward doing the same thing

# Channel Expansion

Many organizations have begun to create new channels and expand what they offer through existing channels to improve the customer experience.

## Channel Expansion

Expansion occurs when an organization finds new ways to reach its customers. For example, when a bank launches its first mobile app, it's expanded to a mobile channel. Expansion also occurs when an organization adds new products and services to a channel. Both require significant resources, but rarely require an organization to retrofit and overhaul the systems of existing channels.

Consider...

A multinational banking and financial services corporation with over 240,000 employees. In 2011, they wanted to expand how customers accessed services via their mobile channel. They created and launched a mobile app for the iPad to complement their iPhone app.

Over  
**5000**

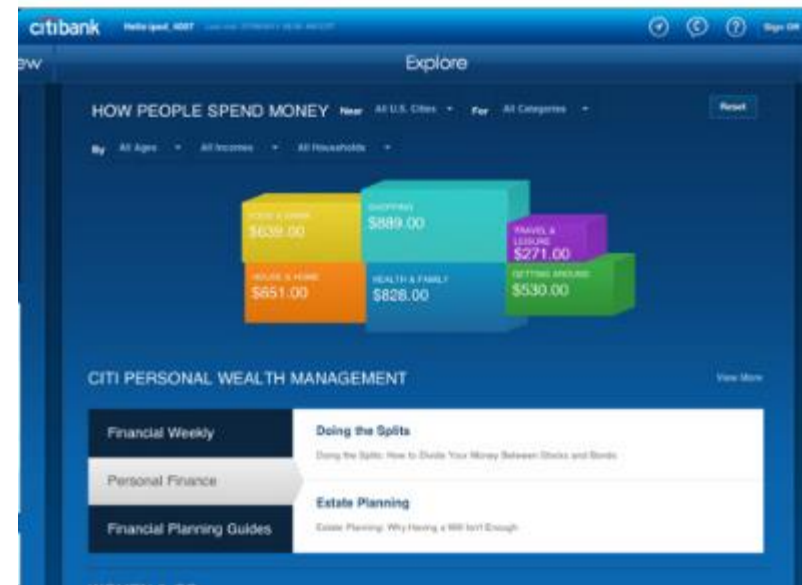

Users took their first  
step with mobile  
banking after release

Over two thirds of users  
ranked the app with

**4-5 Stars**

App had  
**2x**

The adoption rate of  
their phone app

## Characteristics of Practical Cross Channel Service Goals

Researches customers to understand what new channels they demand most and what services they want added to existing channels

Sets clear goals for what new channels should accomplish, but provide implementers flexibility in design and creation

Trends focus on digital channels as currently driving most expansion opportunities

# Channel Integration

Many organizations have improved their cross channel service by making the front and back-end system investments necessary to provide an integrated multi-channel experience.

## Partial Channel Integration

*Occurs when an organization identifies the most important links between channels for a customer and implements the technology, processes, and training necessary to bridge the divide. For example, if most customers visit an organizations brick and mortar locations and browse their mobile sites, it makes sense to integrate those two channels.*

*Consider an...*

### American Loan Provider

That wanted to improve its call center experience by integrating it with its digital channel. They implemented a system that allowed call center employees to directly access and view a customer's web session

*Reduced call time by:*

**50%**

*Retained*

**25%**

*of customers that abandoned  
online sessions by contacting them*

## Full Channel Integration

*Occurs when an organization implements the technology, processes, and training necessary to integrated every single one of its channels. This provides customers with a seamless multi-channel experience, but requires significant organizational investment.*

*Consider...*

**BBVA**

An international bank headquartered in Spain with over 100,000 employees, which implemented a multi-year overhaul of channel management systems. They enabled real-time processing of data across all channels.

*Reduced time required to  
create a new account from:*

**40 minutes to  
5 minutes**

*Improved:*

**Customer  
loyalty**

## Characteristics of Ambitious Cross Channel Service Goals

Integrates two or more existing channels together to provide a more unified customer experience

Invests in improved back-end architecture of technology

Integrates channels based on understanding of the customer's journey

# Individually-Tailored Service

Many organizations have tailored their services to meet the specific needs and improve the experience of individual customers.

## Individual Personalization

Occurs when an organization interacts with their customers on an individual level to create a highly customized and relevant service experience. Organizations can personalize service by adjusting both the content of service and how it's presented. For example, when logging into an account on a webpage, the site may welcome a customer by name and display a personalized view of content based on knowledge of the customer through stated or inferred individual customer preferences.

Consider...

Nationwide is an insurance and financial services company with over 31,000 employees and \$30 billion in annual revenue. Nationwide used technology to create a tailored service by implementing a rules-based live chat service that identified when customers were struggling with their web resources and automatically placed them into live chat with a customer service representative.

*Captured*

**40%**

*of at-risk customers struggling with the website*

*Achieved*

**4.08 out of 5.0**

*satisfaction score for live chat interventions*

### Elements of Personalization

#### Differentiated Content

- Follow-up based on user actions (e.g., post-call email with additional resources)
- Recommendations based on action (e.g., customers with X also enrolled in Y)
- Phrasing/wording (e.g., enroll now! vs. save time and enroll)

#### Differentiated Presentation

- Overall layout (e.g., webpage with application feel vs. traditional page)
- Format (e.g., highlighting or bolding)
- Message placemat (e.g., information on the top, side, or bottom)

## Characteristics of Individually-Tailored Service Goals

Has or creates the capability to collect and analyze data on all individual customers

Personalization has a defined set of possible adaptations and user behavior sets

Highest degree of tailoring requires cross-channel interaction to provide personalized information across multiple channels

# Customer Segmentation to Tailor Service

Many organizations segment their customer base by shared characteristics and tailor their services to the customer segments to meet the needs of the segment.

## Segment Personalization

Occurs when an organization analyzes characteristics of their customer base to create distinct segments. A relevant and customized experience is created for the segments through providing differentiated service content to the segments based on characteristics of the group. For example, students who use an online login for their student checking account may see content focused around student loans or how to build credit.

Consider...

Barclays is an international bank with over 150,000 employees and 48 million customers. They segmented their customer base to better understand and serve their customers, and identified students as a key but underserved demographic. They analyzed data, held focus groups, and implemented service changes based on better understandings of the customer segment of students.

Goal of

**25%**

*student account growth*

Achieved

**34%**

*student account growth*

## Characteristics of Customer Segmentation Goals

Criteria for creating segments of customer base is collectively exhaustive and may be mutually exclusive

Understands the differentiated aspects of their customer base that are crucial to effective personalization

Has or develops the ability to collect and analyze information about customer base

# Improved Access, Communication, and Engagement Activities

Over the past four years the top three organizations for employee engagement have remained consistent. These three are able to achieve and maintain top performance through a series of engagement activities at the organizational level.

## Sustained High Levels of Engagement

Agencies have sustained high levels of employee engagement through continually assessing employee needs, creating opportunities for feedback and development, and facilitating collaboration across all parts of the organization.

Consider...

- Promotes collaboration, transparency, accountability, and a flat organization through a series of initiatives, including:
  - **Two-day new-employee retreat** that conveys agency mission and facilitates peer connections
  - **Increased access to top leadership** by hosting lunches and events for staff to meet and interact with Chair, CFO, etc.
  - **Development of communication tools** (e.g., FTC Daily and Ask Me Anything Sessions) to provide updates and collect feedback
  - **Opportunities to change work** functions and roles for employees
  - **Community engagement initiatives** for employees to share knowledge

**Employee Engagement Index Trends  
FTC, SSA, and Overall**

## Characteristics of Transformative Employee Engagement Goals

Continually create initiatives that reach all levels and functions of employees

Develop internal mechanisms for capturing and acting on employee feedback beyond the Federal Employee Viewpoint Survey

Recognize the diverse needs of the organizations workforce and aim to develop an inclusive environment

# Achieving Continuous Employee Feedback and Participation

Some organizations are developing systems to solicit and implement innovative ideas from employees. This both improves employee engagement and continuously improves the organization's processes and technology.

## Continuous Feedback

Employees want to take ownership of their work and see their decisions and input have a meaningful impact on their workplace. Organizations can channel this impulse into continuous improvement by actively soliciting employee feedback and implementing the changes they propose.

Consider...

- Launched the Bright Ideas portal to encourage innovation and improvement
- Employees can submit ideas via the portal and they're reviewed by colleagues and stakeholders
- If promising, the ideas will then receive funding and are implemented as an innovation pilot

Over	Approximately	Over	Over
<b>64,000</b>	<b>9,410</b>	<b>1,300</b>	<b>\$25 million</b>
<i>staff participating</i>	<i>ideas proposed in</i>	<i>Implemented in</i>	<i>in savings per year</i>
<i>after two years</i>	<i>first two years</i>	<i>first two years</i>	

## Encouraging Participation

The U.K. Department for Work and Pensions (DWP) uses **clever tools to promote participation and vet ideas**:

- Uses gaming concepts like leaderboards to promote participation
- Uses market dynamics to help vet ideas: users have a limited number of points that they can "invest" in ideas, which makes them more visible. When an idea is implemented and successful, all investors receive a return that they can invest in future ideas

## Characteristics of Reduced System Risk

Use communications and gamification to promote participation.

Develop processes to fund and implement the best ideas proposed to encourage continuous participation.

Involve the community in the idea selection process.

# Cultural Change to Drive Engagement

While employee engagement has been on a downward trend overall, some large agencies and departments have been able to improve their index scores over the last four years. It may be possible for SSA to achieve similar improvements.

## Engagement Improvement

Agencies have achieved significant improvements to employee engagement by making organizational changes. “Agencies that have successfully changed their culture report that it takes about three years of consistent focus before sustained results are typically achieved.”

Consider...

### Securities and Exchange Commission

- **Improved index score five points moving from the fifth quintile to the third**, while other large agencies and departments declined an average of three points
- **Made employee engagement a top priority** and improved communication, offered more training and resources, worked to support creativity and innovation, and work-life balance
- **Created an agency-wide cultural change initiative** called “All Invested,” which brought management, employees, and labor relations together to open lines of communication

**Employee Engagement Index Trends  
FTC, SSA, and Overall**

## Characteristics of Focused Improvement Employee Engagement Goals

Create a new initiative at the organizational level to improve internal communications

Focus on internal communications as a primary area for evaluation and improvement

Incorporate need for overall cultural shift across employee base

# Employee Flexibility and Celebrations in the Private Sector

Some private sector organizations promote employee engagement by investing in efforts to improve organizational culture and leadership.

## Private Sector Engagement

Organizations have achieved high levels of employee engagement by creating a desirable working environment, demonstrating the connection between work responsibilities and meaningful outcomes, encouraging leaders to act with integrity and care, and providing opportunities for employees to be successful through communications and development.

**Edward Jones**

MAKING SENSE OF INVESTING

- “Edward Jones invests heavily in its associates' success, making sure they have **the training, guidance, and work/life balance they need to thrive**”
- Employee engagement is promoted through:
  - Multiple **celebrations at branch and home offices**
  - Associates **can transfer to another branch** without losing seniority or benefits
  - Offers **telecommuting**, retirement planning, and unpaid sabbaticals
- 97%** of employees are proud to tell others they work at Edward Jones

## EMPLOYEE RATINGS

LEGEND

OFTEN OR ALMOST ALWAYS

SOMETIMES

Ranked in 2015 as

**1**

in Great Workplaces for  
financial services

Ranked in 2015 as

**6**

in Fortunes 100 Best  
Companies to Work for

## Characteristics of Private Sector Employee Engagement Goals

Foster an environment that promotes competent leadership and provide a clear direction and vision for the organization

Connect employees to the meaning and outcomes of their work

Promote the free and transparent exchange of ideas and information at all employee levels

# Assessment and Knowledge-Sharing to Improve Recruiting

Though no organizations have achieved transformative growth, some have maintained strong overall scores by executing coordinated strategies that focus on knowledge-sharing and management.

## Maintain Strategies and Coordination

Successful agencies develop and execute recruiting strategies that go beyond complying with executive orders. Some of these strategies are characterized by a focus on using data-driven methods to identify recruiting best practices within large agencies and an effort to spread those practices across an agency.

Consider...

### Department of Commerce

- In the Department of Commerce's 2013-2015 strategic plan they focus efforts on:
  - Using existing "Delegated Examining and Human Capital Assessment and Accountability Framework audits" to identify recruiting best practices to spread across the agency
  - Developing an enterprise approach to learning and collaboration
  - Continually assessing and refining the agency's 80-day hiring model to identify and remove bottlenecks

Percentage of respondents that feel they can recruit candidates with the right skills

The Department of Commerce has consistently outperformed the federal government average. It's recruiting strategy focusses on encouraging collaboration among HR personnel.

## Characteristics of Maintaining Superior Recruiting Strategies and Coordination

Develop an HR strategy that explicitly addresses the unique challenges of federal recruiting

Develop processes and tools for identifying recruiting best practices

Develop communities to foster the spread of best practices across the organization

# Creative Partnerships and Outreach

Agencies can use outreach efforts to attract a diverse pool of highly qualified applicants and improve recruiting outcomes. The relationships developed via outreach efforts can prove to be more effective than traditional candidate marketing.

## Recruiting Improvement

Agencies can improve recruiting outcomes by identifying organizations that have historically been feeders of highly qualified applicants. Once identified, they dedicate efforts to building strong relationships with these organizations to help secure a stream of qualified applicants.

Consider...

**Federal Bureau of Investigation**

- The FBI has improved the effectiveness of its recruiting efforts by:
  - Identifying universities that serve as feeders through data analysis
  - Focusing efforts on identifying universities with diverse student bodies
  - Partnering directly with marketing students and professors at target universities to develop and deploy extremely tailored recruiting messaging on campuses

Percentage of respondents that feel they can recruit candidates with the right skills

The Department of Justice has consistently outperformed the federal government average. The FBI's recruitment strategy incorporates close coordination with target universities.

## Characteristics of Modest Recruiting Improvement

Use data to identify external organizations that can serve as feeders

Consider partnering directly with organizations in your target community to improve effectiveness

Tailor recruitment efforts for the most promising partners and candidate pools

# Full Organizational Engagement with Recruiting

Some private sector organizations drive successful recruiting by developing and encouraging a universal and active recruiting culture.

## Private Sector Recruiting

Recruiting is a siloed function for many organizations. However, some organizations incorporate recruiting into their broader culture and make it a core part of how they do business. Additionally, these organizations work to treat candidates like customers, and to provide them with the best recruiting experience possible.

Consider...

- Developed an organizational culture where every employee, former employee, and supplier was made aware of their responsibility to be continually searching for talent
- Emphasizes an old-school high-touch relationship with candidates, and use their customer relationship management frameworks to support their recruiting process

## Outcomes

The newly developed Talent acquisition model was projected to be profitable in 24 months, but that goal was **actually reached in 13**.

They **reduced time to fill by 18 days**.

They **reduced their cost per hire by 51%**.

They **reduced their search firm fees by 78.3%**.

They **improved their quality of hire** (average performance rating increased by 1.2 points).

They reached a **56% employee referral hiring rate** with no bonus payouts.

## Characteristics of Private Sector Employee Engagement Goals

Enlist all current and former employees in the recruiting effort

Treat candidates and potential candidates like customers

Don't be afraid to be proactive and deliberate in recruiting efforts

# Provide All OPM Flexibility Options

Across the board, the federal government received high marks for its telework and AWS programs. SSA posts impressive satisfaction rates, but still lags behind the government average despite recent improvements.

## Achieving and Maintaining Expected Flexibility

Meet government employee expectations by providing robust telework and AWS technology and options. This requires creating a workplace that supports flexible work, encouraging frontline managers to approve flexibility requests, and ensuring technology allows employees to work remotely.

Consider...

**General Services  
Administration**

- GSA has adopted the core belief that **“Work is what we do, not where we are”** and invested in that vision
  - For example, GSA offices utilize desk sharing, hot desking, and an open environment to support a flexible and mobile workforce
- GSA promotes employee flexibility by offering the full suite of possible alternative work schedules to its employees
  - Employees can work 9 or 10 hours each day to have three day weekends every other week or every week
  - Employees can take advantage of Flexitour to accommodate a range of arrival and departure times

Percent of respondents that are satisfied with telework and AWS policies by select agency

## Characteristics of Achieving and Maintaining Expected Flexibility

Invest in facilities and technology that support remote work and a flexible workforce

Offer the full range of federally allowed AWS to employees

Demonstrate the importance of flexibility to frontline managers

# Achieve Improved Geographic Flexibility

Agencies are improving flexibility by implementing policies and technology that allow employees to achieve their long-term career aspirations and their day-to-day objectives with greater geographic flexibility.

## Expanded Geographic Options

For many agencies, long-term career advancement may require employees to relocate to the Washington DC area. Many qualified candidates are unwilling to relocate. Agencies can improve flexibility by allowing employees to rise into national positions but remain in their home geography.

Consider...

- Struggled to fill openings within HQ in Washington DC
- Implemented the Alternate Duty Location (ADL) program, which allowed employees to apply for and serve in national positions from 26 different regional hubs across the US

*Significantly reduced*

*Employees reported*

***time to fill    reduced attrition***

*open positions*

## Mobile Technology

Over the past 25 years, government productivity has remained flat while productivity in the private sector has risen by more than 50%. Mobile technology has the potential to help close this gap by providing government employees with the tools to flexibly complete their missions from anywhere.

Consider...

### ***Miami-Dade County Foster Care Caseworkers***

- Case workers were struggling to keep up with an expanding case load, and had to return to their home office to complete documentation
- The county distributed camera-enabled smartphones and laptops to 2,300 caseworkers across the county

*Achieved*

*Mobile adoption may lead to a*

***30%***

***45%***

*increase in home visits*

*increase in caseworker productivity*

## Characteristics of Improved Geographic Flexibility

Improve career advancement options across all national geographies

Provide employees with technology that allows them to leave the office and directly engage with the public

Train employees to take advantage of emerging mobile technology

# Formal Training, Mentorship, and Collaboration Opportunities

Though no organizations have achieved transformative growth, some have maintained strong overall scores by investing in a dedicated office for training and developing their employees.

## Dedicated Training and Development Strategy

Organizations that have a dedicated office for training and development create a focus and priority on the skills and knowledge of employees at all levels and at all points in their careers.

Consider...

**National Aeronautic and Space Administration**

- NASA's Training and Development Office focuses on:
  - Opportunities through **formal education, training, and on the job developmental experiences** (e.g., in class, online, on-site)
  - **Leadership development training** serving all NASA Centers, Mission Directorates, and Mission Support organizations
  - **Collaboration** across levels of the organization
  - **Effective technical knowledge capture and transfer** through the NESC Academy, an online tool
  - **Mentorship and fellowship** opportunities for employees

## Training and Development Trends

*In 2014, ranked*

**1**

for training and development out of 19 large agencies

“Employees and Supervisors are encouraged to assess training and development needs”  
- NASA Performance Management

## Characteristics of Dedicated Development and Training

Develop technology capability to offer trainings online and communicate development opportunities effectively

Analyze organizational needs and capabilities for knowledge transfer between employees

Develop programs and opportunities offered through a variety of channels to appeal to a broad employee base

# Peer to Peer Knowledge-Sharing

Organizations have employees who are interested in similar topics, in need of similar information, and willing to help others develop; some organizations have harnessed these employees' knowledge and shared it with other employees.

## Peer Training and Development Strategy

Organizations can be successful in addressing employee knowledge gaps by allowing employees to support training and development initiatives. Training and development can focus on specific groups of employees, or focus across the organization.

Consider...

- Department of State has maintained strong employee knowledge and skills through:
  - **Wide range of training topics**, which allows employees to pursue their personal and professional interests
  - **Formal mentorship program** that pairs civil service employees with experienced colleagues with similar professional interests
  - Flex Connect, an employee developed tool that **profiles employee skills** and helps employees match to short-term roles **to develop skills and diversity of experience**

Percent of Respondents that feel the workforce has necessary knowledge and skills

"There is a level of investment in all of our employees in a way that is more holistic than I have seen in other departments"

*Ray Limon*

*Director of the Office of Civil Service HR Management*

## Characteristics of Outreach and Relationship Development

Use technology systems to support employee connections and networking

Tailor initiatives to address different employee needs and groups

Consider informal methods of building and sharing knowledge across the organization

# Leadership Development

Organizations invest in training and developing their employees to provide customers with a consistent and quality experience and to ensure employees performing organization functions deliver accurately and consistently.

## Private Sector Knowledge Gaps

Organizations can successfully train and develop employees by evaluating employee's skills needs and providing high quality training from experts in the field. These organizations also invest in personal skills gap development through tuition reimbursement or partnerships with universities.

Consider...

- Blue Cross Blue Shield of Michigan faced transformational changes like national health care reform and addressed the resulting skills gaps, by:
  - Developing a Leadership Competency Framework to **build skills in employees in a new environment**
  - **Aligning strategic goals, performance reviews, and leader development with competencies** under three themes (Deliver Results, Lead People, and Build for the Future)
  - **Incorporating competencies into leadership training**
  - **Hosting webinars** for techniques for enhancing competencies

## Blue Cross Blue Shield of Michigan Training and Development Overview

- Number of:
  - Employees: 7,707
  - Fulltime trainers: 115
  - Part-time trainers: 5
  - Subject-Matter Experts: 158
- Education:
  - On-site degree programs from Michigan universities/colleges
  - Provided education, training, and development
  - Tuition reimbursement
  - Scholarship opportunities

*In 2015, ranked*

**5**

in Training Magazine's top  
125 awards

## Characteristics of Private Sector Employee Knowledge Gap Goals

Determine impacts of external regulations on workforce skill development and training needs

Expand reach and frequency of training and development communications through technology

Define information employees need to be successful in their jobs

# Tools for Effective decision-making

Some organizations have created clarity and simplification in their processes and policies and have made information readily available to their employees, so employees have the tools they need to make decisions.

## Clear and Simplified Rules

Agencies follow rules and regulations to make decisions when providing services. Some organizations have overcome the complexity and lack of clarity on how benefits decisions are made by simplifying associated rules and regulations.

Consider...

- Veterans filing claims for PTSD prior to a rule change needed to **meet specific medical diagnosis requirements** and may have needed a **claims adjudicator** to complete the benefits decision process
- The rule change **simplifies** the process and instead accepts a simpler doctors diagnosis to support claims without an adjudicator

*“VA’s new streamlined, science-based regulation allows for faster and more accurate decisions that also expedite access to medical care and other benefits for Veterans.”*

## Information Availability

Organizations equip employees with the proper information for decision-making so they are able to better serve customers or support the mission of the organization.

Consider...

- CFPB launched a program to **provide financial counseling services** to people in the workforce with disabilities to help **them make financial decisions**
- Although this is a new untested program, it **requires key information for employees** to make decisions including information that helps employees:
  - Determine which **resources customers** need based on their unique characteristics
  - **Assess financial current state** of customers

## Characteristics of Tools for Effective Decision-Making Goals

Consider organizational culture and environment when creating decision support tools

Identify beneficial training and technology that can assist in providing accurate and timely information

Determine triggers (e.g., customer complaints) and frequency for reviewing rules, policies, and procedures

# Decision-Making Documentation and Improvement

Leaders of organizations make decisions for the future of the organization and define the path forward. Some organizations adopted understanding the decisions their organization makes before making changes.

## Decision Knowledge First

Some organizations changed the way they look at simplifying processes. They first understand the key decisions the organization makes and needs to make, and then change processes to support making those key decisions.

Consider...

- In 2006, Ford's business was facing collapse, and leadership **determined and documented the critical decisions** necessary to turnaround the business
- Leadership **organized critical decisions** by step of the value chain and **outlined infrastructure for executing decisions effectively**
- **Progress was tracked weekly** and resulted in a series of organizational decisions
- Ford determined to accomplish the critical decisions a restructure of the organization was needed which **resulted in avoiding bankruptcy**

## Decision Types

- **“Big, one-off decisions that individually have a significant impact”**
  - For SSA this could be around partnering with other agencies
- **“Small, routine decisions that cumulatively have a significant impact”**
  - For SSA this could be guidance on field interactions with customer

## Characteristics of Organization Decision-Making Goals

Establish criteria for determining which decisions are critical to the organization

Define simple and clear roles for stakeholders in decision-making processes

Consider what components of the organization are impacted by critical decisions

# Continuous Improvement of Operations and Lean

Traditionally continuous improvement of operations have been thought to provide the most benefit to manufactures, but organizations in the service industry have also benefited from continuous improvement.

## Continuous Improvement in Government

Continuous improvement support working more effectively and efficiently by identifying and eliminating waste in processes. Continuous improvement helps to improve the quality, transparency, and speed of agencies' processes.

Consider...

### Environmental Protection Agency

- The EPA has integrated continuous improvement **across headquarters, regional offices, and state environmental agencies**
- Since 2003, Lean and Six Sigma methods (e.g., **value stream mapping and Kaizen events**) have been implemented across the EPA to evaluate and improve processes
- The EPA works to **help other agencies** to lean their operations and processes by **publishing toolkits on conducting Lean improvement events**

## State Agencies using Continuous Improvement

- EPA's Office of Water, EPA Region 7, and four states designed new processes to improve water quality standards and pollutant discharge processes, which reduced **process steps from 50 to 26, and reduced process time from a few years to several months**
- About 30 state environmental agencies using continuous improvement for permits **reduced administrative review times by 50%**
- EPA Region 6 decreased total processing time for Pesticide Enforcement Case Resolution **from 455 days to 216 days**

*EPA headquarters and regional offices:*

*Shortened process  
timeframes by up to*

**82%**

*Reduced number of  
process steps by*

**63%**

## Characteristics of Continuous Improvement Systems

Determine appropriate processes for continuous improvement efforts

Train and certify employees on lean processes to facilitate process improvement across the organization

Locate processes that are performed by multiple areas of the organization and should be done in a similar way

# Customer-Centric Infrastructure

Some organizations have adopted customer-centric goals as organization wide goals and have adapted their business processes and infrastructure to support a customer experience focus.

## Customer-Centric Organization

Customer-centric organizations invest in tools to better understand their customers, adapt infrastructure to support customer experiences, and create a customer-centric culture across all organizational levels.

Consider...

- United Healthcare **created a new position** of Vice President of Member Experience for Medicare and Retirement, which **cut across organizational lines** and allowed United Healthcare to make the following changes:
  - Invested in Member Journey Maps **to understand their customers** and **support employees** personalizing solutions
  - Gained leadership support and buy-in** across all functional areas of the organization through translating customer experience impacts into tangible organizational benefits
  - Engaged employees by providing **customer experience ownership and accountability** in their role
  - Aligned programs, products, and services** with customers needs

*“United Healthcare has created a better consumer experience by embedding the voice of our customers in our **culture** and **engaging employees** to listen to and understand our members on a more personal level. As a result, we’ve seen significant improvements, including a **decrease in customer complaints and calls to customer service.**”*

*- David Shapiro, VP Member Experience*

## Characteristics of Customer-Centric Infrastructure Goals

Focus on creating a customer-centric culture at all levels and across functions of the organization

Embed customer-centric goals into organizational priorities and strategies

Consider the customer journey through all channels and interaction types for programs

# Achieve Agile Development

Some federal government agencies has begun to embrace agile software development in an effort to reduce software development costs and risks.

## Agile Development

Agile software development prioritizes the rapid iterative development of functional code to the customer. It serves as a compelling alternative to traditional waterfall development by reducing long-term program risk and by prioritizing the creation of a functional product or service. However, switching to agile development is not without its challenges, as it differs significantly from waterfall.

Consider...

### Federal Bureau of Investigations

- From 2006 to late 2010 the FBI spent \$405 million developing a non-functional case management system using waterfall development
- In 2010 it switched to agile development, and brought the majority of development work in-house
- Following this change, the FBI significantly reduced monthly development costs, and managed to complete software development within one year, though hardware issues delayed final deployment

## GAO's Top 10 Agile Lessons Learned from 5 Agency Agile Implementations

1. **Start** with Agile guidance and an Agile adoption strategy.
2. **Enhance** migration to Agile concepts using Agile terms and examples.
3. **Continuously improve** Agile adoption at both project and organization levels.
4. **Seek** to identify and address impediments at the organization and project levels.
5. **Obtain** stakeholder/customer feedback frequently and closely.
6. **Empower** small, cross-functional teams.
7. **Include** requirements related to security and progress monitoring in your queue of unfinished work (backlog).
8. **Gain** trust by demonstrating value at the end of each iteration.
9. **Track** progress using tools and metrics.
10. **Track** progress daily and visibly.

## Characteristics of Agile Development

Don't just implement agile, make a concerted effort to *become* agile. Don't be afraid to deviate and be flexible

Realistically assess your readiness for agile development, and be sure to plan for roadblocks and setbacks

Prioritize the iterative creation of functional software over everything else

# Technology and Data Solutions

Although agencies have faced challenges in accurately measuring, tracking, and reducing improper payments, some have focused on technology and data to start to reduce improper payments.

## Technology and Data Focus

Agencies have worked to reduce the percentage of improper payments relative to all payments by developing and implementing strategies to improve data collection, integrate technology systems, and use analytics.

Consider...

- Although Department of Labor has not been able to reduce improper payments, but it has been able to not fall into the trend of increasing improper payments. This was accomplished through the following:
  - **Defined seven strategies** for reducing improper payments, including **three focused on technology and data exchange**
  - Defined **best practices** and shared across organization
  - Determined **root causes at the organization level and state level**
- All new efforts to reduce improper payments focus on data and systems:
  - **Designing pilot program to link systems and share data**
  - **Funding a Center of Excellence** to explore new data and technology to use for predictive analytics

## Improper Payment Rate Unemployment Insurance

*Most common causes for improper payments:*

**35%**

Continuing to make claims after returning to work

**24%**

Failure to meet state work search requirements

**19%**

Untimely or inaccurate separation info.

## Characteristics of Technology and Data Focused Goals

Investigate current technology and data capture methods for areas of improvement

Determine if some parts of the organization have lowered improper payment rates and document best practices

Focus communications on root causes and desired actions from stakeholder groups

# Process Evaluation and Redesign

Organizations have been able to reduce improper payments by evaluating the payment process and identifying areas for change and improvement.

## Process Evaluation and Redesign

Agencies have reduced improper payments by identifying main root causes as well as components of causes for improper payments. Agencies then change processes and policies associated with errors.

Consider...

**United States Department of Agriculture**

- Although overall program level improper payments remain high, USDA focused efforts on reducing aspects of improper payments for Child Nutrition Programs and achieved improvements through:
  - **Developed a study to track** improper payment rates and amounts
  - **Reduced burden of application and certification process** through implementing a Community Eligibility Provision
  - **Redesigned administrative review process**
  - **Partnered** with OPM to design a new prototype meal application
- Recent actions that focus on further reducing improper payments:
  - **Invested \$8.5 million** to improve operational and oversight efforts
  - Posed a **new rule** to help states target highest risk districts

## Improper Payment Rates National School Lunch Program

*Aggregations errors reduced from*

**3.8% to 0.8%**

in frequency for the lunch program over five years

*Aggregations errors reduced from*

**6% to 1.2%**

in frequency for the breakfast program over five years

## Characteristics of Process Evaluation and Redesign Goals

Consider stakeholders involved in improper payments and how training and technology can assist in reduction efforts

Adapt policies as needed to improve and simplify processes identified as causes or contributors to errors

Prioritize areas of focus for reducing types and components of errors

# Sophisticated Data Analytics

The Veteran's Health Administration has embraced the use of predictive analytics to help improve the quality of the healthcare it provides to patients.

## Analytics Excellence

Agencies can achieve analytics excellence by using tools like predictive statistics or machine learning to project what may occur in the future, and respond accordingly. This allows for both improved forecasting and proactive, rather than, reactive decision-making.

Consider...

- Developed the care assessment needs (CAN) score, a **weekly analytic that predicts the likelihood of patient hospitalization or death** within 90 days to a year
- Allows doctors to **proactively identify high-risk patients** and provide them with targeted interventions before they are hospitalized

*Reduced the mortality rate for targeted patients by*

**10%**

*Agencies that use advanced analytics should **ensure they have the proper skillsets and processes in place to help ensure success.** Many organizations are investing in **Data Scientists**, experts with advanced degrees in statistics, economics, or computer science.*

## Characteristics of Data Analytics Excellence

Explore using advanced statistics and machine learning to achieve data analytics excellence

Develop processes that incorporate data analytics into existing decision-making processes

Train or hire employees to create a workforce proficient in data analytics

# Achieving External Collaboration

Some organizations are improving the quality and breadth of data they have access to by sharing data and expertise with external organizations.

## External Collaboration

Organizations that seek to become data-driven don't always have access to all the data they need. When this occurs, they can pursue external partnerships. This may occur for single programs on an ad hoc basis or organizations may use fully integrated databases. Additionally, many organizations use these relationships to share talent and the skills of analytics personnel.

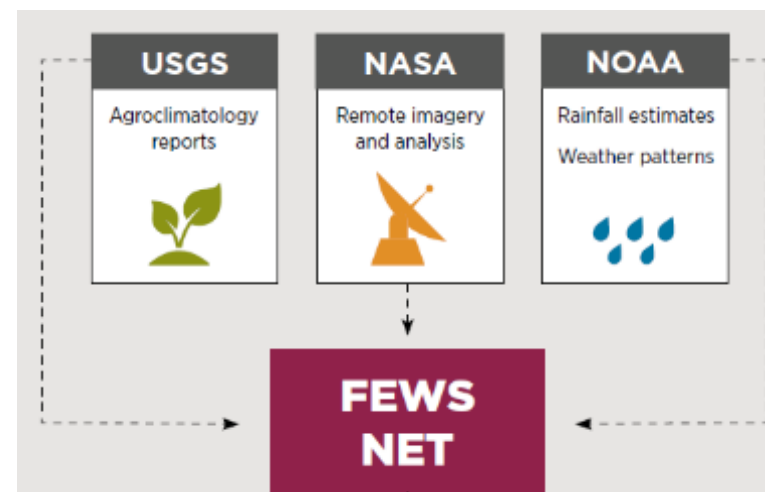

Consider...

- USAID wanted to **improve its ability to predict when and where famines could occur** across the world
- It **lacked the data and expertise** to accomplish this mission
- **Established inter-agency agreements** with USGS, NASA, and NOAA to acquire the necessary data and analysis for FEWS NET

*Guides the distribution of as much as*

**\$1.5b** *in food aid each year*

*"We focused very early on evidence and data and science," Eilerts said. "We didn't flail around. It was, 'How do we get data and information to say if there is a [food] access... problem.'"*

*-From Data to Decisions III, Partnership for Public Service*

## Characteristics of External Collaboration

Identify exactly what type of data you need before initiating inter-agency agreements to streamline the process

Consider partnering with multiple agencies if it improves the quality of data you have access to

Focus on building strong relationships between analysts at different agencies to improve the change of success

# Data Exchange Integration with Electronic Health Records

Some governments have integrated their systems directly with physician electronic health records, which facilitates the quick and secure transfer of medical information when making disability claim decisions.

## Electronic Health Record Integration

Processing disability claims often requires evaluating the health records of an applicant. Often these records are submitted along with the initial application, but the evaluating agency may need to access additional records. By integrating with EHR databases, agencies can quickly acquire the necessary records.

Consider...

Approximate Disability Processing Times

Since 2010, Centrelink has had direct access to electronic medical files for all new claimants. This integration is made possible by Australia's national eHealth system. Additionally, it is important to remember that there are other factors that likely contribute to Australia's quick processing times. For example, Australia also implemented updated disability support pension processes in 2010 which included clearer disability guidelines for doctors and a dedicated physician team that supports complex claims.

## Characteristics of Integrating with Electronic Health Records

Integration may require a national EHR, though a piecemeal approach is potentially possible

Integration must be supported by appropriate processes to maximize processing time reduction

Integrating with EHRs is not a silver bullet, and countries can achieve improvements via clear guidelines and dedicated support teams

# Achieving Enterprise Data Integration

Some organizations are consolidating their databases and implementing improved naming, data, and metadata standards to improve their ability to make data-driven decisions.

## Data Integration

Data integration often requires new technology and processes to improve standardization and unification. This could involve anything from creating new data systems that integrate previously disparate data sets to enforcing standardized data coding and naming conventions.

Consider...

### A Large Financial Institution

- The organization was **struggling due to disparate databases and poor data quality** and had implemented several time consuming processes like paper-based reporting to work around integration issues
- The organization **revised and unified the standards for encoding financial data** to improve reporting
- They **overhauled their database structure** and implemented a new reporting application to take advantage of the newly unified databases

*Manages over*

**200 million**

*new records each day*

*Reduced reporting time by*

**60%**

By improving data integration, the organization was able to **design several new data reports and dashboards** for its executives. This helped the organization make **smarter data-driven decisions** at the executive level.

## Characteristics of Data Integration

Data integration is not just a technology challenge, new data conventions and standards are necessary for success

Don't integrate just to integrate. Have a specific business objective that integration supports

Be prepared for the significant challenges associated with IT system integration

# Achieving an Understanding of Cybersecurity Maturity

There are several cybersecurity maturity models that help organizations assess how coordinated and comprehensive their cybersecurity is. Organizations are using these models to understand the overall state of their cybersecurity.

## Cybersecurity Maturity

Cybersecurity is a complex, multifaceted challenge and addressing it requires organizations to have a deep understanding of their capabilities. Organizations can develop this understanding by assessing their cybersecurity practices against one of many existing cybersecurity maturity models.

Consider...

- In 2014 Intel wanted to better **understand its cybersecurity maturity**, so it launched a pilot program to assess its maturity with the National Institute of Standards and Technology's (NIST) Cyber Security Framework
- Using the framework, it **developed a unified understanding of its cybersecurity capabilities and gaps**

*Provided first ever*

*Allowed the creation of*

***cross-team new tools/dashboards***

*risk management strategy*

*for monitoring risk and maturity*

## Cybersecurity Maturity Models

There are several cybersecurity maturity models in existence. SSA should identify the model that works best for it, and then customize it further to meet its unique needs. Some models include:

- National Institute of Standards and Technology (NIST) Cybersecurity Framework
- NIST 800-53
- CERT
- Federal Information Security Management Act (FISMA)
- Control Objectives for Information and Related Technology (COBIT) 4.1
- Information Technology Infrastructure Library (ITIL) V3 2011
- SANS Top 20

## Characteristics of Transformative Employee Engagement Goals

Adapt the identified maturity model to account for specific organizational concerns/risks

Assess across the organization and build a common understanding of security strengths and weaknesses

Identify risk areas and develop remediation plans accordingly, be sure to reassess often, given rapid evolution of cyber threats

# Achieving Adaptive Risk Management

Some organizations are improving their ability mitigate cyber risk by implementing processes that drive continual cyber security improvement and adaption.

## Adaptive Risk Management

Organizations can mitigate cyber risks by implementing iterative processes that continually review the threat landscape and adjust cyber defenses accordingly. These processes are often integrated into cyber security maturity models, but they go beyond these frameworks by proscribing processes for continual improvement.

Consider...

### U.S. Department of State

- The State Department implemented an automated and dynamic scorecard that constantly assessed risk across the organization
- Scores constantly changed as new threats and vulnerabilities emerged, and stakeholders across the organization addressed emerging risks

*Reduced measured risk by*

**94%**

*following implementation*

*Program owner was promoted to oversee*

### DHS' National Cybersecurity

*There are many ways to implement adaptive risk management processes. Some organizations use **information security management systems (ISMS)**. ISMS' differentiate themselves by incorporating continual improvement processes like PDSA:*

- **Plan:** Objectives, predictions, plan the who, what, where, when of the cycle
- **Do:** Carry out plan and document the results
- **Study:** Analyze data and results of execution
- **Act:** Address the changes that need to be made based on studies

## Characteristics of Adaptive Risk Management

User iterative assessments and improvement processes to adapt to the evolving threat landscape

Tie improvement processes to a rigorous cybersecurity maturity model

Automate reporting as much as possible given technology and system restraints

# Achieving Reduced System Risk

Some organizations are reducing their system risk by applying tough new guidelines and overhauling their network security technology and policy structure.

## Reduced System Risk

Organizations are reducing their system risk by implementing new technologies and modern network architecture philosophies. When thoughtfully executed, these changes can improve security for the organization and its customers.

Consider...

### U.S. Department of Health and Human Services (HHS)

- HHS has developed a disparate patchwork of siloed network security solutions that both wasted resources and failed to provide adequate security
- In response, HHS centralized and unified its network security software and hardware and created a single cybersecurity clearinghouse
- They implemented dozens of new technologies and managed to complete the entire transformation within one year

*Network security monitors*

**10 billion**

*logs per week*

*Identifies*

**3-4**

*suspicious network events each day*

## Other Network Architectures

There are many ways to reduce system risk by improving network architecture. For example Forrester proposes a **Zero Trust** model for network security. This model abandons the idea of a “trusted” internal network. Moving towards this model requires that organizations:

1. Identify their most “toxic” data
2. Document the precise flow of their data through their network
3. Develop “micro perimeters” around toxic data to improve security
4. Implement new rules/access logic for micro perimeters
5. Monitor their new zero trust ecosystem

*This is one example of an alternative network architecture that reduces system risk.*

## Characteristics of Reduced System Risk

Ensure network and technology changes align to the broader system security strategy

Identify the specific network architecture and technology that meets mission needs

Don't neglect the cultural and people components of system risk

# Management of the Medical Examination Process

Some governments deploy their own physicians to manage the medical examination process. This helps expedite the medical evaluation process and reduces the probability of fraudulent claims.

## Medical Examination Process

Some countries contract or appoint physicians directly to administer the medical examination/assessments necessary to determine whether an applicant is eligible for disability. Though this process is more resource intensive, it has the potential to significantly reduce disability processing times. Additionally, it helps ensure that fraudulent claims are not approved and processed.

Consider...

Approximate Disability Processing Times

During the first phase of assessment, a physician appointed by the National Insurance Institute (NII) examines the patient and determines their medical disability percentage. These physicians can then coordinate with the local NII branch, which is electronically integrated with central NII computes, to provide the necessary information to the claims officer that makes the final determination. As the physicians are appointed by NII, there is a significantly lower chance that they will improperly complete an application, which would require follow-up investigation.

## Characteristics of Managing the Medical Examination Process

Appoint trusted physicians to directly administer the necessary examinations and tests

Provide the infrastructure necessary to allow local physicians to submit their findings quickly and securely

Integrate the software systems of all local offices with the central office

# Achieving Integration with Electronic Health Records

Some governments have integrated their systems directly with physician electronic health records, which facilitates the quick and secure transfer of medical information.

## Electronic Health Record Integration

Some organizations have begun to integrate their systems with electronic health records to improve operations. Integration has the most significant impact on disability claim processing time, but can improve any process dependent on medical information.

Consider...

- In 2010, Centrelink integrated its systems with citizen's electronic medical files
- Integration is made possible with Australia's national eHealth system
- Australia has one of the quickest disability claims processing times in the world, despite having one of the highest disability rates among comparable countries
- Other factors likely contribute to its processing speed

Approximately **5.3%** of working age population eligible for disability

Approximately **53** fewer days required for processing compared to US

## Characteristics of Integrating with Electronic Health Records

Integration may require a national EHR, though a piecemeal approach is potentially possible

Focus on major electronic health records (e.g., DoD) if pursuing a piecemeal approach

Integration must be supported by processes that take advantage of seamless access to data (e.g., physician for complex cases)

# Transformational Leadership to Drive Engagement

Transformational leaders can help the agency break new ground. Revised performance metrics and a culture that supports innovation are critical enablers for supporting and growing transformational leaders. As part of the effort to improve service to veterans through increased employee engagement, Veteran's Affairs (VA) is developing its leaders to champion the change and own the results.

## Transformational Leadership

The Secretary of Veteran's Affairs aims to improve customer service for veterans through the increased engagement of employees and improved VA culture.

The Federal Employee Viewpoint Survey and VA All Employee Survey showed agency leaders' scores are actually lagging behind other organizational metrics. They have room for improvement.

Leaders were made accountable for improving employee engagement within their purview, aligned to the President's Management Agenda and OPM guidelines.

## Transformational Leadership Strategies

- Engage leaders as teachers to demonstrate the behaviors necessary to move the organization toward the desired future state
- Focus on leader performance and building a leader performance scorecard to hold executives accountable for the change
- Equip leadership with an Employee Engagement Playbook to support their ability to meet performance goals
- Communicate progress of changes and improvements to all levels of the organization – use a communications cascade to push messaging through managers to front line staff

## Characteristics of Transformational Leadership Strategies

Incentivize transformational leadership by building desired behaviors in to performance metrics for executives

Provide tools and information necessary to support leaders as they lead transformational change

Elevate leadership to teach and guide behavioral changes through their own example

# Field Engagement and Empowerment

Organizations recognize that to efforts to promote employee engagement and empower employees need to occur across organization and at all level. Organizations with geographically disperse operations need to focus heavily on the field staff.

## Empower The Field

Citizenship and Immigration Services (CIS) empowered front line staff to solve their own problems through local office pilots, communities of practice, regional innovation challenges, and creative incentives.

The Director of CIS wanted to tackle the problems that staff were facing in the field to increase the engagement of CIS employees. Most of the CIS staff adjudicate benefits, evaluate benefits, and determine an action, similar to SSA. The workforce believed in the mission, but they were very production driven and they felt that production got in the way of quality.

**U.S. Citizenship  
and Immigration  
Services**

## Empowerment Strategies

- Discussed staff challenges with the Director of CIS and prioritized recommendations (based on LOE and impact).
- Director agreed to own the change himself. He also recognized that the change needed to be owned by the front line staff.
- Director engaged the Unions right away to create guidelines and to align interests.
- CIS conducted six different pilots in the field to test solutions to common staff problems.
- Established a steering committee to govern the pilots and engage local leaders.
- Fostered innovation challenges so employees could come up with ideas to solve any problem they wanted.
- Incentivized staff with creative, low-cost rewards (e.g., Area Directors would personally call and thank an outstanding employee).

## Characteristics of Field Empowerment Strategies

Identify an executive sponsor to champion the effort

Proactively leverage Union relationships to align organizational interests

Support innovation at the front line level, empowering employees to solve their own issues

# Customer-Centric Management Structure

Some agencies have invested in new organizational capabilities to champion transformation and drive accountability to the top.

## Customer-Centric Culture

Some organizations have implemented strategic management that works to connect distinct silos or groups with-in the organization and overcome barriers to collaboration and integration. This management structure can exist to overcome a specific organization-wide problem or to continually develop solutions..

Consider...

- The Veterans Administration (VA) wanted to **improve its services to customers** through an experience office
- Embedded Employee Experience capability within Veteran's Experience
- The VA **hired outside leaders** with experience in standing up customer experience capability
- Conducted Learning Tours with Luminary companies known as **leading edge in customer experience**
- **Increased focus on data analysis** for common understanding
- Developed both outcome and "**early warning**" **indicators** for proactive customer services

## Veteran's Experience Office Functions

1. **Access and Integration** – Build, deploy, and maintain the processes and technology needed for a seamless customer experience
2. **Insight and Design** – Orchestrate customer touch points based on a consistent, shared understanding of their needs
3. **Navigation and Advocacy** – Oversee and enhance touch points with our customers, ensuring they can understand and easily access VA benefits and services
4. **Performance Management and Measurement** – Assess performance from the perspective of customers
5. **Operations and Governance** – Enforce standards of performance informed by the customer's point of view

## Characteristics of Customer-Centric Culture

Integration of customer focus across organization groups/silos/components

Use of data analytics for proof points of changes accomplished

Lead change with the right talent from inside or outside of the organization

## B.2 Trends

# Customer Trends Summary

***Customers expectations are changing to include:***

1

**Flexible and Seamless:** multiple service channels and seamless service delivery across channels

2

**Transparent:** greater visibility into and understanding of service delivery

3

**Self-Service:** access to simple self-service options

4

**Customized:** service delivery customized to individual preferences and needs

5

**Instantaneous:** rapid or instant service delivery

6

**Courteous:** consistently helpful, pleasant, and efficient experiences with employees

# Customer Trends Relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving customer satisfaction. For each trend, consider how it may factor into your goals.

	Trends	Examples
1	Every single company on Forrester's "Most Improved" CXi list for 2014 launched or re-launched a <b>digital experience</b> in the last eighteen months. This suggests that improving an organizations digital experience may be a key component of improved customer satisfaction.	An insurance company actively collected customer feedback regarding their member portal and used it to <b>overhaul their entire web experience</b> . They managed to improve their CXi score by 20 points from 2013 to 2014.
2	Organizations with a brick and mortar footprint are <b>redesigning their physical spaces</b> to improve customer satisfaction. Traditional changes like this may not be as new or exciting as implementing digital experiences, but they can have a significant impact on customer satisfaction.	Over the course of the past few years, a bank has updated many of its branches and ATMs to <b>improve their aesthetics and customer ergonomics</b> . They improved their CXi score by 12 points from 2013 to 2014.
3	Organizations are <b>overhauling the processes of their frontline employees</b> to improve the customer experience. This requires understanding how the customer interacts with the existing process, where pain points are, creating new processes that remove these pain points, and training employees accordingly.	An organization now instructs its field techs to examine their customer's entire systems even when they visit for a specific problem. This allows them to <b>catch problems before they arise and proactively address customer concerns</b> . They improved their CXi score by 14 points from 2013 to 2014.
4	When addressing customer satisfaction challenges, companies are starting to <b>dig deeper to treat the disease rather than the symptom</b> . The visible pain point for a customer may not be directly tied to what needs to change to address it.	An organization tried to improve its store experience by training its frontline staff. However, they weren't making headway. They <b>dug deeper and discovered that regional managers weren't rated on customer satisfaction</b> . Therefore, these managers didn't hold stores accountable for improvement.

# Customer Trends Relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in expanding channel services. For each trend, consider how it may factor into your goals.

	Trends	Examples
5	In a 2014 Forrester survey, <b>web-based self-service</b> surpassed the use of the voice channel for the first time as the most widely used communication channel for customer service. Forester predicts in 2015 that customers will continue to <b>demand effortless interactions over web and mobile self-service</b> channels.	Multiple cable and internet providers offer self installation for high speed internet services, eliminating the need for scheduling a technician to set up the equipment and providing instant access to internet. An organizations high speed internet service <b>supports self installation through step by step processes</b> and the ability to contact support if needed.
6	Companies are exploring expanding capabilities in existing channels. For example, some are exploring <b>expanding mobile channel capabilities through voice assistants and video chat</b> with screen sharing and annotation.	A bank has an online <b>technical support function for commercial business services that enables a representative to view a customer's desktop</b> and trouble-shoot the issue with the customer. Online customer experience is ranked higher than in person customer service for People's United Bank.
7	Organizations with brick and mortar locations are using channel integration to enable <b>strategic partnerships with complimentary service providers</b> to improve customer experience and minimize customers trips to additional physical locations.	An insurance company offers Auto Repair Xpress, which is a service that <b>partners with car repair locations</b> , to have customer who filed a claim, schedule an inspection online and go to the Xpress location where the car will be inspected and work will be completed. Customers rated this service as 4.6 out of 5 stars, and 93% would recommend this service to a friend.
8	Organizations are using <b>social media</b> as a tool to expand and integrate channels. This allows them to engage with customers to improve customer satisfaction and collect customer data.	An organization uses social media to engage with customers who mention them in online posts, and works to resolve issues for customers. They <b>respond to customer posts within the hour</b> with relevant information.

# Customer Trends Relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in tailoring customer service. For each trend, consider how it may factor into your goals.

	Trends	Examples
9	Companies are going beyond reactive engagement with customers to exploring <b>individual proactive customer engagement</b> , which can include providing support and content to customers before it is requested. This enables customers to successfully complete interactions and make decisions.	A bank ATM uses <b>customers' transaction history to individualize the interface</b> . By taking into consideration the customer's personal information and context, proactive experiences go beyond meeting basic needs by tailoring experiences to each customer.
10	Companies are reevaluating the technology systems they use to enable tailored customer experiences. Some have begun to shift from only using closed source technologies to <b>open platform providers</b> , enabling them to better understand, tailor, and scale interactions with their diverse customer base.	In 2013, and insurance company selected ForgeRock to support their online customer portal initiative, which through an open platform enables agile and scalable customer interactions. This platform <b>allowed customers to easily see their individual policy information all in one place</b> , and enabled scalability while customer policy counts increased to over 22 million.
11	Organizations are going beyond traditional methods of demographic segmentation and are <b>analyzing customer behavior</b> to divide their customer base into segments. This provides an understanding of individual customer behavior to create segments and tailor customer service.	An organization has begun to <b>segment customers based on behavior and developed a system for interacting with and rewarding the segment of their customers that are active on social media</b> and are generating customer referrals. They received 331,500 online referrals in the first three months of this change.
12	Organizations are <b>defining key performance indicators</b> for tailored service. They are <b>tracking performance through customer behavior data</b> to be responsive to customer needs and adapt tailored services to the individual customer or segment of customers.	An organization simplifies thermostat setup and reduces domestic energy consumption by <b>monitoring and measuring customer's daily activity, and creates a personalized schedule to maximize cost savings and comfort</b> . On average, customers cut heating and cooling bills by 20% through this measurement and tailored service.

**Sources:** <http://customerthink.com/forresters-top-trends-for-customer-service-in-2015/>; <http://www.forgerock.com/en-us/about-us/press-releases/geico-selects-forgerock-support-online-customer/#en-us/about-us/press-releases/geico-selects-forgerock-support-online-customer/>; <http://www.clickz.com/clickz/news/2350371/24-hour-fitness-uses-social-to-win-new-members>; <http://www.techrepublic.com/blog/big-data-analytics/measure-actual-customer-behavior-using-big-data-analytics/>

# Customer Trends Relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in cutting disability processing times. For each trend, consider how it may factor into your goals. For the majority of these trends, the United States is already a leader.

	Trends	Examples
13	Some countries have historically used a series of programs to administer their disability insurance safety net. Some countries are moving away from this model, and are deploying unified national disability insurance programs to improve the consistency of service. However, these are challenging transformations, and it is not uncommon for countries to encounter difficulties as programs are rolled out.	<b>Australia</b> is currently rolling out the National Disability Insurance Scheme to select populations across Australia, and will complete the launch by July 2016. The initial evaluation report on the rollout of the scheme is due for release in July of 2015.
14	Some countries are moving toward an electronic case management system similar to that employed by the United States. As countries deploy these systems, some of them are using it as an opportunity to integrate other technology improvements into their system. For example, some countries are using these system overhaul opportunities to integrate electronic health records into their evaluation process.	<b>Israel</b> is currently rolling out <i>Tevel</i> , a system that will allow citizens to file disability claims via the internet, supports and coordinates simultaneous work by staff on claims, and integrates with the EHRs of the various sickness insurance funds (similar to HMOs) that exist across Israel.
15	Like the United States, some countries are deploying fast track processes to expedite the claims of citizens that are manifestly disabled. By creating fast track lanes, governments can reduce the workload for its evaluators while getting the most disabled citizens the help they need more quickly.	The <b>United Kingdom</b> has various fast track lanes for its varied disability insurance programs. At the outset of the process, claimants identify whether they are applying under a relevant fast track provision. After doing so, their case is reviewed by the government within 24 hours. This allows the UK to process fast track claims in an average of 6.1 days.

# Employee Trends Summary

## *Employee expectations are changing to include:*

1

**Ownership:** authority and resources to implement impactful changes in their job and working environment

2

**Informed Feedback:** frequent, clear, and actionable feedback from managers

3

**Mission Connection:** see and understand how their day-to-day job impacts the organization's mission

4

**Learning Opportunities:** opportunities to learn and improve their skills, and to apply those skills in their day-to-day job

5

**Flexibility:** tools to complete their mission when and where it is most impactful; work-life balance

6

**Loyalty:** connection and engagement with their work resulting in greater willingness to stay at their organization

# Employee Trends Relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving employee engagement. For each trend, consider how it may factor into your goals.

	Trends	Examples
1	Organizations that improved their employee engagement used <b>multiple communication channels</b> to disseminate messaging and <b>provided opportunities to collect and incorporate employee feedback</b> .	In 2008, the <b>Department of Transportation</b> had a relatively low employee engagement score. DOT managers regularly <b>held town halls, visited field offices frequently, and implemented employee ideas for improving the agency</b> that they received through an online suggestion tool, IdeaHub. Agency <b>leaders wanted employees to know that they valued their feedback</b> . DOT improved 10 spots in ranking, and improved from the fifth quintile to the fourth in employee engagement index
2	Although organizations have stated that there is not a known one-size-fits-all approach for improving employee engagement across an organization, GAO has analyzed employee engagement data across agencies and <b>identified six key drivers for employee engagement</b> . These drivers are <b>a good starting point and should be customized</b> to organization's needs.	GAO analysis indicates that six practices were <b>key drivers higher levels of employee engagement</b> : <ul style="list-style-type: none"> <li>▪ Constructive performance conversations</li> <li>▪ Career development and training opportunities</li> <li>▪ Work-life balance</li> <li>▪ Inclusive work environment</li> <li>▪ Employee involvement</li> <li>▪ Communication from management</li> </ul> These drivers are a starting point for improving and sustaining employee engagement
3	Employee engagement has been described as <b>removing the barriers</b> that prevent employees from <b>providing input</b> and that prevent employee input from <b>making positive changes</b> to the organization.	Agencies have removed employee engagement barriers in many different forms including: <ul style="list-style-type: none"> <li>▪ <b>Adjusting organizational culture</b> to an open environment</li> <li>▪ <b>Improving communications</b> from leadership</li> <li>▪ Creating development and connection opportunities for <b>all levels of employees</b></li> </ul>

# Employee Trends Relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving employee engagement. For each trend, consider how it may factor into your goals.

	Trends	Examples
4	Some organizations are moving beyond annual employee satisfaction surveys and <b>embracing tools that allow them to measure employee satisfaction as closely as they measure customer satisfaction.</b>	When an organization rolled out a series of initiatives focused on improving employee engagement, it knew it couldn't rely on the annual survey anymore. It deployed a <b>tool that allowed the collection of real-time employee feedback</b> so it could better monitor the impact of its initiatives.
5	Some organizations believe that “culture eats strategy for breakfast” and have focused the efforts of senior leaders accordingly. When <b>senior leaders focus on employee engagement</b> , employees throughout the organization may take it more seriously.	An organization recognized that engagement starts at the top, and <b>incorporated senior leaders from across the organization into engagement efforts.</b> These leaders were held accountable for engagement results within their part of the organization.
6	Some organizations have begun to focus engagement efforts on “millennials” given their growing presence in the workforce. Though not entirely different, <b>millennials have different engagement drivers than previous generations</b> , and particularly value purpose, mission, and work-life integration.	Organizations can better serve millennial employees by performing the <b>research necessary to understand what drives the subset of millennials attracted to their organization</b> , and implementing changes based on those findings.
7	Some organizations are beginning to <b>provide employees with more consistent and frequent feedback.</b> This has the dual benefit of helping employees improve more quickly and improving employee engagement.	An organization implemented a new <b>mandate that required managers to have frequent growth and development conversations with employees</b> to encourage engagement. They provided extra training for managers to help equip them for these new conversations.

# Employee Trends Relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving employee recruitment and hiring. For each trend, consider how it may factor into your goals.

	Trends	Examples
8	Some organizations have begun to <b>move beyond the resume and interview</b> when assessing candidates. They seek to put candidates in hands-on situations where they can test and demonstrate the skills essential to success on the job. This may take the form of anything from excel analytics tests, to drafting responses to customer complaints, to participating in hackathons.	An organization uses hands-on hackathons not only to test applicants but also to promote brand awareness. Groups of <b>candidates are given a sample challenge that represents typical work performed by employees</b> , and then must work together to address it. The quality of their response is assessed as a part of the application process.
9	Some organizations have begun to <b>assess soft skills like emotional intelligence through novel interview methods</b> . For example, candidates may meet recruiters in a more casual environment, and will be assessed on their emotional intelligence and interpersonal skills. These types of assessments supplement, but do not replace traditional interviews.	An organization <b>hosts casual “happy hours” at the outset of its recruiting process</b> and uses these opportunities to assess candidates. These happy hours are the first step in a revised and shortened interview process, and organization saves \$2 million dollars for every 100 candidates hired in this way.
10	Some organizations are <b>experimenting with asynchronous interviews to increase convenience for candidates</b> while relieving some of the burden placed on hiring teams. During asynchronous interviews, candidates are given standard questions and their responses are recorded by phone or computer. Reviewers can then review their responses at a later date. This has the added benefit of improving fairness by allowing side by side interview comparisons.	An organization could use <b>asynchronous interviewing as an early step in the interview process</b> . Though it lacks the back and forth of a traditional interview, it improves standardization while increasing convenience.

# Employee Trends Relevant to SSA

Empowering employees requires a series of organizational changes, and no single organization has all the answers. Therefore, this slide provides a series of examples for how private sector companies empower employees.

	Trends	Case Study
11	<b>Employees are tangibly connected to the service strategy.</b> Senior leaders have taken the steps necessary to listen to employees and have implemented changes that allow employees to live the service strategy.	 <p>Yum! Brands CEO David Novak has authorized all employees to spend up to \$10 to address customer problems, so they can tangibly execute the service strategy.</p>
12	<b>Employees have the confidence and tools to personally address challenges</b> for internal and external customers. This doesn't require a complex methodology or teaching curriculum, a shared thought process for addressing challenges can be sufficient.	 <p>Ritz Carlton trains all employees on the MR BIV framework, which helps them personally address mistakes, reworks, breakdowns, inefficiencies, and variations.</p>
13	<b>Frontline employees can experiment</b> , as they have the most direct insight into service breakdowns and opportunities for improvement. Frontline leaders know how to design simple experiments regarding how to improve processes and service.	 <p>Facebook hosts employee hackathons. Facebook video, which has garnered billions of views, was created by an experimenting employee at one such hackathon.</p>
14	<b>The frontline is less hierarchical</b> , which gives employees the opportunity to put their skills to use. Organizations have achieved this by putting in the <i>frequent and deliberate</i> effort necessary to overcome traditional assumptions regarding authority.	 <p>Mayo Clinic gives nurses the ability to escalate concerns past doctors directly to specialists when they fear for the patients safety. Mayo Clinic was recently declared the safest teaching hospital in the country.</p>
15	<b>The organization invests in service employees.</b> The organization prioritizes training and hiring of low level service employees, sometimes even over the training of senior executives.	 <p>Zappos invests significant resources in hiring and training it's service personnel. A basic \$13/hour service employee will often receive 15 interviews for the job and receive weeks of training before ever working a full day.</p>

# Employee Trends Relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving employee empowerment. For each trend, consider how it may factor into your goals.

	Trends	Examples
16	Some organizations are explicitly altering employee assessment paradigms to promote improved employee flexibility. These changes <b>emphasize results and deemphasize traditional metrics like hours worked</b> and face-time in an office environment. By only emphasizing the final outcome, employees have improved flexibility for getting the job done.	An organization introduced a “results only” evaluation process for its employees and supplemented it with concrete guidelines regarding remote and mobile work. After doing this, the organization saw an <b>increase in productivity and engagement</b> .
17	Some organizations are working to <b>digitize paper-based processes</b> to improve employee flexibility. When all work can be performed digitally, it is easier for employees to work when and where meets their needs.	The <b>Belgian Social Security Administration</b> assessed current work processes and the paperwork associated with them. They then began a concerted effort to digitize as much paperwork as possible to promote flexible work.
18	Some organizations are acquiring and deploying <b>software that supports flexible work</b> and promotes remote collaboration. This may include chat software, virtual conferencing software, and knowledge management software.	An organization acquired <b>instant messaging and desktop communication software</b> to promote flexible collaboration. They also acquired a <b>knowledge management platform</b> and implemented a mentoring system to promote its use.
19	Some organizations are providing employees with <b>flexibility regarding the hardware they use</b> . This not only provides the employee with improved choice, but also it can reduce operating costs.	An organization implemented a <b>bring-your-own-device policy</b> that allowed employees to augment issued technology with personal technology. This initiative was <b>complemented with improved security policies</b> like PINs and remote wipe capability.

# Employee Trends Relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving employee knowledge. For each trend, consider how it may factor into your goals.

	Trends	Examples
20	Some organizations are acquiring or building <b>learning technology that is closely integrated with service technology</b> . Rather than sequestering learning modules in an isolated part of an organization intranet, learning modules are integrated directly with the technology employees use to execute their daily mission. This improves the integration of learning and work.	An organization built a platform based on salesforce.com that gives their sales representatives detailed learnings and information during each phase of the sales process. This allows <b>employees to learn more seamlessly</b> as they execute the sales process. This type of technology could be easily integrated into a customer service process as well.
21	Some organizations are <b>using cross-functional teams to develop and execute trainings</b> , rather than relying on just an isolated training team or outside trainers. This not only helps to align trainings more closely with business objectives, but helps to build a culture of knowledge and learning across the organization as everyone chips in.	An organization has it's <b>client engagement teams</b> identify training objectives, a dedicated <b>course development team</b> creates the trainings, and <b>peer and business leaders</b> deliver the trainings to their fellow employees. Content is blended and makes use of online and instructor led training.
22	Some organizations are <b>establishing formalized mentorship programs</b> to help develop employees. Often these programs target a subset of employees, such as those identified as having future leadership potential. However, others are open to all potential participants.	An organization established a mentorship program based around an <b>online system where employees detail what they know and what they want to learn</b> . Employees can then find mentor/mentee matches to further their development. 1,700 employees (10% of the organization) actively participate in the program and 88% of mentees and 74% of mentors believe it is effective.

# Employee Trends Relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving employee knowledge. For each trend, consider how it may factor into your goals.

	Trends	Examples
23	Some organizations are <b>going beyond the traditional lecture based format</b> to make learning and development more effective and interesting for participants. Ne formats are often hands-on, and sometimes produce tangible products for the organization.	An organization has begun to use <b>multi-day high stress simulations, real-time/simulated product data, and prototyping events</b> to promote learning and development.
24	Some organizations are beginning to recognize the <b>importance of unified employee development programs</b> that support them from their first day on the front lines to their service as senior leaders.	An organization rolled out a refined and expanded training and <b>development program for its over 4,500 first and second line leaders.</b>
25	Some organizations have recognized how complex and hectic the modern work environment has become. In response to this they have <b>implemented a series of initiatives and changes that seek to simplify the work experience.</b> This has two principal benefits: it allows the organization to operate more efficiently by removing unnecessary processes/meetings/requirements, and it provides employees with increased flexibility in how they use their time.	An organization first implemented a series of <b>lean initiatives explicitly focused on simplifying the work done by its employees.</b> It then reinforced these changes by promoting a new culture that encouraged simplicity and speed in its operations and day-to-day execution.

# Employee Trends Relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving employee knowledge. For each trend, consider how it may factor into your goals.

	Trends	Examples
26	<p>Some organizations are <b>making a concerted effort to become irresistible to current and future employees</b>. They do this by providing meaningful work, constructive hands-on management, a positive work environment, exciting growth opportunities, and trusted leadership. Additionally, they strive to make the work environment simple by removing bureaucratic overhead.</p>	<p>Google has become a simply irresistible organization by implementing a range of employee engagement policies. For example, it's <b>20% time</b> allows employees to perform meaningful and intrinsically rewarding work. Additionally, it closely monitors what makes a good manager, and constantly adjusts training and manager evaluations accordingly. It creates a positive/humane work environment by providing benefits like free food, yoga classes, and more.</p>
27	<p>Some organizations are <b>overhauling and simplifying their performance management process</b>. Traditional performance management processes can consume million of man hours per year. In response, some organizations are significantly reducing the number of questions asked and factors evaluated. In conjunction with this effort, these organizations are working hard to make sure they ask the right questions. This often involved a focus on asking managers what they would <i>do</i> with their employees, rather than what they <i>think</i> about their employees.</p>	<p>Deloitte is considering radically simplifying its performance management process to focus on four simple questions:</p> <ol style="list-style-type: none"> <li>1. Given what I know of this person's performance, and if it were my money, I would award this person the highest possible compensation increase and bonus</li> <li>2. Given what I know of this person's performance, I would always want him or her on my team</li> <li>3. This person is at risk for low performance</li> <li>4. This person is ready for promotion today</li> </ol> <p>This change has the potential to save Deloitte millions of man hours each year without adversely impacting the evaluation process.</p>

# Organization Trends Summary

***Threats and opportunities are impacting organizations to include:***

1

**Decision Support:** access to smart software that supports human decision-making processes with advice, analysis, and automation

2

**Big Data:** generating and capturing massive quantities of data that can be analyzed and visualized to inform decision-making

3

**Collaboration:** have the opportunity to pursue external partnerships to supplement their internal capabilities and reduce costs

4

**Cyber Threats:** facing ever-evolving cyber threats requiring strengthened security and readiness for inevitable intrusions

5

**Flat Hierarchy:** addressing inflexible/slow org structure by reducing hierarchy to promote efficiency, engagement, and effectiveness

# Organization Trends relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving efficiency of operations. For each trend, consider how it may factor into your goals.

	Trends	Examples
1	Some organizations are <b>using technology transformation to achieve superior customer experience</b> by creating more detailed segmentations of customers, providing services across channels, and gathering analytical insights to tailor services.	An insurance company analyzed data about policy holders to proactively notify them of flood claim guidance and provide instructions for hotels after a major widespread flood. This allowed the insurance company to have an <b>efficient claims process and deliver an improved level of customer service</b> than would have been available without advanced technology capabilities.
2	Using technology to capture customer feedback can make it easier to <b>integrate customer feedback in operations</b> . This can improve customer experiences, identify possible efficiencies in service delivery, and help guide service delivery decisions.	Federal cross-agency priorities include improving customer experience, and <b>technology can help in the collection and integration of customer feedback</b> to attain that goal. While private companies may integrate customer feedback to retain customers, agencies do this to better serve the public and fulfill their missions. The <b>Dept. of Veteran's Affairs</b> created a customer feedback mechanism that links feedback to employee signature blocks and enables HRC payroll to <b>identify opportunities for improvement</b> .
3	Organizations <b>make strategic partnerships</b> to increase <b>operational efficiencies</b> , better <b>reach customers</b> , and develop additional service delivery options beyond physical office locations.	As agencies have faced increased pressure to consolidate space and continue to create value to customers, some have begun to <b>make strategic partnerships to reach customers and develop organizational efficiencies</b> . An example is a partnership between the <b>U.S. Coast Guard, Army Corps of Engineers, and Dept. of Transportation</b> , which launched a new partnership to improve operational efficiency for reviews of new transportation projects by <b>synchronizing their review process</b> .

# Organization Trends relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving improper payments. For each trend, consider how it may factor into your goals.

	Trends	Examples
4	<p><b>Improper payments have been a focus for over a decade.</b> There have been three main acts passed including the Improper Payments Information Act of 2002, Improper Payments Elimination and Recovery Act of 2010, and Improper Payments Elimination and Recovery Improvement Act of 2012. FY14 had one of the highest rates of improper payments, <b>exceeding the previous record from FY09 by 1.4 percentage points.</b></p>	<p>GAO cites <b>multiple challenges</b> with reducing improper payments including:</p> <ul style="list-style-type: none"> <li>▪ <b>Estimating improper payments</b> in an accurate way</li> <li>▪ <b>Creating risk assessments</b> for programs and payments</li> <li>▪ <b>Reworking policies</b> that require legislative approval</li> <li>▪ <b>Determining root causes</b> of improper payments</li> </ul>
5	<p>Improper payments are a complex challenge and organizations have <b>collaborated to share information</b> that is mutually beneficial in efforts to reduce improper payments.</p>	<p><b>Departments have worked together as well as government-wide initiatives</b> including the Do Not Pay Initiative. Do Not Pay was implemented to provide <b>centralized web-based data matching</b> to help prevent certain kinds of improper payments.</p>
6	<p>Although there is <b>no one-size-fits-all solution</b> to improper payments and agencies may have different causes of improper payments, <b>there are some identified strategies</b> to support reducing improper payments.</p>	<p>Examples of strategies that can help reduce improper payments include:</p> <ul style="list-style-type: none"> <li>▪ <b>Analyze root causes</b> to develop corrective actions</li> <li>▪ <b>Start with the three error categories</b> required by OMB (documentation and administrative, authentication, and verification), and <b>create detailed analysis as needed</b></li> <li>▪ Design and implement <b>preventive controls</b> through data-sharing, predictive analytic tests, and training programs</li> <li>▪ Implement <b>effective detection techniques</b>, such as data mining and recovery audits</li> </ul>

# Organization Trends relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving data-driven decisions. For each trend, consider how it may factor into your goals.

	Trends	Examples
7	Develop data to <b>determine the return on investment for analytics programs</b> . Data analytics is a part of the business, just like anything else. Demonstrating ROI can improve a program's longevity and help organizations understand when they need to adjust how they're doing data analytics.	An organization may run ROI analyses on its data analytics programs, and determine that the benefit data analytics brings to small investments doesn't justify the costs. They may then reserve robust data analytics for their most significant investments.
8	<b>Don't neglect data visualization</b> . Most employees and executives won't have the background knowledge or understanding to grapple directly with analyses. Providing them with clear dashboards and compelling visualizations can help improve the impact of data analysis.	An organization may establish a series of executive dashboards with clear visualizations for its executives. This allows executives to quickly understand where the organization stands and make decisions accordingly.
9	Encourage data use and spark insights by <b>enabling employees to easily see, combine and analyze data</b> . Don't hide analytics tools away in a corner of the organization. Get everyone involved if possible, and solicit their feedback on existing tools and processes.	An organization may provide all employees with access to its centralized database and licenses for basic analytic and visualization tools.
10	Data-driven analysis is only as good as the data it's based on, so it's critical to demonstrate the connection between the efforts of those that collect data and the end product it informs. <b>Make sure those who collect data see the results of the analyses so their dedication for quality collection doesn't fade.</b>	An organization may publish a monthly report for its data collection employees that demonstrates the benefits the data they collect is having on the organization and the customers they serve.

# Organization Trends relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving employee engagement. For each trend, consider how it may factor into your goals.

	Trends	Examples
11	It's not a matter of "if" an organization will experience a security breach but "when". <b>Defensive technology can't adapt to emerging threats as quickly as they evolve.</b> Therefore, organizations are adopting risk-based system security strategies.	Instead of focusing all resources on preventing security events, an organization will <b>deploy some resources to develop mitigation and response strategies</b> for inevitable security breaches.
12	Some organizations are <b>dedicating increased resources to system security</b> . In 2012, only 26% of chief information security officers reported to the CEO. By 2015, that number increased to 33%. In response to this increased exposure, security employees are working harder to frame security issues in language that business owners understand.	An organization can give system security the central importance it warrants by <b>creating a chief information security officer that reports directly to the CEO</b> . In turn, it's important that security employees demonstrate the business impact of their efforts.
13	Some organizations are beginning to recognize that <b>people are often the weakest link in their defense</b> . They are responding by winning the hearts and minds of their employees and encouraging a truly cyber-risk, aware culture.	An organization can use <b>brief and humorous communications to help encourage improved cyber security</b> amongst average employees. They understand that long legal agreements and typical communications don't change employee behavior.
14	Some organizations are recognizing the <b>growing lag time between incidents and the response</b> . For financial services organizations, 88% of attacks are successful in less than one day, but only 21% are discovered within 24 hours. In response, organizations are <b>deploying automated security analytics platforms</b> that can monitor security quickly, tirelessly, and twenty four hours a day.	An organization could take the necessary steps to <b>standardize its software and network</b> , and once it has completed this step <b>implement automation and analytics tools</b> to improve monitoring and intrusion detection.

# Organization Trends relevant to SSA

The following trends are important to consider as SSA decides how ambitious it wants to be in improving effective decision-making. For each trend, consider how it may factor into your goals.

	Trends	Examples
15	For large strategic decisions some organizations have explored a <b>decision quality process</b> , which defines high-quality <b>decisions as those that will create the most value</b> . Organizations define what this value means in the context of their environment.	Organizations have made strategic decision by using the following decision quality process: <ul style="list-style-type: none"> <li>▪ <b>Appropriate frame</b> - understand problem and goal</li> <li>▪ <b>Creative and feasible alternatives</b> - choose most value</li> <li>▪ <b>Meaningful information</b> - is accurate and unbiased</li> <li>▪ <b>Clarity about desired outcomes</b> - describe end state and impacts on organization</li> <li>▪ <b>Solid reasoning and sound logic</b> - consider relevant information including unknowns</li> <li>▪ <b>Commitment to action by all stakeholders</b> - support effective implementation of decisions</li> </ul>
16	Some large organizations <b>are using data as a tool</b> to make decisions. Data tools include <b>visualizing large amounts of data</b> in a user friendly way to support decisions.	Organizations that support decision-making by adopting data visualization use the insights in a variety of ways. Some examples of supporting decision-making with data include incorporating <b>real-time insights on operations</b> and segmenting customers.
17	Some organizations are going <b>beyond rules, policy, and procedure simplification and are moving towards a larger work simplification</b> . Work simplification includes simplifying roles, environments, technology, and other organizational elements in addition to simplifying processes and policies.	An organization implemented the concept of work simplification by implementing the initiatives below: <ul style="list-style-type: none"> <li>▪ <b>Lean management</b> – reduced layers and duplication</li> <li>▪ <b>Holistic program</b> – improved speed and customer input</li> <li>▪ <b>Cultural changes</b> – reduced complexity of culture</li> <li>▪ <b>Performance management</b> – reduced complexity for decisions on employee performance</li> </ul>

**Sources:** <https://hbr.org/2015/05/an-organization-wide-approach-to-good-decision-making>; <http://www.fusioncharts.com/whitepapers/downloads/>

## B.3 Maturity Models and Measures Used in Case Studies

# Employee Knowledge Gaps and Knowledge-Sharing

Two questions in the survey address employee knowledge at an organization.

## Federal Viewpoint Knowledge Gap Questions

**Job Knowledge-Sharing** - Question 26 “Employees in my work unit share job knowledge with each other”

**Right Knowledge** - Question 29 “The workforce has the job–relevant knowledge and skills necessary to accomplish organizational goals.”

Percent of Respondents “Agreeing” with Question 26

Percent of Respondents “Agreeing” with Question 29

### Key Takeaways

- Satisfaction with knowledge-sharing is higher both government wide and for SSA than satisfaction with the workforce having the job-relevant knowledge and skills necessary to accomplish organizational goals
- Agencies, departments, and the government-wide responses have not had much volatility over the past three years
- SAA is better than the government-wide average for Job Knowledge-Sharing and similar to the average for Right Knowledge

# Federal Best Places to Work - Strategic Management

The Federal Best Places to Work assessment examines the quality of an agency's strategic management, which includes their ability to recruit and hire employees with the right skillset.

## Strategic Management

**Knowledge and Skills:** "The workforce has the job-relevant knowledge and skills necessary to accomplish organizational goals."

**Recruiting:** "My work unit is able to recruit people with the right skills."

**Development:** "The skill level in my work unit has improved in the past year."

**Measurement:** "Managers review and evaluate the organization's progress toward meeting its goals and objectives."

**We extracted and focused on data specific to this topic for the research in this section of the presentation.**

## Why Best Places to Work?

### Vs. Time to Fill Open Positions Data

- While time to fill data provides insight into how efficient a recruiting process is, it doesn't effectively measure quality of candidate.
- Best Places to Work provides data regarding candidate quality, and is therefore a better measurement for understanding recruiting as it aligns to SSA goals.

### Vs. Chief HC Officer's Managers' Satisfaction Survey

- OPM measures recruiting effectiveness with the Chief Human Capital Officer's Managers' Satisfaction Survey.
- This survey has more questions dedicated to recruiting, but unfortunately data is not publically available.
- Therefore, FEVS data was used for benchmarking, but SSA should consider using Human Capital Officer's Managers' Satisfaction Survey data for internal measurement.

# Employee Knowledge Gaps and Training and Development

The Best Places to Work category of Training and Development measures the extent to which employees believe they are able to do their jobs effectively and improve skills from appropriate trainings based on assessed development needs.

## Training and Development Questions

**Skill Improvement** - "I am given a real opportunity to improve my skills in my organization"

**Information Availability** - "I have enough information to do my job well"

**Needs Assessment** - "My training needs are assessed"

**Training Satisfaction** - "How satisfied are you with the training you receive for your present job"

## Training and Development for Government Wide and SSA

## Key Takeaways

- Government-wide satisfaction and SSA have followed a similar trend over the past four years
- SSA made improvements from 2013 to 2014, but scores are still below the 2011 peak
- SSA had the steepest decline in scores between 2011 and 2013
- Government-wide scores had the steepest decline between 2012 and 2013

# Continuous Improvement of Operations Maturity Outline

There are several ways to become an organization focused on continuous improvement (CI) of operations. There are five main phases for maturity of CI operations and five distinct areas to consider when progressing in maturity.

	Start using CI	Evaluate how CI is working	Expand Proven Successes	Whole Organization uses CI	CI is Crucial Part of Culture
Strategy	Select projects that can be quick wins and develop and in a single area of organization	Use CI as a problem solving method and expand to more areas of org.	Begin aligning projects with organization priorities and expand to more org. areas	Align most projects with org. priorities and expand to all org. areas	Link all projects to strategic priorities and integrate CI into culture of all org. areas
Projects	Track project level metrics	Begin creating project length, savings, and tools targets	Begin tracking org. wide metrics including impact and refine targets	Reduce project length, increase savings and tools, aggregate impact, and track org. metrics	Drives value of business, further reduces project length, further increases savings and tools
Resources	Conscript participants and provide no alumni resources	Have interest based participation, mixed alumni satisfaction, and basic acknowledgement for participation	Recruit participants with a formal process, have positive alumni experience, and provide communal recognition	Recruit top candidates, have strongly positive alumni experience, and provide multiple modes of recognition.	Recruit future leaders, have transformative alumni experience, and have systematic recognition
Training	Invest in some outside resources to train project leaders	Invest in external training for leaders and staff, and identify internal project coaches	Invest in full scope of external CI training and improve coach quality	Provide sub-MBB LSS training internally and have dedicated MBB coaches	Provide MBB LSS training internally and have MBB coaches for all CI projects
Culture	Don't use continuous improvement and engage with CI sporadically	Use but face resistance for continuous improvement and engage with CI at the project level	Use CI and develop a broad awareness of CI principals across org	Embrace continual improvement and lean across the organization	Always pursue CI at all levels and integrate CI into org DNA

*This is not a full or comprehensive maturity model for becoming an organization focused on CI, but it does touch on the most relevant parts for SSA's Vision 2025.*

# Overall Improper Payments

OMB designates programs as “high-error programs” if they exceed a certain threshold for improper payments in a given year. SSA had two programs designated as high-error in 2014.

Program	Agency	Total Payments (outlays)	Improper Payment Amounts*	Improper Payment Rates
<b>Retirement, Survivors, and Disability Insurance (RSDI)</b>	<b>SSA</b>	<b>\$824.2B</b>	<b>\$3.0B</b>	<b>0.4%</b>
Pell Grants	Dept. of Ed	\$31.6B	\$0.7B	2.2%
Supplemental Nutrition Assistance Program (SNAP)	USDA	\$76.1B	\$2.4B	3.2%
Rental Housing Assistance Programs	HUD	\$31.7B	\$1.0B	3.2%
Medicare Prescription Drug Benefit (Part D)	DHHS	\$58.5B	\$1.9B	3.3%
Children's Health Insurance Program (CHIP)	DHHS	\$9.5B	\$0.6B	6.5%
Medicaid	DHHS	\$261.6B	\$17.5B	6.7%
Medicare Advantage (Part C)	DHHS	\$135.5B	\$12.2B	9.0%
<b>Supplemental Security Income (SSI)</b>	<b>SSA</b>	<b>\$55.4B</b>	<b>\$5.1B</b>	<b>9.2%</b>
Unemployment Insurance (UI)	Dept. of Labor	\$48.4B	\$5.6B	11.6%
Medicare Fee-for-Service	DHHS	\$360.2B	\$45.8B	12.7%
National School Lunch Program (NSLP)	USDA	\$11.5B	\$1.7B	15.2%
Earned Income Tax Credit (EITC)	Dept. of the Treasury	\$65.2B	\$17.7B	27.1%

\* Includes overpayments and underpayments

# SSA Improper Payments Trends

SSA sets targets for improper payments each year for Retirement, Survivors, and Disability Insurance (RSDI) and Supplemental Security Income (SSI). These targets are set at a percentage of total payments for each of the programs.

## RSDI Percent Over and Underpayments

## SSI Percent of Over and Underpayments

### Key Takeaways

- **RSDI** has achieved the target level for underpayments since 2011, however, has not achieved the overpayments target in five years
- **SSI** has not achieved the target level for underpayments in five years, and has not achieved the target for overpayments in 3 years
  - Targets for SSI fluctuate more for overpayments than all targets for SSI and RSI
  - SSI overpayments have had the most volatile changes over time

# Data-Driven Maturity Outline

There are several ways to become a more data-driven organization. Due to this, there isn't a single axis of improvement, but rather a series of axes that measure the overall data-driven maturity of an organization.

		Basic	Intermediate	Advanced
Analytics Sophistication		<b>Reactive and Proactive Reporting:</b> Operational reporting for measurement, compliance, and benchmarking.	<b>Strategic Analytics:</b> Segmentation and statistical analysis to understand root causes and inform actionable solutions.	<b>Predictive Analytics:</b> Development of predictive statistical or machine learning models to guide all decision-making.
Data Integration	Internal	<b>Disparate:</b> Several standalone databases, different file formats, different naming conventions, unstructured data	<b>Semi-Unified:</b> Different file formats, standing naming conventions, fewer databases, emergence of metadata	<b>Unified:</b> Few or a single database, well defined metadata, defined data lifecycle, Hadoop or NoSQL databases
	External	<b>Program Specific:</b> Share data as necessary for specific programs and initiatives	<b>Mission Specific:</b> Have the standing agreements and technology to continually share data at the component or mission level.	<b>Full Integration:</b> Full sharing of data between participant organizations.
Adoption		<b>Program Specific:</b> Data-driven decisions occur on an ad hoc basis, and only occur when program/initiative owners decide to use data extensively	<b>Office-Specific:</b> Some offices or components have adopted data-driven processes, across all programs and initiatives within their purview.	<b>Enterprise:</b> All decisions at all levels of the organization across all offices incorporate data as appropriate.

*This is not a full or comprehensive maturity model for becoming a data-driven organization, but it does touch on the most relevant parts for SSA's Vision 2025. Other things to consider are the data expertise of your workforce, data governance, and infrastructure.*

# Appendix C:

# Stakeholder

# Input

# Superior Customer Experience Feedback

The following provides feedback from stakeholders\* that support recommended strategic initiatives by Vision Objective

## Consolidated Customer Experience Management

- **Working Session Feedback:** “Development of more centralized sources”
- **Manager Survey:** “(Create) Predictive service based on notice of people’s life events; reaching out and letting customers know how an event can affect their Social Security being proactive; sharing of info across agencies”
- **Working Session Feedback:** “Make software for analysts and data specialists more available”
- **Manager Survey:** “Move to a customer-centric view that includes a real customer profile for each client versus our current claims based view”
- **Pre-launch Outreach:** “Understand different customer segments and their needs”

## Customer Empowerment and Choice

- **Manager Survey:** “To improve customer experience, employees suggested improved letters for claimants unable to use online services. Letters need to be in plain language and provide specific information.”
- **Public Survey:** “But we have yet to achieve the capability of providing specific Asian language notices for target populations and educational/community outreach of SSA programs in AAPI languages. For example, crucial hearing notices at the ALJ level are either in English or Spanish and are not available in other languages.”
- **Manager Survey:** “Develop multi-language, particularly Spanish, online services and publications. Today most of our efforts are in English and our public needs Spanish information available”
- **Employee Survey:** “Put on Town Hall meeting in local neighborhoods, churches, and schools to gather ideas and keep folks informed”
- **Manager Survey:** “Ramp up the public affairs staff to increase contact with the community.”
- **Pre-launch Outreach:** “Believe more stakeholder investigation of the public needs to be done to understand customer demands and finalize strategic planning”
- **Manager Survey:** “New methods of service tailored to the wants of the customer”

## Omni-Channel Customer Experience

- **Manager Survey:** “Keep improving the internet paths to help walk the visitors to right choices and decisions”
- **Pre-Launch Outreach:** “Integrate application systems so customers don’t have to provide the same information to multiple people when filling out forms”
- **Working Group Feedback:** “(Create) seamless connectivity amongst different components”

# Exceptional Employee Feedback

The following provides feedback from stakeholders that support recommended strategic initiatives by Vision Objective

## Employee Engagement

- **SSA Interviews:** “FEVS (employee survey) guides a lot of employee plans, but the survey itself does not have attributable data to determine what drives changes”
- **Vision 2025 Employee Survey:** “Use employees’ knowledge in a way that impacts SSA in a positive way”
- **Vision 2025 Employee Survey:** “Allow organized time to meet & provide a platform to provide ideas”
- **Vision 2025 Employee Survey:** “Truly listen to the thoughts/ideas of employees and create a meaningful relationship between employees and management”
- **Regional Working Groups Feedback:** “The sense of accomplishment and empowerment when employees are equipped to service their customers/ given the tools to provide superior customer service”

## Employee Development

- **Pre-launch Outreach:** “Establish a career path for employees and provide development support. Support and offer your employees’ career growth”
- **Pre-launch Outreach:** “Expand a results-oriented performance measurement system”
- **Working Session Feedback:** “Streamline and standardize development programs (ODP, IDP, Gear program). There should be standards in these programs so that if I'm a SR or CR, there is a path to get to next step”
- **Working Session Feedback:** “Need a vehicle to capture what specific job-related training employees need”
- **Working Session Feedback:** “Improve materials worked with (to make) more dynamic ways to present information, but make it a more enjoyable, engaging experience... make people look forward to training because it's so meaningful”
- **Working Group Session Feedback:** “There's a lot of value in learning from other components, getting experience with working with customers, etc.”
- **IdeaScale:** “(Create) a community based intra-wiki site for social security employees that encompasses any and all topics related to our work”
- **Alexandria District Office RWS Summary:** Want to see a competency model developed and trainings mapped to the model

# Exceptional Employee Feedback

The following provides feedback from stakeholders that support recommended strategic initiatives by Vision Objective

## Employee Empowerment

- **IdeaScale:** “In addition to/ aside from telework, allow employees who are not responsible for serving the public directly on the frontlines to work out of the closest SSA office/ facility. Doing this will not only assist the employee but also would save the agency in transit subsidies and provide a happier more productive employee.”
- **Employee Survey:** “1) Couple flextime, flexible schedules with flexible locations for performing the work. 2) Empower employees to determine where it’s best (for them) to perform the work and when.”
- **Pre-Launch Outreach:** “Need to make the government accessible from a recruiting standpoint (it shouldn’t take 8 months to get hired...)”
- **Employee Survey:** “We can also work on implementing scenarios that help employees through... most common asked questions and responses and clicking on that response and giving us the feed back on where to go next, sort of like the Alien tree or Decision tree”
- **Employee Survey:** “Currently there are several tools, websites, shortcuts, decision trees, etc. but there is not a centralized location to find everything”
- **Manager Survey:** “Empower employees; create a place where employees take steps to promote themselves and take advantage of available resources”
- **Working Group Session Feedback:** “Remove jurisdictional barriers- if you get the claim and you know how to process it just do it!”

# Innovative Organization Feedback

The following provides feedback from stakeholders that support recommended strategic initiatives by Vision Objective

## Continuous Improvement

- **Public Survey:** “The process to submit suggestions for programs is not a user friendly process. How can we challenge the status quo and remove initiatives that are not aligned with the agency strategic direction if we cannot easily submit suggestions? I hope the new Vision will allow a quick submission process when we identify solutions and want to share our suggestions.”
- **IdeaScale:** “Increase the number of data exchanges between government agencies, from State to Federal and vice versa from Federal to State...”
- **Pre-launch Outreach:** “Establish informal private partnerships (e.g., hospitals, non profits) to better assist with complex cases”
- **Pre-Launch Outreach:** “Restructure programs to enable data mining and run program”
- **Manager Survey:** “Recruit recent graduates with analytical skills”

## Adaptive Culture

- **Working Session Feedback:** “We have to listen to employees, encourage out-of-the-box thinking for what can change as opposed to what can’t, such as regs., increase inter-component communication, tell employees the “why” behind decisions, let employees know we heard them”
- **Working Session Feedback:** “Do we have to bless something 500 times? Or can we change the process and change the number of times someone has to bless something to try a new innovation or development program”
- **Working Session Feedback:** “The sense of complacency - people here tend to say “we can do it, but it’ll take time” as opposed to determining proactive and faster ways to meet needs”
- **Working Session Feedback:** “Not comfortable in taking the risk to do what you need to do, because of the huge focus on output and metrics”
- **Working Session Feedback:** “We have to be more willing to take risks, think outside the box, be open/flexible, be open-minded, accept failure, be responsible, stop being afraid, adapt, speak out against the establishment, be willing to change, and break down barriers”
- **Working Session Feedback:** “We need to promote and encourage the idea of one SSA”

# Innovative Organization Feedback

The following provides feedback from stakeholder that support recommended strategic initiatives by Vision Objective

## Customer-Centric Infrastructure

- **Pre-Launch Outreach:** "Business should be driver for technology - SSA needs to look ahead and think about what technologies is needed to support the business rather than just maintaining what they have right now"
- **Public Survey:** "I think it would help us, as customer service technicians, if we can also have a system to see what the customer is seeing"
- **Working Session Feedback:** "A lot of times you have to update a lot of systems, this needs to be simplified, so you can update in one place and it's automatically updated everywhere"
- **Manager Survey:** "Move to a customer centric view that includes a real customer profile for each client vs. our current claims based view- Invest in the review of legacy software code and document the logic of those older software modules"
- **IdeaScale:** "Personal data is the one critical topic that is on everyone's mind these days with all the news about hacking and the like. Our customers need trust "big government" with their personal information. How do you expect anyone to believe that SSA can protect it? We need to obtain and enlist superior technology and expertise to protect it, and assure the American Public that it is protected. That technology and expertise exists in the National Security Agency. Why can't they protect SSA's system environments?"
- **Pre-Launch Outreach:** "Strategically engage all stakeholder groups in facilities planning"

# Appendix D:

## Current Initiative Details

# Current Initiatives Details

## Consolidated Customer Experience Management

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Customer Experience Management</b>			
142	<b>Customer Connect</b>	Simplifies how customers connect with employees, connects public to SSA, and aims to serve changing needs of customers	Unknown
<b>Customer Data Analytics</b>			
64	Speech analytics from 800 number system upgrades	Establishes an infrastructure that enables understanding of voice of the customer	Operations
66	<b>Compassionate allowances (CAL)</b>	Identifies applicants with most serve disabilities and expedites decisions	Retirement and Disability Policy
108	<b>Google Analytics on secured server sites</b>	Collects page view data from Google Analytics to obtain additional management information and user/behavioral statistics	Operations
125	<b>Demographic research</b>	Analyzes demographic/economic trends to improve OASDI and SSI effectiveness	Retirement and Disability Policy
133	<b>Collaborative research</b>	Researches issues such as improving service to disabled veterans and reducing homelessness with the Veterans Administration	Retirement and Disability Policy

# Current Initiatives Details

## Omni-Channel Customer Experience

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
Customer Channel Improvement			
36	Queuing system improvements	Improves queuing in field office through VIP software	Operations
49	Customer communications improvements	Improves to notices and social security statements including technology capabilities	Communications
69	Occupational information system	Creates web-based system for easier use and increases the quality of disability decisions through providing current information about specific job requirements	Retirement and Disability Policy
96	Return to work online information system	Creates and maintains electronic information technology systems that provide disabled beneficiaries access to a self-directed employment support structure	Retirement and Disability Policy
98	Self-Help PC enhancements	Improves self service options in field offices	Operations
101	Social security electronic remittance system	Enables credit card payments in field offices	Budget, Finance, Quality, and Management
127	Improving employment support programs	Examines the performance of employment networks through regular contact and site visits and determines improvements	Retirement and Disability Policy
135	Critical Eight: Reduce the Wait for a Hearing Decision	Seeks to identify methods to reduce hearing wait times to an average of 270 days without sacrificing customer service quality	Multiple

# Current Initiatives Details

## Omni-Channel Customer Experience

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
Customer Channel Expansion			
33	Video service delivery expansion	Provides disability determinations through video, and includes updating spaces for video hearings in offices	Operations
35	Online card replacement pilot	Creates ability for customers to replace social security cards online	Operations
79	iAppeals	Makes Internet versions of the SSA-561 (Request for Reconsideration) (i561) and HA-501 (Request for Hearing by Administrative Law Judge) (i501) available and customers can complete steps through multiple visits	Operations
87	mySocialSecurity redesign	Creates adaptability of eService applications within mySocialSecurity through upgrades to the portal and architecture and creating the ability to support mobile devices	Operations
90	SSI telephone wage reporting system	Beneficiaries, their spouses and parents, and their representative payees can report monthly wages directly into the SSI system via a combination of touch-tone entry and voice-recognition software	Operations
97	Customer self service kiosk	Enhances and maintains Proof of Concept Customer Service Stations, which have experienced limited success	Operations
100	Online submission to eWork	Allows online work report submissions via the My SSA portal for SSDI beneficiaries	Retirement and Disability Policy
102	External partner desktop icons	Provides a direct link from a public computer to online services at external partner sites, such as libraries and senior centers	Operations
134	Critical Eight: Enhance Online Services	Broadens the number of services customers can access online and improves existing offerings	Multiple

# Current Initiatives Details

## Omni-Channel Customer Experience

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
Customer Channel Integration			
34	Smartclaim	Allows customers to start an application online and come into an office to complete it for retirement, disability, and Medicare benefits through a single application	Operations
65	Automated call back	Allows users to request a call back from a SSA telephone representative during their online experience	Operations
94	Real-time customer assistance	Allows anyone navigating the SSA website to communicate with a representative through click-to-communicate technologies and screen-sharing	Operations

## Customer Empowerment and Choice

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Customer Engagement Strategies</b>			
39	<b>Updates to the public</b>	Provides updates via email and text to the public	Operations
48	<b>National marketing outreach to customers</b>	Creates national marketing campaign and advocacy outreach	Agency-wide
50	<b>Solicited ideas for improvement from customers</b>	Collects customer thoughts through IdeaScale	OCSO
51	<b>Consolidated marketing</b>	Creates consistent messaging in marketing through a website for field offices to order marketing materials from	Communications
52	<b>Video hearing marketing</b>	Promotes use of video hearings to the public	Communications
58	<b>Automated communications to customers with options for action</b>	Provides notices and options for customers to control their accounts to prevent fraud, provides alerts for when changes to accounts occur, and lists program details	Multiple
56	<b>Notice improvements</b>	Improves readability of notice language for disability and Title 16 notices	Retirement and Disability Policy
93	<b>Secure message center</b>	Allows mySocialSecurity account users to receive alerts, messages, and agency announcements through customer engagement tools	Operations
126	<b>Improving employment support outreach to targeted working-age beneficiaries</b>	Automates telephone calls to beneficiaries that are determined most likely to return to work and provides Ticket to work information	Retirement and Disability Policy
129	<b>PROMISE</b>	Partners with Departments of Education, Labor, and Health and Human Services to promote positive outcomes for children who receive Supplemental Security Income (SSI) and their families	Retirement and Disability Policy

# Current Initiatives Details

## Customer Empowerment and Choice

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Customer Engagement Strategies</b>			
130	Retirement security research	Produces, plans, and coordinates a body of research products that will help inform the public about retirement planning, including when to begin receiving Social Security benefits	Retirement and Disability Policy
132	Ticket to work program	Helps disabled beneficiaries return to work and reduce or eliminate their dependence on cash benefits	Retirement and Disability Policy
136	<b>Critical Eight: Educate the Public about Social Security Programs</b>	Uses multiple engagement channels to ensure that the public is aware of, and educated about the importance of Social Security and their options	Multiple
<b>Tailored/Adaptive Service</b>			
124	<b>100% permanent and total veterans initiative</b>	Provides expedited disability case processing for veterans	Retirement and Disability Policy

# Current Initiatives Details

## Employee Engagement

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Employee Engagement Strategy</b>			
7	<b>Awards and recognition</b>	Recognizes employee accomplishments across components	Human Resources
11	<b>Employee engagement toolkit</b>	Equips employees with online tools for improving engagement and satisfaction	Human Resources
118	<b>ODAR employee engagement</b>	Creates engagement improvements using FEVS scores and communications with constant and consistent messaging connected to the mission	Disability Adjudication and Review
119	<b>Employee engagement community of practice</b>	Reviews FEVS data and develops engagement action plans and works with components on improving engagement	Human Resources
<b>Employee Feedback Mechanisms</b>			
10	<b>Direct employee feedback</b>	Solicits employee feedback through forums for union employees, check-ins, websites, and face to face meetings with non-union employees	Human Resources
12	<b>Employee representative feedback</b>	Solicits feedback about employees through employee representatives (e.g., advisory councils, associations)	Human Resources
56	<b>Usability testing (internal)</b>	Assesses usability of internal websites to understand changes needed	Budget, Finance, Quality, and Management
111	<b>Federal Employee View Point Survey (FEVS)</b>	Addresses results and institutes improvements based on FEVS at the component level	Multiple
116	<b>IdeaScale software for employee feedback</b>	Uses IdeaScale across the organization to capture feedback on targeted topics	Multiple
<b>Integrated Employee/Customer Management – No Current Supporting Initiatives</b>			

# Current Initiatives Details

## Employee Development

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Employee Development Plans/Programs</b>			
1	<b>Competency-based management tools to assess and close gaps in skills</b>	Creates a competency model and learning platform to provide training, development opportunities, and hiring to close identified skill gaps	Human Resources
2	<b>Development programs and rotational assignments</b>	Continues and expands the over 40 development and rotational programs	Human Resources
4	<b>Management and leadership skills development programs</b>	Provides leadership skills development to selected participants	Human Resources
5	<b>Action planning</b>	Series of initiatives tied to planning and improving employee development and satisfaction	Human Resources
6	<b>Interagency rotational program</b>	Offers interagency rotational program to further develop employees	Human Resources
8	<b>Mentorship</b>	Offers formal National Mentoring Program for employees, managers, and leaders (Piloted), as well as component specific mentorship connect	Human Resources
9	<b>University Partnership Programs</b>	Provides education courses for employees through universities	Human Resources
138	<b>Critical Eight: Promote Employee Development and Employee Engagement</b>	Develops programs and opportunities for employees to grow and advance	Multiple
<b>Training</b>			
21	<b>Management and supervisor training expansion</b>	Improves flexibility and responsiveness of leadership through technical skills, leadership competencies, and emphasis on performance management	Human Resources
22	<b>Career enrichment workshops</b>	Provides workshops for GS-12 and below that provide additional employee development	Human Resources
23	<b>In-house coaching</b>	Selects participants to receive 6 month government-wide coaching training program	Human Resources
24	<b>On demand training and development</b>	Markets comprehensive online library of course, eBooks, videos, and audio books	Human Resources

# Current Initiatives Details

## Employee Development

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Training</b>			
25	<b>Topic specific training</b>	Raises employee awareness on topics including identifying and reporting fraud, security, Union contracts, personal development, policy writing, disability reviews, and disability workload	Human Resources
109	<b>Analyst Training</b>	Provides organization-wide curriculum to provide analysts with requisite tools and training	Retirement and Disability Policy
<b>knowledge-sharing</b>			
3	<b>Detail assignment expansion</b>	Creates visibility of detail opportunities across all components (possibly in a central repository)	Human Resources
14	<b>Human Resources Services Portal</b>	Creates a one stop shop for answering HR needs for employees	Human Resources
15	<b>Agency-wide knowledge management plan</b>	Plans for structure around information and knowledge-sharing to fight the knowledge gap when employees retire	Human Resources
16	<b>Web-based collaboration platform</b>	Provides SharePoint and a web based platform for communication across the organization	Human Resources
17	<b>Talent and skills sharing platform pilot</b>	Creates a platform to develop and share skills and talent to create an agile and engaged workforce	Human Resources
76	<b>Enterprise SharePoint Architectures</b>	Provides a consistent collaboration point and content management for employees	Human Resources
103	<b>SSA digital library website redesign</b>	Creates a dynamic, widget-based website with a website content management system that provides maximum flexibility for the content administrators to control all content	Human Resources
115	<b>vHELP web support</b>	Creates a web-based Help Desk environment that allows subject matter experts from the regions to work collaboratively to provide programmatic and systems assistance to front line employees on all policy questions (regional level to component)	Human Resources
137	<b>Critical Eight: Improve Succession Planning</b>	Identifies and creates developmental opportunities necessary to ensure continuity in leadership and other critical agency positions	Multiple

# Current Initiatives Details

## Employee Empowerment

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Employee Flexibility</b>			
13	Work-life balance	Provides increased telework options, institutes work/life balance services and family friendly policies, and offers employee seminars	Human Resources
57	Telework analysis and expansion through single device setup (SDS)	Improves employee flexibility by enabling employees to work from different locations; includes technology to enable telework	Multiple
114	Reducing the backlog at the Appeals Council	Adjusts Appeals Council staff levels to reduce the Appeals Council backlog and meet any changes in capacity at DDS and hearings levels	Disability Adjudication and Review
<b>Recruitment</b>			
18	Interview and hiring resources	Develops materials that guide management during the hiring process	Human Resources
19	Diversity and Inclusion in Hiring	Ensures that the SSA workforce is representative of its customers, including Veterans and people with disabilities	Human Resources
20	Pathways program expansion	Attracts talented workforce with meaningful training and development opportunities	Human Resources
<b>Employee Ownership/ Accountability</b>			
110	Electronic disability bench book expansion	Develops materials to help adjudicators analyze and document decisions on disability appeals	Disability Adjudication and Review
112	How am I doing tool	Provides real-time performance related feedback to employees	Disability Adjudication and Review
113	eFolder and local CPMS data	Automatically generates a personal list of case processing activities for the day, week, month, etc. for each employee, tailored to their job-specific workload profile	Disability Adjudication and Review

# Current Initiatives Details

## Continuous Improvement

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Process Efficiency</b>			
37	<b>Workload management national expansion</b>	Balances workloads through automated tracking of paperwork products in field offices using the WebACE system	Operations
38	<b>Workload support units</b>	Units that quickly processes retirement claims, and will now process disability claims through a pilot	Operations
40	<b>Social security number application process enhancements</b>	Provides web-based system where employees record enumeration information and enables employees to correct information for customers	Operations
45	<b>Continuous quality improvement reviews</b>	Compiles recommendations for improvement and then plans, evaluates, and implements outcome-based process and automation improvements across service delivery components (BFQM, ODAR, Operations)	Operations
46	<b>Death reporting system improvements</b>	Efforts to improve data quality including expansion of Electronic Death Registration (EDR), data exchange agreements, and technology improvements	Operations
53	<b>Acquisition process improvement</b>	Enhances transparency of expenditures including new technology, Sunflower Assets Property System, and contractor credentialing	Budget, Finance, Quality, and Management
60	<b>Alien/foreign enumeration</b>	Maintains partnership with DHS and Dept. of State that automatically enumerates certain classes when authorization is provided	Retirement and Disability Policy
67	<b>Earnings redesign</b>	Enhances efficiency and accuracy of wage reporting to better handle increase in volume	Operations
71	<b>E-Gov travel services 2</b>	Implements ETS2 for streamlined travel management	Systems
73	<b>Electronic disability</b>	Automates aspects of the disability determination process, including case processing, quality review, and collection of medical evidence	Retirement and Disability Policy

# Current Initiatives Details

## Continuous Improvement

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Process Efficiency</b>			
75	<b>Web-based Electronic Claims Analysis Tool (eCAT) Improvements</b>	Supports disability claims processing system and continuing disability reviews by guiding adjudicators through the five-step sequential process for determining disability	Retirement and Disability Policy
89	<b>Case processing enhancements</b>	Updates systems to centralize workload functions to help reduce the backlog	Disability Adjudication and Review
99	<b>Registration and Customer Support (RCS) and CHIP enhancements</b>	Improves work processes for employees and service delivery to the public	Operations
105	<b>Strengthen the Enumeration Systems</b>	Makes iterative improvements to the system to ensure the integrity and automation of the enumeration process	Systems
121	<b>Expand the NCAC Model</b>	Centralizes case-pulling and decision-writing workloads and increases telework and shiftwork options	Disability Adjudication and Review
<b>Improper Payment/Fraud</b>			
41	<b>Case tracking tool</b>	Provides insight on where cases are in the process to pursue fraud cases	Operations
42	<b>Cooperative Disability Investigations (CDI) expansion</b>	Additional units that gather information on disability claims and approve or deny benefits	Operations
43	<b>Fraud prevention units</b>	Overall Fraud Prevention Units for all aspects of benefits fraud and business processes and system releases designed to prevent, detect, track, and recover fraudulently redirected benefit payments	Operations

# Current Initiatives Details

## Continuous Improvement

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Improper Payment/Fraud</b>			
55	Anti-fraud infrastructure	Stands up anti-fraud program, office, and committee	Budget, Finance, Quality, and Management
80	Audit trail system architecture	Captures details of transactions most vulnerable to fraud	Systems
88	Beneficiary payment and reporting	Streamlines processes, implements newly required legislative mandates, and implements strong internal controls to improve the accuracy and timeliness of benefit payments	Retirement and Disability Policy
106	Systems Integrity	Ensures fraud and abuse detection and prevention programs are robust and flexible	Systems
<b>Data Exchange</b>			
30	Financial data exchange refinement	Improves automation with bank account verifications to support SSI eligibility	Operations
31	Data exchange community of practice	Collaborates on data exchange activities, shares best practices, finds common solutions to data exchange challenges, and builds a network of federal data exchange partners	Operations
32	Agency Specific Data Exchange	Data exchange focused on specific information (e.g., fugitive data with prisons, IRS tax information)	Multiple
72	eHealth Data Exchange and HIT	Connects medical providers, Department of Defense (DoD), and Department of Veterans Affairs (VA) (target is only at 8% for 2016)	Retirement and Disability Policy
77	Virtual lifetime electronic record	Addresses service members and veterans' needs as seamlessly as possible when applying for Social Security benefits by fully automating access to medical records across DoD, VA, and SSA	Retirement and Disability Policy
81	Integrated Data Exchange Application (IDEA)	Maintains over 1,500 data exchanges and is modernized into new centralized application	Operations

# Current Initiatives Details

## Continuous Improvement

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Data Exchange</b>			
131	<b>Public-private Community of Excellence (CoE)</b>	Meets with private, state and Federal stakeholders to identify ways to streamline health and human services by approaching data as a strategic resource, identifying needs and leveraging technology and sharing data	Retirement and Disability Policy
<b>Data Analytics</b>			
29	<b>Workforce Analysis</b>	Analyzes workforce data (e.g., retirement and applicant flow) to support planning to prevent gaps in knowledge and provide updates to diversity and inclusion councils	Human Resources
54	<b>Fraud Detection and Prevention Analytics</b>	Implements enterprise analytics solutions for fraud including predictive analytics for overpayments and disability fraud	Systems
74	<b>Emergency Response System</b>	Uses geospatial information system technology to provide real-time information during emergencies	Operations
91	<b>Data Quality Assurance</b>	Provides baseline quality assessments of data, monitoring of data through Electronic Quality Assurance (eQA), and publishing of data to data.gov	Budget, Finance, Quality, and Management
92	<b>Quick Disability Determinations (QDD)</b>	Expedites case workload by using a computer-based predictive model to screen initial applications to identify cases where a favorable disability determination is highly likely	Retirement and Disability Policy
120	<b>Analysis to automate processes within case processes, reviews, and hearings (series of pilots)</b>	Includes a series of pilots that use data to automate movement of case workloads including case remands	Disability Adjudication and Review
123	<b>Predictive Modeling in Continuing Disability Review and Redetermination</b>	Identifies Social Security disability beneficiaries whose earnings put them at risk of receiving overpayments and identifies and prioritizes redetermination cases that have a high likelihood of error	Disability Adjudication and Review
141	<b>Critical Eight: Accelerate the Use of Data Driven Decision Making</b>	Uses collected data to identify patterns and improve customer service and investigates new ways data can be leveraged to anticipate customer and agency needs	Multiple

# Current Initiatives Details

## Adaptive Culture

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Culture/Change Management</b>			
27	<b>Enhance top-down communications</b>	Provides different types of communications (e.g., town halls, meetings, emails) within each component to employees	Human Resources
28	<b>Human capital management</b>	Assesses weaknesses and strengths of human capital through data-driven human capital reviews and established governance structure	Human Resources
117	<b>Virtual hallway</b>	Connects employees across offices virtually using technology	Disability Adjudication and Review
<b>Executive Accountability</b>			
26	<b>Policy compliance</b>	Changes to data and channels to be compliant with Data Act, Section 504, and electronic remittance to reduce cash acceptance	Human Resources
104	<b>Strategic IT Investment Process</b>	Provides governance and oversight of IT investments	Systems
140	<b>Critical Eight: Establish the Enterprise Program Management Office</b>	Improves oversight and transparency to develop and deploy projects on time, within budget, and with quality results	Multiple

# Current Initiatives Details

## Customer-Centric Infrastructure

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Technology Modernization</b>			
47	Disability case processing system	Replaces 54 systems to provide common functionality and consistent support to each disability determination system (DDS)	Operations
61	Application portfolio mgmt.. (APM) and IT gov. and architectural planning	Determines the health of IT and software applications	Systems
63	Business Intelligence	Establishes a flexible reporting and analysis environment for telephone service	Systems
68	Enterprise data, database architecture, and storage management	Provides services to other development project teams for creating application software and databases, procuring new hardware, and defining storage requirements	Systems
70	Document management architecture	Expands reach of paperless management of information	Operations
78	Routine updates to financial and HR systems	Updates HR and financial systems with current technology to keep systems functioning	Systems
83	Intelligent disability (iDIB) program	Updates from a paper-based disability process to an integrated electronic set of systems	Operations
84	Virtual desktop infrastructure (VDI)	Provides virtual capabilities in four projects	Operations
85	Medicare database enhancements	Structures the Medicare databases to enhance internal and external processing of cases. These changes will aid frontline employees by reducing redundancies and allowing for more data propagation between systems	Systems
95	Representative payee redesign	Enhances RPS application by streamlining the actions and processes taken for representative payee selections, accounting, misuse, and monitoring determinations	Systems
107	Title II and Title XVI claims and post entitlement	Eliminates older, outdated systems, and replaces with more robust and modern systems to increase systems processing efficiency, eliminate labor intensive manual processing, and improve the accuracy and timeliness of T2 payments	Systems
128	PolicyNet publication system (PPS)	Updates PolicyNet system to fix vulnerabilities	Retirement and Disability Policy
139	Critical Eight: Transform IT Investment Process	Updates the IT Investment Process to be more streamlined and responsive to the needs of its customers	Multiple

# Current Initiatives Details

## Customer-Centric Infrastructure

Tracking #	Initiative Name	What the Initiative Accomplishes	Component Owner
<b>Cybersecurity</b>			
62	Authentication	Ensures the privacy and security of personal information and currently does not support all online services	Operations
82	Information security program	Protects information and communications assets, including ability for managers to terminate access	Systems
<b>Physical Infrastructure</b>			
44	Footprint reduction	Reduces physical space and creates shared spaces (e.g., consolidated field and hearing offices, IRS video capability sharing)	Multiple
59	National support center	Increases computing power and data capacity	Budget, Finance, Quality, and Management
122	ODAR office expansion	Expands number of offices and employees for ODAR	Disability Adjudication and Review

# Appendix E:

## Execution Strategy

## Tools and Templates

# Step One: Descriptions of key roles and responsibilities

Key Role	Summary of Responsibilities	Proposed SSA Alignment
<b>Leadership Role</b>	<ul style="list-style-type: none"> <li>Provides final approval on Agency Strategic Plan, Agency Priority Goals, and prioritized and the related transformational initiatives</li> <li>Maintains oversight of governance process</li> <li>Provides direction on key issues relating to the agency</li> <li>Leads by example in the execution of the strategy</li> <li>Approves budget for transformational initiatives</li> </ul>	(A)COSS
<b>Transformation Champion Role</b>	<ul style="list-style-type: none"> <li>Responsible for agency transformation (Commissioner-appointed)</li> <li>Chairs the Transformation Leadership Committee</li> <li>Defines budget for prioritized transformational initiatives</li> <li>Ensures prioritized transformational initiatives, once selected, are assigned an owner(s)</li> <li>Presents leadership with progress reports and action plans</li> <li>Leads quarterly data-driven initiative progress review meetings</li> </ul>	DC-level representative (e.g., Chief Strategic Officer)
<b>Transformation Leadership Committee</b>	<ul style="list-style-type: none"> <li>Decides on Vision objectives and transformational initiative prioritization and sequencing</li> <li>Supports transformational initiative owners, as necessary</li> <li>Participates in quarterly and annual reviews to assess initiative progress towards goals and presents leadership with action plan based on review results</li> </ul>	DCs representing all components
<b>Consultative Group Role</b>	<ul style="list-style-type: none"> <li>Provides input on transformational initiatives based on the knowledge, skills, and experience they bring from respective components</li> <li>Serves as a sounding board for the Transformational Leadership Committee, including preparing for and following up on progress reviews</li> </ul>	Champions of Change (i.e., EVC)
<b>Convener and Coordinator Role</b>	<ul style="list-style-type: none"> <li>Facilitates collaboration across the organization to make strategic decisions</li> <li>Gathers and analyzes data to compile progress measures on transformational initiatives for data-driven review process</li> <li>Provides information for, and facilitates decisions on, prioritization discussions</li> <li>Packages and translates the strategy to the rest of the organization</li> <li>Provides expertise on Vision 2025, including: awareness of employee feedback, Vision objectives, focus areas, and current and transformational initiatives</li> <li>Partners with Transformation Champion role to prepare for and execute quarterly and annual formal reviews</li> </ul>	OCSO
<b>Transformational Initiative Owner Role</b>	<ul style="list-style-type: none"> <li>Manages all aspects of owning and implementing assigned initiatives, including developing measures and identifying key milestones and dependencies</li> <li>Reports to Transformation Leadership Committee on measures for assigned initiative</li> </ul>	Initiative Owners

# Step One: SSA must also develop an accountability structure

Each of the key roles' responsibilities involve the strategic planning key elements, which can best be illustrated through a RACI Matrix.

## RACI Key

**R** - Who is Responsible? (The doer)

**A** - Who is Accountable? (Ultimate ownership)

**C** - Who is Consulted before an action or decision is made?

**I** - Who is Informed of the action or decision?

## Considerations

- At least one role must be Responsible per activity (but more than one role can be Responsible)
- Only one role can be Accountable (A) per activity identified
- One role can be both Responsible and Accountable
- Consult (C) and Inform (I) may not always be applicable (assign as appropriate)

## Key Roles

<div><b>RACI Key</b>  R - Who is Responsible? (The doer) A - Who is Accountable? (Ultimate ownership) C - Who is Consulted before an action or decision is made? I - Who is Informed of the action or decision?  <b>Considerations</b><ul style="list-style-type: none"><li>At least one role must be Responsible per activity (but more than one role can be Responsible)</li><li>Only one role can be Accountable (A) per activity identified</li><li>One role can be both Responsible and Accountable</li><li>Consult (C) and Inform (I) may not always be applicable (assign as appropriate)</li></ul></div>		Key Roles					
		Leadership Role	Transformation Champion Role	Transformation Leadership Committee	Consultative Group Role	Convener and Coordinator Role	Transformational Initiative Owner Role
Key Elements	Accountability Structure and Performance Measures	A	R	C	I	R	C, I
	Prioritized Goals and Transformational Initiatives	C	R, A	R	C	R	I
	Transformational Initiative Planning	I	A	R	C	C	R
	Budget for Transformational Initiatives	A	R	C	I	C	R
	Continuous Evaluation and Reporting	I	A	C	C	R	R
	Data-Driven Reviews	C	R, A	R	C	R	I
	Communications	I	I	I	C	R, A	C

# Step Two: Reference Guide to Reading the Roadmap

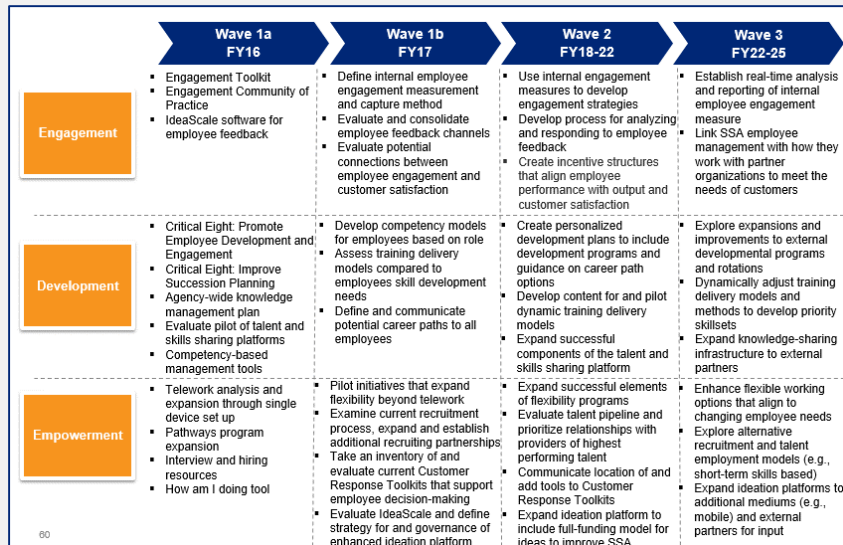

The three Vision priorities each have three Vision objectives

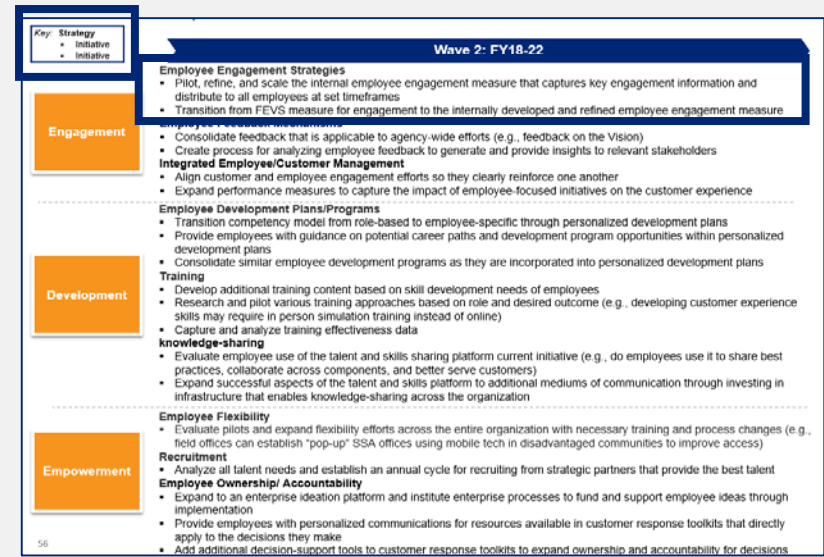

Each Vision Objective has a description and By 2025... statement to add context

Each Vision Objective has strategies and objectives

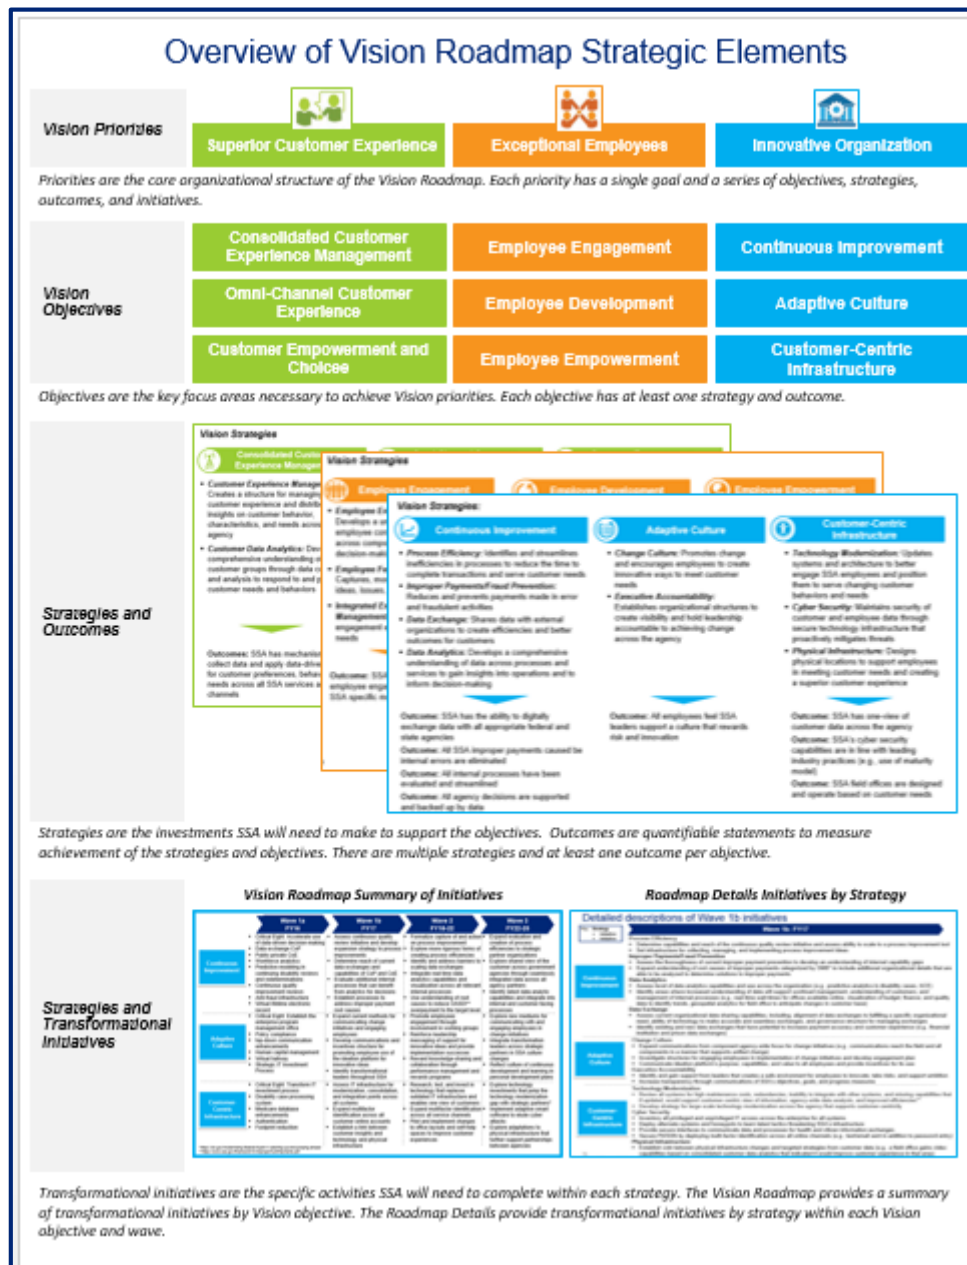

Each Vision priority has a summary Roadmap summarizing the transformational initiatives for each Vision objective (Note: Waves align with Agency Strategic Plans)

Every Wave has a detailed overview of the transformational initiatives by strategy (sample strategy highlighted)

# Step Two: Overview of Vision Roadmap Strategic Elements

Adobe Acrobat  
Document

## Step Two: Sample Prioritization Working Session Agenda

**Session Purpose:** Confirm priority objective outcomes and the current capability gaps within each priority to meeting those outcomes

Time	Description
8:30 – 9:00	<b>Welcome/ Introductions</b> <i>Session hosts welcome the group and explain session purpose and agenda. Participants introduce themselves and provide quick overview of their experience and tenure at SSA.</i>
9:00 – 9:15	<b>Overview of Vision 2025 Goals and Priority Vision Objectives</b> <i>Discuss the approach to developing the Vision priority goals, Vision objectives, and Roadmap, ending with a deeper-dive on the session's priority.</i>
9:15 – 10:00	<b>Current Initiative Analysis Review</b> <i>Explain the purpose of the current initiative analysis and discuss if there are any capability gaps to meeting the goals within the priority. (Note: participants would have received pre-read materials for the discussion)</i>
10 minutes	<i>Break</i>
10:10 – 11:20	<b>Vision Roadmap Review</b> <i>Break out into three groups (one per priority Vision objective) to evaluate the initiatives in each Wave for the priority, discussing if they address the current capability gaps and are sequenced in the right order to achieve the goals.</i>
11:20 – 12:00	<b>Group Discussion</b> <i>Each group reports out on their findings for their Vision objective and facilitator leads group discussion to validate if collectively, the Roadmap gets SSA to where it wants to be in 2025 for the priority.</i>
12:00 – 12:15	<b>Wrap Up</b>

## Step Two: Sample Leadership Questions Template

Vision 2025 Leadership Briefing	
Name	
<p><b><i>As you and your team review the Roadmap in preparation for the Briefing on X/XX/XX, please do not hesitate to contact OCSO should you have any questions on the approach and content. You may contact (enter name, email address) directly or submit this template to the Vision 2025 mailbox (^Vision2025).</i></b></p>	
<b>Questions on Approach</b> <ul style="list-style-type: none"> <li>• External research</li> <li>• Stakeholder feedback</li> <li>• Current initiative analysis</li> <li>• Working Sessions to finalize and confirm the initiatives in each priority</li> </ul>	
<b>General Questions on Roadmap Content</b>	
<i>Superior Customer Experience</i>	
<i>Exceptional Employees</i>	
<i>Innovative Organization</i>	
<b>OCSO POC: (enter name, email address)</b>	

## Step Three: Tool for developing effective metrics

The Metric Fact Sheet is a tool that guides you through key questions to consider when developing metrics. Initiative Owners should complete a fact sheet for each metric.

Consideration of past data allows you to set a target that is feasible:

- What does the historical data show on this objective over time?
- Is it reasonable to assume continuation along a trend?

Availability and quality of data is important when considering how the metrics will be used within SSA's strategic planning process:

- Example: If validated data is available annually, and SSA has quarterly strategy review meetings, a new metric to track progress more regularly will be preferable

### Metric Fact Sheet

<b>Metric:</b>			
<b>Metric Description:</b>			
<b>Goal:</b>	<b>Priority:</b>	<b>Program:</b>	
<b>Baseline:</b> X%, number, rate, etc.	<b>Baseline Year:</b> 20XX	<b>Target:</b> X%, number, rate, etc.	<b>Target Year:</b> 20XX
<b>Justification for setting of target (see target setting guidance):</b>			
<b>1) Is data currently available? If so, what is the most recently available data?</b>			
<b>2) How far back does the data go?</b>			
<b>3) What is the lag in data reporting and validation? For example, data is collected quarterly but not available for 6 months.</b>			
<b>4) What system(s) is the data stored in? Or what source does the data come from?</b>			
<b>5) What are the ways the data is disaggregated? (e.g., by gender, race, age, county, city, region, urban/rural)</b>			
<b>6) How frequently is the data collected? Yearly, quarterly, monthly, weekly, daily?</b>			
<b>7) What are the known data limitations?</b>			
<b>8) Who in your organization is responsible for setting performance targets? Please provide their name and contact information.</b>			

The final justification for setting a target is likely a combination of factors below. The data sheet indicates that the metric is reasonable, aspirational, based on historic data, and directly linked to the desired outcome

Analysis of disaggregated data can allow you to identify top-performing groups or initiatives, and the drivers of the success:

- Example, are there certain districts outperforming others?

In addition to ensuring accountability, consider and record the number of resources within the organization that will be dedicated towards achieving this objective

## Step Four: Sample\* Prioritization Scoring Matrix

Rating criteria to quantify the estimated impact of an initiative

Rating Criteria:	Impact (X-Axis)					Complexity (Y-Axis)			Cost (Bubble Size)		
	3 = high impact 1 = low impact					3 = low complexity 1 = high complexity			3 = high cost 1 = low cost		
Proposed Initiative	Customer	Employee	Cross-Component	Ecosystem	Avg. Impact	Execution Risk	Business Risk	Avg. Complexity	Investment Costs	Recurring Costs	Avg. Cost
	 Customer										
Develop journey maps and conduct action segmentation for all other SSA services	2	1	2	1	1.5	3	1	2	3	3	3
Develop journey maps for external partner SSA-related services	2	1	2	3	2	2	1	1.5	3	3	3
Evaluate field office design and identify layout change needs based on findings	3	3	2	2	2.5	1	2	1.5	1	2	1.5
Establish inter-agency data sharing efforts to significantly reduce redundant data entry for customers across the government	3	1	2	3	2.25	1	2	1.5	1	1	1
Implement full channel integration for all services	3	3	2	1	2.25	1	2	1.5	1	2	1.5
Tailor customer experience across all services	3	2	2	1	2	2	1	1.5	2	2	2
Enhance tailored service delivery to include customer-driven tailoring	3	1	1	1	1.5	2	1	1.5	2	2	2

Scoring to estimate impactful, complex, and costly initiatives may be in order to help drive decision-making, prioritization, and budgetary planning

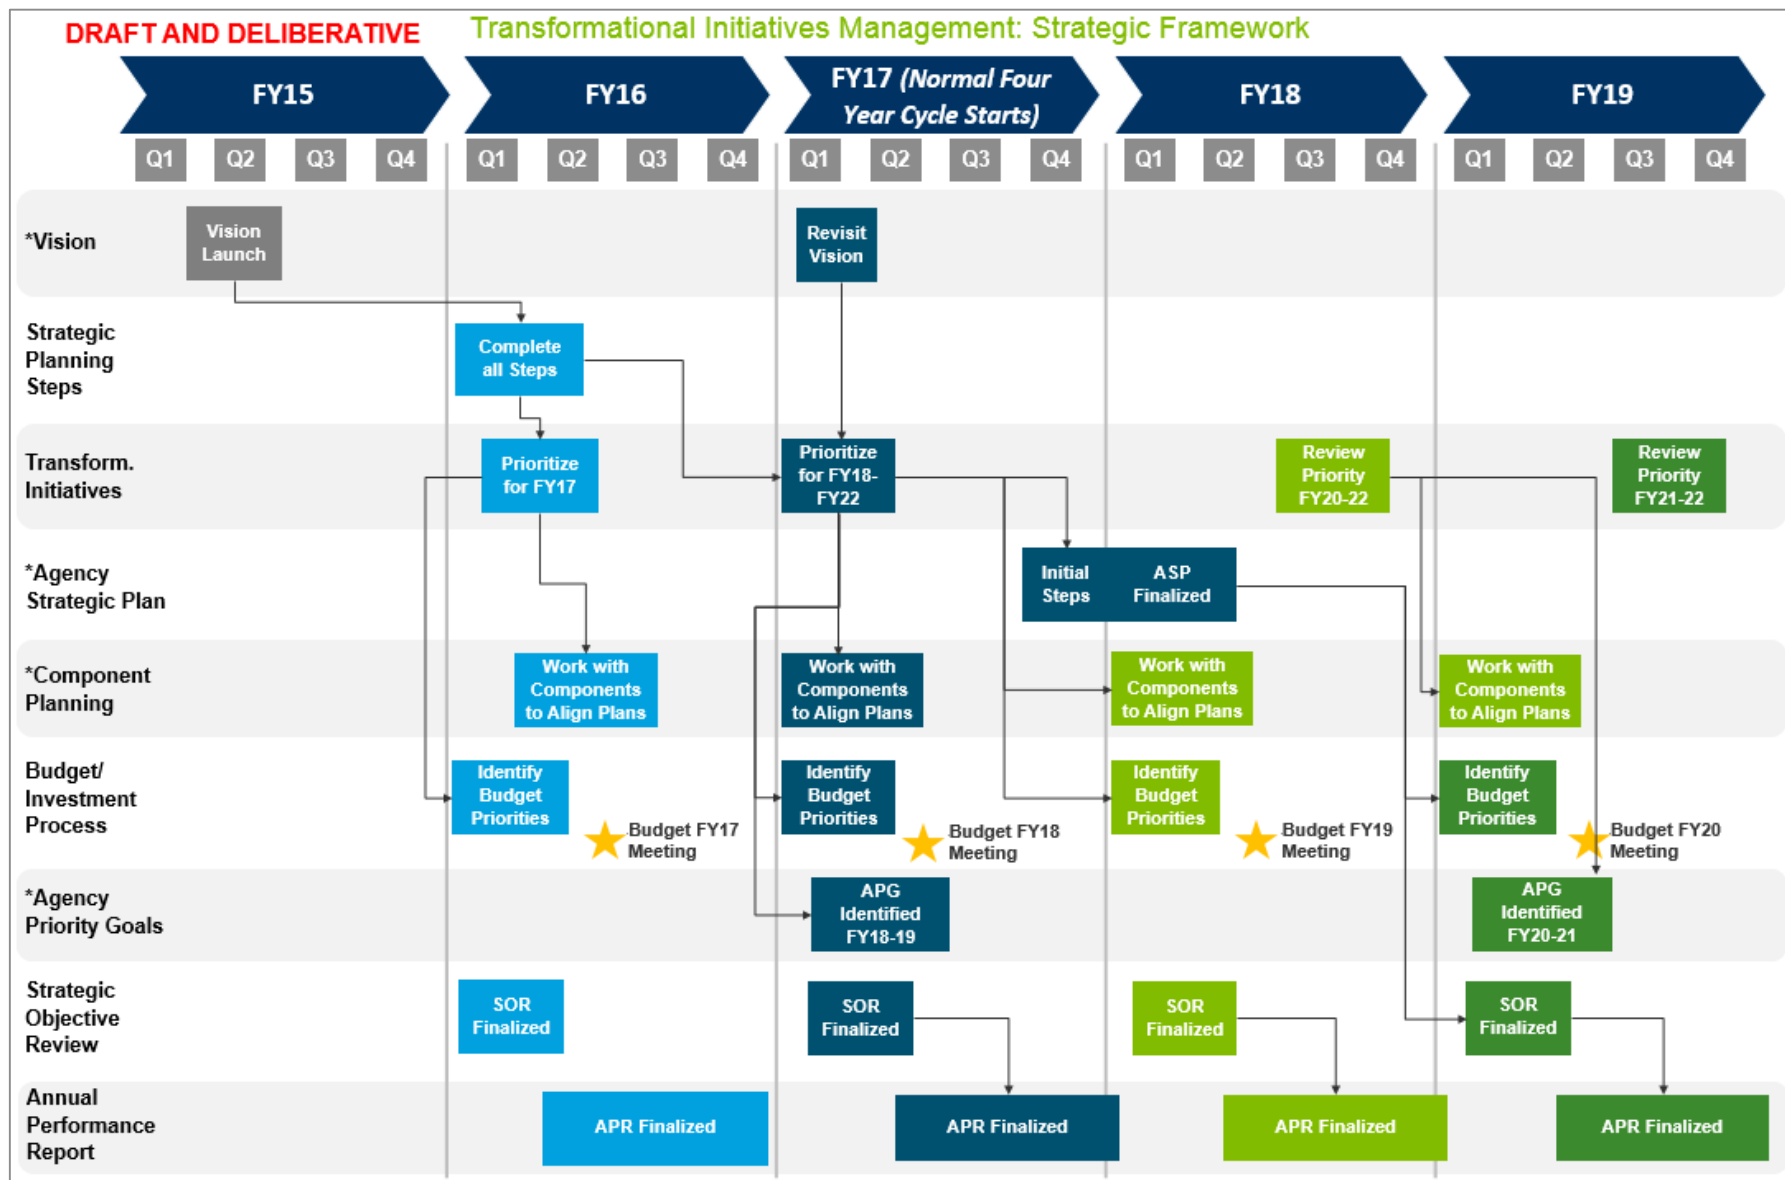

## Step Four: Sample\* Prioritization Visualization

This type of data visualization can be made in Tableau using the data from the Prioritization Scoring Matrix spreadsheet and the “Packed Bubbles” data visualization.

Uses initiative criteria ratings from the Scoring Matrix to display initiatives rank in relation to each other

# Transformational Initiatives Management Strategic Framework

**About Deloitte**

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee, and its network of member firms, each of which is a legally separate and independent entity. Please see [www.deloitte.com/about](http://www.deloitte.com/about) for a detailed description of the legal structure of Deloitte Touche Tohmatsu Limited and its member firms. Please see [www.deloitte.com/us/about](http://www.deloitte.com/us/about) for a detailed description of the legal structure of Deloitte LLP and its subsidiaries. Certain services may not be available to attest clients under the rules and regulations of public accounting.

---

**I. Purpose**

The purpose of this Statement of Work (SOW) is to secure the services of a contractor with prior experience working within SSA's strategy planning process and in engaging senior executives to identify strategic direction for large organizations.

**II. Background**

At the recommendation of GAO Audit GAO-13-459, the Social Security Administration (SSA) established the Office of the Chief Strategic Officer (OCSO) in 2013 to create an entity dedicated to strategic planning. The Office of the Chief Strategic Officer (OCSO) for the Social Security Administration (SSA) works across organizational boundaries to infuse strategic thinking throughout the agency and ensure resources and initiatives are driving the achievement of agency goals and objectives.

Strategy and Performance management is a discipline that involves the formulation, implementation and evaluation of decisions that enable an organization to achieve its objectives. It is a continuous process of strategic analysis, strategy creation, implementation and monitoring, used by organizations with the purpose of achieving desired outcomes.

In essence, strategy and performance management answers the following three questions:

- What is the current state of the organization?
- Where does the organization want to go and what does it want to be?
- How will the organization get there?

The purpose of strategy and performance management is not about predicting the future, but rather about preparing for it and knowing what exact steps the organization will have to take to implement its strategic plan to achieve the desired outcomes.

The support that Social Security Administration (SSA) is seeking is the experience and expert advice of consultants who have worked with Federal agencies in defining and implementing a strategy management structure using a well-established methodology. Specifically, SSA is seeking consultation on its structure of strategy management governance and executive engagement skillsets for developing an agency strategic plan.

**ATTACHMENT 1 –  
STATEMENT OF WORK: OCSO STRATEGY AND PERFORMANCE MANAGEMENT SUPPORT  
SS00-16-30484**

---

OCSO has encountered organizational challenges in facilitating and obtaining feedback from SSA components. While this can be a challenge to any large federal organization with over 70,000 employees, SSA components also grapple with staff shortages, reduced funding and priority initiatives to modernize technology, programmatic systems. Specifically, the agency needs an integrated strategy and performance management framework to communicate with clarity SSA's goals, objectives and strategy and its performance to employees and stakeholders.

There are numerous cyclical and ad hoc activities that influence and/or change strategic direction and priorities without formal assessment of their long-term impacts. The agency needs a strong strategy governance framework to ensure that any strategic planning lifecycle are evaluated for potential ripple effects or unintended consequences. In addition, the strengthening of SSA's strategy management skillsets to ensure OCSO can continue to be the trusted advisor for all strategy and performance related functions within SSA.

Additionally, SSA has experienced waves of retirement and staffing changes and in order to function as the trusted advisor for strategy and performance functions, we must strengthen of SSA's strategy management skillsets.

SSA created its Critical 8 Priority initiatives utilizing 'The PRIME' methodology. The PRIME is a proprietary approach to strategic planning developed by The Clearing, Inc. The PRIME approach drives stakeholder alignment utilizing essential agreement (As Is, Environment, Stake, To Be, and Strategy) that align the organization and provides a model for structuring staff activities, roles and responsibilities.

OCSO is developing the next Strategic Roadmap to capture and communicate the strategic decisions and future direction of the agency. The Strategic Roadmap defines the mechanisms to implement our long-term strategy in three major sections:

- The Agency Critical Management Priorities,
- Agency Strategic Plan(s), and
- Long-range recommendations from key stakeholders.

**ATTACHMENT 1 –  
STATEMENT OF WORK: OCSO STRATEGY AND PERFORMANCE MANAGEMENT SUPPORT  
SS00-16-30484**

---

### III. Scope

#### Project Start-Up and Background Research

To build upon the existing road map and strategic vision, OCSO requires a vendor with expertise utilizing the PRIME methodology.

The scope of this Task Order is to provide consulting services on four tasks:

1. Build upon existing implementation efforts to refine the Strategic Roadmap
2. Assess and Refine current OCSO Strategy and Performance Management Structures and Efforts
3. Assess and Refine Current Agency Wide Strategy and Performance Management Structures and Efforts
4. Assess and provide consultation and training to eliminate skill gaps

Upon notification of award, the contractor shall submit the necessary forms to obtain suitability and clearance to work onsite at SSA. During the time, we are awaiting suitability determination, SSA will and the contractor shall participate in a kick-off/orientation meeting to discuss overall project management with the OCSO team. During this kick-off/orientation meeting, SSA and the contractor shall accomplish, at a minimum, the following:

- Introduce key project personnel;
- Level-set expectations;
- Define next steps;
- Establish milestones and communication protocols; and
- Schedule recurring meetings.

**ATTACHMENT 1 –  
STATEMENT OF WORK: OCSO STRATEGY AND PERFORMANCE MANAGEMENT SUPPORT  
SS00-16-30484**

---

The contractor shall develop and submit a work plan containing additional details about the contractor's approach and a detailed timeline of activities. The contractor shall update the work plan each month and submit the work plan for review by the Contracting Officer's Representative (COR). The COR will review the plan monthly to ensure the project is on track.

**TASK 1: BUILD UPON EXISTING IMPLEMENTATION EFFORTS TO REFINE THE STRATEGIC ROADMAP**

- The contractor shall utilize the proven processes in 'The Prime' to develop, vet and communicate the process and milestones for development of the FY 2018-2022 Agency Strategic Plan
- Using the methods of The Primes, the contractor shall design and implement a series of four approximately two hour working sessions with senior executives to determine and define Strategic Goals and Objectives for the FY 2018-2022 Agency Strategic Plan in accordance to Office of Management and Budget (OMB) guidance in the Circular A-11
  - The contractor shall develop an agenda and meet with Strategy and Performance Management Team members at least 2-weeks prior to a scheduled session to communicate the approach and determine background materials needed from the agency
  - The agency will be responsible for scheduling and coordinating all logistics for these working sessions, which will be held at SSA Headquarters in Woodlawn.
  - The contractor shall co-facilitate working sessions with an appropriate member of the OCSO team, as determined by OCSO leadership
- The contractor shall provide recommendations to OCSO on the use of the Strategic Roadmap to communicate and manage the agency's near-term critical management priorities as well as the long-term strategic goals and objectives of future Agency Strategic Plans.

**TASK 2: ASSESS AND REFINE CURRENT OCSO STRATEGY AND PERFORMANCE MANAGEMENT STRUCTURES AND EFFORTS**

- The contractor shall interview OCSO leadership (approximately 5 executives) and up to 10 SSA leaders outside of OCSO to identify opportunities/challenges with existing strategy and performance implementation efforts. A member of

---

the OCSO team will coordinate the Interviews. The interviews shall be conducted at SSA headquarters in person for local SSA leaders and by phone for those located remotely.

- The contractor shall assess and provide recommended changes to OCSO's Integrated Strategy and Performance Management action plan.
- The contractor shall lead a working session with members of the OCSO Strategy and Performance Management Team to analyze and translate strategy working session outputs into actionable plans. The contractor shall provide expert guidance that will enable OCSO to facilitate strategic dialogs and translate that into clear, structured strategic objectives, priorities, and plans.

**TASK 3: ASSESS AND REFINE CURRENT AGENCY WIDE STRATEGY AND PERFORMANCE MANAGEMENT STRUCTURES AND EFFORTS**

- The contractor shall assess the existing enterprise strategy management structure and processes and provide recommendations on the management structure and governance elements
- The contractor shall conduct working sessions with the core team, focusing on leveraging prior work to recast current governance. The core team (Strategy and Performance Management Team) consists of approximately fifteen team members ranging from GS-13 Analysts to GS-15 OCSO Directors. The contractor shall conduct up to three governance-working sessions.
- Contractor shall provide recommendations to OCSO in communicating and implementing the new agency-wide Strategy and Performance Management governance structure. The contractor shall deliver a recommended Communications and Engagement Plan containing roles, responsibilities and milestones.
- The contractor shall co-facilitate up to five meetings with new Strategy and Performance Management governance groups and stakeholders to communicate roles, responsibilities and milestones and gather related feedback.

**TASK 4: ASSESS AND PROVIDE CONSULTATION AND TRAINING TO ELIMINATE SKILL GAPS**

- The Contractor shall determine the skills needed by the Strategy and Performance Management Team to independently facilitate ongoing strategy development and implementation within the Agency

SS00-16-30484**

- The Contractor shall assess the current skills of the Strategy and Performance Management Team and identify skills gaps in the facilitation of strategy development and implementation within the Agency
- The Contractor shall mentor one to two assigned OCSO co-facilitator prior to a strategy session or meeting with external stakeholders to help build the skills and confidence in applying the facilitation techniques guided by The Primes model.
- Following any meeting or working session with external stakeholders that is co-facilitated by the contractor and OCSO, the Contractor shall meet with the OCSO co-facilitator(s) to evaluate the session, identify lessons learned and areas of improvement, and provide the OCSO co-facilitator(s) mentoring on the development of needed skills

**IV. Deliverables:**

Task	Deliverable	Due Date
Task 1	A. Refined Strategic Roadmap, which will support the communication and management of strategic direction and milestones for the next 10 years B. Documented process and milestone plan for development of the FY 2018-2022 Agency Strategic Plan C. Draft version of agency goals and objectives in accordance to Circular A-11	Deliverables A. and B. – Within 45 days of task order start  Deliverable C. – Within 90 days of task order start
Task 2	A. Contractor shall provide high-level requirements to guide OCSO in translating stakeholder requirements into key skills and products; B. Contractor shall provide a recommendation report on high-level roles and responsibilities that will support OCSO in most effectively meeting the needs of stakeholders	Within 45 days of task order start
Task 3	A. Contractor shall provide documented recommendations on the purpose and scope for governance of OCSO, including the	Within 90 days of task order start

**ATTACHMENT 1 –  
STATEMENT OF WORK: OCSO STRATEGY AND PERFORMANCE MANAGEMENT SUPPORT  
SS00-16-30484**

	<p>optimal structure and use of the existing Executive Vision Council (EVC)</p> <p>B. Contractor shall conduct and co-facilitate engagement sessions with the new governance group and other designated groups to guide and promote strategy development and implementation</p>	
Task 4	<p>A. Contractor shall create a report summarizing skills needed to independently facilitate ongoing strategy development and implementation within the Agency.</p> <p>B. Contractor shall document training for key staff on facilitation of strategy development and implementation efforts. This is training material to support the advancement of skills needed to facilitate a strategic dialog with agency executives and stakeholders. It advances OCSO's ability to facilitate strategy sessions without the need of contractor assistance in the future.</p> <p>C. Contractor shall create a log of lessons learned for staff to reference for future strategy development and implementation efforts.</p>	Within 6 months of task order start
All Tasks	<p>A. Contractor shall record meeting minutes for meetings attended.</p> <p>B. Contractor shall provide Performance Report outlining meetings, deliverable status and work activities.</p>	<p>Deliverable A. – Within 24 hours of meeting</p> <p>Deliverable B. – Bi-weekly</p>

**ATTACHMENT 1 –  
STATEMENT OF WORK: OCSO STRATEGY AND PERFORMANCE MANAGEMENT SUPPORT  
SS00-16-30484**

---

**V. Period of Performance:**

Date of award through six months.

**VI. Skills Required:**

- Bachelors (Masters Preferred) in Organizational Management, Business Administration or related field
- Excellent written and communication skills
- Minimum of 6 years relevant experience
  - Strategic Direction and Vision
  - Program Management
  - Performance Management
  - Leading Change
  - Interacting with senior-level executives
- Knowledge of SSA's organizational structure and processes
- Previous experience working on SSA's critical 8 initiatives and priorities

**VII. Assumptions and Constraints:**

- Contractors are to complete work at SSA's main Woodlawn campus unless otherwise approved by the Program Manager or COR.
- Contractor must prepare written text deliverables in Microsoft Word format and provide electronically.
- The contractor must notify the Program Manager and COTR if at any time, of work delays or endangered deadlines for activities or deliverables.
- Need to be available during SSA core hours of 9:00am to 5:00pm in order to meet with OCSO staff.
- All deliverables are the sole property of OCSO and SSA and contractor may not share without the consent of OCSO.

**VIII. Accessible User Interface and Electronic Content Requirements**

The contractor shall ensure the following deliverables conform to the following content and user interface requirements:

Deliverable	Requirement
Any documentation that the Contractor provides, such as, but not limited to:	All documentation, reports, and training materials shall be accessible to people with disabilities.

## **Improving Quality and Payment Accuracy for Our Customers**

### Office of Retirement and Disability Policy

December 5, 2016

The Improper Payment Oversight Board (IPOB) is a cross component group of Deputy and Assistant Deputy Commissioner across the enterprise, chaired by the Assistant Deputy Commissioner for Retirement and Disability Policy (ORDP). The IPOB leads the effort to improve quality and payment accuracy, focusing on strategies that address the root causes of improper payment.

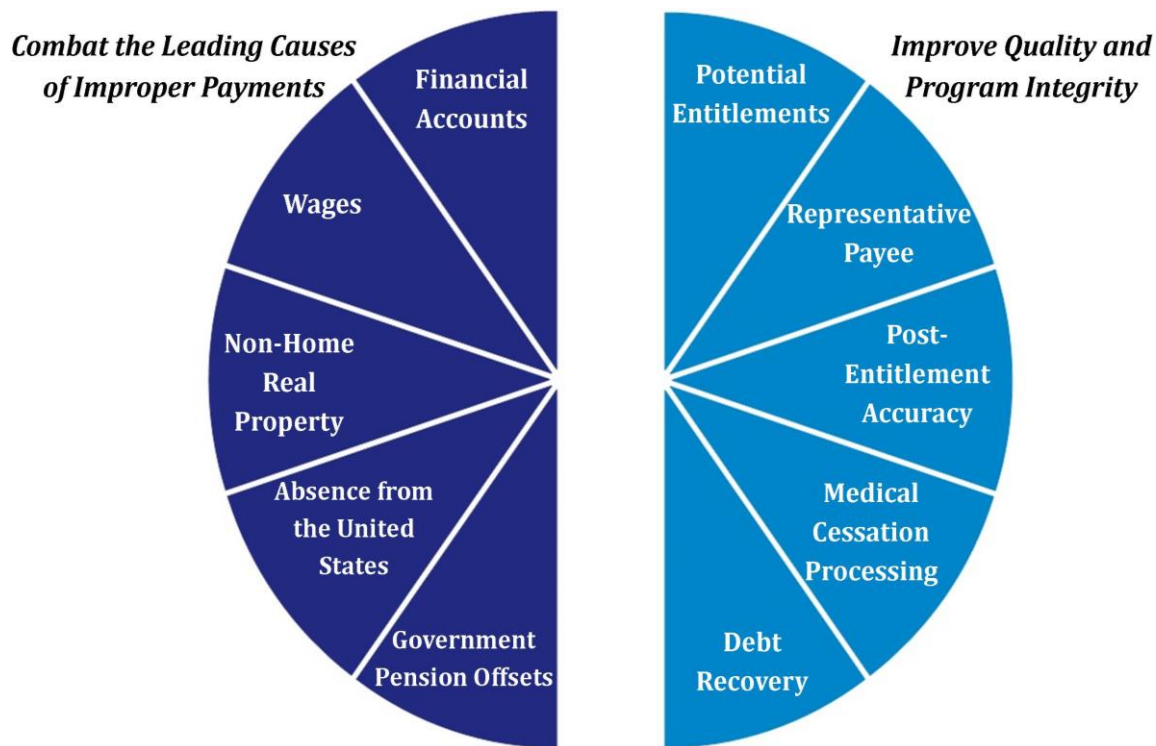

<b>FY15 Payment Accuracy Snapshot</b>		
	<b>Old-Age, Survivors, and Disability Insurance (OASDI)</b>	<b>Supplemental Security Income (SSI)</b>
<b>Beneficiaries/Recipients Paid</b>	60 million	8.3 million
<b>Benefits Paid</b>	\$853.7 billion	\$56.6 billion
<b>Overpayment Accuracy</b>	99.6%	* 93.9%
<b>Underpayment Accuracy</b>	99.3%	98.6%
<b>Improper Payments</b>	\$3.7 billion	\$4.2 billion
<p>* In FY15, SSA achieved our highest SSI accuracy rate in more than a decade.</p> <p>Despite this progress, much work remains. Even small error rates result in substantial improper payments because of the size of our programs. To reduce improper payments by one tenth of one percent, we need to prevent nearly \$57 million in improper payment. A similar improvement in OASDI payment accuracy requires a reduction of \$850 million in improper payments.</p>		

#### Key challenges:

- Reliance on beneficiaries to self-report information affecting their eligibility or entitlement;
- Statutory complexity of our programs, particularly the Supplemental Security Income (SSI) program where we pay benefits on the first day of the month, although changes may occur later in that month;
- Lack of readily available third party data that we can match to increase payment accuracy in some areas, including legal barriers that make it difficult to engage in direct data matching.

#### Key Strategies:

The cornerstone of SSA's program integrity efforts are medical continuing disability reviews (CDRs) and SSI redeterminations (RZ). Congress appropriates special funding each year for those workloads. As shown in the following chart, we have also identified 10 key initiatives to improve quality and payment accuracy. These strategies fall into two categories; 1) Combat the leading causes of Improper Payment, and 2) Improve Quality and Program Integrity.

### Combat the Leading Causes of Improper Payments

**Financial Accounts (avg. \$997 million per year in improper payments)** – Excess resources in financial accounts is the leading cause of SSI overpayments, representing nearly one-quarter of all SSI overpayment. The Access to Financial Institutions (AFI) process allows us to detect underreported or unreported accounts by searching financial institutions where individuals allege having accounts, as well as nearby institutions.

**Wages (avg. \$1.8 billion per year in improper payments)** – Wages (including work and earnings) is a leading cause of error in both the OASDI and SSI programs. We are implementing legislation to engage in direct data exchanges with commercial payroll providers and eliminate the dependency on self-reporting altogether. We expect this initiative will significantly reduce wage related payment errors.

**Non-Home Real Property (avg. \$262 million per year in improper payments)** – Undisclosed real property is a leading cause of improper payment in the SSI program. We are automating the search for real property data, using LexisNexis, into our SSI initial claims and redetermination processes to identify undisclosed property. This is another initiative to reduce our reliance on recipient self-reporting.

**Absence from the United States (avg. \$161 million per year in improper payments)** – We are studying arrival and departure data from the Department of Homeland Security to identify situations when beneficiaries leave the country for an extended period and are ineligible for benefits. If the study yields positive results, we will pursue a data exchange agreement with DHS for this purpose.

**Government Pension Offsets (avg. \$782 million per year in improper payments)** – Combined, Windfall Elimination Provision and Government Pension Offset are the leading cause of overpayments in the OASDI program. These are benefit reductions that apply to individuals who worked in non-covered employment (did

not pay Social Security taxes) and who receive a pension based on those non-covered earnings. We developed a Corrective Action Plan focusing on the pursuit of new data, enhanced automation, clearer policy instructions, and enhanced training.

### Improve Quality and Program Integrity

#### **Debt Recovery (FY 16 – collected \$3.3 billion in debt but established just over \$6.1 billion in new debt)**

Program debt continues to grow as we detect more in new debt than we collect from past overpayments. This is due to our aggressive program integrity work and some of the statutory and regulatory provisions that limit our ability to collect debt. We have a number of efforts underway to improve our internal and external debt collection efforts, including proposed legislation, automation and business process improvements.

#### **Post-Entitlement Accuracy (avg. \$2.72 billion per year in improper payments, largely overpayments) –**

This initiative consists of strategies to address error-prone and complex OASDI workloads in our Processing Centers and Field Offices. We are implementing targeted quality and audit recommendations along with corrective action plans that focus on policy, procedures and automation. NOTE: The dollar amount above is cumulative across several discrete categories of improper payment.

#### **Medical Cessation Processing (est. \$200 million per year) –**

When individuals receive disability benefits and we determine they are no longer eligible for those benefits due to medical improvement or certain work activity, we cease their benefits. When we do not timely process these medical cessations, particularly after individuals have exhausted all levels of appeal and benefit continuation, we continue to pay them erroneously, often for many years. We will improve our business process and automate manual processes that lead to error.

#### **Potential Entitlements (FY 16 - paid \$52 million in underpayments to nearly 35,000 beneficiaries)**

We identify, analyze, and take steps to prevent the recurrence of situations where the agency has failed to handle a claim or payment record appropriately, resulting in a missed entitlement. Each year, we identify specific workloads and take corrective action through policy simplifications, targeted mailings, automation, and other business process improvements.

#### **Representative Payees (quality issue – no dollar errors detected) –**

Studies find that we do not sufficiently document our determination that a beneficiary or recipient is incapable of managing or directing the management of his or her benefits, and therefore needs a representative payee. While documentation errors do not necessarily mean that we incorrectly appointed a representative payee or appointed the wrong payee, the studies revealed the need to improve our documentation of both evidence and our rationale. We are clarifying and streamlining policy, enhancing our electronic system to require documentation of these determinations, and delivering targeted training.

## INTRODUCTION

The Social Security Administration (SSA) has a proven record of accomplishment in real property efficiency. Despite an increasing need for our services and our commitment to maintain a physical presence in local communities nationwide, we made great strides to do more with less space—our footprint is shrinking. We successfully met the mandates of the Freeze the Footprint (FTF) initiative. At the end of fiscal year (FY) 2015, our FTF portfolio consisted of 24,956,355 useable square feet (USF) acquired through occupancy agreements (OA) we have with the General Services Administration (GSA). Compared to our FY 2012 baseline, we reduced 1.41 million USF, or 5.3 percent.

We continue to maintain momentum in achieving real property efficiencies to comply with the new Reduce the Footprint (RTF) policy requirements. It is important to note that our baseline for RTF activities changed substantially due to recent space classification changes at GSA. We worked with the Office of Management and Budget (OMB) and GSA to reassess the previous predominant use codes contained within the Federal Real Property Profile (FRPP). GSA and OMB consulted with us and agreed that the classifications did not appropriately capture certain types of uses for space, and GSA decided to add new real property use categories. For example, we have large portions of space devoted to serving the public, including waiting rooms, interview stations, and other public amenities. GSA previously classified these areas as office space; however, under the new space classification types, GSA now designates these areas as public facing facilities. Since RTF only counts office and warehouse space, the change in real property use categories substantially altered our new baseline under the RTF policy. Because of this change, our FTF 2015 baseline was 24,956,355 USF; our new RTF 2015 baseline is 11,701,596 USF. Under FTF, we tracked approximately 1,500 occupancy agreements (OA); we are now tracking over 400 OAs for RTF.

Despite these changes, we continue to excel in real property efficiency. By the end of FY 2016, we expect to reduce our RTF portfolio by approximately 190,000 USF. We will achieve these reductions in part from a warehouse project that consolidates our outlying, leased warehouse space into our headquarters (federally owned) warehouse, representing a reduction of approximately 140,000 USF in warehouse space. In total, our RTF Plan calls for an additional 450,000 USF reduction in office space from FY 2017 through FY 2021.

We plan to use the following strategies to reduce our footprint further and increase real property efficiencies:

- Continue our centralized space acquisition approval process;
- Continue to apply space allocation standards (SAS) for all locations per our space standards policy;
- Pursue field and hearing office collocation opportunities when it makes business sense and does not adversely affect customer service; and
- Continue to phase in telework, which may present opportunities for future office space reductions.

We face a number of challenges in achieving additional portfolio efficiencies, including our community-based infrastructure to meet the need for face-to-face public service, and

- Appointing additional administrative law judges (ALJ) to help eliminate our hearings backlog;
- Implementing settlement agreement provisions between the agency and the Union signed in May 2015, which address ergonomic solutions and physical security enhancements in public reception areas;
- Negotiating every floorplan with our Unions, which may extend timelines for construction, and relocation dates. The Union negotiation periods vary based on many factors; and
- Exceeding FTF requirements and reducing our footprint beyond the 2012 baseline allows for fewer opportunities for further reductions.

### **Agency Summary**

We have approximately 65,000 Federal and 17,000 State employees who deliver services through a nationwide network of about 1,500 offices consisting of regional offices, field offices (including Social Security card centers), teleservice centers, processing centers, hearing offices (including satellite offices and national hearing centers), the Appeals Council, and our headquarters in Baltimore, Maryland.

Our field offices and Social Security card centers are the primary points of contact for in-person service with the public. Our teleservice centers primarily handle telephone calls to our National 800 Number.

Employees in our processing centers handle Social Security retirement, survivors, and disability payments, and perform a wide range of other functions, including answering telephone calls to our National 800 Number.

We have strong partnerships with our 54 State disability determination services and depend on their employees to make disability determinations. ALJs in our hearing offices and administrative appeals judges in our Appeals Council make decisions on appeals of Social Security and Supplemental Security Income decisions, including post-entitlement workloads and overpayments. The majority of our employees provide direct service to the public or support other employees that service the public.

## PORTFOLIO STATUS

### Overall Agency Building Portfolio

Our FY 2015 RTF baseline shows that we occupy approximately 11.7 million USF in leased and federally owned buildings (not including data centers or public facing facilities). The agency obtains all space via OAs with GSA. We do not use tools, such as enhanced use lease authority, construction/purchase authority, or direct lease authority, to manage our portfolio.

We are responsible for administering critical programs that require direct contact with the public, and facilities located in areas that offer easy public access. Centrally locating our offices in a business district, access to public transportation, and our workload volumes all factor into deciding how many offices we need and the best location for each one. With the possibility of workload and population changes, it is better for us to locate offices in areas with the greatest need for our services. These areas often fall in locations without federally owned buildings, which contributes to our large number of leased facilities.

### FTF Reductions

Our USF calculation showed a slight increase leading up to the 2012 baseline set by the FTF policy. From 2011 to 2012, our portfolio increased by 714,016 USF. Since implementing FTF, we made great strides to change our trajectory, and our footprint began to shrink. From 2012 to 2015, we saw a decrease of 1.41 million USF, resulting in a net portfolio decrease of 696,882 USF for the previous five years. While there were increases in the beginning of the five-year period, we were able to reverse the trend and create a net reduction, surpassing the original FTF directive.

### Space Classification Code Changes

Due to changes in space classifications, GSA and OMB collaborated with us to change the predominant use code designation for many of our offices to “public facing” rather than “office” space. This change substantially revised our new baseline for RTF, which now only reflects office and warehouse space. The chart below shows the difference between our FTF baselines versus the new RTF baseline due to space classification code changes.

	Direct Leased Space	Federally Owned Space	Occupancy Agreement Space
<b>FY 2015 USF (FTF Baseline)</b>	0	0	24,956,355
<b>FY 2015 USF (RTF Baseline)</b>	0	0	11,701,596

We faced one major challenge when reclassifying our predominant use codes. Since a real property asset can have only one predominant use code, if we occupy a public facing office in the same building as another agency whose space is designated as “office” space, our portion of the facility must also be designated as office space. Due to this rule, some of our public facing facilities are included in our RTF baseline, even if we do not use the facility as office space.

**FY 2015 Portfolio Summary per FRPP Submittal**  
**(All Property, including the RTF Baseline Properties)**

	<b>Direct Lease Space</b>	<b>Owned Space</b>	<b>OA Space</b>
<b>Office</b>	<b>0</b>	<b>0</b>	<b>10,879,591</b>
<b>Warehouse</b>	<b>0</b>	<b>0</b>	<b>822,005</b>
<b>All Other</b>	<b>0</b>	<b>0</b>	<b>13,254,759</b>

**Status Relative to Freeze the Footprint Baseline Requirement**

As of September 30, 2015, our real estate FTF portfolio consisted of 1,555 buildings comprising approximately 25 million USF obtained via OAs through GSA. Of the 25 million USF, 18.2 million is leased space and 6.8 million is in federally owned space.

The chart below summarizes our FTF status and compares our FY 2015 actuals to our FY 2012 baseline totals. In comparison to our FY 2012 baseline, we decreased our USF by 5.3 percent and marginally increased our rent by 0.19 percent.

<b>Freeze the Footprint Status</b>		
<b>Fiscal Year</b>	<b>Useable Square Feet</b>	<b>Annual Rent Costs</b>
2012 (Baseline)	26,367,253	\$754,698,276
2015 (Actuals)	24,956,355	\$756,096,930
2015 Change from 2012	-5.3%	0.19%

Our total reduction from the FY 2012 FTF baseline by the end of FY 2015 was 1.41 million USF. We expect to reduce our portfolio by approximately 190,000 USF by the end of FY 2016, achieving a total reduction of 1.6 million USF and a 6 percent decrease overall from the original 2012 baseline. To reduce our real estate portfolio we:

- Combined headquarters leased facilities at our main campus;
- Disposed of our Metro West facility;
- Moved other headquarters leased space into a newly leased facility in Baltimore, MD;
- Relocated offices nationwide to conform to newly adapted SAS; and
- Furthered efforts to collocate our field and hearings operations, wherever possible. Collocating our operations allows us to maximize the use of our resources and reduce operating costs by sharing conference rooms, information technology support space, restrooms, reception areas, security guards, and equipment.

## CAPITAL PLANNING

Since April 2011, we have engaged GSA's Client Portfolio Planning (CPP) initiative to develop a strategic portfolio plan aimed at reducing overall portfolio occupancy expenses. CPP allows us to optimize our real estate, manage property assets, and continually identify opportunities to consolidate leases, achieve rent gap savings, and meet target reductions and goals. We meet regularly with GSA to improve our efforts to align our real property business goals, strategies, and priorities. To date, we identified CPP opportunities that can achieve \$12.3 million in annual rent savings and 701,000 in rentable square feet (RSF) reductions. This partnership allows us to follow the principals and guidelines for budget formulation and capital planning outlined in version 3.0 of OMB's Capital Programming Guide, a supplement to OMB Circular A-11.

## REDUCTION TARGETS

### Reduce the Footprint Reduction Targets for Office and Warehouse Space

To ensure we meet our annual reduction targets, the SRPO reviews and approves all space requests. To align with the President's budget process, we compile data from regional-level offices who report any moves, closures, relocations, and other space changes for the current year, plus two years into the future.

Since we do not have more than 200 warehouses in our portfolio, we are not required to set a warehouse reduction target. However, in our aggressive approach to meet the requirements of the FTF policy, we modified our business process to reduce both our warehouse portfolio and rent costs. In FY 2016, we completed a project that consolidated our outlying, leased warehouse space into our headquarters (federally owned) warehouse, which resulted in a reduction of approximately 140,000 USF in warehouse space.

Based on our national portfolio of expiring leases, we will apply our SAS to right size our facilities and further reduce our footprint as estimated in the table below. These estimates include all net planned reductions of office space included in our RTF baseline.

**Domestic Office and Warehouse USF Reduction Targets FY 2017-2021**  
(Rounded down to nearest five thousand)

	FY 2017	FY 2018	FY 2019	FY 2020	FY 2021	Total FYs 2017 - 2021
Office Target (Net USF Reduction)	15,000	75,000	15,000	35,000	310,000	450,000
Warehouse Targets (Net USF Reduction)	N/A	N/A	N/A	N/A	N/A	N/A

The attached *SSA Final RTF Template Sept 2016* spreadsheet provides details about the space changes shown in the table above. Many of our office moves are confidential; and, therefore, we do not track them publicly. Our estimated reduction in RTF includes significant projected savings from our offices in Dallas, Falls Church, and headquarters buildings located in Baltimore, MD and Washington, D.C., as well as our Security West facility in Woodlawn, MD. Our plan to reduce space is aggressive, and contingent upon an adequate agency budget to support the projects.

Beyond 2021, we are considering additional options to reduce our footprint. For instance, we are looking at consolidating leases at our headquarters location because we are renovating the Altmeyer building. In addition, we occupy the Frank Hagel Federal Building, a 388,140 USF building located in Richmond, CA and the Addabbo Federal Building, a 666,302 USF building located in Jamaica, NY. GSA is exploring opportunities for other tenants, including other Federal agencies, to optimize the space in both facilities, while ensuring our ability to protect the public's personally identifiable information (PII).

### Performance Benchmarks

We use the President's Management Agenda performance benchmarks and dashboard to help us identify and prioritize real estate projects. We also use internal and external databases to make data-driven decisions. These tools help us identify opportunities for real property efficiencies and improvements, and reduce the size of our inventory by prioritizing actions to collocate and dispose of unneeded properties.

For example, FedStat indicated we have a high utilization rate (UR) compared with other agencies, prompting us to review our space utilization and factors that influence our UR. We calculated approximate averages of public facing functions in our field offices and discovered that, on a relatively consistent basis, over one third of these spaces are dedicated to public use. Since the majority of our space is devoted to field offices serving the public, this accounted for the variance we saw between our UR and rates reported by other agencies. We discussed our space usage classifications with OMB and GSA and negotiated a better and more accurate way to measure our space utilization. Our discussions resulted in GSA revising its space classification codes to include a public facing category to accurately reflect our UR.

In May 2016, OMB and GSA provided a FedStat Summary document that identified 11 opportunities for potential space reductions based on high URs. Using the Benchmarking Initiative website, as well as the Asset Consolidation and Real Property Management tools available on the OMBMax portal website, we determined that a review of URs alone is not the only indicator of opportunities for space savings. Besides URs, we must also consider the office use (i.e., whether the office includes public facing space or special space such as Interactive Video Teletraining Studios). We will use these criteria to perform ongoing analysis of our portfolio to identify additional opportunities for reducing our real estate portfolio.

### Disposal Targets for Owned Buildings

We do not own any property.

### Maintenance of the Reduce the Footprint Baseline

OMB Memorandum 2013-02 states, “*On an annual basis, an agency shall not increase the size of its domestic real estate inventory, measured in square footage, for space predominately used for offices and warehouses.*” We complied with this requirement and decided to go a step further—we have been **reducing** our footprint since 2012. As of September 30, 2015, our real estate portfolio consisted of 1,555 buildings comprising approximately 25 million USF, of which 18.2 million is leased space and 6.8 million is Federal space. This is a decrease of 1,410,898 USF, or 5.3 percent, from our 2012 baseline.

In order to implement our plan to RTF beyond our new 2015 baseline, we will pursue several initiatives, including space negotiations with our Unions, Model Field Office proofs of concept, headquarters office space initiatives, and collocation opportunities.

### **Union Negotiations**

Listed below are initiatives regarding space standards and space sharing that involve Union negotiations.

- Pre-Decisional Involvement (PDI) for Space Standards – our Office of Disability Adjudication and Review (ODAR) began PDI with the Unions in January 2015 to discuss the entire Hearing Office Space Standards. We agree with the Union on the majority of the items, and our next step is to proceed with bargaining the hearing office space standards with the Unions.
- National Treasury Employees Union (NTEU) Space Sharing – the agency and NTEU reached an agreement on procedures for office sharing when an employee teleworks more than two days per week.
- American Federation of Government Employees (AFGE) Space Sharing – the agency and AFGE reached agreement on space sharing for employees who telework two or more days per week.

### **Model Offices**

We are working on several initiatives to test new field office models to improve office designs, while continuing to fulfill our duty to serve the public. In the Chicago and Philadelphia Regions, we are designing model field offices to explore alternate options for serving the public beyond the standard field office model. These offices will create an environment for field offices to test emerging technologies and employ new furniture and office designs, as well as new and improved service delivery methods. We expect to complete these projects in FY 2017.

The Philadelphia and Chicago Model Field Offices are both still proofs of concept, and if proven successful, these designs could result in increased efficiency in other offices in the future. While the design models would generally apply to field offices, which are public facing space, many of our field offices are located in buildings designated as predominantly office space, meaning that there could be tangible benefits to our RTF plan.

## **Headquarters Campus Initiatives**

In addition to other initiatives, we are pursuing other model space initiatives at our headquarters campus. These are pilot programs that require further vetting with stakeholders, including the Unions, before broader implementation.

We are currently renovating nearly 17,000 square feet of space for a component with approximately 140 employees. All of the employees are non-bargaining, which allows us to deviate from our large-site space standard. The floor plan includes multiple meeting space types and smaller offices and workstations, yielding a utilization rate of 125 USF/person. We completed the new space in June 2016.

We are in the midst of designing a pilot “hoteling” space with smaller workspaces as compared to the large site space standard. The pilot space will house 55 staff in 3,550 square feet (120 USF/person). The project is currently in the design phase. The concept will offer locked personal storage, workstations with lower panels, open collaboration spaces, and enclosed private meeting spaces.

## **IRS Collocation Opportunity**

We are in the initial phases of development with the Internal Revenue Services (IRS) about a proposed SSA/IRS collocation that would provide the public with access to both SSA and IRS services at the same location. We are having ongoing discussions to establish potential pilot locations to house small Taxpayer Assistance Centers, with one to four IRS employees, within SSA space. We would see a reduction in guard and rent costs, and a decrease in our physical footprint because of the reduction of space in the scope of our OA.

## **Reported Projects Status**

SSA’s 2015 RTF submission included three projects with planned reductions to office and warehouse space that we could track publicly. The projects included the closing of our Preston Gateway Warehouse, the collocation of our Saddlebrook, NJ teleservice center (TSC) with our Hackensack, NJ field office, and the reconfiguration and reduction of space in our Hartford, CT field office.

The first facility for public tracking is our Preston Gateway Warehouse in Hanover, MD. We consolidated our headquarters warehouse space and successfully closed our outlying warehouse in November 2015, saving approximately 140,000 USF. The second facility for public tracking is our Saddlebrook TSC. To better utilize agency space, we collocated the TSC with the Hackensack, NJ field office on December 4, 2015, saving the agency 12,213 USF.

The final facility submitted for tracking is our Hartford, CT field office. Since the last submission, GSA conducted a cost analysis and noted there would be significant savings in moving this office into a Federal facility. Since this is a public facing facility, GSA re-categorized and removed the facility from our current RTF plan. However, once the office moves into another Federal facility, it is likely that the office will be re-categorized back to office space (depending upon the predominant use code of the other occupying agency) and may be returned to our RTF list. The projected move for this office is in FY 2019.

### Space Design Standard for Future Reductions

In April 2012, we implemented a space design standard, known as the revised SAS, for both field offices and large facilities, which reduced the amount of space we request from GSA. Our SAS policies ensure consistency in space requirements submitted to GSA across regions and from one office to another. Our design standard incorporates the office space design standard of 200 USF per person (employees and contractors) for all non-public contact space as an achievable target goal for future space actions. As of August 2016, we have fully integrated the space design standard of 200 USF into the agency's internal policy and documented it via our Administrative Instructions Manual System, which is accessible to all employees on our intranet.

The 2012 field office SAS establishes the size of individual field offices based on current staffing levels. As technology changes the way we do business, we recognize that we can do the same job with less space. Thus, the field office SAS takes into account changes in technology and workflows and provides reduced space requirements for personnel and support areas. For example, since we began using electronic storage, the standard provides less storage space for paper files. We anticipate that continued virtualization of data will further reduce storage needs for both paper files and data equipment. The field office SAS requires efficient space planning for employee workspaces and support space.

The agency's initiative to test new model field offices supports this effort. Our offices will incorporate new, GSA-influenced furniture and office designs. Our offices will also incorporate new service delivery methods, such as self-help kiosks, to reduce face-to-face interaction and traffic in offices.

The revised field office SAS also reflects improvements in employee safety and service to the public. Our SAS for newly occupied field office space requires the construction of a barrier wall to separate public areas from employee areas. If we renew a lease for existing space, we require tenant improvements to add a barrier wall and to address other employee security requirements. In addition, we must increase space in reception areas to meet the needs of the public, including protecting their PII. We recently enhanced our reception areas to include larger interviewing areas for the public with increased acoustical properties to ensure that we provide maximum protection of our claimant's PII. Although the areas for the public are larger, we will reduce our footprint through FY 2021.

Our revised SAS for large facilities applies to all of our headquarters facilities, including the main complex in Woodlawn, MD; the ODAR operation in Falls Church, VA; our 10 regional offices; program service centers; and mega-teleservice centers. To optimize utilization, the revised standard reduced office sizes and redefined support spaces, such as computer equipment rooms and circulation space. For our larger facilities, we will focus on conforming to an all-in design standard of 200 USF per workstation on prospectus projects moving forward.

### **CLIMATE RESILIENCY**

We maintain and publish a *Strategic Sustainability Performance Plan*, which provides our agency with a structured, systematic approach for managing environmental and regulatory responsibilities to continuously improve overall environmental stewardship. The most recent plan includes a goal (#10) that addresses Climate Change Resiliency. This goal specifically states that, "While the

scope, severity, and pace of future climate change are difficult to predict, it is clear that potential changes could have important effects on our operations and programs.” Through climate adaptation planning, we are identifying how climate change is likely to affect our ability to achieve our mission, operate our facilities, and meet our policy and program objectives. We are working to improve our resiliency by tapping into inter-agency Federal government initiatives to improve the accessibility and coordination of climate change science for decision making, and continue to coordinate with GSA’s climate change adaptation efforts. We are building resiliency into our policies and procedures by continuing our review of existing emergency contingency plans and workforce protocols and policies, and incorporating climate change considerations into them as needed.

## **COMPLIANCE AND INTERNAL CONTROLS**

In FY 2012, we modified delegations of space acquisition authority from our 10 regional offices to a single signatory for all requests for space. Consequently, our SRPO must review and approve all requests for space prior to submission to GSA. We established a headquarters-based team to work with our regional offices and GSA to monitor the increases and decreases in office and warehouse space. This centralized process allows us to: (1) closely monitor our real estate portfolio against the established baseline; (2) consider collocation opportunities, where possible; (3) prioritize legitimate competing space requests across our portfolio, based on business case justifications, cost benefit analysis, and planning needs; and (4) ensure compliance with our space standards to support efficient space use.

We currently use a SharePoint site to manage all space requests. The process for evaluating space requests includes the following tasks:

1. OFSM provides our regional counterparts with a list of leases expiring in the next 36-40 months to ensure we submit requirements to GSA in a timely manner. Approximately three years before a lease or OA expires, a regional representative prepares a space request package and submits it electronically to OFSM.
2. The space request package includes a space computation worksheet based upon the appropriate SAS, information related to the current OA, and pertinent background information.
3. An OFSM analyst reviews the space request package for SAS compliance and evaluates the impact of the request on our real property footprint, including our best business case and cost benefit analysis.
4. The analyst makes a recommendation to, and requests approval from, the SRPO.
5. With SRPO approval, the OFSM analyst submits the request for space to GSA.
6. OFSM analysts continue to monitor the space acquisition process to ensure regional and GSA actions conform to our standards and appropriate approvals.

In addition to the process for evaluating space requests, we regularly request space acquisition data from the 10 regions in an effort to track upcoming projects. We compare the data to our headquarters database, as well as data obtained from GSA, to ensure we adequately capture all upcoming projects.

There are instances where it makes better business sense for us to deviate from the standard office space design requirement. Examples include an office that is over-sized for its current location per our SAS, but would cost the agency more to move the office than to pursue a new lease in the current location. To determine the best course of action, we perform a standardized cost benefit analysis during the initial space request process prior to sending it to the SRPO for approval. Our analysis helps to ensure we are making the best use of Government funds.

We conduct annual reviews of field offices to assess service delivery and determine if any changes are necessary to serve the public more effectively. Our reviews consider projected changes in workloads, local populations, demographic trends, and area-specific factors that may affect staffing and service levels. The focus of the reviews is to align anticipated staffing growth rates with workload and population trends.

Although our continued presence is necessary in numerous locations across the country, we are making concerted efforts to restrain real property growth. We evaluate potential collocations and pursue them where it makes good business sense and does not adversely affect customer service. In addition, we work hard to avoid lease overlaps (i.e., double rent) when moving an office from one location to another. We continue to work with GSA to investigate potential collocations with other Federal agencies. This pairing would work particularly well with agencies that have public facing needs. Collocating would allow us to share amenities, such as reception areas, restroom facilities, back end office areas, and security functions, while serving the public at a single, rather than multiple, locations.

During FY 2014, we created several custom reports and spreadsheets to monitor and track our domestic office and warehouse increases and offsets. These tools have allowed us to maintain better control of our portfolio.

In FY 2014, we also completed negotiations with our Unions to implement an expanded telework policy for employees. We are currently phasing in the telework expansion, depending on the unique needs and business requirements of each component. We expect an increase in telework as the agency adopts the policy more broadly. As more employees begin to telework more than two days per week, we can explore desk-sharing arrangements (also known as hoteling). We will continue to monitor our telework practices to look for opportunities to utilize our space more efficiently.

## **FRPP DATA QUALITY IMPROVEMENT**

Since we obtain all of our real property through GSA via OAs, we are not required to report directly to the FRPP. We work with GSA to verify our data before GSA submits the OA directly to the FRPP.

## **CHALLENGES AND IMPROVEMENT PRIORITIES**

One of our main challenges in following the new RTF policy results from the aggressive reduction of space we instituted at the onset of the FTF policy. When OMB implemented FTF, we reviewed our office space and created a successful plan to combine many of the outlying, leased headquarters buildings into federally owned campus buildings. This effort, and numerous other space actions nationwide, allowed us to reduce our footprint by 1,410,898 USF compared to our FY 2012 baseline, which represents a 5.3 percent reduction in our portfolio. Considering that we

made a significant decrease on the forefront of the real estate reduction initiative, further reductions to the new 2015 RTF baseline will be more difficult to achieve.

Hiring new ALJs to help eliminate our hearings backlog may cause a temporary increase in our footprint. Our success in this mission critical effort hinges on these hires.

Another challenge comes from our community-based infrastructure and the need to serve the public in-person. While technology and online services are part of our focus in reaching the public, we still require a physical presence across the country to offer face-to-face services. Due to the continuing need to serve the public face-to-face, our agency has a relatively high space UR. Our FY 2014 benchmarking data indicated that our agency had a UR of 382 USF per occupant. During FY 2014, we were approximately 44 percent above the median. We have over 1,200 field office sites and over 160 hearings office sites, which represents a large majority of our footprint. These offices require public space, which increases our overall USF per person as an agency. Our larger sites do not have the same public space requirements and, therefore, do not face the same UR challenges, but represent a much smaller fraction of our footprint.

With the addition of the new predominant use code in GSA's data dictionary, we re-categorized our offices that serve the public to the new "public facing facility" predominant use code. With this change, our preliminary RTF FY 2015 baseline numbers in the benchmarking submission show an office space only UR of 301 and a total baseline UR of 321 (including warehouse space). While this change does show our UR in a more accurate manner for our office space, there are still many public facing facilities counted as office space in our RTF baseline. These facilities still cause some deviations to our UR.

When revising any of our office space policies or design standards, we must meet labor obligations with three separate Unions: AFGE, NTEU, and International Federation of Professional and Technical Engineers. Ensuring we collaborate appropriately with our labor partners adds to the timeline for implementing new space standards.

Despite the challenges mentioned above, we continue to focus on footprint reductions by optimizing opportunities as they become available. We plan to review properties and use lease expiration opportunities to right size our offices to conform to the revised SAS requirements. As the agency expands telework provisions, we will look for opportunities to begin instituting desk sharing as agreed upon in our Union telework agreement. Internally, we will continue to collocate offices throughout the country as they fit into our agency operating plans. Externally, we will continue to look for opportunities with other agencies in sharing space.

## ATTACHMENTS

As specified in OMB's most recent RTF guidance, attached is an Excel spreadsheet, *SSA Final RTF Template March 2016*, which shows our planned office and warehouse portfolio changes.

## AGENCY CERTIFICATION

The signatories below certify that the information in our FY 2017 through FY 2021 Real Property Efficiency Plan: Reduce the Footprint Policy Implementation is complete, accurate, and complies with existing policy.

# SSA IT MODERNIZATION

## Roadmap V3.0

Transition Team Member Document--Non-Public Information. This document may be disclosed to Authorized  
Transition Team Members only

# PROBLEM STATEMENT

- Little ability to leverage reduction in IT spend on legacy systems
- The cost of extending the legacy to support new legislation is exorbitant
- Expensive or impossible path to utilize modern tech fro the legacy base
- Legacy systems will not take advantage of new cyber-defenses
- Staff who can support legacy are retiring

***This last bullet describes an existential threat... it makes modernization a requirement not a nice cost-cutting measure***

# PREP FOR MODERNIZATION

- Infrastructure
  - ACI Ready for Production
    - BPA in Place: AWS, Azure, SoftLayer...
    - EDW, DCPS2 going live
  - Approved plan for on-prem Cloud
- Technical Environment
  - MDE
  - Policies: 15 Factors, The Edicts...
- Progress
  - BORG, Notices, DCPS2
- Staff
  - Bootcamps
- Agency
  - Awareness before Commitment...

# ROADMAP & COST PROJECTIONS

# INFRASTRUCTURE MODERNIZATION: SHOVEL-READY & STARTED

- Public Cloud in Progress
  - ATO: Q1FY17
  - BPA: Any day now...
  - Two applications in product in Q2FY17
- Private Cloud
  - Plan due Q1FY17
  - Begin development Q2FY17
- Funding will accelerate migration of existing workload to the Cloud
  - Current LINUX & MSFT workloads
  - Mainframe JAVA/WebSphere Workloads based on Plan

## DATA MODERNIZATION: SHOVEL-READY & STARTED

- RI Production in Q2FY17
  - CEDB (was BORG) based on Customer
    - Numident, iAccomodate, Client integrated
  - EDW General Availability
    - Customer
    - MSCICS start in Q2FY17
- Funding required to ramp up modernization as the basis for Earnings
  - Data must be in place before code modernization

# DCPS2: STARTED

## STAFF BY ROLES

Role	Feds	Contractors
Mgmt & Admin	20	
Product Owner	17	
Architect	6	1
DBA	1	2
UX	2	5
Scrum Mstr	8	
Developer	14	30
Tester	9	2

## PROGRESS

- First Release This Month
  - Support for 2% of the Workload
- Modern Infrastructure
  - AWS, Javascript, Etc.
- Releases every Three Months
  - March: Support for 15% of the Workload
  - June: Support for 52% of the Workload
  - 100% in Q1 2018

**This is the basis for Modernization, the proof point, the leverage point for moving forward...**

# COMMUNICATIONS: SHOVEL-READY

## STAFF BY ROLES

Role	Feds	Contractors
Mgmt & Admin	20	
Product Owner	17	
Architect	6	1
DBA	1	2
UX	2	5
Scrum Mstr	8	
Developer	14	30
Tester	9	2

## STAFF RAMP UP

- Six month ramp
- Mgmt, Product, Architects first
- First Milestone in 3 months:
  - Backlog: Epics, RI User Stories, RI MVP
  - Technical Approach & Architecture
  - Through Line Defined

## DISABILITY: NEXT UP...

- Leverage success on DCPS2
- Assumption: 25% code reuse
- First Milestone in 12 months:
  - Backlog: Epics, RI User Stories, RI MVP
  - Technical Approach & Architecture
  - Through Line Defined
- Immediate pivot to advanced functionality
  - Advanced Support for Analyzing Medical Evidence
    - PoC Complete
  - Significant impact on productivity

# CONCLUSION

- Preparation is nearing completion
  - Actually it is ongoing...
- The Agency is coming on-board...
  - Commitment is academic without a budget...
  - Possible commitment to incremental funding...
- We need the funding
  - Incremental Funding will not allow us to catch up
  - \$300M Kick-start is in the President's Budget
  - H.R 6004 will help

# SSA Budget Update & Background

Bonnie Kind  
Associate Commissioner  
Office of Budget

# SSA Overview

---

- On average, over 68 million people receive benefits from Social Security each month.
- Social Security keeps 22 million people out of poverty each year by providing retirement, disability, and survivors benefits – benefits that were earned through their contributions while they worked and which provide critical income support in retirement or if they become disabled.
- Most of the agency's administrative costs are funded by these same worker contributions, but only to the extent that Congress appropriates the funds and allows SSA to spend the money.
- Beneficiaries expect a high level of service from SSA.

# Administrative v. Program Expenses

## FY 2016 Benefit and Administrative Expenses

# What We Do and How Many We Serve

---

Few government agencies touch as many lives as SSA does. For example, in FY 2016, we:

- Paid over \$960 billion to a monthly average of over 68 million beneficiaries;
- Handled approximately 37 million calls on our National 800 Number;
- Served more than 43 million visitors in over 1,200 field offices nationwide;
- Completed over 8.4 million claims for benefits and over 650,000 hearing dispositions;
- Handled more than 33 million changes to beneficiary records;
- Issued almost 17 million new and replacement Social Security cards;
- Posted about 273 million earnings reports to workers' records;
- Handled over 17,000 disability cases in Federal District Courts;
- Completed over 850,000 full medical Continuing Disability Reviews (CDR) to determine if disabled beneficiaries still meet the medical requirements for eligibility; and
- Completed over 2.57 million redeterminations of Supplemental Security Income (SSI) eligibility to ensure that recipients are still eligible for SSI and receiving the correct payment amount based on non-medical factors such as income, resources, and living arrangements.

# SSA's Budget: Major Spending Categories

FY 2016 Actual Spending (excluding reimbursables)

# SSA's Budget Challenges

---

- The agency's funding to support the administration of its programs has been reduced in recent years, resulting in increased wait times and backlogs.
- SSA's core operating budget has shrunk by 10% since FY 2010 after adjusting for inflation.
- While SSA's budget fell by 10%, the number of Social Security beneficiaries rose by 13% since FY 2010.
- The portion of SSA's budget dedicated to program integrity work\* has increased by 88% since FY 2010 while the portion of SSA's budget dedicated to serve the public has decreased.

\* Continuing Disability Reviews (CDR), SSI non-medical redeterminations, Cooperative Disability Investigation Units (CDI), and fraud prosecutions by Special Assistant United States Attorney (SAUSAs).

# Funding for Service (Operating Budget) <sup>1/</sup> (in Millions)

<sup>1/</sup> Funding for Service, i.e., operating budget, does not include funding for Program Integrity, the modernization of the Altmeyer building in FY 2016, ITS no-year, and funding for Recovery Act.

**Transition Team Member Document--Non-Public Information. This document may be disclosed to authorized Transition Team members only.**

# Funding for Program Integrity (PI) (in Millions)

# Beneficiaries & Recipients, FYs 2010-2016

# What We Have Done to Reduce Costs and Improve Efficiencies

---

Some examples include:

- Improved automation – offering new and improved methods of service delivery;
- Business process changes;
- Greater reliance on data analytics;
- Policy simplification and updates;
- Closed more than 60 field offices and more than 500 mobile offices since 2010;
- Reduced the hours our offices are open to the public in order to complete our work as well as finish late-day interviews without overtime;
- Reduced the number of Social Security Statements issued; and
- Suspended lower priority notices.

# SSA's Major Challenges

---

- Hearings Backlog
- Program Service Center (PSC) Backlog
- IT Modernization and Development
- National 800 Number Phone Service
- Field Office Wait Times
- Long Appointment Calendars

## Tough Choices under the Current CR (\$11.959 Billion, if Annualized)

---

The current CR forced us to constrain every aspect of the budget, and we have delayed critical operational decisions until we receive full-year funding. We have:

- An agency-wide hiring freeze, resulting in even fewer people to serve the public;
- Extremely limited overtime for critical work processes, program integrity, health and safety, emergencies, and system upgrades. Our employees in the field need overtime to complete work that cannot be attended to during busy office hours as well as to complete late interviews;
- Restricted funding for all other costs, including mission-critical training and travel. Travel has been cut to an all-time low; and
- Information Technology Systems (ITS) funding at only \$914 million if annualized, which is nearly a 20% decrease from FY 2016 and about a 30% decrease from FYs 2014 and 2015. Our ITS budget helps us become more efficient and reduces our vulnerability to service disruptions on the frontlines.

We are doing everything we can to manage the agency with less funding. While we already are an efficient organization, we continue to look for ways to become more efficient.

# The FY 2017 President's Budget to Congress

---

Our FY 2017 budget request of \$13.067 billion will allow us to rebound from our current situation, modernize our service delivery, and strengthen the integrity of our program. This funding level will allow us to:

- Improve frontline service to the public, such as reducing National 800 Number wait times and improving field office service;
- Implement the agency plan to eliminate the hearing backlog by increasing ALJ and support staff;
- Invest in alternative forms of service delivery to provide more convenient and efficient service, like click-to-chat and secure messaging through *my Social Security*;
- Expand our efforts to combat fraud, waste, and abuse by opening more Cooperative Disability Investigation (CDI) units; and
- Increase our program integrity work.

# What Happens if the CR is Extended?

---

Funding levels under a CR for an extended period in FY 2017 will have a significant impact on both retirees and people with disabilities. If we have to operate at a rate below FY 2016 with built-in inflationary costs of about \$300 million:

- We would have to extend the full staffing freeze, causing hardship on the public;
- We will need to consider reducing field office hours and closing service locations;
- Wait times in our field offices and on our National 800 Number would rise significantly, and we would see our backlogs in our program service centers continue to grow. These delays could interrupt the timely issuance of benefit payments, as well as lead to increased overpayment debts to the government.
- We would not be able to fund our plan to reduce the disability hearings backlog, causing longer delays in benefits for many people who are counting on us.
  - Our hearings backlog was over 1.1 million disability claimants at the end of last year. On average, claimants were waiting almost 550 days for a decision on their disability hearing. Many of those waiting are in dire need of receiving disability benefits to pay for their medical care or for their basic needs and the needs of their families. These hardships are affecting our most vulnerable customers, including veterans, who are at an increased risk of homelessness and disability.
- We could be forced to suspend mailing Social Security Statements; and
- There would be no funding for future IT development or modernization to make us more efficient. Even worse, deep cuts in our IT funding could result in interruptions in service and loss of production on the front-line, causing further delays in service to the public.

It is also imperative that we receive timely full-year funding. For an organization as large as SSA, delaying major operational decisions because of an extended CR is a major setback.

# Request for Funding Exception Under a CR

---

- SSA is currently under a CR, being funded at FY 2016 levels. The Administration is asking for a CR funding anomaly of \$157 million for SSA.
- An anomaly, which would specify an alternate rate of operations to the current CR law, would provide SSA with the funding we need to address our hearings backlog, which has grown to approximately 1.1 million claimants.
- The anomaly language and justification proposed by the Administration is as follows:

Sec. \_\_\_\_\_. Notwithstanding section 101, amounts are provided in the first paragraph of "Social Security Administration—Limitation on Administrative Expenses" at a rate for operations of \$10,755,945,000.

Language is needed to provide an additional \$157 million for the Office of Disability Adjudication and Review (ODAR) within the Social Security Administration (SSA), Limitation on Administrative Expenses account. The current backlog of appeals hearings within ODAR has grown to 1.2 million claimants, an all-time high, and almost 20,000 people died last year while waiting for their hearing. Consistent with the FY 2017 Budget request, funding is needed to hire an additional 250 Administrative Law Judges (ALJs) and associated support staff to address this backlog. Without the anomaly, ODAR would be unable to hire additional ALJs, as SSA has instituted an agency-wide hiring freeze under the current CR.

- Others may be considering a broader anomaly that includes increased funding for both service and program integrity.

# Conclusion

---

- The level of service we provide is directly related to the funding we receive.
  - A growing share of our budget has been consumed by funds allocated for program integrity, while our core operating budget has not kept pace with the increase in the number of Social Security beneficiaries and SSI recipients.
  - Because of the rise in inflationary costs each year, costs that are largely out of our control, even level funding in FY 2017 would be a challenge for us and would lead to service degradation.
  - People pay into the Social Security trust funds throughout their lives, and they expect good service when they retire, become severely disabled, or lose a loved one. When we can't serve them in a timely manner, the impact on their lives can be devastating.
- The longer it takes us to get to our work, the greater the cost is to us and to the public. At some point, we must handle every claim that comes to us, every change of address, every direct deposit change, and every benefit adjustment. Funding us to keep up with the work is not only more cost efficient for us, but it also provides better service for the people who depend on us.

# Questions

**SOCIAL SECURITY**  
Office of the Chief Actuary

December 8, 2016

The Honorable Sam Johnson  
Subcommittee on Social Security  
Committee on Ways and Means  
United States House of Representatives  
Washington, D.C. 20515

Dear Chairman Johnson:

I am writing in response to your request for estimates of the financial effects on Social Security of H.R. 6489, the *Social Security Reform Act of 2016*, which you introduced today. The estimates provided here reflect the intermediate assumptions of the 2016 Trustees Report. This Bill (hereafter referred to as the proposal) includes fifteen provisions with direct effects on the Social Security Trust Funds. The estimates and analysis provided here reflect the combined effort of many in the Office of the Chief Actuary, but most particularly Karen Glenn, Christopher Chaplain, Daniel Nickerson, Kyle Burkhalter, Michael Clingman, Anna Kirjusina, Katie Sutton, and Tiffany Bosley.

The enclosed tables provide estimates of the effects of the fifteen provisions on the cost, income, and combined trust fund reserves for the Old Age, Survivors, and Disability Insurance (OASDI) program, as well as estimated effects on retired worker benefit levels for selected hypothetical workers. In addition, tables 1b and 1b.n provide estimates of the federal budget implications of the fifteen provisions. Assuming enactment of the plan, we estimate that the combined OASI and DI Trust Funds would be fully solvent (able to pay all scheduled benefits in full on a timely basis) throughout the 75-year projection period, under the intermediate assumptions of the 2016 Trustees Report. In addition, under this plan the OASDI program would meet the further conditions for sustainable solvency, because projected combined trust fund reserves would be growing as a percentage of the annual cost of the program at the end of the long-range period.

While we estimate that the provisions of this proposal would make the combined OASI and DI Trust Funds solvent throughout the 75-year projection period under the intermediate assumptions of the 2016 Trustees Report, the two trust funds are separate legal entities. Some modification of the allocation of the total payroll tax rate between the OASI Trust Fund and the DI Trust Fund might be necessary to ensure that both trust funds would remain solvent for the next 75 years under these assumptions.

The proposal includes fifteen basic provisions with direct effects on the OASDI program. The following list briefly identifies each provision:

- 1) *For retired worker and disabled worker beneficiaries becoming initially eligible in January 2023 or later, phase in a new benefit formula (from 2023 to 2032). Replace the existing two PIA bend points with three new bend points and modified benefit formula factors.*
- 2) *Use an annualized “mini-PIA” formula beginning with retired and disabled worker beneficiaries becoming newly eligible in 2023, phased in over 10 years. The mini-PIA calculation would use a single year’s average monthly indexed earnings (mini-AIME) and primary insurance amount (mini-PIA) for each year with taxable earnings.*
- 3) *Replace the current-law Windfall Elimination Provision (WEP) with a new calculation for most OASI and DI benefits based on covered and non-covered earnings, phased in for beneficiaries becoming newly eligible in 2023 through 2032.*
- 4) *After the normal retirement age (NRA) reaches 67 for those attaining age 62 in 2022, increase the NRA by 3 months per year starting for those attaining age 62 in 2023 until it reaches 69 for those attaining age 62 in 2030. Increase the age up to which delayed retirement credits may be earned from 70 to 72 on the same schedule.*
- 5) *Beginning with the December 2018 COLA, provide no COLA for those with modified adjusted gross income (MAGI) above specific thresholds and compute the COLA using the chain-weighted version of the CPI-U (C-CPI-U) for all other beneficiaries.*
- 6) *For spouses and children of retired workers and disabled workers becoming newly eligible beginning in 2023 and phased in for 2023 through 2032, limit their auxiliary benefit to the amount based on one-half of the PIA of a hypothetical worker with earnings equal to the national average wage index (AWI) each year up to his or her eligibility year, and who has the same eligibility year as the worker.*
- 7) *Beginning in January 2019, require full time school enrollment as a condition of eligibility for child benefits at age 15 up to 18.*
- 8) *Provide a new minimum benefit for workers with more than 10 years of covered earnings above a specified level, phased in for retired and disabled worker beneficiaries becoming newly eligible in 2023 through 2032.*
- 9) *Beginning in January 2019, eliminate the retirement earnings test for all beneficiaries under NRA.*
- 10) *Eliminate federal income taxation of OASDI benefits that is credited to the OASI and DI Trust Funds for 2054 and later, phased in from 2045 to 2053.*
- 11) *Provide an option to split the 8-percent delayed retirement credit (DRC) to offer a lump sum benefit at initial entitlement equivalent to 2 of the 8 percent DRC earned, and a 6 percent DRC on subsequent monthly benefits, effective for workers attaining age 62 in 2023 and later.*

- 12) *Beginning in January 2023, provide an addition to monthly benefits for all beneficiaries who have been eligible for at least 20 years. The additional amount is calculated based on 5 percent of the PIA for a hypothetical worker with earnings equal to the national average wage index each year.*
- 13) *Beginning in January 2023, for new and current disabled widow(er) beneficiaries, change the requirement that disability must occur no later than 7 years after the worker's death, or after surviving spouse with child-in-care benefits were last payable, to no later than 10 years.*
- 14) *Beginning in January 2023, for new and current disabled surviving spouse beneficiaries, eliminate the requirement to be age 50 or older for receipt of benefits.*
- 15) *Beginning in January 2023, for new and current beneficiaries, waive the two-year duration of divorce requirement for divorced spouse benefit eligibility in cases where the worker (former spouse) remarries someone other than the claimant before the two-year period has elapsed.*

The balance of this letter provides a summary of the effects of the fifteen provisions on the actuarial status of the OASDI program, our understanding of the specifications and intent of each of the fifteen provisions, and descriptions of our detailed financial estimates for trust fund operations, benefit levels, and implications for the federal budget. See the “Specification for Provisions of the Proposal” section of this letter for a more detailed description of these fifteen provisions.

### **Summary of Effects of the Proposal on OASDI Actuarial Status**

Figure 1 illustrates the projected trust fund ratio through 2090 under present law and assuming enactment of the proposal. The trust fund ratio is defined as the combined Old-Age and Survivors Insurance (OASI) and Disability Insurance (DI) Trust Fund reserves expressed as a percent of annual program cost. Assuming enactment of the proposal, the combined OASI and DI Trust Funds would be fully solvent throughout the 75-year projection period, under the intermediate assumptions of the 2016 Trustees Report. In addition, because the projected trust fund ratio is increasing at the end of the period, the plan meets the conditions for sustainable solvency. It should be noted, however, that because the projected level of reserves reaches as low as 10 percent of annual program cost around 2045, unexpected fluctuations in the economy or other factors affecting program cost or revenue could require additional temporary measures to maintain solvency through this period.

Note: *Trust Fund Ratio* for a given year is the ratio of reserves in the combined OASI and DI Trust Funds at the beginning of the year to the cost of the program for the year.

Under current law, 79 percent of scheduled benefits are projected to be payable on a timely basis in 2034 after depletion of the combined trust fund reserves, with the percentage payable declining to 74 percent for 2090. Under the plan, the OASDI program would be solvent throughout the 75-year projection period, and would have the ability to pay 100 percent of scheduled benefits on a timely basis for the foreseeable future.

Enactment of the fifteen provisions of this proposal would change the long-range OASDI actuarial deficit from 2.66 percent of taxable payroll under current law to a positive actuarial balance of 0.02 percent of payroll under the proposal.

Figure 2 illustrates annual projected levels of cost, expenditures, and non-interest income as a percent of the current-law taxable payroll. The projected level of cost reflects the full cost of scheduled benefits under both current law and the proposal. Under the proposal, projected expenditures equal the full cost of scheduled benefits throughout the long-range period.

OASDI program annual cost under the proposal is higher than under current law, starting in 2019. This difference decreases and by 2022, annual cost under the proposal is lower than under current law. The reduction in cost grows quickly through 2055, reaching over 4 percent of current-law payroll, and then gradually, reaching about 5.5 percent of current-law payroll for 2090. Beginning in 2019, non-interest income under the proposal is projected to be slightly higher than under current law through 2022. For 2023 and later, non-interest income under the proposal is lower than under current law due to reduced and eventual elimination of revenue from income taxation of benefits, with the difference increasing to 0.9 percent of current-law payroll for 2090. The annual balance (non-interest income minus program cost) under the proposal is slightly worse (more negative) than under current law from 2019 through 2021. For 2022 and later, the proposal improves the annual balance.

It is also useful to consider the projected cost, expenditures, and income for the OASDI program expressed as a percentage of Gross Domestic Product (GDP). Figure 3 illustrates these levels under both current law and the proposal.

### **Specification for Provisions of the Proposal**

*1) For retired worker and disabled worker beneficiaries becoming initially eligible in January 2023 or later, phase in a new benefit formula (from 2023 to 2032). Replace the existing two PIA bend points with three new bend points and modified benefit formula factors.*

The three new bend points are at 25 percent, 100 percent, and 125 percent of one-twelfth the AWI from two years prior to initial eligibility. The new PIA factors are 95 percent, 27.5 percent, 5 percent, and 2 percent. During the phase-in, those becoming newly eligible for benefits will receive an increasing portion of their benefits based on the new formula, from 10 percent based on the new formula in 2023 to 100 percent based on the new formula for those becoming newly eligible in 2032 and later. This provision applies to all individuals receiving benefits on the account of a retired, disabled, or deceased worker. The new PIA formula would result in slightly higher benefit amounts for workers with average indexed earnings levels below 90 percent of the AWI, and lower benefit levels for those with higher average indexed earnings. Assuming enactment of this provision, we estimate that 51 percent of worker beneficiaries would have a higher PIA than under current law, and 49 percent would have a lower PIA.

We estimate that enactment of this provision alone would reduce the long-range OASDI actuarial deficit by 0.85 percent of taxable payroll and would reduce the annual deficit for the 75<sup>th</sup> projection year (2090) by 1.53 percent of payroll.

*2) Use an annualized “mini-PIA” formula beginning with retired and disabled worker beneficiaries becoming newly eligible in 2023, phased in over 10 years. The mini-PIA calculation would use a single year’s average monthly indexed earnings (mini-AIME) and primary insurance amount (mini-PIA) for each year with taxable earnings.*

For each year of earnings (indexed as under current law in a monthly equivalent form), for retired workers compute an individual PIA. Sum these individual PIAs for the 35 highest years and divide that total amount by 35 to get the PIA under this provision. For disabled and deceased workers, the number of highest mini-PIA years would equal the number of current-law benefit computation years. Phase-in over ten years, meaning that in 2023, 90 percent of the benefit would be based on the old PIA formula and 10 percent on the new mini-PIA formula, shifting by 10 percentage points each year until 100 percent is based on the new mini-PIA formula for becoming newly eligible in 2032 and later. This provision applies to all individuals receiving benefits on the account of a retired, disabled, or deceased worker.

We estimate that enactment of this provision alone would reduce the long-range OASDI actuarial deficit by 0.34 percent of taxable payroll and would reduce the annual deficit for the 75<sup>th</sup> projection year (2090) by 0.59 percent of payroll.

*3) Replace the current-law Windfall Elimination Provision (WEP) with a new calculation for most OASI and DI benefits based on covered and non-covered earnings, phased in for beneficiaries becoming newly eligible in 2023 through 2032.*

For this new approach, compute a PIA based on all past earnings (covered and non-covered), and multiply by the “non-covered earnings ratio.” This ratio is equal to the current-law concept of the average indexed monthly earnings computed without non-covered earnings divided by a modified average indexed monthly earnings that includes both covered and non-covered earnings in our records. Another way to describe the new approach is that beneficiaries will receive a benefit that reflects the replacement rate applicable for a worker with the same career earnings, where all earnings had been covered.

In the context of this overall proposal, the new approach under this provision would be applied for each individual year of earnings in order to compute modified mini-PIA amounts.

We estimate that enactment of this provision alone would reduce the long-range OASDI actuarial deficit by 0.03 percent of taxable payroll and would reduce the annual deficit for the 75<sup>th</sup> projection year (2090) by 0.05 percent of payroll.

*4) After the normal retirement age (NRA) reaches 67 for those attaining age 62 in 2022, increase the NRA by 3 months per year starting for those attaining age 62 in 2023 until it reaches 69 for those attaining age 62 in 2030. Increase the age up to which delayed retirement credits may be earned from 70 to 72 on the same schedule.*

As the NRA is increased, early entitlement for retired worker and aged spouse benefits may increase by as much as 2 years. The additional reduction to monthly benefits for early entitlement between 5 and 7 years will be at the rate of 4.5 percentage points per year (9/24 percentage point per month). For aged widow(er) benefits, the reduction of 28.5 percent will be retained for new entitlement at age 60 (as well as for disabled widow(er) benefits), and will be phased linearly as under current law to no reduction for age when newly entitled at NRA or above.

In addition to increasing the NRA, increase the age up to which delayed retirement credits may be earned from 70 to 72 on the same schedule. Increase the widow(er) NRA in the same manner. The earliest eligibility age (EEA) for worker and widow(er)'s benefit is unchanged.

We estimate that enactment of this provision alone would reduce the long-range OASDI actuarial deficit by 0.84 percent of taxable payroll and would reduce the annual deficit for the 75<sup>th</sup> projection year (2090) by 1.33 percent of payroll.

*5) Beginning with the December 2018 COLA, provide no COLA for those with modified adjusted gross income (MAGI) above specific thresholds and compute the COLA using the chain-weighted version of the CPI-U (C-CPI-U) for all other beneficiaries.*

For single/head-of-household/married-filing-separate taxpayers with MAGI below \$85,000 and for joint filers with MAGI below \$170,000 for the prior tax year, use the chain-weighted version of the Consumer Price Index for All Urban Consumers (C-CPI-U) to calculate the cost-of-living adjustment (COLA), beginning with the December 2018 COLA. For those beneficiaries whose MAGI is above \$85,000 (\$170,000 if filed jointly) for the prior tax year, provide no COLA. Index the eligibility income threshold amounts to the CPI-U after December 2018. These thresholds are the Medicare Income Related Monthly Adjustment Amount (IRMAA) and are indexed in the same way.

We estimate that enactment of this provision alone would reduce the long-range OASDI actuarial deficit by 1.25 percent of taxable payroll and would reduce the annual deficit for the 75<sup>th</sup> projection year (2090) by 2.31 percent of payroll.

*6) For spouses and children of retired workers and disabled workers becoming newly eligible beginning in 2023 and phased in for 2023 through 2032, limit their auxiliary benefit to the amount based on one-half of the PIA of a hypothetical worker with earnings equal to the national average wage index (AWI) each year up to his or her eligibility year, and who has the same eligibility year as the worker.*

For retired workers, the PIA is calculated as of age 62 and is increased by COLAs thereafter. For disabled workers, the PIA is calculated as of the year of benefit eligibility and is increased by COLAs thereafter.

We estimate that enactment of this provision alone would reduce the long-range OASDI actuarial deficit by 0.07 percent of taxable payroll and would reduce the annual deficit for the 75<sup>th</sup> projection year (2090) by 0.11 percent of payroll.

*7) Beginning in January 2019, require full time school enrollment as a condition of eligibility for child benefits at age 15 up to 18.*

Under current law, children of qualifying retired, disabled, or deceased workers can receive benefits on the worker's account regardless of school attendance up to age 18. Children attending elementary, middle, or high school can continue to receive benefits up to age 19. This provision would require full time school enrollment for children age 15 up to age 18 in order to be eligible for benefits. Eligibility for disabled adult child benefits after attaining age 18 would be unchanged.

We estimate that enactment of this provision alone would reduce the long-range OASDI actuarial deficit by 0.01 percent of taxable payroll and would reduce the annual deficit for the 75<sup>th</sup> projection year (2090) by 0.01 percent of payroll.

*8) Provide a new minimum benefit for workers with more than 10 years of covered earnings above a specified level, phased in for retired and disabled worker beneficiaries becoming newly eligible in 2023 through 2032.*

Under this provision, the PIA based on any worker's account would be set at the higher of (a) the amount based on the standard PIA computation or (b) a percentage of the AWI from the second year prior to initial eligibility. The percentage under (b) would be set at zero percent of AWI for those with 10 or fewer years of work (YOWs), rising to 15 percent of AWI for those with 15 YOWs, then increasing linearly to 19 percent of AWI for those with 19 YOWs. Then the minimum PIA would jump to 25 percent of AWI for those with 20 YOWs, increasing linearly to 35 percent of AWI for those with 35 or more YOWs. A YOW is equal to earnings at or above \$10,875 in 2017 (reflecting a full-time worker earning the federal minimum wage), adjusted thereafter for average wage growth. Scale the YOW requirements for disabled workers, based on years of non-disability. Use the AWI for two years prior to the year of initial eligibility in the minimum PIA calculation with COLA increases after the year of initial eligibility. This provision applies to all individuals receiving benefits on the account of a retired, disabled, or deceased worker.

We estimate that enactment of this provision alone would *increase* the long-range OASDI actuarial deficit by 0.23 percent of taxable payroll and would *increase* the annual deficit for the 75<sup>th</sup> projection year (2090) by 0.41 percent of payroll.

*9) Beginning in January 2019, eliminate the retirement earnings test for all beneficiaries under NRA.*

Under this provision, all beneficiaries under NRA would be exempt, including retired workers, aged spouses, aged widow(er)s, young spouses with a child in care, surviving spouses with a child in care, and children. Because beneficiaries at or above NRA are already exempt from the retirement earnings test under current law, this provision would completely eliminate the retirement earnings test for all beneficiaries.

We estimate that enactment of this provision alone would reduce the long-range OASDI actuarial deficit by 0.01 percent of taxable payroll and would reduce the annual deficit for the 75<sup>th</sup> projection year (2090) by 0.12 percent of payroll.

*10) Eliminate federal income taxation of OASDI benefits that is credited to the OASI and DI Trust Funds for 2054 and later, phased in from 2045 to 2053.*

Under current law, single tax filers with combined “income” (approximately equal to adjusted gross income plus non-taxable interest income and one-half of their Social Security benefit) greater than \$25,000 may have to pay income tax on up to 50 percent of the benefits. If combined “income” exceeds \$34,000, up to 85 percent of the benefits may be taxable. The income tax revenue for taxing up to 50 percent of Social Security benefits goes to the OASI and DI Trust Funds. The additional income tax revenue derived from taxing benefits in excess of 50 percent, up to 85 percent, goes to the Hospital Insurance (HI) Trust Fund. The process is similar for joint tax filers, with \$32,000 and \$44,000 thresholds applying for possible taxation of up to 50 percent or 85 percent of the Social Security benefits, respectively. All threshold levels are fixed amounts and not indexed to price inflation or average wage increase.

Under this provision, the \$25,000/\$32,000 thresholds would increase from 2045 to 2053, and taxation of OASDI benefits that is credited to the OASI and DI Trust Funds would be completely eliminated starting in 2054. The 2045 to 2053 thresholds for single and joint filers would be as follows:

- 2045: \$32,500/\$65,000
- 2046: \$40,000/\$80,000
- 2047: \$47,500/\$95,000
- 2048: \$55,000/\$110,000
- 2049: \$62,500/\$125,000
- 2050: \$70,000/\$140,000
- 2051: \$77,500/\$155,000
- 2052: \$85,000/\$170,000
- 2053: \$92,500/\$185,000.

We estimate that enactment of this provision alone would *increase* the long-range OASDI actuarial deficit by 0.40 percent of taxable payroll and would *increase* the annual deficit for the 75<sup>th</sup> projection year (2090) by 0.96 percent of payroll. Note that the HI Trust Fund would be held harmless relative to current law, with respect to taxation of benefit revenues.

*11) Provide an option to split the 8-percent delayed retirement credit (DRC) to offer a lump sum benefit at initial entitlement equivalent to 2 of the 8 percent DRC earned, and a 6 percent DRC on subsequent monthly benefits, effective for workers attaining age 62 in 2023 and later.*

Those attaining age 62 in 2023 or later have the option to split the current-law 8 percent DRC into two parts, a credit and a lump sum. The credit equals 6 percent for each year (0.5 percent for each month) that eligible benefits are not taken within three years after reaching NRA. The lump

sum is equal to the present value at the time of selecting the option of the additional future monthly benefits the worker is foregoing by taking the 6 percent rather than the full 8 percent DRC. Widows are held harmless from the lump sum decision, meaning that the full 8 percent will apply for widow benefits, even when the deceased worker had elected to take the lump sum option.

We estimate that the change in the long-range OASDI annual balance and the change in the annual deficit for the 75<sup>th</sup> projection year (2090) from enactment of this provision alone would be negligible: that is, between -0.005 and 0.005 percent of taxable payroll.

*12) Beginning in January 2023, provide an addition to monthly benefits for all beneficiaries who have been eligible for at least 20 years. The additional amount is calculated based on 5 percent of the PIA for a hypothetical worker with earnings equal to the national average wage index each year.*

Beginning in January 2023, augment the monthly benefit amount (not the PIA) for those of qualifying age and eligibility duration with an MAGI below \$25,000 if single and below \$50,000 if married. Use the Medicare IRMAA definition of MAGI (AGI plus tax-exempt interest income). For this provision, these thresholds are indexed for years after 2023 by the increase in the C-CPI-U. The full additional amount is applicable for those born in 1957 and later, once 24 years elapse from initial eligibility. The basic additional amount is calculated as 5 percent of the PIA of for a hypothetical worker with earnings equal to the AWI each year. For those born prior to 1957, the full additional amount is multiplied by the number of years they have been affected by the C-CPI-U, divided by 24.

Beneficiaries will receive 20 percent of their additional amount in their 20<sup>th</sup> year after initial benefit eligibility, 40 percent in their 21<sup>st</sup> year after initial eligibility, ..., and 100 percent of their additional amount in their 24<sup>th</sup> and later years after initial benefit eligibility.

Retired and disabled worker beneficiaries, dually entitled spouse beneficiaries, and all survivor beneficiaries receive their addition as described above. Spousal beneficiaries (aged or with a child in care) and child beneficiaries of a living retired or disabled worker receive 50 percent of the additional amount described above. Other beneficiary types (such as parents of deceased workers) will receive the percentage of the flat benefit that is equal to the percentage of the insured worker's PIA that they receive.

The AWI used is for the second year prior to the beneficiary's initial eligibility year, with applicable COLAs applied up to the age when the addition is received. The additional amount is added to the monthly benefit after reductions for early claiming or increases for delayed claiming have been applied.

We estimate that enactment of this provision alone would *increase* the long-range OASDI actuarial deficit by 0.07 percent of taxable payroll and would *increase* the annual deficit for the 75<sup>th</sup> projection year (2090) by 0.07 percent of payroll.

*13) Beginning in January 2023, for new and current disabled widow(er) beneficiaries, change the requirement that disability must occur no later than 7 years after the worker's death, or after surviving spouse with child-in-care benefits were last payable, to no later than 10 years.*

We estimate that the change in the long-range OASDI annual balance and the change in the annual deficit for the 75<sup>th</sup> projection year (2090) from enactment of this provision alone would be negligible: that is, between -0.005 and 0.005 percent of taxable payroll.

*14) Beginning in January 2023, for new and current disabled surviving spouse beneficiaries, eliminate the requirement to be age 50 or older for receipt of benefits.*

Under current law, widow(er)s must attain age 50 in order to qualify for benefits as widow(er)s on the basis of being disabled. This provision would remove the age-50 requirement.

We estimate that the change in the long-range OASDI annual balance and the change in the annual deficit for the 75<sup>th</sup> projection year (2090) from enactment of this provision alone would be negligible: that is, between -0.005 and 0.005 percent of taxable payroll.

*15) Beginning in January 2023, for new and current beneficiaries, waive the two-year duration of divorce requirement for divorced spouse benefit eligibility in cases where the worker (former spouse) remarries someone other than the claimant before the two-year period has elapsed.*

We estimate that the change in the long-range OASDI annual balance and the change in the annual deficit for the 75<sup>th</sup> projection year (2090) from enactment of this provision alone would be negligible: that is, between -0.005 and 0.005 percent of taxable payroll.

## **Detailed Financial Results for the Provisions of the Proposal**

### **Summary Results by Provision**

**Table A** provides estimates of the effects on the OASDI long-range actuarial balance for each of the fifteen provisions of the proposal separately and on a combined basis. The table also includes estimates of the effect of each provision on the annual balance (the difference between income rate and the cost rate, expressed as a percent of current-law taxable payroll) for the 75<sup>th</sup> projection year, 2090. Interaction among individual provisions is reflected only in the total estimates for the combined provisions.

### **Benefit Illustrations**

**Tables B1 and B2** provide illustrative examples of the projected change in benefit levels under the fifteen provisions that affect benefit levels for beneficiaries retiring at age 65 in future years at five selected earnings levels, with selected numbers of years of work. The “Maximum-AIME Steady Earner” is assumed to have earnings at ages 22 through 64 that equal the current-law taxable maximum level (equivalent to \$118,500 for 2016). **Table B3** provides additional important information on characteristics of retired workers represented by these illustrations.

Table B1 compares the initial scheduled benefit levels, assuming retirement at age 65 under the provisions of the proposal, to both scheduled and payable current-law benefit levels. Benefit amounts scheduled under the proposal are generally lower than those scheduled in current law, because the three provisions included in the table that decrease benefits for most workers (NRA increase, COLA decrease, mini-PIA) generally outweigh the other two provisions included (change the PIA formula, increase the minimum benefit). Note that two of the hypothetical worker examples provided have higher benefits than scheduled under current law because of the minimum benefit provision. The final two columns of this table show the level of scheduled benefits under the proposal as a percentage of current-law scheduled and current-law payable benefits, respectively.

Table B2 compares the change in scheduled benefit levels at ages 65, 75, 85, and 95 under the proposal to scheduled benefits under current law, assuming retirement at age 65. Table B2 shows that projected scheduled benefits under the provisions of the proposal decrease in relation to current-law scheduled benefits between ages 65 and 75 for most earners. The benefit addition increases proposal benefits for ages 85 and 95 above the level scheduled in current-law for several hypothetical lower-earner examples, and diminishes the decrease relative to current-law scheduled benefits for other earners.

The hypothetical workers represented in these tables reflect average career-earnings patterns of workers who started receiving retirement benefits under the Social Security program in recent years. The tables subdivide workers with very low and low career-average earnings levels by their numbers of years of non-zero earnings.

Table B3 provides information helpful in interpreting the benefit illustrations in tables B1 and B2. Percentages in Table B3 are based on tabulations from a 10-percent sample of newly-entitled retired workers in 2007. Table B3 displays the percentages of these newly-entitled retired workers in 2007 that are closest to each of the illustrative examples and are:

- 1) “Dually Entitled”, meaning they received a higher spouse or widow(er) benefit based on the career earnings of their husband or wife,
- 2) “WEP” (Windfall Elimination Provision), meaning that they received a reduced benefit due to having a pension based on earnings that were not covered under the OASDI program (primarily certain government workers), and they had less than 30 years of substantial earnings that were taxable under the OASDI program,
- 3) “Foreign Born”, meaning that they entered the Social Security coverage area after birth (and generally after entering working ages), and
- 4) “All Others”, meaning they had none of the three characteristics listed above.

The extent to which retired-worker beneficiaries represented by each of the illustrative examples have any of the characteristics listed above (dually entitled, WEP, foreign born) is important because such individuals are less dependent on the OASDI benefit that relates to their own career-average earnings level.

## Detailed Tables Containing Annual and Summary Projections

Enclosed with this letter are **tables 1, 1a, 1b, 1b.n, 1c, and 1d**, which provide annual and summary projections for the proposal.

### Trust Fund Operations

**Table 1** provides projections of the financial operations of the OASDI program under the proposal and shows that the combined OASDI Trust Funds would be fully solvent throughout the 75-year projection period. The OASDI program would also be solvent for the foreseeable future (sustainably solvent), because the OASDI trust fund ratio is projected to rise by the end of the period, 2091. As mentioned earlier, however, the relatively low trust fund ratios projected around 2045 provide only a small contingency reserve for solvency. Unforeseen economic conditions or other events affecting benefits and revenue might require additional measures around that time.

The table shows the annual cost and income rates, annual balances, and trust fund ratios (reserves as percent of annual program cost) for OASDI, as well as the change from current law in these cost rates, income rates, and annual balances. Included at the bottom of this table are summarized rates for the 75-year (long-range) period.

The annual balance (non-interest income minus program cost) under the proposal is slightly worse (more negative) than under current law from 2019 through 2021. For 2022 and later, the proposal improves the annual balance. The improvement in the annual balance increases to 3.7 percent of payroll for 2053, drops to 3.3 for 2054 (due to the full elimination of OASDI taxation of benefits starting in that year), and thereafter increases steadily to 4.5 percent of payroll for 2090. Under the proposal, the annual deficit generally worsens from 1.1 percent of payroll for 2016 to 2.1 percent of payroll for 2028, and then improves until the annual balance turns positive for 2045. The annual balance increases to 0.5 percent of payroll for 2053, drops to 0.2 percent of payroll for 2054, and then stays relatively stable through the end of the long-range period, ultimately reaching 0.2 percent of payroll for 2090. Under current law, the projected annual deficit for 2090 is 4.3 percent of payroll.

The actuarial balance for the OASDI program over the 75-year projection period is improved by 2.67 percent of taxable payroll, from an actuarial deficit of 2.66 percent of payroll under current law to a positive actuarial balance of 0.02 percent of taxable payroll under the proposal.

### Program Transfers and Trust Fund Reserves

Column 4 of **Table 1a** provides a projection of the level of reserves for the theoretical combined OASI and DI Trust Funds, assuming enactment of the fifteen Social Security provisions of the proposal. These trust fund reserve amounts are expressed in present value dollars discounted to January 1, 2016. The table indicates that the provisions include no new specified transfers of general revenue to the trust funds. For purpose of comparison, the OASDI Trust Fund reserves, expressed in present value dollars, are also shown for the current-law Social Security program both without and with the added proposal general fund transfers (zero in this case) in columns 6 and 7.

Note that negative values in columns 6 and 7 represent the “unfunded obligation” for the program through the year. The unfunded obligation is the present value of the shortfall of revenue needed to pay full scheduled benefits on a timely basis from the date of trust fund reserve depletion through the end of the indicated year. Gross Domestic Product (GDP), expressed in present value dollars, is shown in column 5 for comparison with other values in the table.

#### Effect of the Social Security Provisions on the Federal Budget

**Table 1b** shows the projected effect, in present value discounted dollars, on the federal budget (unified-budget and on-budget) annual cash flows and balances, assuming enactment of the fifteen Social Security provisions of the proposal. Table **1b.n** provides the estimated nominal dollar effect of enactment of the proposal on annual budget balances for years 2016 through 2026. All values in these tables represent the amount of *change* from the level projected under current law. In addition, changes reflect the budget scoring convention that presumes benefits, not payable under the law after depletion of trust fund reserves, would still be paid using revenue provided from the General Fund of the Treasury. The reader should be cautioned that this presumption of payment of benefits beyond the resources of the trust funds is prohibited under current law and is also inconsistent with all past experience under the Social Security program.

We understand that the elimination of taxation of Social Security benefits under provision 10 is intended to hold the Medicare HI Trust Fund harmless. The tables provided here for effects on the budget do not reflect any change based on revenue provided to HI from taxing OASDI benefits.

Column 1 of Table 1b shows the added proposal general fund transfers (zero for this proposal). Column 2 shows the net changes in OASDI cash flow from all provisions of the proposal.

We expect the net effect of the proposal on unified budget cash flow (column 3) to be negative in years 2019 through 2021, and then positive in years 2022 and later, with the decrease in program cost more than offsetting income decreases.

Column 4 of Table 1b indicates that the effect of implementing the proposal is a reduction of the federal debt held by the public, reaching about \$11.9 trillion in present value at the end of the 75-year projection period. Column 5 provides the projected effect of the proposal on the annual unified budget balances, including both the cash flow effect in column 3 and the additional interest on the accumulated debt in column 4. Columns 6 and 7 indicate that the provisions of this proposal would have no expected direct effects on the on-budget cash flow, or on the total federal debt, in the future.

It is important to note that we base these estimates on the intermediate assumptions of the 2016 Trustees Report, so these estimates are not consistent with estimates made by the Office of Management and Budget or the Congressional Budget Office based on their assumptions. In particular, all present values are discounted using trust fund yield assumptions under the intermediate assumptions of the 2016 Trustees Report.

### Annual Trust Fund Operations as a Percent of GDP

**Table 1c** provides annual cost, annual expenditures (amount that would be payable), and annual tax income for the OASDI program expressed as a percentage of GDP for both current law and assuming enactment of the fifteen Social Security provisions of the proposal. Showing the annual trust fund cash flows as a percent of GDP provides an additional perspective on these trust fund operations in relation to the total value of goods and services produced in the United States. The relationship between income and cost is similar when expressed as a percent of GDP to that when expressed as a percent of taxable payroll (Table 1).

### Effects on Trust Fund Reserves and Unfunded Obligations

**Table 1d** provides estimates of the changes in trust fund reserves and unfunded obligations on an annual basis. Values in this table are expressed in present value dollars discounted to January 1, 2016.

For the 75-year (long-range) period as a whole, the current-law unfunded obligation of \$11.4 trillion is replaced by a positive trust fund reserve of \$0.6 trillion in present value assuming enactment of the proposal. This change of \$11.9 trillion results from:

- A \$2.0 trillion net *decrease* in revenue (column 2), primarily from eliminating OASDI taxation of benefits in 2054 and later, *minus*
- A \$13.9 trillion net *decrease* in cost (column 3), primarily from increasing the NRA, reducing (and, for some, eliminating) the COLA, using a “mini-PIA” calculation, and modifying the PIA bend points and factors.

We hope these estimates are helpful. Please let me know if we may provide further assistance.

Sincerely,

A handwritten signature in black ink that reads "Stephen C. Goss". The signature is fluid and cursive, with the first name "Stephen" and last name "Goss" clearly legible.

Stephen C. Goss, ASA, MAAA  
Chief Actuary

Enclosures

**Table A—Estimated Long-Range OASDI Financial Effects of H.R. 6489,  
the “Social Security Reform Act of 2016,”  
Introduced by Chairman Sam Johnson**

<u>Provision</u>	<u>Estimated Change in Long-Range OASDI Actuarial Balance <sup>1</sup> (as a percent of payroll)</u>	<u>Estimated Change in Annual Balance for 75<sup>th</sup> year <sup>2</sup> (as a percent of payroll)</u>
<p>1) For retired worker and disabled worker beneficiaries becoming initially eligible in January 2023 or later, phase in a new benefit formula (from 2023 to 2032). Replace the existing two primary insurance amount (PIA) bend points with three new bend points as follows:</p> <ul style="list-style-type: none"> <li>• 25% AWI/12 from 2 years prior to initial eligibility</li> <li>• 100% AWI/12 from 2 years prior to initial eligibility</li> <li>• 125% AWI/12 from 2 years prior to initial eligibility</li> </ul> <p>The new PIA factors are 95%, 27.5%, 5% and 2%. During the phase in, those becoming newly eligible for benefits will receive an increasing portion of their benefits based on the new formula, reaching 100% of the new formula in 2032.....</p>	0.85	1.53
<p>2) Use an annualized “mini-PIA” formula beginning with retired and disabled worker beneficiaries becoming newly eligible in 2023, phased in over 10 years. For each year of earnings (indexed as under current law in a monthly equivalent form), compute a single year’s PIA For retired workers, sum these individual PIAs for the 35 highest years of indexed earnings and divide that total amount by 35 to get the PIA under this provision. For disabled workers, the number of highest mini-PIA years would equal the number of current-law benefit computation years. Phase-in over ten years, meaning that in 2023, 90 percent of the benefit would be based on the old PIA formula and 10 percent on the new mini-PIA formula, shifting by 10 percentage points each year until 100 percent is based on the new mini-PIA formula for those becoming newly eligible in 2032 and later .....</p>	0.34	0.59
<p>3) Replace the current-law WEP with a new calculation for most OASI and DI benefits based on covered and non-covered earnings, phased in for beneficiaries becoming newly eligible in 2023 to through 2032. For this new approach, compute a PIA based on all past earnings (covered and non-covered), and multiply by the “non-covered earnings ratio.” This ratio is equal to the current-law concept of the average indexed monthly earnings computed without non-covered earnings divided by a modified average indexed monthly earnings that includes both covered and non-covered earnings in our records .....</p>	0.03	0.05

**Table A—Estimated Long-Range OASDI Financial Effects of H.R. 6489,  
the “Social Security Reform Act of 2016,”  
Introduced by Chairman Sam Johnson**

<u>Provision</u>	<u>Estimated Change in Long-Range OASDI Actuarial Balance <sup>1</sup> (as a percent of payroll)</u>	<u>Estimated Change in Annual Balance for 75<sup>th</sup> year <sup>2</sup> (as a percent of payroll)</u>
4) After the normal retirement age (NRA) reaches 67 for those attaining age 62 in 2022, increase the NRA by 3 months per year starting for attaining age 62 in 2023 until it reaches 69 for those attaining age 62 in 2030. Increase the age up to which delayed retirement credits may be earned from 70 to 72 on the same schedule. Increase the widow(er) NRA in the same manner. The earliest eligibility age (EEA) for worker and widow(er)’s benefit is unchanged.....	0.84	1.33
5) For single/head-of-household/married-filing-separate taxpayers with modified adjusted gross income (MAGI) below \$85,000 and for joint filers with MAGI below \$170,000 for the prior tax year, use the chain-weighted version of the Consumer Price Index for All Urban Consumers (C-CPI-U) to calculate the cost-of-living adjustment (COLA), beginning with the December 2018 COLA. For those beneficiaries whose MAGI is above the \$85,000/\$170,000 for the prior tax year, provide no COLA. Index the eligibility income threshold amounts to the CPI-U after December 2018.....	1.25	2.31
6) For spouses and children of retired and disabled workers becoming newly eligible beginning in 2023 and phased in for 2023 through 2032, limit their auxiliary benefit to one-half of the PIA for a hypothetical worker with earnings equal to the national average wage index (AWI) each year .....	0.07	0.11
7) Beginning in January 2019, require full time school enrollment as a condition of eligibility for child benefits at age 15 up to 18.....	0.01	0.01
8) Provide a new minimum benefit for workers with more than 10 years of covered earnings above a specified level, phased in for retired and disabled workers becoming newly eligible in 2023 through 2032. Set the minimum PIA at zero percent of AWI for those with 10 or fewer years of work (YOW) to 15 percent of AWI of those with 15 YOWs, increasing linearly so that it reaches 19 percent for 19 YOWs. Then the minimum PIA would jump up to 25 percent of AWI for those with 20 YOWs, increasing linearly so that it equals 35 percent of AWI for those with 35 or more YOWs. A YOW is equal to earnings at or above \$10,875 in 2017 (reflecting a full-time worker earning the federal minimum wage), adjusted thereafter for average wage growth. Scale the YOW requirements for disabled workers, based on years of non-disability. Use the AWI for two years prior to the year of initial eligibility in the minimum PIA calculation with COLA increase after the year of initial eligibility.....	-0.23	-0.41

2016	2,492	2,492	0.0	0.0	0.0	0.0	0.0	0.0		100	100		
2030	2,308	2,839	-9.1	-0.9	-17.0	0.0	0.0	-25.2		75	75		
2050	2,309	3,622	-13.5	-0.9	-34.0	0.0	0.0	-43.3		57	71		
2080	2,317	5,119	-13.5	-0.9	-33.8	0.0	0.0	-43.2		57	76		

<sup>1</sup> Average of highest 35 years of earnings wage indexed to 2016.

<sup>2</sup> Projected percent of new retired worker awards in 2050 closest to AIME levels and years of work.

<sup>3</sup> After the trust fund reserves deplete under present law continuing taxes are expected to be enough to pay about three fourths of scheduled benefits.

<sup>4</sup> After NRA reaches 67 in 2022, increase 3 months per year until NRA reaches 69 for those attaining 62 in 2030.

<sup>5</sup> Starting Dec 2018, prior to benefit receipt, compute the COLA using the chain-weighted C-CPI-U, producing 0.3% lower annual COLAs on average.

<sup>6</sup> Starting in 2023, set BP1 equal to 25% of AWI/12, BP2 equal to AWI/12, BP3 equal to 125% AWI/12 (2 year lag), and change the PIA factors to 95%/27.5%/5%/2%. Phase in the new BP and PIA factors years of initial eligibility 2023-2032.

<sup>7</sup> Incremental change due to the mini-PIA approach. Phase in the new benefit formula for those newly eligible in years 2023-2032.

<sup>8</sup> Provide a minimum PIA such that a worker with 35/20/19/15/10 years of work would have a PIA of at least 35%/25%/19%/15%/0% of AWI/12. A year of work is equal to \$10,875 in 2017, indexed for average wage growth. This provision would take full effect for all worker beneficiaries in 2032 and later, phasing in between 2023 and 2032. The Minimum Benefit Percent change is calculated by applying this provision after all other provisions.

Note: These tables do not reflect the reduced taxation of OASDI benefits that would go to the Hospital Insurance (HI) Trust Fund assuming enactment of this Bill.  
All estimates based on the intermediate assumptions of the 2016 Trustees Report.

**Table B2. Changes in Benefits for Hypothetical Workers Beginning Benefit Receipt at age 65  
H.R. 6489, the "Social Security Reform Act of 2016," Introduced by Chairman Sam Johnson**

**Proposal Scheduled Benefit as Percent of Present Law Scheduled**

Year Attain Age 65	Age 65	Age 75	Age 85 <sup>3</sup>	Age 95 <sup>3</sup>
		(Percent)		
	<b>Very-Low-AIME (\$12,280 for 2016<sup>1</sup>) 30-Year Scaled Earner (8.9% of Retirees<sup>2</sup>)</b>			
2016	100.0	97.7	101.8	100.5

2080	83.1	80.7	78.3	76.1
	<b>Medium-AIME (\$49,121 for 2016<sup>1</sup>) 30-Year Scaled Earner (3.2% of Retirees<sup>2</sup>)</b>			
2016	100.0	97.7	94.9	92.1
2030	82.8	80.4	78.1	75.8
2050	71.9	69.9	67.9	65.9
2080	72.0	69.9	67.9	65.9

	<b>High-AIME (\$78,594 for 2016<sup>1</sup>) 44-Year Scaled Earner (19.8% of Retirees<sup>2</sup>)</b>			
2016	100.0	97.7	94.9	92.1
2030	80.1	77.8	75.5	73.4
2050	66.8	51.6	40.0	30.9
2080	66.8	51.7	40.0	30.9

	<b>Maximum-AIME (\$118,500 for 2016<sup>1</sup>) 43-Year Steady Earner (6.3% of Retirees<sup>2</sup>)</b>			
2016	100.0	81.4	63.0	48.7
2030	74.8	57.8	44.7	34.6
2050	56.7	43.8	33.9	26.2
2080	56.8	43.9	34.0	26.3

<sup>1</sup> Average of highest 35 years of earnings wage indexed to 2016.

<sup>2</sup> Projected percent of new retired worker awards in 2050 closest to AIME levels and years of work.

<sup>3</sup> Increase the benefit by 5% of an AWI worker for those with a MAGI below \$25,000 if single and \$50,000 if married beginning at age 81 and phased in over five years starting in 2023. Index the MAGI thresholds using C-CPI-U.

Note: Starting in 2018, if MAGI is less than \$85,000 if single and \$170,000 if married, compute the COLA using the chain-weighted C-CPI-U, producing 0.3 percentage point lower annual COLAs on average. If MAGI is above the \$85,000 single/\$170,000 married threshold, eliminate the COLA. Index the eligibility income threshold amounts using CPI-W.

Other Changes:

- After NRA reaches 67 in 2022, increase 3 months per year until NRA reaches 69 for those attaining 62 in 2030.
- Starting in 2023, set BP1 equal to 25% of AWI/12, BP2 equal to AWI/12, BP3 equal to 125% AWI/12 (2 year lag), and change the PIA factors to 95%/27.5%/5%/2%. Calculate the PIA using the mini-PIA approach. Phase in the new BP, PIA factors, and benefit formula for those newly eligible in years 2023-2032.
- Provide a minimum PIA such that a worker with 35/20/19/15/10 years of work would have a PIA of at least 35%/25%/19%/15%/0% of AWI/12. A year of work is equal to \$10,875 in 2017, indexed for average wage growth. This provision would take full effect for all worker beneficiaries in 2032 and later, phasing in between 2023 and 2032.

Note: These tables do not reflect the reduced taxation of OASDI benefits that would go to the Hospital Insurance (HI) Trust Fund assuming enactment of this Bill.

All estimates based on the intermediate assumptions of the 2016 Trustees Report.

**Table B3. Important Characteristics of Hypothetical Workers in 2007**

<u>Category</u>	<u>Percent of Beneficiaries Within Each Category That Are:</u>			
	<u>Dually Entitled<sup>2</sup></u>	<u>WEP<sup>3</sup></u>	<u>Foreign Born</u>	<u>All Others<sup>4</sup></u>
<b>Very-Low-AIME (\$12,280 for 2016<sup>1</sup>):</b>				
30-Year Scaled Earner (9.3% of Retirees)	47	6	11	40
20-Year Scaled Earner (5.8% of Retirees)	38	16	21	31
14-Year Scaled Earner (5.3% of Retirees)	22	21	45	20
<b>Low-AIME (\$22,105 for 2016<sup>1</sup>):</b>				
44-Year Scaled Earner (13.1% of Retirees)	15	2	6	78
30-Year Scaled Earner (5.9% of Retirees)	16	9	18	59
20-Year Scaled Earner (3.1% of Retirees)	10	23	35	37
<b>Medium-AIME (\$49,121 for 2016<sup>1</sup>):</b>				
44-Year Scaled Earner (23.0% of Retirees)	1	1	5	93
30-Year Scaled Earner (4.4% of Retirees)	1	8	26	67
<b>High-AIME (\$78,594 for 2016<sup>1</sup>):</b>				
44-Year Scaled Earner (20.5% of Retirees)	0	0	6	93
<b>Maximum-AIME (\$118,500 for 2016<sup>1</sup>):</b>				
Steady Earner (9.4% of Retirees)	0	0	7	93

Note 1: Table B3 displays the percentages of these newly-entitled retired workers in 2007 that are closest to each of the illustrative examples.

Note 2: Percents based on tabulations of a 10-percent sample of newly entitled retired-worker beneficiaries in 2007 (169,725 records). We can be 95 percent confident that each of the values shown above is within 1.4 percentage points of the value we would find using 100 percent of the retirees in 2007.

Note 3: The sum of the percentages for each category (sum across rows) could be greater than 100 percent because some beneficiaries can be classified in more than one of the following groups: dually entitled, WEP, and foreign born.

<sup>1</sup> Average of highest 35 years of earnings wage indexed to 2016.

<sup>2</sup> Under current law, entitled to an additional benefit based on someone else's account. The dually entitled percent is a minimum value. Some beneficiaries that are not currently dually entitled could become dually entitled in the future.

<sup>3</sup> Covered by pension from government employment and are subject to the windfall elimination provision (WEP).

<sup>4</sup> Neither foreign born, subject to WEP, or dually entitled.

Social Security Administration  
Sole Source Contracts

We provided a list of the contracts identified in the Federal Procurement Data System (FPDS) as sole source for the last 24 months (December 1, 2014 – December 1, 2016). We sorted the list in descending order by the Base and All Options amount of the contract. De-obligating actions are in red and located at the end of the list.

In March 2009, the President directed agencies to refrain from awarding non-competitive contracts except where their use is fully justified. To comply with these directives, in May 2010, we established a Competition Advocate Review Board (CARB) to review Justifications for Other Than Full and Open Competition (JOFOC), Limited Source Justifications (LSJ), Sole Source Justifications (SSJ), and Justifications for an Exception to Fair Opportunity (JEFO). The CARB is internal to the agency and advisory to the Competition Advocate and Senior Procurement Executive (SPE). CARB members include Office of Acquisition and Grants (OAG) officials, the Office of the General Counsel, and other senior managers determined appropriate by the Competition Advocate and SPE.

We have a high rate of contracts noted as sole source due to a number of reasons:

- **Medical Expert (ME), Vocational Expert (VE), Medical Consultant (MC), and Verbatim Hearing Reporter (VHR) Case Review Blanket Purchase Agreements (BPA)** – The ME, VE, MC, and VHR BPAs support Operations and the Office of Disability Adjudication and Review by contracting with individuals directly to provide services to support disability case reviews. These BPAs are not competed in the sense that, if the vendor meets the requirements and is willing to perform at our price or less, the vendor gets a BPA. We are currently working with our stakeholders to change this process. The new process will be less cumbersome and award competitive single-provider requirements contracts for each region.
- **Birth and Death Records** – We award these contracts to State and local Bureaus of Vital Statistics (government agencies), which are the only entities that maintain official birth and death records.
- **Software and Hardware Maintenance** – Our agency has more than 60,000 employees nationwide and two modern co-processing data centers, each with full failover capabilities. We need certain software and hardware products and maintenance for continuous processing, compatibility, and failover. Due to the brands required, we have limited sources. In many instances, we compete our requirements among resellers, but because the products are peculiar to one manufacturer, we report them as sole source. We measure pricing against schedules and market research and often acquire discounts due to the size of our business.
- **Transparent Approach** – We have a respect for industry and do work in advance to determine whether there is competition available. We also publish all of our justifications and allow challenges from vendors; although historically, we have received very few.

Sole Source Contracts  
(December 1, 2014 - December 1, 2016)

ECOMMERCE INTELLIGENCE CORPORATION	PROVIDE GOOGLE ANALYTICS. THE AGENCY USES GOOGLE ANALYTICS FOR REPORTING ON PUBLIC WEB ACTIVITY TO SSA CONTROLLED WEBSITES. AS OF MAY 2016, GOOGLE ANALYTICS CLASSIC IS NO LONGER SUPPORTED BY GOOGLE. THIS MEANS GOOGLE WILL NO LONGER BE PROVIDING SYSTEM PATCHES, UPDATES TO CODING, OR TROUBLESHOOTING SYSTEM ERRORS. THERE IS AN IMMEDIATE NEED TO MIGRATE TO UNIVERSAL ANALYTICS TO UPGRADE OUR SYSTEM AND CONTINUE SUPPORT.  OCOMM NEEDS THE CONTRACTOR, E-NOR, TO PROVIDE THE SERVICES TO COMPLETE THE MIGRATION FROM GOOGLE ANALYTICS CLASSIC TO ANALYTICS 360 UNIVERSAL. THIS INCLUDES REPLACES OLDER DOMAIN SCRIPTS WITH ANALYTICS.JS SCRIPTS. AS PART OF THIS MIGRATION, GOOGLE TAG MANAGER AND AUDIENCE CENTER 360 SHALL BE INCLUDED. OCOMM ALSO REQUIRES THE CONTRACTOR TO CREATE A SCRIPT THAT WILL RUN ON THE SSA HOMEPAGE TO AUTOMATICALLY DETECT WHEN USERS CLICK ON A TILE.  A STATEMENT OF WORK IS INCLUDED IN THIS REQUISITION THAT OUTLINES THE ISSUE, THE SCOPE OF WORK INCLUDING THE MIGRATION SERVICES, TAG MANAGER SERVICES, AND THE DELIVERABLES, A PROJECT TIMELINE, AND PRICE QUOTE.	\$29,185.00	\$29,185.00	2016	9/30/2016	SS001650274		0	OTHER THAN SMALL BUSINESS

	CRITICAL SPARE PARTS ARE NEEDED FOR THE ELECTRIC VEHICLE BARRIERS, WHICH ARE ANTI-TERRORISM MEASURES MANDATED BY FEDERAL STANDARDS, THAT PROTECT THE MAIN ENTRANCE TO ONE OF THE AGENCY S DATA CENTERS. THE BARRIERS ARE MEANT TO KEEP OUT ILL-INTENTIONED INDIVIDUALS MEANING TO DO HARM TO AGENCY PEOPLE AND ASSETS. SHOULD THE BARRIERS FAIL WITHOUT THE SPARE PARTS ON HAND, THIS WOULD DELAY REPAIRS AND POTENTIALLY PUT THE PEOPLE AND ASSETS AT RISK. THE MAIN PART NEEDED IS AN ELECTRIC ACTUATOR THAT RAISES AND LOWERS THE BARRIER. THE PARTS ARE CUSTOM DESIGNED BY THE ORIGINAL EQUIPMENT MANUFACTURER FOR THE VEHICLE BARRIERS AND SIMILAR PARTS MAY NOT WORK, FIT OR FUNCTION PROPERLY CAUSING ADDED TIME, COST AND MATERIALS TO BRING THE BARRIERS BACK TO FULL FUNCTIONALITY.
