### NATIONAL SECURITY AGENCY CENTRAL SECURITY SERVICE FORT GEORGE G. MEADE, MARYLAND 20755-6000

Serial: MDR-54577 10 December 2008

This responds to your request of 26 December 2007 to have the NSA Television Center Catalogue reviewed for declassification. The material has been reviewed under the Mandatory Declassification Review (MDR) requirements of Executive Order (E.O.) 12958, as amended and is enclosed. We have determined that some of the information in the material requires protection.

Some portions deleted from the document were found to be currently and properly classified in accordance with E.O. 12958, as amended. The information denied meets the criteria for classification as set forth in Section 1.4 subparagraphs (c) and (d) and remains SECRET and CONFIDENTIAL as provided in Section 1.2 of E.O. 12958, as amended.

Section 6.2 (c) of E.O. 12958, as amended, allows for the protection afforded to information under the provisions of law. Therefore, the names of NSA/CSS employees and information that would reveal NSA/CSS functions and activities have been protected in accordance with Section 6, Public Law 86-36 (50 U.S. Code 402 note). In addition, information regarding other individuals has been deleted from the enclosure in accordance with the sixth exemption of the Freedom of Information Act. This exemption protects from disclosure information that would constitute a clearly unwarranted invasion of personal privacy. In balancing the public interest for the information you request against the privacy interests involved, we have determined that the privacy interests sufficiently satisfy the requirements for the application of the sixth exemption.

Since your request for declassification has been denied you are hereby advised of this Agency's appeal procedures. Any person denied access to information may file an appeal to the NSA/CSS MDR Appeal Authority. The appeal must be postmarked no later than 60 calendar days after the date of the denial letter. The appeal shall be in writing addressed to the NSA/CSS MDR Appeal Authority (DJP5), National Security Agency, 9800 Savage Road, STE 6884, Fort George G. Meade, MD 20755-6884. The appeal shall reference the initial denial of access and shall contain, in sufficient detail and particularity, the grounds upon which the requester believes the release of

information is required. The NSA/CSS MDR Appeal Authority will endeavor to respond to the appeal within 60 working days after receipt of the appeal.

Sincerely,

Lude J. Huffman

LINDA L. HUFFMAN

Chief

#### INTRODUCTION

- 1. This is the ninth edition of the National Cryptologic School catalog of television material available for reproduction and distribution within the cryptologic community. The catalog will be updated through periodic announcements of new productions via the "TELEGRAM" and republished entirely as necessary.
- 2. This catalog includes television programs produced by the NCS Television Center. Not listed are commercial productions which are copyrighted, and productions on one-of-a-kind equipments installed at Headquarters, NSA/CSS. All productions are in color unless otherwise indicated.
  - 3. The Table of Contents is located on page iii and the index begins on page A-1.
  - 4. Productions may be obtained directly from:

Director

National Security Agency/Central Security Service

ATTN: E23

Fort George G. Meade, MD 20755-6000

- 5. Tapes are available in 3" U-Matic, VHS and BETA formats.
- 6. SCE Field Units and non-NSA/CSS activities requesting material from the catalog, may submit their requests directly to the NCS Television Center (E23). Classified tapes (SI) must be ordered through the unit SSO. SECRET and CONFIDENTIAL tapes may be ordered through the unit COMSEC Custodian. Unclassified tapes may be ordered direct. Due to budgetary constraints, all requests for videotapes must be accompanied by new blank video cassettes. These tapes must be high quality, compatible in format to your playback equipment and of sufficient length to accommodate the running time per copy of the requested production(s).

7. FOR FURTHER INFORMATION CONTACtion copies, memo request: NCS TV Center, Computer Mail: E23,		FANX	II,		-7191(s	) or	859-6629(b). To Message request,
Computer Mail. E25,	44 A				4		<u> </u>

# COMSEC EQUIPMENT

UNCLASSIFIED COMSEC

#### INTRODUCTION TO VINSON (U)

TVC-503A

1978

Running Time: 11:30

Classification: Confidential

1 Part

(U) An overview of the VINSON Tactical Secure Voice Equipment.

#### TSEC/KY-57 OPERATOR TRAINING (U)

TVC-503B

1978

Running Time: 52:36

Classification: Confidential

1 Part

(U) A four-part tape on operating the KY-57 equipment consisting of: (1) Introduction to VINSON; (2) Zeroizing KYX-15, loading KYX-15, zeroizing KYK-13, loading KYK-13, changing batteries in KOI-18, KYK-13, and KYK-15; (3) Zeroizing KY-57/KY-58, loading KY-58, changing batteries in KY-58, preparing KY-58 for operation; and (4) Operator's SARK.

#### TSEC/KY-58 OPERATOR TRAINING (U)

**TVC-503C** 

1978

Running Time: 53:15

Classification: Confidential

1 Part

(U) A four-part tape on operating the KY-58 equipment consisting of: (1) Introduction to VINSON; (2) Zeroizing KYX-13, loading KYK-13, changing batteries in a KOI-18, KYK-13, and KYX-15; (3) Zeroizing the KY-57/KY-58, loading KY-58, changing batteries in KY-58, preparing KY-58 for operation; and (4) Operator's SARK.

### **NET CONTROLLER TRAINING (U)**

TVC-503D

1978

Running Time: 75:18

Classification: Confidential

2 Parts

(U) A four-part tape on Net Controller operations consisting of: (1) Introduction to VINSON; (2) Zeroizing KYX-15, loading KYX-15, zeroizing KYK-13, loading KYK-13, changing batteries in a KOI-18, KYK-13 and KYX-15; (3) Zeroizing the KY-57/KY-58, loading the KY-57, changing batteries in a KY-57, preparing KY-57 for operations; (4) SARK Variable Generate Operation, setting up a Net, SARK Automatic Remote Keying, SARK Manual Remote Keying.

#### TSEC/KW-46 BROADCAST SECURITY EQUIPMENT (U)

TVC-762

1980

Running Time: 27:17

Classification: Secret

1 Part

(U) The KW-46 Broadcast Security Equipment is being developed to replace the TSEC/KW-37 and TSEC/KG-14. The KW-46 videotape presentation consists of two parts. Part I contains a review of the operational capabilities of the KW-46 including discussions on data rates, maintainability, encryption/decryption techniques, and synchronization. The KW-46 keying concept is discussed in detail. Part II is a demonstration of the equipment initialization sequence, the single and multi-channel modes of operation, and the remote keying operation. A copy of the narrative accompanies the tape.

#### THE UMSTEAD SYSTEM (U)

TVC-778

1981

Running Time: 23:39

Classification: Secret

1 Part

(U) The UMSTEAD System is a videotape presentation describing the capabilities and operation of the TSEC/CI-11 UMSTEAD system. A description of each component and an operational demonstration are also given on this tape. This presentation is intended to be distributed to major commands and/or agencies to present to them this new concept in secure communications.

UNCLASSIFIED I-1 Equipment

UNCLASSIFIED COMSEC

#### TSEC/KG-84 OPERATING INSTRUCTIONS (U)

TVC-854

1981

Running Time: 45:00

Classification: Confidential

1 Part

(U) This training videotape demonstrates KG-84 setup, cold start, operation, and troubleshooting at the operator level. A module on fill devices is also included.

#### TSEC/KG-81 OPERATOR INSTRUCTIONS (U)

TVC-848

1982

Running Time: 50:00

Classification: Confidential

1 Part

(U) This videotape describes the basic function, operation, switch settings, strapping options, and keying and rekeying of the KG-81 equipment. It is designed to train new operational military personnel.

### STU-II REKEYING (U)

TVC-1027

1984

Running Time: 09:46

Classification: For Official Use Only

1 Part

(U) This is a step-by-step instructional tape on how to load cryptovariables into a Secure Telephone Unit, Second Generation (STU-II) or KY-71, using either a KOI-18 tape reader or a KYK-13 electronic transfer device.

### USING YOUR STU-II (U)

TVC-927

1984

Running Time: 13:15

Classification: For Official Use Only

1 Part

(U) This tape provides operating instructions for the Secure Telephone Unit (STU-II) or KY-71. It explains how to use the STU-II as a normal phone (clear mode), a secure phone (secure mode), and as a secure intercom system. It also addresses the physical security requirements for the crypto ignition key (CIK).

#### UMSTEAD: TODAY AND TOMORROW (U)

TVC-1050

1984

Running Time: 15:40

Classification: Confidential

1 Part

(U) A description of the UMSTEAD (CI-II, COSS), Secure Satellite Communications System. The operational uses, past field developments, and a general explanation of the system are presented. This tape is designed for nontechnical personnel who have a communications need.

### KG-84 HIGH SHOCK DESTRUCTION SYSTEM (U)

TVC-1116

1985

Running Time: 10:25

Classification: For Official Use Only

1 Part

(U) This tape shows how to install and operate a system designed to destroy critical chips inside the KG-84/84A in an emergency. The system is intended for use in high-risk areas when overrun or capture is imminent.

### THE TRIBUTARY SYSTEM (U)

TVC-1132

1985

Running Time: 15:25

Classification: Confidential

1 Part

(U) Shows how to hook up and operate the various equipments which make up the TRIBUTARY System.

UNCLASSIFIED I-2 Equipment

UNCLASSIFIED COMSEC

#### TSEC/KG-84 DLED: AN OVERVIEW (U)

TVC-769

1981

Running Time: 11:45

Classification: Confidential

1 Part

(U) This overview of the KG-84 capabilities is intended to inform potential users of the equipment. A brief history, a comparison with the KW-7, KW-26, KG-13 and KG-30 equipments, a discussion of functional assets—operational modes, data rates, special features, keying method, variables, fill devices, testing—and information concerning service control, related documents, and NSA information sources are included in the tape.

### THE KY-68 AND SELECTED TRI-TAC EQUIPMENTS: AN OVERVIEW (U)

TVC-817

1982

Running Time: 19:21

Classification: Confidential

1 Part

(U) This overview presents various features and functions of the TTC-39, TTC-42 and SB-3865 TRI-TAC circuit switches and the KY-68 Digital Subscriber Voice Terminal. Associated COMSEC equipments are also discussed. This videotape shows advantages of these equipments to prospective users.

### TSEC/KG-81 TRUNK ENCRYPTION DEVICE – AN OVERVIEW (U)

TVC-925

1982

Running Time: 12:15

Classification: Confidential

1 Part

(U) This physical and functional description of the KG-81 Trunk Encryption Device is intended for senior enlisted men and junior officers with some communications background. It is designed to augment a briefing aids package on TRI-TAC COMSEC equipments.

### KY-90 AN OVERVIEW (U)

TVC-864

1983

Running Time: 13:41

Classification: Confidential

1 Part

(U) An introduction to the Secure Digital Net Radio Interface Unit. A tactical equipment capable of interconnecting various types of single channel radios and TRI-TAC circuit switch subscribers passing digital or analogue voice, teletype, facsimile, or computer data.

### STU-III LOW COST TERMINAL (U)

TVC-1201

1986

Running Time: 8:57

Classification: Unclassified

1 Part

(U) This tape promotes acquisition of the STU-III, Secure Telephone Unit, by agencies and contractors handling information related to national security, by demonstrating its ease of operation and installation. (This video is a module of CY-188)

### INTRODUCTION TO VINSON (U)

TVC-1299

1985

Running Time: 11:26

Classification: For Official Use Only

1 Part

(U) An overview of the VINSON Tactical Secure Voice Equipment. Sanitized for contractors.

### PARKHILL MOD (U)

TVC-1561

1987

Running Time: 17:00

Classification: For Official Use Only

1 Part

(U) This videotape is an aid to familiarize maintenance personnel with mandatory modifications to all deployed Parkhill COMSEC equipment.

FOR OFFICIAL USE ONLY

COMSEC

**BATTLE SUCCESS AND COMSEC (U)** 

TVC-1129

1987

Running Time: 7:59

Classification: Unclassified

1 Part

(U) The importance of communications security is highlighted in 6 one and two minute stories from World War II. Through them, the viewer learns how good COMSEC procedures turned the tide.

NATIONAL INFOSEC AWARDS PRESENTATIONS (FOUO)

TVC-2312

1990

Running Time: 58:48

Classification: For Official Use Only

1 Part

(FOUO) 1990 National INFOSEC awards presentations.

COMSEC MONITORING CENTER CEREMONY (U)

TVC-2350

1990

Running Time: 35:07

Classification: Secret Noforn

1 Part

(U) National CONUS COMSEC Regional Monitoring Center - ribbon cutting ceremony, 5/4/90.

P.L. 86-36

# COMSEC GENERAL

<del>-SECRET</del> COMSEC

#### PROCESSING COMSEC EQUIPMENT MODIFICATIONS (U)

TVC-572

1979

Running Time: 08:00

Classification: Secret

1 Part

(U) This seven-minute production informs "S" organization engineers of the necessary procedures in processing a COMSEC equipment modification. A brief history of an actual modification shows the viewer the necessary regulations, published guidelines and forms; the regulating groups involved and the functions of each; requirements of the MOD installers; and duties of the engineer.

### COMSEC INTEGRATED LOGISTIC SUPPORT (U)

TVC-595

1980

Running Time: 10:10

Classification: For Official Use Only

1 Part

(U) COMSEC Integrated Logistic Support informs the viewer about the elements of integrated logistic support and the responsibilities of various "S" Offices in implementing ILS. This tape is intended for management personnel and general dissemination.

### U.S. COMMUNICATIONS IN JEOPARDY (U)

TVC-731

1981

Running Time: 22:40

Classification: Secret Noforn

1 Part

(S-CCO) This tape presents a general overview of the foreign signals intelligence (SIGINT) threat to unprotected U.S. communications.

EO 1.4.(c)

The tape would be useful for persons requiring an understanding of the reality of this threat and the resultant need for communications security; it does not presume familiarity with the subject.

### COMMUNICATIONS SECURITY — RESEARCH AND ENGINEERING (U)

TVC-851

1982

Running Time: 24:00

Classification: Unclassified

1 Part

(U) An overview of Communications Security—Research and engineering at NSA.

### COMSEC AWARENESS (U)

TVC-918

1983

Running Time: 00:60

Classification: Unclassified

1 Part

(U) A one minute spot commercial intended for viewing in conjunction with other TV fare. Its object is to increase basic COMSEC awareness world-wide.

### THE HUMAN THREAT TO COMSEC (U)

TVC-919A

1983

Running Time: 17:23

Classification: Confidential Noforn

1 Part

(U) The object of this tape is to alert people to the serious threat to the security of U.S. cryptographic systems and the information they protect and to enlist support for recommended countermeasures.

#### THE COMSEC CUSTODIAN: A VITAL ROLE (U)

TVC-868

1983

Running Time: 25:35

Classification: For Official Use Only

1 Part

(U) This is an introductory tape to be used in the training of COMSEC Custodians. It contains an overview of the procedures necessary to control COMSEC material properly and covers some of the problems with which the average custodian must cope.

General

<del>- SECRET -</del> COMSEC

### CRYPTOVARIABLES, THE KEYS TO SECURITY (U)

TVC-1013

1983

Running Time: 07:15

Classification: For Official Use Only

1 Part

(U) This videotape is intended to familiarize the viewers with the role of cryptovariables in securing communications, and to give them a better appreciation of the need for special protection of cryptovariables before, during, and after use.

### COMSEC SUPPORT FOR COMMAND AND CONTROL OF NUCLEAR WEAPONS (U)

TVC-998

1984

Running Time: 14:21

Classification: Secret Noforn

1 Part

(U) Describe the

Demonstrates use of the material in simulated operations.

P.L. 86-36

EO 1.4.(c)

### **KEYING MATERIAL ACCESS (U)**

TVC-1088

1985

Running Time: 15:11

Classification: For Official Use Only

1 Part

(U) This tape, based on a worldwide study of practices and procedures used in handling COMSEC keying material, gives practical suggestions for reducing its vulnerability. Although the study was conducted at U.S. Army commeenters, the principles for reducing access to key are universally applicable.

### THE THREAT TO U.S. COMMUNICATIONS IN EUROPE (U)

TVC-1046

1984

Running Time: 48:00

Classification: Secret Noforn

1 Part

### COMSEC COMMERCIAL: LAND SERIES (U)

TVC-1091

1985

Running Time: 9:00

Classification: Unclassified

1 Part

(U) This tape consists of ten thirty second spots. The possible consequence of interception of U.S. communications by an adversary is depicted using an animated cartoon with ten different captions.

#### COMSEC COMMERCIAL: SEA SERIES (U)

TVC-1150

1985

Running Time: 9:00

Classification: Unclassified

1 Part

(U) This tape consists of ten thirty second spots. The possible consequence of interception of U.S. communications by an adversary is depicted using an animated cartoon with ten different captions.

#### THE NAME OF THE GAME, A COMSEC OVERVIEW (U)

TVC-1030

1985

Running Time: 20:35

Classification: Confidential

1 Part

(U) A fast paced overview of Communications Security including transmission security, cryptographic security, emission security, physical security, operations security, and communications cover and deception. NSA's role in present and future COMSEC development is touched on and football analogies are used for added interest. (This Video is a Module of CY-188).

UNCLASSIFIED

### TEMPEST - ITS DIAGNOSIS AND TREATMENT (U)

TVC-1146

1985

Running Time: 14:36 Classification: Confidential

1 Part

(U) The object is to inform federal personnel, military and civilian, about the dangers of compromising emanations from information processing equipment. The threat to national security is shown and precautionary measures recommended.

# DATA SYSTEMS EQUIPMENT OPERATION

DATA SYSTEMS

### MAINTENANCE AND USE OF THE TARGET MASTER ANALYTIC REPOSITORY (U)

UNCLASSIFIED

1981

TVC-824 7 Parts Running Time: 95:01 Classification: Secret Codeword (U) Tape #1 - Introduction to the Target Master Analytic Repository (TMAR), Tape #2 -TMAR Interactive Edit (GRAPHEX) Program, EDIT (GRAPHEX) Program, ADD, Tape #3 -TMAR Interactive Edit (GRAPHEX) Program, EDIT & VIEW, Tape #4 - Updating the TMAR in a TSS Environment, Tape #5 - Operation of the DD 7000 Terminal, Tape #6 - Operation of the IBM 32XX Series Terminal, Tape #7 - Access & Use of TMAR. The objective of the course is to train analysts in the Maintenance and use of the TMAR data base. A P.L. 86-36 student workbook must be used with the videotapes. PLURIBUS IMP OPERATIONS AND MAINTENANCE (U) 1982 TVC-841 Running Time: 88:05 Classification: Unclassified 8 Parts (U) This program describes the 1st level maintenance of the PLURIBUS IMP. It also provides initial background in the theory and implementation of packet switch computer networks by the MASS STORAGE USING DIGITAL OPTICAL DISK (U) 1984 TVC-1048 Running Time: 09:25 Classification: For Official Use Only 1 Part (U) A demonstration of the capabilities of a prototype digital optical disk recorder, which was used to store and retrieve gazatteer information. TEKTRONIX R7844 DUAL-BEAM OSCILLOSCOPE (U) TVC-974 1984 Running Time: 17:17 Classification: Unclassified 3 Parts (U) Tapes 1&2 cover the operation of the mainframe, vertical and horizontal plug-in unit controls and connectors. Tape 3 demonstrates basic signal measurements using the R7844 oscilloscope. HEWLETT-PACKARD 5328A UNIVERSAL COUNTER (U) TVC-1161 1984 2 Parts Running Time: 30:30 Classification: Unclassified (U) Tape 1 describes options available with the counter, controls and connectors, and their functions. Tape 2 shows how to make basic measurements of Frequency, Period, Time Interval, Time Interval Averaging, Totalizing and Ratio. SRL MODEL 112C PLO PRF SYNTHESIZER (U) TVC-1162 1984 2 Parts Running Time: 27:28 Classification: Unclassified (U) Tape 1 covers the controls and connectors and describes their functions. Tape 2 tells how to phase lock to a standard and non-standard reference frequency. It also covers triggering a pulse train on the oscilloscope using the N1, N2, and an external oscillator. TVC-1500 1988 Classification: Secret CCO 1 Part Running Time: 6:00

**Equipment Operation** 

antenna which is

(U) This brief videotape describes the design and operation of the designed to receive LVHF signals in various parts of the world.

II-1

EO 1.4.(c)

**CBT LONG VERSION (U)** 

TVC-2027

1989

Running Time: 23:00

Classification: For Official Use Only

1 Part

(U) The Computer Based Training Show describes the possibilities of CBT, especially within the constraints of modern training needs.

UNCLASSIFIED II-2 Equipment Operation

# DATA SYSTEMS EQUIPMENT MAINTENANCE

DATA SYSTEMS UNCLASSIFIED

SA411-E MOD MANUAL RECEIVER (U)

TVC-567

1979

Running Time: 319:31

Classification: Unclassified

22 Parts

EO 1.4.(c)

(U) Instructs students in the SA411-E Manual Receiver Theory of operation/maintenance, performance characterization, and the receiver integration in the Receiver Subsystem as it related to the expansion program. Approximately 80% of the presentation is devoted to Maintenance Theory.

### **DELTA DATA 7000T MAINTENANCE TRAINING (U)**

TVC-729A

1981

Running Time: 603:30

Classification: Unclassified

26 Parts

(U) This course provides maintenance training for the microprocessor experienced technician on the Delta Data 7000T video display terminal. Maintenance manuals must be used with these tapes.

#### DELTA DATA 3000T CONTROLLER MAINTENANCE (U)

TVC-729B

1981

Running Time: 282:37

Classification: Unclassified

14 Parts

(U) This course provides maintenance training for the microprocessor experienced technician on the 3000T Controller. Maintenance manuals must be used with these tapes.

### **DEMODULATOR GROUP (U)**

OM-62

OM-62 Demodulator Group

MD-1130/FGC Demodulator

IP-1410/FGC Display

TVC-832

1982

Running Time: (A) 52:20 (B) 49:50

Classification: Unclassified

4 Parts

(U) LRU Maintenance for OM-62 Demodulator Group. These tapes provide LRU Maintenance Training for the MD-1130/FGC Demodulator and IP-1410/FGC display.

### LOW BAND RECORDER ANALYZER OPERATION AND FIELD MAINTENANCE (U)

TVC-806

1982

Running Time: 75:00

Classification: Unclassified

3 Parts

(U) This program provides LBRA users operation, calibration, and field maintenance procedures. The information is general in nature but sufficient to allow the user to become comfortable with LBRA applications. The LBRA Manual is often referred to and may be helpful when viewing this material.

### HARDWARE INTERFACE UNIT (U)

TVC-821

1982

Running Time: 85:20

Classification: Unclassified

4 Parts

(U) The Hardware Interface Unit is an interface between two digitizers and the DMA port on a DEC Computer. This series of tapes provides, an overview complete theory of operation and troubleshooting hints on the interface.

### MD-1121/G PSK DEMODULATOR (U)

TVC-798

1983

Running Time: 97:00

Classification: For Official Use Only

7 Parts

(U) This program provides directives for the operation, calibration, and maintenance of the MD-1121/G. This program provides a trained technician with the information, that is required to calibrate and maintain this demodulator. Ancillary information is available in Tech. Manual TEMO - 0A00-010.

#### MD-1119 MULTITONE FSK DEMODULATOR (8X) (U)

TVC-800

1982

Running Time: 113:38

Classification: Unclassified

5 Parts

(U) This program demonstrates the operation, alignment, and detailed circuit operation of the MD-1119 demodulator. The program is of sufficient scope and detail to provide a trained technician with the information required to maintain this unit. For additional information the Technical manual and SPEC TEST MD-1119 may be consulted.

### THE FIELD MAINTENANCE PROCEDURES FOR TD-1306A/UR DEMULTIPLEXER (U)

TVC-791

1981

Running Time: 47:50

Classification: Unclassified

3 Parts

(U) Diagnosing problems in the demultiplexer and replacement of largest replaceable units (P.C. boards, power supplies, display, keypad). Requires use of digital multimeter.

### MD-1118V MULTITONE PSK DEMODULATOR (U)

TVC-799

1983

Running Time: 174:21

Classification: Unclassified

11 Parts

(U) This program provides a trained technician with the information required to accomplish the alignment, testing, repair, and verification of proper operation of the MD-1118V demodulator. For additional details see the MD-1118V Tech. manual.

#### MD-1120/G MULTITONE FSK DEMODULATOR (U)

Running Time:

Classification:

(U) An eight part series on operating and maintenance procedures of the MD-1120/G Multitone FSK Demodulator.

### MD-1120/G MULTITONE FSK DEMODULATOR – INTRODUCTION & OPERATION (U)

TVC-801A

1984

Running Time: 14:00

Classification: For Official Use Only

1 Part

(U) This tape provides an overview of the demodulator operating procedures and illustrates proper operation of the unit.

### MD-1120/G MULTITONE FSK DEMODULATOR - BLOCK DIAGRAM (U)

1141 (O)

TVC-801B

1984

Running Time: 07:40

Classification: For Official Use Only

1 Part

(U) This tape illustrates the signal flow through the demodulator and provides some insight into the technical details of the demodulation process.

Equipment Maintenance

### MD-1120/G MULTITONE FSK DEMODULATOR - CIRCUIT BOARDS (PART 1) (U)

**TVC-801C** 

1984

Running Time: 22:35

Classification: For Official Use Only

1 Part

- (U) Provides a detailed analysis of the logic and circuitry.
- (1) Input automatic gain control
- (2) Double buffer shift register
- (3) Synthesizer
- (4) D to A converter & multiplier
- (5) Filter assemblies
- (6) Vector sum and comparator

### MD-1120/G MULTITONE FSK DEMODULATOR - CIRCUIT BOARDS (PART 2) (U)

TVC-801D 1984

Running Time: 22:20 Classification: For Official Use Only 1 Part

- (U) Provides a detailed analysis of the logic & circuitry.
- (1) Data delay assembly
- (2) Real time output
- (3) Auto analog phase lock loop
- (4) Auto digital phase lock loop

### MD-1120/G MULTITONE FSK DEMODULATOR - CIRCUIT BOARDS (PART 3) (U)

TVC-801E

1984

Running Time: 22:35

Classification: For Official Use Only

1 Part

- (U) Provides a detailed analysis of the logic & circuitry.
- (1) Front end timing no. 1
- (2) Front end timing no. 2
- (3) Keyboard control no. 1
- (4) Keyboard control no. 2

### MD-1120/G MULTITONE FSK DEMODULATOR - CIRCUIT BOARDS (PART 4) (U)

TVC-801F

1984

Running Time: 16:40

Classification: For Official Use Only

1 Part

- (U) Provides a detailed analysis of the logic & circuitry.
- (1) Display register no. 1
- (2) Display register no. 2
- (3) Power up assembly
- (4) Memory times 1 assembly
- (5) I/O buffer
- (6) Raw data output

### MD-1120/G MULTITONE FSK DEMODULATOR - MAINTENANCE (U)

TVC-801G

1984

Running Time: 15:50

Classification: For Official Use Only

1 Part

(U) Illustrates calibration procedures, and performance tests which will assist in fault isolation, and maintenance.

### MD-1120/G MULTITONE FSK DEMODULATOR - REMOTE CONTROL TEST (U)

TVC-801H

1984

Running Time: 05:25

Classification: For Official Use Only

1 Part

(U) Illustrates the procedure for setting up, controlling and verifying the demodulators operating parameters, such as no. of canals, frequency separation and baud rate.

#### MD-1050/G FSK-DFS DEMODULATOR (U)

TVC-803

1983

Running Time: 83:12

Classification: Unclassified

5 Parts

(U) Maintenance, alignment and test procedures on the MD-1050/G FSK-DFS Demodulator.

### SFP5000 HFDF RECEIVER SERIES (U)

Running Time:

Classification:

(U) A four part series on overall troubleshooting and maintenance of the HFDF SFP5000 System. It includes Receiver Alignment (TVC-877 A-N); Miscellaneous SFP5000 troubleshooting and maintenance (TVC-965 A-D); Alignment & troubleshooting the FDK 5001 Frequency Synthesizer (TVC-963 A&B); Troubleshooting the AG5000 Tuning Unit (TVC-964 A&B).

### PLATH SFP5000 DF RECEIVER ALIGNMENT – ALIGNMENT OF 5550–17 POWER UNIT (U)

TVC-877A

1983

Running Time: 09:52

Classification: Unclassified

1 Part

(U) Describes the severe shock hazard inherent with the Plath equipment and the tests that should be performed to insure proper power correction. Tests cover location of all Power Supply and Test Points, measurement of all Power Supply Voltages and adjustments of voltage regulators in the Power Supply Unit.

### PLATH SFP5000 DF RECEIVER ALIGNMENT – ALIGNMENT OF 5550–1113 FINAL STAGE (U)

TVC-877B

1983

Running Time: 11:37

Classification: Unclassified

1 Part

(U) Covers adjustment of the trace on the Cathode Ray Tube and use of a signal generator to test and adjust the AB, CD and HA Circuitry, in the Final stage.

### PLATH SFP5000 RECEIVER ALIGNMENT – ALIGNMENT OF 5550-14 IF HINGED FRAME (PART 1) (U)

TVC-877C

1983

Running Time: 23:06

Classification: Unclassified

1 Part

(U) Shows the location of the IF Frame and the procedures to follow to prepare the Frame for alignment. Describes testing of the 5550-1113 Final Stage prior to IF Frame alignment. Describes the use of a signal generator to adjust the circuitry in the AB and CD channels. Additional testing includes measurement and adjustment of the 3rd local Oscillator.

### PLATH SFP5000 RECEIVER ALIGNMENT -

ALIGNMENT OF 5550-14 IF HINGED FRAME (PART 2) (U) TVC-877D 1983

Running Time: 15:17 Classification: Unclassified

1 Part

(U) A continuation of tape TVC-877C, however, it covers use of the Plath 95-21 Auxiliary Unit to align the circuitry of the AB & CD IF Channels.

### PLATH SFP5000 RECEIVER ALIGNMENT -

ALIGNMENT OF 5550-14 IF HINGED FRAME (PART 3) (U)

TVC-877E

1983

Running Time: 16:08 Classification: Unclassified

1 Part

(U) A continuation of tape TVC-877D, however, it covers testing and adjustment of the HA Channel in the IF Frame. Additional testing covers measurement of the AGC, Automatic Gain Control, range of the IF Frame.

### PLATH SFP5000 RECEIVER ALIGNMENT -ALIGNMENT OF 5550-16 FRAME BELOW (PART 1) (U)

TVC-877F

1983

Running Time: 08:07

Classification: Unclassified

1 Part

(U) Covers testing and alignment of the old type of Frequency Multiplier in the Frame Below. This circuitry increases the frequency of the 1 MHZ input signal to 49 MHZ, which is the 2nd local oscillator used in the SFP5000 receiver.

### PLATH SFP5000 RECEIVER ALIGNMENT – ALIGNMENT OF 5550-16 FRAME BELOW (PART 2) (U)

TVC-877G

1983

Running Time: 16:02

Classification: Unclassified

1 Part

(U) Covers testing and adjustment of the Balance Circuitry in the Frame Below which generates the internal Calibration signals for the SFP5000 receiver. Additional testing covers use of a signal generator to check the input switching Boards and improvement of the automatic Balance Circuitry in the Frame Below.

### PLATH SFP5000 RECEIVER ALIGNMENT -ALIGNMENT OF 5550-13 HF FRAME (PART 1) (U)

TVC-877H

1983

Running Time: 27:20

Classification: Unclassified

1 Part

(U) Shows the location of the HF Frame and describes the procedures used to rotate the Frame into position for alignment. Preliminary testing includes a check of the 5550-14 IF Frame prior to alignment of HF Frame and measurement of the 2nd local oscillator signal - HF alignment includes use of 95-21 Auxiliary Unit to test and adjust the AB and CD Channels and use of a Vector Impedance Meter to measure phase and impedance of the AB and CD input circuitry.

### PLATH SFP5000 RECEIVER ALIGNMENT – ALIGNMENT OF 5550-13 HF FRAME (PART 2) (U)

TVC-877J

1983

Running Time: 16:23

Classification: Unclassified

1 Part

(U) A continuation of tape TVC-877H, however, it covers testing adjustments and Phase/impedance measurements of the HA Channel in the HF Frame. Additional testing consists of checking the AGC, Automatic Gain Control, range of the circuitry in the HF Frame.

**DATA SYSTEMS** UNCLASSIFIED

### PLATH SFP5000 RECEIVER ALIGNMENT -ALIGNMENT OF 5550-15 HS FRAME (PART 1) (U)

TVC-877K

1983

Running Time: 16:08

Classification: Unclassified

1 Part

(U) Shows location of HS Frame and describes the procedure used to prepare the Frame for alignment. Preliminary testing includes use of a signal generator to Test 5550-1113 Final Stage and adjustment of signal levels in Final Stage prior to alignment of circuitry in HS Frame. HS Frame alignment covers use of a receiving signal and Hydra to test and adjust phase and angle automatic circuitry in HS Frame.

### PLATH SFP5000 RECEIVER ALIGNMENT -ALIGNMENT OF 5550-15 HS FRAME (PART 2) (U)

TVC-877L

1983

Running Time: 14:15

Classification: Unclassified

1 Part

(U) A continuation of tape TVC-877K, however, it covers use of a receiving signal and Hydra to test and adjust the GAIN. Automatic Circuitry in the HS Frame. Additional testing consists of checking the AGC Automatic Gain Control, range of the SFP5000 receiver in both the MANUAL and automatic modes of operation.

### PLATH SFP5000 RECEIVER ALIGNMENT -ALIGNMENT OF 5550-15 HS FRAME (AUDIO CHANNELS)

(PART 1) (U)

Running Time: 08:26

Classification: Unclassified

1983 1 Part

(U) This portion of the SFP5000 alignment procedures only covers the older type audio circuitry located on Board 5550-1515 in the HS Frames. HS Frame alignment shows use of a Modulated receiving signal and Hydra to Test and adjust the A3 Audio Circuitry on Board 5550-1515. Additional testing includes a check of A3 Start receptor and measurement of the A3 bandwidth.

### PLATH SFP5000 RECEIVER ALIGNMENT -ALIGNMENT OF 5550-15 HS FRAME (AUDIO CHANNELS) (PART 2) (U)

TVC-877N

**TVC-877M** 

1983

Running Time: 18:20

Classification: Unclassified

1 Part

(U) A continuation of Tape TVC-877M, however, it covers use of a modulated receiving signal and Hydra to check the A1, A2 and SSB Circuitry in the HS Frame. A1 testing includes frequency measurement and adjustment of the BFO, Beat Frequency Oscillator, in HS Frame. A2 testing covers use of audio to check circuitry and Angle Donator to check response of the A2 audio section. SSB alignment includes testing and adjustment of USB, Upper Side Band Section of the HS Frame.

### MISCELLANEOUS PLATH TROUBLESHOOTING AND MAINTENANCE ANGLE DONATOR TEST (U)

**TVC-965A** 

1983

Running Time: 04:42

Classification: Unclassified

1 Part

(U) Describes the use of a Plath Angle Donator to test the SFP5000 DF receiver.

### MISCELLANEOUS PLATH TROUBLESHOOTING AND MAINTENANCE MEASURING ELECTRICAL CABLE LENGTH (U)

Running Time: 13:54 Classification: Unclassified 1 Part

(U) Describes the proper procedure to use to measure the electrical length of antenna lead-in cables using a VECTOR Impedance Meter.

### MISCELLANEOUS PLATH TROUBLESHOOTING AND MAINTENANCE ANTENNA ELEMENT MAINTENANCE (U)

TVC-965C

TVC-965B

1983

1983

Running Time: 15:25 Classification: Unclassified

1 Part

(U) Covers periodic maintenance checks of the Antenna System. Describes the use of a PLATH PPS 200 test transmitter to perform a symmetry test on the antenna system. Covers the use of a PLATH PPS 200 transmitter to make sense adjustments in the FDK5001 Frequency Synthesizer.

### MISCELLANEOUS PLATH TROUBLESHOOTING AND MAINTENANCE, GONIOMETER (U)

TVC-965D

1983

Running Time: 16:21

Classification: Unclassified

1 Part

(U) Discusses the basic operation of a PLATH Reducing Goniometer. Covers two types of testing procedures: (1) Resistance test of each Goniometer Port and (2) An operational test of the Goniometer using the SFP5000 DF System as an output indicator.

### PLATH DF SYSTEM ALIGNMENT, TROUBLESHOOTING AND TESTING OF THE FDK5001 FREQUENCY SYNTHESIZER (PART 1) (U)

TVC-963A

1983

Running Time: 22:20

Classification: Unclassified

I Part

(U) Describes various tests that can be performed on the FDK5001 Frequency Synthesizer to insure that it is functioning properly. Part 1 covers Power Supply Testing, Frequency Selector testing, 2nd Oscillator testing and tests associated with the Auxiliary oscillator, 10KHZ pulse shapes, Diode Switch, Carrier suppression, Phase detector and VCO.

### PLATH DF SYSTEM ALIGNMENT, TROUBLESHOOTING AND TESTING OF THE FDK5001 FREQUENCY SYNTHESIZER (PART 2) (U)

TVC-963B

1984

Running Time: 20:00

Classification: Unclassified

1 Part

(U) A continuation of TVC-963A Part 2 of the FDK5001 Frequency Synthesizer tests. Covers APC signal measurement and VCO alignment; checking the Frequency Control Signal of the VCO Testing the 100:1 Frequency divides in the VCO circuitry and testing/adjustment of the SSB circuitry in Frame 5531-15.

### PLATH DF SYSTEM TROUBLESHOOTING THE AG5000 TUNING UNIT (U)

**TVC-964A** 

1984

Running Time: 25:22

Classification: Unclassified

1 Part

(U) Describes the proper procedures to remove and replace Boards in the AG5000 tuning unit and covers testing of Multiplier Board 5540.1-1114 testing and adjustment of Stabilizer Board 5540.1-1115, and use of the Front Frequency Readout to locate problems in Decode Counter Boards 5540.1-1118 thru 5540.1-1122. Additional discussions cover troubleshooting of the 5540.1-11 Power Supply Section.

### PLATH DF SYSTEM SUGGESTED MODIFICATIONS FOR THE AG5000 TUNING UNIT (U)

TVC-964B

1984

Running Time: 02:46

Classification: Unclassified

1 Part

(U) Describes the corrosion problems associated with the 5540.1-1123 STABILIZER Board which is caused by the four batteries in the AG5000 tuning Unit. Discusses the Modifications to Stabilizer Board 5540.1-1123 which should be made to eliminate this damaging problem.

### CV-3703 FREQUENCY TRANSLATOR (U)

(U) A three tape series on the introduction, circuit boards and setup and test of the CV-3703 Frequency Translator.

### CV-3703 FREQUENCY TRANSLATOR - INTRODUCTION AND FUNCTIONAL BLOCK (U)

TVC-802A

1984

Running Time: 14:30

Classification: For Official Use Only

1 Part

(U) This program will provide a trained technician with the information required to operate, calibrate, and maintain the CV-3703 translator. Additional information may be found in the CV-3703 technical manual.

### CV-3703 FREQUENCY TRANSLATOR - CIRCUIT BOARD DISCUSSIONS (U)

TVC-802B

1984

Running Time: 22:00

Classification: For Official Use Only

1 Part

- (U) A detailed analysis of the translators circuitry.
- (1) Differential phase shift
- (2) Frequency synthesizer board no. 1
- (3) Frequency synthesizer board no. 2
- (4) Translator assembly

### CV-3703 FREQUENCY TRANSLATOR - SET UP AND TEST (U)

TVC-802C

1984

Running Time: 17:10

Classification: For Official Use Only

1 Part

(U) This tape illustrates the test procedures which will verify if the translator is operating properly, and will illustrate the alignment procedures required for the translator.

#### DF-6 MAINTENANCE AND OPERATION (U) TVC-1326 1987 9 Parts Classification: For Official Use Only Running Time: 231:51 (U) Program contains details of DF-6 operation and maintenance. It is designed to cover the complete training course as given to station personnel. (Controlled By: E23) SYSTEM MAINTENACE (U) TVC-804 1987 Running Time: 340:11 18 Parts Classification: Unclassified is an 18 part course designed to familiarize the technician with the function and P.L. 86-36 maintenance of the system. The various parts of the course include: overall system fault isolation, block diagram analysis, and troubleshooting techniques for the individual equipments in the system. (Controlled By: E23) PEEVEY - SYSTEM INTRODUCTION (U) TVC-1914 1989 Classification: For Offical Use Only Running Time: 8:05 1 Part (U) This videotape is the first of a ten-part series covering the PEEVEY System and its associated functions and equipments. PEEVEY is It is comprised of several commercial equipments linked together by a central computer and special purpose software. In this series the system, configuration, diagnostics and associated equipments are covered in detail. Besides P.L. 86-36 this tape, the System Introduction, there are five sections on the System Industries 1950 Tape Drive, 1935 Formatter and D3 Diagnostic Device; three sections on the Demand Zebra Label Printers; and one on the System Tests. This series will aid the Hardware Maintenance Technician in maintaining the PEEVEY system. Note: The narrator references 14 tapes. Due to economic constraints, there are 10 tapes in the series. PEEVEY - 9700 TAPE SUBSYSTEM (U) TVC-1915/2332 1989/1990 Running Time: 63:08 Classification: For Official Use Only 5 Parts (U) These tapes are intended to provide agency technicians with PEEVEY hardware maintenance training on the System Industries 1950 Tape Drive, 1935 Formatter and D3 Diagnostic Device. 5 Parts (TVC-1915 A, B, C and E/TVC-2332) PEEVEY - ZEBRA PRINTER (U) TVC-1916 1989 Running Time: 22:57 Classification: For Official Use Only 3 Parts (U) These tapes are intended to provide agency technicians with PEEVEY hardware maintenance training on the Demand Zebra Label Printer. Three parts. PEEVEY - SUBSYSTEM TESTS (U) TVC-2333 1990 Running Time: 16:04 Classification: For Official Use Only 1 Part (U) This tape covers the Subsystem Tests on the PEEVEY System used in testing PEEVEY'S

Software Connections.

## DATA SYSTEMS GENERAL

DISPATCHER (U) TVC-511 1974

Running Time: 29:30 Classification: Unclassified 1 Part

(U) An explanation of the Dispatcher System that provides operators a means to report hardware problems to maintenance. Shows how to enter a request for support into the dispatcher system.

### FUTURE POSSIBILITIES: DATA, HARDWARE, SOFTWARE AND PEOPLE CAPT. GRACE B. HOPPER, USNR (U)

TVC-930 A/B 1982

Running Time: (A) 48:25 (B) 40:39 Classification: Unclassified 2 Parts

(U) Talk in FRIEDMAN AUDITORIUM on 19 August 1982 by Capt Grace B. Hopper, USNR, describing future computer possibilities: DATA, HARDWARE, SOFTWARE AND PEOPLE.

### PSL/PSA AN OVERVIEW (U)

TVC-733 1982

Running Time: 19:14 Classification: Unclassified 1 Part

(U) To serve as an introduction to perspective users/managers of an automated tool available for describing information systems of any kind.

### THE MULTICS ADVANTAGE – AN INTRODUCTION TO MULTICS USING THE DELTA DATA 7000E (U)

TVC-947 1984

Running Time: 08:33 Classification: Unclassified 1 Part

(U) An introduction to the MULTICS System including operational procedures for the "first time" user of the Delta Data 7000E terminal.

#### CSAPQE WORKSHOP - DATABASE MANAGEMENT (U)

TVC-1871

1989

2 Parts

Running Time: 83:32 Classification: For Official Use Only

(U) The Database Management Presentation will give the CSAPQE aspirant an overview of Database Management. Topics covered include terminology, NSA systems, data model selection problems, relational data model terms, specialized database machines and a brief summary of distributed databases. This is a two part tape.

#### CSAPQE WORKSHOP - DATA COMMUNICATIONS (U)

TVC-1872

1989

Running Time: 46:59 Classification: Confidential 1 Part

(U) The Data Communications Presentation will give the CSAPQE aspirant an overview of data communications terminology including analog and digital signals, synchronous and asynchronous transmission, bandwidth and modulation and digital encoding schemes. Several other PQE relevant terms are also discussed.

### CSAPQE WORKSHOP - NETWORKING (U)

TVC-1873

1989

Running Time: 74:27 Classification: Confidential 2 Parts

(U) The Networking Presentation will give the CSAPQE aspirant an overview of computer and communications networks. Subjects include: Standards organizations, physical topologies, network categories, switching types, network services, error correction and network architecture. Talk also includes in-depth discussion of ISO model of layered protocols. This is a two part tape.

### CSAPQE WORKSHOP - SOFTWARE ACQUISITION (U)

TVC-1874

1989

Running Time: 60:30

Classification: For Official Use Only

1 Part

(U) The Software Acquisition Presentation will give the CSAPQE aspirant an overview of the software acquisition process. Areas covered include: NSA's governing directives, software product management and the software development sequence including requirements, design and build, test and integration and product acceptance.

### CSAPQE WORKSHOP - SYSTEM ACQUISITION (1988) (U)

TVC-1875

1988

Running Time: 51:46

Classification: Secret CCO

1 Part

(U) The System Acquisition Presentation will give the CSAPQE aspirant an overview of the system acquisition process at NSA. 25-5 is discussed.

### CSAPQE WORKSHOP - SYSTEM ACQUISITION (1989) (U)

TVC-2040

1989

Running Time: 57:40

Classification: Secret CCO

1 Part

(U) The System Acquisition Presentation will describe for the CSAPQE aspirant the process used at NSA for acquiring systems with special emphasis on requirements concepts and the acquisition plan. Easy to understand examples are included.

#### CSAPQE WORKSHOP - GRAPHICS (U)

TVC-1877

1989

Running Time: 60:34

Classification: Top Secret Codeword

1 Part

(U) The Graphics Presentation will describe for the CSAPQE aspirant the various graphics display technologies with particular emphasis on Raster technology. Other topics covered include color definition and video lookup tables, hardware devices and graphics standards. The talk ends with a slide presentation depicting graphics applications at NSA.

#### CSAPQE WORKSHOP - ARTIFICIAL INTELLIGENCE (U)

TVC-2037

1989

Running Time: 79:52

Classification: Top Secret Codeword

2 Parts

(U) The Artificial Intelligence Presentation will give the CSAPQE aspirant an overview including the history of AI, the properties of an AI machine and various problem solving techniques. Examples of LISP, PROLOG and AI projects at NSA are given. This is a two part tape.

#### CSAPQE WORKSHOP - SUPERCOMPUTING (U)

TVC-2039

1989

Running Time: 73:41

Classification: Secret CCO NOCON

2 Parts

(U) The Supercomputing presentation will give the CSAPQE aspirant an overview of Supercomputing machines, including Vector Processing, Parallelism, Benchmarks and Pipelining. A brief summary of covernames and operating systems used by the Cryptanalytic Processing Centers at NSA is given. This is a two part tape.

#### **NEURAL NETWORKS (U)**

TVC-2067

1989

Running Time: 72:42

Classification: For Official Use Only

1 Part

(U) This program is a recording of the 17 April 1989 meeting of the Computer and Information Sciences Institute (CISI), which featured a survey of the Neural Network field. The speaker was Dr. Harold Szu of the Naval Research Laboratory, who is a leader in the field. CISI has available for review the viewgraphs used by Dr. Szu at this presentation, but their order does not correspond to the order used during the meeting. Copies available on VHS only.

#### NSA SUPPORT TO MILITARY OPERATIONS-AN OVERVIEW (FOUO)

TVC-1889 1989

1 Part Running Time: 12:12 Classification: Secret

(FOUO) This videotape, the first in a three part series, provides an overview of NSA's support to military operations. It gives a brief look at the background and history of NSA's involvement with military operations and touches on the support tool, called "Profiling" as a preview of the succeeding tapes. (This video is a module of CY-188).

#### NSA SUPPORT TO MILITARY OPERATIONS – CURRENT CAPABILITIES (FOUO)

1989 TVC-2030

Running Time: 17:26 Classification: Secret CCO 1 Part

(FOUO) Part 2 of 3 in the "Support to Military Operations" series. This show covers how NSA supports current operations. It briefly explains the duties of NSOC, the Collection Management Office and the Service Cryptologic Elements. It gives a history of SIGINT's role in war and crisis situations. And finally, it discusses mission planning architectures. (This video is a module of CY-188).

DEFSMAC (U) TVC-2118 1991

Running Time: 20:14 Classification: Top Secret Codeword TK Noforn HVCCJ 1 Part

-(FOUO) This video covers the mission and operations of the Defense Special Missile and Astronautics Center. Using an example of a missile launch, the video illustrates how intelligence is received and processed through the different divisions that make up DEFSMAC. (This video is a module of CY-188).

#### SIGINT AND THE REQUIREMENTS PROCESS (U)

TVC-1980 1989

Running Time: 24:03 Classification: Top Secret TK HVCCJ 1 Part

(U) The first half of this videotape defines several types of SIGINT and shows the advantages of its use. The second half covers the procedure for requesting SIGINT and the different types of SIGINT requests. Several world events are used to explain how SIGINT played a key role in their outcome. (This video is a module of CY-188)

#### SIGINT COLLECTION AND COLLECTION MANAGEMENT (U)

TVC-2078

1990

Running Time: 9:20 1 Part Classification: Top Secret TK HVCCJ

(FOUC) A basic overview of the techniques of SIGINT collection and collection management. (This video is a module of CY-188)

## ELECTRONIC WARFARE/CLOSE AIR SUPPORT ECM RESULTS OF GALLANT EAGLE '80 (U)

TVC-768

1980

Running Time: 84:44 Classification: Confidential

2 Parts

-(C) The Electronic Warfare during Close Air Support (EW/CAS) Joint Test Force was formed by OSD for the purpose of examining the effects of electronic warfare on close air support operations in a dense air defense and EW threat environment. This presentation focuses on the results of replica communications jamming employed against U.S. tactics and equipments. Recently, EW/CAS-JTF completed the testing phase for tactical communications jamming with their participation in the GALLANT EAGLE 80-A "FREE PLAY" Joint Reconnaissance Exercise and a combined arms test which simulated a Soviet mechanized rifle division breakthrough into a U.S. Brigade sector supported by USAF Close Air Support and attack helicopters. Those tests, specifically test 5 and 6 are detailed below: Test 5 conducted in February 1980, was a CPX which played a Soviet Motorized Rifle Division against a U.S. Mechanized Infantry Brigade, with associated air support. The Red Forces fielded a Radio Electronic Combat Battallion consisting of 6 UHF jammers, 6 VHF jammers, 3 HF jammers, 28 intercept positions, and 2 ICD teams. Test 6, conducted in March 1980, was a part of the REDCOM FTX GALLANT EAGLE '80 which played the U.S. 1st Infantry Division and 5th Marine Brigade against the 4th Infantry Division. Discusses the effects of the ESM/Jamming ICD efforts, which were primarily to delay and confuse command and control functions at battalion level and below. The tests were constructed to determine operational effects of EW on battle management, rather than to gather technical data.

SECURITY SECURITY

### **SECURITY DEBRIEFING (U)**

TVC-1581

1988

Running Time: 5:41

Classification: Confidential

1 Part

(U) A video which explains outgoing NSAers' continuing responsibilities to the Agency regarding security, publications, travel, etc.

### COMPUTER VIRUS BRIEFING (U)

TVC-1806

1988

Running Time: 27:49

Classification: For Official Use Only

1 Part

(FOUO) This tape introduces the notion of viruses, illustrates propagation techniques, and user-transparent infections. Known viruses are discussed in detail, including the targeted system, location, effects, and propagation properties. Finally, progress and simple preventive/detective measures to limit or stop virus propagation are identified.

### COMPUTER VIRUS BRIEFING (U)

TVC-1777

1988

Running Time: 31:15

Classification: Confidential

1 Part

(FOUO) This tape introduces the notion of viruses, illustrates propagation techniques, and user-transparent infections. A simple classification scheme that categorizes viruses according to their sophistication is outlined. Known viruses are discussed in detail, including the targeted system, location, effects, and propagation properties. Finally, programs and simple preventive/detective measures to limit or stop virus propagation are identified.

### PHYSICAL SECURITY (U)

TVC-1585

1988

Running Time: 10:24

Classification: Confidential

1 Part

(U) A description of day-to-day physical security at NSA, including use of badges, secure phones, burn bags, etc.

### PROJECT GUNMAN (U)

TVC-1661

1988

Running Time: 38:49

Classification: Secret Noforn ORCON

1 Part

(C) This videotape discusses project Gunman and the subsequent discovery of bugged found in the U.S. embassy in Moscow, in 1984. The purpose of the tape is to educate the viewer about the project and about how the implant operated.

UNCLASSIFIED LOGISTICS

#### NSA PROCUREMENT INTEGRITY PROGRAM (U)

**TVC-313** 

1976

Running Time: 08:10

Classification: Unclassified

1 Part

(U) A fictional skit which shows how failure to maintain a purely business relationship between a contractor and a government technical representative can compromise the integrity of the individuals and impact on contractual performance.

#### THE SYSTEM DEVELOPMENT MODEL PROCESS (U)

TVC-952

1982

Running Time: 19:48

Classification: Unclassified

1 Part

(U) A presentation on the INSCOM Pamphlet 11-25 entitled the System Development Model. It relates to the process which INSCOM interfaces to the Army in the transition of NSA developed systems for ILS support. (This presentation is in greater detail than "The Count Down", TVC-951). It is intended for the working level audience.

#### THE COUNTDOWN (U)

TVC-951

1982

Running Time: 17:40

Classification: Confidential

1 Part

(U) A presentation on the INSCOM Pamphlet 11-25 entitled the System Development Model. It relates the process which INSCOM interfaces to the Army in the transaction of NSA developed systems for ILS support.

#### TELEPHONE TECHNIQUES (U)

TVC-1097

1984

Running Time: 52:58

Classification: Unclassified

1 Part

(U) Program on Telephone techniques was prepared for National Security Week 1984. Objective was to inform individuals the proper techniques of telephone etiquette.

#### THE MEILSR PROCESS (U)

TVC-915

1984

Running Time: 11:30

Classification: For Official Use Only

1 Part

(U) This tape provides a brief overview of the Minimum Essential Integrated Support Requirements process (MEILSR). Designed for all managers involved in the ILS acquisition of SIGINT equipment or systems. The tape shows a MEILSR meeting and covers the required MEILSR forms.

### MAGNETIC MEDIA DIVISION (U)

TVC-1031

1985

Running Time: 6:01

Classification: For Official Use Only

1 Part

(U) This tape provides an overview of L14, the Magnetic Media Division.

### MAGNETIC TAPE HANDLING (U)

TVC-1200

1985

Running Time: 6:14

Classification: For Official Use Only

1 Part

(U) Proper procedures are described for the handling and storage of magnetic tape.

### AWACS: NO CAUSE FOR ALARM (U)

TVC-1253

1986

Running Time: 7:10

Classification: For Official Use Only

1 Part

(U) A documentary on the operation and correct usage of the Automatic Waste Collection System. Shot on location in Ops 1 and the IRC complex.

UNCLASSIFIED

# **GENERAL EDUCATION**

#### HP400EL AC VOLTMETER (U)

TVC-580

1979

Running Time: 06:20

Classification: Unclassified

1 Part

(U) Covers the specifications of the Hewlett Packard HP400EL AC Voltmeter and several demonstrations of the unit's operation (DB, AC output, and DC recorder output).

#### HP5342A MICROWAVE FREQUENCY COUNTER (U)

TVC-579

1979

Running Time: 19:03

Classification: Unclassified

1 Part

(U) Covers: specifications; an overview of counting technique; and measurement routines (frequency and amplitude) of the Hewlett Packard HP5342A Microwave Frequency Counter. A "walk thru" demonstration of both front and rear panel controls, and service/diagnostic test procedures are covered.

### INSTRUCTIONAL OBJECTIVES AND MEDIA SELECTION (U)

TVC-539

1979

Running Time: 24:40

Classification: Unclassified

1 Part

(U) Covers briefly the development of instructional objectives and using them to guide the selection of audio-visual media. Shows how to use a simple matrix technique for judging and using cost/benefit factors in selecting various media. Produced in conjunction with the Inter-Agency Instructional Television Services Task Team and the Office of Personnel Management.

#### HP5383A RF FREQUENCY COUNTER (U)

TVC-578

1979

Running Time: 05:00

Classification: Unclassified

1 Part

(U) The specifications and features of the Hewlett Packard HP5383A RF Frequency Counter are described and are followed by a demonstration of the operation, set-up and test procedures of the unit.

#### PACKAGING AND WRAPPING (U)

TVC-516

1980

Running Time: 26:20

Classification: Unclassified

1 Part

(U) A demonstration of wrapping procedures for classified documents.

#### NSA GEOGRAPHIC INFORMATION CENTER (U)

**TVC-900** 

1983

Running Time: 03:10

Classification: Unclassified

1 Part

(U) This tape provides an overview of the services and facilities available in the NSA Geographic Information Center.

# DIMENSION AND TOLERANCING: THE AMERICAN SYSTEM OF MANUFACTURE (U)

TVC-599

1983

Running Time: 08:49

Classification: Unclassified

1 Part

(U) To better acquaint government contractors and their vendors with the "basic method" of dimensioning and tolerancing; a historical perspective relevant to modern techniques is examined. Supplement to DoD D 1000, DoD STD 100, and ANSI-Y14.5.

### SECRET

#### NATIONAL SECURITY AGENCY

FORT GEORGE G. MEADE, MARYLAND 20755-6000

Case No. 54577/Appeal No. 3390

25 February 2009

I am writing in response to your letter, dated 15 December 2008, appealing the National Security Agency's (NSA) decision to partially deny your Mandatory Declassification Review (MDR) request. You had requested an MDR of the NSA Television Center Catalogue. I have reviewed your original request, the document at issue, the Chief of Declassification Services' response to you, and your appeal letter. As a result of that review, I have determined that certain information can now be released on appeal. Those 14 pages are enclosed. However, the remaining withheld information continues to warrant protection as described below.

The information withheld continues to meet the standards for classification set forth in subparagraph (a) of Section 1.1 of Executive Order 12958, as amended, and falls under the classification categories contained in Sections 1.4(c) and (d) of the Order. Furthermore, the information remains currently and properly classified at the SECRET and CONFIDENTIAL levels in accordance with the criteria of Section 1.2 of Executive Order 12958, as amended.

Certain information is also exempt from disclosure pursuant to Section 3.5(c) of Executive Order 12958, as amended, which allows for the protection of information when authorized and warranted by law. Specifically, Section 6, Public Law 86-36 (50 U.S.C. § 402 note) protects NSA/CSS functions and activities as well as the names of NSA/CSS employees from disclosure. In addition, certain information has been withheld in accordance with the sixth exemption of the Freedom of Information Act. This exemption protects from disclosure information that would constitute a clearly unwarranted invasion of personal privacy. In balancing the public interest for the information you request against the privacy interests involved, we have determined that the privacy interests sufficiently satisfy the requirements for the application of the sixth exemption. The information you seek on appeal pertains to such information and, therefore, it is protected from disclosure by these statutes.

You may consider this final Agency decision to be a denial of your appeal. You are hereby advised that under the MDR process, you may appeal a final agency decision in writing, within 60 days from the date of this letter, to the Interagency Security Classification Appeals Panel (ISCAP) at

the following address: Executive Secretary, Interagency Security Classification Appeals Panel, ATTN: Classification Challenge Appeals, c/o Information Security Oversight Office, National Archives and Records Administration, 7th and Pennsylvania Avenue, NW, Room 500, Washington, DC 20408. Additional information regarding the ISCAP's appeal process can be found at: <a href="http://www.archives.gov">http://www.archives.gov</a> by typing "ISCAP" in the search field.

Sincerely,

JOHN C. INGLIS

Mandatory Declassification Review

SECURITY

#### SECURITY DEBRIEFING (U)

TVC-1581

1988

Running Time: 5:41

Classification: Confidential

1 Part

(U) A video which explains outgoing NSAers' continuing responsibilities to the Agency regarding security, publications, travel, etc.

## COMPUTER VIRUS BRIEFING (U)

TVC-1806

1988

Running Time: 27:49

Classification: For Official Use Only

1 Part

(FOUO) This tape introduces the notion of viruses, illustrates propagation techniques, and user-transparent infections. Known viruses are discussed in detail, including the targeted system, location, effects, and propagation properties. Finally, progress and simple preventive/detective measures to limit or stop virus propagation are identified.

## COMPUTER VIRUS BRIEFING (U)

TVC-1777

1988

Running Time: 31:15

Classification: Confidential

1 Part

(FOUO) This tape introduces the notion of viruses, illustrates propagation techniques, and user-transparent infections. A simple classification scheme that categorizes viruses according to their sophistication is outlined. Known viruses are discussed in detail, including the targeted system, location, effects, and propagation properties. Finally, programs and simple preventive/detective measures to limit or stop virus propagation are identified.

#### PHYSICAL SECURITY (U)

TVC-1585

1988

Running Time: 10:24

Classification: Confidential

1 Part

(U) A description of day-to-day physical security at NSA, including use of badges, secure phones, burn bags, etc.

#### PROJECT GUNMAN (U)

TVC-1661

1988

Running Time: 38:49

Classification: Secret Noforn ORCON

1 Part

(C) This videotape discusses project Gunman and the subsequent discovery of bugged typewriters found in the U.S. embassy in Moscow, in 1984. The purpose of the tape is to educate the viewer about the project and about how the implant operated.
