Do not request recomp PIA's for a reduced '83 law year 60/30 employee using code "13." When a request is made for recalculated PIA's when the employee attains age 62 (a code 62 is entered in this item as explained above), the recalculated PIA's will include earnings in and after the ABD through the year before age 62 is attained. The latest 19 recomp PIA's will also be supplied that will include earnings in and after the year age 62 was attained. Recomp PIA's for 60/30 '74 Act cases should be requested as usual using a code "13" in Item 13 and a code "1" in Item 14.

- Code "17" - Blank, do not enter.
- Code "18" - Blank, do not enter.

**C. Other**

Use code "04" to request the MBR only on the employee's own account number. Complete Items 1, 2, 3, 4, 5, 6, 7, 13 and 15.
**Item 14:** Enter the code that describes the type of annuity the employee is receiving as follows: (For an explanation of which Railroad Retirement Act or Amendment provisions apply, see RCM 8.6, G-357a instructions for Item 11.)

For PIA calculations under the 1983 Amendments:

- Enter code "05" if the employee is receiving an '83 LY 60/30 annuity and has no disability freeze. If the employee is receiving an '83 LY 60/30 annuity, and has a disability freeze, refer the folder to M&P-A. In the remarks section of the route slip enter "83 LY 60/30 with DF.
- Enter code "03" if the employee is receiving a disability annuity, and also meets the '83 LY 60/30 criteria.

For PIA calculations under the 1981 Amendments:

- Enter code "01" if the employee is receiving a full annuity based on age 65 or for recoup PIA data based on 60/30.
- Enter code "02" if the employee is receiving a reduced age annuity.
- Enter code "03" if the employee is receiving an annuity based on an "occupational" or "total and permanent" disability regardless of whether the employee has 60/30.
- Enter code "04" if the employee is receiving an age and service annuity based on 60/30 and also has been granted a disability freeze.
- Enter code "05" on an initial request if the employee is receiving an age and service annuity based on 60/30. The TRIC program will automatically change to a type "01" if it determines age 60 and 360 service months were acquired prior to 7-1-84. Do not use this code for recoup PIA data when associated with a type "13" in Item 13.

For PIA calculations under the 1974 Act:

- Enter code "01" if the employee is receiving a full annuity based on full age 65 or a '74 Act 60/30 annuity.
- Enter code "02" if the employee is receiving a reduced annuity.
- Enter code "03" if the employee is receiving a disability annuity, whether "total and permanent" or "occupational" regardless of whether the employee has 60/30.
- Enter code "04" if the employee is receiving an age and service annuity based on 60/30 and also has been granted a disability freeze.
For PIA calculations under the 1937 Act:

- Enter code "06" if the employee is receiving a full annuity based on age 65 or based on 60/30 with **no** disability freeze.
- Enter code "07" if the employee is receiving a reduced annuity.
- Enter code "08" if the employee is receiving a disability annuity, whether "total and permanent" or "occupational."
- Enter code "09" if the employee is receiving an age and service annuity based on 60/30 and also has been granted a disability freeze.

**Item 15:** Complete this item as follows:

- Enter code "2" if the employee is a pre-1981 amendment employee.
- Enter code "4" for a 1981 amendment employee who filed before 4-1-82.
- Enter code "6" for a 1981 amendment employee who filed after 3-31-82.

**Item 16:** Enter the month, day and year the application was filed. Enter preceding zeroes where needed.

**Item 17:** Enter code "1" if a regular 1959 calculation is required. If code "1" is used, compensation will be limited to $4550.00 for 1959.

Enter code "2" if the gross 1959 calculation was considered in the original computation of the annuity. If code "2" is used, compensation will be limited by the SS earnings maximum of $4800.00 for 1959.

**NOTE:** Examiners can determine whether Reg '59 or Gross '59 earnings were considered by checking the G90 date into system and the "1959 Gross Amount" of the G-90 originally used to finalize the annuity. If the G90 has a date into system of 10-16-87 or later and the "1959 Gross Amt" is blank, the Reg '59 amount was considered. If the G90 date into system is prior to 10-16-87 and the "1959 Gross Amt" shows $4800 or less, the Gross '59 amount was considered.

**Note:** NCSP calculations are provided if eligibility year (EY) is greater than 1985. If the EY is prior to 1986 then a g563 is required.

**Item 18:** Blank, make no entry. Enter the initial effective date to apply the non-covered service pension (NCSP). Date must be 1/1/1986 or later. The day field, DD, must be '01'.

**Item 19:** Blank, make no entry. Enter the NCSP amount.
**Item 20:** Blank, make no entry. Enter the total number of post 1956 non-covered service months.

**Item 21:** Blank, make no entry. Enter the total number of non-covered service months.

**Item 22:** Enter the total number of verified prior service months. (The program will mechanically determine the number of months to be used in the computation.) If Item 14 is coded "06," "07," "08," or "09," leave this item blank.

**Item 23:** Enter the amount of the prior service average. If Item 14 is coded "06," "07," "08," or "09," leave this item blank.

**PART III - DISABILITY FREEZE INFORMATION**

**Item 24:** Blank, make no entry.

**Item 24a:** The DF date may be obtained from the following:

- Item 24 of OLDDS, or
- Item 15(A) of Form SSA-831-U3, or
- Item 25 of Form G-325, or
- Item 4 of Form SSA-415.

If a closed period of disability or two or more separate periods of disability have been established for the employee, the mechanical system cannot correctly calculate the employee's PIAs. Request manual PIA calculations from CCU for these cases (see RCM 8.11.122).

**NOTE:** Form G-60 will reject if a date is entered in this item and Item 14 (Annuity Code) is completed with "01" or "06" (full age), or "02" or "07" (reduced age). If a DF is established for this type of annuitant, refer to RCM 8.11.15D to determine if the DF will affect the PIA calculations.

Manual PIA calculations must be requested from CCU via Form G-563 if it is determined that PIA's will be affected by the DF.

**Item 24b:** Blank, make no entry.

**Item 25a:** Blank, make no entry.

**Item 25b:** Blank, make no entry.

**PART IV - LAG INFORMATION**
Item 26: A "lag code" must be shown indicating whether lag service is involved and should be considered in the PIA/Tier 2 calculations.

- Enter code "1" if lag service is not involved, or for retirement applications filed May 1, 1988, or later, lag service is involved, but was not developed because it is not needed to establish eligibility for a regular annuity.
- Enter code "2" if lag service is involved and was developed for the year of the employee's retirement (1 lag year).
- Use code "3" if lag service is involved and was developed for both the year of the employee's retirement and the prior year (2 lag years).

If code "2" or "3" was entered in Item 26, complete Items 26a as follows:

Item 26a: Enter the current year, the reported (actual) service months and the deemed service months, if any. Enter preceding zeroes where necessary. If there are no deemed service months, leave both deemed SM boxes blank.

Item 26b: No entry is required. This box is shaded.

Item 26c: No entry is required. This box is shaded.

Item 27: If Item "3" was entered in Item 26, complete Item 27a, as follows:

Item 27a: Enter the prior year, the reported (actual) service months and the deemed service months, if any. Enter preceding zeroes where necessary. If there are no deemed service months, leave both deemed SM boxes blank.

Item 27b: No entry is required. This box is shaded.

Item 27c: No entry is required. This box is shaded.

PART V - M/S INFORMATION

SEARCH processing now accesses and uses the M/S data stored on the EDM database for all types of G-90 requests. Therefore, if M/S is shown on EDM, do not complete M/S Items 28-35. (If the M/S data is incorrect, it is necessary to complete Form G-59MS to revise or delete the M/S data on EDM. See Form G-59MS instructions in RCM 9.4).

EXCEPTION: If any M/S period shown on EDM is being "used" differently than how it is "credited", the G-90 request must show how each M/S period is being "used". Complete M/S data for each M/S period, including the "use" data, must be shown on the G-90 request. The following "use" codes are to be used when applicable:

1 = used as compensation
3 = used as wages
4 = not used

If "use" data is shown for any M/S period, "use" data must be shown for all M/S periods in Items 29c, 30c, 31c, and 32c.

If no M/S data is shown on EDM, follow the instructions below. Your actions will both include the M/S on the requested G-90 and store the M/S data on EDM.

**Item 28:** Enter the appropriate code to show whether the employee has M/S which should be considered in the PIA computations on the G-90. If no M/S is claimed, all items from 28 through 35 can be left blank.

- Enter code "1" if there is one period of military service and it has been claimed and verified.
- Enter code "2" if there are two periods of military service which are claimed and verified.
- Enter code "3" if there are three periods of military service which are claimed and verified.
- Enter code "4" if there are four periods of military service which are claimed and verified.
- Enter code "5" if there are more than four periods of military service which are claimed and verified.

**NOTE:** The date of enlistment or induction is used to determine the creditability of military service. Therefore, if the enlistment or induction date and the date the active military service duty began are the same, it is not necessary to have a determination made as to the creditability of the military service before entering it on the Form G-60. If the dates are not the same, use a Form G-563 to obtain a determination from the Claims Certification Unit as to the creditability of the military service. However, if the information in the folder shows the employee had the required RR service prior to the enlistment or induction date, it will not be necessary to use a Form G-563. The Form G-60 can be used, but only enter the active military service dates.

**Items 29a, 29b, 30a, 30b, 31a, 31b, 32a, 32b:** Any period of M/S with a beginning date within the 6-15-48 through 12-15-50 period must be listed separately on the G-60. Therefore, some consecutive M/S periods which were previously shown as one period must now be shown as two periods (if either period began within the 6-15-48 through 12-15-50 period).

**Example:**

<table>
<thead>
<tr>
<th>M/S Periods</th>
<th>Listed Previously As:</th>
<th>New Listings:</th>
</tr>
</thead>
</table>
Item 29a: Enter the month, day and year the first period of verified active military service began.

Item 29b: Enter the month, day and year the first period of verified active military service ended.

Items 29c, 30c, 31c, 32c: The use code should be entered on a PIA recomp G-60 request (Code "13" in Item 13) and any age 62 recalculation G-60 requests (code "62" in Item 13). Make no entry for all other codes in Item 13.

Enter code "1" to indicate that the applicable military service period is being used as compensation, or a code "3" to indicate that the military service is being used as wages. This entry will be used when the military service has previously been credited and used. If creditability is unknown for any military service period, leave the items blank for all periods, as the system must develop creditability determinations.

Item 29d: Only complete this item if the military service from Items 29a-29b includes any post 12-31-46 military service. Enter code "1" when the means of entry for the first period of military service is voluntary. Enter code "2" when the means of entry for the first period of military service is involuntary.

Items 29e, 30e, 31e, 32e: The number of overlapping military service months should be entered on a PIA recomp G-60 request (code "13" in Item 13) and any age 62 recalculation G-60 request (code "62" in Item 13); precede with a zero if necessary. Make no entry for all other codes in Item 13.

Enter the number of overlapping military service months for the military service period shown. This number can be located from any previous G-90.

Overlapping military service months are defined as those M/S months which are not creditable as service months because RR service has already been credited for these months. Any calendar month cannot be credited as compensation more than once.

If not available, leave this item blank.

Item 29f: Only complete this item if the military service from Items 29a-29b includes all or part of the 6/15/48 through 12/15/50 period.

If EE has answered "Yes" to Item 29 of the AA-1 (9/89), enter an "x" in this item. If the EE has answered "No" to Item 29 of the AA-1 (9/89), leave this item blank.
**Item 30a:** Enter the month, day, and year the second period of verified active military service began, if any.

**Item 30b:** Enter the month, day and year the second period of verified active military service ended, if any.

**Item 30c:** Enter the use code for the second period of verified active military service for PIA recomp G-60 requests and age 62 recalculation G-60 requests (codes "13" and "62" in Item 13 respectively) only.

**Item 30d:** Only complete this item if the military service from Items 30a-30b includes any post 12-31-46 military service. Enter code "1" when the means of entry for the second period of military service is voluntary. Enter code "2" when the means of entry for the second period of military service is involuntary.

**Item 30e:** Enter the number of overlapping military service months for the second military service period for PIA recomp G-60 requests and age 62 recalculation G-60 requests (codes "13" and "62" in Item 13 respectively) only.

**Item 30f:** Only complete this item if the military service from Items 30a-30b includes all or part of the 6/15/48 through 12/15/50 period if the EE has answered "Yes" to Item 29 of the AA-1 (9/89), enter an "x" in this item. If the EE has answered "No" to Item 29 of the AA-1 (9/89), leave this item blank.

**NOTE:** If the EE has two periods of military service, both of which include all or part of the 6/15/48 through 12/15/50 period, then an "x" should be entered in both Item 29f and Item 30f. This will restrict the creditability of the M/S to "wages" only. A message will appear in the Remarks section of the G-90 in this situation in order to alert the claims examiner to contact the F/O to determine if the EE had intervening wages between both of the 6/15/48 through 12/15/50 periods of M/S and RR service.

**Item 31a:** Enter the month, day, and year the third period of verified military service began, if any.

**Item 31b:** Enter the month, day, and year the third period of verified military service ended, if any.

**Item 31c:** Enter the use code for the third period of verified active military service for PIA recomp G-60 requests and age 62 recalculation G-60 requests (codes "13" and "62" in Item 13 respectively) only.

**Item 31d:** Only complete this item if the military service from Items 31a-31b includes any post 12-31-46 military service. Enter code "1" when the means of entry for the third period of military service is voluntary. Enter code "2" when the means of entry for the third period of military service is involuntary.
**Item 31e:** Enter the number of overlapping military service months for the third military service period for PIA recomp G-60 requests and age 62 recalculation G-60 requests (codes "13" and "62" in Item 13 respectively) only.

**Item 31f:** Only complete this item if the military service from Items 31a-31b includes all or part of the 6/15/48 through 12/15/50 period. If the EE has answered "Yes" to Item 29 of the AA-1 (9/89), enter an "x" in this item. If the EE has answered "No" to Item 29 of the AA-1 (9-89), leave this item blank.

**NOTE:** If the EE has more than one period of military service which includes all or part of the 6/15/48 through 12/15/50 period, then an "x" should be entered in those Items 29f, 30f, and/or 31f which correspond to each period of M/S which includes 6/15/48-12/15/50 service. This will restrict the creditability of the M/S to "wages" only. A message will appear in the Remarks section of the G-90 in this situation in order to remind the claims examiner to contact the D/O to determine if the EE had intervening wages between all of 6/15/48-12/15/50 periods of M/S and RR service.

**Item 32a:** Enter the month, day, and year the fourth period of verified military service began, if any.

**Item 32b:** Enter the month, day, and year the fourth period of verified military service ended, if any.

**Item 32c:** Enter the use code for the fourth period of verified active military service for PIA recomp G-60 requests and age 62 recalculation G-60 requests (codes "13" and "62" in Item 13 respectively) only.

**Item 32d:** Only complete this item if the military service from Items 32a-32b includes post 12-31-46 military service. Enter code "1" when the means of entry for the fourth period of military service is voluntary. Enter code "2" when the means of entry for the fourth period of military service is involuntary.

**Item 32e:** Enter the number of overlapping military service months for the fourth military service period for PIA recomp G-60 requests and age 62 recalculation G-60 requests (codes "13" and "62" in Item 13 respectively) only.

**Item 32f:** Only complete this item if the military service from Items 32a-32b includes all or part of the 6/15/48-12/15/50 period. If the EE has answered "Yes" to Item 29 of the AA-1 (9/89), enter an "x" in this item. If the EE has answered "No" to Item 29 of the AA-1 (9-89), leave this item blank.

**NOTE:** If the EE has more than one period of military service which includes all or part of the 6/15/48-12/15/50 period, then an "x" should be entered in those Items 29f, 30f, 31f, and/or 32f which includes 6/15/48-12/15/50 service. This will restrict the creditability of the M/S to "wages" only. A message will appear in the Remarks section of the G-90 in this situation in order to remind the claims examiner to contact the F/O to determine if
the EE had intervening wages between all of the 6/15/48-12/15/50 periods of M/S and RR service.

**Item 33:** Blank, make no entry.

**Item 34:** Blank, make no entry.

**Item 35:** Enter the total number of overlapping military service months that fall within the period January 1937 through December 1950.

### PART VI - SS INFORMATION

**Item 36:** Only complete this item when the type of request code in Item 13 is "01" or "10."

- Enter code "1" (in a pre-1981 Amendment case) or code "5" (in a 1981 or 1983 Amendment case) if a wage QC breakdown for the period 1937-1952 is not required because a determination has previously been made and the information is documented on a Form G-90.

**NOTE:** A "1" should be entered in 1981 or 1983 Amendment cases if the case must be expedited. (See the chart on page 17 which describes the G-90 produced by the entries in G-60 Items 13-36.)

- Enter code "2" if a wage breakdown for the period 1937-1952 is required in order to make an insured status/vesting determination, unless expedited payment without vesting information is necessary.

### EFFECT OF ITEM 13 AND ITEM 36 ON FORM G-90

<table>
<thead>
<tr>
<th>If G-60 Item 13 is:</th>
<th>And G-60 Item 36 is:</th>
<th>And the EE's Vesting status is:</th>
<th>Then the G-90 produced will be:</th>
</tr>

<td></td>
</tr>
</tbody>
</table>

*See RCM 5.6.21 and 5.6.22 for information on the $50.00 and $400.00 wage QC rules.

**Item 37:** Only complete this item when the Type of Request code in Item 13 is "13" and there is no military service involved.

*Enter code "1" if the employee has an SS insured status for VDB purposes. Enter code "2" if the employee does not have an SS insured status for VDB purposes. If the SS insured status of the employee is unknown or military service is claimed, leave this item blank.

**NOTE:** The information required to determine if an employee has an SS insured status may be found on a previous G-90. IF THIS ITEM IS COMPLETED, ITEMS 38 AND 39 MUST ALSO BE COMPLETED OR THE REQUEST WILL REJECT.

* When Item 37 is coded "1" and Items 38 and 39 contain the QC's acquired and the vesting year, PIA's 4, 7, and 8 will be mechanically computed. When Item 37 is coded "2," 9999 will be displayed adjacent to PIA 4 of the G-90. In both instances, the G-90 Remarks section will indicate "INSURED STATUS DETERMINATION FROM G-60."

**Item 38:** Only complete this item when the Type of Request code in Item 13 is "13" and there is no military service involved.

- Enter the number of "Acquired QC's." The number to be entered is displayed in the "WAGES ONLY" field of a previous G-90. Do not enter a figure greater than "40."
- Enter "99" if Item 37 is coded "2" and no QC's are displayed in the "Wages Only" field of a previous G-90.

**Item 39:** Only complete this item when the Type of Request code in Item 13 is "13" and there is no military service involved.

- Enter the employee's vesting year. This is may be located in the G90 section "Quarters of Coverage." This date will be either the year last worked in the railroad industry or 1974.
Enter "9999" if Item 37 is coded "2" and no year is displayed in the "Quarters of Coverage" section of the G90.

NOTE: Entries in Items 38 and 39 should be in agreement with each other. For example, if the number of "Acquired QC's" is entered in Item 38, then a valid vesting year must be entered in Item 39. Likewise, if "99" is entered in Item 38, then "9999" must be entered in Item 39.

Item 40: Enter an "F" when there is a discrepancy in the SSA number in RRB records and the one in SSA's records, but we need the wage information on the SSA number in RRB records. Otherwise, leave blank.

PART VII - FUTURE USE

Item 41: Make no entry unless a special G-90 as explained below is being requested. A miscellaneous M/S code entry allows for certain types of G-90 calculations without changing the military service data as stored on EDM. The following miscellaneous codes will provide G-90 calculations as follows:

Code 1: The G-90 will be processed with no M/S. The message "G-90 Includes No Claimed M/S" will be displayed on the G-90.

Code 2: The G-90 will be processed with all M/S data from EDM except the M/S for M/S accounting purposes. The message "This G-90 is for M/S Accounting Purposes Only" will be displayed on the G-90.

By comparing the computations from an M/S accounting G-90 with a final G-90, which includes all M/S period(s), will provide M/S accounting amounts.

Items 42-44: Blank, make no entry.

Special Situations

1) Completion of G-60 for independently-entitled divorced spouses under PL109-280

Independently-entitled divorced spouse annuities require G-90 PIA calculations even though the employee has not yet filed for an annuity, has no ABD, and may still be working in the railroad industry.

Complete the G-60 entries as usual with the following exceptions:

- Item 5, enter the employee's DOB, as usual;
- Item 8, enter the divorced spouse's ABD as the employee's ABD;
- Item 11, enter the date of the employee’s last railroad work, but no later than the day before the ABD in item 8;
• Item 13, always enter “01”;
• Item 14, enter “01” (full age) or “02” (reduced age) depending on the employee’s age on the ABD that you entered in item 8 above;
• Item 16, enter the divorced spouse’s filing date;
• Item 26, enter lag only if needed for eligibility.

NOTE: Recomp PIAs involving railroad compensation earned by the employee will need to be requested manually via G-563 from CCU because SEARCH will incorrectly allocate compensation posted for periods after the XA ABD, to the DLW-RR entered.

2) Completion of G-60 for Conversion Cases

Completion of a G-60 in the regular manner will not always produce valid PIA’s for conversion cases. Therefore, a separate G-90 program has been created to compute the correct PIA amounts needed for conversion cases. The PIA’s which will be computed for conversion cases are:

• PIA 1 - Recomputed pass-thru PIA.
• PIA 4 - Vested Dual Benefit (VDB) - Wages Only Thru 12-1974.
• PIA 7 - Vested Dual Benefit (VDB) - Compensation Only Thru 12-1974.
• PIA 8 - Vested Dual Benefit (VDB) - Wages and Compensation Thru 12-1974.

When a G-60 is completed with a code ”13” in Item 13, the G-90 program will consider the following information before computing PIA’s 1, 4, 7, and 8:

• PIA 1 (Recomputed Pass-Thru PIA) - The recomputed pass-thru PIA 1 will be furnished only if there are SS earnings in 1974 or later which are high enough to trigger a RECOMP. The recomputed pass-thru will also include any earnings after 1971 that were excluded in the pass-thru PIA computation. If the SS earnings in 1974 or later are not high enough to trigger a RECOMP, the PIA 1 on the G-90 will be left blank.

A pound sign (#) will be shown to the left of PIA 1 on the G-90 and in remarks the legend ”12-1986 PIA" will appear. This legend will be changed whenever a new PIA table becomes effective.

If the 1974 earnings trigger a RECOMP, the earliest date an increase can be paid is 1-1-75. In such a case, the recomputed 6-1975 must be retroacted to the 6-1974 PIA for the annuity adjustment in the 1-1975 to 5-1975 period.

• Vesting Status - If the employee is not entitled to an RIB or DIB, the program will look for an insured status as of 12-31-74. If the employee is entitled to an
RIB or DIB, the program will assume an insured status as of 12-31-74 but only if the SS benefit DOE is prior to 1975. Windfall PIA's 4, 7, and 8 will be furnished if the employee meets the vesting requirements.

The revised G-90 program will also produce valid PIA's 10 and 11 based on compensation through DLW, wages through the year preceding ABD.

**Signature And Disposition**

Sign and date the form in the spaces provided. File the duplicate on the right side of the folder. Put the original in the tray provided to be delivered to the Computer Room. Control the claim in accordance with instructions from the unit supervisor.

The accompanying sample (see paper RCM) of Form G-60 is designed to serve as an examiner guide for determining which entries are required on various types of requests. The darkened boxes indicate no entry is required.

**G-60a - Tracer for G-90**

This form was replaced with an HSL format effective 9/4/1994. As of 9/17/2001, the HSL tracer is not to be used. You must trace an outstanding G90 through e-G-115, General Inquiry Form via email.

**When to trace:** If a G90 is pending more than 30 days, you should trace on the status.

**How to trace:** Please use e-G-115 General Inquiry Form. Open your email account and click on Public Folders, then Office of Programs, then new e-G-115 General Inquiry Form.

**Item to complete:** address the email as follows:

- If the claim ends in 00-31 - Donna Burrell
- If the claim ends in 32-65 - Alma Ford
- If the claim ends in 66-99 - Alice Gant

Also provide the RRA claim number, inquiry date and section, inquirer and a message.

**G-60s - TRIC Request for Wage and MBR Information - Survivor/ Spouse (Original and folder copy)**

**Use**

Use as an input data sheet to: make a request to SSA to initiate update, or delete an MBR earmark for spouses, widow(er)'s, and other auxiliary beneficiaries. (See RCM 7.4.68 for complete information on earmarking.)
Prior to October 29, 1996, this form produced paper output for various informational purposes which can now be accessed via SSA's on-line MBR or by securing a print-out from the SSA on-site representative. The Data Communications Utility Network (DCU) will be used to obtain information from SSA's Detailed Earnings Query (DEQY) record or the Summary Earnings Query (SEQY) record.

The paper output also provided some calculations, such as PIA #21 which are no longer produced mechanically. If you need a PIA #21 calculation, request one via Form G-563 to CCU. Attach any material relating to the vesting determination to the G-563 request. After having determined that the spouse/widow meets the vesting requirements, CCU will calculate a PIA #21.

NOTE: Effective July 1999, RRB paper form G-60s is obsolete. Use the G- 60/G-60s On-Line PC Program accessed via Boardwalk to enter all G-60s requests on-line. RCM 9.1 Appendix C (G-60s) procedure has been retained to assist in completing the on-line forms.

Completion

PART I - IDENTIFICATION

Item 1: Enter the prefix, using A, D, or H. Enter the employee RRB claim number. If the employee has a nine-digit claim number, enter only A, D, or H in the first space provided. If the claim number has less than six digits, precede with zero(s).

Item 2: Enter the employee's social security account number.

Item 3: Enter the appropriate numeric unit designation code as shown in this item.

</table>

Items 4,14,24: Complete as follows:
• Enter code "1" if the auxiliary's annuity is in current pay status at RRB.

• Enter code "4" if Item 5, 15, or 25 is coded "91." See instructions for Items 5, 15, and 25 below.

NOTE: The Items 4, 14, and 24 codes are instrumental in earmarking and maintaining RR data in SSA's MBR. RRB should not initiate earmarking if a RR annuity is not in payment status.

When a PAM Award or MOR is received with the Review Message "ALERT - EARMARK MBR WITH CORRECT RR CLAIM NUMBER/PREFIX" the examiner must check the DPA DATA section of the transmittal for the employee's total service months. If 120 or more months are shown, enter code "1" in this item.

**Items 5,15,25:** Enter the type of request code.

Only the following request codes can be used to earmark a record:

• Enter "05" to earmark an earnings record and MBR for the spouse based on her own account number.

• Enter "06" to earmark an earnings record and MBR for a widow based on her own account number.

• Enter "90" in conjunction with a code "1," "2," or "3" in Items 4, 14, or 24 to update the MBR. Complete only Items 1, 2, 3, 4(14)(24), 6(16)(26), 7(17)(27), 8(18)(28), and 9(19)(29).

• Enter "91" in conjunction with a code "4" in Items 4, 14, or 24 to remove an MBR earmarking (e.g., denials, wrong SSA number earmarked, etc.). Complete only Items 1, 2, 3, 4(14)(24), 6(16)(26), 7(17)(27), 8(18)(28), and 9(19)(29).

NOTE: None of these codes will produce a reply from SSA. Once the G-60 information is transmitted, assume that the proper action was taken by SSA.

**Items 6,16,26:** Enter the account number of the person whose earnings record is the basis for the earmarking.

**Items 7,17,27:** Enter the first ten letters of the beneficiary's surname and the first and second initials.

**Items 8,18,28:** Enter the beneficiary's date of birth. Enter preceding zeroes in the unused boxes.

**Items 9,19,29:** Enter the beneficiary's sex code; "1" for male; "2" for female.
**Items 10,20,30:** Enter the auxiliary's status at RRB: "0" if the auxiliary is an employee, "1" if the auxiliary is a spouse. If the auxiliary is a survivor, leave this box blank.

**Items 11,21,31:** Enter the type of amendment code as follows:

**Spouse Requests** - For an explanation of which Railroad Retirement Act or Amendment provisions apply, see RCM 8.6, G-357a instructions for Item 11.

**NOTE:** Only complete this item when the Type of Request code in Item 5, 15, or 25 is "05."

- Enter code "2" if the annuitant is a pre-1981 amendment spouse.
- Enter code "4" or "6" if the annuitant is a 1981 amendment spouse as shown on the form.

**Survivor Requests**

**NOTE:** Only complete this item when the Type of Request code in Item 5, 15, or 25 is "06."

- Enter code "2" if the annuitant is a pre-1981 amendment survivor.
- Enter "4" if the annuitant is a 1981 amendment survivor.

**Items 12,22,32:** Spouse Requests on Own Account Number (Request Code 05) - If code "2" was entered in Item 11, 21, or 31, enter the year in which the RRB employee should have acquired an insured status to be vested for a windfall benefit. If the employee does not have 120 months of service prior to 1975, enter "9999."

If code 4 or 6 was entered in Items 11, 21, or 31, leave Item(s) 12, 22, and 32 blank.

**All Other Types of Requests** - Leave Item(s) 12, 22, and 32 blank.

**Items 13,23,33:** Enter "F" when there is a discrepancy in the SSA number in the RRB records and the one in SSA's records, but we need the wage information on the SSA number in the RRB records. Otherwise, leave blank.

**Signature And Disposition**

Sign and date the form in the spaces provided. File the duplicate on the right side of the folder. Put the original in the tray provided to be delivered to BDP. Control the claim in accordance with the instructions from the unit supervisor.
9.2.1 Key/Master - "RASIFORM"

A. General

Key/Master is an on-line data entry system which can be used to enter data via CRT's into mainframe systems. The program used to enter data into the RASI system is "RASIFORM." Using Key/Master, data can be edited for basic content accuracy at the time of input, thus preventing some input rejects, then batched and held for processing into the next RASI run, which is usually the same day.

How to Access "RASIFORM"

- From the TRAIN screen:
  
  Type "KEYPROD."

  Press ENTER.

- The message "STATION (__) LOGGED ONTO KEYMASTER 5.1. PRESS THE ENTER KEY TO CONTINUE" will appear.

  Press ENTER.

- The SYSTEM FUNCTION SELECTION screen will appear, giving two options:

  "1" Log Off (stops the sign-on process)

  "2" Key/Master (Continues the sign-on process)

  Type "2" to continue.

  Press ENTER.

- The WELCOME TO KEYMASTER screen will appear.

  Type your Operator ID next to that item.

  Press PF2.

- The OPERATOR COMMANDS screen will appear.

  next to COMMAND, type "ENT."

  next to APPLICATION NAME, type "RASIFORM."

  Press ENTER.
• The BATCH INITIALIZATION screen will appear.

Press ENTER.

• The first screen, RE-ENTRY DATA, will appear. Use the appropriate PF keys, as shown at the bottom of each screen, to access other screens within the program.

B. RASIFORM Data Entry

1. Basic Instructions

Complete Key/Master instructions are available in RCM 15.10; however, some aspects which are specific to RASIFORM are covered in this chapter.

The program consists of ten input screens which can be used for all current RASI examiner input type codes. Instructions for each type code are provided in subsequent chapters.

To enter data, first select the desired screen by pressing the appropriate PF Key, as shown at the bottom of each screen. Type in the required data, entering it on the underscores provided, which indicate the size of the field. Always complete items by starting at the left. Use leading zeroes for numeric items when necessary. Any positions left blank will be passed to RASI as zeroes. The underscores for any unused positions in a field which contains entries must be removed with the space bar. For example, a code name in which the surname has less than four letters will not require all five positions. Space out the last underscore. However, if no entry will be made for an item, no special action is required.

2. Editing and Errors

Following completion of all required items, press ENTER. This activates the edit process. If the data passes the edits, a fresh version of the screen will appear. Enter the same type of data for another case or use a PF key to move to another screen or to close the batch. If the data does not pass the edits, an error message will appear in the upper left corner of the screen, and the incorrect item(s) will be highlighted in red. To correct the error(s), type in the proper data and press ENTER. If it is preferable, or if for some reason the data cannot be corrected immediately, press CLEAR. This will remove the data and provide a fresh screen. This technique can also be used to erase all entries on a screen before ENTER is pressed.

An alternate error signal is the appearance of an EASYLOGIC FACILITY ERROR PROCESSOR screen. This happens when a logic error is made, such as the omission of a type code when it is a required item. When this screen
appears, press CLEAR to return to the data entry screen. The erroneous item(s) will be highlighted in red. Correct as usual.

Some common errors are:

- alpha characters entered in numeric fields, and vice-versa;
- omission of required item(s);
- items partially completed, or underscores not spaced out when all positions in an item are not required;
- items which are incorrect based upon the contents of other items.

3. Closing a Batch

Enter as many type codes and as many screens for each type code as are necessary. Data types can be entered in any order. The data will be processed as a "batch." A batch can also consist of as little as one type code - one case.

To close a batch and log off, press PF-24.

- The BATCH DATA screen will appear. 
  next to COMMAND, type "OFF."
  press ENTER.
  The SIGNOFF ACCEPTED screen will appear.
  Press ENTER.

- The SYSTEM FUNCTION SELECTION screen will appear.
  Type "1."
  Press ENTER.

- The TRAIN screen will appear.

NOTE: If it is necessary to correct or delete data in a closed batch, consult your supervisor.

NOTE: It is also possible to "save" a batch, rather than close it. This should be done only when data being entered must be reviewed by another individual prior to its release. It is necessary either to make a note of the batch number and security code of the saved batch, or to ask a supervisor to locate these items in
order to retrieve a saved batch. To save a batch, press PF-22. The batch number and security code will be shown on the BATCH END screen.

C. RASI Processing of KEY/MASTER Input

RASIFORM data is extracted daily as part of the RASI run process. Only closed batches can be extracted. If a batch has been saved, it will not be extracted for RASI processing until it has been closed. (See RCM 15.10.27 for further information.)

All data entered into RASIFORM (in closed batches) will be extracted the same day it is entered. The action will be reflected the following day on REQUEST, provided the affected fields are displayed on REQUEST. Once data has been extracted, it will no longer be available on Key/Master. A listing of all data input through RASIFORM will be produced as part of the RASI output. This listing will be delivered to PES daily.

D. Supervisory Functions

Supervisors and some RAPT personnel are authorized to access and perform certain functions of Key/Master-RASIFORM in addition to data entry. These include:

- the ability to re-open a closed batch;
- the ability to check the status of all current input batches;
- the ability to cancel a batch;
- the ability to obtain the batch identification data (batch number and security code) for any current batch, as well as the number of items per batch, the operator identification number, and the time and date of entry;
- the ability to reinstate a closed or cancelled batch.

Instructions for supervisory functions are available in a separate format provided to applicable personnel.

9.2.2 Re-Entry Data - Type Codes 150/954

9.2.2.1 Re-Entry Data Screen - Use

This screen is used to process data for six type codes:

I. 150 - Supp Ann Attainments

II. 954 - Supp Ann Data for Current Cases
III. 933 - Miscellaneous Spouse Data

IV. 947 - Current Connection Determination

V. 948 - Transfer of Credits to SSA or Redcap Determination

VI. 998 - Prior Service Data

If information for more than one type code is required for one case, complete a separate screen for each type code.

9.2.2.2 Re-Entry Data - Type Codes 150 and 954

A. General

1. TYPE CODE 150 - RASI POST-ADJUDICATION SUPPLEMENTAL ANNUITY AWARDS

Type code 150 is required for supplemental annuity (supp ann) attainment cases when pension rights information is not available in the Research record or when relinquishment of rights (R of R) is necessary. Form G-88p is required to obtain the employer pension data. (See RCM 8.7.)

There is no mechanical tracing system for post-adjudication cases. Therefore, manual controls must be maintained. Also, post-adjudication cases are not considered to be mechanically "active," and thus do not require dumping if they are paid manually.

Monthly Attainment Program (MAP)

Cases are activated for supp ann payment by RASI through MAP, the Monthly Attainment Program. MAP searches the Research record for new attainments two months prior to the supp ABD. Supp attainments are paid on RASI once a month. The monthly run includes cases with dates of birth (DOB's) from the second day of the month through the first day of the following month; e.g., January attainments include DOB's occurring January 2 through February 1. If pension or R of R information is outstanding the first month the supp ann is payable, payment will not be attempted again until the next monthly run.

RASI Awards

There are two other situations in which the post-adjudication program is used to pay supp anns:

a. If RASI pays the regular annuity, but cannot pay the supp ann because pension information is outstanding, a 150 call-up will remain on REQUEST and on the G-425 for 90 days after the regular annuity
award. During this period, RASI can accept the data entered as either a 150 or a 954 type code.

b. A 954 referral is produced when an employee is not eligible for a supp ann at the time of the regular annuity award, but will be eligible within three months. Enter the data using type code 954; RASI will hold it until the supp ann is payable. (See 954 data entry instructions.)

NOTE: If an employee is due a supp ann, and a supp call-up is pending but no referral has been issued, or none can be located, use type code 150 to enter the data into RASI. However, even if no supp call-up is pending, meaning the post-adjudication program has not yet been activated, RASI will pay the supp ann if data is entered.

If a supp ann call-up is pending after supp data has been entered, no reject notice has been received, and the supp ann ABD has elapsed, refer the case to BRB-RAPT. There may be a problem with the supp attainment monthly run. An overpayment could result if a manual payment is made after RASI data has been entered. Duplicate accrual checks could be sent to the annuitant if the mechanical payment is made first. If the manual payment is made first, the mechanical payment will reject.

Cases Which Cannot Be Paid on RASI

Following is a listing of the types of supp ann cases which cannot or should not be paid through the post-adjudication program (under either type code 150 or 954):

- The regular annuity is in suspense or terminated.
- The regular annuity was not payable for all months in the supp ann accrual period.
- There is a change in the pension rate which affects the supp ann rate.
- More than one pension is being paid.
- The pension effective date is a future date.
- The case involves a lump-sum pension payment (unless the employer allocates it monthly, as explained in RCM 8.7, Form G-88p instructions.)

Folder Record and Award Notice

A G-354e is produced for 1937 and 1974 Act cases, and a G-354R is produced for all others. An RL-20e is released to the employee.
2. **TYPE CODE 954 - REQUEST FOR SUPP ANN DATA FOR CURRENT CASES**

Type code 954 is required when the AA-1 indicates that the employee is entitled to a pension from the railroad employer. To pay the supp ann correctly, RASI needs the pension information from the G-88p. If the G-88p is not received before RASI is ready to pay the regular annuity final, the Supp will not be paid. There will be an award message in the remarks section of the regular annuity award instructing the examiner to control for receipt of the G-88p, and to enter the data if it is received within 90 days. After that, RASI will accept type code 954 for only 90 days after it has paid the regular annuity. After that, use type code 150 or pay it manually. When the G-88p is received, enter the data as instructed in "B."

NOTE: RRB field personnel have been instructed to answer AA-1 item 108 (regarding pension entitlement) "YES" when a disability annuitant age 60 - 64 is eligible for a supp ann, has no employer pension, but refuses to relinquish rights pending a settlement. Do not release a G-88p in this situation. Close the supp without award. Also complete a G-138.

**B. Data Entry Instructions**

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>EE SSN - Usual</td>
</tr>
<tr>
<td>2.</td>
<td>TYPE CODE - Enter &quot;150&quot; or &quot;954.&quot;</td>
</tr>
<tr>
<td>3.</td>
<td>TOT SVC MOS (150 ONLY) - Complete only when M/S for supp ann differs from regular annuity. Enter total RR and M/S months.</td>
</tr>
<tr>
<td>4.</td>
<td>OTHER BENEFIT - Refer to the entries in item 13 of G-88p.</td>
</tr>
<tr>
<td></td>
<td>&quot;1&quot; - Entitled to pension not based upon collective bargaining. (13a is &quot;YES;&quot; 13f is &quot;NO.&quot;)</td>
</tr>
<tr>
<td></td>
<td>&quot;2&quot; - Entitled to pension based upon collective bargaining. (13a and f are &quot;YES.&quot;</td>
</tr>
<tr>
<td></td>
<td>&quot;3&quot; - Entitled to but not receiving pension based on collective bargaining, and not entitled to any other pension. (13a and 13f are &quot;YES,&quot; and no pension rates are shown in 13b.) (954 ONLY) Go to item 9.</td>
</tr>
</tbody>
</table>
"8" - Not entitled to pension, (13a is "NO") or, if entitled, (13a is "YES" and 13f is "NO") pension is either based entirely upon non-creditable service, or has a future effective date. (For pensions based entirely on non-creditable service, employers will show this information in "Remarks" section of G-88p.)

When code 8 is entered, skip items 5-9. Go to item 21.

"9" - Dump for manual handling. (954 ONLY) Go to item 21.

5. **PENSION AMOUNT** (See NOTE at end of this item.) - This field can accept amounts up to $999.99. Enter dollars and cents using leading zeroes if necessary. If amount exceeds $999.99, use "99999". Refer to RCM 8.7, Form G-88p Instructions, for an explanation of the computation of the "Employer Pension" amount. Use that amount in this item.

If the employer pension is contributory, items 15 - 16 of Form G-88p will be completed. Otherwise, the employer pension is non-contributory.

NOTE: If exact pension amount is unavailable, but clearly exceeds $43.00, or if the railroad employer has entered a plug figure in item 13b of the G-88p, enter "07777" for a non-contributory pension, or "17777" for a contributory pension. Also, enter "07777" or "17777" if two pension amounts apply for same month and both exceed $43.00; or, if pension amount is $1,000.00 or more, enter "99999".

However, if employee contributions are involved or if the employee is receiving pensions from more than one employer, item 13b must have the exact amount of the employer pension. It may be necessary to return the G-88p to the railroad for the exact pension rate.

6. **PENSION EFFECTIVE DATE** - Enter beginning date of pension. (G-88p item 13c).

NOTE: If the pension effective date is in the future, item 4 should be "8". Do not complete this item. (Control case for adjustment of supp ann when pension becomes effective.) Go to item 21.
7. **PENSION AMOUNT REDUCED FOR SUPP** (See NOTE at end of this item.) - This field can accept amounts up to $999.99. Enter dollars and cents, using leading zeroes if necessary. If amount exceeds $999.99, enter "99999".

Refer to RCM 8.7, Form G-88p Instructions, for an explanation of the computations for this item. Use the "Employer Pension Amount" minus the "Reduction in Employer Pension for Supp" as the entry for this item.

**NOTE:** If supp ann is a wipe-out, enter "07777" for non-contributory pension, or "17777" for contributory pension.

If a plug figure was used in item 5, a plug figure must be used in this item:

- If item 14(b) of the G-88p is "NO," use the same plug figure as used in item 5.
- If item 14(b) of the G-88p is "YES," reduce the plug figure by the amount in item 14(c) of the G-88p.

For example, if the pension is reduced for a supp of $43.00, and "17777" was entered as the full pension in item 5, enter "13477" in this item. (177.77 - 43.00 = 134.77.) If "99999" was used in item 5, and pension is reduced for a supp of $43.00, enter "95699" in this item.

8. **EE CONTRIBUTION AMOUNT** - This item can accept amounts up to $999.99. Enter dollars and cents using leading zeroes, if necessary.

If items 15 - 16 on G-88p are completed, the employer pension includes employee contributions. Refer to RCM 8.7, Form G-88p Instructions, for an explanation of the computations of the "Employee Contributions." Use this amount in this item.

9. **BA NUMBER** - Enter whenever items 5-8 are completed, or when item 4 has been coded "3".

### 9.2.3 Re-Entry Data - Type Code 933 - Request For Spouse Data

#### A. General

Type code 933 referral is produced when one or more of the following determinations is necessary:
DOM - Date of Marriage
ELG - Spouse Eligibility (AA-3)
DIS - Disabled Child
PM - Previous Marriage
MEDICARE - Spouse Eligibility (AA-7)

Enter a code only in the item(s) indicated in the RASI referral. For Medicare, enter the code in the item labeled "ELG."

NOTE: If information relating to a grandchild is needed, make the necessary entries as if for the employee's child. Following receipt of the award, notify Research that the "child" code should be changed to "grandchild".

spouse may not know the employee’s marriage history. Based on your determination, enter one of the following codes:

Enter code 1 if the applicant is the employee’s current spouse. (Any employee’s or spouse’s previous marriage is no longer valid.)

Enter code 2 if the applicant is currently not the employee’s spouse.

| EXAM NO. | Usual entry. |

### 9.2.4 Re-Entry Data - Type Code 947 – Request for Current Connection Determination

#### A. General

Type code 947 is required whenever a current connection cannot be determined mechanically. RASI assumes there is no current connection if:

- The year in which the employee last worked in the railroad industry is more than three years before the year in which the annuity will begin; and

- The year in which the employee claimed on the application to have last worked outside the railroad industry is more than two years after the year last worked in the railroad industry.

In other words, RASI will generate a 947 referral if it appears that the employee broke the current connection after the 30 month period and before the ABD.

RASI also produces a 947 referral when the employee indicates elected public office in item 66 of the AA-1. In most cases, elected public office is not LPE but is regular employment that can break a C/C.

#### B. Data Entry Instructions

<td>&quot;1&quot; - C/C established for both regular and sup</td>
</tr>
</tbody>
</table>
annuities

"2" - C/C not established.

"3" - C/C not established for retirement purposes, but RRB jurisdiction established for survivor benefits due to no SSA wages.

21. EXAM NUMBER Usual.

9.2.5 Re-Entry Data - Type Code 948 - Request For Possible Transfer Of Credits To SSA Or Request For Redcap Determination

A. General

1. "TR" - A "Transfer" Code is produced whenever "RCU" appears in item 8D of the G-90, indicating the possibility of RRB credits being used at SSA. To make a determination, see the RR and SS earnings shown on the G-90. If it appears that RR credits were used in the computation of SSA's benefit (the RR earnings are higher than SSA's), release a teletype to SSA requesting the return of the credits. In its reply, SSA will indicate whether RRB should recover any overpayment. If the case should be transferred, see RCM 7.2.

2. "RC" - A "Redcap" Code is produced when Board records indicate the possibility of redcap service. Special development is required if redcap service was performed during the period January, 1937, through August, 1941, as those earnings were not reported during that period. See RCM 5.3.100 for more information.

B. Data Entry Instructions

### 9.2.6 Re-Entry Data - Type Code 998 - Request For Prior Railroad Service Data

#### A. General

1. **Retirement Applications**

   A type code 998 is required when railroad service before 1937 is claimed on the AA-1 and the annuitant has less than 360 months of subsequent service. Thus, a determination regarding the employee's claimed prior service is required. Establish the total number of creditable prior service months and the prior service average, based upon documentation in the folder. If the prior service has not been documented, refer the case to the Retirement Analysis and Systems section.

2. **Medicare Applications**

   a. 120 MOS
A type code 998 is required when the employee has less than 120 months of subsequent service according to RRB records. All creditable service, whether prior, military or lag, should be combined and entered in item 20. See RCM 3.2.58 for information about developing service. Complete items 1-2, 19 and 21.

NOTE: 30 years of service must be verified when the employee is 60-61 but is not under a DF.

b. POA

A type code 998 is required when the Medicare applicant's proof of age is less than weight 30. Complete items 1-2, 20 and 21.

B. Data Entry Instructions

Note: unless specified instructions apply to both retirement and medicare applications.

<table>

</tr>
<tr>
<td></td>
<td>&quot;9&quot; - No P/S verified, or EE has 360 subsequent service months.</td>
</tr>
</tbody>
</table>
19. P/S MONTHS (120 MOS)  Enter total P/S months verified. Use leading zeroes, if necessary.

NOTE: For Medicare applications only, enter total of all types of service which can be established.

20. VER (POA)  If the evidence in file establishes the claimed DOB, enter "1".

21. EXAM NUMBER  Usual.

9.2.7 Tier One Offsets - Type codes 950-1 SS Data

A. General

Information from the TRIC reply is fed directly into RASI. However, examiner input of SS data is required when any of the following conditions exists:

- TRIC reply did not match our request on all points of identification, i.e., name, sex, DOB, number;
- More than one reply received with MBR benefit data for the same person under different A/N's, e.g., a spouse receiving benefits as a spouse and also as a wage earner;
- A partial rate is indicated in item 8-Q of G-90;
- Post-entitlement action is indicated on G-90;
- The applicant indicates on the annuity application that (s)he is receiving SS benefits, but no MBR appears on G-90;
- SS benefit is being paid by RRB but TRIC reply indicates no MBR;
- PAM has received a SSADTS transmission for this RR claim number. (PAM activity will trigger a call-up even though TRIC indicates no MBR, SS benefits are not being paid by the Board, and the annuitant did not claim receipt of an SS benefit on the application.)
- The TRIC response was received before SSA began including the December COL-increased rate in the MBR data. RASI sets a 950/951 call-up to allow examiners to update the current rate for the COL. Instructions for this are distributed in an Informational Bulletin at the time of the Mass Adjustment.

If an applicant claims to have filed at SSA, RASI will provide a clearance with checkwriting operations before payment to identify those cases in which the Board is
paying social benefits not reflected in the MBR at the time of TRIC clearance. If the Board is paying social security benefits, RASI will produce a 950/951 referral requesting social security payment data. If there is no indication of SS payments by the Board, RASI will pay the case without reduction.

Acceptable sources of SS benefit information are the G-90, POLO, the MBR, an RR-1a or SOLAR award. If MBR data is shown on the G-90 in a laf code E case but SS payments are not in force, code in the MBR information, check POLO for SS payment activity, and control for a SOLAR award if necessary.

### B. Data Entry Instructions

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Usual</td>
</tr>
<tr>
<td>2</td>
<td>Enter &quot;0&quot; for an Employee. Enter &quot;1&quot; for a Spouse.</td>
</tr>
<tr>
<td>3</td>
<td>Enter code name for payee code shown in item #2. (First initial and first four letters of surname.)</td>
</tr>
<tr>
<td>4</td>
<td>&quot;1&quot; - Applicant is receiving SS benefits. &quot;8&quot; - Applicant is not entitled to SS benefits. &quot;9&quot; - Dump for manual handling.</td>
</tr>
<tr>
<td>5-6</td>
<td>Completion of these items depends upon what code has been entered in item 4. Therefore, complete as follows:</td>
</tr>
</tbody>
</table>

- Item 4 coded "1" - Complete in all cases. Use the SS claim number and appropriate BIC code as explained in RCM 7.4, Appendix B, part 1.
- Item 4 coded "8" -
  - Female Employee cases - If employee is not receiving any SS benefits, show current or former spouse's SS number in item 6. No BIC code is required in this instance; the SS number is for information purposes only. If the spouse's number has not been verified, do not enter it. Verify 700 numbers with the Claims Certification Section.
  - Male employee cases - Leave blank.
• Spouse cases - Leave blank.

• Item 4 coded "9" - Leave blank.

7

Usual

8-13

If item 4 is coded 1, list the SS benefit rates and effective dates in order beginning with the earliest effective date and rate and ending with the most recent date and rate. The rate for the most recent effective date must be based upon the applicable PIA as updated for the latest cost-of-living increase. RASI will reject the data if it does not show the latest benefit rate, and will produce an 805 referral message which reads:

CURRENT SSA RATE PRIOR TO (effective date of latest COL increase)

The latest effective date shown will also be printed on the 805 referral. Upon receipt of the referral, resubmit the data with the latest COL rate to clear the 950/951 call-up. If the latest COL rate is not shown in file, manually update the SS benefit to the COL rate or have the COL rate verified by SSA's on-site representative.

Enter the full dollar amount of the SS benefit. Use leading zeroes if necessary, and ending zeroes. For example, $840.00 should be shown as 0 8 4 0 0 0 ; $1,012.00 should be shown as 1 0 1 2 0 0. Do not enter SS benefit rates reflecting work deductions, always enter the full SS benefit amount before work deductions.

9.2.8 Tier One Offsets - Type Code 953 - Dual Spouse Data

A. General

RASI sets a 953 call-up when the spouse indicates on the AA-3 that (s)he has previously filed an application with the Board and the claim number of that application is not the employee's claim number. The rates and dates to be entered are the spouse's own employee annuity amounts which RASI needs to reduce the spouse's Tier I.

B. Data Entry Instructions

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Usual.</td>
</tr>
<tr>
<td>2</td>
<td>Enter &quot;3.&quot;</td>
</tr>
</tbody>
</table>
3. Enter the spouse's code name. (First initial and first four letters of surname.)

**NOTE:** If the situation arises that neither the employee nor spouse has railroad service prior to 1975 the case MUST be dumped from RASI and paid manually using PC awards. RASI cannot handle these types of cases.

4. "1" - This is a dual spouse case and should be paid on RASI as such.

   "8" - This is not a dual spouse case and RASI should continue normal processing.

   "9" - Dump case. **See the above note.

   When coded "8" or "9", only item 7 need also be completed.

5-6. Leave blank.

7. Usual

8-13. Enter the spouse's own employee Net Tier I effective dates and amounts in chronological order, beginning with the earliest and ending with the most recent. The earliest date may not precede the spouse's Tier I effective date. Enter the full amount of the net Tier 1. Use leading zeroes and ending zeroes if necessary. For example, $650.29 should be entered as 0 6 5 0 2 9 ; $1,650.20 should be shown as 1 6 5 0 2 0 ; $650.00 should be shown as 0 6 5 0 0 0 .

**NOTE** - In spouse-only cases in which the spouse's employee annuity has been paid with different datebreaks from those which apply in the spouse annuity, RASI may apply the wrong reduction amounts. Dump and pay manually.

### 9.2.9 Tier One Offsets - Type Code 957 - Spouse Public Service Pension Data

**A. General**

RASI sets a 957 call-up when the G-230 has a "G-208" entry or the spouse indicates on the AA-3 that (s)he is entitled to a public service pension. See items 104 and 105 on the AA-3 and the G-208 in file and consult the chart in RCM 1.3.192 to determine the effect of the pension upon the spouse's annuity. Complete the form as follows:

**B. Data Entry Instructions**
<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Usual</td>
</tr>
<tr>
<td>2</td>
<td>Enter &quot;7&quot;</td>
</tr>
<tr>
<td>3</td>
<td>Enter the spouse's code name. (First initial and first four letters of surname.)</td>
</tr>
<tr>
<td>4</td>
<td>&quot;1&quot; - PSP applies, RASI will offset SS formula spouse benefit. &quot;8&quot; - No PSP reduction required. &quot;9&quot; - Dump case. When coded &quot;8&quot; or &quot;9,&quot; only item 7 need also be completed.</td>
</tr>
<tr>
<td>5-6</td>
<td>Leave blank.</td>
</tr>
<tr>
<td>7</td>
<td>Usual</td>
</tr>
<tr>
<td>8-13</td>
<td>Show up to six sets of dates and rates in chronological order beginning with the earliest and ending with the most recent. The earliest date may not precede the spouse's Tier I effective date. Enter the full amount of the PSP reduction. Use leading zeroes and ending zeroes if necessary. See examples in items 8-13 of the 953 instructions. The rate entered must be the amount of the PSP reduction being applied, which is not always the same as the PSP amount received. Refer to RCM 1.3.193 and 1.3.194 to determine the correct offset amount and reduction effective date. The PSP reduction will be the first reduction made in the spouse's gross tier I amount. The amount of the reduction will be shown on the award form. NOTE: A PSP reduction amount can be entered with an initial PSP date of entitlement in the future. The 957 action will not reject from RASI. If the PSP-DOE is still in the future as of the RASI paid final date, the award review message &quot;PSP EFFECTIVE DATE IS _____, APPLY REDUCTION&quot; will be produced to alert examiner to control case for adjustment or set tickler call-up to insure the timely adjustment of the spouse tier I. (See 9.3.14 EE/SP Award Messages). NOTE: If the PSP-DOE is later than the spouse ABD and the RRA maximum applies, the award review message &quot;CHECK RRA MAX APPLICATION: PSP INVOLVED AFTER ABD&quot; is produced. (See RCM 9.3.14) The RRA maximum should be redetermined effective with the PSP-DOE. (See RCM 8.6 G-354.4 instructions).</td>
</tr>
</tbody>
</table>
NOTE: If an annuitant is receiving multiple public service pensions it is necessary to take them all into consideration. All public service pension amounts must be added together and the total included in the offset amount. The amounts being paid on the effective dates must be combined.

9.2.10 Lag Service - Form G-88a.1 Listings And Form G-88a.2

A. General

Lag is the time between the last month for which service and compensation has been reported to the RRB and, if it is later, the employee's date last worked. The period from January of the current year through the date last worked is always a lag period; however, the preceding year may also be included in the lag period. This is because the annual service and compensation report for the preceding year is not posted to the Employment Data Maintenance (EDM) until around May 1 of the current year. Therefore, the lag period for applications filed before May can extend from January of the preceding year to the last date worked in the current year.

Determine the lag years required by checking the "CERTHRUDTE" shown on REQUEST screen 13 (CERT THRU DATE). The CERTHRUDTE reflects what is posted on the EDM as of the date on which RASI processes the SEARCH reply for a case. Anything later than that date is considered lag. See the examples below.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>DLW-RR</td>
<td>2-15-2001</td>
</tr>
<tr>
<td></td>
<td>CERTHRUDTE</td>
<td>12-1999</td>
</tr>
<tr>
<td></td>
<td>LAG DATA REQUIRED FOR 2000 AND 2001</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>DLW-RR</td>
<td>2-15-2001</td>
</tr>
<tr>
<td></td>
<td>CERTHRUDTE</td>
<td>12-2000</td>
</tr>
<tr>
<td></td>
<td>LAG DATA REQUIRED FOR 2001</td>
<td></td>
</tr>
</tbody>
</table>

NOTE: In May of every year RASI mechanically recycles cases pending lag data through SEARCH to secure the preceding year's service data. If the employee last worked in the preceding year, RASI clears the lag call-up without examiner input and updates the CERTHRUDTE. If the employee last worked in the current year, only the current year lag data need be input to RASI.

If, following the SEARCH recycle, a case is still pending lag data for a year which is now on the EDM, send an E-Mail message to P&S-RAC to have the lag call-up removed.
If an employee's claimed DLW is in a lag year, but the employer changes it to fall in a non-lag year, send an E-Mail message to P&S-RAC to have the lag call-up removed.

Some special payments can affect the DLW-RR in the lag year. For additional information about crediting special payments, see RCM 5.3, under the specific type of payment. For more information about the effects of special payments on the ABD, see RCM 1.7, under the specific type of payment. This special payments are no longer reported on Form G-88a. They should be reported directly to the Employer Service and Training Center of Assessment and Training.

No verification of the DLW-RR is needed if the employee's claimed DLW-RR is more than two years prior to the filing date. In this situation the railroad will be notified through a monthly Form RL-5A listing, if the employer has requested it, or with a copy of the denial letter if the application is denied.

### B. Form G-88A.1, Request for Verification of Last Date Carried on Payroll

1. **Purpose of Listing**

   Effective from January 1, 2001, Form G-88A.1 listings are monthly computer generated listings maintained by Policy and Systems - RRA Application and Calculation (P&S-RAC) and forwarded to last railroad employers on record each month. The monthly Form G-88A.1 listings will include cases in which the employees have lag railroad service, but the lag is not required for eligibility. These are employees who have stopped railroad employment within two years of the filing date of the annuity application and have a last date carried on the payroll in the current month or an earlier month. The listings inform the employees' last railroad employer that the employee has retired and request a review of the last date carried on the payroll.

   If the employee lists more than one railroad employer or labor union employer within two years of the filing date, he will be on the G-88A.1 listing for each employer. For example, if the employee indicates that he last worked for BA 1621 and BA 8922, he will be listed twice - once on the BA 1621 listing and once on the BA 8922 listing.

   a. **Items from Annuity Application**

      The listings indicate each employee's social security number and the following items as they were entered on the employee's annuity application: payroll name, job title, dept-division, job location, the date last worked for the railroad, the ending date of any injury settlement, and, in age and service cases, the date the employee relinquished rights to railroad employment.

   3. **Release to Railroad**
When an application is filed in advance of the annuity beginning date (up to 90 days) and a claimed date last worked after the filing date is involved, P&S-RIS will not list that employee on the Form G-88A.1 until the first work day of the month in which the employee will cease railroad employment.

P&S-RIS mails the listings to the employers monthly. The addresses are based on the addresses for the Compensation Contact Official (Category C, Subcategory 100) in the Employment Data Maintenance (EDM) Contact Official’s Data Base.

4. Railroad Completion Items

The railroad contact official is requested to check the dates on this listing against the payroll records. If the later of the date last worked or the ending date of an injury settlement listed for each employee agrees with the railroad's record of the employee's date last carried on the payroll, no action is required.

If the dates shown on the listing do not agree with the railroad’s records, the contact official is requested to line out the incorrect information, enter the correct information above it, and sign the form at the bottom of the page. He or she will then fax the corrected page to the Retirement Initial Section (RIS) to correct the annuity. The fax number for (RIS) is included at the bottom of each page of the listing.

5. Processing Returned G-88A.1 Listings

Form G-88A.1 listings returned by the railroad to report changes in the date last worked or date rights relinquished require examiner handling. Since the railroads have been instructed to return this G-88A.1 only if the dates provided are not correct, RASI, or an examiner processing an application manually, will not hold up the final payment pending the receipt of the G-88A.1.

If the employee listed more than one railroad as his employer within two years of the application filing date, he is included on the listings to each of those employers. The listings do not identify the second-to-last employer. Therefore, if the date last worked printed on the listing does not match the date last worked on RASI, determine if the G-88A.1 was returned by the second-to-last railroad employer.

If a corrected date is received, take the following action:

a. Case on RASI, not paid final - Usually a change in the DLW-RR or DRR of the second-to-last railroad employer does not have to be submitted to RASI since it will not impact the ABD. DLW-RR changes and DRR changes not impacting the ABD can be held, and the date(s) corrected on PREH after the final payment has been made.
Otherwise, a change in the DLW-RR or the DRR can be submitted to RASI at any time prior to the final RUIA clearance/calculation processing. For a date last worked change, the examiner should submit a 996 correcting EEDLWRR. For a date rights relinquished change, the examiner should correct EEDRRLST.

Changes submitted while the final RUIA clearance or calculation processing is pending will not be considered in the calculation processing. If TRIC is pending at the time a DLW-RR change is submitted and the ABD year is changed by the corrected DLW-RR, TRIC will recycle for the corrected ABD. If the DLW-RR change will impact the ABD, attempt to drop the case and process the application on ROC considering the correct DLW-RR.

b. **Case paid final, DLW-RR change** - Review the ABD to determine if it is impacted by this change. If so, the case should be recertified to correct the DLW-RR and ABD. Request a new G-90 if the ABD year has changed. If the ABD is not impacted by the change in the DLW-RR, correct the DLW-RR on PREH.

c. **Case paid final, DRR change** - Correct the DRR on PREH. Since the G-88A.1 listings only include employees who did not need their lag for eligibility, deemed railroad service months required for eligibility should not be an issue. The DRR change does not impact final payment.

However, if deemed railroad service months were included in the initial award due to special handling, request the Employer Service and Training Center to recompute the number of deemed railroad service months considering the corrected DRR. Refer the case to your supervisor if it appears the employee is overpaid or no longer eligible. Otherwise, correct the DRR on PREH.

6. **Disposition of Listings**

   **Only One Claim Number** - If only one claim number on the same page of the listing has a correction, mark the claim number on the top and have that page of the listing imaged.

   **Multiple Claim Numbers** - If more than one claim number on the same page of the listing has a correction, highlight the claim numbers and on the imaging request slip indicate that multiple accounts are affected.

C. **Form G-88A.2**

   Notice of Retirement and Request for Verification of Service Needed for Eligibility - This form is available on RRRAILS.
1. **Purpose of Form**

RRAILS Form G-88A.2 is sent by the RRB field office to the employee's last railroad employer(s) when lag service is needed to qualify for an annuity:

a. 120 months for regular age and service or total and permanent disability; or,

b. 240 months for occupational disability; or,

c. 360 months for employee and spouse 60/30 eligibility; or,

d. 360 months for the spouse of a disabled employee to qualify under the 60/30 provisions. The employee may have enough service to qualify for an disability annuity, but the lag service may need to be developed to qualify the spouse under the 60/30 provisions.

Lag service should be developed, even if there is sufficient claimed military service that could establish eligibility for an annuity. The military service might be used as wages to vest the employee for a vested dual benefit.

**NOTE:** The RRB field office will not release a Form G-88A.2 for service information to establish 25 years for a supplemental annuity. The regular annuity application will process to final payment. Prior to 2006 if lag service could establish eligibility for a supplemental annuity, a referral was created when lag was added in the mechanical RAIL mass adjustment. Beginning in 2006, if lag service makes the employee eligible for a supplemental annuity, RESCUE will process the initial supplemental annuity award if the employee is old enough at the time of the RESCUE run. If PREH does not contain information about the whether the employee is entitled to a RR pension, RESCUE will issue a referral to STAR (RUE 40). Otherwise RESCUE will update the service months in PREH, and MAP will issue a referral when the employee attains the required age to receive a supplemental annuity.

2. **RRB Completion Items For Form G-88A.2** - The RRB is to complete the following items before releasing the Form G-88A.2 to the railroad:

   **Item 1, Social Security Number**

   Enter the employee's social security number.

   **Item 2, Name**

   Enter the employee's name.
Item 3, Date Released

Enter the date the Form G-88A.2 is released to the railroad. The Form G-88A.2 should not be released before the month in which the employee will cease railroad employment. RRB field offices should also enter the date the Form G-88A.2 was released (or will be released) on the Form G-230 that is transmitted with the annuity application.

Item 4, BA Number

Be sure to enter the BA number of the employee's last or, if applicable, next to last railroad employer.

Item 5, Railroad Name and Address

Enter the name and the address of the railroad retirement Compensation Contact Official (Category C, Subcategory 100) in the Employer Data Maintenance (EDM) Contact Official database who corresponds to the BA number entered in item 4. However, if the railroad has merged with another railroad, enter the name and address of the railroad contact official for the successor railroad.

The preferred method of sending the Form G-88A.2 to the railroad is by fax. If the field office sent the form by fax to the railroad, they should include the fax number in this item.

Item 6, Payroll Number

Enter the payroll number that the employee entered on his annuity application. For an employee of the Canadian National Railway, enter the SRB (staff record bureau) or PIN (personal identification number) number.

Item 7, Job Title

Enter the job title that the employee entered on his annuity application.

Item 8, Work Location

Enter the work location that the employee entered on his annuity application.

Item 9, Department or Division

Enter the department or division that the employee entered on his annuity application. Exception - If the employee was a labor organization official and Form G-88A.2 is being released to the labor organization, enter the Local Lodge affiliation.

Item 10, RRB Filing Date
Enter the filing date of the employee's annuity application.

Item 11, Date Last Worked

Enter the later of the employee's claimed date last worked for the railroad or the employee's claimed date last carried on the payroll due to pay for time lost, injury settlement, etc. When releasing a Form G-88A.2 for a Canadian citizen or permanent resident who performed service for a U.S. employer, enter the last day the employee performed creditable service in the U.S.

Item 12, Date Rights Relinquished

The entries for this item depend on the type of annuity application.

a. For disability applications, enter "Disability" in Item 12, unless the applicant actually relinquished rights before filing the application.

b. In age and service cases, enter the date the employee claimed as the date relinquished rights, or date will relinquish rights, to railroad employment. However, leave Item 12 blank, with a note in Remarks, if a discharged employee is in the process of asserting a claim before the National Railroad Adjustment Board for reinstatement with pay for time lost.

3. Release to Railroad

When an application is filed in advance of the annuity beginning date (up to 90 days) and a claimed date last worked after the filing date is involved, a Form G-88A.2 will be completed and placed in a pending file in the field office. The forms will not be released by the RRB field office until the month in which the employee ceases railroad employment.

The preferred method of release to the railroad is by faxing the forms to the fax number in item 5 of Form G-88A.2. For these cases, the retirement annuity cannot be paid until the railroad contact official returns these forms to the RRB.

4. Railroad Completion Items

The railroad contact official will complete item 13 of Form G-88A.2 only if a correction is needed for the date in item 11. The railroad contact official is always to complete item 14 of Form G-88A.2, indicating the employee's actual railroad service months in the lag period, and is always to complete item 16, with the Certification data.

The railroad returns the Form G-88A.2 to the RRB by faxing (or mailing) the form to the Retirement Benefits Division - RIS at (312)751-7192. This return address is preprinted on the form.
5. Processing Returned G-88A.2 Forms

RASI will set a 958 call-up pending receipt of the G-88A.2

RIS personnel should submit a 958 to enter the actual railroad service months verified on Form G-88A.2 into RASI as soon as possible. If the railroad changes either the date last worked - railroad (DLW-RR) or date relinquished rights (DRR) on a Form G-88A.2, enter the correct date(s) into REQUEST and RASI.. For a DLW-RR, the examiner should submit a 996 correcting EEDLWRR. For a DRR change, the examiner should correct EEDRRLST. Usually a DLW-RR or DRR of the second to last railroad employer does not have to be submitted to RASI, since it will not impact the ABD.

Note - In January through April of each year, RIS should check Form G-88A.2 to make sure that the preceding year's lag data has also been included. This procedure is discontinued around May 1 each year, after the preceding year's earnings are posted and RASI recycles cases pending lag through SEARCH.

If the lag data for the preceding year is needed for entitlement and not on the EDM and the Form G-88A.2 was completed incorrectly; or, if additional information is needed, send an E-Mail message to Michael Wietcha, in the Employer Service and Training Center of Assessment and Training to obtain the information from the railroad. Indicate the problem or the additional information needed.

When the 958 input is entered into RASI, the lag service months will be added to the service months already on record and RASI will determine if sufficient service has been established for eligibility. If so, RASI will continue its processing (usually by requesting TRIC). If not, RASI will issue a referral for the examiner to determine if deemed service months can be credited. Refer to RCM 9.3.15(E), under the referral "Insufficient Service Months for Annuity Type Code, Consider Deeming."

If the AA-1 shows two lag employers, and lag service is required for eligibility, RASI will produce a referral message: "TWO LAG EMPLOYERS INDICATED." When both G-88A.2's have been received, submit the data for both on one 958. If the employee had two employers in the lag period, and two G-88A.2's were released for service to establish annuity eligibility, RASI will reject 958 input which does not indicate two BA numbers.

6. Controlling for Return of Form G-88A.2

If the lag service is needed for entitlement, the case cannot be paid until the Form G-88A.2 is returned. A Form G-88A.2 tracer referral is generated by RASI 45 days after the application filing date. Trace any outstanding Form G-88A.2 according to RCM 8.1, Appendix D.
7. **Disposition of Form G-88A.2**

Mark the claim number on the top of the Form G-88A.2 and have the form imaged.

**TYPE CODE 958 - LAG SERVICE - DATA ENTRY INSTRUCTIONS** - This screen is used to clear the call-up on RASI for cases pending type code 958. If the DLW-RR has changed since the application was transmitted to RASI, a 996 should have been submitted to correct the EEDLWRR on REQUEST before completing this code 958. The lag service will not be displayed on the EDM until the year-end earnings reports are received from the railroad.

These are cases where railroad lag service is required for eligibility. This screen can be used to submit data for one or two lag employers. RASI will not produce a TRIC request until all required lag data has been entered.

**Item 1 (EE SSN)**

Enter the employee's social security number.

**Item 2 (Code Name)**

Enter the employee's code name. (First initial and first four letters of surname.)

**Items 3-5 (BA NO, DLW, DRR)**

Always complete using the corresponding items on the Form G-88A.2. The item 3 (BA NO.), item 4 (DLW) and item 5 (DRR) should always refer to the last chronological railroad employer, if there are two lag employers, no matter how they are listed on the AA-1.

Item 5 may be omitted when the employee is a disability annuity applicant.

**Items 6-8 (Next-to-Last BA NO, DLW, DRR)**

The item 6 (next-to-last BA NO), item 7 (next-to-last DLW) and item 8 (next-to-last DRR) should be complete using the corresponding items on the second Form G-88A.2 when there are two lag employers listed on the AA-1. Otherwise, leave these items blank.

**Item 9 (Current Lag Year)**

Enter the four digits of the year of the DLW shown in item 4.

**Item 10 (Current Year Actual Service Months)**
Enter the number of actual creditable railroad service months for the year entered in item 9.

One-Employer Cases - If item 14 on the G-88A.2 indicates actual service months for the "Current Year," enter the total actual service months for that year in this item.

Two-Employer Cases - Determine the number of actual service months which can be credited in the current lag year for each Form G-88A.2. A month in which the employee worked for both employers is only one creditable railroad service month. Enter the net number of creditable railroad service months.

Example 1:

The Form G-88A.2 for the last employer shows the DLW-RR as 10-31-2000, and the employee worked in all months through the DLW-RR. The Form G-88A.2 for the next-to-last employer shows the DLW-RR as 7-5-2000, and the employee worked in all months through that DLW-RR. The net amount of actual service months is 10.

Example 2:

The Form G-88A.2 for the last employer shows the DLW-RR as 12-15-2000, and the employee worked only in the months July - December 2000. The Form G-88A.2 for the next-to-last employer shows the DLW-RR as 7-5-2000, and the employee worked only in the months Mar - July. The net amount of actual service months is 10.

Item 11 (Current Year Deemed Service Months)

If deemed months are not necessary to establish eligibility, leave this item blank. Otherwise, when RASI rejects the 978 with the message: "G-88A.2 - INSUFFICIENT SERVICE MONTHS FOR ANNUITY TYPE CODE - CONSIDER DEEMING, see the instructions for that reject message in RCM 9.3.15(E), 958 Input Rejects.

Item 12 (Prior Lag Year)

Enter the four digits of the prior lag year. If none, leave this item blank.

Item 13 (Prior Year Actual Service Months)

If item 12 is completed, use the instructions in item 10, enter the net number of actual creditable railroad service months creditable for the prior lag year.

Item 14 (Prior Year Deemed Months)

See the instructions in RCM 9.3.15(E), 958 Input Rejects.
Item 15 (Exam Number)

Enter your three digit examiner number.

9.2.11 Proofs - Type Codes 900-6

A. General

This screen is required when an application is processed without a required proof attached, or when there is a discrepancy regarding a proof. The following type codes indicate the type of proof outstanding, although all proofs enter RASI as 900.

900 - Employee proof of age (items 1-3, 15)
901 - Spouse proof of age (items 4-5, 15)
902 - Child proof of age/relationship (items 1, 6-7, 15)
904 - Spouse proof of marriage (items 1, 8, 15)
906 - Employee - proof of military service (items 1, 9-15)*

*When proof of military service is still outstanding but not required for eligibility, and processing must be expedited, the RIS examiner must notify the manager or senior examiner. The manager or senior examiner will clear the military service call up and enter the claim number on STAR (RIS-MS). The examiner will continue to trace with the field office for proof of military service. If the proof of military service is abandoned by the field office, close out STAR and enter this information in remarks.

As many as all five types of proofs can be entered on the same screen. However, a separate screen must be completed for each period of military service when there are multiple periods, or for each child, when there is more than one.

### 9.2.12 DUMP - Type Code 991

#### A. General

This screen is used to terminate RASI processing when mechanical handling is no longer advantageous. It is also used when an application is cancelled or denied and payment (partial or final) has already been issued. The screen is also used to remove a case from the RASI Master file and allow it to be re-entered with corrections.

#### B. Data Entry Instructions

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Usual.</td>
</tr>
<tr>
<td></td>
<td>Complete this item as follows:</td>
</tr>
<tr>
<td>---</td>
<td>--------------------------------</td>
</tr>
<tr>
<td>2</td>
<td>• Enter the code &quot;141&quot; to dump the employee and spouse (if any) from RASI for manual handling. A record of the dumped cases will remain on the RASI Master and REQUEST for about 90 days. This code should only be used to dump cases which <strong>will not</strong> be re-entered into the RASI system.</td>
</tr>
<tr>
<td></td>
<td>• Enter code &quot;142&quot; to dump spouse-only cases for manual handling. A record of the dumped case will remain on the RASI Master and REQUEST for about 90 days. This code should only be used to dump spouse only cases which <strong>will not</strong> be re-entered into the RASI system.</td>
</tr>
<tr>
<td></td>
<td>NOTE: Do not use the above codes if you want to re-transmit a case to RASI.</td>
</tr>
<tr>
<td></td>
<td>If you have been requested to dump a case which <strong>will be re-transmitted to RASI</strong>:</td>

<tr>
<td></td>
<td>• Enter code “147” (spouse only). This code results in the <strong>immediate removal</strong> of the case from the RASI Master and REQUEST.</td>
</tr>
<tr>
<td></td>
<td>• Enter code “149” employee (and spouse, if any). This code results in the <strong>immediate removal</strong> of the case from the RASI Master and REQUEST.</td>
</tr>
<tr>
<td></td>
<td>• Enter code &quot;148&quot; to dump an employee SUP ONLY case from RASI for manual handling. A record of the dumped case will remain on the RASI Master and REQUEST about 90 days.</td>
</tr>
</tbody>
</table>
3. Enter first initial and first four letters of surname of employee if item 2 is "1" or "9," or spouse if item 2 is "2" or "7." (Leave blank if item 2 is "8." Space out the underscores.)

4. Enter six-digit claim number, if applicable.

5. Enter the code number which corresponds to the appropriate reason for dump as shown on the form. Code numbers “1”, “2”, “4”, and “5” will produce a disposition record which will remove the case from the pending load. If any other code is used as a reason for dump, the case will remain on the pending load until it has been coded as a disposition.

DUMP REASONS

1 – INCORRECT SSN
2 – DEATH
3 – OP COULD OCCUR
4 – CLAIM ABANDONED
5 – APP CANCELLED
6 – MANUAL PARTIAL
7 – OTHER

Press "ENTER."

9.2.13 IMPACT or SPAR – Type Code 944

A. General

This screen can be used to enter either an IMPACT rate for an employee or a SPAR rate for a spouse applicant, or to change an IMPACT or SPAR which has not yet been paid.

1. IMPACT (Initial Monthly Partial Certification in Tiers)

   a. Eligibility Requirement For IMPACT – The field representative usually determines which employee applicants will be paid the IMPACT rate. If the field representative has reason to doubt that the employee is eligible for an annuity (s)he will not enter an IMPACT rate on the G-230.
RASI will pay an IMPACT rate in disability cases only after receiving a G-325 granting a disability rating. In cases granted an occupational disability rating, the establishment of a C/C and either at least 240 months of service or 60 years of age is also required before an IMPACT rate will be paid.

b. Amount of Partial Rate – The field representative will compute the partial rate based on the information furnished on the Microfiche of Annuity, Residual and Compensation (MARC) file. The partial rate computed will be the same rate that is normally furnished employees who request an annuity estimate. A SUP ANN will not be paid in the partial certification.

The partial rates computed by the field will be entered by tiers, on the G-230 screen.

The breakdown of the IMPACT rate into tier components is required for taxation purposes. Each tier component must be entered as a dollar amount only and must not exceed the following maximums:

- Tier 1 - $1000
- Tier 2 - $800
- Windfall - $500

c. Beginning Date of Payment – All beginning dates for payment of partial rates will be set for the first day of the month.

After the partial rate is entered, RASI will establish an assumed ABD and begin paying full age cases as follows:

Filing Month After DLW (RR and LPS) Month – The ABD for the partial rate will be the first day of the month of the application filing date.

Example: Employee last worked in RR service on 3-15-91. He filed an application on 4-10-91. RASI will establish 4-1-91 as his ABD for the partial rate and issue a check on 5-1-91 for payment of April.

Filing Month Same as DLW (RR or LPS) Month – The ABD for the partial rate will be the first day of the month following the filing month.

Example: Employee last worked in RR service on 3-10-91. He filed an application on 3-14-91. RASI will establish 4-1-91 as his ABD for the partial rate and issue a check on 5-1-91 for the month of April.

The ABD for a reduced age case will be the first day of the first full month the employee is age 62.
The ABD for a disability annuitant will be the first day of the sixth month following the month of the disability onset date. NOTE: If the employee has designated an ABD on the application, RASI will use the late of the two.

Only current month accruals will be paid. If the established ABD would result in more than one month’s accrual being due, RASI will set the partial ABD so that only one month’s accrual will be paid.

EXCEPTION: If RUIA clearance is not received by the cut-off date of the current month, the case will be paid the following voucher month, which would result in more than one month’s accrual being paid.

When a case undergoing partial certification becomes ready for final payment, the final ABD will be used instead of the assumed ABD. In some cases, however, they may be the same date.

d. **RUIA Clearance** – All cases will be cleared with RUIA before payment is made. The assumed ABD will be the ABD furnished RUIA.

e. **Award Forms and Notifications**

   **Award Form** – No Form G-354R will be produced for a RASI case in which a partial rate has been paid. The partial rate date is available on REQUEST Screen 11.

   **Award Notification** – RL-20e and C.P. 400 will be used as the award notification for the partial certifications.

f. **Examiner’s Entry of IMPACT Rate**

   IMPACT rates are generally entered in the G-230 by field personnel. In cases where a point of eligibility is questionable, however, the field may not enter the IMPACT rate, or RASI may zero out the IMPACT rate due to a manual review code or some special situation.

   Once all questions are resolved, the examiner may enter the IMPACT rate by completing a 911. IMPACT rate should be entered whenever possible, especially if the claim is approaching 120 days old.

   RASI will produce a referral message for every case in which no IMPACT data was received from the G-230, and the case has been on the system for 30 days.

   Examiners may enter an IMPACT rate in a disability case prior to the case being rated, if the eligibility requirements are met; however, payment will not be made until the G-325 is processed. If an occupational disability has been granted, a C/C and either at least 240
service months or 60 years of age must be established before RASI will pay an IMPACT rate.

Use of the MARC – In general, the MARC estimate may be used as an IMPACT rate. However, many considerations may cause the MARC estimate to be altered:

- If there is a DOB discrepancy between the MARC and the AA-1, subtract $30 from PIA 1 for each discrepant year, regardless of whether the employee is younger or older. Subtract an additional $100 if the MARC year of birth is before 1917, but the employee is actually born in or after 1917.

- Check the VDB date of entitlement before using the MARC estimate. Exclude the VDB if it is not yet due or there is any doubt about vesting. Cut back the VDB if it is being paid in a VDB cutback period.

- For reduced age cases, be sure to consider age reductions. This is not done in the MARC estimate.

- Reduce the Tier 1 for SS entitlement. The rate shown on the MARC does not reflect the reduction for SS benefits.

- Subtract the amount of the social security benefit if the amount is known. Use the rate shown on the SSA award letter, DATA-Q or a G-90. If the employee has SS-covered wages after the last year SSA earnings are shown as posted on the MARC, increase the SS benefit by $30 for each unposted year.

If the amount of the SS benefit is unknown, assume it equals the gross Tier 1 and do not include a Tier 1 in the IMPACT.

NOTE: An incorrect month or year of birth could also affect the employee’s eligibility for a reduced 60/30 annuity, and the amount of the Tier 1 reduction. If the employee is applying for a 60/30 annuity to begin when he is less than 62, be sure to consider the Tier 1 age reduction.

2. SPAR (Spouse Partial Annuity Rate) – In cases in which the field representative does not enter a SPAR rate on the G-230, examiners may make the decision as to when to pay a SPAR rate. When deciding to pay a partial rate, consider such factors as:

- Age of AA-3 application;

- Amount of information in file to pay case;
• Reason field did not initiate SPAR payment;

• When case is expected to pay final.

Do not pay a partial rate if:

• Excess earnings are indicated; or

• Employee is being paid 100% or 110% O/M rate; or

• The employee and spouse are not living together and there is no G-346 in the file.

• The spouse is receiving SS benefits from the Board and is subject to Medicare premium deductions, and the SPAR rate is less than the amount of the Medicare premium.

• The spouse is not a citizen or legal resident of the United States, or is not a legal resident of Canada who has claimed exemption from non-resident alien tax withholding under the existing U.S. – Canadian treaty. (Non-resident alien tax withholding and account provisions preclude mechanical payment in these situations.) However, if a spouse living outside the United States claims legal U.S. residence, or is a legal resident of Canada, the field should have secured Form RRB-1001 and the Remarks section of the G-230 should be noted “U.S. – Canadian Tax Treaty Exemption Applies.” In that case a SPAR may be paid.

• The spouse is filing based upon a minor or disabled child and the eligibility determination has not yet been made.

a. Eligibility Requirements For Payment of Partial Rate to Spouse – Do not request a partial payment of a spouse unless the eligibility and entitlement requirements outlined in RCM 1.3 have been met. Also, the required proofs must be in file.

NOTE: Do not request a SPAR payment for a case in which the employee is not in pay status, unless an IMPACT is being prepared as well. In that case, RASI will pay the IMPACT first, then the SPAR will be paid in the next run.

b. Amount of Partial Rate – Examiners are responsible for computing the SPAR estimate if the district office has not already provided a SPAR rate on the G-230. The SPAR rate may consist of Tier 1 plus Tier 2, or either of Tier 1 or Tier 2 alone. The total SPAR rate may not exceed $999.
• TO COMPUTE THE SPAR TIER 1 RATE
• Multiply the employee’s PIA 1 (excluding any DRC’s) by 50%;
• Reduce for spouse’s age, PSP and/or SS benefit payable;
• Drop cents;
• Do not exceed $600.

Exceptions:

1. **If the employee is entitled to a reduced 60/30 annuity:**

   Multiply the employee’s ABD Tier 1 (the age – reduced PIA 1) by 50%;

   Reduce for other benefits as required;

   Drop cents;

   Do no exceed $600.

   NOTE: If the employee and spouse are both 62 or older, and employee’s PIA 1 has been recalculated, compute as shown in previous section.

2. When PSP or SS benefit amount are unknown, do not pay SPAR Tier 1.

3. When **employee and spouse are filing together for dual annuities**, do not pay SPAR Tier 1.

4. When a spouse filing alone has an employee annuity in force, reduce the SPAR Tier 1 by the amount of the employee annuity gross Tier 1.

5. When the employee is entitled to a noncovered service pension, the SPAR Tier 1 must reflect the reduction in the employee’s PIA 1.

TO COMPUTE THE SPAR TIER 2 RATE

Employee and Spouse Filing Together:

• Multiply the IMPACT Tier 2 by 45%; (If spouse annuity is subject to age reduction, multiply the IMPACT Tier 2 by 30%)
• If the spouse is continuing LPS, reduce the SPAR Tier 2 by half;
• Drop cents;
• Do not exceed $399.

NOTE: If the employee is 65 or older in the ABD year, or did not work for the railroad in the ABD year, do not pay the SPAR Tier 2.

Spouse Filing Alone:

• Multiply the employee’s Tier 2 by 30%;
• If SPAR Tier 1 was reduced for dual entitlement, restore reduction amount or net Tier 1 rate, whichever is less.
• If the employee or spouse is continuing in LPS, reduce the SPAR Tier 2 by half;
• Drop cents;
• Do not exceed $399.

NOTE: If the employee’s ward states “SPOUSE INVOKES MAX”, do not pay the SPAR Tier 2.

The employee tier data necessary to compute spouse partial rate should be available from the claim folder. Other sources to sue when the data is not available from the folder are the MARC and the BIC. However, when using the MARC file, compare the employee’s verified DOB with that shown on the MARC. If the employee is younger than the date on the MARC, do not use it to pay the SPAR as PIA 1 will be overstated.

c. Beginning Date of Payment – RASI will compute all SPAR ABD’s. If RASI cannot establish an ABD, it will produce the referral message “UNABLE TO SET SPOUSE’S ADB: SUBMIT SPAR FORCE 996”. Prepare a 996 screen coded as indicated in RCM 9.2 Exhibit 9.

d. Special Situation – Some spouse cases pending on RASI will not pay a partial when the employee is also on RASI and pending final payment. If the spouse’s TRIC clearance is received before the employee pays final, RASI puts the spouse in “final mode” and will not pay a SPAR. The spouse will pend “TRACE” on REQUEST until the employee is processed and then the spouse will pay final. This will happen even if a SPAR was entered on the G-230 or if the examiner has entered a 911 for a SPAR.
The examiner can, however, take the spouse out of “final mode” and make RASI go through the evaluation process again, permitting payment of a SPAR. This is done by entering a miscellaneous tickler in the call-up table with a 996. Completion of the 996 to set the call-up is shown in RCM 9.2 Exhibit 10.

If there is already a SPAR in the record from the G-230, RASI will pay it. If no SPAR is in the record, the examiner can enter a 911. If the 911 is required, it can be submitted at the same time as the 996.

In either situation, the examiner must also enter another 996, a DUMMY, to remove the miscellaneous correction created by the first 996. Completion of the 996 to remove the call-up is shown in RCM 9.2 Exhibit 12. The second 996 can be submitted 2 or 3 working days after the first one. RASI will not pay the spouse final until the call-up is removed.

e. Award forms and Notification

Award Form – No Form G-355R will be produced for a RASI case in which the partial rate has been paid to the spouse. The partial rate data is available on REQUEST Screen 21.

Award Notification – An RL-20e and CP-400 will be used as the award notification for the partial certification.

B. Data Entry Instructions

</tr>
</tbody>
</table>

**Name - Address Change**

Several rules must be considered when completing the name and/or address:

- If an address consists of only one line, the city and state must be entered on separate lines.
- Always leave a space in the first position of the first line of the address to indicate the location of the group mark when the data is passed to RASI.
- In a two line name, RASI will accept a single initial as one line.
- RASI will not accept numeric characters in a name entry.
- Only three items may be part of the name entry: first and middle name or initials and surname. If a fourth item is entered, RASI will reject the 997. However, RASI will not reject a 997 for the suffixes "II", "III", "MD," "JR," or "SR," if they are shown on line 1.
- When a representative payee is part of a name and address entry, the word "FOR" must be written at the beginning of the second or third name line, (followed by a blank space) and must be followed by the applicant's name. **NOTE:** RASI will not accept the suffixes listed above if entered on lines 2 or 3.
- When entering or changing a representative payee only, enter only the payee's name. Do not add "FOR" and the annuitant's name.
- Surnames with two words should be written as one name, e.g., STJOHN.
- A name and address entry should never exceed five lines. Before making a name or address change, check REQUEST Screen 11(ee) or 21(sp). If there is already a two line name, RASI will not accept a four line address. Likewise, a two-line name cannot be added unless the address is contained on two or three lines.

- If a representative payee is involved and it is necessary to change the annuitant's name, the full name and address must be entered in item 7, i.e., the representative payee, the annuitant's name (preceded by "FOR") and the complete address.

The following chart represents the most common scenarios regarding a name and address change. It is an aid in choosing the correct coding entries for items 2, 4, and 5 as well as the contents of the name-address area. Items 1 (EE SSN), 3 (code name) and 6 (exam #) should be completed as usual in all cases. Press enter after completing all required entries to process.

**Type of Action:**

9.2.15 Miscellaneous Correction Or Change - Type Code 996

A. General

This screen is used to add or change information in the RASI master file. A list of all fields is available in RAC; however, fields for common use are described in the specific referrals for examiner handling. A short list is provided in RCM 9.3.12 of general data fields. Various examples are shown in Exhibits 1 - 12.

NOTE: When changing a date, always enter all four digits of the year in CCYRMODA order.

B. Data Entry Instructions

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Usual.</td>
</tr>
<tr>
<td>2</td>
<td>Enter &quot;1&quot; for employee; &quot;2&quot; for spouse.</td>
</tr>
</tbody>
</table>
3. Enter the first initial and the first four letters of the surname of the payee in item 2.

4. Usual.

5. "Present Contents" - Starting in the first position, enter the current contents of the RASI field that is to be changed. Space out any remaining positions.

6. "Changed Contents" - Starting in the first position, enter the new contents of the field that is being changed. Space out any unused positions.

7. Field Name - Starting in the first position, enter the name of the field being changed. The name cannot be longer than 18 characters. Space out any unused positions.

9. Inquiry Code - The 996 can be used to query the RASI master file to determine its current contents on any field. Enter an "X in this item and enter the name of the field in item 7. RASI will print the contents of the requested field on an 805 referral. This procedure is useful for determining the contents of fields not shown on REQUEST.

Press ENTER.

9.2.16 Man Op Change - Type Code 995

A. General

Under certain circumstances, a man op code is set to prevent final payment, although all factors of adjudication have been completed. The man op code can be set at filing when the contact representative codes the manual review item, or it can be set when the application data contains conditions which require review by an examiner. These conditions are identified on the HSL referral which notes the setting of the man op code.

A 995 can also be used to set a man op code when there is a need to delay payment. In this instance, another 995 will be required to remove the man op.

B. Data Entry Instructions

<table>

<td>1</td>
<td>Usual.</td>
</tr>
</tbody>
</table>
2  "1" For employee.
   "2" For spouse.
   "3" For employee and spouse.

3  Enter first initial and first four letters of surname for payee in item 2.

4  "0"  To remove man op.
    "2"  To set man op.

5  Usual.

Press ENTER.

9.2.17 Search Clearance - Type Code 946

A. General

A 946 can be used to override an incorrect employee name in DCC's records. When a 946 call-up exists, first determine whether the name on RASI is correct, and whether the SSN being used is correct. If so, entering a SEARCH clearance form will permit the release of the employment record data and allow the case to continue processing.

If the name on RASI is not correct, it must be changed with a 997. If the SSN is not correct dump the case and forward the correct data to BFS for re-entry.

B. Data Entry Instructions

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Enter first five letters of surname.</td>
</tr>
<tr>
<td>2</td>
<td>Usual.</td>

<td>Enter two digits of month and four digits of year of claimed (or verified) date last worked for RR.</td>
</tr>
<tr>
<td></td>
<td>Press ENTER.</td>
</tr>
</tbody>
</table>
9.3.1 RASI Referrals

If RASI will not accept an employee or spouse application or a supporting document because of coding errors, omissions, etc., it produces a RASI input reject message. These referral messages are printed in an HSL listing following each RASI run. The listing, under the main heading "RASI REPORTS," is entitled "RASI 805 REJ REF REPORT." The reject messages describe the missing or invalid data.

If the application is accepted, RASI may produce additional referral messages on line. These referrals are preceded by three-digit numbers which refer to RCA's numerical listing of all the messages. These messages, also accessed through HSL, appear under the main heading "RASI REPORTS," entitled "RASI G354A REPORTS".

In some cases, the reason for referral is technical and involves some discrepancy encountered within RASI. If the reason for the referral is not apparent, refer it to P/P&S-RAC through your supervisor.

9.3.2 Retirement Application Rejects

Correction And Rekeying Of Application Rejects

A. General - Application rejects are referred to PES personnel, who then request the claim folders from the adjudication units. If there is no indication that an employee application should be handled manually, PES will have the application corrected and rekeyed by BFS - Program Services Section. The case will be returned to the appropriate adjudication unit.

Because RASI edits are considered in the IC system, the CR is instructed to explain any overriding of IC edits which will cause an application to reject from RASI. BFS will develop missing information and rekey applications if necessary when RASI rejects applications processed through IC.

If the case requires manual handling, PES forwards it to the appropriate unit.

B. Employee-Spouse Case - If the employee and spouse applications are submitted simultaneously, a coding error on one application usually rejects only that application. The other application remains on RASI. However, RASI will not begin to process a spouse application until a rejected employee application has been corrected and rekeyed. The message "Spouse Only - No Matching Research Record" will be produced.

C. Rekeying Forms - If an application is not shown on REQUEST or the G-425 status list, send the case to PES to see if there is an input reject for the case.

When an application rejects, related forms (e.g., G-91) that were keyed remain on the tape record for 36 runs. Therefore, it is not necessary to have related forms rekeyed if the corrected application will be rekeyed shortly after the date it is rejected.
9.3.3 Application Control

Listings and control cards for all applications pending 60, 90, 120 and more than 149 days are printed at the end of each month. The listings and the cards are forwarded to the modules for action to expedite payment in these cases.

9.3.10 Employee And Spouse Type Of Record And Call-Up Codes

A. Type of Record Codes - RASI has a code for each type of case it receives:

<table>
<thead>
<tr>
<th>Code</th>
<th>Type of Record</th>
</tr>
</thead>
<tbody>
<tr>
<td>100</td>
<td>Employee Application - Full Age</td>
</tr>
<tr>
<td>101</td>
<td>Employee Application - For HIB-SMIB Benefits</td>
</tr>
<tr>
<td>103</td>
<td>Spouse Application For HIB-SMIB Benefits</td>
</tr>
<tr>
<td>200</td>
<td>Employee Application - 60/30 Case</td>
</tr>
<tr>
<td>300</td>
<td>Employee Application - Reduced Age</td>
</tr>
<tr>
<td>500</td>
<td>Employee Application - Occupational Disability, Less than age 60, 20 years of service</td>
</tr>
<tr>
<td>600</td>
<td>Employee Application - Occupational Disability, Age 60, 10 years of service</td>
</tr>
<tr>
<td>700</td>
<td>Employee Application - Total and Permanent Disability</td>
</tr>
<tr>
<td>800</td>
<td>Spouse Application - Full Age</td>
</tr>
<tr>
<td>801</td>
<td>Spouse Application - Reduced Age</td>
</tr>
<tr>
<td>802</td>
<td>Spouse Application Based on Child</td>
</tr>
<tr>
<td>803</td>
<td>Spouse Application Based on 60/30 Employee</td>
</tr>
</tbody>
</table>

B. Call-Up Table Codes - The call-up codes are based on the columns checked on the G-230 and on the proofs required for the type of application filed. RASI sets the call-up date for each pending document. These codes are displayed on Screens 11 (ee) and 21 (sp) on REQUEST. The following codes identify the various types of data required by RASI:

<table>
<thead>
<tr>
<th>Code</th>
<th>Type of Record</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>Code</td>
<td>Type of Record</td>
</tr>
<tr>

<td>POA - Spouse</td>
</tr>
<tr>
<td>902</td>
<td>POA - Relationship - Child</td>
</tr>
<tr>
<td>904</td>
<td>Proof of Marriage</td>
</tr>
<tr>
<td>906</td>
<td>Proof of Military Service</td>
</tr>
<tr>
<td>932</td>
<td>Employee Data From Spouse Research Record</td>
</tr>
<tr>
<td>933</td>
<td>Miscellaneous Data For Spouse</td>
</tr>
<tr>
<td>939</td>
<td>CHICO Inquiry *</td>
</tr>
<tr>
<td>945</td>
<td>RUIA Clearance</td>
</tr>
<tr>
<td>946</td>
<td>DCC SEARCH Request</td>
</tr>
</tbody>
</table>

* If applicant has filed for social security benefits, but TRIC indicates no MBR, RASI will check CHICO to determine if RRB is paying an SS benefit.

<table>
<thead>
<tr>
<th>Code</th>
<th>Type of Record</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>998</td>
<td>P/S or Total Additional Service for MPS Case</td>
<td></td>
</tr>
</tbody>
</table>

(Not shown on REQUEST)

<table>
<thead>
<tr>
<th>Code</th>
<th>G-230 Indication</th>
<th>Call-Up Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>Checked &quot;Att.&quot;</td>
<td>10-day call-up. Changes to Code 7 on trace.</td>
</tr>
<tr>
<td>3</td>
<td>Checked &quot;Prev. Sub.&quot;</td>
<td>10-day call-up. Changes to Code 7 on trace</td>
</tr>
<tr>
<td>4</td>
<td>Checked &quot;To Be Sub.&quot;</td>
<td>60-day call-up. Changes to Code 5 on trace.</td>
</tr>
<tr>
<td>5</td>
<td>60-day call-up.</td>
<td>Repeats on trace.</td>
</tr>
<tr>
<td>7</td>
<td>Checked &quot;Att.&quot;</td>
<td>or 10-day call-up for &quot;Prev. Sub.&quot; At least 945, 946, 995 or 997. 10 days elapsed 60 days for all others.</td>
</tr>
</tbody>
</table>

**EXCEPTIONS TO ABOVE**

<table>
<thead>
<tr>
<th>REQUEST</th>
<th>Call-Up Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>TRIC REQUEST</td>
<td>(960) - 60 day call-up</td>
</tr>
<tr>
<td>EE INFO FOR SP</td>
<td>(932) - 30 day call-up</td>
</tr>
<tr>
<td>G-88A.2 REQUEST</td>
<td>(958) - 45 day call-up</td>
</tr>
<tr>
<td>PUBLIC SERVICE PENSION</td>
<td>(957) - 15 day call-up</td>
</tr>
</tbody>
</table>
The remaining digits in the call-up table represent the call-up date written in year, month, day order. (Sample referrals are at the end of this chapter.) For instance, 1-5-94 would appear as 940105.

**9.3.11 Employee And Spouse Status Word Coding**

A. **Status Words - Employee (SWE)** - The employee status words are found on REQUEST Screen 12. Each code indicates the current status of the particular data required for RASI to adjudicate a claim. RAPT has a copy of RASI's master layout record. Consult with a supervisor before making any word changes involving these status words. (A mnemonic code is shown for each status word.) There are four lines of status words for the employee and three lines for the spouse.

**LINE 1 POSITION 1 - EE AGE (SWEAGE)**

<table>
<thead>
<tr>
<th>Code</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>

9.3.13 Employee And Spouse Referral Messages

These messages are produced daily in the "RASI G-354A REF REPORTS" listing on HSL. Referrals are available for the ten most recent RASI runs. Messages are grouped as follows: Medicare, Age & Service, Disability, Dumps, Status Word Coding Errors. Within each group, numbers are in terminal digit order.

Except in cases where the referral message is self-explanatory, the appropriate action required follows each message. The messages are listed in alphabetical order for easy reference. Messages which begin with a number are listed alphabetically using the first letter of the first number. (Ex. - "953" would be listed under "N". Multiple numeric-series messages are listed in numeric order. Ex. - "950, 951, 953").

- **045 ABD MONTH MORE THAN 24 MONTHS AFTER FILING DATE**
  RASI drops claim. Pay manually. Used for disability annuity applications - type code 500, 600 or 700.

- **076 ABD MORE THAN THREE MONTHS AFTER FILING DATE**
  RASI drops claim. Take appropriate action to deny annuity application.

- **038 ALL EVIDENCE IN - CHANGE MANUAL OP CODE TO ZERO**
  Examine REQUEST screens for accuracy of all information. Correct any inaccurate information. Prepare a 995 to clear man op.

- **216 APP CANCELLED - CHECK HI**
  RASI will drop application. Send folder to MPS for handling.

- **092 APPLICANT IS NOT EMPLOYEE’S SPOUSE****DENIAL****
  A code 2 was entered in the "PM" box of the 933, causing RASI to drop case. Deny the annuity application.

- **521 BUSI INDICATES POSSIBLE GARNISHMENT - SPECIAL HANDLING REQ’D**
  The AA-1 indicates that the employee is not under an obligation to pay part of his/her annuity to a former spouse, but the BUSI pre-clearance indicates that a court order may be on file in that bureau. RASI will dump the case. The initial examiner will send the case to RPS-B2 with the note "BUSI indicates possible garnishment." Examiner will investigate and secure new BUSI clearance for payment. If it is found no garnishment is involved, RPS-B2 will forward case back to RIS for payment and new BUSI clearance will be secured.

- **308 BUSI RECOVERY EXCEEDS PARTIAL - CONVERTED TO INITIAL**
This message is generated when the BUSI overpayment exceeds the partial accrual. RASI will zero-out the partial award and continue processing the case for final payment. No examiner action is required.

- **028 115  CASE CODED FOR MANUAL REVIEW**

- **032 116  MANUAL OP CODED 2**

- **023 017  IMPACT (SPAR) RATE ZEROED OUT**

  The G-230 is coded for manual handling. This referral gives the examiner an opportunity to review the case to determine if manual handling is necessary. If case can be processed mechanically, submit a 995 to change manual OP code to zero. If case should be handled manually, submit a 991 coded to dump case.

- **290 CASE DUMPED - DESIGNATED DECEMBER 31 ABD**

  60/30 employee age 60 or 61 in the ABD year has designated an ABD of December 31st. Because RASI would erroneously pay the Tier II COL increase based on January 1st of the next year, RASI will only pay the IMPACT rate, if any, and release a TRIC request.

  Pay the case manually based on a December 31 ABD. The G-90 generated by RASI will have PIA's computed based on the ABD year as the eligibility year. Even though December 31 is the ABD, no accrual is payable until January 1 of the following year. Since December 31 is the ABD, do not pay the Tier II COL increase that would have been established as January 1 of the following year.

- **267 CASE DUMPED EE M/S REDUCTION OR M/S USED AS WAGES**

  This referral is produced in spouse-only cases if RASI receives a code from Research indicating that a military service reduction or military service used as wages was involved in the employee's annuity calculations. RASI will not calculate spouse annuity and will drop case.

- **247 CASE DUMPED - EE TIER II AMOUNT BEFORE VDB UPDATE NEEDED**

  RASI cannot compute the spouse's tier II because Research has already adjusted the employee's tier II for the vested dual benefit. Pay the spouse manually.

- **036 CASE DUMPED - WF PIA 7 IS ZERO-EE RR SERVICE PRIOR TO 1937**

  This message occurs in spouse-only cases when the employee's railroad service is all prior to 1937. Employee may have been erroneously paid as a conversion case. Since PIA 15 is based solely on railroad compensation through 1974, it should equal zero if there is no compensation after 1936.
Review employee computations. Recompute conversion rate using zero PIA's 15 and 7. The correct January 1, 1975 tier II amount should equal the December 1974 rate and the WF amount should equal zero.

Pay the spouse manually based on the corrected employee annuity computations.

- **067 CHILD NOT DISABLED - DENIAL**
  
  A Code 2 was entered in the "DIS" box of the 933, causing RASI to drop case. Deny the annuity application.

- **011 CHILD NOT ELIGIBLE - DENIAL**
  
  A Code 2 was entered in the "ELG" box of the 933, causing RASI to drop case. Deny the annuity application if spouse's eligibility is based solely on having a child in her care.

- **014 COMPENSATION REPORTED AFTER DLWCOMP LAST REPORTED (DATE)**
  
  This referral occurs when the SEARCH reply indicates that there are more than three service months after the DLW claimed on the RASI record, and either the last of the service months is within one year of the filing date, which could affect the ABD, or a 958 call up is in the record.

  Investigate DLW claimed. If correct, request a dump of record and handle manually. If the DLW is incorrect, prepare a 996 to correct the DLW.

  NOTE: If the SEARCH reply indicates less than 4 service months after the claimed DLW, RASI will accept the claimed DLW, but the compensation for those service months will be used in determining PIA's.

- **065 COMPUTER GENERATED DUMP**

- **015 112 COMPUTER PROCESSING NOT FEASIBLE**
  
  RASI has dumped the case; handle manually.

- **375 299 CONSIDER ENTERING IMPACT (SPAR) DATA**
  
  This message will be produced when an application contains no partial rate information, the ABD has elapsed and the case is not pending final action.

  Check "Remarks" on the G-230 to see if a reason was given for omitting a partial. Consider that, as well as the instructions given for IMPACT and SPAR rates in the 911 instructions in RCM 9.2, and enter a partial rate if possible.

  NOTE: If the message is released for a spouse pending "Trace," meaning the employee is active as well, check to see if the employee is close to paying final before entering a partial rate. If the employee is pending final BUSI clearance, or a man op (995) which can be...
cleared now, or 954, then entering a partial rate for the spouse will delay the spouse's final award. And the final award will be payable as soon as the employee's final award is processed.

- **057/126 DESIGNATED ABD INVALID**

  The ABD designated on the annuity application is an impossible date. If the application was keypunched correctly, develop for a correct designated ABD and prepare a 996.

- **191 DA RATED - WC/PD INVOLVED - (MISSING) SUBMIT 996 IMPACT NOW ZERO**

  This is a disability application for which RASI requires information regarding worker's compensation or public disability (MEGACAP) benefits. Item 124 (WC) or 125 (PD) of the AA-1 was either answered "yes" or was omitted. This message occurs after the rating on the G-325 has been received. Even if there is no benefit involved, RASI requires examiner input to clear the 996 call-up. Determine the effect of the benefit, if any, on the case (consult RCM8.5) and complete a 996 as follows:

<table>
<thead>
<tr>
<th>WC Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-4</td>
<td>As usual.</td>
</tr>
<tr>
<td>5</td>
<td>&quot;5&quot;</td>
</tr>
<tr>
<td>6</td>
<td>&quot;1&quot; Offset is required and RASI must dump case. Pay final manually.)</td>
</tr>
<tr>
<td></td>
<td>&quot;2&quot; (No benefit is in effect or no offset is required. RASI may continue processing.)</td>
</tr>
<tr>
<td>7</td>
<td>&quot;EEWORKCOMPCD&quot;</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>PD Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-4</td>
<td>As Usual</td>
</tr>
<tr>
<td>5</td>
<td>&quot;5&quot; Space out unused positions.</td>
</tr>
<tr>
<td>6</td>
<td>&quot;1&quot; (Offset is required and RASI must dump case. Pay final manually.)</td>
</tr>
<tr>
<td></td>
<td>&quot;2&quot; (No benefit is in effect or no offset is required. RASI may continue processing.) Space out unused positions.</td>
</tr>
<tr>
<td>7</td>
<td>&quot;EEPUBDISCD&quot; Space out unused positions.</td>
</tr>
</tbody>
</table>
In either case, if no offset is required, re-enter the IMPACT rate if possible.

- **234/156 DOB AND SEX**
  
  230/152 NAME
  
  231/153 NAME AND DOB
  
  232/154 SEX
  
  233/155 NAME AND SEX
  
  235/157 NAME, DOB AND SEX DISCREPANCY ON G-90
  
  Check G-90 for correct wage record and PIA's. If this information is not correct, dump case and handle manually. If all information is correct and discrepancies can be reconciled, submit 950 or 951.

- **278 DUAL ENTITLEMENT-CORRECT EMPLOYEE'S PREH RECORD**
  
  This referral is generated for either employee or spouse cases involving any dual annuitant. It alerts the examiner that PREH input is necessary when a spouse application is filed after the employee annuity is paid final. Entries need to be made on the employee
  
  PREH record, screen 3200 (RHRRID) using the PREH correction system. The specific fields are DUAL-ANN-RED-TYP-CODE, OTHER-RRB-CLM-NO, OTH-BENF-TYP-CODE, AND OTH-BENF-AMT.

- **281 DUAL ENTITLEMENT-RR SERVICE BEFORE 1975**
  
  This referral is generated for either employee or spouse awards involving any dual annuitant. Determine if either employee has RR service prior to 1975. If yes, clear the 953 call-up and payment processing continues on RASI. RASI will then compute the tier two restored amount. If neither employee has RR service prior to 1975, drop from RASI and pay via p.c. award shell.

- **362 DUAL SPOUSE TAKEBACK DUMP**
  
  This message is generated in dual spouse cases with an ABD before 12-1-83 and an SS reduction effective 12-1-83. RASI is unable to compute the 12-83 takeback amount and so will dump these cases. Refer to RCM 8.8 for instructions on how to compute them manually.

- **198 EE ABD PIA 1 MISSING FOR RRA MAX TEST**
  
  RASI will generate this message in "spouse-only" cases where RASI is attempting to make the RRA Max test but the employee's PIA 1 information is missing. Examine the folder to determine the employee's PIA 1, excluding DRC's, as of the employee's ABD. Submit a
996 to enter this amount into RASI. Complete items 1 and 4 of the 996 as usual. Complete items 2-3 and 5-7 as explained below. In addition, enter the employee's ABD PIA 1, excluding DRC's, in the Remarks section of Form G-59 and forward it to Research.

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>Enter &quot;2&quot;.</td>
</tr>
<tr>
<td>3</td>
<td>Enter spouse's code name.</td>
</tr>
<tr>
<td>5</td>
<td>Enter &quot;00000&quot; (five zeroes) in the first five blocks. Space out the unused positions.</td>
</tr>
</tbody>
</table>

**AIME/TRANS PIA USED**

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>Enter the PIA 1 amount, excluding DRC's, as of the ABD in the first five blocks. Enter only the dollar and dime amount. Use leading zeros if necessary. Space out the unused positions.</td>
</tr>
<tr>
<td>7</td>
<td>Enter &quot;T1ABDPIA&quot;. Space out the unused positions.</td>
</tr>
</tbody>
</table>

**AMW PIA USED - NO M/S INVOLVED OR M/S USED AS WAGES**

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>Enter the PIA 1 amount, excluding DRC's as of the ABD in the first five blocks. Enter only the dollar and dime amount. Use leading zeros if necessary. Space out the unused positions.</td>
</tr>
<tr>
<td>7</td>
<td>Enter &quot;T1ABDPIA&quot;. Space out the unused positions.</td>
</tr>
</tbody>
</table>

**AMW PIA USED - M/S USED AS COMPENSATION**

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>Enter the PIA 1 amount, excluding DRC's, as of the ABD in the first five blocks. Enter only the dollar and dime amount. Use leading zeros if necessary. Space out the unused positions.</td>
</tr>
<tr>
<td>7</td>
<td>Enter &quot;T1MSABDPIA&quot;. Space out unused positions.</td>
</tr>
</tbody>
</table>

- **380 (381) EEDRRLST OR PRV MISSING. SUBMIT 996. (996 TRACED)**

This message is printed when item 41 or 48 on the AA-1, the relinquishment of rights date for the employee's last or second-last railroad employer, is missing, and the application is for an age and service annuity. The case will not pay final until the date is submitted. This message will be traced every 45 days. Obtain the date through the district office and complete a 996 as follows: (Complete items 1-4 as usual. Space out unused positions.)
<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>&quot;00000000&quot; (eight zeroes)</td>
</tr>
<tr>
<td>6</td>
<td>Enter date in CCYRMODE order.</td>
</tr>
<tr>
<td>7</td>
<td>&quot;EEDRRLST&quot; or &quot;EEDRRPRV.&quot;</td>
</tr>
</tbody>
</table>

Also instruct the district office to obtain Form G-88 certifying the date of relinquishment of rights. (See RCM 5.1.40.) Do not hold up payment for receipt of Form G-88.

- **366 EE FILING FOR 60/30, ITEM 26 MISSING ON AA-1**
- **032 MANUAL OP SET**

When this item has been left blank, RASI accepts the application and does not zero out the partial rate, but must make the following assumptions in order to continue processing.

1. If the applicant attains age 62 within three months of the filing date (or on or before), the ABD is set based on age 62. No Tier 1 reduction applies.

2. If the applicant does not attain age 62 within three months of the filing date (or on or before), the ABD is set based on age 60. The Tier 1 age reduction will apply.

(Of other data such as designated ABD, DLW, etc., are still considered as usual.)

After this message has been produced, a 996 must be submitted to approve RASI's assumption, and a 995 must be submitted to remove the manual OP code and permit payment. If, as in the first case above, the ABD has been set based on age 62, and, is later than the earliest possible ABD, it is necessary to contact the district office to obtain the missing answer to item 26. Should the applicant choose not to use the later ABD, and opt instead for the earlier ABD despite the Tier 1 age reduction, the case cannot be paid on RASI. (See Note.)

I. Complete the 996 as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-4</td>
<td>As usual.</td>
</tr>
<tr>
<td>5</td>
<td>Always enter &quot;0.&quot; Space out unused positions.</td>
</tr>
<tr>
<td>6</td>
<td>Always enter &quot;1.&quot; (See Note.) Space out unused positions.</td>
</tr>
<tr>
<td>7</td>
<td>Always enter &quot;EEDESREDABD.&quot; Space out unused positions.</td>
</tr>
</tbody>
</table>
II. Also complete a Form 995 to remove the manual OP code. (They may be submitted at the same time.)

NOTE: A code "2" in item 6 will have no effect. If the applicant attains age 62 within three months of the filing date (or on or before), the ABD remains set based on age 62, whether acceptance of a reduced annuity is indicated or not. Likewise, if the applicant does not attain age 62 within three months of the filing date (or on or before), the ABD remains set based on age 60. To pay a case contrary to either determination requires manual handling.

- 409 EE REDUCED FOR NON-COVERED SVC PENSION - SPOUSE DUMPED FOR MANUAL HANDLING

130 COMPUTER GENERATED DUMP

This spouse-only has been dumped because the employee's annuity was paid with a reduction for a non-covered service pension, and the effective date of that reduction was later than the ABD. RASI cannot obtain the correctly reduced EE ABD PIA 1 to pay the spouse, so it must be handled manually.

- 314 EE RRA MAX MAY APPLY

RASI will issue this message in an employee-only case if preliminary testing indicates that the RRA MAX limitation may apply to the employee only. After verifying this by manually testing for the max, submit a 996. Code items 1-4 as usual. Complete items 5-7 as follows, and space out unused positions:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>Enter &quot;4&quot; in the first block.</td>
</tr>
<tr>
<td>6</td>
<td>If the RRA MAX applies, enter &quot;1&quot; in the first lock. This will generate a COMPUTE ONLY award, showing RRA MAX in the remarks section. Pay the ee manually.</td>
</tr>
<tr>
<td></td>
<td>If the RRA MAX does not apply, enter &quot;2&quot; in the first block. This will allow the award to pay without an RRA MAX reduction.</td>
</tr>
<tr>
<td>7</td>
<td>Enter &quot;EERRAMAXCD.&quot;</td>
</tr>
</tbody>
</table>

- 199 EE T1 MISSING FOR RRA MAX TEST

RASI will generate this message in "spouse-only" cases where RASI is attempting to make the RRA Max test but the employee's ABD gross tier one information is missing. Examine the folder to determine the employee’s gross tier one, including any DRC's, as of the
employee's ABD, to enter this amount into RASI. Complete items 1 and 4 of the 996 as usual. Complete items 2-3 and 5-7 as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>Enter &quot;2&quot;.</td>
</tr>
<tr>
<td>3</td>
<td>Enter Spouse's code name.</td>
</tr>
<tr>
<td>5</td>
<td>Enter &quot;000000&quot; (six zeroes) in the first six blocks. Space out unused positions.</td>
</tr>
<tr>
<td>6</td>
<td>Enter the gross tier one amount, as of the ABD, in the first six blocks. Include dime and cent amounts. Use leading zeros if necessary. Space out unused positions.</td>
</tr>
</tbody>
</table>
| 7    | - If an AIME/TRANS PIA was used, enter "T1ABDGRSAMT."  
- If an AMW PIA was used and  
  - M/S was not used or was used as wages, enter "T1ABDGRSAMT."  
  - M/S was used as compensation, enter "T1MSABDGRSAMT."  
  Space out unused positions. |

- **218 EMPLOYEE CALCULATION ERROR - SPECIAL HANDLING REQ'D**
  Notify P/P&S-RAC via e-mail.

- **403 EMPLOYEE FELONY CONVICTION INDICATED - SP MANUAL OP CODED 2**
  Use RCM 6.3.7, Prisoner Conviction Cases, to determine the effect of an offense punishable by imprisonment for more than 1 year on the annuity.

- **258 EMPLOYEE PAID FINAL (DATE) - CODED FOR IMMEDIATE DUMP**

- **257 EMPLOYEE PREV DUMPED - CASE NOW CODED FOR IMMEDIATE DUMP**
  These referrals are produced when a 991 is submitted to dump a case which has already been paid (or dumped with a retention period), but an immediate dump has now been processed.

- **034 EMPLOYEE PREVIOUSLY FILED FOR RRB BENEFITS**
Item 104 of AA-1 indicates that applicant previously filed for another RR Act benefit. Application has been accepted, but manual OP code has been entered to prevent payment. Obtain the claim file and document the claim file as explained in RCM Part 11, "Form G303 Instructions."

If no overpayment recovery is necessary from the employee annuity, change the manual OP code to zero.

- **009 EMPLOYEE’S RESEARCH RECORD NOT UPDATED WITH LATEST COL**
  RASI will generate this message in "spouse only" cases where the employee’s research record has not been updated with the latest COL increase. Dump the case and handle manually. If the employee annuity has not yet been handled for the latest COL, recertify the employee case to pay the COL increase.

- **317 EXCESS TAX REFUND PAYABLE**
  An excess tax refund may be payable if the employee is not vested. If a tax refund is payable, use Form G-357 as explained in RCM 8.6 and RCM 5.13.

- **052/062 FED EMP IN LAST (NEXT-TO-LAST) NON-RR WORK IS MISSING - 996 REQUIRED**
  Item 60 (65) of Form AA-1 has been keyed incorrectly or left blank. Obtain the correct answer either from the AA-1 or by contacting the district office, and enter it into RASI as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-4</td>
<td>Usual</td>
</tr>
<tr>
<td>5</td>
<td>&quot;0&quot; (zero). Space out unused positions.</td>
</tr>
<tr>
<td>6</td>
<td>&quot;1&quot; (YES), or &quot;2&quot; (NO) Space out unused positions.</td>
</tr>
<tr>
<td>7</td>
<td>&quot;EEFEDEMPAFTDLW&quot; (item 60) &quot;EEFEDEMP2&quot; (item 65). Space out unused positions.</td>
</tr>
</tbody>
</table>

- **363 406 FELONY INVOLVED - CASE DUMPED**
  The examiner has indicated to RASI on a 996 that there is a felony involved which will affect the payment of this case. See RCM 6.3.7, Prisoner Conviction Cases.
• 359 400 FELONY INVOLVED - SUBMIT 996 - IMPACT (SPAR) NOW ZERO

The applicant has answered "yes" to item 19 on the AA-1 or AA-3, the question regarding felony. Use RCM 6.3.7, Prisoner Conviction Cases, to determine the effect of the prisoner conviction on the annuity. When this determination is complete, submit a 996 as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-4</td>
<td>Usual</td>
</tr>
<tr>
<td>5</td>
<td>&quot;0&quot; (zero). Space out unused positions.</td>
</tr>
<tr>
<td>6</td>
<td>&quot;1&quot; (Clear call-up and continue processing.)</td>
</tr>
<tr>
<td></td>
<td>or</td>
</tr>
<tr>
<td></td>
<td>&quot;2&quot; (Dump case.) Space out unused positions.</td>
</tr>
<tr>
<td>7</td>
<td>&quot;EEFELONY&quot; or &quot;SPFELONY.&quot; Space out unused positions.</td>
</tr>
</tbody>
</table>

If processing can continue, consider re-entry of the partial rate.

• 211 G-88A.2 REQUIRED - TRACE

For non-advance file cases, this message will be released 45 days after the date the case entered RASI. For advance file cases, it will be released 45 days from the employee's date last worked for the railroad.

If the G-88A.2 is still outstanding and lag service is required for eligibility (see G-88A.2 instructions in RCM 9.2.10), trace as usual with Form G-234 through the district office in the railroad's area. The address of the railroad to which the G-88A.2 was mailed is shown on the G-230.

If the G-88A.2 is in file, submit the data to RASI to clear the 958 call-up.

If lag service is not needed to establish eligibility, notify P/P&S-RAC via e-mail message that the 958 call-up should be removed.

NOTE: If an application becomes delayed pending the receipt of the G-88A.2 and the employee has military service which may be sufficient to establish eligibility, message #212 - "Consider M/S Use," will also be printed. If it appears the military service may establish eligibility without the lag service, notify P/P&S-RAC via e-mail message that the 958 call-up should be removed. Notate the file that if the military service does not establish eligibility the lag service data should be traced.

• 306 G-325 DIS EFF YR GREATER THAN TRIC ABD YEAR
In disability cases, RASI will release a TRIC request, before receiving Form G-325, based on an assumed ABD. If the G-325 indicates a disability effective year later than the assumed ABD, RASI will drop its original TRIC request and request a new TRIC reply based on the disability effective date. Once this new TRIC reply is received, RASI will continue to process the case. Consider paying IMPACT rate pending TRIC reply.

- **075 HANDLE SUP MANUALLY - ACTIVATED**
  
  Manually award or deny supplemental annuity.

- **022 IMPACT RATE INVALID - RATE NOW ZERO - 911 REQUIRED**
  
  The partial rate entered on Form G-230 is invalid. Determine the correct partial rate and enter it into RASI.

- **018 113 IMPOSSIBLE CODE IN RECORD**
  
  Send the claim number to P/P&S-RAC via e-mail message, indicating the reason for the referral.

- **048 121 INQUIRY PER EXAMINER**
  
  A 991 was submitted requesting a computer printout of an annuitant's record.

- **006 INSUFFICIENT SERVICE***DENIAL****
  
  If employee has less than 120 months of service and no military service is involved, RASI will drop case. A mechanical match of employee's claim number with BCC's records indicates employee does not have sufficient subsequent service. If further service cannot be verified, deny annuity claim.

- **214 INTERNAL CODING ERROR - SPECIAL HANDLING REQ'D**
  
  Notify P/P&S-RAC via e-mail.

- **078 INVALID DATES FOR SETTLEMENT OR PAY FOR TIME LOST**
  
  Item 49 on the AA-1 is "YES," but 50 has been omitted or completed incorrectly. If the information is shown in documentation in file, enter the correct date on a 996 using the field name "EERR-SETTL-DATE." (Use spaces instead of hyphens.) Also correct the DLW and DRR if necessary. Otherwise, develop the information through the D/O. If item 49 should have been "NO," no further action is necessary. If the information is received after the case pays final and a settlement or pay for time lost is involved, the ABD can be no earlier than the last day of the period involved. If the ABD is affected, correct it and the DLW and DRR, if appropriate, and handle any overpayment as usual.

- **047 INVALID ENTRY FOR SETTLEMENT OR PAY FOR TIME LOST**
Item 49 is blank or "NO," but 50 contains valid dates. Determine whether a settlement is involved by checking documentation in file or by contacting the D/O. If there is a settlement, complete a 996 as follows to change the answer to item 49 to "YES": (Space out unused positions.)

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-4</td>
<td>Usual</td>
</tr>
<tr>
<td>5</td>
<td>&quot;0&quot; if blank (zero); &quot;2&quot; if &quot;No.&quot;</td>
</tr>
<tr>
<td>6</td>
<td>&quot;1&quot; (Yes.)</td>
</tr>
<tr>
<td>7</td>
<td>&quot;EERR-SETTLEMENT.&quot; Use a space instead of a hyphen, and space out unused positions at the end of the word.</td>
</tr>
</tbody>
</table>

If there is no settlement involved, and item 50 should have been blank, no further action is necessary. If the information is received after final payment, handle as for the previous referral.

- **377 LAG SERVICE NOT REQUIRED FOR ELIGIBILITY. 958 CODED ON G-230**

  RASI has determined that lag service is not required to establish eligibility, but the G-230 indicates that the D/O released a G-88A.2 for service information. RASI will not establish a 958 call-up, and will continue regular processing.

- **376 LAG SERVICE REQUIRED FOR ELIGIBILITY. NO 958 CODE ON G-230. RELEASE G-88A.2**

  RASI has determined that lag service is required to establish eligibility for a regular annuity, but the G-230 data indicates that the D/O did not release a G-88A.2 for service information. RASI will process the case as if the 958 code had been passed and pend for receipt of the G-88A.2 before releasing the TRIC request.

  Prepare a G-88A.2 (or 2, if the employee has two lag employers) for release to the railroad employer(s) shown in item(s) 34 (and 40) of the AA-1. See RCM 9.2.10, G-88A.2 Instructions, if necessary.

  If lag service is not required to establish eligibility for a regular annuity do not release a G-88A.2. Notify P/P&S-RAC via e-mail that the 958 call-up should be removed.

- **016 LEGAL PROCESS ISSUE – CONSIDER LEGAL PROCESS QUESTION – SUBMIT 996**

  This referral is generated when RASI first encounters a legal process case on the imaged file. The referral needs a response via a miscellaneous correction (996) in Keyprod. The screen needs to be completed as follows:
1. EE SSN
2. PAYEE CODE
3. CODE NAME – ee996 or sp996
4. EXAM NO – esa
5. PRESENT CONTENTS – L (lower case L)
6. CHANGED CONTENTS – If legal process is an issue and a partition or garnishment payment will be made, code this as Y. This will force RASI to dump the case and referral 030 is then generated.

   If a legal process payment will not be made or if legal process is not an issue, the CHANGED CONTENTS should be coded as N. The partial payment is restored mechanically and RASI will continue processing.

7. FIELD NAME – legalprocess

   • 030 LEGAL PROCESS APPLICABLE – MANUAL HANDLING REQ'D – CASE DUMPED

      This referral is generated when referral 016 is answered Y. Pay the case manually on ROC

   • 036 LEGAL PROCESS FOR INACTIVE MASTER FOUND

      This referral is generated if RASI encounters a number on the legal process list and the RASI master is inactive (paid final or dumped). Please check the Imaging system or the file to see if legal process applies. Take action if necessary. This referral serves as an alert and does not need to be cleared if no action is necessary.

   • 372 MARITAL STATUS MISSING OR INCORRECT - SUBMIT 996

      Item 9 of AA-1 omitted or keyed incorrectly. If the correct information can be obtained while the case is still active, submit it on a 996. Complete 1-4 as usual. Complete 5-7 as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>&quot;0&quot; (zero). Space out unused positions.</td>
</tr>
<tr>
<td>6</td>
<td>Enter &quot;1&quot; if EE is married. Enter &quot;2&quot; if EE is not. Space out unused positions.</td>
</tr>
<tr>
<td>7</td>
<td>&quot;EEMARTSTAT.&quot; Space out unused positions.</td>
</tr>
</tbody>
</table>
RASI issues this referral only once, and does not control for a reply. If the information is received after the case has paid final, use a G-59 to submit it to Research.

- **005 MORE THAN 4 PERIODS OF M/S. CONSOLIDATE OR HANDLE MANUALLY**

Neither RASI nor SEARCH can handle more than four separate periods of military service. When this message is released, a 996 call-up will be set and no TRIC request will be released until a change is made to the number of periods involved. A tracer message will be released every 30 days. Determine whether the M/S can be reduced to four or less periods, and, if it can, notify P/P&S-RAC via e-mail. Indicate the reason for the referral and give instructions for consolidation. P/P&S-RAC will make the necessary changes to permit release of the TRIC request. If the M/S cannot be consolidated to four or less periods, the case will require supervisor review.

- **088 M/S CREDITABLE AS COMP - NO M/S MOS - PAY MANUALLY**

Because M/S months overlap with RR service months, only M/S compensation can be used in the computations. RASI will dump the case and examiner should pay manually.

- **319 M/S DISCHARGE - REVIEW**

RASI generates the above referral and sets a man op code when an other than honorable discharge is indicated by the field. Review the service record submitted and determine M/S creditable as either wages or comp. Refer to RCM 5.4.33-34.

If M/S is creditable, clear the MAN OP CODE. If the entire period of M/S or any portion thereof is not creditable as either compensation or wages, determine how the G-90 is set to use M/S and allow the case to pay on RASI, or dump the case accordingly.

- **379 MS-INTERV-CODE MISSING OR INVALID**

RASI has no AA-1 data regarding intervening earnings after M/S in the period 6/15/1948 - 12/15/50. This affects one or more codes used in the SEARCH request. Obtain the correct answer to item 29 of the AA-1. Prepare a 996 for each voluntary MS period overlapping the 1948-50 time period. Complete items 1-4 as usual, and items 5-7 as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>&quot;0&quot;</td>
</tr>
<tr>
<td>6</td>
<td>&quot;1&quot; if EE had the earnings in question. &quot;2&quot; if EE did not.</td>
</tr>
<tr>
<td>7</td>
<td>&quot;MS-INTERV-EARN1&quot; if the earliest M/S period overlaps 6/15/48-12/15/50. (Use ending digits 2, 3 or 4 as appropriate for subsequent M/S periods.)</td>
</tr>
</tbody>
</table>
• 208 M/S REQUIRED FOR VDB ELIGIBILITY

RASI will drop case. The employee claimed more than one period of M/S or M/S extends beyond 12-56. See RCM 5.4.67A for complete instructions on handling this referral.

• 378 MS-V-48-50 MISSING OR INVALID

RASI has no data regarding voluntary M/S in the 1948-1950 period. Obtain the correct answer to item 28 of the AA-1. Submit a 996. Complete items 1-4 as usual, and items 5-7 as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>&quot;0&quot; (zero)</td>
</tr>
<tr>
<td>6</td>
<td>&quot;1&quot; if EE had voluntary M/S in the period 6-15-48 to 12-15-50. &quot;2&quot; if EE did not.</td>
</tr>
<tr>
<td>7</td>
<td>&quot;MS-V-48-50&quot; Use spaces instead of hyphens. Space out unused positions.</td>
</tr>
</tbody>
</table>

• 094 137 NAME OR ADDRESS CHANGE REQUIRED

A previous referral requested a specific name or address change. This referral is a tracer, indicating that the change has not yet been made. (A common error to be corrected is failure to include a ZIP code address entry.) Prepare a 997 if a partial award has not been made. If a partial payment has been awarded, prepare a 997 and G-607.

• 206 143 NAME/ADDRESS CHANGE OR REP PAYEE REQUIRED

Submit a 997 to correct RASI; if a partial payment is in force, also correct CHICO.

• 049 NCSP MAY APPLY - CHECK YOC

This message is generated when the employee answers "Y" for Non-Covered Service Pension on the APPLE Recurring Annuities Screen.

RASI automatically sets a man-op code once the TRIC request is released. This allows payment of the IMPACT rate entered on the APPLE summary screen but prevents final payment. Examiner action to clear the man-op code is necessary to allow for final payment.

Secure the Employee’s Creditable Service and Earnings Yearly Total Screen from EDMA. For each year of earnings on EDMA, determine if the employee can receive a year of
coverage (YOC). Refer to the instructions and chart in RCM 8.11, Appendix M to compute the YOC when determining the PIA reduction for an NCSP.

1. If the employee has at least 30 years of coverage (YOC), he/she is exempt from the modified benefit formula calculation required for NCSP cases. No further action is required and the man-op code may be cleared.

2. If the employee has less than 30 years of coverage YOC, follow the instructions indicated below:

If the YOC is less than 30, and the employee does not fit any of the exemptions listed in RCM 1.1.17, and the PSP has already been paid or is about to be paid (per RCM 1.1.18), dump the employee (and spouse if applicable) from RASI, calculate the NCSP reduction, and award the annuity on ROC. The information required to make these determinations is contained on Form G-209. Instructions for manual processing are in RCM 8.11.76.

- **411 933 REQUIRED FOR SPOUSE DIS**
  The AA-3 indicates that the spouse is filing based upon having the employee's disabled child in his/her care. Submit a 933 according to the instructions in RCM 9.2, after a disability determination has been made.

- **412 933 REQUIRED FOR SPOUSE PM**
  The AA-3 or AA-7 indicates that either the spouse or the employee has a previous marriage. Submit a 933 according to the instructions in RCM 9.2.

- **413 933 REQUIRED FOR SPOUSE DOM**
  The AA-3 or AA-7 indicates that the employee and spouse do not meet the one year marriage requirement as of the filing date. Submit a 933 according to the instructions in RCM 9.2.

- **414 933 REQUIRED FOR SPOUSE ELG**
  This will be printed with message 411 when the AA-3 indicates that the spouse is filing based upon having the employee's disabled child in his/her care. It will be printed alone when the AA-3 indicates that the spouse is filing based upon having the employee's minor child in his/her care. Submit a 933 according to the instructions in RCM 9.2, for "Retirement Applications."

- **415 933 REQUIRED FOR SPOUSE MEDICARE**
  This is printed in all AA-7 cases. Submit a 933 according to the instructions in RCM 9.2, for "Medicare Applications."

- **417 933 REQUIRED - TRACE**
Previously requested 933 data is still outstanding. Check previous referrals in file, or REQUEST Screen 22 to see what spouse information is required. (One or more of these items - DIS, PM, DOM, ELG, will be coded "4.") Submit a 933 according to the correct item instructions in RCM 9.2.

- **383 947 REQUIRED - FED EMP AFTER DLW-RR**

  The AA-1 indicates that the employee last worked for a federal agency. Check FOM1 225.35B to see if the federal agency is one for which earnings do not break a C/C:

  If it is, enter "1" according to the instructions in RCM 9.2 (C/C - Yes). After the case has paid final (or for manual final payment), it will be necessary to compute an indexed AMC.

  If it is not, make a C/C test considering the earnings as usual. Then enter the results according to the instructions in RCM 9.2, and no further action is necessary.

- **500 947 REQUIRED FOR C/C**

  This is produced when a current connection cannot be determined mechanically. Submit a 947 according to the instructions in RCM 9.2.

- **385 947 REQUIRED - NO C/C ASSUMED**

  RASI will produce this message when it appears that the employee has broken his/her current connection with the railroad industry. Make a C/C test and enter the results according to the instructions in RCM 9.2.

- **384 947 REQUIRED - POSSIBLE CANADIAN EMP**

  This message is produced when the AA-1 indicates that the employee may be a Canadian in the service of a U.S. employer in Canada. Check the employee's address. If he/she resides in Canada, check the instructions in RCM 5.5.7 regarding these employees then make the C/C test and enter the results according to the instructions in RCM 9.2. If he/she does not reside in Canada, make the C/C test and enter the results as usual according to the instructions in RCM 9.2.

- **382 947 REQUIRED - POSSIBLE DEEMED C/C**

  It appears that the employee has broken his/her current connection with the railroad industry, but the AA-1 indicates that the employee may be eligible for a "Deemed C/C" for supplemental and survivor annuity purposes. Evaluate per instructions in FOM1 225.45, and enter the results according to the instructions in RCM 9.2.

- **502 947 REQUIRED - TRACE**

  A current connection determination was previously requested, and is still outstanding. Submit a 947 according to the instructions in RCM 9.2.
• **503 948 REQUIRED FOR R/C**
  Board records indicate possible Redcap service. Submit a 948 according to the instructions in RCM 9.2.

• **504 948 REQUIRED FOR TR**
  Item 80 of the G-90 contains "RCU," indicating that railroad compensation may be in use at SSA. Submit a 948 according to the instructions in RCM 9.2.

• **505 948 REQUIRED - TRACE**
  Information regarding possible R/C or TR involvement was previously requested, and is still outstanding. Check previous referrals in file, or REQUEST Screen 12 to determine which applies, and submit a 948 according to the instructions in RCM 9.2. (If "REDCAP" is coded as "2," RC applies; if coded "3," TR applies.)

• **040 060 950 (951) REQUIRED ABD**

• **276 277 950 (951) TRACED ABD**
  RASI is requesting social security benefit data. This referral will be produced every 90 days until the benefit data has been submitted. See RCM 9.2 for instructions.

• **407 953 REQUIRED**
  This message was generated and a 953 call-up was set because the spouse indicated that (s)he previously filed an application with the RRB and the claim number of that application is not the employee's claim number. Submit a 953 as described in RCM 9.2.

• **408 953 TRACED**
  See instructions for "953 REQUIRED." This message will be produced every 30 days until the data has been received.

• **506 954 REQUIRED FOR PENSION - MS**
  or

• **508 954 REQUIRED FOR PENSION**
  Pension information is required before the supplemental annuity can be paid.

  When the message includes "MS," the Tier 2 rate shown may not include military service. Check REQUEST Screen 11, and, if the Tier 2 rate shown differs, use that Tier 2 to complete the annuity rate information on Form G-88p.
When the pension information is available, submit a 954 according to the instructions in RCM 9.2.

- **507 954 REQUIRED FOR PENS CD - MS**

  or

- **509 954 REQUIRED FOR PENS CD**

  Pension and closing date information is required before the supplemental annuity can be paid. When the message includes "MS," the Tier 2 rate shown may not include military service. Check REQUEST Screen 11, and, if the Tier 2 rate shown differs, use that Tier 2 to complete the annuity rate information on Form G-88p.

  If the pension information is available, submit a 954 according to the instructions in RCM 9.2.

- **510 954 REQUIRED FOR CD**

  Closing date information is required before the supplemental annuity rate can be paid. Submit a 954 according to the instructions in RCM 9.2.

- **511 954 REQUIRED - TRACE**

  Information required to pay the supplemental annuity was previously requested, and is still outstanding. Check previous referrals in file, or REQUEST Screen 12. (The status word SUP PENS will show "3" when only pension information is required; it will show "5" when both pension and CD information is required. Submit a 954 according to the instructions in RCM 9.2.

- **360 957 REQUIRED - PUBLIC SERVICE PENSION INDICATED - SPAR T1 NOW ZERO**

  RASI will generate this referral when item 104 of the AA-3 has been answered "Yes," or "G-208" is indicated on the G-230. If a SPAR was entered, RASI will zero out Tier 1, but will pay Tier 2. Consult RCM 1.3 to determine the effect the public service pension will have on the annuity, then complete a 957 screen according to instructions in RCM 9.2.9.

  The PSP reduction will be effective from the first day of the month if the month is within the accrual period for the RASI award or the ABD. The reduction will be the first reduction made in the spouse's gross Tier 1 amount. The amount of the reduction will be shown on the award form.

- **410 957 TRACED**

  See instructions for "957 Required - Public Service Pension Indicated." This message will be repeated every 30 days until the data has been received.

- **042 120 996 INPUT REQUIRED - CHECK PREVIOUS MSGS - EE (SP)**
This is a tracer referral produced when information previously requested in a referral message is still outstanding. 996 input is required to provide the information and clear the 996 call-up.

Check the file for a G-805 notice of rejected input or a previously unanswered referral message to determine what is required. If neither of these is available, review the status words on REQUEST Screen 12 (22) or the application for areas which may have required development (Status Word SWE(S)FELONY still shows "4"; application indicates federal employment, workers comp/public disability benefits; data for spouse RRA MAX test outstanding, etc.).

If there is nothing in the file to explain the cause for the referral, send an inquiry via e-mail to P/P&S-RAC.

- **368 996 REQ - CHILD CARE ITEM (123) MISSING**

Submit a 996 to furnish the answer to the AA-1 question. Complete items 1-4 as usual. Complete items 5-7 as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>Enter &quot;0&quot; (zero) in first block. Space out unused pos.</td>
</tr>
</tbody>
</table>
| 6    | Enter "1" if answer is "Yes."
       | Enter "2" if answer is "No."
       | Space out unused pos. |
| 7    | Enter "EEDISCHLDLW." Space out unused pos. |

- **261 996 REQ - FURN ANS TO CLAIM WITH OTHER AGENCY BASED ON M/S**

Submit a 996 to furnish RASI with the answer to item 30 of AA-1. Complete items 1-4 as usual. Complete items 5-7 as follows, spacing out unused positions:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>Enter &quot;0&quot; (zero) in the first block.</td>
</tr>
</tbody>
</table>
| 6    | Enter "1" if the answer is "Yes."
       | Enter "2" if the answer is "No."
| 7    | Enter "EEOTHMSBEN." |
• 370 996 REQ - PUBLIC DISABILITY ITEM 125 MISSING IMPACT NOW ZERO

Item 125 of the AA-1 is missing. When this has been omitted, RASI generates this referral and zeroes out the IMPACT rate. To prevent an overpayment, RASI assumes Public Disability is involved and also prints message #190, "WORKER’S COMP/PUBLIC DISABILITY DEVELOPMENT REQUIRED. IMPACT NOW ZERO." If P/D is involved, wait for message #191 to be printed after the rating data has been processed. Follow the instructions for that message. (#191 - DA RATED - WC/PD INVOLVED (MISSING). SUBMIT 996. IMPACT NOW ZERO.)

If P/D is not involved, complete a 996 as follows, spacing out unused positions. Complete items 1-4 as usual. Complete items 5-7 as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>&quot;1&quot;</td>
</tr>
<tr>
<td>6</td>
<td>&quot;2&quot;</td>
</tr>
<tr>
<td>7</td>
<td>&quot;EEPUBDISIND.&quot;</td>
</tr>
</tbody>
</table>

Re-enter IMPACT on screen 911.

NOTE: When PD is not involved, it is not necessary to wait for the rating to enter this data.

• 369 996 REQ - WORKER’S COMP ITEM 124 MISSING. IMPACT NOW ZERO

Item 124 of the AA-1 is missing. RASI will generate this referral and zero out the IMPACT rate. To prevent an overpayment, RASI assumes Worker's Comp is involved and also prints message #190, "WORKER’S COMP/PUBLIC DISABILITY DEVELOPMENT REQUIRED. IMPACT NOW ZERO." If W/C is involved, wait for message #191 to be printed after the rating has been processed. Follow the instructions for that message (191-DA RATED - WC/PD INVOLVED (MISSING). SUBMIT 996. IMPACT NOW ZERO.)

If W/C is not involved, complete a 996 as follows, spacing out the unused positions. Complete items 1-4 as usual. Complete items 5-7 as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>&quot;1&quot;</td>
</tr>
<tr>
<td>6</td>

• 512 998 REQUIRED FOR P/S

This message is released when the employee has claimed prior service on the AA-1. Submit a 998 according to the instructions in RCM 9.2, for "Retirement Applications."

• 513 998 REQUIRED FOR 120 MOS

This is released when an AA-6 has been filed, and Board records indicate that the employee has less than 120 service months on file. Submit a 998 according to the instructions in RCM 9.2, for "Medicare Applications."

• 514 998 REQUIRED FOR POA

This is released when the proof of age attached to an AA-6 has a weight less than 30. Submit a 998 according to the instructions in RCM 9.2, for "Medicare Applications."

• 515 998 REQUIRED - TRACE

Retirement Case - Prior service information which was previously requested is still outstanding. Submit a 998 according to the instructions in RCM 9.2 for "Retirement Applications."

Medicare Case - POA or service information was previously requested, but is still outstanding. Check previous referrals in file to determine which is applicable, and submit a 998 according to the instructions in RCM 9.2, for "Medicare Applications."

• 104 NO CURRENT CONNECTION

• 105 NOT CURRENTLY ENTITLED TO SUP

This message occurs when RASI is processing a SUP case and has determined there is no current connection. RASI will deny the SUP and generate code paragraph 406A to inform the employee of the denial.

• 223 NO REL OF RTS INFO FOR EE. GET G-88

This referral message occurs in spouse-only cases in which the employee was awarded a disability annuity under the provisions of the 1974 Act, the filing date was 12-31-76 or earlier, there is no ROR on file and the ee is not age 65 on the spouse’s ABD. Take action as outlined below, depending upon the revision date of the AA-1d on file.

1. Revision date of AA-1d is before 5-76
a. Instruct F/O to obtain Form G-88 from the employee. (See RCM 5.1.40.)

NOTE: Effective with a revision date of 10-92 or later, the Form G-346, Employee Authorization, includes a statement authorizing the Board to relinquish his/her rights when the annuitant's spouse becomes entitled to an annuity. If such is the case, a Form G-88 is not required. Continue with processing as described in -d- below.

b. Set a manual op code to hold the case from paying final until the G-88 is received.

c. Remove manual op code when G-88 is received.

d. An award message will be printed on the final award, saying to release an RL-13g.1 to the employee's last RR employer. If the spouse will not be paid final on RASI, the letter should be released when the G-88 is received.

2. Revision date of AA-1d is 5-76 or later, or revision date of G-346 is 10-92 or later.

For these cases, relinquishment of rights is automatic when the spouse becomes entitled to an annuity. No G-88 is required. An award message will be printed saying to release an RL-13g.1. Handle as described in #1-d, above.

NOTE: If the employee has submitted a signed statement to override the ROR clause on the AA-1d, handle the case as described in #1a-d, above.

- 026 NO SERVICE REPORTED AFTER 1936

RASI will not drop case. The cause of this referral is often an incorrect SS number. If this is the case, dump application, verify number, and resubmit case to RASI under correct number. If 120 months of service cannot be verified, deny annuity application.

- 003 NOT DISABLED - DENIAL

RASI will drop a case when a G-325 is coded "not disabled," and applicant is not eligible for an age and service annuity. Prepare denial letter.

- 354 NOT DISABLED - WILL PROCESS AS A&S ANNUITY - SUBMIT NEW IMPACT

If an EE filing for a D/A is denied, the case can convert to A&S processing based on the age and service information in file. (If the EE is ineligible for an A&S, or if the EE is entitled only to a reduced annuity, and has indicated on the AA-1 that this is not acceptable, the case will be dumped as usual.) If the DRR is missing, RASI will use the filing date in its place. If TRIC has been requested, a new TRIC request will follow the reply to the previous. Unpaid IMPACT data will be zeroed out. A review message will appear on the award form. Re-enter IMPACT rate on 911. Release a letter to the applicant stating that the disability application has been denied, but that (s)he will now be considered for an age and service annuity.
• 217 147 NOT ELIGIBLE FOR HIB - DENIAL

Deny AA-6 or AA-7.

• 200 NOTIFY RESEARCH - EMPLOYEE COMPUTATIONAL DATA MISSING 932 CALL UP

The absence of a G-90 date on a manual employee conversion award produces this message. Route this referral to Research with the folder. Research will secure correct G-90 tape to update record.

• 004 150 SUBMITTED SUPP PREVIOUSLY PAID (DATE) CASE DUMPED

150 data was submitted for a case in which the supp has already been paid.

• 207 183 PAM INDICATES SS BENEFIT - NO RECORD ON MBR

PAM has received a SSADTS transmission indicating SS entitlement, thereby triggering RASI to request social security benefit data even though the G-90 shows "NO MBR ON FILE."

The referral will be produced only once, however it will generate a 950/951 call-up which will not clear until the data is submitted.

• 226 148 PARTIAL RATE INDICATED ON G-90

TRIC shows that the SS benefit being paid is a partial rate. Determine the correct SS benefit rate and enter the data.

• 201 POA EMPLOYEE/ 202 SPOUSE/ 203 CHILD/ 204 PROOF OF MARR REQUIRED - NOT YET RECEIVED HQ

These proofs have not yet been entered into RASI. Secure proofs and submit a 900. These tracing referrals will be produced every 60 days until the proof is submitted. Note: If a spouse has filed on the basis of a disabled child, or if the spouse is entitled without a minor child in care, do not submit POA. Take action described in the instructions for the reject referral "CHILD DOB DOES NOT MATCH CLAIMED DOB" in RCM 9.3.14.

• 080 POSSIBLE AERO RECOMP - PAY SPOUSE MANUALLY

This referral messages is produced in spouse-only cases when the employee Research record has been updated with RECOMP PIA's and the spouse has an ABD prior to the updated year. Since RASI would calculate the spouse's annuity from her ABD, based on the RECOMP PIA’s RASI will dump the case to avoid a possible overpayment.

• 209 163 POSSIBLE DUAL SOCIAL SECURITY
Two or more TRIC requests have been received, each with rate and date information and each for a different account number. Secure the correct social security reduction amount and submit the data.

- **096 POSSIBLE DUPLICATE EARNINGS - SPECIAL HANDLING REQ’D**

  This referral is produced in cases involving a BA number which has known reporting problems having wages posted to a problem year (see RCM 9.3, Appendix E, Duplicate Earnings Table for a current list of these BA numbers). For handling instructions, refer to RCM 9.14.110, POSSIBLE DUPLICATE EARNINGS BA 9999.

  Item 18 of the AA-1 has been answered "Yes," indicating that there may be a court order in effect which could affect how the annuity should be paid. A manual op code has been set to prevent final payment, and, if an IMPACT was entered, it has been zeroed out. No partial payment should be made at this time.

  When the G-90 is received, forward the case to the BCS for their action. If necessary, they will dump the case for manual payment. However, if their records indicate that no special action is required, i.e., there is no court order on file at the Board, they will return the case indicating so. Clear the man op code and allow the case to process as usual.

- **024 POSSIBLE RED CAP SERVICE**

  This referral is produced when a Code 1 is entered in the "RC" box on a 948 causing RASI to dump case.

- **051 POSSIBLE W/D - NO SPAR**

  To avoid possible overpayments, RASI will not pay a partial rate in cases where excess earnings are indicated.

- **229 151 POST-ENTITLEMENT ACTION REQUIRED**

  This referral indicates that SSA is taking some action to adjust benefit rates. Secure correct rate before submitting the data.

- **002 PROOF OF MS REQUIRED - ABANDONMENT WILL OCCUR IN 30 DAYS**

  This referral is produced 30 days after RASI initial call-up for proof of military service has expired.

  If military service is needed for ELIGIBILITY, this referral will be produced. If military service has not been entered 30 days later, the referral will be abandoned and RASI will process case without military service.

  If the military service has not been entered within 30 days, this referral will not be produced. RASI will process case without military service. Screen 12 of REQUEST will show: M/S – 2 CLAIM ABANDONED.
• 031 PROOF OF M/S SUBMITTED, M/S PREV ABANDONED

A 900 with proof of M/S was entered into RASI, but the information was rejected because it came in after the call-up for M/S was abandoned. RASI will process the case without M/S. Control the case to include after the award. If it is required for eligibility, dump the case and handle it manually.

• 021 RATED 2A4 NO C/C 307 CASE NEEDS TO BE RATED 2A5

If current connection determination is correct, send case to DPS to determine if a total and permanent disability rating is possible. RASI will set a 60-day call-up for receipt of a G-325 and continue this call-up until some disability rating is received. If a total and permanent disability rating is granted, RASI will continue to process case. If a total and permanent disability rating is denied, RASI will dump claim.

• 053 124 REPRESENTATIVE PAYEE NOT YET NAMED

There is an indication on the annuity application or on the G-325 that there is a representative payee involved in the case. Prepare a 997 to enter representative payee information into RASI.

If there is an input error or some other incorrect designation of representative payee prepare a 997 to discharge representative payee.

• 001 109 REQUESTED DUMP OF RECORD

A code 9 was entered in the "other benefits" item (#4) of the re-entry data screen causing RASI to drop case.

• 001 109 REQUESTED DUMP OF RECORD - APPLICATION CANCELLED (CLAIM ABANDONED) (INCORRECT SSA NUMBER) (MANUAL PARTIAL AWARD) (NOTICE OF DEATH) (OVERPAYMENT COULD OCCUR) (REASON UNKNOWN)

A 991 was submitted requesting dump of record for one of the above reasons.

• 001 REQUESTED DUMP OF SUPPLEMENTAL ANNUITY ONLY

A 991 was submitted requesting dump of the SUP ONLY.

• 079 SEARCH REPLY - NO MATCH ON ACCOUNT NUMBER

• 065 COMPUTER GENERATED DUMP

• 063 VERIFY THAT ACCOUNT NUMBER IS CORRECT

The social security number on the AA-1 does not match that in DCC’s records. RASI will dump the case. Verify the account number. If the number in DCC’s records is correct,
correct the AA-1 and have it re-entered. If DCC's number is incorrect, send case to DCC for handling.

- **055 125 SELF-EMPLOYMENT INDICATED - MANUAL OP CODED 2**

  **032 116 MANUAL OP CODED 2**

  Applicant claims self-employment, and the field office has determined that BRB examiner review and determination is required. Investigate the nature of the employment. If the employment is determined to be self-employment, submit a 995 to change manual OP code to zero. Enter an IMPACT or SPAR rate if appropriate.

  If the employment is determined to be LPE (e.g., business is incorporated), notify the applicant of the determination. Notify P/P&S-RAC via e-mail that the SE and LPE fields must be corrected, so that LPS work deductions are properly considered. After these changes are verified, (see REQUEST screen 14 or 23,) submit 995 to change the manual op code to zero. If desired, it is also possible to dump the case and include LPE work deductions in the manual award.

- **012 SPAR RATE INVALID - RATE NOW ZERO - 911 REQUIRED**

  The partial rate entered on Form G-230 is invalid. Determine the correct partial rate and enter it into RASI. Do not exceed the current Tier 1 and/or Tier 2 maximums.

- **219 SPOUSE CALCULATION ERROR - SPECIAL HANDLING REQ'D**

  Notify P/P&S-RAC via e-mail.

- **142 SPOUSE DUMPED WITH EMPLOYEE**

  This referral results from a 991 coded to dump both employee and spouse.

- **286 SPOUSE ONLY - EE PAID UNDER O/M - SPOUSE DUMPED**

  If the Research record indicates that the employee was paid under the O/M, RASI will not pay a spouse-only award.

- **182 SPOUSE ONLY - EE TIER TWO RECOMPUTED - SPOUSE DUMPED**

  RASI cannot calculate the spouse's annuity because Research records indicate the employee's tier two was recomputed due to service after his or her ABD. Pay the case manually.

- **033 SPOUSE ONLY - NO MATCHING RESEARCH RECORD**

  Spouse application has been entered into RASI, but Research does not yet have employee's record. Spouse will be held in RASI until it can be matched to employee's record. If it is necessary to expedite payment, dump the case and handle manually.
message can also occur when the employee's application, submitted separately, has rejected.

- **260 SPOUSE PAID FINAL (DATE) - CODED FOR IMMEDIATE DUMP**

  A dump request has been received which will remove the spouse from the RASI master file, regardless of the remaining retention period.

- **259 SPOUSE PREVIOUSLY DUMPED - CASE NOW CODED FOR IMMEDIATE DUMP**

  This referral is produced when a 991 is submitted to dump case which has already been dumped from RASI with a retention period. The case will now be removed immediately.

- **069 SPOUSE PREVIOUSLY FILED FOR RRB BENEFITS**

  Item 101 of AA-3 indicates that applicant previously filed for another RR Act benefit; e.g., a spouse is receiving a widow’s benefit. Application has been accepted, but manual OP code has been entered to prevent payment. Obtain the claim file and document the claim file as explained in RCM Part 11, "Form G303 Instructions."

  If no overpayment recovery is necessary from the spouse annuity, change the manual OP code to zero.

- **029 SPOUSE PREVIOUSLY TIERED; SPOUSE DUMPED*REX***

  Research records show the spouse is in either final pay status or terminated pay status with the year and month of termination less than 12 months prior to the current filing date. Examiners should review this case and, if an annuity is payable, be sure that the ABD does not retroact to the period when the other annuity was being paid.

- **177 SPOUSE RRA MAX MAY APPLY**

  RASI issues this message in a spouse case when the information currently available indicates that the RRA maximum applies. Manually test for the RRA maximum. Use the G-354.4 (PC) or ROC for folder documentation. Submit a 996 to enter the reduction amount for the tier II if the max applies, or to inform RASI there is no tier II reduction. The 996 can also be coded to produce a COMPUTE ONLY Award when the total RRA maximum reduction exceeds the spouse tier II.

  The FAMC can be secured from Rate History Inquiry (PREH), screen 3300 (RHEE) AMC 6. If AMC 6 shows 0000.00, the folder must be requested. Once received, find the FAMC on the G-90, correct PREH using the on-line correction system and submit the 996.

  Complete items 1 and 4 as usual. Complete items 2-3 and 5-7 as follows:

<p>| Item | Entry |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>Enter &quot;2.&quot;</td>
</tr>
<tr>
<td>3</td>
<td>Enter Spouse's code name.</td>
</tr>
<tr>
<td>5</td>
<td>If entering the amount of reduction for tier II, leave this item blank. Otherwise, enter &quot;4&quot; in the first block. Space out unused positions.</td>
</tr>
<tr>
<td>6</td>
<td>If entering the amount of the reduction for tier II, enter the dollar and cents amount in the first six blocks, using leading zeroes if necessary. For example, if the reduction amount is $40.70, the entry would be &quot;004070.&quot; RASI will reduce the spouse's tier II by the amount entered and pay the case final. If the RRA MAX does not apply, enter &quot;2&quot; in the first block. RASI will pay the case without a reduction. If the total RRA maximum reduction exceeds the spouse tier II, enter &quot;1&quot; in the first block. This code will generate a &quot;COMP ONLY&quot; G-355 showing &quot;RRA MAX&quot; in &quot;REMARKS.&quot; It is necessary to pay the spouse and adjust the employee annuity manually to avoid employee overpayment. For each of these responses, space out the unused positions.</td>
</tr>
<tr>
<td>7</td>
<td>If entering the amount of reduction for tier II, enter &quot;RRAMAXRED.&quot; Otherwise, enter &quot;SPRRAMAXCD.&quot; Space out unused positions.</td>
</tr>
</tbody>
</table>

- **287 SPOUSE SSA NO EQUAL TO ZEROES**

This message is produced if the spouse's SSA number is omitted from the AA-3. RASI will set a manual OP code to prevent payment. Submit a 996 to change the manual OP code from 2 to zero (SWSMANOP); this will clear both the 996 call-up and the manual OP code. RASI will then continue processing the spouse award. However, without a spouse SSA number, RASI will not be able to make a TRIC AUX request; therefore, the spouse's wage record will not be considered in the annuity computations.

Do not request the field to secure the spouse's SSA number, as it will be submitted when received. If the SSA number is received before the case has paid final, enter it into RASI with a 996 (SPSSANO). If the number is received after the case has paid final, send it to Research on a G-59. Request a G-90 under the spouse's SSA number if there is any indication spouse has a wage record and make any necessary annuity adjustments.

- **066 SPOUSE SSA NO INVALID**

- **068 SP MAN OP CODED 2**
086 THIS CONDITION PROHIBITS RELEASE OF TRIC REQUEST

The spouse's SSA number, as entered on the AA-3, is an incomplete or impossible number. The correct SSA number is required for RASI to be able to secure a TRIC reply. Submit a 991 coded with a "7" to dump the AA-3 from RASI, then forward the case to PES for re-entry.

- 083 SPOUSE TOO YOUNG FOR BENEFIT CLAIMED

RASI will drop case. Examine the folder for correct data. If there is incorrect data and spouse could qualify for an annuity, pay case manually.

If EE has 360 SM on EDM, but his annuity was paid based on less than 360 SM on the ABD, do not deny the spouse application. See FOM1 207.12.6 for handling.

- 420 SPOUSE TRIC O/S 90 DAYS OR MORE

Refer case to your supervisor.

- 419 SPOUSE TRIC REPLY O/S 60 DAYS. REQUEST DATE (       )

Release a G-60s to trace on the appropriate TRIC reply, using the instructions in RCM 9.1 for that form. If a partial rate can be paid and one was not previously entered, consider entering one now.

- 227 149 SSA BEN ON ANOTHER NUMBER CHECK FILE

The annuity application indicates the annuitant is claiming SS benefits under another person's SS number. If necessary, request an MBR for this other number to secure correct benefit data. Submit a 950 or 951 to enter it into RASI.

- 274 166 SSA ENT INDICATED BUT NO SS RATE

TRIC indicates entitlement, but shows no benefit rates. Secure correct rates and submit a 950/1.

- 295 169 SSA RATE DECREASE

296 170 INVESTIGATE POSSIBLE SSA WORK DEDUCTION

This message appears when the SSA MBR shows a decrease in rate in the award accrual period. When this referral message is shown, RASI will use the full SS benefit when making final payment.

A decrease in the SS benefit rate could be due to a change in entitlement (e.g., DIB adjusted to age reduced RIB because of recovery from disability) but more commonly is due to:
- Work deductions applied to the SS benefit; or
- Recovery of an SS benefit by partial withholding; or
- A worker's compensation offset in the SS benefit.

The following is a list of the situations which may cause this referral and the action to take when they are encountered.

1. SSA W/D's shown on RR-1a or SOLAR award in file. No action necessary.
2. SSA deferred O/P recovery. No action necessary.
3. SS benefit offset for Worker's Compensation. Recertify to use SS rate payable.
4. Rate decrease is because of an SS entitlement adjustment. Recertify to use the correct SSA rate.
5. No SS information in file - G-90 LAF Code is "C." Secure an MBR to determine why SS rate decreased and handle as shown above.

If there is no RR-1a or SOLAR award in file and LAF Code "E" is shown on the G-90, check POLO for SS payment activity and take appropriate action.

- 041 119 STATUS WORD CODING ERROR - SPECIAL HANDLING REQ'D
  Notify P/P&S-RAC via e-mail.

- 058 127 STILL SELF-EMPLOYED INDICATED - MANUAL OP CODE 2
  Investigate the self-employment to determine whether or not it is LPS. If self-employment is determined, prepare a 995 to change manual OP code to zero. If LPS is determined, notify the applicant of the determination. Dump the case and include LPS work deductions in the manual award.

- 309 SUBMIT 996 TO VERIFY PENSION BA NO
  This referral may occur in both pension and non-pension cases whenever it appears that RASI has a missing or discrepant BA number. For instance, this message will be produced if the BA number shown on the annuity application does not agree with that shown on the 954 data or if RASI receives a 954 with a code 8 and the annuitant indicated (s)he was receiving a pension on the annuity application; or if the Research file does not contain the employee's BA number.

  Submit a 996 to enter the correct pension BA number into master record using the field name "SUPBANO." Leave item 5 blank.
Note: In SUP attainment cases the RASI master does not contain the ee’s code name because that is not a Research field. If the code name is not shown in the referral data, leave item 3 blank. Space out unused positions in items 6 and 7.

- **193 SUBMIT RESTORATION DATE**

RASI generates this message and sets a 996 call-up in dual spouse cases after the 953 call-up has been cleared. The 953 call-up is cleared when RASI receives the reduction amount for the spouse’s own Tier 1 based on his/her own employee annuity. After receiving this reduction amount, RASI requests the Tier 2 restoration date.

When this date is received, RASI will use the earliest amount entered on the 953 as the restoration amount, and will apply the appropriate COL increase. Complete the 996 as follows, spacing out the unused positions:

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-4</td>
<td>Usual</td>
</tr>
<tr>
<td>5</td>
<td>Enter &quot;00000000&quot; (eight zeroes)</td>
</tr>
<tr>
<td>6</td>
<td>Enter the restoration date in CCYRMODA order.</td>
</tr>
<tr>
<td>7</td>
<td>Enter &quot;SPT2RESTOREDT&quot;</td>
</tr>
</tbody>
</table>

This referral will be traced every 30 days until the data is received.

- **265 SUBSEQUENT SERV INDICATED - DLW PRIOR TO 1937**

BDP’s record indicates subsequent service but the annuity application shows a DLW prior to 1937. Investigate claimed DLW. If correct, submit a 996 to correct DLW. (EEDLWRR)

- **025 SUP ACTIVATED - EMPLOYEE DECEASED - CASE DUMPED**

This referral occurs when RASI receives a 150 to pay the SUP ANN but the regular annuity has been terminated. RASI will reject the 150.

This message is produced if the employee has 30 or more years of service and is age 60-64 or has 25 or more years of service and is age 65 or older and the case has been dumped for manual action. Review the file for supp entitlement and take the necessary action to pay or deny the supplemental annuity.

- **518 SUPP ACTIVATED - MANUAL ACTION REQUIRED**

This message is produced if the employee has 30 or more years of service and is age 60-64 or has 25 or more years of service and is age 65 or older and the case has been
dumped for manual action. Review the file for supp entitlement and take the necessary action to pay or deny the supp ann.

- **091 TAKE ACTION TO CLEAR 946 CALL-UP**
  
  The employee's application was filed at least three months ago, and the case is still pending "946 - SEARCH" for identification in our records. Follow the instructions for "Name Reconciliation Required." TRIC cannot be requested until this has cleared.

- **356 (357) TIER I (TIER II) RATE INVALID - 911 REQUIRED IMPACT NOW ZERO**
  
  Tier I (II) component on G-230 or 911, exceeds maximum or is otherwise incorrect. Submit correct 911. Show all three components of rate. If any one field is invalid, the others remain zero.

- **077 TRACE - TWO EMPLOYERS INDICATED**
  
  One or both G-88A.2's is still outstanding, and this case will not go out for TRIC clearance until it is received and submitted on a 958. Trace with the D/O in the railroad area.

- **520 TRIC O/S 90 DAYS OR MORE**
  
  Refer case to your supervisor.

- **084 TRIC REGENERATED: INITIAL TRIC REQUEST'S RECORD TYPE DIFFERENT FROM RECORD TYPE EVALUATED FINAL**
  
  This referral is produced when RASI regenerates a new TRIC request because of a change in the type of annuity after the initial TRIC request is evaluated. No examiner action is necessary.

- **519 TRIC REPLY O/S 60 DAYS. REQUEST DATE ( )**
  
  Release a G-60a to trace on the TRIC reply, using the instructions in RCM 9.1 for that form. If a partial rate can be paid and one was not previously entered, consider entering one now.

- **263 TRIC REPLY - TERMINATED BENEFIT**
  
  TRIC shows that the SS benefit for the annuitant has been terminated. Review the file, secure the correct SS benefit information, and submit to RASI.

- **101/111 TRIC REQUEST REPLY EQUALS ALL "9's"**
  
  The current rate and/or current date equals all "9's." Any one of the five previous rate or date fields equals something other than all zeros or all "9's." Secure the correct SS benefit information and submit the data.

- **013 TRR DUAL SOC SEC BENEFIT**
A TRIC reply was received by RASI with a "D" code indicating the annuitant has two SS benefits. RASI could not convert the case mechanically. Recertify the case to enter the correct SS rate and code into Research's record.

- **074 TWO LAG EMPLOYERS INDICATED**

  The AA-1 indicates two employers in the lag period and a 958 call-up has been established for lag service to establish eligibility. When both G-88A.2's are received, prepare a 958 to submit this information.

- **056 UNABLE TO SET SPOUSE ABD: SUBMIT SPARFORCE 996**

  This referral is produced when RASI is unable to determine the spouse's ABD when trying to pay a SPAR generated mechanically, by the examiner, or by the D/O. Pay the SPAR in these cases by submitting a 996 as shown in the instructions, RCM 9.2, Exhibit 9.

- **194 UPDATED 953 REQUIRED**

  This message will be generated in dual spouse cases when RASI has a date-break in the spouse annuity that is after the latest date break that was shown on the 953. For example, if the latest date shown is 10-1-90 and the case is still pending 2-1-91, RASI will have a date break of 1-1-91 for the COL increase. Therefore, you must submit a new 953 with the same data that was on the original plus the appropriate rate for 1-1-91. A 30 day call-up will be set and a tracer referral will be generated after that period.

- **228/150 WIDOW BENEFITS**

  This is an informational referral indicating the type of benefit annuitant is receiving. Submit a 950/1 with correct benefit data.

- **358 VDB RATE INVALID - 911 REQ - IMPACT NOW ZERO**

  VDB component on G-230 or 911 exceeds maximum or is otherwise incorrect. Submit corrected 911. Show all three components of rate. If any one field is invalid, the others remain zero.

- **190 WORKER'S COMP/PUBLIC DISABILITY DEVELOPMENT REQUIRED-IMPACT NOW ZERO**

  On the AA-1, the EE has indicated entitlement to either worker's compensation or public disability (Megacap) benefits. RASI has zeroed out the IMPACT rate to prevent an overpayment. If a WC or PD offset may apply, secure the AMW PIA 1 if it is an AIME case. Also determine the actual or estimated earnings and compute the required offset amount. See RCM 8.5 for details.

  No immediate action is required of the examiner other than the offset development until and unless the EE is rated disabled. If the EE is rated disabled, message #191 will be
produced. ("DA RATED - WC/PD INVOLVED (MISSING) SUBMIT 996 - IMPACT NOW ZERO.") See the instructions for that message when you receive it.

This message is also produced when one or both items on the AA-1 have been left blank.

- **192 WC/PD INVOLVED - CASE DUMPED**

  The examiner has indicated on a 996 that a worker's compensation or public disability offset must be made. Pay the case final manually.

- **240 162 WRONG SSA NO IF CORRECT CHANGE MANUAL OP CODE TO ZERO**

  A TRIC reply contains discrepant identifying MBR data such as DOB, sex, etc., or possibly an incorrect claim number. Verify the SSA number involved and correct it on RASI if necessary. (The employee SSN field name is "SSANO." The spouse SSN field name is "SPSSANO." If the number is other than one of these, refer the claim number to P/P&S-RAC via e-mail.) Once the SSN is correct on REQUEST, submit a 995 to clear the man op.

  If the SSN is correct, and the error is in some other field, and thus will not affect payment, submit a 995 to clear the man op.

### 9.3.14 Employee And Spouse Award Messages

The following messages will appear on RASI award forms (G-354R and G-355R).

**ABD LATER THAN PARTIAL COMPUTE ONLY**

RASI prints this message to indicate it cannot handle a case where the final ABD is later than the partial payment ABD, resulting in an overpayment. Handle manually.

A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

**ADJUST MANUALLY WHEN SPOUSE AGE 62**

This message is produced for spouse cases in which the employee, an '83 law year 60/30 annuitant, has attained age 62 and has been recertified with a recalculated PIA 1. However, the spouse is not yet 62, and thus cannot be paid yet with the recalculated PIA. If the spouse will attain age 62 within 90 days of the RASI award, control the case manually for recertification. If not, it will be called up mechanically.

**ADVANCE FILE CASE**

This message is printed for an employee or dual spouse case when the date last worked for the railroad is later than the filing date. This is not a review message.

This message does not require review. Examiner action is not necessary.
APPLY PERMANENT W/D FOR PRIOR YEAR

Temporary work deductions (TWD's) have been applied in a year prior to the current (voucher) year and ceased prior to the award date (end of initial accrual period). If TWD's have been withheld for any period during the current (voucher) year, the annuity will be policed for current year LPE work and/or earnings. LPE work and/or earnings for the previous year will be processed when current year permanent work deductions are assessed. If TWD's have been withheld and restored correctly, no additional action is required at this time.

If the annuity will not be policed for current year LPE work and/or earnings estimate (no TWD's withheld since December of prior year) forward case to RPS to make the final work deduction adjustments for the previous year.

ASSUMED NOT VESTED

This message appears in 60/30 employee cases where a quarterly breakdown is needed for the 1937-1950 period to determine if the employee is vested.

RASI has paid this case final and issued any tax refund payable, assuming the employee is not vested. When CESC secures the quarterly breakdown for the 1937-1950 period, a new G-90 with a vesting determination will be produced. If the employee is vested, the G-90 will be sent to CESC and then to Imaging. If the employee is not vested, the G-90 will just be sent to Imaging. No examiner action is required unless the employee is vested. In this event, any tax refund paid by RASI should be recovered from the vested dual benefit accrual.

This message does not require review. Examiner action is not necessary.

CHECK ABD - INJURY SETTLEMENT OR PAY FOR TIME LOST INVOLVED

Items 51 and 52 indicate that this employee received compensation for one of these two situations. RASI will consider the "TO" date in item 52 when setting the ABD, and will not set it earlier than that date.

Compare the "TO" date in item 52 with the DLW in item 11 of Form G-88A.2, if applicable, and item 40 of the AA-1. The corrected DLW-RR should be the latest of these. Review the documentation in the file to verify that the DLW-RR and ABD is correct.

CHECK EE DATE OF BIRTH

RASI prints this message when the probative value of the document used to verify the claimed date of birth is 30 or less. Compare the established date of birth with that shown on other file material (i.e., SSA MBR on Form G-90 or MOR's) to rule out conflicting evidence.

CHECK FOR POSSIBLE ENTITLEMENT BASED ON MINOR CHILD PRIOR TO CURRENT ABD

The spouse was paid based on age, but item 27 on the AA-3 indicates a minor child, unmarried and less than age 18. Investigate for possible earlier ABD or one-payment-only.
CHECK RRA MAX APPLICATION: PSP INVOLVED AFTER ABD

An RRA MAX reduction has been applied to the spouse's Tier 2, and a PSP offset applies in Tier 1 effective sometime after the spouse ABD and prior to the final award date. The RRA maximum must be redetermined when the spouse becomes entitled to a PSP subsequent to the annuity beginning date. Take appropriate action to retest the RRA maximum per RCM 8.6 G-354.4 and adjust spouse tier 2 and EE tier 2 and/or supplemental annuity if applicable.

This message is obsolete.

CHECK SPOUSE LAW YEAR

During the implementation of the 1983 Amendment provisions, some RASI employee disability awards were not coded correctly as '83 law year cases. As a result, the spouse may have been incorrectly paid under the '81 Amendments. Review the law year determination and adjust the spouse if necessary.

CHECK TWD FOR PERIOD BEFORE FULL RETIREMENT AGE

RASI will print this review message when the annuitant was full retirement age or older on the filing date. Therefore, RASI did not apply TWD's in this case. Review case to see if TWD's should have been applied to the period prior to full retirement age attainment.

CHILD ATTAINS AGE 18 - BENEFIT TERMINATES (DATE)

This message appears on a G-355R to inform examiner that child will attain age 18 within 90 days of award date. Control the case to insure that correct termination action is taken effective with the month the child attains age 18.

The RIS supervisor controls the case to ensure that the benefit is terminated timely. No examiner review required.

CHILD CARE DROP-OUT MAY APPLY

This message occurs in employee disability annuity cases in which the ABD is 7-1-80 or later and the employee is under age 37 in his ABD year. The 1980 Disability Amendments provide for the inclusion of an additional drop-out year in the computation of the employee's PIA's 1, 3, and 9 if he or she had a child under age 3 in any year used in computing the PIA and he or she had no earnings in that year. Refer to RCM 4.7.120 for instructions on how to develop a possible child care drop-out year.

COMPUTE ONLY ABD OR AWARD DATE, AND CALCULATED ACCRUAL INCONSISTENT

This G-354R or G-355R message indicates that RASI has attempted to pay an amount accrued prior to the ABD or after the award date. Review calculations and voucher award manually. Prepare a full set of award forms.
A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

**COMPUTE ONLY BUSI EXCEEDS ACCRUAL**

This G-354R message indicates that RASI cannot pay an annuity because the BUSI deductions exceed the annuity accrual. Handle manually. Prepare a full set of award forms.

A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

**COMPUTE ONLY EE C/O**

This message appears on a spouse award form whenever a "compute only" message appears on the employee award. Handle spouse case manually, along with employee. Prepare a full set of award forms.

A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

**COMPUTE ONLY MECHANICAL ZERO ANNUITY RATE**

This message will be printed on the award form in spouse cases where the annuity rate computed by RASI is zero. Release an award letter. Prepare a PREH update award. When all action has been taken, forward case to "TCIU". Note on the G-26 "ZERO RATE CASE".

A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

**COMPUTE ONLY ONE PAYMENT ONLY**

This message is printed on the G-355R when a spouse annuity should be terminated during the accrual period (e.g., spouse's last child attains age 18). Pay spouse manually. Complete a full set of award forms.

A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

**COMPUTE ONLY PARTIAL EXCEEDS FINAL**

The partial (IMPACT or SPAR) rate exceeds the final rate, and cannot be recovered from the accrual check. Handle manually. Prepare a full set of award forms.

A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

**COMPUTE ONLY RRA MAX AMOUNT EXCEEDS SPOUSE TIER TWO**
This message appears on the G-355R when the RRA maximum reduction amount is greater than the spouse's Tier 2. However, if an employee award is also pending, that award will also be a compute-only, and the same message will appear on the G-354R.

In either case, retest to see if the RRA Max Applies. (Test at both the ABD and the Tier 1 effective dates, if they are different.) If the RRA Max does not apply, pay the award(s) final manually.

If the RRA Max applies, check to see if the total family benefit will be less as a result of the spouse's filing; i.e., total of employee and spouse annuities with reductions for RRA Max is less than total annuities payable to employee without a reduction for the RRA Max. If the spouse's filing does not result in a reduction in the total family benefit payable, pay the award(s) manually. If the employee is already in final pay status, adjust that annuity for the RRA Max, and recover any overpayment in the usual manner.

If the total family benefit is less due to the spouse's filing, contact the appropriate district office. Give the relevant facts and request a cancellation of the spouse's application. Hold finalization of the employee's award, if pending, until the reply is received. If the spouse chooses not to cancel the application, pay the award(s) final manually, applying the RRA Max reduction to both. If the employee is already in final pay status, adjust the annuity for the RRA Max and recover any overpayment in the usual manner.

If the spouse does cancel the application, handle according to RCM 5.1.

For whichever course of action applies, prepare a full set of award forms for each compute-only award which will be paid manually.

This message is obsolete.

**COMPUTE ONLY TOO MANY DATEBREAKS**

This message appears on the award form when the number of rate changes exceeds the number of rate changes RASI can process. Pay the case manually. Prepare full set of award forms.

A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

**CONTROL FOR SUP - CHECK DRR**

This message is printed when the employee is not eligible for a supplemental annuity at the time the regular annuity is ready to pay final, but will be within three months of the final award date. RASI will not produce a 954 referral because the employee was not entitled as of the final award date. If the SUP ANN can be paid before MAP activates it as a SUP ANN attainment (the third month after the SUP ANN effective date), enter the data under type code 954. (The SUP ANN cannot be paid under type code 150 until Research has been updated for the award action.)
A referral is established in USTAR (RIS 0SU) upon receipt of the award. An examiner EDP Review is not required.

**DLW-LPE IS, REMOVE LPE WORK DEDUCTIONS**

This message is generated when a future DLW-LPE is entered on the employee or spouse application and is still in the future as of the paid final date. LPE work deductions are being withheld on a recurring basis.

If the DLW-LPE is 90 days or less in the future at the time the RASI award is reviewed, the case should be controlled in RIS and adjustment made to restore the tier II and Sup TWD amount (and the tier I or VDB TWD amount if appropriate). If the DLW-LPE is more than 90 days after the review date, the RIS examiner should establish a call-up for RPS to remove the TWD's.

**DETERMINE IF MIN PIA APPLIES**

This message indicates that although RASI paid this case final using the actual PIA, which is less than the minimum PIA, examiners should check to see if the minimum PIA will apply.

The minimum PIA will apply if the eligibility year is 1981 or earlier. The eligibility year is the earliest of:

- ABD;
- DF onset date;
- age 62; or
- date of death.

If the minimum PIA applies, recertify the case.

**DIS ONSET DTE USED FOR PIA'S - DIS FREEZE INDICATED AT SSA CHECK VDB**

This message is generated for disability cases filed 9-1-83 or later in which the first month of the disability waiting period is in a year prior to the ABD year. Verify that PIA's 4, 7 and 8 have been computed with the correct eligibility year. If the freeze and onset dates are in the same year, no action is necessary. If they are not, and if the PIA's are incorrect, adjust VDB accordingly.

**DIS ONSET DATE USED FOR PIA'S - RECALCULATE USING ABD - THEN CHECK VDB**

This message is generated for disability cases filed 9-1-83 or later in which the first month of the disability waiting period is in a year prior to the ABD year. In this case, there is no freeze at SSA, but RASI assumes one solely to obtain a valid PIA 1 based on the RRA onset date. RASI's assumption will produce incorrect VDB PIA's if the employee is under age 62 in the disability onset year. Put a note on the G-90 to indicate that the VDB PIA's are invalid.
When the VDB is payable, obtain correct PIA's 4, 7, and 8 from CESC. Send the G-90 from RASI attached to a G-563. In Remarks, write: "NO DF. COMPUTE PIA's 4, 7 and 8 BASED ON DOB." When the correct PIA's are available, pay the case accordingly. Send a G-59 to the P&S-RAC G-59 Group Mailbox to correct PIA's 4, 7, and 8 in the Research record.

DIS ONSET DTE USED FOR PIA's - RECALCULATE USING ABD

This message is generated for disability cases filed 9-1-83 or later in which the first month of the disability waiting period is in a year prior to the ABD year. In this case there is no freeze at SSA and no apparent vested dual benefit entitlement. Obtain correct PIA's 4, 7, and 8 from CESC. Send the G-90 from RASI attached to a G-563. In Remarks, write: "DISABILITY ONSET PRIOR TO ABD YEAR. COMPUTE PIA's 4, 7, 8 BASED ON ABD YEAR [DATE]." When the correct PIA's are available, pay the case accordingly. Send a G-59, with the G-90a attached, to the P&S-RAC G-59 Group Mailbox to correct PIA's 4, 7, and 8 in the Research record.

DRC's NOT ADDED - SPEC MIN PIA APPLIES

Although the award in this case shows that DRC's are creditable, they have not been included in the computation because Tier 1 is based on the special minimum PIA. Test whether the regular PIA plus DRC's exceeds the special minimum PIA; and if so, recertify the annuity to pay the higher amount. If the special minimum PIA exceeds the regular PIA plus DRC's no action is necessary. However, if in the future a regular PIA should apply, DRC's may be included.

DUAL ENTITLEMENT CORRECT PREH RECORD FOR EMPLOYEE

RASI prints this message on employee and/or spouse awards when information is entered under “Other RR Annuity” on the application. Entries need to be made on the employee PREH record, screen 3200 (RHRRID) using the PREH correction system. The specific fields are DUAL-ANN-RED-TYP-CODE, OTH-RRB-CLM-NO, OTH-BENF-TYP-CODE, and OTH-BENF-AMT. Review all annuities to determine if the spouse annuity requires adjusting for dual entitlement.

EEACCRBUS NOT EQUAL TO AWARD LESS BUSI - REFER TO RAC

EEACCRAMT NOT SHOWN - REVIEW AWARD

RASI has produced this review message as a result of a duplicate award form being requested after the SUP ANN attainment has been paid final.

EE ACCRUAL DUE NOT EQUAL TO AWARD AMOUNT DUE - REFER TO RAC

EEACCRPP NOT EQUAL TO EEACCRPP AWARD - REFER TO RAC

EE ALSO

This message does not require review. Examiner action is not necessary.
EE ATTAINS AGE 62 (Year - Month) ADJUST MANUALLY

This is an '83 law year 60/30 case, in which the employee was 60-61 on the ABD, and was paid with an age-reduced PIA 1.

PIA 1 must be recalculated when the employee attains age 62, and the case must be recertified with that PIA.

If the employee and/or spouse will attain age 62 within 90 days of the RASI award, control the case manually for recalculation of PIA 1 and recertification. If not, the case will be called up mechanically.

This message is obsolete.

EE C/O

Appears on Spouse Award when employee was compute-only. Spouse is compute-only also.

A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

EE POSSIBLE RAIL - CHECK SP DATA

This is a review message that appears in spouse-only cases in which the employee's PREH data was obtained only once, and may not be the latest due to possible RESCUE activity. Check the data used to pay the spouse and recertify if necessary.

EXCESS EARNINGS NO ADJUSTMENT REQUIRED

This message is produced when excess earnings are indicated by the employee and/or spouse annuitant and a work deduction insured status exists, but no TWD amount is withheld from tier I because of a social security offset effective with the ABD, and VDB entitlement is not involved. No additional action is necessary.

This message does not require review. Examiner action is not necessary.

FRZ INDICATED - CHECK FOR W/F

This message appears on the G-354r produced in disability cases if there is an indication on the G-325 that the annuitant is entitled to a freeze.

G-90 MORE THAN 9 MONTHS OLD

RASI will print this review message when an award is made more than nine months after the G-90 date. RAC routinely purges its files to remove any G-90 data more than nine months old.

Request a current G-90. If the new G-90 data matches the old G-90 data, send a G-59 with the new G-90 date to the P&S-RAC G-59 Group Mailbox. If the new G-90 data is not the same as the old, and no tolerance applies, recertify the award. If tolerance applies, send a G-59 with
the new G-90 date to the P&S-RAC G-59 Group Mailbox. Also, if any of the tier components change, send P&S-RAC an "information only" award form or work sheet showing the new amounts.

This message does not require review. Examiner action is not necessary.

**HOLD**

This message will appear on the G-354r if the employee award is being paid final but the spouse's claim is still pending on the computer. (NOTE: Partial award forms are no longer printed effective 5/97.)

This message does not require review. Examiner action is not necessary.

**INSUFFICIENT SERVICE MONTHS FOR ANNUITY TYPE CODE, CONSIDER DEEMING**

When a 958 for the lag year is entered, RASI will determine if sufficient service has been established for eligibility. If not, RASI will issue this referral. Refer to FOM1 207.5 for an explanation of deemed railroad service months. Request the Compensation and Employer Services Center (CESC) to release Form GL-99, Employer's Deemed Service Months Questionnaire, to develop the necessary information and determine if deemed railroad service months could be credited.

**LAG REQUIRED FOR ELIGIBILITY**

This message does not require review. Examiner action is not necessary.

**LAG SERVICE MAY PROVIDE SUPP ELIGIBILITY**

Lag was not required to establish regular annuity eligibility, but may provide SUP ANN entitlement. This message will be produced only when the employee meets all other conditions for SUP ANN eligibility and is 65 or within three months of attaining age 65 on the award date.

RESCUE will pay the supplemental annuity for these cases if the employer's year-end earnings report provides sufficient railroad service to qualify the employee for a SUP ANN and the employee is old enough to be entitled to the supplemental annuity when RESCUE runs. If PREH does not have information about whether the employee is entitled to a RR pension or not, RESCUE will not pay the supplemental annuity but rather a referral will go to USTAR (RUE 040). If the employee is not yet old enough to receive the supplemental annuity, RESCUE will update the total service in PREH, and MAP will issue a referral when the employee attains the required age.

When lag provides SUP ANN eligibility, verify the amount of any employer pension and pay the SUP ANN on ROC. Edits will require the examiner to recertify both the regular annuity and SUP Ann to make sure the railroad service months are the same for both.

**LAG YEARS ( )**
This message does not require review. Examiner action is not necessary.

**LAST NON-RAILROAD WORK WAS FEDERAL EMPLOYMENT**

This message is generated because the annuitant indicated on his application that his LPE employer was a federal agency. If RASI certified the annuity without a current connection, the C/C must be retested and the indexed T2 developed if LPE is an exempt federal agency. If RASI paid the employee with a current connection an indexed T2 may still need to be developed if the LPE employer is an exempt federal agency.

Refer to [FOM1 225.35.2](#) to determine if the employee’s federal employment did not break his C/C. Refer to [FOM1 214.1](#) to determine if an indexed Tier 2 is warranted.

<table>

<tbody>
<tr>
<td>Federal employer <strong>is not listed</strong> in FOM1 225.35.2</td>
<td>Sign, date, and indicate NAN on the RASI award.</td>
</tr>
</tbody>
</table>
| Federal employer **is listed** in FOM1 225.35.2 | 1. Retest for current connection if annuitant paid final without a C/C.  
2. Correct PREH C/C indicator, if necessary.  
3. Consider indexing T2 by:  
  - Verifying federal employer by securing DEQY or evidence from field office  
  - Verifying federal employment was the major employer in the 60 month period preceding the ABD and that the employee did not work in the railroad industry in that 60 month period  
  - Prepare G-563, request an indexed T2, recertify annuity  
4. Complete a G-59 to request that EE-SPEC-CALC-CD (PREH screen 3300) be changed to “2” (indexed T2 applies).  
5. Reconsider effect on SUPP ANN entitlement. |

**LEGAL PROCESS CONSIDERED**

This message does not require review. Examiner action is not necessary.
LPE WORK DEDUCTIONS WITHHELD T2 SUP ANN

This message indicates the amount of the latest Tier 2 and/or supplemental annuity LPE work deduction. It is a recurring amount if the DLW LPE is "CONT" (continuing).

Review the accuracy of the deduction, and check the claim folder for changes in LPE earnings or employment requiring an adjustment.

M/S ACCOUNTING: MANUAL CALCULATION REQUIRED

Effective in 1995 cases involving M/S accounting are handled as part of a yearly special project. The reimbursable amounts are computed and any necessary adjudication is done at that time.

This message does not require review. Examiner action is not necessary.

M/S AS WAGES REQ. FOR VDB ELG. BUT EE CLAIMED BENS AT OTHER AGENCY

The claimed M/S is creditable as compensation, but if used as wages will vest the employee. RASI will pay the case using M/S as compensation.

Using the instructions in FOM1 215, determine whether the M/S can be used to pay the VDB, and if so, recertify the case.

- M/S MOS XXX
- M/S COMP XXXX

This message does not require review. Examiner action is not necessary.

M/S NOT USED - EE CLAIMED BENEFITS WITH OTHER AGENCY

If the employee indicates on the AA-1 that he has filed for benefits with a federal agency other than the VA and the M/S is not needed for eligibility, and the claimed M/S is only one period, and is entirely pre-1957, RASI will pay the case despite the other M/S benefit. However, if all of those conditions are not met, RASI will pay the case without the M/S. Request a G-90 to see if the M/S is creditable and to get the PIA computations with the M/S. If the M/S is creditable and will increase the annuity payments, recertify the case to include it.

This message is obsolete.

M/S NOT USED - PROOF OF M/S NOT IN FILE

This message appears on the G-354r award form when the case was paid final without M/S because proof of such service was not submitted. It is also an alert that further tracer action is necessary with the field if the M/S is still not available.
If proof of M/S is not available, trace for the proof with the appropriate field office. If the field abandons their efforts to secure the proof, close out USTAR. Enter in Remarks that the field office abandoned their efforts to secure the proof.

If the proof of M/S is available, request a G-90 with the M/S included. If a higher benefit results, recertify the annuity to include the M/S. If the M/S does not cause an increase in the annuitant’s benefit, the M/S data still must be entered into PREH.

A referral is established in USTAR (RIS 0MS) upon receipt of the award. An examiner EDP Review is not required.

**M/S NOT USED - REQUIRED FOR VDB ENTITLEMENT**

The claimed M/S is creditable as compensation, but if used as wages, it will vest the employee. The VDB eligibility date is more than six months in advance, however, so case must be handled according to FOM1 215.110.2.

**M/S USED AS COMPENSATION REQUIRED FOR ANNUITY ELIGIBILITY**

M/S which is creditable as compensation must be included in the annuity computation in order to provide the minimum number of service months required for eligibility.

If the employee is not due a VDB with the M/S used as compensation, but would have been vested had the M/S been used as wages (see the G-90), check for a tax refund which is due because he is not vested with the M/S used as comp. Use Form G-357 as explained in RCM 8.6 and RCM 5.13.

This message does not require review. Examiner action is not necessary.

**M/S USED AS WAGES - REQUIRED FOR VDB ELIGIBILITY**

The claimed M/S is creditable as compensation, but if used as wages, will vest the employee. The VDB DOE precedes the ABD or falls within the accrual period or within three months of the accrual ending date.

**NET TIER I DECREASE - ZERO TB**

This message appears when the 12-83 net Tier 1 rate is greater than zero but less than the 11-83 Tier 1 rate, and the reason for the decrease is not due to the initial SS entitlement effective in 12-83. RASI will compute the 5% takeback amount based on the 11-83 net Tier 1, but will not make any reduction for take back in Tier 2. No examiner action is required.

This message is obsolete.

**NEXT - TO LAST NON - RAILROAD WORK WAS FEDERAL EMPLOYMENT**

This message is generated because the annuitant indicated on his application that his next to last LPE employer was a federal agency. If RASI certified the annuity without a current
connection, the C/C must be retested if the LPE employer was an exempt federal agency. An indexed T2 may still need to be developed if the LPE employer was an exempt federal agency. Consult FOM1 225.35.2 to determine whether the federal agency is one which does not break a C/C. Refer to FOM1 214.1 to determine if an indexed T2 is warranted.

**NO AGE 62 RECALC FOR EE ADJUST EE AND SP MANUALLY**

This message is produced for spouse cases in which the employee, an '83 law year 60/30 annuitant, has attained age 62, but has not yet been recertified with a recalculated PIA 1. Take the necessary action regarding the employee annuity, and if the spouse will attain age 62 within 90 days of the RASI award, control the case manually for recertification. If not, the case will be called up mechanically.

**NO C/C ASSUMED**

If this message is printed on the G-354R, review the C/C determination made by RASI (see RCM 9.1.22.) In any case where the RASI C/C determination was incorrect, send a G-59 to the P&S-RAC G-59 Mailbox to correct the Research record. If an incorrect "NO C/C" code is not corrected in the record, the case will not be called up for SUP ANN development when
the employee attains age 65. This is especially important when the case involves service by a Canadian for a U.S. employer in Canada.

NO EDP REVIEW MESSAGE

This is a final award for which no special handling or follow-up action is required, other than EDP review procedures currently in effect. (This message replaces "FILE ONLY.")

NO EXCESS EARNINGS INDICATED FOR NEXT YEAR

This message is printed when the employee or spouse has Tier 1 work deductions beginning in the year of filing and carrying over into the next year, and the accrual period extends from the year of filing into the next year. The application was filed in September through December and was paid final prior to December 31 of the filing year. The application indicated that excess earnings were expected for all months of the "current" year, the filing year, but not for the "next" year, the year after the filing year. Examine the case for possible removal of Tier 1 work deductions effective with January of the year after the filing year (the actual current year). If the adjustment is not made now, incorrect temporary Tier 1 work deductions may remain in force until the case is policed for excess earnings.

NOT DISABLED - PAID AN A&S ANNUITY

This is a RASI EDP Review message that requires examiner action. The employee filed for a disability annuity but was rated not disabled. Based on the employee's age and service data in file, RASI converted processing of the disability application to an age and service annuity. Review the application and PIA's provided on the G-90 and other applicable data in file to ensure that the tier components and the award are accurate.

O/M DOES NOT APPLY

This message does not require review. Examiner action is not necessary.

O/M MAY APPLY - CHILDREN

For age and service and disability cases in which the disability freeze was granted along with the initial onset, test the O/M with the PC program using the claimed minor and/or disabled child(ren) as auxiliaries. If the O/M does not apply, sign, date, and indicate NAN on the RASI award. If the O/M applies, attach a copy of the O/M test to the RASI award and return it to the RIS supervisor. The case will be assigned to a post examiner to process the O/M award.

O/M MAY APPLY - SPOUSE OVER 62

This message does not require review. Examiner action is not necessary.

PARTIAL EXCEEDS FINAL
The partial (IMPACT or SPAR) rate paid by RASI exceeds the final rate. If the overpayment cannot be recovered from the accrual check, "COMPUTE ONLY" will also be printed. See the instructions for "COMPUTE ONLY - PARTIAL EXCEEDS FINAL".

A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

PIA 1 ADJUSTED AT 62

This message is produced when the '83 law year 60/30 employee in this case has already been recertified with a recalculated PIA 1. The spouse was age 62 or older on the ABD, and was paid based on the recalculated PIA 1 amount.

This message does not require review. Examiner action is not necessary.

PIA 17 = 9999

This message is printed in employee cases in which there is no PIA 2 because the employee had no railroad service prior to 1975. To assess TWD's correctly, RASI substitutes PIA 1 for PIA 2 for calculating the Tier 1 W/D amount.

For EDP review, PREH screens 3210(RHTIER1) and 3278(RHWKDED) should be looked at. On screen 3210(RHTIER1), T1-SUBJ-WD-AMT, T1-AGE-RED-AMT, you should check the information for PIA 1 and age reduction amounts. Compare those amounts to the current PIA 1 and age reduction. If they are correct, no action is needed. If the amount is incorrect, a ROC rectification must be completed.

Example: 3210(RHTIER1) shows PIA 1 and age reduction correct for the 12-1-99 rate, but for the tier 1 subject to work deductions it received the PIA 1 before the cost-of-living due to the date of the G-90 being produced. Screen 3278(RHWKDED) shows the incorrect work deduction being withheld.

PIA 17 = 9999 - EE HAS WDIS

This message is printed in employee cases in which there is no PIA 2 because the employee had no railroad service prior to 1975. Although the employee has a WDIS, no work deductions were applicable in this award. For these cases, PIA 1 will be used in place of PIA 2.

Review the application for LPE and excess earnings.

POSSIBLE ADJ IN SP T1 DUE TO PIA 1 CHANGE IN EE

This message appears on RASI spouse awards with multiple date breaks in which a discrepancy exists between the employee and spouse PIA 1. It is an alert that a possible adjustment to the tier one portion of the spouse annuity may be necessary for the period prior to the latest date break.

POSSIBLE 1988 AMENDMENT M/S CASE. CONSIDER M/S AS COMPENSATION
Release a G-60 request which includes the entire M/S period, and release a G-563 to get Tier 2 data based on the period of M/S that is creditable as compensation before the 1988 Amendments. When both the G-90 and G-563 are received, manually recertify with a 12-1-88 date break. Send a G-59 to the P&S-RAC G-59 Mailbox. Enter the appropriate G-90 date on the G-357.

This message is obsolete.

POSSIBLE 1988 AMENDMENT M/S CASE. G-90 RE-ENTRY DATE BEFORE THE 1988 AMENDMENT COULD BE CONSIDERED

This message will appear when the ABD is 12-1-88 or later, there is M/S in the 6-15-48 through 12-15-50 period, and the G-90 RASI used to pay the case was prepared before the 1988 Amendments could be considered.

Check the IC M/S proof screen for 6-15-48 thru 12-15-50 M/S. If any is claimed, release a G-60 request which includes the entire M/S period (including months now creditable under the 1988 Amendments). When received, recertify from ABD. Prepare G-59R (M/S) (2-89) for Research and enter the appropriate G-90 date on the G-357.

This message is obsolete.

POSSIBLE DEEMED CURRENT CONNECTION

It has been determined that the employee does not have a current connection, yet because item 75 on the AA-1 (8-90) has been answered "YES", it may be possible to establish a deemed C/C for supplemental and survivor annuity purposes.

If items 76 or 77 have been answered "YES", and item 78 has been answered "NO", evaluate and determine if a deemed C/C can be established per FOM1 225.45.

If a deemed C/C is established, notate the file and send a G-59 to the P&S-RAC G-59 Mailbox. The Research record must be corrected to generate a call up at age 65 for annuities with at least 25 years of service, or at age 60 for a D/A case with 30 years of service for supplemental annuity development. If the employee is currently eligible for a supplemental annuity, or will be within 90 days, control the case and initiate development and payment.

If a deemed C/C is not established per FOM1 225.45, and code paragraph 406A was not included on the final RASI award, prepare a denial of the supplemental annuity per FOM1 315.10.

POSSIBLE DUPLICATE EARNINGS INVOLVED. WAGES FOR SOME YEARS NOT USED IN PIA CALCULATION

Wages posted to a year or years after 1977 equal (plus or minus $1) the railroad compensation for the same year(s). These wages appear to be the result of duplicate reporting of earnings and have not been included in the computation of the PIAs used to pay the annuity.
No investigation is normally required for these cases. However, if the wages posted are not equal (difference is greater than plus or minus $1) to the compensation shown for any year or years adjacent to a year where wages and compensation are equal, follow the handling instructions for the G-90 referral POSSIBLE DUPLICATE EARNINGS BA 9999 in RCM 9.14.110.

POSSIBLE LPE WD'S NEEDED DUE TO EE LPE

PREH data indicates the EE no longer has LPE TWD's in force. Review the case to see if LPE WD's should be applied to the spouse annuity based on the EE's earnings.

POSSIBLE RECOMP IN YEAR AFTER 62

(POSSIBLE RECOMP YEAR AFTER EMPLOYEE AGE 62)

This message appears on a G-354R (G-355R) when a RECOMP PIA appears on employee's G-90 and employee is not yet 62. New annuity rate based on RECOMP PIA will be payable effective January 1 of the year after employee attains age 62.

POSSIBLE RESTORATION OF TIER I BENEFIT

See RCM 5.7.54 - 5.7.55.

POSSIBLE UI O/P. CHECK PAR RECORD. APPLY RR ACCRUAL TO UI O/P

This is a RASI review message which requires examiner action. In order to prevent any UI overpayment from not being recovered by a RASI accrual, RASI has been modified that when the UI indicator is "Y", RASI will automatically make these a comp only award. This code of "Y" signifies an open RUIA debt (either uncollectible or regular) on PAR. The RASI award will be initially reviewed by a lead examiner in Operations and forwarded to an examiner for handling. The examiner needs to review PAR and Debt Checker to see if a UI overpayment exists. Any RASI accrual should be used to offset any UI overpayment.

POSSIBLE W/D INSURED STATUS

This message appears when TRIC cannot make a work deduction insured status determination because SSA did not furnish a wage QC pattern for the 1937-1952 period. When this happens, TRIC prints a dash (-) in the QTR I/S ACQUIRED block in item 7(B) on the G-90. Take the necessary action to make a manual W/D insured status determination. If a work deduction insured status does exist, send a G-59 to the P&S-RAC G-59 Mailbox with "W/D INSURED STATUS ACQUIRED IN (QTR/YR)" entered in Remarks.

PREPARE RL-183

This message appears on G-354R or G-355R. Release RL-183.

This message is obsolete.
PRIOR M/S NOT USED

RASI will print this message on the G-354R if the annuitant has prior military service. If the prior M/S can be used to increase the employee's annuity, recertify the award. If the prior M/S cannot be used, advise the annuitant in a letter using code paragraph 333.

This message does not require review. Examiner action is not necessary.

PSP EFFECTIVE DATE IS [DATE], APPLY REDUCTION

This message is generated when a future PSP effective date is entered in response to the 957 request for PSP data, and it is still in the future as of the paid final date. A PSP reduction has not been applied to the spouse tier 1.

If the PSP effective date is 90 days or less in the future at the time the RASI award is reviewed, the case should be controlled in RIS and adjustment made to apply PSP offset to the spouse tier 1 (and new RRA max test, if applicable).

If the PSP effective date is more than 90 days after the award review date, the RIS examiner should establish a call-up, with Form G-662, for RPS to initiate PSP reduction timely, and retest the RRA maximum and adjust the appropriate components accordingly.

REDUCED FOR PUBLIC SERVICE PENSION

This message is produced in spouse cases in which a 957 call-up was set for public service pension data to be input by an examiner. Verify that the reduction amount is correct based on the application and Form G-208.

RELEASE RL-13G.1 FOR EE

This message is printed for a spouse-only case in which the employee was awarded a disability annuity under the provisions of the 1974 Act, the filing date was 1-1-77 or later, there is no ROR on file, and the ee is not age 65 on the spouse's ABD. An RL-13g.1 must be released to the ee's last RR employer to notify that rights have been relinquished due to spouse's annuity eligibility.

RELEASE RL-13G.1 WHEN G-88 RECEIVED

This message is printed for a spouse-only case in which the employee was awarded a disability annuity under the provisions of the 1974 Act, the filing date was 12-31-76 or earlier, there is no ROR on file, and the ee is not age 65 on the spouse's ABD. Depending upon the revision date of the AA-1d, or Form G-346, a G-88 may or may not have been required. Check to see that the referral message "NO REL OF RTS INFO FOR EE. GET G-88." was handled correctly. The spouse should not have been paid final if a G-88 was required, but was not obtained. Release an RL-13g.1 to the ee's last RR employer to notify that rights have been relinquished due to spouse's annuity eligibility.

REVIEW
See RCM 9.1.44

REVIEW DUAL SPOUSE

RASI will print this review message on the G-355R when it has paid a dual spouse case final. Review the spouse's own employee annuity data on PREH and review the award to see if the proper reductions were made in Tier 1 and the proper restoration amount was included in Tier 2.

REVIEW EE AND FOR EARLIER ABD

RASI prints this message on the G-355r when it appears that a full age spouse may qualify a reduced age employee for up to 6 months of retroactivity from the spouse's filing date. Review both employee and spouse awards to see if this provision applies. RASI will restrict the spouse's ABD so as not to precede the employee’s. Therefore, if this provision does apply, both employee and spouse will have to be manually re-opened and paid with a new ABD. When re-opening, remember that the employee's ABD in these cases is restricted not only by the usual age and eligibility requirements, but is also restricted by the spouse's ABD.

REVIEW M/S

This message does not require review. Examiner action is not necessary.

RRA MAX AMOUNT EXCEEDS SPOUSE TIER TWO

When both an employee and spouse are on the system, and the MAX applies, if the reduction amount cannot be recovered completely from the spouse's Tier 2, RASI produces two compute-only awards. Both awards must be paid manually, with the reduction applied to both.

When only the spouse is on the system, RASI DROPS THE SPOUSE AS COMPUTE ONLY. The employee's annuity must be recertified with the spouse's to apply the MAX reduction.

This message is obsolete.

RRA MAXIMUM (__________)

This message is obsolete.

RRA MAXIMUM APPLIES

This is printed on spouse awards when the spouse's tier 2 has been reduced for the RRA maximum. Verify that the maximum does apply, and that the amount used for the reduction is correct. Use Form G-354.4 (PC) or ROC for folder documentation. This should be attached to the AA-3 for release to claim files if you are processing the spouse application folderless.

This message is obsolete.

RRA MAXIMUM MAY APPLY
In SUP ANN attainment cases, RASI will test for the RRA maximum and print this review message, if the testing shows the RRA max may apply. Review the case by testing manually. Use Form G-354.4 (PC) or ROC for folder documentation. Handle as follows:

1) If the RRA max does not apply, no additional action will be required.

2) If the RRA max applies based on the employee's regular and SUP annuities, adjust case and recover any overpayment. Check the "SP Invokes Max" box on ROC - RRA Max Calculation screen so a referral will be released if the spouse files for an annuity.

3) If the RRA max applies based on the employee, spouse and SUP annuities:

   If the spouse has filed, adjust his/her annuity and recover any overpayment.

   If the spouse has not filed, go to PREH using the on-line correction system and complete screen 3300 (RHEE)RRA-MAX-APPBL-CODE using 1-Spouse invokes maximum.

   This message is obsolete.

SALSA CALCULATED - CONSIDER MANUAL AWARD

The SEARCH reply indicates a separation allowance lump-sum amount, shown on the G-90 as a LUMP-SUM SEC 6E. Pay the SALSA manually, deducting any amount previously paid the employee. A disabled annuitant could have received the SALSA under an earlier period of entitlement. Send a G-59 to the P&S-RAC G-59 Mailbox if the SALSA is a one-pay-only award.

Do not pay the SALSA if there is a chance that the SALSA mass adjustment would duplicate your award. An overpayment could result if, at the time of the mass adjustment, the record has been updated with data from the final RASI award, but not from the G-59 or the manual SALSA award.

A referral is established in USTAR (RIS 0SA) upon receipt of the award. An examiner EDP Review is not required.

SEC (3G) 4(D) CUMULATIVE COL

This message displays the COL increases applied to Tier 2.

This message does not require review. Examiner action is not necessary.

SEP/PREMIUM SURCHARGE RELIEF CLAIMED - FWD TO MS

Item 114 on the AA-1 or Item 105 on the AA-3 was answered "NO". Forward the award form to the Medicare Section. (If this cannot be done, forward a copy of the award form.) If there is a G-44b and/or a RL-311-F with the material received for the annuity application, attach the G-44b and/or the RI-311-F to the award form and send to the Medicare Section.
This message does not require review. Examiner action is not necessary.

SERVICE BEGINNING DATE IS AFTER 8/83

This message does not require review. Examiner action is not necessary.

SERVICE MONTH DEEMING APPLIED

The employee was credited with deemed service months based on the amount of Tier 2 compensation reported for the lag year in this case.

This message does not require review. Examiner action is not necessary.

SP LWYR83 60/30 CASE: CONSIDER ABD RETROACTIVITY

The spouse in this case could be eligible for an earlier ABD, based upon the criteria listed in FOM1 112.7. If the spouse is eligible for retroactivity, recertify the case to pay the additional amount due and correct the ABD. No new application or notice to the spouse is required if the AA-3 indicates the spouse wanted the earliest ABD possible, and filed for a reduced 60/30 annuity. If retroactivity does not apply, notify P&S-RAC through your supervisor.

SP T1 WD COMPONENT EXCEEDS SP T1 RT

EE TIER 1 W/D COMPONENT ____________

SP TIER 1 W/D FACTOR ______________

SP W/D EFF DATE ________

ACTUAL PIA 2 AMOUNTS USED

This message occurs when the spouse annuitant's Tier 1 involves a reduction for a public service pension (PSP) and/or for spouse's own employee annuity (DUAL).

If the Tier 1 is reduced to zero or is not payable, no work deductions based on the spouse and/or employee's earnings estimate can be applied. If a net Tier 1 amount remains after the reduction for a PSP and/or spouse's own EE annuity, work deductions will be withheld from this amount.

SPOUSE ATTAINS AGE 65 (YEAR - MONTH) NOW ENTITLED BASED ON AGE

The spouse attains age 65 during the accrual period, and is receiving an annuity based on a minor or disabled child. As of the month the spouse is 65, entitlement should be based on age only. Send a G-59 to the P&S-RAC G-59 Mailbox to notify RAC of the change in the basis of entitlement.

SPOUSE ATTAINS AGE 65 (YEAR - MONTH) PAY TIER I BASED ON SPOUSE AGE 65
The spouse is receiving an annuity based on a minor child older than 16, but less than 18, and only Tier 2 is being paid. The spouse will attain age 65 within three months of the RASI award date. Control the case to recertify as a full age annuity, including Tier 1.

This message is obsolete.

**SPOUSE ELIGIBLE FOR REDUCED 60/30 – AA-3 REQUIRED**

The spouse is receiving an annuity based on a minor child who is at least age 16, but not yet 18, and thus Tier 2 is being paid. Since the spouse is at least age 60, but not yet 65, and the employee is receiving an ’83 law year 60/30 annuity, the spouse is eligible for a reduced annuity. A new AA-3 is required.

**SPOUSE PARTIAL EXCEEDS FINAL RATE**

The SPAR rate paid by RASI exceeds the final rate, and the difference cannot be recovered from the accrual. Handle manually.

A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

**SPOUSE PENDING - DO NOT SEND TO CLAIM FILES**

A current spouse application is pending on RASI. Hold the file in dormant until the spouse recert or final award is matched.

This message does not require review. Examiner action is not necessary.

**SS BENS CLAIMED - NO TIER 1 REDUCTION**

The AA-1 or AA-3 indicated that the annuitant is receiving social security benefits, but the final award contained no reduction to Tier 1. Verify that no SS entitlement currently exists, with special attention to SOLAR/WORKLIST pending activity. Review all account numbers. If the results are questionable or inconclusive, secure an MBR for resolution and take whatever action is appropriate. If the annuitant is not currently entitled to benefits, note the RASI award to that effect.

**SUBMIT 150 or 954 - CHECK RR PENS ENTITLEMENT**

The SUP ANN cannot be paid with the final award because necessary pension information is outstanding. Check for RR pension entitlement. If entitlement is indicated, verify with a G-88p. When G-88p has been returned by the RR employer, follow the instructions in FOM1 315.19. Use 954 if it will be submitted within 90 days of the RASI award. If it will be submitted later, use code 150.

A referral is established in USTAR (RIS 0SU) upon receipt of the award. An examiner EDP Review is not required.
SUPPLEMENTAL ANNUITY NOT PAYABLE – NO RR SERVICE PRIOR TO 10/1/1981

According to EDMA the annuitant does not have one month of creditable railroad service prior to October 1, 1981. Therefore, a supplemental annuity is not payable to an employee even if all other age and service requirements are met. Refer to FOM1 315 for detailed supplemental annuity information and requirements.

TAX REFUND POSSIBLE - CHECK DF STATUS

RASI does not pay tax refunds to disability annuitants because, at the time that payment is made, RASI does not know if a DF determination has been made. Upon receipt of this message, take the following action:

1. If the DF determination has been made and the EE -
   a. Is vested, no action is necessary.
   b. Is not vested, pay the tax refund.

2. If the DF determination has not been made, the case will be called up mechanically for DPS to do the DF rating. After the case has been rated, the following will occur:
   a. If a DF is granted, a DF G-90 will be produced mechanically. When it is received, the tax refund should be paid if the G-90 indicates one and if the ee is not vested. If the ee is vested, take action to pay the vested dual benefit, if all requirements for payment are met.
   b. If the DF is denied, DPS will forward non-vested cases to the operations unit for payment of the tax refund if any is due and the employee is not vested.

TERMINATION REJECT

RASI has received a termination code from CHICO. Pay manually any accrual that is due annuitant.

A referral is established in USTAR (RIS 0CO) upon receipt of the award. An examiner EDP Review is not required.

TIER I BASED ON RED PIA 1 - PIA 1 ADJUSTED AT 62

This message is produced when the ’83 law year 60/30 employee has attained age 62 and has been adjusted for the recalculated PIA 1, but the spouse attained age 62 during the accrual period. The spouse annuity must be recertified with the correct PIA 1 amount.

TIER-I BASED ON RED PIA-1 – SP ATTAINS AGE 62 (YR-MO) – ADJUST MANUALLY WHEN SPOUSE AGE 62
This message is produced when the '83 law year 60/30 employee has attained age 62, and has been adjusted for the recalculated PIA 1 amount, but the spouse has not yet attained age 62. If the spouse will attain age 62 within 90 days of the RASI award, control the case manually for recertification. If not, the case will be called up mechanically.

TIER-2 AFTER TAKEBACK LESS THAN $10.00 - GUARANTY APPLIED

This message occurs in post-'83 ABD spouse cases when the Tier 2 before 4(d)(2) takeback is $9.99 or less. 50% of the employee's T/B amount will be shown in item 21 on the G-355R, however that amount will not be considered in the annuity calculations.

T2 REDUCED FOR RRA MAXIMUM

Examiners should review this case to verify that the RRA max test was made correctly. Use Form G-354.4 (PC) or ROC for folder documentation. This should be attached to the AA-3 for release to claim files if you are processing the spouse application folderless. If a 996 was submitted with the tier 2 max reduction amount, be sure that amount was based on 45 percent of the employee's tier 2 if the spouse is a 1981 amendment case.

This message is obsolete.

$10.00 MINIMUM RULE APPLIES

This message occurs in pre-'84 ABD Spouse cases when the Tier 2 amount after takeback is $9.99 or less. The takeback amount will be shown to the right of the "12-83" or "12-84 TAKEBACK" designation; however, the net Tier 2 paid will be $10.00.

This message is obsolete.

TRIC REPLY - (AUX)(SP) MBR EARMARK REJECT

The employee, spouse or aux. TRIC reply contains a code indicating that correction of the RRB earmark in SSA's records may be necessary. See RCM 7.4.68 for instructions.

VDB DOE (MOYR)

This message is printed when the month of the VDB beginning date is later than the month of the RASI award run date and within the following three months. Control the case to pay the VDB.

W/D INSURED STATUS QUESTIONABLE

Determine if W/D insured status exists. If a determination cannot be made on basis of evidence in file, secure a G-90. When G-90 is in file, handle according to FOM1 Art. 11. RASI will pay the full rate in questionable W/D cases.

VDB CUTBACK APPLIED FROM DATE OF ENTITLEMENT - REVIEW
This message will be printed in employee partial to final recertifications paid on April, 1988 or later vouchers in which the VDB date of entitlement and the partial ABD are before 3-1-88. RASI cannot apply the correct VDB cutback for months prior to 3-1-88 in this situation. Adjust the case as necessary based on procedure for applying the VDB cutback in partial to final recertifications. See RCM 8.6 G-354WF Special Situations.

WORK DEDUCTIONS COMPUTED

EMPLOYEE TIER I W/D COMPONENT ____________

SPOUSE TIER I W/D FACTOR ___________

SP WD EFF DATE ___________

ACTUAL PIA 2 AMOUNT USED

Work deductions have been applied to the spouse Tier I based on the spouse's own and/or the employee's earnings estimate. The employee's latest WD component (PIA 2) will be displayed, as well as, spouse's WD component. In addition, the actual TWD amount after applicable age reduction will be shown for each rate change.

Review the accuracy of the components used and deductions made. Check the application and Imaging for any correspondence that indicate a change in the earnings estimate or employment. Following the guidelines established in FOM1 1120, make any adjustment necessary to correct the current WD components.

However, it must be noted that due to system limitations RASI is unable to forward employee work deduction information to the spouse award message when the employee has no railroad service prior to 1975. Even though the work deduction information is not printed on the spouse RASI award, work deductions should still be considered.

WORK DEDUCTIONS COMPUTED

(EXCESS EARNINGS ABD MONTH ONLY)

T1 PIA 2 __________

EE WD EFF DATE __________

ACTUAL PIA 2 AMOUNTS USED

This message appears when work deductions are applied to the employee Tier I based on the employee’s earnings estimate. The employee's latest PIA 2 (WD component) will be displayed. In addition, the actual WD amount withheld, including the applicable age reduction or DRC increase, will be shown for each rate change.

Review the accuracy of the components used and deductions made. Check the application and Imaging for any correspondence that indicate a change in the earnings estimate or
employment. Following the guidelines established in FOM1 1120, make any adjustment necessary to correct the current WD components.

WORKERS COMP TERMINATED - CHECK ACCRUAL PERIOD

This message will be printed in "spouse only" cases when Research records indicate the employee's workers compensation benefits have terminated. Check Imaging to determine when these benefits actually terminated. If they terminated prior to the spouse's accrual period, no examiner action is required. However, if they terminated in the spouse's accrual period, an overpayment exists for the accrual period preceding the termination date. Recover this overpayment in the usual way.

YRS W/O M/S XX XX XX - YRS WITH M/S XX XX XX

This information appears on G-354R when RASI has used M/S in the annuity computation.

This message does not require review. Examiner action is not necessary.

9.3.15 Employee And Spouse RASI Input And Mech G-60 Reject

MESSAGES

When data is input to RASI, an edit of the input is made. If an error or a situation which warrants investigation is discovered, a RASI input reject is issued, describing the missing or invalid data.

The referral is printed on 805 (5 1/2" x 8") paper. "RASI INPUT REJECT" appears at the top with the date of the computer run. For identification, the SSA number, RRB claim number, code name and type code of the document appear next, followed by the message.

805 reject messages can also be viewed on HSL, in the "RASI 805 REJ REF REPORT." Messages for the ten most recent RASI runs are available. Messages are listed in SSN order.

The following list shows the various referral messages that may appear and the corrective action required. Many referrals are self-explanatory, indicating that data is missing or incorrect. In certain cases, Research data can be corrected by use of Form G-59R. (See RCM 9.4) In other cases, incorrect or inconsistent data can be corrected and reentered.

A. RASI produces the following referrals when erroneous or incomplete information is received from Research or SEARCH.

- AIME/TRANS PIA IN RESEARCH IS ZERO

  RASI cannot pay the spouse final in this case until Research is furnished the EE's AIME/TRANS PIA. Because of the long delays Research has in updating its record, examiners should dump and pay manually. After final payment, furnish Research with the AIME/TRANS PIA via a G-59R.
• CURRENT SSA DATA IS PRIOR TO LATEST COL

    ANOTHER TRIC REQUEST SENT TO BDPA

    RASI produces an input reject referral with this message if a TRIC reply does not show an SS benefit rate which includes the latest Cost-of-Living increase. (The last effective date shown on the MBR will be printed after the referral message.) RASI will not accept the TRIC reply and will continue to generate TRIC request until the latest COL increase appears on the annuitant's MBR.

• DETAIL NOT ACCEPTED - NO CALL-UP - REFER TO RCA

    RASI received an input document which it did not need for processing a particular application.

• DUPLICATE TRIC REPLY

    This is an information referral indicating that a second TRIC reply was requested.

• EE ABD YEAR

    This is a G-60 mechanical reject.

• EE DLW RR INVALID OR ZERO - 946 CALL UP

    No date or an invalid date is entered on the AA-1. RASI will not reject the application, but will set a 946 (SEARCH) call-up. Secure correct DLW, and prepare a 996 to enter the date into RASI. The field name is EEDLWRR.

• EE NOT AGE 60 ** CHECK SUPP ABD**

    This message occurs when a 150 is submitted in advance of the month the employee attains age 60. Review the file to determine the month in which the employee will be eligible for a supplemental annuity. If the employee will be eligible in the next 90 days, take no action. RASI will process the SUP ANN at that time. If the month of SUP ANN eligibility is more than 90 days from the date of the reject message dump the case.

• EE RESEARCH AMT - SERV CONTAINS ZEROS

    Research has no record of years or months of service. These cases should be dumped and paid manually. Send a G-59R to Research with a current G-90 date.

• EE RESEARCH CLAIM NUMBER 999999 NOT EQUAL TO APPLICATION CLAIM NUMBER 999999; MANUAL OP CODE SET

    This message occurs only in cases with six digit claim numbers. The Research file contains a different claim number from that shown on the RASI file. RASI will accept
Research's claim number but will set a manual op code. Investigate discrepancy. If Research's number is correct, clear the manual op code. If Research's number is incorrect, dump the case and handle manually. Notify Research of the correct claim number.

- **EE RESEARCH RECORD NOT IN FINAL PAY STATUS - 30 DAY CALL-UP SET**

  Message is generated in SUPP ANN attainment case when the EE's Research record is not in final pay status.

- If EE paid final within 90 days prior to the date of the referral, allow the case to pend for up to 90 days from the date of the final award. If this referral is still produced after that time, send the folder to Research to update their records.

- If EE paid final more than 90 days prior to the date of the referral, send the folder to Research to update their records.

- If EE not paid final, recertify to final rate.

- **EE RESEARCH RECORD SHOWS SUPP PAID-MMYY; CASE DUMPED**

  RASI will dump this case and generate this referral in SUP ANN attainment cases when research records show the SUP ANN has already been paid. If the SUP ANN has not been paid, pay the case manually.

- **EE TIER 2 BEFORE COL CONTAINS ZEROS**

  Message is generated when the employee's tier II amount before any section 3(g) increases is missing from Research records. Examiners should dump the case and pay manually.

- **ERROR IN SSA NUMBER OF TYPE CODE FROM FILE**

  RASI produces this referral when it cannot identify a particular type of activity. If an SSA number or type code can be determined, re-enter input. Otherwise, no action can be taken on this referral.

- **1ST (2ND) MIL SERV BEG DATE INVALID**

  SEARCH rejected RASI's TRIC request because the MS beginning date is incomplete. Enter the full date of the period(s) with a 996. The present contents of the RASI field are indicated in the 805 referral's "Contents of Field." Enter the correct date in CCYYMMDD order. The RASI field name is MSBEGDT1 or MSBDGDT2.

- **1ST (2ND) PER MEANS ENTRY CD INV**
SEARCH rejected RASI's TRIC request because the code is missing or incorrect for the EE's means of entry into MS. If there are two periods of MS, check the means of entry for both; RASI might have an incorrect "voluntary/involuntary" code for one MS period and no code for a second period.

Correct any erroneous code with a 996. The present contents of the RASI field are indicated in the 805 referral's "Contents of Field." Enter the changed code as follows: 1 for voluntary entry (enlisted, re-enlisted, or commissioned), or 2 for involuntary entry (inducted, or called from inactive duty). The RASI field name is MSINCDE for the first period, or MSINCD2 for the second. Space out unused positions.

- INVALID G-230 TYPE CODE - ACTIVITY NOT PROCESSED

The type code has been entered incorrectly on the G-230. This is a D/O error. Refer to the case to PES if there is no indication that it has already been handled.

- INVALID RECTYP OR SPTYP CODE - REFER TO RCA

Refer case via Outlook to Dawn Farganus, P&S-RAC.

- MASTER RECORD FOR THIS DETAIL NOT IN FILE

RASI has received a document for which there is no master record. Handle the case manually.

- M/S INDICATOR DISCREPANCY (M/S NOT INVOLVED - DATA IN INPUT)

There is a discrepancy between the M/S claimed on the annuity application and EDMA. RASI will not drop case but will continue to process claim using the claimed M/S. If the case is paid incorrectly, recertify award without M/S.

- NAME RECONCILIATION REQUIRED - BDP CODE NAME VERIFY THAT ACCOUNT NUMBER IS CORRECT

Analyze the file information to determine the cause of the referral. If there is no real discrepancy (i.e., female employee who worked under a maiden name) enter a 946 to bypass the discrepancy. If the discrepancy between the record on EDMA and the RASI record is correct on EDMA and incorrect on RASI, submit a 997. If the two names are irreconcilable, contact the district office to determine if the application was filed under an incorrect number. See RCM 4.8 for addition instructions on name reconciliations.

In addition to checking the name, examiners must verify the account number. If the account number is incorrect, the case must be dumped and re-entered using the correct account number.
• PREVIOUS CLAIM NUMBER FROM BDP - MANUAL OP CODE SET - IMPACT RATE ZEROED OUT

RASI received an application with a nine-digit claim number but found a previous six-digit number in BCC records. The application has been accepted but a manual OP code has been entered to prevent final payment and the IMPACT rate, if any, has been zeroed out. Obtain other folder and send both folders to claim files for consolidation. Prepare a 996 to change claim number to six-digit number before changing manual OP code to zero. After RASI has been corrected to the six-digit number, examiners must manually enter the IMPACT rate if they want one paid. However, do not enter the IMPACT rate until the six-digit number is accepted in the system and appears on REQUEST.

• REX PAID DATE ZERO

This message occurs in spouse-only cases where there is no voucher date for the employee’s final payment in Research records. If there is a final voucher date in file, notify Research.

• REX PARTIAL IS ONE

This referral occurs in spouse-only cases where there is only a partial award for the employee in Research records. If the file indicates that employee has paid final, notify Research so that its records may be corrected.

• SEARCH OUTSTANDING - DETAIL NOT PROCESSED

RASI has an input document, but cannot find a master record. After several attempts at finding a record, RASI will finally reject input document and produce this referral.

• T1-PIA-1 IN RES RECORD NOT CORRECT XXX.XT1AMW1XXXX

• 932 CALL UP SET

RASI cannot pay the spouse final in this case until Research is furnished the EE's tier one AMW PIA. Because of the possible delay Research may have in updating its record, examiners should dump and pay manually. After final payment, furnish Research with the AMW PIA via a G-59R.

• T1 PIA-1 IN RESEARCH RECORD NOT CORRECT. 932 CALL-UP SET

This referral occurs in spouse-only cases where Research does not have consistent AMW - PIA information in its records. Furnish Research with correct T1 PIA-1 and the associated G-90 date. Use Form G-59R to transmit referral. (See G-59R instructions in RCM 9.4)
A 99998 AMW will appear on the referral when a transitional PIA 1 was used to compute the employee's annuity. RASI rejects this type of case because of 99998 AMW does not correspond to a PIA amount. If the PIA amount shown on the referral is correct (i.e., a transitional PIA 1 is applicable for the employee), it is not necessary to complete Form G-59R, since the Research record is correct. Instead, case must be dumped and paid manually.

- **TRIC REPLY SHOW EXCESS M/S XXX**
  
  An excess amount of creditable M/S has appeared on the TRIC reply. RASI will automatically regenerate TRIC. If this 805 is generated twice for the same code, refer to P&S-CAS.

- **TRIC TIER 2 RATE CONTAINS ZEROS**
  
  These referrals are handled in P&S-RAC.

B. The following category of RASI rejects involves applications (AA-1, AA-3, AA-6, AA-7). Unless otherwise indicated, whenever a message indicates that data is invalid, missing, or incorrect, the application has rejected.

"Incorrect" data implies that a wrong code was entered into RASI. For instance, a particular item on the application could be answered "1" (yes) or "2" (no). If the item is incorrectly entered with a "3", RASI will produce a referral message indicating "incorrect" data. "Invalid" refers to impossible data. For example, if RASI receives alpha data when the system needs numeric data, an "invalid" message will be produced.

Whether the reject is the result of invalid or incorrect data, forward the file to PES for their action. PES charges the field office with an error, if necessary, and re-enters the application.

- **AA-1 DESIGNATED ABD INVALID**
  
  Item 80 of AA-1 and item 79 of AA-3.

- **AA-1 (AA-3) G-230 SSA NOT EQUAL AA-1 (AA-3) EE SSA NO G-230 SSN AA-1 (AA-3) SSN - REPUNCH**
  
  The employee SSN shown in item 4 of Form G-230 is different from the one entered in item 2 of the application. Determine the correct number. Correct the erroneous form and send the folder to PES.

- **APP FILING DATE MORE THAN 9 MONTHS PRIOR TO CURRENT DATE**
  
  Filing date on G-230.

- **APPLICATION SIGNED BY REPRESENTATIVE CODED INCORRECTLY**
Item 127 of AA-1, item 113 of the AA-3.

- ANNUITY FILED FOR DOES NOT MATCH TYPE CODE ON G-230
  
  Item 25 of the AA-1, item 25 of the AA-3.

- BA NO LAST (2nd LAST) RR EMPLOYER SHOULD NOT BE ZERO
  
  ER number on AA-1.

- CHILD CLAIMED AND VERIFIED DOB BLANK
  
  Forward this referral with file to P&S-RAS.

- CHILD’S DATE OF BIRTH MISSING
  
  Item 31 of AA-3.

- CHILD UNDER 18 CODED INCORRECTLY
  
  Item 27 of AA-3.

- CHILDRENS DATE OF BIRTH MISSING
  
  Item 31 or 35 of AA-3.

- CLAIM WITH OTHER FEDERAL AGENCY CODED INCORRECTLY
  
  Item 30 of AA-1.

- CODE NAMES IN MASTER AND DETAIL NOT EQUAL
  
  Item 3 of AA-1, AA-3, AA-6, and AA-7.

- DATE OF BIRTH INVALID
  
  Item 8 of AA-1, item 6 of AA-6, item 11 of AA-3, item 7 of AA-7.

- DATE OF MARRIAGE INVALID
  
  Item 12 of AA-1.

- DATE RTS REL LAST RR EMPLOYER GREATER THAN 90 DAYS FROM CURRENT DATE (INVALID) (SHOULD NOT BE ZERO)
  
  Item 41 of AA-1.

- DATE RTS REL 2nd LAST RR EMPLOYER GREATER THAN 90 DAYS FROM CURRENT DATE (INVALID) (SHOULD NOT BE ZERO)
Item 48 of AA-1.

- DEPENDENT CHILD CODED INCORRECTLY
  Item 16 of AA-1.

- DESIGNATED ABD INVALID
  Item 79 of AA-3.

- DISABLED CHILD CODED INCORRECTLY
  Item 36 of AA-3.

- DIVORCED SPOUSE - MANUAL HANDLING REQUIRED
  Item 13 of AA-3.

- DLW FOR 2ND OUTSIDE ER INVALID
  Item 64 of AA-1.
  Item 68 of AA-3.

- DLW LAST RR EMPLOYER GREATER THAN 90 DAYS FROM CURRENT DATE (INVALID)
  Item 40 of AA-1.

- DLW OTHER RR EMPLOYMENT INVALID OR ZERO
  Item 58 of AA-3.

- DLW OUTSIDE INVALID
  Item 59 of AA-1, item 65 of AA-3.

- DLW OUTSIDE SHOULD NOT BE ZERO
  Item 59 and/or 64 of AA-1, and item 65 and/or 68 of AA-3. In continuing LPE cases, the DLW can be zero, but the "still working" box must be checked.

- DLW 2nd LAST RR EMPLOYER GREATER THAN 90 DAYS FROM CURRENT DATE (INVALID)
  Item 47 of AA-1.

- EARLIEST DATE CODED INCORRECTLY
Item 79 of AA-1 and item 78 of AA-3.

- EARLIEST DATE CODED ONE - DESIGNATED BEG DATE SHOULD BE ZERO
  
  Item 80 of AA-1 and item 79 of AA-3.

- ELECTED PUBLIC OFFICE CODED INCORRECTLY
  
  Item 66 of AA-1 and item 69 of AA-3.

- EMP PREV ON (DATE) AA-1 REJECTED - SPOUSE IN MASTER FILE
  
  Employee award has already been made. A second employee application is keypunched into RASI and, therefore, rejects. This referral is a reminder that there is still an active spouse on record.

- EMP SSA NO ON AA-7 INVALID
  
  Item 1 on AA-7.

- ESTIMATED TOTAL EARNINGS CURRENT (LAST) (NEXT) YEAR SHOULD NOT BE BLANK OR ZERO
  
  Items 87, 83, and 92 of AA-1 and items 86, 82, and 97 of AA-3.

- EXCESS ANNUAL EARNINGS CURRENT (LAST) (NEXT) YEAR CODED INCORRECTLY
  
  Items 86, 82, and 91 of AA-1 and items 85, 81, and 90 of AA-3.

- EXCESS MONTHLY EARNINGS CURRENT (LAST) YEAR CODED INCORRECTLY
  
  Items 88 and 84 of AA-1 and items 87 and 83 of AA-3.

- FELONY CODE INVALID OF MISSING
  
  Item 19 of AA-1, item 19 of AA-3.

- FILED APPLICATION WITH SSA CODED INCORRECTLY
  
  Item 95 of AA-1 and 94 of AA-3, item 14 of AA-6 and item 27 of AA-7.

- FILING DATE GREATER THAN CURRENT DATE (INVALID)
  
  Filing date of AA-1 and AA-3.

- FILING DATE INVALID
  
  Filing date of AA-1 or AA-3.
• **INVALID G-230 TYPE CODE - ACTIVITY NOT PROCESSED**
  Type code item on G-230 omitted.

• **LAST RR EMPLOYMENT - RIGHTS NOT RELINQUISHED OR MISSING**
  Item 52 of AA-3.

• **MANUAL REVIEW CODE INVALID**
  Item 10 of G-230.

• **MARITAL STATUS CODED INCORRECTLY**
  Item 9 of AA-1.

• **MECHANICAL DUMP-POSSIBLE SPOUSE DUAL ANNUITY-COMPUTE MANUALLY**
  This reject referral is generated for spouse annuitants when a dual annuity is indicated on the application. It alerts the examiner that RASI will dump the case and the annuity must be computed manually either on ROC or the P.C. award shell program.

  The p.c. award shell program must be used if neither the employee annuitant nor the spouse applicant have any railroad service prior to 1975. With these types of cases the entire spouse annuity must be reduced by the full amount of their own employee annuity based on their own earnings.

• **MINOR CHILDREN CODED INCORRECTLY**
  Item 27 of AA-3.

• **M/S CODED INCORRECTLY**
  Item 27 of AA-1.

• **MONTHS OF NO EXCESS EARNINGS CURRENT (LAST) YEAR (CODED INCORRECTLY) SHOULD NOT BE ZERO**
  Items 89 and 85 of AA-1 and items 88 and 84 of AA-3.

• **NO SECOND LAST RR EMPLOYER BA NO. SECOND EMPLOYER SHOULD BE ZERO**
  Next to last ER number on AA-1.

• **NON-RR JOB LAST 12 MONTHS AFTER DLW-RR. AA-1 ITEM 55 BLANK**
  Item 55 of AA-1.
- OTHER RAILROAD EMPLOYMENT - ITEM 53 BLANK
  Item 53 of AA-3.

- OTHER RR EMPLOYMENT - RIGHTS NOT RELINQUISHED OR MISSING
  Item 59 of AA-3.

- OTHER (SPOUSE) SSA NO INVALID (CODED INCORRECTLY)
  Item 100 of AA-1, item 99 of AA-3.

- OUTSIDE EMPLOYMENT WITH FEDERAL AGENCY
  Item 60 of AA-1.

- POSSIBLE LEGAL PROCESS CASE - FORWARD TO CCR
  Item 18 of AA-1.

- PREVIOUS APPLICATION IN FILE - MASTER TYPE---
  A second application of the same type is received. The second application is rejected for manual handling.

- PREVIOUS MARRIAGE CODED INCORRECTLY
  Item 16 of AA-3.

- PREVIOUS RRB CLAIM NO INVALID
  Item 106 of AA-1 and item 103 of AA-3.

- PREVIOUS SPOUSE SSA NO INVALID
  Item 15a of AA-1 and item 18a of AA-3.

- PREVIOUSLY FILED FOR RRB BENEFITS CODED INCORRECTLY
  Item 104 of AA-1 and item 101 of AA-3.

- PRIOR SERVICE CODED INCORRECTLY
  Item 35 of AA-1.

- PUBIC SERVICE PENSION CODED INCORRECTLY
  Item 104 of AA-3.
• RR RTS REL CODED INCORRECTLY
  Item 49 of AA-1.

• RR EMPLOYMENT CLAIMED - DLW SHOULD NOT BE ZERO
  Item 51 of AA-3.

• RR EMPLOYMENT CODED INCORRECTLY
  Item 46 of AA-3.

• RR RTS NOT REL
  Item 41 of AA-1.

• RR SENIORITY RIGHTS NOT RELINQUISHED OR MISSING
  Item 60 of AA-3.

• SECOND YOUNGEST CHILD'S DOB INVALID
  Item 35 of AA-3.

• SELF-EMPLOYMENT LAST 12 MO CODED INCORRECTLY
  Item 72 of AA-1 and item 75 of AA-3.

• SEX CODE INCORRECT
  Item 6 of AA-1, item 10 of AA-3, item 7 of AA-6, item 8 of AA-7.

• SMIB OPTION CODED INCORRECTLY
  Item 118 of AA-1 and item 108 of AA-3, item 18 of AA-6, item 31 of AA-7.

• SPOUSE DATE OF BIRTH INVALID
  Item 11 of AA-1.

• SPOUSE DATE OF BIRTH MISSING
  The AA-1 does not reject and payment will not be delayed. The spouse DOB in item 11 is missing. No action is necessary if the spouse has filed for an annuity or if the D/O does not submit the information. If the DOB is available, prepare a G-59r after the EE's final award to notify Research of the spouse's DOB. The data is used in the RL-100 program to alert potential annuitants of their eligibility.
• SPOUSE REP PAYEE CODED INCORRECTLY
  Item 33 of AA-7.

• SPOUSE SSA NO SHOULD NOT BE ZERO
  Item 10 of AA-7.

• SPOUSE PREVIOUS MARRIAGE CODED INCORRECTLY
  Item 16 of AA-3.

• SPOUSE PREVIOUSLY FILED - AA-3 NOT PROCESSED
  A second AA-3 is received before RASI has completed processing of original application. The second application is rejected for manual handling.

• SSA NO INVALID
  Employee SSA number on AA-1, AA-3, AA-6, AA-7.

• STILL SELF-EMPLOYED CODED INCORRECTLY
  Item 73 on AA-1 and item 76 on AA-3.

• 360 MO CLAIM CODED INCORRECTLY O - DOB = XXXXXX - REPUNCH
  Item 34 of AA-1. The application will reject for this error only if the employee’s claimed date of birth is before 1927.

• TYPE OF ANNUITY INVALID - REPUNCH
  Item 25 of AA-1, item 25 of AA-3.

• YOUNGEST CHILD'S DOB INVALID
  Item 31 of AA-3.

C. RASI will reject RE-ENTRY DATA input for the following reasons. Re-enter the data correctly to clear the applicable call-up.

  Type code 150

• CURRENT PENSION AMOUNT INVALID

• CURRENT PENSION EFFECTIVE DATE INVALID

• EE CONTRIBUTION AMT GREATER THAN PENSION AMOUNT
• EE CONTRIBUTION AMOUNT INVALID
• EE CONTRIBUTION AMT NOT ZEROS. ENTER FULL PENSION AMOUNT
• EE SSA NUMBER INVALID
• EMPLOYER BA NUMBER INVALID
• INVALID CB BA NUMBER
• INVALID CLOSING DATE or INVALID CLOSING DATE CODE
• INVALID OTHER BENEFIT CODE - LABOR ORG. BA NO

The SUP ANN should not be reduced in this case.

• OTHER BENEFITS CODE INVALID
• PENSION AMOUNT OF REDUCTION EXCEEDS $43.00
• PENSION AMOUNT REDUCTION FOR SUPP INVALID
• PENSION AMT RED GREATER THAN PENS AMT
• PENSION EFFECTIVE DATE GREATER THAN CURRENT DATE
• SUPPLEMENTAL ANNUITY PREVIOUSLY PAID EFFECTIVE _______ SUP ANN data was submitted on this date. If no SUP ANN was paid, refer the case to P&S-RAC after taking manual action to pay SUP ANN.

• SUPPLEMENTAL PENSION AMOUNT SHOULD NOT BE ZEROS
• SUPPLEMENTAL PENSION DATE SHOULD NOT BE ZEROS
• TOTAL SERVICE MONTHS INVALID
• 150 ENTERED, EMPLOYEE ANNUITY NOT PAID FINAL - SUP ANN data must be coded as 954.

• 150 ENTERED WITH PLUG RATES; SUPP NEEDS TO BE HANDLED MANUALLY.

This case cannot be handled mechanically.

• 150 FORM PREVIOUSLY SUBMITTED, INPUT FORM IGNORED. SUP ANN data has already been entered, but the SUP ANN cannot be paid yet. If the SUP ANN ABD has elapsed, refer the case to RAPT.

Type Code 933
• DISABLED CHILD CODE INVALID
• DOCUMENT NOT REQUIRED - REFER TO ESA. 933 data is not required.
• ELIGIBILITY CODE INVALID
• INVALID DOM DETERMINATION CODE FOR ABD
• PREVIOUS MARRIAGE CODE INVALID
  Type code 947
• (947) IMPOSSIBLE CODE IN SWE CUR CON - REFER TO RCA
• (947) IMPOSSIBLE CUR CON DETERMINATION CODE
• (947, 948) SECOND DOCUMENT NOT REQUIRED - 947 data has already been submitted.
  Type code 948
• (948) IMPOSSIBLE CODE IN RED CAP - REFER TO RCA
• (948) IMPOSSIBLE RED CAP CODE
• (947, 948) SECOND DOCUMENT NOT REQUIRED - 948 data has already been submitted.
  Type code 954
• (954) BA NUMBER
• (954) CURRENT EFFECTIVE DATE
• (954) CURR PENSION AMOUNT
• (954) CURR PENS HIGHER BY MORE THAN 43.00
• (954) EE - CONTRIBUTION AMOUNT
• (954) EE CONTRIBUTION AMOUNT NOT ZEROS
• (954) EMPLOYEE HAS BEEN DUMPED - Pay the supp with the manual award if either is payable.
• (954) ENTER FULL PENSION AMOUNT
• (954) INCORRECT C/D CODE
• (954) INCORRECT PENSION STATUS WORD. Refer to RCA.
• (954) INVALID OTHER BENEFIT CODE

• INVALID OTHER BENEFIT CODE - LABOR ORG. BA NO

   The supp should not be reduced in this case.

• (954) INVALID SPECIAL CLOSING DATE

• (954) PENS AMT RED FOR SUPP ANN HIGHER THAN SUPP ANN

• (954) SPECIAL C/D BLANK

   Type Code 998

• P/S MONTHS INVALID

• P/S AVERAGE INVALID

• P/S METHOD CODE INVALID

• SECOND DOCUMENT NOT REQUIRED

• VERIFIED DOB CODE INVALID

D. RASI will reject TIER ONE OFFSET data for the following reasons. Where erroneous entries are indicated, re-enter correct data to clear 950/951, 953 or 957 call-up. Where no type code is indicated, the reject refers to 950/951 activity.

• ALL RATES AND/OR DATES ARE BLANK

• CURRENT SSA RATE PRIOR TO (eff date of latest COL increase). See instructions in RCM 9.2 for 950/951 activity.

• (DATE) EFFECTIVE DATE IS EARLIER THAN PRECEDING DATE

• (DATE) EFFECTIVE DATE IS SAME AS PRECEDING DATE

• 953 ALL RATES AND/OR DATES ARE BLANK

• 953 EFF DATE IS EARLIER THAN PRECEDING DATE

• 953 EFF DATE IS INVALID

• 953 EFF DATE IS THE SAME AS PRECEDING DATE

• 953 FIRST DATE IS EARLIER THAN SPOUSE ABD

• 953 OTHER BENEFIT CONTAINS AN INVALID CODE
• 953 SPOUSE DUMPED
• 953 SPOUSE PAID FINAL
• 953 CODED FOR PSP - NO DATES/RATES - RESUBMIT 953
• 953 EFFECTIVE DATE IS EARLIER THAN SPOUSE TIER 1 DATE
• OTHER BENEFIT CONTAINS INVALID CODE
• PREVIOUS SS EFFECTIVE DATE INVALID
• PREVIOUS SS EFFECTIVE DATE IS LATER THAN CURRENT SS EFFECTIVE DATE
• **** RATE IS INVALID (BLANK)
• SSA CLAIM NO DOES NOT MATCH NUMBER SHOWN ON AA-3
• SSA CLAIM NO INVALID
• SUFFIX (2 MAR) CONTAINS INVALID CODE
• SWE RR4 CONTAINS INVALID CODE - REFER TO RCA
• SWS IN STAT CONTAINS INVALID CODE - REFER TO RCA.

E. RASI will produce input reject referrals for 958 - LAG SVC input for the following reasons. Where incorrect or invalid data is indicated, resubmit. The messages are arranged alphabetically ignoring the preceding type code designation.

• 958 - BA NO. DOES NOT MATCH CLAIMED NUMBER
  Item 3 on the 958 does not agree with the last employer BA number shown in the master record. Determine which is correct. If the master record is wrong, prepare a 996 to change "EELSTBA," and then submit the 958 one run later. If the form is wrong, resubmit with the correct number.

• 958 - BA NO. INVALID
  Item 3 on the 958 is blank, incomplete or contains alpha characters.

• 958 - BA NO. INVALID - NEXT TO LAST EMPLOYER
  Item 6 is blank, incomplete or contains alpha characters.

• 958 - CODE NAME INVALID
  Item 2 on the 958 is blank or numeric.
• 958 - CURRENT LAG YEAR DIFFERENT FROM DLW YEAR
  Item 9 must be the same year as the date in item 4.

• 958 - CURRENT LAG YEAR INVALID
  Item 9 is blank or alpha characters.

• 958 - CURRENT YEAR ACTUAL SERVICE MONTHS INVALID
  Item 10 is blank or alpha characters.

• 958 - CURRENT YEAR DEEMED SERVICE MONTHS INVALID
  Item 11 is alpha characters.

• 958 - CURRENT YEAR SERVICE INDICATOR INVALID
  Item 9 is blank.

• 958 - CURRENT YEAR SERVICE MONTHS INVALID
  Item 10 is required because 15A is "NO," but is blank or alpha characters.

• 958 - CURRENT YEAR TOTAL SERVICE MONTHS = 0
  Items 10 11 and 10-C are blank.

• 958 - CURRENT YEAR TOTAL SERVICE MONTHS INVALID - GREATER THAN 12
  Items 10 11 and 10-C, when added, exceed 12 months.

• 958 - DLW INVALID
  Item 4 on the 958 is blank, or alpha or not 6 digits.

• 958 - DLW INVALID - NEXT TO LAST EMPLOYER
  Item 7 is blank or alpha or not 6 digits.

• 958 - DLW LATER THAN CURRENT DATE
  Item 4 on the 958.

• 958 - DLW LATER THAN CURRENT DATE - NEXT TO LAST EMPLOYER
  Item 7.

• 958 - DRR EARLIER THAN DLW
Item 5.

- 958 - DRR EARLIER THAN DLW - NEXT TO LAST EMPLOYER

Item 8.

- 958 - DRR INVALID

Item 5 is blank, incomplete or alpha characters, and this is not a disability case.

- 958 - DRR INVALID - NEXT TO LAST EMPLOYER

Item 6 is blank, incomplete or alpha characters, and this not a disability case.

- 958 - DRR LATER THAN CURRENT DATE

Item 5.

- 958 - DRR LATER THAN CURRENT DATE - NEXT TO LAST EMPLOYER

Item 8

- 958 - INSUFFICIENT SERVICE MONTHS FOR ANNUITY TYPE CODE. CONSIDER DEEMING.

RASI has determined that the service months in the SEARCH record plus the total creditable actual railroad service lag months from the G-88A.2 are insufficient to provide eligibility for the type of annuity being considered. Because this is prior to TRIC clearance, any claimed military service months used as compensation have not been considered. If creditable military service months are sufficient to provide eligibility, no further action is required. Control for the TRIC reply to verify that the military service months are creditable and provide eligibility. If not, and RASI dumps the case for denial for insufficient service.

Deemed railroad service months are explained in RCM 5.2.44-5.2.46. The most common situation is a disability case in which the additional service months are deemed in the 5-month waiting period to establish 240 months for an occupational disability. If there are months available between the employee’s claimed actual date last worked and date rights relinquished (age and service), or between the claimed date last worked and the annuity beginning date (disability), consider deemed railroad service months.

When notice of the RASI dump action is received, and deemed railroad service months could apply, refer the case to the Employer Service and Training Center in Assessment and Training. They will contact the railroad and verify the number of creditable deemed railroad service months. If deemed railroad service months are creditable, they will obtain a new G-90 before returning the case to RIS.
Then, process the case as follows:

If deemed months are sufficient to establish eligibility, pay the case on ROC; or,

If deemed months are insufficient to establish eligibility, deny the case.

- 958 - NO MATCH ON NEXT-TO-LAST BA NO.

  Item 6 does not agree with the next-to-last employer number in the master record. Determine which is correct. If the master record is wrong, prepare a 996 to change "EEPRVBA," and then submit the 958 one run later.

- 958 - NO NEXT-TO-LAST EMPLOYER. SECOND BA NO. INVALID

  Item 6. The master record shows only one lag employer. If there are two, refer case to OP-RIS. Otherwise, resubmit 958.

- 958 - NO SECOND BA NO. TWO EMPLOYERS CLAIMED

  The master record shows two lag employers. If there is one lag employer, refer case to P&S-RIS. Otherwise, enter both employers' lag data onto a 958 and submit.

- 958 - PRIOR LAG YEAR INVALID

  Item 12 is blank or alpha characters.

- 958 - PRIOR YEAR ACTUAL SERVICE MONTHS VALID

  Item 13 is alpha characters.

- 958 - PRIOR YEAR DEEMED SERVICE MONTHS INVALID

  Item 14 is alpha characters.

- 958 - PRIOR YEAR SERVICE INDICATOR INVALID

  Item 12 is required because there are two lag years, but it is blank.

- 958 - PRIOR YEAR SERVICE MONTHS INVALID

  Item 12 is required because 15-A is "NO," but it is blank or alpha or one number.

- 958 - PRIOR YEAR TOTAL SERVICE MONTHS = 0

  Item 13 is blank, but 14 is also blank.

- 958 - PRIOR YEAR TOTAL SERVICE MONTHS INVALID - GREATER THAN 12

  Item 13 and 14, when added, exceed 12 months.
• 958 - SUBMITTED FOR NON-LAG YEAR. CERTHRUDTE IS 12 (___). CORRECT DATES AND RESUBMIT, OR REFER TO RAPT TO CLEAR LAG CALL-UP

Item 4 on the 958 (DLW - last employer) is not in the current lag period. If the DLW is different from the AA-1 (item 38), and is no longer in a lag period, refer the case to P&S-RIS to clear the 958 call-up after submitting a 996 to change "EEDLWRR." If the form is wrong, submit a 958.

F. RASI produces the following input reject referrals explaining why a proof was rejected. Where action is required, submit a correct 900 to establish a proof on the master record.

• AA-3 DOM UNEQUAL TO G-91 DOM

There is a discrepancy between the date of marriage claimed on the AA-3 and the date of marriage verified. Investigate discrepancy. If DOM on AA-3 is correct, resubmit a corrected 900. If DOM on 900 is correct, prepare a 996 to correct DOM in master record before submitting 900.

• CHILD VERIFIED DOB NOT AS CLAIMED

Handle as for message below.

• CHILD DOB DOES NOT MATCH CLAIMED DOB

If a minor child was claimed on the AA-3 and is needed for spouse eligibility, investigate the discrepancy. If the child's DOB on the AA-3 is correct, submit a correct 900. If the DOB on the 900 is valid, prepare a 996 to correct DOB in the master record before submitting a 900.

If a child's POA is not required (Child is disabled or the spouse has claimed a minor child but is entitled without one) take the following action:

Prepare two (2) 996's. Item 1 and 2 on both forms should be completed normally for a spouse. Items 3-7 should be completed as follows:

First 996

3. CODE NAME SP996
4. EXAM NO RCA (Do not use exam#.) CORRECTED OR CHANGED DATA
5. PRESENT CONTENTS 4
6. CHANGED CONTENTS 0 (zero)
7. FIELD NAME SWSAGERELCHLD
Second 996

3. CODE NAME SP996
4. EXAM NO RCA (Do not use exam#.) CORRECTED OR CHANGED DATA
5. PRESENT CONTENTS (blank)
6. CHANGED CONTENTS 0 (zero)
7. FIELD NAME CLS902

Note: For both 996’s, space out unused positions.

8. INQ CD

F

NOTE: Do NOT resubmit child’s proof of age or the 902 call-up will be reset.

- DISCREPANCY IN 1ST OR 2ND M/S PERIOD BEGINNING OR ENDING DATES

The dates of M/S indicated on the 900 are discrepant with those found in BDP records. RASI will accept 900 and continue to process claim. If annuity is paid incorrectly, recertify award with correct M/S.

- INVALID CODE IN M/S MEANS OF ENTRY

- INVALID CODE IN M/S TYPE OF DISCHARGE

- INVALID DATA IN DATE OF MARRIAGE

- INVALID DATA IN EE (SP) (CHILD) DOB (DOB WT) -

- INVALID DATE IN M/S

- M/S ENDING DATE PRIOR TO M/S BEGINNING DATE

- M/S PROOF NOT ACCEPTED - END DATE PRIOR TO 1-37

RASI will not accept proof for prior military service; an examiner determination is necessary to determine acceptability of proof before using prior M/S in annuity computation.

- M/S START DATE PRIOR TO 1-1-37, CHANGE TO 1-37

For mechanical computation purposes, RASI will only consider military service after 1-1937. If an annuity computation is to include prior M/S, handle manually.
• SECOND PERIOD M/S REJECTED - DUPLICATE OF FIRST

• (EE) (SP) (CHILD) VERIFIED DOB NOT AS CLAIMED -
  
  Investigate discrepancy. If claimed DOB is incorrect, prepare a 996 to change master record before submitting 900.

G. DUMP data is rejected by RASI for the following reasons. When invalid or discrepant data is found, submit corrected 991.

• ATTEMPTED DUMP OF DUMMY EMPLOYEE RECORD SUBMIT 991 FOR SPOUSE ONLY DUMP

• CHANGE OF CHARGE FIELD CONTAINS INVALID CODE

• (EE) (SP) DUMPED CASE CODED FOR IMMEDIATE DROP
  
  RASI has already dumped case; do not reenter 991.

• FORM CODE INVALID

• NAME DOES NOT MATCH MASTER RECORD

• (EE) (SP) PD FINAL CASE CODED FOR IMMEDIATE DROP
  
  RASI has already paid case; do not reenter 991.

• SP RECORD NOT FOUND

H. RASI will reject IMPACT/SPAR input for the following reasons.

• TIER 1 (2) RATE INVALID $XXXXXX - RESUBMIT 911

• VDB RATE INVALID $XXX - RESUBMIT 911

• IMPACT ALREADY PAID - 911 REJECTED

• CODE NAME DOES NOT MATCH RASI BE CODE NAME - RESUBMIT 911.

• SPAR TIER 1 (2) RATE INVALID $XXXXXX - RESUBMIT 911

• SPAR ALREADY PAID - 911 REJECTED

• CODE NAME DOES NOT MATCH RASI SPOUSE CODE NAME - RESUBMIT 911.

• SPAR TIER 1 AND SPAR TIER 2 IS GREATER THAN $999.

  NEW SPAR TIER 1 CONTENTS
NEW SPAR TIER 2 CONTENTS

I. RASI will reject a G-325 for the following reasons. Send folder to DPS for corrective action and re-entry.
   - DIAGNOSTIC CODE INVALID
   - DISABILITY BEGINNING DATE OR RATING CODE INVALID
   - FREEZE CODE OR FREEZE DISABILITY DATE INVALID
   - NAME ON FORM DOES NOT MATCH MASTER RECORD
   - REP PAYEE CODE INVALID
   - SWE DISABILITY NOT EQUAL TO 3 - REFER TO RCA

J. NAME-ADD data will reject for the following reasons. Prepare corrected 997 and re-submit.
   - ADDRESS MUST BE AT LEAST TWO LINES LONG
     If address consists of only one line, then city and state must be written on separate lines.
   - AT LEAST TWO NAME LINES ARE REQUIRED
     If a change in name and address is being made and a representative payee is being added, at least two name lines must be used.
   - CHANGE CODE INVALID
   - CLAIMANT'S NAME MUST BEGIN IMMEDIATELY AFTER THE WORD **FOR**
     If a representative payee is part of a name and address entry, the word "FOR" must be written at the beginning of the second name line (followed by a blank space) and must be followed by claimant’s name.
   - CODE NAME DOES NOT MATCH MASTER RECORD
   - CONFLICTING ITEMS - CHANGE CODE**** NAME AND ADDRESS CODE***
     RASI will accept a 997 submitted for both employee and spouse in cases where only an address change is being made. If the codes used indicate any other type of change, RASI will reject the 997.
   - DATA FOUND BEYOND 3RD POSITION OF 1ST NAME LINE
Only three items may be entered on the name line of the 997: first and middle name or initials and surname. If a fourth item is entered, RASI will reject. However, RASI will not reject for the suffixes "II", "III", "MD", "JR", or "SR".

- **EMPLOYEE AND SPOUSE ADDRESS CHANGE NO SPOUSE RECORD FOUND**
  
  997 will not reject; change in employee's address will be made.

- **FIRST LINE OF A TWO LINE NAME SHOULD BE TWO CHARACTERS LONG**
  
  In a two line name, RASI will not accept a single initial as one line. Either add a second initial or spell out entire first name.

- **FIRST POSITION OF ADDRESS LINE IS BLANK**
  
  Group mark must be in first box of address line.

- **997 REQUIRED - G/M MISSING IN FIRST POSITION OF ADDRESS**
  
  This message occurs when both the name and address are being changed, but no group mark was entered before the address. Without the group mark, RASI cannot differentiate between the name or address. Therefore, when preparing a new 997, be sure to enter both the name and address, separated by a group mark.

- **INCOMING ADDRESS CONTAINS MULTIPLE GROUP MARKS**
  
  Only one group mark at beginning of address line is necessary.

- **INCOMING ADDRESS DOES NOT HAVE GROUP MARK**

- **INCOMING ADDRESS EXCEEDS FOUR LINES**
  
  Rewrite address to fit on four lines.

- **INCOMING NAME/ADDRESS LINE IS BLANK**
  
  Item 5 is coded for name or address change; therefore, a name or address entry is necessary.

- **INITIALS MUST BE SEPARATED BY A SPACE**

- **INVALID THREE LINE NAME IN MASTER - REFER TO RCA**

- **INVALID WORD IN NAME LINE**
  
  RASI will not accept numeric characters in a name entry.

- **LINE DOES NOT BEGIN WITH GROUP MARK**
997 is coded for address change only. Therefore, the first line must begin with a blank space.

- **LINE 1 THRU 5 SHOULD BE BLANK**
  
  Item 2 is coded 4 or 5; therefore, no entry should be made in name-address area.

- **LINE 3 THRU 5 SHOULD BE BLANK**
  
  997 is coded for name change only; therefore, no address entry should be made.

- **MASTER RECORD CONTAINS AN INVALID ADDRESS SUBMIT 997 TO REENTER CLAIMANT NAME AND ADDRESS**
  
  Name and address on application was incorrectly written (e.g., no blank space at beginning of address; more than four lines long, etc.). Correctly enter name and address on 997.

- **MASTER RECORD INDICATES AN ACTIVE REP PAYEE**
  
  Item 2 was coded "0", but master record indicates a representative payee. Enter appropriate payee code.

- **MORE THAN ONE WORD IN SURNAME**
  
  Surnames with two words should be written as one name, e.g., STJOHN.

- **MORE THAN TWO NAME LINES SHOW**
  
  Name entry must be limited to two lines.

- **NAME/ADDRESS CODE IS INVALID**

- **NAME LINE CANNOT BEGIN WITH GROUP MARK**
  
  A space was entered in the first position of the name.

- **NAME LINE CONTAINS AN INVALID ONE POSITION WORD**
  
  A last name must contain more than one character.

- **NAME LINE CONTAINS NUMERIC DATA**

- **NAME LINE MUST CONTAIN MORE THAN ONE WORD**
  
  RASI will reject 997 if there are not two or more "words" in name entry.

- **NO ACTIVE MASTER FOUND FOR EMPLOYEE (SPOUSE)**
RASI does not have active record for annuitant. Use G-607 to change address.

- **NO NAME FOUND IN INCOMING NAME AND ADDRESS**

  997 was coded for change of name and address but only address entry was made. This message also occurs if no group mark was used in the address entry (without a group mark RASI cannot differentiate between name and address).

- **NO REP PAYEE FOUND IN MASTER RECORD**

  Item 2 was coded "5", but there is no indication of a representative payee on master record.

- **PAYEE CODE INVALID**

- **PAYEE CODE INVALID FOR ADDRESS CHANGE**

- **POSITION FOLLOWING GROUP MARK IS BLANK**

  Address must begin in space immediately following blank position.

- **POSITION 21/22 OF NAME OR ADDRESS LINE IS GREATER THAN BLANKS**

  Each line of name and address must be limited to 20 characters.

- **PROPOSED NAME AND/OR ADDRESS CHANGE WOULD REQUIRE SIX LINES**

  Rewrite entry to fit on five lines.

- **WORD **FOR** MUST PRECEDE CLAIMANT NAME**

  When entering representative payee, the word "FOR" (followed by a space) must be written on the second line along with claimant's name.

K. A 996 will be rejected for the following reasons. Where incorrect or impossible data is indicated, submit a corrected 996. If the message indicates that a manual op code has been set, submit a 995 to clear that as well.

- **CODE NAME IN MASTER DOES NOT MATCH RASI EE (SP) CODE NAME MANUAL OP CODE SET TO 2. 995, 996 REQUIRED.**

  The 996 rejected because the code name entered in item 3 is incorrect. It is either misspelled or does not match the code name of the payee code in item 2.

- **CORRECTION ATTEMPTED BY (EXAMINER NUMBER) MASTER CONTENTS **** DO NOT EQUAL 996 PRESENT **** MANUAL OP CODE SET FOR CORRECTION FAILURE AT LOCATION ****
996 entries do not agree with the master record contents. The digital location is also shown. A manual OP code is set to prevent payment until record correction can be made. This manual OP code will clear when another 996 is submitted. If none will be submitted, refer the case to RAPT to clear the 995 and 996 call-ups.

- **NO MATCHING RASI FIELD NAME**
  
  The entry in item 7 does not match any field in the RASI master. Check the 996 data for a discrepancy. Also check the field names printed on the reject notice.

- **PRESENT CONTENTS **** AND/OR CHANGED CONTENTS **** NOT NUMERIC**
  
  There are alpha characters shown for a field which should contain only numeric characters.

L. RASI rejects a 995 for the following reasons. Where erroneous information is indicated, submit a corrected 995.

- **CHANGE CODE INVALID**

- **CHANGE CODE IS 1 (3) DUMMY EMPLOYEE RECORD**
  
  RASI has a spouse-only application and no active employee record. Change code on 995 was incorrectly marked "1" or "3".

- **INVALID CODE NAME**

- **NO ACTIVE SPOUSE DETAIL PROCESSED FOR EMPLOYEE**
  
  Change code on 995 was "3", but only employee application is on master record. Manual OP code will change for employee.

- **TYPE OF ACTION INVALID**
  
  RASI did not set a man OP code; therefore, 995 was unnecessary.

### 9.3.20 Survivor (SURVEA) Referral Messages - General

SURVEA (Survivor Electronic Attainments) is the computer program that selects survivor annuitants for annuity adjustments or notices when they attain a certain age. SURVEA uses Research’s MBF for the initial selection and compares these records to CHICO. If a match is made, a particular referral or listing is issued, followed by the specific age attainment notice. This message will be more fully explained in Section C below.

A. **Referral Messages Printed on Listings**

1. **In Suspense FRA** - These cases are selected in the month of FRA attainment, the third month after attainment if the case has not been handled; and every
month after the third month until the case is handled. This listing is used by the survivor post section to investigate cases where a widow(er) is attaining full retirement age and has been in suspense due to work. Also listed are cases where the referral of "NO PAYMENT RECORD FOR THIS RESEARCH RECORD," as described in Section C below, is issued.

2. **HI Entitlement** - These cases are selected six months before the month of age 65 attainment. This listing is used by the Medicare Program Section to set up or verify enrollment for HI entitlement at age 65. Also, a listing is prepared for MPS of cases where the widow(er) came on the rolls from one to five months in advance of age 65 attainment.

**B. RL-175a Advance Notices**

There are four situations in which an RL-175a advance notice is released.

<table>
<thead>
<tr>
<th>SITUATION</th>
<th>RL-175a</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Age 18 Attainment</td>
<td></td>
</tr>
<tr>
<td>A. child age 18; no widow(er) involved</td>
<td>RL-175a #1</td>
</tr>
<tr>
<td>B. Last child age 18; widow(er) involved</td>
<td>RL-175a #1 &amp; #4</td>
</tr>
<tr>
<td>2. Any student attaining age 19</td>
<td>RL-175a #11</td>
</tr>
<tr>
<td>3. Age 16 Attainment</td>
<td></td>
</tr>
<tr>
<td>Last child attaining age 16, and the parent involved is a 1981 Amendment beneficiary</td>
<td>RL-175a #6</td>
</tr>
</tbody>
</table>

The RL-175a advance notices are released 4 months before attainment. The four RL-175a letters are displayed in section 9.3.22 of this chapter.

A copy of the letter is sent to the field office for their records. Another copy is filed in the folder. No examiner action is needed in these cases.

**C. 805 Referral Notices** - The 805 referral is matched with the folder and sent to examiners for any necessary action. The specific messages are as follows:

1. **CASE IN SUSPENSE. DEVELOP.** This message is only issued one time.

2. **CHILD AGE 17 AND 11 MONTHS.** This message is issued in the month prior to age 18 attainment. There are no referrals for the next two subsequent months.
3. CHILD OVER 18 NOT DISABLED NOR FTS BORN 99-99. This message is issued the third month after the child attains age 18 if the case has not been handled. A referral is issued every subsequent month until handled or until the child is age 22, whichever is earlier.

4. WIDOW FULL RETIREMENT AGE. CHILD INVOLVED. This message is issued in the month a widow(er), who is being paid as a young mother or father with a child in care, is attaining full retirement age. There is no referral for the next two subsequent months. If the case has not been handled by the third month after the initial referral another referral will be released and one each month thereafter until the case is handled.

5. IN SUSP RIB/DIB AGE REDUCTION ADJUSTMENT REQ. This message is issued in the month a widow(er) type annuitant attains FRA and a RIB/DIB adjustment is necessary.

6. INTERIM WIDOW FOR 6 MOS. - INVESTIGATE. These cases are selected for the sixth month and all following months after the employee's death if a spouse is involved who has not been converted to a widow(er) or been terminated. If the DOD is unknown at the time of the employee's termination, Research uses an assumed DOD, 1 month prior to the time of termination. (Their records are earmarked that this is an assumed DOD). If an assumed DOD was used and the employee was enrolled in Medicare, send the case to MPS to correct their records after all other action is completed.

7. STUDENT AGE 19. This message is issued in the month of age 19 attainment. There are no referrals for the next two subsequent months.

8. STUDENT OVER 19 NOT DISABLED BORN 99-99. This message is issued in the third month after the student attains age 19, if the case has not been handled. A referral is issued every subsequent month until handled. The month and year of DOB is entered in the "9's" area.

9. LAST CHILD ATTAINING AGE 16. This message is issued in the month prior to age 16 attainment. There are no referrals for the next two subsequent months.

10. CHILD 17 + 8 MOS--BAD FAMILY CODES--NO FAST. This message is issued 4 months prior to age 18 attainment. This message is issued in cases in which the PREH family code and the CHICO family codes do not match and SURVEA cannot determine which record to select for termination.

11. NO PAYMENT RECORD FOR THIS RESEARCH RECORD. Generally, this message is issued when the Research record and the CHICO record do not agree on payee code or date of birth or a CHICO record, with the same prefix and claim number as the Research record, cannot be found. SURVEA will not issue the specific message or notice for the age attainment with this type of discrepancy because it cannot verify pay status. Under this message, the reason
for the selection will also be given, along with the date of birth in Research's record. In addition to the reasons listed in 1. through 10. above, other reasons are:

- CHILD AGE 17 AND 8 MOS - RL-175a (#1 or #1 and #4)
- CHILD AGE 15 AND 8 MOS - RL-175a (#6)
- STUDENT AGE 18 AND 8 MOS - RL-175a (#11)

The timetable for the release of message 10 is determined by the specific reason which initially selected the case.

Examiners must determine the source of the discrepancy and take appropriate action. This could include correcting the Research record via a G-59, correcting the CHICO record via a G-607, releasing an RL-175a type letter manually, and adjusting the case for the age attainment.

9.3.21 SURVEA Criteria For Message Selection

SURVEA initially selects attainment records from the Research file. Research has an individual record for each survivor beneficiary. SURVEA then attempts to match the record on CHICO. CHICO only has a record for a particular payee code.

1. Whenever the prefix and claim number from the Research record cannot be found on CHICO, a referral of "NO PAYMENT RECORD FOR THIS RESEARCH RECORD" will be issued.

2. If the payee code on Research records matches the payee code on CHICO, SURVEA then looks at the dates of birth. (See 3 below.) If the payee codes do not match and CHICO's payee code is greater than Research's payee code, a referral of "NO PAYMENT RECORD FOR THIS RESEARCH RECORD" is issued. If the payee codes do not match and CHICO's payee code is not greater than Research's payee code, SURVEA continues to read the CHICO records for that claim number until payee codes either match or CHICO's payee code is greater than Research's payee code.

3. If the date of birth on Research records matches the date of birth on CHICO and there is no termination on CHICO, the record is selected and the normal referral message is issued. If there is a termination on CHICO, the record is not selected. If there is a suspension on CHICO, a referral of "NO PAYMENT RECORD FOR THIS RESEARCH RECORD" is issued. If the dates of birth do not match, SURVEA looks at the activity date. If CHICO's activity date is greater than Research's activity date, a referral of "NO PAYMENT RECORD FOR THIS RESEARCH RECORD" is issued.

Exception: The COL voucher number is 471. Since Research is not updated for the COL as quickly as CHICO, SURVEA will by-pass the activity date edit check if the
voucher number on CHICO is 4/1 and Research's voucher date is different. In these cases, the normal referral message will be issued.

If CHICO's activity date is equal to or less than Research's activity date and there is no termination on CHICO, the case will be selected and the normal referral message is issued. If there is a termination on CHICO, the record is not selected.

9.3.22 SURVEA RL-175A Notices

RL-175A #1 A CHILD IN THIS CASE WILL ATTAIN AGE 18 IN ___________.

THE CHILD'S ANNUITY WILL TERMINATE WITH THE MONTH AGE 18 IS ATTAINED UNLESS THE CHILD IS TOTALLY AND PERMANENTLY DISABLED, OR IS A FULL-TIME STUDENT IN AN ELEMENTARY OR SECONDARY SCHOOL. IF EITHER OF THESE CONDITIONS EXIST, CALL OR WRITE THE RAILROAD RETIREMENT BOARD OFFICE NEAREST YOU RIGHT AWAY.

IF YOU BELIEVE THIS DECISION IS NOT CORRECT, YOU MAY REQUEST THAT THE DECISION BE RECONSIDERED. YOUR REQUEST MUST BE IN WRITING AND SHOULD EXPLAIN WHY YOU DISAGREE. IF YOU WITH THIS RECONSIDERATION, YOUR REQUEST MUST BE RECEIVED BY THE RAILROAD RETIREMENT BOARD WITHIN 60 DAYS FROM THE DATE OF THIS NOTICE. YOU MAY SEND YOUR REQUEST TO ANY FIELD OFFICE OF THE RAILROAD RETIREMENT BOARD, OR YOU MAY SEND IT DIRECTLY TO THE FOLLOWING ADDRESS: RAILROAD RETIREMENT BOARD, RECONSIDERATION SECTION, 844 NORTH RUST STREET, CHICAGO, ILLINOIS 60611-2092. IF YOU HAVE ANY ADDITIONAL EVIDENCE TO BE CONSIDERED, YOU SHOULD INCLUDE IT WITH YOUR REQUEST.

IF YOU DISAGREE WITH THE RECONSIDERATION DECISION, YOU MAY THEN APPEAL TO THE BUREAU OF HEARINGS AND APPEALS WITHIN 60 DAYS FROM THE DATE OF THE RECONSIDERATION DECISION.

IF YOU DO NOT REQUEST RECONSIDERATION WITHIN 60 DAYS FROM THE DATE OF THIS NOTICE, YOU MAY NOT FILE AN APPEAL AT A LATER DATE.

THERE IS AN OFFICE LOCATED AT
A CHILD IN THIS CASE WILL ATTAIN AGE 18 IN __________.

WHEN A CHILD ATTAINS 18, HE MAY CONTINUE TO RECEIVE AN INSURANCE ANNUITY IF HE IS TOTALLY AND PERMANENTLY DISABLED, OR IF HE IS A FULL-TIME STUDENT IN AN ELEMENTARY OR SECONDARY SCHOOL.

YOUR ANNUITY WILL END WHEN THE CHILD REACHES AGE 18 UNLESS HE IS IN YOUR CARE AND ENTITLED TO A DISABLED CHILD’S INSURANCE ANNUITY, OR YOU ARE AGE 50 OR OLDER AND HAVE A PERMANENT DISABILITY WHICH PREVENTS YOU FROM DOING ANY WORK. A WIDOW UNDER AGE 60 CANNOT QUALIFY FOR AN ANNUITY BASED ON HAVING A FULL-TIME STUDENT IN HER CARE.

IF YOU ARE AT LEAST 50 AND DISABLED, OR IF THE CHILD IS DISABLED OR A FULL-TIME STUDENT IN AN ELEMENTARY OR SECONDARY SCHOOL, CALL OR WRITE THE RAILROAD RETIREMENT BOARD OFFICE NEAREST YOU RIGHT AWAY.

IF YOU BELIEVE THIS DECISION IS NOT CORRECT, YOU MAY REQUEST THAT THE DECISION BE RECONSIDERED. YOUR REQUEST MUST BE IN WRITING AND SHOULD EXPLAIN WHY YOU DISAGREE. IF YOU WISH THIS RECONSIDERATION, YOUR REQUEST MUST BE RECEIVED BY THE RAILROAD RETIREMENT BOARD WITHIN 60 DAYS FROM THE DATE OF THIS NOTICE. YOU MAY SEND YOUR REQUEST TO ANY FIELD OFFICE OF THE RAILROAD RETIREMENT BOARD, OR YOU MAY SEND IT DIRECTLY TO THE FOLLOWING ADDRESS: RAILROAD RETIREMENT BOARD, RECONSIDERATION SECTION, 844 NORTH RUSH STREET, CHICAGO, ILLINOIS 60611-2092. IF YOU HAVE ANY ADDITIONAL EVIDENCE TO BE CONSIDERED, YOU SHOULD INCLUDE IT WITH YOUR REQUEST.

IF YOU DISAGREE WITH THE RECONSIDERATION DECISION, YOU MAY THEN APPEAL TO THE BUREAU OF HEARINGS AND APPEALS WITHIN 60 DAYS FROM THE DATE OF THE
RECONSIDERATION DECISION.

IF YOU DO NOT REQUEST RECONSIDERATION WITHIN 60 DAYS FROM THE DATE OF THIS NOTICE, YOU MAY NOT FILE AN APPEAL AT A LATER DATE.

THERE IS AN OFFICE LOCATED AT

(NEAREST FIELD OFFICE)

ROBERT J. DUDA
DIRECTOR OF OPERATIONS

YOU WILL ATTAIN AGE 19 IN _______________________.

A STUDENT’S ANNUITY ENDS WITH THE EARLIER OF GRADUATION FROM HIGH SCHOOL OR ATTAINMENT OF AGE 19. IF YOU ARE IN FULL-TIME ATTENDANCE AT A SECONDARY SCHOOL IN THE MONTH YOU ATTAIN AGE 19, AND HAVE NOT COMPLETED THE REQUIREMENTS FOR, OR RECEIVED A DIPLOMA, ANNUITY PAYMENTS MAY BE EXTENDED FOR A SHORT TIME PAST YOUR 19TH BIRTHDAY. OUR FIELD OFFICE WILL BE CONTACTING YOU SOON TO DETERMINE WHEN YOUR ANNUITY WILL END.

IF YOU ARE DISABLED, CONTACT THE NEAREST RAILROAD RETIREMENT BOARD OFFICE AS SOON AS POSSIBLE SINCE YOU MAY BE ELIGIBLE FOR AN ANNUITY BASED ON DISABILITY.

IF YOU BELIEVE THIS DECISION IS NOT CORRECT, YOU MAY REQUEST THAT THE DECISION BE RECONSIDERED. YOUR REQUEST MUST BE IN WRITING AND SHOULD EXPLAIN WHY YOU DISAGREE. IF YOU WISH THIS RECONSIDERATION, YOUR REQUEST MUST BE RECEIVED BY THE RAILROAD RETIREMENT BOARD WITHIN 60 DAYS FROM THE DATE OF THIS NOTICE. YOU MAY SEND YOUR REQUEST TO ANY FIELD OFFICE OF THE RAILROAD RETIREMENT BOARD, OR YOU MAY SEND IT DIRECTLY TO THE FOLLOWING ADDRESS: RAILROAD RETIREMENT BOARD, RECONSIDERATION SECTION, 844 RUSH STREET, CHICAGO, ILLINOIS 60611-2092. IF YOU HAVE ANY ADDITIONAL EVIDENCE TO BE CONSIDERED, YOU SHOULD INCLUDE IT WITH YOUR REQUEST.
IF YOU DISAGREE WITH THE RECONSIDERATION DECISION, YOU MAY THEN APPEAL TO THE BUREAU OF HEARINGS AND APPEALS WITHIN 60 DAYS FROM THE DATE OF THE RECONSIDERATION DECISION.

IF YOU DO NOT REQUEST RECONSIDERATION WITHIN 60 DAYS FROM THE DATE OF THIS NOTICE, YOU MAY NOT FILE AN APPEAL AT A LATER DATE.

RL-1175A #6

YOUR CHILD WILL ATTAIN AGE 16 IN ________________.

YOUR ANNUITY CAN CONTINUE IF YOU HAVE IN YOUR CARE AN UNMARRIED DISABLED CHILD UNDER AGE 22 OR A CHILD WHO BECAME DISABLED BEFORE AGE 22. YOU CAN ALSO GET AN ANNUITY IF YOU ARE AT LEAST 50, DISABLED FOR ALL WORK, AND MEET THE NECESSARY MARRIAGE REQUIREMENTS. IF EITHER OF THESE CONDITIONS EXIST, CONTACT THE NEAREST OFFICE OF THE RAILROAD RETIREMENT BOARD AS SOON AS POSSIBLE.

IF YOU BELIEVE THIS DECISION IS NOT CORRECT, YOU MAY REQUEST THAT THE DECISION BE RECONSIDERED. YOUR REQUEST MUST BE IN WRITING AND SHOULD EXPLAIN WHY YOU DISAGREE. IF YOU WISH THIS RECONSIDERATION, YOUR REQUEST MUST BE RECEIVED BY THE RAILROAD RETIREMENT BOARD WITHIN 60 DAYS FROM THE DATE OF THIS NOTICE. YOU MAY SEND YOUR REQUEST TO ANY FIELD OFFICE OF THE RAILROAD RETIREMENT BOARD, OR YOU MAY SEND IT DIRECTLY TO THE FOLLOWING ADDRESS: RAILROAD RETIREMENT BOARD, RECONSIDERATION SECTION, 844 NORTH RUSH STREET, CHICAGO, ILLINOIS 60611-2092. 9.3.30 PAM Referral Messages

PAM edits and processes all incoming Social Security transmissions from the Social Security Automated Data Transfer System (SSADTS). Whenever possible, it processes to completion and pays transmitted award records. If the final PAM award requires examiner review, PAM prints a message or messages on the RR-1a award form.

In other cases, omissions or discrepancies in the payment records preclude payment. PAM refers such cases out for manual handling with a descriptive message printed on the Mechanical Output Referral (MOR) form. A SOLAR award is also generated if the transmission indicates a payment activity to be taken, but the MOR message is not printed on it.

A. The following list of PAM messages is arranged alphabetically for easy reference. Each message has its numeric equivalent displayed in parentheses after it. If too many messages are necessary on PAM output, the numeric codes will be printed for the remaining messages instead of the actual message.

All messages with a numeric code beginning with "5" are reject referrals. These transmissions are referred to examiners for manual handling. Numeric codes beginning with a "6" indicate "alert" messages. These records are coded for examiner review after PAM processes the case. Numeric codes beginning with a "7" are non-review, informational messages which do not require examiner action.

All of these messages are produced by PAM as the result of its evaluation and interpretation of SSADTS data. No message is directly transmitted from SSA.

- ALERT - ACTIVE RECORD ON PAM (701)
If there is an active unpaid record remaining in the PAM system when another record is referred out for manual handling, this message is printed. Although the active record may not be for the same beneficiary as the one referred out, it will be in the same family group.

- **ALERT - BENE'S OWN NUMBER EXTRACTED FROM CHICO (609)**

  A record was transmitted without the beneficiary's own account number but the BOAN is on CHICO. PAM will update the record with the BOAN from CHICO.

- **ALERT - CASE ON RASI (613)**

  PAM has processed a case for payment and RASI contains a pending record.

- **ALERT - CHECK FOR POSSIBLE SS COL REFERRAL (618)**

  PAM has processed an ss adjustment action but there could be an 805 referral still outstanding for the case from the mechanical COL run. If there is a referral, follow existing instructions for handling it.

- **ALERT - CHECK RRB's USE OF MIL SERV (603)**

  If PAM is able to process to completion a BIC initial SS award transmission for an RR employee and there is an RR annuity and item 33(B) is E, I, M or S, the message will be printed. If RRB is using M/S as compensation in the annuity computation, use an RR-3 to notify the PC of RRB's use of M/S. (SSA may have to recompute the beneficiary's PIA to exclude M/S.)

- **ALERT - CHICO/SS RATES INCONSISTENT (612)**

  PAM has processed a non-award action such as a suspension, termination, or change of address even though the SS rate on CHICO is not equal to the rate in the PAM record. Review the case to determine if a rate correction is necessary.

- **ALERT - COA INDICATOR (642)**

  PAM did not process an SSA transmission to completion and a change of address is indicated on the SSA transmission. The change of address should be considered when the award is manually processed.

- **ALERT - COA NOT PROCESSED/RR IN FORCE (608)**

  The SSADTS transmission contains a change of address for the SS benefit, but there is an RR annuity in force. PAM will not process the COA. Review the file to verify that SSA's address is not an old or invalid one and if a change is required, prepare a G607.

- **ALERT - CORRECT PART RATE BEGINNING DATE MO-YR (614)**
An adjustment action in a partial rate case has caused the partial rate beginning date to change to the voucher date of the current award. Examiner must complete a form G-607 to change the beginning date to the date of the first award which initiated the partial rate (see RCM 9.4, G-607 procedure). The date shown in the message is the voucher date now in the record which must be changed to the correct partial rate beginning date.

- **ALERT - DPA/SSA NAME DISCREPANCY (639)**
  
  The surname of the SS beneficiary is not the RR employee's surname in the SEARCH record. In some cases, this may not indicate a problem (for example, RRB pays certain divorced wives' SS benefits). In other cases, it may indicate incorrect or discrepant information on SSA's transmission which should be corrected.

- **ALERT - DOB DISCREPANCY - CHECK CHICO-RASI-DPA (604)**
  
  If the DOB on SSA's record does not match the DOB in RRB's record (the RRB DOB as shown on CHICO or the SEARCH DOB-EE only or the RASI DOB, or the SSA DOB as shown on CHICO - If the RRB on CHICO is blank), this message will be printed. A DOB discrepancy will not prevent payment. Existing procedure should be followed to resolve the DOB discrepancy.

- **ALERT - EARMARK MBR WITH CORRECT RR CLAIM NO/PREFIX (602)**
  
  If SSA transmits no RRB claim number or the RRB claim number transmitted cannot be verified by SEARCH, a SEARCH request is made on the SSA claim number. If SEARCH verifies a valid RRB claim number, this number will be printed in item 1 as well as the above message. Examiners must complete a code "90" G-60 to enter the correct RRB claim number as shown in item 1 on the MBR. (See RCM 9.1 Appendix C.) This message will continue to appear until the correct RRCLNO is earmarked on the MBR. (See RCM 9.1 Appendix C.) This message will continue to appear until the correct RRCLNO is earmarked on the MBR. The earmarking process usually takes two weeks from the date the G-60 is submitted.

- **ALERT - ESTABLISH FOLDER (700)**
  
  If the SCORE file data indicates that no general file and no claim file have been established, for the verified claim number, this message is printed as an aid to determine if a folder should be established. All RR-1a's are to be sent to claim files for matching with a folder or establishment of a file.

- **ALERT - ESTABLISH SS ACCTS REC (616)**
  
  A G-376b must be prepared in any case where PAM initiates partial withholding. This review message will alert examiners to prepare a G-376b in such cases.

- **ALERT - FORWARD CASE TO DB (607)**
If a current pay SS award with a BIC A and a DOED is transmitted for an RR employee with no pending or paid RR annuity, this message will be produced. Forward the case to DB on a G-26.

- **ALERT - IMPACC PAYMENT MADE (705)**

  If SSA transmits the IMPACC indicator and the SSADTS accrual does not equal the accrual computed by PAM, this message will be printed for informational purposes. In addition, a special paragraph on the RL-130Z will be printed to tell the beneficiary that his check does not include the amount already paid by SSA.

- **ALERT - JURIS DETERM REQUIRED (601)**

  PAM converts SSA's request for a jurisdiction determination into this message and prints the SSADTS record data out on the MOR. This message appears in conjunction with type of activity "TERM" and "INFO".

- **ALERT - MANUAL HI CLEARANCE REQ (605)**

  The only instances in which mechanical clearances will not be sent are:
  
  a) if it is a survivor case;
  
  b) if the RR claim number on the transmission has not been verified by SEARCH;
  
  c) if 120 months of service have not been verified; or
  
  d) if the transmission contained invalid critical data fields.

  In these cases, the HI-SMI data (DOEH = HI EFF DATE, DOES = SMI EFF DATE, SENC = SMI CODE, SPAC = SMI PREMIUM) will be printed on the Mechanical Output Referral with the above message.

  Follow current procedure for securing HI-SMI clearance if RRB has certification responsibility for payment of the SS benefit.

- **ALERT - POSSIBLE TRUST FUND CHANGE (606)**

  This message will be printed if the DOEI, DOEC, and DOED are all present and the DOEI and DOEC match but the DOED is different or the DOEI and DOED match but the DOEC is different and the case is a current pay award with no old LAF.

  This message will be printed on adjustment awards if the trust fund indication on CHICO does not equal the trust fund on the latest transmission. Prepare a G-607 to change trust funds (see RCM 9.4).

  If a trust fund change was not made timely or if there is a trust fund change in the accrual, prepare a G-92 to make the trust fund correction.
• ALERT - REP PAYEE CODE ASSUMED (704)

SSA does not consider a parent receiving benefits for a child to be a representative payee. When PAM identifies this type of case (BIC "C" and the presence of "FOR" in the PNA), the word "PARENT" will be shown in the RPC followed by an asterisk as long as there is no CHICO record or conflict with the RPC on CHICO. For other rep payee situations when no RPC is transmitted, PAM will assume and print "OTHER".

• ALERT - RR ALREADY REDUCED (619)

PAM has processed a partial rate adjustment that includes an RR annuity in force or in suspense. The offset for SS benefits in an RR annuity is not affected by a change in the SS benefit due to partial withholding.

• ALERT - SS IN FRCE/SUSP - LAF C CASE (620)

SSA has transmitted an "OLD LAF C" to "NEW LAF T1" transmission. CHICO shows that an SS benefit (LAF E) is being paid or is in suspense. Investigate to determine if duplicate payments have been made by SSA and RRB.

• ALERT - T-3WD REQUIRED (600)

SSA's request for a T-3WD is converted by PAM into this message which causes the SSADTS record to be referred out for manual handling and release of a T-3WD or T-3. This message will also appear in some partial rate cases when it appears that SSA has neglected to request a T-3/T-3WD before authorizing us to recover an overpayment.

• ASSOCIATE AND FILE DOWN (702)

If a miscellaneous transmission has an OLAF and NLAF of D or S, this message will be printed. The activity is the result of some action to the beneficiary's MBR while it is in a deferred or suspended status. No examiner action is required.

• AWARD NOT BALANCED TO ACCRUAL

SSA ACCRUAL $9999.99

COMPUTED ACCRUAL $9999.99

THRU MO-YY (615)

The accrual that SSA authorized us to pay is not equal to the accrual that PAM computed based on the payment histories that were also transmitted.

In initial cases, most discrepancies are due to attorney's fees or IMPACC payments. Therefore, do not question a discrepancy in current pay awards unless an error is readily apparent.
In adjustment cases, do not try to resolve a discrepancy unless you are working with the accrual period in question or if an error is immediately detectable. For example, in some cases, the old history that SSA has used may not equal the actual amount that we have paid. These cases may be referred to the OSR.

(NOTE: The accrual amount for adjustment cases that SSA transmits to us and which is printed in this message includes the old recurring check rate as does PAM's computed accrual shown in line 3. However, PAM correctly subtracts this amount before paying SSA's accrual.

The "thru date" is SSA's accrual date. It is the date through which the SSA and computed accruals in this message are calculated. This date may differ from PAM's actual accrual date if PAM vouchers the case through a later month. In such cases, PAM extends the accrual and adds on the difference due for the additional time period when it pays the case.

- CANNOT DETERMINE IF CHICO MATCHES PARCEL (523)

If it cannot be determined whether the CHICO reply which PAM requested matches the SSADTS transmission record (parcel) because of a discrepant name, BIC, BEN SYN, Payee Code, DOB, or BOAN, PAM does not continue to process the case but refers it out for manual handling with this message. Determine if CHICO contains incorrect data which resulted in a no match situation and correct such data with a G-607.

- CANNOT DEVELOP UNIQUE BEN SYN/PAYEE CODE

(DEVELOPED CODES ALREADY USED) (525)

For each SSADTS transmission record, PAM attempts to convert the MBR data into the RRB payment format. If PAM cannot develop a unique benefit symbol or a payee code from the MBR or RRB data available, the case is rejected for manual handling.

Determine if CHICO contains incorrect data which resulted in a no match situation and correct such data with a G-607.

- CASE PAID OR DUMPED BY RASI (520)

The RASI Reply to PAM's inquiry is "Paid Partial," "Paid Final," or "Case Dumped."

- CHANGE PAYEE NAME (626)

If SSA transmits an address that does not conform to our procedures (for example, the word "for" in rep payee cases is in line 1), PAM will try to correct SSA's address before it pays the case. Sometimes the correction cannot be done due to space limitations. Rather than rejecting the case, PAM will pay it.

Correct the name and/or address with a G-607. In most cases, this will involve moving the word "for" to line 2 and abbreviating the first name of the payee on that line.
• CHECK JURIS OF BIC C - NOT ON RR EMP'S ACCT (544)

The claim account number for a BIC C record is not equal to the RR employee's social security number. The RRB has certification responsibility for the payment of benefits to the children of living RR employees only if the benefits are claimed on the employee's record. Return all other BIC C claims to SSA.

• CHICO SS NUMBER INCONSISTENT (535)

Although the transmission record has no beneficiary's own account number (BOAN), PAM is able to match with CHICO on SS CL NO and BIC but the SS CL NO, BOAN and BIC are not consistent, i.e., the SS CL NO is not the same as the BOAN but the BIC is A and, conversely, the SS CL NO is the same as the BOAN but the BIC is not A. PAM does not update the pseudo number 729-01-2345 with the CHICO BOAN. Examiner action is necessary to resolve the discrepancy and correct CHICO using a G-607 if CHICO's BOAN is wrong or to correct the SOLAR award if the BOAN on the transmission record is wrong. Refer to Interim Procedure A-79-34 "Use of G-607 to Correct Boan on CHICO."

• COA NOT PROCESSED - SS TERM (710)

A termination request and a change of address were received from SSA. Since CHICO cannot accept a COA for a terminated CASE, the COA will not process. However, the system will send the termination notice to the new address.

• COA PROCESSED ON MM/DD/YY (707)

PAM has processed a change of address based on a non-award SSADTS transmission.

• CODE PAR

In current pay award cases with OLAF other than T1, T4, and T6 and no critical case indication which are referred out for manual handling, an RL-130Z letter is release. The wording of this letter has been coded as follows:

002 - "Under the law, social security benefits for railroad workers and their families are certified by the Social Security Administration to the U.S. Railroad Retirement Board for payment. The Social Security Administration has notified you and the Board that you are entitled to monthly SS benefits."

003 - "We have received payment information from the Social Security Administration and we will process your monthly benefit award as soon as possible. We regret any inconvenience this delay may cause you."

• COL MATCHED PAM - UNABLE TO PROCESS (538)

PAM is not able to process a COL transmission for a PAM record. An 805 referral will also be produced. Follow current instructions for handling 805 referrals.
• CORRECT BIC ON CHICO (617)
  In certain cases, PAM will process an award action even though the BIC suffix on CHICO does not match the suffix on the SSADTS transmission. Examiners must prepare a Form G-607 to add or correct the BIC suffix on the CHICO record (see RCM 9.4).

• DOD IN DPA DATA/RR EE IN FORCE (646)
  The SCORE file contains a date of death (DOD) for the railroad employee, but the CHICO record shown a check is being issued to him/her. In almost all cases, the SCORE file DOD is several years prior to the current year and is clearly erroneous. In such cases, complete a G-563, showing in item 24 the following:

  "Erroneous DOD in SCORE file for EE. Please remove; EE is alive".

  Send the G-563 to the Claims Certification Section. If you have reason to suspect that the SCORE file DOD may be valid, verify the EE's current status before removing the DOD from SCORE (this should be a very rare situation).

• DOWNWARD ADJUSTMENT RATE CORRECTED (625)
  If SSA transmits a downward adjustment and the NEW MBF equals the accrual due, PAM will process the case as a zero accrual recertification. That is, it will adjust the current rate to the NEW MBP effective with the following month's recurring check rate. (If SSA transmits an accrual due with a downward adjustment, PAM will pay the accrual amount and this message will not be printed unless PAM is processing the award later than SSA's accrual date and, consequently, an overpayment may exist.

  These cases should be reviewed to determine if an overpayment is involved and a T-3/T-3WD should be released if necessary.

• DUAL ENTITLEMENT INVOLVED (543)
  The SSADTS and CHICO records match on the beneficiary's own account number, but not on the claim account number and BIC. Benefits from the same trust fund should be combined. If different trust funds are involved, the benefits must be paid separately.

• FORWARD CASE TO DB IF RR DIS INVOLVED (631)
  SSA has transmitted a suspension or termination for a DIB beneficiary because of work or a possible or actual recovery from disability and there is an RR employee, widow, or surviving child in pay status.

  If the RR annuitant is receiving an RR annuity based on disability and DB has not taken any action based on SSA's report, forward the case to DB after the SS benefits are suspended or terminated.

• G-96 NOT PROCESSED TIMELY (622)
The SS date of termination is before the SS accrual date or PAM’s date of termination is after SSA's accrual date. In either case, an overpayment may have occurred. Release Form T-3 to notify SSA of any overpayment. In death cases, follow the applicable procedure for last checks. (See RCM 6.6)

- **LAF CODE C ON RR TYPE ACTIVITY (546)**
  
The SSADTS record transmitting award activity reflects a LAF code C which means that SSA is certifying benefits. It may be necessary to coordinate with SSA in order to resolve any certification responsibility discrepancy.

- **MANUAL DUMP REQUESTED (534)**
  
  This message will be produced if a G-394 is completed by an examiner to dump a pending PAM record.

- **MECHANICAL HI CLEARANCE GENERATED ON MM/DD/YY**
  
  **DOER MM/YY DOES MM/YY (703)**

  PAM will be able to generate mechanical HI clearances to the MIRTEL system for most initial cases transmitted with HI-SMI data. For these cases, this message will be printed to indicate the date the mechanical clearance was sent.

- **MORE THAN 8 PARCELS ON MASTER (521)**
  
  A PAM "master" RRB claim number is established for each transmission record unless a prior "master" has been established. Each master can contain 8 separate "parcels." A "parcel" is a record with any type of activity for a beneficiary with the same RRB claim number. If the master contains 8 records, the additional transmitted activity is referred out for manual handling with this message.

- **9 PAYEE CODES USED (524)**
  
  The CHICO reply indicates that 9 payee codes have been assigned for the RRB claim number. Examiners must combine benefits if additional beneficiaries are involved.

- **NO RECORD ON CHICO (539)**
  
  The SSADTS transmission is for an adjustment action but the CHICO record does not contain an indication that a benefit is being paid. Any previous unpaid SSADTS transmissions should be considered before processing the adjustment action.

- **NO REINS REC'D ON DEF AWD - DEF OT MM/YY (526)**
  
  PAM holds deferred awards which do not contain HI/SMI on the system and converts them to current pay awards when the reinstatement activity is received from SSA. If 30 days have elapsed after the DOEC or DEFERRAL DATE (whichever is applicable) and no
reinstatement activity is received, the case is rejected for investigation and manual handling. Notify SSA that a payment appears to be in order. Occasionally, SSA’s mechanical call-up system does not work; this will allow them to correct their records timely.

- **PAM ADJ PROCESSED EFF DD-YY**

  **SSA ADJUSTMENT EFF DT MM-YY (610)**

  The effective date of a downward adjustment processed by PAM is later than the effective date transmitted by SSA. If an overpayment is involved, the time lag must be considered when removing partial withholding or when determining the actual amount of the overpayment.

- **PARCEL MATCHED CHICO - BEN STAT INCONSIST. (528)**

  The status of benefits on CHICO is inconsistent with the status of benefits on SSA's transmission. For example, SSA shows current pay activity, but CHICO contains a terminated record.

- **PARCEL MATCHED CHICO NAME DOB DISCREPANCY (632)**

  The beneficiary's own account number matches the one on CHICO but there is **either** a name or DOB discrepancy. Examine both records and resolve any discrepancies between them.

- **PARCEL MATCHED CHICO WITH DUE PROC. INC 532**

  The CHICO reply has a due process indicator for the SS beneficiary.

- **PNA ALERT (711)**

  If SSA's transmission does not contain a change of address indication, but the address is too long as shown for CHICO, PAM will not supply CHICO with the address.

  There is no action to be taken. If the case pays mechanically, the check will be sent to CHICO's address. If the case has to be paid manually, care should be taken not to use the address as shown on the transmission.

- **POSSIBLE DUPLICATE PAYMENTS**

  **BA NUMBER XXXX PREV XXXX (636)**

  SSA may have posted RR compensation as wages for the following employers during the years shown:
<table>
<thead>
<tr>
<th>EMPLOYER</th>
<th>YEARS</th>
</tr>
</thead>
<tbody>
<tr>
<td>American Federation of Labor Railway Employees' Department (BA 8913)</td>

</tbody>
</table>
If the G-90 in file shows wages for the period shown above for the Ee's railroad employer, send the claim folder to the Claims Certification Section. If there is no G-90 (SS-only case), release a G-37b teletype to SSA to determine if the railroad shows up as an employer at SSA for the years in questions.

When it is determined that SSA's record is in error, release an RR-3 explaining the problem. Adjust the RR annuity and process the SS benefit in file. SSA will send an amended benefit award later if necessary.

- **POSSIBLE INSTALLMENT PAYMENT (627)**

SSA is unable to transmit an "I" partial rate code to indicate an installment payment. PAM will try to identify possible installment cases by printing this message if the MBA is greater than the PIA, no DRIMS are posted and dual entitlement is not involved. Ask the OSR to determine if an installment payment is involved before attempting to adjust an RR annuity for the SS benefit.

- **POSSIBLE U/P CHECK OLD HST (621)**

SSA has transmitted an initial award with a deferred status indicator due to current excess earnings, but some monies are payable for a previous year. PAM holds these records in the system until the future deferred date; it does not attempt to process a one check only for the money due in the previous year.

If SSA transmits a second revised record before PAM pays the case, SSA assumes that all monies due have been paid and computes the accrual accordingly. Since PAM pays the latest accrual amount from SSA when it processes the case for payment, an underpayment may occur.

Check the OLD HISTORY DATA on the RR-1a award form. If it shows that an amount was paid, but a review of the file shows that this is not the case, redetermine the accrual using the correct history data and pay the additional amount due.

- **PREV MO NOT PAYABLE - POSSIBLE O/P (549)**

SSA's mechanical system is incorrectly sending duplicate accruals for cases with two or more transmissions in the same accrual month. (See the Informational Bulletin dated September 17, 1980). PAM is able to identify some of these cases if the OLD HISTORY total money amount is more than the NEW HISTORY total money amount and the monthly rates are the same. If this message appears, check the file for other MOR's with the same
accrual date, then calculate the total money due or owed based on the transmissions' histories. If a discrepancy exists, request the OSR to reconcile the inconsistencies.

- **RASI REDUCTION/SS DATES AND RATES INCONSISTENT (542)**
  The SS rates and effective dates in the RASI record do not match the record pending payment in the PAM system. If the discrepancy cannot be resolved after an examination of the file, refer the case to the OSR.

- **RATE CORRECTED/TOLERANCE APPLIE (709)**
  If SSA transmits an adjustment award that is within ten cents of the recurring SS rate, PAM will adjust the benefit in the current month only. Since tolerance applies, no overpayment amount or underpayment accrual will be computed and no further action is necessary.

- **RR CLM NO. DIS.**
  RASI 999999; PAM 999999 (533)
  The RASI RRB claim number does not match the PAM RRB claim number. Determine the proper claim number and correct the discrepant one.

- **RR EE IN PAY STATUS - CHECK O/M (636)**
  A BIC C award has been processed and there is an indication that there is an RR EE in pay status. Determine if an adjustment should be made in the Ee annuity.

- **RR ESTABLISHED - NOT "PURE" (519)**
  A CHICO record has been established for the SS beneficiary under the same RRB claim number as the SSADTS transmission record.

- **RR G-96 PROCESSED ON NM-DD-YY CAUSE CD 999 LTR CDE 999 (628)**
  PAM has processed a G-96 to terminate an RR annuity due to death. The effective date of the G-96 is the month shown in the message. That is, assume that if the processing date is in one month, the following month's check will be stopped. RCM 9.4, G-96 Instructions, contains a list of G-96 cause codes and letters.

- **RR INVOLVED (624)**
  There is an RR annuity in force for the beneficiary whose SS benefit PAM has suspended or terminated. Review the file to determine if the suspension or termination affects the RR annuity.

- **RR RATES ON CHICO AND RASI UNEQUAL (531)**
PAM cannot determine if an RR annuity has been reduced for the pending SS benefit if the RR rate on CHICO is not the last rate that was shown on RASI. The SS benefit and RR annuity, if necessary, must be manually processed.

- **REP PAYEE CODE DISC (516)**

  There appears to be a representative payee discrepancy because:
  - SSA's transmission contains a rep payee code for the beneficiary but CHICO does not;
  - CHICO has a rep payee code, but SSA's record does not;
  - The rep payee codes on each record differ;
  - SSA's record contains a rep payee code, but there is no "FOR" in the address.

- **SEARCH REPLY REC'D - LESS THAN 120 MO OF SERV (518)**

  SEARCH verifies the claim number but the number of railroad service months for that claim number through the last full year of posted service months and compensation is less than 120. Complete Form RR-3 to notify the PC that RRB does not have certification responsibility because the RR EE has less than 120 months of RR service. However, the possibility of lag or M/S or prior service should be explored, if it appears from the year last worked or the service months from 37-46 that additional service would produce 120 months.

- **SMIB BEING DEDUCTED (706)**

  SMI premiums are being deducted from the SS benefit. Item 37 (E, G) on the RR-1a reflects the benefit rate after the SMI deduction.

- **SMIB RATE EXCEEDS RECURRING RATE (548)**

  SSA has transmitted an SS amount for payment that is less than the SMI premium rate for the beneficiary. In most cases, partial withholding will be involved. Process the award without a deduction for SMIB and forward the case to HB to establish direct billing.

- **SS G-96 PROCESSED ON MM-DD-YY CAUSE CD 999 LTR CDE 999 (708)**

  PAM has processed a mechanical G-96 to suspend or terminate SS benefits. The effective date of the G-96 is the month shown in the message. That is, assume that if the processing date is in one month, the following month's check will be stopped. RCM 9.4 contains a list of G-96 cause codes and letters.

- **SSA ACCRUAL AMOUNT $99999.99**

  RATE CORRECTED (611)
If SSA transmits an accrual amount in DPRD = 01/99 cases, PAM will adjust the current rate, but it will not pay the accrual since any money due should be used towards recovery of the overpayment. The accrual transmitted by SSA will be printed as a review message.

- **SSA DATA EXCEPTION - BENCD (507)**
  
  Benefit code is missing or invalid.

- **SSA DATA EXCEPTION - BENNAME (508)**
  
  Beneficiary's name is missing or contains numeric data.

- **SSA DATA EXCEPTION - BIC (502)**
  
  Beneficiary identification code is missing or not logical, or it is not consistent with the CAN and BOAN.

- **SSA DATA EXCEPTION - BOAN (510)**
  
  Beneficiary's own account number is missing or invalid or it is not consistent with the CAN and BIC.

- **SSA DATA EXCEPTION - CAN (501)**
  
  SSA claim number on which the payment is based is missing or invalid or it is not consistent with the BOAN and BIC.

- **SSA DATA EXCEPTION - DOB (629)**
  
  Date of birth is missing or invalid.

- **SSA DATA EXCEPTION - DOEC (504)**
  
  Date of current entitlement is missing or invalid.

- **SSA DATA EXCEPTION - DOEI (505)**
  
  Date of initial entitlement is missing or invalid.

- **SSA DATA EXCEPTION - DOST (514)**
  
  Date of suspension or termination is missing or invalid.

- **SSA DATA EXCEPTION - MBP (506)**
  
  Monthly benefit payable amount is missing.

- **SSA DATA EXCEPTION - NO ACCRUAL (529)**
The SSADTS record transmitting an award activity does not contain an accrual amount that SSA has authorized the RRB to pay.

- **SSA DATA EXCEPTION - PNA (512)**
  
  The name or address line contains more than 20 characters or SSA's transmission is for combined beneficiaries.

- **SSA DATA EXCEPTION - RRBCAN (500)**
  
  RRB claim number was not verified in the SEARCH program.

- **SSA DATA EXCEPTION - RRBBS (513)**
  
  SSA's benefit suffix cannot be converted into RRB prefix.

- **SSA DATA EXCEPTION - TOA (503)**
  
  Type of activity indicator is missing or not logical.

- **SSA "SHORT MONTH"**
  
  **WITHHOLD 999.99**

  **RATE CORRECTED (623)**

  SSA has transmitted an upward or downward adjustment and an accrual amount that is less than the monthly rate. This "short" month accrual indicates that there is an amount to be withheld from one monthly check. A temporary work deduction due to excess earnings is usually involved.

  PAM will handle these cases as zero accrual recertifications and adjust the current rate to the NEWMBP effective with the following month's recurring check rate. The amount in the message is the money to be withheld from one monthly check. (PAM determines this amount by subtracting the accrual amount on SSA's transmission from the MBP.) Although these cases must be suspended in order to withhold the amount in the message, they can usually be immediately reinstated.

- **TRANS MATCHED PARCEL - UNABLE TO PROCESS (527)**

  If a SSADTS transmission record is received for a beneficiary and an existing record is pending in PAM, PAM determines if it can process either or both parcels (records). If PAM cannot process both parcels, the records are rejected for manual handling.

- **UNABLE TO COMPUTE AMT PAYABLE (522)**

  **ACC AMT $9999.99**
If PAM has processed the SSADTS record through the initial edits for missing or discrepant data and it meets the other payment criteria, the program which computes the amount payable attempts to compute the accrual amount as transmitted. If PAM cannot interpret SSA’s information or accrual account, the case will reject.

In initial or adjustment cases, pay the amount SSA has authorized (extending the accrual, if necessary) unless an error is readily apparent. Discrepant accruals in initial cases usually reflect attorney's fees or IMPACC payments and, therefore, are correct. In adjustment cases, SSA’s old history data may not equal what we actually paid. Refer those cases to the OSR if you are unable to resolve the discrepancy. If an error is detected, it is important to notify SSA so that their records can be corrected.

- **UNABLE TO PROCESS ADJ (536)**
  The NEW MBP on the adjustment transmission equals the OLD MBP, but SSA has posted an accrual amount due or the partial rate code is "N".

- **UNABLE TO PROCESS CPA - LAST ACTION NOT ON RASI (541)**
  PAM cannot determine if an RR annuity has been reduced for the pending benefit if there is no RASI record or if the voucher number on CHICO is not a RASI voucher number. The SS benefit and RR annuity, if necessary, must be processed manually.

- **UNABLE TO PROCESS CPA - NO RR REDUCTION MADE (540)**
  PAM will not process a current pay SS benefit if the corresponding offset has not been made in the RR annuity.

- **UNABLE TO PROCESS G-96 T/S (547)**
  PAM cannot interpret SSA's transmission (for example, the LAF code is illogical) or SSA's transmission contains a LAF S9 "Jurisdiction determination required" for an auxiliary beneficiary due to the death of the primary beneficiary. If the SS auxiliary is an RR A&S or disability annuitant, a jurisdiction determination is not required and PAM will not suspend the benefits. PAM will also not terminate "TO" LAF cases if the beneficiary is an RR A&S or disability annuitant, "T+" LAF cases if an RR annuity is involved, and deferred adjustment cases where reinstatement action is to be taken the month following the date of suspension.

- **UNABLE TO PROCESS - NO COL RATE (537)**
  SSA has not transmitted the latest COL increase and effective date for a record.

- **UNABLE TO PROCESS - NO NEW HISTORY (545)**
  This message appears in conjunction with termination referrals when SSA is deleting an MBR due to incorrect information. Their "Kill Credit" transmission corresponds to our code
62 G-96. Take appropriate action to correct the benefit record including completion of a code 62 G-96, if necessary (see RCM 9.4).

- UNABLE TO PROCESS ON PREF OR BEN SYM SURV/PENS CASE (517)

  PAM determines that it is a survivor or pensioner case if the RRB benefit symbol/prefix is "D" or "H", or the employee is dead, or there is a widow's record on CHICO, or there is a WC record on CHICO with RR benefits.

- UNABLE TO PROCESS - SS BEN AMTS NOT EQUAL (530)

  The current recurring SS benefit rate on CHICO does not match the OLD MBP on the adjustment transmission. Since this may indicate a prior adjustment action that has not been processed, PAM will reject the record and an MOR/SOLAR award will be produced.

**9.3.40 Mechanical G-90 Reject Messages**

A G-90 request has rejected from a mechanical G-90 request run. The request could be from the monthly DF mechanical run, the monthly MAP age 62 recalculation mechanical run, or any special one-time mechanical G-90 run. The following reject messages explain the cause of the reject. Submit a G-60 request in order to obtain the G-90. When completing the G-60, pay particular attention to the information which caused the mechanical reject.

- ABD YEAR BEFORE 1975

  The mechanical G-90 request contained a "01" type of request code, but an ABD prior to 1975. Verify and enter the correct ABD in item 8 of the G-60. If the ABD is prior to 1/1/75, enter a "13" in item 13 of the G-60. If the ABD is 1/1/75 or later, furnish the appropriate entry (either "01" or "10") in item 13 of the G-60.

- ABD YEAR

- REC REQ CD INVALID FOR ABD YEAR

  The mechanical G-90 request contained an ABD prior to 1937. Verify and enter the correct ABD in item 8 of the G-60.

- ABD YR GREATER THAN CURRENT YR

  The mechanical G-90 request contained a "01" type of request code but an ABD later than the current year plus one. For example a G-90 request made in 1989, (with a "01" type of request code), the ABD cannot be later than 1990. Verify and enter the correct ABD in item 8 of the G-60.

- ABD YR LESS THAN DLW RR YR

  The mechanical G-90 request contained an ABD prior to the RR (DLW). Verify and enter the correct ABD and RR (DLW) in items 8 and 11 of the G-60.
• **APPL FILING DATE ERROR**

  The mechanical G-90 request contained an invalid application filing date. Verify and enter the correct application filing date in item 16 of the G-60. (Enter preceding zeroes where necessary.)

• **CLAIM NO NOT NUMERIC**

  The mechanical G-90 request contained a non-numerical claim number. Verify and enter the correct claim number in item 2 (or item 1 if the claim number is a six digit claim number) of the G-60.

• **DATE OF BIRTH ERROR**

  The mechanical G-90 request contained an invalid date of birth. Verify and enter the correct date of birth in item 5 of the G-60.

• **DF DATE REQUIRED**

  The mechanical G-90 request did not contain a DF year. Verify and enter the correct DF beginning date in item 24a of the G-60.

• **DF PRIOR SERVICE MONTHS**

  The mechanical G-90 request contained either a non-numerical prior service month total or a total greater than 360 months. Verify and enter the correct number of prior service months, (not more than 360), in item 22 of the G-60.

• **DF YEAR GREATER THAN CURR YR**

  The mechanical G-90 request contained a DF beginning date later than the current year. Verify and enter the correct DF beginning date in item 24a of the G-60.

• **DF YEAR LESS THAN 40**

  The mechanical G-90 request contained a DF beginning date prior to 1940. Verify and enter the correct DF beginning date in item 24a of the G-60.

• **DF 1ST PER BEG DATE ERR**

  The mechanical G-90 request contained an invalid DF beginning date. Verify and enter the correct DF beginning date in item 24a of the G-60. (Enter preceding zeroes where necessary.)

• **EE ANN CODE WRONG FOR ABD YEAR**

  The mechanical G-90 request contained an incorrect type of annuity code for the ABD. Verify and enter the correct ABD and type of annuity code in items 8 and 14 of the G-60.
• 1ST MS OVERLAP INVALID W/USE
• 1ST MS USE MUST BE - 1
• 2ND MS OVERLAP INVALID W/USE
• 2ND MS USE MUST BE - 1
• 3RD MS OVERLAP INVALID W/USE
• 3RD MS USE MUST BE - 1
• 4TH MS OVERLAP INVALID W/USE
• 4TH MS USE MUST BE - 1

The military service period is shown with overlapping railroad service months, while the military service period is shown as being "used" other than as compensation. Overlapping railroad service months apply only when the M/S period is "used" as compensation. Leave items 29e, 30e, 31e, or 32e blank if the corresponding M/S period is not being "used" as compensation in the annuity computation. Complete correct M/S data as appropriate on the G-60.

• 1ST M/S PER OVRLAP MOS NOT ZERO
• 2ND M/S PER OVRLAP MOS NOT ZERO
• 3RD M/S PER OVRLAP MOS NOT ZERO
• 4TH M/S PER OVRLAP MOS NOT ZERO

The mechanical G-90 request contained an invalid type of request code for matching military service information. Verify and enter the correct codes for items 13 and 28.

• 1ST MS PER USE CODE INVALID
• MS CODE - 1ST PER - INVALID
• 2ND MS PER USE CODE INVALID
• MS CODE - 2ND PER - INVALID
• 3RD MS PER USE CODE INVALID
• MS CODE - 3RD PER - INVALID
• 4TH MS PER USE CODE INVALID
• MS CODE - 4TH PER - INVALID

The military service period does not show how it is being "used" in the annuity computation. Complete correct M/S data including "use" code in items 29c, 30c, 31c and 32c as appropriate on the G-60.

• GROSS 1959 CODE NOT 1 OR 2

The mechanical G-90 request contained an invalid (not "1" or "2") '59 Gross Earnings Code. Enter either "1" or "2" in item 17 of the G-60 according to the G-60 instructions in RCM 9.1, Appendix C.

• GRS 59 CD NOT 1 - APP DATE

The mechanical G-90 request contained an application filing date later than 10-15-87, but a '59 Gross Earnings Code of "2". If the correct application filing date is later than 10-15-87, enter a "1" in item 17 of the G-60. If the correct application filing date is prior to 10-15-87, check item 1H of the G-90 which was used to finalize the annuity. If the "date into system" is 10-16-87 or later, enter a "1" in item 17 of the G-60. If the "date into system" is prior to 10-16-87, enter a "2" in item 17 of the G-60. (This message often results from missing G-90 information from the preceding award.)

• INV MIL SER CRED CD - 1ST PER
• INV MIL SER CRED CD - 2ND PER
• INV MIL SER CRED CD - 3RD PER
• INV MIL SER CRED CD - 4TH PER

The mechanical G-90 request contained an invalid military service creditability code. Complete item 29c, 30c, 31c, or 32c as appropriate of the G-60.

• INVALID CLAIM NO PREFIX

The mechanical G-90 request contained an invalid claim number prefix. Verify and enter the correct claim number prefix ("A", "D", or "H") in item 1 of the G-60.

• INVALID CURRENT CONNECTION

The mechanical G-90 request contained an invalid current connection code. If the employee does not have a current connection, leave item 10 of the G-60 blank. If the employee had a current connection on 12-31-74, but not on his ABD, enter a "3" in item 10 of the G-60. If the employee has a current connection on his ABD (either before or after 12-31-74), enter a "4" in item 10 of the G-60.

• INV DATES FOR INTV EARNS CODE
• 1ST MS PER INTV EARNNS CODE INV
• 2ND MS PER INTV EARNNS CODE INV
• 3RD MS PER INTV EARNNS CODE INV
• 4TH MS PER INTV EARNNS CODE INV

An intervening earnings code is shown in the Research record for the M/S period for which it is unnecessary. The M/S period may be completely outside the 6-15-48 through 12-15-50 period. Code 1 = YES, Code 2 = NO. Delete the intervening earnings code from your G-60 request, if applicable.

• INVALID DF UNIT CODE

The mechanical G-90 request contained an invalid unit code for a DF record. Complete G-60 per usual instructions.

• INVALID DF YEAR

The mechanical G-90 request contained an invalid DF beginning date. Verify and enter the correct DF beginning date in item 24a of the G-60. (Enter preceding zeroes where necessary.)

• INVALID DLW - LPS

The mechanical G-90 request contained an invalid LPS date last worked. Verify and enter the correct LPS (DLW) in item 12 of the G-60. (Enter preceding zeroes where necessary.)

• INVALID DLW - RR

The mechanical G-90 request contained an invalid RR date last worked. Verify and enter the correct RR (DLW) in item 11 of the G-60. (Enter preceding zeroes where necessary.)

• INVALID EMP ANN CODE FOR DF
• INVALID EE ANN CODE

The mechanical G-90 request contained an invalid employee annuity code. Verify and enter the correct employee annuity code in item 14 of the G-60.

• INVALID EMPLOYEE ABD

The mechanical G-90 request contained an invalid employee ABD. Verify and enter the correct employee ABD in item 8 of the G-60.

• INVALID INITIALS
The mechanical G-90 request contained invalid initials in the employee's name. Enter the correct initials in item 4 of the G-60.

- **INVALID MIL SER CODE**
  The mechanical G-90 request contained an invalid military service code. Enter the correct military service code ("1", "2", "3", or "4") in item 28 of the G-60.

- **INVALID SEARCH ACCT NO.**

- **INVALID SSA NO.**
  The mechanical G-90 request contained an invalid RRB claim number and/or an invalid SSA number. Enter the correct RRB claim number and SSA number in items 1 and 2 of the G-60.

- **INVALID SURNAME**
  The mechanical G-90 request contained an invalid employee surname. Verify and enter the correct surname, up to 10 letters, in item 4 of the G-60.

- **MS BEG 1ST PER MONTH INVALID**
- **MS BEG 2ND PER MONTH INVALID**
- **MS BEG 3RD PER MONTH INVALID**
- **MS BEG 4TH PER MONTH INVALID**
  The mechanical G-90 request contained an invalid military service beginning date (the month of the beginning date was not "01" through "12"). Verify and enter the correct military service beginning date in item 29a, 30a, 31a, or 32a of the G-60.

- **MS BEG 1ST PER YR NOT NUMERIC**
- **MS BEG 2ND PER YR NOT NUMERIC**
- **MS BEG 3RD PER YR NOT NUMERIC**
- **MS BEG 4TH PER YR NOT NUMERIC**
  The mechanical G-90 request contained an invalid military service beginning date (the year of the beginning date was not numeric). Verify and enter the correct military service beginning date in item 29a, 30a, 31a, or 32a of the G-60.

- **MS DATA FOUND - -WRONG MS CODE**
The mechanical G-90 request indicated that no military service was claimed, however data has been found in one or more of the subsequent military service entries. If the employee has military service which should be considered in the PIA computations, enter the appropriate military service code in item 28 of the G-60. If no military service has been claimed, all G-60 items 28 through 35 should be blank.

- **MS DATES ARE NOT IN SEQUENCE**

The mechanical G-90 request contained military service dates which were out of sequence. Review and enter the correct military service dates in items 29a and 29b, 30a and 30b, 31a and 31b, or 32a and 32b, if applicable, of the G-60.

- **MS END 1ST PER MONTH INVALID**
- **MS END 2ND PER MONTH INVALID**
- **MS END 3RD PER MONTH INVALID**
- **MS END 4TH PER MONTH INVALID**

The mechanical G-90 request contained an invalid military service ending date (the month of the ending date was not "01" through "12"). Verify and enter the correct military service ending date in item 29b, 30b, 31b, or 32b of the G-60.

- **MS END 1ST PER YR NOT NUMERIC**
- **MS END 2ND PER YR NOT NUMERIC**
- **MS END 3RD PER YR NOT NUMERIC**
- **MS END 4TH PER YR NOT NUMERIC**

The mechanical G-90 request contained an invalid military service ending date (the year of the ending date was not numeric). Verify and enter the correct military service ending date in item 29b, 30b, 31b, or 32b on the G-60.

- **MS 1 BEG DATE FOUND**
- **MS 2 BEG DATE FOUND**
- **MS 3 BEG DATE FOUND**
- **MS 4 BEG DATE FOUND**

The mechanical G-90 request indicated that no military service was claimed, however a M/S beginning date was entered on the request. If the employee has military service which should be considered in the PIA computations, enter the appropriate military service code
in item 28 of the G-60. If no military service has been claimed, all G-60 items 28 through 35 should be blank.

- MS 1 END DATE BEFORE BEG DATE
- MS 2 END DATE BEFORE BEG DATE
- MS 3 END DATE BEFORE BEG DATE
- MS 4 END DATE BEFORE BEG DATE

The mechanical G-90 request contained a military service ending date which was earlier than the corresponding beginning date. Review and enter the correct military service dates in items 29a and 29b, 30a and 30b, 31a and 31b, or 32a and 32b, if applicable of the G-60.

- MS 1 END DATE FOUND
- MS 2 END DATE FOUND
- MS 3 END DATE FOUND
- MS 4 END DATE FOUND

The mechanical G-90 request indicated that no military service was claimed, however, a M/S ending date was entered on the request. If the employee has military service which should be considered in the PIA computations, enter the appropriate military service code in item 28 of the G-60. If no military service has been claimed, all G-60 items 28 through 35 should be blank.

- MS 1 MS CODE FOUND
- MS 2 MS CODE FOUND
- MS 3 MS CODE FOUND
- MS 4 MS CODE FOUND

The mechanical G-90 request indicated that no military service was claimed, however a separate mechanical entry indicated that either 1, 2, 3, or 4 periods of military service were claimed. Enter the correct M/S code in item 28 of the G-60.

- MS 1 USE CODE FOUND
- MS 2 USE CODE FOUND
- MS 3 USE CODE FOUND
- MS 4 USE CODE FOUND
• **MS DATA FOUND - WRONG MS CODE**

Incomplete M/S data is shown for the M/S period listed on the reject. If the M/S period is valid, enter complete M/S data on the G-60. If the M/S data listed is incorrect, delete the M/S data from the G-60 request.

• **REC REQ CD INVALID FOR ABD YR**

• **ABD YEAR**

The mechanical G-90 request contained an annuity beginning date prior to 1937. Verify and enter the correct ABD in item 8 of the G-60.

• **SEARCH ACCT NO. BLANK**

The mechanical G-90 request contained zeroes or spaces in the SSA number entry. Verify and enter the correct SSA No. in item 2 of the G-60.

• **SURNAME BLNK, INITIALS PRESENT**

The mechanical G-90 request contained the employee's first and middle initials, but the surname entry was blank. Verify and enter the employee's correct name, (up to 10 letters) in item 4 of the G-60.

• **SURNAME PRESENT, 1ST INIT BLNK**

The mechanical G-90 request contained an employee surname, however the first initial entry was blank. Enter the employee's name, including initials, in item 4 of the G-60.

• **TYP REQ 01 MUST HAVE DLW RR**

The mechanical G-90 request did not contain an RR date last worked. Enter the correct DLW (RR) in item 11 of the G-60.

• **VESTING YR NOT 37 TO 74 OR 99**

The mechanical G-90 contained an invalid vesting year. If the DF G-90 request is for a '37 Act case (item 13 of the G-60 is "13"), enter the correct vesting year in item 39 of the G-60. The item 39 entry must either be from "37" through "74", if a vesting year is displayed in item 10F of a previous file G-90; or "99", if no vesting year is displayed in item 10F of a previous file G-90. Leave this item blank in any '74 Act or later case. This message often results from missing G-90 information from the preceding award.

• **WRNG EE ANN CD FOR TYPE OF REQ**

The mechanical G-90 request contained a 1974 Act type of request code, however the request also contained a 1937 Act annuity code. Review and enter consistent codes in items 13 and 14 of the G-60.
9.3.41 Correction Of The Research Record In Mechanical G-90 Reject Situations

Once the manually requested G-90 is matched to the file, action must be taken to correct the Research record which caused the mechanical reject.

A. If the manually requested G-90 date (item 3H of G-90) is less than 9 months old, take the following action:
   1. If award action is being taken, simply show the new G-90 date in item 18 of the G-357.
   2. If award action is not required, it will be necessary to send Form G-59 to BIS-DMG with the new G-90 date shown on the G59.

B. If the manually requested G-90 date is more than 9 months old, take the following action:

See RCM 8.1.164 for complete instructions on handling of all G-90s more than 9 months old.

9.3.50 Category "B" Survivor G-90 Referrals

A FNOD or on-line SURGE request will generate a SEARCH G-90 wage record request. Category B (paper) Survivor G-90 referrals are routed to Operation's Claims Certification Unit (CCU).

CCU forwards certain category B survivor G-90 referrals immediately to the Survivor Benefits Division (SBD). CCU retains other referrals for manual review or calculation before release.

All category B referrals are listed on the B G-90 Database Program. SBD examiners can trace outstanding category B survivor G-90s directly with CCU using the Database program (see RCM 8.1 Appendix D.)

The referral messages along with the effect on the computation and handling by CCU/SBD are outlined below:

- **MANUAL COMPUTATION REQUIRED FOR BASIC AMOUNT**

  No basic amount(s) are shown on the G-90. CCU forwards the G-90 to SBD. If SBD requires a basic amount calculation, attach a G-563 request to the paper G-90 and return to CCU.

- **MANUAL COMPUTATION REQUIRED FOR AMC'S 1A -37-50 OVERLAP (MS TR2 QUESTIONABLE)**

  There is military service in the 1937-1950 period and one or more overlapping months. CCU forwards the G-90 to SBD.
In rare cases, Tier II could be overstated if the employee's high 60 months of creditable compensation (used to determine the Tier II AMC) are in the 37-50 period. In that case, attach a G-563 to the G-90 and return to CCU for a manual Tier II computation.

- **MANUAL COMPUTATION REQUIRED FOR PIA 1, 8, 9**

  PIAs 1, 8, and 9 are not shown on the G-90. CCU forwards the G-90 to SBD. If SBD requires a PIA calculation, attach a G-563 to the G-90 and return to CCU.

- **SSA 794 PENDING**

  SSA wage information, which could possibly increase the PIA, is outstanding. CCU photocopies the G-90 and forwards the original to SBD. SBD will use the original G-90 for payment. CCU traces with SSA for wage information. If the SSA 794 information is returned and affects the PIA computation, the corrected G-90 will be forwarded to SBD for handling.

- **INCORRECT ACCOUNT NUMBER INDICATION**

  G-90 calculations could be understated or overstated. CCU photocopies the G-90 and forwards the original to SBD for payment. CCU will follow its' internal procedure for resolving this referral. The referral could take months, even years to resolve. When resolved, the G-90 will be forwarded to SBD.

- **OUT OF BALANCE INDICATION RRB/SSA**

  G-90 calculations could be understated or overstated. CCU photocopies the G-90 and forwards the original to SBD for payment. CCU will follow its' internal procedure for resolving this referral. The referral could take months, even years to resolve. When resolved, the G-90 will be forwarded to SBD.

- **SERVICE AFTER DOD**

  The Tier II shown on the G-90 is overstated. CCU will cutback service to the date of death, and manually compute the correct Tier II before forwarding the G-90 to SBD. Compensation posted to years after the year of death will be ignored.

- **MILITARY SERVICE AFTER 1956**

  No basic amounts or Tier IIs are shown on the G-90. CCU will calculate Tier II with and without military service before forwarding the G-90 to SBD. If SBD requires a basic amount calculation, attach a G-563 to the G-90 and return to CCU.

- **QBD REQUESTED**

  Quarters of coverage (QCs), 1937 through 1952, are needed to determine if the employee is vested. If the employee is vested, a possible VDB reduction could apply to the survivor Tier II. The CCU supervisor forwards the G-90 to the SBD Operations Analyst to determine if there is enough information in the claim folder to make a vesting determination.
If a determination cannot be made using the claim folder, SBD will pay the case with a VDB reduction using PIA's 4, 7 and D8 on the wage record. SBD will release a teletype to SSA for QC information. When that information is received, SBD will make a vesting determination. If the employee is not vested, SBD will recertify the survivor annuity.

Appendices

Appendix B - RASI Award Message Codes

When generating a final award, RASI will only print up to 20 lines of referral messages in the "Remarks" section of the award form. If more than 20 lines are needed, RASI will print numeric codes for the remaining messages. These numeric codes follow:

**EMPLOYEE AWARD FORM MESSAGES**

**Appendix D - Processing Referrals**

PAM AWARD LETTER CODE PARAGRAPHS

The following is a list of code paragraphs printed on the RL-130Z PAM award letter. The numbers of the code paragraphs used in a particular case will be printed in item 34 of the RR-1a award form.
Under the law, social security benefits for railroad retirement workers and their families are certified by the Social Security Administration to the U.S. Railroad Retirement Board for payment. This is true even if the individual is not entitled to current or future benefits under the Railroad Retirement Act. The Social Security Administration has notified you and the Board that you are entitled to the following social security benefit:

Under the law, social security benefits for railroad workers and their families are certified by the Social Security Administration to the U.S. Railroad Retirement Board for payment. The Social Security Administration has notified you and the Board that you are entitled to the following social security benefit:

If you have not received a check in the amount of $ (amount of accrual due through the accrual month), you should receive one within the next two weeks. This check will cover the payment of your social security benefit through (date will be accrual month). (The accrual period is through the end of the month prior to the voucher month.)

Succeeding checks will be mailed to reach you during the first week of each month and will cover the amount due for the preceding month.

If you have any questions about your benefit, contact the nearest district office of the Social Security Administration or, if it is more convenient, the Railroad Retirement Board. If you call in person, please bring this notice and all other material you have about your claim.

Starting with your next payment, your social security benefit will be included in your railroad retirement check each month. The amount of each benefit payment will be shown on the check. Succeeding checks will be mailed to reach you during the first week of each month and will cover the combined amounts due in railroad retirement and social security benefits for the preceding month.

The Social Security Administration has requested the Railroad Retirement Board to adjust your social security payments.

The following headings will appear and the appropriate fill-ins will be furnished by the system:

<table>
<thead>
<tr>
<th>Social Security Claim No.</th>
<th>Type of Benefit</th>
<th>Monthly Rate</th>
<th>Effective Date</th>
</tr>
</thead>
</table>

If you believe this determination is not correct, you may request that your case be re-examined. If you want this reconsideration, you must request it not later than 60 days from the date you receive this notice. You may make your request through any social security office.
017 The date of entitlement to monthly benefits for this case has been established as (DOEC).

018 This payment represents the difference between benefits already paid and those now payable on your claim.

019 They have also advised the Board to withhold your benefit for those months in which you were not entitled to payment.

025 The following line will appear and the appropriate benefit information will be supplied by the system in conjunction with code paragraph #12:

Benefits will now be paid as follows:

026 This adjustment is due to a recalculation of your benefits.

027 Your social security benefit has been adjusted effective (RRB processing date). The Social Security Administration will contact you regarding the benefits paid prior to this adjustment.

028 An overpayment of social security benefits will be recovered by withholding part of the benefit due you.

Your full social security benefit will be restored when the overpayment has been recovered.

029 This adjustment is due to a change in the earnings data of you or the person on whose social security record the benefits are payable.

066 Your monthly payment will be increased to $________ beginning with your next month's payment. This increase is based on the rise in cost-of-living.

069 The cost-of-living increase that became effective in the month of June has been considered in the computation of your monthly payment.

071 Part of your benefit continues to be withheld to recover an overpayment of social security benefits.

075 The Social Security Administration has requested the Railroad Retirement Board to pay you an amount due in addition to your regular social security monthly benefit amount.

123 You should have received a letter from the Social Security Administration regarding the overpayment which caused this action. If you have not received such a letter or need more information about the overpayment, contact the nearest Social Security district office. Most questions can be handled by telephone or mail. If you call in person, please bring this notice and any other material you have about your claim with you.
Appendix E - Duplicate Earnings Table

This table may be used as a reference when handling retirement referrals 096 (see RCM 9.3.13) and POSSIBLE DUPLICATE EARNINGS...NOT USED IN PIA CALCULATION (see RCM 9.3.14), survivor referral 0324 (see the STAR referral screen), or when the message "POSSIBLE DUPLICATE EARNINGS BA 9999" appears in the Remarks section of Form G-90 (see RCM 9.14.110). It duplicates the table in SEARCH containing the current listing of BAs with known reporting problems. If any of these referrals appear, refer to RCM 9.14.110, Possible Duplicate Earnings BA 9999, for handling instructions.

</thead>
</table>
G-59 - Correction of the PREH/TAX Record

The G-59 is now available on RRAILS. Also, the G-59R has been incorporated into this form and is now obsolete.

Use

Examiners (example, Retirement, Survivor, etc.) should use the G-59 to notify BIS/DMG, P&S/RAC, and TCIS/TS of changes or new information affecting the PREH record or tax accounting system (TAX).

The PREH record can be corrected with a vouchered payment award, a PREH update award, the on-line PREH correction system, or a G-59.

The TAX record can be corrected with a vouchered payment award or a G-59. If you use a PREH update award, the PREH on-line correction system, or a G-59 to correct a social security number, a rate, or a date of birth, you MUST prepare a G-59 for TCIS/TS.

Examiners should use G-59MS for any changes to military service on EDM or PREH. This includes creating a military service record when one does not currently exist.

NOTE: Section 3 allows for correcting the survivor record when PSP information is used to reduce the tier 1 to zero. While some of these corrections can be made with the PREH On-Line Correction facility, not all can. Therefore, a G-59 should be used to make all changes in order to eliminate an extra action.

Completion

Section 1

After entering RRAILS, click #9, the Bene button, in the CASES area of the initial screen. Any fields you fill out in the client window will be pre-filled on the G-59. All identifying information in this section, except #6 Beneficiary Type, should always be completed. It is used by BIS/DMG, P&S/RAC, and TCIS/TS to ensure record changes are made on the correct beneficiary. The information is self-explanatory. Complete the Beneficiary Type for an IPI, a Twin, or SSA Only.

Section 2

Complete section 2 only if the information is changing. If the Beneficiary's SSA Number is changing, the current, incorrect, SSA number will pre-fill from section 1.

Section 3-Survivors Only
Complete Section 3 to remove PSP information that was entered into the record for the sole purpose of reducing tier 1 to zero.

Section 4-Retirement Data

Put a checkmark in the box in front of each piece of information that applies. If you need to enter a number, enter two digits (i.e., # of W/D DRCs: 03). If you are entering a date for ‘Vested in the future’, use the mm-dd-yyyy format. EXCEPTION: If the ‘Vested in the future’ date is three months or less in the future, control the case on USTAR and pay the VDB when the USTAR referral comes up.

Section 5-Other Corrections and Remarks

Enter any other information or comments in this space.

The examiner’s name and the date will pre-fill. Type in the unit initials. Email the form to the RAC G-59 and TCIS-TS mailboxes, as necessary. Send the form to IMAGING through RRAILS.

**G-96 - Termination or Suspension of Payments**

(Original and one copy)

**Use**

This form is used for all of the following actions:

To suspend or terminate regular annuity payments and SUP ANN payments;

To suspend or terminate social security benefits paid by the Railroad Retirement Board (RRB);

To terminate suspended annuities;

To delete the checkwriting master record in order to correct the claim number, prefix, claim number symbol or payee code.

This form may be used to notify the annuitant of a suspension action by a computer-printed letter if the annuity will be reinstated in the same month, or when processing a timely termination (i.e., payment for the effective month of termination is stopped.) If termination is not timely, a special overpayment and/or adjustment notice must be prepared.

**NOTE:** This form is used when an annuitant record cannot be located on DATA-Q. If the annuitant record is on DATA-Q, process any suspension or termination activity via FAST-S/T (see RCM 9.7).
General Instructions

Multiple Payee Codes - If more than one person is receiving a monthly check based on the insured status of the same employee, prepare a separate G-96 to terminate or suspend each beneficiary's payments according to their respective payee codes.

Payee Receiving More Than One Type of RR Annuity - If a person is receiving an employee annuity and a supplemental annuity, one G-96 showing the regular RR annuity rate will suspend or terminate both annuities. However, if a person is receiving any other combination of two regular monthly RR annuities, for instance, an employee annuity and a widow's annuity, prepare a G-96 to terminate or suspend each payment, as appropriate.

Payee Receiving Railroad Retirement Annuity and a Social Security Benefit Is Also Being Paid by the RRB - Handle suspension or termination action on the RR annuity in the usual manner. However, if suspension or termination action is required on the SS benefit in other than death cases or SMI premium deduction cases, refer the case to the on-site representative.

Computer Rejects Of G-96

The computer rejects Form G-96, and does not suspend annuity payments in force if the payee code or reason code entry is omitted from item 5 or 7 or if the complete claim number or monthly rate does not match the same item on the checkwriting master file. If the G-96 rejects, the payment services group will return the unprocessed G-96 to the originator.

Regular Completion Of Form G-96

<table>
<thead>
<tr>
<th>Item</th>
<th>Entry</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Enter the beneficiary symbol, if any, and the prefix by entering an X in the appropriate handprint box.</td>
</tr>
<tr>
<td>2</td>
<td>Enter the claim number. In six-digit claim number cases, begin handprinting in the last six boxes (just below the blue shading). In terminal-digit claim number cases, begin handprinting in the first box.</td>
</tr>
<tr>
<td>3</td>
<td>Never Complete</td>
</tr>
<tr>
<td>4</td>
<td>Enter the payee's name and the annuitant's name, if other than the payee. This item may be handwritten but must be kept within the restraining margin.</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>5</td>
<td>Handprint the payee code in the right-hand box. In all cases, enter the payee code as shown on the award form, EDP printout in file, or the microfilm of checks issued. This item must be completed in order to stop an in-force payment or to terminate a suspended annuity.</td>
</tr>
</tbody>
</table>
| 6 | **RR Annuities** - Enter the current monthly RR annuity rate (after any deduction for SMI) from the latest recurring award form EDP printout. Do this even though a check at that rate has not yet been released. Do not use the total check rate on the MOMS microfilm, because if an SS benefit is included in the total check rate, both the RR and SS amounts will be affected by the G-96 action. When terminating cases already in suspense, enter the last rate paid. It is not necessary to precede with insignificant zeroes but the rate must be entered so that the last digit appears in the last box. Suspension or termination of the RR annuity will not stop on SS benefit being paid by the RRB.  

**SS Benefit Paid by the RRB** - The on-site representative must approve the suspension or termination of all SS benefits paid by the RRB in all cases other than death cases and SMI premium deduction cases. To suspend or terminate the SS benefit, enter the current monthly SS benefit (after any deduction for SMI, if only SS benefits are payable by the RRB). To terminate or suspend both the RR annuity and the SS benefit, enter the total check rate. The check rate can be obtained from the MOMS microfilm if it is not readily available in the folder.  

NOTE: In death terminations only, enter the last monthly rate shown in file, and the annuitant's date of birth in Item 8. The G-96 program will terminate payments if it matches either on the monthly rate or on the date of birth. |
| 7 | **RR Annuities** - Select the reason for terminating or suspending payments to the beneficiary shown in item 4 from the codes printed on the G-96 or Exhibit 1 of this chapter.  

**SS Benefit Paid by the RRB** - Use the SS benefit cause codes in Exhibit 1 of this chapter to suspend or terminate RR-certified SS benefits:  

**Combined SS and RR payments** - One G-96 may be used to terminate or suspend both an RR annuity and SS benefit by entering the total check rate in item 6. Select the cause code from the ones printed on the G-96 (9-76) or Exhibit 1 of this chapter. Two G-96's must be prepared (use the RR cause codes for one form and the SS cause codes for the other  

G-96) if:  

- The RR annuity cause code is "miscellaneous" but there is a specific cause code for the SS benefit, or,
• The RR cause code does not correspond to the reason for stopping the SS benefit. (Example: the RR benefit is being suspended because of a return to employer service; the SS benefit is being stopped due to work and earnings, or)

• The combined RR and SS rate is equal to the old RR annuity rate, or,

• Combined RR and SS non-phaseout student benefits terminate effective August 1, 1982, or,

• Combined RR and SS spouse benefits terminate and payment of spouse SS benefits is transferred to SSA, or,

• Combined RR and SS young mother's/father's benefits terminate when the youngest child attains age 16.

If two G-96's are used, do not use the combined check rate.

8 Enter the DOB on all suspension and terminations.

9 Never complete.

10 Never complete.

11 Never complete.

12 Enter the month and year only. When payments are being suspended because a payee failed to respond to a questionnaire, enter the month in which the G-96 is prepared.

If the G-96 is being prepared to terminate an earlier suspension, enter the month and year in which the termination is effective. (Also note the date of the suspension in the remarks section.)

If the month of suspension or termination cannot be determined, enter the current month and year.

13 Enter the appropriate letter code for release of an RL-176 suspension or termination notice to the annuitant. (See the section entitled "Generating Suspension or Termination Notices via Form G-96").

14 For EDP Control purposes.

Enter your name and unit in the spaces provided. In the "date" box, enter the date on which the G-96 is completed unless it will not be delivered to the control and services group until after noon of the G-96 cut-off date announced on the monthly cut-off calendar. In that case, or if it is intended to terminate an annuity in the month following
the month in which the G-96 is completed, enter the first day of the month in which the annuity is to be suspended. In the "remarks" section, enter any remarks necessary or appropriate to explain the action.

**Terminating Annuity Entitlement In A Suspended Case**

Prepare a G-96 to terminate the annuity record when a termination event occurs and the annuity was previously suspended. Complete all entries on the G-96 according to the instructions for terminating an annuity in force. The termination code and effective date will replace the suspension code and effective date on the master record. A termination notice will be released for the code shown in item 13, (if any). Do not make any entry in item 10.

**Use Of Termination Code 62**

Prepare a G-96 with code 62 in item 7 only when the benefit payment record needs a correction in one of the following items:

- Claim number
- Claim number symbol (M, W, WC, P, or J) NOTE: If only the symbol is being corrected on a survivor award, a G-96 is not necessary. See G-364 instructions located in RCM 8.9.
- Prefix (A, D, or H)
- Payee Code

Processing of the code 62 G-96 will delete the benefit payment record and must be followed by an award action. If the code 62 is being used to delete an incorrect claim number, prefix or symbol, an initial award must be processed on the correct claim number, prefix and symbol in cases where there was no previous award processed under the correct claim number, prefix and symbol. If an award had previously been processed under the correct claim number, prefix and symbol, a "reinstate-recert" award is used to process the award. If the code 62 is being used to change the payee code, the award on the "new" payee code must be processed as an initial award. See RCM 8.1.141 and 8.1.142 for further information on the use of code 62.

**Effect Of G-96 On The MIRTEL Record**

The MIRTEL system receives information from the checkwriting master (CHICO) file. If a change in payment status is shown on DATA-Q or MOMS; the MIRTEL and MOLI records will also change.

A G-96 which terminates or suspends an annuity has the following effect on the MIRTEL record:
• **Death Codes 01, 41, and 51** - These codes terminate the MIRTEL record if the annuity is in current pay status or suspense.

NOTE: If a constructive award was made, or the beneficiary filed for Medicare only, or the date of death was over 16 months ago, a G-811 (activity code 50) is required to terminate the MIRTEL record. See RCM 3.3 for instructions on completing form G-811.

• **Other Termination Codes** - These codes change the record status on the MIRTEL record and may generate a referral "Termination - Check Jurisdiction" (See RCM 3.5 Exhibit 1 for handling.)

• **Suspension Code** - These codes change the record status code on MIRTEL to an "annuity in suspense" code which will generate quarterly or year end billing for SMI option codes 1 or 5.

If an annuity is suspended and reinstated in the same month, no change will be made in the MIRTEL record.

**Generating Suspension Or Termination Notices Via Form G-96**

When RR annuity or SS benefit payments will be reinstated in the month of suspension or when processing a timely termination (i.e., payment for the effective month of termination is stopped), an entry in item 12 will generate a computer-printed notice which will be released to the beneficiary.

Following are tables listing RR and SS code letters as they correspond to the suspension and termination codes. Following the tables, the text of each code letter is shown, as well as, instructions as to when the letter should be released. Before releasing any letter, be sure to review the instructions and the text of the letter.

A. **RR Suspension Code Letters** - When payments will be reinstated in the month of suspension, an entry in Item 12 will generate a computer-printed RL-176 which will be released to the annuitant. RR suspension letters are detailed below:

**Code Letters 151 and 169**

A copy of the letter will be sent to the appropriate field office. The standard text of the letters is as follows:

**YOUR MONTHLY BENEFITS MUST BE ADJUSTED BECAUSE...**

(INSERT)

THIS ADJUSTMENT MAY CAUSE A DELAY IN THE RECEIPT OF YOUR NEXT PAYMENT. HOWEVER, A PAYMENT WILL BE SENT TO YOU AT THE EARLIEST POSSIBLE DATE. SHOULD YOU HAVE ANY QUESTIONS REGARDING THIS ADJUSTMENT, CALL OR WRITE THE BOARD OFFICE NEAREST YOU. THERE IS AN OFFICE LOCATED AT (Address of field office).

The first sentence of the letter will be completed as follows:

Code 151 - MEDICARE PREMIUMS WILL BE DEDUCTED FROM YOUR BENEFITS.

Code 169 - YOUR EXPECTED EARNINGS FOR THIS YEAR WILL EXCEED THE EXEMPT AMOUNT.

Code Letter 172

Use this code letter when suspending an annuity to begin or adjust garnishment withholding. A copy of the letter will be released to the appropriate field office.

YOUR ANNUITY HAS BEEN SUSPENDED TO BEGIN OR ADJUST WITHHOLDING IN ACCORDANCE WITH A GARNISHMENT, ASSIGNMENT, OR COURT-ORDERED PROPERTY DIVISION. THIS MAY CAUSE A DELAY IN THE RECEIPT OF YOUR NEXT PAYMENT; HOWEVER, A PAYMENT WILL BE SENT TO YOU AT THE EARLIEST POSSIBLE DATE. SHOULD YOU HAVE ANY QUESTIONS REGARDING THIS ADJUSTMENT, CONTACT THE NEAREST RAILROAD RETIREMENT BOARD OFFICE. MOST RAILROAD RETIREMENT BOARD OFFICES ARE OPEN TO THE PUBLIC FROM 9:00 A.M. TO 3:00 P.M. MONDAY THROUGH FRIDAY. IF YOU COME IN PERSON, TAKE THIS NOTICE WITH YOU.

THERE IS AN OFFICE LOCATED AT (Address of field office).

Code Letter 173

Use this code letter when suspending to adjust the amount of the annuity payment being sent to the third-party payee in a garnishment case. A copy of this letter will not be released to the field office.

DUE TO A REDUCTION IN THE AMOUNT OF THE PAYMENT, THERE WILL BE A DELAY IN THE NEXT PAYMENT TO BE MADE IN CONNECTION WITH ENFORCEMENT OF LEGAL PROCESS FOR SUPPORT.

Code Letter 197

Use this code letter whenever suspending the RR portion only of a combined RR-SS payment, and that portion will be reinstated in the month of suspension.
Be sure to include the reason for adjustment in the reinstatement award letter.
The text of the letter is as follows:

YOUR MONTHLY RAILROAD RETIREMENT ANNUITY MUST BE ADJUSTED. 
THIS MAY CAUSE A DELAY IN THE RECEIPT OF THE RAILROAD 
RETIREMENT PORTION OF YOUR NEXT PAYMENT. THE SOCIAL 
SECURITY PORTION OF YOUR PAYMENT WILL BE RELEASED AS USUAL, 
WITHOUT DELAY. YOUR RAILROAD RETIREMENT PAYMENT AND AN 
EXPLANATION WILL BE FORWARDED TO YOU AT THE EARLIEST 
POSSIBLE DATE.

A copy is not sent to the servicing field office.

Code Letter 199

Use this code letter whenever suspending an RR only annuity, and the annuity 
will be reinstated in the month of suspension. Be sure to include the reason for 
adjustment in the reinstatement award letter. The text of the letter is as follows:

YOUR MONTHLY BENEFITS MUST BE ADJUSTED. THIS MAY CAUSE A 
DELAY IN THE RECEIPT OF YOUR NEXT PAYMENT. A PAYMENT AND AN 
EXPLANATION OF THE ADJUSTMENT WILL BE SENT AT THE EARLIEST 
POSSIBLE DATE.

A copy is not sent to the servicing field office.

B. SS Suspension Code Letters

Code Letter 198

Use this code letter when suspending the SS portion only of a combined RR-SS 
payment and that portion will be reinstated in the month of suspension. Be sure 
to include the reason for adjustment in the reinstatement award letter. The text 
of the letter is as follows:

YOUR MONTHLY SOCIAL SECURITY BENEFIT MUST BE ADJUSTED. THIS 
MAY CAUSE A DELAY IN THE RECEIPT OF THE SOCIAL SECURITY 
PORTION OF YOUR NEXT PAYMENT. THE RAILROAD RETIREMENT 
PORTION OF YOUR PAYMENT WILL BE SENT AS USUAL, WITHOUT DELAY. 
YOUR SOCIAL SECURITY PAYMENT AND AN EXPLANATION WILL BE SENT 
TO YOU AT THE EARLIEST POSSIBLE DATE.

A copy is not sent to the servicing field office.

SS Suspension Code Letters - (Continued) - Use the following code letters when 
suspending an RR certified SS benefit. A copy of the letter will be sent to the 
appropriate RRB field office. The code letter states:
THE SOCIAL SECURITY ADMINISTRATION HAS REQUESTED THE RAILROAD RETIREMENT BOARD TO SUSPEND YOUR BENEFITS (SEE REASONS LISTED BELOW)

IF YOU BELIEVE THAT THIS DETERMINATION IS NOT CORRECT, YOU MAY REQUEST THAT YOUR CLAIM BE RE-EXAMINED. IF YOU WANT THIS RECONSIDERATION, YOU MUST REQUEST IT NOT LATER THAN 60 DAYS FROM THE DATE YOU RECEIVE THIS NOTICE. YOU MAY MAKE YOUR REQUEST THROUGH ANY SOCIAL SECURITY OFFICE. IF ADDITIONAL EVIDENCE IS AVAILABLE, YOU SHOULD SUBMIT IT WITH YOUR REQUEST.

IF YOU HAVE ANY QUESTIONS ABOUT YOUR CLAIM, CONTACT THE NEAREST DISTRICT OFFICE OF THE SOCIAL SECURITY ADMINISTRATION. MOST QUESTIONS CAN BE HANDLED BY TELEPHONE OR MAIL. IF YOU VISIT AN OFFICE, HOWEVER, PLEASE BRING THIS NOTICE AND ALL OTHER MATERIAL YOU HAVE ABOUT YOUR CLAIM WITH YOU.

The first sentence of the letter will be completed as follows:

LETTER SUSPSSA

</tr>
</tbody>
</table>

**Code Letter 380**

If the reason for adjustment of an SS only case is other than the ones covered by code letters 370 through 379, use letter code 380. This is a miscellaneous code letter which is suitable for SS benefits suspended under LAF codes S7, S9, SD, SF, SH, SJ, SK, SL, SM, SP, or SW. (See RCM 7.4 Appendix B)

The letter states:

THE SOCIAL SECURITY ADMINISTRATION HAS REQUESTED THE RAILROAD RETIREMENT BOARD TO SUSPEND YOUR BENEFITS. YOU
WILL BE NOTIFIED AT A LATER DATE AS TO WHEN YOUR BENEFITS CAN BE RESUMED.

IF YOU BELIEVE THAT THIS DETERMINATION IS NOT CORRECT, YOU MAY REQUEST THAT YOUR CLAIM BE REEXAMINED. IF YOU WANT THIS RECONSIDERATION, YOU MUST REQUEST IT NOT LATER THAN 60 DAYS FROM THE DATE YOU RECEIVE THIS NOTICE. YOU MAY MAKE YOUR REQUEST THROUGH ANY SOCIAL SECURITY OFFICE. IF ADDITIONAL EVIDENCE IS AVAILABLE, YOU SHOULD SUBMIT IT WITH YOUR REQUEST.

IF YOU HAVE ANY QUESTIONS ABOUT YOUR CLAIM, CONTACT THE NEAREST DISTRICT OFFICE OF THE SOCIAL SECURITY ADMINISTRATION. MOST QUESTIONS CAN BE HANDLED BY TELEPHONE OR MAIL. IF YOU VISIT AN OFFICE, HOWEVER, PLEASE BRING THIS NOTICE AND ALL OTHER MATERIAL YOU HAVE ABOUT YOUR CLAIM WITH YOU.

Code Letters 381 through 389

Use these code letters when suspending an RR certified SS benefit that has been placed in a deferred status (LAF Code D). A copy is sent to the appropriate RRB field office.

The letter states:

THE SOCIAL SECURITY ADMINISTRATION HAS REQUESTED THE RAILROAD RETIREMENT BOARD TO TEMPORARILY WITHHOLD YOUR SOCIAL SECURITY BENEFITS.

(SEE REASONS BELOW)

YOUR NEXT PAYMENT WILL BE MADE AS SOON AS THE REQUIRED AMOUNT OF BENEFITS HAS BEEN WITHHELD.

IF YOU BELIEVE THAT THIS DETERMINATION IS NOT CORRECT, YOU MAY REQUEST THAT YOUR CLAIM BE REEXAMINED. IF YOU WANT THIS RECONSIDERATION, YOU MUST REQUEST IT NOT LATER THAN 60 DAYS FROM THE DATE YOU RECEIVE THIS NOTICE. YOU MAY MAKE YOUR REQUEST THROUGH ANY SOCIAL SECURITY OFFICE. IF ADDITIONAL EVIDENCE IS AVAILABLE, YOU SHOULD SUBMIT IT WITH YOUR REQUEST.

IF YOU HAVE ANY QUESTIONS ABOUT YOUR CLAIM, CONTACT THE NEAREST DISTRICT OFFICE OF THE SOCIAL SECURITY ADMINISTRATION. MOST QUESTIONS CAN BE HANDLED BY TELEPHONE OR MAIL. IF YOU VISIT AN OFFICE, HOWEVER, PLEASE BRING THIS NOTICE AND ALL OTHER MATERIAL YOU HAVE ABOUT YOUR CLAIM WITH YOU.

Code Letter 386
Code letter 386 will close with the following paragraph instead of the one shown above:

YOU SHOULD HAVE RECEIVED A LETTER FROM THE SOCIAL SECURITY ADMINISTRATION REGARDING THE OVERPAYMENT WHICH CAUSED THIS ACTION. IF YOU HAVE NOT RECEIVED SUCH A LETTER OR NEED MORE INFORMATION ABOUT THE OVERPAYMENT, CONTACT THE NEAREST SOCIAL SECURITY DISTRICT OFFICE. MOST QUESTIONS CAN BE HANDLED BY TELEPHONE OR MAIL. IF YOU CALL IN PERSON, PLEASE BRING THIS NOTICE AND ANY OTHER MATERIAL YOU HAVE ABOUT YOUR CLAIM WITH YOU.

C. RR Termination Code Letters - Use the following code letters when terminating an RR annuity. Code paragraph 199 regarding reconsideration and appeals is included on all termination code letters. A copy of the letter will be sent to the appropriate field office.

<table>
<thead>
<tr>
<th>Code Letter</th>
<th>Situation</th>
</tr>
</thead>
</table>
| 501         | Use in manual termination of WCIA-last child attaining age 18 IS NOT an FTS; widow will be eligible in future.  
YOUR MOTHER'S/FATHER'S ANNUITY HAS ENDED BECAUSE YOUR CHILD IS ATTAINING AGE 18 THIS MONTH. THE CHILD SHOULD CONTACT THE NEAREST DISTRICT OFFICE OF THE BOARD IF HE (SHE) BECOMES:  
- A FULL TIME STUDENT AT A HIGH SCHOOL OR ELEMENTARY SCHOOL BEFORE ATTAINING AGE 19 AND HAS NOT MARRIED, OR  
- DISABLED BEFORE ATTAINING AGE 22 AND HAS NOT MARRIED.  
YOU MAY BE ELIGIBLE AGAIN FOR A MOTHER'S/FATHER'S ANNUITY IF THE CHILD BECOMES DISABLED BEFORE AGE 22, HAS NOT MARRIED AND IS IN YOUR CARE.  
YOU MAY BE ELIGIBLE FOR A WIDOW(ER)'S ANNUITY AT AGE 60 (AGE 50 IF DISABLED). AT THAT TIME YOU WILL HAVE TO FILE A NEW APPLICATION WITH THE RAILROAD RETIREMENT BOARD.  
IF YOU HAVE ANY QUESTIONS ABOUT THIS LETTER, CONTACT THE NEAREST DISTRICT OFFICE OF THE BOARD.  
THERE IS AN OFFICE LOCATED AT (ADDRESS OF NEAREST FIELD OFFICE). |
| 502         | Use in manual termination of WCIA-last child attaining age 18 IS an FTS; widow will be eligible in future.  
YOUR WIDOW'S CURRENT INSURANCE ANNUITY HAS ENDED BECAUSE YOUR CHILD IS ATTAINING AGE 18 THIS MONTH.  
ALTHOUGH THE CHILD IS ENTITLED TO AN ANNUITY AS A FULL-TIME STUDENT, A WIDOW UNDER AGE 60 CANNOT QUALIFY FOR AN ANNUITY ON THIS BASIS. |
YOU MAY BE ELIGIBLE AGAIN FOR A MOTHER'S/FATHER'S ANNUITY IF THE CHILD BECOMES DISABLED BEFORE AGE 22, HAS NOT MARRIED AND IS IN YOUR CARE.

IF YOU HAVE ANY QUESTIONS ABOUT THIS LETTER, CONTACT THE NEAREST DISTRICT OFFICE OF THE BOARD.

THERE IS AN OFFICE LOCATED AT (ADDRESS OF NEAREST FIELD OFFICE).

503

Use in manual termination of a CIA when child attains age 18 this month.

YOUR CHILD'S INSURANCE ANNUITY HAS ENDED BECAUSE THE CHILD HAS ATTAINED AGE 18 THIS MONTH.

FURTHER BENEFITS MAY BECOME PAYABLE IF THE CHILD BECOMES:

- A FULL-TIME STUDENT AT A HIGH SCHOOL OR ELEMENTARY SCHOOL BEFORE ATTAINING AGE 19 AND HAS NOT MARRIED, OR,

- DISABLED BEFORE ATTAINING AGE 22 AND HAS NOT MARRIED.

IF HE (SHE) BECOMES ELIGIBLE FOR FURTHER BENEFITS, OR IF YOU HAVE ANY QUESTIONS ABOUT THIS LETTER CONTACT THE NEAREST OFFICE OF THE BOARD.

THERE IS AN OFFICE LOCATED AT (ADDRESS OF NEAREST FIELD OFFICE).

505

Use when terminating a spouse annuity based on minor children in her care--last child attaining age 18, spouse will qualify for unreduced annuity at age 60.

YOUR ANNUITY ENDED THIS MONTH. YOU WERE PREVIOUSLY NOTIFIED THAT YOUR ANNUITY WOULD END WHEN YOUR CHILD ATTAINED AGE 18 UNLESS THE CHILD WAS TOTALLY AND PERMANENTLY DISABLED AND IN YOUR CARE.

WHEN YOU REACH AGE 62, YOU MAY QUALIFY FOR A SPOUSE ANNUITY AT A REDUCED RATE. IF YOU DECIDE TO WAIT UNTIL AGE 65, YOU MAY QUALIFY FOR AN UNREDUCED ANNUITY AT THAT TIME.
YOU MUST FILE AN APPLICATION BEFORE A SPOUSE ANNUITY CAN BE PAID AGAIN. YOU MAY DO SO AT ANY BOARD OFFICE WHEN YOU ARE QUALIFIED FOR AN ANNUITY. THE ENCLOSED FORM GIVES THE CONDITIONS UNDER WHICH YOU MAY QUALIFY FOR AN ANNUITY. IF YOU NEED FURTHER INFORMATION, CALL OR WRITE THE NEAREST DISTRICT OFFICE OF THE BOARD. PLEASE TAKE THIS LETTER WITH YOU IF YOU CALL IN PERSON.

THERE IS AN OFFICE LOCATED AT (ADDRESS OF NEAREST FIELD OFFICE).

ENCLOSURE

G-177a

515 Use in 1981 Act case for manual termination of WCIA–last child attaining age 18 IS NOT an FTS; widow will be eligible in future.

YOUR WIDOW'S CURRENT INSURANCE ANNUITY HAS ENDED BECAUSE YOUR CHILD IS ATTAINING AGE 18 THIS MONTH. IF THE CHILD BECOMES A FULL-TIME STUDENT, OR BECOMES DISABLED BEFORE ATTAINING AGE 22 AND HAS NOT MARRIED, HE (SHE) SHOULD CONTACT THE NEAREST OFFICE OF THE BOARD.

YOU MAY BE ELIGIBLE FOR A WIDOW'S INSURANCE ANNUITY AT AGE 60 (AGE 50, IF DISABLED). AT THAT TIME, YOU WILL HAVE TO FILE A NEW APPLICATION WITH THE RAILROAD RETIREMENT BOARD.

IF YOU HAVE ANY QUESTIONS ABOUT THIS LETTER, CONTACT THE NEAREST DISTRICT OFFICE OF THE BOARD.

THERE IS AN OFFICE LOCATED AT (ADDRESS OF NEAREST FIELD OFFICE).

516 Use when terminating a student who is no longer in full-time attendance; no overpayment involved.

YOUR ANNUITY HAS BEEN TERMINATED BECAUSE YOU CEASED FULL-TIME SCHOOL ATTENDANCE THIS MONTH.

IF YOU HAVE ANY QUESTIONS ABOUT THIS LETTER, CONTACT THE NEAREST DISTRICT OFFICE OF THE BOARD.
D. SS Termination Code Letters - Use the following code letters when terminating an RR certified SS benefit. A copy of the letter will be sent to the appropriate RRB field office.

The basic text of the letter is as follows:

THE SOCIAL SECURITY ADMINISTRATION HAS REQUESTED THE RAILROAD RETIREMENT BOARD TO TERMINATE YOUR BENEFITS (SEE REASONS LISTED BELOW)

IF YOU BELIEVE THAT THIS DETERMINATION IS NOT CORRECT, YOU MAY REQUEST THAT YOUR CLAIM BE RE-EXAMINED. IF YOU WANT THIS RECONSIDERATION, YOU MUST REQUEST IT NOT LATER THAN 60 DAYS FROM THE DATE YOU RECEIVE THIS NOTICE. YOU MAY MAKE YOUR REQUEST THROUGH ANY SOCIAL SECURITY OFFICE. IF ADDITIONAL EVIDENCE IS AVAILABLE, YOU SHOULD SUBMIT IT WITH YOUR REQUEST.

(USED ON ALL BUT LETTER #363)

WHEN BENEFITS ARE TERMINATED DURING A YEAR AND A BENEFICIARY IS UNDER AGE 70, AN ANNUAL REPORT OF EARNINGS MUST BE FILED IF THE BENEFICIARY HAS INCOME FROM WORK EXCEEDING THE YEARLY LIMIT. THIS REPORT SHOULD INCLUDE THE BENEFICIARY’S EARNINGS FOR THE ENTIRE YEAR BOTH BEFORE AND AFTER THE BENEFITS WERE TERMINATED.

IF YOU HAVE ANY QUESTIONS ABOUT YOUR CLAIM, CONTACT THE NEAREST DISTRICT OFFICE OF THE SOCIAL SECURITY ADMINISTRATION. MOST QUESTIONS CAN BE HANDLED BY TELEPHONE, OR MAIL. IF YOU VISIT AN OFFICE, HOWEVER, PLEASE BRING THIS NOTICE AND ALL OTHER MATERIAL YOU HAVE ABOUT YOUR CLAIM WITH YOU.

**PAYABLE HAVE BEEN COMBINED WITH YOUR OWN BENEFITS SO THAT ONE PAYMENT CAN BE MADE UNDER YOUR OWN NUMBER.**

**DUE TO THE DEATH OF THE PERSON ON WHOSE ACCOUNT YOU ARE RECEIVING BENEFITS.**

**ADDITIONAL PARAGRAPHS:**

SURVIVOR BENEFITS ARE PAYABLE BY EITHER THE RAILROAD RETIREMENT BOARD OR THE SOCIAL SECURITY ADMINISTRATION, BUT NOT BY BOTH, EVEN THOUGH THE EMPLOYEE MAY HAVE RECEIVED BENEFITS FROM BOTH AGENCIES WHILE HE WAS ALIVE. THE RAILROAD RETIREMENT BOARD HAS JURISDICTION OF YOUR SURVIVOR BENEFITS. NOTICE OF THE EMPLOYEE’S DEATH WAS RECEIVED TOO LATE TO PREVENT THE RELEASE OF SOCIAL SECURITY BENEFITS ISSUED AFTER THE MONTH OF DEATH. THESE OUTSTANDING AND NOT DUE BENEFITS WILL BE RECOVERED FROM YOUR SURVIVOR AWARD.

**Disposition**

The original copies of all Forms G-96 are to be accumulated by units and sections and forwarded to the control and services group by 11:00 a.m. on the cut-off date published on the monthly cut-off calendar. Carbon copies are to be filed the left side of the claim folder.

**G-100 - Request to Enter or Delete Due Process Code**

(Original and one copy)

**Use**

- Used by claims examiners to freeze an annuity rate or an RR-certified social security benefit rate and to prevent the mechanical increase of either during a due-process period.

- Used to delete previously entered due process code without going through the process of manually certifying an award or completing a G-96 for an annuity rate or an RR-certified social security benefit.
• Used to prevent a PAM adjustment in cases where manual certification of an RR-le is in progress.

**General Instructions**

A G-100 entered into the checkwriting system with codes "0" or "1" will freeze the annuity or RR-certified SS benefit for the payee designated on the form until:

• A manual award form, including an award certification for SSA, is processed; or

• Form G096 is prepared to suspend or terminate payments; or

• Another form G-100 with codes "2" or "3" is prepared to delete the previously entered due process code.

**Preparation**

You must complete a G-100 for each type of benefit for which you want to enter a due process code.

Cols. 1-3 - Enter beneficiary symbol and prefix. If the prefix is one character, use column 3.

Cols. 4-12 - Enter the numerals of the claim number. For a six-digit claim number, enter the numbers in cols. 7-12.

Cols. 13 - Enter the payee code of the annuitant for whom you wish to enter a due process code.

**Record Changes**

Enter the appropriate due process code as described below:

<table>
<thead>
<tr>
<th>Code</th>
<th>Situation</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>To freeze an annuity rate</td>
</tr>
<tr>
<td>1</td>
<td>To freeze an RR-certified SS benefit</td>
</tr>
<tr>
<td>2</td>
<td>To delete a previously entered due process code for an annuity rate</td>
</tr>
<tr>
<td>3</td>
<td>To delete a previously entered due process code for an RR certified SS benefit.</td>
</tr>
</tbody>
</table>

**Disposition**

• Sign and date the form and enter the unit in which it was prepared in the space provided. File the carbon copy on the right side of the claim folder and put the original in the designated keypunch forwarding location.
• G-100’s used to stop a mechanical increase to the RR annuity (code 100 in columns 16-18) are submitted to keypunch once a month on the same day as examiner/recert cut-off. The exact date will be specified on EFP calendar.

Miscellaneous

If you want to find out the G-100 was entered into CHICO, request a QUICKIE print-out.

**G-143 - Master Benefit Adjustment Record Control**

(For research use only)

**Use**

Research has the responsibility of post-editing and reconciling their files with the benefit payment records. When an error is found involving an award form, the correction is made on the award form in red. When an error not involving an award form is found and corrected, research inserts a Form G-143 in the folder to note the type of correction made and when the action took place. The form is used exclusively by research and can be disregarded by claims examiners and payment records personnel. A copy of the G-143 is shown below:

Sample Copy

(Printed on Pink Stock)

SEE EXHIBIT 1

**G-607 PC - Record Correction Request Name-Address-Code**

**Use**

Used to change or correct a payee’s or beneficiary’s name and/or address on the CHICO master benefit file, and to make certain other corrections on the file.

**Program Access**

To access the PC G-607 Program, double-click on the G-607 icon. The Online Form G-607 Program entry screen will appear.

**Form Access**

To access the online Form G-607, single click on the G-607 box. The online Form G-607 will appear with the cursor positioned in the RRB Claim No. “Sym” field.
Data Entry Procedure

Sym Box (Optional Entry) - If the RRB claim number symbol/prefix is MA, WA, WD, WCA or WCD, enter M, W, or WC as appropriate. After making the entry, press TAB or ENTER to move to the Prefix box. If the RRB claim number does not contain an M, W, or WC symbol, leave this field blank and press TAB or ENTER to move to the Prefix box.

Prefix Box (Mandatory Entry) - The Prefix box is prefilled with an A. If the claim number prefix is A, press TAB or ENTER to move to the Claim Number box. If the prefix is D, override the prefilled A with a D and press TAB or ENTER to move to the Claim Number box.

Claim Number Box (Mandatory Entry) - Enter the six or nine-digit RR claim number. Use preceding zeroes with six-digit claim numbers. Press TAB or ENTER to move to the Employee’s Name box.

Employee’s Name Box (Optional Entry) - Enter the employee’s name. Press TAB or ENTER to move to the Payee’s Name box.

Payee’s Name Box (Optional Entry) - Enter the payee’s name. Press TAB or ENTER to move to the Change Code box.

Change Code Box (Mandatory Entry) - Click on the applicable change code. The selected code will be highlighted. Press TAB or ENTER to move to the Payee Code box.

Payee Code Box (Mandatory Entry) - Enter the numeric payee code. Press TAB or ENTER to move to the First Five box.

First Five Box (Mandatory Entry) - The appropriate entry is based on the selected Change Code:

- If using Change Code 1,2,3,4,5,6,7,C, D or E, enter the first five letters of the LAST WORD on line 1 of the name/address block of the current payment record. Note: While this is usually the payee’s surname, that is not always the case. Be sure to enter the first five letters of the LAST WORD on line 1 of the current name/address block.

- If using Change Code 8, the entry depends on the type of change being made. Use the following guidelines when using Change Code 8:

<table>
<thead>
<tr>
<th>Entry to Correct SMIB Enrollment Code</th>
<th>Enter the new enrollment code followed by the letters “SMIB” to change the RR record, or “SMIS” to change the SS record, e.g., “9SMIB”. Remember to enter the</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entry to Correct Policing Code (Rep Payee Cases)</td>
<td>Enter the correct policing code (0, 1, 2, 3, 4, 5, 6, 7, or 8 as described in RCM 5.10.3) followed by the letters “POLC”, e.g. “0POLC”. Remember to enter the payee’s name on line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>------------------------------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Entry to Correct the Family Code</td>
<td>Enter “FAMCD” in the First Five Box. Enter the two-digit Family Code (the first digit will always be zero) on Line 1 of the 5-line name/address block. Note: When deleting a Family Code, enter “00”.</td>
</tr>
<tr>
<td>Entry to Correct the Twin Code on CHICO</td>
<td>Enter “TWIN” followed by the correct twin code (0, 1, 2) in the First Five box, e.g., “TWIN1”. Enter the payee’s name on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Correct the BA Number</td>
<td>Enter “B” followed by the railroad’s 4-digit BA number in the First Five box, e.g. “B3724”. Enter the payee’s name on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry for Input of Collective Bargaining Code</td>
<td>Enter “1”, followed by “CBCD” in the First Five box, e.g. “1CBCD”. Enter the payee’s name on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Correct the Geographic Code</td>
<td>Enter “GC”, followed by the 3-digit geographic code in the First Five box, e.g., “GC223”. Enter the payee’s name on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Correct Date of Birth (RR or SS)</td>
<td>Enter “DOB” in the First Five box to correct a RR DOB. Enter “DOBSS” in the First Five box to correct a SS DOB. Enter the correct DOB on Line 1 of the 5-line name/address block as an 8-digit date in century-year-month-date order.</td>
</tr>
<tr>
<td>Examples:</td>
<td>April 28, 1987 = 19870428</td>
</tr>
<tr>
<td></td>
<td>October 12, 1995 = 19951012</td>
</tr>
<tr>
<td></td>
<td>January 1, 2001 = 20010101</td>
</tr>
<tr>
<td>Entry to Correct the Medicare Disability Code</td>
<td>Based on the type of case, enter the following in the First Five box:</td>
</tr>
</tbody>
</table>
"0DISA" to remove disability code,
"1DISA" for a disabled Employee,
"4DISA" for a disabled child,
"6DISA" for a disabled spouse,
"8DISA" for a disabled widow,
"9DISA" for a disabled IPI.

Enter the payee’s name on Line 1 of the 5-line name/address block.

<table>
<thead>
<tr>
<th>Entry to Correct the Sex Code</th>
<th>Enter “1” for male, “2” for female, and “3” for unknown followed by “SXCD” in the First Five box, e.g. “2SXCD”. Enter the payee’s name on Line 1 of the 5-line name/address block.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entry to Correct Interim Widow Code</td>
<td>To correct an erroneous interim widow code, enter “IWCD0” in the First Five box. Enter the payee’s name on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Correct Type of Beneficiary Symbol</td>
<td>Enter “TOB” followed by the appropriate 2-digit numeric code from RCM 6.9.13 in the First Five box, e.g., “TOB71”. Enter the payee’s name on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Correct RRB COL Earmark Code</td>
<td>Enter “RREM8” in the First Five box when all mass adjustments have been applied, but the master record still reflects pending status. Enter the payee’s name on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Correct SSA COL Earmark Code</td>
<td>Enter “SSEM8” in the First Five box when the most recent SS COL has been applied, but the master record still reflects pending status. Enter the payee’s name on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Correct Employee’s SSA Number</td>
<td>Enter “EMPSS” in the First Five box. Enter the correct SS number on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Correct the SSA Claim Number</td>
<td>Enter “CLMSS” in the First Five box. Enter the correct SSA claim number on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Correct the SSA</td>
<td>Enter “BIC” followed by the correct suffix in the First</td>
</tr>
<tr>
<td>Claim Number Suffix</td>
<td>Five box, e.g. “BICC1”. Enter the payee’s name on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>---------------------</td>
<td>--------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Entry to Correct The Beneficiary SS Account Number</td>
<td>Enter “BENSS” in the First Five box. Enter the correct account number on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Correct the SSA Trust Fund Indicator</td>
<td>Enter “SSATF” in the First Five box. Enter “OASI” or “DI” on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Correct SSA Partial Rate Code Data</td>
<td>Enter “PDATA” in the First Five box. Enter “N” on Line 1 of the 5-line name/address block if there is no partial rate. Enter “P” in the first box, the monthly rate in boxes 3-8 ($$$cc) and the beginning date (MOYEAR) in boxes 10-15 on Line 1 of the 5-line name/address block.</td>
</tr>
<tr>
<td>Entry to Input RRA MAX Code (SUP ANN Cases)</td>
<td>Enter “3CBCD” if the EE receives a pension under a collective bargaining plan or “4CBCD” if the EE receives a pension under a non-collective bargaining code in the First Five box. Enter the payee’s name on Line 1 of the 5-line name/address block.</td>
</tr>
</tbody>
</table>

Line 1 – Line 2 – Line 3 – Line 4 – Line 5 Boxes (Mandatory Entry) - Based on the selected change code in the Change Code box and the entry in the First Five box, make the appropriate entries on Lines 1 through 5.

Note: If entering an address (Change Code 2) or a name/address (Change Code 3), use an exclamation point ! for the group mark.

Note: If entering a Date of Birth, enter an 8-digit date in century-year-month-date order. For example, show September 29, 1984 as “19840929”.

Press TAB or ENTER to move to the Prepared By box.

Prepared By Box (Mandatory Entry) - Enter your name. Press TAB or ENTER to move to the Unit box.

Unit Box (Mandatory Entry) - Enter your unit designation. This completes the data entry requirements unless the G-607 is being used to enter a foreign address. If the G-607 is being used for a change other than a foreign address, see the Disposition instructions below. If you are entering a foreign address (change code 2 or 3), press TAB or ENTER to move to the Geographic Code box.

Date Box (Prefilled Entry) - The current date is prefilled. No entry is necessary.
Geographic Code Box (Optional Entry) - Enter the appropriate 3-digit geographic code for the foreign country when entering a foreign address with change code 2 or 3. See RCM 10.2 Appendix B2 for the correct GEO code.

Auth For Rep Payee Change Box (Future Use)

Rep Payee Code Box (Future Use) - The PC G-607 program does not process Code R COA transactions at this time.

Disposition

UNDO RECORD BUTTON - Click on the UNDO RECORD BUTTON in the lower right corner of the G-607 screen to refresh the G-607 screen at anytime prior to establishing the record on the PC database. Any entries made on the G-607 will be erased and new or corrected entries can be made.

UPDATE RECORD BUTTON - After making the appropriate entries, click on the UPDATE RECORD BUTTON in the lower left corner of the G-607 screen to submit the transaction to the program database. To check on the submitted transaction, click on the scroll arrow in the Review Current G-607s box, also in the lower left corner of the screen. Scroll down through the listed cases to locate your transaction. Transactions are listed in ascending claim number order and the employee’s name will be listed next to the claim number if the employee’s name was entered on the G-607.

DELETE RECORD BUTTON - To delete a submitted G-607 transaction (prior to the DAISY upload), locate the record by scrolling through the records in the Review Current G-607s box. Click on the record to be deleted and the record will appear on the screen. Click on the DELETE RECORD BUTTON. A box insert will appear asking you if you want to delete the record. Click on the “YES” box to delete the record.

NEW G-607 BUTTON - After updating a record, the newly established record will remain on the G-607 screen. Click on the NEW G-607 BUTTON to refresh the screen. A new G-607 can now be entered.

PRINT G-607 BUTTON - Click on the PRINT G-607 BUTTON to create a screen-print of the G-607. The print will be made at your PC printer.

CLOSE FORM BUTTON - Click on the CLOSE FORM BUTTON to return to the PC G-607 Program entry screen.

Exit

To exit the PC G-607 program. Click on the “X” in the upper right hand corner of the program entry screen or click on the EXIT BUTTON (graphic) in the lower right corner of the program entry screen.
G-627 – Request for Information from Quality Control/Claims Specialist

Form G-627 is available on RRAILS. If replaces the BSB-111.

Use

The form is used by examiners to refer questions on specific case handling to lead examiners and Quality Analysts.

Examiner Form Completion:

- RRAILS completes the claim number, the examiner's name and the date.
- Enter the RCM reference(s) and AFCS charge.
- Under “Summary of Facts and/or Questions”, briefly state the facts in the case, explain the problem and ask your question.
- DO NOT MAKE ANY ENTRIES IN THE “REQUIRED ACTION” section.

Lead Examiner/Quality Analysts Form Completion:

- If your name and the date prefill at the top of the form, delete these entries.
- Tab to the “REQUIRED ACTION” section and enter the action(s) to be taken.
- Enter your name and date at the bottom of the form.

Routing

Operation’s management will determine how the form should be routed.
9.5.1 Scope Of Chapter

This chapter will familiarize you with the CRT (cathode ray tube) terminals used by this bureau. Information about operating CRT terminals is also in the manual, User's Guide. It contains information on resolving mechanical problems and problems with access. A copy of the manual is kept next to some CRT terminals. If a problem arises that cannot be resolved, contact the Help Desk through your unit supervisor.

The teleprocessing software system which displays data on the CRT terminals is called the Integrated Database Management System-Data Communications (IDMS-DC).

9.5.2 Terminology

The following terms are helpful in understanding the operation of CRT terminals:

- **Teleprocessing** is computer processing via remote terminals. The CRT terminals in use at the RRB are a teleprocessing device. Each terminal is connected to the RRB main computer; by entering input on the remote terminal keyboard, the user can access a particular computer system. Information accessed through the terminals will be displayed on the video screen.

  There are three major applications of a teleprocessing system: 1) query processing, whereby the user can retrieve information from a computer system; 2) information updating, whereby the user can change the data in the computer's master record directly through the terminal keyboard; and 3) compiling, executing, and "debugging" computer programs.

- **Database** is a type of data storage, it is the storing of common data to eliminate the need for duplicate files. For instances, currently an annuitant's social security number is found in several computer files throughout the bureau and the RRB: CHICO, RASI, Research record, etc. In the database concept, one master record is established for each annuitant; common items such as social security number, date of birth, name and address, etc. are shown only once in the database record. Every individual system, such as CHICO, would retrieve the needed information from the database master record. Likewise, if one system makes a data change all other systems would have access to the new data.

- **On-line processing** occurs when data can be processed immediately. The bureau's CRT systems are on-line processing, since the user has immediate and direct response to his inquiries.

  On-line processing requires a computer system to have a random (or direct) access capability. Random access means the capability to go directly to a specified location to find a needed record in a file without searching the file from the beginning. For instances, the DATA-Q system can randomly access the necessary CHICO information for its display from the database.
### 9.5.3 Keyboard

The terminal keyboard is similar to a standard typewriter keyboard in appearance and arrangement of keys. Most keys perform the same function as the corresponding keys on a typewriter. The layout of the keyboard is shown in Exhibit 2.

The keyboard can generate and display 26 upper case letters, 10 numbers, and 26 symbols and punctuation marks. The character will be displayed when the corresponding key is pressed. The character is displayed on the screen in the position marked by the cursor, (the guideline or block that moves along as the characters are typed). The keyboard also includes control keys which are used to edit data and generate input messages to signal the computer.

Keys that have two designations on their faces can generate either character, depending upon the position of the SHIFT key. The lower character is generated when the key is pressed and the keyboard is in the unshifted mode. To generate the upper character, the SHIFT key must be held down while the selected key is pressed. The SHIFT keys and the SHIFT LOCK key function essentially the same as they do on any standard typewriter. To generate the front function of any of the control keys, the alternate shift key must be held down while the selected key is pressed.

The alphabetic, numeric, and special symbol key functions the same as they do on any standard typewriter.

<table>
<thead>
<tr>
<th>Marking On Key</th>
<th>Name Of Key</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alt</td>
<td>Alternate Shift</td>
<td>To activate the function on the front of a control key, the alternate shift key must be held down while the selected key is pressed.</td>
</tr>
<tr>
<td>Clear</td>
<td>Clear</td>
<td>Pressing the clear key will usually delete the current screen and move the system backward one screen level.</td>
</tr>
<tr>
<td>Enter</td>
<td>Enter</td>
<td>The ENTER key must be pressed after a data entry is typed onto the screen. The Enter key passes a data request from your terminal to the RRB computer, which in turn will generate a response. Do not press the ENTER key if you are typing information which is not a data request. For instance, do not press the ENTER key after typing in the routing designation for a printout.</td>
</tr>
<tr>
<td>Erase EOF</td>
<td>Erase to End of</td>
<td>When pressed, this key will delete any characters</td>

</tbody>
</table>
### 9.5.4 Password Requests

Bureau personnel authorized to use the CRT terminals must be assigned a user ID and a password. These passwords are necessary to operate the on-line systems in accordance with the Privacy Act. Some passwords will not access every system. If access to a system is required, additional clearance may be requested on a G-455. An employee should never divulge his password to anyone for security reasons.

Form G-455 must be completed by a supervisor and submitted to the Evaluation, Security, and Control Section. This form is also used when an employee resigns, changes names, or forgets the password. When an employee is transferred, a G-455 must be completed. Usually a new password is not required, however, the user ID must be updated.

</tbody>
</table>
9.5.5 Terminal Operation

CRT terminals are continuously available for use 24 hours a day. A terminal should never be turned off. At the end of each regular business day the screen light knob should be turned down to dim the screen.

When most CRT terminals are not in use for several minutes, the RRB train logo will automatically disappear from the screen. Press the RESET key to display the RRB train logo and resume terminal operation.

At times it is necessary for computer services to shut down all terminals to change or move system data. When a scheduled shutdown occurs, you will be advised through your unit supervisor that terminal operations will be unavailable and when normal operations will resume.

Usually, if a CRT terminal is down, it will come up again momentarily. If it does not, notify your supervisor. Any major mechanical problems should be reported to the HELP desk through your supervisor.

9.5.6 Standard Sign-On And Sign-Off Procedures

1. Teleprocessing Activation

   The teleprocessing software system which displays data on the CRT terminals is called IDMS-DC (Integrated Database Management System - Data Communications.)

   The CRT is not operational unless the Power-On Light is on. The light is located below the screen either in the middle or on the right side. Consult the User's Guide if you believe there is a mechanical problem. If the problem cannot be resolved, contact the Help Desk through your unit supervisor.

2. Initial Sign-on Procedure

   When the system comes up in the morning or after being down during the day, the screen will display the RRB train logo. This train also appears if an application/system is not used for ten minutes.

   From the RRB train logo screen enter the name of the database to be accessed (DATABANK, RRAPID, etc.) and press the ENTER key. Refer to Exhibit 32 which shows a navigation chart of the systems contained in DATABANK and RRAPID.

   NOTE: If the RRB logo screen is not present when the terminal is unlocked, enter the name of the database and press the ENTER key. When exiting the database, the RRB train logo screen will return.
If your database selection is successful, the next screen will have one of the following lines displayed:

V2 ENTER NEXT TASK CODE:  (for DATABANK)

V6 ENTER NEXT TASK CODE:  (for RRAPID)

Follow the sign-on procedure as explained in Section 4 below.

3. Problems

The following message indicates the database selected is currently not functional.

UNABLE TO ESTABLISH SESSION INIT FAILED WITH SENSE (TERMINAL #)

Wait five minutes and then try signing on again.

The following message should be reported per RCM 9.5.5.

SESSION NOT BOUND

The following messages indicate a particular system is unavailable.

APPLID PARAMETER INVALID

TASK OUT OF SERVICE

If you were not notified that the system would be down, report the problem per RCM 9.5.5.

4. Sign-on With User ID and Password

To access a database, you must have a USER ID and a password. If you need these, see RCM 9.5.4.

After the initial sign-on (see 2 above), the cursor will be positioned on the line after one of the following messages:

V2 ENTER NEXT TASK CODE

V6 ENTER NEXT TASK CODE

As part of the sign-on procedure, you must enter your USER ID. This code consists of an eight character code that has been assigned to you.

To complete the sign-on procedure, type the message: SIGNON (followed by the USER ID). For instance, type: SIGNON JONESJOC then press the ENTER key. Note that the hyphen is deleted from the spelling of SIGNON; a space
should be entered between the word, SIGNON, and your USER ID. If the USER ID has been entered correctly, a password prompt line appears:

ACFA 2032 ENTER PASSWORD

Type in your password and press the ENTER key. If the USER ID was incorrectly entered, the following message will be displayed.

ACFA 2041 INVALID INPUT RE-ENTER LOGONID

Reenter the word SIGNON and the correct USER ID.

For security reasons, the password does not appear as it is being typed. If the password is entered correctly, this message appears on the screen:

ACFA 2032 ENTER PASSWORD

ACFA 2050 SIGNON COMPLETE

ACFA 1137 LAST SYSTEM ACCESS 13 16-2/14/92 FROM 1441191C

On the third line of the password validation screen, the numbers before and immediately after the dot represent the Signon time, i.e., 13 16 is 1:16 p.m. After the dash, the sign-on date appears. The numbers after the word FROM represent the terminal number.

Do not enter any additional data on this screen. Press ENTER and the next screen will show:

ENTER NEXT TASK CODE:

You have now successfully accessed the database application. Refer to the appropriate section of RCM 9 or 16 for information on each database application. See Exhibit 32 which shows the systems in each database or how to view a system which must be accessed through the menu of another system.

Three chances are given to each user to enter his password. If the password is entered incorrectly, the following messages will appear:

ACFA 2032 ENTER PASSWORD -

ACFA 1012 PASSWORD NOT MATCHED

ACFA 2032 ENTER PASSWORD -

If the password continues to be entered incorrectly, the message will be repeated up to three times. If the password is entered incorrectly a third time, the following message appears:
ACFA 2047 MAXIMUM PASSWORD ATTEMPTS EXCEEDED

ACFA 2059 SIGNON TERMINATED

The system terminates access for the current USER ID. Contact the Administrative Operations Section - BDP to have your password reinstated.

If an incorrect entry has been made when trying to access a particular system, the message UNDEFINED TASK CODE appears on the screen. IDMS-DC displays the erroneous entry on the top line of the screen until a correct entry has been made.

If you attempt to access a system you are not authorized to use, or if you attempt to access a system without signing on, the following message will appear:

SECURITY VIOLATION ON TASK CODE: (Name of System)

ENTER NEXT TASK CODE:

If you failed to sign on, do so and then access the desired system.

If IDMS-DC is denying you access to a system that you should have access to, advise your supervisor to call the Administrative Operations Section - BDP to have this resolved.

5. Sign-off Procedure

Signing-Off RRAPID

After you are finished with one system within the Railroad Automated Processing Integrated Database (RRAPID), use the appropriate exit key for the system you have been using. This will return you to the RRAPID main menu. You have two options available:

You may enter a different system within RRAPID by selecting the assigned number and entering it next to the word, SELECTION. Then press ENTER, or

You may sign off by entering an X next to the word, SELECTION. Then press ENTER. The RRB train logo screen will appear. You can access another database by following the appropriate sign-on procedure in Section 2 above.

Signing-Off DATABANK

A somewhat different approach is taken when signing off DATABANK. On the last system screen, enter the letter E in the ACTION field and press ENTER. The next screen will show ENTER NEXT TASK CODE. From this screen you may either:
Select another system within DATABANK, or

Sign off by typing the word, BYE, then pressing ENTER. This will sign you off the system and bring up the RRB train logo screen.

Refer to RCM 9.10 for instructions on signing-on, moving through, and exiting the PAR system.

9.5.7 Requesting A Printout Of A CRT Screen

When you want to print the information that is currently displayed on the CRT screen, press the PRINT key.

Some systems allow for the entry of the requestor name and unit before the screen is printed. To do this from a DATA-Q or MOLI screen, press the PF-2 key. The following line will appear near the bottom of the screen:

> - - - - -> ENTER NAME Xxxxxxxxxx AND UNIT <- - - - - <

At this point, enter your name and any routing designation decided upon in your office. Use the spacebar [or the ERASE EOF key] to blank out any X's in unused spaces.

To do this from a taxation system screen, move the cursor to the area next to the words, REQUESTOR'S NAME. Enter your name in this area and use the spacebar [or the ERASE EOF key] to blank out the X's in any unused spaces.

Once you have entered your name or your name and routing designation, press the PRINT key. The printer will then produce a printout, provided it has been turned on and is properly equipped with paper.

9.5.8 Accessing RRB System Applications

A. Accessing the RRAPID Systems - The following is a list of the current systems in the Railroad Automated Processing Integrated Database (RRAPID), a brief description, and the point of reference for detailed information:

<table>
<thead>
<tr>
<th>System</th>
<th>Description</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>RATEH (ORIS)</td>
<td>On-line Rate History Inquiry System</td>
<td>16.2</td>
</tr>
<tr>
<td>PAM (POLO)</td>
<td>Pam On-line Operation</td>
<td>16.3</td>
</tr>
<tr>
<td>DATA-Q</td>
<td>Data Query</td>
<td>9.5</td>
</tr>
<tr>
<td>REQUEST</td>
<td>Retirement Adjudication System-Initial</td>
<td>9.5</td>
</tr>
<tr>
<td>MOLI</td>
<td>MIRTEL On-Line Inquiry</td>
<td>9.5</td>
</tr>
</tbody>
</table>
The RRAPID main menu (see Exhibit 3) will appear with the message "NO HOTKEY SESSION." (See Section C below for an explanation of navigating between systems in RRAPID using the HOTKEY function). Select the number of the application you wish to view and enter it on the lower left side of the screen next to the caption, NEXT SELECTION. Press ENTER.

Depending on your screen selection, you will either view the first screen of the selected application or another menu for which the appropriate screen must be selected.

The systems having a number designation on the RRAPID main menu are available in RRAPID.

<table>

<td>9.5</td>
</tr>
</tbody>
</table>
FTRACK, FTCHECK, and PISTATUS can also be accessed directly through DATA-Q. Refer to instructions for this in RCM 9.5.11 Section 2.

From any system screen of RRAPID, press the appropriate exit key to return to the RRAPID main menu. To exit from RRAPID, refer to sign-off instructions in RCM 9.5.6 section 5.

B. Opening Multiple RRAPID Sessions – Please See FOM1 1525.15.3 for information on using the RRAPID Advantage

C. Navigating Between Systems in RRAPID using the HOTKEY Function - The HOTKEY function allows you to more efficiently access information for a particular claim number or SSN from multiple application systems in RRAPID without re-keying the identifying information. A HOTKEY session is established whenever you sign on to RRAPID and continues as you move from system to system. The session ends when you sign off the RRAPID menu.

1. Beginning a HOTKEY session - Sign on to RRAPID using the instructions in RCM 9.5.6. and 9.5.8A. The RRAPID menu will appear with the message "NO HOTKEY SESSION." Select the system you first wish to access. Enter the identifying information for that system (claim number, SSN, etc.) for the individual for whom you are retrieving information or creating a transaction. Complete your inquiry or transaction and exit the system in the normal manner (generally PA2). The system will return you to the RRAPID menu and retain the identifying information you were using.

Select another system and press ENTER. Additional identifying information for that individual will be retrieved from either RATEH or EDM (depending on the destination you select) and stored for use during your HOTKEY session. When you enter your next and subsequent destinations, the identifying information for each application will be prefilled on the first screen that requires them.

NOTE: It will be necessary to key over the prefilled data if the data retrieved from RATEH or EDM is discrepant or incorrect.

The identifying information in use is displayed on the message line at the bottom of the RRAPID menu as shown below.

HOTKEY IN FORCE FOR D000123456 1 BEN 123456789 EE 1234 ER 1234

It includes the RR prefix, claim number and payee code, the beneficiary's SSN, the employee's SSN and, in a few circumstances, the employer number. The only identifying information displayed when you leave the first application you entered is the information used to access that
application. After additional applications are entered, the message will display all available identifying information. (The employer number is only displayed after leaving EDM or an RUIA application.)

NOTE: HOTKEY does NOT allow you to pause where you are, go to another system and return exactly to where you left. It facilitates movement between systems and decreases keystrokes. For example, if you are in the middle of a transaction in one system (e.g., creating an award in ROC) and you wish to retrieve some information from another system (e.g., a new mass adjustment rate from MAIS), you must finish storing the data for the screen you are on (usually by pressing ENTER) before you leave or you will have to re-key the data when you return.

2. Changing claims or individuals during a HOTKEY session - You may change identifying information during a HOTKEY session in three ways.

Press PF5 (REFRESH) while on the RRAPID menu. The HOTKEY IN FORCE message is replaced by the message NO HOTKEY SESSION. Go to the next application and enter the identifying information for the new claim or individual. When you exit this application, the HOTKEY session will again retrieve all possible identifying information from RATEH or EDM for the new claim/individual.

Return to the main screen for the application you are currently in and key in the new identifying information. The HOTKEY session knows when you change claims/individuals and retrieves the identifying information for the new claim/individual if you go to another application.

If you change beneficiaries within a claim, the HOTKEY session proceeds for whichever beneficiary is active when you leave the application. The HOTKEY session knows when you change beneficiaries and retrieves the identifying information for the new beneficiary if you go to another application.

3. Ending a HOTKEY session - The HOTKEY session is terminated when you EXIT the RRAPID menu.

NOTE: If your session terminates abnormally (i.e., you forget to sign off or the system goes down), your HOTKEY session will still be in force when you next sign on to RRAPID. The last claim number or SSN you were using will appear on the RRAPID menu. You may continue working with that number or you may refresh the menu (using PF5) and begin a new session.

C. Accessing DATABANK Applications - See RCM 9.10 Sections 1 to 5 for an overview of the Program Accounts Receivable (PAR) System located in the DATABANK database. Other administrative systems such as Federal Financial
System (FFS) are accessed through DATABANK. Procedure for signing on to the PAR system to view available accounts receivable screens is located in RCM 9.10.50. To sign-off DATABANK refer to instructions in RCM 9.5.6 section 5.

9.5.9 DATA-Q

DATA-Q allows direct access to selected data in the checkwriting (CHICO) file through CRT terminals. DATA-Q may be used whenever there is need for current payment status information. Any new data entered into the CHICO system in a computer run between midnight and seven a.m. will appear on the DATA-Q screen at seven a.m.

9.5.10 DATA-Q Display

The following items will be shown on the DATA-Q terminal display: (See Exhibit 4 for a sample DATA-Q display.)

- **CLAIM NO** - The annuitant's beneficiary symbol, prefix and claim number.
- **P/C** - The payee code shown on the Master Record (usually from the latest annuity award form).
- **PSEUDO/DUAL NO** - This field is used for two purposes: To display a dual annuitant's other RRB claim number, or to display the annuitant's pseudo claim number when the annuitant has been assigned a pseudo claim number for Medicare purposes. If a pseudo claim number is displayed, the information was received from the MOLI database, and will be pink in color. If a dual number is displayed. The information was received from the DATAQ database and will be green in color.

NOTE: If a dual annuitant also has a pseudo claim number for Medicare purposes, the other RRB claim number will be the only number displayed in this field. In this situation, any information about the pseudo claim number can be found by viewing the MOLI screens (see RCM 9.5.20 through 9.5.22).

- **RR/SS** - The current status of the annuitant's railroad and social security benefits.
- **IN FRC** - In current pay status
- **N APPL** - No application processed
- **SUSP** - Suspended
- **TERM** - Terminated
- **NAME/ADDRESS** - The name and home or mailing address on our records.
- **C/M** - Combined Mailing.
• **NO** - No Combined Mailing.

• **YES** - Combined Mailing. The employee and spouse have the same home mailing address.

• **GEO CODE** - If the annuitant record contains a foreign address (foreign country or U.S. Possession) the geographical code is displayed in this field. If the record does not contain a foreign address, the geographical code is not displayed.

• **DOB** - Annuitant's date of birth. If both an RR annuity and SS benefit are being paid, DOB in the RR record is shown. In SS only cases, the DOB in the SS record is shown.

• **SEX** - Annuitant's sex is indicated. This field is filled with information from the DATAQ or MOLI database. If the information is from DATAQ, it will be in green. If the information is from MOLI, it will be in pink.

• **RATE INFORMATION** - The total current monthly check amount, and the individual regular annuity (after SMIB and tax withholdings, if applicable), SS benefit (after SMIB, if applicable), and supplemental annuity rates, if payable.

  NOTE: To determine where the SMIB deduction occurs, see the SMIB CODE field.

• **REP PAYEE** - If a representative payee is involved, his status will be indicated as follows:

  - **BLANK** (No rep payee)
  - **COURT** (Court-appointed rep payee),
  - **BOARD** (Board-appointed rep payee),
  - **PARENT** (Parent-For-Child rep payee),
  - **HRCRT** (High Risk-Court Appointed without a Third Party Custodian),
  - **HRBRD** (High Risk-Board Appointed without a Third Party Custodian),
  - **HRCRTC** (High Risk-Court Appointed with a Third Party Custodian),
  - **HRBRDC** (High Risk-Board Appointed with a Third Party Custodian),
  - **PRNTC** (Parent for child with a Third Party Custodian).

• **EARMARKS** - Two codes are displayed in this field which will indicate the status of the record after each of the following mass adjustments:

  - **AERO** - Automatic Earnings Recomputation Operation
  - **RAIL** - Retirement Adjustment to Include Lag
  - **COL** - Cost of Living
An acronym will be displayed for each of the mass adjustments described above. The acronyms are as follows:

- **AE - AERO**
- **RL - RAIL**
- **CL - COL**

Below each of these mass adjustment acronyms, a summary code which indicates the status of the record after each mass adjustment will be displayed as follows:

- **OK -** The record was successfully adjusted in each mass adjustment of this type.
- **RE -** Reject or Review
  
  The record rejected from the mass adjustment, or the record requires review as a result of the mass adjustment.
  
  If the record rejected, manual handling is required to apply the mass adjustment and to clear the earmark code.
  
  If the record requires review, the record was adjusted, but manual handling is required to ensure the proper mass adjustment processing occurred and to clear the earmark code.
  
  **NOTE:** RE will be displayed if the record rejected or was coded for review in the most recent or any previous mass adjustment of this type. After each mass adjustment is run, paper listings of the records that rejected or were coded for review are produced. These listings are used to determine the specific year the record was rejected or coded for review.

- **BLANK -** The record was not selected for the mass adjustment; no action is required.
  
  **NOTE:** Records in suspense, other than code 35, 69, 88, or 98, are earmarked with reject code 03 by the mass adjustment operation, i.e., COLA, AERO or RAIL. The earmark will only be displayed on PREH, screen 3250, and NOT on DATAQ. Upon reinstatement remove the earmark by checking the box, 'Earmarks Considered' or submitting a G-607, if appropriate.

- **FAMCD -** FAMILY CODE
  
  A single digit code appears when the entitlement of a young parent depends upon the entitlement of a minor or disabled child. The family code is the same as the payee code of the young parent.

- **TWCD -** TWIN CODE
A single digit code appears when:

1) more than one beneficiary entitled to benefits on the claim number has the same DOB; or

2) there are parent beneficiaries with beneficiary symbols of P and F, or of LP and LF.

<table>
<thead>
<tr>
<th>Code</th>
<th>Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>First beneficiary; or F or LF</td>
</tr>
<tr>
<td>2</td>
<td>Second beneficiary; or P or LP</td>
</tr>
<tr>
<td>3</td>
<td>Third beneficiary</td>
</tr>
</tbody>
</table>

- **LAST COA** - Date of the latest change of address.
- **EE SSN** - The railroad employee's social security number is displayed in this field.
- **SMIB INFORMATION**
- **SMIB RATE** - The monthly deduction for SMIB premiums.
- **SMIB CODE** - A separate code for both the latest RR and SS award; in combined benefit cases, this code will tell you from which benefit (RR or SS) SMIB is being deducted:

<table>
<thead>
<tr>
<th>Code</th>
<th>Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>No benefit is being paid or SMIB is not being deducted from this benefit.</td>
</tr>
<tr>
<td>1</td>
<td>The beneficiary enrolled for SMIB and his first SMIB coverage has not been terminated.</td>
</tr>
<tr>
<td>2</td>
<td>No response.</td>
</tr>
<tr>
<td>3</td>
<td>The beneficiary filed a &quot;No&quot; election in his IEP or a GEP, or his &quot;Yes&quot; election was denied.</td>
</tr>
<tr>
<td>4</td>
<td>The beneficiary's first SMIB coverage has terminated, either at his request or for non-payment of premium, and he has not re-enrolled.</td>
</tr>
<tr>
<td>5</td>
<td>The beneficiary re-enrolled, following termination of his first SMIB coverage, and his second SMIB coverage has not terminated.</td>
</tr>
<tr>
<td>6</td>
<td>The beneficiary's second SMIB coverage has terminated, either at his request or for non-payment of premium.</td>
</tr>
</tbody>
</table>
7 RESERVED

8 The beneficiary is covered by a state buy-in agreement and premium deductions are not in effect because the welfare agency is paying the premium.

9 The beneficiary is entitled to an annuity (or is an IPI) under another RRB claim number and the enrollment (SMIB code) is shown under the other claim number.

- **DISA CODE** - This is an indication if the annuitant is entitled to Medicare based on disability. If he is not, the word "AGE" will appear. If the annuitant is entitled to Medicare based on disability, a code will appear indicating his (her) status; i.e., EMP, EMP 65, CHILD, CHILD 65, SP, SP 65, WIDOW, WIDOW 65.

- **HIB DATE/SMIB DATE** - The month and year HIB/SMIB entitlement begins. These fields are filled with information from the MOLI database, and will be pink in color.

- **TABLE RATE** - The current Medicare premium from the MOLI database. This information will be displayed in pink.

- **DIRECT DEPOSIT INFORMATION**

  - **DATE** - The effective date of direct deposit.

  - **ROUTE NO** - The depositor's bank's routing number and check digit.

  - **ACCOUNT TYPE/NO** - The depositor's account number will be preceded by a "C" or "S" type of account designation.

- **PREVIOUS ACTIONS**

  - **ACCRUAL/OLD RATE/NEW RATE** - The last rate of the RR annuity (after SMIB), the SS benefit payment, and/or the supplemental annuity, prior to the latest adjustment, is shown under "old rate." If the last award was an accrual award, this amount will also be shown. The latest rate is shown under "new rate" for comparison purposes. (This should be the same rate shown in "current rate information" above.)

- **VOU**

- **TYPE** is "AWD"

  The most recent activity was an award action. The date of the award action is shown under "ACC DATE." See RCM sec. 8.1, Exhibit 1 for a list of voucher number assignments.

- **TYPE** is "T/S"
The most recent activity was a suspension or termination. The date of the termination or suspension is shown under "ACC DATE." This should not be confused with the effective date, shown under "EFF DT".

**Batch Number**

011-299  T/S caused by G-96 or FAST-S/T

300-399  T/S caused by returned payment

- **ACC DATE** - If the most recent action was an award action, the date of the check is shown. If the most recent activity was a suspension or a termination, the date of the G-96 or the FAST-S/T batch date is shown.

- **TYPE** - The type of the last previous activity is indicated: award, suspension or termination. As mentioned above, an award will be shown as "AWD" and a suspension or termination will be indicated as "T/S".

- **TERM/SUSP INFORMATION**

- **CAUSE** - The termination or suspension code from the G-96, FAST-S/T, or cancelled payment is shown if either RR or SS benefits are not in current payment status.

- **EFF/DT** - The month and year of the RR or SS termination or suspension is shown, as indicated on the G-96 or FAST-S/T transaction. This field will be blank if a 00-00 effective date was present in the FAST-S/T or cancelled payment activity record or, the G-96 entry item was blank, at the time of processing.

  NOTE: If the EFF/DT field is blank, develop for the actual suspension/termination effective date. When the month and year of the event is learned, process a new FAST-S/T transaction to update the record.

- **RR PRE-TAX** - The railroad annuity check rate before any tax withholding is displayed in this field.

- **TAXES W/H**

- **RR ACC** - Taxes withheld from the latest regular annuity accrual.

- **SUP ACC** - Taxes withheld from the latest supplemental annuity accrual.

- **RECUR RR** - Taxes being withheld from the recurring regular annuity.

- **RECUR SUP** - Taxes being withheld from the recurring supplemental annuity.

  NOTE: Accrual tax withheld amounts shown after "RR ACC" or "SUP ACC" will be deleted if the amounts in "PREVIOUS ACTIONS" are deleted.
• **SSA CLAIM NO** - If the annuitant is claiming SS benefits, the claim number under which he is entitled is shown, followed by the appropriate suffix. ("0" indicates a blank space in the suffix.)

• **BEN SSN** - The annuitant's own SSA number is shown.

• **SS ENTITLEMENT** - The code "YES" indicates the RR annuity is reduced for entitlement to SS benefits. Code "NO" indicates the annuity is not being reduced.

• **SUP EF DT** - The effective date of the supplemental annuity.

• **SUP RED** - Amount of supplemental annuity reduction due to entitlement to a pension from railroad employer.

• **BA NO** - The BA number of the railroad paying the annuitant a pension.

• **CB** - A collective bargaining code "1" is shown if the employee is receiving a pension from his railroad employer which was negotiated through collective bargaining.

• **DATE** - The current display date is shown. This date will appear on any printouts made of the DATA-Q display.

• **MESSAGES** - DATA-Q will display a series of instructional messages on the bottom of the terminal screen. Follow these messages for correct input necessary for a DATA-Q display.

DATA-Q will also display a message on the bottom of the screen if a FAST S/T or FAST COA transaction is pending, i.e., the S/T or COA transaction has been entered on FAST but has not yet been processed.

### 9.5.11 Operating DATA-Q

After you have signed on to the RRAPID database (see RCM 9.5.6) access DATA-Q by selecting the appropriate number assigned to DATA-Q on the RRAPID Main Menu. Then press ENTER.

Note: DATA-Q is unavailable if the message PREVIOUS TASK ABENDED WITH ABEND CODE appears. Follow the instructions in RCM sec. 9.5.6.

A. **DATA-Q Display Selection** - Once the DATA-Q system has been accessed, the screen will display the message:

"ENTER PREFIX X RRB# (9 DIGITS) XXXXXXXXX and PAY CODE X."

Press the appropriate keys on the terminal keyboard in the prefix, claim number and payee code order. Then press the ENTER key.
Prefixes may be punched as letter codes (A, D, H) or as number codes (A = 1, D = 4, H = 8).

Note that nine digits must be entered for the claim number. Precede a six-digit number by three zeros.

If an "A" is entered as a prefix for a nine digit number, but the claim number is on DATA-Q as a "D" record, the "D" record will be displayed.

**EXCEPTION:** In cases where there is a Pension Protection Act (PPA) 3rd-party payment in effect and a survivor benefit payment record with a ‘D’ prefix exists, the specific prefix (‘D’ for the survivor benefit record ‘A’ for the PPA payment record) **must** be entered in order for the DATA-Q record to be displayed for the specific payment record. If an error is made at any time before the ENTER key is pressed, move the cursor back to the incorrect entry and type in the correct entry. The cursor can be moved by pressing one of the "arrow" keys on the lower right hand side of the keyboard.

If an invalid prefix is entered, DATA-Q will display the message, INVALID PREFIX - TRY AGAIN. The cursor will return to the beginning of the claim number field. Enter the correct prefix.

If an invalid RRB claim number is entered, the message "INVALID RRB # TRY AGAIN" will appear. The cursor will return to the beginning of the claim number field. Enter the correct claim number.

If a claim number not on the database is entered, DATA-Q will display the message: NO RECORD FOUND - TRY AGAIN; OR PF14 FOR INITIAL DD. The cursor will move back to the prefix position. Enter a different claim number, depress PF14 to access IDDA, or depress the clear key and sign off. Although all terminals will show this message, only field office personnel and a limited number of Headquarters employees are authorized to input information to IDDA or view the screens.

Enter the payee code if you wish to have immediate access to a particular record. If you do not enter a payee code, DATA-Q will display the closest record on database. This is usually the last record put into pay status.

If an incorrect payee code is entered, the display will read: "NO RECORD FOUND - TRY AGAIN; OR PF14 FOR INITIAL DD." This means there is no record under that payee code. It does not mean there is no record under that claim number.

Once the necessary identifying information has been entered into DATA-Q, the requested payment record will be displayed on the DATA-Q screen.
B. Viewing Additional Records on the Same Claim Number - If you wish to view additional screens after the initial screen is displayed, you have two options for selecting screens.

- After the requested screen has been displayed, a prompt line will appear: "SCREEN X DISPLAYED; NEXT? ___. Enter the number of the screen you wish to view and press the "ENTER" key. The screen you requested will then appear, along with a new prompt line.

  Note that the number is designated by the position a particular records holds on the CHICO family record. In most cases the number of the screen is the same as the payee code; for example, payee code 1 record = screen 1; payee code 2 record = screen 2, etc. However, in those cases where there is a gap in the payee code numbering of records on CHICO, this is not the case. For instance if the CHICO record contains payee codes 1 and 4, to display the payee code 4 record through the DATA-Q prompt line, you must request screen 2.

- If you wish to page through one screen at a time, (i.e., view all payee code records in order), use the PA 1 key. This key will move you forward through the family record, displaying each individual payee code in order. If you wish to page backward through the family record, use the PA 2 key.

- If you are viewing the last screen in the family record and press the PA 1 key, the message "LAST SCREEN DISPLAYED" appears. Likewise, if you are viewing the first screen in the family record and press the PA 2 key, the message "FIRST SCREEN DISPLAYED" appears. If you request through the prompt line a screen that is not part of the family record on CHICO, the message "SCREEN NOT FOUND" appears.

C. Accessing FAST - (Field Address-Suspension-Termination) is a database system that interacts with DATA-Q. The FAST system processes change of address, suspension/termination, non-receipt, reclamation, photocopy and first notice of death/returned check transactions through the CRT Terminal. FAST may be accessed after the record of the beneficiary on which the action is to be taken is displayed on DATA-Q. Press the PF-3 key to obtain a menu showing the following selections. Access the appropriate screen by pressing one of the PF keys shown.

- On-line Rate Verification Letters - PF6
- FAST Suspension/Termination - PF7
- FAST Change of Address - PF8
- Payment Investigation - PF9
• FAST COA/Direct Deposit - PF10
• FAST Transaction Regarding Annuitant or Check - PF11
• Status of Payment Investigation - PF13

Refer to RCM 9.7 for further information on FAST.

D. Viewing Additional Records on a New Claim Number - To clear the display in order to make a new request, press the PF1 key.

You will get the screen:

"ENTER PREFIX X RRB# (9 digits) XXXXXXXXXX and PAYEE CODE X".

Press the appropriate keys on the terminal keyboard to enter the prefix, claim number, and payee code. Then press the ENTER key to view the record.

E. How to Return to the RRAPID Main Menu - Press the CLEAR key to return to the RRAPID Main Menu. From the menu, you can select another application/system in RRAPID by entering the number assigned to the application/system and entering it next to the word, SELECTION. Then press ENTER. To sign off RRAPID enter an X next to the word, SELECTION. Then press ENTER.

9.5.12 DATA-Q Referrals

Any type of award activity will be reflected on the CHICO record. However, DATA-Q will not accept any new or changed records that are discrepant with records already on DATA-Q.

DATA-Q will reject any record with the following discrepancies:

1) Prefix - If DATA-Q already has a record with one prefix and nine digit claim number and an award activity with another prefix but the same claim number is processed, DATA-Q will reject the new activity. This problem frequently occurs in survivor awards; for example, a WA annuity in suspended status is reinstated as a WD award; DATA-Q will not accept the WD record.

2) Claim Numbers - Part of the CHICO record may be under one claim number and another part under a second number. For instance, if an RR annuity is being paid under a six digit number, and an SS benefit with the same employee SS number is processed under a nine digit number, DATA-Q will not accept the SS award.

3) Duplicate Payments - The same award may be processed under two different claim numbers. For example, two SS awards for the same person may be processed under two different claim numbers; first under a six digit number, then
under a nine digit number. DATA-Q will reject the second award processed under the nine digit number.

4) **Employee SS Numbers** - Two annuitants, paid under different claim numbers but both having the same employee SS number on the CHICO record, will also cause problems for DATA-Q. If one such case is already on CHICO and a second discrepant case is processed, DATA-Q will reject the second record.

5) **Family Groups** - In error, two claim numbers may be used for one family group, e.g., WA 631413 and WCA 631414. If one claim number is already on DATA-Q and a second award with a different claim number but with the same employee SS number is processed, DATA-Q will not accept the new award.

Note that in each of these cases, the discrepant award has been accepted by CHICO. Payments are being made under the discrepant numbers or the necessary data changes have been made in the CHICO record. The discrepant award, however, is not displayed by DATA-Q. (This occurs because the database file rejects such discrepancies.) Therefore, if a record does not appear on DATA-Q, it does not necessarily mean that an award has not been made. To insure that all cases that are on CHICO are reflected on DATA-Q, discrepant records rejected by DATA-Q should be given priority handling.

The bureau of data processing and accounts will send all DATA-Q referrals directly to the modules for handling. Check DATA-Q for those cases on DATA-Q and request QUICKIE printouts for those cases on Chico. Take the necessary action to resolve any discrepancies and return one copy of the referral, along with a new DATA-Q printout to verify the correction has been made, to the program analysis section. File the second copy of the referral in the claim folder.

If a correct prefix and claim number is already on DATA-Q, delete the record with the erroneous prefix and/or claim number with a Form G-96 completed with termination code 62. Reinstating the annuity under the correct prefix and claim number will correct the CHICO record and will cause the new record to be added to DATA-Q.

**EXAMPLE:** Employee is receiving an annuity under a six digit number and is on DATA-Q. Spouse is being paid erroneously under the employee's nine digit SS number. Delete the nine digit award with Form G-96, code 62. Prepare a current pay award under the six digit claim number. Spouse award will then appear on DATA-Q.

If an erroneous record is on DATA-Q, and a correct record is not, delete the erroneous record and reinstate the record under the correct claim number. The reinstatement activity will cause the new record as well as the payments already under the same prefix and claim number to be added to DATA-Q.

**EXAMPLE:** An RR annuity is being paid under an erroneous "D" prefix and is on DATA-Q; an SS benefit is being paid under the correct "A" prefix and is not on DATA-Q. Prepare Form G-96 with code 62 to delete the "D" record. Reinstate the RR annuity
under the "A" prefix; this action will bring both the annuity and SS payments onto DATA-Q.

If an erroneous, but suspended or terminated, record is on DATA-Q and the correct active record is not on DATA-Q, action must be taken to delete the erroneous record with Form G-96 code 62 and then to "force" the correct record onto DATA-Q. This is usually done by preparing Form G-607, since Form G-607 will generate CHICO activity and cause the record to be run against data-base. If the discrepant record has already been removed from data-base with Form G-96, Form 607 activity will not reject from data-base and will cause the correct record to be accepted by DATA-Q.

Prepare Form G-607 for any type of miscellaneous data entry. For instance, complete Form G-607 to change the date of birth, using the same date of birth already on the CHICO record. Even though the date of birth information is not being changed, the processing of Form G-607 will still bring the correct record onto DATA-Q. Form G-607 will also add to DATA-Q any other payments being made under the same prefix, claim number and payee code.

The timing of the above procedure is very important to insure that a case is accepted by DATA-Q. Do not prepare Form G-607 for the correct record until you are sure the Form G-96 deleting the erroneous record has cleared.

EXAMPLE: A suspended annuity with an erroneous "D" prefix is on DATA-Q. An active annuity with the correct prefix of "A" is on CHICO but not on DATA-Q; an SS payment under the same "A" prefix is also on CHICO but not on DATA-Q. Prepare Form G-96 with code 62 to delete the erroneous and suspended "D" record. Periodically check DATA-Q to determine when Form G-96 has cleared. After the erroneous record has been deleted, prepare a Form G-607 for the "A" annuity with the annuitant's date of birth as it is shown on CHICO. When Form G-607 is processed, both the annuity and SS payment will appear on DATA-Q under the "A" prefix.

In the case of discrepant employee SS numbers, no Form G-96 or award action is necessary. Instead, correct the erroneous SS number with Form G-607 and, if necessary, prepare a second Form G-607 to "force" the record with the correct SS number onto DATA-Q. The second Form G-607 should not be submitted until the first Form G-607 has processed.

EXAMPLE 1: Due to an error in the completion of their award forms, two widows, WA 999999 and WD 888888, have the same employee SS number on CHICO. WA 999999 is on DATA-Q; WD 888888 is not. Upon investigation, you discover that WD 888888 should have a different SS number. Prepare Form G-607 to correct the employee SS number. This will bring WD 888888 onto DATA-Q.

EXAMPLE 2: Two employees, A 999991, which is on DATA-Q, and A 999992, which is not, have the same SS number on CHICO. You learn that A 999991 has the incorrect SS number. Prepare Form G-607 to correct the SS number on CHICO and DATA-Q.
After that form has processed, prepare a second Form G-607 to “force” the record with the correct SS number, A 999991, onto DATA-Q.

See RCM 8.1.76 for further information on correcting claim numbers and prefixes and RCM 9.4 for Form G-607 instructions.

Be sure to notify MPS if SMIB is being deducted under the incorrect number. It may be necessary to make reimbursements and notify SSA of record consolidations.

When a particular record with an erroneous prefix is deleted with a code 62 and not reinstated, all records in the Research record with the same payee code are also deleted, since research ignores prefixes on payments under nine digit claim numbers. For instance, if you are deleting an erroneous "D" claim number payee code 1 that was previously suspended or terminated, and retaining the active "A" claim number payee code 1, both records will be deleted from the Research record when Form G-90 is processed. To keep the Research records accurate, prepare Form G-59, noting that the "A" claim number is being retained.

9.5.15 REQUEST System

REQUEST allows direct access to selected data on the RASI master file through CRT terminals. REQUEST may be used whenever there is need for current payment status information. Any new data entered into RASI during a nightly computer run will appear on the REQUEST screen the day after that run.

Cases paid by RASI and manually dropped cases are available on REQUEST for 90 days. Mechanically dropped cases are available on REQUEST for 10 days. Cases coded for immediate drop remain on REQUEST for one day only.

REQUEST displays information generated by RASI. At times, apparently inconsistent data may appear on REQUEST screens because of the nature of RASI processing. For example, if an employee and spouse file jointly, REQUEST will not display the spouse application until the day after the day on which the employee's is first displayed. This is because there must be an employee of record before RASI can accept a spouse application. Also, because of RASI's daily evaluation process, the FINAL ABD is not really "final" until the award occurs. In disability cases, REQUEST does not even show the final ABD until the award is made, in order to prevent confusion.

9.5.16 REQUEST

A. Screen 11 - Employee Information

- SSA # - Employee's social security claim number.
- RRB # - If an employee has a six digit claim number, that number will be displayed here. Otherwise, a series of nines will appear in this item.
• **REQUEST UPDATED** - The date of the last RASI run for which REQUEST has been updated, usually the last run.

• **VIEW DT** - The current date is shown.

• **NAME AND ADDRESS** - The name and home address or mailing address currently on the RASI record. The asterisk at the beginning of the address is equivalent to the RASI "group mark."

• **TYPE ANNUITY** - The type of annuity being processed is indicated: Full Age 65, Employee Health Insurance, SUP Only, Full Age 60, Reduced Age, Occupational Disability, Total Disability, or Spouse Only.

• **STATUS** - The status of the employee annuity is shown: PENDING is displayed until the annuity has paid final; PAID is shown when the final annuity rate is paid; DENIAL is indicated if the annuity claim is denied; MAN DROP is displayed for an examiner initiated drop from RASI; DUMP is shown if there is a computer generated drop from RASI; COMP ONLY is displayed if the annuity has been computed, but cannot be paid.

• **NAME AND ADDRESS** - The name and home or mailing address currently on the RASI record. The asterisk at the beginning of the address is equivalent to the RASI "group mark."

• **TYPE ANNUITY** - The type of annuity being processed is indicated: Full Age 65, Employee Health Insurance, SUP only, Full Age 60, Reduced Age, Occupational Disability, Total Disability, or Spouse Only.

• **STATUS** - The status of the employee annuity is shown: Pending is displayed until the annuity has paid final; PAID is shown when the final annuity rate is paid; DENIAL is indicated if the annuity claim is denied; MAN DROP is displayed for an examiner initiated drop from RASI; DUMP is shown if there is a computer generated drop from RASI; COMP ONLY is displayed if the annuity has been computed, but cannot be paid.

• **TYPE CERT** - The type of annuity payment most recently made. If no certification has been made, no entry is shown. PARTIAL is shown if an IMPACT rate has been paid; FINAL is displayed if a final annuity rate is paid and no partial rate has ever been paid; RECERT is indicated if a partial rate is recertified to a final rate.

• **LAW YEAR** - The year of the amendments which apply to the adjudication of the case. The law year can differ from the year of the application filing date.

• **TYPE ACTION** - An entry is made in this item if:

  • annuity payment is pending (PENDING, TRACE or CALC);
• some type of payment action has been taken by RASI (PARTIAL, FINAL, RECERT);

• the case has been dropped from RASI (MAN DROP for examiner initiated drop, MECH DROP for computer drop);

• if RASI is ready to make an annuity payment but cannot do so for some reason (FUTURE VOUCH, if RASI cannot make a payment until the next month's voucher; ESA INVEST, if the electronic systems analysis section is reviewing the case; INSUFF ACCRL, if the partial rate exceeds the final but the overpayment can be recovered from one more month's accrual; or RUIA EX ACCRL, if RUIA recoverable amount exceeds the accrual and the overpayment can be recovered in the next month).

• NEXT ACTION DATE - The date of the next scheduled RASI processing activity for those cases pending payment.

• APP FILE DT - The filing date of the latest annuity or HI application.

• DOB - The employee's date of birth. If the annuity's DOB is verified, "VER" appears next to "DOB"; if the DOB is not verified, "CLM" appears to indicate claimed date of birth.

• PARTIAL ABD - If a partial payment has not been made, a Calculated ABD is shown. If a partial payment has been made, the partial ABD is shown.

• PART AWD DT - The date an award was processed by RASI. Check DATA-Q for date annuity check was processed.

• EE CALL UPS - The call-up codes, the type of data required, and the date of the next RASI trace for each type of pending data. Up to eight items of any of the following types of RASI call-up activity may be shown:

<table>
<thead>
<tr>
<th>CALL-UP</th>

</table>

- **check CHICO to determine if RRB is paying an SS benefit.**
- **RUIA Clearance reply pending.**
- **RASI is searching DCC records for the employee's service and compensation record, or compensation is indicated in excess of three months after the claimed date last worked.**
- **Current connection determination to be submitted on a type code 947 "RASIFORM" screen.**
- **A transfer or red cap determination to be submitted on a type code 948 "RASIFORM" screen.**
- **Research data required for payment of supplemental annuity is pending.**
- **Employee social security benefit data to be submitted on a type code 950 "RASIFORM" screen.**
- **Supplemental annuity pension information to be submitted on a type code 954 "RASIFORM" screen.**
- **Lag information found on Form G-88A.2 (Retirement Contact Form) to be submitted on a type code 958 "RASIFORM" screen.**
- **Employee TRIC reply pending.**
- **Disability determination required on Form G-325 (Disability Determination Sheet).**
- **Manual op code set to prevent annuity payments. Can be cleared with a type code 995 "RASIFORM" screen.**
- **A type code 996 "RASIFORM" screen needed to change the contents of a field in the RASI record.**
- **A name and/or address change or rep payee data to be submitted on a type code 997 "RASIFORM" screen.**
- **Prior service data or HB data to be submitted on a type code 998 "RASIFORM" screen."
• **FINAL ABD** - If a final payment has not been made, a calculated ABD is shown. If an annuity has paid final or has been recertified, the final ABD is indicated. In a disability case, no ABD will be shown until all information has been processed to pay a final award.

• **FINAL AWD DT** - The date award was processed by RASI. Check DATA-Q for date annuity check was processed.

• **RECUR RATE** - The actual net annuity rate is displayed if an award has been made.

• **CODE NAME** - The first initial and first four letters of the applicant's surname.

• **TIER I** - The amount of the tier 1 component of the final annuity rate. (Before work deduction.)

• **TIER II** - The amount of the tier 2 component of the final annuity rate. (Before work deduction.)

• **WF** - The amount of the VDB component of the final annuity rate. (Before work deduction.)

• **AGE RED** - The amount of the final annuity rate age reduction, if applicable.

• **SUP** - The amount of the supplemental annuity after any LPS TWD but before cutback.

• **SSA** - If RASI reduced the retirement annuity for SS entitlement, the amount of the SS benefit appears.

• **TRIC REQ DATE** - The date of the TRIC request currently being processed. When a disability case has converted to an age and service case, or when RASI must initiate a new TRIC request for another reason, this is the date of that TRIC request. Compare this date with that of the referral message noting a change in the type of annuity being processed.

• **INTO RASI** - The date the application actually entered RASI. This can be different from the filing date or the APPLE transmittal date.

B. **Screen 12 - Employee Status Words**

The employee's SSA number and RRB claim number appear in the top left hand corner. The latest RASI processing date and current viewing date appear in the upper right hand corner of the screen.

Items of status information evaluated by RASI appear on this screen. Entries are made only for those items applicable to the particular case being reviewed.
numeric code appears after each item; this code indicates the status of each item and is the same type of status word code that currently is found on the RASI referral. A narrative description of the particular item's status follows the numeric code. The employee status words shown on screen 12 are listed below.

C. Employee Miscellaneous Fields

Status and eligibility data appear on employee screens 13 and 14. Related items are grouped together for easy reference. Employee screen 13 and 14 contain "English" captions for RASI data. However, by pressing the PF3 Key, the captions change to mnemonic codes, which can be used when preparing RASI input forms.
Note that on the screen with "English" captions, dates appear in the month - day - year format. However, in the mnemonic display, dates are in the year - month - day order for use on RASI input forms.

The employee's SSA number and RRB claim number appear in the top left hand corner. The latest RASI processing date and current viewing date appear in the upper right hand corner of the screen.

The items displayed on screens 13 and 14, with both their English and mnemonic captions, are shown below. In some cases, numeric codes appear along with the displayed data.

C1. Screen 13 - EMPLOYEE MISC FIELDS

- Miscellaneous Data
- Field office (FLDOFF)
- Claimed DOB (DOBCLM)
- Marital Status (SWEMARR)
- Sex (SWESEX)
- Verified Lag Months (VERLAGMOS)
- Disability Effective Date (DISEFFDTE)
- Original RUIA Recovery Amount (RECOVBUSOC)
- Certified Through Date (CERTHRUDTE)
- Last Item Date (LSTITMDTE)
- Creditable Prior Service Months (CREDPSMOS)
- Other Benefits based on Military Service (EEOTHMSBEN)
- T1 WD: Amount of work deductions withheld from Tier 1 (EELSTT1WDAMT)
- T2 WD: Amount of LPS work deductions withheld from Tier 2 (EELSTT2WDAMT)
- Conversion Code: Code 6 indicates conversion from disability to age and service (EETYPAPP)
- Worker's Compensation (EEWCIND)
- Public Disability (EEPUBDISIND)
• ABD Information
  • Earliest ABD: Did EE request earliest ABD allowed by law? (EEABDCDE)
  • RASI Calculated ABD: In disability cases, remains blank until final payment (CALCABD)
  • Employee Designated ABD - (EEDESABD)
  • Supplemental Annuity ABD - (SUPABD)

• Children
  • Does employee have minor children? "EEMINCHD" (1 = yes; 2 = no) - (AA1CHILDUND18)
  • Total number of children employee has "EENOCHD"

• Impact
  • Impact Tier I (IMPACTT1)
  • Impact Tier 2 (IMPACTT2)
  • Impact WF (IMPACTWF)

• Health Insurance Information
  • Health Insurance Filing Date (HIFILDTE)
  • Health Insurance Entitlement Date (HIENTDTE)
  • Health Insurance Clearance Date (HICLRDTE)

• Supplemental Annuity Information
  • SUP code indicating there is a SUP ANN adjustment; code 1 means RASI is processing the SUP ANN, code 9 indicates RASI has paid the SUP ANN (PAMCD)
  • SUP ANN call-up date (PAMSUPTICKDTE)
  • SUP ANN Type Code (PAMTYPE)
  • SUP ANN Paid Date (PAMSUPPDDTE)
  • SUP WD: The amount of the LPS TWD taken from the supplemental annuity (SUPPLSTWDAMT)
C2. **Screen 14 - EMPLOYEE MISC FIELDS**

- Railroad Employment Data
  - BA number of last railroad employer (EELSTBA)
  - BA number of previous railroad employer (EEPRVBA)
  - Date last worked for last railroad employer (EEDLWRR)
  - Date last worked for previous railroad employer (EEDLPVRR)
  - Verified date last worked for last railroad employer (ESTDLWRR)
  - Date rights relinquished for last railroad employer (EEDRRRLST)
  - Date rights relinquished for previous railroad employer (EEDRRPRT)
  - Does employee have rights to return to railroad employment? (EERGHTREL)

- Outside Employment Information
  - Did employee work in outside employment during the last twelve months? (EEOUTLST12)
  - Did employee work for federal agency after last railroad employment? (EEFEDEMPAFTDLW)
  - Date employee last worked outside of railroad industry or "CONT" if still working (EELPSENDT1)
  - Date employee last worked for second-last employer outside the railroad industry or "CONT" if still working (EELPSENDT2)

- Previous Railroad Application
  - Did employee previously file for an annuity? (EEPRVAPP)
    - If so, what was annuity prefix? (EEPRVRRPRE)
    - If so, what was previous annuity claim number? (EEPRVRRCLM)

- Self-Employment Information
  - Was employee self-employed within the last twelve months? (EESELST12)
  - Is employee self-employed now? (EESENOW)
NOTE: When the field office makes the determination that alleged SE is SE and no additional review by BRB required, REQUEST will display 2 or BLANK, as if the EE was not self-employed now or in the past 12 months. The field office determination is displayed on the remarks screen of APPLE (Pf-12) and transmittal.

When headquarters review is required, and the claimed SE is found to be LPE, these fields will not be changed. However, the applicable LPE fields will be changed.

- SSA Application Data
  - Application: Has employee filed for SS benefit? (EESSAAPP)
  - If so, under what SS number? (EESSANOFLD)
  - What is his claim suffix? (EECLMSUF)
  - Alleged Filing: Is this his own claim number or another's? (SWEALGSSAFIL)

D. Screen 21 - Spouse Information

- SSA # - Employee's social security claim number.
- RRB # - If spouse has a six digit claim number, that number will be displayed here. Otherwise, a series of nines will appear.
- REQUEST UPDATED - The date of the last RASI run for which REQUEST has been updated, usually the last run.
- VIEW DT - The current date is shown.
- NAME AND ADDRESS - The name and home or mailing address on our records. The asterisk at the beginning of the address is equivalent to the RASI group mark.
- TYPE ANNUITY - The type of the spouse annuity being processed is indicated: Spouse Health Insurance, Full Age 65, Full Age 60-64, Reduced Age, Disabled Child, Minor Child.
- STATUS - The status of the spouse annuity is shown: PENDING is displayed until the annuity has paid final; PAID is shown when the final annuity rate is paid; DENIAL is indicated if the annuity claim is denied; MAN DROP is displayed for an examiner initiated drop from RASI; DUMP is shown if there is a computer generated drop from RASI; COMP ONLY is displayed if the annuity has been computed but cannot be paid.
- TYPE CERT - The type of annuity payment most recently made is indicated. If no certification has been made, no entry is shown. PARTIAL is indicated if a SPAR rate
has been paid; FINAL is displayed if a final annuity rate is paid and no partial rate has ever been paid; RECERT is shown if a partial rate is recertified to a final rate.

- **LAW YEAR** - The year of the amendments which apply to the adjudication of the case. The law year can differ from the year of the application filing date.

- **TYPE ACTION** - an entry is made in this item if:
  - annuity payment is pending (PENDING, TRACE, CALC);
  - some type of payment action has been taken by RASI (PARTIAL, FINAL, RECERT);
  - the case has been dropped from RASI (PARTIAL, FINAL, RECERT); (MECH DROP for computer drop);
  - RASI is ready to make an annuity payment, but cannot do so for some reason (FUTURE VOUCHER, if RASI cannot make a payment until the next month’s voucher; INSUFF ACCRL, if the partial rate exceeds the final but the overpayment can be recovered from one month’s accrual.)

- **NEXT ACTION DATE** - The date of the next scheduled RASI processing activity for those cases pending payment.

- **APP FILE DT** - The filing date of the latest annuity or HI application.

- **DOB** - The spouse's date of birth. If the DOB is verified, "VER" appears next to "DOB"; if the DOB is not verified, "CLM" appears to indicate claimed date of birth.

- **PARTIAL ABD** - If a partial payment has been made, the partial ABD is shown.

- **PART AWD DT** - The date an award was processed by RASI. Check DATA-Q for date annuity check was vouchered.

- **PARTIAL AMT** - If a partial award has been made, the SPAR rate is indicated. This field can accommodate rates over $999.99.

- **INTO RASI** - The date the application actually entered RASI. This can be different from the filing date or APPLE transmittal date.

- **SP CALL-UPS** - The call-up codes, the type of data required, and the date of the next RASI activity for each type of pending data. Up to eight items of any of the following types of RASI call-up activity may be shown.

<table>
<thead>
<tr>
<th>CALL-UP</th>
<th>TYPE OF INFORMATION PENDING</th>
</tr>
</thead>
<tbody>
<tr>

<td>Proof of marriage to be submitted on a type code 900 &quot;RASIFORM&quot; screen.</td>
</tr>
<tr>
<td>932-RES FOR SP</td>
<td>Basic employee data from Research that is necessary before spouse annuity can be calculated.</td>
</tr>
</tbody>
</table>
| 933-ELIG INFO FOR SP | Miscellaneous spouse eligibility data required:  
"ELG" - eligibility determination based on child;  
"DIS" - disability eligibility determination based on disabled child;  
"PM" - validity of prior marriage determination (the field office has indicated via entries on the APPLE summary screen that examiner review is required);  
"DOM" - year of marriage eligibility determination. Each to be submitted on a type code 933 "RASIFORM" screen, coded for each applicable determination, as indicated in referral messages. |
| 939 CHICO INQUIRY | If applicant claims (s)he filed for social security benefits, but TRIC indicates no MBR, RASI will check CHICO to determine if RRB is paying an SS benefit. |
| 951-SP SS BEN | Spouse social security benefit data to be submitted on a type code 951 "RASIFORM" screen. |
| 953-DUAL SPOUSE | Spouse also entitled to an employee annuity. Data to be submitted on a type code 953 "RASIFORM" screen. |
| 957-PSP      | Spouse indicates entitlement to a public service pension. Data to be submitted on a type code 957 "RASIFORM" screen. |
| 961-SP TRIC  | Spouse TRIC reply(ies) pending.                                              |
| 995-CLR MAN OP | Manual op code set, preventing annuity payments. Can be cleared with a type code 995 "RASIFORM" screen. |
RCM 9.5 CRT Terminals

#### 996-CLR MIS COR
Type code 996 "RASIFORM" screen needed to change the contents of a field in the RASI record.

#### 997-NAME/ADDR
A name and/or address change or rep payee data to be submitted on a type code 997 "RASIFORM" screen.

- **FINAL ABD** - If an annuity has been paid final or recertified, the final ABD is indicated.
- **FINAL AWD DT** - The date an award was processed by RASI. Check DATA-Q for date annuity check was processed.
- **RECUR RATE** - The final net annuity rate is displayed.
- **CODE NAME** - The first initial and first four letters of the applicant's surname.
- **TIER 1** - The amount of the Tier 1 component of the final annuity rate. (Before work deduction.)
- **TIER 2** - The amount of the Tier 2 component of the final annuity rate. (Before work deduction.)
- **AGE RED** - The amount of the annuity age reduction, if applicable.
- **SSA** - If RASI reduced the retirement annuity for SS entitlement, the SS benefit amount appears.

### E. Screen 22 - Spouse Status Words

The employee's SSA number and spouse's RRB claim number appear in the top left hand corner. The latest RASI processing date and current viewing date appear in the upper right hand corner of the screen.

Items of status information evaluated by RASI appear on this screen. Entries are made only for those items applicable to the particular case being reviewed. A numeric code appears after each item; this code indicates the status of each item and is the same type of status word code that currently is found on the RASI referral. A narrative description of the particular item's status follows the numeric code. The spouse status words shown on screen 22 are listed below.

- **AGE**
  - 0 - Not Applicable
1 - Verified
4 - Verification required

- PROOF OF MARRIAGE
  0 - Not applicable
  1 - Verified
  4 - Verification required

- DATE OF MARRIAGE

F. Screen 23 - Spouse Miscellaneous Fields
The employee's SSA number and spouse's RRB claim number appear in the top left hand corner. The latest RASI processing date and current viewing date appear in the upper right hand corner of the screen.

Miscellaneous status and eligibility data appear on this screen. The information is displayed on the screen with "English" captions for easy reading. However, the PF 3 key will change the captions to mnemonic headings for use in preparing RASI input forms. Some items display numeric codes indicating their status, as well as actual data.

Note that on the screen with "English" captions, dates appear in the month-day-year format. However, in the mnemonic display, dates are in the year-month-day order for use on RASI input forms.

Similar items are grouped in categories for easy reference. The items shown on screen 23 are listed below with both "English" and mnemonic captions.

- Miscellaneous
- Spouse's own SSA number (SPSSANO)
- Claimed Date of Birth (SPDOBCLM)
- Date of Marriage (SPDOMARR)
- Previous Marriage (SPPRVMARR)
- Spouse's previous annuity claim number (SPPRVAPCLM)
- Last item date (SPLSTT1WDAMT)
- Partial annuity rate (SPPRTLAMT)
- Health Insurance
- Health insurance filing date (SPHIFILDTE)
- Health insurance entitlement date (SPHIENTLDTE)
- Health insurance clearance date (SPHICLRDTE)
- SSA Application
• Has spouse filed SS application? (SPSSAAPP)
• If so, what is spouse's claim number? (SPSSACLMNO)
• Did spouse also file under a second number? (SPSSAOTHNO)
• Children
• Does spouse have minor children? (SPMINCHLD) (1 = yes; 2 = no)
• Does spouse have disabled children? (SPDISCHLD) (1 = yes; 2 = no)
• Verified date of birth of youngest child (SPYCVERDOB)
• Oldest child's date of birth (SPOLDDOB)
• Employment Information
• Was spouse employed in railroad industry? (SPEMPRR)
• Date last worked for railroad (SPDLWRR)
• Does spouse have rights to return to any RR employment? (SPRGHTREL)
• Was spouse employed outside of railroad industry? (SPEMPOUT)
• Date last worked in outside employment or "Cont" if still working (SPLPSENDDT1)
• Date last worked in second-last outside employment or "CONT" if still working (SPLPSENDDT2)
• Is spouse now self-employed? (SPSENOW)
• Has spouse been self-employed during last twelve months? (SPSE12)

NOTE: When the field office makes the determination that alleged SE is SE and no additional review by BRB required, REQUEST will display 2 or BLANK, as if the spouse was not self employed now or in the past 12 months. The field office determination is entered and displayed on the IC G-230 screen and transmittal.

When headquarters review is required, and the claimed SE is found to be LPE, these fields will not be changed. However, the applicable LPE fields will be changed.

• ABD Information
• Earliest ABD: Did spouse request earliest ABD allowed by law? (SPEARABD)
• ABD calculated by RASI (SPABD)

• ABE designated by spouse (SPDESABD)

9.5.17 Operating REQUEST

1. Sign-On Procedure - Access the REQUEST system as follows:

<table>
<thead>
<tr>
<th>At This Screen</th>
<th>Type and Enter</th>
</tr>
</thead>
<tbody>
<tr>
<td>Train logo</td>
<td>RRAPID</td>
</tr>
<tr>
<td>ENTER NEXT TASK CODE</td>
<td>SIGNON (plus your ID and password)</td>
</tr>
<tr>
<td>RRAPID MAIN MENU (NEXT SELECTION)</td>
<td>6</td>
</tr>
</tbody>
</table>

After these entries, the next screen to be displayed is the REQUEST DIRECTORY screen.

2. REQUEST DIRECTORY Screen - The DIRECTORY screen is a list of all the different screens available on REQUEST. A two digit numeric code is assigned to each screen and is also listed in the DIRECTORY. The first digit of the code is the payee code of the record you wish to view. The second digit is the sequential order of the screen in the REQUEST display format.

At the bottom of the DIRECTORY screen, REQUEST will display the message SSA# SCREEN# ___. Enter, in the spaces provided, the employee's SSA number and the number of the particular screen you wish to have displayed. Then press the enter key to register the information with the computer.

If an error is made at any time before hitting the ENTER key, move the cursor back to the incorrect entry and type in the correct entry. The cursor can be moved by hitting one of the arrow keys on the lower portion of the keyboard.

Note that the employee's SSA number, not his RRB claim number, must be entered to view a REQUEST display. (This procedure is used, since all claims in the RASI master record are in SSA number order, rather than claim number order.) The employee's SSA number must be used even if you wish to view a screen displaying spouse data.

If an invalid SSA number is entered, the message INVALID SSA # appears. The cursor will return to the beginning of the SSA number entry. Enter the correct SSA number.
If an invalid screen number is entered, REQUEST will display the message INVALID SCREEN NUMBER. The cursor will return to the beginning of the screen number entry. Correctly enter one of the screen codes listed in the REQUEST DIRECTORY.

If no record is found, the message RECORD NOT FOUND appears. No record for that particular SSA number can be found on REQUEST.

If REQUEST only has an employee record, and you request a spouse screen, the message NO SPOUSE FOUND - EMPLOYEE ONLY appears. Employee Screen 11 will then be displayed on the terminal.

Once the necessary identifying information has been entered into REQUEST, the requested RASI status information will be displayed on the CRT screen.

3. REQUEST Data Display

A. On the bottom of each REQUEST data screen, the prompt line SCREEN X DISPLAYED; NEXT? ___ appears. To view additional REQUEST screens, type in the number of the next screen you wish to see. Then press the ENTER key. The new screen will then appear on the terminal.

If an incorrect screen number is entered in the prompt line, the message INVALID SCREEN NUMBER appears. Enter the correct screen number.

If REQUEST only has an employee record, the message NO SPOUSE appears on the bottom of each data screen. If a spouse screen is requested when the NO SPOUSE message is displayed, the message SCREEN NOT FOUND appears.

B. To return to the DIRECTORY screen to request another record, hit the PF1 key.

C. Screens 13, 14 and 23 will display information with "English" captions. If you wish to view mnemonic captions, hit the PF3 key. This key displays the miscellaneous fields screen with RASI mnemonics. If you wish to return to the English captions, hit the PF3 key again.

4. Printout Request - If it is necessary to obtain a printout, press the PF2 key. The message ENTER NAME AND UNIT will appear. Type in your name (up to ten characters) and unit (no more than four characters). Do NOT press the enter key. This designation is important for distribution of printouts.

Follow the printout request procedure as outlined in RCM 9.5.11.

5. Exiting REQUEST - You can return to the RRAPID menu by pressing PA1, PA2 or the Clear Key. To return to the train logo screen from the RRAPID menu, enter X at the NEXT SELECTION prompt.
9.5.20 MOLI

MOLI allows direct access to selected data in the MIRTEL file. MOLI may be used whenever there is a need for current Medicare status information. Any new data entered and processed into MIRTEL during a night computer run will appear on the MOLI screen the next morning.

See FOM-I-1540.5 for additional general information about MOLI.

9.5.21 MOLI Display

MOLI consists of six screens. The first screen is a menu/help screen that allows the user to enter identifying information for the beneficiary and to select the data screen needed. The MOLI screens and references for finding detailed information about the screens are shown in the following chart.

<table>
<thead>
<tr>
<th>Screen ID Code</th>
<th>Description</th>
<th>Procedure References</th>
</tr>
</thead>
<tbody>
<tr>
<td>MOLI Help Screen (Menu)</td>
<td></td>
<td>FOM-I-1540.10</td>
</tr>
<tr>
<td>GD</td>
<td>General Data Screen</td>
<td>FOM-I-1540.15.1</td>
</tr>
<tr>
<td>DB</td>
<td>Direct Bill Screen</td>
<td>FOM-I-1540.15.2</td>
</tr>
<tr>
<td>SB</td>
<td>State Buy-In Screen</td>
<td>FOM-I-1540.15.3</td>
</tr>
<tr>
<td>SC</td>
<td>Screening and Record Indicator Code Screen</td>
<td>FOM-I-1540.15.4</td>
</tr>
<tr>
<td>CP</td>
<td>Current Premium Screen</td>
<td>FOM-I-1540.15.5</td>
</tr>
</tbody>
</table>

9.5.22 Operating MOLI

MOLI is accessed from the RRAPID Main Menu. Refer to FOM-I-1540.10 for detailed instructions on how to access and operate MOLI.

9.5.23 Automated Folder Control System

For a detailed description of procedure and information about the Automated Folder Control System see the AFCS Folder Control Directory or Administrative Circular BSS-6 which is on Boardwalk under Bureau of Information Services.
9.5.40 PAYBACK

PAYBACK (On-line Cancelled Payment Data) is an inquiry only system that provides on-line viewing access of cancelled checks and returned direct deposit/EFT payments. PAYBACK gets its information from the cancelled payment files received from Treasury. Since RRB receives these files on a daily basis, PAYBACK is updated daily.

The system, which became operational in April 1993, was initially loaded with Treasury files containing RRA cancelled payments and limited payability cancellations received in March 1993. On July 5, 2000, Treasury began to include RUIA cancelled payments on the cancelled payment files; the RUIA data is available on PAYBACK.

Accessing PAYBACK

To access PAYBACK, enter the Railroad Automated Processing Integrated Database (RRAPID) using normal signon and password procedures. When the RRAPID menu is displayed, select option "23" and press the "Enter" key. This will access the claim number entry screen. The cursor will automatically position itself at the prefix/claim number field.

To view data on a particular claim number, enter the prefix (A, D or H) followed by the railroad claim number. If the claim number is a terminal number (employee's social security number) or you are checking for RUIA cancelled payment information, it is not necessary to enter a prefix; tab once and type in the social security number and then press the "Enter" key. If an error is made on the claim number entry screen, press the PF1 key to refresh the screen and re-enter the correct number.

9.5.42 Viewing PAYBACK

PAYBACK allows you to view returned/cancelled payment information for each beneficiary paid under the same claim number. The information is displayed in order of beneficiary and payee code.

9.5.43 PAYBACK Function Keys

<table>
<thead>
<tr>
<th>TERMINAL KEY</th>
<th>FUNCTION</th>
<th>PC KEY</th>
</tr>
</thead>
<tbody>
<tr>
<td>PA 2</td>

### 9.5.60 FOMF Overview

The Financial Organization Master File (FOMF) is a file furnished by the Treasury Department which the Railroad Retirement Board (RRB) uses to obtain the name and address of a financial organization based upon its routing number. Previously, the FOMF was contained on microfiche and viewed through a machine. However, the RRB developed an inquiry database which allows the FOMF to be accessed and viewed online. Access the FOMF from the RRAPID MAIN MENU as explained below.

### 9.5.61 Accessing The FOMF

To access the FOMF, select FOMF (31) from the RRAPID main menu. Enter the routing number (RTN) at the prompt on the FOMF entry screen. The route number has been expanded from eight digits to nine. The first eight fields encompass the previously entered eight digit RTNs and the ninth field position includes the check digit. If an incorrect RTN is entered, the system will show the message, "RTN NOT FOUND, PRESS PF1 TO ENTER NEW RTN".

### 9.5.62 FOMF Information Screen

The FOMF INFORMATION SCREEN will display the following data:

- Routing number
- Name of the Organization
- Address of the Organization, including City/Town and State
• ZIP+4
• Date the file was updated
• telephone number of the organization

To return to the FOMF Entry Screen to enter another RTN, press "PF1". To exit the FOMF inquiry system and return to the "RRAPID main menu", press the PA1 or PA2 key.
9.6.1 General

The Automated Stop Payment System is used to release mechanical SF-1184 "Unavailable Check Cancellation" requests to Treasury when:

Non-receipt Claim

- The payee or representative payee initiates a claim for the proceeds of a check which has not been received or which has been lost, stolen, mutilated or destroyed; or,
- The payee enrolled in direct deposit claims non-receipt.

NOTE: Occasionally, a Financial Institution (FI) will notify RRB of checks that were lost or stolen after being cashed by the payee. The FI may submit a non-receipt claim. When this occurs, secure the exact check symbol and check number of the check(s) from the Chicago Financial Center and advise the FI to file a "Holder In Due Course" claim or a "Lost/Stolen In Transit" claim with its servicing Federal Reserve Bank. Do not process the claim on the Automated Stop Payment System. If there is any doubt, refer the case to PP&PAS.

Non-entitlement

- The RRB determines that the payee is not entitled to the proceeds of a check that is not in the possession of either the RRB or the Treasury disbursing center (it is not known if the check has been paid (cashed) or if it is outstanding) and recovery cannot be made by any other means; or,
- The RRB determines that a payee enrolled in direct deposit is deceased or incompetent.

Status or Photocopy

- The RRB determines that a photocopy of a check or payment status information is needed for administrative purposes.

Requests to Treasury may be submitted using FAST-Payment Investigation or Form G-333. The information from the G-333 input document and FAST-Payment Investigation will be transferred to a computer tape by the Automated Stop Payment System for processing by Treasury. Complete Form G-333 in duplicate following the instructions in RCM 9.6, Appendix A. Enter a transaction on FAST according to RCM 9.7.

A. Multiple Requests - Information for up to 24 payments in one case can be entered on FAST-Payment Investigation at one time. Additional requests must be entered using Form G-333. Information for up to five recurring payments in one case can be included on one G-333 as long as the claim number, symbol
and prefix, payee code, reason code, direct deposit information (if a DD/EFT payment) and name and address for the replacement check or photocopy are the same.

NOTE: CLAIMS FOR DD/EFT PAYMENTS AND REGULAR CHECKS CANNOT BE COMBINED ON ONE G-333.

B. Accrual Check or One Payment Only - Requests for non-recurring payments (accruals or one payment only checks) require the first check number assigned by Treasury to the batch of checks in a voucher. This information is furnished on the confirmed copies of the SF-1166 Voucher and Schedule of Payments forms stored in PSG. Any G-333s prepared in the adjudication units for non-recurring payments must have this check number entered by PSG. Mark the complete voucher number (date and batch number) in the upper right corner of the G-333 and attach a copy of the SAMM tape. PSG will use this information to determine the first check number in the voucher and complete that item on the G-333.

C. Courtesy Disbursement (Replacement Check) - Requests for Courtesy Disbursements released as a result of a B or C non-receipt claim require the exact check number of the Courtesy Disbursement check. This information is furnished by accessing Treasury's "TIE FILE". Any G-333s prepared in the adjudication units for Courtesy Disbursements (i.e. 9 shown in item 3) must have this check number entered by PSG. Mark the check symbol and check number of the original check in the upper right corner of the G-333. This information is found on the status of Non-Receipt Claims/Cancellation Requests listing. PSG will use this information to determine the exact check number and complete that item on the G-333.

9.6.2 Batching Forms G-333 And FAST Payment Investigation Transactions

G-333 forms will be prepared by both the adjudication units and the payment service group (PSG). Once a day, the central control group will collect all of the G-333s completed during that day, rubber band or paper clip the forms together in batches of one hundred or less and prepare a G-180, "Batch Control Sheet". Complete the items in Parts A and B as follows:

PART A

- TYPE OF FORMS SUBMITTED - enter G-333
- REQUESTING BUREAU - enter ORSP.
- PREPARED BY - enter the name of the person preparing the batch.
- UNIT - enter CSU.
• EXTENSION - enter the unit telephone extension.

• RETURN DOCUMENTS TO - enter CSU.

PART B

• DATE - enter the date the G-180 is being prepared.

• BATCH CONTROL NUMBER - enter the last digit of the current year in the first box followed by the Julian Calendar date in the last three boxes. If the Julian Calendar date is less than three digits, zero-fill the second and/or third box. The Julian Calendar date corresponds to the current month, date and year. It can be found in the left-hand corner of most standard desk calendars.

• NUMBER OF DOCUMENTS SUBMITTED - enter the number of G-333s. This total item count cannot exceed 100.

• DOCUMENT TYPE CODE - leave blank.

• CLAIM/SSA NUMBER OF FIRST INPUT DOCUMENT - enter the claim number from the first G-333 of the batch, if it is a six-digit claim number, zero-fill the first three boxes in this item.

• CLAIM/SSA NUMBER OF LAST INPUT DOCUMENT - enter the claim number from the last G-333 of the batch. If it is a six digit claim number, zero-fill the first three boxes in this item.

• BATCH CONTROL TOTAL - leave blank.

• HASH TOTAL - leave blank.

After the G-333s have been keypunched, the central control group will forward the batch and the G-180 to PSG. The batches should be kept for two months and then destroyed.

FAST-Payment Investigation transactions are mechanically batched and entered to the Automated Stop Payment System which runs twice weekly.

9.6.3 Transmitting Non-Receipt Reports, Photocopy Requests, Status Inquiries And Reclamation Requests To Treasury

The information from the G-333 and FAST-Payment Investigation is used to prepare a computer tape which is sent to the Chicago Financial Center (CFC) to initiate reclamation, payment investigation and/or the photocopy request. CFC processing is discussed further in section 9.6.10.
9.6.4 Initial System Output

During the processing of the information from the G-333s and FAST-Payment Investigation transactions the computer will prepare up to three types of output in addition to the computer tape for CFC. The output types are:

- letter of acknowledgment for non-receipt claims
- status line
- rejects

A. Letter of Acknowledgment - With the processing of the G-333 and FAST input data, the computer will prepare one of the following three letters to acknowledge the non-receipt claim and notify the claimant that the matter has been referred to the Treasury Department.

- **RL-37** - When direct deposit information is shown on the G-333 or FAST transaction and the reason code is either B, or C, an RL-37 will be released to the name and address shown on the G-333 or FAST transaction. See exhibit 3 for a sample of the RL-37.

- **RL-38** - When direct deposit information is not shown on the G-333 or FAST transaction and the reason code is either B, or C, an RL-38 will be released to the name and address shown on the G-333 or FAST transaction. See exhibit 4 for a sample of the RL-38.

- **RL-39** - When direct deposit information is not shown on the G-333 or FAST transaction and the reason code is G, an RL-39 will be released to the name and address shown on the G-333 or FAST transaction. See exhibit 5 for a sample of the RL-39.

The letters will be delivered directly to the mailroom for release. The computer will prepare an original only of each letter. There will not be a copy for the field office or for the folder. If the above situations occur in a case, assume the letter was sent to the claimant. If the field office specifically requests acknowledgment, respond by memo or electronic mail.

B. Status List - A Status of Non-Receipt Claims/Cancellation Requests listing will be produced by the computer and will show the claim number, date of payment, amount of payment, type of payment, reason code, reclamation amount and name and address shown on the G-333 or FAST transaction. (See exhibit 6). Direct deposit information will be shown if applicable. If the transaction was entered on FAST, the signon and unit ID will also be shown. The list will be updated to include the information processed during the last computer run. The information for a specific claim or request will be maintained on the list for 6 months.
The status list will show one of three different types of messages under the caption STATUS depending on what action has been completed at the time the list is prepared.

1. If the claim or request has been transmitted to CFC, but we have not yet received the disposition (response) tape showing CFC’s actions, the status shown will be "SENT TO TREASURY". If no reply is received from CFC within 30 days, the system will release a second request and the status shown will be changed to "SENT TO TREASURY - SECOND REQUEST". The date on which the RRB's tape is transmitted to CFC will be shown to the right of STATUS DT.

2. After CFC has processed our tape, they will return a disposition tape with information showing the action taken at CFC. When the disposition tape is processed by the automated stop payment system, the STATUS will change to reflect CFC’s action. The check number or EFT trace number (CK NO), check symbol (CK SYM) and CFC processing date (PROC DT) will be added to the status list. In addition, the STATUS DT will be changed to show the date the disposition tape was processed at RRB. The CFC disposition status messages are explained in section 9.6.11.

3. In check cases, Treasury's Check Payment and Reconciliation System (CP&R) will provide the status of the original payment and notice of the initial CP&R action via the Daily Advice of Status tape. When this tape is processed by CFC they will return a disposition tape to us. After we process the tape, STATUS will change to reflect CP&R action and the STATUS DT will be changed to show the date the disposition tape was processed at RRB. The CP&R status messages are explained in section 9.6.24.

The status list can be used to answer correspondence from the claimant or the field without requesting the folder.

C. Rejects - A G-333 may reject from the Automated Stop Payment system for any number of reasons (a box which should be completed is blank, an erroneous reason code, keypunch error, etc.) The computer will print out a Form G-333 Edit Reject Sheet (see exhibit 7). This form is in the same format as the G-333 and will show all the information which was keypunched from the original G-333. The reason(s) for the reject will be printed on the bottom of the form.

The Form G-333 Edit Reject sheets will be delivered to the payment services group (PSG) to be returned to the originating unit for correction. Corrections can be made directly on the Form G-333 Edit Reject Sheet. If necessary, consult the MOMS/SAMM/QUICKIE/DATA-Q and/or the folder to make the corrections. If the reject was caused by missing information, enter the information in the appropriate spot in the reject sheet. If the reject was caused by erroneous information, draw a line through the entire entry and clearly print the correct entry
to the right of the incorrect item. If it is determined that the reject was caused by a keypunch error, either correct the erroneous entry in the same manner as above, or enter the omitted information in the appropriate spot. The central control group will batch the corrected Form G-333 Edit Reject sheets with the regular G-333s completed during the day. CORRECT AND RESUBMIT G-333 EDIT REJECTS AS QUICKLY AS POSSIBLE.

9.6.10 Chicago Financial Center Processing

When the Chicago Financial Center (CFC) receives a computer tape of Automated Stop Payment system input, they will take the following actions:

- Screen their records to determine whether or not the payment in question was issued.

- Confirm that the payment amount on the request equals the issue amount.

- Search the returned checks to determine if the check is in the possession of the financial center.

- Search other files (previous SF-1184s, previous non-receipt claims) to determine if a previous action was taken.

- Complete the check description by entering the specific check symbol and serial number of the check in question.

If CFC has no record of the payment being issued (e.g., payment date and/or amount on the request does not match CFC's records) or if their records show a previous action (e.g., the check was returned or a non-receipt claim or a previous SF-1184 was filed) a Payment Investigation Referral will be generated.

A. Check Cases - If the check was issued and CFC records show no previous action, they will notate their records that an SF-1184 was received and forwarded to the CP&R system in Washington D.C. for further handling. A record of the CFC disposition will be returned to the RRB.

B. Direct Deposit Cases - If the payment was directed to a financial organization, CFC will check the representative payee and/or beneficiary information and depositor account number against the financial center microfilm and take the following actions:

1) Reclamation - CFC will verify that the reason for the transmission of the request was either death or legal incapacitation and prepare and release a Form FMS-133 Notice of Reclamation to the financial organization.

2) Non-receipt - CFC will verify the payment, prepare and release a FMS-150 DD/EFT Tracer to the financial organization.
9.6.11 Processing CFC Replies

After CFC processes our tape, they will return a disposition tape to the RRB notifying us of the action taken on each claim or request. This notification will either be in the form of a confirmation or a referral. A confirmation indicates that all necessary RRB action has been completed and Treasury is processing the claim or request. A referral indicates that the RRB should re-examine the case to verify that the request is valid and resubmit the claim with the corrected information. As each Chicago Financial Center disposition tape is processed, the Status of Non-Receipt Claims/Cancellation Requests listing and PI STATUS will be updated.

A. Confirmations - When RRB receives a confirmation on a claim, PI STATUS and the status list will always be updated, however, a computer printed folder record will only be produced when direct deposit is involved or if the request is for a photocopy/certified photocopy. The Payment Investigation Folder Record (see exhibit 8), will show the information which was entered from the G-333 or FAST, the date the claim or request was processed by CFC and the action taken by the financial center. If the claim involves a check and the request is other than photocopy/certified photocopy, no folder record will be produced at this time. The only record of the financial center's handling on these claims will be the status list and PI STATUS.

The following messages will appear on PI STATUS, the status list and on the folder records produced at this time:

- **CHECK PREV CANCELLED**
  The check or payment has been cancelled. The Cancelled Check Listings should be checked to verify this information. The folder record will show the date of the cancellation.

- **DUPLICATE CLAIM SUBMITTED**
  Treasury will follow-up on a previous request. The folder record and status list will show the date of the previous action.

- **EFT PAYMENT TRACE PROCESSED**
  CFC has released a DD/EFT payment tracer, FMS-150, to the financial organization to investigate the claim of non-receipt.

- **PREV SF-1184 PROCESSED**
  The RRB has already entered a non-receipt claim or requested that reclamation action be taken on the payment. The referral notice and the status list will show the date the SF-1184 was processed.
• SF-1184 PROCESSED

The request for reclamation action or non-receipt claim has been sent to the CP&R system (Treasury in Washington) for handling.

The Payment Investigation Folder Records will be marked "ASSOCIATE AND FILE DOWN". They will be delivered to claim files.

B. Referrals - When CFC is unable to process a request as submitted, they will provide the referral reason on the disposition tape. A computer printed Payment Investigation Referral will be generated. PI STATUS and the status list will be updated for each request containing a referral code. The Payment Investigation Referral (see exhibit 9) will show the information which had been entered from the G-333 or FAST, the date the claim or request was handled by CFC and the reason for the referral.

The referral notices will be delivered directly to PSG where they will be routed to the requester. All referrals should be investigated and corrective action should be taken as necessary.

The following messages will appear on the referral notices, PI STATUS and the status list:

• AMOUNT DIFFERENCE

Check the referral and if necessary the MOMS/SAMM or the folder to see whether the amount or possibly the date entered on the G-333, or FAST does not match with the claimed or requested check or payment. Resubmit a corrected G-333 or FAST transaction.

• CFC WILL REPROCESS - REASON CHANGED FROM C TO D

CFC was unable to process the non-receipt claim within 4 business days. The referral should be filed in the claim folder. Pend the case 45 days for Treasury's reply. If the payment is outstanding, Treasury will forward a code 99 Non-Receipt Credit (see section 9.6.56 for handling code 99 credits). If the payment was cashed, Treasury will forward a photocopy of the check and a claim form (TFS-1133) to RRB for completion by the payee.

• EFT PROOF OF PAYMENT PROCESSED

A non-entitlement reclamation action, or photocopy/status request on an EFT payment has been validated by CFC.

• INVALID DIRECT DEPOSIT INFO

Resubmit a corrected G-333 or FAST transaction.
• INVALID RECORD OF ISSUE
  Resubmit a corrected G-333 or FAST transaction.

• NO RECORD OF ISSUE
  The described check or payment was not issued. Recheck the data entered on the G-333 or FAST. Recheck MOMS/SAMM. If no payment was issued, refer the case to the appropriate adjudication unit.

• UNKNOWN DISP REASON - XX
  Locate the claim folder. Send the folder and referral notice to PP&PAS.

• UNMATCHED DISP - REFER TO RCA
  Send the referral notice directly to PP&PAS.

  If the investigation of the referral shows that a FAST transaction or G-333 was submitted with erroneous data, prepare a corrected G-333 as shown in section 9.6, Appendix A or enter a payment investigation transaction on FAST. Attach the referral notice to the copy of the corrected G-333 or FAST print-out and file in the claim folder or mark the package "ASSOCIATE AND FILE DOWN" and release it to claim files.

9.6.20 Initial Editing And Review By The Check Payment And Reconciliation System (CP&R)

The Chicago Financial Center (CFC) sends all stop payment (non-receipt and reclamation) and photocopy requests for check cases to the CP&R System in Washington for further handling. Upon receipt in CP&R, the mechanical SF-1184s are again edited for missing data and/or inappropriate reason codes. A computer printed Payment Investigation Referral will be generated and PI STATUS and the status list will be updated for each request containing a CP&R edit reject message. The Payment Investigation Referral will show the information from the G-333 or FAST transaction, the date the claim or request was handled by CFC, the status date supplied by CP&R and the reason for the referral.

The referral notices will be delivered directly to BSU where they will be routed to the requester. All referrals should be investigated and corrective action should be taken as necessary.

The following messages will appear on the referral notices and status list:

A. Initial Stop
  • REJECT - CP&R UNABLE TO PROCESS.
CFC passed erroneous data to CP&R. Resubmit the transaction on FAST or Form G-333 and notify PP&PAS.

- **REJECT - DATE OF EVENT AFTER DATE OF PAYMENT.**
  
  Resubmit the claim via a new G-333 or FAST with either the correct date of death or the non-entitlement reason code (F).

- **REJECT - DECEDEANT/PAYEE NAME DISAGREE.**
  
  Resubmit the claim via a new G-333 or FAST with either the correct deceased name or the non-entitlement reason code (F).

- **REJECTED - INVALID CHECK DATE FIELD.**
  
  Resubmit the claim via a new G-333 or FAST, correcting the check date.

- **REJECTED - NON-NUMERIC DATA IN NUMERIC ONLY FIELD.**
  
  Resubmit the claim via a new G-333 or FAST.

- **REJECTED - UNACCEPTABLE USE OF DECEASED REASON CODE: RESUBMIT NONENTITLEMENT STOP IF REPRESENTATIVE PAYEE DID NOT RECEIVE CHECK.**
  
  Resubmit the claim via a new G-333 or FAST with either the correct deceased name or the non-entitlement reason code (F).

### B. Subsequent Stop

- **DUPLICATE STOP**
  
  Review the case. If the original request has a reply, no further action is necessary. If there is no reply to the first request, trace with Treasury. See section 9.6.57 for instructions on tracing stop payments.

- **REJECTED-OUTSTANDING CHECK NOT CANCELLED - NO ISSUE REPORTED - CONTACT DC.**
  
  CFC did not update their issue file. Send referral to PP&PAS.

- **REJECTED - UNACCEPTABLE USE OF STOP REASON CODE.**
  
  Review the case. Submit a new G-333 or FAST transaction with the correct reason code.

  If the investigation of the referral shows that a G-333 or FAST transaction was submitted with erroneous data, prepare a corrected G-333 as shown in section
9.6 Appendix A or enter a payment investigation transaction on FAST. Attach the referral notice to the copy of the corrected G-333 or FAST print-out and file in the claim folder, or mark the package "ASSOCIATE AND FILE DOWN" and release it to claim files.

9.6.21 Initial Stop Payment Processing By CP&R

Mechanical SF-1184s accepted by Treasury will be processed by the CP&R System. CP&R will examine its records to see if the check has been negotiated. (See section 9.6.24).

9.6.22 CP&R Action Taken When The Check Has Not Been Paid

If the CP&R System determines that the check is still outstanding (uncashed), Treasury will take the following actions based upon the reason code entered by RRB on the G-333 or FAST transaction:

- **A** - entitlement agency recertified before status - Treasury will cancel the original check and forward credit to RRB.
- **B** - entitlement-issue Courtesy Disbursement before status - Treasury will notify RRB that the check was outstanding and a Courtesy Disbursement (replacement check) was issued as a part of mass loss processing.
- **C** - entitlement - issue Courtesy Disbursement after status - Treasury will issue a Courtesy Disbursement (replacement check) bearing a unique check symbol and check serial number and notify RRB of their action.
- **D** - entitlement - agency will recertify after status - Treasury will cancel the original check and forward credit to RRB.
- **E** - deceased - Treasury will cancel the original check and forward credit to RRB.
- **F** - non-entitlement - Treasury will cancel the original check and forward credit to RRB.
- **G** - lost/stolen - endorsed - Treasury will cancel the original check and forward credit to RRB.
- **K** - photocopy - Treasury will notify RRB that the check is outstanding and no photocopy can be issued.
- **L** - certified photocopy - Treasury will notify RRB that the check is outstanding and no photocopy can be issued.
- **M** - status - no photocopy - Treasury will notify RRB that the check is outstanding. No further action will be taken by Treasury.
• S - agency match - non-entitlement - Treasury will cancel the original check and forward credit to RRB.

• T - agency match - deceased - Treasury will cancel the original check and forward credit to RRB.

• U - legal incapacitation - Treasury will cancel the original check and forward credit to RRB.

RCM 9.6.43 describes what action should be taken when the agency credit is received at RRB.

9.6.23 CP&R Action When The Check Status Shows Paid

If Treasury determines that the check has been negotiated, no credit is given. A photocopy of the paid check will be secured in all cases except reason code "M - Status - no photocopy." Treasury has agreed to provide photocopies for stop payment claims actions within 60 days. If the original check cannot be located and photocopy produced within that time frame, Treasury has established special procedures (see section B).

A. Photocopy Available - When the Check Claims Group (CCG) has obtained the photocopy, they will take the following actions based upon the reason code entered by RRB on the G-333 or FAST transaction:

• A - entitlement - agency recertified before status - Treasury will notify RRB that the original check was paid. The photocopy and FMS-1133 will be forwarded to RRB.

• B - entitlement - issue Courtesy Disbursement before status - Treasury will notify RRB that the original check was paid but a replacement check was issued (as a result of mass loss processing) before the paid status was known. If the replacement check is also paid, Treasury will notify RRB (see Interim Procedure A-95-03).

• C - entitlement - issue Courtesy Disbursement after status - The photocopy and FMS-1133 claim form will be sent to the payee. A replacement check will not be prepared until the claim form is completed and returned to CCG for processing.

• D - entitlement - agency will recertify after status - Treasury will notify RRB that the original check was paid. The photocopy and FMS-1133 will be forwarded to RRB.

• E - deceased - Treasury will use the photocopy to seek recovery of the "amount to be reclaimed" from the banking system and credit the agency if the amount is recovered.
• **F - non-entitlement** - Treasury will send the photocopy and a FMS-1133 claim form to the RRB for completion by the payee. If the payee claims non-involvement, Treasury will seek recovery from the bank.

• **G - lost/stolen - endorsed** - Treasury will notify RRB that the check was paid and that the fact that it was endorsed when lost or stolen may prevent claims action. The photocopy and FMS-1133 claim form will be sent to the payee. In some cases, this will be done through the RRB.

• **K - photocopy** - Treasury will forward the photocopy to the name and address shown in the NAME/ADDRESS block of the G-333 or FAST transaction.

• **L - certified photocopy** - Treasury will send a certified photocopy to the name and address shown in the NAME/ADDRESS block of the G-333 or FAST transaction.

• **M - status - no photocopy** - Treasury will notify RRB that the check is paid. No further action will be taken by CP&R.

• **S - agency match - non-entitlement** - Treasury will send the photocopy and a FMS-1133 claim form to the RRB for completion by the payee. If the payee claims non-involvement, Treasury will seek recovery from the bank.

• **T - agency match - deceased** - Treasury will use the photocopy to seek recovery of the "amount to be reclaimed" from the banking system and credit the agency if the amount is recovered.

• **U - legal incapacitation** - Treasury will send the photocopy and FMS-1133 claim form to the RRB for completion by the payee. If the payee claims non-involvement, Treasury will seek recovery from the bank.

**B. Photocopy Not Available Within 60 Days** - When the photocopy of the paid check is unavailable after 60 days, release an FMS-3864 to trace with Treasury (see RCM 9.6 Appendix C). When Treasury receives the FMS-3864 they will either forward the photocopy or take the following actions:

1. **Payee claiming non-receipt** - CCG will send a modified FMS-1133 claim form (see exhibit 10) to either RRB for release to the payee or directly to the payee if RRB requested release of a replacement check. If the payee continues to claim non-involvement in cashing the check, the payee must complete the modified FMS-1133 claim form and return it to CCG.

   CCG will adjudicate the claim and either credit RRB or settle with the payee. CCG will continue to attempt to retrieve the photocopy of the paid check. If they are successful, they will either reverse the credit to RRB or notify RRB that the duplicate payment must be recovered from the payee.
2. Requests other than non-receipt - In situations other than claims of non-receipt (deceased payee, non-entitlement, lost or stolen endorsed check, photocopy or status requests) the unavailability of a photocopy of the paid check will not result in credit being passed to RRB. CCG will notify RRB that no further action can be taken. If an overpayment exists, take the necessary or appropriate recovery actions.

9.6.24 Processing CP&R Status Replies

After CP&R investigates the payment status of a check, they will transmit a Daily Advice of Status file to CFC showing payment status and the action they will take on each claim or request. CFC will process the status file and transmit a disposition file to RRB. As each disposition file is processed at RRB, the Automated Stop Payment system will update the message on PI STATUS and the Status of Non-Receipt Claims/Cancellation Requests listing and produce Payment Investigation Folder Records.

The following messages will appear on PI STATUS, the status list and on the folder records produced at this time:

A. Paid Status

- PAID - CERTIFIED PHOTOCOPY TO FOLLOW.
  
  Control case for the certified photocopy. Send to the requester when received. Treasury will use this status message for requests coded "L - certified photocopy".

- PAID - CCG RECLAMATION; NO PHOTOCOPY TO AGENCY.
  
  Control for credit. Treasury will use this status message for request code "E - deceased" and "T - agency match - deceased".

- PAID - COURTESY DISBURSEMENT ISSUED BEFORE STATUS; PHOTOCOPY AND CLAIM TO FOLLOW.
  
  Treasury will only use this status message for request reason code "B - entitlement - issue Courtesy Disbursement before status." This status message confirms that a replacement check was issued by CFC as a result of mass loss processing but the original check was paid (cashed). There is a strong possibility that an overpayment will occur. If both the original and replacement check are subsequently paid, Treasury will notify RRB (see Interim Procedure A-95-03).

- PAID - ENDORSEMENT MAY PROHIBIT CLAIMS ACTION; PHOTOCOPY AND CLAIM TO FOLLOW.
Treasury will only use this status message for requests coded "G - lost/stolen - endorsed." Treasury will send the claim form and photocopy to RRB for completion by the payee (see Interim Procedure A-95-03).

- **PAID - PHOTOCOPY AND CLAIM TO FOLLOW.**

  Treasury will use this status message for request codes "A" - entitlement - agency recertified before status, "C - entitlement - issue Courtesy Disbursement after Status", "D" - entitlement - agency will recertify after status, "F - non-entitlement", "S - agency match - non-entitlement" and "U - legal incapacitation". If the request reason code was "C - entitlement - issue Courtesy Disbursement after status", Treasury will send the claim form and photocopy directly to the payee. In the remaining request codes, control the case for receipt of the claim form and photocopy. Send both to the payee when received (see section 9.6.31).

- **PAID - PHOTOCOPY TO FOLLOW.**

  Control case for photocopy. Send to requester when received. Treasury will only use this status message for request code "K - photocopy."

- **PAID STATUS.**

  No claim action pending. Use check payment status for the reason it was requested. Treasury will use this status message for request code "M - status - no photocopy."

- **PAID - NO PHOTOCOPY AVAILABLE.**

  Treasury will use this status message for request code K - Photocopy and code L - certified photocopy for any check dated before November 7, 1986. This message will also appear for checks issued after November 7, 1986 that have aged 78 months. If an overpayment exists, take the necessary or appropriate recovery actions.

**B. Outstanding Status**

- **OUTSTANDING - CHECK CANCELLED; AGENCY CREDIT TO FOLLOW.**

  Control case for receipt of the agency credit. When credit is received, reissue the check or close the accounts receivable and tickler call-up as necessary. Treasury will use this status message for request codes "A - entitlement - agency recertified before status", "D - entitlement - agency will recertify after status", "E - deceased", "F - non-entitlement, "G - lost/stolen - endorsed", "S - agency match - non-entitlement", "T - agency match - deceased", "U - legal incapacitation" and in certain cases, "C - entitlement - issue Courtesy Disbursement after status."
• OUTSTANDING - NO PHOTOCOPY.

No photocopy can be sent because the check has not been paid. If credit is necessary and the check issue date is less than a year old, submit a new G-333 or FAST transaction with a stop reason code (see exhibit 1 for acceptable codes). Treasury will use this status message for request codes "K - photocopy" and "L - certified photocopy."

• OUTSTANDING STATUS.

The check has not been presented for payment. No claim action is pending. Use the payment status information for the reason it was requested. Treasury will use this status message only for request code "M - status - no photocopy."

• OUTSTANDING - COURTESY DISBURSEMENT ISSUED.

Treasury issued a replacement check to the payee according to our request. Treasury will use this status message for request code "C - entitlement - issued Courtesy Disbursement after status."

• OUTSTANDING - COURTESY DISBURSEMENT ISSUED BEFORE STATUS.

Treasury issued a replacement check to the payee according to our request for mass loss processing. Treasury will only use this status message for request codes "B - entitlement - issue Courtesy Disbursement before status."

• LIMITED PAYABILITY CANCELLATION.

A check is at least 12 months old and has not been presented for payment. Treasury has cancelled the check. Reissue the check if entitlement to the payment exists or close the accounts receivable record and tickler call-up if necessary. Treasury will use this status message for request codes "K-Photocopy," "L-Certified Photocopy" and "M-Status - No Photocopy."

C. Miscellaneous Stops Exceptions

• PAYMENT EXCEPTION - CCG WILL INVESTIGATE AND ADVISE.

Control for the results of CCG’s investigation. Treasury will use this status message for all request codes.

• STATUTE OF LIMITATIONS EXPIRED.

Treasury is unable to take any claims action because of the age of the check. Resubmit the claim using code M for the status of the payment or code K if a photocopy is needed.
9.6.25 Courtesy Disbursements

Treasury will provide Courtesy Disbursement replacement services as explained below:

A. Mass Loss Claims - Replacement checks for mass loss claims will be produced by the Chicago Financial Center upon receipt of the claims tape. Checks will be issued immediately without the ten day delay for processing current month check replacements. If an overpayment occurs as a result of the Courtesy Disbursement being issued, it will be charged to the RRB (see Interim Procedure A-95-03).

B. Non-receipt Claims - If the original check has not been negotiated, CP&R authorizes the Chicago Financial Center to issue a replacement check. The Courtesy Disbursement is clearly identified with the statement "REPLACES PAYMENT DATED MM/DD/YY." No further action will be taken by the Check Claims Group (CCG) unless both checks are later received negotiated.

NOTE: Treasury will not issue replacement checks for mass loss claims and non-receipt claims if 13 months have lapsed since the check issue date of the original check. The Limited Payability Cancellation listing should be checked to see if credit has been received for the payment.

9.6.26 Processing Code 90 Notice Of Cancelled Check Credits And Code 99 Non-Receipt Claim Credits

Treasury will forward credits to RRB in response to reclamation requests and non-receipt claims, on the cancelled check file using cause code 90 and cause code 99, respectively. These codes will not cause a suspension or termination, so code 90 and code 99 will not show up on DATA-Q under TERM/SUSP CAUSE. Notices of Cancelled Checks (Cause Code 90) and Non-Receipt Claim Credit notices (Cause Code 99) should be matched to the claim folder and handled as follows:

A. Reclamations - Treasury will forward code 90 credits in response to reclamation requests when the check has been found to be outstanding. After determining that a reclamation request was processed for the payment returned as a code 90 credit, use the credit to reduce the outstanding overpayment balance.

B. Non-Receipt Claims - The majority of non-receipt claims released to Treasury are reason code "C" claims. Normally, when the check is found to be outstanding, Treasury will use the credit from the outstanding check to release a replacement check. However, in a number of situations, Treasury will forward a code 99 credit to RRB for reissuance. Refer to RCM 9.6.56 for instructions on the release of a replacement check.
9.6.27 Processing Code 40 Limited Payability Cancellation Credits

Treasury will forward credit to RRB for all checks issued October 1, 1989, and later, that remain uncashed after the 12th month from the check issue date using cause code 40. A code 40 will not cause a suspension or termination, so a code 40 will not show up on DATA-Q under TERM/SUSP CAUSE. Limited Payability Cancellation Credit notices (Cause Code 40) should be matched to the claim folder and handled as follows:

A. **Check Covers A Period of Non-Entitlement** - If the check covers a period of non-entitlement, any overpayment caused by the payment should be removed. Close out the accounts receivable record using action out code 12F and tickler call-up if necessary.

B. **Check Covers A Period of Entitlement** - If the check covers a period of entitlement and a request for reissuance is received, reissue the payment to the annuitant. Refer to section 9.6.56B for instructions on the release of a replacement check to the annuitant. Otherwise, file down the Limited Payability Cancellation notice and forward the folder to claim files. If the annuitant is deceased, develop for accrued annuities and issue the payment to the eligible survivor(s).

**NOTE:** If the check covers a period of entitlement and an overpayment exists on the annuitant's record, use the amount of the check to offset the overpayment. If the check is a combined RR/SS payment, only the RR portion of the check can be used to offset the RR overpayment. Reissue the SS portion of the check to the annuitant. Prepare Form G-206 to modify the accounts receivable balance using action out code 12F. Notify the annuitant of the action and if an overpayment balance still remains, the new overpayment recovery date.

If the date of the check is 10/1/89 or later and, the check is reissued, used to offset an overpayment, or if there is no entitlement to the check, the bureau of fiscal operations (BFO) must be notified in order to properly credit funds. Access HSL to get to the Limited Payability Cancellation Reversals program so that a transfer of funds can be made. See RCM 9.6 Appendix D for instructions on using the HSL program.

Also, if the payment is reissued as an accrued annuity, or if the check was for a period of non-entitlement, send the claim folder to TAX-IAS after all examiner action.

9.6.28 Processing Non-Receipt Claims After Expiration Of The Claimability Period

When an annuitant claims non-receipt of a check that is a year or older, the Beneficiary Services Unit (BSU) will investigate the claim by checking the Administrative Cancellation listing, PAYBACK, the Limited Payability Cancellation listing, and/or the Cancelled Check listing to see if the check was previously cancelled. If the check is not found, BSU will check PI STATUS or the Status of Non-Receipt Claims/Cancellation
Requests listing to see if a previous non-receipt claim was processed. If no previous claim was processed, PSG will initiate a photocopy request via FAST-PI using stop reason code K.

A. **Check Previously Cancelled** - If the check appears on PAYBACK or one of the cancellation lists or, PI STATUS indicates that the check was previously cancelled, BSU will prepare a G-696 and forward it to the appropriate unit for handling as described in section 9.6.27.

B. **Previous Stop Payment Processed**

1. If the check appears on the Status of Non-Receipt Claims/Cancellation Requests list or PI STATUS and the Treasury reply message is "OUTSTANDING--COURTESY DISBURSEMENT ISSUED" or "OUTSTANDING--DISBURSEMENT ISSUED BEFORE STATUS", BSU will access the Treasury Tie File to get the date that the replacement check was issued and release an RL-77 letter to the payee advising him/her that no further action will be taken on his/her claim.

2. If the check appears on the Status of Non-Receipt Claims/Cancellation Requests listing or PI STATUS and the Treasury reply message is "OUTSTANDING--CHECK CANCELLED; AGENCY CREDIT TO FOLLOW", BSU will forward the case to the appropriate unit for handling. Examine the claim folder to determine if a replacement check was issued. If a replacement check was issued, release an RL-77 letter to the payee advising him/her that no further action will be taken on his/her claim. If a replacement check was not issued, and the payee is entitled to the check, prepare an OPO award as described in section 9.6.56.

C. **Check Not Previously Cancelled And No Previous Stop Payment Processed** - If the check does not appear on PAYBACK, any of the cancellation listings, the Status of Non-Receipt Claims/Cancellation Requests listing or PI STATUS, process a photocopy request via FAST-PI using stop reason code K and pend the case 45 days for Treasury's reply.

**IMPORTANT:** Avoid processing unnecessary photocopy requests. Treasury charges RRB for each photocopy received. While initially providing the annuitant with the photocopy could minimize additional handling of the case, whenever possible process a status request using stop reason code M.

1. If the status message shows "PAID-PHOTOCOPY TO FOLLOW", BSU will release an RL-77 letter along with the photocopy to the payee advising him/her that no further action can be taken on his/her claim.

2. If the status messages shows "PAID-NO PHOTOCOPY AVAILABLE" or "PAID", BSU will release an RL-77 letter to the payee advising him/her
that no due to the Statute of Limitations, no further action can be taken on his/her claim.

3. If the status message shows "Limited Payability Cancellation," BSU will refer the case to the appropriate unit for handling, as described in section 9.6.27.

9.6.30 Claims Processing On A Paid Check

After the paid status is determined and RRB is advised, Treasury's computer will produce a two page Claims Document (see exhibit 11). This Claims Document contains all of the appropriate stop information and the appropriate mailing information. The FMS-3858 Claims Document, is now the first two pages of a four page forms set. Page three is a set of instructions to the payee/claimant on how to complete the TFS-1133 Claim Form and page four is the TFS-1133 Claim Form.

In some cases, the RRB will be responsible for contacting the payee for completion of the TFS-1133 claim form (see exhibit 12). The Claims Document will be used to transmit photocopies and TFS-1133 claim forms to the RRB for forwarding to the payee.

In cases where RRB asked Treasury to release a replacement check ("B-entitlement-issue Courtesy Disbursement before status" and "C-entitlement-issue Courtesy Disbursement after status"), Treasury will be responsible for releasing the claim forms to the payee. The Claims Documents will be destroyed if Treasury releases the claim forms.

9.6.31 ORSP Claims Document Processing

Treasury produced Claims Documents will be received in the payment services group (PSG). Folders charged to claim files or non-adjudication units will be requested through the Automated Folder Control System (AFCS). When the folder is charged to an adjudication unit, the Claims Document and photocopy will be routed to that unit for handling. NEVER SEND UNPROCESSED CLAIMS DOCUMENTS AND PHOTOCOPIES TO CLAIM FILES FOR MATCHING WITH THE FOLDER - ALWAYS USE AFCS.

Note: When the reason code shown on the Claims Document is A, F, S, or U and the folder is charged to claim files or a non-adjudication unit, PSG will request the folder through AFCS, match the Claims Document package and forward the folder to the appropriate adjudication unit.

Treasury will forward Claims Documents in both non-receipt and some reclamation requests. When the Claims Document is matched to the claim folder, check the reason code and take the following action:

A. Reason Code "A - Entitlement - Agency Recertified Before Status" - If Treasury sends a Claims Document to the RRB for forwarding to the payee, and the
original request was for reason code "A", file the Claims Document package (pages 1 through 4 and photocopy) in the claim folder, and check the folder to determine if the replacement payment issued by the RRB was returned.

1. **Payment Returned**

   Notate the Claims Document that the replacement payment was returned and take no further action.

2. **Payment Not Returned**

   - Prepare Form G-333 or FAST transaction using reason code "F", for the replacement payment, enter the amount of the payment to accounts receivable, and establish a six-month 16-09 call-up for Treasury's response.

   - If Treasury finds that the payment is outstanding (uncashed) the payment will be cancelled and credit forwarded to RRB on the cancelled check tape (Code 90). When the Notice of Cancelled Check (green sheet) is matched to the folder, close out the open accounts receivable balance. No further action is necessary.

   - If Treasury finds that the payment is paid (cashed) a Claims Document package will be forwarded to the RRB. When the package is matched to the folder, handle according to RCM 9.6.54.

B. **Reason Code "B - Entitlement - Courtesy Disbursement Before Status" and "C - Entitlement Issue Courtesy Disbursement After Status"**

   Treasury should release claim forms and photocopies directly to the payee in these cases. Treasury will notify the payee directly on the disposition of his claim. If any claim forms are received in these cases, release the claim forms directly to the payee and send the folder to claim files. No further action is necessary.

C. **Reason Code "D - Entitlement - Agency Will Recertify After Status"** - If Treasury sends a Claims Document to the RRB for forwarding to the payee, and the original request was for reason code "D", take the following action:

   - File both copies of the Claims Document (pages 1 & 2) in the claim folder.

   - Release the TFS-1133 instructions and claim form (pages 3 & 4), along with the photocopy, to the payee.

   - Notate page 1 of the Claims Document with the date of release and send the folder to claim files. No further action is necessary.
D. **Reason Code "F - Non-Entitlement", "S - Agency Match-Non-Entitlement" and "U - Reclamation - Legal Incapacitation"** - If Treasury sends a Claims Document to the RRB for forwarding to the payee and the original request was for either "F", "S", or "U", take the following action:

- File both copies of the Claims Document (pages 1 & 2) in the claim folder.
- Make a copy of the check for the folder for possible overpayment recovery action.
- Release the TFS-1133 instructions and claim form (pages 3 & 4), along with the photocopy, to the payee through the appropriate field office.
- Enter the amount of the payment to accounts receivable.
- Establish a tickler call-up, reason code 01 followed by the unit code (e.g. RPS would use "01-01"), for 90 days to control for receipt of the completed TFS-1133.

**NOTE:** Do not trace for the completed claim form when the call-up expires, see section 9.6.34.

E. **Reason Code "G - Lost/Stolen - Endorsed"** - Treasury will send a Claims Document to the RRB for forwarding to the payee.

- File both copies of the Claims Document (pages 1 & 2) in the claim folder.
- Release the TFS-1133 instructions and claim form (pages 3 & 4), along with the photocopy, to the payee.
- Notate page 1 of the Claim Document with the date of release and send the folder to claim files. No further action is necessary.

### 9.6.32 Reviewing Completed Claim Forms

When the completed TFS-1133 claim form is returned by the payee, request the claim folder through AFCS. Do not send the TFS-1133 to claim files for the folder. Review the claim form for completeness. Verify that:

- all of the questions on the front and back of the form have been answered; and
- the payee or representative payee has signed the claim in the required places (if the check is drawn jointly, both payees must sign); and
- the payee’s signature, if made by mark, has been witnessed.
A. **Properly Completed Claim Forms** - Send properly completed forms to: Financial Management Service, Adjudication Division - Check Claims, Room 800 D, P.O. Box 1849, Hyattsville, MD 20788. Attach both the CCG copy of the Claims Document (page 2) and the photocopy of the check to the completed claim form (page 4). File the RRB copy of the Claims Document (page 1) on the right side of the claim folder. Note the date the package was returned to Treasury and establish a new (16-09) tickler call-up for 6 months.

B. **Payee Admits Negotiating the Check** - In cases where the payee admits negotiating the check or authorizing its negotiation, or where the payee does not return the claim form, Treasury will not take further action. If the accounts receivable record has been established in the case, route the folder to the appropriate adjudicating unit for recovery of the overpayment.

C. **Payee Claims Address Error** - If the payee claims to have never lived or received mail at the check address, review the case to determine when and why the address was changed. If it appears that the wrong address was changed (the check was mailed to and received by a person of the same name residing at the check address), send the case to PP & PAS.

   If the check address appears correct according to our records, attach a photocopy of the change of address request to the TFS-1133 claim form and return it to the address shown in section A on the previous page. Attach both the CCG copy of the Claims Document (page 2) and the photocopy of the check to the completed claims form. File the RRB copy of the Claims Document (page 1) on the right side of the claim folder. Note the date the package was returned to Treasury and establish a new (16-09) tickler call-up for 6 months.

### 9.6.33 Adjudicating TFS-1133 Claims On Paid Checks

Treasury will continue to have the responsibility to finally adjudicate paid check claims, referring apparent forgeries to Secret Service to investigate the circumstances surrounding negotiation of the check and reclaiming against the bank that presented the check.

The adjudication process at Treasury begins when CCG receives the completed TFS-1133 claim form, the CCG copy of the Claims Document and the photocopy of the check. CCG will analyze the payee's signature and other information from the TFS-1133 to determine the validity of the claim.

A. **Payee Involved in Negotiation of the Check** - If Treasury determines that the endorsement was not forged (i.e., the intended recipient actually negotiated the check) the claim will be denied. Treasury will notify RRB of this denial. If this denial results in an overpayment (payee was not entitled to the check, RRB issued a replacement check, etc.) RRB must recover the overpayment. In cases where Treasury has been in direct contact with the payee/claimant, a denial notice will also be sent directly to the payee.
B. Payee Was Not Involved in the Negotiation of the Check-Forgery - Upon receipt of the completed TFS-1133, Treasury will conduct a forgery investigation. Where they determine that the payee does not appear to have been involved in the negotiation of the check and he was entitled to the check, Treasury will seek to recover the amount of the original check through the banking system and issue a settlement check directly to the payee or forward the credit to RRB for reissuance of a replacement check.

In some involved cases, Treasury will advise that further investigation is necessary. Because of the length of time required for Treasury to complete a forgery investigation, it may take as long as two years from the date the stop payment request was processed to resolve the case and send the credit to RRB.

9.6.34 Action When The Erroneous Payments Tickler Call-Up Expires

When the tickler call-up expires, the adjudication unit examiner will review the case to determine if the completed TFS-1133 has been matched to the folder. If the completed TFS-1133 has been matched to the folder, see section 9.6.32.

If the claim form is not returned to the RRB, assume the payee negotiated the check or authorized its negotiation. Request recovery of the existing overpayment if an overpayment letter was never released, (see section 9.6.54 if double payments are involved and section 9.6.55 if there is a payment over cancellation). If reclamation was initiated after normal overpayment recovery methods were exhausted, refer the claim to OPR.

9.6.40 Treasury Receivable, Accounting And Collection System (TRACS)

The Treasury Receivable, Accounting and Collection System (TRACS) handles all accounting, billing and collection activities associated with the check claims process; initiating automated credits and charges to the RRB Budget Clearing Account. The credits received from TRACS are for Unavailable Check Cancellations (UCCs) from paper SF-1184s, Limited Payability Cancellations and Reclamation Credits on not-due checks paid (cashed) after the death of an annuitant. The charges are for Payments-Over-Cancellations (POCs).

All credit/charge detail information is received on magnetic tape and all credit/charge summary information is received over the Government On-Line Accounting Link System/On-Line Payment and Collection System (GOALS/OPAC). The Bureau of Fiscal Operations (BFO) is responsible for balancing and distributing the money to the correct RRB appropriation account.
9.6.41 ORSP Processing Of TRACS Transactions

Treasury will forward a separate tape for each TRACS transaction; Unavailable Check Cancellation (UCC) credits, Payment-Over-Cancellation (POC) Reclamation Credits and Limited Payability Cancellations. The Limited Payability Cancellation tape is processed through the DAISY/CHICO system (see section 9.6.27). The tape containing UCCs, POCs and Reclamation Credits is processed through the Automated Stop Payment System. Three types of output are then generated; the credit/charge folder notice (see exhibit 13), the credit/charge status listing (see exhibit 14) and a separate detail listing of each transaction type (see exhibit 15).

A. Folder Notice - A folder notice will be produced for every item on a transaction tape. It will contain the schedule number, the transaction date and all of the detail information; the claim number, payee code, payee name, check number and symbol, check date and the credit or charge amount. A status message and a reason code will only be provided for UCCs and POCs. See section 9.6.43 for an explanation of the status messages.

B. Status List - The information from each TRACS transaction will be accumulated on a credit/charge status listing. This listing is kept in PSG. It will contain the schedule number, the transaction date and all of the detail information; the claim number, payee code, payee name, check number and symbol, check date and the credit or charge amount. A status message and a reason code will only be provided for UCCs and POCs. See section 9.6.43 for an explanation of the status messages.

C. Detail Listing - A detail listing showing all credits/charges will be produced for each TRACS transaction type; UCCs, POCs and Reclamation Credits. These listings are kept in PSG. Each list will contain the schedule number, the transaction date, the claim number, payee code, payee name, check number and symbol, check date and the credit or charge amount.

9.6.42 Distributing Automated Stop Payment Credit/Charge Folder Notices

The Credit/Charge folder notices will be received in the payment services group (PSG). PSG personnel will take the following actions:

- Sort the folder notices by stop reason code, and match them to the appropriate form FMS-3858 forwarded from Treasury. Form FMS-3858 will be produced for charges only; any credit folder notices should be forwarded to the appropriate unit with Form G-98. If a folder notice or FMS-3858 is received for the bureau of unemployment and sickness insurance or for the bureau of fiscal operations, it is to be forwarded to the respective bureau.
• Request the claim folder for all FMS-3858s received with stop reason code B or C. Access the Treasury Tie File to obtain a printout of the replacement check data. Review the claim folder for the return of the replacement check. If not found, check the cancelled check listing. If the replacement check was returned, no further action is necessary. If the replacement check was not returned, follow the instructions in section 9.6.55A.

• Route folder notices and associated forms FMS-3858 according to the beneficiary symbol and prefix (BSP) shown on the folder notice or the check copy attached to the FMS-3858. BSP of A or MA should be routed to the retirement post section (RPS). All others should be routed to SPS.

Instructions for the handling of these charges in the adjudication units and PSG are found in sections 9.6.55 and 9.6.56.

9.6.43 Processing Credits And Charges

In addition to identifying the credits and charges, Treasury will send the following status messages via TRACS on the Unavailable Check Cancellation (UCC) tape and the Payment-Over-Cancellation (POC) tape. These messages will appear on the folder notice and the status list.

A. Credits

• OUTSTANDING - CHECK CANCELLED; AGENCY CREDIT TO FOLLOW.

This is the only credit message. The check requested has not been cashed. The credit can be used to reduce an open accounts receivable balance, issue a replacement check, or pay the accrued annuity to a survivor, as necessary. Treasury will use this message for requests coded "A - entitlement - agency recertified before status", "D" - entitlement - agency will recertify after status, "E-deceased", "F-non-entitlement", "G-lost/stolen-endorsed", "S-agency match-non-entitlement", "T-agency match-deceased" and "U-legal incapacitation."

NOTE: This code is used infrequently. Credits are normally received at RRB on the cancellation tape as code 90 or code 99.

B. Charges

• BOTH CHECKS PAID - CHARGE TO AGENCY; PHOTOCOPIES AND CLAIM ATTACHED.

Treasury will use this message with a charge item when both the original and replacement check have been cashed. This code will only be sent when Treasury released the replacement check (request codes "B-entitlement-issue
Courtesy Disbursement before status" and "C-entitlement-issue Courtesy Disbursement after status"). See section 9.6.54 for further instructions.

- PAYMENT-OVER-CANCELLATION-REVERSAL OF PREVIOUS AGENCY CREDIT TO RFC BY SF-215 PHOTOCOPY AND CLAIM ATTACHED.

Treasury will use this charge message when they previously returned credit to the RRB for a check and it has now been processed for payment. This message will also be used when Treasury issued a replacement check and the original check is subsequently processed for payment. This code will be used for requests coded "A-entitlement-agency recertified before status" "B-entitlement - issue Courtesy Disbursement before status", "C-entitlement - issue Courtesy Disbursement after status", "D-entitlement -agency will recertify after status", "F-non-entitlement", "S-agency match-non-entitlement" and "U-legal incapacitation". See section 9.6.55 for further instructions.

- PAYMENT-OVER-CANCELLATION-REVERSAL OF PREVIOUS AGENCY CREDIT TO RFC BY SF-215 PHOTOCOPY AND CLAIM ATTACHED; ENDORSEMENT MAY PROHIBIT CLAIMS ACTION.

Treasury will use this charge message when they previously returned credit to the RRB for a check and now it has been processed for payment. This code will only be used for requests coded "G-lost/stolen-endorsed." See section 9.6.55 for further instructions.

- PAYMENT-OVER-CANCELLATION-REVERSAL OF PREVIOUS AGENCY CREDIT TO RFC BY SF-215; PHOTOCOPY USED FOR CCG RECLAMATION ON DECEASED STOP.

Treasury will use this charge message when they previously returned credit to the RRB for a check and now it has been processed for payment. Treasury's check claims group (CCG) will seek to recover the check through the banking system. If successful, credit will be sent to the RRB with the regular reclamation credits via TRACS. This code will be used for requests coded "E-deceased" and "T-agency match-deceased".

- THIRD PAYMENT AGAINST CHECK; CHARGE TO AGENCY WITH PHOTOCOPIES AND CLAIM ATTACHED. PREVIOUS AGENCY CREDIT TO RFC BY SF-215.

Treasury will use this code when both the original and the replacement checks have been paid after credit for the original check was returned to RRB. This code will be sent when RRB sent a request "C-entitlement-issue Courtesy Disbursement after status" for the replacement check and received credit because the original and replacement checks had not been paid (cashed). There should be a previous Automated Stop Payment Credit/Charge folder notice in file showing either "PAYMENT-OVER-

9.6.44 Updating The Accounts Receivable Record

When an Unavailable Check Cancellation (UCC) credit or a reclamation credit is received via TRACS or, a TFS-133 or TFS-135 is received from Treasury or, a cash refund is received via LOCK BOX, PSG will update the accounts receivable record. Claims examiners and/or development clerks must update the accounts receivable record in the situations described below.

A. Establishing An Accounts Receivable Balance - Create an open accounts receivable record whenever:
   - An Automated Stop Payment Credit/Charge folder notice is received showing that the check was paid over a cancellation (credit was previously given to RRB).
   - An Automated Stop Payment Credit/Charge folder notice of a double payment is received (payee cashed both the original and replacement checks).

B. Clearing an Accounts Receivable Balance - Update the accounts receivable record whenever:
   - A Notice of Cancelled Check (green sheet) is received or the outstanding check appears on the Cancelled Check listing.
   - The overpayment is written-off to uncollectible (this can only be done by OPR).
   - The overpayment is recovered from due benefits (annuity withholding, LSDP or accrued annuities).

NOTE: Refer to RCM 9.10 for instructions on establishing, clearing and modifying an accounts receivable balance.

9.6.50 Cancelling A Stop Payment Request

There will be instances where the RRB must request the Treasury Department to abandon the stop payment action. This situation usually occurs if the examiner submits a G-333 or FAST-PI request and any of the following occur:

- A refund is received from the estate or financial organization, or
- The stop payment request was prepared in error, or
• The incorrect date of the missing check was reported, or
• The original check was located.

Requests to terminate a stop payment request must be made in writing and include: the reason for abandoning the stop payment action, the date of the payment, the amount of the payment, the name of payee, the check number and check symbol. The completed check description information can be obtained from either PI STATUS, the Payment Investigation Folder Record or the Status of Non-Receipt Claims/Cancellation Requests list. The request to terminate a stop payment request should also show the "date of referral", use the processing date (PROC DT) from PI STATUS the status list or folder record.

A. Direct Deposit/EFT Payment - If the stop payment request was submitted for a DD/EFT payment, the processing will be done by the Chicago Financial Center. Notice to terminate the stop payment action for a DD/EFT request must be sent to the Chicago Financial Center (CFC). Prepare an RL-78d; complete the payment identification section, mark the appropriate box, and release the letter.

B. Check Cases - If the stop payment request was submitted for a check case, the processing will be done by the check claims group (CCG) in Hyattsville, MD. Notice to terminate the stop payment action for a check request must be sent to CCG. Prepare an RL-78; complete the check identification section, mark the appropriate box and release the letter to Treasury.

9.6.51 Non-Receipt Of A Courtesy Disbursement (Replacement Check)

When a claimant reports that he still has not received a replacement check for a check previously reported as missing, the payment services unit (PSU) will take the following action: Check the status of Non-Receipt Claims/Cancellation Requests listing for the request. Verify that the request was correctly submitted and that a replacement check was requested, reason code "B-entitlement-issue Courtesy Disbursement before status" or "C-entitlement - issue Courtesy Disbursement after status."

A. Request Incorrectly Submitted - If the G-333 request or FAST transaction was submitted with incorrect information (wrong check date or wrong reason code), submit a new G-333 or FAST transaction with the correct information.

B. Status Reply Not Received - If a status reply from Washington has not been received on the request and more than 30 days have elapsed since the processing date (PROC DT), release an RL-78 to Treasury. If less than 30 days have elapsed, release an RL-77 to the claimant showing that Treasury has been requested to investigate and he can expect to hear from that office.

C. Status Shows Check Paid - If the status of the check shows "PAID-PHOTOCOPY AND CLAIM TO FOLLOW", release an RL-77 to the claimant advising that Treasury is handling the claim.
D. **Status Shows Check is Outstanding** - If the status of the check shows either "OUTSTANDING-COURTESY DISBURSEMENT ISSUED" or "OUTSTANDING-COURTESY DISBURSEMENT ISSUED BEFORE STATUS", access Treasury's Tie File for the exact check number and check issue date of the Courtesy Disbursement. If the date of the claimant's inquiry is more than one week from the check issue date of the Courtesy Disbursement, prepare a new G-333 or FAST transaction using reason code C. If the date of the claimant's inquiry is less than one week from the check issue date of the Courtesy Disbursement, release an RL-77 to the claimant advising that Treasury is handling the claim.

### 9.6.52 Courtesy Disbursement Or Replacement Checks Returned

Courtesy Disbursement or Replacement checks issued as a result of non-receipt processing, should be routed to the Chicago Financial Center (CFC) in the same manner as regular checks. After CFC processing, these checks will appear on the Cancelled Check Listing showing the word REPLACE in the TYPE PAYMENT column. Processing of a replacement check in the DAISY system will not cause suspension or termination unless the check is returned as undeliverable (98), or because the payee died (01, 41, 51).

### 9.6.53 Original Check Returned To The RRB - Stop Payment Request Pending

A payee might return the original check when he has submitted a request for a replacement check. If an original check is returned, route the check to Chicago Financial Center in the same manner as regular checks.

### 9.6.54 Double Payments - Original And Replacement Cashed

A double payment occurs when:

- Treasury authorizes and issues a settlement (replacement) check to a payee based on the payee submitting a completed claim form (FMS-1133) and Treasury later determines that the payee cashed both the original and the replacement checks; or,

- The RRB authorizes Treasury to issue a replacement check based on a non-receipt claim filed by the payee (stop reason code C processing) and the payee receives and cash both the original and the replacement checks. At the time a replacement check is issued, the payee is advised not to cash both the original and replacement checks. The payee may still receive and cash both checks even though the stop payment request was processed.

These double payment overpayments require due process and must be recovered by full withholding, credit card payment or cash refund. The RRB is responsible for recovering the overpayment from the payee.
A. **Treasury Authorized Replacement Check** - Treasury will use an SF-1081 Voucher and Schedule of Withdrawals and Credits to notify RRB of double payments on cases where they have determine that the payee has cashed both the original and the replacement checks. The amount of the duplicate payment will have been charged to the RRB. The SF-1081 will be accompanied by photocopies of both checks. Since the overpayment resulted from a false claim submitted by the payee, a claim form will not accompany the photocopies. The SF-1081 will be received in the payment services group (PSU) and sent to the appropriate adjudication unit for handling.

The examiner should take the following action:

- Prepare code letter 1855. Show the name and phone number of the appropriate field office on the letter. Release the letter to the payee.
- Enter the amount of the overpayment to the accounts receivable.
- Authorize and recover the overpayment in the usual manner.

B. **RRB Authorized Replacement Check**—If Treasury notified the RRB of a double payment via TRACS, an Automated Stop Payment Credit/Charge folder notice will be generated. The amount of the duplicate payment will have been charged to the RRB. Treasury will furnish copies of both checks with a claim form to the RRB. PSU will send the credit/charge folder notice, photocopies and claim form to the appropriate unit for handling.

The examiner should take the following action:

- Prepare code letter 1855. Show the name and phone number of the appropriate field office on the letter.
- Prepare a memorandum modeled after Exhibit 16 to the appropriate field office.

NOTE: If the check is more than a year old, modify the memorandum to the field advising them to return the completed claim form and photocopies to headquarters and not to Treasury. Upon receipt, forward the completed claim form and photocopies to RRA PAS for further handling.

- Attach the Claims Document package and photocopies, along with a copy of the overpayment letter, to the field office memorandum.
- Enter the amount of the overpayment to the accounts receivable.
- Authorize and recover the overpayment in the usual manner.

C. **When SS Benefits Are Involved** - When Treasury reports that a payee cashed both his original and replacement RR/SS BEN check, recover the RR portion of
the overpayment according to the applicable instructions described above in sections A or B (do not apply tolerance to the RR amount if the amount is at/below the tolerance rate) and prepare and release Form RR-3pc to the SSA Program Service Center that has jurisdiction of the SSA claim number (see RCM 10.5). File a copy of the RR-3pc in the folder.

Set a 90 day call-up for a reply from SSA. If no reply to the RR-3pc has been received when the call-up expires, release a second RR-3pc to the program service center.

D. **Processing Returned G-66's** - Form G-66 is an enclosure with the code letter 1855 overpayment notice. Process the returned G-66's in the following manner:

1. **Review of the Facts** - In reviewing the facts, consider as evidence the photocopies of the paid checks, provided by Treasury. Also consider the fact that the payee either neglected to complete the claim form or that Treasury determined that the annuitant signed both checks. If the claim form is not completed and returned to RRB until this time, send it to Treasury according to section 9.6.32.

2. **Waiver Consideration** - In considering waiver, keep in mind that since Treasury determined that the annuitant signed both checks, the annuitant is considered to be at fault. The photocopies of the paid checks serve as evidence of this. If the claim form is not completed and returned to RRB until the waiver consideration was requested, route the completed claim form to Treasury according to section 9.6.32.

3. **Personal Conference** - Be sure that the evidence presented at the personal conference includes the photocopies of the paid checks provided by Treasury. If after viewing the photocopies, the payee disputes the fact that he signed both checks, the payee must complete the claim forms to be referred back to Treasury for resolution of the disagreement.

   **NOTE:** If the check is more than a year old and the payee denies negotiating the check, the payee must complete the claim form. Forward the completed claim form and photocopies to RRA PAS for further handling.

E. **Original Check Endorsed Prior to Being Lost or Stolen** - If the check was endorsed by the claimant prior to being lost or stolen, the beneficiary is liable for the amount of the check. If the original check, and the replacement check are both cashed, the beneficiary is liable for the amount of the overpayment since the original check bears the genuine endorsement of the payee.
9.6.55 Payment Made Over Cancellation

After a payment has been cancelled and credit passed to the agency, it is possible that the check will be subsequently presented for payment. If a check does come in for payment after a cancellation, Treasury will honor the check and reverse the cancellation. They will debit the RRB account, send notice via TRACS and send a photocopy of the check. Take the following actions:

A. RRB Must Recover the Overpayment - Treasury will use one of the following status messages when they expect RRB to recover the amount of an overpayment caused by payment of a check over cancellation. PSU will send the credit/charge folder notice, photocopies and claim form to the appropriate unit for handling, after determining that an overpayment exists, as explained below.

1. PAYMENT-OVER-CANCELLATION-REVERSAL OF PREVIOUS AGENCY CREDIT TO RFC BY SF-215; PHOTOCOPY AND CLAIM ATTACHED - Treasury will use this message when the original request was prepared using any of the following reason codes:

   • A - Entitlement - RRB Recertified Before Status
   • B - Entitlement - Issue Courtesy Disbursement Before Status
   • C - Entitlement - Issue Courtesy Disbursement After Status
   • D - Entitlement - RRB will Recertify After Status
   • F - Non-Entitlement
   • S - Agency Match - Non-Entitlement
   • U - Legal Incapacitation

   a. Non-Receipt Claims - Reason Codes A, B, C or D - When Treasury reverses a cancellation credit previously forwarded to the RRB in response to a non-receipt claim, the status of the replacement check must be determined. File the Claims Document package (pages 1 through 4 and photocopy) in the claim folder, and check the folder and the cancelled check listings to determine if the replacement check was returned.

      • If the replacement check was returned, notate the Claims Document accordingly and take no further action.

      • If the replacement check was issued by RRB (see RCM 9.6.56), and there is no record that the replacement check has been
returned, prepare Form G-333 or FAST-PI transaction, reason code F, for the replacement check.

Note: If this reversal is received before RRB released a replacement check, the previous cancellation credit balances this charge. Clear the open accounts receivable amount using action out code 88A and send the case to claim files.

• If the replacement check was issued by Treasury (reason codes B or C), and there is no record that the replacement check has been returned, enter a FAST-Payment Investigation transaction, reason code F, according to RCM 9.7.82. Enter a 9 in the PAYMENT TYPE field, and the replacement check number in the FIRST CHECK NO field. The replacement check number is listed as the NEW SERIAL NUMBER on the COURTESY DISBURSEMENT TIE FILE INQUIRY printout attached to the claims document package.

• Enter the amount of the payment to accounts receivable and control the case for Treasury’s response.

• If Treasury finds that the replacement check is outstanding (uncashed) the payment will be cancelled and credit forwarded to RRB on the cancelled check tape (Code 90). When the Notice of Cancelled Check (green sheet) is matched to the folder, modify the open accounts receivable balance (see RCM 9.10 for PAR instructions). No further action is necessary.

• If Treasury finds that the replacement check is paid (cashed) a Claims Document package will be forwarded to the RRB. When the package is matched to the file, prepare code letter 1855 and a memorandum, to the appropriate field office, modeled after Exhibit 16. Show the name and phone number of the field office on the letter. Attach the Claims Document packages and photocopies of original and replacement checks, along with a copy of the overpayment letter, to the field office memorandum. Authorize and recover the overpayment in the usual manner.

Exception: When the annuitant is residing in a foreign country, modify code letter 1855 and release the claim forms and photocopies with the letter.

b. Reclamation - Reason Codes F, S, or U - When Treasury reverses a cancellation credit previously forwarded to the RRB in response to a reclamation action (reason codes F, S, or U), forward the claim form (pages 3 and 4) and photocopy to the payee according to RCM 9.6.31 and take the following action:
• If the payee completes the claim form, refer to RCM 9.6.32 for further instructions.

• If the tickler call-up expires and the claim form has not been returned, the overpayment must be recovered from the annuitant by full withholding. Due process must be given. Prepare and release an overpayment letter based upon code letter 1855.

If there is no source of recovery, refer the case to DRD for a decision on write-off to uncollectible.

2. PAYMENT-OVER-CANCELLATION-REVERSAL OF PREVIOUS AGENCY CREDIT TO RFC BY SF-215. PHOTOCOPY AND CLAIM ATTACHED; ENDORSEMENT MAY PROHIBIT CLAIM ACTION - Treasury will only use this message when the original request was coded "G-lost/stolen-endorsed." If it was not done, enter the amount of the charge to accounts receivable. The examiner should release the claim form and photocopies to the payee according to section 9.6.31. If the payee completes the claim form, refer to section 9.6.32 for further instruction. If the tickler call-up expires and the claim form has not been returned, the overpayment must be recovered from the annuitant by full withholding. Due process must be given. The examiner should prepare and release an overpayment letter based upon code letter 1855. If the RRB issued the replacement check, change the reference to a Treasury issued substitute check.

Note: If this reversal is received before RRB released a replacement check, the previous cancellation credit balances this charge. Clear the open accounts receivable amount using action out code 88A and send the case to claim files.

If the payee is no longer entitled and there is no source of recovery, refer the case to DRD for a decision on write-off to uncollectible.

3. THIRD PAYMENT AGAINST CHECK; CHARGE TO AGENCY WITH PHOTOCOPIES AND CLAIM ATTACHED. PREVIOUS AGENCY REVERSAL TO RFC BY SF-215 - Treasury will use the message when:

• The RRB sent a request code "C-entitlement-issue-Courtesy Disbursement after status" to trace a previous "B-entitlement-issue Courtesy Disbursement before status" or "C-entitlement-issue Courtesy Disbursement after status" requests; and

• Treasury sent credit for the check because the original and replacement checks were not paid when the non-receipt request for the replacement check was processed; and
• Both the original and the replacement checks have been cashed.

Treasury considers the three payments to be: the original check, the replacement check and the cancellation credit. The payee is only overpaid twice and if the cancellation credit was never used to issue a replacement check or reduce an overpayment, only one check must be recovered from the payee.

When the Credit/Charge folder notice is matched to the claim file, the examiner should enter the amount of the charge to accounts receivable. There should be a previous Automated Stop Payment Credit/Charge folder notice in file showing either "PAYMENT-OVER-CANCELLATION-REVERSAL OF PREVIOUS AGENCY CREDIT TO RFC BY SF-215; PHOTOCOPY AND CLAIM ATTACHED" or "BOTH CHECKS PAID-CHARGE TO AGENCY; PHOTOCOPIES AND CLAIMS ATTACHED." Check the status of the overpayment recovery on the previous charge.

a. **Recovery Is Complete** - If recovery of the previous overpayment is complete, release the new claim form and photocopies to the payee according to section 9.6.54B. If the tickler call-up expires and the claim form has not been returned, the overpayment must be recovered from the annuitant by full withholding.

b. **First Overpayment Notice Never Released** - If the overpayment letter for the first Treasury charge was never released, release the new claim form and photocopies to the payee according to section 9.6.54B before continuing to recover the first overpayment. If the tickler call-up expires and the claim form has not been returned, the entire overpayment must be recovered from the annuitant by full withholding.

c. **Overpayment Letter Released - No Recovery** - If the overpayment letter for the first Treasury charge was released but the recovery has not begun, prepare a new overpayment letter based upon code letter 1855 and describing both payments. Release the letter according to RCM 9.6.54B. If the tickler call-up expires and the claim form has not been returned, the entire overpayment must be recovered from the annuitant by full withholding.

Note: If this third payment charge is received before RRB released a replacement check and the cancellation credit was never used to reduce an overpayment, the cancellation credit can be used to recover this charge. Clear the open accounts receivable using action out code 88A. If there is any doubt, refer the case to RRA PAS.
If the payee is no longer entitled and there is no source of recovery, refer the case to DRD for a decision on write-off to uncollectible.

B. **Treasury Will Attempt Recovery** - When the original request was coded either "E-deceased" or "T-agency match-deceased", Treasury will use the photocopies to seek recovery of the overpayment through the banking system. Treasury will send the status message, "PAYMENT-OVER-CANCELLATION-REVERSAL OF PREVIOUS AGENCY CREDIT TO RFC BY SF-215; PHOTOCOPY USED FOR CCG RECLAMATION ON DECEASED STOP." PSU will send the Credit/Charge folder notice to the appropriate unit for handling.

If it was not done, enter the amount of the charge to accounts receivable. Set a six month tickler call-up (16-09) and handle the case like a regular reclamation. If Treasury is successful in recovering the money, credit will be sent to the RRB with the regular reclamation credits via TRACS.

### 9.6.56 RRB Issued Replacement Checks

There are instances where Treasury will not issue a replacement check even if the payee is entitled and check status is unpaid in their system.

A. Requests coded "A-entitlement - agency recertified before status" "D-entitlement - agency will recertify after status", "G-lost/stolen-endorsed" and in certain instances "C-Entitlement - issue Courtesy Disbursement after status" - If Treasury is unable, for any reason, to process a reason code "C" entitlement (non-receipt) claim within 4 business days, the reason code will be converted to "D - entitlement-agency will Recertify After Status". When this is the case, Treasury will transfer credit to RRB on the cancelled check tape if the original payment is determined to be outstanding (uncashed).

If an Automated Stop Payment Credit/Charge folder notice showing "OUTSTANDING-CHECK CANCELLED; AGENCY CREDIT TO FOLLOW", or a Non-Receipt Claim Credit notice showing Cause Code 99 is matched to the file, the RRB may have to release a replacement check to the payee. Determine if the payee is entitled to the proceeds of the cancelled check. If so, prepare an OPO award for the replacement check. Treat the payment as a non-taxable amount. If the credit includes a supp amount, prepare a separate award to transfer the supp amount, paid out in the OPO, back to the RR fund. In the remarks section of the award form show "REPLACES CHECK DATED (date of the original check)."

Prepare an ALTA letter to the payee explaining the replacement check and warning the payee not to cash both the original and replacement checks.

Note: If an inquiry is received on a non-receipt claim, check the status of the claim on the "Non-Receipt Claims/Cancellation Requests" listing or PI STATUS. If the status message shows "OUTSTANDING-CHECK CANCELLED; AGENCY CREDIT TO FOLLOW", release a replacement payment according to the above
guidelines. Control the case until the Non-Receipt Claim Credit notice - Cause Code 99 (green sheet) is matched to the folder.

B. Limited Payability Applies - Public Law 100-86 limits the negotiability of U.S. Government checks to a one year period from the check issue date. In cases where a check is cancelled due to limited payability, the issuing agency will reissue the check.

If a Limited Payability Cancellation Notice (green sheet) showing Cause Code 40 is matched to the file or if the PI STATUS message shows "LIMITED PAYABILITY CANCELLATION", determine if the payee is entitled to the proceeds of the cancelled check. If so, prepare an OPO award for the replacement check. Treat the payment as a non-taxable amount including the supp amount, if any. If the credit includes a social security benefit amount, pay the social security amount on SOLAR. In the remarks section of the award show "Code 40-Replaces Check Dated (date of the original check)." Prepare an ALTA letter. Explain to the annuitant that the check must be cashed within a year.

NOTE: Remember to access the Limited Payability Funds Transfer Program so that notification can be sent to BFO.

9.6.57 Tracing Stop Payments

If acknowledgement of a stop payment request is not received from the Chicago Financial Center within thirty days, the Automated Stop Payment system will mechanically generate a duplicate request. The status message will be changed to show "SENT TO TREASURY - SECOND REQUEST."

A. Non-receipt Claims

1. Check Case - When the original request was coded for Treasury to release a replacement check (reason code either "B" or "C"), refer to section 9.6.51 if the payee claims non-receipt of the replacement check. If the payee reports that he never received any reply to his non-receipt claim, check PI STATUS or the Status of Non-Receipt Claims/Cancellation Requests listing. If Treasury fails to advise the RRB of the payment status of the original check for any non-receipt claim ("B"-entitlement-issue Courtesy Disbursement before status" or "G-lost/stolen endorsed") and at least 30 days have elapsed since the processing date (PROC DT), a "NON RECEIPT FOLLOW UP NEEDED" referral will be produced. Refer to file to RRA PAS.

Note: If the status message on either the Payment Investigation Referral, the Status of Non-Receipt Claims/Cancellation Requests list or PI STATUS shows "DUPLICATE STOP", the payment services unit (PSU) should follow up by releasing Form FMS-3864, Agency Recertification follow up.
2. **DD/EFT Payment** - When the original request was coded for Treasury to investigate non-receipt of a DD/EFT payment (reason code either "B" or "C"), the Chicago Financial Center (CFC) will release a DD/EFT payment tracer form, FMS-150 to the financial organization. When Treasury and the financial organization resolve the non-receipt issue, the financial organization will send a copy of the complete FMS-150 to the payee. If the payee reports that he has not received either a credit to his account or a copy of the FMS-150, check the Status of Non-Receipt Claims/Cancellation Requests listing or PI STATUS. If the message shown is "EFT PAYMENT TRACED" and at least 45 days have elapsed since the processing date (PROC DT), release a second G-333 or FAST transaction coded with the original reason code. Treasury will process a follow up request with the financial organization. If the payee reports no response to the follow up, PSU should phone the Claims Branch at the Chicago Financial Center to secure status on the case.

Note: If the payment trace number on the second non-receipt claim is different from the payment trace number on the first request, CFC will not have processed a follow up. If the payment numbers are different, do not phone CFC, release another G-333 or FAST transaction to generate follow up action.

**B. Reclamation Requests**

1. **Check Case** - When the six month call-up expires for cases in which reclamation has been requested and Treasury has still not credited the RR account with the amount of the check, release an RL-78 to Treasury requesting the status of the credit. Show the processing date (PROC DT) from the status list or folder record or PI STATUS for the "date of referral." Establish a new call-up for 60 days. When the call-up for tracing the RL-78 expires and Treasury still has not credited the RR account, release Form FMS-3864 and establish a 90 day call-up. If no reply is received from the FMS-3864, refer the case to RRA PAS.

Note: If the status message on either the Payment Investigation Referral, the Status of Non-Receipt Claims/Cancellation Requests list or PI STATUS shows "DUPLICATE STOP," the payment services unit (PSU) should follow up by releasing form FMS-3864, Agency Recertification follow-up. Do not release an RL-78 in "DUPLICATE STOP" cases.

2. **DD/EFT Payment** - When the six-month call-up expires for cases in which reclamation of a DD/EFT payment has been requested and Form FMS-133 has not been received, the payment services group (PSU) will trace by releasing Form Letter RL-78a to the Treasury Chicago Financial Center. Show the processing date (PROC DT) from the status list, folder record or PI STATUS for the "date of referral." Establish a call-up for sixty days from the current date. If a reply is not received to the RL-78a within
the sixty days, send an RL-78a with the "second tracer" box checked. If no reply to the second RL-78a is received from Treasury, refer the case to the Supervisor, Payment Services Unit to trace with the Chicago Financial Center by phone.

Appendices

Appendix A - G-333

Form G-333 is obsolete. Use the FAST-Payment Investigation Entry (PIENTRY) system to initiate non-receipt claims and reclamation, photocopy, and status requests. Refer to RCM 9.7 for PIENTRY instructions.

Appendix B - Department of the Treasury Telephone Contacts - Check Claims Branch

The Department of the Treasury has furnished the Railroad Retirement Board with contact information for the Check Claims Branch:

Telephone: (855) 868-0151

E-mail: check.claims@fms.treas.gov

As a reminder, Treasury records are maintained based on the check symbol and check serial number. This information must be provided when making an inquiry. The check symbol/check serial number can be found on PISTATUS, PACER, the Credit/Charge Folder Notice, the FMS-3858 Claims Document Package, or on the check itself. Contact the Direct Deposit Specialist if you need assistance obtaining this information.

Appendix C - FMS-3864 Instructions

FMS-3864 - (Prepare an original and two copies)

Use

Form FMS-3864 is to be used for trace and follow-up actions with the Department of the Treasury (Treasury) on stop requests or inquiries on paper checks.

IMPORTANT: Treasury requires that agencies use the original, carbonized, multi-page form. Do not use photocopied forms. Treasury will return any follow-up requests that are made on photocopied forms. If additional forms are needed, notify the Planning and Budget Unit (PBU) in the Administrative Operations Section to order the forms from Treasury.

The FMS-3864 is divided into three parts; parts A, B, and C.
PART A: STOP REQUEST INFORMATION - Provides the identifying information of the check in question.

PART B: AGENCY REASON FOR FOLLOW-UP - The reason you are tracing with Treasury. Mark the appropriate box. Use item 11 - Other, if the choices provided does not cover your particular follow-up situation.

PART C: RESPONSE TO AGENCY - Treasury will complete this section when responding to your followup request.

**Disposition**

The original and one copy is to be mailed to Treasury. The address is located in the bottom left hand corner of the form. The remaining copy is to be filed in the claim folder. Establish a 90 day call-up for Treasury's response.

**Appendix D - Limited Payability Cancellation Reversals Program Instructions**

**Use**

To notify the Bureau of Fiscal Operations (BFO) when checks issued 10/1/89 and later have been cancelled due to Limited Payability and, the checks have been reissued, used to offset an overpayment, or there is no entitlement to the checks.

A. Establishing Report in User Follow-up--Before you can forward limited payability cancellation information to BFO, the report screen must be established in the user FOLLOWUP MENU.

Step 1. Enter the Railroad Automated Processing Integrated Database (RRAPID) using normal sign on and password procedures. From the RRAPID menu, select HSL (H) and press ENTER.

Step 2. The message "YOU HAVE NEW MAIL" will appear in the lower left hand corner of your screen. From the HSL menu, select MAIL. The Mail Menu will appear.

Step 3. From the mail menu, select 8, RECEIVE MAIL. The incoming Mail Menu will appear.

Step 4. The cursor will automatically position itself at the ENTER CODE field. From the list, type the numeric code associated with the topic "LIMITED PAY CANCELLATION REVERSALS". Press ENTER.

Step 5. From the options list at the bottom of the screen, type in M (MODIFY) and press ENTER.

Step 6. The cursor will reposition itself at the top of screen. Tab down to the options list and type in S (SEND) and press ENTER. The Send Letter screen will appear.
Step 7. Type in the number "1" on the line that reads "SELECT OPTION TO CHOOSE RECEIVERS" and press ENTER. This action will send the report to your followup menu. To exit the system, press the corresponding numeric code for LOGOFF and press ENTER.

B. Entering and Sending Data to BFO--Once the report has been properly forwarded to the FOLLOWUP MENU, you can begin entering and sending data to BFO.

Step 1. From the FOLLOWUP MENU, select "LIMITED PAY CANCELLATION REVERSALS".

Step 2. From the options list at the bottom of the screen, type M (MODIFY). Press ENTER.

Step 3. Type in the beneficiary's name and railroad claim number. If the check involves a social security (SS) benefit amount, type in the SS claim number and BIC code.

Step 4. If the check was reissued to the same payee, list the amount of the check under "Entitled Payments" by its components; i.e., Tier 1, Tier 2, VDB, etc.

If: (1) the payee is not entitled to the check, (2) the check is being paid as an accrued annuity, or (3) the check was used to offset an overpayment, list the amount of the check under "Non-Entitled Payments" by its components; i.e., Tier 1, Tier 2, VDB, etc.

NOTE: If SMIB premiums were deducted from the annuity at the time the check was issued, the returned check will be net of SMIB. Unless SMIB was being deducted from the SS benefit, for the purpose of the transfer, the SMIB amount is to be deducted from the Tier 1 benefits. If the SMIB amount is greater than Tier 1, the balance of the SMIB amount is to be subtracted from the Tier 2 and if necessary, from the VDB.

Tax withholding amounts, if any, are to be deducted from the component from which it was withheld.

Step 5. If the check does not include an SS benefit amount, proceed to Step 8. If the check includes an SS benefit amount, press ENTER to page to the next screen.

Step 6. Enter the check number and check date of each check that includes an SS benefit amount.

Step 7. Place an "X" on the line by the SSA Program Service Center (PSC) having jurisdiction over the social security benefit. This information can be found in the claim folder or, refer to RCM 10.6 for a listing of the PSCs by social security numbers.
Step 8. After all entries have been made, TAB to the options list and type S (SEND). Press ENTER. The Send Letter screen will appear.

Step 9. Type in "A LPC REVERSALS" on the line that reads "OR ENTER NAME TO SEND TO ONE PERSON". Press ENTER. The message "LETTER HAS BEEN SENT" will appear in the bottom left hand corner of the screen.

Step 10. To exit, press the up arrow key once, type in the number 1, and press ENTER. The FOLLOWUP MENU will appear. The cursor will position itself at the ENTER CODE field. To exit the system, type the corresponding numeric code for LOGOFF and press ENTER.

NEXT PAGE: 2
9.7.5 FAST

A. FAST Is an Input Option

The FAST (Field-Address-Suspension-Termination) System accepts change of address (COA), suspension/termination (S/T), and payment investigations (PI) of non-receipt/reclamation/photocopy/status requests, by both headquarters and field personnel. The FAST system can be used in place of input forms G-607, G-96, and SF-1199a. The input forms must be used for transactions which FAST cannot process.

B. FAST Is a RRAPID Database System

FAST is a RRAPID database system that usually interacts with DATA-Q. FAST automatically extracts much of the data required for a transaction from the beneficiary’s DATA-Q record. The required remaining data is input via input entry screens. However FAST-PI, under certain circumstances, does allow for direct entry outside of DATA-Q.

C. FAST Prevents Most Errors

Transactions entered through FAST are edited after data has been entered. Transactions are not taken into the database until the data entered by the user has cleared all edits. Errors are identified through error messages displayed on input entry screens. Most errors can be corrected immediately and, thus, most system rejects are prevented.

D. FAST Transactions Create Database Records

All accepted FAST transactions create records, which are stored on a database until they are batched and processed through:

- the DAISY system for change of address and suspension/termination; and,
- the Automated Stop Payment system for non-receipt claims, reclamations, or photocopy and status requests.

All FAST transactions are tracked for purposes of security.

E. Pending FAST Transactions Can Be Viewed and Corrected or Deleted

Pending FAST transactions can be viewed and corrected or deleted, if necessary. Once DAISY or the Automated Stop Payment system processes a FAST transaction, it can no longer be viewed on FAST.

F. Accessing FAST
FAST was developed with a link to DATA-Q. This means FAST can be accessed after you have successfully signed on to DATA-Q and selected the proper beneficiary record that requires action. It is important to make certain that the proper beneficiary has been selected before accessing the particular FAST activity.

- Sign on to DATA-Q in the usual manner;
- Select the proper beneficiary; and,
- Select the appropriate FAST input screen by pressing one of the following PF keys:
  - PF 7 - Suspension/Termination
  - PF 8 - Change of Address/REP Payee
  - PF 9 - Non-receipt Claim
  - PF10 - Direct Deposit/Change of Address

### 9.7.10 FAST Suspensions and Terminations

The FAST (Field-Address-Suspension-Termination) system is used to enter suspension or termination transactions through the CRT terminal instead of submitting Form G-96. The on-line suspension/termination system does not obsolete Form G-96. Form G-96 must be used only when entry on FAST-S/T is not possible, e.g., terminating constructive awards.

### 9.7.11 How FAST Processes Suspension/Termination Transactions

When a suspension/termination action is processed through FAST, the user:

- calls up the DATA-Q record of the annuitant or beneficiary whose payment is to be suspended or terminated;
- by pressing the PF-7 key, accesses the suspension/termination input entry screen;
- enters the required information (suspension/termination reason code, effective date, and letter code, if applicable); and
- responds to edit messages, if necessary, until the data is accepted by the system.

The FAST System:

- edits the information entered by the user for consistency;
• When acceptable data has been entered, creates a transaction consisting of the
data entered by the user and data that it extracts from DATA-Q (prefix and claim
number, payee code, date of birth, and payment rate);

• stores the transaction on the database; and

• selects the transaction at the appropriate time for processing through DAISY.

If the transaction processes successfully through DAISY, DATA-Q is updated for the
suspension or termination. If the transaction rejects in DAISY, a reject referral is
produced and the suspension/termination must be processed again.

9.7.12 Viewing the Fast Suspension/Termination Entry Screen

Any employee who has access to DATA-Q may view the FAST suspension/termination
entry screen to determine if an on-line suspension or termination transaction is pending.
To view the suspension/termination data entry screen, first locate the record of the
annuitant on DATA-Q whose payment is to be stopped. Then press the PF-7 key. The
suspension/termination entry screen will appear. If a suspension/termination
transaction is pending on the FAST database, the screen will display the data entered to
create that transaction.

9.7.13 Who Can Input FAST Suspension/Termination Transactions

Headquarters and field personnel who have responsibilities for taking suspension and
termination actions have security clearance to input FAST Suspension/Termination
activities. One must have security clearance access to DATA-Q in order to use FAST-
Suspension/Termination. However, a separate security table is maintained which
authorizes users to input data into FAST-S/T. If one does not have clearance to input
FAST-Suspension/Termination activity, the screen will display the following message:

** NO PENDING FAST-S/T TRANSACTION - INPUT NOT AUTHORIZED **

A FAST-S/T security table is maintained within the FAST system to control access to
suspension and termination codes. FAST-S/T users at headquarters are authorized to
input all suspension and termination codes available for use on Form G-96, with certain
restrictions. FAST-S/T users in the field are restricted to use of certain codes. The
access levels are detailed in 9.7.14.

9.7.14 Types of Suspensions and Terminations that can be Processed
on FAST

When FAST-Suspension/Termination was implemented in August 1987, only a limited
number of suspension and termination codes could be entered on FAST. Effective
March 1, 1990, FAST-S/T may be used to process any of the suspension and
termination codes used on Form G-96. FAST-S/T users in headquarters and the field have separate levels of access to the codes available on the system.

FAST-S/T users at headquarters are authorized to input all suspension and termination codes available for use on Form G-96, with certain restrictions. Field users have access only to certain codes.

A mechanical program, the FAST-MAP/SURVEA load, is run on a monthly basis to add suspension/termination records from the retirement (MAP) and survivor (SURVEA) monthly attainment programs to the FAST-S/T database. These transactions can be recognized by the USER SIGNON name `MAP' or `SURVEA' and the UNIT ID that is equal to the month and year of the MAP/SURVEA run (i.e., 0393).

Suspension and Termination Codes Available to Field Users

FAST-S/T users in the field have access to a limited group of the suspension and termination codes available on FAST-S/T. When the reason for termination is death, the FAST system will continue to automatically terminate the railroad annuity, supplemental annuity, and social security benefit, if any. For reasons other than death, field users may only use FAST-S/T to suspend or terminate the railroad annuity and supplemental annuity, if any. Social Security benefits may not be suspended or terminated, for a reason other than death, by a field user.

FAST-S/T users in the field may use only the following suspension and termination codes:

1. **Termination codes**
   - **Employee**
     - 01 - Employee died
     - 08 Employee disability annuitant recovered
     - 20 RR disability annuitant returned to substantial gainful employment (Medicare continues)
   - **Spouse**
     - 51 - Spouse died
     - 53 - Spouse no longer has child in care
     - 57 - Spouse divorced
       - Divorced Spouse remarries
   - **Survivor**
20  RR disability annuitant returned to substantial gainful employment  
(Medicare continues)

41 - Survivor died

44 - Child remarried or adopted
  - Widow(er) or parent remarried

45 - Widow does not have entitled child in care or child in care attains age 18

47 - Student ceased full-time attendance

All Payees

61 - Application or award cancelled

2. Suspension codes

Employee

02 - Employee returned to employer service

09  Employee disabled annuitant earned over the monthly amount in the current year (example: if 2016 is the current year, the monthly amount is $880 and if disabled employee annuitant earns over $880 then suspend using code 09). Refer to the chart in FOM 1 1125.5.2 for the current year’s monthly amount.

63 - Employee annuity suspended for representative payee development; also deletes direct deposit, if present.

Spouse

52 - Spouse in employer service

64 - Spouse annuity suspended for representative payee development; also deletes direct deposit, if present.

Survivor

11 - Survivor in employer service

12 - Survivor under age 70 excess earnings

65 - Survivor annuity suspended for representative payee development; also deletes direct deposit, if present.

All Payees
76 – Investigation Abandoned

Suspension and Termination Codes Available to Headquarters Users

Effective February 15, 1990, FAST-S/T users at headquarters have access to all suspension and termination codes available for use on Form G-96, with certain restrictions. Use of code 62 (Deletion of CHICO master record) and code 66 (Suspend annuity to recover overpayment) is restricted to headquarters personnel having responsibility for those functions.

If an annuitant is receiving an employee annuity and a supplemental annuity, a RR suspension or termination will suspend or terminate both annuities. However, if an annuitant is receiving any other combination of two regular monthly RR annuities (e.g., an employee annuity and a widow's annuity), access each DATA-Q record to enter suspension or termination transactions on each annuity.

If suspension or termination action is required on an SS benefit being paid by RRB, (in other than death cases and when requested by SSA), refer the case to the on-site representative.

FAST-S/T users at headquarters may use the following suspension and termination codes:

1. **RR Termination codes**

   **Employee**
   - 01 - Employee died
   - 08 - Employee disability annuitant recovered
   - 20 - RR disability annuitant returned to substantial gainful employment (Medicare continues)

   **Spouse**
   - 51 - Spouse died
   - 53 - Spouse no longer has child in care
   - 55 - Spouse entitled to greater benefit (remarried widow)
   - 57 - Spouse divorced
     - Divorced spouse remarried
   - 59 - Spouse termination - EE's benefit terminated

   **Survivor**
20 - RR disability annuitant returned to substantial gainful employment (Medicare continues)

41 - Survivor died

42 - Survivor child attained age 18
   - Survivor disabled child recovered
   - Survivor student attained age 19
   - Survivor disabled widow recovered

44 - Child remarried or adopted
   - Widow or parent remarried

45 - Widow does not have entitled child in care or child in care attains age 18

46 - Survivor entitled to equal or greater benefit

47 - Student ceased FTA

All payees

61 - Application or award cancelled

62 - Deletion of CHICO master record

2. **SS Termination codes**

**SS only**

03 - Attainment of age 18 or 22 and not disabled - LAF T4 - BIC C
   - Mother term. last child 16 - LAF T4 - BIC other than C

08 - Beneficiary no longer disabled - LAF T8

10 - Entitled to different benefit - LAF T5, AD

13 - Withdrawn or cancelled claim - LAF TR, T+

14 - Student ceased FTA - LAF T6 - BIC C
   - Mother term. No child in care - LAF T6 - BIC other than C

15 - Marriage, divorce, remarriage - LAF T3
17 - Primary benefit terminated - LAF T2
21 - RRB no longer has certification
25 - Other - LAF T9, TP, or T0

3. RR or SS Termination codes

   Employee
   01 - Employee died
   Spouse
   51 - Spouse died
   Survivor
   41 - Survivor died

   All payees
   18 - Garnishment case - terminate third-party payment
   62 - Deletion of CHICO master record

4. RR Suspension codes

   Employee
   02 - Employee returned to employer service
   06 - Employee-other
   09 - Employee disabled annuitant earned over the current monthly disability earnings limit in a month
   63 - Suspend employee annuity and delete direct deposit
   Spouse
   52 - Spouse in employer service
   56 - Spouse-other
   58 - Spouse employee benefit suspended
   64 - Suspend spouse annuity and delete direct deposit
Survivor

11 - Survivor in employer service

12 - Survivor under age 70 excess earnings

16 - Survivor payee not determined
   - Survivor withdrawn for investigation
   - Survivor-other

65 - Suspend survivor annuity and delete direct deposit

All payees

54 - Annuity reduced to zero
   - Annuity waived

66 - Suspend annuity to recover overpayment

67 - Suspend to apply garnishment

76 – Investigation Abandoned

5. SS Suspension codes

SS only

26 - Work and earnings - LAF S2
   - Foreign work and earnings - LAF S1

27 - SS primary benefit suspended - LAF S3, S5

28 - Rep payee not determined - LAF S8

30 - Suspend for investigation - LAF S4

31 - Better address required - LAF S6

50 - Young mother - no child in care - LAF S4
   - Other - LAF S7, S9, SD, SF, SH, SJ, SK, SL, SM, SP, SW

SS Suspensions - Deferred status

71 - Work and earnings - LAF D2
- Foreign work and earnings - LAF D1
72 - Aux. ben. withheld due to primary's wk. & earnings - LAF D3
- Aux. ben. w/h - primary foreign work & earnings - LAF D5
73 - Recovery of erroneous payment - LAF D6
75 - Young mother - no child in care - LAF D4
- Receipt of Public Assistance - LAF DP
- Receipt of Workman's Compensation - LAF DW
- Deferred-other - LAF D9

6. **RR or SS Suspension codes**
   All payees
66 - Suspend annuity to recover overpayment
67 - Suspend to apply garnishment

**9.7.15 The Function Of The FAST Suspension/Termination Effective Date**

FAST suspension/termination transactions require entry of a suspension/termination effective date. The effective date is the first month for which an annuity is not due (not the date of the payment to be stopped). For example, if an employee died on September 2, 1987, 09-02-1987 is entered as the termination effective date, since no annuity is due for the month of September. The effective date is the first month in which entitlement is lost or a suspension event occurs. However, when suspending to develop for a representative payee, the effective date is the month, day, and year in which the RRB became aware of the need to start development action.

The system will accept an effective date that is up to three months after the current month (e.g., in August, it will accept an effective date as late as November). A future effective date may be entered in the following situations:

- employee returns to employer or last person service,
- spouse no longer has child in his/her care, or
- student ceases full-time attendance.

The FAST system determines when to remove the transaction from the database for processing through DAISY based on the effective date. If the effective date is later than
the current month the transaction remains on the database until the end of the month before the effective month. Then the transaction is processed through DAISY so that it stops the appropriate payment.

NOTE: When the FAST transaction is processed through DAISY/CHICO, the “day” field of the effective date is not displayed on DATAQ, only the month and the year is displayed.

9.7.16 Determining Which Payment Will Be Suspended Or Terminated

Which month's payment is suspended or terminated by the FAST transaction depends on the suspension/termination effective date entered and whether the transaction is entered before or after FAST suspension/termination cut-off. The FAST system selects transactions for processing through DAISY based on the suspension/termination effective date.

A. Suspension/Termination Effective Date Is In The Current Month Or Earlier

Transaction is entered before the FAST suspension/termination cut-off: the next monthly payment is stopped.

Example: A suspension transaction with a 09-87 or earlier effective date is entered on 09-02-1987. Payment for the month of September is stopped (10-1 check or EFT payment).

Transaction is entered after FAST cut-off through the end of the month; the payment after the next monthly payment is stopped.

Example: A suspension transaction with a 09-87 or earlier effective date is entered on 09-20-1987. Payment for the month of October is stopped (the 11-1 check or EFT payment).

B. Suspension/Termination Effective Date Is Later Than The Current Month

The payment that would have been due for the effective month of suspension/termination will be stopped.

Example: A suspension transaction with an 11-01-1987 effective date is entered in October. Payment for the month of November will be stopped (12-1 check or EFT payment).

9.7.17 FAST Letters

FAST-S/T can be instructed to release mechanical notices of suspension or termination to the annuitant/beneficiary. FAST letters should be released only when the RR annuity or SS benefit will be reinstated in the month of suspension, or when making a timely termination (i.e., payment for the effective month of termination is stopped). If
termination is not timely, a FAST letter should not be released and a special overpayment and/or adjustment letter must be prepared.

Following are tables listing RR and SS code letters as they correspond to the suspension and termination codes. Following the tables, the text of each code letter is shown, as well as, instructions as to when the letter should be released. Before releasing any letter, be sure to review the instructions and the text of the letter.

### RR Suspension Code Letters

- **A.** When payments will be reinstated in the month of suspension, an entry in the code letter field of the FAST-S/T entry screen will generate a computer-printed RL-176 which will be released to the annuitant. RR suspension letters are detailed below:

#### Code Letters 151 and 169

A copy of the letter will be sent to the appropriate field office. The standard text of the letters is as follows:

**YOUR MONTHLY BENEFITS MUST BE ADJUSTED BECAUSE...**

**(INSERT)**

**THIS ADJUSTMENT MAY CAUSE A DELAY IN THE RECEIPT OF YOUR NEXT PAYMENT. HOWEVER, A PAYMENT WILL BE SENT TO YOU AT THE EARLIEST POSSIBLE DATE. SHOULD YOU HAVE ANY QUESTIONS REGARDING THIS ADJUSTMENT, CALL OR WRITE THE BOARD OFFICE NEAREST YOU. THERE IS AN OFFICE LOCATED AT (Address of field office).**

The first sentence of the letter will be completed as follows:

- **Code 151 - MEDICARE PREMIUMS WILL BE DEDUCTED FROM YOUR BENEFITS.**

- **Code 169 - YOUR EXPECTED EARNINGS FOR THIS YEAR WILL EXCEED THE EXEMPT AMOUNT.**

#### Code Letter 172

Use this code letter when suspending an annuity to begin or adjust garnishment withholding. A copy of the letter will be released to the appropriate field office.

**YOUR ANNUITY HAS BEEN SUSPENDED TO BEGIN OR ADJUST WITHHOLDING IN ACCORDANCE WITH A GARNISHMENT, ASSIGNMENT, OR COURT-ORDERED PROPERTY DIVISION.**

</table>
THIS MAY CAUSE A DELAY IN THE RECEIPT OF YOUR NEXT PAYMENT; HOWEVER, A PAYMENT WILL BE SENT TO YOU AT THE EARLIEST POSSIBLE DATE. SHOULD YOU HAVE ANY QUESTIONS REGARDING THIS ADJUSTMENT, CONTACT THE NEAREST RAILROAD RETIREMENT BOARD OFFICE. MOST RAILROAD RETIREMENT BOARD OFFICES ARE OPEN TO THE PUBLIC FROM 9:00 A.M. TO 3:00 P.M. MONDAY THROUGH FRIDAY. IF YOU COME IN PERSON, TAKE THIS NOTICE WITH YOU.

THERE IS AN OFFICE LOCATED AT (Address of field office).

Code Letter 173

Use this code letter when suspending to adjust the amount of the annuity payment being sent to the third-party payee in a garnishment case. A copy of this letter will not be released to the field office.

DUE TO A REDUCTION IN THE AMOUNT OF THE PAYMENT, THERE WILL BE A DELAY IN THE NEXT PAYMENT TO BE MADE IN CONNECTION WITH ENFORCEMENT OF LEGAL PROCESS FOR SUPPORT.

Code Letter 197

Use this code letter whenever suspending the RR portion only of a combined RR/SS payment, and that portion will be reinstated in the month of suspension. Be sure to include the reason for adjustment in the reinstatement award letter. The text of the letter is as follows:

YOUR MONTHLY RAILROAD RETIREMENT ANNUITY MUST BE ADJUSTED. THIS MAY CAUSE A DELAY IN THE RECEIPT OF THE RAILROAD RETIREMENT PORTION OF YOUR NEXT PAYMENT. THE SOCIAL SECURITY PORTION OF YOUR PAYMENT WILL BE RELEASED AS USUAL, WITHOUT DELAY. YOUR RAILROAD RETIREMENT PAYMENT AND AN EXPLANATION WILL BE FORWARDED TO YOU AT THE EARLIEST POSSIBLE DATE.

A copy is not sent to the servicing field office.

Code Letter 199

Use this code letter whenever suspending an RR only annuity, and the annuity will be reinstated in the month of suspension. Be sure to include the reason for adjustment in the reinstatement award letter. The text of the letter is as follows:

YOUR MONTHLY BENEFITS MUST BE ADJUSTED. THIS MAY CAUSE A DELAY IN THE RECEIPT OF YOUR NEXT PAYMENT. A PAYMENT AND AN EXPLANATION OF THE ADJUSTMENT WILL BE SENT AT THE EARLIEST POSSIBLE DATE.
A copy is not sent to the servicing field office.

B. SS Suspension Code Letters

Code Letter 198

Use this code letter when suspending the SS portion only of a combined RR-SS payment and that portion will be reinstated in the month of suspension. Be sure to include the reason for adjustment in the reinstatement award letter. The text of the letter is as follows:

YOUR MONTHLY SOCIAL SECURITY BENEFIT MUST BE ADJUSTED. THIS MAY CAUSE A DELAY IN THE RECEIPT OF THE SOCIAL SECURITY PORTION OF YOUR NEXT PAYMENT. THE RAILROAD RETIREMENT PORTION OF YOUR PAYMENT WILL BE SENT AS USUAL, WITHOUT DELAY. YOUR SOCIAL SECURITY PAYMENT AND AN EXPLANATION WILL BE SENT TO YOU AT THE EARLIEST POSSIBLE DATE.

A copy is not sent to the servicing field office.

SS Suspension Code Letters - (Continued) - Use the following code letters when suspending an RR certified SS benefit. A copy of the letter will be sent to the appropriate RRB field office. The code letter states:

THE SOCIAL SECURITY ADMINISTRATION HAS REQUESTED THE RAILROAD RETIREMENT BOARD TO SUSPEND YOUR BENEFITS (SEE REASONS LISTED BELOW)

IF YOU BELIEVE THAT THIS DETERMINATION IS NOT CORRECT, YOU MAY REQUEST THAT YOUR CLAIM BE RE-EXAMINED. IF YOU WANT THIS RECONSIDERATION, YOU MUST REQUEST IT NOT LATER THAN 60 DAYS FROM THE DATE YOU RECEIVE THIS NOTICE. YOU MAY MAKE YOUR REQUEST THROUGH ANY SOCIAL SECURITY OFFICE. IF ADDITIONAL EVIDENCE IS AVAILABLE, YOU SHOULD SUBMIT IT WITH YOUR REQUEST.

IF YOU HAVE ANY QUESTIONS ABOUT YOUR CLAIM, CONTACT THE NEAREST DISTRICT OFFICE OF THE SOCIAL SECURITY ADMINISTRATION. MOST QUESTIONS CAN BE HANDLED BY TELEPHONE OR MAIL. IF YOU VISIT AN OFFICE, HOWEVER, PLEASE BRING THIS NOTICE AND ALL OTHER MATERIAL YOU HAVE ABOUT YOUR CLAIM WITH YOU.

The first sentence of the letter will be completed as follows:

<table>
<thead>
<tr>
<th>LETTER</th>
<th>SUSP</th>
<th>SSA LAF</th>

370 30 S0 IF BIC=A) PENDING ADDITIONAL INFORMATION WHICH IS NEEDED TO DETERMINE WHETHER YOU ARE STILL DISABLED.

371 30 S0 (IF BIC=C) PENDING ADDITIONAL INFORMATION WHICH IS NEEDED TO DETERMINE WHETHER YOU, OR THE PERSON ON WHOSE RECORD YOU RECEIVE BENEFITS, IS STILL DISABLED.

372 30 S0(IF BIC= A OR C) PENDING ADDITIONAL INFORMATION WHICH IS NEEDED TO DETERMINE WHETHER THE PERSON ON WHOSE RECORD YOU RECEIVE BENEFITS IS STILL DISABLED.

373 26 S1 BECAUSE YOU ARE WORKING OUTSIDE THE UNITED STATES ON 7 OR MORE DAYS DURING A MONTH. IF YOUR WORK PLANS CHANGE, PLEASE NOTIFY ANY SOCIAL SECURITY OFFICE PROMPTLY.

374 26 S2 BASED ON YOUR ESTIMATED EARNINGS FOR THIS YEAR. IF YOUR ESTIMATE OF EARNINGS FOR THE YEAR CHANGES, PLEASE NOTIFY ANY SOCIAL SECURITY OFFICE PROMPTLY.

375 27 S3 BASED ON THE ESTIMATED EARNINGS FOR THE PERSON ON WHOSE SOCIAL SECURITY RECORD YOU RECEIVE BENEFITS.

376 50 S4 BECAUSE YOU NO LONGER HAVE A CHILD IN YOUR CARE ENTITLED TO RECEIVE SOCIAL SECURITY BENEFITS.

377 27 S5 BECAUSE THE PERSON ON WHOSE SOCIAL SECURITY RECORD YOU RECEIVE BENEFITS IS WORKING OUTSIDE THE UNITED STATES ON 7 OR MORE DAYS DURING A MONTH.

379 28 S8 BECAUSE THE SSA IS REVIEWING THE QUESTION OF WHO SHOULD RECEIVE THE SOCIAL SECURITY BENEFITS
PAYABLE ON THIS RECORD. A SOCIAL SECURITY REPRESENTATIVE MAYBE GETTING IN TOUCH WITH YOU ABOUT THIS IF THEY HAVE NOT ALREADY DONE SO. WHEN A DECISION HAS BEEN REACHED, THEY WILL CONTACT YOU.

Code Letter 380

If the reason for adjustment of an SS only case is other than the ones covered by code letters 370 - 379, use letter code 380. This is a miscellaneous code letter which is suitable for SS benefits suspended under LAF codes S7, S9, SD, SF, SH, SJ, SK, SL, SM, SP, or SW. (See RCM 7.4 Appendix B)

The letter states:

THE SOCIAL SECURITY ADMINISTRATION HAS REQUESTED THE RAILROAD RETIREMENT BOARD TO SUSPEND YOUR BENEFITS. YOU WILL BE NOTIFIED AT A LATER DATE AS TO WHEN YOUR BENEFITS CAN BE RESUMED.

IF YOU BELIEVE THAT THIS DETERMINATION IS NOT CORRECT, YOU MAY REQUEST THAT YOUR CLAIM BE REEXAMINED. IF YOU WANT THIS RECONSIDERATION, YOU MUST REQUEST IT NOT LATER THAN 60 DAYS FROM THE DATE YOU RECEIVE THIS NOTICE. YOU MAY MAKE YOUR REQUEST THROUGH ANY SOCIAL SECURITY OFFICE. IF ADDITIONAL EVIDENCE IS AVAILABLE, YOU SHOULD SUBMIT IT WITH YOUR REQUEST.

IF YOU HAVE ANY QUESTIONS ABOUT YOUR CLAIM, CONTACT THE NEAREST DISTRICT OFFICE OF THE SOCIAL SECURITY ADMINISTRATION. MOST QUESTIONS CAN BE HANDLED BY TELEPHONE OR MAIL. IF YOU VISIT AN OFFICE, HOWEVER, PLEASE BRING THIS NOTICE AND ALL OTHER MATERIAL YOU HAVE ABOUT YOUR CLAIM WITH YOU.

Code Letters 381 - 389

Use these code letters when suspending an RR certified SS benefit that has been placed in a deferred status (LAF Code D). A copy is sent to the appropriate RRB field office.

The letter states:

THE SOCIAL SECURITY ADMINISTRATION HAS REQUESTED THE RAILROAD RETIREMENT BOARD TO TEMPORARILY WITHHOLD YOUR SOCIAL SECURITY BENEFITS.

(SEE REASONS BELOW)
YOUR NEXT PAYMENT WILL BE MADE AS SOON AS THE REQUIRED AMOUNT OF BENEFITS HAS BEEN WITHHELD.

IF YOU BELIEVE THAT THIS DETERMINATION IS NOT CORRECT, YOU MAY REQUEST THAT YOUR CLAIM BE REEXAMINED. IF YOU WANT THIS RECONSIDERATION, YOU MUST REQUEST IT NOT LATER THAN 60 DAYS FROM THE DATE YOU RECEIVE THIS NOTICE. YOU MAY MAKE YOUR REQUEST THROUGH ANY SOCIAL SECURITY OFFICE. IF ADDITIONAL EVIDENCE IS AVAILABLE, YOU SHOULD SUBMIT IT WITH YOUR REQUEST.

IF YOU HAVE ANY QUESTIONS ABOUT YOUR CLAIM, CONTACT THE NEAREST DISTRICT OFFICE OF THE SOCIAL SECURITY ADMINISTRATION. MOST QUESTIONS CAN BE HANDLED BY TELEPHONE OR MAIL. IF YOU VISIT AN OFFICE, HOWEVER, PLEASE BRING THIS NOTICE AND ALL OTHER MATERIAL YOU HAVE ABOUT YOUR CLAIM WITH YOU.

Code Letter 386

Code letter 386 will close with the following paragraph instead of the one shown above:

YOU SHOULD HAVE RECEIVED A LETTER FROM THE SOCIAL SECURITY ADMINISTRATION REGARDING THE OVERPAYMENT WHICH CAUSED THIS ACTION. IF YOU HAVE NOT RECEIVED SUCH A LETTER OR NEED MORE INFORMATION ABOUT THE OVERPAYMENT, CONTACT THE NEAREST SOCIAL SECURITY DISTRICT OFFICE. MOST QUESTIONS CAN BE HANDLED BY TELEPHONE OR MAIL. IF YOU CALL IN PERSON, PLEASE BRING THIS NOTICE AND ANY OTHER MATERIAL YOU HAVE ABOUT YOUR CLAIM WITH YOU.

</table>
When you reach age 60, you may again qualify for an unreduced spouse annuity.

You must file an application before a spouse annuity can be paid again. You may do so at any Board office when you are qualified for an annuity. The enclosed form gives the conditions under which you may qualify for an annuity. If you need further information, call or write the nearest district office of the Board. Please take this letter with you if you call in person.

There is an office located at (address of nearest field office).

Enclosure

G-177a

507 Use when terminating a spouse annuity based on minor children in her care—last child attaining age 18; spouse may qualify for reduced annuity at age 60.

Your annuity has ended this month. You were previously notified that your annuity would end when your child attained age 18 unless the child was totally and permanently disabled and in your care.

When you reach age 60, you may qualify for a spouse annuity at a reduced rate. If you decide to wait until age 65, you may qualify for an unreduced annuity at that time.

You must file an application before a spouse annuity can be paid again. You may do so at any Board office when you are qualified for an annuity. The enclosed form gives the conditions under which you may qualify for an annuity. If you need further information, call or write the nearest district office of the Board. Please take this letter with you if you call in person.

There is an office located at (address of nearest field office).

**D. SS Termination Code Letters** - Use the following code letters when terminating an RR certified SS benefit. A copy of the letter will be sent to the appropriate RRB field office.

The basic text of the letter is as follows:

**THE SOCIAL SECURITY ADMINISTRATION HAS REQUESTED THE RAILROAD RETIREMENT BOARD TO TERMINATE YOUR BENEFITS**

(SEE REASONS LISTED BELOW)

**IF YOU BELIEVE THAT THIS DETERMINATION IS NOT CORRECT, YOU MAY REQUEST THAT YOUR CLAIM BE RE-EXAMINED. IF YOU WANT THIS RECONSIDERATION, YOU MUST REQUEST IT NOT LATER THAN 60 DAYS FROM THE DATE YOU RECEIVE THIS NOTICE. YOU MAY MAKE YOUR REQUEST THROUGH ANY SOCIAL SECURITY OFFICE. IF ADDITIONAL EVIDENCE IS AVAILABLE, YOU SHOULD SUBMIT IT WITH YOUR REQUEST.**

(USED ON ALL BUT LETTER #363)

**WHEN BENEFITS ARE TERMINATED DURING A YEAR AND A BENEFICIARY IS UNDER AGE 70, AN ANNUAL REPORT OF EARNINGS MUST BE FILED IF THE BENEFICIARY HAS INCOME FROM WORK EXCEEDING THE YEARLY LIMIT. THIS REPORT SHOULD INCLUDE THE BENEFICIARY’S EARNINGS**
FOR THE ENTIRE YEAR BOTH BEFORE AND AFTER THE BENEFITS WERE TERMINATED.

IF YOU HAVE ANY QUESTIONS ABOUT YOUR CLAIM, CONTACT THE NEAREST DISTRICT OFFICE OF THE SOCIAL SECURITY ADMINISTRATION. MOST QUESTIONS CAN BE HANDLED BY TELEPHONE, OR MAIL. IF YOU VISIT AN OFFICE, HOWEVER, PLEASE BRING THIS NOTICE AND ALL OTHER MATERIAL YOU HAVE ABOUT YOUR CLAIM WITH YOU.

</tbody>
</table>
### Additional Paragraphs:

Survivor benefits are payable by either the Railroad Retirement Board or the Social Security Administration, but not by both, even though the employee may have received benefits from both agencies while he was alive. The Railroad Retirement Board has jurisdiction of your survivor benefits.

Notice of the employee's death was received too late to prevent the release of Social Security benefits issued after the month of death. These outstanding and not due benefits will be recovered from your survivor award.

### Code Letter 391

Use code letter 391 when terminating RR certified SS benefits in "No C/C" cases when payment of benefits will be transferred to SSA. The code letter will consist of three paragraphs as shown in the "REASON" column for code letter 391 below.

<table>
<thead>
<tr>
<th>LETTER CODE</th>
<th>TERM CODE</th>
<th>SSA LAF CODE</th>
<th>BIC</th>
<th>REASON FOR ADJUSTMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>391</td>
<td>17,21</td>
<td>C,T2</td>
<td>B/C</td>
<td>Survivor insurance benefits are not payable to you under the Railroad Retirement Act because the employee...</td>
</tr>
</tbody>
</table>
WAS NOT INSURED UNDER THAT ACT FOR DEATH BENEFITS.

BECAUSE YOU ARE NOT ENTITLED TO A RAILROAD RETIREMENT ANNUITY, RESPONSIBILITY FOR PAYMENT OF YOUR SOCIAL SECURITY BENEFIT MUST BE RETURNED TO THE SOCIAL SECURITY ADMINISTRATION.

THE SOCIAL SECURITY ADMINISTRATION WILL BEGIN PAYING YOUR SOCIAL SECURITY BENEFITS IN THE NEAR FUTURE. IF YOU DO NOT RECEIVE PAYMENT WITHIN A REASONABLE TIME OR IF YOU HAVE ANY QUESTIONS ABOUT YOUR BENEFIT, CONTACT THE NEAREST DISTRICT OFFICE OF THE SOCIAL SECURITY ADMINISTRATION. IF YOU CALL IN PERSON BEFORE YOU RECEIVE PAYMENT, PLEASE BRING THIS LETTER WITH YOU.

| 394 | 03 | T4 | = C (CHILD AGE 16) |

SINCE YOU NO LONGER HAVE A CHILD WHO IS UNDER AGE 16, OR DISABLED, IN YOUR CARE. WHEN YOU ARE AGE 62, YOU MAY BE ENTITLED TO RETIREMENT BENEFITS. IF YOU ARE A WIDOW OR WIDOWER, YOU MAY BE ENTITLED AT AGE 60 OR AT AGE 50 IF YOU ARE DISABLED. NOTIFY ANY SOCIAL SECURITY OFFICE IF YOU THINK YOU MIGHT BE ELIGIBLE.

### 9.7.19 Death Notification Entry

Death Notification Entry (DNE) is an electronic process which transmits notification of the death of an annuitant to the financial institution (FI). DNE transactions are limited to annuities paid via Direct Deposit/Electronic Funds Transfer (DD/EFT).

DNEs are issued daily, without regard to monthly cut-offs. DNE transactions are created from APPLE First Notice of Death (FNOD) information and from FAST-Suspension/Termination (FAST-S/T) transactions. Returned payments, death terminations from the PAM system, and annuities in suspense prior to the death termination will not create a DNE transaction.

NOTE: If a FNOD or FAST-S/T transaction is erroneous or contains a wrong date of death and, the transaction is not deleted or modified before close of business on the day the transaction is entered, a DNE with the incorrect information will be released to the FI. When this occurs, immediately notify the FI. Provide the FI with the correct date of death or, inform the FI that the report of death was in error and is to be disregarded. Additionally, wrong date of death reports and erroneous reports of death are to be handled according to the instructions in RCM sections 6.6.141 and 6.4.46, respectively.
A DNE transaction furnishes the FI with the following information:

- claim number
- name of the annuitant
- account number
- date of death
- annuitant's social security number
- the next recurring payment amount

Upon receipt of the DNE, FIs are encouraged to "flag" the deceased customer's account to prevent further acceptance of post-death payments. Federal payments received after the FI has been notified of a customer's death by DNE, must be returned within 3 business days of the payment date. Prompt return of the payment by the FI reduces and in some cases, eliminates the need to recover outstanding payments via the reclamation process.

**9.7.20 Suspension/Termination Display and Input**

After determining that the beneficiary's payments should be suspended or terminated and that the correct beneficiary's record is displayed on the DATA-Q screen, press the PF-7 key. The FAST SUSPENSION/TERMINATION ENTRY SCREEN will appear. If no suspension/termination transaction has been entered for that record, the lower half of the screen will be titled "ENTER S/T INFORMATION" and no S/T data will appear. If a suspension/termination transaction has been entered, the lower half of the screen will be titled "CURRENT S/T INFORMATION" and S/T data will appear. (See RCM 9.7.23 for more information regarding pending transactions.)

**A. Top Half of Screen**

The FAST Suspension/Termination system prefills certain information directly from the beneficiary's record. Because of the DATA-Q link, the actual number of input items that the user must complete to process a transaction is reduced. Input errors are held to a minimum and can be corrected on-line. Prefilled fields cannot be changed by the user.

The following items are prefilled from DATA-Q:

- claim number (CLAIM NO)
- payee code (P/C)
- name (first line of the address block as it appears on DATA-Q (NAME)
• date of birth (DOB)

• payment rate information (CURRENT RATE INFO: CHECK, RR, SUPP, SS)

The date and time that the screen is displayed is shown in the upper right-hand corner of the screen.

NOTE: Double check to make sure that the proper beneficiary is displayed.

While edits can prevent data input errors, they cannot prevent the suspension/termination of the wrong beneficiary.

B. Lower Half of Screen

The lower half of the split screen contains all the data input items, which must be filled by the user. There are seven data input fields (UNIT ID, RR & SS SUSP/TERM CODE, EFF DATE, and LETTER CODE). The user sign-on will be carried through from the DATA-Q sign-on function.

A message line is also located on the bottom of the FAST S/T entry screen. If an S/T transaction is being entered in a "dual" annuity case, the message "DUAL ANNUITANT CASE/ACTION NEEDED ON ANOTHER CLAIM NUMBER?" will be displayed.

9.7.21 Entering Data On FAST Suspension/Termination Screen

A. How To Enter Data

The FAST-S/T screen has been expanded to include entry fields for suspension/termination of SS benefits. In order to suspend or terminate both the RR annuity and SS benefit, the appropriate data must be entered in both the RR and SS entry fields. (Exception: If a death code is entered in either the RR or SS line, FAST will automatically carry the same codes into the other line after the PF-2 edit key is pressed.)

The first data entry field is UNIT ID. After that field is completed, the cursor will position itself under the data entry fields according to the composition of the monthly rate. That is, if the monthly rate is RR only, the cursor will not move to the SS line; if the monthly rate is SS only, the cursor will not move to the RR line; if the monthly rate is RR & SS, the cursor will move to the RR line first, and then to the SS line.

Enter suspension/termination data according to the following instructions:

1. UNIT ID

   • Enter your 4-digit organization code in the UNIT ID field. If you are not sure of your correct organization code, refer to RCM 9.7 Appendix A.
RR Entry Fields

2. SUSP/TERM CODE
   • Enter the appropriate 2-digit RR suspension/termination code. Refer to RCM 9.7.14B for suspension/termination codes. Note: A termination code entered will terminate an annuity that is in suspended status.

3. EFF DATE
   • If known, enter the effective date of the RR suspension/termination. The entry must include two digits for the month; followed by a hyphen, two digits for the day; followed by a hyphen, and four digits for the year.

   Refer to RCM 9.7.15 when entering future effective dates. If the effective date is unknown, enter 00-00-0000.

   NOTE: Whenever a 00-00-0000 effective date is used, you must develop for the actual suspension/termination effective date. When the actual month and year of the suspension/termination event is learned, process a new FAST-S/T transaction.

4. LETTER CODE
   • Enter the appropriate three-digit letter code.

   This input field does not always require an entry. If a notice should not be released, leave this field blank. Refer to RCM 9.7.17 for tables of susp/term codes and corresponding letter codes.

SS Entry Fields

5. SUSP/TERM CODE
   • Enter the appropriate 2-digit SS suspension/termination code. Refer to RCM 9.7.14B for suspension/termination codes.

6. EFF DATE
   • If known, enter the effective date of the SS suspension/termination. This entry must include two digits for the month; followed by a hyphen, two digits for the day; followed by a hyphen, and four digits for the year.

Refer to RCM 9.7.15 when entering future effective dates. If the effective date is unknown, enter 00-00-0000.

NOTE: Whenever a 00-00-0000 effective date is used, you must develop for the actual suspension/termination effective date. When the actual month and year of the suspension/termination event is learned, process a new FAST-S/T transaction.

7. LETTER CODE

- Enter the appropriate three-digit letter code. If a notice should not be released, leave this field blank.

This input field does not always require an entry. Refer to RCM 9.7.17 for tables of susp/term codes and corresponding letter codes.

B. How to Start The Edit Process

After all of the entries have been made, press the PF-2 key to activate the edit process.

9.7.22 Editing Data

A. Input Passes Edits

If the data passes the edits, this message will appear in white on the screen:

"NO ERRORS DETECTED, HIT PF 2 TO SUBMIT RECORD TO THE DATABASE"

Press the PF-2 key a second time. In response to the PF-2 key a confirmation message will appear in white on the screen:

"RECORD HAS BEEN ADDED TO THE DATABASE.
HIT PF KEY TO CONTINUE"

NOTE: Before storing the data, if it is necessary to change the data entered, move the cursor to the field to be changed, correct the data and then press the PF-2 key. The data will be edited again. If the transaction passes the edits, it will be stored on the database. If the transaction does not pass all edits, an edit message will appear.

B. Input Does Not Pass Edits
If an invalid entry is made, the cursor will be positioned under the invalid item and an error message will be displayed on the screen. FAST can only indicate one invalid entry at a time. Therefore, after correcting the invalid item and hitting the PF-2 key, the system may identify a second item needing correction. The fields are edited in the same sequence that they are entered by the user. When all the data is valid, this message will appear on the screen:

"NO ERRORS DETECTED,

HIT PF 2 TO SUBMIT RECORD TO THE DATABASE."

Refer to RCM 9.7.26 for a list of the edit messages and corrections.

Press the PF-2 key. This confirmation message will appear in white on the screen:

"RECORD HAS BEEN ADDED TO THE DATABASE.

HIT PF KEY TO CONTINUE."

C. Print-outs

To make a screen print, use your system’s print function.

D. Return to DATA-Q

To enter another suspension/termination transaction, or return to DATA-Q, press the PF-6 key.

E. Return to RRAPID Menu

When finished with FAST/DATA-Q press the CLEAR key to return to the RRAPID Menu.

9.7.23 Pending Transactions

A suspension or termination transaction pends on the database until it is transferred to a file for processing through DAISY. When a suspension/termination transaction for a particular claim is pending on the database, the data that was input to create that transaction appears on the data entry screen under the heading "CURRENT S/T INFORMATION." A pending transaction may be changed or deleted, if necessary, before it is removed from the FAST database for processing through DAISY.

FAST-Suspension/Termination can be modified an unlimited number of times while they are pending on the database. The latest transaction or G-96 on record will be processed through DAISY. Suspension/termination transactions created by G-96 input forms cannot be viewed on FAST.
How long a transaction pends on the database depends on when in the month it is entered and the suspension/termination effective date.

A. **Pends Until the Close of the Work Day**

Transactions entered from the second to the last work day of the month through the cut-off for FAST suspensions/terminations in the following month are removed from the database at the end of each work day and processed through DAISY overnight, provided the suspension/termination effective date is the same as the cut-off month or earlier. Transactions entered on the day before cut-off are an exception. Since there is no DAISY run that evening, they do not process through DAISY until the following night.

Example: FAST Suspension/Termination cut-off is September 17. Suspensions or terminations with a 09-01-1987 or earlier effective date entered through FAST from August 28 (the second to the last work day of August since the weekend falls on the 29th and 30th) through September 15 and on September 17 will process through DAISY overnight and appear on DATA-Q the morning of the next work day after they are entered. Transactions entered on September 16, the day before cut-off, will not appear on DATA-Q until September 18.

B. **Pends Until the Second Work Day of the Following Month**

Transactions entered after the monthly FAST suspension/termination cut-off pends through the second work day of the following month when they are removed for processing through DAISY.

Example: Transactions with a 07-01-1989 or earlier effective date entered after the June 19 cut-off pends on the database through July 5. They would appear on DATA-Q on July 6.

C. **Pends Until Future Month**

Transactions with an effective date later than the current month pends on the database until the end of the second work day of the effective date month.

Example: A suspension transaction with an 08-89 effective date is entered through FAST in June. The transaction pends on the database through August 2 (the second work day of the effective date month). The transaction will appear on DATA-Q on August 3.

NOTE: There is sometimes a delay in DATA-Q’s being updated, for example, after the cost-of-living adjustment. A pending suspension/termination transaction may still have been processed through DAISY even though it will not appear on DATA-Q until it is updated. Be aware of the DATA-Q update date.
9.7.24 Modifying A Pending Transaction

If a pending transaction exists, the input items will be filled under the "CURRENT S/T INFORMATION" legend on the bottom half of the split screen. The following message will appear at the bottom of the screen:

"S/T EXISTS. FOR DATAQ - HIT PF 6. TO MODIFY - ENTER ALL DATA THEN PF 3. TO DELETE - ENTER UNIT ID THEN PF 4. TO ENTER TRACK-HIT PF8."

After reviewing the screen and determining that a modification is necessary, input **all** data for the modified transaction even if some of the data will not change.

- SUSP/TERM CODE
- EFF DATE
- UNIT ID
- LETTER CODE (when appropriate).

The cursor will automatically move to the next input field once the required positions are filled. Press the PF-3 key. If the data is valid, this message will appear on the screen:

"NO ERRORS DETECTED,

HIT PF-3 TO MODIFY CURRENT RECORD ON THE DATABASE"

To cancel the transaction at this time before it has been accepted, Press PF-6. You will return to DATA-Q. To enter the transaction, press the PF-3 key again. This message will appear on the screen:

"RECORD ON DATABASE HAS NOW BEEN MODIFIED.

HIT PF KEY TO CONTINUE."

To make a screen print, use the print function on your system.

If the data is invalid, an error message will be displayed and the cursor will position itself under the erroneous entry. Refer to RCM 9.7.26 for edit messages and corrective actions. Make corrections and press the PF-3 key again until all input data is valid and the modification can be made.

Example: The beneficiary advises the field office that he plans to return to work at the railroad on September 1, 1988. A FAST transaction is processed after the August FAST S/T cutoff date showing 09-01-1988 as the EFFECTIVE DATE. He calls in a few days later and says he will NOT begin employment until October 1, 1988. A second FAST transaction modifies the EFF DATE to 10-01-1988.
9.7.25 Deleting A Pending Transaction

After you have determined that a pending action should be deleted, move the cursor to the UNIT ID data entry field and enter your four-digit UNIT ID and press the PF-4 (Delete) key. If the data is valid, the following message will appear on the screen:

"NO ERRORS DETECTED, HIT PF-4 TO SUBMIT
DELETE ACTION TO THE DATABASE."

To cancel the transaction before it is accepted, press PF-6. You will return to DATA-Q. Otherwise, press PF-4 again to enter the transaction. The following message will appear on the screen:

"RECORD ON DATABASE IS NOW A DELETION RECORD.
HIT PF KEY TO CONTINUE."

NOTE: If a death termination is being deleted, check the remarks section of the APPLE FNOD screen before completing the deletion action. If the message "SSA/CMS DEATH MATCH TERM, NOTIFY DMS IF ERRONEOUS REPORT OF DEATH IS RECEIVED" is present, Notify the Death Match Section. The discrepant report of death information must be reconciled.

If the data is invalid, an error message will be displayed and the cursor will position itself under the erroneous entry. Refer to RCM 9.7.26 for error messages and corrective actions. After correcting the data, press PF-4.

9.7.26 Edit Messages And Corrective Actions

Activity entered through FAST is edited on line. Activity is not passed to the database until all the input information has cleared all edits. Errors are identified through error messages displayed at the bottom of the input entry screen. Errors can be corrected by typing over the erroneous entry with the correct information. Since most errors can be identified and corrected on-line, very few FAST suspension/termination transactions reject in DAISY. Listed below are the error messages that are displayed in the FAST edit process, and the corrective action that should be taken. These messages are listed in the order that the data is entered by the user.

A. Suspension/Termination Code

1. Message: "NO S/T CODE ENTERED - ENTER S/T CODE." This edit occurs if the RR or SS SUSP/TERM CODE has been omitted, or is incomplete.

   Correction: Type in an appropriate RR and/or SS SUSP/TERM CODE. See RCM 9.7.14B for available codes.
2. **Message: "INVALID S/T CODE - ENTER VALID S/T CODE."** This edit occurs if the RR or SS SUSP/TERM CODE entered is not a valid code as detailed in RCM 9.7.14.

   **Correction:** Type in one of the codes detailed in RCM 9.7.14 as appropriate for the action being taken.

3. **Message: "INVALID ENTRY - CASE IS TERMINATED."** This edit occurs if the RR annuity and/or SS benefit is terminated and a Suspension code is entered in the RR and/or SS SUSP/TERM CODE field.

   **Correction:** No action can be taken since a suspension transaction cannot be processed against a terminated record.

**B. Effective Date**

1. **Message: "NO EFFECTIVE DATE ENTERED - ENTER EFFECTIVE DATE."** This edit occurs if the RR or SS SUSP/TERM CODE field has been completed and the corresponding EFF DATE field has been left blank, or is incomplete.

   **Correction:** Type in a valid effective date, in the proper month-day-year format with a hyphen separating the two-digit month, the two-digit day, and the four-digit year. If the effective date is unknown, type in 00-00-0000. Remember to develop for the exact effective date. When the month and year of the suspension/termination event is learned, process a new FAST S/T transaction.

2. **Message: "INCORRECT MONTH - ENTER CORRECT MONTH."** This edit occurs if the “MM” positions of the EFF DATE entry are other than a number 01 through 12.

   **Correction:** Type in a valid month entry in the “MM” positions of the EFF DATE.

3. **Message: "INCORRECT DAY - ENTER CORRECT DAY."** This edit occurs if the “DD” positions of the EFF DATE entry are other than a number 01 through 31.

   **Correction:** Type in a valid month entry in the “DD” positions of the EFF DATE.

4. **Message: "INCORRECT YEAR - ENTER CORRECT YEAR."** This edit occurs if the year is 1978 or earlier.

   **Correction:** Type a valid year (after 1978) in the “CCYY” positions of the EFF DATE.
5. Message: "EFFECTIVE MONTH ZEROES, YEAR MUST BE ZEROES." This message occurs if the “MM” positions of the EFF DATE are 00 and the “CCYY” positions are not 0000.

Correction: Type in 0000 in the “CCYY” positions of the EFF DATE. Remember to develop for the exact effective date. When the month and year of the suspension/termination event is learned, process a new FAST S/T transaction.

6. Message: "EFFECTIVE YEAR OR DAY ZEROES, MONTH MUST BE ZEROES." This message occurs if the “CCYY” and “DD” positions of the EFF DATE are 0000 and 00 and the “MM” positions are not 00.

Correction: Type in 00 in the “MM” positions of the EFF DATE. Remember to develop for exact effective date. When the month and year of the suspension/termination event is learned, process a new FAST S/T transaction.

7. Message: "EFFECTIVE DATE MORE THAN 3 MONTHS IN FUTURE - ENTER VALID EFFECTIVE DATE." This edit occurs if an effective date more than three months after the current month is entered (for example, an effective date later than November is entered in August). A suspension/termination transaction with an effective date more than three months after the current month cannot be processed on FAST.

Correction: If the effective date is within three months, type in the correct date. If the effective date is more than three months after the current month, no action can be taken at this time on FAST. Hold the case until you are within 3 months of the action.

8. Message: "EFFECTIVE DATE GREATER THAN CURRENT DATE - ENTER VALID EFFECTIVE DATE." This edit occurs if the effective date is later than the current month, day and year and the SUSP/TERM code is 01, 41, 51, 57, 63, 64 or 65.

Correction: Type in an effective date of the current month or earlier. If payments are not to be suspended or terminated immediately this transaction cannot be processed on FAST.

9. Message: "EFFECTIVE DATES RR AND SS NOT BOTH IN FUTURE - ENTER VALID EFFECTIVE DATE." This edit occurs if effective dates have been entered in both the RR and SS lines and one date is a future date and the other date entered is either a different future date or the current date.

Correction: If the effective dates are correct, the system will not accept the transaction as entered. Correct the transaction to enter the
suspension or termination with the earliest effective date only, and control the case for entry of the transaction with the later effective date, after the first transaction has processed on CHICO. If the effective dates entered are not correct, enter a valid effective dates.

10. Message: "DATE ENTERED NOT NUMERIC - ENTER NUMERIC DATE" This edit occurs if THE ""MM", ""DD", or ""CCYY"" positions of the EFF DATE are not numeric.

Correction: Type in a valid numeric entry.

C. Unit ID

1. Message: "NO UNIT ID ENTERED - ENTER UNIT ID." This edit occurs if the unit ID has been omitted, or is incomplete.

Correction: Type in the correct UNIT ID.

2. Message: "UNIT ID NOT NUMERIC - ENTER NUMERIC UNIT ID." This edit occurs if the unit ID entered does not consist of four digits.

Correction: Type in the correct four-digit unit ID.

3. Message: "INVALID UNIT ID - ENTER VALID UNIT ID." This edit occurs if the first digit of the UNIT ID is not a "2" for headquarters personnel, or a "7" for field office personnel.

Correction: Type in a UNIT ID with a 2 or 7 in the first position.

D. Letter Code

1. Message: "LETTER CODE DOES NOT CORRESPOND WITH S/T CODE." This edit occurs if the LETTER CODE entry does not correspond to the SUSP/TERM CODE entry as shown in RCM 9.7.17.

Correction: Either delete or correct the letter code so that it is appropriate for the SUSP/TERM CODE, or correct the SUSP/TERM CODE as appropriate if the correct letter code was entered.

9.7.30 Field Office Handling Of FAST Suspension/Termination Transactions

Field offices use the FAST suspension/termination system to stop payments when they are informed by the annuitant of one of the suspending or terminating events that can be processed through FAST.

NOTE: While death terminations can be processed using FAST, all death terminations are to be processed using APPLE.
Field offices do not use FAST to suspend or terminate payments in the following situations:

- a third party provides information that could cause termination or suspension of an annuity and the field office is unable to verify the information through the annuitant;
- a representative payee is being developed, but the field office has determined that the annuitant is benefiting from the annuity payments. When the representative payee development is completed, the field office will process the representative payee selection on FAST-COA.
- the spouse payment is not terminated when notice of the employee's death is received.
- payments are not terminated based on the field office copy of a MAP or SURVEA letter.

In these situations, and any other situation requiring codes not available to the field (See RCM 9.7.14), headquarters is responsible for suspending or terminating payments.

**9.7.31 Headquarters Handling Of FAST Suspension/Termination Transactions**

While field offices will be stopping annuity payments in certain situations, headquarters will maintain responsibility for determining that all necessary action has been taken after the suspension or termination of benefits.

A. **Suspension/Termination Initiated by Field Office**

   Headquarters must be notified whenever additional actions are required that cannot be handled by the field office.

B. **Suspension/Termination Initiated by Headquarters**

   The examiner or development clerk should follow through with any additional action necessary in accordance with current suspension/termination procedures.

**9.7.35 Processed Activity**

Activity that has been input to the FAST system is not processed until it is batched, put on a file, and processed through the DAISY system.

Pending transactions will remain on the screens until processed. Therefore, if the transaction can be viewed on FAST it has not yet been updated to the checkwriting system. Once processed, the transaction will no longer appear on FAST.
Batched activity may be verified for processing on the following sources:

- **DATA-Q** - DATA-Q is updated soon after the activity is processed. The DATA-Q screen shows payment status, effective date of suspension or termination, actual date the suspension or termination was processed and the reason for suspension or termination. FAST transactions can be identified by a voucher number of 011.

- **PREH** – PREH (3277 on the full inquiry menu or RECUR on the general inquiry menu) is also updated soon after the activity is processed and is a good source for verification. The 3277 or RECUR screens show payment status, effective and actual dates of the suspension or termination, and the reason for the suspension or termination. FAST transactions can be identified by a voucher number of 011.

- **SAMM** - The SAMM tape is a record of all daily activity. In addition to suspension/termination information, this tape provides the identification of the unit and person that processed the suspension or termination. The activity is stored on tape according to the transaction run date. The voucher number will be shown as 011.

- **MOMS** - Suspension/termination activity may be checked on the MOMS tape produced on the first of the month following the month annuity payments were stopped.

### 9.7.70 FAST Payment Investigation Entry (PIENTRY)

The FAST Payment Investigation Entry (PIENTRY) is used to release mechanical SF-1184, Unavailable Check Cancellation, requests to Treasury. Non-receipt claims and, reclamation, photocopy, and status requests entered on PIENTRY are transferred to a computer file for processing by Treasury. Transactions are entered in the following instances:

**Non-Receipt Claim**

The payee or representative payee initiates a claim for the proceeds of a payment that has not been received, or has been lost, stolen, mutilated, or destroyed.

**NOTE:** Occasionally, a financial institution (FI) will notify RRB of checks that were lost or stolen after being cashed by the payee. The FI may submit a non-receipt claim. When this occurs, secure the exact check symbol and check number of the check and advise the FI to file a “Holder In Due Course” or “Lost-In-Transit” claim with its servicing Federal Reserve Bank. Do not process a non-receipt claim. If there is any doubt, refer the case to Policy & Systems-Payment Analysis & Systems.

**Reclamation (Non-Entitlement)**

The RRB determines that the payee is not entitled to the proceeds of a check that is not in the possession of either the RRB or Treasury (it is unknown if the check has been
negotiated) and recovery cannot be made by any other means. Or, the RRB determines that a payee enrolled in direct deposit is deceased or incompetent.

**Status or Photocopy**

The RRB determines that a photocopy of a check or payment status information is needed for administrative purposes.

A. **Multiple Requests**

Information for up to 24 payments in one case can be entered on PIENTRY at one time. Additional requests must be entered after the first 24 pending transactions have processed, generally the following business day.

B. **Non-Recurring Payments**

Requests for non-recurring payments (accruals or one payment only payments) require the check number assigned by Treasury. This information is found by accessing Treasury's PACER system.

C. **Courtesy Disbursements**

Requests for Courtesy Disbursements, released as a result of a B or C non-receipt claim, require the check number assigned by Treasury. This information is found by accessing Treasury's TIE File system.

D. **Identical Payment Issue Date (Month and Year)**

Requests for payments issued in the same month and year cannot be entered on PIENTRY on the same day. The additional request must be entered after the first request has processed, generally the following business day.

### 9.7.71 How Payment Investigation Transactions Are Processed

When a payment investigation transaction is processed through PIENTRY, the user:

- Calls up the DATA-Q record of the annuitant or beneficiary for whom the payment investigation is to be processed;
- By pressing the PF-9 key, accesses the payment investigation input entry screens or accesses PIENTRY via the RRAPID Main Menu;
- Enters the required information (unit ID, reason code, payment date, etc); and,
- Responds to edit messages, if necessary, until the data is accepted by the system.
• Edits the information entered by the user for consistency;

• When acceptable data has been entered, creates a transaction consisting of the data entered by the user and data that it extracts from DATA-Q (prefix and claim number, payee code, name, address, etc.); and,

• Stores the transaction on the database.

9.7.72 Viewing The FAST-Payment Investigation Entry Screens

Any employee who has access to DATA-Q may view the PIENTRY screens to determine if a non-receipt claim or reclamation, status, or photocopy request for a particular payment is pending transmission to Treasury. Pending transactions are batched and processed daily. Check PISTATUS for transactions that have been released to Treasury.

To view the payment investigation data entry screens, first locate the annuitant’s record on DATA-Q, then press the PF-9 key. The payment investigation review menu screen will appear.

NOTE: If the annuitant is not on DATA-Q, access PIENTRY from the RRAPID Main Menu (see section 9.7.80).

When a payment investigation transaction has been entered on PIENTRY and has not been sent to Treasury for processing, the payment date will be shown on the review menu. To view the data entered for a particular payment date, enter the corresponding two-digit menu number in the SELECT OPTION field and then press the PF-5 key. The PAYEE IDENTIFICATION screen will appear. This is the first of three data entry screens. The second and third screens, BANK IDENTIFICATION INFORMATION and PAYMENT IDENTIFICATION INFORMATION, respectively, can be viewed by pressing the PF-5 key.

NOTE: The PF-5 key function was created as a view-only option. It is not necessary to enter the UNIT ID on the review menu screen when the PF-5 key is used.

9.7.73 Who Can Input Payment Investigation Transactions

Headquarters and field off personnel, who have responsibilities for taking payment investigation actions, have security clearance to input payment investigation transactions. One must have security clearance access to DATA-Q to view a pending transaction. However, a separate security clearance is required for PIENTRY to input data. If one does not have clearance, when an attempt is made to input a transaction, the screen will display the following message:

“SECURITY VIOLATION ON TASK CODE
ENTER NEXT TASK CODE”
### 9.7.74 Type Of Payment Investigation Transactions That Can Be Processed On PIENTRY

Listed below are acceptable payment investigation codes and their descriptions.

<table>
<thead>
<tr>
<th>CODE</th>
<th>REASON</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>RRB REISSUE BEFORE STATUS – Use when:</td>
</tr>
<tr>
<td></td>
<td>• The payee claim dire need or a due check is returned to RRB for reissuance.</td>
</tr>
<tr>
<td></td>
<td>• Payment was not DD/EFT.</td>
</tr>
<tr>
<td></td>
<td>• The payee is entitled to the check.</td>
</tr>
<tr>
<td></td>
<td>• If lost or stolen, the check was not endorsed.</td>
</tr>
<tr>
<td></td>
<td>• The check is less than a year old.</td>
</tr>
<tr>
<td></td>
<td>RRB is certifying a second payment before Treasury determines the status of the original payment (payment is recertified outside of the Courtesy Disbursement process).</td>
</tr>
<tr>
<td>B</td>
<td>MASS LOSS – Use when:</td>

### F
**RECLAMATION-OTHER** – Use when:
- Payment was **not** DD/EFT.
- The payee is not entitled to all or part of the proceeds of the payment.
- The check is less than a year old.

### G
**LOST/STOLEN-ENDORSED** – Use when:
- Payment was **not** DD/EFT.
- The payee is entitled to the check.
- The check was endorsed and then lost or stolen,
- The check is less than a year old.

**NOTE:** Do not use code “G” to process a lost/stolen claim filed by a financial institution (see section 9.7.70).

### K
**PHOTOCOPY** – Use when:
- Payment was **not** DD/EFT.
- A photocopy of a check is required for agency use and non-receipt of checks more than a year old.

### L
**CERTIFIED PHOTOCOPY** – Use when:
- Payment was **not** DD/EFT.
- The photocopy of the check must be certified to satisfy legal requirements.

### M
**STATUS** – Use when:
- The status of a check or DD/EFT payment is required for agency use.
- The annuitant claims non-receipt of a check that is more than a year old, and there is no record that the check was previously cancelled.

### S
**AGENCY MATCH-NON-ENTITLEMENT** – Use when:
• Cross-reference with another agency’s record indicates the payee is not entitled to all or part of the proceeds of the check.
• RRB has not confirmed the non-entitlement report.
• Payment was not DD/EFT.
• The check is less than a year old.

9.7.75 Determining When payment Investigation Transactions Will Be Processed

Transactions entered on PIENTRY are processed and transmitted at the close of each business to Treasury for processing. When a transaction is pending for a particular payment, the data that was input to create that transaction appears on the data screens. A pending transaction can be changed or deleted, of necessary, before it is processed. (See section 9.7.86 and 9.7.87)

9.7.80 Payment Investigation Display And Input

The FAST-Payment Investigation Entry (PIENTRY) system consists of four screens. Depending on the type of transaction being processed, entries may not be needed on each screen. In most cases, the system will pre-fill certain items; in some instances it may be necessary to alter or delete pre-filled information.

Before entering any transaction on PIENTRY, make sure the action was not previously taken. This can be determined by viewing the FAST-Payment Investigation Review Menu screen or FAST-Payment Investigation Status. The Review Menu lists pending cases that will be processed on the next run and PISTATUS lists transactions
previously submitted to Treasury. After determining that a payment investigation is in order, check to see if the annuitant’s record is displayed on the DATA-Q screen.

NOTE: Check to make sure the proper annuitant record is displayed. While edits can prevent data input errors, they cannot prevent the entry of payment investigation information on the wrong record.

Annuitant on DATA-Q

Press the PF-9 key. The FAST-Payment Investigation Review Menu will appear.

REVIEW MENU

This screen displays any previous transactions entered that have not been processed. Up to twenty-four transactions can be stored. Any one of these transactions can be reviewed by entering the appropriate number in the ‘SELECT OPTION’ field. The ‘UNIT ID’ is also entered on this screen. The claim number and payee code are pre-filled from DATA-Q.

If no transactions are pending on the review menu, the FAST-Payment Investigation system pre-fills certain information from the annuitant’s record on DATA-Q. Because of the DATA-Q link, the actual number of input items that the user must complete to process a transaction is reduced. Input errors are held to a minimum and can be corrected on-line.

The following items are pre-filled on the appropriate payment investigation screens from DATA-Q if there are no pending transactions on the Review Menu:

- Prefix
- Claim Number
- Payee Code
- Name
- Current address
- Direct deposit information
- Payment amount

In addition, the following items will be pre-filled from DATA-Q if there are no pending transactions on the Review Menu when the reason code entered is B or C:

Object code
RR amount
SUP amount
SS amount
SS fund code

However, when a transaction has been entered on FAST and is shown as pending on the Review Menu, **all** of the data from the earliest transaction date on the Menu (excluding the payment date) will appear on the entry screens.

**Annuitant Not On DATA-Q**

If the annuitant’s record is not on DATA-Q, verify the claim number. If the claim number is correct, press the CLEAR key to return to the RRAPID Main Menu. Enter the number assigned to PIENTRY (for the Payment Investigation Entry screen) next to the word, SELECTION. Press ENTER and a screen resembling the Review Menu will appear.

Enter the following:

- Beneficiary symbol (e.g., W, WC, M, L)
- Prefix (e.g., A, D, H)
- Claim number, and
- Payee code.

Then press the ENTER key. The “UNIT ID” must also be entered on this screen.

The FAST-Payment Investigation entries are made on three screens. The screens are broken down into different subject areas, Payee Identification Information, Bank Identification Information, and Payment Identification Information.

**PAYEE IDENTIFICATION INFORMATION**

This screen contains information regarding the payee and the initial entries required for payment investigation. The claim number, payee code and current name and mailing address are pre-filled either from DATA-Q or the earliest pending transaction. If no DATA-Q record exists and no pending transactions are shown on the Review Menu, all necessary entries must be made.

A code representing the reason for the payment investigation must be entered. If the reason code is pre-filled from the earliest pending transaction, the code must be reviewed and modified, if necessary. If the payee or representative payee is deceased, additional entries are required.
Thos screen also carries over the claim number, payee code, unit ID, requester (signon) and the dates of the last five pending transactions and total number of pending transactions, if present.

**BANK IDENTIFICATION INFORMATION**

This screen displays information regarding direct deposit. If direct deposit information is currently shown on DATA-Q or the earliest pending transaction, the bank information will be pre-filled. The bank information on this screen may be added, deleted or modified to agree with the bank information as it was for the payment being investigated.

This screen also carries over the claim number, payee code, unit ID, requester (signon) and the dates of the last five pending transactions, and the total number of pending transactions, if present.

**PAYMENT IDENTIFICATION INFORMATION**

This final screen provides a breakdown of the current payment information as shown on DATA-Q or from the earliest pending transaction. The breakdown may be modified or deleted, depending on the type of transaction and the payment in question. If no DATA-Q record exists and no pending transactions are shown on the Review Menu, all necessary entries must be made.

The month and 4-digit year; e.g. 1999, of the payment must be entered. If partial reclamation is involved, that information is entered on this screen.

This screen also carries over the claim number, payee code, unit ID, requester (signon) and the dates of the last five pending transactions and total pending transactions, if present.

**9.7.81 Entering A Non-Receipt Claim On Fast Payment Investigation**

After determining that a non-receipt claim should be entered on FAST (see FOM1 115.30.2 and 115.30.3) and that the correct annuitant record is displayed in the DATA-Q screen, press the PF-9 key.

A.  Payment investigation Review Menu

The cursor will position itself under the entry fields in the following order.

1.  SELECT OPTION

   - To enter a new transaction, do not make an entry in this field. Use the TAB key to move the cursor to the next field.
   - If it is necessary to review, modify or delete a pending transaction, enter the two-digit menu number corresponding to the payment date.
(See sections 9.7.86 and 9.7.87 for instructions on modifying or deleting pending transactions.)

2. UNIT ID

- Enter your 4-digit organization code in the UNIT ID field.
- Press the ENTER key. The first data entry screen will appear.

B. Payee Identification Information Screen

The cursor will position itself under the entry fields in the following order.

1. REASON CODE

- Enter the appropriate reason code. Depending upon the particular circumstances, reason code A, B, C, D or G must be entered for a non-receipt claim. Refer to section 9.7.74 for the table of reason codes.

2. DECEASED NAME

- DO NOT make an entry. Use the TAB key to move the cursor to the next field.

3. DATE OF EVENT

- DO NOT make an entry. Use the TAB key to move the cursor to the next field.

4. NAME/ADDRESS

Treasury will sue the information entered in this field to issue the replacement check for requests coded B or C. This field will be pre-filled from DATA-Q or the pending transaction with the earliest chronological payment date. Verify that the name, street address or box number, city, state and ZIP code for the annuitant or representative payee is the most current.

- If the information in this field is not the most current, or the field is blank, type in the correct data.
- DO NOT precede the address with the cent sign or a group mark. The edit process will not pass those characters.
- If the information pre-filled or entered in this field is correct and reflects a non-foreign address, press the PF-2 key at this point to activate the edit process for this screen.
NOTE: Also process an address change using FAST-Change of Address if the address shown on DATA-Q is not correct.

5. REP PAYEE DEC’D
   • DO NOT make an entry. Use the TAB key to move the cursor to the next field if necessary.

6. GEOGRAPHIC CODE
   • If the annuitant resides in a foreign country, enter the three-digit geographic code (see RCM 10.2 Appendix B).

After all of the entries on this screen have been made or verified, press the PF-2 key to activate the edit process. If the input passes the edits, this message will appear on the screen:

“PAYEE ID INFORMATION IS CORRECT – PRESS PF2 TO CONTINUE”

Press the PF-2 key a second time. The second data entry screen will appear.

If an invalid entry has been made, the cursor will position itself under the invalid item and an error message will be displayed on the screen. Refer to RCM 9.7.84 and 9.7.88 for instructions on handling error messages.

C. Bank identification Information Screen

If the payment involved is a Direct Deposit/Electronic Funds Transfer (DD/EFT) payment, all four of the fields on this screen must be completed. If the payment is not a DD/EFT payment, these items must be blank.

If this screen is being pre-filled from DATA-Q and the payee is currently receiving payment by DD/EFT, these items will be pre-filled. If the pending transaction with the earliest chronological payment date contains DD/EFT information, these items will be pre-filled from that transaction. Verify the information and type in any corrections. If these fields are pre-filled, but the payment involved was not released DD/EFT, use the space bar to delete the data in all four fields.

The cursor will position itself under the data entry fields in the following order.

1. BANK ROUTING NUMBER
   • Enter or verify the routing number of the Financial Institution (FI) corresponding to the payment in question.

2. CHECK DIGIT
• Enter or verify the check digit of the FI corresponding to the payment in question.

3. DEPOSITOR ACCOUNT NUMBER

• Enter or verify the depositor account number. The first digit of the account number must be entered on the first position to the left. Leave blank any positions after the account number.

4. TYPE BANK ACCOUNT

Enter or verify the type of account at the FI. Enter “C” if the account is a checking account, “S” if the account is a savings account.

After all of the entries on this screen have been made or verified, press the PF-2 key to activate the edit process. Handle any error messages according to sections 9.7.84 and 9.7.88. When the input passes the edits, press the PF-2 key a second time. The last data entry screen will appear.

D. Payment Identification Information Screen

The cursor will position itself under the entry fields in the following order.

1. PAYMENT DATE

• Enter the month and 4-digit year; e.g. 1999, that the payment was dated. If the month is only one digit, enter the digit in the second position and enter a zero in the first position (e.g., 08-1999 for August 1999).

2. PAYMENT AMOUNT

• Verify the amount of the payment pre-filled from DATA-Q or the pending transaction with the earliest chronological payment date. If the amount is not correct, type in the correct amount.

3. PAYMENT TYPE

• The system will pre-fill a “1” – recurring payment. Enter or verify the type of payment in question according to the following table.

  1 – Recurring payment
  2 – Accrual or One Payment Only
  9 – Courtesy Disbursement (Replacement check)

4. FIRST CHECK NO
• If the payment involved is recurring, DO NOT make an entry in this field.

• If the payment involved is an accrual or one payment only check, obtain the check number from Treasury’s PACER system. If the check number is less than eight digits, zero-fill the number from the left so that the last digit of the number is in the last position on the right (e.g. 0 0 9 9 9 9 9 9).

• If the payment involved is a replacement check, obtain the exact check number from Treasury’s TIE FILE system.

5. OBJECT CODE

• If the reason code entered is B or C, verify that the object code pre-filled from DATA-Q is correct. If the reason code is other than B or C this field should be blank.

• Verify or enter the appropriate object code according to the following table.

  0 – RR ONLY
  1 – SMI REFUND
  2 – SS ONLY
  4 – SUP ONLY
  5 – RR/SS/SUP
  6 – RR/SS
  7 – RR/SUP

6. RR AMOUNT

• If the reason code is B or C and the object code is 0, 5, 6 or 7, verify or enter the RR amount of the payment.

7. SUP AMOUNT

• If the reason code is B or C and the object code is 4, 5, or 7, verify or enter the SUP amount of the payment.

8. SS AMOUNT
If the reason code is B or C and the object code is 2, 5, or 6, verify or enter the SS amount of the payment.

9. SS FUND CODE

If the reason code is B or C and the object code is 2, 5, or 6, verify or enter the SS Trust Fund Information. The code entered is “1” for OASI and “2” for DI.

10. RECLAIM PARTIAL

DO NOT make an entry.

11. AMOUNT

DO NOT make an entry.

After all of the entries on this screen have been made or verified, press the PF-2 key to activate the edit process. Handle any error messages according to sections 9.7.84 and 9.7.88.

9.7.82 Entering Reclamation On Fast Payment Investigation

After determining that a reclamation action should be entered on FAST and that the correct annuitant record is displayed on the DATA-Q screen, press the PF-9 key.

NOTE: Requests for non-recurring payments (i.e., accruals, One Pay Only, or Courtesy Disbursements) require additional information maintained in PSD-CSS.

A. Payment Investigation Review Menu

The cursor will position itself under the entry fields in the following order.

1. SELECT OPTION

   - If it is necessary to review, modify or delete a pending transaction, enter the two-digit menu number corresponding to the payment date. (See sections 9.7.86 and 9.7.87 for instructions on modifying or deleting pending transactions.)

   - To enter a new transaction, do not make an entry in this field. Use the TAB key to move the cursor to the next field.

2. UNIT ID

   - Enter your 4-digit organization code in the UNIT ID field.

   - Press the ENTER key. The first data entry screen will appear.
B. Payee Identification Information Screen

The cursor will position itself under the entry fields in the following order.

1. **REASON CODE**
   - Enter the appropriate reason code. Depending upon the particular circumstances, reason code E, F, S, T or U must be entered for a reclamation action. Refer to section 9.7.74 for the table of reason codes.

2. **DECEASED NAME**
   - If the reason code is E or T, enter the name of the deceased payee, or deceased representative payee. In check cases when the annuitant died but the representative payee is still alive, the reason code should be “F” and this field should be left unfilled.
   - Enter the payee’s last name followed by a blank, followed by first name, followed be a blank, followed by middle initial. If the surname, first name and middle initial do not fit in 22 positions, use the first initial rather than the first name.

   Example: ROBERT L DOUGLAS should be entered as:
   DOUGLAS ROBERT L

3. **DATE OF EVENT**
   - If the reason code is E or T, enter the month, day, and 4-digit year; e.g. 1999, that the payee died. If the exact day is not known, enter the first day of the month. Entering “00” for the day will cause an error message.

4. **NAME/ADDRESS**
   - In the majority of cases, this field will be pre-filled from DATA-Q. Verify that the name, street address or box number, city and state for the annuitant or representative payee is that to which the last payment was released.
   - If the information in this field is not correct, or the field is blank, type in the correct data.
   - DO NOT precede the address with the cent sign or a group mark. The edit process will not pass those characters.

5. **REP PAYEE DEC’D**
• Enter an “X” in this field if the action is being taken because of the death of the representative payee.

6. GEOGRAPHIC CODE

• If the address entered is a foreign address, enter the three-digit geographic code (see RCM 10.2 Appendix B).

After all of the entries on this screen have been made or verified, press the PF-2 key to activate the edit process. If the input passes the edits, this message will appear on the screen:

“PAYEE ID INFORMATION IS CORRECT – PRESS PF2 TO CONTINUE”

Press the PF-2 key a second time. The second data entry screen will appear.

If an invalid entry has been made, the cursor will position itself under the invalid item and an error message will be displayed on the screen. Refer to RCM 9.7.84 and 9.7.88 for instructions on handling error messages.

C. Bank identification Information Screen

If the payment to be reclaimed is a Direct Deposit/Electronic Funds Transfer (DD/EFT) payment, all four of the fields on this screen must be completed. If the payment is not a DD/EFT payment, these items must be blank.

In the majority of cases, these items will be pre-filled from DATA-Q or the pending transaction with the earliest chronological payment date. Verify the information and type in any corrections. If these fields are pre-filled, but the payment to be reclaimed was not released DD/EFT, use the space bar to delete the data in all four fields.

The cursor will position itself under the data entry fields in the following order.

1. BANK ROUTING NUMBER

   • Enter or verify the routing number of the Financial Institution (FI) corresponding to the payment in question.

2. CHECK DIGIT

   • Enter or verify the check digit of the FI as corresponding to the payment in question.

3. DEPOSITOR ACCOUNT NUMBER
• Enter or verify the depositor account number. The first digit of the account number must be entered on the first position to the left. Leave blank any positions after the account number.

4. TYPE BANK ACCOUNT

• Enter or verify the type of account at the FI. Enter “C” if the account is a checking account, “S” if the account is a savings account.

After all of the entries on this screen have been made or verified, press the PF-2 key to activate the edit process. Handle any error messages according to sections 9.7.84 and 9.7.88. When the input passes the edits the third data entry screen will appear.

D. Payment Identification Information Screen

The cursor will position itself under the entry fields in the following order.

1. PAYMENT DATE

• Enter the month and 4-digit year; e.g. 1999, that the payment was dated. If the month is only one digit, enter the digit in the second position and enter a zero in the first position (e.g., 08-1999 for August 1999).

2. PAYMENT AMOUNT

• Verify the amount of the payment pre-filled from DATA-Q. If the amount is not correct, type in the correct amount.

3. PAYMENT TYPE

• The system will pre-fill a “1” – recurring payment. Enter or verify the type of payment in question according to the following table.

  1 – Recurring payment

  2 – Accrual or One Payment Only

  9 – Courtesy Disbursement (Replacement check)

At this point, if a partial reclamation amount or an accrual, one payment only or replacement check is no involved, press the PF-2 key to activate the edit process. If partial reclamation is necessary, continue to fields 10 and 11.

4. FIRST CHECK NO
• If the payment involved is recurring, DO NOT make an entry in this field.

• If the payment to be reclaimed is an accrual or one payment only check, obtain the check number from Treasury’s PACER system. If the check number is less than eight digits, zero-fill the number from the left so that the last digit of the number is in the last position on the right (e.g. 0 0 9 9 9 9 9 9 ).

• If the payment to be reclaimed is a replacement check, obtain the exact check number from Treasury’s TIE FILE system.

5. OBJECT CODE

• DO NOT make an entry. Use the TAB key to move the cursor to the next field.

6. RR AMOUNT

• DO NOT make an entry. Use the TAB key to move the cursor to the next field.

7. SUP AMOUNT

• DO NOT make an entry. Use the TAB key to move the cursor to the next field.

8. SS AMOUNT

• DO NOT make an entry. Use the TAB key to move the cursor to the next field.

9. SS FUND CODE

• DO NOT make an entry. Use the TAB key to move the cursor to the next field.

10. RECLAIM PARTIAL

• If the amount to be reclaimed is less than the “PAYMENT AMOUNT,” enter an “X” in this field.

11. AMOUNT

• If an “X” has been entered in the “RECLAIM PARTIAL” field, enter the amount to be reclaimed in this field.
After all of the entries on this screen have been lade or verified, press the PF-2 key to activate the edit process. Handle any error messages according to sections 9.7.84 and 9.7.88.

9.7.83 Entering Photocopy or Status Request On Fast Payment Investigation

After determining that a photocopy request should be entered on FAST and that the correct annuitant’s/beneficiary’s record is displayed on the DATA-Q screen, press the PF-9 key.

NOTE: Requests for non-recurring payments (i.e., accruals, One Pay Only, or Courtesy Disbursements) require the check number.

A. Payment Investigation Review Menu

The cursor will position itself under the entry fields in the following order.

1. SELECT OPTION
   - To enter a new transaction, do not make an entry in this field. Use the TAB key to move the cursor to the next field.
   - If it is necessary to review, modify or delete a pending transaction, enter the two-digit menu number corresponding to the payment date. (See sections 9.7.86 and 9.7.87 for instructions on modifying or deleting pending transactions.)

2. UNIT ID
   - Enter your 4-digit organization code in the UNIT ID field.
   - Press the ENTER key. The first data entry screen will appear.

B. Payee Identification Information Screen

The cursor will position itself under the entry fields in the following order.

1. REASON CODE
   - Enter the appropriate reason code. Depending upon the particular circumstances, reason code K, L, or M must be entered for a photocopy or status request. Refer to section 9.7.74 for the table of reason codes.

2. DECEASED NAME
• DO NOT make an entry. Use the TAB key to move the cursor to the next field.

3. DATE OF EVENT

• DO NOT make an entry. Use the TAB key to move the cursor to the next field.

4. NAME/ADDRESS

• Treasury will use the information entered in this field to forward photocopies of checks to the RRB. Show “RR RET BD” in the first line, the bureau, unit, and last name of the requestor, in the second line, and the address, city, state and zip code in the third and fourth lines.

EXAMPLE:

RR RET BD

RBD-RPS-SMITH

844 N RUSH ST

CHICAGO IL

60611

• If a payee, his family, or representative payee requests a photocopy of a check because there is a question about the payment having been received, process the request as a non-receipt claim.

After all of the entries on this screen have been made or verified, press the PF-2 key to activate the edit process. If the input passes the edits, the following message will appear:

“PAYEE ID INFORMATION IS CORRECT – PRESS PF-2 TO CONTINUE”

If an invalid entry has been made, the cursor will position itself under the invalid item and an error message will be displayed on the screen. Refer to sections 9.7.88 for instructions on handling error messages.

C. Bank identification Information Screen

A photocopy or status request should not be entered for a Direct Deposit/ Electronic Funds Transfer (DD/EFT) payment. When entering a photocopy or status request for a payment which was not released DD/EFT, but the fields on this screen have been pre-filled from DATA-Q or the pending transaction with the
earliest chronological payment date, delete the DD/EFT information from all four fields using the space bar. After all of the entries on this screen have been deleted, press the PF-2 key to activate the edit process.

D. Payment Identification Information Screen

The cursor will position itself under the entry fields in the following order.

1. PAYMENT DATE
   - Enter the month and 4-digit year; e.g. 1999, that the payment was dated. If the month is only one digit, enter the digit in the second position and enter a zero in the first position (e.g., 08-1999 for August 1999).

2. PAYMENT AMOUNT
   - Verify the amount of the payment pre-filled from DATA-Q or the pending transaction with the earliest chronological payment date. If the amount is not correct, type in the correct amount.

3. PAYMENT TYPE
   - The system will pre-fill a “1” – recurring payment. Enter or verify the type of payment in question according to the following table.
     1 – Recurring payment
     2 – Accrual or One Payment Only
     9 – Courtesy Disbursement (Replacement check)

4. FIRST CHECK NO
   - If the payment involved is recurring, DO NOT make an entry in this field.
   - If the request is for an accrual or one payment only check, obtain the check number from Treasury’s PACER system. If the check number is less than eight digits, zero-fill the number from the left so that the last digit of the number is in the last position on the right (e.g. 0 0 9 9 9 9 9 9).
   - If the request is for a replacement check, obtain the exact check number from Treasury’s TIE FILE system.
   - The remaining entries on the screen are not applicable for a photocopy or status request. Therefore, press the PF-2 key to
activate the edit process. Handle any error messages according to sections 9.7.84 and 9.7.88.

9.7.84 Editing Data

A. Input Passes Edits

To activate the edit process for the entire record, the PF2 key is pressed after the entries on the third data entry screen (Payment Identification Information) have been completed. If the data passes the edits, this message will appear in white on the screen:

“NO ERRORS DETECTED, HIT PF-2 TO SUBMIT RECORD TO DATABASE.”

NOTE: If the data passes the edits after pressing the PF-2 key the first time, the data cannot be changed at this point. If it is necessary to make a change, use the modification or deletion functions according to sections 9.7.86 and 9.7.87.

Press the PF-2 key a second time. In response to the PF-2 key a confirmation message will appear in white on the screen.

“RECORD HAS BEEN ADDED TO THE DATABASE,
HIT PF-2 TO CONTINUE.”

B. Input Does Not Pass Edits

If invalid entry is made, the cursor will be positioned under the invalid item and an error message will be displayed on the screen. FAST can only indicate one invalid entry at a time. Therefore, after correcting the invalid item and hitting the PF-2 key, the system may identify a second item needing correction.

When the edit process is activated after the user has entered or verified the data on the final data entry screen, and any item on a prior screen has not passed the edits, the prior screen will appear, and an error message will be displayed on the screen. When all the data is valid, this message will appear on the screen:

“NO ERRORS DETECTED,
HIT PF-2 TO SUBMIT RECORD TO DATABASE.”

Refer to section 9.7.88 for a full discussion of edit messages and corrections.

Press the PF-2 key. This confirmation message will appear in white on the screen:
“RECORD HAS BEEN ADDED TO DATABASE,
HITPF-2 TO CONTINUE.”

C. Return to DATA-Q

To enter a payment investigation transaction on a different record, or return to DATA-Q, press the PF-6 key.

D. Finish with FAST/DATA-Q

When finished with FAST/DATA-Q press the clear key to return to the RRAPID Main Menu and enter an “X” next to the word “SELECTION”.

9.7.85 Pending Transactions

A payment investigation transaction pends on the database until it is batched and processed and transmitted to Treasury at the close of each business day. When a transaction for a particular payee is pending on the database, the data that was input to create the transaction may be viewed on the data entry screens. (Refer to RCM 9.7.72 for instructions on accessing payment investigation data entry screens.) A pending transaction may be modified or deleted, if necessary, before it is removed from the FAST database for processing.

FAST-Payment Investigation transactions can be modified an unlimited number of times while they are pending on the database. Payment Investigation transactions created by the Automated Receivables, Reclamations, and Credits (ARRC) system cannot be viewed on PIENTRY.

9.7.86 Modifying a Pending Transaction

If a pending transaction exists, the payment date of the transaction will appear on the Payment Investigation Review Menu. If you wish to modify a pending transaction, locate the payment date of the transaction to be modified and take the following action:

- Enter the two-digit menu number corresponding to the payment date in the SELECT OPTION field. If there is more than one payment date shown that needs to be changed, each payment date must be modified separately.

- Enter your unit ID and hit the ENTER key. The cursor will automatically move to the first field of the first data entry screen.

- Use the TAB key to move the cursor to the field(s) that need to be changed. Modify data by typing over the entries in a given field.
• Press the PF-2 key to re-enter information for the first two screens whether or not a change was made. This is necessary in order to build a complete record. The system will automatically advance to the next screen.

• After making the changes (if any) on the final screen, press the PF-3 key.

If the data is valid, this message will appear on the screen:

“NO ERRORS DETECTED,
HIT PF-3 TO MODIFY CURRENT RECORD ON THE DATABASE.”

NOTE: If the data passes the edits after pressing the PF-3 key the first time, the data cannot be changed at this point. If it is necessary to make a change, again use the modification function or use the deletion function according to sections 9.7.86 and 9.7.87.

• To enter the transaction, press the PF-3 key again. This message will appear on the screen.

“RECORD ON DATABASE HAS NOW BEEN MODIFIED,
HIT PF-2 TO CONTINUE.”

If the data is invalid, an error message will be displayed and the cursor will position itself under the erroneous entry. Refer to section 9.7.88 for edit messages and corrective actions. Make corrections and press the PF-3 key again until all input data is valid and the modification is made.

9.7.87 Deleting a Pending Transaction

After determining that a pending action should be deleted, e.g. the transaction was for the wrong payment or the payee is no longer claiming non-receipt, locate the payment date of the transaction to be deleted on the review menu and take the following action:

• Enter the two-digit menu number corresponding to the payment date in the SELECT OPTION field. If there is more than one payment date shown that needs to be deleted, each payment date must be deleted separately.

• Enter your four digit unit ID and hit the ENTER key. The cursor will automatically move to the first field of the next screen.

• Use the PF-8 key to page forward to the final entry screen.

• Press the PF-4 (Delete) key.

If the data is valid, this message will appear on the screen:
“NO ERRORS DETECTED, HIT PF-4 TO SUBMIT
DELETION ACTION TO THE DATABASE.”

NOTE: If the data passes the edit after pressing the PF-4 key the first time, the deletion cannot be changed at this point. If the data should not be deleted, it will be necessary to again enter it.

- To enter the deletion, press PF-4 again. This message will appear on the screen:

  “RECORD ON DATABASE IS NOW A DELETION RECORD,
  HIT PF-2 TO CONTINUE.”

If the data is invalid, an error message will be displayed and the cursor will position itself under the erroneous entry. Refer to section 9.7.88 for edit messages and corrective actions. After correcting the data, press PF-4.

9.7.88 Edit Messages and Corrective Actions

Activity entered through PIENTRY is edited on-line. The activity is not passed to the database until all the input information has cleared all edits. Errors are identified through error messages displayed at the bottom of the input entry screen. Errors can be corrected by typing over the erroneous entry with the correct information. Since most errors can be identified and corrected on-line, few FAST-Payment Investigation transactions reject. Listed below are the error messages that are displayed in the FAST edit process, and the corrective action that should be taken. The messages are listed according to the screen in which they will appear.

REVIEW MENU

A. SELECT OPTION

Message: “SELECT OPTION IS INCORRECT. PLEASE REENTER. PRESS ENTER.” This edit occurs if a menu number, which does not contain a payment date, is entered. This edit will also occur if a number greater than 25 is entered.

Correction: Type in a valid two-digit menu number or leave as 00.

B. UNIT ID

Message: “UNIT ID IS INCORRECT. PLEASE REENTER - PRESS ENTER.” This edit occurs if the UNIT ID has been omitted or is incomplete.

Correction: Type in the correct UNIT ID.
DATA ENTRY SCREEN ONE – PAYEE IDENTIFICATION INFORMATION

1. Message: “ENTER OR VERIFY BENEFICIARY SYMBOL.” This edit occurs if the beneficiary symbol has been omitted, or is incomplete.
   Correction: Type in the correct beneficiary symbol (e.g., M, W, WC) or leave blank.

2. Message: “ENTER OR VERIFY PREFIX.” This edit occurs if the prefix has been omitted, or is incomplete.
   Correction: Type in an A, D or H.

3. Message: “ENTER OR VERIFY CLAIM NUMBER.” This edit occurs if the claim number has been omitted, or is incomplete.
   Correction: Type in the correct claim number.

4. Message: “ENTER VALID REASON CODE – MUST BE – A B C D E F G K L M S T U.” This edit occurs if the reason code is anything other than A B C D E F G K L M S T or U.
   Correction: Type in an A B C D E F G K L M S T or U. (See section 9.7.74 for a listing of the reason codes and their uses.)

5. Message: “ENTER OR VERIFY ZIP OR GEOGRAPHICAL CODE.” This edit occurs if the last two positions of this field are blank and the first three positions are less than 561 or greater than 998 or the entry is non-numeric.
   Correction: Type in the correct ZIP or GEOGRAPHICAL code in accordance with Appendix B of RCM 10.2 or the ZIP master.

6. Message: “ENTER OR VERIFY PAYEE CODE.” This edit occurs if the payee code is a blank or an alpha character.
   Correction: Type in the correct payee code.

7. Message: “REASON DOE E OR T – ENTER DATE OF EVENT.” This edit occurs if the code is E or T and the date of the event is blank or incomplete.
   Correction: Verify that the reason code should be E or T and type in date of event in the MM-DD-YYYY format.

8. Message: “REASON DOE E OR T – ENTER PAYEE/DECEASED NAME.” This edit occurs if the reason code is E or T and the payee/deceased name is blank or incomplete.
Correction: Verify that the reason code should be E or T. Type in the payee/deceased name. The name should be entered – last name, followed by a space, first name, followed by a space, followed by the middle initial.

9. Message: “ENTER OR VERIFY NAME AND ADDRESS.” This edit will occur if the name and address are blank or incomplete.

Correction: Type in the beneficiary’s name and address. If the reason code is K, the address must end with:

844 N RUSH ST
CHICAGO IL 60611

10. Message: “REMOVE GROUP MARK FROM ADDRESS.” This edit will occur if the cent or group mark is entered in the NAME/ADDRESS field.

Correction: Delete the cent sign or group mark from the address.

DATA ENTRY SCREEN TWO – BANK IDENTIFICATION INFORMATION

1. Message: “ENTER OR VERIFY CHECK NUMBER.” This edit occurs if the type of payment is 2 or 9 and the check number is incomplete or blank.

Correction: Type in the correct check number. If the type of payment is 2 or 9, an entry must be made.

2. Message: “ENTER OR VERIFY BANK ID INFO.” This edit occurs when direct deposit information is left blank in any of the following fields: check digit, bank routing number, depositor account number and/or bank account fields. If all four fields are blank the edit will not be applied.

Correction: Type the correct bank information for any field(s) not entered.

3. Message: “ENTER OR VERIFY BANK ROUTING NUMBER.” This edit occurs if the bank routing number is blank or incomplete and the check digit, bank account and depositor account number are entered, or if the bank routing number entered is not a valid routing number.

Correction: Enter the correct bank routing number.

4. Message: “ENTER OR VERIFY DEPOSITOR ACCOUNT NUMBER.” This edit occurs if the depositor’s account number is blank or incomplete and the routing number, check digit, or bank account entries are entered.
Correction: Type the correct bank information for any field(s) not entered.

DATA ENTRY SCREEN THREE – PAYMENT IDENTIFICATION INFORMATION

1. Message: “ENTER OR VERIFY PAYMENT DATE.” This edit occurs when the payment date is:
   - blank, or
   - not numeric, or
   - the first two positions are greater than 12.

   Correction: Enter a payment date that is:
   - numeric, or
   - The first positions are 01 through 12.

2. Message: “PAYMENT DATE GREATER THAN CURRENT DATE - ENTER VALID PAYMENT DATE.” This edit occurs when the payment date is greater than the current month and year.

   Correction: Enter the correct payment date.

3. Message: “ENTER OR VERIFY PAYMENT AMOUNT.” This edit occurs if the payment amount is:
   - blank, or
   - non-numeric.

   Correction: Enter a numeric amount.

4. Message: “ENTER PAYMENT TYPE – MUST BE 1-RECUR, 2-OPO/ACCR, 9-REPLACEMENT.” This edit occurs when a number other than a 1, 2 or 9 has been entered or the payment type is blank.

   Correction: Enter payment type 1, 2 or 9.

5. Message: “ENTER OR VERIFY RECLAIM PARTIAL CODE.” This edit occurs if any character other than “X” has been entered.

   Correction: Enter “X” in this field, or delete the entry if partial reclamation is not involved.

6. Message: “ENTER OR VERIFY RECLAIM PARTIAL AMOUNT.” This edit occurs when:
• the partial amount is non-numeric, or
• the partial reclamation code is entered and
• the partial amount is blank or incomplete, or
• a partial amount which does not equal the payment amount is entered.

Correction: Type in a Reclaim Partial amount that is less than the payment amount, or delete the reclaim partial code if partial reclamation is not involved.

The following messages will only appear if the reason code is B or C.

7. Message: “VERIFY OBJECT CODE – 0=RR, 1=SMI REF, 2=SS, 4=SUP, 5=RR/SS/SUP, 6=RR/SS, 7=RR/SUP.” This edit occurs if:
   • the reason code is B or C, and
   • the object code is blank, or
   • the object code is other than, 0, 1, 2, 4, 5, 6 or 7

Correction: Enter a valid object code.

8. Message: “OBJECT CODE IS 0-SS FUND CODE MUST BE SPACE.” This edit occurs when the object code is 0 and the SS fund code field is not blank.

Correction: Verify the object code and delete the entry in the SS FUND CODE field.

9. Message: “OBJECT CODE IS 0-SUPP AMOUNT MUST=0.00.” This edit occurs when the object code is 0 and an amount is entered in the SUP AMOUNT field.

Correction: Verify the object code and delete the entry in the SUP AMOUNT field.

10. Message: “OBJECT CODE IS 0 SS AMOUNT MUST=0.00.” This edit occurs when the object code is 0 and an amount is entered in the SS AMOUNT field.

Correction: Verify the object code and delete the entry in the SS AMOUNT field.
11. Message: “OBJECT CODE IS 1-SS FUND CODE MUST BE SPACE.” This edit occurs when the object code is 1 and the SS FUND CODE field is not blank.

Correction: Verify the object code and delete the entry in the SS FUND CODE field.

12. Message: “OBJECT CODE IS 1-SUP AMOUNT MUST = 0.00.” This edit occurs when the object code is 1 and an amount is entered in the SUP AMOUNT field.

Correction: Verify the object code and delete the entry in the SUP AMOUNT field.

13. Message: “OBJECT CODE IS 1-SS AMOUNT MUST = 0.00.” This edit occurs when the object code is 1 and an amount is entered in the SS AMOUNT field.

Correction: Verify the object code and delete the entry in the SS AMOUNT field.

14. Message: “OBJECT CODE IS 1-RR AMOUNT MUST = 0.00.” This edit occurs when the object code is 1 and an amount is entered in the RR AMOUNT field.

Correction: Verify the object code and delete the entry in the RR AMOUNT field.

15. Message: “OBJECT CODE IS 2-RR AMOUNT MUST = 0.00.” This edit occurs when the object code is 2 and an amount is entered in the RR AMOUNT field.

Correction: Verify the object code and delete the entry in the RR AMOUNT field.

16. Message: “OBJECT CODE IS 2-SUPP AMOUNT MUST = 0.00.” This edit occurs when the object code is 2 and an amount is entered in the SUP AMOUNT field.

Correction: Verify the object code and delete the entry in the SUP AMOUNT field.

17. Message: “OBJECT CODE IS 4-SS FUND CODE MUST BE SPACE.” This edit occurs when the object code is 4 and the SS FUND CODE field is not blank.

Correction: Verify the object code and delete the entry in the SS FUND CODE field.
18. **Message:** "OBJECT CODE IS 4-SS AMOUNT MUST = 0.00." This edit occurs when the object code is 4 and an amount is entered in the SS AMOUNT field.

**Correction:** Verify the object code and delete the entry in the SS AMOUNT field.

19. **Message:** "OBJECT CODE IS 4-RR AMOUNT MUST = 0.00." This edit occurs when the object code is 4 and an amount is entered in the RR AMOUNT field.

**Correction:** Verify the object code and delete the entry in the RR AMOUNT field.

20. **Message:** "OBJECT CODE IS 6-SUP AMOUNT MUST = 0.00." This edit occurs when the object code is 6 and an amount is entered in the SUP AMOUNT field.

**Correction:** Verify the object code and delete the entry in the SUP AMOUNT field.

21. **Message:** "OBJECT CODE IS 7-SS FUND CODE MUST BE SPACE." This edit occurs when the object code is 7 and the SS FUND CODE field is not blank.

**Correction:** Verify the object code and delete the entry in the SS FUND CODE field.

22. **Message:** "OBJECT CODE IS 7-SS AMOUNT MUST = 0.00." This edit occurs when the object code is 7 and an amount is entered in the SS AMOUNT field.

**Correction:** Verify the object code and delete the entry in the SS AMOUNT field.

23. **Message:** "ENTER OR VERIFY SS FUND CODE – MUST BE 1-OASI OR 2-DI." This edit occurs if either of the following situations exist.

   - The object code is 2, 5 or 6 and the SS fund code is blank or a code other than 1 or 2.

**Correction:** Enter a code 1 for OASI or code 2 for DI.

   - The object code is 0, 1 or 4 and the SS Fund code is not blank.

**Correction:** Delete the entry in the SS Fund code field.
24. **Message:** “ENTER OR VERIFY RR AMOUNT.” This edit occurs if either of the following situations exist.
   - The object code is 0, 5, 6 or 7 and the RR amount is blank.
   **Correction:** Enter the correct RR amount.
   - The object code is other than 0, 5, 6 or 7 and the RR amount is not blank.
   **Correction:** Delete the RR amount, or correct the object code.

25. **Message:** “ENTER OR VERIFY SS AMOUNT.” This edit occurs if either of the following situations exist.
   - The object code is 2, 5 or 6 and the SS amount is blank.
   **Correction:** Enter the correct SS amount.
   - The object code is other than 2, 5 or 6 and the SS amount is not blank.
   **Correction:** Delete the SS amount, or correct the object code.

26. **Message:** “ENTER OR VERIFY SUP AMOUNT.” This edit occurs if either of the following situations exist.
   - The object code is 4, 5 or 7 and the SUP amount is blank.
   **Correction:** Enter the correct SUP amount.
   - The object code is other than 4, 5 or 7 and the SUP amount is not blank.
   **Correction:** Delete the SUP amount, or correct the object code.

### 9.7.100 Processed Activity

Activity that has been input to the FAST-Payment Investigation Entry (PIENTRY) system will remain on the PIENTRY screens until it has been processed and sent to Treasury at the close of each business day. Pending transactions can be modified or deleted, as necessary. Therefore, if the transaction can be viewed on PIENTRY, it has not yet been sent to Treasury.

### 9.7.101 System Output

PIENTRY processing prepares two files, a claim file containing the transactions for transmission to Treasury and an initial status disposition file that is updated to
PISTATUS. In addition to the files, the system produces a letter to the annuitant/beneficiary acknowledging the non-receipt claim and ARRC reject notices.

**Acknowledgment Letters**

The letters are delivered to the mailroom for release. Only an original letter is produced. A copy is not generated for the field office.

RL-37 – Released when the payment involved was sent via EFT and the reason code on the transaction is C.

RL-38 – Released when the payment involved was a paper check and the reason code on the transaction is B or C.

RL-39 – Released when the payment involved was a paper check and the reason code on the transaction is G.

### 9.7.105 Payment Investigation On-Line Status System (PISTATUS)

The Payment Investigation On-Line Status (PISTATUS) System allows individuals to view the status of non-receipt claims and reclamations, photocopy, and status requests made by the Railroad Retirement Board (RRB) to the Department of the Treasury (Treasury). The PISTATUS screens will display all transactions entered on FAST-Payment Investigation Entry (PIENTRY) and transactions received from the Automated Receivable, Reclamation, and Credit (ARRC) system, plus status messages and processing dates, the user signon, and unit ID. PISTATUS is updated on a daily basis. The information for a specific transaction will be maintained on the system for 18 months.

PISTATUS is available to both headquarters and field personnel. PISTATUS is a view-only system. Data to create a transaction must be entered on PIENTRY (see sections 9.7.71 to 101) or through ARRC.

If it is necessary to access DATA-Q initially to extract some needed date, the PISTATUS screen can be accessed through DATA-Q. Otherwise, if an inquiry only relates to payment investigation status, then PISTATUS can be directly accessed from the main menu of the Railroad Automated Processing Integrated Database (RRAPID).

PISTATUS will display one of two types of status messages depending on what action has been completed at the time the system is viewed. The two types of messages are as follows:

**Transmitted to Treasury**
If the transaction has been transmitted to Treasury’s Regional Financial Center (RFC), but we have not yet received the disposition (response) file showing Treasury’s action, the STATUS MESSAGE displayed will be “SENT TO TREASURY.” The date the transaction was submitted to Treasury will be shown under RRB PROC DT.

RFC Response

After Treasury has processed the file containing our transactions, they will return a disposition file showing the action they took, PISTATUS will be updated to reflect this action; the check number or EFT trace number and check symbol (CK NUMBER-SYM) and RFC processing date (RFC PROC DT) will be added to the screen. In addition the RRB PROC DT will be updated to show the date the disposition file was processed at RRB.

9.7.110 Viewing STATUS

(PISTATUS) consists of two screens, a PISTATUS Menu and a PISTATUS Screen

PAYMENT INVESTIGATION

STATUS MENU

This screen displays the payment dates of transactions processed for the beneficiary in the last 18 months. Any one of these transactions can be reviewed by entering the corresponding menu number in the SELECT OPTION field and pressing ENTER.

SELECT OPTION is a three-digit field in order to accommodate menu items numbered over 99. While the menu will display only the payment dates for the 24 latest transactions, the total number of transactions on the status database, for that beneficiary, is displayed in the TOTAL field. Any number up to the TOTAL may be entered in the SELECT OPTION field.

- Beneficiary On DATA-Q

If the beneficiary’s record is on DATA-Q, select the DATA-Q record and press the PF-13 key. The payment investigation Status Menu will appear.

- Beneficiary Not ON DATA-Q

If the beneficiary’s record is not on DATA-Q, verify the claim number. If the claim number is correct, press the CLEAR key to return to the RRAPID Main Menu. Select the number assigned to PISTATUS on the RRAPID Main Menu and enter it next to the word, SELECTION. Press ENTER and the payment investigation status menu appears.

Enter the following:

- Beneficiary symbol (e.g. W, WC, M, L)
• Prefix (A, D, H)
• Claim number, and
• Payee code.

Then press the ENTER key. The payment dates of transactions processed for that beneficiary, within the last 18 months will be displayed on the screen. Any of the transactions can be reviewed by entering the corresponding menu number in the SELECT OPTION field and pressing ENTER. The status screen for that particular payment date will appear.

PAYMENT INVESTIGATION STATUS

This screen contains information regarding the status of non-receipt claims and reclamation, photocopy, and status requests. It is not necessary to return to the menu screen in order to view transactions for other payment dates. Use PF-7 to page back and PF-8 to page forward to view the status screens of transactions for other payment dates.

The following is a description of the fields displayed on the Payment Investigation Status screens.

A. Identifying Data

1. CLAIM NUMBER P/C
   • The beneficiary symbol, prefix, claim number and payee code shown on the payment in question.

2. NAME/ADDRESS
   • In a non-receipt claim, this will be the most current name and address, or that which was shown on the statement of non-receipt.
   • In a reclamation or status request, this will be the name and address shown in the last payment released.
   • In a photocopy request this will be the name and location to which the photocopy will be forwarded.

3. GEO CODE
   • If the address shown in NAME/ADDRESS is a foreign address, the three-digit geographical code will be displayed. (See RCM 10.2 Appendix B)

4. REQUESTOR UNIT ID
• The user ID, or signon, and the organization code of the person that entered the original transaction on FAST-Payment Investigation will be displayed.

• If the ARRC system was used to enter the original transaction, G-333 will be shown under REQUESTOR and the UNIT ID field will show zeroes.

B. Direct Deposit Data

If the payment involved is a Direct Deposit/Electronic Funds Transfer (DD/EFT) payment the following fields will contain data. In check cases these fields will be blank.

1. ROUTING NO

• The routing number and check digit of the financial institution (FI) to which the payment was released.

2. ACCT TYPE

• The type of account at the FI to which the payment was released; CHECKING or SAVINGS.

3. ACCOUNT NUMBER

• The depositor account number at the FI.

C. Payment Information

1. PAYMENT DT

• The month and year that the payment was issued.

2. PAYMENT AMT

• The amount of the payment involved.

3. PAYMENT TYPE

• The type of payment involved.
  
  REC – Recurring or monthly payment
  
  ACC – Accrual or One Payment Only
  
  CSY – Courtesy Disbursement
4. CK NUMBER-SYM
   
   • The check number or EFT trace number and check symbol of the payment involved. This data is provided by Treasury.

   Exception: When the payment involved is an accrual or one payment only, or a replacement check, the check number will have been entered by RRB, and verified by Treasury.

D. Status Data

1. REASON
   
   • The reason code and description of the action requested (i.e., non-receipt claim, reclamation request, photocopy request). A list of the possible reason codes and their description follow:

   A: RRB REISSUE BEFORE STATUS

   Used by Headquarters in dire need non-receipt situations or when due checks are returned to the RRB for reissuance. RRB recertifies a second payment before Treasury determines the status of the original payment. A stop code A is valid only for check payments.

   B: MASS LOSS

   Used at the discretion of Headquarters in mass loss situations. Treasury issues a replacement before the status of the original check is known. A stop code B is valid only for check payments and is to be used only in the month the payment was issued.

   C: NON-RECEIPT-RFC REISSUE

   Used by Headquarters and field offices in routine non-receipt situations. In check cases, Treasury issues a replacement check only after the original payment is determined to be outstanding (uncashed). In EFT cases, Treasury releases a trace request, Form FMS-150.1 or Form FMS-150.2, to the FI.

   D: NON-RECEIPT-RRB REISSUE

   Used by Headquarters in non-receipt situations requiring additional adjudication action. RRB recertifies a second payment after the status of the original payment is determined to be outstanding (uncashed) and the credit is received from Treasury.

   E: RECLAMATION-DECEASED
Used by Headquarters when the payee died prior to issuance of the check or DD/EFT payment. In representative payee cases, when payments were made by check, reason code E is used only if the representative payee is the one who died. When payments were made by DD/EFT, reason code E is used when the annuitant or representative payee died.

**F: RECLAMATION-OTHER**

Used by Headquarters when the payee is not entitled to all or part of the proceeds of the payment. In representative payee cases, when payments were made by check, reason F is used when the annuitant died but the representative payee is alive. A stop code F is valid only for check payments.

**G: LOST/STOLEN ENDORSED CK**

Used by Headquarters when the payee endorsed the check and the check was then lost or stolen. A code G is valid only for check payments.

**K: PHOTOCOPY**

Used by Headquarters when a photocopy of a check is required for agency use. A code K is valid only for check payments.

**L: CERTIFIED PHOTOCOPY**

Used by Headquarters when the photocopy must be certified to satisfy legal requirements. A code L is valid only for check payments.

**M: STATUS**

Used by Headquarters when the payment status of a check is required for agency use, or the annuitant claims non-receipt of a check that is more than a year old and there is no record that the check was previously cancelled.

**S: AGENCY MATCH-NON ENTITL**

Used by Headquarters when cross-reference with another agency’s record indicates that the payee is not entitled to all or part of the proceeds of the check, and RRB has not confirmed the non-entitlement report. A code S is valid only for check payments.

**T: AGENCY MATCH-DECEASED**
Used by Headquarters when cross reference with another agency’s record indicates that the payee is deceased, and RRB has not confirmed the report of death. A code T is valid only for DD/EFT payments.

**U: RECLAMATION-LEGAL INCAP**

Used by Headquarters when the payee has been declared incompetent. A code U is valid only for DD/EFT payments.

2. **RFC PROC DT**
   - The date Treasury’s Regional Financial Center (RFC) processed the transaction.

3. **RRB PROC DT**
   - The date the status record is created or updated by RRB. A record will remain on the system for 18 months from this date.

4. **ORIG REQ DT**
   - The date the original transaction was created by RRB. This field will show zeroes until a response is received from Treasury.

5. **PREV ACTION DT**
   - The date that a previous action was processed by RFC for this payment.

6. **PI UPDATED**
   - The date that PI STATUS was most recently updated.

7. **STATUS MESSAGE**
   - The status of the transaction. The status messages are listed and defined in section 9.7.115.

### 9.7.115 Status Messages

**A. Confirmation and Reject Messages**

After Treasury has processed the file containing our initial transactions from PIENTRY and ARRC, they will return a disposition file showing the action they took. This file will contain status messages in the form of confirmations and rejects. The initial response is usually received from Treasury in two business days, but 30 days is allowed before tracing. A confirmation indicates that all
necessary agency action has been completed and Treasury is processing the transaction. A reject indicates that Treasury was not able to process the claim based on the information that was provided. The rejected request is referred to the individual that originally submitted the claim for review and resubmission, if necessary.

1. **Confirmation Messages**
   - **SF-1184 PROCESSED**
     
     Initial processing by Treasury is completed. Transactions involving DD/EFT payments are forwarded to the FI. Transactions involving check payments require additional processing by Treasury.

   - **EFT PAYMENT TRACE PROCESSED**
     
     Treasury has released a DD/EFT payment tracer, FMS-150.1 or FMS-150.2, to the FI to investigate the claim of non-receipt.

   - **EFT PROOF OF PAYMENT PROCESSED**
     
     Treasury has confirmed that a DD/EFT was received by the FI. Treasury’s handling is completed.

   - **EFT TRACE FOLLOW-UP PROCESSED**
     
     Treasury has released a follow-up DD/EFT payment tracer, FMS-150.1, to the FI to investigate a previous claim of non-receipt for the payment.

   - **PHOTOCOPY/STATUS REQUEST PROCESSED**
     
     Treasury is processing the photocopy or status request.

2. **Reject Messages**
   - **AMOUNT DIFFERENCE – TREASURY AMOUNT $999999.99**
     
     The payment amount shown on our transaction does not match the amount shown on Treasury records. The requestor will submit a corrected transaction.

   - **CLAIM SUBMITTED TOO EARLY**
     
     The EFT follow-up trace request is less than 30 days from the date the initial non-receipt request was released. You must allow 30-45 days before tracing with Treasury.
3. Paid Status Messages

The following paid status messages apply to check payments and indicate that the check has been cashed. This second step in Treasury’s processing (the first being the confirmation of receipt of the claim from RRB) usually occurs within three business days from the date the claim was initially sent to Treasury. However, 30-45 days is allowed before tracing with Treasury.

- PREV SF-1184 ACTION

A non-receipt or reclamation stop request has already been processed against the payment.

This message will also be generated in a DD/EFT case when a subsequent reclamation request is received after a reclamation request has been processed against other payments involving the same payee based on the same date of death.

- CHECK PREV CANCELLED

The payment was previously cancelled by Treasury. The credit has been forwarded to RRB.

- REJECT – DATE OF EVENT AFTER DATE OF PYMT

The date of death is after the payment date.

- REJECT – INVALID PAYMENT DATA

The direct deposit information is invalid. Treasury’s records indicate that the payment was issued as a paper check.

- NO RECORD OF ISSUE

Treasury has no record that the described payment was issued.

- REJECT – DECEDENT/PAYEE NAME DISAGREE

The name of the deceased and the payee name do not match in a transaction code E or T.

- INVALID STOP REASON CODE

An incorrect stop reason code was used.

- PAID-CERTIFIED PHOTOCOPY TO FOLLOW
In response to a transaction entered with reason code L, Treasury will forward a certified photocopy of the check to the RRB for release to the requestor.

- **PAID-CCG RECLAMATION; NO PHOTOCOPY TO AGENCY**

  In response to a reclamation coded E or T, Treasury will use the photocopy to seek recovery of the check amount from the FI and will credit RRB if the amount is recovered.

- **PAID-COURTESY DISB. ISSUED BEFORE STATUS**

  Treasury will sue this message only for request reason code B. This message confirms that a replacement check was issued as a result of mass loss processing and the original check has been cashed. Treasury will forward a photocopy of the original check and a claim form to RRB for handling. If an overpayment is involved, Headquarters will initiate recovery action.

- **PAID-ENDORSEMENT MAY PROHIBIT CLAIMS ACTION: PHOTOCOPY AND CLAIM TO FOLLOW**

  Treasury will use this status message only for requests coded G. Treasury will send the photocopy and claim form to the RRB for release to the payee.

- **PAID-PHOTOCOPY AND CLAIM TO FOLLOW**

  Treasury will use this status message for requests coded A, C, D, F, S, and U. If the request reason code is C or D, Treasury will forward the photocopy and claim form directly to the payee. In the remaining request codes, the photocopy and claim form will be forwarded to RRB for release to the payee.

- **PAID-PHOTOCOPY TO FOLLOW**

  Treasury will use this status message only for request reason code K. Treasury will forward the photocopy to the RRB for release to the requestor.

- **PAID STATUS**

  Treasury will use this status message only for request reason code M. Treasury is not taking any additional action based on this request.

- **PAID-STATUTE OF LIMITATIONS EXPIRED: NO PHOTOCOPY AVAILABLE**
Treasury will use this status message for request coded K and L. The check has been cashed, but because of the age of the check, Treasury is unable to provide a photocopy.

- **PAID-ISSUE AMOUNT $25 OR LESS; NO FURTHER ACTION WILL BE TAKEN**

  Treasury will use this status message for request codes E and T. Treasury will not pursue any further action because of the amount of the check.

4. **Outstanding Status Messages**

   The following outstanding status messages indicate that the check has not been cashed.

   - **OUTSTANDING-CHECK CANCELLED: AGENCY CREDIT TO FOLLOW**

     This message will be received for request codes A, D, E, F, G, S, T and U. Treasury will cancel the payment and forward the credit to RRB.

   - **OUTSTANDING-NO PHOTOCOPY**

     Treasury will use this status message for request codes K or L. No photocopy can be sent because the check has not been cashed.

   - **OUTSTANDING STATUS**

     Treasury will use this status message only for request code M. Treasury is not taking any additional action.

   - **OUTSTANDING-COURTESY DISB. ISSUED**

     Treasury will use this status message only for request code C. Treasury has issued a replacement check to the payee according to our request.

   - **OUTSTANDING-REPLACEMENT CHECK ISSUED BEFORE STATUS**

     Treasury will use this status message only for request code B. Treasury has issued a replacement check to the payee according to our request for mass loss processing.

5. **Miscellaneous Status Messages**
• PYMT EXCEPTION-CCG WILL INVESTIGATE

The transaction is being handled manually by Treasury's Check Claim Group in Hyattsville, MD. The case must be controlled for the results of the investigation.

• STATUS OF LIMITATION EXPIRED

Treasury is unable to take any claims action because of the age of the check. Treasury will sue this message when a non-receipt or reclamation request is received for a check payment that is over a year old.

• LIMIED PAYABILITY CANCELLATION

This message will be received when a stop code K, L, or M is processed against a payment that remained uncashed 12 months after its issue date. Treasury previously cancelled the check and forwarded the credit to the RRB.

9.7.150 FAST – Change of Address

The FAST system can be used to enter certain types of change of address transactions through the Mainframe instead of submitting PC Form G-607 or keypunching Form SF-1199A. Currently, FAST may be used to change the annuitant's/beneficiary's home address, to add or cancel combined mailing, to add, change, or delete Direct Deposit information, and to add or change representative payee information, including changing direct deposit with a representative payee change.

PC Form G-607 must continue to be used for change of name and change of selected benefit information (e.g., clear mass adjustment earmark, change DOB, change SS Trust Fund, etc.). Also, Form G-607 can still be used to make address changes; to add or delete combined mailing; to add, change or delete Direct Deposit information and to add or change representative payee information even though these same changes can be processed through FAST. Therefore, this on-line system does not obsolete PC Form G-607.

FAST-COA can also be used to mechanically reinstate an annuity that is in code 98 suspense status by processing a change code of '2, 4, 5 or B.' Refer to section 9.7.163 for more details.

9.7.151 How FAST Processes Change Of Address And Direct Deposit Transactions

A. Overview - When a change of address action is processed through FAST, the user:
• calls up the DATA-Q screen of the annuitant or beneficiary whose change of address, Direct Deposit enrollment, or representative payee transaction is to be processed;

• presses the PF-8 key to access the CHANGE OF ADDRESS ENTRY SCREEN (field offices will get the COA/PAYEE ENTRY SCREEN); or PF-10 to access the DIRECT DEPOSIT ENTRY SCREEN;

• enters the required information (change code, unit ID, new address, Direct Deposit information, or representative payee information); and

• responds to edit messages, if necessary, until the data is accepted by the system.

B. The FAST system:

• edits the information entered by the user for consistency;

• creates a transaction consisting of the acceptable data entered by the user and data that it extracts from DATA-Q (prefix and claim number, payee code, combined mailing indicator, representative payee type code, and Direct Deposit information);

• stores the transaction on the database; and

• transfers the transaction to tape for processing through DAISY.

If the transaction processes successfully through DAISY, DATA-Q is updated with the new information. If applicable, the last COA date and Direct Deposit date are updated, the representative payee type code, and the combined mailing indicator are changed. If the transaction rejects in DAISY, a reject referral is produced and the change must be processed again. The reject referrals are loaded to the Universal Star (USTAR) system for review and re-entry, if necessary.

At times the new information is processed but a referral is produced which requires review to determine that the change is indeed correct. Most times the referral involves the ZIP code in a change of address. If correction is necessary, DCU processes the change.

9.7.152 Viewing The FAST Pending Change Screen

You must have security clearance to access DATA-Q through the RRAPID Main Menu in order to access the FAST system. However, the DATA-Q access only allows viewing of the FAST PENDING CHANGE SCREEN to determine if an on-line change of address transaction is pending. A separate security clearance for FAST itself is necessary to actually enter a change, modification or deletion. Headquarters and field personnel who
have responsibilities for taking change of address actions have security clearance to input FAST-Change of Address transactions.

Any employee who has access to DATA-Q may view the FAST PENDING CHANGE SCREEN to determine if an on-line change of address, Direct Deposit enrollment, or representative payee selection is pending. To view the FAST PENDING CHANGE SCREEN, locate the DATA-Q record of the annuitant/beneficiary upon whom you are inquiring. Press the PF-8 key.

A. DATA-Q Record is Terminated

If the record of the annuitant/beneficiary is terminated, the FAST PENDING CHANGE screen will be displayed with blank pending information fields. The following message will be displayed at the bottom of the screen:

"RECORD IS TERMINATED
HIT ENTER TO RETURN TO DATA-Q"

A FAST transaction cannot be entered on a terminated record.

B. DATA-Q Record is Suspended or in Current Pay Status

1. The employee is authorized to input FAST-Change of Address transactions - The FAST PENDING CHANGE SCREEN will be displayed. The screen will display the data entered to create the pending transaction. The pending data fields that are displayed in white can be modified through this screen. Modification to the data fields that are displayed in green is not allowed. If no FAST transaction is pending, a blank input screen will be displayed.

2. The employee is not authorized to input FAST-Change of Address transactions - The FAST PENDING CHANGE SCREEN will be displayed. The screen will display the data entered to create the pending transaction. The pending data fields will be displayed in green. Modification to the pending data is not allowed. The message "USER NOT AUTHORIZED TO MODIFY OR DELETE THIS TRANSACTION" will be displayed. If no FAST transaction is pending, the pending data fields will be blank and the message "NO PENDING FAST-COA TRANSACTION - INPUT NOT AUTHORIZED" will be displayed.

9.7.153 Who Can Input FAST-Change Of Address Transactions

Headquarters and field personnel who have responsibilities for taking change of address actions have security clearance to input FAST-Change of Address (COA) activities. In addition, one must have security clearance to access DATA-Q in order to use the FAST-COA system. A separate security table is maintained which authorizes
users to input data into FAST-COA. If one does not have clearance to input a FAST-COA transaction, only pending transactions can be viewed. When no transaction is pending and one does not have security clearance to input FAST-COA transactions, the screen will display the following message:

"NO PENDING FAST-COA TRANSACTION – INPUT NOT AUTHORIZED"

A FAST-COA security table is maintained within the FAST system to control access to certain data input fields on the FAST-COA screens. If a FAST-COA user is authorized to input data to a particular field, the beginning and the end of that field will show the symbols ( ). If data is already entered and the user is authorized to change the entries in the field, the data will be displayed in white. If a FAST-COA user is not authorized to input data to a particular field or a FAST-COA screen, the data in the field will be displayed in green and the cursor will not rest under that field. Field office personnel and some HQ employees are authorized to input data to the Direct Deposit fields on the FAST-COA screens; employees in the agency's field offices are authorized to input data to the representative payee fields on the FAST-COA screens. All employees with FAST-COA access can change an address, delete DD from the checkwriting record and delete a pending FAST transaction (except representative payee changes).

**9.7.154 Types of Change Codes That Can Be Processed On FAST**

The FAST-Change of Address system can be used to change address information for all addresses, including foreign addresses. FAST will be expanded, in the future, to process other types of changes, such as, change of selected benefit information. Until that time, PC Form G-607 must be used to enter those changes.

Following is a list of change codes, with their descriptions, that FAST will accept.

- **Change Code 2 - Change of Home Address Only**

  Use change code 2 to:

  - Change the home address in an employee only case;
  - Change the home address in a survivor case;
  - Change both an employee and spouse home address when the combined mailing indicator is "yes" on both records. Changing either record will change the address on both records.

  **NOTE:** If one change is entered to change two records, the pending FAST change will only be displayed on FAST for the beneficiary record in which the change was entered. However, both addresses will be changed when the activity is updated to the checkwriting master.
• Change one address in an employee and spouse case in which the combined mailing indicator is "no".

NOTE: Do not change a home address in a representative payee case based on the annuitant's signature on the change of address request. The representative payee's signature is required in order to change an address in a representative payee case. If a change of address is received directly from an annuitant in a representative payee case, refer the request to the appropriate field office for an investigation.

• Change Code 4 - Cancel Combined Mailing Code and Change Home Address

Combined mailing was discontinued in 1986. All checks are now mailed separately; however, the combined mailing indicator remains on record for change of address purposes.

Use change code 4 to:

• Change one address in an employee and spouse case in which the combined mailing indicator for the beneficiary whose address in changing is "yes."

• Change Code 5 - Add Combined Mailing Code and Change Home Address

Combined mailing was discontinued in 1986. All checks are now mailed separately; however, the combined mailing indicator remains on record for change of address purposes.

Use change code 5 to:

• Change both an employee and spouse home address when the combined mailing indicator in the CURRENT INFORMATION section is "no" on both records or "yes" on one record and "no" on the other record. Processing a code 5 change on either record will change the address on both records.

NOTE: If one change is entered to change two records, the pending change will only be displayed on FAST for the beneficiary record in which the change was entered. However, both addresses will be changed when the activity is updated to the checkwriting master.

• Change Code A - Add Direct Deposit Information Only

Use change code A to:

• Enroll an annuitant in the Direct Deposit program when a home address change is not necessary at the time of enrollment;

• Change existing Direct Deposit information in an annuitant record when a home address change is not necessary at the time of the Direct Deposit change.
NOTE: SPECIAL SECURITY CLEARANCE IS REQUIRED FOR THIS CODE. Field office personnel and a limited number of ORSP employees who are assigned to Ford City are authorized to input change code A transactions. These employees are responsible for the processing of Direct Deposit enrollments through FAST.

• **Change Code B - Add Direct Deposit and Change Home Address**

  Use change code B to:

  • Enroll an annuitant in the Direct Deposit program when a home address change is necessary at the time of the Direct Deposit enrollment.

  • Change existing Direct Deposit information in an annuitant record when a home address change is necessary at the time of the Direct Deposit change.

  NOTE: SPECIAL SECURITY CLEARANCE IS REQUIRED FOR THIS CODE. Field office personnel and some HQ employees are authorized to input change code B transactions. These employees are responsible for the processing of Direct Deposit enrollments through FAST.

• **Change Code C - Delete Direct Deposit Only**

  Use change code C to:

  • Delete the Direct Deposit information from an annuitant record when a home address change is not required at the time the Direct Deposit information is being deleted.

• **Change Code D - Delete Direct Deposit and Change Home Address**

  Use change code D to:

  • Delete the Direct Deposit information from an annuitant record when a home address change is required at the time the Direct Deposit information is being deleted.

  NOTE: Direct Deposit deletions are only processed upon receipt of a signed statement from the annuitant requesting that payments no longer be sent to the financial institution. **Do not** process a Direct Deposit deletion without such documentation.

• **Change Code R - Change Representative Payee Information**

  Field offices alone use change code R to:

  • Add a representative payee's name and address to an annuitant's record;
• Change a representative payee name and address to a new name and address; or

• Change from a representative payee name and address to an annuitant name and address;

• Change a representative payee code on DATAQ (see RCM 5.10.3 for the types of representative payee codes).

• Add and or change a representative payee’s name with a simultaneous direct deposit enrollment or change.

NOTE: SPECIAL SECURITY CLEARANCE IS REQUIRED FOR THIS CODE.

Only field office employees are authorized to input change code R transactions. The field offices are responsible for the appointment of representative payees for annuitants in domestic cases.

When a change code R transaction is processed, the combined mailing and Direct Deposit are cancelled, and the representative payee type code is changed. An electronic notice (e-notice) will be produced for each representative payee selection (change code R) processed through FAST. The Program Evaluation Section will review the notice. Any e-notice showing a questionable representative payee name or address will be forwarded to the Program Services Section in the Bureau of Field Service for investigation.

• Change Code S - Add Direct Deposit and Change Home Address in Child Support Payment Cases

Select FAST COA system users in HQ use change code S to add Direct Deposit and change the home address in child support payment cases. Code S changes may be added either on the COA/PAYEE ENTRY SCREEN via PF8 or on the DIRECT DEPOSIT ENTRY SCREEN via PF10.

9.7.155 Determining When Record Will Reflect Changes Entered

A transaction pends on the database until it is transferred to tape for processing. When a transaction is pending for a particular claim number, the data that was input to create that transaction appears on the PENDING CHANGE SCREEN under the legend, "ENTER NEW INFORMATION." A pending transaction may be changed or deleted, if necessary, before it is removed from the FAST database for processing.

The length of time a transaction pends is dependent upon whether the new data is entered before or after the cut-off date for FAST-Change of Address. You can obtain the monthly cut-off dates from the Monthly Operations Calendar, which is available on the Share drive.
9.7.160 Processing Changes Of Address On FAST

Change of Address Display and Input - After determining that the annuitant's/beneficiary's address should be changed and that the correct annuitant's/beneficiary's record is displayed on the DATA-Q screen, press the PF-8 key. If the record is terminated, the FAST PENDING CHANGE SCREEN will be displayed with blank pending information fields. The message "RECORD IS TERMINATED HIT ENTER TO RETURN TO DATA-Q" will be displayed at the bottom of the screen. If the record is in current pay status suspended, one of two screens will be displayed.

NOTE: Do not change a home address in a representative payee case based on the annuitant's signature on the change of address request. The representative payee's signature is required in order to change an address in a representative payee case. If a change of address is received directly from an annuitant in a representative payee case, refer the request to the appropriate field office for an investigation.

A. No FAST Transaction Pending - If no FAST transaction is pending, the COA ENTRY SCREEN will be displayed. The lower half of the screen will display a blank address field, change code field, unit ID field, and foreign address indicator field.

An example of the COA ENTRY SCREEN follows:

```
FAMED004     COA/PAYEE ENTRY SCREEN      031412
             14:04
J DOE        CURRENT INFORMATION
123 MAIN ST  PREFIX MA RRB # 123-45-6789 PAYEE CODE
ANYTOWN      C/M NO LAST COA 01-01-01 REP PAYEE
ST 12345     DIRECT DEPOSIT INFORMATION
             DATE ROUTE NO ACCOUNT TYPE/NO
GEO CODE

---------------------------------- ENTER NEW INFORMATION ----------------------------------------
SDU STATE CD >   < NCP SSN >   <
SDU ID CODE >    < NCP NAME >  <

REP PAYEE: >     <> < REP PAYEE TYPE: > <
ANNUITANT: >     <
ADDRESS: >¢     <
>               <
>               <
>               <
FOREIGN ADDRESS? (Y): >   <
ENTER CHANGE CODE: X ENTER UNIT ID: XXXX USER SIGNON
```
NEXT CLAIM NUMBER = PF1   ADD = PF2   DATAQ = PF6   EXIT = CLEAR

B. FAST Transaction Pending - If a FAST transaction is pending for the record, the PENDING CHANGE SCREEN will be displayed. This screen will display any pending information: address, Direct Deposit, representative payee information, change code, unit ID, and signon of the person who entered the pending transaction. The screen will also display an additional line for entry of a revised change code and unit ID. An example of the PENDING CHANGE SCREEN follows:

1. Upper Half of Screen - The FAST-Change of Address system prefills certain information directly from the annuitant's/beneficiary's DATA-Q record. Because of the DATA-Q link, the actual number of input items that the user must complete to process a transaction is reduced. Input errors are minimized and can be corrected on-line. Fields that are prefilled from DATA-Q are displayed in green and cannot be accessed by the user. The same prefilled fields are displayed on both the entry screen and pending transaction screen.

NOTE: It is important to verify that the proper annuitant/beneficiary record is displayed before entering data. While edits can prevent data input errors, a change for the wrong annuitant/beneficiary cannot be prevented by the system.

The following items are pre-filled from DATA-Q, and displayed in the CURRENT INFORMATION SECTION of the COA ENTRY SCREEN or PENDING CHANGE SCREEN:

- Name
- Address
- Beneficiary Symbol and Prefix
- Claim Number
- Payee Code
- Combined-Mail Indicator
- Last COA Date
- Rep Payee Code
- Direct Deposit Information
• Geographic Code

NOTE: The GEO Code value will only be displayed when the annuitant record includes a foreign address or the name of a U.S. Possession (Virgin Islands, Guam, Puerto Rico, etc.).

2. **Lower Half of Screen** - The lower half of the screen contains the data input items to be filled in by the user. The user sign-on will be carried through from the DATA-Q sign-on function.

A message line is also located on the bottom of the FAST COA entry screen. If a COA transaction is being entered in a "dual" annuity case, the message "DUAL ANNUITANT CASE/ACTION NEEDED ON ANOTHER CLAIM NUMBER?" will be displayed.

### 9.7.161 Entering Data On The FAST-COA Screen

Access the FAST-COA ENTRY SCREEN or PENDING CHANGE SCREEN by pressing the PF-8 Key.

A. **How to Enter Data** - The cursor will position itself under the data entry fields in the following order.

1. **CHANGE CODE**

   • Enter the appropriate change code. If on the COA Entry screen a code 2, 4, 5, C, D or S must be entered in this field. Refer to RCM 9.7.240 for a complete description of the change codes available on FAST-COA.

   It is not necessary to press the ENTER key after entering data in a field; the cursor will automatically move to the next input field once the required positions are filled.

2. **UNIT ID**

   • Enter your 4-digit organization code in this field. If you are not sure of your correct organization code, refer to RCM 9.7 Appendix A.

3. **SDU STATE CD** – Enter the appropriate two-character state or US territory designation.

   NOTE: This field is only used by select HQ users.

4. **SDU ID CODE** - Enter the appropriate SDU case ID code.
NOTE: This field is only used by select HQ users.

After the entry of the two character state or U.S. territory designation, press the PF-2 key. This will activate a sweep of the State Table, which contains the necessary address and Direct Deposit account information for the appropriate state disbursing agency. This action will automatically fill the name, address, and EFT information needed to complete the ‘S’ code transaction. The non-custodial parent (NCP) fields, i.e., NCP SSN and NCP NAME, will be pre-filled if that information is in PREH.

After checking that the automatic entries match the state entered in the SDU STATE CD field, press the PF-2 key again to submit the ‘S’ code transaction to the database.

5. ADDRESS BLOCK

Begin each line with the first space indicated by the cursor. Use the new line key or tab key to move the cursor from line to line.

The following basic rules apply:

- The first address line contains the system-supplied group mark and is limited to 19 characters.

- The second and third lines are restricted to 20 characters. The fourth line is restricted to 19 characters.

- You must use at least two lines to change an address. For an address that consists of only the name of the city and state, enter the name of the city on the first line and the state and ZIP code on the second line.

NOTE: If the name consists of two lines, (e.g., representative payee involved), do not use more than three lines for the address change.

- Use the standard abbreviations shown in RCM 8.1 Appendix B or RCM 10.2 Appendix B.

- Spell out the full city proper name whenever possible. However, it is expected that acceptable abbreviations such as ST (Saint), FT (Fort) etc., will be used with the proper name. If space limitations prevent city, state and ZIP code from occupying the same line, move the ZIP code to the next line rather than abbreviating. If it is still necessary to abbreviate, check the ZIP master for an acceptable city name abbreviation.
• Omit all punctuation; including hyphens (-), apostrophes (’), ampersands (&), forward slashes (/), backslashes (\), percentage signs used as the abbreviation for “care of” (%), etc.

• Allow only one space between each item of the address (house number, direction, city, state and ZIP code).

• Only the home address should be shown in the address block. The annuitant/beneficiary must complete Form SF-1199A at a financial institution to initiate enrollment in the Direct Deposit program.

• Do not show the annuitant’s name in the address block.

• Enter the ZIP code on the same line as the state, unless it makes the line too long; in which case, enter the entire ZIP code on the next line. The 5 digit ZIP code must be the last entry when completing the address block.

• For a foreign address the name of the country must be the last entry on the final line of the address. The name of the country cannot be abbreviated in any way. (Refer to RCM 8.1 Appendix B or RCM 10.2 Appendix B).

6. FOREIGN ADDRESS INDICATOR

• If you are entering a foreign address, enter a ‘Y’ in this field.

• If you are not entering a foreign address, leave this field blank.

B. How to Activate the Edit Process - After you have completed entering the data on the COA ENTRY SCREEN, press the PF-2 key to activate the edit process.

9.7.162 Editing Data From The COA Entry Screen

A. Input Passes Edits - If the data passes the edits, this message will appear in white on the screen:

"NO ERRORS DETECTED, HIT PF-2 TO SUBMIT RECORD TO THE DATABASE."

• Press the PF-2 key a second time. In response to the PF-2 key a confirmation message will appear in white on the screen.

"RECORD HAS BEEN ADDED TO THE DATABASE,HIT PF-1 TO RETURN TO ENTER NEXT CLAIM NUMBER"
NOTE: Before storing the data, if it is necessary to change the data entered, move the cursor to the field to be changed, correct the data and then press the PF-2 key. The data will be edited again. If the transaction passes the edits, it will be stored on the data base. If the transaction does not pass all edits, an edit message will appear.

B. Input Does Not Pass Edits - If an invalid entry is made, the cursor will be positioned under the invalid item and an error message will be displayed on the screen. FAST can only indicate one invalid entry at a time. Therefore, after correcting the invalid item and hitting the PF-2 key, the system may identify a second item needing correction. The fields are edited in the same sequence that they are entered by the user. When all the data is valid, this message will appear on the screen:

"NO ERRORS DETECTED, HIT PF-2 TO SUBMIT RECORD TO THE DATABASE."

Refer to RCM 9.7.171 for a full discussion of edit messages and corrections.

- Press the PF-2 key. This confirmation message will appear in white on the screen:

"RECORD HAS BEEN ADDED TO THE DATABASE, HIT PF-1 TO ENTER NEXT CLAIM NUMBER"

C. Print-outs - To print out the screen press the PRINT key. A print-out of the input screen should be filed on the left side of the folder as documentation.

D. Enter Next Claim Number/Finished With FAST - To enter another transaction, press the PF-1 key. If you are finished with FAST, press the PF-1 key and then press the CLEAR key to return to the RRAPID Main Menu. From this point select another application/system by entering the assigned number next to the word, SELECTION. Then, press ENTER. To sign-off of RRAPID, enter an X next to the word, SELECTION and press enter to return to the RRB train logo screen.

9.7.163 Reinstating Undeliverable Suspensions (Code 98) On FAST

If a check is returned as undeliverable, the annuity is suspended using a code 98 and the claim is referred to the Payment Service Unit (PSU).

In the past, field offices would call PSU to report an address change on code 98 cases to ensure that these cases would receive priority handling. With the FAST system, field office or headquarters personnel may now input the necessary information on-line.

If a claim of non-receipt is received and DATA-Q shows that the annuity is in code 98 suspense status, a change of address transaction with a change code of '2, 4, 5 or B'
can be processed to reinstate payments. The change of address transaction will reinstate current payments and reissue any past payments that are due.

The following action should be taken to generate a mechanical reinstatement:

- Determine if a new address is involved.
- If so, enter the new address information.
- If the address has not changed and the check was erroneously returned by the post office, it is still necessary to process a change of address activity to generate the mechanical reinstatement process. **Note:** Only a change code of '2, 4, 5 or B' may be processed to reinstate payments. Process a change of address activity showing the current address, and print-out a copy of the input screen for folder documentation.

Only code 98 suspensions may be reinstated by processing a change of address transaction.

### 9.7.164 Processing Direct Deposit Enrollments on FAST

**A. General** - Enrollment in the Direct Deposit (DD) program will be processed based upon a written request, a verbal request (telephone or in-person), or submission of a SF-1199A. A separate request is necessary for each payee. A representative payee who chooses to enroll in DD is restricted to submitting a SF-1199A. Information on processing Direct Deposit (DD) forms is found in RCM 10.2.

**Note:** "Formless enrollment" is permitted in field offices only. Enrollment requests without the SF-1199A received at headquarters, will be referred to the appropriate field office for processing.

The entry of Direct Deposit information is restricted to a specific group of FAST-COA users who have security access to the Direct Deposit input fields.

**B. Direct Deposit Display and Input** - After determining that the correct annuitant's/beneficiary's record is displayed on the DATA-Q screen, press the PF-10 key. If the record is terminated, the FAST PENDING CHANGE SCREEN will be displayed with blank pending information fields. The message "RECORD IS TERMINATED HIT ENTER TO RETURN TO DATA-Q will be displayed. If the record is in current pay status or suspended, one of two screens will be displayed.

1. **No FAST Transaction Pending** - If no FAST transaction is pending for the record, the FAST DIRECT DEPOSIT ENTRY SCREEN will be displayed. The lower half of the screen will display blank route number, check digit, account number, account type, change code, and unit ID fields.
When a change code B is entered on the DIRECT DEPOSIT ENTRY SCREEN, the FAST COA/DD ENTRY SCREEN will be displayed after you press PF-2 to activate the screen edits. The screen will display the Direct Deposit information just entered, and a blank address block. The UNIT ID SIGNON and CHANGE CODE are carried forward from the DIRECT DEPOSIT ENTRY SCREEN. The message "NO ERRORS DETECTED IN DIRECT DEPOSIT FIELDS - ENTER ADDRESS INFORMATION" will be displayed at the bottom of the screen.

2. **FAST Transaction Pending** - If a FAST transaction is pending for the record, the FAST PENDING CHANGE SCREEN will be displayed. The lower half of the screen will display the pending address and/or Direct Deposit information, the pending change code, the unit ID and the signon of the person who entered the pending transaction.

C. **Upper Half of Screen** - The FAST-Change of Address system prefills certain information from the annuitant's/beneficiary's DATA-Q record to the DIRECT DEPOSIT ENTRY SCREEN. Because of the DATA-Q link, the actual number of input items that the user must complete to enter a transaction is reduced. Input errors are minimized and can be corrected on-line. Fields that are prefilled from DATA-Q are displayed in green and cannot be accessed by the user. The same prefilled fields are displayed on both the entry screen and pending transaction screen.

NOTE: It is important to verify that the proper annuitant/beneficiary record is displayed before entering data. While edits can prevent data input errors, a Direct Deposit enrollment or change for the wrong annuitant/beneficiary cannot be prevented by the system.

The following items are prefilled from DATA-Q and displayed in the CURRENT INFORMATION SECTION of the screens:

- Name
- Address
- Beneficiary Symbol and Prefix
- Claim Number
- Payee Code
- Combined-Mail Indicator
- Last COA Date
- Representative Payee Type Code
• Direct Deposit Information

• Geographic Code

NOTE: The GEO Code value will only be displayed when the annuitant record includes a foreign address or the name of a U.S. Possession (Virgin Islands, Guam, Puerto Rico, etc.).

D. Lower Half of Screen - The lower half of the screen contains all of the data input items to be completed by the user. The user sign-on will be carried through from the DATA-Q sign-on function.

9.7.165 Entering Direct Deposit Data On FAST.

A. How to Enter Data - The cursor will position itself under the data entry fields in the following order:

1. CHANGE CODE
   • Enter the appropriate change code. A code A or B must be entered in this field. Refer to RCM 9.7.320 for an explanation of these change codes.

2. UNIT ID
   • Enter your 4-digit organization code in this field. If you are not sure of your correct organization code, refer to RCM 9.7 Appendix A.

3. ROUTE NUMBER
   • Enter the 8-digit bank routing number as shown on the Form SF-1199A.

4. CHECK DIGIT
   • Enter the 1-position check digit as shown on the Form SF-1199A.

5. ACCOUNT NUMBER
   • Enter the depositor account number as shown on the Form SF-1199A.

6. ACCOUNT TYPE
   • Enter a "C" or "S" as shown on the Form SF-1199A.

B. How to Activate the Edit Process - After you have completed entering the data on the DIRECT DEPOSIT ENTRY SCREEN or COA/DD ENTRY SCREEN, press the PF-2 key to activate the edit process.
9.7.166 Editing Data From The Direct Deposit Entry Screen Or The COA/DD Entry Screen

A. Input Passes Edits

1. Change Code A Transactions - If the data passes the edits, a routing number verification message with the name of the financial institution (FI) will be displayed on the screen in white, for example:

"FIRST NATIONAL BANK VERIFY FI. IF CORRECT PRESS PF2 AGAIN"

   - If the financial institution is correct, press the PF-2 key a second time. In response to the PF-2 key this confirmation message will be displayed on the screen in white:

   "RECORD HAS BEEN ADDED TO THE DATABASE, HIT PF-1 TO ENTER NEXT CLAIM NUMBER."

2. Change Code B Transactions - If the Direct Deposit data passes the edits, the FAST COA/DD ENTRY SCREEN will be displayed with this message displayed in white:

"NO ERRORS DETECTED IN DIRECT DEPOSIT FIELDS ENTER ADDRESS INFORMATION."

   - After entering the address information, press the PF-2 key. If the Direct Deposit and address data passes the edits, a routing number verification message with the name of the financial institution (FI) will be displayed on the screen in white, for example:

   "FIRST NATIONAL BANK VERIFY FI. IF CORRECT PRESS PF2 AGAIN"

   - Press the PF-2 key again. In response to the PF-2 key this confirmation message will be displayed on the screen in white:

   RECORD HAS BEEN ADDED TO THE DATABASE, HIT PF-1 TO ENTER NEXT CLAIM NUMBER."

NOTE: Before storing the data, if it is necessary to change the data entered, move the cursor to the field to be changed, correct the data and then press the PF-2 key. The data will be edited again. If the transaction passes the edits, it will be stored on the data base. If the transaction does not pass all edits, an edit message will appear.
B. **Input Does Not Pass Edits** - If an invalid entry is made, the cursor will be positioned under the invalid item and an error message will be displayed on the screen. FAST can only indicate one invalid entry at a time. Therefore, after correcting the invalid item and pressing the PF-2 key, the system may identify a second item needing correction. The fields are edited in the same sequence that they are entered by the user. When all the data is valid, a routing number verification message with the name of the financial institution (FI) will appear on the screen, for example:

"FIRST NATIONAL BANK VERIFY FI. IF CORRECT PRESS PF2 AGAIN"

Refer to RCM 9.7.171 for a full discussion of edit messages and corrections.

- Press the PF-2 key. This confirmation message will appear in white on the screen:

  "RECORD HAS BEEN ADDED TO THE DATABASE, HIT PF-1 TO ENTER NEXT CLAIM NUMBER."

C. **Print-outs** - To print out the screen, press the PRINT key.

D. **Enter Next Claim Number/Finished with FAST** - To enter another transaction, press the PF-1 key. If you are finished with FAST, press the PF-1 key and then CLEAR key to return to the RAPID Main Menu. From this point select another application/system by entering the assigned number next to the word, SELECTION. Then press ENTER. To sign-off of RRAPID, enter an X next to the word, SELECTION and press ENTER to return to the RRB train logo screen.

### 9.7.167 Modifying A Pending Transaction

If a pending transaction exists, the input items will be filled under the "ENTER NEW INFORMATION" legend on the bottom half of the split screen.

The following message will appear at the bottom of the screen:

"COA EXISTS. TO KEEP - HIT PF-6. TO MODIFY - ENTER ALL DATA THEN PF-3. TO DELETE - ENTER UNIT ID THEN PF-4."

Data shown under the legend "CURRENT INFORMATION" cannot be modified. New data must be entered on the screen under the legend "ENTER NEW INFORMATION."

After reviewing the screen and determining that a modification is necessary, input modified data by typing over the entries in the address block and Direct Deposit fields that require modification. It is not necessary to input the entire address if only one entry in the address block is changed. However, before entering the modified address or Direct Deposit information, the cursor will be positioned in the "REVISED CHANGE CODE" field. You must **always**:
Enter the correct change code. If the code has not changed enter the same code shown in the "CURRENT CHANGE CODE" field.

Enter your UNIT ID in the "REVISED UNIT ID" field.

Enter the modified Direct Deposit or address information in the appropriate fields. The cursor will automatically move to the next input field once the required positions are filled.

Press the PF-3 key.

A. **Data is Valid** - If the data is valid, this message will appear on the screen:

"NO ERRORS DETECTED, HIT PF-3 TO MODIFY CURRENT RECORD ON THE DATABASE."

- To cancel the transaction at this time before it has been accepted, press PF-6. You will return to DATA-Q and the original pending transaction will remain on the data base.

- To enter the transaction, press the PF-3 key again. This message will appear on the screen.

"RECORD ON DATABASE HAS NOW BEEN MODIFIED, HIT PF-1 TO ENTER NEXT CLAIM NUMBER."

To print out the screen, press the PRINT key.

B. **Data is Invalid** - If the data is invalid, an error message will be displayed and the cursor will position itself under the erroneous entry. Refer to RCM 9.7.171 for edit messages and corrective actions. Make corrections and press the PF-3 key again until all input data is valid and the modification can be made.

To print out the screen, press the PRINT key.

**9.7.168 Deleting A Pending Transaction**

After determining that a pending action should be deleted:

- Move the cursor to the UNIT ID data entry field and enter your four digit UNIT ID and press the PF-4 (Delete) key.

A. **Data is Valid** - If the data is valid, this message will appear on the screen:

"NO ERRORS DETECTED, HIT PF-4 TO SUBMIT DELETION ACTION TO THE DATABASE."
To cancel the transaction at this time before it is accepted, press PF-6. You will return to DATA-Q and the original pending transaction will remain on the data base.

To enter the deletion transaction, press PF-4 again. This message will appear on the screen:

"RECORD ON DATABASE IS NOW A DELETION RECORD, HIT PF-6 TO RETURN TO DATA-Q."

B. Data is Invalid - If the data is invalid, an error message will be displayed and the cursor will position itself under the erroneous entry. Refer to RCM 9.7.171 for edit messages and corrective actions. After correcting the data, press PF-4.

NOTE: If you delete a pending transaction, payments will continue to be released according to the CURRENT INFORMATION displayed in the upper half of the PENDING CHANGE SCREEN. If Direct Deposit information is displayed, payments will be released to that financial institution. If Direct Deposit information is not displayed, payments will be released to the address that is displayed.

9.7.169 Special Modification Situations

Although a limited number of FAST-COA users are authorized to input Direct Deposit (change code A and B) transactions through the DIRECT DEPOSIT ENTRY SCREEN, any authorized FAST-COA user can modify or delete a pending change code A or B transaction. This section explains the situations in which these pending transactions can be modified or deleted, and the steps necessary to process the modification or deletion.

A. Change Code A Transaction Pending

1. The Current Home Address is Incorrect - If the address displayed in the CURRENT INFORMATION section of the PENDING CHANGE SCREEN is incorrect and:

   a. The Pending Direct Deposit Enrollment is Correct - Modify the pending transaction as follows:

   • Enter a change code B in the REVISED CHANGE CODE field;
   • Enter the Unit ID in the REVISED UNIT ID field;
   • Enter the new address information in the address block; and
   • Press the PF-3 key to begin the edit process. After the input passes all of the edits, press the PF-3 key again to add the transaction to the data base.
b. **The Pending Direct Deposit Enrollment is Incorrect** - If the Direct Deposit information displayed in the NEW INFORMATION section of the PENDING CHANGE SCREEN is incorrect and:

(1) All Direct Deposit (both current and pending) Information is to be Deleted From the Record - To enter the new address information, modify the pending transaction as follows:

- Enter a change code D in the REVISED CHANGE CODE field;
- Enter the unit ID in the REVISED UNIT ID field;
- Enter the new address information in the address block; and
- Press the PF-3 key to begin the edit process. After the input passes all of the edits, press the PF-3 key again to add the transaction to the data base.

(2) **The Current Direct Deposit Information is Correct** - If the Direct Deposit information displayed in the CURRENT INFORMATION section of the PENDING CHANGE SCREEN is correct, delete the pending transaction as instructed in RCM 9.7.168. After the deletion transaction has been removed from the data base (usually the next day), process the new address information by entering a change code 2, 4, or 5 transaction, as appropriate.

Exception: Users who are authorized to input Direct Deposit transactions can access the PENDING CHANGE SCREEN by pressing the PF-10 key from DATA-Q. Then, enter a change code 2, 4, or 5 transaction as appropriate, and use the space bar to remove the pending Direct Deposit information from the pending transaction.

(3) **The Annuitant is not Currently Enrolled in Direct Deposit** - If no Direct Deposit information is displayed in the CURRENT INFORMATION section of the PENDING CHANGE SCREEN, modify the pending transaction as follows:

- Enter a change code D in the REVISED CHANGE CODE field;
- Enter the Unit ID in the REVISED UNIT ID field;
• Enter the new address information in the address block; and
• Press the PF-3 key to begin the edit process. After the input passes all the edits, press the PF-3 key again to add the transaction to the data base.

2. **The Current Home Address is Correct** - If the address displayed in the CURRENT INFORMATION section of the PENDING CHANGE SCREEN is correct and:
   a. **The Pending Direct Deposit Enrollment is Correct** - Do not modify or delete the pending transaction.
   b. **The Pending Direct Deposit Enrollment is Incorrect**
      (1) **All Direct Deposit (both current and pending) will be Deleted from the Record** - Modify the pending transaction as follows:
          • Enter a change code C in the REVISED CHANGE CODE field;
          • Enter the Unit ID in the REVISED UNIT ID field; and
          • Press the PF-3 key to begin the edit process. After the input passes all of the edits, press the PF-3 key again to add the transaction to the data base.
      (2) **The Current Direct Deposit Information is Correct** - If the Direct Deposit information displayed in the CURRENT INFORMATION section of the PENDING CHANGE SCREEN is correct delete the pending transaction as instructed in RCM 9.7.168.
      (3) **The Annuitant is not Currently Enrolled in Direct Deposit** - If no Direct Deposit information is displayed in the CURRENT INFORMATION section of the PENDING CHANGE SCREEN, delete the pending transaction as instructed in RCM 9.7.168.

B. **Change Code B Transaction Pending**

1. **The Current Home Address is Incorrect** - If the address displayed in the CURRENT INFORMATION section of the PENDING CHANGE SCREEN is incorrect and:
   a. **The Pending Direct Deposit Enrollment and Address Information are Correct** - Do not modify or delete the pending transaction.
b. The Pending Direct Deposit Enrollment is Correct and the Pending Address Information is Incorrect - Modify the pending transaction as follows:

- Enter a change code B in the REVISED CHANGE CODE field;
- Enter the unit ID in the REVISED UNIT ID field;
- Enter the necessary corrections to the address block and the Foreign Address Indicator field (if necessary); and
- Press the PF-3 key to begin the edit process. After the input passes all of the edits, press the PF-3 key again to add the transaction to the data base.

c. The Pending Direct Deposit Enrollment is Incorrect - If the Direct Deposit information displayed in the NEW INFORMATION section of the PENDING CHANGE SCREEN is incorrect and:

1. **ALL Direct Deposit (both current and pending) is to be Deleted from the Record**

   - Enter a change code D in the REVISED CHANGE CODE field;
   - Enter the Unit ID in the REVISED UNIT ID field;
   - Enter the necessary corrections to the address block and the Foreign Address Indicator (if necessary); and
   - Press the PF-3 key to begin the edit process. After the input passes all of the edits, press the PF-3 key again to add the transaction to the data base.

2. **The Current Direct Deposit Information is Correct** - If the Direct Deposit information displayed in the CURRENT INFORMATION section of the PENDING CHANGE SCREEN is correct, delete the pending transaction as instructed in RCM 9.7.168. After the deletion transaction has been removed from the data base (usually the next day), process the new address information by entering a change code 2, 4, or 5 transaction, as appropriate.

   Exception: Users who are authorized to input Direct Deposit transactions through FAST can access the PENDING CHANGE SCREEN by pressing the PF-10 key from DATA-Q. Then, enter a change code 2, 4, or 5 transaction, as
appropriate, and use the space bar to remove the pending Direct Deposit information from the pending transaction.

(3) The Annuitant is not Currently Enrolled in Direct Deposit -
Modify the pending transaction as follows:

- Enter a change code D in the REVISED CHANGE CODE field;
- Enter the Unit ID in the REVISED UNIT ID field;
- Enter the necessary corrections to the address block and foreign address indicator, (if necessary); and
- Press the PF-3 key to begin the edit process. After the input passes all of the edits, press the PF-3 key again to add the transaction to the data base.

2. The Current Home Address is Correct - If the address displayed in the CURRENT INFORMATION section of the PENDING CHANGE SCREEN is correct and:

a. The Pending Direct Deposit Information is Correct - Modify the pending transaction as follows:

- Enter a change code A in the REVISED CHANGE CODE field;
- Enter the Unit ID in the REVISED UNIT ID field;
- Remove the pending address information from the address block and the foreign address indicator (if necessary) by using the space bar; and
- Press the PF-3 key to begin the edit process. After the input passes all of the edits, press the PF-3 key again to add the transaction to the data base.

b. The Pending Direct Deposit Enrollment is Incorrect - If the Direct Deposit information displayed in the NEW INFORMATION section of the PENDING CHANGE SCREEN is incorrect and:

(1) ALL Direct Deposit (both current and pending) is to be Deleted from the Record - Modify the pending transaction as follows:

- Enter a change code C in the REVISED CHANGE CODE field;
• Enter the Unit ID in the REVISED UNIT ID field;

• Remove the pending address information from address block and foreign address indicator field (if necessary) by using the space bar; and

• Press the PF-3 key to begin the edit process. After the input passes all of the edits, press the PF-3 key again to add the transaction to the data base.

(2) The Current Direct Deposit Information is Correct - If the Direct Deposit information displayed in the CURRENT INFORMATION section of the PENDING CHANGE SCREEN is correct, delete the pending transaction as instructed in RCM 9.7.168.

(3) The Annuitant is not Currently Enrolled in Direct Deposit - Delete the pending transaction as instructed in RCM 9.7.168.

C. Acknowledgement Message Display - When modifying a pending change code A or B transaction by entering a change code C or D transaction, the message "ALL DIRECT DEPOSIT WILL BE DELETED, HIT PF-3 TO MODIFY CURRENT RECORD ON THE DATABASE" will be displayed after the PF-3 key is pressed the first time and the transaction has passed all of the edits. Press the PF-3 key again to add the modification transaction to the data base.

9.7.170 When Pending Transactions Are Processed

A FAST-COA transaction pends on the data base until it is transferred to tape for processing through DAISY. When a transaction for a particular claim is pending on the data base, the data that was input to create that transaction appears on the pending change screen under the heading "ENTER NEW INFORMATION." A pending transaction may be changed or deleted, if necessary, before it is removed from the FAST data base for processing through DAISY.

FAST-COA transactions can be modified an unlimited number of times while they are pending on the data base. The latest transaction on record will be processed through DAISY. Change of address transactions created by G-607 input forms cannot be viewed on FAST.

How long a transaction pends on the data base depends on when in the month it is entered.

A. Transaction Entered on or Before Cutoff - Transactions entered from the second to the last work day of the month through the cut-off for FAST-COA in the
following month are removed from the data base at the end of each work day and processed through DAISY overnight.

Exception: Transactions entered on the day before cut-off will pend an extra day. No change of address-type activity is processed on the day before cut-off.

For example, if the FAST-COA cut-off is September 17, a change of address entered on or before that date will process through DAISY overnight and should appear on DATA-Q the next work day. Therefore, if the annuitant/beneficiary is not on Direct Deposit, the 10-1 payment will be released to the new address. (Transactions entered on September 16, the day before cut-off, would not appear on DATA-Q until September 18, because no change of address type activity is processed on the day before cut-off).

B. Transactions Entered After Cutoff - Transactions entered after FAST-COA cut-off pend through the second to the last work day of the month when they are removed for processing through DAISY with the next month’s activity.

For example, if an annuitant is not on Direct Deposit and the change of address is processed on September 18, after cut-off, the 10-1 payment will be released to the old address.

NOTE: There is sometimes a delay in DATA-Q’s being updated, for example, after the cost-of-living adjustment. A pending change of address transaction may still have been processed through DAISY even though it will not appear on DATA-Q until it is updated. Be aware of the DATA-Q update date.

9.7.171 Edit Messages And Their Corrective Actions

A. Overview - Activity entered through FAST is edited on-line. Activity is not passed to the data base until all the input information has cleared all edits. Errors are identified through error messages displayed at the bottom of the input entry screen. Errors can be corrected by typing over the erroneous entry with the correct information. Since most errors can be identified and corrected on-line, few FAST change of address transactions reject in DAISY. The listing of edit messages contained in this section has been divided into four categories: access edits, common edits, COA entry/modification edits, and Direct Deposit entry/modification edits. The edits for the representative payee fields are explained in FOM-I-1570. Representative payee (code R) transactions cannot be modified or deleted by headquarters employees.

B. Access Edits - Listed below are the error messages that can occur when attempting to access a FAST-COA screen. These messages will be displayed at the bottom of the FAST PENDING CHANGE SCREEN.

1. Message: "RECORD IS TERMINATED, HIT ENTER TO RETURN TO DATA-Q.” This message is displayed when the payment record of the
annuitant is terminated. No FAST-COA input is allowed when an annuitant record is terminated.

Correction: Verify that the proper annuitant/beneficiary record is displayed on the screen. If the incorrect record is displayed, press either the ENTER or the PF-6 key to return to DATA-Q.

2. Message: "INVALID PF KEY - USER NOT AUTHORIZED FOR DD ENTRY - ACCESS FAST-COA WITH PF-8. HIT ENTER TO RETURN TO DATA-Q." This message will be displayed when a user who is not authorized to enter Direct Deposit data attempts to enter FAST using the PF-10 key.

Correction: Press either the ENTER or the PF-6 key to return to DATA-Q. From the DATA-Q screen, press the PF-8 key to access the FAST-COA system.

3. Message: "USER NOT AUTHORIZED TO MODIFY OR DELETE THIS TRANSACTION." This message is displayed when a pending change code R transaction is accessed by a headquarters employee.

Correction: Change code R transactions can only be modified or deleted by field office employees.

C. Common Edits - Listed below are the error messages that can occur on any of the FAST-COA system screens.

1. CHANGE CODE
   a. Message: "INVALID CHANGE CODE, ENTER VALID CHANGE CODE." This edit occurs if a code other than 2, 4, 5, A, B, C, D or R is entered.

      Correction: Determine the type of change being processed and enter the appropriate code. On the COA ENTRY SCREEN, codes 2, 4, 5, C or D can be used. On the DIRECT DEPOSIT ENTRY SCREEN, codes A or B can be used. On the COA/DD ENTRY SCREEN, code B can be used. On the PENDING CHANGE SCREEN, codes 2, 4, 5, A, B, C or D can be used. Code R can only be used by field office employees. If the change code is other than 2, 4, 5, A, B, C or D submit the change on Form G-607.

   b. Message: "USER NOT AUTHORIZED FOR THIS CHANGE CODE."

      This edit occurs if a change code R is entered by a headquarters FAST-COA user or if a change code A or B is shown on the COA
ENTRY SCREEN by a user not authorized to add Direct Deposit enrollments through FAST.

Correction: Change code R transactions cannot be entered by headquarters FAST users. Enter the correct change code 2, 4, 5, C, or D, as appropriate, or process the representative payee change manually.

c. Message: "CHANGE CODE CANNOT ACCEPT DIRECT DEPOSIT DATA." This edit occurs when a change code 2, 4, or 5 is entered and there are entries in the Direct Deposit fields.

Correction: Correct the change code to A or B. These change codes are the only codes that will allow the entry of Direct Deposit information.

d. Message: "DIRECT DEPOSIT INFORMATION NOT ENTERED - CHANGE CODE INVALID." This edit occurs when change code A or B is entered and the Direct Deposit fields are blank.

Correction: Enter the Direct Deposit information in the fields provided or enter the correct change code 2, 4, 5, C or D.

e. Message: "CHANGE CODE CANNOT ACCEPT ADDRESS DATA." This edit occurs when a change code A or C is entered and the address block is filled.

Correction: Correct the change code to 2, 4, 5, B or D, as appropriate. If a change code of A or C is correct, space out the address information.

f. Message: "NO CURRENT DIRECT DEPOSIT - CHANGE CODE INVALID." This edit occurs when a change code C is entered and there is no Direct Deposit information shown in the CURRENT INFORMATION section of the FAST screen.

Correction: Enter the correct change code. If you are attempting to delete a pending Direct Deposit enrollment, refer to the special modifications situations in RCM 9.7.169.

2. **UNIT ID**

a. Message: "NO UNIT ID ENTERED - ENTER UNIT ID." This edit occurs if the UNIT ID has been omitted.

Correction: Type in the correct UNIT ID.
b. Message: "UNIT ID NOT NUMERIC - ENTER NUMERIC UNIT ID." This edit occurs if the UNIT ID entered does not consist of four digits, or is incomplete.

Correction: Type in a valid UNIT ID.

c. Message: "INVALID UNIT ID - ENTER VALID UNIT ID." This edit occurs if the UNIT ID entered is not valid as listed in RCM 9.7 Appendix A.

Correction: Type in a valid UNIT ID.

3. PF-KEY

a. Message: "INCORRECT REPONSE KEY - TRY AGAIN." This edit occurs if the incorrect PF key is hit for the type of action being taken or if the enter key is pressed when a PF key should be pressed.

Correction: Press the proper PF key according to the action being taken. Press PF-2 to add a transaction, PF-3 to modify a pending transaction, PF-4 to delete a pending transaction and PF-6 to leave as is and return to DATA-Q. PF key instructions are displayed at the bottom of the screen.

D. Change of Address Edits - Listed below are the error messages that occur when you are processing address changes through FAST.

1. ADDRESS BLOCK

a. Message: "ENTER NEW ADDRESS INFORMATION." This edit occurs if the address block is blank.

Correction: The change code entered requires completion of the address block. Enter the new address information.

b. Message: "BEGIN ADDRESS ON FIRST LINE." This edit occurs if the first line of the address block is blank.

Correction: Enter the address beginning with the first position of the first line.

c. Message: "DO NOT ENTER GROUP MARK." This edit occurs if the group mark (¢) is entered in any line of the address block.

Correction: Remove the group mark from the address block.
d. Message: "CLOSE SPACE AFTER GROUP MARK." This edit occurs if a space is entered between the group mark and the beginning of the address.

Correction: Use the TAB key to locate the beginning position of the address. It will appear on the screen that there is a space after the group mark, but there really is not in the record that will be created for the data base.

e. Message: "ADDRESS MUST HAVE AT LEAST 2 LINES." This edit occurs if the address is entered on only one line. An address must have two lines.

Correction: Alter the entry of a new address so that the address consists of two lines.

f. Message: "REMOVE PUNCTUATION FROM ADDRESS LINES." This edit occurs if punctuation marks (periods, commas, etc.) have been entered in the address block.

Correction: Remove all punctuation from the address block.

g. Message: "ZIP CODE MISSING - ENTER ZIP CODE OR ANSWER FOREIGN ADDRESS QUESTION." This edit occurs if the address does not contain a ZIP Code; the ZIP code entered does not contain five numbers; or there is no space between the two-letter state abbreviation and the ZIP code.

Correction: Enter the proper five-digit ZIP Code when processing a domestic or U.S. possession address change. If you are processing a foreign address change, answer the foreign address question "Y" (Yes), and be sure to enter the country name, completely spelled out, in the last line of the address. (Refer to RCM 8.1 Appendix B or RCM 10.2 Appendix B).

h. Message: "LAST POSITION OF LAST ADDRESS LINE MUST BE BLANK." This edit occurs if the last line of the address entered contains 20 characters, including spaces. The last line of the address is limited to 19 characters, including spaces.

Correction: Alter the last line of the address so that it does not exceed 19 characters, including spaces.

i. Message: "BEGIN ADDRESS LINE IN FIRST POSITION." This edit occurs if any address line begins with a space.
Correction: Use the TAB key or the NEW LINE key to locate the beginning position of each address line. Begin entering address information in the first position of the address line.

j. Message: "INVALID STATE CODE"  This edit occurs if the two-digit state designation is invalid (for a COA transaction not designated as a foreign address).

Correction: Enter the correct two-digit state designation for the U.S. state, U.S. possession, or Armed Forces address for a domestic address OR enter “Y” in the foreign address indicator field for a foreign address.

2. FOREIGN ADDRESS INDICATOR

a. Message: "INVALID ANSWER TO FOREIGN ADDRESS QUESTION."  This edit occurs if the foreign address indicator field does not contain a "Y" or a blank space.

Correction: If you are processing a foreign address change, answer the foreign address question "Y" (yes) and be sure to enter the country name, completely spelled out, in the last line of the address. If you are not processing a foreign address change, this item should be blank. Delete any entry in this field if you are not processing a foreign address change.

E. Direct Deposit Edits - Listed below are the error messages that occur when you are processing Direct Deposit transactions through FAST. These messages are listed in the order that variable data is entered. Address block edits are explained in RCM 9.7.171D.

1. ROUTE NUMBER

a. Message: "ROUTE NUMBER MISSING."  This edit occurs if the route number field is blank.

Correction: Enter the route number shown on the Form SF-1199A.

b. Message: "ROUTE NUMBER CONTAINS A SPACE OR NON-NUMERIC - ENTER CORRECT ROUTE NUMBER."  This edit occurs if spaces or non-numeric characters are present in the route number field.

Correction: Enter the correct eight digit route number shown on the Form SF-1199A, removing any spaces or non-numeric characters.
c. Message: "ERROR - VERIFY RTN. THE RTN ENTERED IS NOT VALID." This edit occurs if the route number entered is not listed on the Financial Organization Master File (FOMF).

Correction: Verify that the financial institution (FI) shown on the Form SF-1199A is correct and re-enter the correct eight digit route number.

2. CHECK DIGIT
   a. Message: "CHECK DIGIT MISSING." This edit occurs if the check digit field is blank.
   
   Correction: Enter the check digit shown on the Form SF-1199A.
   
   b. Message: "CHECK DIGIT INVALID - ENTER THE CORRECT CHECK DIGIT." This edit occurs if the check digit entered is not correct.
   
   Correction: Enter the check digit shown on the Form SF-1199A. If this edit still occurs, verify the route number and re-enter the route number and check digit.
   
   c. Message: "CHECK DIGIT MUST BE NUMERIC - ENTER CORRECT CHECK DIGIT." This edit occurs if the check digit entered is not a number.
   
   Correction: Enter the numeric check digit shown on the Form SF-1199A.

3. ACCOUNT NUMBER
   a. Message: "ACCOUNT NUMBER MISSING." This edit occurs if the account number field is blank.

   Correction: Enter the account number shown on the Form SF-1199A.
   
   b. Message: "INVALID CHARACTER IN ACCOUNT NUMBER - ENTER CORRECT ACCOUNT NUMBER." This edit occurs if something other than a letter, number, or hyphen is entered in the account number field.

   Correction: Enter the account number exactly as shown on the Form SF-1199A.

4. ACCOUNT TYPE
   a. Message: "ACCOUNT TYPE MISSING." This edit occurs if the account type field is blank.
Correction: Enter the account type as shown on the Form SF-1199A.

b. Message: "ACCOUNT TYPE MUST BE "C" OR "S" - ENTER CORRECT ACCOUNT TYPE." This edit occurs if the entered account type is not a C or S.

Correction: Enter the account type as shown on the Form SF-1199A.

### 9.7.190 Field Office Handling Of FAST Change Of Address Transactions

After the field office has completed a FAST-Change of Address transaction they will:

- Document ContactLog with the notification of change of address information, i.e. telephone call, letter;
- Image any paper copies of the change of address documentation;

Note: If a change of address is processed by a district office in a spouse to widow(er) conversion case before the widow(er)'s annuity has been paid, the field office should inform the Survivor Benefits Division of the address change via an email to the SBD Group Mailbox. Also, If the spouse/widow is enrolled in International Direct Deposit, the Direct Deposit Specialist in the Unemployment and Programs Support Division (UPSD) should be notified of the address change. See FOM 115.22.1. When the field office processes a FAST-COA transaction to change the payee in a representative payee case (change code R), they will release RL-107 and RL-107B notices about the payee change to the annuitant and an RL-107A notice to the new payee. The field office will also, if appropriate, release an RL-107D notice about the payee change to the old representative payee and RL-107E notices to anyone who may have applied but was not selected as representative payee. If the annuitant is living with a third party who is not the representative payee, the field office will release an RL-107F notice to the third party custodian. The field office will image all of the original representative payee documentation.

### 9.7.191 Headquarters Handling Of Field FAST Change Of Address Transactions

If a change of address is processed for an annuitant who has a claim pending on RASI, make a Keymaster entry to change the address on RASI. Failure to take this action will cause the address to revert to the old address when the final RASI award is processed.

If a change of address is processed in a spouse to widow(er) conversion case before the widow(er) annuity has been paid (i.e., widow(er) is still in pay status as a spouse on DATA-Q) the field office will inform the Survivor Benefits Division of the address change.
via an email to the SBD Group Mailbox. Also, if the spouse/widow is enrolled in International Direct Deposit, the Direct Deposit Specialist in the Unemployment and Programs Support Division (UPSD) must be notified of the address change. See FOM 115.22.1. The new address should then be entered on the widow(er) annuity award form.

### 9.7.192 Documentation Of FAST Direct Deposit Enrollments

The SF-1199As processed by HQs are field offices are to be imaged.

### 9.7.195 Processed Activity

Activity that has been input to the FAST system is not processed until it is batched and processed through the DAISY system.

Pending transactions will remain on the screens until processed. Therefore, if the transaction can be viewed on FAST it has not yet been updated to the checkwriting system. Once processed, the transaction will no longer appear on FAST.

Processing of batched activity may be verified on the following sources:

- **DATA-Q** - DATA-Q is updated soon after the activity is processed and is a source for verification. The DATA-Q screen shows the current address, the combined mailing indicator, the representative payee type code, and the date the change of address was processed. It also shows the Direct Deposit data and the date processed.

- **SAMM** - The SAMM tape is a record of all daily activity. In addition to change of address and Direct Deposit information, this tape provides the identification of the unit and person that processed the change of address. The activity is stored on microfilm according to the transaction run date. A FAST-Change of Address will be indicated by voucher number 11 (VOUCH NO 011).

- **MOMS** - Change of address activity may be checked on the MOMS tape produced on the first of the month following the month the address change representative payee change or Direct Deposit enrollment was processed.

### 9.7.196 DAISY Rejects

Online edits and pre-filling of data fields ensure that most address changes and other FAST-COA transactions are processed without problems. Edits in DAISY batch processing, however, may detect problems that cause COA transactions to reject. COA transactions that reject must be corrected and reentered.

COA transactions that reject in DAISY processing are now loaded to the Universal Star (USTAR) system for handling. USTAR assigns the rejected COA transaction to the FAST user who input the COA transaction based on the FAST user signon ID. Field office and Operations users are responsible for handling their USTAR COA reject
assignments and reentering corrected FAST transactions, if necessary. The instructions for handling FAST-COA rejects on USTAR are located in FOM-1-1570.75. If you cannot determine the cause of the reject, contact the Payment Analysis and Systems section in Policy & Systems for assistance. 9.7.200 ORVL - The On-Line Rate Verification Letter

(ORVL) system allows authorized field office or headquarters employees to mechanically generate rate verification letters in one of three selected formats. It is accessed through DATA-Q located in the Railroad Automated Processing Integrated Database (RRAPID). ORVL is not located on the RRAPID Main Menu and must be accessed through auxiliary processing tasks of DATA-Q by pressing the PF-6 key. The ORVL system captures current pay data from the checkwriting database file and formats it into a letter. Individuals requesting letters through ORVL may customize letters by inserting variable information into several positions, including a four line free form paragraph area. In addition, some information secured from the database can be overlayed, if necessary.

Field office requests are generated immediately through a printer in the office. Headquarters requests are batched and prepared nightly.

The system does not relieve the record keeping requirements of the Privacy Act on the release of information. The system will retain no record of individual ORVL requests. Headquarters requests must be documented by final input screen retention as a file record.

9.7.201 What ORVL Can And Cannot Do

A. What ORVL Can Do - The ORVL system can produce rate verification letters in three versions. The user enters any required letter inserts and generates the letter of choice by pressing one of three PF keys, each of which formats a separate letter. The RL-136 is prepared for release to the beneficiary with the inquirer identified, the RL-136a for third party release with a copy to the beneficiary and the RL-136b for direct beneficiary requests with no inquirer identified. Copies of the three letter formats are shown in Exhibits 1, 2, 3.

ORVL can produce letters at any time of the month. There is no dark period for ORVL processing. ORVL works with the information on the DATA-Q file.

ORVL secures information from DATA-Q, formats it as required and produces a letter. The system does nothing else.

B. What ORVL Cannot Do - The system does not interact with the FAST system. The only similarity is that both systems are accessed through the DATA-Q program. If an annuitant’s address change is placed in the body of the rate verification letter, it is still necessary to go into FAST-COA to process the COA.
ORVL cannot associate rate information with the payment beginning date. If an adjustment is processed before the time it is actually paid, i.e., the annual cost-of-living adjustment, ORVL will pickup the COL information as the current rate paid and place it in a letter being released before the new rate is received.

ORVL cannot provide information on activity in mechanical processing channels. For instance, if an adjustment is being processed which requires a floating SMIB premium to be invoked, the system will be unable to pickup Medicare information until the float is completed.

ORVL cannot automatically produce letters for multiple payees on a single claim number. Separate letters need to be requested for employee and spouse annuitants and for all children in a family group.

ORVL cannot place multiple rates into a mechanical letter. Any request requiring multiple rates must be handled by composing a special letter or by placing previous rate information in the free form area on the mechanically prepared ORVL letter.

ORVL does not maintain records of individual letters released. Folder documentation requirements can be fulfilled by maintaining copies of ORVL data input screens.

9.7.202 Who Can Access ORVL

ORVL entry is available to anyone with DATA-Q access. Since requests for rate verification are received both in the field and headquarters, the system was designed to perform in both areas.

The only difference between usage in field offices and headquarters is that letters can be generated immediately in the field, but must be batched and printed nightly when requested in headquarters. This difference is due to the limited placement of printers and the size and color of paper used in headquarters printers. Headquarters letters are produced with the standard Railroad Retirement Board letterhead; field generated letters have the requesting office’s return address.

9.7.203 Accessing the ORVL System

Entry to ORVL is made through the DATA-Q system. No special security measures are needed to access ORVL. Once the claim number and payee code are selected, the user can request the rate verification letter option by selecting the menu of all options available from DATA-Q by pressing PF-3 or going directly to ORVL by pressing PF-6.

Once the ORVL request is entered, the terminal will present a data input screen pre-filled with data secured from DATA-Q.
9.7.210 Protected Data Pre-Filled On ORVL

When the user strikes the PF6 key directly from DATA-Q or from the menu screen, the ORVL system immediately displays an input screen seen below, pre-filled with information. Most of the information is placed in protected fields, i.e., it cannot be written over. All protected data is identified in green on the CRT input screen. Protected fields include the claim number and payee code, Medicare information, and railroad and social security benefit rate data.

Information in other areas of the input screen can be entered or overlayed as appropriate. This is explained in the next section.

All claim information present on the input screen is carried over into the ORVL letter text. Some of the rate information goes through calculation routines before it is placed in the ORVL text.

SEE EXHIBIT 28

9.7.211 Inputting Data To ORVL

The ORVL system draws DATA-Q information for entry into designated fields. The three letter versions available take the same data and place it into a format selected by the user. Certain fields can be inserted or overlayed as required by moving the cursor to the appropriate position using the tab or return keys. Most inserts are optional and the failure to provide entries will usually not prevent the production of a reasonable letter. If an insert is absolutely essential, i.e., name and address in a third party release letter (RL-136a), an edit message will appear.

When the input screen appears, the cursor is automatically positioned at the first entry requiring possible preparer input, the rate effective date. Once all spaces are filled in a field needing preparer input, the cursor will move to the succeeding field. If all available spaces are not needed, cursor movement can continue through the fields that can be inserted or overlayed by depressing the forward tab key. The backward tab key will allow movement in that direction. Cursor navigation through the input screen can also be done with the arrow keys. Pressing the return key will position the cursor at the beginning of the next line.

A. Inserting Data to ORVL - Information can be inserted into several positions where either the inquirer is the source of the required entry or DATA-Q does not hold the necessary data.

Fields in which data may be inserted are the payment effective month and year, the inquirer reference number, and the inquirer name and address. Entering this information is generally optional except for the inquirer name and address in an RL-136 and RL-136a request.
1. The payment effective date entry is required because the DATA-Q accounting date will differ from the effective date. A letter can be generated with or without this information. Enter this data with two digit conversions of month and year, i.e., January 1989 is 01/89, December 1988 is 12/88, etc. If there is no entry in this area, the letter text indicates the rate information is current. This date can be furnished without extensive review for most adjustments and can usually be determined from the accounting date, i.e., the annual cost-of-living adjustment effective date is always December 1 and the accounting date is always in mid-December.

2. The reference number entry allows 12 characters when the inquirer has a specific file identifier other than the railroad claim number.

3. The inquirer name and address refers to a third party inquirer. Name and address information can be placed in a five line format with 20 spaces available per line. The positioning of this information on the ORVL letter depends on the version requested. Letter version selection depends on whether the beneficiary has authorized the release of rate information or if the requester is a routine user.

   NOTE: If the inquirer's name and address and/or reference number is entered on the ORVL screen, but an RL-136b is requested, the inquirer's entry will be ignored.

4. A free form text area consisting of four lines with 80 characters each can be used as necessary. The information placed in that area will appear on the ORVL created letter exactly as shown. The system has no word processing capability. Words extending between lines should contain hyphenation. You may use this area to answer questions, provide additional rate information, etc.

B. Overlaying Existing Data - Information in two areas can be overlayed to update or modify data pulled from DATA-Q.

1. The annuitant's name and address can be modified if the DATA-Q information needs updating. Possible conditions requiring modification in this field are a change of address or the appointment of a representative payee. Since these changes are not processed into the individual's record through ORVL, a separate action must be taken on the FAST system.

   If the beneficiary authorizes the release of rate information, but objects to the release of his address, use the space bar to delete the address from the third party RL-136a.

2. The annuitant's name is entered exactly as shown on the DATA-Q screen. In some instances, a name which is abbreviated for checkwriting purposes
can be expanded on the ORVL letter. Twenty spaces are available in this field.

NOTE: When overlaying existing data, do not use the delete or EOF keys on the terminal to remove existing information. You can type over information or use the space bar to eliminate existing data. Although the screen display indicates the delete and EOF keys are working, the actual printing does not recognize the deletion of the previous data.

9.7.212 Requesting The ORVL Letter

Once the preparer has completed any input screen data entry, the letter print request can be initiated. Letter preparation requires striking the PF key linked to the letter version twice consecutively. Prompts for the PF keys associated to each letter version are indicated at the bottom of the input screen. When the PF key is depressed, the message "RL-136X HAS BEEN PREPARED FOR PRINTING (IN THE FIELD) or (AT HEADQUARTERS). HIT PFXX TO RELEASE." will appear. The letter preparation is triggered when the user depresses the PF key a second time. After depressing the PF key, a screen message appears stating "RL-136X WILL BE PRINTED (IN THE FIELD) or (AT HEADQUARTERS). HIT VALID RESPONSE KEY TO CONTINUE.

The three RL-136 letter versions available and their PF keys are:

PF 21 - RL-136  Rate Verification to Beneficiary for Release to Inquirer - This letter is typically used when a request for information is received from a third party to whom we cannot directly release information. This letter is sent to the beneficiary. It indicates who has requested the information and that the annuitant is responsible for releasing the information, if so desired.

PF 22 - RL-136a Rate Verification to Inquirer with Copy to Beneficiary - This letter is designed for release to the third party requester directly. As a courtesy, a copy is prepared and released to the annuitant so that he is aware of the information provided.

PF 23 - RL-136b Rate Verification to Beneficiary, Inquirer Not Identified - This letter is prepared for release to the annuitant at his request. It is designed so that the individual can utilize it at his discretion

A. Reviewing Input Before Printing Letter - Requiring the PF key to be depressed twice provides an opportunity to review input before printing the letter. The user should take the time before engaging the printer to assure that the proper letter version is being created, that any information inserted or overlayed is correct and that the F.O. code is correct for the field office or blank for headquarters requests. Once the information is verified by the user, the second depression of the PF key can be performed.
If the user reviewing the input screen determines that information should be changed or an incorrect letter version is being requested, the user can take the following action:

1. Incorrect information - Using the tab or arrow keys, reset the cursor at the information which needs to be changed. Re-enter the information and begin the print process.

2. Incorrect letter requested - If the first striking of the PF print key identifies the wrong letter, merely strike the correct PF key. This restarts the print process which again requires two consecutive strikes of the letter linked PF key.

### 9.7.213 ORVL System Edit Messages

Once the user requests preparation of the designated ORVL letter, the letter generating program goes through a series of edits to determine the acceptability of the desired output. Any edit message will appear on the CRT screen. Possible ORVL edits and messages are:

**FIELD OFFICE NUMBER** is not a required field. If it is not spaces, it is edited.

- **Edit:** Non-Numeric
- **Message:** Field office number is not numeric. Try again.
- **Edit:** Not found on RRFO Table
- **Message:** Field office number invalid. Try again.

**ANNUITANT ADDRESS** is a required field for RL-136 and RL-136b requests.

- **Edit:** Spaces in line 1 or line 2 or line 3
- **Message:** Annuitant's address must contain at least 3 lines. Try again.

**ANNUITANT NAME** is a required field for all letter requests.

- **Edit:** Spaces
- **Message:** Annuitant's name not entered. Try again.

**RATE EFFECTIVE DATE** is not a required field. It is edited if it is not spaces.

- **Edit:** Month Not Numeric
- **Message:** Rate effective month must be numeric. Try again.
Month Invalid (not 1-12)  Rate effective month invalid. Try again.
Monthly Spaces  Rate effective month not entered. Try again.
Year Spaces  Rate effective year not entered. Try again.
Year Not Numeric  Rate effective year must be numeric. Try again.

The INQUIRER'S ADDRESS is a required field for RL-136 and RL-136a requests.

Edit:

Message:

Spaces on line 1  Inquirer's name/address not entered. Try again.
Spaces on line 2 or line 3  Inquirer's name/address must be at least three lines. Try again.

9.7.214 Information On The ORVL Letter

Information is taken from the input screen and placed in designated positions in the letter format. Information, other than rate data, is carried directly as shown. Some rate data is calculated before being placed in the letter.

A. Protected Rate Data in the ORVL Letter - ORVL letters can contain a maximum of eight lines of rate information. Individual lines are included as required. Information placed on those lines is as follows:

REGULAR RAILROAD RETIREMENT ANNUITY includes the actual railroad annuity payable. Any taxes withheld are added back in. Any partial withholding or actuarial adjustment is not added back in. Rate shown is before any Medicare premium deduction. Any RR amount in suspense is considered payable and is included in the total. Any terminated amount is not included.

SUPPLEMENTAL ANNUITY includes the supplemental annuity actually payable. Any taxes withheld are added back in.

LESS FEDERAL INCOME TAX WITHHELD is a combined total of any taxes withheld from the regular railroad and the supplemental annuity, if any. This deducted amount is positioned slightly to the left of payable amounts on the letter.

NET MONTHLY RAILROAD ANNUITY is the total of the regular railroad and supplemental annuity amount after any tax withholding.

SOCIAL SECURITY PAID BY RRB includes any social security benefit payable or in suspense. Any Medicare premium deducted from the SS component is added back in.
TOTAL MONTHLY RATE PAYABLE is the total of RR, Supp and SS benefit components previously listed before any Medicare premium deduction.

LESS DEDUCTION FOR MEDICARE PREMIUM includes any Medicare premium deducted from either the RR or SS benefit component. Regular, variable or penalty SMIB rates are shown. Deduction includes any catastrophic premium taken from the individual's annuity benefits. Premiums paid through a state buy-in are not deducted. This deducted amount is located slightly to the left of payable amounts on the letter.

CHECK/PAYMENT AMOUNT is the amount of RR, Supp and SS benefits paid by the RRB after deductions for any Medicare premium and/or tax withholding. This line may contain the effective date if the user has provided an insert on the ORVL input screen.

If an individual's benefit has been terminated, and nothing is payable, a warning message 'NO RATES PAYABLE FOR THIS ANNUITANT' is displayed. This message is informational. A rate verification letter can be generated to confirm that the individual is not receiving any benefits.

B. Protected Information Provided Other Than Rate Data -

MEDICARE EFFECTIVE DATES are taken directly from the DATA-Q record. If an individual is only entitled to Part A coverage, that date is shown.

RR CLAIM NUMBER is taken directly from the DATA-Q record. The payee code is not carried into the ORVL letter. It is placed on the input screen primarily for file documentation on headquarters released letters.

C. Information Inserted or Overlayed on the Input Screen - Any information placed on the input screen through the insert or overlay utility is presented exactly as entered.

9.7.220 After Requesting The ORVL Letter

Once the user has requested the ORVL letter, several options exist for further processing. The individual can request another copy of the requested letter, request a letter on another payee code on the same claim number, request an ORVL letter on another claim number, or exit the system completely. Individual keys on the computer terminal can be used to accomplish these functions.

REQUESTING ANOTHER LETTER ON THE SAME CLAIM NUMBER AND PAYEE CODE

This action can be accomplished by striking the PF key for the letter version requested two consecutive times. If two copies of the same letter are needed, four strokes of the PF key will produce two letters.
REQUESTING A LETTER ON ANOTHER PERSON ON THE SAME CLAIM NUMBER

Striking the PF 6 key after the letter is produced will return the user to the DATA-Q screen for the claim number and payee code. Other payee codes can be accessed by using the PA 1 and PA 2 keys after returning to DATA-Q. Requesting ORVL on other payee codes requires re-entry of variable information.

REQUESTING A LETTER ON ANOTHER CLAIM NUMBER

If the user wishes to request an ORVL letter on another claim number, pressing the PF 1 key will return the screen to the DATA-Q entry display:

ENTER PREFIX X RRB# (9 DIGITS) XXXXXXXXX and PAY CODE X

Pressing the 'Clear' key from ORVL will exit the application/system completely and return to the RRAPID Main Menu.

9.7.221 Releasing ORVL Letters

Addresses have been positioned on ORVL letters to allow insertion into window envelopes when properly folded. Headquarters requested letters are batched nightly and sent directly to the mailroom for release. No file copy is produced.

9.7.222 Documentation For Released ORVL Letters

Since the ORVL system maintains no record of letters released, any documentation of information released is the responsibility of the user.

Since no file copy is produced, a screen print of the letter release screen should be substituted for the actual letter. The final screen includes all necessary information including the users identification. Actual copies of letters will not be released for filing.

9.7.223 Special Situations

The three RL-136 version letters can be used to respond to almost any rate verification request with appropriate modification. However, if a situation arises which cannot be handled appropriately on ORVL, a manual letter should be prepared.

9.7.225 Working Information Letter on Beneficiary Rates (WILBR) System

The Working Information Letter on Beneficiary Rates (WILBR) system is a companion to the ORVL (On-line Rate Verification Letter) system. WILBR allows users to input a request for a post cost-of-living adjustment (COLA) rate verification letter at any time throughout the year. WILBR pends the letter up to the next COLA run in December, then processes the request after the COLA run, and produces an RL-136,
RL-136A, or RL-136B letter with the updated cost-of-living rate in early January of the following year.

NOTE: At this time, WILBR will be used only by the field offices. We anticipate that WILBR will be available to headquarters units sometime in 1997. Until WILBR is available for headquarters use, any rate verification requests which are received in headquarters and which would be entered on WILBR, i.e., requests received prior to the December COLA but which ask for the new COLA rate, should be sent to the appropriate field office for processing.

Headquarters personnel should not forward "current rate" verification requests or COLA rate verification requests received after the COL adjustment to the field offices. These types of requests should continue to be processed on ORVL.

At the time the WILBR request is entered, the user has the option of producing a WILBR "confirmation" letter, to serve as an interim reply to the rate verification requestor. The "confirmation" letter informs the requesting party that a rate verification letter, which includes the latest COLA rate, will be released in January of the following year. These "confirmation" letters are printed in the same way that ORVL letters are currently printed, i.e., requests originating from a field office will be printed at the field office’s remote printer. However, in order to realize bulk mailing savings, all post COLA RL-136 series letters requested through WILBR will be printed and released from headquarters.

A rate verification letter request pending on WILBR can be modified, in the event of address changes, and/or deleted. After the WILBR requests have been batched, interchanged with DATAQ to obtain the COLA rates, and the RL-136 series letter is produced and released, a record of the release will remain on the WILBR system for five years.

WILBR does not replace ORVL, it is an alternative method for field offices to request a rate verification letter with future, i.e. post-COLA, rates. ORVL should continue to be used by both field office and headquarters personnel for cases in which a current rate verification letter is required.

9.8.1 ALTA

A. ALTA Allows Examiners to Produce Manual Award Letters On-Line

Beginning in November 1988, examiners can create letters for most manual awards using ALTA (Automated Award Letters to Annuitants). ALTA is an on-line system that can be accessed using existing CRT terminals. ALTA will allow examiners to create, modify and delete award letters. ALTA also produces letters for mechanical systems, such as APPLE, ASTRO, SURPASS, MAP, RASI, and PAM.

In a browse mode, ALTA will allow examiners and field personnel to view data entry screens for released award letters and to view the text of code paragraphs in the ALTA library. Screens for released letters will remain on the ALTA database for at least 120 days after the voucher date.

From a selection of screens, the examiner will be able to build letters by selecting the letter type, entering code paragraphs needed and providing a payment summary if necessary. Any code paragraph that requires variable data to be inserted in a sentence will cause the system to automatically pull up a screen that will prompt the examiner to enter the required information. The examiner will also be able to include up to two individually composed paragraphs and to request additional letter copies and enclosures.

B. ALTA Is a Database System

Like FAST, ALTA is a database system that interacts with other data processing systems. ALTA will combine data selected and entered by the examiner on-line with data from a corresponding manual voucher obtained through the CHICO and Rate History (RH) files. ALTA will also process award letters that will combine data from a RR and an SS voucher. Information coming from CHICO and RH will help determine the composition of the letter, provide the annuitant’s name and mailing address, provide limited payment summary information, and provide certain code paragraph inserts.

C. ALTA Prevents Errors Through On-line Edits

ALTA performs numerous up-front edits to prevent incorrect or incomplete award letters from being produced. ALTA's on-line edits:

- check for internal consistency of data,
- verify that the data is within its prescribed content and range, and
- apply relational edit checks between individual fields.
The ENTER key must be pressed at the completion of each screen to activate the edit process.

When all the required screens have been completed, the examiner must validate the letter. This tells the database that the letter is ready to be released.

The examiner must secure a printout of the main data entry screens used in developing the letter. The authorizer will review these screens for completeness and accuracy.

D. **ALTA Releases Letter Only After the Voucher Clears**

A letter input on ALTA will pend at least 120 days on the database for its corresponding voucher to clear. Pending letters will be purged on a monthly basis at the end (around the 26th) of the 2nd month following the month of entry on ALTA. For example, a letter entered on 11-25-02 will pend until 3-31-03 at which time it will be purged while a letter entered on 11-27-02 will be purged on 4-30-03. A listing will be produced at the end of each month detailing these purged letters.

When the voucher clears, information from CHICO and RH will be passed to the ALTA match program. ALTA uses the claim number and payee code to create a match between the letter pending on the ALTA database and the information coming from the voucher. Because of this, only one railroad and one social security letter can pend on ALTA on the same claim number and payee code at a time. When the match is complete, the letter is supplemented with the CHICO and RH information.

When a combined SS/RR award letter (RL-130tc, 130uc and 130xc) is being created, ALTA will pend the data from the first voucher to clear until the second voucher clears and is matched.

If an award rejects in vouchering, re-vouchering that award or vouchering a new award will trigger the release of a pending ALTA letter provided the new voucher date is within 120 days from when the letter was first entered.

Before a letter is purged from the database, the examiner can modify or delete the letter at any time until the voucher clears and releases the matched letter.

E. **ALTA’S End-of-Line Edits**

ALTA has an end-of-line edit system to determine whether the CHICO and RH data required was available, correct and consistent. These edits also indicate whether there was no match between a voucher and a letter on ALTA, or whether there was a match but that the letter was not validated (see Section 9.8.1.F). Incomplete and/or unvalidated letters will be printed as far as possible.
and sent to their originating units. Completed, validated letters will be printed and released to the mailroom.

F. **ALTA Produces Listings and Referrals to Aid Processing**

The match program produces a daily listing (like DAISY) reflecting manual award activity and how it impacts on ALTA. This listing contains a balance sheet that summarizes the activity on ALTA. Reject referrals for award letter errors will also be produced daily for each run. These reject messages will inform the examiner of the nature of the particular error. Rejected letters will have to be corrected manually. ALTA listings and referrals are sorted by unit according to their voucher number assignments.

The daily ALTA listing will provide an effective means of pulling cleared vouchers from dormant.

ALTA will also provide a weekly count of letters produced by type, and a monthly listing of purged letter screens.

G. **When Letters Cannot be done on ALTA**

- A RR letter (with the exception of ASTRO RL-119A's and RESCUE RL-119R and RL-45R's) cannot be added to the ALTA database if a RR letter is already pending on ALTA on the same claim number and payee code. Similarly, an SS letter cannot be added to the ALTA database if an SS letter is already pending on ALTA on the same claim number and payee code.

- Letters for simultaneous RR Vouchers to one payee (e.g., simultaneous G-357's; an OPO and a zero accrual recurring voucher for taxation purposes). Do not use ALTA for simultaneous vouchers.

- SS letters requiring more than 12 date-breaks, retirement RR letters requiring more than 13 date-breaks and survivor RR letters requiring more than 15 date-breaks on the payment summary.

- Award letters with more than two individually composed paragraphs of 5 lines each.

- Award letters that require more than 10 examiner entered code paragraphs.

- SF-1166 award letters.

- Award letters returning payments to financial organizations (RCM 6.6.137).

- Award letters mailed to an address other than the address on CHICO.
• SS OPO letters (RL-130X or RL-130XC) if there is no SS accrual being paid out to the annuitant. In this situation, if a RR letter is required, the SS accrual being withheld should be explained in the RR letter.

9.8.2 Introduction And Main Menu

After you have signed on and set your terminal for upper and lower case letters (see NOTE 2, below), access ALTA by typing 9 on the RRAPID menu and pressing the ENTER key. The ALTA MAIN MENU SCREEN will appear. The Main Menu consists of the 6 following selections:

PF-24 - CREATE AWARD LETTER. Press PF-24 when initially creating an award letter on a specific claim number and payee code.

PF-23 - MODIFY PENDING LETTER. Press PF-23 to view or to change and/or add new data to a letter pending on the ALTA database.

PF-20 - DELETE PENDING LETTER. Press PF-20 to delete a letter pending on the ALTA database.

PF-6 – BROWSE PENDING MECHANICAL LETTER. Press PF-6 to view the input screens of a pending mechanical letter.

PF-5 - BROWSE RELEASED LETTER. Press PF-5 to view the input screens of a released letter.

PF-1 - BROWSE CODE PARAGRAPH LIBRARY. Press PF-1 to view the text of any code paragraph in the ALTA library.

PA-2 - END ALTA SESSION. Press PA-2 to exit from ALTA.

Press the appropriate key. The screen selected will automatically appear.

9.8.3 Creating An Award Letter

To create an award letter, press PF-24 on the MAIN MENU. The CREATE AWARD LETTER screen will then appear.

Enter the following information:

<table>
<thead>
<tr>
<th>Item</th>
<th>Completion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prefix</td>
<td>Enter A, D or H.</td>
</tr>
<tr>
<td>RRB#</td>
<td>Enter the 6 or 9 digit number. If your entry is a 6-digit number, enter 6 digits and tab over to the payee code entry.</td>
</tr>
<tr>
<td>Payee Code</td>
<td>Enter the payee code, from 1 to 9.</td>
</tr>
<tr>
<td>Letter Type</td>
<td>Enter one of the following letters:</td>
</tr>
<tr>
<td>------------</td>
<td>----------------------------------</td>
</tr>
<tr>
<td>Railroad</td>
<td>SSA</td>
</tr>
<tr>
<td>RL-20</td>
<td>RL-130a</td>
</tr>
<tr>
<td>RL-23</td>
<td>RL-130b</td>
</tr>
<tr>
<td>RL-24</td>
<td>RL-130c</td>
</tr>
<tr>
<td>RL-24b</td>
<td>RL-130r</td>
</tr>
<tr>
<td>RL-43</td>
<td>RL-130t</td>
</tr>
<tr>
<td>RL-45</td>
<td>RL-130u</td>
</tr>
<tr>
<td>RL-119</td>
<td>RL-130x</td>
</tr>
<tr>
<td>Combined SS/RR</td>
<td></td>
</tr>
<tr>
<td>RL-130tc</td>
<td></td>
</tr>
<tr>
<td>RL-130uc</td>
<td></td>
</tr>
<tr>
<td>RL-130xc</td>
<td></td>
</tr>
<tr>
<td>RL-130r</td>
<td></td>
</tr>
</tbody>
</table>

Employee's Name – The entry of the employees’ name is a requirement. Type the employee’s full name as shown on PREH, APPLE or other mainframe system being used. We are no longer printing the RRB Claim number or Social Security numbers on ALTA letters. We will use the employee name on the letters to find the RRB Claim Number using the ALPHA look-up on RRAILS or the EDM system on RRAPID. Information of the ALPHA look-up on RRAILS can be found in FOM1 1596.51 and information on access to Employee and Employer Information on the EDM system can be found in RCM 9.9.3.

Capitalize the 1st letter of each portion of the employee’s name. 20 positions are allowed for the name.

Review all entries and press the ENTER key to activate the edit process. See RCM 9.8.12 for a description of the edit process.

If you discover an error before pressing the ENTER key, return the cursor to the incorrect item and type in the correct entry. Hitting either a forward or backward TAB or NEW LINE KEY may move the cursor.

If an invalid entry has been made, an error message will appear. ALTA can only indicate one invalid entry at a time. Therefore, after one invalid item has been corrected, the system may identify another item needing correction. The fields are edited in the same sequence that the user enters them. Correct all the invalid entries and press the ENTER key after each correction.

NOTE: The RRB number is not checked for accuracy. Therefore, it is important that the number entered is correct.
If the data passes the edits, it will be stored and the next appropriate screen, based on the type of letter chosen as shown on the chart below, will appear.

<table>
<thead>
<tr>
<th>Letter Type</th>
<th>Screen to Follow</th>
</tr>
</thead>
<tbody>
<tr>
<td>RL-24, RL-24b, RL-45</td>
<td>CP Select/Overview</td>
</tr>
<tr>
<td>RL-20, RL-23, RL-43 &amp; RL-119</td>
<td>Payment Summary Selection</td>
</tr>
<tr>
<td>RL-130a, RL-130b, RL-130c, RL-130u,</td>
<td>SSA Payment Summary</td>
</tr>
<tr>
<td>RL-130r, RL-130t, RL-130u,</td>
<td></td>
</tr>
<tr>
<td>RL-130tc, RL-130uc</td>
<td>SSA OPO Payment Summary</td>
</tr>
<tr>
<td>RL-130x, RL-130xc</td>
<td></td>
</tr>
</tbody>
</table>

Once the edits have cleared and you have left the CREATE AWARD LETTER screen, you cannot return to the CREATE AWARD LETTER screen or use the MODIFY PENDING LETTER screen to correct the Prefix, RRB #, PC or Letter Type. If any of these 4 entries is incorrect, the letter must be deleted using the DELETE PENDING LETTER screen and then a new record created.

NOTE: You can return to the CREATE AWARD LETTER screen to add an Employee's Name entry or to change an Employee's Name entry previously made. To do this - access the CREATE AWARD LETTER screen, enter the Prefix, RRB #, PC, Letter Type and the new or corrected Employee's Name. Press the ENTER key. The message RR or SS LETTER ALREADY ON THIS RECORD; HIT PF 23 TO MODIFY OR PF 20 TO DELETE will be displayed but the employee's name entry on all letters on the claim number entered will reflect the new Employee's Name entry. Press PA1 to return to the MAIN MENU or PA2 to exit ALTA if your action is complete.

### 9.8.4 Selecting A Payment Summary

The Payment Summary Selection Screen automatically appears if you selected Letter Type RL-20, RL-43 or RL-119 on the Create Award Letter Screen. The Prefix, RRB #, Payee Code, Letter Type and Employee's Name will be pre-filled with entries from the CREATE screen.

There are two entries on this screen. Type in the appropriate number (e.g., "01" for a tier 1, "08" for a tier 1 and Supp or "12" for a partial annuity payment summary) and press ENTER. In the Payment Summary item, you must select the opening paragraph and headings required by your payment summary. The payment summary headings chosen must be representative of all the tiers that the annuitant is eligible for even if the tier amount is zero. In the Payment Summary Source item, you must tell the system
where the payment summary rate-breaks are to come from (RHF and/or examiner) and how they are to be composed. The Rate History File (RHF) will store the latest effective date and rates in retirement cases and the latest 3 effective dates and rates in survivor cases. The user must enter any prior dates and rates on the appropriate payment summary screen.

Payment Summary - Enter one:

<table>
<thead>
<tr>
<th>All RR AWD Letters</th>
<th>RL-20 AWD Letters Only</th>
<th>RL-23 Letters Only</th>
</tr>
</thead>
<tbody>
<tr>
<td>01-T1</td>
<td>08-T1/SUPP</td>
<td>13-RL-23</td>
</tr>
<tr>
<td>02-T2</td>
<td>09-T2/SUPP</td>
<td></td>
</tr>
<tr>
<td>03-T1, T2</td>
<td>10-T1,T2/SUPP</td>
<td></td>
</tr>
<tr>
<td>04-T1, T2, VDB</td>
<td>11-T1,T2,VDB/SUPP</td>
<td></td>
</tr>
<tr>
<td>05-SUPP</td>
<td>12-PARTIAL</td>
<td></td>
</tr>
<tr>
<td>06-O/M</td>
<td></td>
<td></td>
</tr>
<tr>
<td>07-NONE</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Payment Summary Source - Enter one:

| 1-(R/S): | 1 date break from RHF, prior date breaks from examiner |
| 2-(R/S): | 1 date break from RHF                                  |
| 3-(SURV): | 2 date breaks from RHF                               |
| 4-(SURV): | 3 date breaks from RHF                               |
| 5-(SURV): | 3 date breaks from RHF, prior date breaks from examiner |
| 6-(R/S/RL23): | All date breaks from examiner                       |

If Payment Summary 07 (NONE) or 12 (PARTIAL) is selected, do not complete the Payment Summary Source entry.

Review all entries and press the ENTER key to activate the edit process. See RCM 9.8.12 for a description of the edit process. If the data passes the edits, it will be stored and the next appropriate screen will appear.

If you selected Payment Summary 07 (NONE) or 12 (PARTIAL), the CODE PARAGRAPH SELECTION/OVERVIEW screen will automatically appear.
If you selected Payment Summary 13 (RL-23), you must select Payment Summary Source 6 (all rate breaks from examiner.) We cannot secure date breaks from Rate History in Court Ordered Property Division awards.

If you selected Payment Summary Source 2, 3 or 4 (all date-breaks from RHF), the CODE PARAGRAPH SELECTION/OVERVIEW screen will automatically appear.

If you selected Payment Summary Source 1, 5 or 6, a PAYMENT SUMMARY screen with the headings you selected in the Payment Summary entry will automatically appear. If you selected PAYMENT SUMMARY 08, 09, 10 or 11, the SUPP payment summary screen will appear first and then, when you complete your data entry, you will select the regular payment summary screen by pressing PF18.

NOTE: If you exit the system with PA2 (End ALTA Session) before completing the PAYMENT SUMMARY SELECTION screen, you will return to this screen when you re-enter ALTA through the MODIFY PENDING LETTER screen. Whenever completion of the PAYMENT SUMMARY SELECTION screen is required (i.e., your letter is a RL-20, RL-43 or RL-119), the CP SELECT/OVERVIEW screen cannot be accessed until the entries on the PAYMENT SUMMARY screen are completed. If the PAYMENT SUMMARY SELECTION screen appeared due to an erroneous letter selection on the CREATE AWARD LETTER screen, you must use the DELETE AWARD LETTER screen to delete the entire record before you begin again.

9.8.5 Completing A RR Payment Summary Screen

The PAYMENT SUMMARY screen requested will be automatically displayed if Payment Summary Source code 1, 5 or 6 on the PAYMENT SUMMARY SELECTION screen is selected. The PAYMENT SUMMARY screen which appears will have the Prefix, RRB #, PC, Letter Type and Employee’s Name entries pre-filled. Also displayed will be the previously selected Payment Summary Source code and its description, as seen on the PAYMENT SUMMARY SELECTION screen (e.g., 5-(SURV): 3 date breaks from RHF, prior date breaks from examiner.)

If you selected PAYMENT SUMMARY 08, 09, 10 or 11, the SUPP payment summary screen will appear first and then, when you complete your data entry, you will move to the regular payment summary screen by pressing PF18. Completion of regular and supp payment summary screens are pretty much the same. It is important to note, however, that the Supp will generally have fewer date breaks than will the regular annuity payment summary. Since Rate History will pick up only the current date break of the award, make sure the beginning date break of the Supp award is entered on-line if it is not the current rate.

If the wrong payment summary had been selected or if the Payment Summary Source needs to be changed, press CLEAR at this point to return to the PAYMENT SUMMARY SELECTION screen.
Completion of a PAYMENT SUMMARY screen consists of typing in effective dates and tier/annuity amounts, up to 12 occurrences, under the appropriate column heading. The cursor will be positioned at the first Effective Date entry. Enter the MM-DD-YY of the earliest date break. Date-breaks must be entered in ascending order from the earliest date-break to the latest. Use a preceding zero for months and days less than 10. When this entry is complete, the cursor will move to the first tier or annuity amount entry.

Seven positions are allowed for rates. You must line up the dollar portion of the rate with the pre-filled decimal. If a cents amount is required, type over the decimal and enter the cents amount (e.g., a rate of 20.53 can be entered by hitting the space bar twice and entering 20.53.) ALTA will automatically print $ signs on the letter.

The cursor moves from the left to right and from top to bottom, as you complete the entry fields. If all positions are not used in a rate field, you must tab to the next entry field. Continue typing in all the rate breaks. Stop at the last rate break prior to the first rate break that will be mechanically picked up (if applicable) from your award form.

Review all entries and press the ENTER key to activate the edit process. See RCM 9.8.12 for a description of the edit process. If any data entered is invalid, an error message will appear. The cursor will position itself under the entry that triggered the error message. Correct the invalid entry and press the ENTER key again to reactivate the edit process. Continue this procedure until all the errors have been corrected.

When the data entered has cleared all edits, the data will be stored and the message "DATA HAS BEEN ACCEPTED: SELECT NEXT FUNCTION" will be displayed. Print the PAYMENT SUMMARY screen at this point for a folder record.

NOTE: Review RCM 9.8.12 on payment summary edits. The ENTER key should only be pressed after all entries have been completed. Since all of the numerous payment summary edits are activated whenever ENTER is pressed, this will reduce the amount of unnecessary computer response time.

Errors can be corrected at any time prior to exiting from the screen. Therefore, if an error is detected after the edits have cleared and the screen has been printed, you can still tab to the incorrect entry and change it. When your corrections are complete, press ENTER again. Get a new printout of the screen when the message "DATA HAS BEEN ACCEPTED: SELECT NEXT FUNCTION" is displayed.

When you are ready to continue, if you selected PAYMENT SUMMARY 01, 02, 03, 04, 05, 06, 13, press PF-19 to go to the CP SELECT/OVERVIEW screen. If you selected PAYMENT SUMMARY 08, 09, 10 or 11, press PF-18 to go to the regular payment summary screen you selected.

9.8.6 Completing A SSA Payment Summary (Recurring)

If you selected letter type RL-130a, RL-130b, RL-130c, RL-130r, RL-130t, RL-130u, RL-130tc or RL-130uc on the CREATE AWARD LETTER screen, the SSA PAYMENT
SUMMARY screen will be displayed automatically. Completion of the SSA PAYMENT SUMMARY screen is mandatory for the SSA letters listed above. The screen will have the Prefix, RRB #, PC, Letter Type, and Employee's Name entries pre-filled. Enter the following information:

<table>
<thead>
<tr>
<th>Item</th>
<th>Completion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type of Benefit</td>
<td>Enter the Type of Benefit. &quot;Retirement&quot;, &quot;Disability&quot;, etc. Twenty characters are allowed. Use upper and lower case letters. Do not abbreviate your entry.</td>
</tr>
<tr>
<td>Effective Date</td>
<td>Enter MM/DD/YY beginning with the earliest date break. Precede months and days less than 10 with a zero.</td>
</tr>
<tr>
<td>Monthly Rate</td>
<td>Enter the monthly rate up to 7 numeric positions. Use the space bar to line up dollar amounts less than four with the pre-filled decimal.</td>
</tr>
</tbody>
</table>

NOTE: Unlike RR award forms, payment summary information on Form RR-1e is not keypunched. Therefore, the user must enter all effective dates and rates to appear on the letter on-line.

The cursor moves from left to right and from top to bottom of the screen. For example, when the first line of entries is complete, the cursor will go to the effective date field on the 2nd line. Continue entering effective dates and monthly rates in ascending date order from the earliest to the latest as needed.

Review all entries and press the ENTER key to activate the edit process. See RCM 9.8.12 for a description of the edit process. If any data entered is invalid, an error message will appear. The cursor will position itself under the entry that triggered the error message. Correct the invalid entry and press the ENTER key again to reactivate the edit process. Continue this procedure until all errors have been corrected.

When the data entered has cleared all edits, the data will be stored and the message "DATA HAS BEEN ACCEPTED: SELECT NEXT FUNCTION" will be displayed. Print the SSA PAYMENT SUMMARY screen at this point for a folder record.

Errors can be corrected at any time prior to exiting from the screen. Therefore, if an error is detected after the edits have cleared and the screen has been printed, you can still tab to the incorrect entry and change it. When your corrections are complete, press ENTER again. Get a new printout of the screen when the message "DATA HAS BEEN ACCEPTED: SELECT NEXT FUNCTION" is displayed.

When you are ready to continue your RL-130 series letter, press PF19 to go to the CP SELECT/OVERVIEW screen. When you are ready to continue with a RL-130 TC or UC letter, press PF18 to go to the PAYMENT SUMMARY SELECTION screen to enter your RR payment summary data. Enter this data following the procedures in sections 9.8.4,
Selecting a Payment Summary, and 9.8.5, Completing a RR Payment Summary Screen. When you complete your RR payment summary entries, press PF-19 to go to the CP SELECT/OVERVIEW screen.

9.8.7 Completing A SSA OPO Payment Summary Screen

If you selected letter type RL-130x or RL-130xc on the CREATE AWARD LETTER screen, the SSA OPO PAYMENT SUMMARY screen will be displayed automatically. Completion of this screen is mandatory for the RL-130x and RL-130xc letters. The screen will have the Prefix, RRB #, PC, Letter Type, and Employee's Name entries pre-filled. Enter the following information:

<table>
<thead>
<tr>
<th>Item</th>
<th>Completion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Name of Wage Earner</td>
<td>Enter the name of the wage earner on whom the benefit is based. Use upper and lower case letters as appropriate. Twenty characters are allowed for the name. If fewer positions are needed, tab to next entry.</td>
</tr>
<tr>
<td>Period Covered by This Award</td>
<td>Enter the MM/DD/YY the accrual period began and the MM/DD/YY it ended. Precede months and days less than 10 with zero.</td>
</tr>
</tbody>
</table>

Review all entries and press the ENTER key to activate the edit process. See RCM 9.8.12 for a description of the edit process. If any data entered is invalid, an error message will appear. The cursor will position itself under the entry that triggered the error message. Correct the invalid entry and press the ENTER key again to reactivate the edit process. Continue this procedure until all errors have been corrected.

If the data is valid or when all edits have been cleared, the data will be stored and the message "DATA HAS BEEN ACCEPTED: SELECT NEXT FUNCTION" will be displayed. Print the screen at this point for a folder record.

Errors can be corrected at any time prior to exiting from the screen. Therefore, if an error is detected after the edits have cleared and the screen has been printed, you can still tab to the incorrect entry and change it. When your corrections are complete, press ENTER again. Get a new printout of the screen when the message "DATA HAS BEEN ACCEPTED: SELECT NEXT FUNCTION" is displayed.

When you are ready to continue, press PF19 to go to the CP SELECT/OVERVIEW screen. If you are completing a RL-130xc combined award letter, press PF18 to go to the PAYMENT SUMMARY SELECTION screen to enter your RR payment summary data. Enter this data following the procedures in sections 9.8.4, Selecting a Payment Summary and 9.8.5, Completing a RR Payment Summary Screen.
When you complete your RR payment summary entries, press PF-19 to go to the CP SELECT/OVERVIEW screen.

NOTE: Do not create a SS OPO letter (RL-130X or RL-103XC) if no SS accrual is being paid out.

9.8.8 Completing The CP Selection/Overview Screen

When this screen is accessed, the Prefix, RRB #, PC, Letter Type and Employee's name entries will be pre-filled. This screen is used to select and enter code paragraphs, access other screens for data entry and to provide an overview and folder record of the data entered on the letter. The body of the screen consists of two columns: ITEM and DESCRIPTION. The ITEM column will display identifying numbers or symbols of the input. The DESCRIPTION column will display the corresponding item's description and any applicable code paragraph (CP) inserts.

A. How Payment Summary Data Will Be Summarized on the Overview Screen - When the OVERVIEW screen is accessed during creation of an RL-20, RL-23, RL-43, RL-119 or an SS award letter, the payment summary name and description as selected on the PAYMENT SUMMARY SELECTION screen will be summarized and displayed on the OVERVIEW screen. See examples below:

1. Railroad Payment Summaries

   EX 1. Payment Summary Selection Screen: (code 03) T1, T2 payment summary (code 2) 1 date break from RHF

   OVERVIEW screen will display:

<table>
<thead>
<tr>
<th>ITEM</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>PS 03.2</td>
<td>T1, T2 - 1 date break from RHF</td>
</tr>
</tbody>
</table>

   EX 2. Payment Summary Selection Screen: (code 07) None

   OVERVIEW screen will display:

<table>
<thead>
<tr>
<th>ITEM</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>PS 07.0</td>
<td>No payment summary</td>
</tr>
</tbody>
</table>

   EX 3. Payment Summary Selection Screen: (code 04) T1/T2/VDB PMT SUM: (code 6) All date-breaks from examiner

   OVERVIEW screen will display:
ITEM      | DESCRIPTION
---        | ------------|
PS 04.6    | T1, T2, VDB - all date breaks from examiner

EX 4. Payment Summary Selection Screen: (code 13) RL-23 PMT SUM: (code 6) All date-breaks from examiner

OVERVIEW screen will display:

ITEM      | DESCRIPTION
---        | ------------|
PS 13.6    | COPD - all date breaks from examiner

2. Social Security Payment Summaries

ITEM      | DESCRIPTION
---        | ------------|
PS SS      | SSA Payment Summary
PS SS      | SSA OPO Payment Summary

NOTE: Once the CP SELECTION/OVERVIEW SCREEN is accessed, Payment Summary data can only be changed by using the Modify Pending Letter function. From the OVERVIEW screen the Modify Pending Letter Screen can be accessed by hitting PF23. The Modify Pending Letter screen can also be accessed using the Main Menu.

B. How to Enter Code Paragraphs

1. Entering Code Paragraphs - Entries are made next to the ENTER CODE PARAGRAPH item located at the bottom of the screen. The cursor will be located under the first data entry position. Enter the code paragraph number selected and press the ENTER key to activate the edit process.

- If a valid code paragraph (CP) requiring no inserts is entered, the CP number will be displayed in the ITEM column and a brief CP description will be displayed in the DESCRIPTION column.

  The cursor will be reset at the first position of the entry field. To add an additional CP, simply enter another number and press ENTER.
• If a valid CP requiring inserts is entered, the CODE PARAGRAPH INSERTS screen will automatically appear. When that screen is completed, the insert information entered will be brought to the OVERVIEW screen and displayed. The CP number will be displayed in the ITEM column. Next to it, a brief CP description and the numbered inserts for that CP will be displayed in the DESCRIPTION column.

Make your entries using the appropriate upper and lower case letters, i.e., capitalize proper names, names of states, etc.

See RCM 9.8.12 for a description of the edit process. If any data entered is invalid, an error message will appear. The cursor will position itself under the entry that triggered the error message.

2. Completing the REASON FOR THE ADJUSTMENT PROMPT - The RL-119 letter requires that you complete a "reason for the adjustment" (RFA) entry before you go on to enter any miscellaneous CP entries. To complete this prompt you can use a code or special paragraph. The point is to enter the primary reason why you are processing an award. The paragraph you enter here will be given special prominence in the letter. (It will follow opening CP 1600, 1601, 1629 or 1630 and precede the payment summary).

When you type in your RFA CP or SP, tab to the reason for the adjustment prompt. This prompt will be pre-filled with a "N" for NO. Change this prompt to a "Y" and press ENTER. A "Y" will be displayed along with the CP/SP ITEM number and DESCRIPTION.

An error message will appear when you attempt to validate the RL-119 letter if a RFA CP/SP is not entered or if more than one RFA CP/SP is entered.

3. Completing a Combined Award Letter - On RL-130tc, 130uc and 130xc letters, enter the CP's pertaining to the SS adjustment first and then, the RR adjustment CP's. (For example, enter SS CP 1508.1, Additional SS Earnings Considered, SS CP 1506.1, SS increase; Specified Amt of RR O/P Recovered, and then, enter RR CP 1705, SS Benefit Increase-100% offset.

C. How to Enter Special Paragraphs - ALTA allows for the creation of 2 compositions 5 lines of up to 70 characters each. If there is no code paragraph for the information needed on a letter, enter SP1 to compose a special paragraph. ALTA will display the COMPOSE SPECIAL PARAGRAPH screen (described in 9.8.10). When entering a special paragraph, you must use upper and lower case letters. Use appropriate capitalization, that is, capitalize the first word of sentences and all proper names. When that screen has been completed,
return to the OVERVIEW screen. Whenever a second special paragraph is needed, enter SP2. ALTA will again display the COMPOSE SPECIAL PARAGRAPH screen for data entry. If two special paragraphs have been created in succession, the OVERVIEW screen will display:

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SP1</td>
<td>Compose Special Paragraph - 1</td>
</tr>
<tr>
<td>SP2</td>
<td>Compose Special Paragraph - 2</td>
</tr>
</tbody>
</table>

NOTE: The actual wording of the special paragraph will not appear on the OVERVIEW screen.

D. Reserved– ALTA letters are imaged. Letters can be viewed on WorkDesk. Copies cannot be requested on ALTA.

E. Miscellaneous

1. **How to Access Multiple Pages on Overview Screen** - The OVERVIEW screen is page-able to allow more space for data entry. A page number will be displayed in the lower right portion of the screen. If your entries fill up the first page of the OVERVIEW screen, they will automatically be posted to the second page. Though data may be posted to a page different than the one you are on, that later page will not be displayed automatically. When necessary, use PF8 to access page 2 and subsequent pages of the OVERVIEW screen. Once a page is accessed, you will remain on that page for all entries except code paragraphs with inserts. ALTA always returns to page 1 of the OVERVIEW screen from the CODE PARAGRAPH INSERTS screen.

   To view multiple pages:
   1) Press PF8 to display the next page, or
   2) Press PF7 to display the preceding page.

2. **How to Modify and Delete Entries Displayed on the Overview Screen**

   - To modify the inserts previously entered in a CP, type in the CP number you want to modify and press PF3 (MODIFY ITEM). The CODE PARAGRAPH INSERTS screen will automatically be displayed and the cursor will be set at the first insert entry. If necessary, move the cursor to the incorrect item and type in the corrected insert. Press
ENTER to return to the OVERVIEW screen when all corrections have been completed. The corrected insert(s) will be displayed on the OVERVIEW screen.

- To modify a special paragraph previously entered, type in SP1 or SP2 (as appropriate) and press PF3 (MODIFY ITEM). The COMPOSE SPECIAL PARAGRAPH screen will appear. Type over the incorrect text; press ENTER. Print the corrected COMPOSE SPECIAL PARAGRAPH screen for a folder record before continuing on with your next ALTA action.

- To delete a CP, enter the CP number in the ENTER CODE PARAGRAPH entry item and press PF4 (DELETE ITEM). The CP number, description and inserts (if any) will be deleted from the OVERVIEW screen. The remaining CP's, if any, will move up. The cursor will reset at the first position of the CP entry item.

- To delete a special paragraph previously entered, type in SP1 or SP2 (as appropriate) and press PF4 (DELETE ITEM). The SP item deleted and its description will be deleted from the OVERVIEW screen. If two special paragraphs (SP1 and SP2) have been created and SP1 is deleted, the SP2 designation will be changed to SP1 automatically.

If you hit PF3 or PF4 after entering a CP number that has not been previously entered, you will get an error message.

F. How to complete the Appeals Rights Prompt - After all data entries have been completed on a RL-20, RL-24, RL-43, RL-45 or RL-119 ALTA award letter, you must complete the APPEALS RIGHTS? Y/N prompt. When you press the TAB key at this point, the cursor will jump to this item pre-filled with a "Y" - yes. If you have one of the situations mentioned in RCM 6.1 procedure that do not require an appeals rights paragraph, enter a "N" or "n" in this item. The cursor will jump to the next entry and code paragraph 199 will not be included in the award letter.

If the letter requires appeals rights, TAB through this item to the validation prompt. The appropriate version of code paragraph 199 will be automatically included in the letter.

This prompt will not appear on any letters other than those mentioned above.

G. How to Validate the Letter - After all data entries have been completed, each letter must be validated on the OVERVIEW screen. This tells the system that the letter is finished and ready to be mailed. To validate a letter, tab to the "N" in the "LETTER VALIDATED FOR RELEASE?" item if necessary, type in "Y" or "y" and press the enter key to activate the edit process.
If the data passes all edits, the message: LETTER READY FOR RELEASE: SELECT NEXT FUNCTION will be displayed. Print the OVERVIEW screen at this point for a folder record.

If any additions/corrections are made to the letter after it has been validated, the validation code automatically reverts to an "N". Revalidate the letter with a "Y" or "y" whenever necessary.

Press the appropriate PF key to exit ALTA or to begin your next ALTA action.

### 9.8.9 Completing Code Paragraph Inserts

This screen is automatically displayed after a code paragraph number that requires inserts has been entered on the OVERVIEW screen. The Prefix, RRB #, and Payee Code entries will be pre-filled. As a reminder, the code paragraph number and description will be displayed. Insert prompts will guide you as to what to enter for the insert. The insert prompts will be listed in numerical order below the description. Each insert prompt will be followed by a line for data entry. Make your entries using the appropriate upper and lower case letters.

If necessary, review the text of the code paragraph by using ALTA's Code Paragraph Library. The library can be accessed from the OVERVIEW screen by pressing PF1. In general, enter dates in numeric. ALTA will convert the month and year as follows: 06-07-88 will appear on the letter as June 7, 1988. The usual editing for dates will be done, i.e., only 1 through 12 for month and 1 through 31 for days will be allowed. On the letter, the year will be shown as 4 characters. You must complete all positions when dates are requested. Months and days under 10 must be filled with a preceding zero. Spaces between dates can be dashes or slashes only. (ex: 06-07-88 or 06/07/88)

Inserts that have been identified as being all numeric or all alphas only allow those characters.

Inserts that are money amounts allow numeric and decimals only. You must enter a decimal followed by two numbers (zeros, if appropriate). Do not enter the $ sign. ALTA will precede these entries with a $ sign on the letter.

The cursor will be set at the first position of the first insert. Type in the insert. If more than one insert is required, tab the cursor from one entry to the next.

Complete all the inserts before pressing the ENTER key. Review all entries and press the ENTER key to activate the edit process. See RCM 9.8.12 for a description of the edit process. If the data you entered is valid, the data will be stored and the OVERVIEW screen will be automatically displayed. If the data is invalid, an error message will appear. Correct the invalid entry and press the ENTER key. Repeat, if necessary, until all the data is valid.
You can exit from the code paragraph insert screen prior to completion of all data by pressing the CLEAR key. If this is done, both the code paragraph number and any inserts will be automatically erased and you will be automatically returned to the OVERVIEW screen. The incomplete code paragraph will not appear in the OVERVIEW screen.

### 9.8.10 Composing Special Paragraphs

Entering SP1 or SP2 on the OVERVIEW screen accesses this screen. The Prefix, RRB #, Payee Code, Letter Type, and Employee’s Name, if any, entries will be pre-filled. This screen tracks entry and modification of a special paragraph by recording the user ID and entry/modification date next to the "LAST MODIFIED BY" item at the top left of the screen. This item will be updated each time the screen is modified. However, the "Date Entered" displayed on the Modify Pending Letter and Delete Pending Letter screens for a pending letter never changes. These 2 screens always show the date the letter was originally entered.

When the screen is displayed, the cursor will be positioned below the first position of special paragraph (SP1). Type in your text using the appropriate capitalization i.e., capitalize the first word of each sentence and all proper names. When your entry is complete, press ENTER. The message DATA HAS BEEN ACCEPTED: SELECT NEXT FUNCTION will be displayed. If you only plan to compose one special paragraph, print a copy of the screen at this time for a folder record. If you plan a second special paragraph, press ENTER but print the screen only after the second special paragraph is completed.

Press CLEAR to return to the OVERVIEW screen.

If a second special paragraph is desired, enter SP2 in the OVERVIEW screen. When you return to the COMPOSE SPECIAL PARAGRAPH screen, the cursor will be set at the first position of the SP2 entry. When your entry is complete, follow the procedure above.

The special paragraph(s) will appear on the letter exactly as it is entered on the screen.

**NOTE:** You can enter multiple paragraphs on a single set of 5 lines by skipping a line between the statements. Keep in mind that ALTA always prints a blank line between SP1 and SP2 or the next selected code paragraph.

### 9.8.11 Copies

ALTA letters are imaged. Letters can be viewed on WorkDesk. Copies cannot be requested on ALTA.
9.8.12 How ALTA Edits Data On-Line

ALTA performs numerous up-front edits to prevent erroneous data from being entered into the database. The ENTER key must be pressed to activate the edit process. If the data entered is valid, both the data will be stored and the next appropriate screen will be displayed automatically or a confirmation message will appear indicating the action taken while the system awaits the next command. ALTA edits the screen item by item. The edit process stops when the first invalid entry is found. The cursor then sets itself at the invalid item. The erroneous data field will be highlighted in red reverse-video (blocked), and a descriptive edit message will be displayed in red. See Exhibit 1 for the ALTA edit messages and their meanings.

Errors are corrected by typing over the erroneous entry with the correct information. After correcting the first invalid field, press ENTER to reactivate the edit process. Continue this until you have cleared all the edits.

9.8.13 Pending Transactions

Letters will be held on the database until the voucher clears, until both SS and RR voucher clear for combined award letters or for at least 120 days from the date originally entered, whichever is earlier. When the voucher(s) clear(s) and the letter is released or rejected, the screens used in creating the letter are moved to the Browse released letters file (see Section 9.8.16). Letters that have not matched with a voucher after at least 120 days will be automatically purged from the database. In the case of combined letters, letters that have not matched with the second voucher after at least 120 days will be automatically purged. A listing will be produced monthly detailing these purged cases. You can modify or delete a letter at any time until the last voucher clears or the letter is purged. The following sections detail these functions.

9.8.14 Modifying A Pending Letter

To modify or to view an award letter pending on the database, you must request the MODIFY PENDING LETTER screen. To access this screen from the MAIN MENU or CREATE AWARD LETTER screen, press PF-23.

If the MODIFY PENDING LETTER screen is accessed from the CREATE screen, the top entries (Prefix, RRB #, and Payee Code) will be pre-filled. The bottom of the screen will display all letters pending on that payee code. If the MODIFY PENDING LETTER screen is accessed from the MAIN MENU, enter the following information:

<table>
<thead>
<tr>
<th>Item</th>
<th>Completion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prefix</td>
<td>Enter A, D or H.</td>
</tr>
</tbody>
</table>
### RRB #

Enter the 6 or 9 digit number. If your entry is a 6 digit number, enter 6 digits and tab over to the next entry.

### Payee Code

Enter the payee code from 1 to 9.

---

**NOTE:** A payee code entry is not mandatory. If a payee code is not entered, the screen will display all the letters pending on the database under the claim number entered. If a payee code is entered, the screen will display only the letters under the claim number and payee code requested.

The cursor will be set at the "SELECT ONE OF THE FOLLOWING LETTERS" entry. Enter the number corresponding to the letter you want to modify and press the ENTER key to activate the edit process.

If the data is valid, ALTA will display the appropriate screen as shown on the chart in section 9.8.3. The screens will appear in the same sequence and function as they did during the Create mode. To access the screen you need, traverse any earlier screens automatically displayed by hitting ENTER or the appropriate PF key. In the Modify mode, the original entries will be displayed. To modify an entry, simply type over it. Tab over entries that do not need to be changed. Press ENTER to activate the edit process. When all entries are complete, you must re-validate the letter on the OVERVIEW screen. Also, secure new printouts of changed screens.

**NOTE:** A letter's "Date Entered" displayed on the Modify Pending Letter screen is never updated. This screen always shows the date a letter was originally entered, regardless of whether or not it was later modified.

### 9.8.15 Deleting A Pending Letter

To delete an award letter pending on the database, you must request the DELETE PENDING LETTER screen. To access this screen from the MAIN MENU or CREATE AWARD LETTER screen, and press PF-20.

If the DELETE PENDING LETTER screen is accessed from the CREATE screen, the top entries (Prefix, RRB #, and Payee Code) will be pre-filled. The bottom half of the screen will also show all the letters pending on the pre-filled claim number and payee code.

If the DELETE screen is accessed from the MAIN MENU, enter the following information:

<table>
<thead>
<tr>
<th>Item</th>
<th>Completion</th>
</tr>
</thead>
<tbody>
<tr>
<td>RRB #</td>
<td>Enter the 6 or 9 digit number. If your entry is a 6 digit number, enter 6 digits and tab over to the next entry.</td>
</tr>
</tbody>
</table>
Prefix | Enter A, D or H.

RRB # | Enter the 6 or 9 digit number. If your entry is a 6 digit number, enter 6 digits and tab over to the payee code entry.

Payee Code | Enter the payee code from 1 to 9.

NOTE: A payee code entry is not mandatory. If a payee code is not entered, the screen will display all the letters pending on the database under the claim number entered. If a payee code is entered, the screen will display only the letters under the claim number and payee code requested.

The cursor will be set at the "SELECT ONE OF THE FOLLOWING LETTERS" entry. Select and type in the number of the letter you want to delete and press the ENTER key.

If your entry is valid, the following message will be displayed:

HIT PF-4 TO COMPLETE DELETION; HIT PF-19 TO VIEW CP SELECT/OVERVIEW

Press PF-19 if you wish to review the OVERVIEW screen before deleting the letter. Press PF-4 if you wish to delete the letter. The message "RECORD HAS BEEN DELETED" will be displayed when PF-4 is pressed. Printouts of the screens used in creating the deleted letter should be destroyed.

9.8.16 The Browse Released Letter Screen

The screens used in creating award letters will remain on the database, available for viewing, at least 120 days after the voucher has cleared and the letter is released. In the case of combined award letters RL-130tc, uc and xc, the screens will remain on the database for browsing at least 120 days after the last voucher has cleared and the letter released. After 60 days, these screens will begin to be purged from the database. Screens for released letters and rejected letter information will be purged at the end (around the 26th) of the 2nd month following the date the letter was released/rejected. For example, a letter released on 11-25-02 will pend until 3-31-03 at which time it will be purged while a letter released on 11-27-02 will be purged on 4-31-03. The date the letter was released is the voucher date of the manual award. To view the data entry screens for released award letters, press PF-5. The BROWSE RELEASED LETTER screen will then appear. Enter the following information:

| Item | Completion |
Prefix | Enter A, D or H.
--- | ---
RRB # | Enter the 6 or 9 digit number. If your entry is a 6-digit number, enter 6 digits and tab over to the payee code entry.
Payee Code | Enter the payee code from 1 to 9.

NOTE: A payee code entry is not mandatory. If a payee code is not entered, the screen will display all the released letters pending on the database under the claim number entered. If a payee code is entered, the screen will display only the letters under the claim number and payee code requested.

Review all entries and press the ENTER key to activate the edit process. See RCM 9.8.12 for a description of the edit process.

If you discover an error before pressing the ENTER key, return the cursor to the incorrect item and type in the correct entry. Hitting either a forward or backward TAB or NEW LINE key should move the cursor.

If the data is valid or after all edits have been cleared, ALTA will display all the letters pending under the record requested. Rejected letters (i.e., partially or wholly printed and referred out) will also be displayed on the BROWSE RELEASED LETTER screen. The voucher date of the rejected letter will be shown under the date released and "REJECT" will be shown after it. The input screens for rejects are not available for viewing.

The cursor is set at the "SELECT ONE OF THE FOLLOWING LETTERS" entry. Enter the number corresponding to the letter you want to BROWSE and press the ENTER key. ALTA will edit your entry in this item. If all edits clear, ALTA will display the BROWSE OVERVIEW screen.

### 9.8.17 The Browse Overview Screen

This screen will display all data contained on the CP SELECT/OVERVIEW screen used in creating the letter. The body of the screen consists of two columns: ITEM and DESCRIPTION. The ITEM column will display identifying numbers or symbols for the input. The DESCRIPTION column will display the corresponding item’s description and any applicable CP inserts.

For recurring award letters, the payment summary is the first listing on Browse Overview screen. (Payment Summaries are not provided on ALTA for manual railroad one-payment-only awards.)

The ALTA system can access the Rate History File (RHF) to obtain limited payment summary data. Rates and their corresponding effective dates available from voucher
input sheets do not have to be input to ALTA by the examiner when creating a letter, minimizing the number of screen entries. In retirement cases, only the latest rate can be picked up from RHF; in survivor cases, up to the three latest rates may be secured from the RHF. The description of the payment summary indicates the letter’s source for the effective dates and rates (e.g., T1, T2 - 1 date-break from the RHF). Rates filled from the RHF will not be displayed on subsequent Browse Payment Summary screens; only rates entered on-line by the examiner will be displayed on the Browse Payment Summary screens.

For regular RR or SS award letters, if the Browse Overview screen’s description indicates that a payment summary was completed on-line (e.g., T1, T2 - 3 date-breaks from RHF, prior date-breaks from examiner), pressing PF17 will take you to a SS payment summary and pressing PF18 will take you to a RR PAYMENT SUMMARY screen. (See Section 9.8.18). If a dual RR payment summary number 08, 09, 10 or 11 was selected, the RESPONSES section at the bottom of the screen will be slightly different. Press PF15 to view the SUPP ANN PAYMENT SUMMARY screen or press PF18 to view the RR PAYMENT SUMMARY screen. When you complete your viewing of the PAYMENT SUMMARY screen, press PF19 to return to the BROWSE OVERVIEW screen.

For combined award letters, press PF-17 to view the SS payment summary and/or press PF-18 to view the RR payment summary.

If the screen indicates that a special paragraph has been composed, pressing PF21 will take you to the BROWSE SPECIAL PARAGRAPHS screen. The text of one or two special paragraphs will be displayed. To return to the BROWSE OVERVIEW screen, press PF19.

To view the text of a code paragraph displayed on the BROWSE OVERVIEW screen, press PF1. You will be switched to the BROWSE CODE PARAGRAPH LIBRARY screen. Follow the procedure in RCM 9.8.20, to view the text of any code paragraph on ALTA. To return to the BROWSE OVERVIEW screen, press PF19.

The BROWSE OVERVIEW screen is page-able to allow more space for data display. A page number will be displayed at the lower right portion of the screen.

To view multiple pages:

1) Press PF8 to display the next page, or

2) Press PF7 to display the preceding page.

9.8.18 The Browse Payment Summary Screens

Through the BROWSE OVERVIEW screen, you can access the following BROWSE PAYMENT SUMMARY SCREENS:
BROWSE T1 PAYMENT SUMMARY
BROWSE T2 PAYMENT SUMMARY
BROWSE T1, T2 PAYMENT SUMMARY
BROWSE T1, T2, VDB PAYMENT SUMMARY
BROWSE SUPPLEMENTAL PAYMENT SUMMARY
BROWSE SPECIAL GUARANTY PAYMENT SUMMARY
BROWSE SSA OPO PAYMENT SUMMARY
BROWSE SSA PAYMENT SUMMARY

As discussed in Section 9.8.17, the Browse Payment Summary screen displays only the rates entered on-line by the examiner. If necessary, use the Payment Summary Item and Description shown on the Browse Overview screen to determine which rates were shown on the letter but not displayed on this screen.

Responses for all the Browse Payment Summary Screens will be:

PF19 Browse Overview
PA1 Main Menu
PA2 End ALTA Session

9.8.19 The Browse Special Paragraph Screen

To view the wording of the special paragraph(s), press the PF21 key. The Browse Special Paragraphs screen will be displayed.

Responses for the Browse Special Paragraphs Screen will be:

PF1 Browse Code Paragraph Library
PF19 Browse Overview
PA1 Main Menu
PA2 End ALTA Session

9.8.20 Browse Code Paragraph Library

To view a code paragraph available on the ALTA database, request the BROWSE CODE PARAGRAPH LIBRARY screen. To access this screen from the MAIN MENU,
CP SELECT/OVERVIEW, BROWSE OVERVIEW, or BROWSE SPECIAL PARAGRAPHS screens, press PF1.

When the screen appears the cursor will be set at the ENTER CODE PARAGRAPH item. To view the text of a code paragraph, type in the code paragraph number. Enter decimals in the code paragraph number, if applicable (e.g., 1824.1). Enter alpha characters in case shown in RCM 10.5 e.g., 404a, 404b. Press the ENTER key.

ALTA will edit the entry and when edits clear, display the CP requested. The first line will display the CP number followed by a short description. The text of the CP begins on the second line. If the CP contains inserts, the type of insert will be indicated as follows: examiner completed inserts will be numbered (1.), (2.), (3.), etc., automatically completed inserts will be indicated by the designations (CHICO) or (RHI) depending on the file used to complete the insert.

When the CP is displayed, the CP number in the entry item will be automatically erased and the cursor will be reset for the next CP entry. If the CP entered is not in the ALTA library, the message: CODE PARAGRAPH NOT IN LIBRARY will be displayed. In this case, the CP number will not be erased, but the cursor will be reset for a new entry. Review your entry and type in the correct code paragraph number.

The BROWSE CODE PARAGRAPH LIBRARY screen is page-able to allow more space for data display. A page number will be displayed at the lower right portion of the screen.

To view multiple pages, if any:

1) Press PF8 to display the next page, or

2) Press PF7 to display the preceding page.

9.8.21 ALTA Daily Manual Award Activity Listing

Given that file copies of award letters will not be routinely produced under ALTA, the ALTA Activity Listing is designed to simplify pulling cases that have cleared vouchering. It is also used to identify cases that require special handling of ALTA rejects.

This listing while similar to the current Xeroxed DAISY listing shows manual award activity only. Related ALTA activity is indicated next to each claim that has been accepted (paid).

Because the listing is sorted according to the Units' voucher number assignments, each Unit will receive a listing of its own manual award activity.

A. Rejected Awards

1. Regular ALTA Letters
Related ALTA Activity will not be shown for awards that reject. Furthermore, rejected awards will not be included in the ALTA Balance Counts Report. For each Unit, the rejected awards will be listed in claim number order following all paid awards on the ALTA Activity Listing.

2. **Combined ALTA Letters**

Combined award letters, RL-130TC, RL-130UC and RL-130XC, will be handled differently. Until both vouchers clear DAISY, they will not be posted on this listing. Rather, notice of DAISY reject and related ALTA activity will be documented by referral, see RCM 9.8.22A.

B. **Accepted Awards**

The following messages will be displayed for cases that have been accepted:

- **ALTA - Match, Letter Released**
  
  The accepted award (or awards if a combined letter is involved) has matched a claim number and payee code entered in ALTA. All edits have cleared and the letter was released.

- **ALTA - Match, Reject LTR RLSD**
  
  For combined letters, this message indicates that all edits pertaining to the letter in question have cleared, but the companion letter has rejected. A reject letter and referral have been produced.

- **ALTA - Not Applicable**
  
  The accepted award met the criteria for a STAZA letter. No reject referral will be produced.

  **NOTE:** STAZA cases will not be included in the ALTA Balance Counts Report.

- **ALTA - No Match**
  
  A separate ALTA reject referral will be produced. (See detailed explanation of reject referrals in 9.8.22.)

- **ALTA - Reject, No Validation**
  
  A separate ALTA reject referral will be produced. (See detailed explanation of reject referrals in 9.8.22.)

- **ALTA - Reject, RH Data Miss/Invld.**
A separate ALTA reject referral will be produced. (See detailed explanation of reject referrals in 9.8.22.)

### 9.8.22 ALTA Reject Referrals

**A. General** - ALTA will produce referrals for four categories of cases. The following are the messages that are displayed on the referrals and the conditions that produce them. The first three categories listed below apply to all cases; the fourth category applies only to combined letter processing.

1) **ALTA, No Match**

   The accepted award did not find a matching claim number and payee code entered in ALTA and the manual award did not meet the criteria for a STAZA letter. No letter was released by ALTA.

   One of the following situations may have occurred:

   a) The User entered the wrong claim number and/or payee code, or
   
   b) The User neglected to enter a letter into ALTA, or
   
   c) The case did not require an award letter (e.g.: transfer of funds only) or,
   
   d) The award letter was typed outside the ALTA program.

   Units should match the referral to the file and determine the proper handling. If it is determined that a letter must be manually released, a copy should be made for the F/O and file.

2) **ALTA- Reject, No Validation**

   The accepted case has matched a claim number and payee code entered in ALTA. All edits have cleared but the letter was not released because the "letter validated for release" on-line entry was not completed. The letter will be printed and forwarded with the referral to the originating unit for proper handling.

3) **ALTA - Reject, RH Data Miss/Invld.**

   The accepted case has matched a claim number and payee code entered in ALTA. Edits prevented the letter from being completed properly. The letter will be printed, excluding the portion of the letter where the error was detected, and forwarded with the referral to the originating Unit for completion, and release.

4) **Combined Letter Referrals**
a. **ALTA - Match, DAISY Reject; Voucher Data Place on Hold File**

The accepted DAISY voucher has matched a claim number payee code and combined letter pending on ALTA. The second voucher needed to complete the ALTA letter has rejected in DAISY. The data required to complete the ALTA letter has been placed on a hold file to pend correction of the rejected voucher.

Units should match the referral to the file on a priority basis and determine the proper handling. The rejected award should be mechanically corrected as soon as possible using ONCORR. If it is determined that the rejected voucher will not be re-vouchered, a manual letter must be completed for the voucher which did clear. Manual letters should be prepared as soon as possible after the referral is received.

b. **ALTA - Match, DAISY No Match; Voucher Data Placed on Hold File**

The accepted DAISY voucher has matched a claim number, payee code and combined letter pending on ALTA. The second voucher needed to complete the ALTA letter did not come through on DAISY on the same run.

Units should match the referral to the file on a priority basis and determine the proper handling. Determine whether to wait for the second voucher to clear or whether, if the missing voucher is not being re-vouchered, a manual letter should be released for the voucher which cleared.

c. **ALTA Combo Award No Match Referral Combined Letter and Voucher Data Deleted/Purged**

This referral will be produced whenever the voucher needed to complete a pending ALTA letter is not matched before the pending ALTA letter is deleted by examiner action or purged by the monthly ALTA purge program.

This referral is a folder record. It documents the fact that a pending letter was deleted or purged and, therefore, cannot be used again. Combined letter referrals a. and b., above, will have been released previously, check to make sure the actions required by those referrals has been completed.

---

B. **Payment Summary Edits** - When ALTA is requested to mechanically pick-up date breaks from the award form to be printed on the letter and an error is detected during the end-of-line editing process, a referral message will be printed and editing terminated for that portion of the letter. The payment summary heading
selected on-line and any date breaks entered on-line will, nonetheless, be printed on the letter. The rejected letter will leave lines for manual completion of the payment summary.

The following shows edits which are performed and the reject messages that may appear under the category of "RH Data Missing/Invalid."

- **PAYMENT SUMMARY - TOTAL RATE DOES NOT EXCEED ZERO, COL.A.**

  Column A refers to the latest date-break on the award form G-357 or G-364.1. This message occurs when the on-line payment summary selection was other than O/M or SUPP and the Rate History File shows the total rate (G-357 item 27 or G-364.1 item 113) as zero or blank.

- **PAYMENT SUMMARY - TOTAL RATE DOES NOT EXCEED ZERO, COL.B.**

  Column B refers to the 2nd latest date-break on the award form G-364.1. This message occurs when the Rate History File shows the total rate (G-364.1 item 113) as zero or blank.

- **PAYMENT SUMMARY - TOTAL RATE DOES NOT EXCEED ZERO, COL.C.**

  Column C refers to the 3rd latest date-break on the award form G-364.1. This message occurs when the Rate History File shows the total rate (G-364.1 item 113) as zero or blank.

- **PAYMENT SUMMARY - SUM OF TIERS SELECTED DOES NOT EQUAL TOTAL RATE, COL.A.**

  Column A refers to the latest date-break on the award form G-357 or G-364.1. This message occurs when the on-line payment summary selection was other than O/M or SUPP and, in Rate History, the total of the selected tiers (G-357 items 24, 25, and 26) or (G-364.1 items 87, 110 and 112) does not add up to the total rate (G-357 item 27) or (G-364.1 item 113). Note that if a tier sheet is submitted showing a net tier amount different than what appears on the G-357 or G-364.1, the information on the tier sheet is used in Rate History, and therefore, used in ALTA's calculation check.

- **PAYMENT SUMMARY - SUM OF TIERS SELECTED DOES NOT EQUAL TOTAL RATE, COL.B.**

  Column B refers to the 2nd latest date-break on the award form G-364.1. This message occurs when, in Rate History, the total of the selected tiers (G-364.1 items 87, 110 and 112) does not add up to the total rate (G-364.1 item 113). Note that if a tier sheet is submitted showing a net tier amount different than what appears on the G-357 or G-364.1, the information on the tier sheet is used in Rate History, and therefore, used in ALTA's calculation check.
• PAYMENT SUMMARY - SUM OF TIERS SELECTED DOES NOT EQUAL TOTAL RATE, COL.C.

Column C refers to the 3rd latest date-break on the award form G-364.1. This message occurs when, in Rate History, the total of the selected tiers (G-364.1 items 87, 110 and 112) does not add up to the total rate (G-364.1 item 113). Note that if a tier sheet is submitted showing a net tier amount different than what appears on the G-357 or G-364.1, the information on the tier sheet is used in Rate History, and therefore, used in ALTA's calculation check.

• O/M PAYMENT SUMMARY SELECTED, O/M RATE DOES NOT EXCEED ZERO.

This refers to the latest date-break on the award form G-357. This occurs when the on-line selection was O/M and the Rate History File shows the O/M rate item 28 as zero or blank.

• PAYMENT SUMMARY SELECTED INCONSISTENT WITH TYPE OF PAYMENT.

This occurs when the on-line payment summary selection was SUPP and the award form G-357 submitted shows a "Type of payment" other than "SUPP ONLY."

• PAYMENT SUMMARY SOURCE SELECTED INCONSISTENT WITH TYPE OF AWARD FORM.

This occurs when the on-line payment summary source selection requested ALTA to use more than one date-break from RHF, and the award form submitted was G-357. The RHF picks up only one date break, the latest, from the G-357.

• PAYMENT SUMMARY - EFF. DATES NOT IN ASCENDING ORDER.

This occurs when the effective dates in Rate History are not in ascending date order, or when the effective dates entered on-line, together with the Rate History effective dates are not in ascending date order.

• PAYMENT SUMMARY - LATEST EFF. DATE EXCEEDS LETTER ENTRY DATE BY 60 DAYS.

This occurs when the latest effective date in Rate History is more than 60 days from the date the letter was entered on ALTA.

C. Code Paragraph Edits - Certain code paragraphs require insert data from the Rate History or CHICO files. If that data is missing or invalid, a referral under the category of "RH Data Missing/Invalid" will be produced. The reject message will identify the problem code paragraph number.
9.8.23 ALTA Balance Counts Report

A Balance Count Report will be produced with every ALTA Daily Manual Award Activity Listing.

The purpose of this report is to compare the number of manual awards vouchered with the corresponding output produced by ALTA. This report balances the following counts:

- **Total ALTA Awards**
  This is the total number of manual awards vouchered on the Daisy run excluding rejected awards and accepted awards that have been identified as STAZA awards.

- **Letters Released**
  This is the total number of award letters completed and released for mailing.

- **No Matching ALTA Letter**
  This is the total number of awards that did not match a transaction pending in ALTA. Referrals will be produced and sent to the appropriate Unit for handling.

- **ALTA Letter Reject, No Validation or RH Data Miss/InvId**
  This is the total number of award letters produced but not released because of missing/invalid information in Rate History, or because the letter was not validated on-line for release. These letters, along with their referrals, will be sorted and sent to the appropriate Unit for correction and release.

- **In Balance**
  A "yes" will be printed if the sum total of "Letters Released," No Matching ALTA Letter" and "ALTA Letter Rejects" equals the number of "Total ALTA Awards." Otherwise, a "No" will be printed.

- **Combination Voucher/Letter Counts**
  This part of the report displays the following counts for combined letters:

  - **Total ALTA Awards**
    This is the total number of accepted manual awards completing ALTA award letters. It includes vouchers processed on the DAISY run and voucher data that resided in the hold file. It only includes vouchers which matched on a combined letter pending on ALTA.

  - **Letters Released**
This is the total number of award letters completed and released for mailing.

- **ALTA Letter Reject, No Validation or RH Data Miss/Invld**

  This is the total number of reject ALTA letters produced.

### 9.8.24 ALTA Referral Message Counts

This report is a list of all referral messages produced by ALTA's end-of-line edits. Each message is followed by the frequency of the error in the Daisy run.
9.9.1 Employer Status List Overview

The Bureau of the Actuary maintains an Employer Status List (ESL). The list contains the employers that were determined to be covered under the Railroad Retirement Act since 1936. Refer any questions concerning the list to the Bureau of the Actuary.

9.9.2 Employment Data Maintenance (EDM) Overview

Employment Data Maintenance (EDM) is a data base system that captures and maintains employment data for individuals who worked for employers covered under the Railroad Retirement Act.

EDM maintains the following types of employment data for railroad employees: actual and deemed railroad service months, compensation, miscellaneous compensation, military service and SSA wage/SEI data. EDM also maintains railroad employer specific information, such as name, address and status. The railroad contact officials for A&T are also included.

While the primary users of the EDM system will be A&T, other headquarters and field users can utilize the system to inquire into the service and earnings records of railroad employees as an aid to answering inquiries and expediting disability freeze determinations. No spouse or survivor information is contained in EDM.

EDM replaces wholly or in part the following master tape files:

- **SSA MEF (Master Earnings File)** - Wages reported to SSA for employees with 120 or more RR service months.
- **SCORE** - Service and Compensation of railroad employees.
- **SPREM** – Miscellaneous compensation reported as railroad earnings by railroads, the Disability, Survivor, Unemployment Benefit Division (DSUBD) or insurance companies.
- **CUTBACK** - Railroad earnings in excess of the annual Tier I and Tier II maximums.
- **Employer File** - Detailed information about railroad employers covered at EDM's implementation.
- **Railroad Contact Official File** - Detailed information about railroad contact officials.

These files have been converted from magnetic tape to a data base environment to allow on-line access.
EDM also provides military service dates and creditability determinations as soon as that information becomes available or is developed, thereby avoiding delays and eliminating the need for manual re-entry on subsequent requests for G-90’s or PIA calculations. The data base is built in retirement cases as the M/S data leaves the SEARCH system, or when it is processed from data input on APPLE.

SSA will provide RRB with weekly updates of wages/SEI information for RR employees whom either:

- Worked after 1995 or
- Have 108 railroad service months or more.

This will save time in paying cases since the wage data stored in EDM can be provided as soon as it is requested through SEARCH and the TRIC systems.

EDM will produce a referral for RASI when earnings are posted after the claims processing begins.

Expedited data similar to service and compensation data now supplied on Form G-563 is available on EDM. However, EDM does not replace Form G-90. The system will not mechanically compute a PIA, AMC, RLS or Tier 2 contribution. It does not send computations to the Research Master Benefit File.

There are 4 basic types of screens within the EDM system. The four types are:

- Menu screens
- Inquiry screens
- Selection Directory screens
- Maintenance screens (Reserved for authorized users only)

Menu screens allow you to go from screen to screen within the system to access the screen that you wish to view.

Inquiry screens allow you to view information which already exists on the database.

The Selection Directory screens, explained in CCOM 1 are valuable tools when the user is not sure about the exact RRB claim number or Social Security Number, railroad employee name, railroad name or RRB 4-digit employer number (formerly BA number). Maintenance screens can only be accessed by authorized A&T or P&S users. They allow the user to:

- Enter data and create new data base information for the first time on-line;
- Create batches of transactions for overnight processing;
• Modify data on records that already exist on the system;

• Delete records that already exist on the system;

On most screens, other than the menu screens, one or more fields usually appear that are considered "key search fields." In EDM, the key search fields are usually either the RRB employer number-4 digit (formerly BA number) and the railroad name or the employee’s social security number. The search based on the railroad employee’s name can only be made from the EMPLOYEE SELECTION DIRECTORY. The search fields are required for processing on the first screen you access after the INQUIRY MENU. The data will pre-fill for any other screen which you request for the same employee.

9.9.3 How to Access Employee and Employer Information

After you have signed on with your password, access the Employment Data Maintenance (EDM) Inquiry System by typing "EDMA" in response to the query line: V10 ENTER NEXT TASK CODE. Press the ENTER key. The EDM MAIN MENU SCREEN will appear. The cursor rests at the first submenu selection. To make a selection, move the cursor with the Tab key.

The three inquiry options available to the operating units are the INQUIRY MENU, the EMPLOYEE SELECTION DIRECTORY MENU, and the EMPLOYER SELECTION DIRECTORY MENU. Type an "x" in the space to the left of your choice and press ENTER.

If you request the EMPLOYEE DATA MAINT MENU/EMPLOYER DATA MAINT MENU, REPORT CONTROL MENU, or BA-6/LETTERS/REPORT REQUEST options, the screen will display the message "UNACCEPTABLE RESPONSE. PLEASE TRY AGAIN." These screens are only available to authorized A&T and P&S users.

To return to the INQUIRY MENU, press the CLEAR key. To return to the MAIN MENU from any other EDM screen, press the PA1 key. To exit EDM from any EDM screen, press PA2.

9.9.4 Standard Keys and Cursor Movement

The Programmed Function (PF) keys for EDM operate similarly to the way they do for the other database systems with the exception of PF-6 and PF-13 thru PF-21. The standard keys used for EDM inquiry are described below:

<table>
<thead>
<tr>
<th>KEY</th>
<th>FUNCTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>PA1</td>
<td>Return to EDM main menu</td>
</tr>
<tr>
<td>PA2</td>
<td>Quit EDM, return to sign off screen</td>
</tr>
</tbody>
</table>
CLEAR | Return to INQUIRY MENU
---|---
ENTER | Perform the selection with an "x" to the left of the item.

NOTE: The ENTER key is only used on the main menu and submenu. Other screens require a PF key to process your selection. The red user message on each screen will help you to determine the proper key. When the ENTER key is used and is not appropriate, the screen will display the message: "INVALID RESPONSE - PRESS THE APPROPRIATE PF KEY."

<table>
<thead>
<tr>
<th>KEY</th>
<th>FUNCTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>PF6</td>
<td>Erase or refresh screen data and allow for the entry of new SSN or railroad employer data. For example, this allows you to call up data for a series of SSN's in the same screen category without returning to the MAIN MENU.</td>
</tr>
<tr>
<td>PF7</td>
<td>Go to previous page. If a screen is page able, PF7 will scroll to the previous page. The scroll range is limited to the first page viewed (i.e. if the first page viewed is page 4, PF-7 will not scroll back to pages 1-3). When the first page in the scroll range is reached, PF 7 will continue to display that page again and again. Refer to the instructions for the applicable screens to extend the scroll range.</td>
</tr>
<tr>
<td>PF8</td>
<td>Go to next page. If a screen is page-able, PF8 will scroll to the following page. The scroll function has a limited number of pages in each scroll range. When the last page in the range is reached, PF 8 will continue to display that page again and again. Refer to the instructions for the applicable screens to extend the scroll range.</td>
</tr>
<tr>
<td>PF13 thru PF19</td>
<td>Used to make a directory selection and to move between various screens. Follow the directions at the bottom of your screen.</td>
</tr>
<tr>
<td>ALT and PF23</td>
<td>Enhance the cursor to facilitate entry of search keys.</td>
</tr>
<tr>
<td>Search Keys</td>
<td>These are the employee's SSN, the RRB employer number-4 digit (formerly BA number) or the railroad's name.</td>
</tr>
</tbody>
</table>

Cursor may be positioned with the return key, tab key or cursor movement (arrow) keys. Use of the tab key is preferred. It automatically moves the cursor to the next selection item. It will also by-pass items that do not need to be completed.
9.9.5 Contact Official Database

A. Each railroad employer, employer organization, and employee organization designates one or more individuals as contact officials. The names and addresses of these contact officials are maintained using the Employment Data Maintenance Applications. Refer to CCOM, Section 307 for instructions on accessing this database.

B. When a Railroad Employer Notifies You of a Change in Contact Official:

If someone from the RRB is notified by an employer that there is a change in a contact official, the information should be forwarded to the Quality Reporting and Service Center (QRSC) in A&T. Provide the following information:

- Employer number (BA number)
- Employer’s full name
- Contact official’s name, title, address, telephone number, fax number and e-mail address.
- Contact official’s function or forms they handle such as: Forms BA-4, ID-2u, ID-30b, G-251, etc.

9.9.10 EDM Main Menu Display

The EDM MAIN MENU screen is a list of options available on the EDM. The EDM MAIN MENU screen includes 7 submenu screens. The selections are displayed in descending order as follows:

INQUIRY MENU (RBD access)

EMPLOYEE DATA MAINT MENU (A&T and P&S use only)

EMPLOYER DATA MAINT MENU (A&T and P&S use only)

EMPLOYEE SELECTION DIRECTORY (RBD access)

EMPLOYER SELECTION DIRECTORY (RBD access)

REPORT CONROL MENU (A&T and P&S use only)

BA-6/LETTERS/REPORT REQUEST (A&T and P&S use only)

RBD users only have access to the INQUIRY MENU and related screens, the EMPLOYEE SELECTION DIRECTORY and the EMPLOYER SELECTION DIRECTORY. The remaining screens are for authorized A&T and P&S users only. See
Exhibit 1 for a flow chart of the EDM screens. See Exhibits 2 through 15 for a sample of the submenu screens available to RBD users.

The cursor rests at the first submenu option. Use the TAB key to move the cursor. Type an "X" in front of the submenu option that you wish to view and depress the ENTER key. The submenu screen that you selected will appear.

If you attempt to select a submenu option for which you do not have access, (i.e., the EMPLOYEE DATA MAINT MENU), the screen will display the message: "UNACCEPTABLE RESPONSE. PLEASE TRY AGAIN."

9.9.11 EDM Inquiry Menu

The EDM INQUIRY MENU screen lists the 14 submenu task options included on the INQUIRY MENU. There are also 2 subordinate screens not listed on the INQUIRY MENU: EE MULTI ACCOUNTS screen and MILITARY SERVICE INFO screen. These subordinate screens can only be accessed as explained in RCM 9.9.13 and RCM 9.9.15. (See Exhibits 2 through 13 for samples of the INQUIRY screens.)

The cursor positions itself at the submenu sections in descending order as follows:

EMPLOYEE DEMOGRAPHIC INFO (RBD ACCESS)
EE SERVICE AND RUIA INFO (RBD ACCESS)
MISCELLANEOUS SCORE INFO (RBD ACCESS)
CREDITABLE S&E YEARLY TOTALS (RBD ACCESS)
EE S&E TOTALS (RBD LIMITED USE)
S&E YEARLY LEDGER (RBD LIMITED USE)
SERVICE MONTHS DETAIL (RBD ACCESS)
EMPLOYER INFORMATION (RBD ACCESS)
EMPLOYER CONTACT OFFICIAL (RBD ACCESS)
ANNUAL RPT PKG DIRECTORY (RBD LIMITED USE)
ADJSTMNT RPT PKG DIRECTORY (A&T AND P&S USE ONLY)
OUT OF BAL BATCH DIRECTORY (A&T AND P&S USE ONLY)
SUSPENDED TRANS DIRECTORY (A&T AND P&S USE ONLY)
REPORT PACKAGE STATUS (A&T AND P&S USE ONLY)

RBD users only have access to the first 10 screens listed. Access to the last 4 screens is reserved for A&T and P&S users only.

Use the TAB key to move the cursor. Type an "X" in front of the inquiry screen that you wish to view and depress the ENTER key. The screen that you selected will appear.

It is not necessary to return to the INQUIRY MENU to request a new screen. Screen movement options available for each screen are listed in the RESPONSES area at the bottom of the screen. Movement from screen to screen is controlled by the use of Program Function (PF) and Program Access (PA) keys.

Use the following link to locate the EDM screen descriptions in CCOM 1.
9.10.1 Introduction

The Federal Financial System (FFS) is an integrated financial management system designed specifically for federal agencies. FFS enables agencies such as the Railroad Retirement Board to comply with federal laws and regulations in tracking and accounting of revenue. FFS is maintained by the bureau of fiscal operations.

The Program Accounts Receivable System (PARS) is a subsystem of FFS. Through the establishment and maintenance of tables and documents in PARS, an accounts receivable record for each overpaid annuitant under both the Railroad Retirement Act and the Railroad Unemployment and Sickness Insurance Act is created. Input of specific information into PARS allows the system to address a variety of operational and administrative functions. PARS provides for:

- Automation of tracking and maintenance of accounts receivable that originate from benefit overpayments.
- Automation of billing and follow-up functions including installment bills.
- Automation of the calculation and collection of interest, penalties and administrative charges where applicable.
- Automation of processing cash receipts and maintenance of accounts receivable offset information.
- Referral of uncollectable receivables to other agencies for collection.
- Reports concerning activities within the accounts receivable area.

Sections 9.10.3 through 9.10.161 explain how to create or change accounts receivable records on PARS. Sections 9.10.200 through 9.10.230 describe situations in which an accounts receivable record needs to be established or corrected.

9.10.2 Operation Of PARS

Overpayments to annuitants involving railroad retirement annuity or supplemental annuity funds are recorded and tracked in PARS. In the future, Medicare overpayments will also be entered into PARS. Data entry, approval and scheduling are done on-line.

PARS includes a variety of on-line processes for maintaining overpayment records after they have been entered into the system. Current balances are available along with a history of recovery actions. Tables exist which track the printing and release of follow-up overpayment letters and recovery by partial or full withholding. Information contained in PARS can be viewed by both headquarters and field office personnel.
9.10.3 PARS Data Entry

The first step in creating a PARS accounts receivable record is to establish two identification and information tables. These are the payor (PAYR) and the payor debtor information table (PDIT). Completing these two tables creates a unique identifier for the individual payor/debtor involved and each overpayment attributed to that individual.

To enter overpayment and recovery information requires the creation of a document. Each document consists of three different entry screens called the startup screen, input screen and line screen. Overpayment and recovery information is entered on-line and then edited for errors. After the edits are completed, the document is placed in a hold status on a suspense file. The document will remain on the suspense file until all detected errors are corrected and it is approved and scheduled for processing.

9.10.4 Glossary Of Terms

The Program Accounts Receivable system uses terms and phrases which may be unfamiliar to the claims examiner. This section provides a list of some of these terms and their meaning in relation to PARS.

- Accounts Receivable - A record of who owes what to the RRB and the reason for the overpayment.
- Action - A command entered on all PARS screens which instructs the system as to the type of processing desired.
- Action Out Code - This is a three position code which describes how an open accounts receivable record is being reduced or offset. A complete list of valid action out codes is displayed on the ACOT table screen. For ORSP purposes, the first two positions of this code are always numeric while the final position is an alphabetic character.
- Add - The process of establishing table data to identify the name and address of the person responsible for repayment of a debt, the name of the overpaid annuitant and other pertinent information concerning an accounts receivable record.
- Approval - The process of verifying that data entered on a screen to create a document is correct. This is analogous to authorization of manual award forms or due process letters.
- Billing Document - The method used in PARS to establish an accounts receivable record. Through completion of a variety of data entry screens, a record is established which provides the amount, type, and cause of an overpayment as well as other pertinent information.
- Cancel - The removal of information entered into an accounts receivable record through a processed billing or cash receipt document.
• Cash Receipt Document - The method used in PARS to reduce or eliminate the amount of an open balance on an accounts receivable record. A cash receipt document is completed regardless of the method of recovery, be it by check, money order, tolerance, annuity withholding, waiver, etc.

• Change - The process of correcting or altering certain information contained on PARS table screens. Some fields cannot be altered once they have been established and require cancellation of the record if changes are needed.

• Debtor - The name of the annuitant or former annuitant who is/has been overpaid.

• Delete - For PARS billing and cash receipt documents, delete is the removal of information scheduled to be entered into an accounts receivable record which has not yet been processed. For PARS table screens, this is the method used to remove information established in an accounts receivable record as if it had never existed.

• Division - A four position code completed on data entry screens which identifies the RRB organization responsible for the transaction. Currently, four such codes are possible.
  • 2000 ORSP
  • 2500 BDMO
  • 8000 BUSI
  • 1600 BFO

• Document Identification Number - The alpha/numeric code which keeps each transaction unique so that both accounts receivable and cash receipt records can be accessed for correction, modification, maintenance or inquiry.

• Key - A code entered on the PARS table screens which enables the system to locate specific individuals or accounts receivable records.

• Mode - A one position code on PARS document screens which tells the system the type of activity that is being attempted. The three codes used by claims examiners are:
  • C-Correction - Used when correcting, modifying or deleting information from previously completed document screens,
  • D-Data Entry - Used when initially completing a document screen,
  • S-Scan - Used when viewing existing documents.
• Modify - The process of changing certain information on previously processed billing
and cash receipt documents. Some fields cannot be changed once they have been
processed and require cancellation of the entire document if changes are needed.

• Payor - The individual who is responsible for repayment of a debt to the RRB. This
may be a person who has current entitlement, a representative payee, an executor
of an estate, etc.

• Payor Number - This is a reference which identifies the RRB claim in which an
overpayment exists. It is composed of the prefix and claim number. Serial claim
numbers are preceded with zeros. The final position is an identifier which makes the
code unique to each payor within the same claim number.

• Quick Edit - This is a function of the PAR system whereby information entered to
establish or modify either a billing document or cash receipt document is edited.
This process does not guarantee the document will not reject from processing once
it has been scheduled. However, the various error and warning messages
generated by this function alert the user to potential problems. A listing of messages
generated by Quick Edit is provided in Appendix A.

• Schedule - The process used to alert the PAR system that all data entry items on
billing and cash receipt documents have been completed and are correct. The
information entered is ready to generate a billing document or post a recovery
action.

NOTE: It is essential that scheduling of a billing document coincides with the
release of an overpayment notice. Interest, penalty and administrative charges
accrue and are assessed and dunning notices are released based on the date a
billing document is scheduled for processing in the PAR system.

• Table - These are a series of screens in PARS which provide for three basic
functions:

  • Data Entry - These screens allow for direct on-line data entry of information to
    establish an accounts receivable record and post recovery actions.

  • Information - These screens provide details concerning the status of a given
    accounts receivable record. When processed, billing and cash receipt document
    information is displayed on a PARS table.

  • Reference - Lists of codes and abbreviations and their meanings used to
    complete PARS data entry screen.

RCM 9.10.6 provides a list of the tables ORSP personnel will encounter in
establishing and maintaining accounts receivable records and gives a brief summary
of the information contained on each table.
• Table ID - This is a four position acronym which designates each individual table within the PAR system. The TABLEID is required to access a particular table, either for data entry or reference purposes. RCM 9.10.6 provides a list of tables along with the four character acronym which makes up the TABLEID. The TABLEID is referred to as the table code name in the data entry portion of this chapter.

• Transaction Code - This is a two position code which designates the type and origin of a document being generated. Claims examiners will be concerned with the following:
  • B2 - Billing document created by ORSP
  • C2 - Cash receipt document created by ORSP
  • B5 - Billing document created by BDMO
  • C5 - Cash receipt document created by BDMO
  • WR - Cash receipt documents created in write-off to uncollectable processing.
  • Unapplied Cash - Receipts which are processed through PARS in which no accounts receivable record has been established or if it has been established, the open balance is zero.

9.10.5 General Screen Description

Each table screen in the PAR System is divided into four sections, each having a distinct function. These sections are:

• Action line,

• Key line,

• Data area, and

• Message area.

These sections appear on each of the table screens as shown below.

SEE EXHIBIT 1

Document screens are formatted in the same manner as table screens except there is no key line on a document screen. The function of the action line, data area and message area on a document screen is the same as that described for a table screen.
A. **Action Line** - The action line, located at the top of each table screen, is used to define the type of processing the user wants to accomplish. Three basic types of action are available. These are:

- Retrieval actions which enable the user to access and scan tables or specific records based on key fields,
- Maintenance actions which enable the user to add, modify, correct and delete data from table and document screens, and
- Control actions which enable the user to move from table to table, advise the system that data entry is complete, schedule documents for processing and exit from tables.

The action line also displays the four character identifier for the table screen you are viewing or moving to. In addition, your PARS user identification code and password must be entered on the action line before you can access or enter any information on a table screen.

B. **Key Line** - The key line, which is the second section of each table screen, displays the table name and between one and four components known as keys. Entering the required keys enables the PAR system to locate specific individuals or accounts receivable records stored in the system. Examples of key data components, which cannot be modified or corrected once they have been established in the PAR system, are PAYOR NUMBER, BILLING DOCUMENT ID and CASH RECEIPT ID. If errors are detected in a key, all table and document records containing the incorrect key must be deleted and reestablished using the correct key.

C. **Data Area** - The data area of each table screen contains the information pertinent to the table identified on the action line. There are two types of tables; input tables which are completed by the examiner and reference tables which do not require any examiner completion. Input data areas are used to establish, maintain, modify, correct and close out an open accounts receivable record. Reference data areas provide a source for determining the status of a specific accounts receivable record or provide lists of explanations for codes used in data entry.

D. **Message Area** - Located along the bottom of each screen is an area reserved for messages. These messages indicate when all required entries on an input screen have been completed and the table has been established. If any errors are detected or fields requiring an entry are left blank, this information will be displayed in the message area. In the case of reference tables which are displayed on multiple screens, the message area will alert the viewer when the end of the table has been reached.
9.10.6 PAR Tables

The following table provides the acronym and describes the types of PAR tables that are used by ORSP.

<table>
<thead>
<tr>
<th>ACRONYM</th>

</table>

9.10.7 DebtChkr

DebtChkr is an on-line database file which enables examiners to ascertain whether RRA, RUIA, Medicare and uncollectible overpayments exist. Examiners should use DebtChkr before paying out an accrual.

The DebtChkr icon can be found on the RRAILS and Mainframe toolbar. The Mainframe icon is not operational. Use the RRAILS icon. Select “Show Intranet”.

Select “Debt Checker” from the menu.
When activated the following screen will appear:

![Image of DebtChkr screen]

Enter the claim number and press “Look Up”. DebtChkr will convert a six digit claim number to nine digits and will search A and D prefixes. DebtChkr will scan the ARCL, OBDT and UNCL PARS tables to see if an overpayment exists. If one or more debts are found, DebtChkr will provide the PARS screen for each debt. When an overpayment is found, the accrual due should be used to offset or reduce the overpayment on record.

Below is an example of the PARS screen DebtChkr returns when a debt is found. In this case the debt was written off but can now be recovered from an accrual due.
DebtChkr allows the following functions which can be found on the toolbar titled “Capture Action”.

- Arrow Keys – Increase or decrease the height of the screen display.
- Clear – Press “Clear” and the previous claim number is erased.
- Save – Press “Save” if you need to save this document. Follow the prompts.
- Print – Press “Print” if you need a copy of this document for your files.
- Exit – Press “Exit” to close DebtChkr.

### 9.10.10 Account Receivable Case History Line Table (ARCL) Screen Description

The Accounts Receivable Case History Line Table (ARCL) contains a detailed history for each account. This screen provides a line-by-line accounting of all activity for a particular account. This screen has a seven line capacity.

A sample of the screen without entries follows.

**SEE EXHIBIT 2**

The lines on the screen for a document are in order from earliest to most recent. Therefore, the screen initially accessed may not show the current overpayment status. Examiners can page through the screens by pressing the ENTER key. The PAR
System is not capable of alerting users that additional pages exist on a given document. Therefore, examiners should always check for an additional page if the screen currently being viewed has seven line entries. If no other pages exist for a particular document, the paging action will take you to the next numerically sequenced payor number. For example, an overpayment document with payor number A I23456789 M will follow one with payor number A I23456789 A.

It is possible for two or more overpayment documents to exist on PAR for one claim number. Two or more overpayment documents with the same payor number will be listed in billing document order. Examiners should be sure they are aware of all overpayments posted to a claim number by 1) paging through ARCL until a new payor number is reached or 2) checking the Outstanding Billing Document Table (OBDT) which lists overpayments in payor number order.

The system does not have any backward paging capabilities. If you have paged out of a desired document, it can be re-accessed by:

1) Entering an N in ACTION and pressing ENTER.

2) A blank screen will appear, re-enter the payor number and press ENTER.

OR

1) Enter an S in ACTION.

2) Move the cursor to the last position of the payor number.

3) By pressing the space bar, erase the contents of the last position and the billing document number.

4) Press ENTER. The first ARCL record for this payor number will appear. If necessary, continue pressing ENTER until the desired document appears.

The following is a breakdown of all data that appears on the ARCL screen.

SCREEN DESCRIPTION ARCL

<table>
<thead>
<tr>
<th>FIELD NAME</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>PAYOR NUMBER</td>
<td>RRA OVERPAYMENTS</td>
</tr>
</tbody>
</table>
In this field, the payor refers to the debtor. The first 10 positions of the payor number are the prefix and claim number for the account. The last position (separated from the claim number) identifies the overpaid person. In survivor cases the payee code is used as the identifier. In retirement cases an 'A' identifies an employee, an 'M' a spouse and an 'X' a divorced spouse.

<table>
<thead>
<tr>
<th>Examples</th>
<th>Retirement - A123456789 A</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Survivor - A123456789 1</td>
</tr>
</tbody>
</table>

In the event that a record needs to be created for a second spouse or divorced spouse, the next letter of the alphabet is used. Thus, a second spouse would have 'N' in the last position of the payor code, a second divorced spouse 'Y.'

| NOTE: If a payor number has a numeric character in the last position and a previous retirement overpayment exists for the number, the payor number with the alpha character will be numerically sequenced on ARCL before the payor number with the numeric character in the final position. |

For example, an overpayment document with payor number A123456789 1 will follow one with payor number A123456789 A.

| A 'G' in the last position refers to a garnishment payment. A 'P' in this position refers to a partition payment. |

<table>
<thead>
<tr>
<th>MEDICARE DEBTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>In this field, the payor refers to the railroad claim number and prefix of the railroad claim number on which the debt was incurred. The 10 position railroad claim number and prefix is followed by a numeric character which represents the number of specific records under this PAYOR number. Six digit numbers are preceded by zeros. Example: 725148398A 1.</td>
</tr>
</tbody>
</table>

| NOTE: If further information is needed regarding Medicare account receivable records refer to RCM 3.12. |

<table>
<thead>
<tr>
<th>BUSI DEBTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>In this field, the payor refers to the railroad claim number on which the debt was incurred. The 9 position railroad claim number is shown. Prefixes and suffixes are not used on BUSI debts.</td>
</tr>
</tbody>
</table>

Example: 123456789
**BILLING DOC ID**
Billing Document Identification. The number assigned to the debt. All "BILLING DOC ID" numbers begin with a "B." The second position of the "BILLING DOC ID" number is numeric and a "2" identifies an RRA overpayment, an "8" identifies a BUSI overpayment and a "5" identifies a Medicare debt.

For RRA "Billing DOC ID" numbers, the third through the thirteenth positions are described in RCM 9.10.57 beginning on page 122.

**PAYOR NAME**
The person from whom the debt is being collected. This may or may not be the same person who incurred the debt.

**TRANS DATE**
Transaction date. The system date when the entry was created.

**BD LINE NO**
Billing Document Line Number. Indicates the type of debt or charge being posted, as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>001</td>
<td>Retirement or survivor annuity overpayment</td>
</tr>
<tr>
<td>002</td>
<td>Supplemental annuity overpayment</td>
</tr>
<tr>
<td>997</td>
<td>Interest charges</td>
</tr>
<tr>
<td>998</td>
<td>Administrative cost charges</td>
</tr>
<tr>
<td>999</td>
<td>Penalty charges</td>
</tr>
</tbody>
</table>

**AC CD**
Activity code. Identifies the type of activity that has taken place on this billing document line. The possible activity codes are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>AC</td>
<td>Administrative Cost</td>
</tr>
<tr>
<td>AR</td>
<td>Account referral (indicates the RRA overpayment has been referred to a collection agency or another federal agency.)</td>
</tr>
<tr>
<td>AW</td>
<td>Annuity withholding (partial or full withholding, annuity accrual withheld)</td>
</tr>
<tr>
<td>BA</td>
<td>Modifying billing document (used to correct an amount previously posted or, in returned check situations, this activity code is used when some, but not all outstanding checks have been returned)</td>
</tr>
<tr>
<td>BD</td>
<td>Original entry billing document (used when original debt</td>
</tr>
<tr>
<td>Abbreviation</td>
<td>Description</td>
</tr>
<tr>
<td>--------------</td>
<td>-------------</td>
</tr>
<tr>
<td>CA</td>
<td>Modifying cash receipt (used when a correction is made to a previous cash receipt posting)</td>
</tr>
<tr>
<td>CR</td>
<td>Original entry cash receipt (cash refund)</td>
</tr>
<tr>
<td>DN</td>

<table>
<thead>
<tr>
<th>TRANSACTION AMOUNT</th>
<th>The amount of the activity against this billing document line. A negative amount indicates a subtraction from the balance.</th>
</tr>
</thead>
<tbody>
<tr>
<td>BALANCE</td>
<td>The current outstanding balance for this account.</td>
</tr>
<tr>
<td>DOCUMENT ID</td>
<td>The billing document or cash receipt document to which the information posted on the line relates. Billing documents are preceded with a 'B' and cash receipts with a 'C.' Each debt is assigned a unique identification number. That number first appears when a debt is established. The same billing document ID number will appear if that amount is adjusted for a correction (upward or downward) or if additional costs (interest, penalty, administrative charges) are added to the debt. A cash receipt posting refers not only to a cash refund, but to any action that would offset the overpayment amount (annuity withholding, write-off). This field will remain blank if the activity is not the result of a document transaction.</td>
</tr>
</tbody>
</table>
Billing documents that were generated from the accounts receivable mechanical conversion begin with "B2 MC ...." Recovery documents generated by monthly full or partial withholding begin with "C2 92A ...." where the two numbers after C2 refer to the year and the letter to the month of the payment from which the full or partial withholding amount was credited. Overpayments mechanically generated from an RR-IE Social Security award action begin with B2 SSMR or B2 SSMS (SSMR - Retirement, SSMS - Survivor). Likewise, recoveries generated from an RR-1E begin with C2 SSMR or C2 SSMS. Overpayments and recoveries mechanically generated from a RAIL run begin with B2 RAIL and C2 RAIL respectively.

<table>
<thead>
<tr>
<th>REF LINE NO</th>
<th>This field displays the document line number of the transaction that is generating the activity.</th>
</tr>
</thead>
</table>

Recovery documents relating to BUSI and Medicare debts begin with C8 and C5 respectively.

### 9.10.50 Accessing PARS And Data Entry

PARS is a separate data base from the one which contains DATA-Q, MOLI or FAST. You must access PARS with the TRAIN logo on the CRT screen. If the TRAIN logo is not displayed on the terminal, type BYE and press ENTER. This action will bring up the TRAIN logo so you can access the PARS data base.

- With the TRAIN logo displayed on the CRT screen, type DATABANK and press ENTER.
  - The message "V2 ENTER NEXT TASK CODE:" will appear.
  - Type SIGNON and your user identification code, leaving one space between SIGNON and your ID, and press ENTER.
  - The message "ACFA2032 ENTER PASSWORD=" will appear.
  - Type your password and press ENTER. (Your password will not be displayed on the screen.)
  - The message ACFA2032 ENTER PASSWORD="
    "ACFA2050 SIGN ON COMPLETE"
    "ACFO 1137 (YOUR ID) LAST SYSTEM ACCESS (TIME/DATE) FROM (TERMINAL)" will appear.
• Press ENTER.
  • The message "V2, ENTER NEXT TASK CODE:" will appear.

9.10.55 Establishing An Accounts Receivable Record

When an annuity overpayment has been identified, an open accounts receivable record is established in PARS by creating a billing document. The steps for creating a billing document are shown below. These screens must be completed in the order in which they are listed.

• PAYOR TABLE (PAYR) screen.
• PAYOR/DEBTOR INFORMATION TABLE (PDIT) screen.
• DATA ENTRY AND CORRECTION STARTUP SCREEN FOR APPLICATION FFS screen.
• BILLING DOCUMENT INPUT screen.
• BILLING DOCUMENT LINE screen.

NOTE: The PAYOR TABLE (PAYR) is a permanent record of the individual from whom RRB is requesting repayment of an open receivable. Once a PAYOR TABLE has been established for an individual, it does not have to be reestablished for each additional receivable identified. If a PAYOR TABLE already exists, begin with the PAYOR/DEBTOR INFORMATION TABLE.

9.10.56 Completing The Payor Table (PAYR) Screen

A. Accessing the PAYR Screen - Once you have successfully signed on to the PAR System as described in RCM 9.10.50, access to the PAYR screen is accomplished as follows:

  • Type MTI, leave one space, then type the table code name PAYR.

  • Press ENTER.

  • A blank PAYOR TABLE screen will appear.

SEE EXHIBIT 3

B. Completing the PAYR Screen - Make the following entries next to or below the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.
<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>

</tr>
</tbody>
</table>

**ADDR LINE 2:** Enter the remaining portion of the address where the overpayment letter is being sent. A maximum of 30 characters can be entered in this field. If this line is not needed to continue the address from ADDR LINE 1, make no entry in this field. Use the TAB key to advance to the next field. **DO NOT** enter the city, state, and ZIP code on this line.

**PHONE NUMBER:** Make no entry in this field. Use the TAB key to advance to the next field.

**ADDR LINE 3:** Enter the city, state and ZIP code where the overpayment letter is being sent.

- **City** Enter the city name in the first 19 positions of ADDR LINE 3. If all positions are used, the cursor will advance to the state field, otherwise use the TAB key to advance the cursor.

- **State** Enter the official state abbreviation. A complete list of abbreviations is shown in RCM 10.2, Appendix B. The cursor will advance to the ZIP code field.

- **ZIP Code** This field is designed for the ZIP+4 configuration. **Only** complete the first five positions. Use the TAB key to advance to the next field.

**EXCEPTION 1:** If **RECLAMATION** or **DEVELOPMENT** was entered in the PAYOR NAME field, an asterisk (*) must be entered in the first position of the city, state and ZIP code fields. Use the TAB key to advance to the first position of each field.

**EXCEPTION 2:** For foreign address cases **ONLY**, enter the street address, city and province on ADDR LINE 1 and 2. Enter the country name in the first 19 positions of ADDR LINE 3. The first position of BOTH the state field and ZIP code field must contain an asterisk (*). Use the TAB key to advance to the first position of these fields after the country name has been entered.
<table>

<tr>
<td>PROVIDOR IND:</td>
<td>Always enter a B in this field.</td>
</tr>
</tbody>
</table>

C. Exiting from the PAYR Screen - After completing the PROVIDOR IND field, review the information you have entered on the PAYR screen to verify these entries are correct. If any errors are detected, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information.

1. Establishing the PAYOR TABLE - When all required entries have been completed and all information is correct, press ENTER. The message *LO30 ALL LINES ADDED will be displayed in the message area of the screen indicating the PAYOR TABLE has been established. In addition, the captions GROUP BILLS: and GROUP DUNN: will contain N's. These fields have been prefilled by the system.

2. Errors Detected - If any errors are detected, or any required entries are not complete, an error or warning message(s) will be displayed in the message area of the screen. Refer to Appendix A of this chapter for a description of the problem and corrective action to be taken. Use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and complete the required entry or correct any entry as indicated. Continue to press ENTER and make any required corrections until the message *LO30 ALL LINES ADDED is displayed in the message area of the screen. It is important that all errors are corrected and all required entries are completed on the PAYR screen because subsequent screens are dependent on a PAYOR TABLE being established.
An example of a completed PAYOR TABLE for an overpaid employee appears below:

SEE EXHIBIT 4

An example of a completed PAYOR TABLE where an overpayment has been identified but DEVELOPMENT action is required appears below:

SEE EXHIBIT 5

Once DEVELOPMENT action has been completed and the name and address of the individual responsible for repaying the debt has been determined, this information must be entered in the PAYOR NAME, ADDR LINE 1:, ADDR LINE 2: and ADDR LINE 3: fields.

An example of a completed PAYOR TABLE where a representative payee is involved appears below:

SEE EXHIBIT 6

An example of a completed PAYOR TABLE with a foreign address appears below:

SEE EXHIBIT 7

9.10.57 Completing The Payor/Debtor Information Table (PDIT) Screen

A. Accessing the PDIT Screen - After completing and entering the PAYR screen as described in RCM 9.10.56, the cursor will be positioned in the ACTION field on the action line of the screen. To access the PDIT screen:

- Type N for Next Screen in the ACTION field. The cursor will advance to the TABLEID field.
- Type PDIT in the TABLEID field.
- Press ENTER.
- A blank PAYOR/DEBTOR INFORMATION TABLE screen will appear.

SEE EXHIBIT 8

B. Completing the PDIT Screen - Make the following entries next to or below the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.
<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

These organization codes are also displayed on the PARS SORG TABLE screen.

- Positions 5-7. Enter your three position examiner number or your initials, determined by your unit's policy.
- Positions 8-10. Enter the sequential day of the year you are establishing this accounts receivable record. If the day contains fewer than three digits, enter zeros in positions 8 and 9 as necessary.

EXAMPLE: January 20 is entered as 020; December 28 is entered as 362. The sequential date can be found in the lower left hand corner of most desk calendars.

- Positions 11-12. Enter the last two digits of the current year.

</tbody>
</table>

The following example shows a completed PAYOR/DEBTOR INFORMATION TABLE for an overpaid employee:

**SEE EXHIBIT 9**

C. Exiting from the PDIT Screen - After completing the last required entry on the PDIT screen, review the information you have entered to verify these entries are
correct. If any errors are detected, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information.

1. **Establishing the PAYOR/DEBTOR INFORMATION TABLE** - When all required entries have been completed and all information is correct, press ENTER. The message *LO30 ALL LINES ADDED* will be displayed in the message area of the screen indicating the PAYOR/DEBTOR INFORMATION TABLE has been established. In addition, the PAYOR NAME: and PAYOR ADDR: fields completed on the PAYOR TABLE will now be displayed on this screen as well.

2. **Errors Detected** - If any errors are detected, or any required entries are not complete, an error or warning message(s) will be displayed in the message area of the screen. Refer to Appendix A of this chapter for a description of the problem and corrective action to be taken. Use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and complete the required entry as indicated. Continue to press ENTER and make any required corrections until the message *LO30 ALL LINES ADDED* is displayed in the message area of the screen. It is important that all errors are corrected and all required entries are completed on the PDIT screen because subsequent screens are dependent on a PAYOR/DEBTOR INFORMATION TABLE being established.

The following example shows a completed PAYOR/DEBTOR INFORMATION TABLE where DEVELOPMENT action is required:

**SEE EXHIBIT 10**

The following example shows a completed PAYOR/DEBTOR INFORMATION TABLE where a representative payee is involved:

**SEE EXHIBIT 11**

The following example shows a completed PAYOR/DEBTOR INFORMATION TABLE where another payor and claim number have been identified and entered on the screen:

**SEE EXHIBIT 12**

### 9.10.58 Completing The Startup Screen

Following the completion of the PDIT screen as described in RCM 9.10.57, the next step in establishing an accounts receivable record is the completion of the DATA ENTRY AND CORRECTION STARTUP SCREEN FOR APPLICATION FFS.

A. **Accessing the STARTUP Screen** - To access the STARTUP screen from the PDIT screen, take the following actions:
• Using the TAB key, position the cursor in the ACTION field on the action line of the PDIT screen.

• Type E for Exit in the ACTION field.

• Press ENTER, the message "V2 ENTER NEXT TASK CODE" will appear.

• Type DDB.

• Press ENTER.

• A blank STARTUP screen will appear.

SEE EXHIBIT 13

B. Completing the STARTUP Screen - Make the following entries next to the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>MODE OF</td>
<td>Enter a D for Data Entry. The cursor will advance to the next field.</td>
</tr>
<tr>
<td>OPERATION:</td>
<td>advance to the next field.</td>
</tr>
<tr>
<td>DOCUMENT ID:</td>
<td>Enter the document identification code under the captions displayed as follows:</td>
</tr>
<tr>
<td></td>
<td>• TRAN - Always enter B2. The cursor will advance to the DIVISION field.</td>
</tr>
<tr>
<td></td>
<td>• DIVISION - Always enter 2000. The cursor will advance to the ID NUMBER field.</td>
</tr>
<tr>
<td></td>
<td>• ID NUMBER - Always complete this field exactly as positions 3 through 13 of the BILLING DOC ID field on the PDIT screen. The cursor will advance to the next field.</td>
</tr>
<tr>
<td>BATCH ID:</td>
<td>• TRAN - Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td></td>
<td>• DIVISION - Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
</tbody>
</table>
### CAPTION | ENTRY
--- | ---
**• ID NUMBER** - Make no entry in this field. Use the TAB key to advance to the next field. | 
**USER ID:** Enter your four character PARS user identification code and your four character PARS password. (Your PARS password will not be displayed on the screen.)

The cursor will advance to the next field.

An example of a completed STARTUP screen appears below.

**SEE EXHIBIT 14**

C. **Exiting from the STARTUP Screen** - After you have entered your PARS user identification code and PARS password, review the information you have entered on the STARTUP screen to verify these entries are correct. If any errors are detected, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information. When all information is correct, press ENTER. The BILLING DOCUMENT INPUT SCREEN will appear.

### 9.10.59 Completing The Billing Document Input Screen

A. **Accessing the BILLING DOCUMENT INPUT Screen** - Following completion and entering of the STARTUP screen as described in RCM 9.10.58, the BILLING DOCUMENT INPUT SCREEN displayed below will appear.

**SEE EXHIBIT 15**

The MODE, DOCID and USERID field on the action line of this screen will be prefilled from these entries on the STARTUP screen.

B. **Completing the BILLING DOCUMENT INPUT Screen** - Make the following entries next to the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields beginning with the DOC DATE in the BILLING DOCUMENT INPUT section and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>DOC DATE:</td>
<td>Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>ACCTG PRD:</td>
<td>Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>CAPTION</td>
<td>ENTRY</td>
</tr>
<tr>
<td>----------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>TRANS TYPE:</td>
<td>Enter one of the following two position codes depending on the type of accounts receivable record you are establishing. The cursor will advance to the next field.</td>
</tr>
<tr>
<td></td>
<td>• NA - New Account. This code is used for any overpayment which is not on the &quot;old&quot; accounts receivable system.</td>
</tr>
<tr>
<td></td>
<td>• RA - Reactivated Account. This code is used for any overpayment transferred from the uncollectable accounts and entered on PARS.</td>
</tr>
<tr>
<td></td>
<td>• CO - Conversion Case. This code is used for any overpayment which is entered on PARS from the &quot;old&quot; accounts receivable system.</td>
</tr>
<tr>
<td>BUDGET FY:</td>
<td>Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>ACTION:</td>
<td>Enter E for Entry. The cursor will advance to the next field.</td>
</tr>
<tr>
<td>DOCUMENT TOTAL:</td>
<td>Enter the amount of the overpayment for the accounts receivable record you are establishing. DO NOT include SSA amounts in this total. You must use a decimal point and complete this entry to two decimal places. DO NOT use a dollar sign. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>FUND:</td>
<td>Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>DOC TYPE:</td>
<td>Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>COMMENTS:</td>
<td>In combined RR and SSA payment situations where an outstanding payment(s) is being requested or reclaimed, enter SS, space and the total amount of outstanding SSA benefits. Complete this entry to two decimal places but DO NOT use a dollar sign EXAMPLE: SS 484.00. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>BILL PRINT FLAG:</td>
<td>Enter one of the following one position codes. The cursor will advance to the next field.</td>
</tr>
<tr>
<td></td>
<td>• Current entitlement - Enter an N, indicating no bill will be printed.</td>
</tr>
</tbody>
</table>
### CAPTION
- printed, in this field.

**NOTE:** Cases referred to OPR for release of the overpayment letter, cases where Reclamation, Development or Family or Friends was entered as the PAYOR NAME and Conversion Cases where a new overpayment letter detailing interest and penalty charges will not be released are treated as current entitlement cases.

- Non-current entitlement - Enter an S, indicating the printing of the bill will be suppressed, in this field.

**EXCEPTION:** Non-current entitlement cases where the overpayment letter is referred to the field office for release or delivery are treated as current entitlement cases.

### COLLECTION:
- Make no entry in this field. Use the TAB key to advance to the next field.

### DUE DATE
- key to advance to the next field.

### INTEREST RATE:
- Make no entry in this field. Use the TAB key to advance to the next field.

### TEXT TYPE:
- Make no entry in this field. Use the TAB key to advance to the next field.

### DUNNING FLAG:
- Completion of this field is determined as follows:
  - Current entitlement - Always enter an N (no dunning). Check that this field is correctly completed in these cases. If this field is erroneously left blank the system will furnish a default entry of Y.

**NOTE:** Cases referred to OPR for release of the overpayment letter, cases where Reclamation, Development, or Family or Friends was entered as the PAYOR NAME are treated as current entitlement cases.

- Non-current entitlement - Enter a Y (yes, release dunning when criteria are met) in the field.

**EXCEPTION:** Non-current entitlement cases where the overpayment letter is referred to the field office for release or delinquent are treated as current entitlement cases.

### WAIVER FLAG:
- Completion of this field is determined as follows:
<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current entitlement</td>
<td>- Enter an A. Use the TAB key to advance to the next field. ACTION OUT: Make no entry in this field. Use the TAB key to move to the next field if necessary.

Each BILLING DOCUMENT LINE screen will accommodate entries for two different funds. Therefore, for an employee annuitant, both a regular annuity overpayment and a supplemental annuity overpayment can be entered using the same BILLING DOCUMENT LINE screen.

If both sections of this screen must be completed, use the TAB key to advance the cursor from the ACTION OUT field in the top portion of the screen. The cursor will advance to the LINE NO field in the bottom portion of the screen. If both a regular annuity and supplemental annuity overpayment exist, complete each entry on the lower portion of the screen as described for each caption above.

C. Exiting from the BILLING DOCUMENT LINE Screen - After completing the TYPE OF OVERPAYMENT field, either in the top portion of the screen or at the bottom of the screen if both LINE NOS are completed, review the information you have entered on the BILLING DOCUMENT LINE screen to verify these entries are correct. If any errors are detected, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information.

An example of a completed BILLING DOCUMENT LINE SCREEN appears below:

**SEE EXHIBIT 18**

An example of a completed BILLING DOCUMENT LINE SCREEN, with both a regular annuity overpayment and a supplemental annuity overpayment appears below:

**SEE EXHIBIT 19**

### 9.10.61 Quick Edit Function

The Quick Edit function is used to edit entries you have completed on the BILLING DOCUMENT INPUT and BILLING DOCUMENT LINE screens. This function also
signals the PAR System that all table and document screens required to establish an accounts receivable record have been completed.

A. **Beginning the Quick Edit Process** - Following your review of the BILLING DOCUMENT LINE screen and your determination that all required entries are complete and correct, Quick Edit is accomplished as follows:

- Position the cursor in the ACTION field on the action line of the screen.
  - Press and hold down an alternate shift key (Alt),
  - Press the cursor home key (   ),
  - Release the alternate shift key (Alt).
- Type Q for Quick Edit in the ACTION field.
- Press ENTER.

B. **Results of the Quick Edit Process** - The PARS System always returns to the initial screen in a document screen series for display of edit, error or acceptance messages.

- The BILLING DOCUMENT INPUT screen will be displayed.
- The MODE field on the action line of the screen will contain a C indicating the system is in the correction mode.
- The letters RH indicating additional handling is required will be displayed under the STATUS caption.
- The current interest rate will be displayed following the INTEREST RATE caption.

1. **No Errors Are Detected During Quick Edit** - If all required entries on the BILLING DOCUMENT INPUT and BILLING DOCUMENT LINE screens have been completed and the system does not detect any errors, the PAYOR NAME, ADDRESS, CITY, STATE and ZIP fields will be filled with entries you completed on previous screens. In addition, the following three messages will be displayed in the message area at the bottom of the BILLING DOCUMENT INPUT screen:

   - **A** - *CQ93 - DOCUMENT REJECTED
   - **H** - *FO53 - DOCUMENT NOT APPROVED
   - **H** - *S401 - READY FOR APPROVAL
SEE EXHIBIT 20

2. **Errors Are Detected** - If any errors are detected during the Quick Edit process or any required entries are not complete, an error or warning message(s) will be displayed in the message area of the screen. Refer to Appendix A of this chapter for a description of the problem and corrective action to be taken. Use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and make the required corrections.

The ACTION field on the action line of the screen may contain the letters EM. Because a maximum of six edit or error messages can be displayed on a screen, EM indicates there are additional edit or error messages for the screen you are viewing. To view the additional messages, press ENTER. The same screen with the additional edit or error messages will be displayed.

a. Moving from the BILLING DOCUMENT INPUT Screen to the BILLING DOCUMENT LINE Screen While Performing Quick Edit - Error messages always appear at the bottom of the BILLING DOCUMENT INPUT screen first. To check for any edit or error messages which may be displayed on the BILLING DOCUMENT LINE screen, or to make any corrections to the BILLING DOCUMENT LINE screen which are displayed on the BILLING DOCUMENT INPUT screen:

   • Position the cursor in the ACTION field on the action line of the screen.
   • Press and hold down an alternate shift key (Alt),
   • Press the cursor home key (    ),
   • Release the alternate shift key (Alt).
   • Type NS for Next Screen in the ACTION field.
   • Press ENTER.

   The BILLING DOCUMENT LINE screen containing any additional edit or error messages will be displayed.

b. Moving from the BILLING DOCUMENT LINE Screen to the BILLING DOCUMENT INPUT Screen While Performing Quick Edit - If it is necessary to return to the BILLING DOCUMENT INPUT screen from the BILLING DOCUMENT LINE screen while in the correction mode of Quick Edit:
• Position the cursor in the ACTION field on the action line of the screen.
• Press and hold down an alternate shift key (Alt),
• Press the cursor home key ( ),
• Release the alternate shift key (Alt).
• Type NLO for Move to Top of Document in the ACTION field.

NOTE: The third position of this ACTION command is numeric.
• Press ENTER.

The BILLING DOCUMENT INPUT screen will again be displayed.

C. Exiting from Quick Edit - When all corrections have been made on both the BILLING DOCUMENT INPUT and BILLING DOCUMENT LINE screens, perform the Quick Edit function as described in section A. Continue to make all corrections and perform Quick Edit until the PAYOR NAME, ADDRESS, CITY, STATE and ZIP, as well as the three messages described in section B1 are displayed on the BILLING DOCUMENT INPUT screen.

9.10.62 Holding The Billing Document For Approval

After the Quick Edit function has successfully been performed, the accounts receivable record you have completed must be held for approval. This is accomplished as follows:

• Position the cursor in the ACTION field on the action line of the screen.
• Press and hold down an alternate shift key (Alt),
• Press the cursor home key ( ),
• Release the alternate shift key (Alt).
• Type H for Hold Document in the ACTION field.
• Press ENTER.

The STARTUP screen with the message A-*CQ8H - DOCUMENT HELD shown in the message area of the screen will be displayed.

SEE EXHIBIT 21

This completes the data entry portion for the establishment of an initial accounts receivable record.
9.10.63 Approval of The Billing Document

Before an accounts receivable record is actually processed and a billing document is established by the PAR System, the data entered on the BILLING DOCUMENT INPUT and BILLING DOCUMENT LINE screens must be approved by an authorizer. If any errors were detected in the calculation of the award, the overpayment amount or the overpayment letter which require correction, DO NOT approve or schedule the billing document. Return the folder to the claims examiner for correction of the PARS document screens, award and/or overpayment letter. Billing documents awaiting approval are housed in the SUSPENSE FILE TABLE (SUSF). Documents requiring approval are designated by the letters HELD in the STAT field and five zeros in the APPRV field on this table.

A. Accessing the SUSF Screen - To access the SUSPENSE FILE TABLE (SUSF) screen, take the following actions:

• Sign on to the PAR System as described in RCM 9.10.50.
• Type MTI, leave one space, then type the table code name SUSF.
• Press ENTER.
• A blank SUSPENSE FILE TABLE screen will appear.

SEE EXHIBIT 22

B. Completing the SUSF Screen - Make the following entries next to or below the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTION:</td>
<td>When the SUSF screen is accessed, the cursor will be positioned in the ACTION field which is prefilled by an S, which signifies Scan Record. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>TABLE ID:</td>
<td>The TABLEID field will contain the correct table code name. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>USER ID:</td>
<td>Enter your four character PARS user identification code and your four character PARS password. (Your password will not be displayed on the screen). The cursor will advance to the next field.</td>
</tr>
<tr>
<td>CAPTION</td>
<td>ENTRY</td>
</tr>
<tr>
<td>-------------</td>
<td>----------------------------------------------------------------------</td>
</tr>
</tbody>
</table>
| BATCH ID:   | TRAN - Make no entry in this field. Use the TAB key to advance to the next field.  
|             | ORG 1 - Make no entry in this field. Use the TAB key to advance to the next field.  
|             | NUMBER - Make no entry in this field. Use the TAB key to advance to the next field.  |
| DOCUMENT ID:| TRAN - Always enter B2 in the first two positions of the Transaction Code. Use the TAB key to advance to the next field.  
|             | ORG 1 - Always enter 2000 in this field. The cursor will advance to the next field.  
|             | NUMBER - Enter the 11 position alpha and numeric code assigned to the billing document which requires approval.  |

After completing the TRAN, ORG 1 and NUMBER fields under the DOCUMENT ID caption, press ENTER.

- The cursor will return to the ACTION field on the action line of the screen.
- The ACTION field will now contain an R for Refill.
- The billing document you requested will appear on the first data line of the screen.
- In addition to the DOCUMENT ID field which you completed, the STAT, APPRV, ENTRY DATE, LAST DATE, LAST TERMINAL and LAST USER fields will now be prefilled by the PAR System.

SEE EXHIBIT 23

C. Accessing the BILLING DOCUMENT INPUT and LINE Screens for Approval - To access the BILLING DOCUMENT INPUT screen, take the following actions.

- Type S for Scan Record over the R in the ACTION field on the action line of the screen.
- The correct TABLEID and your USERID will be prefilled in these fields.
- Use the NEW LINE key ( ) to advance the cursor to the first position of the first input line on the SUSF TABLE screen.
• Press ENTER.

• The BILLING DOCUMENT INPUT SCREEN will appear.
  
  • The cursor will be positioned in the ACTION field on the action line of the screen,
  
  • The ACTION field will be blank,
  
  • The MODE field will be prefilled with a C for correction mode,
  
  • The DOCID field will be prefilled with the document number you requested,
  
  • The letters RH indicating additional handling required will appear under the STATUS caption,
  
  • Two messages will appear at the bottom of the BILLING DOCUMENT INPUT screen;
    
    • H--*S401 - READY FOR APPROVAL 1,
    
    • H--*F053 - DOCUMENT NOT APPROVED.

SEE EXHIBIT 24

D. **Approval Process** - Once the billing document requiring approval and scheduling is accessed and visible on the screen, take the following actions.

• Review the information on the BILLING DOCUMENT INPUT SCREEN to verify all entries are correct. Complete or correct any data entry items that do not affect the overpayment amount or award.

• Type NS for Next Screen in the ACTION field on the action line of the screen.

• Press ENTER. This will access the BILLING DOCUMENT LINE screen.

• Review the information on the BILLING DOCUMENT LINE screen to verify all entries are correct. Complete or correct any data entry items that do not affect the overpayment amount or award.

• Perform the QUICK EDIT function as described in RCM 9.10.61.

  • Correct any data entry errors if possible.
  
  • If you are unable to correct data entry errors, return document to HOLD until corrective action can be determined.
• If errors exist in fields which are filled from the PAYR or PDIT tables, return to these tables, make data entry corrections and perform QUICK EDIT of the BILLING DOCUMENT INPUT and BILLING DOCUMENT LINE screens again.

• Type A for Approval in the ACTION field on the action line of the screen. Use the NEW LINE key ( ) to move the cursor to the APPRVL field.

• Type Y in the APPRVL field.

• Press ENTER.

• The BILLING DOCUMENT INPUT SCREEN will be displayed with the following two messages in the message area of the screen.

  • A - *S001 - APPROVAL 1 APPLIED.

  • A - *CY41 - APPROVED DOCUMENT.

SEE EXHIBIT 25

9.10.64 Scheduling The Billing Document For PARS Processing

After the billing document has been approved, it must be returned to the SUSPENSE FILE TABLE and scheduled for processing by PARS. This is accomplished as follows.

• Return cursor to the ACTION field on the action line of the screen.

• Type the letter O for Off-line processing.

• Press ENTER. The SUSPENSE FILE TABLE screen will be displayed.

SEE EXHIBIT 26

The document you have just approved will be displayed on the top line in the data area of the screen. The STAT field will still show HELD and the APPRV field will still display five zeros.

To verify the billing document has been approved and scheduled:

• Type N in the ACTION field on the action line of the screen,

• Press ENTER.

A blank SUSPENSE FILE TABLE screen will be displayed.

• The ACTION field will be prefilled with an S for Scan Record,
• Complete the SUSF screen as described in RCM 9.10.63B,

• Press ENTER.

**SEE EXHIBIT 27**

The approved document will appear on the top line in the data area of the screen. The STAT field will now show SCHED indicating the billing document has been scheduled for processing. The first position of the APPRV field will display a Y, indicating the billing document has been approved.

### 9.10.70 Establishing A Cash Receipt Document

An open accounts receivable record is offset in PARS by creating a cash receipt document. The cash receipt document is linked to a previously established billing document through the billing document identification number which was assigned to the receivable when the PAYOR/DEBTOR INFORMATION TABLE (PDIT) was completed. The billing statement and notice of delinquent debt released for installment repayment situations have the billing document identification number printed on them. This number is also typed on G-421 series, method of overpayment recovery option forms. Debtors are furnished two copies of these forms with the request to return one copy to the RRB with their payment or selected method of recovery. RCM 9.10.71 provides procedure for securing the billing document identification number when a copy of the notice or form is not returned and a cash receipt document must be prepared without a folder or the folder does not contain a record of this number.

The terms cash receipt or cash refund should not be confused with the term cash receipt document as applied to PARS. The cash receipt document generated in PARS is used to offset an overpayment regardless of the method of recovery.

**A. Creating a Cash Receipt Document Using Document Screens** - A cash receipt document for all methods of recovery except for partial or full annuity withholding can be created by completing a cash receipt document screen series. Posting receipts where the receivable has already been reduced to zero or where no billing document exists must be done using this method.

The following screens must be completed in the order listed when this method for posting recoveries is used.

- **DATA ENTRY AND CORRECTION STARTUP SCREEN FOR APPLICATION FFS,** and
- **CASH RECEIPT INPUT SCREEN,** and
- **CASH RECEIPT LINE SCREEN.**
Just as in the creation of a billing document, this series requires quick edit, approval and scheduling for processing in order to generate a cash receipt document in PARS. Procedure for using this method for creating a cash receipt document is provided in RCM 9.10.72 through 9.10.78.

B. Creating a Cash Receipt Document Using Table Screens - PARS has three table screens which mechanically generate cash receipt documents. The table screen completed depends on the method which will be used to reduce or recover the overpayment. The following PARS tables generate cash receipt documents and are completed for the recovery methods listed below each table name.

1. **Cash Collection Input Table (CCIT)**
   - Cash refund (cash, check or money order)
   - Tolerance
   - Waiver
   - One time annuity withholding
     - Overpaid amount withheld from accrual due
     - Small overpayment recovery situations
   - Actuarial Adjustment
   - Compromise

   Cash receipt documents created in PARS from the completion of the CCIT require approval and scheduling for processing like the cash receipt document created by completing the document screens. Instructions for completing the Cash Collection Input Table are found in RCM 9.10.79. Procedures for approval and scheduling of this PARS generated cash receipt document are located in RCM 9.10.75 through RCM 9.10.78.

2. **Recurring Cash Receipt Table (RECR)**
   - Partial annuity withholding
   - Full annuity withholding

   Unlike the cash receipt document created from completion of the CCIT, the cash receipt document generated in PARS from completion of the RECR does not require approval and scheduling for processing. Instructions for completing the Recurring Cash Receipt Table are found in RCM 9.10.80.
3. Write-Off Table (WROT)

- Used to transfer amounts from PARS to uncollectible
- OPR completion only

The cash receipt document generated in PARS from the completion of the WROT does not require approval or scheduling for processing. Instructions for completion of the Write-Off Table are found in 9.10.71 Securing The Billing Document Identification Number

Generally, a copy of the notice or form containing the billing document identification number will be returned with the payment or method of recovery selection. If it is necessary to secure the billing document identification number assigned to the overpayment when the open accounts receivable record was established, scan the ACCOUNTS RECEIVABLE CASE HISTORY HEADER TABLE (ARCH). You must know the employee's RRB claim number in order to scan this table.

A. Accessing the ARCH Screen - The ARCH screen is accessed as follows.

- Sign on to the PAR System as described in RCM 9.10.50.
- Type MTI, leave one space, then type the table code name ARCH.
- Press ENTER.
- A blank ACCOUNTS RECEIVABLE CASE HISTORY TABLE screen will appear.

SEE EXHIBIT 28

B. Completing the ARCH Screen - Because this is an information table, entries can only be made on the action line and key line of the table. Make the following entries next to or below the captions displayed on the action and key lines of the screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTION:</td>
<td>When the ARCH screen is accessed, the cursor will be positioned in the ACTION field on the action line of the screen. The ACTION field will be prefilled with an S, which means Scan Record. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>CAPTION</td>
<td>ENTRY</td>
</tr>
<tr>
<td>-------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>TABLEID:</td>
<td>The TABLEID field will contain the correct table code name. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>USERID:</td>
<td>Enter your four character PARS user identification code and your four character PARS password. (Your password will not be displayed on the screen.) The cursor will advance to the next field.</td>
</tr>
<tr>
<td>PAYOR CODE:</td>
<td>Enter the prefix and claim number of the railroad employee. Precede serial claim numbers with zeros. The cursor will advance to the identifier position of the PAYOR CODE field. DO NOT make any entry in this field.</td>
</tr>
</tbody>
</table>

After completing the PAYOR NUMBER field on the key line of the ARCH screen, press ENTER. An ACCOUNTS RECEIVABLE CASE HISTORY HEADER TABLE for the railroad claim number entered in the PAYOR NUMBER field will be displayed.

The data area of the ARCH screen will be filled with information entered on the PAYOR TABLE, the PAYOR/DEBTOR INFORMATION TABLE and the billing document screens which were completed when the accounts receivable record was established.

C. Determining the Billing Document Identification Number - The billing document identification number will be displayed under the BILLING DOCUMENT ID caption located on the key line of the screen. Make a note of this number for future use in creating the cash receipt document. If 0.00 is displayed following the ORIG O/P: caption and the message 01-PP30W ARHT TABLE ENTRY NOT FOUND appears in the message area of the screen, a billing document has either not been established under this billing document number and it will be necessary to page through the record as explained below, or the billing document has not yet been processed.

In many cases, only one open accounts receivable record will have been established for a claim number. Where more than one open receivable record exists, by entering only the railroad claim number in the PAYOR CODE field on the key line of the screen, the first open receivable will be displayed. When determining the billing document identification number, it is necessary to page through the record in all cases to verify the number of records that exist and to determine which open accounts receivable record is related to the payment you are processing. To page through the record to get to the applicable billing document, press ENTER. The next ARCH record in sequence will be displayed. You can only page forward. If you pass the record you need, enter an S for Scan Record in the ACTION field on the action line of the screen and re-enter the
claim number in the PAYOR CODE field on the key line of the screen. Press ENTER. The initial record for that claim number will again be displayed on the ARCH screen.

D. Exiting from the ARCH Screen - The command for leaving the ARCH table is determined by your next task.

1. Moving from the ARCH Table to Another PARS Table Screen - If you want to access another PARS table screen from the ARCH table screen, take the following actions.
   - Position the cursor in the ACTION field on the action line of the screen.
     - Type N for Next Screen in the ACTION field.
     - The cursor will advance to the TABLEID field.
     - Type the table code name you want to access over ARCH.
     - Press ENTER.
   A blank screen for the table you requested will be displayed.

2. Ending the Session - To exit from the ARCH table, take the following actions.
   - Position the cursor in the ACTION field on the action line of the screen.
   - Type E for Exit in the ACTION field.
   - Press ENTER.
   The message "V2 ENTER NEXT TASK CODE" will be displayed.

9.10.72 Completing The Startup Screen

Open receivable records are offset in PARS by creating a cash receipt document. The cash receipt document screen series can be used to generate a cash receipt document for all methods of recovery except for partial or full annuity withholding. This is the only method which can be used to post receipts to a receivable where the balance has previously been reduced to zero because of over reimbursement or duplicate recovery. The cash receipt document screen series must also be completed in situations where no billing document exists.

A. Accessing the STARTUP Screen - To access the STARTUP screen from the message "V2 ENTER NEXT TASK CODE" displayed after successfully signing on to the PARS database as described in RCM 9.10.50, or after exiting from a table screen, take the following actions.
• Type DDB.

• Press ENTER.

• A blank DATA ENTRY AND CORRECTION STARTUP SCREEN FOR APPLICATION FFS will appear.

SEE EXHIBIT 29

B. Completing the STARTUP Screen - Make the following entries next to the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>MODE OF OPERATION:</td>
<td>Enter a D for Data Entry. The cursor will advance to the next field.</td>
</tr>
<tr>
<td>DOCUMENT ID:</td>
<td>Enter the cash receipt document identification code under the captions displayed as follows:</td>
</tr>
<tr>
<td></td>
<td>• TRAN - Always enter C2. The cursor will advance to the DIVISION field.</td>
</tr>
<tr>
<td></td>
<td>• DIVISION - Always enter 2000. The cursor will advance to the ID NUMBER field.</td>
</tr>
<tr>
<td></td>
<td>• ID NUMBER - This number is made up of a combination of 11 letters and numbers. Enter the code as follows.</td>
</tr>
<tr>
<td></td>
<td>• Positions 1-2. Enter your unit designation determined as follows:</td>
</tr>
<tr>
<td></td>
<td>BC  Beneficiary Compliance Section</td>
</tr>
<tr>
<td></td>
<td>CB  Combined Benefits Section</td>
</tr>
<tr>
<td></td>
<td>CI  Congressional Inquiry Section</td>
</tr>
<tr>
<td></td>
<td>HA  Bureau of Hearings and Appeals</td>
</tr>
<tr>
<td></td>
<td>MP  Methods and Procedures</td>
</tr>
<tr>
<td></td>
<td>OP  Overpayment Recovery Section</td>
</tr>
<tr>
<td></td>
<td>PE  Program Evaluation Section</td>
</tr>
<tr>
<td>CAPTION</td>
<td>ENTRY</td>
</tr>
<tr>
<td>---------</td>
<td>-------</td>
</tr>
<tr>
<td>PS</td>
<td>Payment Services Unit</td>
</tr>
<tr>
<td>RB</td>
<td>Retirement Backlog Task Force</td>
</tr>
<tr>
<td>RI</td>
<td>Initial Claims Section</td>
</tr>
<tr>
<td>RP</td>
<td>Retirement Post Section</td>
</tr>
<tr>
<td>RS</td>
<td>Reconsideration Section</td>
</tr>
<tr>
<td>SI</td>
<td>Survivor Initial Section</td>
</tr>
<tr>
<td>SP</td>
<td>Survivor Post Section</td>
</tr>
</tbody>
</table>

These organization codes are also displayed on the PARS SORG TABLE screen.

- Positions 3-5. Enter your three position examiner number or your initials, determined by your unit’s policy.

</tr>
</thead>
</table>
| DOCUMENT ID (Cont.): | Positions 6-8. Enter the sequential day of the year you are establishing this cash receipt document. If the day contains fewer than three digits, enter zeros in positions 6 and 7 as necessary.  
EXAMPLE: January 20 is entered as 020; December 28 is entered as 362.  
The sequential date can be found in the lower left hand corner of most desk calendars. |
| | Positions 9-10. Enter the last two digits of the current year. |
| | Position 11. The final position is a counter. The counter is determined from the number of PARS cash receipt documents you establish each day.  
EXAMPLE: The first cash receipt document is 1; the second is 2; etc. |

</tr>
</tbody>
</table>

| USER ID: | Enter your four character PARS user identification code and your four character PARS password. (Your PARS password will not be displayed on the screen.) The cursor will advance to the next field. |

An example of a completed DATA ENTRY AND CORRECTION STARTUP SCREEN FOR APPLICATION FFS appears below.

SEE EXHIBIT 30

C. Exiting from the STARTUP Screen - After you have entered your PARS user identification code and PARS password, review the information you have entered on the STARTUP screen to verify that these entries are correct. If any errors are detected, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information. When all information is correct, press ENTER. The CASH RECEIPT INPUT SCREEN will appear.

9.10.73 Completing The Cash Receipt Input Screen

A. Accessing the CASH RECEIPT INPUT SCREEN - Following completion and entering of the STARTUP screen as described in RCM 9.10.72, the CASH RECEIPT INPUT SCREEN displayed below will appear.

SEE EXHIBIT 31

The MODE, DOCID and USERID fields on the action line of this screen will be prefilled from these entries completed on the STARTUP screen.

B. Completing the CASH RECEIPT INPUT SCREEN - Make the following entries next to the captions displayed on the screen. The cursor will place you in the first
position of each of the data entry fields beginning with DOC DATE and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>

</table>
| DEP NUMBER:        | Complete this entry as follows. This field will accommodate an entry of up to 12 positions. If all positions are used, the cursor will advance to the next field, otherwise use the TAB key to advance the cursor.  
  • If the method of recovery is by cash, check or money order, enter the certificate of deposit number (CD#).  
  • If the method of recovery is by annuity withholding, waiver, tolerance, etc. (any method other than cash, check or money order,) enter BRC. |
| DOC TYPE:          | Make no entry in this field. Use the TAB key to advance to the next field. |
| BILL FUND:         | Make no entry in this field. Use the TAB key to advance to the next field. |
C. Exiting from the CASH RECEIPT INPUT SCREEN - After completing the DOCUMENT TOTAL field, review the three entries you have completed on the CASH RECEIPT INPUT SCREEN to verify that these entries are correct. If any errors are detected, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information. When all information is correct, press ENTER. The CASH RECEIPT LINE SCREEN will appear.

9.10.74 Completing The Cash Receipt Line Screen

A. Accessing the CASH RECEIPT LINE SCREEN - Following completion and entering of the CASH RECEIPT INPUT SCREEN as described in RCM 9.10.73, the CASH RECEIPT LINE SCREEN displayed below will appear.

SEE EXHIBIT 33

The MODE, DOCID and USERID fields on the action line of this screen will be prefilled from these entries completed on the STARTUP screen.

B. Completing the CASH RECEIPT LINE SCREEN - Make the following entries next to the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields beginning with LINE NO and will move through the screen in the following order.

</table>

NOTE: The PARS ACOT Table contains a complete list of action out codes, including those used by the bureau of sickness and unemployment benefits division (SUBD).

Each CASH RECEIPT LINE SCREEN will accommodate entries for two separate lines of activity. If both sections of this screen must be completed, use the TAB key to advance the cursor from the ACTION OUT field in the top portion of the screen. The cursor will advance to the LINE NO field in the bottom portion of the screen. Complete each entry on the lower portion of the screen as described for each caption above.

Because of interest, penalty and administrative charges, situations exist where multiple lines of activity must be completed for a cash receipt document. Following completion of the bottom half of the first CASH RECEIPT LINE SCREEN, additional lines are accessed by pressing ENTER. A blank CASH RECEIPT LINE screen will appear. The MODE, DOCID and USERID fields on the action line of this screen will be prefilled with the information you entered on the STARTUP screen. The cursor will place you in the first position of each of the data entry fields beginning with LINE NO. Complete the required entries for each line of activity as described above. Continue to press ENTER to access additional blank CASH RECEIPT LINE SCREENS until sufficient lines of activity have been completed to record the entire payment.

C. Exiting from the CASH RECEIPT LINE SCREEN - After completing the ACTION OUT field on the last required line of activity, review the information you have entered on the CASH RECEIPT LINE SCREEN to verify that these entries are
correct. If any errors are detected, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information.

An example of a completed CASH RECEIPT LINE SCREEN appears below:

SEE EXHIBIT 34

9.10.75 Quick Edit Function

The Quick Edit function is used to edit entries you have completed on the CASH RECEIPT INPUT SCREEN and CASH RECEIPT LINE SCREEN. This function also signals the PAR System that all document screens required to establish a cash receipt document have been completed.

A. Beginning the Quick Edit Process - Following your review of the CASH RECEIPT LINE SCREEN and your determination that all entries are complete and correct, Quick Edit is accomplished as follows:

• Position the cursor in the ACTION field on the action line of the screen.
  • Press and hold down an alternate shift key (Alt),
  • Press the cursor home key (    ),
  • Release the alternate shift key (Alt).
  • Type Q for Quick Edit in the ACTION field.
  • Press ENTER.

B. Results of the Quick Edit Process - The PAR System always returns to the initial screen in a document screen series for display of edit, error or acceptance messages.

• The CASH RECEIPT INPUT SCREEN will be displayed.
• The MODE field on the action line of the screen will contain a C indicating the system is in the correction mode.
• The letters RH indicating additional handling is required will be displayed under the STATUS caption.

1. No Errors Are Detected During Quick Edit - If all required entries on the CASH RECEIPT INPUT SCREEN have been completed and the system does not detect any errors, the following three messages will be displayed in the message area at the bottom of the CASH RECEIPT INPUT SCREEN:
• A-*CQ93 - DOCUMENT REJECTED
• H-*FO53 - DOCUMENT NOT APPROVED
• H-*S401 - READY FOR APPROVAL

NOTE: The above messages will appear if no errors are detected on the CASH RECEIPT INPUT SCREEN but errors may still exist on the CASH RECEIPT LINE SCREEN. Therefore, it is essential to page to the CASH RECEIPT LINE SCREEN for display of any error messages. This is accomplished by typing NS for Next Screen in the ACTION field on the action line of the screen and pressing ENTER. Because the system will remain in correction mode, any errors detected in LINE screen entries will be displayed in the message area at the bottom of the screen. If no errors are detected, the message area will be blank.

SEE EXHIBIT 35

2. Errors Are Detected During Quick Edit - If any errors are detected during the Quick Edit process or any required entries are not complete, an error or warning message(s) will be displayed in the message area of the screen. Refer to Appendix A of this chapter for a description of the problem and corrective action to be taken. Use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and make the required entries.

The ACTION field on the action line of the screen may contain the letters EM. Because a maximum of six edit or error messages can be displayed on a screen, EM indicates there are additional edit or error messages for the screen you are viewing. To view the additional messages, press ENTER. The same screen with the additional edit or error messages will be displayed.

a. Moving from the CASH RECEIPT INPUT SCREEN to the CASH RECEIPT LINE SCREEN While Performing Quick Edit - Error messages always appear at the bottom of the CASH RECEIPT INPUT SCREEN first. To check for any edit or error messages which may be displayed on the CASH RECEIPT LINE SCREEN, or to make any corrections to the CASH RECEIPT LINE SCREEN which are displayed on the CASH RECEIPT INPUT SCREEN:

• Position the cursor in the ACTION field on the action line of the screen.
• Press and hold down an alternate shift key (Alt),
• Press the cursor home key (←),
- Release the alternate shift key (Alt).

- Type NS for Next Screen in the ACTION field.

- Press ENTER.

The CASH RECEIPT LINE SCREEN containing any additional edit or error messages will be displayed.

b. Moving from the CASH RECEIPT LINE SCREEN to the CASH RECEIPT INPUT SCREEN While Performing Quick Edit - If it is necessary to return to the CASH RECEIPT INPUT SCREEN while in the correction mode of Quick Edit:

- Position the cursor in the ACTION field on the action line of the screen.

- Press and hold down an alternate shift key (Alt),

- Press the cursor home key (    ),

- Release the alternate shift key (Alt).

- Type NLO for Move to Top of Document in the ACTION field.

  NOTE: The third position of this ACTION command is numeric.

- Press ENTER.

  The CASH RECEIPT INPUT SCREEN will again be displayed.

C. Exiting from Quick Edit - When all corrections have been made to the CASH RECEIPT INPUT SCREEN and CASH RECEIPT LINE SCREEN, perform the Quick Edit function as described in section A. Continue to make all corrections and perform Quick Edit until the three messages described in section B1 are displayed in the message area of the CASH RECEIPT INPUT SCREEN.

9.10.76 Holding The Cash Receipt Document For Approval

After the Quick Edit function has successfully been performed, the cash receipt document you have completed must be held for approval. This is accomplished as follows:

- Position the cursor in the ACTION field on the action line of the screen.

- Press and hold down an alternate shift key (Alt),

- Press the cursor home key (    ).
• Release the alternate shift key (Alt).
• Type H for Hold Document in the ACTION field.
• Press ENTER.

The STARTUP screen with the message A-*CQ8H-DOCUMENT HELD shown in the message area of the screen will be displayed.

SEE EXHIBIT 36

This completes the data entry portion for the establishment of a cash receipt document by means of completion of the cash receipt document screen series.

9.10.77 Approval Of The Cash Receipt Document

Before a cash receipt document is actually processed and established by the PAR System, the data entered on the CASH RECEIPT INPUT SCREEN and CASH RECEIPT LINE SCREEN must be approved by an authorizer. Cash receipt documents awaiting approval are housed in the SUSPENSE FILE TABLE (SUSF). Documents requiring approval are designated by the letters HELD in the STAT field and five zeros in the APPRV field on this table.

A. Accessing the SUSF Screen - To access the SUSPENSE FILE TABLE (SUSF) screen, take the following actions:

• Sign on to the PAR System as described in RCM 9.10.50.
• Type MTI, leave one space, then type the table code name SUSF.
• Press ENTER.
• A blank SUSPENSE FILE TABLE screen will appear.

SEE EXHIBIT 37

B. Completing the SUSF Screen - Make the following entries next to or below the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTION:</td>
<td>When the SUSF screen is accessed, the cursor will be positioned in the ACTION field which is prefilled with an S, which means Scan Record. Use the TAB key to advance to the next field.</td>
</tr>
</tbody>
</table>
### CAPTION | ENTRY
---|---
**TABLEID:** | The TABLEID field will contain the correct table code name. Use the TAB key to advance to the next field.
**USERID:** | Enter your four character PARS user identification code and your four character PARS password. (Your password will not be displayed on the screen.) The cursor will advance to the next field.
**BATCH ID:** | TRAN - Make no entry in this field. Use the TAB key to advance to the next field.
| ORG 1 - Make no entry in this field. Use the TAB key to advance to the next field.
| NUMBER - Make no entry in this field. Use the TAB key to advance to the next field.
**DOCUMENT ID:** | TRAN - Always enter C2 in the first two positions of the Transaction Code. Use the TAB key to advance to the next field.
| ORG 1 - Always enter 2000 in this field. The cursor will advance to the next field.
| NUMBER - Enter the 11 position alpha and numeric code assigned to the cash receipt document which requires approval.

After completing the TRAN, ORG 1, and NUMBER fields under the DOCUMENT ID caption, press ENTER.

- The cursor will return to the ACTION field on the action line of the screen.
- The ACTION field will now contain an R for Refill.
- The cash receipt document you requested will appear on the first data line of the screen.
- In addition to the DOCUMENT ID field which you completed, the STAT, APPRV, ENTRY DATE, LAST DATE, LAST TERMINAL and LAST USER fields will now be prefilled by the PAR System.

**SEE EXHIBIT 38**

C. **Accessing the CASH RECEIPT INPUT SCREEN and CASH RECEIPT LINE SCREEN for Approval** - To access the CASH RECEIPT INPUT SCREEN, take the following actions.
• Type S for Scan Record over the R in the ACTION field on the action line of the screen.

• The correct TABLEID and your USERID will be prefilled in these fields.

• Use the NEW LINE key (     ) to advance the cursor to the first position of the first data line on the SUSF table screen.

• Press ENTER.

• The CASH RECEIPT INPUT SCREEN will be displayed.

• The cursor will be positioned in the ACTION field on the action line of the screen,

• The ACTION field will be blank,

• The MODE field will be prefilled with a C for Correction Mode,

• The DOCID field will be prefilled with the cash receipt document number you requested,

• The letters RH indicating additional handling required will be displayed under the STATUS caption,

• Two messages will appear in the message area at the bottom of the CASH RECEIPT INPUT SCREEN;

• H-*S401-READY FOR APPROVAL 1,

• H-*F053-DOCUMENT NOT APPROVED.

**SEE EXHIBIT 39**

**D. Approval Process** - Once the cash receipt document requiring approval and scheduling is accessed and visible on the screen, take the following actions.

• Review the information on the CASH RECEIPT INPUT SCREEN to verify all entries are correct. Complete or correct any data entry items as necessary.

• Type NS for Next Screen in the ACTION field on the action line of the screen.

• Press ENTER. This will access the CASH RECEIPT LINE SCREEN.

• The FUND:, BUDGET ORG/SUB:, BOC/SUB: and VND/PRV: on each line of activity will be filled from information entered into the PAR System when the billing document was established.
• Review the information on the CASH RECEIPT LINE SCREEN to verify all entries are correct. Complete or correct any data entry items as necessary.

• Perform the Quick Edit function as described in RCM 9.10.75.
  • Correct any data entry errors if possible.
  • If you are unable to correct data entry errors, return the cash receipt document to HOLD until corrective action can be determined.

• Type A for Approval in the ACTION field on the action line of the screen. Use the NEW LINE key ( ) to move the cursor to the APPRVL field.

• Type Y in the APPRVL field.

• Press ENTER.

• The CASH RECEIPT INPUT SCREEN will be displayed showing the following two messages in the message area at the bottom of the screen.
  • A-*S001-APPROVAL 1 APPLIED.
  • A-*CY41-APPROVED DOCUMENT.

SEE EXHIBIT 40

9.10.78 Scheduling The Cash Receipt Document For PARS Processing

After the cash receipt document has been approved, it must be returned to the SUSPENSE FILE TABLE and scheduled for processing by PARS. This is accomplished as follows.

• Return the cursor to the ACTION field on the action line of the screen.

• Type the letter O for Off-line processing.

• Press ENTER. The SUSPENSE FILE TABLE screen will be displayed.

SEE EXHIBIT 41

The cash receipt document you have just approved will be displayed on the top line in the data area of the screen. The STAT field will still show HELD and the APPRV field will still display five zeros.

To verify the cash receipt document has been approved and scheduled:
• Type N for Next Screen in the ACTION field on the action line of the screen.

• Press ENTER. A blank SUSPENSE FILE TABLE screen will be displayed.
  • The ACTION field will be prefilled with an S for Scan Record,
  • The TABLEID field will contain the correct table code name,
  • The USERID field will contain your PARS user identification code and password.

• Position the cursor on the first line of the data area of the screen.
  • Type C2 in the TRANS field under the DOCUMENT ID caption. Use the TAB key to advance to the next field.
  • Type 2000 in the ORG 1 field. The cursor will advance to the next field.
  • Type the 11 character alpha and numeric cash receipt document number you have just approved in the NUMBER field.

• Press ENTER.

SEE EXHIBIT 42

The approved cash receipt document will appear on the top line in the data area of the screen. The STAT field will now show SCHED indicating the cash receipt document has been scheduled for processing. The first position of the APPRV field will display a Y, indicating the cash receipt document has been approved.

9.10.79 Creating A Cash Receipt Document Using The Cash Collection Input Table (CCIT) Screen

A cash receipt document is mechanically produced by PARS for the following recovery methods by completing the CASH COLLECTION INPUT TABLE (CCIT).

• Cash refund (cash, check or money order, reclamation credit - SF 1081, TFS 133, TFS 135).

• Tolerance.

• Actuarial Adjustment.

• Waiver.

• One time annuity withholding.
  • Overpaid amount was withheld from an accrual due,
- Small overpayment recovery situation.
- Compromise.

Creating a cash receipt document through completion of a CCIT screen has several advantages. When recovering both a regular and supplemental annuity overpayment, the cash receipt document generated in PARS by the CCIT will automatically allocate the recovery between the two accounts. In non-current entitlement situations, where interest, penalty and administrative changes are involved, a CCIT generated PARS cash receipt document will distribute funds to these accounts in the order required by law. The balance of the payment will then be credited to the principal. Another advantage in creating a cash receipt document from the CCIT screen is that less data entry fields require completion.

Both the PAYOR CODE and the BILLING DOCUMENT IDENTIFICATION NUMBER assigned to the overpayment when the accounts receivable record was established must be known to complete a CCIT screen. If a copy of the notice or form containing these identifiers does not accompany a payment or method of recovery selection and the folder does not contain the information, or the CCIT screen is being completed without a folder, RCM 9.10.71 provides instructions for securing these keys.

A. **Accessing the CCIT Screen** - The CCIT screen is accessed as follows:

- Sign on to the PAR System as described in RCM 9.10.50.
- Type MIT, leave one space, then type the table code name CCIT.
- Press ENTER.
- A blank CASH COLLECTION INPUT TABLE screen will appear.

SEE EXHIBIT 43

B. **Completing the CCIT Screen** - Make the following entries next to or below the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTION:</td>
<td>When the CCIT screen is accessed, the cursor will be positioned in the ACTION field on the action line of the screen.</td>
</tr>
<tr>
<td></td>
<td>- The ACTION field will be prefilled with an S, which means Scan Record.</td>
</tr>
<tr>
<td>CAPTION</td>
<td>ENTRY</td>
</tr>
<tr>
<td>------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td></td>
<td>• Type A for Add Record over the S.</td>
</tr>
<tr>
<td></td>
<td>• The cursor will advance to the TABLEID field.</td>
</tr>
<tr>
<td>TABLEID:</td>
<td>The TABLEID field will contain the correct table code name. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>USERID:</td>
<td>Enter your four character PARS user identification code and your four character PARS password. (Your password will not be displayed on the screen.) The cursor will advance to the next field.</td>
</tr>
<tr>
<td>CR DOC ID:</td>
<td>The Cash Receipt Document Identification code on the CCIT screen is made up of a combination of 13 letters and numbers. The first two positions are referred to as the TRANS CODE on error and warning messages. The remaining 11 positions are referred to as the DOCUMENT NUMBER. Complete this field as follows:</td>
</tr>
<tr>
<td></td>
<td>• Positions 1-2. Always enter C2 in the first two positions of this field. The cursor will advance to position 3.</td>
</tr>
<tr>
<td></td>
<td>• Positions 3-4. Enter your unit designation determined as follows:</td>
</tr>
<tr>
<td></td>
<td>BC  Beneficiary Compliance Section</td>
</tr>
<tr>

<td></td>
</tr>
<tr>
<td>REFERENCE BILL DOC ID:</td>
<td>Enter the Billing Document Identification Number which was assigned when the accounts receivable record, which is being offset by this cash receipt document, was established. Always enter B2 in the first two positions of this field. The cursor will advance to the remaining 11 positions. Upon completion of the document number field, the cursor will advance to the next field.</td>
</tr>
<tr>
<td>NOTE: Always enter the REFERENCE BILL DOC ID on line 01. Lines 02 through 07 are reserved for RUIA use only.</td>
<td></td>
</tr>
<tr>
<td>AMOUNT RECEIVED:</td>
<td>Enter the same amount as was entered in the TOTAL PAYMENT field above. You must use a decimal point and complete this entry to two decimal places. DO NOT use a dollar sign. The cash receipt document generated by PARS will create the appropriate lines of activity from the information contained in the billing document.</td>
</tr>
<tr>
<td>NOTE: Always enter the AMOUNT RECEIVED on line 01. Lines 02 through 07 are reserved for RUIA use only.</td>
<td></td>
</tr>
</tbody>
</table>

C. Exiting from the CCIT Screen - After completing the AMOUNT RECEIVED field, review the information you have entered on the CCIT screen to verify that these entries are correct. If any errors are detected, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information.

1. Establishing the CASH COLLECTION INPUT TABLE - When all required entries have been completed and all information is correct, press ENTER. The message *L030 ALL LINES ADDED will be displayed in the message area of the screen indicating the CASH COLLECTION INPUT TABLE has been established.

2. Errors Detected - If any errors are detected, or any required entries are not complete, an error or warning message(s) will be displayed in the message area at the bottom of the screen. Refer to Appendix A of this chapter for a description of the problem and corrective action to be taken. Use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and complete the required entry as indicated. Continue to
press ENTER and make any required corrections until the message *030 ALL LINES ADDED is displayed in the message area of the screen. It is important that all errors are corrected and all required entries are completed on the CCIT screen. PARS will not mechanically generate a cash receipt document as long as errors are present.

The following example shows a completed CASH COLLECTION INPUT TABLE.

SEE EXHIBIT 44

D. Approving the Cash Receipt Document Generated from Completion of the CCIT Screen - Cash receipt documents generated in PARS from completion of CCIT screens require approval and scheduling for processing. Generally, a cash receipt document which is created through CCIT completion one day will appear on the DOCUMENT SUSPENSE FILE INQUIRY (SUSF) table the following day.

The approval and scheduling process for cash receipt documents generated from CCIT screen completion is the same as for the cash receipt document created through document screen series completion. Refer to RCM 9.10.77 and 78 for instructions on the approval and scheduling process.

9.10.80 Creating A Cash Receipt Document Using The Recurring Cash Receipt Table (RECR) Screen

Where partial or full annuity withholding is the method which will be used to offset an open accounts receivable record, a cash receipt document is generated through completion of the RECURRING CASH RECEIPT TABLE (RECR) screen. Unlike cash receipt documents created through completion of the document screen series completion, cash receipt documents created from RECR do not require approval or scheduling for processing.

Both the PAYOR NUMBER and the BILLING DOCUMENT IDENTIFICATION NUMBER assigned to the overpayment when the accounts receivable record was established must be known to complete a RECR screen. If a copy of the G-421 series, method of recovery selection does not contain these identifiers or the folder does not contain this information, RCM 9.10.71 provides instructions for securing these keys.

It is essential that the RECR screen be completed timely because the date entered in the OFFSET BEGIN DT field can only be the current or a future date. If the RECR screen is not completed until after withholding is in force, paragraph E of this section provides instructions for this situation.

A. Accessing the RECR Screen - The RECR screen is accessed as follows.

- Sign on to the PAR System as described in RCM 9.10.50.
- Type MTI, leave one space, then type the table code name RECR.
• Press ENTER.

• A blank RECURRENT CASH RECEIPT TABLE screen will appear.

SEE EXHIBIT 45

B. Completing the RECR Screen - Make the follow entries next to or below the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTION:</td>
<td>When the RECR screen is accessed, the cursor will be positioned in</td>
</tr>
<tr>

</tr>
<tr>
<td></td>
<td>• The ACTION field will be prefilled with an S, which means Scan</td>
</tr>
<tr>
<td></td>
<td>Record.</td>
</tr>
<tr>
<td></td>
<td>• Type A for Add Record over the S.</td>
</tr>
<tr>
<td></td>
<td>• The cursor will advance to the TABLEID field.</td>
</tr>
<tr>
<td>TABLEID:</td>
<td>The TABLEID field will contain the correct table code name.</td>
</tr>
<tr>
<td></td>
<td>Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>USERID:</td>
<td>Enter your four character PARS user identification code and your</td>
</tr>
<tr>
<td></td>
<td>four character PARS password. (Your password will not be displayed</td>
</tr>
<tr>
<td></td>
<td>on the screen.) The cursor will advance to the next field.</td>
</tr>
<tr>
<td>PAYOR NUMBER:</td>
<td>Enter the Payor Number which was established on the billing document</td>
</tr>
<tr>
<td></td>
<td>when the accounts receivable record, which is being offset by partial</td>
</tr>
<tr>
<td></td>
<td>or full annuity withholding, was established. The cursor will</td>
</tr>
<tr>
<td></td>
<td>advance to the next field. This field was previously titled PAYOR</td>
</tr>
<tr>
<td></td>
<td>CODE.</td>
</tr>
<tr>
<td>BILLING DOC ID:</td>
<td>Enter the Billing Document Identification Number which was assigned</td>
</tr>
<tr>
<td></td>
<td>when the accounts receivable record, which is being offset by partial</td>
</tr>
<tr>
<td></td>
<td>or full annuity withholding was established. Always enter B2 in the</td>
</tr>
<tr>
<td></td>
<td>first two positions of this field. The cursor will advance to the</td>
</tr>
<tr>
<td></td>
<td>remaining 11 positions. Upon completion of the document number</td>
</tr>
<tr>
<td></td>
<td>field, the cursor will advance to the ACTION OUT field.</td>
</tr>
<tr>
<td>CAPTION</td>
<td>ENTRY</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>----------------------------------------------------------------------</td>
</tr>
<tr>
<td>ORIG O/P FOR OFFSET:</td>
<td>This item is completed from information contained within PARS. The cursor will skip over this field.</td>
</tr>
<tr>
<td>CURRENT BALANCE:</td>
<td>This item is completed from information contained within PARS. The cursor will skip over this field.</td>
</tr>
<tr>
<td>ACTION OUT:</td>
<td>Enter one of the following codes which describes how recovery is being made.</td>
</tr>
<tr>
<td></td>
<td>• 11B  Partial annuity withholding.</td>
</tr>
<tr>
<td></td>
<td>• 11C  Full annuity withholding.</td>
</tr>
<tr>
<td>CURRENT OFFSET AMT:</td>
<td>Enter the recurring withholding amount. You must use a decimal point and complete this entry to two decimal places. DO NOT enter a dollar sign. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>OFFSET BEGIN DT:</td>
<td>Enter the month, day and year of the check issue date partial or full annuity withholding is effective. Precede single digit month and day entries with a zero. EXAMPLE: 03 01 90.</td>
</tr>
<tr>
<td></td>
<td>NOTE: The OFFSET BEGIN DT entered in this field cannot be prior to the calendar date on which the RECR screen is completed. It can be a future date. If annuity withholding is to be effective with the payment issued on July 1, the RECR screen can be completed on July 1 or anytime prior with an OFFSET BEGIN DT of 07 01. If annuity withholding was effective with the payment issued on July 1, but the RECR screen was not established by that date, 08 01 must be entered in the OFFSET BEGIN DT field. Paragraph E of this section provides instructions for special handling when the RECR screen is completed after withholding is in effect.</td>
</tr>
<tr>
<td>LAST OFFSET MADE DT:</td>
<td>This item is completed from information contained within PARS. The cursor will skip over this field.</td>
</tr>
<tr>
<td>TRANS TYPE:</td>
<td>Always enter the letters AW in this field. The cursor will advance to the next field.</td>
</tr>
<tr>
<td>ORIG OFFSET MONTHS:</td>
<td>Enter the number of months partial or full annuity withholding will be in force. This is a three position field. Inasmuch as withholding will rarely be in force for more than 48 months, enter zeros in the first two positions as necessary.</td>
</tr>
</tbody>
</table>
### CAPTION | ENTRY
---|---
| EXAMPLES: 048, 007. The cursor will advance to the HOLD IND field. |
| APPLIED OFFSET MONTHS: | This item is completed from information contained within PARS. The cursor will skip over this field. |
| HOLD IND: | Make no entry in this field. Use the TAB key to advance to the next field. If withholding must be suspended for any reason, see paragraph E of this section for special instructions. |
| CASH ACCT: | Make no entry in this field. Use the TAB key to advance to the next field. |
| ARCHIVE FLAG: | Make no entry in this field when the RECR screen is being established. This field is only completed once partial or full annuity withholding has been completed and the CURRENT BALANCE field on this screen has been reduced to zero. Paragraph D of this section provides instructions for completing this entry once recovery through annuity withholding has been completed. |

#### C. Exiting from the RECR Screen

- **Exiting from the RECR Screen** - After completing the ORIG OFFSET MONTHS field, review the information you have entered on the RECR screen to verify that these entries are correct. If any errors are detected, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information.

1. **Establishing the RECURRING CASH RECEIPT TABLE** - When all required entries have been completed and all information is correct, press ENTER. The message *LO30 ALL LINES ADDED will be displayed in the message area of the screen indicating the RECURRING CASH RECEIPT TABLE has been established. Approval and scheduling of the RECR screen are not necessary. Pressing ENTER and having the above message displayed on the screen will establish this table in PARS. Each month, a cash receipt document will be mechanically generated for the withholding amount entered in the CURRENT OFFSET AMT field until the open balance has been reduced to zero.

2. **Errors Detected** - If any errors are detected, or any required entries are not complete, an error or warning message(s) will be displayed in the message area at the bottom of the screen. Refer to Appendix A of this chapter for a description of the problem and corrective action to be taken. Use the TAB and ARROW keys to move the cursor to the incorrect field(s)
or position(s) and complete the required entry as indicated. Continue to press ENTER and make any required corrections until the message *LO30 ALL LINES ADDED is displayed in the message area of the screen. It is important that all errors are corrected and all required entries are completed on the RECR screen. PARS will not mechanically process and generate a recurring cash receipt document as long as errors are present.

The following example shows a completed RECURRING CASH RECEIPT TABLE.

SEE EXHIBIT 46

The ORIG O/P FOR OFFSET, CURRENT BALANCE, HOLD IND, ARCHIVE FLAG, PEN %, ADMN COST and INT % fields in the data area of the screen will be filled with information derived from the PAR System.

D. Archiving the RECURRING CASH RECEIPT TABLE - The final cash receipt document generated from the RECR table will be for the remaining amount of the open balance. Once the CURRENT BALANCE field has been reduced to zero, and the claim is recertified to remove partial or full annuity withholding, the RECURRING CASH RECEIPT TABLE must be archived. This is accomplished as follows:

- Sign on to the PAR System as described in RCM 9.10.50.
- Type MTI, leave one space, then type the table code name RECR.
- Press ENTER. A blank RECURRING CASH RECEIPT TABLE screen will be displayed. The ACTION and TABLEID fields will contain the correct entries.
- Enter your PARS password and user identification code following the USERID caption on the action line of the screen.
- Complete the PAYOR CODE and BILLING DOC ID on the key line of the screen.
- Press ENTER. The RECURRING CASH RECEIPT TABLE for the PAYOR CODE and BILLING DOC ID you entered on the key line of the screen will be displayed.
- Type C for Change Record over the R in the ACTION field on the action line of the screen.
- Use the TAB key to move the cursor to the ARCHIVE FLAG field.
- Type Y for yes over the N appearing in the ARCHIVE FLAG field.
• Press ENTER. The following two messages will be displayed in the message area at the bottom of the screen.

01 - PP01W  DVAL TABLE ENTRY NOT FOUND

01 - *LO31  ALL LINES CHANGED

An example of a RECURRING CASH RECEIPT TABLE in which the ARCHIVE FLAG has been set appears below.

SEE EXHIBIT 47

When the RECURRING CASH RECEIPT portion of PARS is processed, this record will be archived and will no longer be displayed as a table screen.

E. Special Situations

1. Annuity Suspended While Partial or Full Annuity Withholding is in Effect - Occasionally, it may be necessary to suspend an annuity from which deductions are being made to recover an overpayment. Because PARS does not interface with the payment systems, PARS must also be alerted if an annuity is suspended from which partial or full annuity withholding is in force. This is accomplished by changing the HOLD IND field on the RECURRING CASH RECEIPT TABLE (RECR). Take the following actions.

• Sign on to the PAR System as described in RCM 9.10.50.

• Type MTI, leave one space, then type the table code name RECR.

• Press ENTER. A blank RECURRING CASH RECEIPT TABLE screen will be displayed. The ACTION and TABLEID fields will contain the correct entries.

• Enter your PARS password and user identification code following the USERID caption on the action line of the screen.

• Complete the PAYOR NUMBER and BILLING DOC ID on the key line of the screen.

• Press ENTER. The RECURRING CASH RECEIPT TABLE for the PAYOR CODE and BILLING DOC ID you entered on the key line of the screen will be displayed.

• Type C for Change Record over the R in the ACTION field on the action line of the screen.

• Use the TAB key to move the cursor to the HOLD IND field.
• Type Y for yes over the N appearing in the HOLD IND field.

• Press ENTER. The following two messages will be displayed in the message area at the bottom of the screen.
  
  • 01 - PP01W DVAL TABLE ENTRY NOT FOUND
  • 01 - *LO30 ALL LINES CHANGED

NOTE: If the HOLD IND field is not completed timely, any cash receipt document(s) posted in error must be cancelled. Check the ACCOUNTS RECEIVABLE CASH RECEIPT LINE (ARCL) screen to determine if any erroneous cash receipts were posted and to obtain the Cash Receipt Document (C2) Number.

An example of a RECURRING CASH RECEIPT TABLE in which the HOLD IND has been set to Y appears below.

SEE EXHIBIT 48

Once the annuity has been returned to pay status, the HOLD IND must be changed back to N. This is accomplished by the same procedure as outlined above for changing the HOLD IND to Y.

2. RECURRING CASH RECEIPT TABLE Created After Partial or Full Annuity Withholding Has Gone into Effect - As stated earlier, the date entered in the OFFSET BEGIN DT cannot be prior to the calendar date on which the RECR screen is being completed. In the event the RECR screen is not completed until after one or more months of annuity withholding have occurred, take the following actions.

a. Complete the CASH COLLECTION INPUT TABLE

• Calculate the amount which has been recovered from annuity payments prior to establishment of the RECR screen.

• Complete a CCIT screen as described in RCM 9.10.79.
  
  • Enter the amount withheld from annuity payments in the TOTAL PAYMENT field.
  • Enter AW for annuity withholding in the TRANS TYPE field.
  • Enter one of the following codes in the ACTION OUT field.
    • 11B Partial Annuity Withholding.
    • 11C Full Annuity Withholding.
• Have the completed CCIT generated cash receipt document approved and scheduled for processing.

b. Complete the RECURRING CASH RECEIPT TABLE

• Determine the total number of months annuity withholding has been in force prior to completion and processing of the RECR screen.

• Complete a RECR screen as described in paragraph B of this section.

• Enter the first day of the next monthly annuity payment from which full or partial withholding will be applied in the OFFSET BEGIN DT field.

• Enter the total number of months partial or full withholding will be applied, reduced by the number of months recovery has already been made prior to establishment of the RECR screen, in the ORIG OFFSET MONTHS field.

• The CURRENT BALANCE field, which is filled by the system, will reflect the amount which was recovered and processed through completion of the CCIT screen prior to establishment of the RECR screen.

3. Annuity Withholding and Simultaneous Recovery through Installment Billing - Occasionally, because of the amount of an overpayment, full annuity withholding may be in force. At the same time, the annuitant may have agreed to remit a certain amount each month in order to reduce the overpayment. Because both an INSTALLMENT BILLING AND PAYMENT TABLE (INBT), used to produce monthly billing statements, and a RECURRING CASH RECEIPT TABLE (RECR) cannot exist at the same time, examiners must complete the RECR screen. The CURRENT BALANCE field on the RECR screen will reflect the amount recovered by annuity withholding as well as the cash amount remitted each month. Following completion of the RECR screen, examiners must forward the claim folder to the Overpayment and Recovery Section. Since installment billing notices cannot be generated by PARS in these situations, OPR will control the case and manually trace on installment payments when necessary.

9.10.81 Creating A Cash Receipt Document Using The Write-Off Table (WROT) Screen

The Write-Off Table (WROT) is used to mechanically create a cash receipt document which will transfer open accounts receivable records from PARS to the uncollectible
account. Only claims examiners in the Overpayment Recovery Section (OPR) have access to enter or change records on this table. Accounts receivable records which have not had any collection activity posted to them for 60 days from the delinquency date will automatically default to WROT. In order for records appearing on WROT to actually be transferred to uncollectible, OPR examiners must change the write-off flag and reason code and complete the action out code. Receivables to be transferred to uncollectible which do not appear on WROT can also be added to this table.

When transferring amounts to uncollectible, it is essential that the PAYOR TABLE contains the name of the person responsible for the debt as opposed to RECLAMATION, ESTATE DEVELOPMENT, etc. Paragraph E of this section provides instructions for correcting the payor name if necessary.

A. Accessing the WROT Screen - The WROT screen is accessed as follows.

- Sign on to the PAR System as described in RCM 9.10.50.
- Type MTI, leave one space, then type the table code name WROT.
- Press ENTER.
- A blank WRITE-OFF TABLE screen will appear.

SEE EXHIBIT 49

B. Transferring Existing WROT Records to Uncollectible - To transfer an existing accounts receivable record to uncollectible, make the following entries next to or below the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields beginning with ACTION and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTION:</td>
<td>When the WROT screen is accessed, the cursor will be positioned in the ACTION field on the action line of the screen. The ACTION field will be prefilled with an S, which means Scan Record. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>TABLEID:</td>
<td>The TABLEID field will contain the correct table code name. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>USERID:</td>
<td>Enter your four character PARS user identification code and your four character PARS password. (Your password will not be displayed on the screen.) The cursor will advance to the next field.</td>
</tr>
</tbody>
</table>
PAYOR NUMBER: Enter the prefix and claim number of the railroad employee. Precede serial claim numbers with zeros. The cursor will advance to the identifier position of the PAYOR NUMBER field. DO NOT make any entry in this field. This field was previously titled PAYOR ID.

After completing the PAYOR NUMBER field on the WROT screen, press ENTER. The WRITE-OFF TABLE record for the railroad claim number entered in the PAYOR NUMBER field will be displayed on line 01 of the screen.

SEE EXHIBIT 50

The PAYOR NUMBER, BD ID, TOTAL BILL AMOUNT, LAST DUN DATE, WRITEOFF FLAG and RSN fields will be filled with data contained within PARS.

To transfer the existing record to uncollectible, make the following entries next to or below the captions displayed on the screen.

NOTE: Caution must be exercised when changing existing fields and completing required entries while in the CHANGE mode, as all records displayed on the screen are subject to change.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTION</td>
<td>When the WROT screen for the PAYOR ID you entered above is accessed, the cursor will be positioned in the ACTION field on the action line of the screen.</td>
</tr>
<tr>
<td></td>
<td>• The ACTION field will be prefilled with an R which means Refill Record.</td>
</tr>
<tr>
<td></td>
<td>• Type C for Change Record over the R.</td>
</tr>
<tr>
<td></td>
<td>• The cursor will advance to the TABLEID field.</td>
</tr>
<tr>
<td>TABLEID</td>
<td>The TABLEID field will contain the correct table code name. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>USERID</td>
<td>The USERID field will contain your PARS identification code and PARS password. (Your password will not be displayed on the screen.) Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>CAPTION</td>
<td>ENTRY</td>

<tr>
<td>-----------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>PAYOR NUMBER:</td>
<td>Make no entry in this field (previously titled PAYOR ID). Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td></td>
<td>NOTE: Line 01 in the data area of the WROT screen will contain the first record for the railroad employee's claim number you entered above. If more than one record for a claim number is shown, use the NEW LINE key to position the cursor on the data line for the Billing Document Identification Number and Total Bill Amount which is to be transferred to uncollectible.</td>
</tr>
<tr>
<td>BD ID:</td>
<td>Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>TOTAL BILL AMOUNT:</td>
<td>Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>LAST DUN DATE:</td>
<td>Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>OVER DUE STAT:</td>
<td>Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>WRITEOFF FLAG:</td>
<td>This field will be prefilled with an N, which means No. Type Y for YES over the N. The cursor will advance to the next field.</td>
</tr>
<tr>
<td>WRITEOFF RSN:</td>
<td>This field will be prefilled with an A, which means Uncollectible - OPR. Select a Write-Off Reason Code from the list below which best describes the reason for transfer to uncollectible. Type this code over the A. The cursor will advance to the next field.</td>
</tr>
<tr>
<td></td>
<td>A  Uncollectible - OPR</td>
</tr>
<tr>
<td></td>
<td>B  Uncollectible - BH&amp;A</td>
</tr>
<tr>
<td></td>
<td>C  Uncollectible - Reclamation Abandoned</td>
</tr>
<tr>
<td></td>
<td>D  Uncollectible - Statute of Limitations Expired on Reclamations</td>
</tr>
<tr>
<td></td>
<td>E  $500 Waiver/Reconsideration Uncollectible</td>
</tr>
<tr>
<td></td>
<td>F  Relief from Recovery</td>
</tr>
</tbody>
</table>
### CAPTION | ENTRY
---|---
If the WRITE OFF RSN code remains A, use the TAB key to advance to the next field.

### ACT OUT:
Enter one of the following three position codes which best describes the reason for transfer of the accounts receivable to uncollectible.

| 18A | Uncollectible - OPR |
| 18B | Uncollectible - BH&A |
| 18C | Uncollectible - Reclamation Abandoned |
| 18D | Uncollectible - Statute of Limitations Expired on Reclamation |
| 18E | $500 Waiver/Reconsideration Uncollectible |
| 18F | Relief from Recovery |

An example of a completed WRITE-OFF TABLE in which the record appearing on line 01 in the data area of the screen has been changed for transfer to uncollectible appears below.

**SEE EXHIBIT 51**

C. **Adding a Record to the WROT Screen** - To add a record to the Write-Off Table, make the following entries next to or below the captions displayed on a blank WROT screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.

### CAPTION | ENTRY
---|---
ACTION: | When the WROT screen is accessed, the cursor will be positioned in the ACTION field on the action line of the screen.
- The ACTION field will be prefilled with an S, which means Scan Record.
- Type A for Add Record over the S.
- The cursor will advance to the TABLEID field.
<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>TABLEID:</td>
<td>The TABLEID field will contain the correct table code name. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>USERID:</td>
<td>Enter your four character PARS user identification code and your four character PARS password. (Your password will not be displayed on the screen.) The cursor will advance to the next field.</td>
</tr>
<tr>
<td>PAYOR NUMBER:</td>
<td>Enter the prefix and railroad claim number which was assigned as the PAYOR NUMBER when the accounts receivable record was established. Precede serial claim numbers with zeros. The cursor will advance to the identifier position. Enter the identifier which was assigned when this record was established. This field was previously titled PAYOR ID. The cursor will advance to the next field.</td>
</tr>
<tr>
<td>BD ID:</td>
<td>Always enter B2 in the first two positions of this field. The cursor will advance to the remaining 11 positions. Enter the Billing Document Identification number assigned when the accounts receivable record was established. The cursor will advance to the next field.</td>
</tr>
<tr>
<td>TOTAL BILL AMOUNT:</td>
<td>Enter the amount of the overpayment for the accounts receivable record which is being transferred to uncollectible. You must use a decimal point and complete this entry to two decimal places. DO NOT use a dollar sign. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>LAST DUN DATE:</td>
<td>Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>OVER DUE STAT:</td>
<td>Make no entry in this field. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>WRITEOFF FLAG:</td>
<td>Always enter a Y for YES in this field. The cursor will advance to the next field.</td>
</tr>
<tr>
<td>WRITEOFF RSN:</td>
<td>Enter the one position code from the list below which best describes the reason for transfer of this record to uncollectible. The cursor will advance to the next field.</td>
</tr>
<tr>
<td></td>
<td>A  Uncollectible - OPR</td>
</tr>
<tr>
<td></td>
<td>B  Uncollectible - BH&amp;A</td>
</tr>
<tr>
<td>CAPTION</td>
<td>ENTRY</td>
</tr>
<tr>
<td>-----------------</td>
<td>----------------------------------------------------------------------</td>
</tr>
<tr>
<td>C</td>
<td>Uncollectible - Reclamation Abandoned</td>
</tr>
<tr>
<td>D</td>
<td>Uncollectible - Statute of Limitations Expired on Reclamations</td>
</tr>
<tr>
<td>E</td>
<td>$500 Waiver/Reconsideration - Uncollectible</td>
</tr>
<tr>
<td>F</td>
<td>Relief from Recovery</td>
</tr>
</tbody>
</table>

**ACT OUT:**

Enter one of the following three position codes which best describes the reason for transfer of this record to uncollectible.

- **18A** Uncollectible - OPR
- **18B** Uncollectible - BH&A
- **18C** Uncollectible - Reclamation Abandoned
- **18D** Uncollectible - Statute of Limitations Expired on Reclamation
- **18E** $500 Waiver/Reconsideration - Uncollectible
- **18F** Relief from Recovery

A maximum of 13 records to be transferred to uncollectible can be added on one WROT screen.

An example of a completed WRITE-OFF TABLE adding a record for transfer to uncollectible, appears below.

**SEE EXHIBIT 52**

**D. Exiting from the WROT Screen** - After completing the ACT OUT field, review the entries you have changed or added to the WROT screen to verify these entries are correct. If any errors are detected, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information.

1. **Establishing the WRITE-OFF TABLE** - When all required entries have been completed or changed and all information is correct, press ENTER. Where the ACTION field was completed with an A, and a record was added to this table, the message *L030 ALL LINES ADDED will be displayed in the message area of the screen. Where the ACTION field was completed with a C, and an existing record was changed, the
message *L031 ALL LINES CHANGED will be displayed in the message area of the screen. The display of one of these messages indicates the WRITE-OFF TABLE has been established. Approval and scheduling of the WROT screen are not necessary. Pressing ENTER and having one of the above messages displayed on the screen will establish this table in PARS. A cash receipt document will be mechanically generated to reduce the open accounts receivable balance by the amount displayed under the TOTAL BILL AMOUNT caption and transfer this amount to uncollectible.

2. **Errors Detected** - If any errors are detected, or any required entries are not complete, an error or warning message(s) will be displayed in the message area at the bottom of the screen. Refer to Appendix A of this chapter for a description of the problem and corrective action to be taken. Use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and complete the required entry as indicated. Continue to press ENTER and make corrections until one of the messages described in D1 is displayed in the message area of the screen. It is important that all errors are corrected and all required entries are completed on the WROT screen. PARS will not mechanically process a cash receipt document and transfer an amount to uncollectible as long as errors are present.

The following example shows a completed WRITE-OFF TABLE to which a record was added.

**SEE EXHIBIT 53**

The following example shows a completed WRITE-OFF TABLE where an existing record was changed.

**SEE EXHIBIT 54**

E. **Special Situation** - When transferring amounts to uncollectible, it is essential that the name of the individual responsible for the debt is contained on the PAYOR TABLE. If the PAYOR NAME field contains an asterisk, reclamation, estate development, or anything other than the payor name, it will be necessary to correct this field prior to creating a cash receipt document through WROT completion. Both a corrected PAYOR TABLE and a modified billing document are required.

1. **Correcting the PAYOR TABLE**
   - Sign on to the PAR System as described in RCM 9.10.50.
   - Type MTI, leave one space, then type the table code name PAYR.
• Press ENTER. A blank PAYOR TABLE screen will be displayed. The ACTION and TABLEID fields will contain the correct entries.

• Enter your PARS password and user identification code following the USERID caption on the action line of the screen. The cursor will advance to the PAYOR CODE field.

• Enter the PAYOR NUMBER for the record which requires correction in the PAYOR NUMBER field on the key line of the screen.

• Press Enter. The PAYOR TABLE for the PAYOR NUMBER you entered on the key line of the screen will be displayed.

• Type C for Change Record over the R in the ACTION field on the action line of the screen.

• Use the TAB key to move the cursor to the PAYOR NAME field. Type the correct name over the entry which is currently displayed in this field.

• Press ENTER. The following message will be displayed in the message area of the screen.

  • 01 - *L031 ALL LINES CHANGED

2. Creating a Modified Billing Document - Following correction of the PAYOR TABLE as described above, the billing document must be modified.

• When the message "01-*L031 ALL LINES CHANGED" is displayed on the corrected PAYOR TABLE screen, the cursor will be positioned in the ACTION field on the action line of the screen. Type E for Exit in the ACTION field. Press ENTER. The message "V2 ENTER NEXT TASK CODE:" will be displayed on the screen.

• Type DDB. Press ENTER. A blank STARTUP screen will be displayed.

• Complete the STARTUP screen as described in RCM 9.10.58. Enter the Document ID for the billing document which requires modification.

• Press ENTER. A blank BILLING DOCUMENT INPUT SCREEN for the billing document number entered on the STARTUP screen will be displayed.

• Type M for Modify in the ACTION field on the action line of the screen.

• Press ENTER.
• Perform QUICK EDIT as described in RCM 9.10.61.

• Hold the modified Billing Document for approval as described in RCM 9.10.62.

• Approve the modified Billing Document as described in RCM 9.10.63.

• Schedule the modified Billing Document as described in RCM 9.10.64.

After the modified Billing Document has been processed, the WRITE-OFF TABLE can be completed to create a cash receipt document to transfer amounts to uncollectible.

9.10.82 Completing the Installment Billing and Payment Table (INBT)

The Railroad Retirement Board primarily allows installment payment plans with individuals who are indebted to the RRB and who do not have continuing entitlement to an annuity. Occasionally, an annuitant in current pay status may request an installment payment plan rather than partial or full annuity withholding as the method of recovery for a debt. Completion of the INSTALLMENT BILLING AND PAYMENT TABLE in these situations provides for mechanical release of monthly installment billing notices. Establishment of this table is the responsibility of BFO-DRD.

A. Accessing the INBT Screen - To access the INSTALLMENT BILLING AND PAYMENT TABLE (INBT) screen, take the following actions:

• Sign on to the PAR System as described in RCM 9.10.50.

• Type MTI, leave one space, then type the table code name INBT.

• Press ENTER.

• A blank INSTALLMENT BILLING AND PAYMENT TABLE screen will appear.

SEE EXHIBIT 55

B. Completing the INBT Screen - Make the following entries below the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTION:</td>
<td>When you access the INBT screen, the cursor will be positioned in the ACTION field on the action line of the screen.</td>
</tr>
</tbody>
</table>
- The ACTION field will be prefilled with an S which means Scan Record.
- Type A for Add Record over the S.
- The cursor will advance to the TABLEID field.

**TABLEID:**
The TABLEID field will contain the correct table code name. Use the TAB key to advance to the next field.

**USERID:**
Enter your four-character PARS user identification code and your four-character PARS password. (Your password is not displayed on the screen.) The cursor will advance to the next field.

**PAYOR NUMBER:**
Enter the PAYOR NUMBER of the debtor for whom you are establishing this installment payment plan. The cursor will advance to the next field.

**BILLING DOC ID:**
Enter the Billing Document Identification Number that represents the overpayment that is being recovered through an installment payment plan. The cursor will advance to the next field.

**EFFECTIVE DATE:**
Completion of this field is optional. If there is nothing entered, the system will default to the current date. If this field is completed, it must be in month, day, year sequence; it must be a valid calendar date and must be a current or future date. Precede single digit month and day entries with zeros. If this item is completed, the cursor will advance to the INST AMT field, otherwise use the TAB key to advance the cursor.

**NOTE:** The only reason for completing this field when initially establishing this table would be if the installment billing notices are to be released on a future date.

**ORIGINAL INST DEBT:**
The system will display the original overpayment amount. The cursor will skip over this field.

**CURRENT BALANCE:**
The system will display the current outstanding amount. The cursor will skip over this field.

**INST AMT:**
Enter the amount the debtor has agreed to repay each month. You must use a decimal point and complete this entry to two decimal places. **DO NOT** enter a dollar sign.
<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>INT %:</td>
<td>The system will display the current interest percent. The cursor will skip over this field.</td>
</tr>
<tr>
<td>PEN %:</td>
<td>The system will display the current penalty percent. The cursor will skip over this field.</td>
</tr>
<tr>
<td>ADMIN COST:</td>
<td>The system will display the current administrative costs. The cursor will skip over this field.</td>
</tr>
<tr>
<td>ACT IND:</td>
<td>Make no entry in this field when initially completing this table. The system will default to a Y which means installment bills will automatically be generated. When the CURRENT BALANCE field reaches zero, this flag will change to an N, and installment bills will no longer be generated.</td>
</tr>
<tr>
<td>TEXT:</td>
<td>Type one of the following two position codes depending upon the text you want incorporated into the installment billing notice.</td>
</tr>
<tr>
<td></td>
<td>• TA Use when the overpayment is subject to interest and penalty.</td>
</tr>
<tr>
<td></td>
<td>• TC Use when interest and penalty charges do not apply to this overpayment.</td>
</tr>
</tbody>
</table>

The balance of this screen contains space for display of the history of installment billing notices released and monies received against each installment. An installment line is added mechanically to this portion of the screen each time an installment bill is released and each time a cash receipt is received and processed. The cash received is always used to offset the oldest installment bill. An example of a completed INSTALLMENT BILLING AND PAYMENT TABLE appears below.

SEE EXHIBIT 56

C. Exiting from the INBT Screen - After completing the last required entry on the INBT screen, review the information that you have entered to verify that these entries are correct. If you detect any errors, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information.

1. Establishing the INSTALLMENT BILLING AND PAYMENT TABLE - When all required entries have been completed and all information is correct, press ENTER. The message *L030 ALL LINES ADDED will be displayed in the message area of the screen indicating the INSTALLMENT BILLING
AND PAYMENT TABLE has been established. The ORIGINAL INST DEBT, CURRENT BALANCE, INT%, PEN%, ADMIN COST and ACT IND fields will be filled by the system. This table does not require approval or scheduling in order for it to be established.

2. **Errors Detected** - If any errors are detected, or any required entries are not complete, an error or warning message(s) will be displayed in the message area of the screen. Refer to Appendix A of this chapter for a description of the problem and corrective action to take. Use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and complete the required entry as indicated. Continue to press ENTER and make any required corrections until the message "L030 ALL LINES ADDED" is displayed in the message area of the screen. It is important that you correct all errors and complete all required entries on the INBT screen. Installment billing notices are not mechanically generated as long as errors are present.

The following example shows a completed INSTALLMENT BILLING AND PAYMENT TABLE.

**SEE EXHIBIT 57**

A copy of an installment billing notice generated from completion of the INSTALLMENT BILLING AND PAYMENT TABLE appears below.

**SEE EXHIBIT 58**

D. **Special Situations**

1. **Suspension of Release of Installment Billing Notice** - If for some reason the monthly installment billing notice should not be released, take the following actions.

   - Access the INBT screen as described in RCM 9.10.82A.
   - Enter your USERID on the action line of the screen.
   - Enter the PAYOR NUMBER and BILLING DOC ID for the installment billing notice to be suspended on the key line of the screen.
   - Press ENTER. The INBT for the PAYOR NUMBER and BILLING DOC ID entered above will be displayed.
   - Type C for Change over the R for Refill in the ACTION field on the action line of the screen.
   - Use the TAB key to position the cursor in the ACT IND field at the end of the first line in the data area of the screen.
• Type N for No over the Y currently appearing in this field.

• Press ENTER. The message "*L031 ALL LINES CHANGED" will be displayed in the message area of the screen.

When installment billing notices should again be released, the ACT IND must be changed to Y for yes.

2. Change in the Installment Billing Amount

a. Accounts Receivable Record is NOT Delinquent or in Default - In the event an individual who is making installment payments requests that the installment amount be increased or decreased, take the following actions.

• Access the INBT screen as described in RCM 9.10.82A.

• Enter your USERID on the action line of the screen.

• Enter the PAYOR NUMBER and BILLING DOC ID for the record that requires a change in the installment bill amount, on the key line of the screen.

• Press ENTER. The INBT for the PAYOR NUMBER and BILLING DOC ID entered above will be displayed.

• Type C for Change over the R for Refill in the ACTION field on the action line of the screen.

• Use the TAB key to position the cursor in the INST AMT field in the middle of the first line in the data area of the screen.

• Type the new installment bill amount over the figure currently appearing in this field. You must use a decimal point and complete this entry to two decimal places. DO NOT enter a dollar sign. Use the SPACE BAR to erase any portions of the previous amount that may remain after entry of the new installment bill amount.

• Press ENTER. The message "*L031 ALL LINES CHANGED" will be displayed in the message area of the screen.

b. Accounts Receivable Record Is Delinquent or in Default - In the event that an individual who was making installment payments and whose account is delinquent or in default requests a change in the monthly installment amount, take the following actions.

• Access the INBT screen as described in RCM 9.10.82A.
• Enter your USERID on the action line of the screen.

• Enter the PAYOR NUMBER and BILLING DOC ID for the record that requires a change in the installment bill amount, on the key line of the screen.

• Press ENTER. The INBT for the PAYOR NUMBER and BILLING DOC ID entered above will be displayed.

• Type C for Change over the R for Refill in the ACTION field on the action line of the screen.

• Use the TAB key to position the cursor in the EFFECTIVE DATE field on the key line of the screen. Enter the current date or the date the installment bill at the new amount should be released. Precede single digit months and days with zeros. This date can only be the current or a future date.

NOTE: If no notice of delinquent debt has been produced, (no DN shown on this ARCL record), the first installment bill (IB) for the changed amount will be dated approximately 30 days from the LAST BILL DATE displayed on the ARHT for this record. If a notice of delinquent debt has been produced (DN is displayed on this ARCL record), the first installment bill for the changed amount will be dated with the EFFECTIVE DATE entered in this field.

• Use the TAB key to position the cursor in the INST AMT field in the middle of the first line in the data area of the screen.

• Type the new installment bill amount over the figure currently appearing in this field. You must use a decimal point and complete this entry to two decimal places. DO NOT enter a dollar sign. Use the SPACE BAR to erase any portions of the previous amount that may remain after entry of the new installment bill amount.

• Change the ACT IND to Y for yes if an N for no is currently displayed in this field.

• Press ENTER. The message *L031 ALL LINES CHANGED will be displayed in the message area of the screen.

• A modified Billing Document may also be required to change the WAIVER FLAG if necessary.
9.10.83 Completing the Waiver of Recovery Table (WAIV)

All billing documents which result in the establishment of an open accounts receivable record also establish a record on the WAIVER OF RECOVERY TABLE. For those overpaid annuitants or former annuitants that exercise their due process rights, this table is completed by personnel in the Reconsideration Section, BFO-DRD, or perhaps the Bureau of Hearings and Appeals, depending on the type of request received. When completed, information on this table indicates the status of a particular case in the appeals process. Where the request is subsequently denied, completion of the WAIVER DECISION DATE field determines when interest and penalties will again begin to accrue if applicable.

A. Accessing the WAIV Screen – Access the WAIV screen as follows.

- Sign on to the PAR System in the usual manner.
- Enter “N” in the “ACTION” field, then enter the table code name “WAIV” in the “TABLEID” field.
- Press ENTER.
- A blank WAIVER OF RECOVERY TABLE screen will appear.

B. Securing the Document Requesting Waiver - Since the WAIV table contains the billing document numbers for all established accounts receivable records, scanning the entire WAIV table to arrive at a particular document is avoided by making the following entries on a blank WAIV screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTION:</td>
<td>When the WAIV screen is accessed, the cursor will be positioned in the ACTION field on the action line of the screen.</td>
</tr>
<tr>
<td></td>
<td>The ACTION field will be prefilled with an S, which signifies Scan Record.</td>
</tr>
<tr>
<td></td>
<td>Type G for Get Record over the S.</td>
</tr>
<tr>
<td></td>
<td>The cursor will advance to the TABLEID field.</td>
</tr>
</tbody>
</table>
TABLE: The TABLEID field will contain the correct table code name. Use the TAB key to advance to the next field.

USERID: Enter your four-character PARS user identification code and your four-character PARS password. (Your password is not displayed on the screen.) The cursor will advance to the next field.

BILLING DOC ID: Always enter B2 in the first two positions of this field. The cursor will advance to the remaining 11 positions of this field. Enter the 11-position billing document identification number for the accounts receivable record that has had a request for review, reconsideration, waiver, or appeal filed against it.

After completing the BILLING DOC ID field on line 01 in the data portion of the screen, press ENTER. THE BILLING DOC ID and PAYOR NUMBER for the accounts receivable record you requested is displayed on line 01.

C. Completing the WAIV Screen - Make the following entries next to or below the captions displayed on the screen. The cursor will place you in the first position of each of the data entry fields and will move through the screen in the following order.

<table>
<thead>
<tr>
<th>CAPTION</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTION:</td>
<td>When the WAIV table for the billing document requested in B above is displayed on the screen, the cursor will be positioned in the ACTION field on the action line of the screen.</td>
</tr>
<tr>
<td></td>
<td>• The ACTION field is prefilled with an R, which means Refill Record.</td>
</tr>
<tr>
<td></td>
<td>• Type C for Change Record over the R.</td>
</tr>
<tr>
<td></td>
<td>• The cursor will advance to the TABLEID field.</td>
</tr>
<tr>
<td>TABLEID:</td>
<td>The TABLEID field will contain the correct table code name. Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>USERID:</td>
<td>The USERID field will contain your PARS identification code and PARS password. (Your password is not displayed on the screen.) Use the TAB key to advance to the next field.</td>
</tr>
<tr>
<td>BILLING DOC ID:</td>
<td>The BILLING DOC ID field will contain the number of the accounts receivable record for which the annuitant has requested review, reconsideration, waiver, appeal, etc. Use the TAB key to advance to the WAIVER EXPIRATION field. Because the BILLING DOC ID field is a split field, it will be necessary to depress the TAB key twice to advance the cursor.</td>
</tr>
<tr>
<td>---------------</td>
<td>-------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>NOTE:</td>
<td>The cursor will skip over the PAYOR NUMBER field because it is also prefilled.</td>
</tr>
<tr>
<td>DELINQUENCY DATE:</td>
<td>If the BILL PRINT FLAG indicator entered on the BILLING DOCUMENT INPUT Screen was an S, this field will be prefilled with a date 30 days from the Document Date. When this field is prefilled, use the TAB key to advance to the WAIVER REQUEST field. If the BILL PRINT FLAG indicator entered on the BILLING DOCUMENT INPUT Screen was an N, this field will be blank. Calculate the delinquency date by adding 30 calendar days to the date of the overpayment notice and enter it in this field. The date must be completed in month, day, year sequence. Precede single digit month and day entries with a zero. This date can be a past or a future date. When completed, the cursor will advance to the next field.</td>
</tr>
<tr>
<td>WAIVER REQUEST:</td>
<td>For those annuitants that exercise their due process rights, enter a Y in this field. The cursor will advance to the next field. In those cases where the BILL PRINT FLAG indicator on the BILLING DOCUMENT INPUT screen was an S, and the annuitant does not exercise their due process rights, this field will default to an N after the date shown in the WAIVER EXPIRATION field has passed. NOTE: Entry of a Y in this field will remove both the dunning count and the last dunning date from the ACCOUNTS RECEIVABLE HEADER TABLE (ARHT). In those situations where a waiver or reconsideration request is legitimately received late and interest, administrative costs and penalty are applicable, the OUTSTANDING BILLING DOCUMENT TABLE (OBDT) must be modified to suspend the assessment of these charges while the decision is being made.</td>
</tr>
<tr>
<td>WAIVER DECISION DATE:</td>
<td>When an annuitant exercises their due process rights, make no entry in this field. Use the TAB key to advance to the next field. Only complete this field after a decision has been made on the annuitant's request.</td>
</tr>
<tr>
<td>----------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>

</tbody>
</table>

**STATUS CHANGE DATE:**

You do not need to make an entry in this field. After you complete the status code field and press enter, the status change date will automatically update with the current date.
D. Exiting from the WAIV Screen - After completing the STATUS CHANGE DATE field, review the information you have entered on the WAIV screen to verify that these entries are correct. If you detect any errors, use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and enter the correct information.

1. Establishing the WAIVER OF RECOVERY TABLE - When all required entries have been completed and all information is correct, press "ENTER." The message *L031 ALL LINES CHANGED will be displayed in the message area of the screen indicating the WAIVER OF RECOVERY TABLE has been established. Approval and scheduling of the WAIV screen are not necessary. Pressing ENTER and having the above message displayed on the screen will establish this table in PARS. Completion of this table will prevent interest, penalty and administrative costs from accruing and will prevent the release of further dunning notices until the due process rights request has been disposed of.

2. Errors Detected - If any errors are detected, or any required entries are not complete, an error or warning message(s) will be displayed in the message area at the bottom of the screen. Refer to Appendix A of this chapter for a description of the problem and corrective action to take. Use the TAB and ARROW keys to move the cursor to the incorrect field(s) or position(s) and complete the required entry as indicated. Continue to press ENTER and make any required corrections until the message *L031 ALL LINES CHANGED is displayed in the message area of the screen. It is important that you correct all errors and complete all required entries on the WAIV screen. Interest, penalty, and administrative cost will continue to accrue and be assessed and dunning notices will continue to be released in non-current entitlement cases as long as errors are present.

E. Actions to be Taken and Completion of the WAIV Table Following a Decision on a Due Process Request - Once a decision has been reached concerning a due process request from an overpaid annuitant, changes to and completion of the WAIV Table are determined by the type and disposition of the request.

1. Full Waiver - Where waiver of the overpayment was requested and is granted, no further entries are required on the WAIV Table. Complete a cash receipt document (CR) or a cash collection input table (CCIT) to close out the open accounts receivable record.

2. Waiver Denial or Partial Waiver Granted - Where waiver of the overpayment was requested and is denied or only partially granted, complete the WAIVER DENIAL NOTICE field on the WAIV Table.
• Sign on to the PAR System as described in RCM 9.10.50.

• Type MTI, leave one space, then type the table code name WAIV.

• Press ENTER. A blank WAIVER OF RECOVERY TABLE screen will be displayed.

• Type G for Get Record in the ACTION field on the action line of the screen. The TABLEID field will contain the correct entry.

• Enter your PARS password and user identification code following the USERID caption on the action line of the screen.

• Enter the billing document number for the accounts receivable record which has had waiver denied or only partially granted in the BILLING DOC ID field on line 01 in the data area of the screen.

• Press ENTER. The WAIVER OF RECOVERY TABLE for the accounts receivable record you requested will be displayed on the first line of the data area of the screen.

• Type C for Change Record over the R in the ACTION field on the action line of the screen.

• Use the TAB key to move the cursor to the WAIVER DECISION DATE field.

• Enter the month, day and year of the waiver or partial waiver denial notice. Precede single digit month or day entries with a zero. This date need not be current or in the future. Completion of this field will establish the collection due date 30 days after the date of the waiver denial notice. In non-current entitlement situations, dunning notices will be released and interest, penalty, and administrative cost will begin to accrue based on the completion of this field.

• Use the TAB key to move the cursor to the STATUS CHANGE DATE. Enter the actual month, day and year on which any change is made. Precede single digit month or day entries with a zero.

• Press ENTER. Display of the message *L031 ALL LINES CHANGED at the bottom of the screen indicates the system has accepted the change. In non-current entitlement situations, dunning notices will be released and interest, penalty and administrative cost will accrue and be assessed if payment in full is not received by the payment due date.
3. **Review of the Facts and Personal Conference** - Rarely will a review of the facts and/or a personal conference alone result in a determination that the entire amount of an overpayment is in error. Should that be the case, however, no further entries on the WAIV screen are required. Where a review of the facts results in a determination that the original decision and notification accurately described the overpayment, complete the WAIVER DENIAL NOTICE field on the WAIV table in the same manner as described for waiver denial in item 2 of this section. Where review of the facts reveals that the amount of the overpayment was incorrectly calculated, in addition to completing the WAIV table as above, the billing document must be modified to reflect the correct overpayment amount.

Enter a date in the WAIVER DENIAL NOTICE field enables the PAR system to establish a new collection due date which in turn drives release of dunning notices and the accrual and assessment of interest, administrative costs and penalty in those situations where it is applicable.

F. **Appeal of an Unfavorable Decision** - Should an unfavorable decision be appealed to the Bureau of Hearings and Appeals (BHA), take the following actions. Also, take these actions if an unfavorable decision rendered by BHA is appealed to the Board, or ultimately the court.

- Sign on to the PAR system as described in RCM 9.10.50.
- Type MTI, leave one space, then type the table code name WAIV.
- Press ENTER. A blank WAIVER OF RECOVERY TABLE screen will be displayed.
- Type G for Get Record in the ACTION field on the action line of the screen. The TABLEID field will contain the correct entry.
- Enter your PARS password and user identification code following the USERID caption on the action line of the screen.
- Enter the billing document number for the accounts receivable record where an unfavorable review of the facts or waiver decision is now being appealed in the BILLING DOC ID field on line 01 in the data area of the screen.
- Press ENTER. The WAIVER OF RECOVERY TABLE for the accounts receivable record you requested will be displayed on the first line of the data area of the screen.
• Type C for Change Record over the R in the ACTION field on the action line of the screen.

• Use the TAB key to move the cursor to the WAIVER DENIAL NOTICE field. With the SPACE BAR, erase the date currently appearing in this field. The cursor will advance to the STAT field.

• Enter the two-position waiver status code which best describes the appeal request. The cursor will advance to the STATUS CHANGE DATE field.

• Press ENTER. Display of the message *L031 ALL LINES CHANGED at the bottom of the screen indicates the system has accepted the change. Removal of the date from the WAIVER DENIAL NOTICE field will prevent dunning notices from being released, and will prevent interest, penalty and administrative costs from accruing and being assessed while the request is under consideration.

• If a favorable decision is rendered by BHA, the Board, or the court, no further changes on the WAIVER OF RECOVERY TABLE are required. Process a cash receipt document (CR) on a cash collection input table (CCIT) to close out the accounts receivable record.

• If an unfavorable decision is rendered by BHA, the Board, or the court, the date of the notice advising the annuitant of the unfavorable decision must be entered in the WAIVER DENIAL NOTICE field. Completion of this field and processing of this change will establish a new collection due date which in turn will generate dunning notices and the accrual and assessment of interest, penalty and administrative costs were applicable.

9.10.100 Changing PARS Data

This section of RCM 9.10 deals with how to change data you are entering or that has already been established in the PAR system. This section contains information on:

• How to a change a document;

• What data is or is not changeable; and

• What data entries must be made for the method of change selected.

The following terms are used to describe the various kinds of changes you can make to documents. The terms are linked to the stage of processing a document is in.

1. Correction/Change - You can add, delete or replace incorrect data with correct data in unprocessed documents by making CORRECTIONS/CHANGES. (See RCM 9.10.101, and RCM 9.10.110 - 9.10.130)
2. **Cancelling Out of a Document** - You can remove a document from the PAR system and return to the STARTUP screen by CANCELLING OUT of the DOCUMENT. (See RCM 9.10.102).

3. **Delete** - You can remove a document from the PAR system after the document has been entered in the PAR system but before it has been processed by DELETING the document. (See RCM 9.10.122).

4. **Modify** - You can change some data in the PAR system that was established from a successfully processed document by MODIFYING the original BILLING DOCUMENT or CASH RECEIPT DOCUMENT.

   (See RCM 9.10.131 through 9.10.140).

5. **Cancel** - You can purge almost all traces of a successfully processed document from the PAR system by CANCELLING the document. (See RCM 9.10.141).

Remember if you need to correct something in the PAR system be prompt and accurate. Delays and errors affect more than the information displayed on your terminal. Delaying correction of errors, or inaccurately correcting documents can cause:

- the dates given on manually released overpayment notices to be inaccurate,
- interest, penalty and administrative costs to be charged incorrectly,
- dunning letters to be released incorrectly and with erroneous information,
- additional work to correct errors and handle subsequent complaints,
- delays in collecting the overpayment.

In general, the principles on how make to changes, what changes to make and how to navigate through the system apply to any kind of document. If no difference is specified assume that procedure applies to both billing and cash receipt documents.

**9.10.101 Changing Entries Before The Document Screen Is Entered Into The PAR System**

Anytime you enter information on a document screen for the first time, you should review it carefully before pressing the ENTER key. If you notice an entry error, use the TAB and ARROW keys to move the cursor to the appropriate position(s) and make the necessary correction(s).

1. type in the entry you wish to make if the field or position is blank,

2. type over an erroneous entry with the correct entry, and/or
3. use the space bar to remove any entries from any fields or positions that should be blank.

Once you press the ENTER key you have officially created part of a document.

**9.10.102 Cancelling Out Of The Document Before The Screen Is Entered Into The PAR System**

You can CANCEL OUT of a document transaction you have just begun to enter if:

- the DOCUMENT INPUT screen is displayed on your terminal,
- a D is displayed in the MODE field of the document action line, and
- you have never pressed the ENTER key since entering the DOCUMENT INPUT screen.

When you are creating the document, once you access the line screen it is too late to CANCEL OUT.

Situations in which you would want to CANCEL OUT of a document are:

1. You notice in review that the DOCUMENT ID displayed on the DOCUMENT ACTION LINE is incorrect and you need to go back to the STARTUP SCREEN to correct it, or

2. You start entering a document and discover you don't have time to complete it and don't wish to leave a partially completed DOCUMENT INPUT SCREEN in the SUSPENSE FILE.

### A. To CANCEL OUT of a document take the following steps:

- Position the cursor in the ACTION field on the document action line of the BILLING DOCUMENT INPUT SCREEN.
- Type X in the action field to CANCEL OUT of the document.
- Press the ENTER key.

### B. Results of CANCELLING OUT of a document:

The PAR system returns to the screen viewed immediately before the DOCUMENT INPUT SCREEN was entered.

- The STARTUP screen will be displayed
• The MODE, DOCUMENT ID and USER ID fields will display the data they contained prior to your entering the DOCUMENT INPUT screen that you just CANCELLED OUT of.

You can now either correct your DOCUMENT ID and enter a fresh DOCUMENT INPUT screen, or exit the PAR system.

9.10.103 Using Quick Edit

System edits are mechanical checks on field entries made when processing, to prevent transactions containing bad data from entering the system. The PAR system has the capability of running a document against processing edits on request. This function is called QUICK EDIT.

For instructions on how to use the QUICK EDIT function please refer to RCM 9.10.61 for a billing document or 9.10.75 for a cash receipt document.

9.10.104 PAR System Document Edits

The following is a general list of PAR system edits. It is important to remember that there are limits to what this system can validate both because of its generic design (to be used by all government agencies) and because it is not possible for the system to determine the accuracy of some entries.

• It checks if a billing document or cash receipt document has been previously established with the same DOCUMENT ID. PARS will not allow two documents in the system at the same time with the same ID.

• If you are modifying or cancelling a document, it checks if that document exists in the system.

• It checks that any date entered is valid in the PARS DATE table.

• It checks that all money fields are completed using a decimal point followed by two positions, and with numeric characters only (no dollar signs, cent signs or commas can be entered).

• It verifies that the total amount of a document equals the total line activity of the document.

• It checks that these fields are valid in the CAUS, TYOP, SRCE and ACOT tables:
  • CAUSE CODE
  • TYPE OF OVERPAYMENT CODE
  • SOURCE CODE
• ACTION OUT CODE

It cannot validate that the correct code is being used. On a billing document CAUSE, TYPE and SOURCE are required entries. On a cash receipt document ACTION OUT is a required entry.

• It checks that entries made in action flag fields are valid manual entries for the field in question. If these fields are left blank your document will pass system edits because the system will supply default entries for these fields.

9.10.105 Edit Messages

The brief literal portion of the error message is sometimes self-explanatory and no further research is needed to determine the necessary correction. Sometimes the messages are not clear. If you cannot determine what the message means refer to Appendix A of RCM 9.10 for further clarification of what the problem is and how to resolve it.

If the code is not listed in this appendix and you can't determine from the explanation in the edit message what is causing the error:

• Review your document fields for missing, bad or extraneous entries

• If you can't determine what is causing the edit message:
  • Print the screen display by pressing the PRINT key, and
  • Deliver the printout and brief explanation to your section supervisor for review
  • If your section supervisor is not able to determine the problem he/she should contact the PAR system specialist in the Division of Adjudicative Services (in BRB and BSB the supervisor should make this contact through their respective bureau's PAR system specialist).

9.10.110 Making Changes to Docs. Stored in SUSF File

After a document has been entered into the PAR system, but before it has been successfully processed it is stored on the suspense file (SUSF).

The following are guides to correcting and changing documents that reside in the SUSF:

1. Once the DOCUMENT INPUT screen is entered into the suspense file it cannot be accessed while a DOCUMENT LINE screen is in data entry mode (i.e., a D is displayed in the MODE field on the document action line)

2. When the whole document is entered into the suspense file:
A. The size of the document (how many document lines are attached to it) is set. Special instructions must be followed in order to add document lines (See RCM 9.10.117) or to remove document lines (See RCM 9.10.119). The whole document becomes part of the suspense file for the first time when it is sent to the suspense file for storage with a hold command or when it is run against system edits for the first time (QUICK EDIT).

B. The document can no longer be CANCELLED OUT. A DELETE command must be used that requires batch processing at the end of the day. (See RCM 9.10.130).

C. In order to correct or change a document in the SUSF, you must be in the CORRECTION mode (i.e., a C must be displayed in the MODE field on the document action line)

The document will be in the correction mode

• after quick edit is used, or

• when accessed through the SUSF when the document is in a HELD status.

• after C is entered in the MODE field.

If there is an approval on the document or the status displayed is SCHED when you access it through SUSF you will need to remove the approval and change the mode from SCAN to CORRECTION before any changes can be made to the document (See RCM 9.10.113 and 9.10.115).

D. Most changes can be made to a document in correction mode by typing the information in blank fields, typing over previous erroneous entries in fields and/or using the space bar to erase unwanted entries in fields (as described in 9.10.101) except for the following:

• adding and deleting document lines (See RCM 9.10.117, and 9.10.119),

• changing a DOCUMENT ID NUMBER (See RCM 9.10.124 and 9.10.125),

• changing information in the NAME and ADDRESS fields on a billing document (See RCM 9.10.120),

• changing the PAYOR NUMBER on the billing document when the PAYR record must also be changed (See RCM 9.10.128-130).
9.10.111 When To Change Or Delete A Document

You will know you need to make changes to or delete a document on SUSF if:

- edit messages other than the standard messages advising that the "document needs approval" appear when you submit your document to QUICK EDIT, (remember to check the document line screen),

- you notice data entry and/or adjudicative errors when you review the document screens, case file, and/or Form T-200 before submitting the document for approval and scheduling (when you are entering data in the PAR system);

- you notice data entry or adjudicative errors when you review the document screens, case file and/or T-200 when you are approving and scheduling a document for processing; or

- the situation changes before a document is processed, such as:
  - a change of address,
  - a change in entitlement status, or
  - checks or EFT payments are returned changing the overpayment amount.

You can ensure that you will uncover any problems that need correction and your transaction will not reject from processing if you verify that:

1. All required fields are completed.

2. Entries are complete and accurately represent folder and/or payment information.

3. Data entered in a field is entered in the correct position within that field. (Always use a tab key to position the cursor at the beginning of a field.)

4. All dollar amount entries are in the proper format.
   - No dollar or cent signs are used.
   - No commas are used.
   - A decimal point is always used after the dollar amount.
   - Two positions after the decimal point are always completed.
   - Except for the decimal point, positions in money fields must be completed only with numbers.
5. The PAYOR NUMBER is correct. This is one of the primary means of identifying and locating an overpayment in the PAR system.

6. Any field that should not have an entry has no data entered. This not only prevents bad data in the field, it allows the system to supply correct entries if the field is completed by inference or default.

7. An alpha entry is not used when a numeric entry is required and vice versa. This confusion most commonly happens with the alpha character O and the numeric 0 (zero).

After making any corrections to a document always QUICK EDIT the document to verify that the correction is successful. Edit messages at the bottom of the screen will not change until the document is re-edited. Do not just press the ENTER key. If you simply press the ENTER key, the system will display an erroneous message that no errors exist.

**9.10.113 Removing An Approval**

You cannot make a change to a document transaction with an approval on it. You can tell that a document transaction has an approval by scanning the SUSF (see B and C of this section), or if you are viewing the document directly you can tell it has been approved by the display of the following edit messages at the bottom of the DOCUMENT INPUT screen:

- A--*CY41 - APPROVED DOCUMENT

To remove an approval, you must first access the document on the SUSF screen.

A. **Accessing the SUSF Screen** - To access the SUSF take the following actions:

- Sign on to the PAR system as described in 9.10.50.

- Type MTI, leave one space, then type the table code name SUSF.

- Press the ENTER key.

- A blank SUSF screen will appear.

B. **Scanning SUSF to Locate a Particular Record** - To locate your record take the following actions:

- After completing the steps in A your cursor will be in the document ACTION field. An S will already be displayed.

- Move the cursor with your TAB key to the USER ID field and type in your USER ID.
The cursor will now have moved to the first blank line on the SUSF screen. Using the TAB key move the cursor to the DOCUMENT ID TRAN field (TRANSACTION CODE). Type in B2 if you are looking for a billing document, C2 if you are looking for a cash receipt document.

Using the TAB key, move the cursor to the ORGI (ORGANIZATION) field and type in 2000 (ORSP).

The cursor is now positioned in the NUMBER field. Type in the ID NUMBER of the document for which you are looking.

Press the ENTER key.

The SUSF screen will appear with 15 records displayed. The document you requested will be the first line displayed.

C. Determining if there is an Approval on the Document that Must be Corrected - Look at the fourth column from the left labeled APPRV (APPROVAL).

Although there are five positions in this field, the PAR system uses only one level of approval, which is indicated in the first position in the field.

- If the first position displays a zero, no approval was ever placed on the document transaction.

- If the first position displays a 'Y', there is an approval on the document transaction.

- If there is an 'N' there was an approval, but it has been removed.

D. Removing the Approval - To access the document transaction and remove the approval:

- Move the cursor to the ACTION field on the SUSF screen. Type in S.

- Using the line TAB key, move the cursor back to the line of the SUSF screen containing the DOCUMENT ID of the document you want to correct.

- Press the ENTER key.

- You are now viewing the DOCUMENT INPUT screen of the document in question. The cursor is in the ACTION field of the document action line.

- Type A in that field.

- Using the line TAB key move the cursor to the APPROVAL field on the document action line. Type N in that field.
• Press the ENTER key.

• The following message will now be displayed at the bottom of the DOCUMENT INPUT screen.

  • A--*S051 - APPROVAL 1 REMOVED.

You are now ready for the next step to correct your document, changing from SCAN mode to CORRECTION mode.

9.10.115 Changing From Scan Mode To Correction Mode On Screen

If you enter a DOCUMENT INPUT SCREEN from the SUSF and it has an approval on it, the document will be in SCAN mode when you enter it. After removing the approval, as described in 9.10.113, you will have to change the mode from SCAN (S displayed in the MODE field) to CORRECTION (C displayed in the MODE field).

To accomplish this mode change:

• Type F in the ACTION field.

• Using the field TAB key move the cursor to the MODE field.

• Type C over the S displayed in the field (only the C is visible in this field when your action is complete).

• Press the ENTER key.

• The ACTION field on the document action line is once again blank, but C is now displayed in the MODE field. The following edit messages will be displayed at the bottom of the DOCUMENT INPUT screen:

  • H--*S401 - READY FOR APPROVAL 1

  • H--*F053 - DOCUMENT NOT APPROVED

Your document transaction is now ready for correction.

9.10.116 Moving Through Documents Screens While In Correction Mode

Once you are in correction mode the system will allow you to:

• Move through all the screens in your document transaction in sequence,

• Return to the DOCUMENT INPUT screen from the document line
• Pause and leave your document to check a reference table (PAYR, PDIT, CAUS etc.) and return directly to the document screen on which you were working.

The ability to move through your document and back to your DOCUMENT INPUT screen is helpful whether you are creating a document or modifying it. They are not usable when cancelling a document, because only the DOCUMENT INPUT screen is involved in a cancelling transaction.

A. To Move Through Document Screens in Sequence - take the following steps:

• Position the cursor in the ACTION field on the document action line.

• Type NS in the ACTION field.

• Press the ENTER key.

The first document line screen stored in the system for the document you are viewing will appear.

• If you entered the command on the DOCUMENT INPUT screen and your document transaction included lines for a regular railroad annuity overpayment and a supplemental annuity overpayment, you will be looking at a DOCUMENT LINE screen displaying lines 001 and 002.

• If you entered the command on the DOCUMENT INPUT screen and no DOCUMENT LINE screens exist, or if you entered the command on a DOCUMENT LINE screen and no further lines exist for that document the following message will be displayed at the bottom of your screen:

  • A--*CR19-END OF DOCUMENT

• If you entered the command on your first DOCUMENT LINE screen, and you had accidentally entered your document lines twice, you will be viewing the next line screen in sequence containing those duplicate lines. If, after you press enter and the command action is completed, you do not see the message:

  • A--*CR19-END OF DOCUMENT

you know you are looking at a new portion of your document.

If you press the ENTER key without entering any command in the ACTION field, you will also see the next screen displayed. However, heavy or inconsistent pressure could result in bypassing a screen without being aware of it. Using the NS command guarantees that you are looking at the next screen in sequence, which is especially important when you are correcting errors.

The NS command will also work in the scan mode.
B. **To Return to a DOCUMENT INPUT Screen from any DOCUMENT LINE Screen in the Same Document Transaction** - take the following steps:

- Position the cursor in the ACTION field of the document action line.
- Type NLO (the third position of the command is numeric, zero) in the ACTION field.
- Press the ENTER key.

The DOCUMENT INPUT screen will now be displayed on your terminal.

This command will also work in the scan mode.

C. **To Temporarily Exit from your Document to Check Table Information (PAUSE)** - take the following steps:

- Position the cursor in the ACTION field of the document action line.
- Type P (PAUSE) in the ACTION field
- Press the ENTER key.
- If you entered the document from the SUSF, the SUSF screen you entered the document from will be displayed. Type E in the ACTION field and press the ENTER key to have the message described in the next step displayed. If you entered from the STARTUP screen the message in the next step will be displayed.
- The message "V2, ENTER NEXT TASK CODE:" will now be displayed on the screen.
- Type MTI, leave one space, then type the four position acronym for the table you want to access (PAYR, PDIT, ACOT, SRCE, CAUS, ARCL etc.)
- Press the ENTER key.
- A blank screen for the table you requested will be displayed. Follow standard instructions for whatever table actions you need to take. You may access other tables if you need to as long as you don't exit the PAR system.
- When you have completed all your table actions, position the cursor in the ACTION field of the table action line. Type E in the ACTION field (exit tables).
- Press the ENTER key.
• The message "V2, ENTER NEXT TASK CODE" will be displayed.

• Type DDB.

• Press the ENTER key.

• The document screen you were viewing before you entered the PAUSE (P) command will again be displayed. The cursor will be positioned in the ACTION field of the document action line. The mode will be the same as when you left the document. This is the only command that will allow you to exit a document and reenter it in data entry mode (D displayed in the MODE field of the document action line).

This last command is very helpful if, due to error messages or indecision, you need to reference a table in the middle of completing or correcting a document.

9.10.117 Adding A Line Or Multiple Lines To A Document In SUSF Correction (IL or ILN Command)

A. If you need to add one or more lines to your document, and your document does not currently have any document lines (for example, you had to store your document in SUSF before you had time to enter your document line or you prematurely used QUICK EDIT while still viewing the DOCUMENT INPUT screen in data entry mode) take the following actions:

• Position the cursor in the ACTION field on the document action line of the DOCUMENT INPUT SCREEN.

• Type IL in the ACTION field.

• If you wish to add more than one line, insert the number of lines to be inserted in the 3rd position of the field (IL2, IL3, etc).

• Move the cursor to the position in the line beneath the last line displayed on the DOCUMENT INPUT screen.

• Press the ENTER key.

• A blank DOCUMENT LINE screen will be displayed. The following message will be shown at the bottom of the screen:

"A--*CU13 - CONTINUING SAME DOCUMENT".

• Complete all required entries for the new line following standard instructions in RCM 9.10.60. QUICK EDIT and HOLD in SUSF for approval and scheduling if there are no further errors.
B. If you need to add a line or multiple lines to your document, and your document already has one line:

- Position the cursor in the ACTION field on the document line screen.
- Type IL in the ACTION field.
  - If you wish to add more than one line, type the number of the lines to be inserted in the 3rd position of the field (IL2, IL3, etc.).
- Move the cursor to underscore the final position of the last field name of the document line (the ACTION OUT field) which you want the new line to follow.
- Press the ENTER key.
  - A new DOCUMENT LINE screen with two blank document lines will appear with the message "A--*CU13 - CONTINUING SAME DOCUMENT" displayed at the bottom. (You have not lost the line you previously entered, nor will there be a blank line stored with your document. After you have entered your new document line, QUICK EDITED your document and viewed your document, you will see that the new line has been correctly inserted immediately after the existing line.)
  - Complete all required entries for the new line following standard instructions in RCM 9.10.60. QUICK EDIT and HOLD in SUSF for approval and scheduling if there are no further errors.

9.10.119 Deleting A Line Or Multiple Lines From A Document In SUSF (DL Or DLN Command)

If you need to delete a DOCUMENT LINE(S) from your document (example: you became distracted during document entry, accidentally pressed the ENTER key, then entered the same line a second time; you erroneously attributed part of your overpayment to supplemental annuity when it was all regular railroad annuity that was overpaid) take the following actions:

- Position the cursor in the ACTION field on the document action line of the screen containing the DOCUMENT LINE you want to delete.
- Press and hold down an alternate shift key (Alt).
- Press the cursor home key.
- Release the alternate shift key (Alt).
- Type DL in the ACTION field. If you are deleting 2 lines, enter DL2, etc.
• Using the line TAB key move the cursor to the first line of the DOCUMENT LINE you want to delete. The cursor will now be in the first position of the LINE NUMBER field.

• Press the space bar three times, erasing the LINE NUMBER entry.

• Press the ENTER key. The line is now deleted.

• The DOCUMENT INPUT screen will now be displayed.

• Type Q in the ACTION field of the document action line.

• Press the ENTER key.

• Scan your document screens to validate that the line is deleted and no further errors exist.

• Handle according to standard procedure regarding scheduling and approval.

9.10.120 Changing Name and Address Fields

Changes to the name and address fields on the billing document (e.g. data entry error detected or change of name or address received before the document is processed) cannot be accomplished by simply typing over what is displayed in these fields on the DOCUMENT INPUT screen. This is because the information is

• Created in PAYR and PDIT table records, and

• stored in PDIT for mailing purposes (The PDIT screen is the only location in the system for entering a second name line for a mailing address).

The correction must then be "pulled through" to your document to:

• Make the information in the system consistent, and

• Make the information available to interactive uncollectible file should the receivable be written off to the uncollectible file.

To Summarize the Basic Steps for Document Name and Address Correction:

• If your action started with viewing the document to be corrected, leave the DOCUMENT INPUT screen using a P (PAUSE) command

• Correct the NAME and ADDRESS fields on the PAYR record using a C (CHANGE) command,

• Move to the PDIT record using the L (LEAF) command,
• Validate new entries displayed on PDIT and if necessary correct the second NAME Line on PDIT with a C (CHANGE) command,

• Return to the DOCUMENT INPUT screen, and

• QUICK EDIT to pull the information to your BILLING DOCUMENT.

See below for step by step instructions:

To change the name and address fields take the following actions.

PAYR SCREEN

• Access the PAYR table.
  
  • If you are not in the PAR system follow standard instructions in RCM 9.10.50 until you see the message "V2, ENTER NEXT TASK CODE" displayed.

  • If you are viewing the DOCUMENT INPUT screen with the name and/or address fields that need to be corrected, type P in the ACTION field of the document action line (PAUSE command) and press the ENTER key. You will see the message "V2, ENTER NEXT TASK CODE".

• Type MTI, leave one space, then type the table code name PAYR.

• Press the ENTER key. A blank PAYR screen will appear. An "S" will be displayed in the ACTION field and PAYR in the TABLEID field of the table action line.

• Use the field TAB key to advance the cursor to the USERID field.

• Type your eight position USERID (four positions displayed, four positions encripted in the USERID field).

• The cursor will advance to the PAYOR NUMBER field. Type in the PAYOR NUMBER of the record you need to change.

• Press the ENTER key. The record you need to change will now be displayed.

• The cursor is now positioned in the ACTION field of the table action line. Type C over the R displayed.

• Using the line and field TAB keys move the cursor to the address field(s) that need to be changed. Type the correct entries in the appropriate fields according to the directions in RCM 9.10.56. If the change that you are making is due to the establishment of a representative payee, remember it is the representative payee’s name that is entered in the name field on the PAYR record.
• Press the ENTER key. The message "01-*LO31 ALL LINES CHANGED" will be displayed at the bottom of the screen when the change is complete.

• The cursor is positioned in the ACTION field of the table action line. Type L over the C displayed (LEAF command).

• The cursor is now positioned in the TABLEID field. Type in PDIT.

• Press the ENTER key. The PDIT record for your receivable will now be displayed (if there are multiple overpayments for the same PAYOR number, press the enter key until the one with the correct BILLING DOC ID is displayed).

**PDIT SCREEN**

• The cursor is now positioned in the ACTION field of the table action line.

  • If there are no changes to be made on the second name line of the address (PAYOR’S NAME preceded by ‘for’ if the representative payee’s name was entered on the PAYR record, or erasing the entry in the second line if a representative payee is being removed) scan the name and address to validate that the changes entered on the PAYR record are correctly displayed.

  • If a change is needed on the second PAYOR NAME line, type C in the ACTION field. Use the line TAB key to move the cursor to the second PAYOR NAME line, type in the appropriate date if the second name line is needed for the address or use the space bar to erase the data displayed on this line if it is no longer needed. Press the ENTER key. When the charge has been made the message "01-*LO31 ALL LINES CHANGED will be displayed at the bottom of the screen.

• Type E in the ACTION field of the table action line (to exit the tables portion of the PAR system).

• Press the ENTER key.

• The message "V2 ENTER NEXT TASK CODE" will appear on the screen. Type DDB.

• Press the ENTER key.

  • If this process started with a departure from the DOCUMENT INPUT screen using a P (PAUSE) command, you will now be viewing the DOCUMENT INPUT screen again.

  • If you did not use the P (PAUSE) command to start this process you will be viewing the STARTUP screen.

    • Type C in the MODE field.
The cursor is now positioned in the TRANSACTION CODE field of the DOCUMENT ID line. Type B2 in this field. Type 2000 in the DIVISION field and the billing document ID NUMBER of the document being corrected in that field.

Move the cursor using the line TAB key to the USERID field and type your USERID.

Press the ENTER key. You will now be viewing the DOCUMENT INPUT screen.

BILLING DOCUMENT INPUT SCREEN

Using the line TAB key move the cursor to the PAYOR NAME and ADDRESS lines. Using the space bar erase the data displayed in these lines.

Return the cursor to the ACTION field of the document action line. Type Q in that field (QUICK EDIT).

Press the ENTER key. The PAR system will pull through the new data from the PAYR and PDIT records, and it will now be displayed on the DOCUMENT INPUT screen.

If there are no further corrections necessary the document is ready for approval and scheduling.

9.10.121 Changing The Fund Field Of Unapplied Cash Lines On Unprocessed Mechanically Generated Cash Receipt Documents

The correct entry in the FUND field on an unapplied cash line is 8011. Currently, when the line is created from cash collection input table (CCIT) processing the fund displayed is *PAR. This problem will require a substantial change in contractor software. Until that software collection is made, when you are reviewing such a cash receipt document, you must change the entry in this FUND field of the unapplied cash line from *PAR to 8011.

Take the following steps after you have determined an unapplied cash line exists (the code UA appears in the TRANS TYPE (TRANSACTION TYPE) field in the last line of the CASH RECEIPT DOCUMENT:

- Move the cursor to the FUND field using a TAB key.

- Type 8011 in that field over the *PAR entry displayed.

- If there are no other problems with the CASH RECEIPT DOCUMENT, follow standard directions in RCM 9.10.77 for approval and scheduling.
NOTE: Unapplied cash lines (using the UA TRANSACTION TYPE) should only occur when a recovery is being posted that would require a cash collection (CC) transaction type. Since all check and money order recoveries should be entered into the PAR system through lockbox processing, you will most often see this kind of activity from posting reclamation money when a combined benefit payment is involved.

### 9.10.122 Deleting An Unprocessed Document Transaction From The Suspense File Or Start-Up Screen

You would want to DELETE a document if:

- In a BILLING DOCUMENT, the BILLING DOCUMENT ID (especially the TRANS CODE and UNIT ID positions) is incorrect.
- In a BILLING DOCUMENT, authorization discovers the overpayment doesn't exist.
- In a BILLING DOCUMENT, the overpayment was caused by an outstanding payment and the payment is returned before the document is processed.
- In a CASH RECEIPT DOCUMENT, authorization determines that the liquidation action is incorrect.
- Something has occurred subsequent to its entry causing it to no longer be necessary.

#### A. To DELETE an unprocessed document transaction through the PAR system SUSPENSE FILE:

- Access the SUSF screen following directions in RCM 9.10.50.
- Access the record you wish to delete following directions in RCM 9.10.63 (B and C) if you want to delete a billing document, or RCM 9.10.77 (B and C) if you want to delete a cash receipt document.
- Type S in the ACTION field of the table action line.
- Move the cursor to the first position of the first record on the SUSF screen using the tab key.

NOTE: Before moving to the DOCUMENT INPUT SCREEN look at the status and approval fields for the document you are going to delete.

If STATUS is HELD and the first position of the APPRV (approval) field is O or N, you can take your action to DELETE as soon as you enter the DOCUMENT INPUT SCREEN.
If the STATUS is HELD but the first position of the APPRV field is Y you will have to remove the approval before you can DELETE the document.

If the STATUS is SCHED (scheduled) and the first position of the APPRV field is N or O you will have to change the mode from SCAN (S) to correction (C) after you enter the DOCUMENT INPUT SCREEN.

If the STATUS is SCHED and the first position of the APPRV field is Y you will have to first remove the approval and then change the mode from scan to correction.

- Press the ENTER key. You are now viewing the DATA INPUT SCREEN of the document you wish to DELETE.

- Remove the approval from the document if one exists. If this is not necessary move on to the next step. To remove an approval:
  - Type A in the ACTION field of the document action line.
  - Move the cursor to the APPRVL field of the document action line using the line tab key. Type N in that field.
  - Press the ENTER key.

- Change the mode to C if an S appears in the MODE field on the document action line. If this is not necessary move on to the next step. To change to correction mode:
  - Type F in the ACTION field of the document action line.
  - Use the tab key to move the cursor to the MODE field of the document action line. Type C in that field.
  - Press the ENTER key. The MODE field will now display C. You are in correction mode.

- Type DD in the ACTION field of the document action line.

  - Move the cursor to the DOCID field of the document action line using a tab key. Erase the TRANSACTION CODE (B2 or C2) by pressing the space bar.

  - Press the ENTER key. No approval or scheduling is needed since you are only removing a document transaction from the suspense file and not adding or changing information in PARS.

You will now be viewing the same SUSF screen you left to enter the DOCUMENT INPUT screen. The information displayed is the same as when you entered the DOCUMENT INPUT screen. If you clear the screen by typing N in
the ACTION field of the document action line, press the ENTER key, and then reaccess your document transaction record on SUSF you will see DELETE displayed in the STATUS field for that document on the SUSF screen. You will no longer be able to access that document as it has been deleted from PARS. After production is completed that night the record will be removed from the SUSF screen.

B. DELETING a document from the START-UP screen when there is no approval on it.

- Signon to the PAR system as described in RCM 9.10.50.
- Type DDB on the screen when it displays the message "V2, ENTER NEXT TASK CODE".
- Press the ENTER key. You will now be viewing the START-UP screen.
- Type P in the MODE OF OPERATION field.
- On the DOCUMENT ID line of the START-UP screen type:
  - B2 in the TRAN field if you are DELETING a billing document transaction or C2 if you are DELETING a cash receipt document transaction.
  - 2000 in the DIVISION field, and
  - the DOCUMENT ID NUMBER of the document transaction you are DELETING in the ID NUMBER field.
- Move the cursor to the USER ID field using a tab key and type your USER ID.
- Move the cursor to the SCHEDULING ACTION field using a tab key. Type DD.
- Press the ENTER key.
  - If the document was in HELD or SCHED status in the SUSPENSE FILE with no approval the document is now deleted. The message "A--*CQ8L-DOCUMENT DELETED" will be displayed at the bottom of the START-UP screen.
  - If the document had an approval on it, whether in HELD or SCHED status, the document has not been DELETED. The messages:
    "A--*CY41-APPROVED DOCUMENT" and
    "A--*CY81-APPROVED-ACTION INVALID"
will be displayed at the bottom of the START-UP screen.

- If you successfully DELETED your document, press the CLEAR key to exit the DOCUMENT DATA BASE (DDB), or proceed to make entries for your next document transaction. If you could not DELETE the document because it had an approval on it proceed to C of this section.

C. DELETING a document accessed through the START-UP screen, when there is an APPROVAL on it.

- After taking the steps in B. of this section and determining that the document you wish to DELETE has an approval, type S in the MODE OF OPERATION field on the START-UP screen.

- Press the ENTER key (the other necessary fields, DOCUMENT TRANSCODE, DIVISION, DOCUMENT ID and USER ID, will still be displayed from your first attempt to DELETE).

- You will now be viewing the DOCUMENT INPUT screen for the document transaction you wish to delete. Type A in the ACTION field of the document action line.

- Move the cursor to the APPRVL field of the document action line using the line tab key. Type N.

- Press the ENTER key. The message:
  "A--*5051 APPROVAL 1 REMOVED"

  will be displayed at the bottom of the DOCUMENT INPUT screen.

- Type F in the ACTION field of the document action line.

- Move the cursor to the MODE field of the document action line using tab key, and type C.

- Press the ENTER key. The messages:
  "H--*5401-READY FOR APPROVAL 1" and
  "H--*FO53-DOCUMENT NOT APPROVED"

  will be displayed at the bottom of the screen along with any other error messages generated by the document transaction you are DELETING.

- Type DD in the ACTION field of the document action line.
• Move the cursor to the DOCID field of the document action line using a tab key. Erase the TRANS CODE (B2 or C2, depending on the document you are DELETING) by pressing the space bar.

• Press the ENTER key. The START-UP screen will now be displayed with the message:

"A--*CQ8L-DOCUMENT DELETED"

You will no longer be able to view the document transaction. If you attempt to do so by typing S in the MODE OF OPERATION field with the appropriate DOCUMENT ID and USER ID DATA and press the ENTER key, the following message will be displayed on the "START-UP" screen:

"A--CX11-BATCH OR DOC HEADER DELETED"

• Continue with your next document transaction or press the CLEAR key to exit the document data base (DDB).

**9.10.124 Changing A Billing Document Id On The SUSF**

There are two ways you could become aware that a data entry error was made in the billing document ID.

• By scanning the DOCID field in the document action line at the top of either the DOCUMENT INPUT SCREEN or the DOCUMENT LINE SCREEN, or

• By having one of the following error messages displayed on the BILLING DOCUMENT INPUT SCREEN after QUICK EDITING your BILLING DOCUMENT:

"H--PP86E - PDIT TABLE ENTRY NOT FOUND"

"H--PP90E - BD EXISTS IN ARHT TABLE"

NOTE: Edit message PP86E can also be generated because:

• A PDIT record was not established

• A PDIT record was established with the wrong BILLING DOCUMENT ID NUMBER. If so you will need to delete the bad record and add the correct record to the PDIT table, see RCM 9.10.158)

• The PAYOR NUMBER on the BILLING DOCUMENT in question does not match the PAYOR NUMBER on an existing PDIT RECORD.
• If the PAYOR NUMBER on the BILLING DOCUMENT is incorrect or incorrectly positioned in the PAYOR NUMBER field see RCM 9.10.126 for directions to correct it.

• If the PAYOR NUMBER is incorrectly entered on the PAYOR and PDIT records, see RCM 9.10.129 for necessary actions to establish corrected table records.

• If the PAYOR NUMBER was not positioned correctly in the PAYOR NUMBER field on the BILLING DOCUMENT INPUT SCREEN it will not match with a PDIT record. By using the TAB key, verify that the PAYOR NUMBER starts in the first position of the PAYOR NUMBER field and that all positions are entered correctly.

If there is a processed PARS record with the same BILLING DOCUMENT ID as the one you are attempting to establish, the following message will be displayed at the bottom of the PDIT screen when you attempt to add your record:

01-PP90E BD EXISTS IN ARHT TABLE.

If the duplicate does not exist when you add the PDIT record but is established in PARS after you add that record but before you have entered your BILLING DOCUMENT the following message will be displayed at the bottom of the START-UP SCREEN after you have pressed the ENTER key in an attempt to access the BILLING DOCUMENT INPUT screen for the first time:

A--*CD31 - DUPLICATE DOCUMENT ID.

Because you are prewarned in these last two situations, a billing document with a duplicate ID should not be created.

Correcting the DOCUMENT ID on the BILLING DOCUMENT

The DOCUMENT ID cannot be changed on the BILLING DOCUMENT. After you have determined that the DOCUMENT ID is in error and the error was made when it was entered on the START-UP SCREEN when the BILLING DOCUMENT was created and not on the PDIT record you have only two options.

A. CANCEL OUT of the BILLING DOCUMENT if you have never put the document on HOLD in the suspense file and have never accessed the BILLING DOCUMENT LINE SCREEN.

• Move the cursor to the ACTION field of the document action line.

• Type X in the ACTION field.

• Press the ENTER key.

• You will now be viewing the START-UP SCREEN.
• All the data you entered before accessing the BILLING DOCUMENT INPUT SCREEN will be displayed. Move the cursor to the DOCUMENT ID line on this screen. Type B2 in the TRAN field if B2 is not displayed there (the START-UP SCREEN will display all your original entries). If B2 was already displayed there or if you have typed B2 in that field move the cursor to the ID NUMBER field of the DOCUMENT ID line.

• Type the correct ID NUMBER.

• Press the ENTER key.

• You will now be viewing the DOCUMENT INPUT SCREEN. Complete the BILLING DOCUMENT INPUT SCREEN and submit for approval and processing following standard instructions in RCM 9.10.63 and 64.

B. DELETE the BILLING DOCUMENT if you have at any time put the document in HOLD status on the SUSPENSE FILE or accessed the DOCUMENT LINE SCREEN. This can be done either of the following two ways:

1. If you accessed the document through the SUSPENSE FILE:

   • you should be viewing the DOCUMENT INPUT SCREEN and the cursor should be in the ACTION field of the document action.

   • TYPE DD in the ACTION field.

   • Move the cursor, using a TAB key, to the DOCID field of the document action line.

   • Using the space bar, erase the TRANSACTION CODE (B2).

   • Press the ENTER key.

   • You will now be viewing the SUSPENSE FILE screen from which you entered the document exactly as you left it. The status displayed for the BILLING DOCUMENT you have just deleted will still say HELD.

   • If you wish to check if your document is scheduled for DELETION take the following steps.

      • The cursor will be in the ACTION field of the table action line. Type S in that field.

      • Move the cursor the SUSF line of the document you just DELETED.

      • Press the enter key.
• You will now be viewing the STARTUP screen.

• Press the CLEAR key.

• You will now be viewing the SUSF screen continuing your record again. DELETE should now be displayed in the STATUS field of the SUSPENSE FILE record for your BILLING DOCUMENT and you should no longer be able to access it. The document has been deleted. The SUSPENSE FILE record will be archived the next time nightly production is run.

• Type E in the ACTION field to exit tables.

• Follow standard instructions to enter a BILLING DOCUMENT taking care to type the BILLING DOCUMENT ID correctly on the START-UP screen.

2. If you want to DELETE a BILLING DOCUMENT using the START-UP SCREEN, take the following steps:

• Type P in the MODE of OPERATION field.

• The cursor will have moved to the DOCUMENT ID line. Type B2 in the TRAN field, 2000 in the DIVISION FIELD and the ID NUMBER of the BILLING DOCUMENT you want DELETE in ID NUMBER field.

• Move the cursor to the USER ID field and type your USER ID.

• Move the cursor to the SCHEDULING ACTION field and type DD.

• Press the ENTER key.

• The following message will now be displayed at the bottom of the START-UP screen:

   A--*CQ8P - DOCUMENT DELETED

• Now complete your START-UP screen and BILLING DOCUMENT screens following standard instructions being careful to correctly enter your new DOCUMENT ID.

9.10.125 Changing A Cash Receipt Document Id On The SUSF

You would need to change your CASH RECEIPT DOCUMENT ID if you made a data entry error in your DOCUMENT ID or if the DOCUMENT ID already exists in PARS.

You would become aware of a data entry error
• by scanning the DOC ID field in the document action line;
• by the display of the following edit messages at the bottom of your screen

  01-CPM02 - TRAN CODE/TYPE NOT IN ACED

• If the TRANSACTION CODE entered was other than C2 but exists as a valid code in
  an accounting reference table (if you enter a TRANSACTION CODE that is not valid
  in an accounting reference table, your entry will reject when you attempt to add your
  CCIT record "PP24W ACED TABLE ENTRY NOT FOUND" or when you attempt to
  enter the CASH RECEIPT DOCUMENT SCREEN from the START-UP SCREEN "A-
  *CD15 - DOCUMENT TYPE INVALID"). You would know that your CASH RECEIPT
  DOCUMENT ID is a duplicate of one that exists already in PARS (but not on the
  SUSPENSE FILE) by the display of the following edit message at the bottom of the
  CASH RECEIPT INPUT SCREEN after the document is edited:

    H--CR07E - DUPLICATE CR DOC.

If there is a SUSPENSE FILE record with the same document ID as the one you are
attempting to enter, your action will reject on CCIT (with the following message
displayed, H--PPD1E DUPLICATE DOC ID EXISTS) or the START-UP SCREEN
(with the following message displayed, A--*CD31 - DUPLICATE DOCUMENT ID)
and never get as far as the cash receipt document screen. Then you will have to
type over the ID NUMBER, with a new number that will be unique.

Correcting the DOCUMENT ID on the CASH RECEIPT DOCUMENT

The DOCUMENT ID cannot be changed on the CASH RECEIPT DOCUMENT. There
are only two options:

1. CANCEL OUT of the CASH RECEIPT DOCUMENT if you have never put the
document on HOLD in the suspense file and have never accessed the CASH
RECEIPT DOCUMENT LINE SCREEN, or

2. DELETE the CASH RECEIPT DOCUMENT if you have at any time put the
document in HOLD status on the SUSPENSE FILE or accessed the
DOCUMENT LINE SCREEN.

   • Move the cursor to the ACTION field inside the BILLING DOCUMENT INPUT
   SCREEN (not the document action line).
   
   • Type X in the ACTION field.
   
   • Press the ENTER key.
   
   • You will now be viewing the START-UP SCREEN.
   
   • Type D in the MODE of OPERATION field.
• All the data you entered before accessing the CASH RECEIPT DOCUMENT INPUT SCREEN will be displayed. Move the cursor to the DOCUMENT ID line on this screen. Type C2 in the TRAN field if C2 is not displayed there (the START-UP SCREEN will display all your original entries). If C2 was already displayed there or if you have typed C2 in that field move the cursor to the ID NUMBER field of the DOCUMENT ID line.

• Type the correct ID NUMBER.

• Press the ENTER key.

• You will now be viewing the CASH RECEIPT DOCUMENT INPUT SCREEN. Complete the CASH RECEIPT DOCUMENT INPUT SCREEN and submit for approval and processing following standard instructions in RCM 9.10.75-78.

• You will now be viewing the START-UP screen. All the data originally entered on that screen before you accessed your CASH RECEIPT DOCUMENT will be displayed.

• If you are going to manually reenter your CASH RECEIPT DOCUMENT take the following steps.

  • Move the cursor to the DOCUMENT ID line using your TAB key and type over the incorrect fields with the correct entries.

  • Press the ENTER key. You will now be viewing the CASH RECEIPT DOCUMENT INPUT SCREEN again. The correct DOCUMENT ID should now be displayed in the DOC ID field of the document action line. Complete your CASH RECEIPT DOCUMENT following standard directions in RCM 9.10.75 through 9.10.78.

• If you want to reenter your transaction on the cash collection input table, follow standard directions in 9.10.79.

Deleting the CR Document can be done either of the following two ways, depending on how you entered the document:

A. If you accessed the document through the SUSPENSE FILE you should be viewing the DOCUMENT INPUT SCREEN and the cursor should be in the ACTION field of the document action.

  • TYPE DD in the ACTION field.

  • Move the cursor, using a TAB key, to the DOCID field of the document action line.

  • Using the space bar, erase the C2 TRANSACTION CODE.
• Press the ENTER key.

• You will now be viewing the SUSPENSE FILE screen from which you entered the document exactly as you left it. The status displayed for the CASH RECEIPT DOCUMENT you have just deleted will still say HELD.

If you wish to check if your document is scheduled for deletion:

• The cursor will be in the ACTION field of the table action line. Type S in that field.

• Move the cursor to the SUSF line containing your document transaction.

• Press the enter key.

• You will now be viewing the STARTUP screen.

• Press the CLEAR key.

• You should now be viewing the SUSF screen containing your document transaction.

• DELETE should now be displayed in the STATUS field of the SUSPENSE FILE record for your CASH RECEIPT DOCUMENT and you should no longer be able to access it. The document has been deleted. The SUSPENSE FILE record will be archived the next time nightly production is run.

• Either type N in ACTION field of the table action line and CCIT in the TABLE ID and press the ENTER key,

or

Type E in the ACTION field of the table ACTION line and press the ENTER key.

Your choice depends on whether you reenter your transaction (with a correct DOCUMENT ID) on a CCIT screen or directly on a START-UP SCREEN and CASH RECEIPT DOCUMENT. Most units, unless directed otherwise by supervisor, should reenter their action on a CCIT screen.

• Follow standard directions in 9.10.79 through 9.10.78 if you are reentering your transaction on a START-UP SCREEN, CASH RECEIPT DOCUMENT INPUT SCREEN and CASH RECEIPT LINE SCREEN.
B. If you want to DELETE a CASH RECEIPT DOCUMENT using the START-UP SCREEN take the following steps.

- Type P in the MODE of OPERATION field.
- The cursor will have moved to the DOCUMENT ID line. Type B2 in the TRAN field, 2000 in the DIVISION FIELD and the ID NUMBER of the BILLING DOCUMENT you want to DELETE in ID NUMBER field.
- Move the cursor to the USER ID field and type your USER ID.
- Move the cursor to the SCHEDULING ACTION field and type DD.
- Press the ENTER key.
- The following message will now be displayed at the bottom of the STARTUP screen:
  
  A--*CQ8L - DOCUMENT DELETED

- If you are going to reenter your cash receipt on a CCIT screen (and all units should unless otherwise directed by a supervisor), press the CLEAR key.
- The message "V2 ENTER NEXT TASK CODE" will appear on the screen.
- Type MTI CCIT.
- Press the ENTER key.
- You will now be viewing the CCIT screen. Reenter your transaction, with a correct DOCUMENT ID following directions in RCM 9.10.79.
- If you are going to reenter your CASH RECEIPT DOCUMENT using the START-UP, CASH RECEIPT DOCUMENT INPUT SCREEN and CASH RECEIPT DOCUMENT LINE SCREEN move the cursor to the MODE OF OPERATION field and follow standard directions for completion in RCM 9.10.72 through 9.10.78.

9.10.126 Determining That An Incorrect Payor Number Exists On An Unprocessed Billing Document

The PAYOR NUMBER is the primary key to finding information, in the PAR system, and should be checked very carefully before a document is processed.
You would want to change the PAYOR NUMBER on your unprocessed BILLING DOCUMENT for either of the two following reasons.

- You made a data entry error in the PAYOR NUMBER field on the BILLING DOCUMENT INPUT SCREEN, and that FIELD does not match with a PAYOR NUMBER established in PARS on PAYR and PDIT record.

- You made a data entry error in the PAYOR NUMBER field on the BILLING DOCUMENT INPUT SCREEN, PAYR record and PDIT record.

You would know that there is a problem with the PAYOR NUMBER:

- By visual inspection of the PAYOR NUMBER field on the BILLING DOCUMENT INPUT SCREEN. (This is very important, because if you make the same error in this field on the PAYR table and the PDIT table as well as the BILLING DOCUMENT INPUT SCREEN there is no system edit to tell you that the PAYOR NUMBER is incorrect. The edits tell you that what is displayed in the PAYOR NUMBER field on the BILLING DOCUMENT INPUT SCREEN has not been established in the required PAR system reference tables. This happens because: 1. data entry errors on that screen cause it not to match with previously established records, or 2. the proper reference table records have not been established.), or

- By the display of the following messages at the bottom of the BILLING DOCUMENT INPUT SCREEN:

  H--PP86E - PDIT TABLE ENTRY NOT FOUND

  H--BD11E - INVALID PAYOR CODE

9.10.127 Correcting The Payor Number Field On The Billing Document Input Screen

A. If you first notice that there is a problem with the PAYOR NUMBER field on the BILLING DOCUMENT input screen because the edit messages H--INVALID PAYOR CODE and H--PP86E - PDIT TABLE ENTRY NOT FOUND appear at the bottom of the BILLING DOCUMENT INPUT SCREEN after editing take the following basic steps:

- Validate the entry in the PAYOR NUMBER field.

- Correct the entry in the PAYOR NUMBER field if it is wrong.

- Edit the document.

- If the edit messages indicating a problem with the PAYOR NUMBER field are no longer displayed, prepare your document for approval and scheduling following standard instructions.
• If the entry in the PAYOR NUMBER field is correct, or if edit messages indicating a PAYOR NUMBER problem still appear after correcting that field proceed to 9.10.129.

To correct the PAYOR NUMBER, if it is incorrect do the following:

• Move the cursor to the PAYOR NUMBER field.

• Type the correct PAYOR NUMBER over the data displayed in that field taking care that you begin entering data with the first position in the field.

Edit the document by moving the cursor to the ACTION field of the table action line and type Q.

• Press the ENTER key.

• If edit messages H--INVALID PAYOR CODE and H--PP86E-PDIT TABLE ENTRY NOT FOUND are displayed at the bottom of the BILLING DOCUMENT INPUT SCREEN, proceed to D of this section.

• If the above edit messages no longer appear, and there are no other problems, follow instructions in RCM 9.10.63-64 for having the document approved and scheduled.

B. If you have determined by scanning your BILLING DOCUMENT INPUT SCREEN that the PAYOR NUMBER is incorrect take the following basic steps:

• complete your data entry action on the billing document. (Completing all necessary lines and fields will preclude any future need for using a special command to add lines and will prevent unnecessary edit messages from being generated when you edit your document), and

• edit the billing document.

You are editing the document to determine if the bad PAYOR NUMBER detected by sight on the billing document also exists in PAYR and PDIT records.

• If the messages H--BD11E-INVALID PAYOR CODE and H--PP86E-PDIT TABLE ENTRY NOT FOUND are not displayed after editing proceed to 9.10.128.

• If the messages H--BD11E-INVALID PAYOR CODE and H--PP86E-PDIT TABLE ENTRY NOT FOUND are displayed after editing proceed to 9.10.129.
9.10.128 Correcting The Payor Number When No PAYR/PDIT Record Exist

If the PAYOR NUMBER on the BILLING DOCUMENT INPUT SCREEN determined by sight to be incorrect and no edit messages are generated indicating conflict with or lack of PAYR/PDIT records with that same PAYOR NUMBER (i.e., the same incorrect number is present in the PAYR/PDIT records created for this receivable) you will be taking the following basic steps:

- Correct the PAYOR NUMBER field as you did in A of 9.10.127.
- Leave the BILLING DOCUMENT INPUT SCREEN using the pause command.
- Add a correct PAYR record
- Delete the incorrect PDIT record
- Add a correct PDIT record
- Delete the incorrect PAYR record
- Return to the BILLING DOCUMENT INPUT SCREEN
- Re-edit the BILLING DOCUMENT INPUT SCREEN.

To accomplish these steps do the following:

To correct the Payor number field on the BILLING DOCUMENT INPUT SCREEN:

- Move the cursor to the PAYOR NUMBER field.
- Type the correct PAYOR NUMBER (See RCM 9.10.56 for the correct PAYOR NUMBER format).

To use the pause command to leave the input screen and go to the PAYR record:

- Move the cursor to the ACTION field of the document action line and type P in that field.
- Press the ENTER key. The message V2 ENTER NEXT TASK CODE will be displayed.
- Type MTI, press the space bar and type PAYR.
- Press the ENTER key. You are now viewing a blank PAYR record.

To add a correct PAYR record:
- Type S in the ACTION field, move the cursor to the USER ID field and type your USER ID in that field, all on the table action line.

- Move the cursor to the PAYOR NUMBER field and type in the erroneous PAYOR NUMBER you just typed over on the BILLING DOCUMENT INPUT SCREEN.

- Press the ENTER key. The record with the bad PAYOR NUMBER will now be displayed.

- Type A in the ACTION field of the table action line.

- Move the cursor to the PAYOR NUMBER field and type the correct PAYOR NUMBER in that field.

- Press the ENTER key. The screen will now display the message 01-*LO130 ALL LINES ADDED. By accessing the bad record first and then typing over the bad PAYOR NUMBER with the correct one, giving it a new key identifying field, you are able to add this corrected record as a brand new record without changing or entering any fields beside the PAYOR NUMBER field.

To delete the incorrect PDIT record:

- Type L in the ACTION field and PDIT in the TABLE ID field of the table action line.

- Move the cursor to the PAYOR NUMBER field and type in the bad PAYOR NUMBER (you want to access the PDIT record with the bad PAYOR NUMBER).

- Press the ENTER key. You will now be viewing the PDIT record with the bad PAYOR NUMBER.

- Type D in the ACTION field of the table action line (you are deleting this record because you cannot change a key identifying field on a record in PARS, you must delete the bad record and add a new one).

- Press the ENTER key. The message 01--*L032 ALL LINES DELETED should be displayed at the bottom of the screen.

- If the message 01--PPF2E CANNOT DELETE WHEN PDIT EXISTS is displayed, this PAYOR NUMBER is being used for another receivable. Take no further steps to delete it.

To add a correct PDIT record:

- Keep all the data you deleted displayed on the PDIT screen. Type A in the ACTION field of the table action line.

- Using a TAB key move the cursor to the PAYOR NUMBER field.
• Type in the correct PAYOR NUMBER. You will not have to type in any other information if all the information entered into the record you deleted, outside of the PAYOR NUMBER, is correct.

• Press the ENTER key. The message 01-*L030 ALL LINES ADDED will be displayed at the bottom of the screen.

(So far you have corrected the PAYOR NUMBER on the BILLING DOCUMENT INPUT SCREEN added a PAYR record with the correct PAYOR NUMBER, deleted the PDIT record with the incorrect PAYOR NUMBER, and added a PDIT record with the correct PAYOR NUMBER. Before returning to the billing document you will have to delete the PAYR record with the incorrect PAYOR NUMBER. This could not be done the first time you accessed the PAYR table because you cannot delete a PAYR record when a PDIT record exists and you cannot add a PDIT record if the PAYOR NUMBER is not first established on the PAYR table. So, you will now have to return to the PAYR table.

To delete the incorrect PAYR record:

• Type L in the ACTION field and PAYR in the TABLE ID field of the table action line.

• Move the cursor to the PAYOR NUMBER field and type in the bad PAYOR NUMBER.

• Press the ENTER key. The PAYR record with the bad PAYOR NUMBER will now be displayed.

• Type D in the ACTION field of the table action line.

• Press the ENTER key. The message 01-*L032 ALL LINES DELETED will be displayed. You can now return to your billing document.

To return to the BILLING DOCUMENT INPUT SCREEN:

• Type E in the ACTION field of the table action line (exit tables).

• Press the ENTER key.

• The screen will now display the message V2 ENTER NEXT TASK CODE. Type DDB.

• Press the ENTER key.

• The BILLING DOCUMENT INPUT SCREEN that you originally left using the pause (p) command will now be displayed, without having to enter any identifying information.

To re-edit the INPUT SCREEN
• Type Q in the ACTION field of the document action line to make sure all actions have been correctly taken.

• Follow standard directions to hold the document in the suspense file for approval and scheduling.

**9.10.129 Correcting PDIT/PAYR Records When Billing Document Field Is Correct**

If the PAYOR NUMBER field is correct or has been corrected but edit messages are displayed showing that an invalid PAYOR NUMBER has been used and a PDIT record cannot be found with that PAYOR NUMBER you must take the following basic steps:

• Leave the BILLING DOCUMENT INPUT SCREEN using the pause command.

• Scan the PDIT table to attempt to locate the bad record.

• If it is not located:
  • Add the correct PAYR record.
  • Add the correct PDIT record.

• If it is located:
  • Add a correct PAYR record
  • Delete the bad PDIT record
  • Add the correct PAYR record

• Return to the BILLING DOCUMENT INPUT SCREEN.

To accomplish these steps do the following:

To leave the BILLING DOCUMENT INPUT SCREEN:

• To see if there is a record using the prefix and claim number of your receivable and the BILLING DOCUMENT ID you are using for the receivable in question, you must leave the BILLING DOCUMENT INPUT SCREEN to check PDIT.

• Type P in the ACTION field of the document action line.

• Press the ENTER key.
• If you entered the document through the START-UP screen you will see the message V2 ENTER NEXT TASK CODE. Type MTI, space with the space bar, then type PDIT.

• If you entered the document through the SUSPENSE FILE screen from which you accessed your billing document, type N in the ACTION field and PDIT in the TABLE ID field of the table action line.

• Press the ENTER key.

To scan the PDIT Table:

• You are now viewing a blank PDIT screen. Type S in the ACTION field, and your USERID in the USERID field of the table action line.

• Type the prefix and claim number (entering zeroes between the prefix and the first position of the claim number, if it is less than 9 positions) in the PAYOR NUMBER field (do not enter anything in the last position of the field).

• Press the ENTER key.

• You are now viewing the first record in the PDIT table that matches the data you entered in the PAYOR NUMBER field, if such a record exists, or the closest number subsequent to the number you entered if that number doesn't exist on a record. Determine if the number displayed is the same as the number you entered. (If it isn't you will have to add a PAYR and a PDIT table record for your overpayment following standard directions in RCM 9.10.56 and 9.10.57.) If the first ten positions of the PAYOR NUMBER are the same as you entered previously proceed with these directions.

• Look at the BILLING DOCUMENT ID field. If that ID is not the same as for your receivable, press the ENTER key. The screen will fill with the next record in sequence. Scan the records in PDIT until you locate one with the same BILLING DOCUMENT ID or until you have seen all the records in PDIT in which the first ten positions of the PAYOR NUMBER matches the prefix and claim number of the overpayment.

• If you cannot match the prefix, claim number, and BILLING DOCUMENT ID, you do not have to take any further steps to locate the bad PDIT/PAYR records that may have been entered. Add PAYR and PDIT table records to the PAR system following standard directions in RCM 9.10.56 and 9.10.57 (remember the PAYR record must be added before the PDIT record).

• you do match on the first ten positions of the PAYOR NUMBER and the BILLING DOCUMENT ID you have located the bad PDIT record. All the information on the record should be correct except for the last position of the PAYOR NUMBER, just
as it should be on the PAYR record. The necessary steps you will have to take in their correct sequence are:

- Add a PAYR record with the correct PAYOR NUMBER.
- Delete the PDIT record with the incorrect PAYOR NUMBER.
- Add the PDIT record with the correct PAYOR NUMBER.
- Delete the PAYR record with the incorrect PAYOR NUMBER.
- Return to the billing document to reedit it and put it on hold status in the SUSPENSE FILE for approval and scheduling.

To add a correct PAYR Record:

- Type L (leaf command) in the ACTION field and PAYR in the TABLE ID field of the document action line.
- Press the ENTER key. You are viewing the PAYR record with the incorrect PAYOR NUMBER.
- Type A in the ACTION field of the table action line.
- Move the cursor to the PAYOR NUMBER field using a TAB key. Using the arrow key (arrow pointing right) move the cursor to the last position of the field. Type in the correct alpha or numeric character.
- Press the ENTER key.
- The message 01-*030 ALL LINES ADDED will be displayed.

To delete the incorrect PDIT record:

- Type L in the ACTION field and PDIT in the TABLEID field of the document action line.
- Move the cursor to the PAYOR NUMBER field using a tab key. Move the cursor to the last position of the field and type in the incorrect character (you want to leaf back to the PDIT record with the bad PAYOR NUMBER).
- Press the ENTER key.
- You will now have the PDIT record with the bad PAYOR NUMBER displayed.
- Type D (delete) in the ACTION field of the table action line.
• Press the ENTER key. The message 01-*L032 ALL LINES DELETED will appear at the bottom of the screen. If the message 01-PPF2E CANNOT DELETE WHEN PDIT EXISTS is displayed, this PAYOR NUMBER is being used for another receivable. Take no further steps to try and delete it.

To add a correct PDIT record:

• Type A in the ACTION field of the table action line.

• Move the cursor to the PAYOR NUMBER field using a tab key. Move the cursor to the final position of the field using the arrow key (arrow points right). Type the correct character in that position.

• Press the ENTER key. The message 01-*L030 ALL LINES ADDED will be displayed at the bottom of the screen.

To delete the incorrect PAYR record:

• Type L (leaf) in the ACTION field and PAYR in the TABLEID field of the table action line.

• Press the ENTER key. The PAYR record with the correct PAYOR NUMBER will now be displayed on your screen.

• Type D in the ACTION field of the table action line.

• Move the cursor to the PAYOR NUMBER with a tab key. Move the cursor to the final position of the field and type in the erroneous final character.

• Press the ENTER Key. The message 01-L032 ALL LINES DELETED will now be displayed on the screen. You have now added a PAYOR and a PDIT table record and deleted a PAYOR and PDIT table record using only table commands and entering data only in the final position of the PAYOR NUMBER field.

To re-edit the billing document:

• Type E in the ACTION field of the table action line.

• Press the ENTER key. The message V2 ENTER NEXT TASK CODE will be displayed.

• Type DDB

• Press the ENTER key. The document you left to access the PAYR and PDIT tables is now displayed. Quick edit the document to verify that there is no further problem. Then place it on hold status in the SUSPENSE FILE for approval and scheduling following standard instructions.
9.10.130 Changing A Payor Number On A Cash Receipt Document

You would need to change the PAYOR NUMBER on your unprocessed CASH RECEIPT DOCUMENT if you made a data entry error in the PAYOR NUMBER field on the CCIT record that created the CASH RECEIPT DOCUMENT or in direct entry of that field on the CASH RECEIPT DOCUMENT LINE SCREEN. When you are manually completing a CASH RECEIPT DOCUMENT LINE SCREEN, follow directions in RCM 9.10.74 to leave the VND/PRV field blank; this will result in the system filling this field with the PAYOR NUMBER associated with the BILLING DOCUMENT ID entered in the REFERENCE NUMBER field. This guarantees you will not have an erroneous entry in this field, unless the error is initiated on CCIT.

You will know that the PAYOR NUMBER in the VND/PROV field is incorrect if the following message is displayed on the bottom of the CASH RECEIPT DOCUMENT LINE SCREEN:

• CR32E-VEND CODE NOT = AR ENTRY.

To correct an erroneous PAYOR NUMBER in the VND/PRV field on a CASH RECEIPT DOCUMENT LINE SCREEN you will basically have to take the following three steps:

• validate the entries in the REF TC and REF NUMBER fields,

• erase the entry in the VND/PRV field, and

• QUICK EDIT the CASH RECEIPT DOCUMENT to mechanically complete the VND/PRV field with the PAYOR NUMBER from the billing document referred to in the REF TC and REF NUMBER fields.

To accomplish those steps do the following:

To validate the entries in the REF TC AND REF NUMBER fields:

• Compare the entries in REF TC and REF NUMBER with the BILLING DOCUMENT ID of the overpayment to which you wish to post a cash receipt.

  • If the data in these two fields is incorrect, take action as described in RCM 9.10.125. Then, proceed with the remaining necessary steps to correct the VND/PRV field.

  • If the data in these two fields is correct proceed with the remaining necessary steps to correct the VND/PRV field.

To erase the VND/PRV field:

• Move the cursor to the VND/PRV field using the tab key. Press the space bar once for each completed position in this field, erasing its contents.
To Edit:

- Move the cursor to the ACTION field of the document action line. Type Q in that field.
- Press the ENTER key. The message CR32E-VEND CODE NOT = AR ENTRY will no longer be displayed at the bottom of the screen. The VND/PRV field will now be completed with the PAYOR NUMBER from the referenced billing document.

### 9.10.131 Modifying A Receivable After It Has Been Processed In PARS

A. A receivable can be changed after it is established in the PAR system by entering a modified billing document transaction in PARS with the same BILLING DOCUMENT ID as the receivable with the data you wish to change.

B. To change any offset posted to a receivable you must MODIFY the CASH RECEIPT DOCUMENT on which the offset was posted.

C. The following information requires BOTH a TABLE Change and a BILLING DOCUMENT MODIFICATION:

<table>
<thead>
<tr>
<th>PAYR NAME 1st LINE</th>
<th>PAYR</th>
</tr>
</thead>
<tbody>
<tr>
<td>PAYR NAME 2nd LINE</td>
<td>PDIT</td>
</tr>
</tbody>
</table>

The address to be displayed on installment billing and dunning notices.

D. The contents of the following fields listed in the right hand column can be modified by changing table data OR by a BILLING DOCUMENT MODIFICATION. If there are no other changes needed for the receivable make your change on the TABLE involved rather than with a BILLING DOCUMENT MODIFICATION. If one of these fields needs an immediate change, make the change on the TABLE involved even if a BILLING DOCUMENT MODIFICATION is necessary.

<table>
<thead>
<tr>
<th>FIELD</th>
<th>TABLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>DUNNING FLAG</td>
<td>OBDT</td>
</tr>
<tr>
<td>BILL PRINT FLAG</td>
<td>OBDT</td>
</tr>
</tbody>
</table>
### TABLE

<table>
<thead>
<tr>
<th>DATA</th>
<th>TABLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Indicator of a request for waiver or reconsideration of overpayment</td>
<td>WAIV</td>
</tr>
<tr>
<td>Expiration date for waiver or reconsideration of overpayment request</td>
<td>WAIV</td>
</tr>
<tr>
<td>Date waiver or reconsideration of overpayment denial was released</td>
<td>WAIV</td>
</tr>
<tr>
<td>The type of text to be used on installment bills</td>
<td>INBT</td>
</tr>
<tr>
<td>Installment billing effective date</td>
<td>INBT</td>
</tr>
<tr>
<td>The amount of an installment bill agreement</td>
<td>INBT</td>
</tr>
<tr>
<td>The indicator that an installment billing agreement is active</td>
<td>INBT</td>
</tr>
<tr>
<td>The code indicating where a receivable has been referred for recovery or additional development</td>
<td>AREF</td>
</tr>
<tr>
<td>Date that the referral code is effective</td>
<td>AREF</td>
</tr>
<tr>
<td>Amount of full or partial withholding</td>
<td>RECR</td>
</tr>
<tr>
<td>The code indicating if the recovery is partial or full withholding</td>
<td>RECR</td>
</tr>
<tr>
<td>The code indicating if recovery by partial or full withholding is currently in force</td>
<td>RECR</td>
</tr>
</tbody>
</table>

E. The following changes could be made by MODIFYING the original BILLING DOCUMENT:

- Reduce the amount of the receivable to remove any erroneous amount;
- Reduce the amount of the receivable because an outstanding check or electronic fund transfer (EFT) payment has been returned, even if it reduces the receivable to zero;
• Change contents of PAYOR NAME field stored in PARS (ARHT);
• Change the DUNNING FLAG;
• Change the BILL PRINT FLAG;
• Change the WAIV flag
• Add PENALTY, ADMINISTRATIVE COST or INTEREST lines to a BILLING DOCUMENT;
• Change the collection due date;
• Correct the amount of PENALTY ADMINISTRATIVE COST or INTEREST lines on a BILLING DOCUMENT;
• Correct CAUSE, SOURCE and TYPE CODES
• Within limitations, modify a line amount to zero and add it back for the same transaction with different entries in the non-modifiable fields.
• If a BILLING DOCUMENT must be removed from PARS and the action cannot be taken in the same month the document was established you must MODIFY the amount to zero. If a BILLING DOCUMENT transaction can be processed within the same month as the original BILLING DOCUMENT entered, CANCEL the BILLING DOCUMENT (See RCM 9.10.142).

F. Miscellaneous Information on Document Modifications.

Do not attempt to MODIFY a document while there is a document transaction with the same ID NUMBER on the suspense file (SUSF). A DOCUMENT ID on the SUSF must be unique. If you complete a START-UP screen to begin the process of MODIFYING a document, and the DOCUMENT ID entered exists on SUSF, the following edit message will be generated

"A--*CD31 - DUPLICATE DOCUMENT ID" and the system will not allow you to enter the DOCUMENT INPUT SCREEN.

You can only modify to decrease the open balance amount on a BILLING DOCUMENT LINE.

If you need to decrease a BILLING DOCUMENT open balance after a cash receipt document has been posted; (the original overpayment was larger than the current balance), you will have to modify the amount of the cash receipt document to zero first to increase the open balance of the overpayment to the amount of the necessary modification. The excess amount, depending on the type of action it was, will have to be refunded to the PAYOR, returned to
Treasury, or no further action taken if the cash receipt action had been a write-off to uncollectible. See RCM 6.6 for appropriate actions to take.

MODIFICATION is done on the same BILLING DOCUMENT screens used for initial data entry

- BILLING DOCUMENT INPUT SCREEN
- BILLING DOCUMENT LINE SCREEN

In general, you only need to enter the data you are changing.

Never manually enter more data than you absolutely have to on a document MODIFICATION. When you QUICK EDIT the document the system will fill in the missing document data from information stored in ARHT and ARLT. Let the system do the work for you and avoid the risk of making a mistake.

**9.10.132 Basic Data Input Instructions For A Billing Document Modification (No change in amount)**

To Modify a Billing Document:

1. Access the billing document input screen for the document to be modified.
2. Type M (Modify) in the Action field.
3. Move the cursor to the field(s) you wish to change and type in the new data.
4. Access the document line screen if charges are needed there.
5. Quick Edit and Hold the document for approval and scheduling.

**PREPARATION**

- Know the ID NUMBER of the BILLING DOCUMENT you are MODIFYING.
- Know the numbers of the BILLING DOCUMENT LINES you want to change. (Check ARLT and ARCL - secure prints if necessary).
- Know the amount by which you want to increase or decrease any lines.
- Know what codes you will need to enter, if any.

**SIGNON**

- Sign on to the PAR system as directed in RCM 9.10.50.
• When the message "V2, ENTER NEXT TASK CODE" is displayed, type DDB to access the STARTUP screen.

• Press the ENTER key. The STARTUP screen will now be displayed.

**STARTUP SCREEN**

• Type D in the MODE of OPERATION field.

• Complete the DOCUMENT ID line of the STARTUP screen.
  - Type B2 in the TRANS field.
  - Type 2000 in the DIVISION field.
  - Type the DOCUMENT ID NUMBER of the BILLING DOCUMENT you are modifying in the NUMBER field.

• Move the cursor to the USERID field using a TAB key. Type your USERID in this field.

• Press the ENTER key. The BILLING DOCUMENT INPUT SCREEN will now be displayed.

**BILLING DOCUMENT INPUT SCREEN**

• Move the cursor to the ACTION field of the DOCUMENT INPUT SCREEN (not the ACTION field of the document action line) using a tab key and type M (MODIFY).

• Move the cursor to the field you want to change, if it is modifiable. See RCM 9.10.133 for a list of fields that may and may not be changed directly with a billing document MODIFICATION. Type in the new data.
  - If the only fields you are changing are displayed on the DOCUMENT INPUT SCREEN, you do not have to access the DOCUMENT LINE SCREEN (e.g., your change involves DUNNING FLAG, BILL PRINT FLAG). The only exception to this is the TEXT TYPE field (See RCM 9.10.137).
  - If your MODIFICATION involves increasing or decreasing a receivable amount see RCM 9.10.134.
  - If your MODIFICATION involves a PAYOR NAME/ADDRESS see RCM 9.10.138.
  - If your modification involves adding PENALTY, ADMINISTRATIVE COST or INTEREST lines to the BILLING DOCUMENT see RCM 9.10.135.

• Type in the correct entry. RCM 9.10.133 lists options for MODIFIABLE fields.
BILLING DOCUMENT LINE SCREEN

- If you need to change a field located on a BILLING DOCUMENT LINE SCREEN, after you have completed all necessary entries on the BILLING DOCUMENT INPUT SCREEN:
  
  - Press the ENTER key. The BILLING DOCUMENT LINE SCREEN will be displayed
  
  - The cursor will be in the first position of the LINE NO field. Type in the line number of the BILLING DOCUMENT LINE with the data you wish to change.
  
  - Move the cursor directly to the field you want to change (e.g., the TYPE CODE field) and type in the desired data.
  
  - If there are more BILLING DOCUMENT LINES in which you need to enter change data move the cursor to the LINE NO field on the second empty BILLING DOCUMENT and type in the line number for the next BILLING DOCUMENT LINE that requires changes. Move the cursor to the field you will be changing using a tab key. Type in the change data. If you need another blank line, press the ENTER key and two more blank BILLING DOCUMENT LINES will appear on your screen. Remember, when MODIFYING data in PARS using a BILLING DOCUMENT, you only have to modify fields relevant to the specific change. You do not have to have any BILLING DOCUMENT LINES on your MODIFICATION transaction if you do not have to change a field on a line. You do not have to have an entry for each line existing on a PARS receivable, only on the lines that need correction.

QUICK EDIT

- When you have completed your entries QUICK EDIT your document as directed in RCM 9.10.108.

HOLD FOR APPROVAL AND SCHEDULING

- After successfully editing your document place it on HOLD in the suspense file (type H in the ACTION field of the document action line and press the ENTER key) to await approval and scheduling, just as you would an initial document.

9.10.133 Billing Document Fields And Modification

The following is a list of BILLING DOCUMENT fields. The narrative to the right of the field states if the field can be directly MODIFIED or used in MODIFYING a BILLING DOCUMENT, and what the possible entries are for the field.
<table>
<thead>
<tr>
<th>Field Name</th>
<th>Narrative</th>
</tr>
</thead>
<tbody>
<tr>
<td>DOC DATE</td>
<td>NOT MODIFIABLE</td>
</tr>
<tr>
<td>ACCTG PERIOD</td>
<td>NOT MODIFIABLE</td>
</tr>
<tr>
<td>TRANS TYPE</td>
<td>NOT MODIFIABLE</td>
</tr>
<tr>
<td>BUDGET FY</td>
<td>NOT MODIFIABLE</td>
</tr>
<tr>
<td>ACTION</td>
<td>Always complete with M when MODIFYING a document.</td>
</tr>
<tr>
<td>TOTAL</td>
<td>This field contains the combined amount of all the lines you are entering in your document transaction. This does not represent the total amount of the receivable after the transaction is processed unless the transaction will establish the receivable in PARS.</td>
</tr>
<tr>
<td></td>
<td>1. Add together all increased line amounts from your transaction. If you are only establishing or increasing a receivable amount, enter this amount in the TOTAL field.</td>
</tr>
<tr>
<td></td>
<td>2. Add together all decreased line amounts. If you are only decreasing the receivable amount, enter this amount in the TOTAL field.</td>
</tr>
<tr>
<td></td>
<td>3. If you have both line increase and decreases in your transaction, determining which is greater the combined increase or combined decreases. Subtract the smaller amount from the larger amount and enter the difference in the TOTAL field.</td>
</tr>
<tr>
<td></td>
<td>4. If your increases equal your decreases enter 0.00 in the TOTAL field.</td>
</tr>
<tr>
<td>COMMENTS</td>
<td>No edits exist on this field and there are no limits to changes except for the 12 position size of the field. Whatever is entered in this field will completely replace whatever existed in the COMMENTS field in the accounts receivable header table (ARHT) before the modification. You cannot truly erase the contents of this field if it is erroneous and you have no information you want entered. However, simply type a single asterisk in this field when modifying the BILLING DOCUMENT and you will get the desired effect.</td>
</tr>
<tr>
<td>BILL PRINT FLAG</td>
<td>MODIFIABLE FIELD</td>
</tr>
<tr>
<td>-----------------</td>
<td>------------------</td>
</tr>
<tr>
<td>The following are BILL PRINT FLAGS currently used in PARS.</td>
<td></td>
</tr>
<tr>
<td>Y = Command to print a bill. This is used by ORSP only in the installment bill process and is usually system generated.</td>
<td></td>
</tr>
<tr>
<td>P = Y command has been processed, a bill has been released and necessary dates generated in PARS.</td>
<td></td>
</tr>
<tr>
<td>S = Command to generate system dates as though a bill has been generated but no PARS bill is issued.</td>
<td></td>
</tr>
<tr>
<td>U = S command has been processed, dates have been generated, no bill was released.</td>
<td></td>
</tr>
<tr>
<td>N = Command not to issue a bill or generate system dates. Used by ORSP on initial BILLING DOCUMENTS.</td>
<td></td>
</tr>
<tr>
<td>A BILL PRINT FLAG of Y can be entered no matter what BILL PRINT FALG already exists in PARS. BILL PRINT FLAGS of P and U can never be manually entered in PARS, only system generated after Y and S flags are processed. An existing BILL PRINT FLAG can never be modified to an N. A BILL PRINT FLAG can be MODIFIED to S only if the existing BILL PRINT FLAG is N. The most frequent reason for changing this field is release of the overpayment letter sometime after establishment of the overpayment in PARS. This field can also be directly changed with a CHANGE command on the OBDT.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>COLLECTION DUE DATE</th>
<th>MODIFIABLE FIELD</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is a six position field. Two positions are allotted and must be completed for the following: month, day, year. Example: 10 01 91.</td>
<td></td>
</tr>
<tr>
<td>The COLLECTION DUE DATE is calculated to be 30 days after the release of the overpayment letter or waiver/reconsideration/ hearings and appeal denial letter. In PARS this is calculated from the BILL PRINT DATE in ARHT or WAIV DENIAL DATE field in WAIV.</td>
<td></td>
</tr>
</tbody>
</table>
| This date is used to determine when initial PENALTY is
charged and when the first DUNNING notice is released. When recurring administrative costs are implemented in PARS, this date will determine when the initial assessment occurs. If you need to MODIFY this field because there was a delay in the release of an initial overpayment letter, remember to correct the WAIVER EXPIRATION DATE in the WAIV table (should be the same as the COLLECTION DUE DATE).

Do not use a BILLING DOCUMENT MODIFICATION to correct the COLLECTION DUE DATE if a BILL PRINT FLAG of N exists in ARHT/OBDT, a COLLECTION DUE DATE does not currently exist in PARS and the overpayment letter is now being released. Change the BILL PRINT FLAG to S when the letter is released. When that is processed it will mechanically set the COLLECTION DUE DATE and WAIVER EXPIRATION DATE at 30 days after processing.

Do not change the COLLECTION DUE DATE with a BILLING DOCUMENT MODIFICATION if it needs to be changed because a waiver, reconsideration or hearings and appeal DENIAL DATE needs to be entered or corrected. Changing/entering the denial date in the WAIV table will automatically reset the COLLECTION DUE DATE to thirty days after the denial date.

<table>
<thead>
<tr>
<th>DUNNING FLAG</th>
<th>MODIFIABLE FIELD</th>
</tr>
</thead>
<tbody>
<tr>
<td>This is a one position field. There are two possible entries:</td>
<td></td>
</tr>
<tr>
<td>Y = Yes Dunn</td>
<td></td>
</tr>
<tr>
<td>N = No, don't dunn (or stop dunning).</td>
<td></td>
</tr>
<tr>
<td>If the wrong flag was initially entered, either flag can be entered at any time. If this is the only field you need to change (nothing else is being modified), change it on OBDT. If you are changing the BILL PRINT FLAG from N to S, remember to change the DUNNING FLAG from N to Y at the same time.</td>
<td></td>
</tr>
</tbody>
</table>

<table>

<tr>
<td>This field allows for control of exactly what charges are</td>
<td></td>
</tr>
</tbody>
</table>
assessed. This field in PARS for ORSP (displayed on ARHT or OBDT) is most commonly blank (assess all charges) or filled with a A (don't assess any charges). Other acceptable flags are:

<table>
<thead>
<tr>
<th>Flag</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>waive interest charges</td>
</tr>
<tr>
<td>H</td>
<td>waive administrative costs</td>
</tr>
<tr>
<td>P</td>
<td>waiver penalty charges</td>
</tr>
<tr>
<td>IH</td>
<td>waiver interest and administrative costs</td>
</tr>
<tr>
<td>IP</td>
<td>waive interest and penalties</td>
</tr>
<tr>
<td>HP</td>
<td>waive administrative costs and penalties</td>
</tr>
</tbody>
</table>

There are no restrictions on changes. You can modify the field to any acceptable flag. If you want to change the contents of the field from an absolute value to spaces (assess all charges) enter an asterisk (*) in this field when doing your BILLING DOCUMENT MODIFICATION. This is because a blank field on the DOCUMENT INPUT or LINE SCREEN in a BILLING DOCUMENT MODIFICATION is interpreted by the system as no change wanted (i.e., you only complete the fields you want to change). The asterisk is interpreted by the system as a request to fill this field with spaces. If this is the only change you need to make, change this field on OBDT.

<table>
<thead>
<tr>

</table>

The amount of a receivable can be increased or decreased. This field on the BILLING DOCUMENT LINE SCREEN is completed with the amount you want to increase or decrease that specific line by. See RCM 9.10.134 for
specific instructions on modifying amounts. Line amount totals can be secured from the ARLT table record for the receivable by subtracting the DOC LINE CLOSED AMT field from the DOC LINE ART field.

| **I/D**<br>(INCREASE/DECREASE INDICTOR) | This is not a field to be modified; however, it is an instruction related to an AMOUNT MODIFICATION. If there is an entry in the BILLING DOCUMENT LINE AMOUNT field this field must be completed with an I (increase this line of the receivable by the amount entered in the AMOUNT field) or a D (decrease this line of the receivable by the amount entered in the AMOUNT.) See RCM 9.10.134 for directions on modifying an amount. |
| **SOURCE (SOURCE CODE)** | MODIFIABLE FIELD |
| | This is a four position field. All four positions must be completed. Any existing SOURCE CODE can be modified to any SOURCE CODE valid in PARS. The PARS SRCE table contains a complete list of all SOURCE CODES valid in PARS. Be careful not to use any SOURCE CODE designated as belonging to SUBD or DBD on the SRCE table. The current SOURCE CODE for a receivable can be viewed on the ARCH or ARLT table. |
| **TYPE OF OVERPAYMENT** | MODIFIABLE FIELD |
| | This is a three position field. All three positions must be completed with any existing TYPE OF OVERPAYMENT CODE valid in PARS. The PARS TYOP table contains a complete list of all TYPE OF OVERPAYMENT CODE valid in PARS. Be careful not to use any TYPE CODE designated as belonging to SUBD or BDB. The current TYPE OF OVERPAYMENT CODE for a receivable can be viewed on ARCH or ARCT table. |
| **ACTION OUT** | This field is completed if you are DECREASING the amount of the receivable with your BILLING DOCUMENT MODIFICATION. The codes you would use are ACTION OUT codes with a first position of 8 or 9 (correction codes) and a final position of A and ACTION OUT Code 88T. (B’s are used for CASH RECEIPT DOCUMENT MODIFICATIONS). Use 12A if you are reducing a receivable because the |
9.10.134 Modification To Increase/Decrease Amounts

You may want to increase the amount of your receivable because:

- an erroneously low amount was entered when it was established, or
- an additional overpayment was discovered after the receivable was established but before the overpayment letter was released on the original amount.

You may want to decrease the overpayment because:

- An erroneously high amount was entered when it was established,
- a treasury check or EFT payment was returned reducing part or all of the overpayment,
- an error exists in an identifying field (DOCUMENT ID or PAYOR NUMBER, see RCM 9.10.140 for more information on this type of case) on the BILLING DOCUMENT and you want to remove it by modifying the document to zero, or
- the overpayment is no longer valid and you want to remove it by modifying the amount to zero.

Unless you can remove a BILLING DOCUMENT in the same month it is posted, you must remove it by MODIFYING the amount to zero. CANCEL a BILLING DOCUMENT only if it can be removed in the same month it was established.

Take the following steps to MODIFY the amount of a BILLING DOCUMENT:

- Sign on the PAR system as described in RCM 9.10.50.
- Secure a STARTUP screen by typing DDB after signon has been successfully completed.
  
  - Enter D in the MODE OF OPERATION field.
    
    - Enter B2 under TRANS,
    - Enter 2000 under DIVISION,
    - Enter the 11 position billing document number requiring modification under ID NUMBER.
• Enter your four character PAR identification code and your four character PAR password in the USER ID field.

• Press ENTER. A BILLING DOCUMENT INPUT SCREEN will be displayed.

• Move the cursor to the ACTION field within the BILLING DOCUMENT INPUT SCREEN (not the ACTION field on the document action line) using a tab key and type M.

• Move the cursor to the TOTAL field using a tab key and enter the total amount of the change that will be requested on all the lines entered with this BILLING DOCUMENT MODIFICATION. This field must always be numeric and be completed with a decimal point and two positions after the decimal point. Never enter commas, dollar signs or cent signs.

• Add together all the increase amounts (i.e., all the amounts for lines for which I will be used as the INCREASE/DECREASE INDICATOR). If you only will have lines with increases in this MODIFICATION this is the amount you enter.

• Add together all the decrease amounts (i.e., all the amounts for lines for which D will be used as the INCREASE/DECREASE INDICATOR). If you will only have lines with decreases in this MODIFICATION, this will be the amount you will enter.

• If you will have both increases to lines and decreases to lines in this MODIFICATION, ascertain the total amount of the increases, then the total amount of the decreases. Subtract the smaller amount from the larger amount. Enter the remainder in this field. If the amount of the increases is equal to the amount of the decreases enter 0.00 in this field.

• Press the ENTER key. A BILLING DOCUMENT LINE SCREEN will be displayed.

• Type the line number of the BILLING DOCUMENT LINE you wish to MODIFY in the LINE NO. field.

• Move the cursor using the tab key to the AMOUNT field. Type the amount by which you wish to increase or decrease the line of the BILLING DOCUMENT indicated in the LINE NO. field.

Always enter the amount using a decimal point with two numeric positions completed after the decimal. Never enter commas, dollar signs or cent signs.

• Move the cursor to the I/D field using the tab key. Type I if you are increasing the BILLING DOCUMENT LINE or D if you are decreasing it.
• Move the cursor to the ACTION OUT field using a tab key. Type in the appropriate action out code (see RCM 9.10.132) if you are decreasing the receivable. If you are increasing the receivable do not complete this field.

• Following completion of the ACTION OUT field perform the QUICK EDIT process as described in RCM 9.10.61. It is essential to correct any errors which may be detected. The PAR system will not process a modification in which an error is present.

• Just as creating a billing document requires approval and scheduling, so does modification. Procedures for these functions can be found in RCM 9.10.63 and 64.

9.10.135 Modification To Add Lines

BILLING DOCUMENT LINES are added to a receivable after it has been established in PARS:

- If the overpayment was erroneously established without the supplemental annuity portion;

- If the overpayment was originally established in PARS for regular annuity only and an additional supplemental annuity overpayment is discovered before the overpayment letter is released; or

- If OPR receives payment for a receivable that includes charges not assessed by PARS (for example, from cases referred to the Department of Justice for collection).

A regular annuity overpayment LINE cannot be added to a BILLING DOCUMENT by MODIFICATION. This is because special accounting entries must be established to deal with the fund split of the entry on that line. Those entries can only be established in PARS when a BILLING DOCUMENT is initially processed, not by a document MODIFICATION.

Do not manually create BILLING DOCUMENT LINES for interest, penalty or administrative cost when a receivable should have been assessed charges but was not. This would occur if the WAIVER FLAG was erroneously coded A instead of being left blank. If the COLLECTION DUE DATE and the WAIVER EXPIRATION DATE are correct you need only change the WAIVER FLAG and PARS will calculate the charges due back to the correct date and create the BILLING DOCUMENT LINES for the charges in the next production run. If the dates are not correct, correct the WAIVER EXPIRATION DATE in the WAIV table (See RCM 9.10.167) before MODIFYING the BILLING DOCUMENT to correct the COLLECTION DUE DATE and WAIVER FLAG. If only the WAIVER FLAG needs to be changed, change it on the OBDT table (See RCM 9.10.163).

To create a LINE by BILLING DOCUMENT MODIFICATION:
SIGNON

- Sign on the PAR system as described in RCM 9.10.50.
- Type DDB on the screen displaying the message "V2 ENTER NEXT TASK CODE."

Access the STARTUP SCREEN

- Press the ENTER key. The STARTUP screen will now be displayed.
- Type D in the MODE of OPERATION FIELD
- Complete the DOCUMENT ID line.
  - Type B2 in the TRANS field (transaction code).
  - Type 2000 in the DIVISION field.
  - Type the ID number of the BILLING DOCUMENT you wish to add the LINE to in the ID number field.
- Move the cursor to the USER ID field using a tab key. Type your eight position USER ID.
- Press the ENTER key. The BILLING DOCUMENT INPUT screen will now be displayed.

BILLING DOCUMENT INPUT SCREEN

- Move the cursor to the ACTION field within the BILLING DOCUMENT INPUT SCREEN (not the ACTION field on the document action line) and type M.
- Move the cursor to the TOTAL field and type in the total amount you are adding to the established billing document (if the only action you are taking in your MODIFICATION is adding LINE 002, the contents of this field will be the same as the AMOUNT field on LINE 002).
- Press the ENTER key. A BILLING DOCUMENT LINE SCREEN will now be displayed.

Modify the BILLING DOCUMENT LINE SCREEN

The table below shows the field to be completed and the proper entries to be made on the BILLING DOCUMENT LINE SCREEN for the modifications shown below. Each field is shown in the order it is accessed as entries are made. Move the cursor to the first position of each field before making entries:

A. Creating a LINE for a supplemental annuity overpayment
B. Creating an interest LINE
C. Creating an administrative cost LINE
D. Creating a penalty LINE

SEE EXHIBIT 63

QUICK EDIT

Quick edit the document transaction as described in RCM 9.10.108.

APPROVAL AND SCHEDULING

Hold the transaction for approval and scheduling as described in RCM 9.10.63-64.

9.10.136 Modification to Remove Lines from a Billing Document

You would want to remove a line from a BILLING DOCUMENT if:

- an error was made in adjudication and a portion (regular annuity or supplemental annuity) of the overpayment is erroneous,
- interest, administrative cost and/or penalty was charged erroneously,
- checks or EFT payments may have been returned, totally eliminating the overpayment, in a month other than the month the overpayment was established (i.e., you want to remove all your overpayment LINES).

In order to remove a LINE from a BILLING DOCUMENT (overpayment) you have to MODIFY the AMOUNT displayed on the ARLT screen in the DOC LINE AMOUNT field for the specific LINE of the receivable involved. If a CASH RECEIPT DOCUMENT has been processed and an amount now appears in the DOC LINE COLLECTED AMT, DOC LINE CLOSED AMT and/or DOC LINE WRITTEN OFF AMT fields on ARLT the BILLING DOCUMENT LINE cannot be removed. However, if all CASH RECEIPT LINES referencing the BILLING DOCUMENT LINE are removed first, you will be able to remove the BILLING DOCUMENT LINE (see RCM 9.10.140 for directions on removing a CASH RECEIPT DOCUMENT LINE).

Once you process a MODIFICATION to decrease a LINE by the full amount that LINE will completely disappear from ARLT. If you MODIFY the full established amount off all the LINES of any BILLING DOCUMENT, the ARCH, ARHT, ARLT, PDIT and OBDT records for that receivable will completely disappear.

If an overpayment is being completely removed and charges have been assessed, remove the charge LINES when you remove the regular and/or supplemental annuity overpayments.
DATA ENTRY FOR REMOVING BILLING DOCUMENT LINES

SIGNON

- Sign on the PAR system as described in RCM 9.10.50.
- Type DDB on the screen displaying the message "V2 ENTER NEXT TASK CODE."

STARTUP SCREEN

- Press the ENTER key. The STARTUP screen will now be displayed.
- Type D in the MODE of OPERATION FIELD
- Complete the DOCUMENT ID line.
  - Type B2 in the TRANS field (transaction code).
  - Type 2000 in the DIVISION field.
  - Type the ID number of the BILLING DOCUMENT you wish to add the LINE to in the ID number field.
- Move the cursor to the USER ID field using a tab key. Type your eight position USER ID.
- Press the ENTER key. The BILLING DOCUMENT INPUT screen will now be displayed.

BILLING DOCUMENT INPUT SCREEN

- Move the cursor to the ACTION field within the document fields (not the ACTION field on the document action line) using the type M.
- Move the cursor to the TOTAL field and type in the total amount you are removing from the established billing document.
- Press the ENTER key. A BILLING DOCUMENT LINE SCREEN will now be displayed.

BILLING DOCUMENT LINE SCREEN

- Type the LINE NUMBER of the BILLING DOCUMENT LINE you are removing in the LINE NO field of the first blank document line displayed (the cursor will already be in the correct position)
• Move the cursor to the AMOUNT field using a tab key and type the amount of the BILLING DOCUMENT LINE (DOC LINE AMT from ARLT) you are removing this BILLING DOCUMENT MODIFICATION.

• Move the cursor to the I/D field using a tab key, and type D (decrease).

• Move the cursor to the ACTION OUT field using a tab key and enter the correct three position ACTION OUT CODE that describes why you are removing part or all the BILLING DOCUMENT.

QUICK EDIT

• Quick edit the document transaction as described in RCM 9.10.108.

APPROVAL AND SCHEDULING

• Hold the transaction for approval and scheduling as described in RCM 9.10.63-64.

9.10.137 Modification To Add Text Type

This field is only entered by examiners in the overpayment recovery section (OPR) of the division of compliance (DOC).

Text type is to be established or changed only by entering the proper code on INBT (see RCM 9.10.82 for initial entry or 9.10.162 for corrections).

9.10.138 Changing Payor Name And/Or Address After The Billing Document Is Processing

Just as with an unprocessed BILLING DOCUMENT, correcting a PAYOR NAME and/or PAYOR ADDRESS after the BILLING DOCUMENT is processed requires two separate actions:

• correcting the PAYR and PDIT (if necessary) record because the name and address is taken from that data when installment bills or dunning notices are released and it is accessed there for some reports; and

• MODIFYING the BILLING DOCUMENT for the overpayment to establish the new PAYOR NAME (except for the second line) and/or address in PARS.

DATA ENTRY IN SEQUENCE FOR CHANGING NAME AND ADDRESS

Signon

• Sign on to the PAR system as directed in RCM 9.10.50.
• When the message "V2, ENTER NEXT TASK CODE" is displayed type MTI, press the space bar once, then type PAYR.

• Press the ENTER key. A blank PAYR screen will now be displayed.

PAYR SCREEN

• The cursor will be positioned in the ACTION field of the table action line. An S (SCAN) will be displayed in that field and PAYR will be displayed in the TABLE ID field. Move the cursor to the USERID field using a tab key and type your PARS USERID.

• The cursor will now be positioned in the PAYOR NUMBER field. Type the complete eleven position PAYOR NUMBER for the receivable involved.

• Press the ENTER key. The PAYR record for your receivable will now be displayed.

• The cursor will again be positioned in the ACTION field of the table action line. Type C (CHANGE).

• Move the cursor to the field (or fields, sequentially,) requiring change:
  • PAYOR NAME (first line)
  • PAYOR ADDRESS LINE 1
  • PAYOR ADDRESS LINE 2
  • PAYOR ADDRESS LINE 3 (city, state and/or zip code fields).

Type in the correct data. If the new information typed in the field is shorter than the previous entry and extra characters are displayed, erase them by pressing the space bar once for each character that needs to be removed. See RCM 9.10.56 for complete address instructions. See RCM 10.2 Appendix B for correct state abbreviations to use.

• Check your entries and make sure the address is correct and displayed as it should be for mailing purposes. If it is correct, press the ENTER key.

• The message "01-*LO31 ALL LINES CHANGED" will be displayed. If there are changes to be made on PDIT (the 2nd PAYOR NAME line has to be added, changed or removed) access the PDIT screen by doing the following:
  • Type L (leaf) in the ACTION field of the table action line.
  • Type PDIT in the TABLEID field.
• Press the ENTER key. Proceed to the following section on the PDIT screen for further instructions.

If there are no further changes needed in the PAYOR NAME, exit PAYR by doing the following.

• Type E in the ACTION field of the action line.

• Press the ENTER key.

• Proceed to section after the following section for directions on accessing the STARTUP SCREEN to enter the BILLING DOCUMENT MODIFICATION.

PDIT SCREEN

After leafing to the PDIT SCREEN from the PAYR SCREEN, you will be viewing the PDIT record with the same PAYOR NUMBER as the screen you just left.

If there are multiple billing documents associated with a PAYOR NUMBR, the first one in sequence will be displayed. Press the ENTER key and refill the screen until the record with the correct BILLING DOCUMENT ID is shown, then take the following steps.

• Type C in the ACTION field of the document action line.

• Move the cursor to the second PAYOR NAME LINE using a tab key (the first PAYOR NAME LINE and the ADDRESS LINES will reflect the changes just made on the PAYR record).

• Type in the second PAYOR NAME line if you are adding or changing it (remove any extra letters displayed by pressing the space bar, if you are changing the name line)

• Press the space bar once for each letter displayed if you are removing the second name line.

The name and address should now appear as you would want it on a mailing envelope.

• Press the ENTER key. The message "01-*LO31 ALL LINES CHANGED" will be displayed.

• Type E in the ACTION field of the table action line.

• Press the ENTER key. The message "V2 ENTER NEXT TASK CODE" will appear. Accessing and completing the STARTUP SCREEN

• Type DDB.
• Press the ENTER key. The STARTUP SCREEN will be displayed.

• Type D in the MODE OF OPERATION field.

• Move the cursor to the DOCUMENT ID LINE.
  • Type B2 in the TRANS field.
  • Type 2000 in the DIVISION field.
  • Type the eleven position ID NUMBER of the BILLING DOCUMENT you are MODIFYING.

• Move the cursor to the USERID field and type your USERID

• Press the ENTER key. The BILLING DOCUMENT INPUT SCREEN will be displayed.

BILLING DOCUMENT INPUT SCREEN

• Move the cursor to the ACTION field within the BILLING DOCUMENT portion of the screen (not the ACTION field on the document ACTION line) using a tab key. Type M. This is the only entry you need to make to pull the PAYOR NAME/ADDRESS changes through the system you just made on PAYR/PDIT.

• Make any other changes, if any other changes are needed.

• Home the cursor back to the ACTION field of the document action line.

QUICK EDIT

• Perform Quick edit as described in RCM 9.10.61.

APPROVAL AND SCHEDULING

• Follow directions for approval and scheduling in RCM 9.10.63 and 64.

RESULTS

• After the document transaction has been processed the corrected address can be viewed on ARHT. Remember ARHT can only display the first PAYOR NAME LINE

9.10.139 Removing And Reentering A Nonmodifiable Field

In the PAR system there are two reasons why fields can't be modified - either they are key identifying fields (PAYOR NUMBER or DOCUMENT ID, see RCM 9.10.140) or the fields are used for budgeting/accounting purposes and generate accounting, budgeting or general ledger data by the document transaction. Within certain limitations, to correct
budgeting/accounting fields, you can remove the entire DOCUMENT LINE (with the wrong data) and recreate the line with the correct data.

Restriction for Use

- To reduce the line to zero, no transactions can be posted against it. All LINES of CASH RECEIPT DOCUMENTS referring to the BILLING DOCUMENT LINE you wish to MODIFY to ZERO must themselves be modified to zero first (see RCM 9.10.146 for direction to MODIFY a CASH RECEIPT LINE to zero).

- The fields to be changed must be LINE fields (they appear on the BILLING DOCUMENT LINE SCREEN and are viewable on the ARLT (accounts receivable line table) after processing.

- You cannot remove a line 001 and restore it to change the FUND field from 8012 to *PAR. This is because a fund split (*PAR funds are divided in PARS into social security and non social security components) can only be established during initial document processing and not from a document MODIFICATION.

- If you use this method to correct a TRANSTYPE field from NA to RA (reactivated uncollectible) the MODIFICATION will not remove the receivable from the uncollectible file. Therefore, to correct this situation you would have to MODIFY the BILLING DOCUMENT with the bad TRANTYPE to zero and enter a new BILLING DOCUMENT with the RA TRANTYPE.

DATA ENTRY INSTRUCTIONS

Signon

- Sign on to the PAR system as described in RCM 9.10.50.

- When the message "V2 ENTER NEXT TASK CODE" appears type DDB.

- Press the ENTER key. A blank STARTUP screen will appear.

STARTUP SCREEN

- Type D in MODE OF OPERATION field.

- Complete the DOCUMENT ID line.
  - Type B2 in the TRANS field.
  - Type 2000 in the DIVISION field.
  - Type the ID NUMBER of the DOCUMENT your are going to MODIFY in the ID NUMBER field.
• Move the cursor to the USERID field using a tab key, and type your USERID.

• Press the ENTER key. A blank BILLING DOCUMENT INPUT SCREEN will now be displayed.

BILLING DOCUMENT INPUT SCREEN

• Move the cursor to the ACTION field within the BILLING DOCUMENT INPUT SCREEN (not the one on the document action line), using a tab key, and type M.

• Move the cursor to the TOTAL field using a tab key and type 0.00.

• Press the ENTER key. A blank BILLING DOCUMENT LINE SCREEN will appear.

BILLING DOCUMENT LINE SCREEN

• Type the LINE NUMBER of the DOCUMENT LINE on which you wish to change the DATA in the LINE NO field.

• Move the cursor to the AMOUNT field using a tab key and type the full amount of the DOCUMENT LINE you are going to remove and recreate. This amount is displayed in the DOC LINE AMOUNT field on the ARLT.

• Move the cursor to the I/D field using a tab key, and type D (decrease).

• Move the cursor to the ACTION OUT field and type the appropriate BD correction ACTION OUT CODE.

• Again type the LINE NUMBER of the DOCUMENT LINE you are changing in the LINE NO field of the second blank document line displayed (the cursor will have moved there after you completed the entry in the ACTION OUT field). This is because, in this particular type of transaction, you are deleting and reentering the same DOCUMENT LINE. See RCM 9.10.135 for specific field entries to add lines.

• Move the cursor to the FUND field and type the correct fund for the DOCUMENT LINE you are reestablishing. Since you are reestablishing this LINE all fields have to be completed on the line as you would for an initial billing document.

• Move the cursor to the TRAN TYPE field and type the correct TRANSACTION TYPE for the BILLING DOCUMENT LINE you are reestablishing (a print of the ARLT screen for that LINE is helpful when you are doing this).

• In the ORG/SUB field type 2000 if you are reestablishing line 001 or 002 or 1600 if you are reestablishing a charge line. Press the field tab key and type the two position unit identification code entered with the original document (displayed on the ARLT screen).
• Type the correct code in the **REV SRCE/SUB field** if you are reestablishing a charge line.

• Use the line tab key to move the cursor to the **BOC/SUB field** and type 4220 if you are reestablishing line 001 or 002.

• Use the line tab key to move the cursor to the **AMOUNT field**. Type the amount of the LINE (same amount that was entered in the AMOUNT field in the first line completed on the screen).

• Use the field tab key to move the cursor to the **I/D field** and type I.

• Use the line tab to move the cursor to the **SOURCE field** and type the correct four position source code for the overpayment (displayed on the ARLT screen as previously established).

• Type the correct three position type of overpayment code in the **TYPE OF OVERPAYMENT field** (displayed on ARLT screen as previously established).

**QUICK EDIT**

• Perform QUICK EDIT as described in RCM 9.10.61. The following message will be displayed at the bottom of the BILLING DOCUMENT LINE SCREEN "02-BD01W-NEW LINE ADDED TO AR".

**APPROVAL AND SCHEDULING**

• Follow directions for approval and scheduling in RCM 9.10.63 and 64.

**RESULTS**

After the document transaction is processed, the LINE will be displayed in ARLT with the correct information. An activity line will be displayed on ARCL with an ACTIVITY CODE of BA and a transaction amount of 0.00.

**9.10.140 Correcting Payor Number And Billing Document ID After Processing**

There is no way to change a PAYOR NUMBER and/or BILLING DOCUMENT ID on a BILLING DOCUMENT after it had been processed. These are primary identifiers for overpayments in PARS.

Do not take any corrective action if a BILLING DOCUMENT ID is incorrect unless the TRANS CODE is not B2 but it should be. It would be counter productive to remove a processed billing document from the PAR system and attempt to restore the information on a new BILLING DOCUMENT just to correct the unit identification, examiner number.
or initials, serial calendar date, last digit of the year and/or counter on a BILLING DOCUMENT ID.

If the PAYOR NUMBER is incorrect, action must be taken to close out the BILLING DOCUMENT and establish one under the correct PAYOR NUMBER. This field is the only link to the DEBTOR and claim folder and, as such, it must be correct.

If there is a COLLECTION DUE DATE present on ARHT and OBDT records for the BILLING DOCUMENT that will be closed, and the current date is equal to or greater than that date, send the case to the overpayment recovery section (OPR) for corrective action.

Check if an RECR, INBT and/or AREF record exists on the PAYOR NUMBER/BILLING DOCUMENT ID you are closing out. Print a copy of the table records that exist for the BILLING DOCUMENT you are closing. After your new BILLING DOCUMENT is established create new records for the new BILLING DOCUMENT.

The following are the main steps you will take in closing out a receivable with a bad PAYOR NUMBER and reopening a new BILLING DOCUMENT with a correct PAYOR NUMBER.

1. Take prints of ARHT ARLT and ARCL screens for the BILLING DOCUMENT
   - If any exist also take prints of RECR, INBT and AREF records.

2. PAYR
   - Enter new PAYOR NUMBER in COMMENTS field of the bad PAYOR record.
   - Create a new PAYR record

3. PDIT
   - If cash receipts have been posted to the receivable with the bad PAYOR NUMBER, change the old PDIT record to display the new PAYOR NUMBER and BILLING DOCUMENT ID at the bottom of the screen.
   - Enter a new PDIT record using the new PAYOR NUMBER/BILLING DOCUMENT ID NUMBER, displaying the old PAYOR NUMBER/BILLING DOCUMENT ID at the bottom of the screen.

4. DOCUMENT PROCESSING
   - MODIFY the amount of the bad BILLING DOCUMENT to zero, or cancel it if it meets criteria
   - Establish a new BILLING DOCUMENT for the overpayment
5. **After Establishment of the New BILLING DOCUMENT**

   - Modify the new BILLING DOCUMENT to add any necessary interest, administrative cost or penalty lines.
   - Establish any necessary records in the following tables:
     - RECR
     - INBT
     - AREF
   - Enter WAIVER EXPIRATION DATE in the WAIV table record consistent with the COLLECTION DUE DATE, if any.
   - Take any necessary action with the overpayment.

**Detailed instructions on how to do steps 1-5 follow:**

**Removing a BILLING DOCUMENT with a bad PAYOR NUMBER and reestablishing the receivable when no cash receipt documents exist. This includes cases where all cash receipt documents posted have been completely removed by CANCELLATION or MODIFICATION.**

- Print copies of the ARHT, ARLT and ARCL records for the BILLING DOCUMENT you are going to remove. You will use these to:
  - document the folder on the change from the bad PAYOR NUMBER/TRANS CODE to the correct one (staple a note to the prints showing the new PAYOR NUMBER/BILLING DOCUMENT ID for the overpayment);
  - extract information for the new BILLING DOCUMENT you will establish for the overpayment.
- If a receivable is delinquent, it is past the collection due date, this corrective action should be taken by OPR.

**PAYR Record**

- Establish a new record with a correct PAYOR NUMBER if that field is incorrect.
  - Access a blank PAYR record following directions in RCM 9.10.56.
  - Type S in the ACTION field of the table action line.
  - Move the cursor to the USER ID field using a tab key and type your USER ID.
The cursor will have moved to the **PAYOR NUMBER field**. Type in the incorrect PAYOR NUMBER.

Press the ENTER key. The PAYR record that was established with the incorrect PAYOR NUMBER will be displayed.

- Type C in the **ACTION field** of the table action line.
- Move the cursor to the **COMMENTS field** and type "NOW (PAYOR NUMBER.)"
- For example: NOW
- Press the ENTER key.
- Type A in the **ACTION field** of the table action line.
- Move the cursor to the PAYOR NUMBER FIELD and type the correct PAYOR NUMBER.
- Move the cursor to the COMMENTS field and type "PREV" followed by the incorrect PAYOR NUMBER
- Make any other changes to the record if any are needed.
- Press the ENTER key and the record will be added under the correct PAYOR NUMBER. The message "*L030 ALL LINES ADDED" will be displayed at the bottom of the screen.
- Type L in the **ACTION field** of the table action line.
- Type PDIT in the **TABLE ID field**.
- Move the cursor to the **PAYOR NUMBER field** and type over the necessary characters displayed to restore the incorrect PAYOR NUMBER.
- Press the ENTER key.

**PDIT RECORD**

- If you corrected the PAYOR NUMBER and accessed PDIT from the PAYR table following the previous instructions you will be viewing the PDIT record for the bad PAYOR NUMBER.
- Type A in the **ACTION field** of the table action line.
- Move the cursor to the **PAYOR NUMBER field** and type the correct PAYOR NUMBER.
• Type in the **new** BILLING DOCUMENT ID for the overpayment.

• Check the rest of the fields on PDIT, make any corrections necessary.

• Move the cursor, using the line tab key, to **OTHER PAYOR NAME #1 field:**
  
  • Type the word "previous" followed by the BILLING DOCUMENT NUMBER previously used for the receivable.

  • Press the field tab key to move the cursor to the #2 field across from the PAYOR NAME #1 field and type the incorrect PAYOR NUMBER previously used for the overpayment.

  • Press the ENTER key. The message "L030 ALL LINES ADDED" will be displayed.

• Type E in the **ACTION field** of the table action line.

**Transition to Document Modification**

• Press the ENTER key. The message "V2 ENTER NEXT TASK CODE" will be displayed.

• Type DDB.

• Press the ENTER key. You are now viewing the STARTUP screen.

**BILLING DOCUMENT TRANSACTIONS**

There are two BILLING DOCUMENT TRANSACTIONS you will have to enter now:

1. One to remove the BILLING DOCUMENT with the bad PAYOR NUMBER, and

2. One to establish the overpayment in PARS with the correct PAYOR NUMBER.

  1. Remove the BILLING DOCUMENT with the bad PAYOR NUMBER

     • Type D in the **MODE of OPERATION field**.

     • In the DOCUMENT ID line:

       • type B2 in the **Tran field**.

       • type 2000 in the **DIVISION field**.

       • type the ID number of the document you are going to remove in the **ID NUMBER field**.
• Move the cursor to the **USERID field** using a tab key and type your USERID.

• Press the ENTER key. A blank BILLING DOCUMENT INPUT SCREEN will be displayed.

**BILLING DOCUMENT INPUT SCREEN**

• Move the cursor using a tab key to the **ACTION field** within the document screen (not the one on the document action line) and type M.

• Move the cursor to the **TOTAL field** and enter the amount displayed in the TOTAL AMT field from the ARHT screen for the BILLING DOCUMENT you are removing.

• Press the ENTER key. You will now be viewing a blank BILLING DOCUMENT LINE SCREEN.

**BILLING DOCUMENT LINE SCREEN**

Take the following steps for each open line of the BILLING DOCUMENT you are removing. Refer to the screen prints taken from the accounts receivable line table (ARLT) you took before starting.

• Type the line number of the BILLING DOCUMENT LINE to be removed in the **LINE NO field**

• Move the cursor to the **AMOUNT field** using a tab key and enter the amount shown on the ARLT printout in the DOC LINE AMT field for the document line you are closing.

• Move the cursor to I/D field using a tab key and type D.

• Move the cursor to the **ACTION OUT field** using a tab key and type 24A.

Repeat the above process for every line of the BILLING DOCUMENT you are removing including INTEREST, ADMINISTRATIVE COST and PENALTY.

• **QUICK EDIT** the document according to instructions in RCM 9.10.61.

• Type H in the **ACTION field of the document action line** to hold it in the suspense file for approval and scheduling.
2. Establish the overpayment with the new PAYOR NUMBER/BILLING DOCUMENT ID.

- Type D in the MODE of OPERATION field.
- In the DOCUMENT ID line:
  - Type B2 in the TRANS field.
  - Type 2000 in the DIVISION field.
  - Type the new BILLING DOCUMENT ID NUMBER in the ID NUMBER field.
- Your USERID should still be displayed in the USERID field from the previous transaction. Press the ENTER key. A blank BILLING DOCUMENT INPUT SCREEN will be displayed.

**BILLING DOCUMENT INPUT SCREEN**

The following directions assume everything, except the PAYOR NUMBER, was correct on the previous billing document. If something else was wrong, substitute the correct information when the directions tell you to enter information from the previous BILLING DOCUMENT. Refer to the ARHT and ARLT printout from the document you MODIFIED to zero.

- Type the transaction code displayed on the ARLT printout in the TRANS TYPE field.
- Move the cursor to the ACTION field within the document and type E.
- Type the amount displayed in the BILLED AMT field on your ARHT printout in the TOTAL field. If there were interest, administrative cost or penalty lines on the BILLING DOCUMENT you are restoring you will have to MODIFY the BILLING DOCUMENT after it is processed (see RCM 9.10.135). Charge lines cannot be entered on an initial BILLING DOCUMENT.
- Move the cursor to the BILL PRINT FLAG field and type N. Type in the later of the COLLECTION DUE DATE or LAST DUN DATE displayed on the ARHT printout in the DUE DATE field. If nothing is displayed in that field in the printout leave it blank on the screen.
- Move the cursor to the DUNNING FLAG field.
• If there is an N displayed in the DUNNING FLAG field of the ARHT printout, type N in this field,

• If there is a Y in the DUNNING FLAG field on ARHT but 2 notices have already been released (DUNNING COUNT field on the ARHT printout) type N in this field to prevent further notices from being released.

• If there is a Y in the DUNNING FLAG field on ARHT; less than 2 notices have been released; the WAIVER FLAG field is blank on the printout, and interest, administrative cost and/or penalty amounts have been charged, type N in this field. You will change this to a Y if you modify your new BILLING DOCUMENT to add interest, penalty and/or administrative cost lines.

• If there is a Y in the DUNNING FLAG field, less than 2 notices have been released and the WAIVER FLAG field is blank, type Y in this field.

• If the WAIVER FLAG field on the ARHT printout is blank leave the WAIVER FLAG field on the BILLING DOCUMENT blank; if it is completed, type the code displayed in the field on the ARHT printout in the WAIVER FLAG field.

• Type the newly established correct PAYOR NUMBER in the PAYOR NUMBER field.

• Type the cause of overpayment from the ARHT printout in the CAUSE OF OVERPAY field.

• Press the ENTER key. A blank BILLING DOCUMENT LINE SCREEN will appear.

BILLING DOCUMENT LINE SCREEN

You will have to recreate any regular annuity overpayment (line 001) or supplemental annuity overpayment (line 002) associated with the billing document you removed. Use the ARLT printouts. Remember any interest, administrative cost and/or penalty lines must be added by modification after this document is processed (see RCM 9.10.135). They cannot be added on an initial billing document transaction.

• Type the line number of the first line of your restored billing document in the LINE NO field.

• Move the cursor to the FUND field using a tab key and type the correct fund for the overpayment line.
  • *PAR for line 001
  • 8012 for line 002

• Move the cursor to the ORG/SUB field using a tab key,
• Type 2000
• Press the field tab key
• Type your two position unit ID.

• Move the cursor to the **BOC/SUB field** using a tab key and type 4220.
• Move the cursor to the **AMOUNT field** and type the amount from the DOC LINE AMT field from the ARLT printout for the line number you entered in the LINE NO field.
• Move the cursor to the **SOURCE field** and type the source code on ARLT for the line you are restoring.
• Move the cursor to the **TYPE OF OVERPAYMENT field** and type the type of overpayment code displayed on ARLT for the line you are restoring.

• If the overpayment has both lines 001 and 002 complete the second line on the BILLING DOCUMENT LINE SCREEN, again following the preceding instructions.
• **QUICK EDIT** the document you just completed following the standard directions in RCM 9.10.61.

• **Put the document on HOLD in the suspense file and submit it for approval and scheduling as described in RCM 9.10.63 and 64.**

**After Your Document Transactions Process**

A. **Results**

1. **Old Billing Document**
   • ARHT record no longer exists
   • ARLT record no longer exists
   • OBDT record no longer exists
   • PDIT record no longer exists
   • ARCH record no longer exists
   • WROT record, if any, will not exist after the programs for that table are seen for the first time after the document is removed. This does not disappear instantaneously with document processing.
   • AREF record if any, will still exist on that table but the CURRENT BALANCE field will be blank. When the archive flag is changed to Y
(manually) the record will be archived the next time the referral programs are run.

- INBT record, if any, will still exist on that table until it is archived. The CURRENT BALANCE field will display zeros.

- RECR record, if any, will still exist until the record is archived.

- WAIV table record no longer exists.

- PAYR table record still exists and the COMMENTS field contains the new PAYOR NUMBER.

2. The New BILLING DOCUMENT

- ARHT record exists.

- ARLT record exists for lines 001 and/or 002. The BILLING DOCUMENT will now have to be modified to add interest, administrative cost or penalty lines if any existed on the document you removed (see RCM 9.10.135 for procedure on adding lines).

- WAIV record exists. The record must be changed to add the correct waiver expiration date and any other field data from the record that was removed.

- OBDT record now exists.

- PDIT record exists that displays the old PAYOR NUMBER/BILLING DOCUMENT ID at the bottom of the screen.

- ARCH record exists that displays the old PAYOR NUMBER/BILLING DOCUMENT

- If the date that was entered in the COLLECTION DUE DATE field is less than the current date by 60 days or more it should have been selected for a WROT record. If there are less than 60 days between the current date and the collection due date or if there is no collection due date (current entitlement, reclamation or on-going development case) there will be no record created on WROT.

- ARCL record now exists that shows the receivable established on the new PAYOR NUMBER/BILLING DOCUMENT ID.

- There will be no referral record created on AREF because no dunning count will exist when this record is created. If a referral record is needed you will have to manually establish it.
• There will be no INBT record mechanically created. If one is needed created on following standard procedure in RCM 9.10.82.

• There will be no RECR record mechanically created. If one is needed follow standard instructions in RCM 9.10.80.

Removing a BILLING DOCUMENT with a bad PAYOR NUMBER and reestablishing the receivable when cash receipt documents have been posted to it

Only the open portion of a BILLING DOCUMENT can be decreased by MODIFICATION. A BILLING DOCUMENT cannot be cancelled if it has cash receipts referred to it. In order to MODIFY the entire amount of a BILLING DOCUMENT to zero, or cancel it, all cash receipt documents referring to that BILLING DOCUMENT must be MODIFIED to zero or cancelled. Then those cash receipt documents would have to be reposted to the new BILLING DOCUMENT. Since this could be a considerable amount of work, especially if there has been an active recurring cash receipt or installment bill situation, with a risk of error in reposting, you will only be moving the open balance of the receivable to the new PAYOR NUMBER/BILLING DOCUMENT ID. The PDIT and ARCH records of the new BILLING DOCUMENT will display the old PAYOR NUMBER/BILLING DOCUMENT ID used for the overpayment at the bottom of those screens.

Data entry Instructions

Follow the previous directions except for the following additions.

PDIT

• When you access the old PDIT record:

  • Type C in the ACTION field of the table action line,

  • Move the cursor, using the line tab key to the OTHER PAYOR NAME #1 field

    • Type "NOW" followed by the new BILLING DOCUMENT ID you will be using for the overpayment.

    • Move the cursor to #2 field across from the OTHER PAYOR NAME #1 field using a tab key and type the new PAYOR NUMBER.

    • Press the ENTER key. The message "01-*L031 ALL LINES CHANGED" will be displayed at the bottom of the screen.
• Now you can follow the direction for adding the new PDIT record given in the preceding section. What you just entered will now be displayed on the ARCH record for the old BILLING DOCUMENT just as entered on the PDIT record.

BILLING DOCUMENT LINE SCREEN for the document transaction to close out the BILLING DOCUMENT with the incorrect PAYOR NUMBER

• In the AMOUNT field for each line you are closing refer to the ARLT print you took for the particular line. Subtract the DOC LINE CLOSED AMT (Combines the amounts in the DOC LINE COLLECTED AMT and DOC LINE WRITE OFF AMT FIELDS) from the DOC LINE AMT. Type the remainder in this field.

Otherwise follow the directions in the preceding section. The amount you close out on the old BILLING DOCUMENT will be the amount you establish on the new BILLING DOCUMENT.

RESULTS

The only change in results is that since you are not closing out this entire amount of the BILLING DOCUMENT, only the open amount only the ABDT record will disappear after processing.

9.10.141 Cancelling A Billing Document

CANCELLATION is a method of removing an overpayment from the PAR system completely. A BILLING DOCUMENT can only be CANCELLED if the transaction will be processed within the same month that the BILLING DOCUMENT was established (DOCUMENT DATE on the ARHT record). If the CANCELLATION cannot be processed within the same month the BILLING DOCUMENT was established you must remove it by MODIFYING the amount to zero. (see RCM 9.10.134.) You cannot cancel a BILLING DOCUMENT if a cash receipt has been posted to it (unless you first cancel or modify the CASH RECEIPT DOCUMENT(S) to zero amount.)

Take the following steps to CANCEL a BILLING DOCUMENT.

SIGNON

• Sign on to the PAR system as described in RCM 9.10.50.

• Type DDB on the screen when it displays the message "V2 ENTER NEXT TASK CODE".

• Press the ENTER key. The STARTUP screen will now be displayed.

STARTUP SCREEN

• Type D in the MODE OF OPERATION field.
• Complete the DOCUMENT ID line.
  • Type B2 in the TRANS field (TRANSACTION CODE).
  • Type 2000 in the DIVISION field.
  • Type the ID number of the BILLING DOCUMENT you wish to CANCEL in the ID NUMBER field.

• Move the cursor to the USER ID field using a tab key. Type your eight position USER ID.

• Press the ENTER key. A blank BILLING DOCUMENT INPUT screen will now be displayed.

BILLING DOCUMENT INPUT SCREEN

• Move the cursor to the ACTION field within the document screen (not the ACTION field on the document action line at the tip of the screen) using a tab key, and type X. No further entries are needed. Do not access the BILLING DOCUMENT LINE.

QUICK EDIT

• Quick edit the document transaction as described in 9.10.61.

APPROVAL AND SCHEDULING

• Hold the transaction for approval and scheduling as described in RCM 9.10.63 - 64.

RESULTS

After cancellation is processed all table records for the receivable will be deleted from the system including the case history line table (ARCL) record, except for those in the following list.

• The RECR record, if any, will not be removed until the N in the ARCHIVE FLAG field is manually changed to a Y.
  • Access the RECR record.
  • Type C in the ACTION field of the table action line.
  • Type your USERID in the USERID field.
  • Move the cursor, using a tab key, to the ARCHIVE FLAG field and type Y (yes, archive) over the N displayed.
• Press the ENTER key. The message "01-*L031 ALL LINES CHANGED" will be displayed.

The next time BFO archives records from RECR it will be removed. The CURRENT BALANCE and INT % fields will display the legend "NOT NUMBERIC".

• The AREF record if any, will still be present. The CURRENT BALANCE field will now be blank. The ARCHIVE flag will still be N. This record can only be removed by archiving. You will have to manually change the flag to Y.

• Access the AREF record.

• Type C in the ACTION field of the table action line.

• Type your USERID in the USERID field.

• Move the cursor, using a tab key, to the ARCHIVE FLAG field and type Y over the N displayed.

• Press the ENTER key. The message "01-*L031 ALL LINES CHANGED" will be displayed.

The record will be archived the next time that program is run for AREF.

• The INBT record, if any, will not be removed until general archiving/clearance programs are run. Once these are instituted they will be run annually. There is no ARCHIVE FLAG field on the INBT table.

• The WROT record, if any, will disappear the next time programming is run for that table. The entire table is emptied for processing, then documents meeting criteria are selected to refill it. A cancelled document would not be selected when the table is refilled.

• The vendor cross reference table (VXRF) should still have the billing document listed after cancellation. This table lists all documents associated to a specific PAYOR NUMBER. If, after entering S in the ACTION field of the table action line and your USERID in the USERID field you enter a PAYOR NUMBER the in the appropriate field and press enter the TRANS CODE, TRANSACTION DATE and DOCUMENT ID of all referenced documents should be displayed, including cancelled documents.

9.10.142 Modifying A Cash Receipt Document After It Has Been Processed In PARS

A. Type of CASH RECEIPT DOCUMENT THAT CANNOT BE MODIFIED

A processed CASH RECEIPT DOCUMENT that was generated by the write-off table (WROT) can never be MODIFIED or CANCELLED.
All receivable amounts written-off on WROT are entered into ORSP's uncollectable file. If that receivable amount must be reestablished on the PAR system, a new BILLING DOCUMENT with an RA TRANS TYPE must be entered to remove the amount from the uncollectable file. A CASH RECEIPT MODIFICATION or CANCELLATION would restore the balance on the PAR system but would not remove the amount from the uncollectable file.

B. Table Changes that can Impact CASH RECEIPT DOCUMENTS

CASH RECEIPT DOCUMENT data cannot be corrected by a change to a table record after the document has been processed (unlike some established BILLING DOCUMENT fields which can be changed by a table action).

If you entered table data to generate a CASH RECEIPT DOCUMENT, that data can be corrected on the table before the table records are processed to create cash receipt documents.

- For a CCIT record, processing is after 4:30, Monday through Friday.
- For a WROT record, processing is after 4:30, Monday through Friday.
- For RECR records, processing is usually the first business day of the month.

Changes to tables are accomplished by:

- Accessing the necessary table and record,
- Typing "C" in the action field of the table action line,
- Moving the cursor to the USER ID field and typing your USER ID,
- Moving the cursor to the field(s) that must be changed and typing over the contents of the field with the correct data (erasing extraneous characters with the space bar), and
- pressing the ENTER key.

Remember a change to the RECR table changes future CASH RECEIPT DOCUMENTS created, not documents already generated. See RCM 9.10.177, 9.10.182 and 9.10.184 for more specific information on changes to these tables.

C. Changes that can be made with a CASH RECEIPT DOCUMENT MODIFICATION

Make the following kinds of changes by processing a CASH RECEIPT DOCUMENT transaction to MODIFY an already processed CASH RECEIPT DOCUMENT.
• REDUCE the amount of the CASH RECEIPT posted due to data entry error, insufficient funds (bad check) etc.

• Increase the amount of the CASH RECEIPT posted, when the original amount posted was erroneously low.

• Apply unapplied cash to lines that have been increased or newly created on the BILLING DOCUMENT (for example: money is posted from the Department of Justice that is greater than the amount of the receivable thus creating an unapplied cash line on the cash receipt document.

• Remove unapplied cash lines after the cash has been dispersed.

• Within limitations, modify a line amount to zero and add it back with different entries in the non-modifiable fields.

D. Miscellaneous Information on CASH RECEIPT DOCUMENT MODIFICATIONS

• Do not attempt to MODIFY a CASH RECEIPT DOCUMENT while there is a document transaction with the same ID NUMBER on the suspense file (SUSF). You will not be able to enter it. A DOCUMENT ID on the SUSF must be unique. If you complete a START-UP screen to begin the process of MODIFYING a CASH RECEIPT DOCUMENT and the DOCUMENT ID you attempted to enter already exists on SUSF, the following edit message will be generated:

"A - *C031 - DUPLICATE DOCUMENT ID" and the system will not allow you to enter the CASH RECEIPT DOCUMENT INPUT SCREEN.

• When MODIFYING a CASH RECEIPT DOCUMENT to remove an UNAPPLIED CASH LINE that was created because more was remitted for the social security portion of outstanding payments, do not take the action until you are completing paperwork to transfer the funds (as a control).

• If you are going to completely remove a CASH RECEIPT DOCUMENT you must do it by MODIFYING the amount to zero and entering the appropriate action out code. Do not cancel a CASH RECEIPT DOCUMENT.

• You can obtain the CASH RECEIPT DOCUMENT NUMBERS referenced to a particular PAYOR NUMBER by scanning VXRF, the vendor (PAYOR) cross reference table. That table displays all documents referenced to the PAYOR NUMBER you enter in the KEY field.

• You can obtain the CASH RECEIPT DOCUMENT NUMBERS referenced to a particular BILLING DOCUMENT (overpayment) by scanning.

• ARCL (accounts receivable case history line table), or
• DXRF (document cross reference table)

ARCL will give you the most complete information displaying how much of the CASH RECEIPT DOCUMENT was posted to each existing line of the BILLING DOCUMENT and identifying the number of CASH RECEIPT LINES involved. Unapplied cash lines are not currently displayed on ARCL.

DXRF will display all CASH RECEIPT DOCUMENTS referenced to the BILLING DOCUMENT ID entered in the key TRANS CODE and TRANS NUMBER fields.

• Specific information needed from a previously processed CASH RECEIPT DOCUMENT can be secured from the CASH RECEIPT HEADER TABLE (CRHT) or the CASH RECEIPT LINE TABLE (CRLT). Helpful fields on CRHT are:
  • DEPOSIT NUMBER
  • DOC DATE (the date the transaction was processed, later modifications do not impact this date).
  • AMOUNT (total CASH RECEIPT DOCUMENT AMOUNT)

• Never manually enter more information than you have to on a document MODIFICATION. When you QUICK EDIT the document the system will bring up the missing document data from information stored in CRHT and CRLT from the original document. Let the system do the work for you and avoid the risk of making a mistake.

• Helpful fields on CRLT are:
  • the LINE NUMBER of each CASH RECEIPT LINE created;
  • the FUND the CASH RECEIPT LINE was applied to;
  • the amount of the CASH RECEIPT LINE;
  • the billing document TRANS CODE, ID NUMBER and LINE to which the amount of that CASH RECEIPT LINE was posted; and
  • the ACTION OUT CODE that identifies the type of liquidation that took place.

9.10.143 Cash Receipt Document Fields And Modification

The following is a list of CASH RECEIPT DOCUMENT fields used by ORSP. The narrative to the right of the field states if the field can be directly MODIFIED or must be completed when MODIFYING A CASH RECEIPT DOCUMENT. Directly MODIFIABLE
means an entry in the field on the MODIFICATION transaction will change the same field on the original transaction. Fields designated as NOT MODIFIABLE should never be completed on a CASH RECEIPT MODIFICATION.

FROM THE START-UP SCREEN

**TRANSACTION CODE (C2)**  NOT A MODIFIABLE FIELD (CASH RECEIPT DOCUMENT must be cancelled or MODIFIED to zero and a new CASH RECEIPT DOCUMENT entered)

**DOCUMENT ID NUMBER**  NOT A MODIFIABLE FIELD (there is no error in DOC ID format which would justify CANCELLING a CASH RECEIPT DOCUMENT or MODIFYING it to zero to correct)

**CASH RECEIPT INPUT SCREEN FIELDS**

<table>

</tr>
</tbody>
</table>
**DOCUMENT TOTAL**
This field contains the combined amount of all the line amount activities on your CASH RECEIPT MODIFICATION. This is **not** the total CASH RECEIPT amount after MODIFICATION.

1. Add together all increase line amounts on your transaction. If all your line amount changes are increases, enter this amount in the DOCUMENT TOTAL field.

2. Add together all decrease line amounts on your transaction. If all your line amount changes are decreases, enter this amount in the DOCUMENT TOTAL field.

3. If you have both line increases and decreases in your MODIFICATION transaction, determine which amount is larger, the combined increases or the combined decreases. Subtract the smaller amount from the larger amount and enter the difference in the DOCUMENT TOTAL field.

4. If the increase line amounts on your MODIFICATION transaction equal the decrease amounts, enter **0.00** in the DOCUMENT TOTAL field.

5. If your MODIFICATION did not involve an amount (example: MODIFYING the ACTION OUT CODE), you would leave this field blank. Currently, however, you would not MODIFY a CASH RECEIPT DOCUMENT to correct an ACTION OUT CODE.

**ACCOMPLISHED DATE**
**NOT A MODIFIABLE FIELD** *(never changed)*

If you are increasing the line amount and you are keeping the same code (for example, with an administrative offset, it is still an annuity offset, you just have more annuity than you previously thought) you do not need to enter the ACTION OUT CODE. The system will bring up the code from the original document line if you leave the field blank.

9.10.144 Basic Data Entry Instructions For Modifying A Cash Receipt Document

A. PREPARATION

Secure all the information you need for your MODIFICATION before you start accessing and completing the CASH RECEIPT DOCUMENT INPUT screens.

- Know the ID NUMBER of the CASH RECEIPT document you are MODIFYING.
- Know the numbers of the CASH RECEIPT lines you want to change.
- Know the reference field entries if you need to enter any.
• Know the amount by which you want to increase or decrease any lines.
• Know what action out code you will enter, if any.

B. START-UP Screen

• Type D in the MODE OF OPERATION field.
• Complete the DOCUMENT ID line.
  • Type C2 in the TRAN field.
  • Type 2000 in the DIVISION FIELD.
  • Type the ID NUMBER of the CASH RECEIPT document you wish to change in the ID NUMBER field.
  • Type your USER ID in the USER ID field.
• Press the ENTER key. The CASH RECEIPT DOCUMENT INPUT screen will be displayed.

C. CASH RECEIPT DOCUMENT INPUT SCREEN

• Type M in the ACTION field within the document screen (not on the document action line).
• Complete the DOCUMENT TOTAL field as described in RCM 9.10.142.
• Press the ENTER key. The CASH RECEIPT LINE screen will be displayed.

D. CASH RECEIPT DOCUMENT LINE SCREEN(S)

• Type the LINE NUMBER in the LINE NO field of the first CASH RECEIPT DOCUMENT LINE you have to correct, and proceed with each successive line until your corrective action is complete.
  • If you are completely DELETING and then reestablishing a line to correct fields that are not directly MODIFIABLE your transaction will have two lines with the same number (see RCM 9.10.145).
  • If the
    • REF TC field,
    • REF NUMBER field,
    • REF LINE field, or
• TRAN TYPE field

do not have to be changed, leave these fields blank. PARS will complete these fields with information from the original CASH RECEIPT document when you QUICK EDIT. If these fields are incorrect on the original document see directions in RCM 9.10.146.

• If the data in the

  • BFY field,
  • FUND field,
  • BUDGET ORG/SUB field,
  • REV SRCE/SUB field (if a change line is involved),
  • BOC/SUB field, or

on the original CASH RECEIPT DOCUMENT are incorrect, the BILLING DOCUMENT referred to must be corrected. Never manually complete these fields on a CASH RECEIPT MODIFICATION.

• Type the amount of any increase or decrease to the original CASH RECEIPT DOCUMENT LINE in the AMOUNT field (not the new correct line amount, the increase or decrease to the old amount that will result in a correct line amount).

• If you are increasing the amount of the line type I, if you are decreasing the amount type D, in the I/D field.

• If you are decreasing the line amount enter the appropriate CASH RECEIPT correction action out code in the ACTION OUT field (see ACTION OUT CODES listed in 9.10.143 or refer to the action out table (ACOT) on PARS). If you are increasing the existing amount leave this field blank (system will bring up the existing action out code for this line). If you are establishing a new line enter the action out code appropriate for your liquidation activity.

E. QUICK EDIT your document MODIFICATION.

F. Have your transaction approved and scheduled for processing following standard instructions.
9.10.145 Insufficient Funds (Bad Checks)

When PSG is notified (receives debit voucher) that a check posted to an ORSP receivable had insufficient funds and could not be negotiated, take the following steps in PARS.

A. Determine the cash receipt ID Number

- Access the ARCL table and scan it for the record that contains the CASH RECEIPT activity when the bad check was posted.

- Use the prefix and claim number supplied on the debit voucher for the first ten positions of the PAYOR NUMBER.

- Press the ENTER key and check for
  - PAYOR NAME
  - CASH RECEIPT activity for the entry on the debit voucher
  - the amount of the cash activity to match the amount of the debit voucher

- If you find a match based on PAYOR NUMBER and date, check CRHT and CRLT for the CASH RECEIPT DOCUMENT listed. It might have an unapplied cash line. If there is an unapplied cash line the total amount on CRHT will match the amount of the debit voucher.

- If you can't find cash receipt activity for the date indicated on the debit voucher on ARCL, access the vendor (PAYOR NUMBER) cross reference screen (VXRF). Type in the first 10 positions of the PAYOR NUMBER in the VENDOR field. Press the ENTER key and all document activity related to the PAYOR NUMBER. If there is no CASH RECEIPT ID displayed with the first screen, press the ENTER key to view the next screen in succession until you locate the CASH RECEIPT DOCUMENT (if it is here and not on ARCL, everything went into unapplied cash). If unapplied cash is involved, the folder will have to be secured to see what further steps are needed after PARS actions are taken (reverse an SSA transfer, prevent vouchering the return of a nonexistent overreimbursement, etc.).

B. SECURE CASH RECEIPT LINE INFORMATION FROM CRLT

- Take a print of the complete CRLT record for the CASH RECEIPT DOCUMENT.

C. MODIFY THE CASH RECEIPT AMOUNT TO ZERO ON THE PAR SYSTEM
STARTUP SCREEN

- Type D in the MODE OF OPERATION field.
- Type C2 in the TRAN field.
- Type 2000 in the DIVISION field.
- Type the ID NUMBER of the CASH RECEIPT DOCUMENT you are going to MODIFY in the ID NUMBER field.
- Type your USER ID in the USER ID field.
- Press the ENTER key. The CASH RECEIPT DOCUMENT INPUT screen will be displayed.

CASH RECEIPT DOCUMENT INPUT SCREEN

- Type M in the ACTION field in the input screen.
- Type the total amount of the cash receipt document you are modifying to zero in the DOCUMENT TOTAL field.
- Press the ENTER key. You will now be viewing the CASH RECEIPT LINE input screen.

CASH RECEIPT DOCUMENT LINE SCREEN(S)

Complete the four necessary fields for each line of the CASH RECEIPT DOCUMENT you are MODIFYING to ZERO. (Refer to the printout you took of the CRLT record).

- Type the LINE NUMBER of the first CASH RECEIPT DOCUMENT line in the LINE NO field.
- Type in the amount of that line in the AMOUNT field.
- Type D in the I/D field.
- Type 87B in the ACTION OUT field.
- Repeat the above steps for each CASH RECEIPT DOCUMENT line created for the bad check.
- QUICK EDIT your transaction.
- Follow standard procedure to get your document transaction approved and scheduled for processing.
9.10.146 Simple Modification To Decrease (Includes Modifying The Amount To Zero) Or Increase The Amount Of A Cash Receipt Document Line

START-UP SCREEN

- Type D in MODE of OPERATION field.

- Complete the DOCUMENT ID line.
  - Type C2 in the TRAN field.
  - Type 2000 in the DIVISION field.
  - Type the ID NUMBER of the CASH RECEIPT document you are going to modify in the ID NUMBER field.

- Type your USER ID in the USER ID field.

- Press the ENTER key. You are now viewing the CASH RECEIPT DOCUMENT INPUT SCREEN.

CASH RECEIPT DOCUMENT INPUT SCREEN

- Type M in the ACTION field within the input screen (not the ACTION field of the document action line at the top of the screen).

- Type in the total amount of the document activity in the DOCUMENT TOTAL field. If you are only decreasing line amount this field will be the total of your line amounts. See RCM 9.10.142 for complete instructions for this field if your action is more complex.

- Press the ENTER key. You will now be viewing the CASH RECEIPT DOCUMENT LINE INPUT screen.

CASH RECEIPT DOCUMENT LINE INPUT SCREEN

- Type in the line number of the CASH RECEIPT DOCUMENT LINE you are decreasing or increasing in the LINE NO field.

- Type in the amount you want to DECREASE or INCREASE in the AMOUNT field.

- Type D if you are DECREASING the line amount or I if you are INCREASING the line in the I/D field.

- Type the appropriate cash receipt action out code in the ACTION OUT field.
• Repeat these instructions if you are correcting the amount on more than one line.

QUICK EDIT

• QUICK EDIT your document transaction.

APPROVAL and SCHEDULING

• Follow standard instructions to get your document approved and scheduled for processing.

9.10.147 Removing and Reentering Non-modifiable Fields

While the PAR system cannot allow direct modification of certain fields, it is able to close a document line (completely reverse it out of accounting tables) and re-enter it on the same transaction. The type of error this is useful to correct is when the wrong reference number has been entered on a line (for example, a cash refund has been applied to an employee's overpayment instead of the spouse's overpayment or has been placed in unapplied cash because a document reference wasn't entered.

A. Secure a print of the CRLT record for the CASH RECEIPT DOCUMENT (when you are done keep it as a folder record).

B. Access the START-UP screen following standard instructions and complete it.
   • Type D in the MODE of OPERATION field.
   • Complete the DOCUMENT ID line.
     • Type C2 in the TRAN field.
     • Type 2000 in the DIVISION field.
     • Type the ID NUMBER of the CASH RECEIPT DOCUMENT you are MODIFYING in the ID NUMBER field.
   • Press the ENTER key. The CASH RECEIPT DOCUMENT input screen will be displayed.

C. Complete both necessary entries on the CASH RECEIPT DOCUMENT INPUT screen.
   • Type M in the ACTION field inside the input screen (not on the document action line).
   • Type 0.00 in the DOCUMENT TOTAL field.
Press the ENTER key. The CASH RECEIPT LINE Input screen will now be displayed.

D. Complete two line actions for each CASH RECEIPT DOCUMENT line for which you have to correct a document reference or transaction type field. The first action will reduce the existing line to zero. The second action will recreate the CASH RECEIPT DOCUMENT LINE.

- Type the line number of the DOCUMENT LINE you are changing in the LINE NO field.
- Type the AMOUNT of the line you are correcting in the AMOUNT field.
- Type 'D' in the I/D field.
- Type 88B in the ACTION OUT field.

The next line entry is to simultaneously reestablish the cash receipt line you are removing with your first line action (see RCM 9.10.74 for detailed instructions for completing a CASH RECEIPT DOCUMENT LINE). Type the same line number in the LINE NO field of the second CASH RECEIPT DOCUMENT LINE displayed on your screen (you want to reestablish the line with the same LINE NUMBER).

- Type B2 in the REF TC (reference transaction code) field.
- Type the correct BILLING DOCUMENT ID NUMBER in the REF NUMBER field (the correct receivable to which the liquidation activity should be posted.)

- Type the correct BILLING DOCUMENT LINE NUMBER to which the amount should be posted:
  999 Penalty
  998 Administrative Cost
  997 Interest
  001 Regular RRA Overpayment
  002 Supplemental Annuity Overpayment
  in the REF LINE field.

- Type the correct CASH RECEIPT TRANSACTION type for the CASH RECEIPT LINE in the TRAN TYPE field.
For reference lines 001 or 002 this is:

- AW if the recovery is from annuity,
- CC if the recovery is cash,
- WO if the recovery is from a write-off action, and
- UA for Unapplied Cash, if the cash or credits cannot be applied to an overpayment.

For charge lines 997, 998, or 999 this is

- IP if interest, administrative cost or penalty is being liquidated with manually entered cash receipt (no matter what the source of the offset is).

- Type the amount of the line in the AMOUNT field.
- Type I in the I/D field.
- Type the correct action out code in the ACTION OUT field.
- Repeat the above instructions for each line you have to correct.
- QUICK EDIT your modification transaction.
- Follow standard procedures for approving and scheduling your document.

### 9.10.148 Unapplied Cash Lines

When cash refunds or credits are posted to PARS and there is no open balance

- No receivable exists;
- A receivable exists but there is no open balance; or
- A receivable exists with an open balance, but the amount posted exceeds the balance

The excess amount which cannot be applied to an overpayment is recorded in a CASH RECEIPT DOCUMENT LINE with a TRANSACTION TYPE of UA, unapplied cash. These unapplied cash lines must be removed when the action is taken to repay, transfer or correctly apply the money or credits reflected in that line.

Unapplied cash lines are most commonly created when:
• the cash or credit received is for outstanding payments that include a social security benefit (the overpayment on PARS is only the railroad annuity),

• duplicate reimbursements are received,

• the open balance on PARS is incorrect due to an erroneous posting, or

• the annuitant refunds more than the outstanding debt.

A. If the unapplied cash line represents

• social security reimbursement, or

• overreimbursement of an overpayment

MODIFY the unapplied CASH RECEIPT DOCUMENT line to zero (see directions in RCM 9.10.147 section D):

• When the SF-1081 is sent to BFO on a social security reimbursement;

• When advice of credit reversal is received either through the Treasury Receivable Accounting and Collection System (TRACS) or by SF-1081 from Treasury after notifying Treasury to reverse credit for overreimbursement of outstanding payment(s) not under direct deposit; or

• When paying out an overreimbursement from a PAYOR (annuity withheld and cash refund received) and the award clears vouchering.

B. If the unapplied cash line represents money/credits that should be applied but couldn't because:

• erroneous cash receipt(s) have caused the receivable balance to be lower than it should; or

• The billing document for the receivable needs to be MODIFIED because the overpayment amount was entered incorrectly or an additional charge line needs to be added.

Take your corrective action first. This includes:

• MODIFYING cash receipt documents to correct amounts,

• MODIFYING the amount of a cash receipt document to zero if the transactions are duplicate postings, or

• MODIFYING the BILLING DOCUMENT to correct the amount and/or add interest, administrative cost or penalty lines.
When you have completed your corrective action, follow directions in RCM 9.10.146 to close out the unapplied cash line and reestablish it with the proper reference information and TRANSACTION TYPE (in other words correctly applying it).

C. If there is nothing on the CASH RECEIPT DOCUMENT but an unapplied cash line and this amount will never be unapplied to an RRB overpayment you can can CANCEL the CASH RECEIPT DOCUMENT instead of MODIFYING each line to zero. (See RCM 9.10.149C.)

D. Before you remove an unapplied cash line, print a copy of it and file it in the folder. An unapplied cash line disappears from CRLT as soon as the modification to zero is processed. There is no record of an unapplied cash line on ARCL. Only the amount of a CASH RECEIPT DOCUMENT applied to a receivable is displayed on the ARCL record. The total amount of a CASH RECEIPT document can be found on CRHT (key is the CASH RECEIPT DOCUMENT ID) or on VXRF (key is PAYOR NUMBER) if the PAYOR NUMBER was entered on the CASH RECEIPT DOCUMENT.

E. If you cannot determine what action to take with an unapplied cash line, send the folder on a G-26 route slip to the RRA Calculations Unit of Policy & Systems (RAC). In the comment section write: UNAPPLIED CASH.

9.10.149 Cancelling A Cash Receipt Document

A. Never cancel a CASH RECEIPT DOCUMENT which has one or more lines posting an offset to a receivable.

These activities must be tracked by action out code and the ACTION OUT field cannot be completed on a CANCELLATION.

B. If you have a CASH RECEIPT DOCUMENT that is:
   • totally composed of unapplied cash, and
   • you will not be applying it to a receivable (see RCM 9.10.147(B)

you can cancel it. Since unapplied cash lines are not recorded on ARCL there is no purpose to entering an action out code that will not be stored.

C. Directions for CANCELLING a CASH RECEIPT DOCUMENT having only an unapplied cash line that will not be referenced to a railroad receivable.

START-UP SCREEN

• Type D in the MODE of OPERATION field.

• Complete the DOCUMENT ID LINE.
- Type C2 in the TRAN field.
- Type 2000 in the DIVISION field.
- Type the ID NUMBER of the document you are going to CANCEL in the ID NUMBER field.
- Type your USER ID in the USER ID field.
- Press the ENTER key. You will now be viewing the CASH RECEIPT INPUT screen.

**CASH RECEIPT INPUT SCREEN**

- Type X in the ACTION field within the CASH RECEIPT INPUT SCREEN (NOT the ACTION field in the document action line at the top of the screen).

**QUICK EDIT**

QUICK EDIT the document following standard instructions.

**APPROVAL AND SCHEDULING**

Follow standard instructions to APPROVE and SCHEDULE your transaction for processing.

**9.10.150 Types Of PAR System Tables**

There are three types of tables in the PAR System

- Reference tables containing data that validates data entries or drives processing (see RCM 9.10.151);

- System generated and maintained tables which are not interactive and cannot be directly changed. However, data displayed can be indirectly changed by:
  - Processing document modifications, or
  - Making changes or additions to other table records (see RCM 9.10.152); and

- Interactive tables that take data input using change and in certain cases deletion commands. See RCM 9.10.153 through 9.10.172 for instructions to change or delete records in these tables.
9.10.151 General Information On Table Changes

- Key fields on interactive tables can never be changed. These fields are clearly labeled at the top of the screen for the particular table involved. (See RCM 9.10.156, 9.10.157 and 9.10.158 for directions on adding new records and removing bad ones.) If you attempt to change a key field the message "L014 CHANGED RECORD DIFFERENT" will be displayed at the bottom of the screen.

- PAR system table changes are done on-line with no approvals or night processing needed to change table data.

- Additional processing might be needed to get the end product you desire. For example, when you add a record to the Cash Collection Input Table (CCIT) you have created that record when you press the ENTER key, but the desired result - a correctly calculated and completed CASH RECEIPT DOCUMENT - is created in that night's production.

- Anyone with the proper security clearance can change what is entered before processing which can be as soon as that night (CCIT) or as long as a month (RECR). In the case of AREF changes, if someone changes the DESTINATION CODE you entered before it can be processed, the code you entered will never be displayed on ARCL - only the last code entered before nightly processing.

- The only way table activity can be lost, since it is directly entered on-line, is if corrupted data requires a roll back of the data base. In that case the table records would be in the position of the previous nights back-up (would not reflect table additions, deletions, changes done that day).

9.10.152 PAR System Reference Tables

Only the PAR system administrator in BFO can change or delete information in PAR system reference tables.

PAR system reference tables include:

- **ACOT**, the table that stores all ACTION OUT CODES used in PARS;

- **ARDT**, the table that stores all DESTINATION CODES and DESTINATION CODE controls on charges and overridable error messages;

- **AREP**, the table that stores criteria for mechanical selection of receivables for the accounts receivable referral table (AREF) and criteria/codes needed for the automatic write-off process;
• **AROP**, the table that contains criteria for the mechanical assessment of charges and selection of receivables for the write-off table (not automatic write-off);

• **AR02**, the table that contains some default and special use TRANSACTION TYPES;

• **ARTX**, the table that stores the installment billing and reminder notice texts ORSP needs;

• **CAUSE**, the table that stores all CAUSE OF OVERPAYMENT CODES used in the PAR system;

• **SRCE**, the table that stores all SOURCE OF OVERPAYMENT CODES used in the PAR system;

• **TYOP**, the table that stores all TYPE OF OVERPAYMENT CODES used in the PAR system; and

• **WORC**, the table that stores all the write-off table reason codes used in the PAR system.

These tables are not affected by clearing or archiving in PARS.

**9.10.153 Generated/System Maintained Tables**

System generated and maintained tables take no direct table ACTION commands other than inquiry commands (scan (S), get (G) refill (R), or leaf (L)). Information is entered and changed generally through processing, DOCUMENT MODIFICATION or natural aging in the PAR system. In special situations the PAR system administrator can change field data using technical tables and programs. There are also changes to certain mechanically maintained tables that result from other table processing.

The following are PAR system generated/maintained tables, descriptions of their contents, and information on how field data or table records are added, changed or removed from them.

**9.10.154 Case History Header Table (ARCH)**

• ARCH contains all the information displayed in PDIT plus the original overpayment amount and associated codes established in PARS after the BILLING DOCUMENT is processed.

  • Changes to NAME and ADDRESS fields in PAYR and PDIT records are reflected ARCH.

  • Changes to other PDIT fields will change the contents for those fields in ARCH.
• BILLING DOCUMENT MODIFICATIONS of the original overpayment amount or CAUSE, TYPE or SOURCE CODES will change the contents of those fields on ARCH.

• CANCELLATION or MODIFICATION of the complete amount of a BILLING DOCUMENT will delete an ARCH record.

• ARCH records of closed receivables are removed from PARS when archiving/clearance programs are run. These are archived on tape to be stored on microfilm and paper.

### 9.10.155 Case History Line Table (ARCL)

• ARCL is established after a BILLING DOCUMENT is processed. The only changes to ARCL (outside of special corrections by the PAR system administrator) are additions to the table records.

• BILLING DOCUMENT MODIFICATIONS result in a line of activity for each document line changed, added or removed. This includes mechanical processing for assessing interest, administrative cost or penalty.

• Processing a CASH RECEIPT DOCUMENT or CASH RECEIPT DOCUMENT MODIFICATION will generate a line of activity for each line on the CASH RECEIPT DOCUMENT referenced to the BILLING DOCUMENT the ARCL record is tracking. Any line(s) with UA as the TRANSACTION TYPE (unapplied cash) are not recorded on ARCL.

• Generation of any bill, original or installment, or processing a BILL PRINT FLAG of S (suppressed bill) even though it does not create a paper bill, will result in a line of activity.

• ARCL records are deleted if a BILLING DOCUMENT is CANCELLED, but are retained if the amount of the BILLING DOCUMENT is MODIFIED to zero.

• ARCL records of closed receivables, which meet the criteria will be removed from the system when archiving/clearance programs are run, and will be archived (retained) on tape to be stored on microfilm.

• RCM 9.10.10 contains detailed information on ARCL fields.

### 9.10.156 Accounts Receivable Header Inquiry Table (ARHT)

• ARHT contains a summary of activity on individual BILLING DOCUMENTS and is created when the BILLING DOCUMENT is initially processed.

• TRANSCODE and DOCUMENT NUMBER and PAYOR NUMBER fields cannot be changed by any system activity.
• PAYOR NAME and ADDRESS fields will be changed when a BILLING DOCUMENT MODIFICATION is processed after changes have been made to the PAYOR table name and address fields. Without a BILLING DOCUMENT MODIFICATION these fields will not change. The second PAYOR NAME line displayed on PDIT and ARCH is not displayed on ARHT.

• The contents of the BILL PRINT FLAG field on ARHT can be changed by
  • BILLING DOCUMENT MODIFICATION,
  • Changing the BILL PRINT FLAG field on OBDT, or
  • Entering an INBT record.
  • Mechanically after an S or a Y flag is processed.

• The contents of the DUNNING FLAG field can be changed by
  • BILLING DOCUMENT MODIFICATION, or
  • Changing the DUNNING FLAG field on OBDT.

• The contents of the DUNNING COUNT field is changed each time a reminder notice is generated. The contents of this field is erased
  • When an INBT record is entered or reset, and
  • When an "Y" is entered in the WAIV REQUEST field on the WAIV table.

• The contents of the WRITE-OFF FLAG field will change
  • To "P" when it is selected for the write-off table mechanically, and
  • to "Y" if the receivable is written off.

• The contents of the WRITE-OFF REASON CODE field will change to display the reason code if a receivable is written-off.

• The DOCUMENT CLOSING DATE field is filled when an overpayment is completely liquidated with the date of the transaction that closes it.

• The contents of the LAST BILL DATE field is changed (updated) anytime a regular or installment bill is generated with the date of that activity.

• The contents of the COLLECTION DUE DATE field changes:
  • each time the LAST BILL DATE field changes with a date 30 days later than the LAST BILL DATE,
• by BILLING DOCUMENT MODIFICATION, or

• when the date is entered or changed in the WAIVER DENIAL NOTICE field on the WAIV table (COLLECTION DUE DATE is 30 days after the WAIVER DENIAL NOTICE).

• The BILL PRINT DATE field is filled when the first bill is operated for a receivable and doesn't change after that.

• The INTEREST APPLY DATE field is filled/changed whenever interest is mechanically assessed in PARS. BILLING DOCUMENT MODIFICATIONS to add, increase or partially decrease interest will not change the INTEREST APPLY DATE (effective February, 1992). A BILLING DOCUMENT MODIFICATION to completely remove all interest assessed will erase the INTEREST APPLY DATE (effective February, 1992).

• HAN APPLY DATE field is filled/changed whenever administrative costs are mechanically assessed in PARS. BILLING DOCUMENT MODIFICATIONS to add, increase or partially decrease administrative costs will not change the HAN APPLY DATE (effective February, 1992). A BILLING DOCUMENT MODIFICATION to completely remove all administrative costs assessed will erase the HAN APPLY DATE (effective February, 1992).

• The contents of the LAST DUN DATE field change each time a reminder notice is generated reflecting the date generated. This field is erased when:
  • an INBT record is established or reset, or
  • when a "Y" is entered in the WAIVER REQUEST field on the WAIV table.

• The WRITE-OFF DATE field is filled when a write-off CASH RECEIPT transaction (generated from the write-off table) is processed, with the date of the transaction.

• The contents of the WAIVER FLAG field changes
  • when the field is changed on a BILLING DOCUMENT MODIFICATION, or
  • when that field is changed on OBDT.

• The contents of the O/P CAUSE field can only be changed by BILLING DOCUMENT MODIFICATION.

• The contents of the BILLED AMOUNT field (original overpayment) FIELD can only be changed by BILLING DOCUMENT MODIFICATION.

• The contents of the INTEREST AMOUNT field can be filled or changed by
• MANUAL BILLING DOCUMENT MODIFICATION, or

• mechanical assessment of interest.

• The contents of the HANDLING (ADMINISTRATIVE COST) field can be filled or changed by

  • manual BILLING DOCUMENT MODIFICATION, or

  • mechanical assessment of ADMINISTRATIVE COSTS

• The contents of the PENALTY AMOUNT field can be filled or changed by

  • manual BILLING DOCUMENT MODIFICATION, or

  • mechanical assessment of PENALTY.

• The contents of the TOTAL AMOUNT field will change when the BILLED AMOUNT and/or INTEREST AMOUNT AND/OR HANDLING AMOUNT AND/OR PENALTY AMOUNT fields change due to

  • BILLING DOCUMENT MODIFICATION, or

  • mechanical assessment of changes.

• The PENALTY APPLY DATE field is filled/changed whenever a penalty amount is mechanically assessed in PARS, BILLING DOCUMENT MODIFICATIONS to add, increase or partially decrease the penalty amount will not change the PENALTY APPLY DATE (effective February, 1992). A BILLING DOCUMENT MODIFICATION to completely remove all penalty assessed will also erase the PENALTY APPLY DATE (effective February, 1992).

• the WRITE-OFF AMOUNT field is filled or changed (updated) each time an amount is written-off through the write-off table.

• The COLLECTED DOCUMENT AMOUNT field is filled/changed (updated) everytime a CASH RECEIPT DOCUMENT LINE is processed, either initially or through MODIFICATION, that is referenced to the BILLING DOCUMENT identified in the TRANS CODE and NUMBER fields on the ARHT record; excluding CASH RECEIPT transactions generated through the write-off table.

• The contents of the DOCUMENT CLOSED AMOUNT field reflects the total amounts in the WRITE-OFF AMOUNT field and the COLLECTED AMOUNT field. Therefore, it changes

  • when a write-off CASH RECEIPT created by the write-off table is processed, and
• when an initial CASH RECEIPT or CASH RECEIPT MODIFICATION is processed.

WRITE OFF AMOUNT, COLLECTED AMOUNT and DOCUMENT CLOSED AMOUNT fields are not impacted by BILLING DOCUMENT MODIFICATION to increase or decrease line amounts unless the decrease removes the open balance of the overpayment.

• When clearing/archiving programs are run, closed ARHT records that meet archiving/clearance criteria will be deleted (not retained on tape.)

• When the full amount of a billing document is MODIFIED to zero or cancelled the ARHT record for that receivable is automatically deleted.

9.10.157 Accounts Receivable Line Inquiry Table (ARLT)

• ARLT contains records with summary information on individual BILLING DOCUMENT lines (regular railroad overpayments, supplemental annuity overpayment and individual charge lines).

• Information in the table can only be changed by BILLING DOCUMENT MODIFICATION except for the DOC LINE COLLECTED AMOUNT, DOC LINE CLOSED AMOUNT and DOC LINE WRITE-OFF AMOUNT fields.

• The DOC LINE COLLECTED AMOUNT field is filled or updated whenever a CASH RECEIPT DOCUMENT (initial or modification) is processed which is referenced to this document line.

• The DOC LINE WRITE-OFF AMOUNT field is filled or updated whenever a CASH RECEIPT DOCUMENT is created through the WRITE-OFF table and processed which is referenced to this document line.

• The DOC LINE CLOSED AMOUNT field is filled or updated whenever there is any registered activity in the DOC LINE COLLECTED AMOUNT or DOC LINE WRITE-OFF AMOUNT fields (this field is a total of the amounts in those fields).

• When archiving/clearance programs are run all ARLT closed records that meet criteria will be deleted from the system (not stored).

• When the full amount of a billing document line is MODIFIED to zero that line is deleted from PARS.

9.10.158 Billing Document Fund Split Table (BDFS)

• BDFS stores the percentage split of social security and nonsocial security funds with a *PAR FUND overpayment.
• No changes or deletions can be made directly or indirectly to records in this table.

• Records in this table for closed receivables which meet clearance/archiving criteria are deleted when those programs are run.

9.10.159 Cash Receipt Header Inquiry Table (CRHT)

• CRHT stores data from the CASH RECEIPT INPUT screen from each CASH RECEIPT DOCUMENT that is processed.

• Only a CASH RECEIPT DOCUMENT MODIFICATION can change data on this screen. The only field that can be changed is AMOUNT field.

• Completely modifying the CASH RECEIPT DOCUMENT AMOUNT to zero will delete the record from the CRHT table.

• Cancelling a CASH RECEIPT DOCUMENT will delete the CRHT record.

• When the archiving/clearance programs are run any CRHT record referenced to a closed BILLING DOCUMENT that meets criteria will be deleted from the PAR system, unless the CASH RECEIPT DOCUMENT contains one or more unapplied cash lines (any cash receipt lines with empty BILLING DOCUMENT reference fields).

9.10.160 Cash Receipt Line Inquiry Table (CRLT)

• CRLT contains data from the CASH RECEIPT LINE SCREEN(S) of each CASH RECEIPT DOCUMENT processed.

• Data on a CRLT record can only be changed by a CASH RECEIPT DOCUMENT MODIFICATION.

• MODIFYING a line amount to zero will delete the CRLT record for that CASH RECEIPT DOCUMENT LINE.

• CANCELLING a CASH RECEIPT DOCUMENT will delete all CRLT record for that document.

• When archiving/clearance programs are run, all CRLT records referencing closed receivables that meet criteria will be deleted.

• CRLT records not referenced to a BILLING DOCUMENT (unapplied cash) are not affected by archiving/clearance programs. CRLT records belonging to the same CASH RECEIPT DOCUMENT as the unreferenced lines are also not affected by archiving/clearance programs.
9.10.161 Suspense File (SUSF)

- SUSF contains records of unprocessed documents.
  - Record changes are only made through document activities (examples: holding for review, scheduling for process, applying or removing approvals). The system registers the last person accessing the document.
  - A record is removed from SUSF by deleting the document identified.
  - Records of successfully processed documents are archived (removed) from SUSF daily at the end of the production run.

9.10.165 Accessing Table Records

There are three different navigational commands which can be used to access table records.

- S (scan)
- G (get)
- L (leaf)

SCAN Table Command

If you are already viewing the table you need to access:

- Type S in the ACTION field of the table action line.
- Enter your USER ID if it isn't already displayed.
- Complete as many of the TABLE KEYS (see RCM 9.10.176 -184 for information on KEY FIELDS for specific tables) as you are able to or need to. You do not have to complete all table keys when using the SCAN command; the PAR system will bring up the first record stored matching the key field(s) you have completed. Be careful and check all identifying data on the record displayed before you make any changes. Remember there can be more than on person on a claim number and there may be more than one overpayment existing for a PAYOR.

- Press the ENTER key. If you only entered the first 10 positions of the PAYOR NUMBER and the first record displayed matches those 10 positions but is not the record you want, press the ENTER key again. There is already an R command in the ACTION field to refill the screen. Repeat this until you find your record or you've determined a table record doesn't exist.

- Proceed to make your change/delete action, if you locate your record.
• When you first access a table S is automatically entered in the ACTION field.

GET Table Command

This command must be used when you need to change or delete a record on the WROT table or when changing record data on the WAIV or OBDT tables (if your action requires a C or a D in the table ACTION field this applies). These tables display multiple records on a single screen unless a GET command is used when accessing information. When the GET command is used only the record requested is displayed. Additional records would be put unnecessarily at risk if a SCAN command is used. To use the G (get) command after accessing your table:

• Type G in the ACTION field of the table action line.

• Type your USER ID, if it isn't displayed, in the appropriate field.

• Fully complete all key fields for the table you are accessing. The get command will not work if all KEY fields are not completed.

• Press the ENTER key. If your record exists in the table it will now be the only one displayed on the screen. If a record with the exact same key fields as you entered does not exist in the table the message

   "01---*L004 LINE NOT FOUND"

   will be displayed at the bottom of the screen.

• Proceed to take your CHANGE/DELETE action.

LEAF Command

When tables have the same key, the system allows you to move from one table to another and stay on a record belonging to the same BILLING DOCUMENT or CASH RECEIPT DOCUMENT if the table records share at least one key field. This saves time and data entry when using the table portion of PARS. Also, if you have verified that the initial record you are accessing is correct, the leaf command removes risk of data entry error in accessing the next table record. When the new table record is displayed the key fields will already be filled. If no record exists for your key field entries the following messages will be displayed at the bottom of the screen:

"01--*L008 END OF FILE"          "01-*L004 LINE NOT FOUND"

If you must establish a record you will already have your key fields accurately completed when you take your add (A) action, if the record from which you are leafing has identical KEY FIELDS as the table to which you are leafing.
To leaf (L) from one table record to another:

- Type L in the ACTION field of the table action line.
- Type the four position acronym of the TABLE you wish to access in the TABLE ID field of the table action line.
- Press the ENTER key.
- Proceed with your CHANGE/DELETE action if your record exists.

9.10.166 The Change Command

For interactive tables use the change table (C) command to:

- Add a field entry to an existing table record,
- Change a field entry to an existing table, and/or
- erase a field entry.

After you have accessed the correct table record:

- Type C in the ACTION field of the table action line.
- Move the cursor, using the tab key, to the necessary field.
  - The cursor will move only to fields in which an entry can be made.
- Take your corrective action.
  - Type the correct entry in any empty field you need to fill.
  - Type over the existing entry in any field you need to change, removing excess data by depressing the space bar.
  - Erase any data where the field should be empty or you want a default entry to be displayed, using the space bar.
- Press the ENTER key. The record now exists in PARS exactly as it is displayed. Table changes are real time on-line changes. The PAR system will not obey a C command entered in tables listed in 9.10.151 and 9.10.152.

9.10.167 Deleting Table Records

There are five interactive PARS tables which will accept a DELETE (D) command for a record, three of them only under certain conditions.
• CCIT, the cash collection input table, contains records which will be processed into CASH RECEIPT DOCUMENTS. Any record contained in this table can be deleted; there are no qualifications. Before deleting a record from this table, check to make sure that the action should not be taken. CCIT records are deleted from this table mechanically when successfully used to create a CASH RECEIPT DOCUMENT.

• INBT, the installment billing table, contains records of installment billing activity. Records can be DELETED from this table if no bill has yet been released. Once a bill is released these records can only be removed from the system when the archiving/clearance programs are run.

• PAYR, The PAYOR information table, stores records containing the first PAYOR NAME line and the PAYOR address and validates the existence of the PAYOR NUMBER in the system. Records in this table can be deleted if there are not existing PDIT records that reference the PAYOR numbers established on them. PAYOR records are not impacted by archiving/clearance programs and are not deleted when a BILLING DOCUMENT is cancelled or completely modified to zero.

• PDIT, the payor debtor information table, stores records containing identifying information on ORSP overpayments. Records in this table can be DELETED if an ARHT record does not exist with the BILLING DOCUMENT NUMBER established on the PDIT record. PDIT records will be deleted by clearing/archiving programs if the BILLING DOCUMENTS identified on them meet criteria. They will also be mechanically deleted if the BILLING DOCUMENT is CANCELLED or MODIFIED to zero.

• WROT, the write-off table, contains records mechanically selected or manually entered for write-off. These records can be DELETED without qualification. These records are mechanically deleted from the table when a CASH RECEIPT DOCUMENT is created from the WRITE-OFF table record. Cancellation of the BILLING DOCUMENT, complete MODIFICATION to zero or complete liquidation of the debt will remove the record from this table.

To DELETE a table record do the following after accessing the correct table record (remember to use the GET command for WROT)

• Type "D" in the ACTION field of the table action line.

• Press the ENTER key.

If the command is successful the message "01-*L032 ALL LINES DELETED" will be displayed at the bottom of the screen.

If you discover you did not want to delete the record before you leave the screen, all data is still displayed,

• Type an A in the action field of the table action line, and
• Press the ENTER key.

The record(s) will be added back to the table.

If you are DELETING the record due to an error in one of the key fields:

• After successfully deleting the record with the bad data in a key field, keep the record displayed on screen.

• Move the cursor to the field(s) with the bad data and type in the correct information.

• Press the ENTER key. This prevents having to fully complete the record again and removes the risk of erroneously completing a field that was entered correctly the first time.

9.10.168 The Importance Of The Final Position On A Table Edit Message

A table edit message, like a document edit message is composed of an identifying alpha-numeric code and a short informative description. If the final position of the code is a W the message is a warning. If the action you are taking is correct, disregard the warning. If no error message exist, your command has been accepted and processed. If you do not want the record to process as it is you will have to use a CHANGE command to correct the necessary fields or a DELETE command to remove the record until the problem can be resolved.

Examples:

a. An examiner is entering an initial BILLING DOCUMENT and a CCIT record for a recovery from accrual at the same time. When the CCIT record is entered the edit message "01-PP29W AMT RECEIVED OUTSTANDING BALANCE" is displayed at the bottom of the CCIT screen. The reason for the message is that the BILLING DOCUMENT has just been entered and is not yet processed. The record has been added to CCIT and can be left as is.

b. A CCIT record is entered to post recovery from accrual on a receivable that was established some time ago. After the ENTER key is pressed to add the record the edit message "01-PP29W AMT RECEIVED is OUTSTANDING BALANCE is displayed. Since this BILLING DOCUMENT is established, you know there is something wrong with the entry because it is larger than the existing overpayment. The record has been added to CCIT as the message is only a warning. DELETE the record from CCIT to prevent if from creating a bad CASH RECEIPT DOCUMENT. Determine what your correct action should be (in this case if a CASH REFUND has already been received, pay out the accrual).

If the last position of the edit message code is an E, it is an error message. The system will take no action on the command you entered. If you don't correct the error situation it
will be as if you hadn't entered anything. If the problem is simply data entry error, move
the cursor to the necessary field and type over the bad entry with the correct one using
the space bar to erase extraneous data. The original command will still be in the
ACTION FIELD. Just press the ENTER key and see if your correction has been
successful.

9.10.175 Interactive Tables

Interactive tables are those tables on the PAR system which allow any user with the
proper clearance to make on-line changes to the information stored directly on the
screens for those records. This makes changes to this information quick and easy (see
general directions in RCM 9.10.166 and 167). This also means great care must be
taken in making changes to these tables.

Sections 9.10.176 through 9.10.184 will contain:

• CHANGE/DELETION information for each interactive PARS table,

• A sample screen showing which fields on each particular table are eligible for
change, and

• References to complete change instructions existing in other sections of RCM 9.10.

9.10.176 Changing Information On Or Deleting Records From The
AREF Table

• Records on the accounts receivable referral table can be added either mechanically
by meeting system criteria, or manually, only by the overpayment recovery section.

• Once added a record cannot be deleted by using a DELETE command. The system
will only change the ARCHIVE FLAG to a "Y" and permit the record to be removed if
the balance equals zero. Once the ARCHIVE FLAG is set to "Y" the record will be
removed when regular monthly archiving programs are run.

• Always change the REFERRAL STATUS CODE to "R" when making an entry in the
DESTINATION CODE field.

• Always use the space bar to erase any data in the REFERRAL DATE and
REFERRED AMOUNT fields when changing the contents of the DESTINATION
CODE field. This allows the system to bring up the current date and current open
balance amount as default entries.

• When an action is successfully completed to change the contents of the
DESTINATION CODE field the system will fill the COLLECTED AMOUNT field with
zeroes and the LAST PAYMENT field with spaces. These two codes along with
REFERRAL DATE and referred amount are to contain information since the DESTINATION CODE was entered.

- When a record no longer qualifies for the referral table (an installment billing agreement is established or reset, etc.)
  - Enter C in the ACTION field of the table action line.
  - Move the cursor to the second line if there are fields filled (not ARCHIVE FLAG) and erase the contents of those fields. If there are no entries there proceed to instructions for the REFERRAL STATUS field.
  - Press the ENTER key.
  - Move the cursor to the REFERRAL STATUS field and type S.
  - Press the ENTER key.

SAMPLE AREF SCREEN

WITH KEY AND CHANGE FIELDS INDICATED

SEE EXHIBIT 64

- Fields in the above sample filled with alpha characters display one character per available positions in that field.

- Fields which display "K" in the above sample are key fields and cannot be changed after the record has been added to the PAR system. An attempt to change will result in the following message after pressing the ENTER key "L014 CHANGED RECORD DIFFERENT" and the change will not be made. A new record must be added with all fields correctly completed. Follow the direction in the last dotted item of RCM 9.10.64 to make changes to the bad AREF record to be left on PARS.

- Fields displaying "C" in the sample can be accessed for change.

- If the contents of a field is blank in the above sample, the field:
  - cannot be accessed for change,
  - is inferred from another table and must be changed by a different action if incorrect, and/or
  - is not used by ORSP.
9.10.177 Changing Information On Or Deleting Records From The CCIT Table

- Records on this cash collection input table can be entered either manually or mechanically from the LOCKBOX process.

- Any record on this table can be DELETED.

- All CCIT records which successfully produce CASH RECEIPT DOCUMENTS in nightly production will be deleted from CCIT automatically.

- Records with an entry in the REFERENCE BILL DOC ID field that does not exist in ARHT will be retained in CCIT.

- All CCIT fields which are not key fields can be corrected following general CHANGE procedure (see RCM 9.10.154).

- If you added a record to CCIT with a bad entry in the REFERENCE BILL DOC ID field it is necessary to DELETE the bad record from CCIT when you add the corrected record; otherwise it will continue to be retained on CCIT (the system does this to accommodate simultaneous entry of a BILLING DOCUMENT and a CCIT record with the recovery). The simplest way to accomplish this is to follow directions to DELETE/ADD in RCM 9.10.166.

- If you are scanning a CCIT record some time after its initial entry (you use the SCAN command to access it) edit messages will not be displayed.

  - Type A in the ACTION field of the table action line.
  
  - Press the ENTER key.
  
  - Edit messages will now be displayed. If the message "ALL LINES ADDED" is displayed the CCIT record will be processed in the next production run.

- If you see an edit message with an E at the end, and you don't make necessary changes, no record will be added to CCIT.

- For directions to correctly complete a CCIT record (see RCM 9.10.79).

SAMPLE CCIT SCREEN

WITH KEY AND CHANGE FIELDS INDICATED

SEE EXHIBIT 65

- Fields in the above sample filled with alpha characters display one character per available positions in that field.
• Fields displaying "K" in the above sample, are key fields and cannot be changed after the record has been added to the PAR system. An attempt to change will result in the following message after pressing the ENTER key "L014 CHANGED RECORD DIFFERENT", and the change will not be made. A new record must be added with all fields correctly completed. Delete the bad record.

• Field displaying "C" in the above sample can be changed.

• If the contents of a field is blank in the above sample, the field
  • cannot be accessed for change,
  • is inferred from another table and must be changed by a different action if incorrect, and/or
  • is not used by ORSP.

9.10.178 Changing Information On Or Deleting Records From The INBT Table

• Records are added manually to the installment billing table; there is no way to mechanically add records to this table.

• Records can be DELETED from this table by manually entering the DELETE command (see RCM 9.10.155) if no installment bill has been generated.

• If an installment bill has been generated, a record can only be removed from the table by archiving. If a BILLING DOCUMENT with an active installment billing record must be modified to zero (PAYOR becomes deceased and the debt must be switched to a new PAYOR), remember to inactivate the installment billing record after your modification action is complete.

  • Type C in the ACTION field of the table action line.
  • Type N in the ACT IND field.
  • Press the ENTER key.
  • Since you already MODIFIED the receivable to 0 you don't have to worry about DUNNING notice being released. If a balance still existed on the BILLING DOCUMENT (you are taking your table actions at the same time you are scheduling your document MODIFICATION) you would need to LEAF to the OBDT table and change that record to have:
    • an "A" in the WAIV FLAG, and
    • an "N" in the DUNN FLAG field
to prevent erroneous charges from being charged (and changing the outstanding bill amount) and an erroneous reminder notice from being released.

- To reset an installment bill (only done by OPR), after entering C in the ACTION field of the table action line.
  - Type in the effective date of the new agreement in the EFFECTIVE DATE field:
    - the first two positions in the field are for the month (zero fill the first position if your effective date is the first through the ninth month of the year).
    - the next two positions in the field are for the day (zero fill the first position if the effective day is the first through the ninth day of the month),
    - the last two positions in the field are for the last two digits of the year (example: enter 92 if the year is 1992).
  - If the installment amount is different than it was for the original agreement, type in the new amount in the INST AMT field (if fewer positions are used in the new amount erase any extraneous characters displayed by pressing the space bar).
  - Reactivate the record by typing "Y" in the ACT IND field
  - Press the ENTER key and your INBT record is reset. Check the WAIV FLAG and DUNN FLAG fields to see if they contain the proper flags for the receivable. If not, change them. Your DUNN COUNT will now be zero and the LAST DUNN DATE will be blank (see ARHT). Be careful when determining if a reset record is in default, because the system currently will bring forward all past due amounts. When the system is corrected to mechanically default installment bills, records meeting criteria will also be corrected.

- When an installment bill agreement is in default (three consecutive bills issued since the EFFECTIVE DATE are currently unsatisfied and 30 days have elapsed since the last bill was issued) do the following after typing the change (C) command in the ACTION field of the table action line:
  - Type N in the ACT IND field, and
  - Press the ENTER key.
  
  The DUNN CT field on ARHT and OBDT will now display a "1". A final reminder notice requesting the entire amount of the overpayment will be generated in the next production run and an AREF record will be created if none already exists. Check to see if an AREF record already exists. If one does, use the change command (C) or AREF to:
    - change the entry in the REFERRAL STATUS field from "S" to "R",
• enter GENL in the DESTINATION CODE field, and
• enter a date in the REFERRAL DATE field equal to the current date plus 30 days.
• press the ENTER key.
• See RCM 9.10.82D for step by step instructions on:
  • Suspension of release of an installment bill, and
  • Change in an installment billing amount.

SAMPLE INBT SCREEN
WITH KEY AND CHANGE FIELDS INDICATED

SEE EXHIBIT 66

• Fields in the above sample filled with alpha characters display one character per available positions in that field.
• Fields displaying "K" in the above sample are key fields and cannot be changed after the record has been added to the PAR system. An attempt to change will result in the following message after pressing the ENTER key "L014 CHANGED RECORD DIFFERENT", and the change will not be made. A new record must be added with all fields correctly completed. Delete the bad record if possible. If not possible, inactivate the bad record.
• Fields displaying "C" in the above sample can be changed.
• If the contents of a field is blank in the above sample, the field
  • cannot be accessed for change,
  • is inferred from another table and must be changed by a different action if incorrect, and/or
  • is not used by ORSP.

9.10.179 Changing Information On Or Deleting Records From The OBDT Table

• Records are added mechanically to the open billing document table when an initial BILLING DOCUMENT is processed. Records are deleted from this table as soon as a document transaction (CASH RECEIPT or BILLING DOCUMENT) is processed to close out the receivable amount (reduce the open balance to zero).
• The system will not DELETE a record when the delete (D) command is manually entered on the ACTION field of the table action line.

• Fields which can be changed on OBDT are:
  • the BILL PRINT FLAG (PRINT IND field),
  • the DUNNING FLAG (DUNN FLG field), and
  • the WAIVER FLAG (waiver of charges) (WAV FLAG field).

• Since seven records can be displayed at a time on OBDT always use the GET (G) command when changing a record on this table to eliminate risk of accidentally making an erroneous change on a record (see RCM 9.10.153).

• Follow standard directions in RCM 9.10.154 for making changes to these table records.

• When changing the BILL PRINT FLAG check your entry before pressing the ENTER key. If you incorrectly enter a Y, PARS will not let you type a change entry over it.

• Current system problems prevent the reopening of an OBDT record by:
  • CANCELLING a CASH RECEIPT DOCUMENT that closed a receivable,
  • MODIFYING a CASH RECEIPT DOCUMENT to a ZERO amount that closed a receivable, or
  • MODIFYING a closed BILLING DOCUMENT to add a charge (INTEREST, PENALTY or ADMINISTRATIVE COST) line.

In order to reopen the OBDT record (a CASH RECEIPT cannot be posted to an overpayment if there is no record on OBDT)

• Process a BILLING DOCUMENT MODIFICATION to increase the principal line (001 or 002 if there is no line 00) by $1.00, and

• process a BILLING DOCUMENT MODIFICATION to decrease the BILLING DOCUMENT by $1.00 after your action has been taken.

SAMPLE OBDT SCREEN

WITH KEY AND CHANGE FIELDS INDICATED

SEE EXHIBIT 67

• Fields in the above sample filled with alpha characters display one character per available positions in that field.
• Fields displaying "K" in the above sample are key fields and cannot be changed after the record has been added to the PAR system. An attempt to change it will result in the following message after pressing the ENTER key "L014 CHANGED RECORD DIFFERENT" and the change will not be made. The key fields on these table records are system generated, and can only be created by processing an initial BILLING DOCUMENT.

• Fields displaying "C" in the above sample can be changed.

• If the contents of a field is blank in the above sample, the field:
  • cannot be accessed for change,
  • is inferred from another table and must be changed by a different action if incorrect, and/or
  • is not used by ORSP.

9.10.180 Changing Information On Or Deleting Records From The PAYR Table

• PAYR table records are entered manually as part of the process of establishing an overpayment in the PAR system or are created mechanically by the social security mechanical or RAIL mechanical process if no record exists in PARS for the PAYOR. Without a PAYOR record a PAYOR NUMBER is not valid in PARS.

• There is no mechanical process for deleting or archiving PAYR records from the PAYR table.

• A record can be DELETED from the PAYR table if no PDIT record exists using the PAYOR NUMBER established on the records as one of its KEY fields. If you attempt to DELETE a PAYR record that is referenced by a PDIT record the following message will be displayed on the bottom of your screen:
  "PPF2E CANNOT DELETE WHEN PDIT EXISTS".

• If you made an error in the PAYOR NUMBER on a PAYOR record you entered, and you haven't entered your PDIT record yet, follow the DELETE/ADD instructions in RCM 9.10.155. This will allow you to ADD the correct PAYOR NUMBER without having to retype entries in the other necessary fields.

• If you must change the NAME and ADDRESS fields on the PAYOR record, either just after it has been established and no PDIT record exists, or after the PDIT record exists but before a BILLING DOCUMENT referencing that PDIT record exists on the suspense file, follow standard table change directions in RCM 9.10.154.
• If an error is discovered in the PAYOR NUMBER after the BILLING DOCUMENT has been processed, follow directions in RCM 9.10.140.

• Changes to the NAME and ADDRESS fields will automatically change the contents of those fields on PDIT and ARCH.

• See RCM 9.10.56 for general directions for completing PAYR fields.

SAMPLE PAYR SCREEN

WITH KEY AND CHANGE FIELDS INDICATED

SEE EXHIBIT 68

• Fields in the above sample filled with alpha characters display one character per available positions in that field.

• Fields displaying "K" in the above sample, are key fields and cannot be changed after the record has been added to the PAR system. An attempt to change will result in the following message after pressing the ENTER key "L014 CHANGED RECORD DIFFERENT", and the change will not be made. A new record must be added with all fields correctly completed. Delete the bad record if possible.

• Fields displaying "C" in the above sample can be changed.

• If the contents of a field is blank in the above sample, the field
  • cannot be accessed for change,
  • is inferred from another table and must be changed by a different action if incorrect, and/or
  • is not used by ORSP.

9.10.181 Changing Information On Or Deleting Records From The PDIT Table

• PDIT table records are entered manually as part of the process of establishing an overpayment on the PAR system or they can be created mechanically by either the social security mechanical or RAIL processes. Without a PDIT record a BILLING DOCUMENT ID NUMBER is not valid in PARS.

• A PDIT record will be deleted from the PAR system mechanically if:
  • Archiving/clearance programs are run and the closed receivable meets criteria,
  • The full amount of the overpayment is MODIFIED to zero, or
• The BILLING DOCUMENT is cancelled.

• A PDIT record cannot be DELETED if an ARHT record exists referencing its BILLING DOCUMENT ID field entry. The only way to DELETE the PDIT record would be to CANCEL or DELETE the BILLING DOCUMENT. Do not CANCEL or DELETE a BILLING DOCUMENT because a portion of the DOCUMENT ID was incorrectly completed according to current format. The only identifying field error which should result in CANCELLING or MODIFYING a BILLING DOCUMENT amount to zero and then establishing a new BILLING DOCUMENT is a PAYOR NUMBER error (see RCM 9.10.140). If the document is still on the suspense file see RCM 9.10.122 for directions.

• The only part of a PAYOR NAME that is changeable on PDIT is the second name line. Follow standard change instructions in 9.10.154. If your only change to the PAYOR NAME/ADDRESS is to the second line of the PAYOR NAME no additional action to the BILLING DOCUMENT are necessary (described in RCM 9.10.120 and 9.10.138) because the PAR system does not store the second NAME line on ARHT.

• The remainder of the fields on PDIT can be changed following standard directions for table changes in RCM 9.10.154.

• Changes made to the PDIT record will automatically change the contents of the same field displayed on ARCH.

• See RCM 9.10.57 for directions for completing PDIT fields.

SAMPLE PDIT SCREEN

WITH KEY AND CHANGE FIELDS INDICATED

SEE EXHIBIT 69

• Fields in the above sample filled with alpha characters display one character per available positions in that field.

• Fields displaying "K" in the above sample, are key fields and cannot be changed after the record has been added to the PAR system. An attempt to change will result in the following message after pressing the ENTER key "L014 CHANGED RECORD DIFFERENT", and the change will not be made. A new record must be added with all fields correctly completed. Delete the bad record if possible.

• Fields displaying "C" in the above sample can be changed.

• If the contents of a field is blank in the above sample, the field:
  • cannot be accessed for change,
• is inferred from another table and must be changed by a different action if incorrect, and/or

• is not used by ORSP.

9.10.182 Changing Information On Or Deleting Records From The RECR Table

• RECR table records are entered manually to allow the PAR system to generate CASH RECEIPT documents to post monthly recoveries due to full or partial withholding.

• An RECR record cannot be DELETED from the table by manually entering a DELETE command.

• An RECR record is only removed from the PAR system after a change (C) command (RCM 9.10.154) has been used to change the contents of the ARCHIVE FLAG field from "N" (no) to "Y" (yes).

• Never change the contents of the ARCHIVE FLAG field to Y if the amount displayed in the CURRENT BALANCE field is greater than zero. See RCM 9.10.80 for detailed instructions on archiving RECR records.

• Whenever monthly annuity is not being withheld (for example it is in suspense or the annuitant died), the contents of the hold indicator field (HOLD IND) must be changed from "N" (no) to "Y" (yes) to prevent erroneous CASH RECEIPTS from being generated and processed. If erroneous CASH RECEIPTS are processed the amount of the CASH RECEIPT DOCUMENTS must be MODIFIED to zero, each document individually.

• See RCM 9.10.80 (E)(I) for detailed instructions for changes to the RECR record (and associated actions) when an annuity is suspended while partial or full withholding is in effect.

• When an award action is taken to reinstate an annuity and recover the overpayment by partial withholding that was initially being recovered by full withholding the following PARS actions must be taken:
  • Enter a change command (C) in the ACTION field of the table action line.
  • Type 11B in the ACTION OUT field.
  • Type the new amount that will be withheld in the CURRENT OFFSET AMT field, use the space bar to erase extraneous characters in the field. This will be the amount of the CASH RECEIPT DOCUMENTS created by RECR effective with the next CASH RECEIPT to be created.
• Press the ENTER key. You have now corrected the RECR record.

• Look at the PPLIED OFFSET MONTHS field. The number displayed is the number of CASH RECEIPT DOCUMENTS you will have to modify.

• LEAF to the ARCL screen for the case you are correcting.

• Take a print of the screen(s) displaying the RECR CASH RECEIPT DOCUMENTS you will have to MODIFY to decrease the amount from the full withholding amount to the partial withholding amount. Note if there is one line or two lines for each CASH RECEIPT DOCUMENT you need to MODIFY. If there are two lines you will have to prorate the reduction to the CASH RECEIPT DOCUMENT. By decreasing the CASH RECEIPT DOCUMENT amounts the balance of the overpayment will increase to its correct level.

• To change the CURRENT OFFSET AMOUNT on full withholding recoveries to reflect cost-of-living increases (OPR):

  • Type the change command (C) in the ACTION field of the table action line,

  • Type the correct withholding amount in the CURRENT OFFSET field,

  • Do not change the OFFSET BEGIN DATE,

  • Press the ENTER key.

• If you do not take the action timely:

  • Calculate the amount of the increase times the months for which it was not posted.

  • Post this amount using a CCIT record (follow general instructions in RCM 9.10.79) with an AW TRANSACTION TYPE code and an 11C ACTION OUT CODE. This is simpler than MODIFYING all the CASH RECEIPT DOCUMENTS generated for an amount less than they should have been.

SAMPLE RECR SCREEN

WITH KEY AND CHANGE FIELDS INDICATED

SEE EXHIBIT 70

• Fields in the above sample filled with alpha characters display one character per available positions in that field.

• Fields displaying "K" in the above sample, are key fields and cannot be changed after the record has been added to the PAR system. An attempt to change will result in the following message after pressing the ENTER key "*L014 CHANGED
RECORD DIFFERENT", and the change will not be made. A new record must be added with all fields correctly completed. Inactivate the bad record (change HOLD INDICATOR to Y) and change the archive indicator to Y to delete it the next time archiving programs are run.

- Fields displaying "C" in the above sample can be changed.
- If the contents of a field is blank in the above sample, the field:
  - cannot be accessed for change,
  - is inferred from another table and must be changed by a different action if incorrect, and/or
  - is not used by ORSP.

**9.10.183 Changing Information On Or Deleting Records From The WAIV Table**

- WAIV table records are created mechanically when a BILLING DOCUMENT is processed.
- WAIV table records cannot be deleted by manually entering the delete (D) command.
- WAIV table records are deleted from the system mechanically when:
  - a BILLING DOCUMENT is cancelled,
  - the amount of a BILLING DOCUMENT is completely MODIFIED to zero, or
  - when a closed BILLING DOCUMENT meets criteria and archiving/clearance programs are run.
- When changing a WAIV record always access the record using a get (G) command so that you don't expose unnecessary records to the risk of being changed (see RCM 9.10.153).
- See RCM 9.10.154 for general instructions for using the change (C) command.
- See RCM 9.10.83 for general instructions for completing WAIV table fields.
- Be careful when changing the WAIVER EXPIRATION DATE, unless the WAIVER REQUEST is "Y" or there is an entry in WAIVER DENIAL DATE, because the entry in that field controls when interest is changed. If a BILLING DOCUMENT is MODIFIED to correct the original COLLECTION DUE DATE (the overpayment letter
was not released timely) the WAIVER EXPIRATION DATE on the WAIV table should be changed at the same time (the original dates should match).

- See RCM 9.10.83 (C) for detailed instructions on how to change the WAIV record when a request for waiver or reconsideration is received. An entry of "Y" in this field automatically:
  - Erases the DUNN COUNT in PARS,
  - Erases the LAST DUNN DATE in PARS, and
  - Blocks all charges if no CHARGE APPLY DATE exists. If a CHARGE APPLY DATE exists on ARHT for any charge
    - Change the WAIV FLAG on OBDT to A to block charges
    - MODIFY the BILLING DOCUMENT to remove all charges assessed. This will remove the CHARGE APPLY DATES.
    - Change the WAIV FLAG field back to a blank.
    - If the charges were modified to a zero amount before February, 1992 forward a print of the ARHT screen through your supervisor to the ORSP PAR system specialist to have the PAR SYSTEM ADMINISTRATOR remove the necessary APPLY DATES. Change the WAIV flag field to a blank (if appropriate) only after the erroneous APPLY DATE is removed.
  - Everytime an action is taken in OPR or RECON on a case involving an overpayment the examiner should make the appropriate change in status code (STAT field) and change the date in the STATUS CHANGE DATE field. Charges in the latter will prevent cases from being erroneously listed in the report of cases without activity. See RCM 9.10.83(C) for codes to enter.
  - See RCM 9.10.83(3)(F) for detailed steps to take for changes to the WAIV record should unfavorable ORSP decisions be appealed to the bureau of hearings and appeals (BHA).

SAMPLE WAIV SCREEN

WITH KEY AND CHANGE FIELDS INDICATED

SEE EXHIBIT 71

- Fields in the above sample filled with alpha characters display one character per available positions in that field.
- Fields displaying "K" in the above sample, are key fields and cannot be changed after the record has been added to the PAR system. an attempt to change will result
in the following message after pressing the ENTER key "*L014 CHANGED RECORD DIFFERENT", and the change will not be made. The key fields on these table records are system generated and can only be created by processing an initial BILLING DOCUMENT.

- Fields displaying "C" in the above sample can be changed.

- If the contents of a field is blank in the above sample, the field
  - cannot be accessed for change,
  - is inferred from another table and must be changed by a different action if incorrect, and/or
  - is not used by ORSP.

9.10.184 Changing Information On Or Deleting Records From The WROT Table

- Records are added to the write-off table
  - mechanically if the balance is greater than $1.00 and criteria stored in the WROT table are met,
  - mechanically if the balance on the OBDT table is less than $1.00 (these records are created with the WRITE-OFF FLAG set to "Y" an ACTION OUT CODE of 22B and will produce approved write-off cash receipts in the next production run if there is no intervention before then), or
  - manually by an OPR examiner if the receivable qualifies to be written off but did not meet system criteria for selection.

- All records on WROT are eligible to be deleted using the DELETE (D) command. An OPR examiner might want to delete a WROT record:
  - If the record manually added has a data entry error in the PAYOR NUMBER or BD ID field,
  - If the decision to add it to WROT was erroneous
  - If a corrective action is being taken on a case that has an automatic write-off cash receipt in WROT and you want to prevent a write off CASH RECEIPT from being created and processed.

- Follow standard directions in RCM 9.10.155 for using the DELETE command.
When accessing a record in WROT to CHANGE or DELETE, always use the GET (G) command (see RCM 9.10.153) so that only the record you want is open to change. A WROT screen normally displays 14 records at a time.

Records are not selected to refill the WROT table after production of write-off cash receipts if:

- A write-off CASH RECEIPT has been produced, or
- no OBDT records exists for the receivable or criteria are no met.

If the WRITE OFF FLAG is not Y on the WROT record there is no reason to DELETE a record on which you are taking other close out action. Without the Y it will not create a CASH RECEIPT DOCUMENT. After your action it will not be reselected for WROT.

If only part of the receivable is being write-off, change the contents of the TOTAL BILL AMOUNT field to the amount to be written-off. When you type the new amount, the field display will be left justified in the field, while the amount already established in the field will be right justified. Remember to erase the old amount using the space bar before pressing the ENTER key (see RCM 9.10.154 for standard instructions on the CHANGE (C) command). After the CASH RECEIPT DOCUMENT is created the contents of the P/F field must be changed to P before the document is processed (see the supervisor of OPR, special clearance is needed to access WR CASH RECEIPT DOCUMENTS).

The following codes can be changed using standard CHANGE command procedure:

- WRITE OFF FLAG,
- WRITE OFF REASON,
- ACTION OUT.

See RCM 9.10.81(B) for step by step instructions for changes to write-off an existing WROT record and directions for field completion.

See RCM 9.10.81(E) for special directions to take before making changes to write-off an existing WROT record if the PAYOR NAME or ADDRESS are incorrect.

SAMPLE WROT SCREEN

WITH KEY AND CHANGE FIELDS INDICATED

SEE EXHIBIT 72

- Fields in the above sample filled with alpha characters display one character per available positions in that field.
• Fields displaying "K" in the above sample, are key fields and cannot be changed after the record has been added to the PAR system. An attempt to change will result in the following message after pressing the ENTER key "L014 CHANGED RECORD DIFFERENT", and the change will not be made. A new record must be added with all fields correctly completed. Delete the bad record.

• Fields displaying "C" in the above sample can be changed.

• If the contents of a field is blank in the above sample, the field:
  • cannot be accessed for change,
  • is inferred from another table and must be changed by a different action if incorrect, and/or
  • is not used by ORSP.

### 9.10.200 Recording Program Accounts Receivable Transactions

This section outlines situations where the Office of Retirement and Survivor Programs (ORSP) is required to establish or change an accounts receivable record and when to post a recovery. Any actions required on an accounts receivable record for a Medicare debt will be done by the Bureau of Disability and Medicare Operations (BDMO).

An account receivable record must be established on the Program Accounts Receivable System (PARS) anytime a railroad and/or a supplemental annuity overpayment occurs. A PARS record does not need to be established if a specific tolerance situation exists--please see RCM 6.2.56 A.4 for explanation.

There are two types of overpayment recoveries that are shown on PARS. These types are non-recurring cash receipts and recurring cash receipts.

Non-recurring cash receipts are those instances in which the RRB has a one-time recovery action. Examples of these are cash refund, credit card refund and withholding accrual payments to offset an overpayment.

### 9.10.205 Establishing A PARS Record When An Accrual Will Be Used To Offset An Overpayment

In all situations, the entire overpayment must be posted to PARS before an offset from the same or another account is processed. RCM 9.10.70 through 9.10.79 explains how to post a recovery on the Cash Collection Input Table (CCIT). The Action Out code used in this situation is 11A.

If you must complete Form T-200 for PARS entry, complete sections A and B to establish the overpayment and section D to establish the CCIT. See Exhibit 74.
EXAMPLE: John Doe’s railroad annuity is overpaid by $500.00 due to 1991 work deductions. His spouse, Jane Doe, is due a $100.00 accrual for an annuity adjustment. John Doe’s entire overpayment of $500.00 must be established on PARS before the $100.00 offset is established. A sample Accounts Receivable Case History Line Table (ARCL) for this situation is shown in Exhibit 73.

9.10.210 Establishing A PARS Record for Full Or Partial Withholding

Recurring cash receipts are those instances in which the RRB has a recurring (monthly) recovery action - partial or full withholding. When the annuity is adjusted for full or partial withholding, the accounts receivable record must be updated to establish a Recurring Cash Receipt Table (RECR). RCM 9.10.80 explains how to establish an RECR table on PARS.

If you must complete Form T-200 for PARS entry, complete Section C to establish an RECR table. See Exhibit 75.

Both the PAYOR CODE and the BILLING DOCUMENT IDENTIFICATION NUMBER assigned to the overpayment when the accounts receivable record was established must be known to complete a RECR record on PARS.

9.10.211 Establishing A PARS Record For Actuarial Adjustment

When an annuity is adjusted for actuarial adjustment, the accounts receivable record must be updated to reflect this recovery. The recovery is recorded on CCIT. RCM 9.10.70 through 9.10.79 explains how to post a recovery on CCIT. The Action Out code used in this situation is 15A.

If you must complete Form T-200 for PARS entry, complete Section D to establish the CCIT. See Exhibit 76.

9.10.215 PARS Action In Small Overpayment Recovery Situations

In small overpayment recovery situations it is not necessary for an RECR table to be established. Instead, the recovery must be recorded on CCIT. RCM 9.10.70 through 9.10.79 explains how to post a recovery on CCIT. The Action Out code used in this situation is 11C.

If you must complete Form T-200 for PARS entry, complete Section D to establish the CCIT. See Exhibit 77.

9.10.220 When To Correct An RECR Record

Partial or full withholding cases may require a change of the withholding type and/or the offset amount already established on PARS. This happens when notice is not received timely requesting partial withholding to recover an overpayment. The annuity is
suspended to recover the overpayment but the G-421 requesting partial withholding has not been matched to file. Once the G-421 is matched, the annuity is reinstated and partial withholding is started. At this time it is also necessary to correct the RECR table. RCM 9.10.182 explains how to correct an RECR record on PARS.

If you must complete Form T-200 for PARS entry, complete Section C with the new withholding information and/or corrected data. Note in the remarks section of the T-200 "RECR previously established-correction needed." See Exhibit 78.

9.10.225 Posting Cash Refunds To PARS

In August 1991, ORSP established a lockbox in which all cash refunds are deposited. The Beneficiary Services Unit-Payment Services Group (BSU-PSG) is responsible for all cash refunds and lockbox items. Lockbox processing is done in cooperation with First Chicago Bank. All cash refunds from field offices are forwarded to the bank where they are keypunched. The bank transmits all data to the RRB where it is loaded into PARS. The cash refunds are posted to the accounts receivable records. BSU-PSG monitors lockbox processing and handles all rejected items.

Occasionally, uncashed checks or money orders are incorrectly forwarded to the adjudicating units. In these instances the check or money orders should be walked to the Program Procedures and Project Analysis Section (PP&PAS)-Rosalie Klocek for lockbox processing.

9.10.230 Posting Credit Card Payments

Field offices forward all requests for repayment by credit card to PP&PAS for handling. PP&PAS secures approval from Citibank. PP&PAS will notify the appropriate adjudication unit of approval by entering "APPROVED" on the G-421 series form. The adjudication unit is responsible for posting the credit card repayment to PARS. RCM 9.10.70 through 9.10.79 explains how to post a recovery on CCIT. The Action Out code used in this situation is 13B.

If you must complete Form T-200 for PARS entry, complete Section D to establish the CCIT. See Exhibit 79.
9.11.1 Overview

The Survivor G-90 Expeditor (SURGE) system automates requests sent to the SEARCH system for a survivor earnings and computation record (G-90). Previously, G-90 requests were handled by completing and keypunching form G-73a.

The majority of survivor G-90 requests will be triggered automatically upon completion of the APPLE First Notice of Death (FNOD) screen for a deceased employee or enters a survivor application on APPLE. SURGE on-line data entry screens are available for use by claims examiners, development clerks and contact representatives for wage record requests in cases not submitted through APPLE.

Up to three mechanical requests for a wage record may be created based on the following criteria either entered via APPLE or SURGE. The disability freeze and/or alternative index year must be supplied in order for the multiple requests to be created by SURGE. SURGE will not do multiple requests if the information must be retrieved from the Master Benefit File. If the data is not provided by APPLE or by the examiner, only one request will be generated.

I. If a disability freeze (DF) and an alternative index year (ALT) are provided (APPLE and/or examiner will provide DF from PREH), SURGE will format 3 SEARCH requests:
   • with ALT and DF (if DF > 12-31-1978); or
   • with ALT and without DF (if DF < 1-1-1979); and
   • with DF and without ALT; and
   • without ALT or DF.

II. If a DF is only provided, SURGE will format 2 SEARCH requests:
   • with DF; and
   • without DF.

III. If an ALT is only provided, SURGE will format 2 requests:
   • with ALT; and
   • without the ALT.

Request data will remain on-line for at least 90 days. During this time modifications and corrections may be made to the original data and a request resubmitted.
9.11.2 Database Operation

Structure

A. The SURGE system contains the G-90 request information only. No actions occurring after the request enters the SEARCH system are reflected on the database.

B. Nightly processing - On a nightly basis, processing will occur to:

- prepare a G-90 request file containing employees with current connections from the current day's SURGE APPLE transactions.

- match the G-90 request file to the Employee Data Maintenance file (EDM) to pick up military service information where appropriate. Military service is taken from EDM in all cases except if the military service is entered directly on SURGE and an m/s “use code” is entered. (See 9.11.22 B below for details).

- store the updated records (after EDM data is included) on the SURGE/APPLE database.

- submit the G-90 requests to the SEARCH system.

C. Monthly processing - Each month, records that have gone at least 90 days without data entry activity will be purged from the database.

9.11.10 Surge Operation

When notice of a railroad employee’s death is received in a field office, the APPLE First Notice of Death (FNOD) screen is to be completed. The transmission of this death notification will trigger a survivor G-90 request by the SURGE system. A survivor G-90 request can also be triggered when a survivor application is entered on APPLE

A. Data Used in the G-90 Request - Data from either the APPLE FNOD screens or the APPLE survivor application will be used to format a SURGE G-90 request. The following employee information will be completed by APPLE: name, date of birth, date of death, date last worked, sex code, annuity beginning date, filing date, disability freeze date, gross 59 code, “no ABD” flag, and ALT index year. If an ALT and/or DF is provided, SURGE will format multiple requests as indicated above in 9.11.1.

APPLE will automatically enter the DF date under the following circumstances:

- The DF is on PREH and the DF letter code is 1; and

- The date is on 3255-SSA-DIS-ONS-DT or
• The date is on 3255-DF-BEG-DT and the month is other than January.

• APPLE will automatically enter the ALT Index Year under the following circumstances:

  • Widow’s potential date of entitlement is not more than two years in the future; and

  • Widow’s information is on the First Notice of Death – when the wage record is being requested from the FNOD; or

  • Widow is applying for an aged widow’s annuity – when the wage record is being requested through APPLE.

Note: The ALT Index Year will not be included by APPLE if the widow is applying for a disability annuity.

B. The Current Connection Code Is A Required Entry - To furnish SURGE with the information necessary to determine in which cases to request a G-90, the current connection (c/c) code on the FNOD screen must be completed. Previously, the c/c field was an optional entry.

A "Y" (yes) or "U" (unknown) entry in the c/c field will prompt a G-90 request. No G-90 will be requested for cases with an "N" (no) in this field.

9.11.15 Field Use Of SURGE

The use of SURGE by the field office may be required when additional proof such as MS is submitted after the application and/or FNOD has been processed. If an additional request is submitted and consideration is required, notify SBD via email. Otherwise, the APPLE FNOD will automatically initiate a SURGE request.

9.11.20 Direct On-Line Data Entry

Three screens have been developed for on-line entry, modification, and correction of survivor G-90 requests. These screens are the Basic Information, Military Service, and Lag Data/Prior Service screens.

All initial requests require the completion of the Basic Information screen. The two other screens are optional, based on the individual employee circumstances. Modifications or corrections may be done on any of the three screens, individually or in combination.

9.11.21 Sign On Procedure

To sign onto the SURGE system:

NOTE: Standard sign-on and sign-off procedures for field offices are in FOM 1525.
Signing onto the SURGE system:

- Open EXTRA and enter your user id and password followed by pressing ENTER twice.
- Select RRAPID from the menu.
- Select item 11, SURGE.
- Enter the prefix and claim number, press ENTER. If a SURGE request was previously submitted, the screen will be prefilled with the data previously entered; if not, a blank Basic Information screen will appear with only the prefix and claim number prefilled.

9.11.22 Entering Data On SURGE Screens

A. Basic Information Screen

Enter data in the appropriate fields according to the following instructions.

NOTE: Explanations of the functions of the various navigation and data entry keys can be found in Appendix A. Editing of the data is handled as explained in section 9.11.23.

SSN - Enter the deceased employee’s social security number. This item will be prefilled if the deceased employee’s social security number is also his railroad claim number.

NAME (FI - MI - LAST) - Enter the deceased employee’s first initial, middle initial (if known), and surname.

SEX - Enter "M" if the deceased employee was male, "F" if female.

DATE OF BIRTH - Enter the month, day, century and year of the deceased employee’s birth. Month, century and year are required entries. If the exact day of birth is unknown, enter "15" for the day entry.

DATE OF DEATH - Enter the month, day, century and year of the deceased employee’s death. Month, century and year are required entries. If the exact day of death is unknown, enter "15" for the day entry.

DATE LAST WORKED - Enter the later of the date the deceased employee last worked for a railroad employer or the last date worked prior to retirement for a non-railroad employer. The EE date last worked can be found in PREH, Employee General Information Screen (EEINFO). If the exact day last worked is unknown, enter "01" for the day entry.
ANN EFF DATE - Enter the month, day, century and year of the deceased employee's annuity beginning date, if any. If the day the employee's annuity began is unknown, enter "03" for the day entry.

APPL FILING DATE - Enter the month, day, century and year the deceased employee filed his or her retirement application. If the filing date is not available, it can be found in the Rate History system on RRAPID, on the first page of the Annuitant General Information (BENE) screen. If the application filing day is unknown, enter "01" for the day entry.

DIS FREEZE DATE - If a period of disability under the Social Security Act has been established for the deceased employee, enter the disability freeze date. Obtain the disability freeze date from one of the following:

- Item 26 of Form G-325; or
- Item 15(A) of Form SSA-831-U5; or
- Item 24 of the On-Line Disability Decision Sheet (OLDDS) system; or
- Item 4 of Form SSA-415; or
- PREH, screen 3255, SSA-DIS-ONS-DT (If DF-LTR-CODE (3255) is not a ‘1’ then this may be a Medicare only DF.).

NOTE: Do not enter the dates from the SSA-415 if there are checks before "Coordination" and "Conflict" and the folder does not show that the conflict has been resolved.

If the disability freeze period was established by SSA before 9-6-58, use the date(s) from the SSA allowance letter or other letter from SSA. The date(s) can also be found on Form T-216.

If a period of disability has not been established, leave this item blank.

ALT INDEX YEAR - If an alternative PIA is being requested, enter the alternative indexing year. If applicable, the date must be greater than 1976. Otherwise leave the prefilled value of ‘1900’.

Refer to RCM 8.9 G-364.1 instructions for information on determining the alternative indexing year.

GROSS 59 CODE (PREV SURVIVOR) - This field will be prefilled with an "N", meaning that compensation up to $4550.00 will be considered for 1959.
Make no entry in this item unless a gross 1959 calculation is required. If PREH indicates a survivor award has been vouchered prior to 10/15/1987, enter "Y" for the gross 59 code. Entering a "Y" in this field will allow the use of compensation up to $4800.00 (the SSA maximum for 1959) in the G-90 calculations.

**NO ABD ("A" CASE) -** This item will be prefilled with "N" for no. Enter a "Y" if an "A" prefix has been assigned to a deceased employee and no retirement annuity has been awarded.

**AMC - (Average Monthly Compensation) -** If the employee’s annuity began to accrue before 1948 and was based on at least 10 years of service, consult your lead specialist or supervisor concerning the entry to make in this field.

**AMR - WITH INC YEARS (Average Monthly Remuneration with Increment Years) -** If all the following conditions apply:

- No entry has been made in the AMC field; and
- the employee died before 2-15-1968; and
- a survivor award based on the AMC was made after 9-5-1958,

consult your lead specialist or supervisor concerning the entries to make in these fields.

**B. Military Service Screen** - The identifying information (prefix, claim number, etc.) on the first line of the screen will be prefilled.

Only enter military service (MS) information if the MS is either not on EDM or if it is different then what is on EDM. Please refer to the following chart concerning MS involvement.

<table>
<thead>
<tr>
<th>If the MS is on SURGE</th>
<th>and the MS is on EDM</th>
<th>and SURGE MS use cd is</th>
<th>then the MS is from/type</th>
<th>EDM updated</th>

</tbody>
</table>
• MS information is not retrieved from the MBF/PREH on SURGE requests – it comes from SURGE and/or EDM.

• If SURGE has an MS use cd, then the MS is used as indicated on SURGE. The MS will not get updated to PREH nor EDM based on the wage record. Refer to G-59 MS instructions

• If SURGE does not contain an MS use cd, then the MS information will be updated to EDM if there is no other MS on EDM.

• NUMBER OF PERIODS - If active military service after 1936 is claimed:
  • Enter "1" if there is one period of military service that has been claimed and verified.
  • Enter "2", "3", "4", as appropriate, if multiple periods of military service are claimed and verified.
  • Enter "5" if there are more than 4 periods of military service.

• 37-50 OVERLAP MOS - If military service was previously credited in this case and there are overlap months in the 1937-50 period, enter the number of overlap months in this field. Overlap months are calendar months containing both railroad and military service. The number of 1937-50 overlap months can be found in item 2 of the G-90 if military service was previously considered for the employee.

  If the 1937-50 overlap months are not available, leave this item blank.

  MS BEG DT (1-4) - Enter the month, day, century and year of the employee’s entry into active duty for each period of military service.

  MS END DATE (1-4) - Enter the month, day, century and year of the employee’s discharge or release from active duty for each period of military service.

  MS USE CODE (1-4) - Enter a "W" if the period of military service was previously determined to be creditable as wages. Enter a "C" if the military service was previously creditable as compensation.

  An entry in this item will prevent the MS from being updated to EDM.

  If no previous determination is available, leave this item blank.
MEANS OF ENTRY (1-4) - Enter an "I" if the employee's entry into military service in this period was involuntary. Enter a "V" if the employee entered military service voluntarily.

INT EARN (Intervening Earnings) (1-4) - This item will be prefilled with an "N" for no. Enter a "Y" only if the employee had non-RR earnings between the end of any military service which includes all or part of the 6-15-1948 through 12-15-1950 period and the return to railroad service. This information can be found in the following items on the survivor applications:

<table>
<thead>
<tr>
<th>Application</th>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>AA-17</td>
<td>11</td>
</tr>
<tr>
<td>AA-18</td>
<td>12</td>
</tr>
<tr>
<td>AA-20</td>
<td>12</td>
</tr>
</tbody>
</table>

OVERLAP MOS (1-4) - If there has been a previous creditability determination for this period of military service, enter the overlap months, if any. This is a separate count that includes 1937-50 overlap months even if they have already been entered in the 37-50 overlap field.

C. Lag Data/Prior Service Screen - The identifying information (prefix, claim number, etc.) on the first line of the screen will be prefilled.

The first line of the lag data section represents the current year with the second line provided for prior year lag data. Lag data should be obtained from the AA-12 or G-88A.2 in the claim file. Only the lag year(s) and the number of service months credited for that year(s) should be entered. If neither form is in the file, leave this section blank.

YEAR - This item will be prefilled with the current or previous calendar year.

Service and earnings from a previous year are only considered "lag" until the data is posted at the RRB, usually no later than May 1 of the following year.

REPORTED MOS - Enter the number of reported service months from the AA-12 or G-88A.2.

DEEMED MOS - Enter the number of deemed months, if any. Refer to RCM Part 11, G-73a instructions, page 18, for information about deeming service months.

POSSIBLE LAG-DETAILS UNKNOWN - This field will be prefilled with "N" for no. If there is an indication that the employee worked for a RR employer in the
current or preceding year but no earnings information is available, enter a "Y" (yes) in this field.

A. PRIOR SERVICE MOS - Enter the number of verified prior service months. Up to 360 months of service (subsequent service plus prior service) can be included in the employee’s tier 2 computation. The prior service months can be obtained either from the retirement G-90, retirement award form, PREH, screen 3300, field PS-MO-USE-CNT or form G-367 in the claim file.

B. PRIOR SERVICE AVG - If there is an entry in PRIOR SERVICE MOS, enter the prior service average from the retirement G-90, the retirement award form, PREH, screen 3300, field PS-AVG-MO-AMT or form G-367 in the claim file if available. Otherwise leave this item blank.

9.11.23 Editing SURGE Data

After all entries have been made, press PF-2 to activate the edit process (PF-3 if you are modifying existing data).

A. Input Passes Edits - If the data passes the edits, this message will appear on the screen:

"DATA SUCCESSFULLY UPDATED"

B. Input Does Not Pass Edits - If an invalid entry is made, the cursor will be positioned under the first invalid item, all errors highlighted in red and an error message will be displayed in red on the screen. SURGE can only display one error message at a time; therefore, after correcting an invalid item and pressing the PF-2 key (PF-3 if you are modifying existing data), the system may display a second error message. The fields are edited in the same sequence that they are entered. When all the data is valid, this message will appear on the screen:

"DATA SUCCESSFULLY UPDATED"

C. EDIT MESSAGES

- CLAIM NUMBER MUST BE 6 OR 9 DIGITS
- NAME OF DECEASED MUST BE ENTERED
- NAME MUST CONTAIN ONLY ALPHABETIC CHARACTERS
- NAME MUST INCLUDE AT LEAST FIRST AND LAST NAMES
- DATE OF BIRTH INVALID
- DATE OF BIRTH MUST BE NUMERIC
• SEX CODE MUST BE M OR F
• APPL FILING DATE MUST BE NUMERIC
• APPLICATION FILING DATE CANNOT BE BEFORE 1935
• APPLICATION FILING DATE MUST BE LATER THAN DATE OF BIRTH
• APPLICATION FILING DATE CANNOT BE LATER THAN DATE OF DEATH
• APPLICATION FILING DATE REQUIRED IF ANNUITY EFFECTIVE DATE ENTERED
• DATE OF DEATH INVALID
• DATE OF DEATH MUST BE NUMERIC
• DATE OF DEATH CANNOT BE BEFORE 1935
• DATE OF DEATH CANNOT BE LATER THAN CURRENT DATE
• DATE OF DEATH MUST BE LATER THAN DATE OF BIRTH
• DATE LAST WORKED INVALID
• DATE LAST WORKED BE NUMERIC
• DATE LAST WORKED CANNOT BE BEFORE 1935
• DATE LAST WORKED MUST BE LATER THAN DATE OF BIRTH
• DATE LAST WORKED CANNOT BE LATER THAN DATE OF DEATH
• DATE LAST WORKED REQUIRED IF ANNUITY EFFECTIVE DATE ENTERED
• IF SURVIVOR INIT WAGE REQUEST IS B/4 10/15/1987 CONSIDER GROSS 59 = Y
• ALT INDEX YEAR MUST BE BETWEEN 1977 AND CURRENT YEAR
• NO ABD CODE MUST BE Y OR N
• ANNUITY EFFECTIVE DATE INVALID
• ANNUITY EFFECTIVE DATE MUST BE ENTERED OR NO ABD CODE MUST BE Y
• ANNUITY EFFECTIVE DATE MUST BE LATER THAN DATE LAST WORKED
• ANNUITY EFFECTIVE DATE CANNOT BE LATER THAN DATE OF DEATH
• ANNUITY EFFECTIVE DATE CANNOT BE BEFORE 1935
• ANNUITY EFFECTIVE DATE AND NO ABD CODE CANNOT BOTH BE ENTERED
• ANN EFF DATE MUST BE NUMERIC
• DISABILITY FREEZE DATE INVALID
• DISABILITY FREEZE DATE MUST BE NUMERIC
• DISABILITY ONSET DATE CANNOT BE LATER THAN DATE OF DEATH
• DISABILITY ONSET DATE CANNOT BE BEFORE 1935
• ALT INDEX YEAR IS N/A IF DISABILITY FREEZE DATE < 1979
• AMC AMOUNT CANNOT BE ENTERED IF ALT INDEX YEAR ENTERED
• ONLY ONE SPECIAL REQUEST FIELD CAN BE ENTERED

9.11.30 Data Modification And Deletion

During the 60 days SURGE records remain on the database, existing data may be modified or deleted. The modified record will be kept for at least 60 days from the date of modification.

A. Modifying existing data. - Entering a prefix and claim number on the SURGE entry screen will display the latest information used in a G-90 request for that number. Any field displayed in white is "unprotected" and may be modified by tabbing to the field and keying over the existing data with the changed data or with spaces, if appropriate.

When the information displayed on the screen reflects all the changes wanted, press PF3 to store the revised data on the database. The message "DATA SUCCESSFULLY UPDATED" will appear at the bottom left of the screen if no edit errors are detected. Fields failing the edits will be highlighted in red until corrected. Error messages will be displayed at the bottom left of the screen.
Only the most recent information entered for a specific claim number is stored on the SURGE database. If it is necessary to retain a record of a previous request, a screen print should be made before modifying the data.

After the initial G-90 request is processed through the SURGE system, the latest entry date will appear in the field labeled "PREV SURGE DATE" in the lower left portion of the Basic Information screen. The "SUBMISSION NUMBER" at the lower right portion of the Basic Information screen starts at 1 with the initial request and increases with each subsequent modification after nightly processing is completed each time.

B. Deleting data - Pressing PF4 will delete the information displayed on the screen. As a precaution, a confirmation is requested by the message "HIT PF4 TO CONFIRM DELETE". When PF4 is pressed a second time, the deletion is processed. A deletion action entered on the Basic Information screen will erase the entire record. Entering a deletion on the Military Service or Lag Data/Prior Service screen will delete the particular screen information but not the identifying data, i.e., claim number, name, etc.

9.11.40 Reject Referrals

A. MBF Match Rejects - G-90 requests from APPLE for cases in current pay status on DATA-Q will pick up additional data such as annuity effective date, date last worked, etc., from the Research MBF. If the G-90 request does not find a matching MBF record in these cases, the record will be referred on a reject listing to the survivor operational unit for reconciliation. A referral message will appear on the screen if the case is accessed on-line after the nightly processing has occurred.

B. Military Service Referrals - As a result of the 1988 amendments making 1948-50 voluntary service creditable under the Railroad Retirement Act, additional military service items are required by the SEARCH system. In April 1990, the MBF began storing the necessary military service data. However, military service records stored prior to that time are incomplete in terms of today's processing.

During the MBF match each night when military service is found, it will be checked for completeness. If it is incomplete, the G-90 request will be submitted to SEARCH without military service. A message, "MILITARY SERVICE IS INCOMPLETE" will appear on-line when the request is accessed after the nightly processing. If a G-90 with military service is needed, the information should be entered on the SURGE Military Service screen and a modified request submitted.
Appendices

Appendix A - Screen Navigation And Data Entry Keys

The following keys are used in the SURGE system to navigate between screens and to enter, modify, and delete data:

- **PA 2** - used to exit from the SURGE system. Pressing this key will take you to a screen with the "ENTER NEXT TASK CODE" message. Pressing this key will not store the data on the screen.

- **PF 2** - used to enter new requests through the SURGE on-line screens.

- **PF 3** - used when modifying existing database information to submit a second request through the SURGE on-line screens. Each modification will produce a separate G-90.

Note: Pressing the ENTER key after typing in new or modified data will submit the information in the same way pressing PF 2 and PF 3 does.

- **PF 4** - used to delete information from the SURGE system. Pressing the PF 4 key while at a screen will delete any data in unprotected (white) fields. On the Basic Information screen, PF 4 will delete the entire record from the SURGE/TRACK database. A G-90 will still be produced unless the deletion occurs before the initial nightly processing.

- **PF 7** - used to "page backward" or view each screen in reverse order. Using this key will not store data.

- **PF 8** - used to "page forward" or view each screen in sequence. Using this key will not store data.

- **PF 20** - a "new record" key that will return you to the SURGE entry screen. Pressing this key will not store the data on the screen.

- **PF 21** - used to access the Basic Information screen from either of the two other screens.

- **PF 22** - used to access the Military Service screen from either of the two other screens.

- **PF 23** - used to access the Lag Data/Prior Service screen from either of the two other screens.

NOTE: If PF 21, 22, or 23 is pressed after entering or modifying data, the message "SCREEN MODIFIED BUT NOT UPDATED, PRESS ENTER TO UPDATE" will appear.
Pressing enter will submit the new data. Pressing the navigation key again will take you to the requested screen without storing the data.
9.12.1 Overview

ONCORR is a system for correcting, on-line, manual awards that reject from the daily checkwriting system (DAISY/CHICO). Rejected awards from each DAISY/CHICO run are stored on the ONCORR database so that they can be corrected and authorized by claims examiners. ONCORR edits the award as it is being corrected, determines a voucher number and date, and resubmits the award to the DAISY system for payment.

Awards that are vouchered through BREA’s correction subsystem (constructive awards or correction awards) and that reject are also stored on the ONCORR database so that they can be corrected and authorized by the unit that originated the award. The ONCORR vouchering process for these awards is different, as explained in RCM 9.12.16.

ONCORR produces daily and monthly reports. Reports that are used to control the reprocessing of the rejects on the ONCORR database are available each morning on HSL.

For general information on voucher rejects, refer to RCM 12.2.

9.12.2 General Description Of Reject Correction Using ONCORR

When ONCORR is used, the reject correction process works as follows:

- Rejects are assigned to examiners for correction and monitored using ONCORR reports available each day on HSL.

- Examiners access the award on ONCORR and enter the necessary corrections to the award form data displayed. When all corrections have been made, ONCORR sets a tentative voucher date for the award and updates its status to "pending authorization."

- An authorizer accesses the award, checks the corrections, and either approves the award or refers it back to the examiner for further corrections. When the authorizer approves the award, ONCORR resets the voucher date and updates the status of the award to "authorized."

- Each time there is a DAISY run, awards with the appropriate voucher date are extracted from the ONCORR database and processed through DAISY/CHICO. A voucher number is assigned and the status of the award is updated to "batched." Folder documentation is produced for each award.

- Awards may also be deleted from ONCORR if the examiner determines that they should not be revouchered. Authorized or deleted awards may be reopened by a supervisor if necessary.
9.12.10 Types Of Rejected Awards Handled By ONCORR

ONCORR handles all manual award rejects except for awards paid on Form G-359. Any G-359 awards that reject from DAISY/CHICO must be revouchered manually. Rejects of mechanical awards (e.g., RASI, SURCAL, PC award rejects, mass adjustment rejects) are not handled by ONCORR.

ONCORR also handles rejects of correction or constructive awards that are vouchered through the BREA correction subsystem.

Awards that will be passed to ONCORR for correction are identified on the DAISY/CHICO reject listing with the message: REJECT SENT TO ONCORR. Occasionally, awards that are identified as having been passed to ONCORR will not be available on the ONCORR database. This will occur if there is more than one award reject for the same claim number and payee code from the same voucher. Since ONCORR cannot always accurately match the reject to its keypunch record in this situation, these cases will be listed for manual handling, and the unit that vouchered the award will be notified.

9.12.11 Referrals

If the rejected award produced referral messages, they will be displayed on ONCORR along with the reject message(s). The award may contain up to 22 reject and referral messages. These messages appear on the ONCORR Reject/Referral Reason screen (RCM 9.12.24), and are explained in Appendices A and B. The cause of the referral message should be considered in determining the cause of the reject.

9.12.12 Controlling Rejects Handled By ONCORR

ONCORR produces three reports that can be used to assign rejected awards to examiners for correction and to monitor the awards to see that they are handled quickly. These are the current day's reject report, described in RCM 9.12.50; the claims pending report, described in RCM 9.12.51; and the Research reject report, described in RCM 9.12.56. The reports group the awards by claims adjudication unit. Both the current day's reject and claims pending reports are available daily on HSL after each DAISY run. The Research reject report is produced after each run of the Research subsystem, which is generally weekly. The latest ten generations of each report can be viewed on HSL.

Rejects for a particular adjudication unit can also be accessed using the Reject Selection screen (RCM 9.12.22).

9.12.13 Access To ONCORR

There are six levels of access to ONCORR:
1. Inquiry access (INQ). The status of awards may be viewed on the Reject Selection screen only.

2. Inquiry plus (INQ-PLUS). Awards and the administrative tables may be viewed.

3. Examiner access (EXAM). Awards may be corrected or deleted.

4. Authorization access (AUTH). Awards may be authorized.

5. Supervisory access (SUPV). Awards may be reopened. The examiner and authorizer number may be reassigned.

6. Administrative (ADMIN) The check writing cut-off calendar, the access reject/referral reason table, the unit table, and the voucher number table may be updated.

If a user attempts to perform a function for which he does not have the appropriate level of access, he will be given the edit message YOU ARE UNAUTHORIZED FOR REQUESTED ACTIVITY or UNACCEPTABLE RESPONSE, PLEASE TRY AGAIN. When requesting access to ONCORR, the user should list each level of access required, using the acronyms shown above.

9.12.14 How Corrections Are Processed (DAISY/CHICO Interface)

The source of ONCORR's rejected awards is the Daily Activity Input System/Checkwriting Integrated Computer Operations system (DAISY/CHICO). ONCORR extracts rejected manual railroad and social security awards from the DAISY/CHICO output. It also extracts rejected awards from the BREA correction subsystem. It then matches each reject with its keypunch record. The keypunch record and the reject reason(s) are loaded onto the database.

After an examiner has corrected a payment reject and an authorizer has approved it, ONCORR extracts the award for processing through DAISY. Depending on the voucher date assigned by ONCORR, the award will be extracted for processing in the next DAISY run, or will pend until the first of the following month when it will be extracted for processing through DAISY.

Authorized BREA rejects are extracted whenever BREA is ready to reprocess them through its correction subsystem, which is generally once a week.

When the award is extracted from ONCORR, ONCORR formats it into a complete keypunch record so that the award processes through DAISY and the BREA correction subsystem like any other manual award.
9.12.15 Vouchering And Other Functions Performed By ONCORR

A. Vouchering

(The vouchering process described in this section applies to payment rejects. Rejects from BREA's correction subsystem are vouchered as described in RCM 9.12.16.)

ONCORR assigns a voucher date and voucher number to the award. Each examining unit has one of its railroad and one of its social security voucher numbers reserved for use by ONCORR.

The voucher date is based on the type of activity (final, recert, etc.) and the cut-off dates for that month. ONCORR sets a tentative voucher date after the award is corrected and resets the voucher date after the award is authorized. The voucher date will be set for either the next day, the date of one of the two DAISY runs that occur during the post-period, or the first of the following month. The date will be the first of the following month, if it would not be possible to extract the award for processing by the last DAISY run for that month in which it could be included.

Example: The last DAISY run of the pre-period is January 18. If a recert award is corrected on the 18th, the voucher date will be set for February 1. If it were corrected on the 17th, the voucher date would have been set for the 18th.

If the award can be paid in the post period, and it is corrected after the cut-off for pre-period awards but before the beginning date of the post-period, the voucher date will be set as the post-period beginning date. If it is corrected on or after the post-period beginning date but before the post-period ending date, the voucher date will be set as the post-period ending date.

The voucher date can be viewed on the Reject Selection screen after the award is corrected.

ONCORR uses the voucher date that was set when the award was authorized to determine when to extract the award. When the award is extracted for processing through DAISY, ONCORR gives it the extraction date as the voucher date, if the voucher date previously set was earlier.

ONCORR also edits the month and year through which the award is accrued to ensure that they are consistent with the voucher date that was set. (See RCM 9.12.28.)

Each month the analyst responsible for preparing the calendar of monthly computer operations also updates the ONCORR checkwriting cut-off calendar screen by entering next month's cut-off dates and indicating the types of awards that can be processed in the post period. ONCORR uses this information to
determine voucher dates. Anyone with inquiry plus access to ONCORR can view the checkwriting cut-off calendar. (See RCM 9.12.34.)

B. Setting Accompanying Forms Indicators.--ONCORR determines what forms are attached to the award, both when it loads the award onto the database and when it extracts the award from the database for reprocessing. It sets the accompanying forms indicators on Form G-357 or Form G-364 based on what is attached. The indicators may not be changed by the examiner.

9.12.16 Awards That Reject From The BREA Correction Subsystem

Awards that reject from BREA's correction subsystem are loaded onto ONCORR for correction. These include awards that the examining units forwarded to BREA (constructive and correction awards) and awards prepared by BREA. BREA assigns four-digit voucher numbers to these awards. The last three digits of the voucher number correspond to the regular voucher numbers of the unit that prepared the award. This allows ONCORR to assign the award to the unit that prepared it.

Rejects from the BREA correction subsystem are placed on their own HSL report (see RCM 9.12.56). These awards are corrected and authorized in the same way as payment rejects, but the vouchering process is different. ONCORR assigns a voucher number to the award. It does not assign a voucher date. BREA has the ability to extract awards from the ONCORR database whenever it runs its correction subsystem. When the awards are extracted, usually weekly, a voucher date of the 28th of the month is assigned. BREA's voucher process does not follow the same cut-offs that are applied to awards that are affecting a payment. BREA continues to process awards that will affect that month's MBF (Master Benefit File) into the following month.

If a BREA correction subsystem award that was corrected on ONCORR rejects again, it will be loaded onto ONCORR again and assigned to the same unit. If the award rejects a second time after being corrected on ONCORR, it will not be recycled through ONCORR again. Instead, the award will be updated to the Research record and BREA analysts will review the award and make any necessary corrections to the MBF.

ONCORR determines whether the award is being corrected for the first or second time based on the voucher number that was assigned to the award. The first time the award is corrected, it gives the award the unit's three-digit ONCORR voucher number preceded by the same first digit as was on the original award. If that award should reject again ONCORR knows that it has already rejected once because it has an ONCORR voucher number. When the award is vouchered on ONCORR the second time, it assigns it a unique voucher number. This voucher number indicates that the BREA award has been corrected for the second time. As explained above, if this award rejects, it will not be loaded onto ONCORR.

BREA awards that are corrected on ONCORR produce two copies of the folder documentation, one for the file and one for BREA. Any awards that are deleted from the database are listed on a report for BREA (see RCM 9.12.57).
9.12.20 Overview Of Screens And Functions

This section provides a general description of the ONCORR screens. Further information on each screen can be found in the section referenced.

- Reject Selection screen - First screen displayed. Allows user to select claims and indicate the function (view, correct, authorize, reopen, or reassign) to be performed. Provides information on the status of each claim. Provides access to the administrative table screens. (See RCM 9.12.22 and 9.12.23.)

- Reject/Referral Reasons - Displays reject/referral messages associated with the rejected award. (See RCM 9.12.24.)

- Form Selection screens - Allows user to select a particular retirement or survivor award form or to delete a form from the award. (See RCM 9.12.25.)

- Form Correction screens - A series of screens displaying data keyed from the award forms. The following forms can be corrected on ONCORR:

<table>
<thead>
<tr>

</tbody>
</table>
• Reassign Examiner Number - Available to users with supervisory level access only. Allows supervisor to change the examiner and/or authorizer number on the rejected award. (See RCM 9.12.31.)

• Administrative Table - Allows user to select a particular Selection Screen table for view or update purposes. These tables allow user analysts to update variable data required for ONCORR processing. (See RCM 9.12.33).

• Checkwriting Cut-off Calendar screen - Only designated user analysts may update this screen but all other users may view it. Contains the beginning and ending dates of the DAISY/CHICO pre and post periods and indicates the types of awards that can be paid in the post period. (See RCM 9.12.34.)

• Reject/Referral Reasons Table Screen - Only designated user analysts may update this screen but other users may view it. Gives the reject/referral status of a particular edit and the message associated with it. (See RCM 9.12.35.)

• Unit Table Screen - Only designated user analysts may update this screen but other users may view it. Gives the voucher numbers associated with a particular unit. (See RCM 9.12.36.)

• Voucher Number Table - Displays all active units and their voucher numbers. No information may be changed on this screen. (See RCM 9.12.37.)

9.12.21 Sign On Procedure

To sign on to ONCORR:

• With the TRAIN logo displayed on the CRT screen, type RRapid and press ENTER.

• When the message "ENTER NEXT TASK CODE" appears, type SIGNON and your signon name and press ENTER.

• The "ENTER PASSWORD" message will then appear. Type your password and press ENTER.

• You will receive a "SIGNON COMPLETE" message with information about your last system access. Press ENTER and a screen with "ENTER NEXT TASK CODE" will appear.
• Type MENU and press ENTER. The RRAPID Main Menu will appear.

• Select ONCORR (10) and press ENTER. The Reject Selection screen will appear. Select awards using this screen as explained in the following section.

9.12.22 Selecting ONCORR Award Records

Awards on the ONCORR database are accessed using the Reject Selection screen, the first screen displayed when the user signs onto the system. The user may select claim(s) by entering either a specific claim number or the acronym of an examining unit and pressing the ENTER key. A line of identifying and status information will then be displayed for all awards on the database for that claim number or unit. Status information is explained in RCM 9.12.23.

Up to eight records may be displayed on one screen. If there are more than eight records that meet the selection criteria entered, they may be viewed by paging forward and backward using PF7 and PF8.

A. Selecting Awards by Claim Number  Enter the beneficiary symbol, prefix, and claim number of the award and press ENTER. If there are no awards with this claim number on the database, this message will be displayed:

NO AWARDS FOUND FOR SELECTION CRITERIA ENTERED

A sample of the Reject Selection screen with a claim number selected is shown below.

SEE EXHIBIT 4

If there is an award or awards with this claim number on the database, one line of data will be displayed for each award. If more than one award is on the database, the user can determine which record to select based on this data. There may be more than one award on the database for a particular claim number if, for example, a railroad and social security award were paid simultaneously and both rejected, or an award that was vouchered on ONCORR rejects again.

Survivor family groups paid using one G-364.1 with multiple G-364's attached are treated as one award and only one line of data will be displayed on the Reject Selection screen, even if more than one family member rejected.

B. Selecting Rejects by Unit - To display awards for a particular examining unit, enter the unit's acronym and press ENTER. The unit selected must have a specific range of voucher numbers assigned to it. Valid acronyms are ICS, RPS, CBS, RBT, RSC, SIS, SPS, BCS, DPS, MPS and RES. Units whose awards are vouchered by another unit should enter the vouchering unit's acronym to display their rejects.
A sample of the Reject Selection screen with a unit selected is shown below.

The user may limit the awards displayed for a particular unit by choosing a specific status or reject date.

1. Status code - The status code is a one-letter code that indicates the status of the award on the ONCORR database. The status codes are:

   R  Reject - The award has not been corrected.

   P  Pending Authorization - The award has been corrected, but not authorized.

   A  Authorized - The award has been corrected and authorized.

   B  Batched - The award has been corrected, authorized and extracted from the ONCORR database for processing through DAISY/CHICO.

   D  Deleted - The award has been earmarked for deletion from the database.

2. Reject date - This is the date the award was stored on the ONCORR database, which should be the date it rejected from DAISY. This date is generally used to limit the awards displayed to those that rejected in the previous night's DAISY run.

C. Selecting the Action To Be Taken - Enter the number (from 1-8) of the record to be selected. (Record number 1 is pre-filled on the screen but can be typed over.) Then indicate the action to be taken on the record (correct, authorize, etc.) by pressing the appropriate PF key. The status of the claim must be consistent with the action to be taken or an edit message will be displayed. PF keys and their functions are:

   PF 3 - Correct. Allows corrections to the award. The status of the award must be REJ (reject) or PNDA (pending authorization).

   PF 4 - Delete. Earmarks the award for deletion. Awards with the status BCHD (batched) cannot be deleted.

   PF 5 - View. Allows the award to be viewed; no corrections may be made.

   PF 6 - Authorize. Allows authorization of the award. The status of the award must be PNDA (pending authorization).
PF 9 - Reopen. Allows a supervisor to reopen the award for further corrections. The status of the award must be AUTH (authorized) or DLET (deleted).

PF 10 - Reassign. Allows a supervisor to reassign the award to another examiner and/or authorizer. Awards with the status BCHD (batched) or DLET (deleted) cannot be reassigned.

If the user does not have access to the function selected, this message will be displayed:

UNACCEPTABLE RESPONSE, PLEASE TRY AGAIN.

If PF 3, 5, or 6 is selected, the user is transferred to the Reject/Referral Reason screen (see RCM 9.12.24).

If PF 10 is selected, the user is transferred to the Reassign Examiner Number screen (see RCM 9.12.31).

If PF 4 or 9 is selected, the status is changed immediately on this screen.

9.12.23 Viewing The Status Of Award Records

After the desired claim number or unit is entered on the Reject Selection screen, a line of identifying and status data is displayed for each award that meets the selection criteria entered. Up to eight lines of data may be displayed on one screen. If there are more than eight awards to be displayed, they may be viewed by paging forward and backward using PF 7 and 8.

A sample of the Reject Selection screen with awards in various stages of correction is shown below.

SEE EXHIBIT 5

The following information is displayed for each award record:

- CLAIM NO - The beneficiary symbol, prefix and claim number

- PC - Payee code. If there is more than one payee code on the award (survivor family group), the payee code of the first G-364 will be displayed.

- VOUCHER DATE/NO - The voucher date and voucher number of the original award. Social security awards have voucher numbers in the 900 range; voucher numbers below 900 belong to railroad awards. Voucher numbers greater than 999 indicate that the award was vouchered through BREA's correction subsystem and is not a payment reject.

- EXM NO - The number of the examiner who completed the original award. The number will not change unless the award is reassigned by a supervisor.
• AUT NO - The number of the examiner who authorized the original award. The number will not change unless the award is reassigned by a supervisor.

• UNIT - The examining unit that vouched the award.

• REJECT DATE - The date the award was stored on ONCORR. This is generally the date the award rejected from DAISY.

• STATUS DATE - The date of the last action taken on the award. The date the status of the award changed to the status displayed in the next column.

• STAT - The status of the award on the ONCORR database. One of the following will be displayed:
  - REJ (reject) - The award is pending correction by an examiner.
  - PNDA (pending authorization) - The award has been corrected by a corrected by an examiner and is ready to be authorized.
  - AUTH (authorized) - The award has been authorized and is ready to be extracted for processing through DAISY at the appropriate time.
  - BCHD (batched) - The award has been corrected, authorized and extracted for processing through DAISY.
  - DLET (deleted) - The award has been earmarked for deletion.

• NEW VOU DATE/NO - The voucher date and number assigned to the corrected award by ONCORR. The date assigned will be either in the current month or the first of the following month. The date will be filled after the award is corrected. The voucher number is the last voucher number from the range of railroad and social security voucher numbers assigned to the unit that vouched the original award.

  Note that the voucher date may change unless the status of the award is "batched" (BCHD).

**9.12.24 Determining The Reject And Referral Reason(s)**

The reason the award rejected is displayed on the Reject/Referral Reasons screen. The Reject/Referral Reasons screen is the next screen displayed after a particular award is selected on the Reject Selection screen.

The screen displays the same reject message(s) shown on the DAISY/CHICO reject listing. Up to 22 DAISY and rate history messages may be displayed. Each message is identified as either a reject (REJ) or referral (REF), and the number of the reject or referral is given. These messages are explained in the Appendices. Rejects and referrals are numbered as follows:
If the award has more referral messages than can be displayed on one screen, the user may page backward and forward using PF7 and PF8.

To access the Reject/Referral Reasons screen from the Form Selection or Form Correction screens, press PF23. To return to that screen from the Reject/Reason screen, press CLEAR.

A sample of the Reject/Referral Reason screen is shown below.

SEE EXHIBIT 6

A. **Survivor Family Groups** - When a survivor family group that was paid using one set of forms rejects, the award is treated as one record on the ONCORR database. All of the reject/referral reasons for the family group are displayed on the same Reject/Referral Reasons screen. Use the payee code displayed after each reject/referral reason to determine the corrections to be made to each payee.

B. **Referrals** - While correcting the cause of the reject, also investigate and correct, if necessary, the cause of any referrals.

### 9.12.25 Selecting Award Forms For Correction

For railroad awards, the next screen displayed after the Reject/Referral Reason screen is the Retirement or Survivor Form Selection screen. Use this screen to select the form(s) to be corrected; to access a blank form, if the correction requires that a form be added; or to delete a form, if necessary. An arrow is displayed in front of each form that is part of the award. When data on the award form has been changed, an asterisk is displayed in front of the form.

For social security awards, the next screen displayed is the first screen of Form RR-1e.

If a form is requested that was not part of the award as originally keyed, and the user is in view mode, a blank Form Correction screen will be displayed with the message: (FORM) NOT FOUND. In the correction mode, forms may be added as explained in C.

A. **Retirement Form Selection Screen**

The Retirement Form Selection screen is a menu of the employee and spouse awards available for correction on ONCORR. If a form has been deleted, a "D" is displayed in front of the form. The Retirement Form Selection screen is shown below.
SEE EXHIBIT 7

B. Survivor Form Selection Screen

The Survivor Form Selection screen is a menu of the survivor forms available for correction on ONCORR. The Survivor Form Selection screen is shown below.

SEE EXHIBIT 8

The Survivor Form Selection screen allows for three occurrences of both Form G-364 and Form G-369. As many as three G-364's and three G-369's may be attached to one G-364.1 as one award form set. This award form set is also treated as one record on ONCORR and each G-364 and G-369 belonging to the payees that rejected are accessed from the Form Selection screen. The payee code of the G-364/G-369 stored in each occurrence is displayed.

If one or more payees in the group did not reject, the G-364 and G-369 for those payees will not be displayed on ONCORR. Only data from the rejected payee(s) will be displayed in the first and/or second occurrence of the G-364/G-369.

C. Adding a Form - To add a form that was not included in the original award, select the form from this screen. A blank form will appear with the message: (Form) DOES NOT EXIST - WILL BE CREATED. Fill in the items on the blank screen and complete the normal correction process.

Form G-369 may be added to a survivor award only if there is a single G-364 in the award form set. G-364's may not be added.

ONCORR will set the appropriate accompanying forms indicator(s), so it is not necessary to change that item on Form G-357 or G-364 when adding a form.

D. Deleting a Form - To delete a form that was included in the original award, select the form and press PF5 (DELETE FORM). A message will appear advising that PF5 must be pressed again to actually delete the form.

Since each award must have a G-357 or G-364 attached, Form G-357 and the last G-364 may not be deleted. If the entire award is to be deleted, use the delete award function on the Reject Selection screen.

Special form deletion rules apply to survivor awards. If there is a G-364.1 attached to the award, and a G-369 is deleted, the associated G-364 will also be deleted. If there is no G-364.1 attached, the G-369 will be deleted without deleting the G-364, but the G-369 must be the first and only occurrence. If a G-364 is deleted, the associated G-369 will also be deleted.

If the first occurrence of Form G-364 and G-369 is deleted, the second occurrence of the forms will become the first occurrence and the third
occurrence, if any, will become the second occurrence. Likewise, if the second occurrence is deleted, the third occurrence will become the second.

ONCORR will also delete the appropriate accompanying forms indicator(s), so it is not necessary to change that item on Form G-357 or G-364 when deleting a form.

9.12.26 Correcting The Award

A. Access the Reject Selection screen (RCM 9.12.22), select the award to be corrected, and press PF3 (CORRECT).

The status of the award to be corrected must be "reject" (REJ) or "pending authorization" (PNDA). If the status of the award is "pending authorization," it will revert to "reject" if further corrections are made.

B. Review the reject and referral messages on the Reject/Referral Reasons screen (RCM 9.12.24), the next screen displayed, to determine the corrections to be made.

C. If the reject is a railroad award, select the form to be corrected on the Form Selection screen (RCM 9.12.25). A form may also be added or deleted from this screen. If the reject is a social security award, the next screen displayed will be the first screen of Form RR-1e.

D. Enter corrections on the form correction screens by moving the cursor to the appropriate item and typing the new or changed data.

Data from the award forms is displayed in a series of screens. The numbers of the screen items correspond with the award form item numbers. When a form is selected on the Form Selection screen, the beginning of the form is displayed first. Access other screens for that form by pressing the appropriate PF key. The item numbers that will be displayed for each PF key are shown at the bottom of the screen.

Not all award form items are displayed on the screens; only items that are keyed are displayed. Exhibit 1 shows the data that is keyed from the attached retirement award forms. Most data from Form G-357 is keyed, but exceptions are noted. Refer to this exhibit to resolve questions about what data from the form should be entered on the screen.

Some general screen format features are:

- Items are arranged from left to right and down, since that is how the cursor moves.
• Data that cannot be changed is displayed in green. There are only a few items that cannot be changed: the original voucher number and date; the accompanying forms indicators on Form G-357 and G-364; the number of G-357s on the G-357, the number of sets on the G-364 and the examiner and authorizer numbers (these can only be changed by a supervisor). For survivor awards with multiple G-364’s, if the claim number and accrual period ending date are changed, they must be changed on the first occurrence of Form G-364. Those items will be updated to be the same on the other occurrence(s) automatically.

• When an item requires entry of a code, the acceptable values are usually displayed in parentheses after the item caption. A translation of the code is displayed in gold after the code itself.

Some screen items require that a code be entered where the corresponding form item allowed a numbered box to be checked. In those situations, enter the number of the box that would have been checked on the form.

Example: 7 TYPE OF CERT (0-3, 6-9): 1 RECERT

• When an award form item required that a single box be checked, the appropriate screen entry is an "X."

Example: 13 TOLERANCE APPLIES (X): X * 5

• When the award requires that a box be checked to indicate "yes" or "no", the appropriate screen entry is "Y" or "N."

Example: 19 SS BEN RECEIPT CD (Y/N): Y

• Money amounts that were not filled in on the award will be displayed as ".00". When entering a money amount, it is not necessary to position the decimal point exactly where it is positioned on the screen, but a decimal point must be entered to indicate how the dollars and cents are to be formatted.

• When the award form has three columns of data, the screen also displays three columns. Some items contain a "computation" (left) block and a "rate" (right) block. In some items of this type, only the computation block or only the rate block is keyed. As much as possible, this data is aligned to the left or right on the screen to indicate whether it is computation data or rate data. Refer to Exhibit 1, for information on what data from the retirement forms is keyed.

• The group mark should be entered in the first line of the address by pressing SHIFT and 1 on a standard terminal or the right-hand bracket () on the PC terminal.
• When a question mark appears in an item, it means that the data was miskeyed and the appropriate code could not be displayed. Determine what the correct entry should be.

• When changes are successfully updated to the screen, pink asterisks appear after the new or changed data.

E. After all of the necessary corrections have been made to a screen, press one of the following keys to take the action shown.

1. To update any changes that were made to the screen, press one of the following keys:

   PF24 (DONE) - Corrections have been completed. No further changes have to be made to any of the forms for the award. (See F below.)

   ENTER - To update changes to the screen and confirm that they were accepted. Pressing ENTER causes the screen to be edited. If no errors are detected, asterisks will appear behind the changed data to confirm that the changes were accepted. Press one of the other keys depending on the next action to be taken. If errors are detected, they must be corrected before processing may continue.

   PF11-21 - To update changes to the screen and go to another screen within the same award form. Pressing one of these PF keys causes the screen to be edited. If no errors are detected, the requested screen will be displayed. If errors are detected, they must be corrected first.

   PF22 (FORM SELECT) - To update changes to the screen and go to another form for the same award via the Form Selection screen. This also causes the screen to be edited.

   PF23 (REJ REASON) - To update changes to the screen and to view the reject/referral reasons. This also causes the screen to be edited.

2. If any of the following keys are pressed before pressing ENTER or one of the other keys listed above, any changes made on that screen will not be updated to the screen.

   CLEAR - To leave without updating the changes and to transfer to the Form Selection screen (if a railroad award) or the Reject Selection screen (if a social security award).

   PA1 - To transfer to the Reject Selection screen.

   PA2 - To exit the system.
F. After all corrections have been made to the award, press PF24 (DONE). Correct any errors that are detected. This may require that other forms within the award be accessed. If corrections had to be made, press PF24 again after all corrections have been made.

When PF24 is pressed, ONCORR

- edits the screen the user is on
- performs edits that involve comparing items on more than one screen. These edits may involve more than one screen within a form, or more than one form within an award. It also edits for the completion of required items.
- determines a voucher date. The voucher date is tentative and may be changed when the award is authorized.
- edits the date through which the award was accrued to make sure it is consistent with the voucher date.

(See RCM 9.12.28 for more detailed information on the edit process.)

When the award passes all edits, this message will appear:

PROCESSING SUCCESSFULLY COMPLETED - STATUS CHANGED TO "PNDA"

The award is now ready to be authorized.

G. Exit ONCORR by pressing PA2 or return to the Reject Selection screen to access other awards by pressing PA1.

9.12.27 Authorizing The Award

A. Access the Reject Selection screen (RCM 9.12.22), select the award to be authorized, and press PF6 (AUTHORIZE). The status of the award to be authorized must be "pending authorization" (PNDA).

Examiners cannot authorize awards that they have corrected. If this is attempted, the message "EXAMINERS CANNOT AUTHORIZE OWN WORK" will appear on the Reject Selection screen.

B. Review the reject and referral messages on the Reject/Referral Reasons screen, the next screen displayed, to determine what corrections should have been made by the examiner.

C. Review the corrections made by the examiner. The Form Selection screens will display an asterisk in front of any forms that were corrected. Every item on the form that was corrected by the examiner will have an asterisk after it.
D. If errors are found, refer the award to an examiner for correction. Changes cannot be made to the award while it is being authorized.

E. If the award is approved, press PF24 (DONE).

ONCORR will set a final voucher date and edit the date through which the award was accrued to make sure it is consistent with the voucher date. (See RCM 9.12.28.) The voucher date then becomes part of the status information for that award on the Reject Selection screen.

If an error is detected, refer the award to an examiner for correction. If no errors are detected, this message will be displayed: PROCESSING SUCCESSFULLY COMPLETED - STATUS CHANGED TO "AUTH."

The award will be extracted from the ONCORR database at the appropriate time for processing through DAISY.

F. Exit ONCORR by pressing PA2 or return to the Reject Selection screen to access other awards by pressing PA1.

9.12.28 How Awards Are Edited

ONCORR performs two edit processes when an award is corrected.

A. It edits each item on every award form screen the examiner accesses (unless the screen is exited without attempting to update it).

Data is checked to see that it is alpha or numeric as required by the item, that any codes entered are acceptable, that dates entered are valid, that mandatory items are completed, and that items that have some relationship are consistent. Errors are highlighted in red and an error message is displayed at the bottom of the screen. Any changes made to a screen cannot be updated unless the item edits for that screen are passed. If the examiner does not access a screen, only items on that screen that are affected by a relational edit (as explained below) are edited.

B. When the examiner indicates that all corrections to the award have been completed by pressing PF24, ONCORR edits for the completion of required items, performs interscreen relational edits and edits the accrual period ending date.

1. Relational edits. Relational edits are edits between two items that bear some relationship. For example, both items are required (if the tier summary total is completed, then the tier summary total code must be completed); or if one item is a certain value, the other item must be a certain value (if the cert code is recert, the last monthly check rate must be greater than zero).
An interscreen edit may involve items on different screens within the same form, or items on different forms within the same award.

When an error message for an interscreen edit appears on the screen after PF24 has been pressed, it may be necessary for the examiner to leave the screen he is on and go to another screen to make the correction. The error message will identify the form that contains the error. If a survivor award involves multiple payees, the payee code will be displayed in front of the relational edit error message. The examiner should continue to make corrections and press PF24 until this message is displayed:

PROCESSING SUCCESSFULLY COMPLETED - STATUS CHANGED TO "PNDA"

2. "Paid through" date edit. The date through which the award was accrued is compared to the voucher date set by ONCORR. ONCORR assumes that the award is to be vouchered on the earliest possible date. It always sets the voucher date as either the next day, the date of one of the two DAISY runs in the post period, or the first of the following month depending on whether or not the award can be processed before the cut-off date.

Whenever the examiner adds or changes the accrual dates on an award, a warning message appears to remind the examiner that the accrual amounts must agree with the accrual period shown. ONCORR does not recompute accruals.

A recurring award should be accrued through the month before the voucher month. If it is not, one of the following error messages is displayed:

- "PAID THROUGH DATE ERROR - REEXTEND OR DELETE." This message appears if the award is accrued through a month that is earlier than the month before the voucher month. Extend the accrual through the correct month or delete the award from ONCORR.

- "PAID THROUGH DATE ERROR - CUT BACK OR DELETE." This message appears if the award is accrued through the same month as the voucher month or a later month. Adjust the accrual to extend it through the correct month or delete the award from ONCORR. It is also possible to let the award pend on the database and have it authorized later, when the system would set a voucher date consistent with the paid through date.

Exception: During the correction process, ONCORR will allow the award to be accrued through the same month as the voucher month or a later
month. This is to allow for the situation in which the examiner has extended the accrual because he knows the award will not be authorized before the current month's cut-off. However, the following warning message will be displayed: WARNING - PAID THRU DATE IN FUTURE - CUT BACK OR DELETE IF NECESSARY

One-payment-only awards are also edited to make sure that the paid through date is not later than the month before the voucher month. It can be earlier.

The paid through date must be completed on all awards except for cert code 6, one-payment-only awards. The paid through date on these awards may be "00/00" (blanks are not acceptable). The paid through date is not keyed from Form RR-1e. The examiner must enter the accrual paid through date on all RR-1e's in the item provided on screen 2 of Form RR-1e, accessed by pressing PF12.

When a paid through date error is detected on Form G-364 and there are multiple G-364's attached to one G-364.1, it is only necessary to change the paid through date on the first G-364. ONCORR assumes that the paid through date on all awards should be the same.

(See RCM 9.12.34 for an explanation of how to determine the "paid through" date based on the checkwriting cut-off calendar.)

### 9.12.29 Deleting Awards

If it is determined that the award will not be resubmitted for vouchering on ONCORR, the award should be deleted from the database. To delete an award, select the award on the Reject Selection screen (RCM 9.12.22), and press PF4 (DELETE). The award that was selected for deletion will be highlighted in yellow and this message will appear:

**HIT PF4 TO CONFIRM DELETION OR PF11 TO CANCEL**

Press PF4 again to delete the award. Press PF11 to cancel the request to delete. A confirmation message will appear.

Deleted awards remain on the database through the end of the month after the month in which they are deleted. During that time they may be viewed and can be reopened by a supervisor for correction, if necessary.

Awards originally vouchered through the BREA subsystem (voucher number greater than 999) that are deleted are listed on a report. (See RCM 9.12.57.)
9.12.30 Reopening Awards

No further corrections can be made to an award after it has been authorized unless the award is reopened. Supervisors may reopen awards by accessing the Reject Selection screen, selecting the award to be reopened, and pressing PF9. The award that was selected for reopening will be highlighted in yellow and this message will appear:

HIT PF9 TO CONFIRM REOPEN OR PF11 TO CANCEL

Press PF9 again to reopen the award. Press PF11 to cancel the request to reopen. A confirmation message will appear. The status of the award will revert to "reject" (REJ). The examiner can then access the award and make corrections.

Only awards with a status of "authorized" (AUTH) or "deleted" (DLET) may be reopened. Awards with a status of "batched" (BCHD) cannot be reopened. These awards have already been extracted from the database for processing through DAISY. Although the award remains in the database for viewing, no further corrections are possible. It would not be necessary to reopen awards with a status of "reject" (REJ) or "pending authorization" (PNDA), since corrections may be made to these awards.

9.12.31 Reassigning Awards

When an award is corrected on ONCORR, the examiner number and authorizer number entered on the original award are retained on the ONCORR award. Production credit for the ONCORR award is given to the original examiner and authorizer. Supervisors have the authority to change the examiner and/or authorizer on an award, if they determine that production credit should be given to the correcting examiner(s).

To reassign the examiner/authorizer number(s), the supervisor accesses the Reject Selection Screen, selects the award to be reassigned, and presses PF10. The Reassign Examiner Number screen, showing the current examiner and authorizer numbers, will be displayed. The supervisor enters the new examiner and/or authorizer numbers. The system will not accept a new number that is identical to the old number. If no change is being made to a number, leave the number blank. When ENTER is pressed, the new number(s) become part of the award record.

9.12.32 Introduction

Four tables are maintained on ONCORR. They are the Checkwriting Cut-off Calendar, the Reject/Referral Reason Table, the Unit Table and the Voucher Number Table. These tables are used by the system to identify rejects, to organize the rejects after they have been extracted from DAISY/CHICO, and to set voucher numbers and dates for corrected rejects. The tables are maintained by user analysts in the Division of Adjudicative Services in the Office of Retirement and Survivor Programs. They are the only users who can update a table. Other users may view them.
9.12.33 Table Selection Screen

A table is chosen for viewing or updating by using the Table Selection screen. This screen is entered from the Reject Selection screen by pressing PF-22 (for viewing) or PF-23 (for updating).

The Table Selection screen lists the four tables maintained on ONCORR. A table is accessed by entering its number at the cursor and pressing enter. The mode used to enter the Table Selection screen (inquire or update) carries through to each table selected from the screen.

SEE EXHIBIT 9

9.12.34 Checkwriting Cut-Off Calendar

A checkwriting cut-off calendar is maintained on ONCORR so that the system can set appropriate voucher dates for awards. User analysts in the Division of Adjudicative Services in the Office of Retirement and Survivor Programs are the only users who can update the calendar.

In the event that the cut-off calendar for a particular month is not updated by the first of that month, examiners attempting to process awards on ONCORR will receive the message: "NO CUT-OFF CALENDAR - NOTIFY SUPERVISOR." Examiners should notify their supervisor, who will contact the user analyst responsible for updating the calendar.

A. Viewing the Calendar - Access the calendar screen from the Table Selection screen by entering "1" and pressing ENTER. Enter the month and year of the calendar to be viewed. If ONCORR does not have a calendar for that month, this message will be displayed: NO CALENDAR RECORD FOUND. Otherwise, the pre and post period beginning and ending dates and the type of post period will be displayed.

The screen also indicates the types of awards that can be processed in that month's post period.

Assuming that the calendar month is the current month, all recurring awards corrected and authorized through the day before the pre-period ending date should be accrued through the month before the calendar month. ONCORR will give these awards a voucher date of the next day.

Any awards that can be handled in that month's post period that are corrected and authorized through the day before the post-period ending date should be accrued through the month before the calendar month. ONCORR will give these awards a voucher date of the beginning date of the post period (if the award is corrected and authorized before that date) or the ending date of the post period (if the award is corrected and authorized after the post-period beginning date but
before the post-period ending date). The beginning and ending dates of the post period are the only two dates in the post period on which there are DAISY runs.

Other recurring awards should be accrued through the calendar month, since ONCORR will set the voucher date as the first of the following month.

B. Updating the Calendar - Enter the Table Selection screen in update mode (PF23). Access the calendar screen from the Table Selection screen by entering "1" and pressing ENTER. Enter the month and year of the calendar to be updated. If information was previously entered for this calendar month, it will be displayed and may be corrected. ONCORR will not allow a month that is earlier than the current calendar month to be corrected, however.

If no information was previously entered for this month, the screen displayed will have certain information pre-filled and the rest of the information should be entered. The pre and post period beginning and ending month and year will be pre-filled based on what they should be for the calendar month and year entered. Enter the required dates. Place an "X" in front of the appropriate post period.

When ENTER is pressed, the screen is edited. In some cases the error messages will be warnings only, for example: "WARNING-POST PERIOD ENDING DAY SHOULD BE THIRD-TO-LAST BUSINESS DAY." These warning messages provide guidelines for entering dates, but may be overridden if the dates for a particular month do not conform to the usual rules.

SEE EXHIBIT 10

9.12.35 Reject/Referral Reason Table

The Reject/Referral Reason Table contains a code which tells the DAISY/CHICO system which reject/referral numbers are rejects and which are referrals. The reject/referral descriptive messages are also stored on this table. The Reject/Referral Table screen allows a user to request an individual reject/referral number in order to see its reject code and its descriptive message. The entire table cannot be viewed at one time.

If the screen is entered in update mode, the reject code and the descriptive messages can be changed. User analysts in the Division of Adjudicative Services in the Office of Retirement and Survivor Programs are the only users who can update the table. Any change in the status of a reject or referral must be made with the concurrence of the other bureaus affected--the claims operations bureaus and the bureaus of taxation and research and employment accounts.

Enter the Reject/Referral Table screen by entering "2" on the Table Selection screen and pressing ENTER. When the screen is displayed, enter the number of the desired reject/referral and press ENTER. What happens next depends on what mode the user is in.
A. **Inquiry** - If the number is not found in the table, the message REQUESTED RECORD NOT FOUND is displayed and the user can enter another number. If the number is in the table, the reject code and the descriptive message are displayed. All fields are protected (green) except the number request field.

B. **Update** - If the number is not found in the table, the message REQUESTED RECORD NOT FOUND-WILL BE CREATED is displayed. The number field is protected. The Type Code and Description fields are unprotected and the cursor moves to the Type Code field. Type in a reject code (y=reject, n=referral) and a descriptive message and press ENTER to create a new record. Note: The Description field is limited to 38 characters.

If the number is in the table, the current information is displayed as unprotected (white) so that changes can be made.

New entries are edited. If an error is found, an error message is shown and the incorrect field is highlighted. When all edits are passed, the message REJECT/REFERRAL RECORD SUCCESSFULLY UPDATED is displayed. If no changes are made the message NO DATA CHANGED - NO UPDATE DONE is displayed.

After all edits are passed, the Type Code and Description fields are protected, the number request field is unprotected and the cursor moves to the number request field. If new entries are made on the screen, but the user exits the screen by pressing CLEAR, PA1 OR PA2 without first pressing ENTER, the new data is not updated to the table. No message is given.

NOTE: Any DAISY/CHICO edits that are performed in the CHICO update program (P26311) cannot be converted to rejects using this table. Changes to P26311 would be required. This table affects only edits done in P26530 or edit modules called by P26530. Likewise, DAISY edits with numbers below 100 cannot be converted to referrals using this table.

A sample of the Reject/Referral Reasons Table screen is shown below.

**SEE EXHIBIT 11**

**9.12.36 Unit Table**

The Unit Table screen allows the user to view the voucher numbers associated with a specific operating unit. The screen also allows users to update the voucher number information maintained on the Voucher Number Table. User analysts in the Division of Adjudicative Services in the Office of Retirement and Survivor Programs are the only users who can use the Unit Table for updating.

A. **Entering the Table for View Only.** While in inquiry mode, access the Unit Table screen from the Table Selection screen by entering "3" and pressing ENTER. A
blank Unit Table screen is displayed. Type the desired unit's initials in the unit field and press ENTER. If the unit has no records that were effective during the current fiscal year, the message NO RECORDS FOUND FOR UNIT ENTERED is displayed. If records do exist for the unit, the current record, as well as any other records that were effective during the current fiscal year are displayed with all fields protected (green). The unit field will remain unprotected (white) so that another unit request can be entered.

B. Entering the Table for Updating. While in update mode, access the Unit Table screen from the Table Selection screen by entering "3" and pressing ENTER. A blank Unit Table screen is displayed. Type the desired unit's initials in the unit field and press ENTER. If the unit has no records on the Voucher Number Table, the message NO ACTIVE RECORDS FOUND FOR UNIT ENTERED-WILL BE CREATED is displayed. If records do exist, all the active records for the unit are displayed. (An active record is one whose ending date is in the future or unspecified). Fields which can be changed are displayed in white. Protected fields are displayed in green.

A sample of the Unit Table screen is shown below.

SEE EXHIBIT 12

Using the Unit Table to update is the only way that the entries on the Voucher Number Table can be modified. When a change is made to a unit's records, the change is edited against all the other records within the unit to make sure that there are no overlapping voucher numbers or dates. The new entry is then edited against all the other unit records in the Voucher Number Table to make sure that no voucher numbers overlap during the same dates. There are several restrictions imposed on updating to ensure that the edits are carried out properly:

- Only one record in a unit can be modified, added or deleted at a time.
- Dates earlier than the current date cannot be changed.
- Dates earlier than the current date cannot be entered.
- If an actual ending date is not entered, the ending date must be 99/99/99.
- Neither the voucher numbers nor the sort code can be changed in a record with at least one date that is earlier than the current date.
- Only the ending date can be changed in a record that has a beginning date before the current date.
- A new record can be added only if the beginning date is the current date or later and the beginning date is later than the ending date of all the other records in the unit.
• To delete a record the beginning date and the ending date must be the current date or in the future.

When the unit's active records are displayed type an "M" under the "Act" to modify a record and enter the changes to the record. Type a "D" to delete a record. A new record can be added by completing the entire last line (line 10) on the screen. Only one action can be taken at a time. If more than one action is attempted, the message MULTIPLE ACTION INVALID is displayed.

When adding a new record, enter the acronym of the organization to which the unit belongs (e.g., BDMO). Enter "V" (voucher number sort) or "T" (terminal digit sort) under "SEQ" to indicate the sort sequence of the awards for that unit on the Current Day's Reject Report. Units with a sequence code of "V" have their awards sorted by voucher number, then claim number; units with a sequence code of "T" have their awards sorted in terminal digit order.

After the activity code and the new entries have been typed, press ENTER. If the new entry fails an edit, an error message is displayed. If the cause of the error is on the screen, the incorrect item is highlighted in red. If the error is caused by a conflict with entries in another unit's record, the message will identify the unit. To help locate the error, the active records for all the other units are available on the Voucher Number Table. Press PF-9 to view those records. To return to the Unit Table from the Voucher Number Table, press CLEAR.

When the new entry passes all the edits, the message UNIT TABLE ENTRY SUCCESSFULLY UPDATED is displayed. The changed record is highlighted in turquoise and the other records are in protected green. The cursor returns to the unit field. While making a change, pressing PF-5 will return (refresh) the screen to the entries that were originally displayed. None of the changes made to the record are kept. After the Unit Table is successfully updated, the Voucher Number Table is also changed.

Helpful hint: When records for more than one unit are changed at one time, enter an ending date in each of the units to be changed before making any modification to the unit entries or adding new records to the units. This will prevent the new entries from editing against invalid old entries.

BREA-DSS should be informed of any changes made to the unit table, since they will be assigning four-digit voucher numbers to awards processed through their correction subsystem based on the voucher numbers designated for each unit.

9.12.37 Voucher Number Table

A voucher number table is maintained in ONCORR so that the system can determine to which unit a rejected award belongs and assign the appropriate ONCORR voucher number when corrected awards are extracted from the data base for vouchering.
The table contains the railroad and social security voucher number ranges for each operating unit and the dates those voucher numbers are active. It also contains the railroad and social security ONCORR voucher numbers assigned to each operating unit as well as a special "cycle 2" voucher number used for awards which rejected from the BREA correction system. Finally, it contains a code which designates how a unit's rejects will be sorted for display on the HSL Current Day's Reject Report, either by voucher number (V) or in terminal digit order (T). User analysts in the Division of Adjudicative Services in the Office of Retirement and Survivor Programs are the only users who can update the Table. All other users may view it.

All units with active voucher numbers are shown on the Voucher Number Table. (Active voucher numbers are those whose ending dates are either in the future or unspecified.) These active records are viewed by using the Voucher Number Table screen. This is a view only screen. Changes to the table must be made by using the Unit Table screen. (See 9.12.36.)

A sample of the Voucher Number Table screen is shown below.

SEE EXHIBIT 13

Access the Voucher Number Table screen through the Table Selection screen or the Unit Table screen (while in update mode).

A. Viewing the Voucher Number Table by Using the Table Selection Screen. Access the Table Selection screen from the Reject Selection screen by pressing PF-22 (if inquiring) or by pressing PF-23 (if updating). Enter "4" on the Table Selection screen and press enter. All units with active voucher numbers are displayed.

B. Viewing the Voucher Number Table by Using the Unit Table. It is possible to access the Voucher Number Table from the Unit Table while in update mode by pressing PF-9. All units with active voucher numbers are displayed. Press clear to return to the Unit Table Screen.

9.12.40 How Long Rejects Remain On ONCORR

Rejects remain on the database and are available for viewing until the month after the month they were batched for processing through DAISY or were deleted from the database. Once an award has been batched for processing through DAISY, no further corrections can be made to the award. Deleted awards that are still on the database can be corrected if they are reopened.

9.12.41 Corrected Awards

Corrected rejects are extracted from the ONCORR database and processed through DAISY with other manual award activity (see RCM 9.12.14). It is possible that the ONCORR award may reject from DAISY/CHICO if an error condition exists in the
ONCORR award. In general, DAISY/CHICO does not perform other edits with reject numbers less than 100 once it finds one in that range. So it is possible that the award may reject again if it has other error conditions that were not detected by DAISY/CHICO or by the ONCORR edits. It is also possible that a new Rate History reject reason may be produced. If the ONCORR award rejects, it will be recycled through ONCORR for correction. ONCORR awards appear on the DAISY/CHICO award and reject listings.

9.12.42 Folder Documentation

A. **Description** - The folder record Form G-380 documents all of the changes that were made to the award. All changed or deleted data is listed by form and item number on the right-hand side of the record. Basic rate information from the award (tier rates, net annuity rate, net amount paid) is shown on the left-hand side. A sample of the folder documentation is in Exhibit 3.

For awards that were originally vouchered through the BREA subsystem, a second set of folder documents is produced for BREA.

B. **Handling** - Folder documentation is produced for every award that is extracted from ONCORR for processing through DAISY. The central control group will deliver the documents to each vouchering unit. All folder documents, including those for awards that reject, should be filed on the left-hand side of the folder.

If an ONCORR award rejected and if it is followed by another ONCORR award that paid, it will be necessary to look at the changed items from both folder documents (the one produced by the reject and the one produced by the award that paid) to determine which items on the original award were changed.

9.12.50 Current Day's Reject Report

The current day's reject report lists payment rejects that were loaded onto the ONCORR database from the latest DAISY/CHICO run. A new report is available on HSL after each DAISY run and can be used to assign rejects to examiners for correction. HSL stores the last ten reports in order from newest to oldest. The title of the report shows the date the report was updated.

The rejects listed on the report are grouped by examining unit. Within each unit, the awards are sorted either by voucher number and then in claim number sequence (CBS, ICS, RPS, RBT, RSC) or in terminal digit order (all other units). CBS, ICS, RBT, RPS and RSC are displayed first on the report followed by all other units in alphabetical order.

A sample of the report is shown below.

**SEE EXHIBIT 14**

The following information is displayed for each award.
• UNIT - The examining unit that vouched the reject. ONCORR determines the unit based on the voucher number of the award. If it is not able to determine the unit for a particular voucher number it will assign the award to RPS or SPS. When that happens, an asterisk will appear after the unit name on the report. If the award does not belong to RPS or SPS, they should notify the unit to which the folder is charged so that the reject will be handled.

• CLAIM NUMBER

• PC - payee code.

• VOUCH and DATE - voucher number and voucher date of the award.

• EXAM - examiner number.

• AUTH - authorizer number.

• TYPE - type of certification (initial, recert, etc.)

• STATUS - status of the award on ONCORR. This will always be "REJECT."

• The reject and/or referral reasons are displayed in the second and following lines.

• The total number of rejects for each unit is displayed after its rejects.

9.12.51 Claims Pending Report

The claims pending report lists all awards pending on the ONCORR database for one or more days that have not been corrected and authorized. It can be used to monitor rejects to make sure that they are being handled quickly and to see that rejects that will not be corrected on ONCORR are deleted from the database.

A new report is available on HSL after each DAISY run. HSL stores the last ten reports in order from newest to oldest. The title of the report shows the date the report was updated.

The report shows the number of days each award has been pending on the ONCORR database. The report groups awards by organization and then by unit. Within each unit, the awards pending the longest are listed first. Organizations (compliance, disability/medicare, retirement, and survivor) and units are listed in alphabetical order. The status of awards on this list is always "reject" or "pending authorization."

A summary page gives the total number of awards pending correction or authorization for each unit for one, two, three, four, five, six, and seven days, and more than seven days; totals for each organization; and grand totals.

A sample of the report is shown below.
9.12.52 Examiner/Authorizer Error Reports

Reports of all award rejects loaded onto ONCORR during the month are produced at
the end of each month. Two reports are produced. One is sorted by examiner number;
the other by authorizer number. Awards that were deleted from ONCORR are identified.

Sample reports are shown in Exhibit 2.

9.12.53 Reject/Referral Reason Reports

Four reports are produced that give counts of the number of manual awards that
rejected for a particular reject reason. One report is produced daily and is available on
HSL. The other reports are produced monthly. These reports can be used to detect
program errors and to identify training needs.

The reports are described below:

- Daily report of reject and referral reasons in order of frequency.
- Monthly report of reject and referral reasons in order of frequency.
- Monthly report for each unit of its reject and referral reasons in order of frequency.
- Monthly report of reject and referral reasons in numeric order.

Each report shows the number of each reject and referral reason, identifies it as a reject
or referral, and gives a breakdown of the number of retirement, survivor, and social
security awards for each reason. If no awards rejected for a particular reason, that
reason will not be in the report. The reason associated with each reject/referral number
is included in the monthly reports. They also can be found in the Appendices for this
chapter.

A sample of the daily report is shown below. Samples of the monthly reports are in
Exhibit 2.

SEE EXHIBIT 17

9.12.54 Counts

ONCORR counts the number of awards that reject, the number that are batched from
ONCORR for processing through DAISY, the number that were deleted from ONCORR,
and the number that reject again within a given month. Each month a report
summarizing these totals is produced. The report gives the number of awards in each
category for each adjudication unit, totals for each organization, and grand totals. The report also gives totals for the fiscal year to date.

Beginning and ending effective dates are specified for each unit. If the voucher numbers assigned to a unit change during the fiscal year, or a unit is added during the fiscal year, a new line of totals with a new effective date will be added.

A sample of this report is in Exhibit 2.

### 9.12.55 Time Lapse Reports

Two monthly reports track how long it takes to process rejects on ONCORR. The first report tracks the number of days that elapse between the time the award rejects and the time it is authorized. The second report tracks the number of days that elapse between the time the award rejects and the time it is batched for processing through DAISY. The first report can be used to assess how quickly awards are handled by examiners; the second, to assess overall turnaround time for rejects. Examiner handling of an award is completed once the award is authorized. However, some awards must wait until the first of the following month to be extracted from the database for processing through DAISY.

On each report, the time elapsed is counted in one-day increments for the first 10 days, then in increments of 11-20 days, 21-30 days and more than 30 days. The number of awards handled by each unit in each time frame is shown, as well as each unit’s monthly and fiscal-year-to-date totals and average processing time for the month and year; subtotals for each organization; and grand totals.

Beginning and ending effective dates are specified for each unit. If voucher numbers assigned to a unit change during the fiscal year, or a unit is added during the fiscal year, a new line of totals with a new effective date will be added.

A sample of this report is in Exhibit 2.

### 9.12.56 Research Reject Report

The Research Reject Report lists the award rejects that were loaded onto the ONCORR database from the latest run of the BREA correction subsystem.

A new report is available on HSL each time the BREA correction subsystem runs, which is usually weekly. The report can be used to assign rejects to examiners for correction. HSL stores the last ten reports in order from newest to oldest. The title of the report shows the date the report was updated.

The rejects listed on the report are grouped by unit, and then by claim number within each unit.

The following information is displayed for each award.
UNIT - The unit that vouchered the reject. ONCORR determines the unit based on the voucher number of the award. If it is not able to determine the unit for a particular voucher number, it will assign the award to Research. When that happens, an asterisk will appear after the unit name on the report.

CLAIM NUMBER

PC - Payee code.

VOUCH AND DATE - voucher number and date of the award.

EXAM - examiner number.

AUTH - authorizer number.

TYPE - type of certification (initial, recert, etc.)

The reject and referral reasons are displayed in the second and following lines.

The total number of rejects for each unit is displayed after its rejects.

A grand total of all rejects is displayed at the end of the report.

A sample of the Research Reject report is shown below.

SEE EXHIBIT 18

9.12.57 Research Deletion Report

The Research Deletion Report lists cases that rejected from the BREA correction subsystem, were loaded onto ONCORR for correction, and were deleted from ONCORR. This report is produced for BREA each time they extract awards from the ONCORR database for reprocessing through their subsystem, which is usually weekly. Since awards remain on the database through the end of the month after the month they are earmarked for deletion, awards earmarked for deletion will continue to appear on the reports until they are dropped from the database.

The report gives the following information for each deleted award: unit, claim number, payee code, voucher number, voucher date, examiner number, authorizer number, and type of award. The awards are listed by unit, and then by claim number within unit.

A sample of the report is in Exhibit 2.
Appendices

Appendix A - DAISY/CHICO Edit Messages

ON-LINE CORRECTION SYSTEM (ONCORR)

DAISY/CHICO EDIT MESSAGES

Messages numbered from 0001-0189 are DAISY/CHICO edit messages. All of the edits numbered less than 100 and some of the edits numbered from 101-189 cause payment rejects. Edits identified with "(REF)" below the edit number may require corrective action but do not, of themselves, prevent payment.

0001 MASTER IN PAY STATUS - A record is already in pay status and another award action (other than a recertification or one payment only) is being attempted. The DAISY listing for this type of reject will show two records. The first record shows the award activity data and the reject message. The second record gives a printout of the current information on the master file. This reject may be caused by one of the following:

A. An incorrect prefix and/or claim number or payee code used. If any of these items are incorrect, the name and address on the rejected award will be different from the name and address on the rejected award printout section of the DAISY listing.

B. Termination or suspension action not processed or never attempted. A reinstatement or reinstatement-recertification award will reject when the G-96 or FAST-S/T transaction to suspend or terminate the annuity failed to process.

C. The award was coded other than recertification when it should have been coded "recert".

D. Duplicate awards were processed. This usually happens when a manual award is attempted after a mechanical award (i.e., RASI, PAM) is processed and vice versa.

E. A suspended award should have been terminated. This can happen when a survivor award is processed and the employee record has only been suspended.

F. A social security initial (current pay) award will reject for this reason if there is an SS rate in the master. This usually happens when an SS award is processed for a spouse and the master shows a terminated SS benefit for the previous spouse. Delete the previous spouse record with a
G-96, or FAST-S/T transaction coded 62 and resubmit the initial SS award.

0002 NO MASTER RECORD - An award action other than a final or partial is being attempted, and no previous award action is in the master file. This type of reject can be caused by an incorrect claim number and/or prefix or a wrong payee code. This reject can also be the result of a previous record established under an incorrect claim number.

0003 RATES NOT EQUAL - The last monthly railroad or social security rate on the rejected award does not agree with the last monthly railroad or social security rate in the master file. (This type of reject should only appear on "Recert" awards.) Two records will appear on the DAISY/CHICO listing for this type of reject. The first record will give the reject reason "RATES NOT EQUAL", and the second record will provide a master file printout which includes the last monthly check rate.

0007 MASTER NOT IN PAY STATUS - A recertification (recert) award action is being taken, but the master record has been suspended or terminated. The DAISY listing for this type of reject will show two records. The first record shows the award activity data and the reject message. The second record gives a printout of the current information on the master file. There are several reasons that might cause this type of reject.

A. An incorrect prefix and/or claim number or payee code used. If any of these items are incorrect, the name and address on the rejected award will be different from the name and address shown on the master file printout section of the DAISY listing.

B. A returned payment, G-96, or FAST-S/T transaction suspended or terminated payments.

C. An award was coded recertification when it should have been coded one payment only, reinstatement or reinstatement-recertification.

D. A STAZA award was attempted but the RR annuity was not in current pay status.

0009 REINST-RATE NOT EQUAL - The monthly rate on a reinstatement (reinst) award action is not the same as the rate on the suspended or terminated master file. Two records are shown on the DAISY listing for this type of reject. The first record gives the reject reason. The second record includes the rate that was in effect at the time of suspension. On a reinstatement award the monthly annuity payable should be the same as the rate on the master file. This type of reject could also occur if the claim number or prefix is incorrect.
0011 BASIC/SUP CODE INVALID OR INCONSISTENT - There are several possible causes for this type of reject.

A. The incorrect box, or no box, was checked in TYPE OF PAYMENT (Reg Ann, Sup Only, Reg and Sup) on Form G-357.

B. In survivor cases, the A or D prefix is not preceded by symbols such as W or WC or, in retirement cases, a Sup payment is attempted (Reg and Sup box checked) and there is an entry prior to the A prefix (M, L, X, etc.)

C. On a one payment only award, the SUP ACCRUAL is zero and the SUP/REG ANN recovery box is not coded for transfer of money to Reg Ann.

D. On a recurring award, the MO SUP ANN CHECK RATE is zero and the RRA MAX REDUCTION, REDUCTION IN SUP ANN and SUP LEGAL PROCESS DEDUCTION are all zero.

E. On a recurring award, the MO SUP ANN CHECK RATE plus the REDUCTION IN SUP ANN exceeds $70.11.

F. If the TYPE OF PAYMENT is Sup Only, the TYPE OF CERTIFICATION (activity code) must be either one payment only or recertification.

0012 RECERT IN POST UPDATE PERIOD - The award is a recertification and was processed after recert cut-off. Either the type of certification (activity code) was entered incorrectly or the award was not processed by the recert cut-off. If the award is resubmitted on ONCORR, re-extend the accrual if necessary; ONCORR will set the voucher date and edit to make sure that the paid through date is consistent with the voucher date it has set.

Note: Since initial SUP awards are considered recertifications, they must be processed before recert cut-off.

0013 INVALID ACTIVITY CODE - The type of certification (activity code) was keyed incorrectly.

0014 BEN/SYM NOT CONSISTENT WITH PREFIX - The beneficiary symbol used is inconsistent with the prefix. This type of reject will usually occur in survivor cases. Symbols for survivor cases are W, WC, P and J. The symbols immediately precede the prefixes A, D or H in the claim number section of the award form. Survivor prefixes and common corresponding symbols are:

- Widow over age 60 - WA or WD
- Joint and Survivor - JA
• Young Widow with Children - WCA or WCD
• Child(ren) Only - WCA or WCD
• Disabled Widow - WA or WD
• Widow or Child of pensioner - WH or WCH
• Parent - PA or PD

0015 LUMP SUM CODE FOR RECURRING ACTIVITY - The type of certification is "OPO" and recurring payment information (monthly rate, last monthly rate) was completed.

0016 INVALID BENEFICIARY SYMBOL - (See 0017.)

0017 INVALID PREFIX - The beneficiary symbol and/or prefix was omitted or DAISY/CHICO did not recognize the symbol or prefix given.

Valid beneficiary symbol prefix combinations for survivor awards are shown in reject message 0014. Retirement awards can have a prefix of A or H and a beneficiary symbol of blank, M or X.

0018 NO CLAIM NO., INVALID SS ACCOUNT NO. - (See 0019.)

0019 NO SS ACCOUNT NUMBER; INVALID CLAIM NUMBER - A six-digit claim number was omitted from the award or an invalid employee social security number was entered. An invalid social security number will result when the number was keyed or actually written as:

- All 9's or
- With the first digit(s) being 6 or
- With the first digits greater than 730.

It is also possible that one or more of the numeric characters were keyed as alphabetic, for example, letter O for zero, letter l for one, or letter B for eight.

0020 INVALID SUPP ANN EFF DATE - The supplemental annuity effective date on Form G-354 Sup is after the accrual period or the type of payment is "REG and SUPP" and no G-354 Sup was attached to the award and one was required. (A G-354 Sup must be attached to the award if the type of payment is "regular and supp" unless the supp is being reinstated or is being recertified only to apply LPS work deductions or a legal process deduction. If the award is a reinst-recert., Form G-354 Sup must be attached.)
0021 INVALID SUPP RED NON-ZERO B/S CODE - The type of payment was coded "REG ANN" and either a Form G-354 Sup was attached to the award showing a reduction in supp ann or an employer tax credit, or an employer tax credit was entered on Form G-357. The type of payment should be "REG and SUP."

0023 RUIA, SUP, RET AMT/CODE INCONSISTENT - An amount was entered in one of the transfer of funds items but no box was checked. Either a code and amount must both be entered or both should be blank.

0024 RECERT WITHOUT OLD MONTHLY RATE - On a recert award, the last previous monthly rate was not entered in the last monthly payment rate box.

0025 INVALID SMIB RECURRING RATE - A monthly SMI premium amount was entered on Form RR-1e. Since the SMI premium is deducted mechanically, that item should be left blank.

0026 REGULAR MONTHLY RATE MISSING - The monthly rate was omitted or the wrong type of activity was checked (e.g., "recert" instead of "OPO").

0027 SUPP ANN RATE EXCEEDS $70 - Either the monthly supplemental annuity rate, the reduction in the supplemental annuity for an employer pension or the employer tax credit amount was greater than $70.

0030 MAN AMT ZZZZZ.ZZ - COMP AMT ZZZZZ.ZZ - Balance control is a check and balance for individual awards to assure that the money amounts being released have been correctly keyed into the computer payment system. To accomplish this, designated amounts from the award form are totalled and entered into the balance control box on the individual award form. The computer payment system also determines a balance control amount using the same designated items. If the amounts differ, the award rejects. The manual and computer system payment amounts are both shown in the reject message. The discrepancy between the two amounts must be reconciled before the award can be paid.

If the award is being corrected on ONCORR, the Reject Reason screen will display the balance control items that were keyed from the award. These items must be checked against the award to verify that they were keyed correctly.

- **Keypunch error in the balance control item(s):** If the balance control items were not keyed correctly, the items should be corrected. ONCORR will automatically recompute the balance control when the examiner indicates that the award has been completed.

- **Balance control items correctly keyed; balance control amount on the award is incorrect:** It is not necessary to correct the balance control amount. ONCORR will automatically recompute the balance control when the examiner indicates that the award has been completed.
INVALID NO ADDRESS AWARD - A diagonal line has been used in the address section of the award indicating that the address has not changed and the system should take the name and address from the checkwriting master. However, there was no address on the checkwriting master.

NOTE: If the TYPE OF CERTIFICATION (ACTIVITY CODE) is marked partial or final or, on a one payment only, when the master record for the payee code is terminated, the full name and address must be completed.

This reject occurs in the following situations:

A. There is no master name and address for the payee code on the award and no name and address is shown on the award.

B. There is a death termination on the master for the payee code shown on the award and a one-payment-only award is processed without a name and address.

C. A one-payment-only award is processed without a payee code or name and address.

D. An SS award is processed without the name and address and the RR RATE is omitted.

ONE PAYMENT WITHOUT ACCRUAL - DAISY/CHICO can only process a one-payment-only award if there is an accrual or a recovery amount for RUIA, SSA, RR or Sup. Cases involving a "TRANSFER OF FUNDS ONLY" can be vouchedered as a one-payment-only without an accrual.

DUE PROCESS O/P INVOLVED - A mechanical award cannot be paid because of an earmarking in CHICO.

SS CERT - RECOVERY/ENTITLE CODE CONFLICT - The entire social security accrual is being paid yet a railroad annuity is being paid without a reduction for social security benefits. The SS benefit award will reject if the correct code is not shown in the RRB Code box on the RR-1e.

SS CERT - RR-SUSP - NO FORCE CODE - The railroad annuity is in suspense and a social security award is being attempted.

SS CERT - RR TERM - The railroad annuity has been terminated and a social security award is being attempted.

SSEB PIA AMOUNT MISSING - The SSEB PIA amount was not entered on Form G-354 and the employee is age 61 11/12 or older or the SSEB PIA amount was not entered on Form G-355 and both the employee and spouse are age 61 11/12 or older.
0046 **SSEB PIA CODE MISSING OR INVALID** - The SSEB PIA code was not entered or an invalid code was entered on Form G-354 and the employee is age 61 11/12 or older, or the code was not entered or an invalid code was entered on Form G-355 and both the employee and spouse are age 61 11/12 or older.

0047 **RR CERT - ENTITLEMENT CODE CONFLICT** - The railroad annuity is being processed without a reduction for social security benefits but a social security benefit is in pay status.

0048 **RR CERT - SS TERM/DEATH** - The social security benefit was terminated because of death and a railroad award is being attempted.

0057 **INVALID EFFECTIVE DATE** - There is a problem with the voucher accounting date. This field may have been keyed incorrectly or an improper date may have been stamped on a voucher of awards.

Example: The accounting date of the award is either 04-03-90 or 03-04-91 and DAISY is geared to process April 1991 vouchered awards. Awards with the 1990 accounting year would reject because DAISY is looking for awards with a 1991 accounting year. Awards with an 03 accounting month would reject because DAISY is looking for awards with an 04 accounting month.

- If the reject is the result of a keypunch error and the correction is being processed on ONCORR, check to be sure the award has been accrued through the correct month and resubmit the award. ONCORR will set a voucher date and edit the award to ensure that it has been extended through the correct month.

- If the accounting date shows as a prior date, DAISY may have been trying to reprocess work. Notify the Program, Procedures, and Project Analysis section in the Division of Adjudicative Services. Take no action on revouchering the awards.

- If the accounting date shows as a future date, the work may have been released from the adjudication unit too early. If this is the case, notify the Program, Procedures, and Project Analysis section in the Division of Adjudicative Services. Hold the work for the proper accounting period.

0062 **NO BA NUMBER, CB OR PENSION INDICATED** - The BA number is blank, but the CB code has been checked or a tax credit amount has been entered. Either the BA number should be entered or both items should be blank.

0063 **TAX CREDIT/SUPP ANNUITY INCONSISTENT** - Both a monthly supplemental annuity rate and a tax credit amount have been entered, and the total of the two amounts exceeds $70.11.
0064 NEGATIVE TAX WITHHOLDING - The tax accounting system computed a negative tax withholding amount. Refer the folder to the bureau of taxation, Chief of Taxation Analysis-Section A.

0081 WARNING - POSSIBLE DUP ACCRUALS - Two recurring awards to the same payee were attempted in the same voucher month.

0082 WARNING - POSSIBLE DUP PAYMENT FOR PREV MONTH - A suspension/termination and a reinstatement or reinstatement-recertification award containing an accrual were processed in the same vouchering month.

0083 O/P NOT FULLY RECOVERED - ACCRUAL PAID - The total railroad overpayment amount shown on the RR-1e was larger than the amount withheld from the award, and a social security accrual is being paid.

0084 NEGATIVE RATE OR ACCRUAL - Tax withholding was attempted from the award and the withholding amount exceeded the net annuity rate or net accrual amount payable. Refer the folder to the bureau of taxation, Chief of Taxation Analysis-Section A.

0085 G-369 MISSING - Form G-357 or Form G-364 indicated that Form G-369 was attached but the form was not attached or was not keyed.

If the edit occurs because the form was not attached or was not keyed and should have been, the form may be added using ONCORR. If the edit occurs because the form ID(15) was not keyed or the accompanying form indicator was checked in error, no corrective action would be required, other than to reprocess the award, since those errors would have been corrected when the case was loaded onto ONCORR.

0086 SUPP ACCRUAL INCONSISTENT - G-357 item 83 must equal the sum of:

the supplemental accrual amount (G-354 SUP item 27c),

+ the SUPP ACCRUAL DUE AFTER O/P - RECOVERED (Item 51B),

+ the NET O/P SUPP (Item 85B),

Minus the sum of:

the amount transferred to REG ANN (Item 66),

+ the amount transferred to SUP (item 66) if there is a SUP O/P on G-354SUP item 27C.
0087  **TIER SUMMARY TOTAL UNIDENTIFIED** - The tier summary total is not equal to zero, and the box indicating whether the amount is an accrual or an overpayment was not checked.

0088  **TIER SUMMARY TOTAL INCONSISTENT** - The sum of the tier 1, tier 2, and vested dual benefit accrual amounts less the overpayment amounts on Form G-369 does not equal the tier summary total on Form G-357 or G-364.

0089  **NET AMOUNT PAID INCONSISTENT** - The sum of all of the accrual amounts less the sum of all of the deduction amounts does not equal the NET AMOUNT PAID on Form G-357 or Form G-364 Shown as R for 357’s and S for 364’s below. DAISY will make the following calculations. The sum of:

  the ACCRUAL DUE AFTER OVERPAYMENT - RECOVERED (R 51A; S 64),
  + the TIER SUMMARY TOTAL (if coded 1 - accrual) (R 50; S 63),
  + the SS AMOUNT (R 52; S 65),
  + the OTHER BENEF’Y AMOUNT (R 53; S 66),
  + the NON-TAXABLE AMOUNT (R 54; S 67),
  + the RR TAX REFUND (R 55),
  + the LUMP SUM (SALSA) PAYMENT (R 56),
  + the ACT ADJ REFUND (R 57; S 68),
  + the TRANSFER ACCRUED FUNDS FROM RUIA (R 58),
  + the NET O/P REG (R 85A; S 94)

Minus the sum of:

  the TIER SUMMARY TOTAL (if coded 2 - OP) (R 50; S 63),
  + the TAXABLE RECOVERY - OTHER CLAIM NO. (R 61; S 73),
  + the TAXABLE RECOVERY - THIS CLAIM NO. (R 62; S 74),
  + the NON-TAXABLE RECOVERY - ANY CLAIM NO. (R 63; S 75),
  + the RLS REPD (S 76),
  + the TRANSFER TO RUIA (R 64; S 77A 4),
  + the TRANSFER TO SSA (R 65; S 78),
+ the TRANSFER TO SUPP OR REG ANN G-357, item 66 (code 3) not included; S 77A

+ any PARTIAL WITHHOLDING (R 67; S 82), ACT ADJ (R 68; S 83), WAIVER (R 69; S 84), LEGAL PROCESS-PARTITION (R 70; S 85), ASSIGN/LEGAL PROCESS-NON-PARTITION (R 71; S 86), SMI PREMIUM (R 72; S 87), SMI PREVIOUSLY TRANSFERRED (R 73; S 88) deductions from the accrual.

0090 CLAIM NUMBER MISSING - The railroad claim number and/or social security number is missing from Form RR-1e.

0091 SS NUMBER MISSING OR INVALID - The social security claim number is missing from Form RR-1e, or it is an invalid number (i.e., the first digit is a 6 or the first three digits are greater than 730).

0092 SS BENEFICIARY’S NAME MISSING - The beneficiary’s name (item 10 of Form RR-1e) was omitted or was not keyed.

0094 BIC DATA MISSING OR INVALID - The beneficiary identity code is missing or an incorrect code is being used.

0095 ENTITLEMENT DATA MISSING OR INVALID - Item 13 of Form RR-1e (DOEC - Date of Entitlement-Current) was omitted or was not keyed.

0096 BENEFIT CODE MISSING OR INVALID - Item 14 of Form RR-1e was omitted or was not keyed.

0097 INVALID RR RATE - The last monthly railroad rate on Form RR-1e is incorrect. This amount should be the railroad rate after SMIB deductions and before tax withholding.

0098 STAZA AWARD WITH INVALID DATA - There is an inconsistency in the award that will not allow it to process as a STAZA. The reason could be one of the following:

A. One or more fields on the award form was improperly keypunched.

B. An amount is shown in the Net Amount Paid box.

C. The last monthly RR check rate is not shown.

D. The social security monthly check rate is equal to or greater than the last monthly railroad retirement check rate and the type of activity is initial.

E. The last monthly social security check rate is equal to or greater than the social security monthly check rate and the type of activity is recertification.
F. The dollar difference between the last monthly social security check rate and the social security monthly check rate on recertification is equal to or greater than the last monthly railroad retirement check rate.

0099 FORCED REJECT - SEE OTHER PAYEE - When one survivor award rejects, other awards being paid on the same claim number that are on the same voucher and have the same activity code are rejected with this message.

0101 INVALID SUPP ANN CLOSING DATE - The supplemental annuity denial indicator on Form G-357a was keyed incorrectly.

0102 BA NO. MISSING OR CB CODE NEEDED - A supplemental annuity is being reinstated using Form G-357 and the BA number and Employer Pension items are blank.

0103 CB CODE INVALID - The CB Code on Form G-354 Sup or Form G-357 may have been keyed incorrectly.

0104 REP P/C NOT CONSISTENT WITH NM-ADDR - There is a group mark at the beginning of line 2 and a representative payee code. The group mark would normally be at the beginning of lines 3 or 4 when representative payee information is present.

0105 GRP MK INSERTED AT BEGIN OF LINE 2 - A group mark was not found at the beginning of line 2, 3, or 4. The mark was arbitrarily placed at the beginning of line 2 after shifting the contents of this line one position to the right. This move may have caused the rightmost position on line 2 to be lost. It may also have confused the representative payee information.

0106 SINGLE LINE ADDRESS INDICATED - Check the address to make sure it was formatted correctly.

0107 ZIP CODE NOT PRESENT, MAY BE FOREIGN - There is no matching city and state on the RRB ZIP Code Master. If the case is domestic, enter the zip code. If the case is foreign, and the check is being sent to one of the countries listed below, no action is necessary. Check to be sure the country is spelled or abbreviated as shown below. If the country is not listed below, refer the folder to the Division of Adjudicative Services to obtain the correct geographical code and prepare a code 8 G-607 with the code name GCNNN to enter the geographic code on the CHICO master. (See RCM 9.4, G-607 instruction.)

0108 (REF) **CASE REINSTATED AFTER TERMINATION** - Review the award to ensure that the payment should be made.

0109 (REF) **WERE UNDELIVERABLE CHKS INCLUDED IN AWD** - The case was a code 98 (undeliverable) suspension and DAISY/CHICO is now processing a manual reinstatement or reinstatement/recertification award.
0113 ADDRESS NOT EQUAL NO COMBINED MAIL - The employee and spouse addresses are different. Make sure this is not due to an error in the address on the award.

0115 TYPE OF BENEFIT CODE MISSING - DAISY cannot determine the type of beneficiary from the type of annuity. Verify that the type of annuity item on Form G-357a or the beneficiary symbol on Form G-364 was completed correctly. If the problem cannot be corrected on the award form, prepare a code 8 G-607 with the code name TOBNN to enter this information on the CHICO master.

0116 BEN AMT LESS THAN SMIB - SMIB ZEROED OUT - SMIB premiums are no longer being deducted from the RR or SS benefit because the benefit is less than the monthly SMIB premium.

0117 WARN - POSSIBLE DUPLICATE SMIB RECOVERY - A MIRTEL reinstatement or reinst-recert award containing IPD data is processed on a case that had a manual award with an IPD in the same month or in the two prior months.

Medicare program section (MPS) examiners must check for duplication of the manual SMIB deduction and refund any over-deduction.

0130 LAST ZIP CODE DIGITS INACCURATE - The RRB ZIP Code Master shows that the city is a multi-ZIP code city, but the SSA ZIP Master does not contain the final two digits. The award will process with "00" shown in the final two digits. If the correct ZIP Code was entered, forward the folder to the control services group to have the SSA ZIP Code Master updated.

0131 ZIP CODE INCOMPLETE - The RRB ZIP Code Master for a single - ZIP code city does not match the ZIP code shown on the award form. The award will process with the ZIP code from the RRB ZIP Code Master. If the correct ZIP code was entered, forward the folder to the control services group to have the RRB ZIP Code Master updated.

0132 ADDRESS TOO LONG TO ACCEPT ZIP CODE - The address as entered with the ZIP code creates a name and address with more than five lines or a fifth line that has more than 19 characters. The address should be shortened.

0133 NO POSTAL ADDRESS CODE - ITALY

0134 NO POSTAL ADDRESS CODE - YUGOSLAVIA - The postal address code for these countries was not entered or was entered improperly. Check to see that the 5-digit postal address code is the first entry in the last line of the address, e.g., nnnnn Yugoslavia.

0151 MECH LINK CD INVALID - Item 86 on Form G-357 wasn't completed or has an
entry in the first box that is greater than the entry in the second box. Item 2 on Form G-364 wasn't completed or has an entry in the first box that is greater than the entry in the second box.

0152 SURV YNGST CHILD DOB INVALID - G-364 item 49 must be a valid date. The year must show all four positions.

0153 PREV EST OP TXRCV OTHNO - NO OTHNO RECV CLMNO - On Form G-357, Taxable recovery - Other Claim Number (Item 61) was completed but Other Recovery Claim Number (Item 59) was not completed. On Form G-364, Taxable recovery - Other Claim Number (Item 73) was completed but Other Recovery Claim Number (Item 71) was not completed. Please complete items 59 or 71.

0160 DATE OF BIRTH NEEDED - On a current pay SS award, the DOB was omitted or the DOB was invalid.

0161 DISAB ONSET DT MISSING OR INVALID - The beneficiary is entitled to Medicare based on disability, and the disability onset date was omitted from the SS award or the onset date is later than it should be.

0162 (REF)PAYMT CNTR CD MISSING OR INVALID - The code of the social security payment center was omitted or an invalid code was entered.

0163 (REF) RR CERT-SS TERM/NOT DEATH - A railroad award is being paid and the social security benefit of that annuitant has been terminated for a reason other than death. Check to be sure that the annuitant's railroad annuity would not be affected for the same reason.

0164 (REF) SS CERT-FORCE ENTITLEMENT - The RRB code entered on Form RR-1e is an"X," an RR overpayment recovery is being made and the CHICO master does not have an indication of an SS reduction. The code in the CHICO master has been changed to a 1 to indicate that there is an SS reduction.

0165 (REF) RR ENTITLE CD3 - SS PAYMENT IN FORCE - The annuitant's SS benefit entitlement code is a 3 (unknown-partial RR rate-SS not considered) but there is no indication of a partial rate being paid. Check to be sure the railroad annuity is being adjusted correctly.

0182 ONE PAY WITH RREM8 - NO PAYEE CD - The award must have a payee code in order for the earmark to be removed from the CHICO master.

0183 (REF) ONE PAY WITH RREM8 - NO MASTER OR TERM - There is no active CHICO master record from which to remove the earmark.

0184 EMPLOYEE - SS ACCT NOS DIFFER - There is a discrepancy between the RR employee's social security number and the beneficiary's social security number on the employee's social security award.
Appendix B - Rate History Edit Messages

Messages with numbers greater than 1000 are rate history edit messages. These edits detect missing or inconsistent data or calculation errors. They are numbered as follows: employee edits (1000-1128), spouse edits (2010-2245), survivor edits (3001-3085), comparison edits (5001-7025), retirement and survivor date and record ID edits (9001-9168). Except for the comparison edits, most of the edits cause payment rejects. Edits that are identified with "(REF)" below the edit number may require corrective action but do not, of themselves, prevent payment.

EMPLOYEE RATE HISTORY EDIT MESSAGES

<table>

<tr>
<td>1023</td>
<td>FORMS, TYPE PAYMENT/CERT INCONSISTENT - If the type of payment is regular and supplemental, the annuity formula is railroad, and the award is a reinstatement, then the only forms that should be attached are Forms G-354 Sup and G-369.</td>
</tr>
<tr>
<td>1024</td>
<td>LPE WD'S, EFF DT NOT &gt; 0; END DT NOT = 0 - If LPE work deductions are in force (G-357, item 29 &gt; 0 and G-357, item 23 = 0), then if the T2 WD amount (item 16(C)) &gt; 0, the LPE WD effective date (item 17(D)) must be completed.</td>
</tr>
<tr>
<td>1025</td>
<td>FORMS, TYPE PAYMENT/CERT INCONSISTENT - If the type of payment is regular and supplemental, the annuity formula is O/M, and the award is a final certification, Forms G-354.1 and G-354.3 should not be attached. (The O/M should not be paid as an initial award.) (There are a few situations, e.g., an erroneous deletion, in which a 37/74 Act employee must be paid as an initial award and this edit can be ignored.)</td>
</tr>
</tbody>
</table>
| 1026 | LEGAL PROCESS TYPE CODE NOT > 0 - If the "LP-PARTITION" or
"ASSIGN/NON-PN" amounts in G-357, item 30 > 0 and the ending date in item 23 = 0, then the legal process type code (item 44) must be > 0.

| 1027 | GROSS TIER I AND DRC'S INCONSISTENT - If PIA 1 is not a special minimum PIA, DRC's apply, and the employee's year of eligibility on Form G-357a is after 1978 and before 1987, the G-354 gross tier 1 must equal PIA 1 times 1 plus (.0025 times the number of DRC's), dropping dimes and cents. |
| 1028 | FORMS, TYPE PAYMENT/CERT INCONSISTENT - If the type of payment is regular and supplemental, the annuity formula is O/M, and the award is a reinstatement, then the only forms that should be attached are Forms G-354.3, G-354 Sup, and G-369. |
| 1029 | TOTAL RR RATE NOT EQUAL TO TIERS - The TOTAL RR RATE on Form G-357 must equal the sum of the net tier 1, net tier 2, and the VDB after cutback. (If Forms G-354, G-354.1, G-354.1A, or G-354 WF are attached, the tier rates from those forms are used in the edit. If not, the rates entered on Form G-357 are used.) |
| 1030 - 1040 (REF) | NET ANN RATE NOT EQUAL TO TIERS LESS DEDUCT - The regular annuity rate on Form G-357 (MO REG ANN RATE) should equal the latest TOTAL RR RATE (if the annuity formula is railroad) or O/M Rate (if the annuity formula is O/M) minus the following:  
  • the work deduction adjustment amount (W/D ADJUST) if the "withhold W/D amount" code for either regular or LPS work deductions is checked.  
  • the legal process/partition amount (LP-PARTITION)  
  • the assignment/non-partition amount (ASSIGN/NON-PN)  
  • the actuarial adjustment amount (ACT ADJ)  
  • the waiver amount (WAIVER)  
  • the partial withholding rate (PARTIAL WITHHOLDING), if the W/H recovery date is later than the current date.  
  (This edit message may occur when it should not if a legal process-partition, assignment/non-partition, actuarial adjustment, or waiver deduction applies to some but not all effective dates on Form G-357. In this situation, the edit can be ignored provided the deductions have been subtracted correctly.) |
| 1041 | AGE ON ABD AND TYPE ANN INCONSISTENT - If the type of annuity on Form G-357a is full age 65, the age on ABD (as determined from the DOB |
and ABD on Form G-357) must be greater than or equal to 65.

<table>
<thead>
<tr>
<th>1042</th>
<th>AGE ON ABD AND TYPE ANN INCONSISTENT</th>
<th>If the type of annuity on Form G-357a is reduced age or reduced 60/30, then the age on ABD (as determined from the DOB and ABD on Form G-357) must be greater than or equal to 60 and less than 65.</th>
</tr>
</thead>
<tbody>
<tr>

<td>CC CODE MISSING</td>
<td>If the award is a final certification, the current connection code on Form G-357a must be completed.</td>
</tr>
<tr>
<td>1057</td>
<td>WC OR PDB RED TERM EFF DATE NOT &gt; 0</td>
<td>If the worker's compensation termination code in G-354, item 7 is completed, the termination effective date must be completed.</td>
</tr>
</tbody>
</table>
| 1058 | INAPPROPRIATE DRC % APPLIED PER DRC  | If the DOB ≥ 01-02-25, the gross T1 amount (G-354, item 17) must equal PIA 1 multiplied by (1 + the
appropriate DRC percentage) times the number of DRC months (the result is dime rounded for reduced 60/30 employees; otherwise, the result is dollar rounded).

| 1059 | NON-DISABILITY ANN; DRR MISSING - If the award is a final certification and not a disability annuity, then the date rights relinquished (DRR) on Form G-357a must be completed. |
| 1060 | AGE REDUCED ANN; AGE RED MOS INVALID - If the award is a final certification and is a reduced age or reduced 60/30, then the age reduction months on Form G-357a must be greater than 0 and less than 37. |
| 1061 | T1 FORM, FORM ID, OR EFF DT MISSING - Form G-357 shows Form G-354 as an accompanying form, but a tier 1 rate history record was not created. This could occur if the G-357 form indicator was incorrect and Form G-354 was not attached, or the G-354 Form ID (03) was not keyed, or the effective date on Form G-354 is missing. If the error was in the form indicator or form ID, ONCORR would have corrected it when the award was loaded onto the database. |
| 1062 | NET T1 NOT EQUAL TO GROSS TIER 1 LESS RED - If Form G-354 is attached and the tier 1 not payable code is blank, then the net tier 1 must equal the gross tier 1 minus the following: |
|  | • the worker’s comp reduction (WC REDUCTION) |
|  | • the public disability benefit (PDB REDUCTION) |
|  | • the tier 1 age reduction |
|  | • the social security benefit reduction (SS BEN REDUCTION). |
| 1063 - 1064 | T1 FORM, FORM ID, OR EFF DT MISSING - (See 1061.) |
| 1065 | WC EFF DATE AND WC RED INCONSISTENT - If the worker’s compensation reduction effective date on Form G-354 is before or equal to the current date, and the worker’s compensation termination effective date is later than the current date, then the worker’s compensation reduction amount (WC REDUCTION) or the public disability benefit amount (PDB REDUCTION) must be entered on Form G-354. |
| 1066 | WC TERM DATE AND WC RED INCONSISTENT - If the worker’s compensation termination effective date is earlier than the current date, then nothing should be entered on Form G-354 in the worker’s compensation reduction amount (WC REDUCTION) or the public disability benefit amount (PDB REDUCTION) for any occurrence with a tier 1

</tr>
<tr>
<td>-------------</td>
<td>-------------</td>
</tr>
<tr>
<td>1078 - 1080</td>
<td><strong>T2 FORM, FORM ID, OR EFF DT MISSING</strong> - Form G-357 shows Form G-354.1 as an accompanying form, but the appropriate rate history records were not created. This could occur if the G-357 form indicator was incorrect and Form G-354.1 was not attached, or the Form G-354.1 ID (04) was not keyed, or the effective date on Form G-354.1 is missing. If the error was in the form indicator or form ID, ONCORR would have corrected it when the award was loaded onto the database.</td>
</tr>
<tr>
<td>1081 (REF)</td>
<td><strong>T2 BASIC ANN, CALC DATA INCONSISTENT</strong> - If a G-357a and G-354.1 are attached, then the basic annuity must equal the AMC 1 total years and months of service through 1974 times the AMC factor (3.58% of the first $50.00 of the AMC 1 plus 2.69% of the next $100.00 plus 1.79% of the balance). If the case is a 37 or 74 Act case and the employee has a current connection, the minimum basic annuity could apply. This is the lowest of $89.35, or AMC 1 times 118%, or the AMC 1 total years and months of service through 1974 times $5.35. If this is higher than the regular basic annuity, the minimum basic annuity becomes the basic annuity. (Because of a rounding problem with this edit, it can sometimes be produced even though the computation is correct. It can be ignored in that case.)</td>
</tr>
<tr>
<td>1082</td>
<td><strong>PRE 12-84 T2, GUARANTY CD INCONSISTENT</strong> - If Form G-354.1 is attached, the tier 2 effective date is earlier than 12-1-84, and the $10.00 guaranty applies, then the net tier 2 must be $10.00.</td>
</tr>
<tr>
<td>1083</td>
<td><strong>PRE 12-84 T2 NOT EQUAL TO COMPONENTS</strong> - If Form G-354.1 is attached, the tier 2 effective date is earlier than 12-1-84, and the $10.00 guaranty does not apply, then the net tier 2 must equal the sum of net component 1 (the first non-zero occurrence of items 33, 32, or 31) plus net component 2 (the first non-zero occurrence of items 41, 40, 39 or 38) plus net component 3 (the first non-zero occurrence of items 49, 48, 47, 46 or 45).</td>

</tr>
<tr>
<td>1110</td>
<td><strong>VDB AGE RED AMT, RED DATA INCONSISTENT</strong> - If Forms G-357A and G-354WF are attached, age reduction months are given and the tier 1 only age reduction code does not apply, then if the case is paid under the 81 Amendments, the VDB age reduction must equal the age reduction months divided by 180 times the VDB after COL increase.</td>
</tr>
<tr>
<td>1111</td>
<td><strong>VDB AGE RED AMT, RED DATA INCONSISTENT</strong> - If Forms G-357a and G-354WF are attached, age reduction months are given and the tier 1 only age reduction code does not apply, then if the case is not paid under the 81 Amendments, the VDB age reduction must equal the age reduction months divided by 180 times the VDB after COL increase.</td>
</tr>
</tbody>
</table>
Amendments, the VDB age reduction amount must be greater than 0.

| 1112 | VDB AGE RED AND TYPE ANN INCONSISTENT - If Forms G-357a and G-354WF are attached and the tier 1 only age reduction code does not apply, then if the type of annuity is given and it is not a reduced age 62, the VDB age reduction amount must be zero. |
| 1115 | SUPP FORM, FORM ID, OR EFF DT MISSING - Form G-357 shows Form G-354 Sup as an accompanying form, but a supplemental annuity rate history record was not created. |
| 1116 | This could occur if the G-354 Sup form indicator was incorrect and Form G-354 Sup was not attached, or the G-354Sup Form ID (08) was not keyed, or the effective date on form G-354 Sup is missing. If the error was in the form indicator or form ID, ONCORR would have corrected it when the award was loaded onto the database. |
| 1117 | TAX CREDIT/SUPP ANNUITY INCONSISTENT - If Form G-354 SUP is attached and the SUP ANN beginning date is given and is after 12-31-74, then the SUP annuity check rate on Form G-357 (MO SUPP ANN CHECK RATE) plus the employer tax credit must be less than or equal to $43.00. |
| 1118 | TAX CREDIT/SUPP ANNUITY INCONSISTENT - If Form G-354 SUP is attached and the SUP ANN beginning date is before 1-1-75, then the SUP annuity check rate on Form G-357 plus the employer tax credit must be less than or equal to $70.00. |
| 1119 | NET T2 AND GUARANTY CD INCONSISTENT - If Form G-354.1 is attached, the tier 2 effective date is after 11-30-84 and the $10.00 guaranty applies, then the net tier 2 must be $10.00. |
| 1120 | NET T2 NOT EQUAL TO ITS COMPONENTS - If Form G-354.1 is attached, the tier 2 effective date is after 11-30-84, and the $10.00 guaranty does not apply, then the net tier 2 must equal the sum of items 35, 36, 42, 51 and 52. |
| 1121 | PRE 12-84 T2, CALC DATA INCONSISTENT - If Form G-354.1A is attached, the tier 2 effective date is before 12-1-84, and the $10.00 guaranty does not apply, then the net tier 2 must equal the first non-zero occurrence of items 19, 18, 17 or 16 minus the tier 2 age reduction minus the first takeback. |
| 1122 | 12-84 T2 AND GUARANTY CD INCONSISTENT - If Form G-354.1A is attached, the tier 2 effective date is 12-1-84 and the $10.00 guaranty applies, the net tier 2 must be $10.00. |
1123 | **12-84 T2 AND T2 CALC DATA INCONSISTENT** - If Form G-354.1A is attached, the tier 2 effective date is 12-1-84, and the $10.00 guaranty does not apply, the net tier 2 must equal the first non-zero occurrence of items 19, 18, 17, or 16 minus any tier 2 age reduction minus the first takeback, times .011 (rounded to 2 decimal places) minus the second takeback.

1124 | **POST-84 T2, GUARANTY CD INCONSISTENT** - If Form G-354.1A is attached, the tier 2 effective date is after 12-1-84, and the $10.00 guaranty applies, then the net tier 2 must be $10.00.

1125 | **POST-84 T2, T2 CALC DATA INCONSISTENT** - If Form G-354.1A is attached, the tier 2 effective date is after 12-1-84, and the $10.00 guaranty does not apply, then the net tier 2 must equal the tier 2 after the second takeback plus the post-84 COL increases.

1126 | **AGE RED AMT MUST BE GREATER THAN ZERO** - If the award is a final certification and is an 83 Amendment 60/30 case with a half or full age reduction, then the ABD age reduction amount (60/30 EE AGE RED AMOUNT ON ABD) on Form G-357a must be greater than 0.

1127 | **SUSP/TERM CODE MISSING** - If the award is a one-pay-only initial or one-pay-only recert award, then the suspension/termination code (SUSP/TERM CD) must be entered on Form G-357.

1128 | **SUSP/TERM EFFECTIVE DATE MISSING** - If the award is a one-pay-only initial or one-pay-only recert award, then the suspension/termination effective date (SUSP/TERM EFF) must be entered on Form G-357.

**SPOUSE RATE HISTORY EDIT MESSAGES**

2010 | **MONTHLY RATE NOT EQUAL TO NET ANN RATE** - The net annuity rate on Form G-357 (NET ANN RATE) must equal the monthly check rate (MO REG ANN RATE).

2020 | **BEN SYM AND PAYEE CODE INCONSISTENT** - If the beneficiary symbol/prefix entered on Form G-357 is MA, the payee code must be 2.

2030 | **BEN SYM AND PAYEE CODE INCONSISTENT** - If the beneficiary symbol/prefix entered on Form G-357 is XA, the payee code must be greater than 2.

2031 | **FORMS, FORM SET NOT FIRST OR PAYMENT SET** - If the form set is not the first or payment set (G-357, item 86 - first number not equal to 0 or 1), then the bypass codes set in the rate history record must be "bypass" for

<td><strong>ACCOMP. FORMS, TYPE CERT INCONSISTENT</strong> - If the award is a reinstatement, no forms should be attached except Form G-369.</td>
</tr>
<tr>
<td>2050</td>
<td><strong>ACCOMP. FORMS, BEN SYM INCONSISTENT</strong> - If the award is for a divorced spouse and is not a reinstatement, only Forms G-357a, G-355 and G-369 may be attached.</td>
</tr>
<tr>
<td>2060</td>
<td><strong>TOTAL RR RATE NOT EQUAL TO TIERS</strong> - The TOTAL RR RATE on Form G-357 must equal the sum of the net tier 1, net tier 2, and VDB after cutback. (If Forms G-355, G-355.1, G-355.1B or G-355WF are attached, the tier rates from those forms are used in the edit. If not, the rates entered on Form G-357 are used.)</td>
</tr>
</tbody>
</table>
|2071 (COLA) (REF) | **NET ANN NOT EQUAL TO TIERS LESS DEDUCT** - The regular annuity rate on Form G-357 (MO REG ANN RATE) should equal the TOTAL RR RATE (if the annuity formula is railroad) or the O/M RATE (if the annuity formula is O/M) minus the following:  
  • the work deduction adjustment amount (W/D ADJUST) if the "withhold W/D amount" code for either regular or LPS work deductions is checked.  
  • the legal process/partition amount (LP-PARTITION)  
  • the assignment/non-partition amount (ASSIGN/NON-PN)  
  • the actuarial adjustment amount (ACT ADJ)  
  • the partial withholding rate (PARTIAL WITHHOLDING), if the W/H recovery date is later than the current date.  
  • (This edit message may occur when it should not if a legal process-partition, assignment/non-partition, actuarial adjustment or waiver deduction applies to some but not all effective dates on Form G-357. In this situation, the edit can be ignored provided the deductions have been subtracted correctly.) |
<p>|2074 | <strong>REG/LPE WD'S, COMPONENTS DO NOT EQUAL TOTAL WD AMT</strong> - If regular or LPE WD's are in force (G-357, item 29 &gt; 0 and G-357, item 23 = 0), the T1 WD amount G-357, item 16(A)) plus the T2 WD amount (item 16(C)) plus the VDB WD amount (item 16(D)) must equal item 29. |
| 2075 | <strong>LPE WD'S, EFF DT NOT &gt; 0; END DT NOT = 0</strong> - If LPE work deductions are in force (G-357, item 29 &gt; 0 and G-357, item 23 = 0), then if the T2 WD amount (item 16(C)) &gt; 0, the LPE WD effective date (item 17(D)) must be completed. |
| 2076 | <strong>LEGAL PROCESS TYPE CODE NOT &gt; 0</strong> - If the &quot;LP-PARTITION&quot; or &quot;ASSIGN/NON-PN&quot; amounts in G-357, item 30 &gt; 0 and the ending date in item 23 = 0, then the legal process type code (item 44) must be &gt; 0. |
| 2077 | <strong>REG WD'S, EFF DT NOT &gt; 0; END DT NOT = 0</strong> - If regular work deductions are in force (G-357, item 29 &gt; 0 and G-357, item 23 = 0), then if the Tier 1 WD amount (item 16(A)) &gt; 0, the regular WD effective date (item 17(C)) must be completed. |
| 2081 | <strong>AGE ON ABD AND TYPE ANN INCONSISTENT</strong> - If the spouse/divorced spouse type of annuity on Form G-357a is full age 65, then the spouse's age on ABD (as determined from the DOB and ABD on Form G-357) must be greater than or equal to age 65. |
| 2082 | <strong>AGE ON ABD AND TYPE ANN INCONSISTENT</strong> - If the spouse type of annuity on Form G-357a is based on child in care, then the spouse's age on ABD (as determined from the DOB and ABD on Form G-357) must be less than 65. |
| 2083 | <strong>AGE ON ABD AND TYPE ANN INCONSISTENT</strong> - If the spouse/divorced spouse type of annuity on Form G-357a is reduced age, then the spouse's age on ABD (as determined from the DOB and ABD on Form G-357) must be 62-64. |
| 2084 | <strong>AGE ON ABD AND TYPE ANN INCONSISTENT</strong> - If the spouse type of annuity on Form G-357a is reduced age under the 83 Amendments, then the spouse's age on ABD (as determined from the DOB and ABD on Form G-357) must be 60-64. |
| 2090 | <strong>TIER 1 DOE IS BEFORE ABD</strong> - The tier 1 DOE on Form G-357a must be the same as or later than the ABD. |
| 2100 | <strong>AGE RED MOS CANNOT EXCEED 36</strong> - The number of age reduction months on Form G-357a cannot exceed 36. |
| 2111 | <strong>AGE RED MOS AND TYPE ANN INCONSISTENT</strong> - If age reduction months are entered on Form G-357a, then the spouse's type of annuity must be reduced age, or 83 Amendment 60/30 with a full or half age reduction. |

<tr>
<td>3072</td>
<td>DISCREPANCY IN CALCULATION OF T2 - If the rate effective date is before 12-1-83, then the T2 rate after the 12/83 takeback (G-364.1) should equal the rate before the 12/83 takeback (G-364.1).</td>
</tr>
<tr>
<td>3073</td>
<td>DISCREPANCY IN CALCULATION OF T2 - If the rate effective date is after 11-30-84 and the OBD (G-364) is before 12-1-84, then the T2 rate after the 12/84 takeback (G-364.1) should equal the pre-12/84 COL T2 rate (G-364.1) increased for the 12/84 tier 2 COL, less the 12/84 takeback amount (G364.1).</td>
</tr>
</tbody>
</table>
### DISCREPANCY IN CALCULATION OF T2
- If the rate effective date is after 11-30-84 and the OBD (G-364) is after 11-30-84, then the T2 rate after the 12/84 takeback (G-364.1) should equal the pre-12/84 COL T2 rate (G-364.1) less the 12/84 takeback amount (G-364.1).

### ORIGINAL BEGINNING DATE MISSING
- The OBD (G-364) must be entered.

### TAKEBACK USED, ORIG T2 LESS THAN $10
- When the OBD (G-364) is after 11/30/84, a takeback reduction (G-364.1) cannot apply if the tier 2 before takeback (G-364.1) is less than $10.00.

### T2 COL INC AMT AFTER 84 IS INCORRECT
- The amount of the tier 2 increase entered in tier 2 COL increase amt. after 12/84 (G-364.1) must be consistent with the percentage increase based on the OBD (G-364) and the effective date (G-364.1) of the date break being computed.

### T2 COL INC AMT AFTER 84 IS INCORRECT
- The $10 guaranty (G-364.1) does not apply if the tier 2 after the 12/84 4(g) takeback (G-364.1) plus the cumulative post '84 COL Increase (G-364.1) is greater than $10.00.

### T2 PLUS POST COL CONFLICTS WITH $10 CD.
- The $10 guaranty (G-364.1) does not apply if the tier 2 after the 12/84 4(g) takeback (G-364.1) plus the cumulative post '84 COL increase (G-364.1) is greater than $10.00.

### COMPARISON EDITS
- Employee comparison edits
- Spouse comparison edits
- Survivor comparison edits

These edits generally indicate a systems problem that must be investigated by analysts in the bureau of research and employment accounts. They are produced when data fields that should be identical in the Research, CHICO, and Rate History portions of the activity record are not. Occasionally a comparison edit may be produced in conjunction with other rate history edit rejects. Correcting the reason for the rate history edit reject should clear up the comparison edit as well.
RETIREMENT AND SURVIVOR DATE AND RECORD ID EDITS

These edits detect one of several possible errors involving date entries or the award form record identification numbers. They are numbered from 9001-9168. Most of these edits cause a payment reject. Edits that are identified with "(REF)" below the edit number may require corrective action but do not, of themselves, prevent payment.

- **Invalid date.** A date entry is invalid because either the month and year were transposed, the month entered was greater than 12, or the day was inappropriate for the month.

- **The message INVALID VOUCHER BATCH RECORD DATE** means that erroneous dates are appearing in the record because the Form G-180 batch record that accompanies each batch of manual award forms contained an invalid voucher date. No correction is required other than to resubmit the award.

- **Date missing.** A date that should have been entered was missing. This generally applies to rate or tier effective and ending dates.

- **Form ID missing.** Each award form has a unique two-digit number that is keyed as part of the award record. The numbers correspond to the circled codes in the accompanying forms items on Form G-357 and G-364. This edit occurs when the form ID is not present in the record but the form was "X"d as an attached form on the G-357 or G-364.

If the edit occurs because the form was not attached or was not keyed, the form may be added using ONCORR. If the edit occurs because the form ID itself was not keyed or the accompanying form indicator was checked in error, no corrective action should be required since those errors would have been corrected when the case was loaded onto ONCORR.

**Appendix C - ONCORR Edit Messages**

The following edit messages are displayed on the award form correction screens when an error is detected. (Error messages for other screens are explained in the text.) For
messages that contain variable data, the basic format of the message is shown below with the variable data in parentheses and an example following.

1. **Individual item edits.** These messages apply to the screen being updated. They may appear when the examiner attempts to update the screen by pressing ENTER, a PF key to go to another screen within the form, PF22 (FORM SELECT), PF23 (REJECT REASON) or PF24 (DONE). The erroneous data will be highlighted in red and the cursor positioned underneath it.

<table>
<thead>
<tr>
<th>MESSAGES</th>
<th>MEANING</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADDRESS DOES NOT CONTAIN GROUP MARK</td>
<td>A group mark (SHIFT and &quot;1&quot; on the terminal keyboard) must be entered in the second line of the address.</td>
</tr>
<tr>
<td>INVALID DATA. MUST BE NUMERIC</td>
<td>Non-numeric data was entered in a field that should be numeric.</td>
</tr>
<tr>
<td>INVALID DATE ENTRY</td>
<td>The month entered is greater than 12 or the date is not appropriate for the month.</td>
</tr>
<tr>
<td>INVALID ENTRY. CODE SHOULD BE BLANK OR X</td>
<td>If the highlighted item applies, the appropriate entry is an &quot;X&quot;. If it does not apply, it should be left blank.</td>
</tr>
<tr>
<td>INVALID ENTRY. CODE SHOULD BE BLANK, Y, or N</td>
<td>The appropriate entry for the highlighted item is a &quot;Y&quot; or &quot;N&quot;. The item may also be left blank.</td>
</tr>
<tr>
<td>(ITEM NAME) CANNOT EXCEED (SOME NUMBER OR AMOUNT)</td>
<td>The item entry cannot exceed the number or amount specified.</td>
</tr>
<tr>
<td>EXAMPLE: SUP ANNUITY RATE CANNOT EXCEED $70.00</td>
<td></td>
</tr>
<tr>
<td>(ITEM NAME) INVALID</td>
<td>The code entered was not in the acceptable range of values for that item.</td>
</tr>
<tr>
<td>EXAMPLE: BIC CD INVALID</td>
<td></td>
</tr>
<tr>
<td>(ITEM NAME) MAY NOT BE ZEROS</td>
<td>The item cannot be completed with zeros. If no entry is required leave the item blank.</td>
</tr>
<tr>
<td>EXAMPLE: OTHER RECOVERY CLAIM NO. MAY NOT BE ZEROS.</td>
<td></td>
</tr>
</tbody>
</table>
ITEM NAME) MUST BE (SOME VALUE) The item entry must be one of the values shown.

EXAMPLE: PAYEE CODE MUST BE NUMERIC, 01 THRU 09

ITEM NAME) MUST NOT BE BLANK The item must be completed.

EXAMPLE: PREFIX MUST NOT BE BLANK

2. Relational edits. These messages apply to the screen being updated only if both items that are being edited are on that screen. In that case, the erroneous item(s) will be highlighted in red and corrections will not be updated to the screen until the error(s) are corrected.

If the error message appears after PF24 (DONE) is pressed, and the items involved are not both on the screen the examiner is on, the examiner may move to the item(s) that require correction and the corrections made to the screen he is leaving will be updated. To correct the error, the examiner may have to go to another screen within the form or another form within the award. The message will identify which form has the error.

For survivor awards, a payee code is displayed at the beginning of the error message. When PF24 is pressed, all payees paid with one award form set are edited at the same time and any resulting error messages may apply to any members of the family group, not just to the payee to which the screen applies.

<table>
<thead>
<tr>
<th>MESSAGES</th>
<th>MEANING</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCOMPANYING FORMS NOT CONSISTENT WITH AWARD</td>
<td>The accompanying forms &quot;X&quot;'d on Form G-357 or G-364 do not agree with the forms that were keyed.</td>
</tr>
<tr>
<td>BENEFICIARY SYMBOL AND PAYEE CODE INCONSISTENT</td>
<td>The beneficiary symbol does not agree with the payee code, e.g., the beneficiary symbol is &quot;M&quot; and the payee code is &quot;1.&quot;</td>
</tr>
<tr>
<td>BENEFICIARY'S OWN SSN MUST NOT BE THE SAME AS EE'S SSN</td>
<td>On a survivor award, the beneficiary's own social security number must be different from the employee's.</td>
</tr>
<tr>
<td>BOTH (ITEM NAME) AND (ITEM NAME) MUST HAVE</td>
<td>Both items must either be completed or left blank. One cannot be completed without the other being completed.</td>
</tr>
<tr>
<td>ENTRIES OR BE BLANK</td>
<td></td>
</tr>
</tbody>
</table>
**EXAMPLE:** BOTH TAX REFUND CODE AND AMOUNT MUST HAVE ENTRIES OR BE BLANK

- **CLAIM NO. OR EMPLOYEE SSA NO. MUST BE ENTERED:**
  - The claim number and the employee's social security number cannot be left blank. One or both must be completed.

- **EITHER (FORM NO.) OR (FORM NO.) MUST BE DELETED:**
  - More than one tier 2 input sheet cannot be attached to the award.

**EXAMPLE:** EITHER G-355.1B OR G-355.1 MUST BE DELETED

- **FORM (NO.) CANNOT BE CREATED UNLESS FORM (NO.) IS DELETED:**
  - More than one tier 2 input sheet cannot be attached to the award.

**EXAMPLE:** FORM G-354.1A CANNOT BE CREATED UNLESS FORM G-354.1 IS DELETED.

- **IF (ITEM NAME) IS (SOME VALUE), (ITEM NAME) MUST BE (SOME VALUE):**
  - One item must have a certain value, if another item has a certain value.

**EXAMPLE:** IF THE ACC/OP AMOUNT IS NOT ZERO, THE ACC/OP CODE MUST BE 1 OR 2

- **IF (ITEM NAME) IS (SOME VALUE), (ITEM NAME) MUST BE ENTERED:**
  - One item must be completed if another item has a certain value.

**EXAMPLE:** IF TYPE CERT IS NOT 1, LAST MONTHLY RATE SHOULD BE BLANK

- **IF (ITEM NAME) IS (SOME VALUE), (ITEM NAME) SHOULD BE BLANK:**
  - One item must be blank if another item has a certain value.

**EXAMPLE:** IF TYPE CERT IS NOT 1, LAST MONTHLY RATE SHOULD BE BLANK

- **(ITEM NAME) MUST BE (SOME RELATIONSHIP) TO (ITEM NAME):**
  - The relationship of two item (e.g., same as, greater than) is specified.

**EXAMPLE:** G-364.1 CLAIM NO. MUST BE THE SAME AS G-364 CLAIM NO.
(ITEM NAME) OR (ITEM NAME), BUT NOT BOTH, MAY BE ENTERED

9.13.1 General Information About KORFORMS

The Key Operating Report (KOR) manual activity KEY/MASTER screens "KORFORMS" replace the Form G-660, "Receipt Code Sheet" and Form G-661, "Disposition Code Sheet." These screens are used by Operations to manually enter "Receipt" and "Disposition" records into the monthly KOR run. A KORFORMS batch may include both "Receipt" and "Disposition" records.

Using KEY/MASTER, data can be edited for basic content accuracy at the time of input, thus preventing some input rejects. The KORFORMS batches are held on the KEY/MASTER facility until 5:30 p.m. on the last workday of each month. The batches are extracted at 5:30 p.m. on the last workday of the month for processing into the next KOR run, which is scheduled to run on the next business day.

Once the KORFORMS batches are extracted, they are reviewed by the Records Analysis and Systems section and deleted from KEY/MASTER. The KORFORMS batches are saved on tape in the event a KOR rerun is needed.

9.13.2 Accessing Key/Master

To access the system:

A. Sign on to TPX as usual.
B. Use your assigned PF key or type an “s” next to KEYPROD
C. On the Keymaster screen, hit enter
D. On the Operator Commands screen, type “ENT” on the the commands line and “KORFORMS” on the Application Name Line.
E. Hit enter twice

9.13.3 KORFORMS Data Entry Screens

Access "KORFORMS" from the TPX menu by selecting "KEYPROD" with the PF key explained in RCM 9.13.2. The KEY/MASTER screen will appear.

A. Creating a KORFORMS Batch - If you are creating or correcting a KORFORMS batch, go directly to the KORFORMS data entry operator (DEO) screen. To do this, leave the "Supervisor Code" and "Command" blank and press "Enter."

This will take you to the next screen. To create a new batch, on the command line, type "ENT." Enter the application name "KORFORMS" on the application name line, then press the ENTER key. The next screen will display the batch number and security code for that batch. Write them down as a future reference,
should you need to adjust the batch. Then press the ENTER key. The "Receipts" screen for KORFORMS will appear. If this is not the screen that you want, use PF-2 to select the other KORFORMS screen, "Dispositions." The menu is displayed at the bottom of the screen. Refer to RCM 9.13.10 for instructions on correcting data if you start on the wrong screen.

When all of the required items on the screen are completed, press ENTER. The ENTER key will cause the information to write off to your KORFORMS batch. The screen will refresh to allow a new record for that screen. If you need a different KORFORMS screen at any time, use the appropriate PF key to request the KORFORMS screen that you need.

Refer to the command line at the top of each KORFORMS screen. The number of records that have been entered into the batch are indicated after "E:" and the record number of the current screen for that batch is indicated after the "C:" symbol. Although there is no limit for the number of records in a batch, we suggest that you limit your batches to no more than 100 records.

B. Accessing an Existing KORFORMS Batch - If you are accessing an existing KORFORMS batch to correct a record or to add new records to that batch, on the command line, type "ENT." Always TAB past the "Application Name" line to leave it blank. Type the batch number. Tab to the next line and type the security code. Then press the ENTER key. The last KORFORMS record entered for that batch will appear. Press the ENTER key. The screen will refresh to allow a new record entry for the same screen. If this is not the screen that you need, use the appropriate PF key to request the KORFORMS screen that you need. The KORFORMS menu is displayed at the bottom of each screen.

RCM 9.13.10 explains the commands to use to correct a record in the batch.

9.13.4 General Information About Receipts

The receipt of most employee and spouse applications is recorded through mechanical processing. Survivor AA-21 applications are coded in by APPLE. All initial survivor annuity applications and all reactivated applications (retirement and survivor) are manually coded in on KORFORMS. When an application is coded in as a receipt, either as an initial or as a reactivation, it is counted among the pending cases until it is coded out as being paid, denied or closed without award.

The receipt of SSA initial and reactivated awards is coded through SOLAR. However, when more than one SSA SOLAR award is received for the same payee, the system will only code in the first application. The other SSA SOLAR award must be coded in manually on KORFORMS. Any SSA payment set up by Operations must also be coded in on KORFORMS. When a SSA SOLAR award is coded in, it is counted among the pending cases until it has been paid or closed without award.
Do not code in "Supplemental" applications since they are only additions to the original application. When reactivating an application, code it in under the same application type code (APPL TYPE CD) and number or SSA benefit type code (BEN TYPE CD) and number previously assigned to it. Only the status code (APPL STAT CD) changes on a reactivated application.

9.13.5 Folder Record Of Receipt Coding Action

You may print out a copy of any KORFORMS screen, other than the supervisor screen, with the EXTRA! "PRINT SCREEN" commands. A copy of the KORFORMS receipt coding is not on the annuity application. When necessary, use the KOR monthly pending list to verify the APPLE, RASI, or KORFORMS receipt coding.

9.13.6 Coding Receipts On KORFORMS

The "Receipt Code Sheet" screen will appear when you begin a new KORFORMS batch. PF1 can also be used to move to this screen. The cursor moves automatically after each of your typed entries. If you leave an item blank, use the "Tab" key to move the cursor. The activity code will be entered into the record mechanically by KORFORMS when you complete your entries and press enter.

### RECEIPT CODE SHEET

<table>
<thead>
<tr>
<th>RECEIPT CODE SHEET</th>
<th>ACTIVITY CODE = 07</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. PREFIX _</td>
<td>2. CLAIM # ___ - ___ - ___</td>
</tr>
<tr>
<td>3. RECEIPT DTE ___</td>
<td>4. APPL\BEN TYPE CD</td>
</tr>
<tr>

</tr>
<tr>
<td>13. ABD\OBD DTE ___</td>
<td></td>
</tr>
</tbody>
</table>

INSTRUCTIONS FOR DATA ENTRY:

1. **PREFIX** - Type the alphabetical prefix "A," or "D".

2. **CLAIM NUMBER** - Enter the RRB claim number. If the claim number is six digits or less, enter zeros in the first three spaces.

3. **RECEIPT DATE (MM/DD/CC/YY)** – Always complete this item. Use preceding zeroes in any unused boxes. The receipt date is:
a. New Applications - Enter the application filing date.

b. Reactivated Application - Enter the coding date.

c. SSA application for survivor benefits - Enter date received in the RRB mailroom.

d. Disabled IPI or Medicare Only Child - Enter the date of the Form AA-19A for the disabled retirement child.

e. SSA PAM or SOLAR award - Enter the date the SSA award was transmitted to the RRB (SSA Run Date).

4. **APPL/BEN TYPE CD** - Always complete this item. A comparison to the old KOR Type of Application code is at the end of this document (Appendix A).

</table>

5. **APPL/BEN NUM** - Always complete this item. When the code entered in item 4 is less than 90, this item is used to complete the KOR-SURV-APPL_NUM field in the KOR Master Record. When the code entered in item 4 is more than 90, this item is used to complete the KOR-SURV-APPL_NUM and the KOR-SSA-BENE-TYP-CD field in the KOR Master Record.

   a. **RRB Applications** - Complete this item with the two-digit application number (use preceding zero when applicable) so the system can identify the correct application when the disposition is entered. For applications coded in by RASI, enter "00" in this item. For applications coded in by APPLE, use the number that APPLE assigned to the application. APPLE assigns numbers to applications consecutively as the applications are entered into APPLE. Thus the first application on the Application Menu Screen has the number 01, the second application is 02, etc. Note that FNODs are not assigned a number and should not be counted when determining the assigned application number.

   For example, the young mother's AA-18 would be "01," the child's AA-19 would be "02," etc.
b. **Solar Awards** - The correct codes for SOLAR awards are shown below:

- **Code 01**: Initial award where the beneficiary’s SSN is the same as the RR EE’s SSN.
- **Code 02**: Initial award where the SSA beneficiary’s SSN with BIC other than C, B6 or B9 is not the RR EE’s SSN.
- **Code 11**: Initial award where the BIC of the SS claim number is C1.
- **Code 12, etc.**: Initial award where the BIC of the SS claim number is C2, etc.
- **Code 30**: Initial award where the BIC of the SS claim number is B6 or B9.

6. **BEN SS NUM** - Always complete this item, even if it is the same as item 2. Enter the applicant’s own social security number. If the applicant does not have a social security number, enter “000000000”.

7. **STATUS OF APPLICATION** - Always complete this item. The codes are:

- 0 = New Retirement Application, SUP ANN, Medicare only, or PAM/SOLAR award.
- 1 = Reactivated RRB application, SUP ANN, or PAM/SOLAR award
- 2 = Recertified
- 3 = SSA AERO Calc (PAM, SOLAR, STAZA)
- 4 = Survivor "Spouse to Widow Conversion"
- 5 = Aged Widow or RLS (with Application AA-21)
- 6 = Survivor Accrued Annuity (with Application AA-21)
- 7 = Spouse Accrued Annuity (with Application AA-3)

8. **FIELD OFFICE NUMBER** - When item 7 above is has a status code of zero, enter the number of the RRB field office or, if applicable, the Headquarters code.

</tbody>
</table>

401 = A Social Security Administration application which was transferred to RRB or an application that was filed at Headquarters (i.e. foreign survivor student application)

402 = An RR Cert case coded in by PAM/SOLAR.

430 = A SUP ANN initial (reg ann and sup) from RASI

431 = A SUP ANN attainment from MAP.

999 = Miscellaneous or Field Office Number Missing

9. HOW FILED - This information for applications processed by APPLE can be found on the APPLICATION ENTRY Screen APMMOO2 in item “Dev CD.” Enter the appropriate code.
1 = In person - This corresponds to the code “P” on APPLE. Use this code if the application is taken on APPLE and the summary/certification is mailed to the applicant for signature.

2 = By mail - This corresponds to the code “M” on APPLE. Use this code, if a RRAILS paper application (i.e. AA-17, AA-18, AA-19 or AA-20) is used to obtain the information for the APPLE screens.

3 = By employer

4 = Record from PAM/SOLAR

5 = SUP ANN Age Attainment

6 = Internet (Future Use)

Leave this item blank for RRA application reactivations (Recon cases).

10. APPL ENTR DTE - This item is for future use. For now, leave this item blank.

11. APPL REL DTE - This item is for future use. For now, leave this item blank.

12. DOB DTE - Complete this item only for RRB monthly annuity applications or a SUP ANN. Enter the applicant’s date of birth. If unknown, leave this item blank. If you are not coding an RRB annuity application or SUP ANN, leave this item blank.

13. ABD/OBD DTE - Complete this item with the ABD/OBD only for new RRB annuity applications (status code = 0). For survivor cases, you can use the estimated OBD from the APPLE Summary Screen. For retirement cases, the estimated ABD is on RASI request. For an RRB SUP ANN, enter the SUP ANN Begin Date.

Note: KOR will correct this date if the disposition record closes out the application with a different ABD, OBD, or SUP ANN Begin Date.

If you are not coding a new RRB annuity application or SUP ANN, leave this item blank.

Always press ENTER after coding each Receipt record. Otherwise, the record will not be written off to the KORFORMS batch.

Refer to RCM 9.13.11 for instructions for closing your KORFORMS batch.

9.13.7 General Information About Dispositions

Award disposition coding is done mechanically.
The following disposition actions must be coded out manually using KORFORMS:

A. Denial or closed without award (CWOA) not coded out by APPLE
B. DBD KOR cases for retirement disabled children.
C. Disability Medicare only cases
D. SSA Awards coded in mechanically by PAM and paid with different disposition coding on SOLAR (SSA Unmatched Disposition).
E. Survivor Accrued Annuity-at-Death applications not coded out by DAISY.

9.13.8 Folder Record Of Disposition Coding Action

You may print out a copy of any KORFORMS screen with the EXTRA "PRINT SCREEN" commands. However, a copy of the KORFORMS disposition coding is not on the annuity application. When necessary, use the KOR monthly final disposition listings to verify the disposition coding.

9.13.9 Coding Dispositions On KORFORMS

When you open a new batch, the "Receipt Code Sheet" screen will appear. Use PF2 to move to the "Disposition Code Sheet" screen. The cursor moves automatically after each of your typed entries. If you leave an item blank, use the "Tab" key to move the cursor. The activity code will be entered into the record mechanically by KORFORMS when you complete your entries and press enter.

<table>
<thead>
<tr>
<th>DISPOSITION CODE SHEET</th>

</tr>
</tbody>
</table>

INSTRUCTIONS FOR DATA ENTRY:

1. PREFIX - Type the alphabetical prefix "A," or "D." 2. CLAIM NUMBER - Enter the RRB claim number. If the claim number is six digits or less, enter zeros in the first three spaces.
3. **APPL\BEN TYPE CD** - Always complete this item. The code should be the same as number on the KORFORMS Receipt record for this record. (See 9.13.6 item 4.)

4. **APPL\BEN NUM** - Always complete this item. The code should be the same as number on the Receipt record for this record. (See 9.13.6 item 5.)

5. **BEN SS NUM** - Always complete this item, even if it is the same as item 2. This number should be the same as their own SSA number on the KORFORMS Receipt record for this record. (See 9.13.6 item 6.)

6. **STATUS OF APPLICATION** - This should be the same as the status code for the receipt of this record. (See 9.13.6 item 7.)

7. **PRTIAL PD DTE** - Complete this item with the final disposition record if the applicant was paid a partial award before the final disposition date. Otherwise, leave this item blank.

8. **FINAL DISP DTE** - Always complete this item. Enter the final disposition date.

9. **TYPE OF DISPOSITION** – Always complete this item. Enter the appropriate code:
   
   00= Final Award or Allowance for AA-6 or AA-7  
   01= Closed Without Award or Denial  
   06= Supplemental Annuity Reduced to Zero  

   Note that code “03 - OLDDS rating information” and code “05 - Partial Award” are used in the KOR program, but are never entered on KORFORMS.

10. **DOB DTE** – Always complete this item. This should be the same as the DOB on the receipt of this record. (See RCM 9.13.6 item 12.)

11. **ABD/OBD DTE** - Complete this item with the ABD/OBD only for new RRB annuity applications (status code = 0). For an RRB SUP ANN, enter the SUP ANN Begin Date.

   Note: KOR will correct the ABD, OBD or SUP ANN Begin Date when the disposition record closes out the application with the correct ABD, OBD, or SUP ANN Begin Date.

12. **EXAMINER NUMBER** - Enter the appropriate examiner number in this item. If this item is left blank, KOR will enter the exam number “999.”

13. **AUTHORIZER NUMBER** - Enter the appropriate authorizer number in this item. If this item is left blank, KOR will enter the exam number “999.”
14. **MED EVID COMPL DTE** - This item is for future use. For now, leave this item blank.

Always press ENTER after coding each disposition record. Otherwise, the record will not be written off to the KORFORMS batch.

Refer to RCM 9.13.11 for instructions for closing your KORFORMS batch.

**9.13.10 Correcting Your KORFORMS Entries**

There are several ways the examiner or clerk can correct their own KORFORMS entries in a batch that has not yet been extracted to the monthly KOR run.

Use the PAGE DOWN (or the PA-2 key on the CRT terminal) to page back through the records as they were entered into your batch. Use the PAGE UP (or the PA-1 key on the CRT terminal) to page forward through the records as they were entered into your batch.

The "Command Line" for your batch is at the top of each KORFORMS screen. Use the HOME key (or the keys ALT-RULE on a CRT terminal) or the TAB key to move the cursor up to the command line.

A. **Started Entry on Wrong Screen** - If you begin to enter data on the wrong KORFORMS screen, do not press the ENTER key. Use the PAUSE key (the CLEAR key on the CRT terminal) to prevent the data from being forwarded on to KEY/MASTER. Then use the appropriate PF key to request the correct KORFORMS screen and type your entries.

B. **Entry Has Typo or Incorrect Data** - To correct a record in a batch that has not yet been extracted for the KOR run, type the correct information on the screen. Then tab up to the command line and type "REP" for "Replace." Then press ENTER. The message "RECORD MODIFIED" should appear at the top left corner of the screen.

C. **Need to Delete One Record from the Batch** - To delete a record in a batch that has not yet been extracted for the KOR run, page to that record. Tab up to the command line and type "DEL" for "Delete." Then press ENTER. The message "RECORD DELETED" should appear at the top left corner of the screen.

D. **Need to Cancel Entire Batch** - To cancel an entire batch that has not yet been extracted for the KOR run, tab up to the command line of any KORFORMS screen and type "CAN" for "Cancel." Then press ENTER. The message "CANCELLED" should appear when you close out the batch.

**NOTE:** A batch can also be cancelled from the supervisor screen by a person with a valid supervisor code.
E. **Batch Seems to be Locked Up** - When you press ENTER, the message MUST RESUME may appear in the upper left corner of the screen. This means that you must exit the paging mode PAGE UP or PAGE DOWN (PA-1/PA-2) before you can add new records to the batch. To do this, page forward to the last record in the batch. Tab up to the command line at the top of the screen and type "RES" for "Resume." Then press ENTER. A blank KORFORMS screen should appear to allow new entries to the batch or allow you to close the batch.

### 9.13.11 Closing KORFORMS Batches

When your entries for the batch are completed, close the batch. Close your batch by pressing the PF-24 key (Shift/PF12).

You may later add records to a closed batch, as explained in RCM 9.13.3(B).

KEY/MASTER will hold a "closed" batch until it is extracted to the monthly KOR run.

### 9.13.12 Signing Off Key/Master

After you close the batch, you will go to a screen that indicates whether your batch is "closed." Then press PF-12. The screen should say you are logged off. Press PF-12 again. You will be at the SYSTEM/FUNCTION screen. Type 1 at the cursor and press ENTER. You will be logged off the KEY/MASTER system.

### 9.13.13 KORFORMS Supervisory Functions

Access "KORFORMS" from the TPX menu by selecting "KEYPROD" with the PF key explained in RCM 9.13.2. The KEY/MASTER screen will appear.

If you have supervisory access to KORFORMS, type your KORFORMS supervisor code on the supervisor code line. Press the ENTER key. Then type the command "STA" and "KORFORMS" next to PARM 1. DO NOT REQUEST A PRINT SCREEN FOR THE SUPERVISOR SCREEN.

The supervisor screen will help you find a batch number and security code for a batch. The supervisor screen may be used to reinstate a cancelled batch on the same workday as the day of the cancellation. However, if the batch is not reinstated, the KEY/MASTER reallocation program may drop all cancelled batches for that day at the close of business.

The data on the supervisor screen is displayed as follows:

**CMD = Command Column.** Use the command "C" to cancel a batch or "R" to reinstate a batch. Then press ENTER. The program will ask you to verify this request. Press ENTER again.

**Batch = Batch number**
E = Current Status of batch. This must be "C" = "Closed" for the batch to be extracted to the monthly KOR run.

S/C = Security Code

ENT = Number of records in batch

CDATE = Date batch was created (year/Julian date)

H M S = Time of day batch was created

EDATE = Date batch was extracted by Data Processing (year/Julian date)

E OPER = KEYPROD LOGON ID of the person who created the batch

You can view the entire list of KORFORMS batches by continuing to press "Enter". After you reach the end of the list, you will be taken back to the command screen.

The PF-1 through PF-8 keys for the KORFORMS menu work only from the Data Entry Operator (DEO) mode (see RCM 9.13.3). You cannot view a KORFORMS batch from the supervisor mode. To view a KORFORMS batch, go from the "Supervisor" mode to the "Data Entry Operator" (DEO) mode by typing the command "DEO". Leave all other items blank and press ENTER. Then follow the instructions for correcting a KORFORMS batch in RCM 9.13.3(B).

9.14.05 Background

Effective September 14, 2001, the paper G-90 has been replaced with an online version. An online database has been created to store and display the results of SEARCH calculations. Previously, SEARCH results were printed on paper G-90's, sorted, distributed to the requesting units and filed in the employee's claim folder. More recently, a temporary file replaced the conventional claim folder and the G-90 was manually scanned onto the imaging system. These functions are no longer required.

The online G-90 was developed to address two primary needs: expanded SEARCH calculations; and support a paper and folder free work environment. The results of expanded SEARCH calculations, such as providing true PIA history for up to 20 effective dates, would have required the paper G-90 to be three pages. This in turn would require the three pages to be printed, sorted, distributed and then physically scanned onto the imaging system.

9.14.10 What's on the database?

The database will house all mechanically produced employee retirement and survivor reentry G-90's and all final employee retirement G-90's. This includes all special mass adjustment G-90's such as RAIL and AERO and RESCUE. SURPASS will continue to store final survivor G-90's. Spouse and auxiliary spouse G-90's are not available on the database. The RR90 will temporarily be printed pending SSA procedural changes.

Note: You must continue to manually scan the G-90a onto the imaging system.

9.14.15 Effective date

The following provides the location of G-90's based on the date the G-90 was produced.

If the G-90 was produced before 9/14/2001, then the G-90 is a paper G-90.

- Effective 10/2/00 - all initial G-90's were physically scanned and are available on the imaging system.

Note: The SEARCH results of the 2001 RAIL are on the database.

9.14.20 How to locate a G-90

In order to locate a G-90, you must access the SQL G-90 database on the intranet. Below are various alternatives.

1. Through Internet Explorer - Type the following address:
   http://internalappsprd.usrrb.ad.local/WebApps/GOLDMenu/GoldMenu.aspx
2. Create a desk top short cut - see T-01-58.

3. Through Boardwalk, under 'Applications Associated Link' and click 'G-90 Online'.

Note: Multiple sessions on the database are allowed.

**9.14.25 Database location**

The database (DB) is located on the production server RRBSQLP01. It is accessed through Boardwalk on the intranet:
http://internalappsprd.usrrb.ad.local/WebApps/GOLDMenu/GoldMenu.aspx

**9.14.30 Access**

Since the DB is located via the intranet, field office personnel as well as headquarters personnel have access to G-90's online. Multiple users may view the same G-90 at the same time. You may also have multiple sessions open in order to compare G-90's if necessary.

**9.14.35 Frequency**

The G-90 Online DB is run nightly as part of the SEARCH stream. A mechanical process loads the daily SEARCH activity to the G-90 Online DB. This includes MAP (age 62 recalc G-90's) & DF Attainments. Special SEARCH output such as the RAIL and AERO and RESCUE are loaded upon request.

**9.14.40 Relationship to imaging**

A special file is created as part of the SEARCH stream that is loaded to the imaging DB. The file contains specific information about the G-90 that is used to create an index within workdesk. This index allows you to verify if the G-90 is available online. You can access the G-90 as specified in 9.14.20. It is not accessible through workdesk.

**9.14.45 Purge erroneous G-90**

If a G-90 has been generated based on erroneous information, the G-90 should be removed from the DB. You should send an email to Barry Fredrick or Stewart Kosterski requesting the G-90 to be deleted as well as the imaging team. You must include the reason and the G-90 ID number.

**9.14.50 HSL report**

The reports providing SEARCH counts, rejects and pending reentry G-90’s are located on Boardwalk, Applications under System Reports. The link is \share\hsl_reports\Production.
9.14.51 G-90 Rejects

G-90 rejects are listed in the SEARCH Counts daily report that is posted on Boardwalk, Applications, System Reports, SEARCH Counts (refer to link above in 9.14.50). A referral is also loaded to USTAR under categories SISG90 for survivor and RBDG9R for retirement. As you handle the case, these USTAR referrals must be closed upon concluding your action just as any other referral that is on USTAR.

9.14.55 G-90 Online Log

An online log is produced after each load to the G-90 Online DB has been completed. It provides counts of records processed, stored, deleted, and when the job started and ended. It also provides counts by the type of G-90 processed, e.g., RASI. Some fields that may be important to you:

- G-90’s Processed - total number of G-90’s produced from SEARCH.
- G-90’s Deleted - total number of reentry G-90’s purged because SEARCH provided a final G-90. Match based on G-90 ID number.
- GEN - number of G-90’s stored on the DB.

The log is located at http://internalappsprd.usrrb.ad.local/ClassicASP/Gold/G90Log.asp

9.14.60 Retention period

The G-90 Online DB has an unlimited retention period.

9.14.65 Location

The PC database (DB) is located through the intranet at:
http://internalappsprd.usrrb.ad.local/WebApps/GOLDMenu/GoldMenu.aspx

9.14.70 Inquiry screen

The inquiry screen is displayed below. You may locate a G-90 by claim number, type of G-90, by the date the G-90 was loaded onto the DB or by the G-90 ID number. The search process will begin after you click the icon labeled ‘List G-90s For Claim’ or by pressing ‘enter.’

G-90s For Given Claim
Please enter the search criteria below and click the button. The screen will display a list of G-90s matching the criteria. Please note that you can enter as much criteria as you would like.

Claim Number (X999999999 format)

Requestor

Loaded After Date (yyyyMMdd - no slashes)

Loaded Before Date (yyyyMMdd - no slashes)

G-90 ID

Warning: Please narrow your search criteria. Please enter a claim number if you set 'Requestor' to 'ANY'. If you set 'Requestor' to 'ANY' without a claim number and search a wide range of dates, your PC could be tied up for a very long time and it could disrupt other users.

### 9.14.75 Inquiry screen definition

The fields on the inquiry screen are defined as follows:

- **Claim Number** - claim number as provided on G-90 request. The format is prefix (A, D or H) followed by nine digits. A six digit claim number must include zeroes in the first three digits of the claim number following the prefix, e.g., A000123456.

- **Requestor** - type of G-90. The categories are as follows:
  - Any
  - Survivor Reentry B
  - Survivor Reentry A
  - RESCUE – (RAIL or AERO G-90)
  - Retirement Reentry A
  - Retirement Reentry B
  - SPEED
  - SPARC (MAP age 62 recalc)
• DF
• RASI
• Manual G60
• Financial Interchange
• MS ACCT

- Loaded After Date - search for all G-90’s loaded onto the DB after specified date. The format is YYYYMMDD without any spaces.

- Loaded Before Date - search for all G-90’s loaded onto the DB before specified date. The format is YYYYMMDD without any spaces.

- G-90 ID - search for a specific G-90 based on the G-90 ID number.

9.14.80 Search result

The following information is a sample reply based on ‘Manual G60.’

G-90’s Which Meet Criteria - To display the G-90, click its G-90 ID.

<table>
<thead>
<tr>
<th>ID</th>
<th>Surname</th>

</tr>
</tbody>
</table>

9.14.85 Description of result

The labels for the search result are explained below.

- G-90 ID - unique number assigned to each G-90 request. Since more than one G-90 may be available for any given claim number, a unique number for each G-90 request is necessary.

- Surname - employee’s last name.

- Date Loaded - the date the G-90 was loaded onto the DB, (what was the G-90 print date).

- Requesting Unit - the specific unit that made the G-90 request.

- Request Type - type of SEARCH calculation.
• Description - more detailed request type (AGE 62 and ALT PIA).
• SS No - social security number on request.
• Requestor - type of G-90.
• Assigned - date entered by CCU supervisor for survivor reentry B G-90’s that require additional manual calculations.
• Completed - date survivor reentry B G-90 was completed by CCU examiner.
• Reason - only displays cause for survivor reentry B and only if manual calculations are required.

9.14.90 G-90 display

You must click on a specific G-90 ID number to view the G-90.

9.14.95 Navigation

The following are guides to navigating through the DB.
• Get out - click on the icon ‘Back’ until you’re home.
• New search - click on the icon ‘Back’ until you’re at the search screen.
• Views - use scroll bar for up, down and side to side.

7) Re-entry A Data Required - Military Service Creditability and Annuity Beginning Date

8) Re-entry A Data Required - Date of Death

9) Re-entry A Data Required - Date of Death and Military Service Creditability

RE-ENTRY B MESSAGES

Message 1: Out of Balance Indication RRB/SSA: USTAR code RBOG9R

Detail wages and/or compensation do not equal total. Possible causes: SSA wage info is outstanding, specifically 1953-1955 wages/QCs. When RRB’s request is made to SSA, SSA initiates corrective action. SSA typically resolves the issue within 30 days - new G-90 request should be made to verify no change in PIAs.

Message 2: Incorrect Account Number Indication: USTAR code RBOG9R

Total compensation does not equal cumulative compensation. Possible causes are:
• Multiple A/N - Send an email to CESC to consolidate comp records, once notified of resolution, request new G-90; or
• incorrect SCORE record - Possible discrepancy in surname and/or DOB from request and SCORE FILE DATA displayed on GOLD. If SCORE error, send an email to CESC to correct error; request new G-90 once EDM has been updated. If error on request, correct and request new G-90.

Message 3: Service After ABD: USTAR code RBOG9R

Referral produced when there are more than 3 months reported after the ABD.

For cases identified thru RESCUE - refer to Final G-90 messages below for more detail
Message 4: More than 4 Periods of M/S

Message 5: Military Service after 1956

Message 6: SSA 794 Pending: USTAR code CCUG9F

SSA has action pending on the case - request new G-90 in 30 days and compare to earlier G-90.

Message 7: Eligibility Prior to 1941

Message 8: Military Service after 1974: obsolete - NAN

Message 9: 2 Vesting Years, One or Both Prior to 1951

Message 10: Vesting Year 2 Required

Message 11: Questionable Compensation

Message 12: Lag Not Used: obsolete - NAN

Message 13: Two M/S Creditability Codes in Year after 1950: obsolete - NAN

Message 14: Determine QC’s through Vesting Year

Message 15: M/S After 1956 Not Corroborated by QC Pattern: obsolete - NAN

Message 16: Excess of Overlapping M/S Months. Determine QC’s through Vesting Yr

Message 17: Manual Computation Required for PIAs, AIME PIAs, AMCs, Basic Amt

Message 18: Determine Month & Year 360 Months Established

Message 19: 60/30 Determination Not Made

Message 20: Possible Deeming Required: obsolete - NAN

Message 21: Vesting Year is Questionable

Message 22: Vesting Year is Required: USTAR code RBOG9R

SEARCH is unable to make vesting determination because the vesting year is prior to 1951. If vested, complete g60 with vesting year
Message 23: Review Creditable Service Months: obsolete - NAN

FINAL G-90 MESSAGES

ADDITIONAL QC’S MAY APPLY 1937-1950

This message is displayed when insufficient QC’s are established for a 5 year vesting case and there are wages greater than $49.99 in the period 1937-1950. Secure a QBD to verify the QC’s – you may NOT use the $400 rule to establish QC’s.

ASSUMED NOT VESTED

This message will appear on an employee RASI requested initial G-90 for a 60/30 annuitant if TRIC did not make a vesting determination before the G-90 was displayed. The G-90 was processed as if the employee was not vested, the PIA 4 is shown on this G-90 as "9999."

A second G-90 (and possibly G-90a) will be produced to furnish the vested status. (See Section 7.4.40.)

CHECK CHILD CARE D/O

This message will appear in retirement case if the employee is a disability annuitant under age 37 in the earlier of his ABD year or DF year and his ABD is 7-1-80 or later or his DF date is 2-1980 or later.

This message will appear in survivor cases if the employee was under age 37 in the earlier of his ABD year or DF year and his ABD was 7-1-80 or later, or his DF year was 1980 or later, and the DOD is 8-1-81 or later.

If the employee has 1 or more years with no earnings after the year he attains age 21 and before the earlier of his ABD or DF onset year, develop for possible child care drop-out years as explained in RCM 4.7.120ff.

ESTIMATED AIME PIA 9 FURNISHED

The AIME PIA 9 furnished on the Form G-90 for the 60/30 annuitant is an estimated PIA based on an estimated average annual earnings amount for the AIME PIA 9 indexing year. The estimated AIME PIA 9 should not be used to award the O/M. If the O/M applies, obtain the correct AIME PIA 9 based on the actual average earnings amount for the indexing year.

LAG NOT USED, MAY BE A FACTOR IN COMPUTATIONS
This message is displayed on mechanical DF G-90's to indicate that lag compensation was not included in the PIA computations on the DF G-90. If the employee has lag compensation which would affect the PIA computations, release Forms G-60 to obtain correct PIA computations which include the DF.

LESS THAN 120 SERVICE MONTHS BEFORE 1975

This message is displayed on employee survivor G-90's if the employee does not have 120 months of railroad service before 1975. This message indicates that the maximum lump sum death payment is 3 times the PIA or $225, whichever is less. The maximum LSDP for this case cannot be based on ten times the basic amount.

LESS THAN 120 TOTAL SERVICE MONTHS

This message is displayed on employee G-90's if the employee does not have 120 months of railroad service. In retirement G-90's no computations are provided. In survivor G-90's, the computations are provided.

(L) LAG COMPENSATION REPORTED FOR (YEAR)

This message is displayed on the employee G-90 if the employee has lag compensation. The message indicates what years in item 4 are considered lag.

MATCH AND FORWARD TO RM

This message is displayed on mechanical DF G-90's to indicate that the DF G-90 should be matched to the claim folder and forwarded to the appropriate Modular Unit.

MBR DISAGREES ON (NAME) (DOB) (NAME AND DOB) (SEX) (NAME AND SEX) (DOB AND SEX) (NAME, DOB AND SEX)

A discrepancy exists in name, DOB, or sex. MBR data is furnished but the message is displayed to point out the discrepant item.

Resolve the discrepancy.

MBR MAY BE INCORRECT

This message is displayed on COL reject G-90's if the BIC code is not A and SSA transmitted a code indicating that the MBR date may be incorrect.
If the MBR data is incorrect or if you are unable to determine if the MBR data is incorrect, secure an MBR print-out to verify the MBR data.

**MS CONSIDERED IN COMPUTATION**

This legend will appear if the G-90 is the result of a G-60 request for RECOMP PIA data and M/S was considered in the computations.

**M/S INVOLVED - 37 ACT CASE**

This message is displayed on AERO G-90's to indicate that the employee's military service was not included in the computations.

If inclusion of the employee's military service would affect the computations, request manual computations from the Claims Certification Section.

**M/S NOT INCLUDED IN GROSS RESIDUAL**

The employee's military service after 1950 has not been included in the gross residual. If the gross residual with M/S must be obtained, return the Form G-90 to the Claims Certification Section and ask that M/S be included.

**MS NOT USED IN COMPUTATION**

This legend will appear in RECOMP G-90 cases where the M/S was not used in the computations.

Review the G-90 to determine if the M/S will increase the PIA amounts. Generally, if the M/S is prior to 1951 and the AMW is over $250.00, the "OLD START" is not applicable. In such cases, the RECOMP PIA's on the G-90 will be correct. However, you must also consider if the M/S will provide an additional year of coverage for cases where the special minimum PIA may be applicable.

If there is a possibility that the M/S will increase the PIA data, request a manual PIA calculation.

**MS QUESTIONABLE - NOT USED IN COMPUTATION**

This legend will appear if the G-90 is the result of a G-60 request for RECOMP PIA data and M/S was shown on the G-60 but was not used in the computations. Usually this will happen in cases where the M/S period is erroneous, i.e., keypunch error or examiner error.

Review the file copy of the G-60 to see if the correct M/S period was
furnished. If the M/S period is correct, request a manual PIA calculation. If the M/S period shown on the G-60 is incorrect, submit a new G-60 with the correct M/S period.

NO EFFECTIVE PIA 1 RECOMP

This message is displayed on 1937 Act recomp requests if no PIA 1 recomputation is payable.

NO SS INSURED STATUS FOR SSEB

This message is shown on survivor G-90's in which the employee does not have enough quarters of coverage to have an SS insured status. The SS insured status determination for SSEB is based on combined wages and compensation. The SSEB acquired quarters are shown in item 10F.

NOTICE OF RRB JURISDICTION RELEASED (TO BIRMINGHAM PAYMENT CENTER) (TO CHICAGO PAYMENT CENTER) (TO KANSAS CITY PAYMENT CENTER) (TO NEW YORK PAYMENT CENTER) (TO PHILADELPHIA PAYMENT CENTER) (TO SAN FRANCISCO PAYMENT CENTER)

This message is shown on survivor G-90's in "D" cases if an entry was made in the RSI block of item 3L and the employee died in the current year or last year. This message indicates that the Claims Certification Section released a notification to be appropriate SSA payment center that RRB has jurisdiction of survivor benefits in this case.

NUMBER OF OVERLAPPING M/S MONTHS QUESTIONABLE

The examiner should review the proof(s) of active military service in file to determine if they match the period(s) of creditable military service shown in item 1T of page 1 of the G-90.

If the military service period(s) shown are correct, refer the folder to the Claims Certification Section for verification of the correct number of overlapping military service months shown on the G-90.

% - DUE TO PRIOR YEAR ADJUSTMENT

The PIA 1 which should have been in effect immediately prior to the AERO recomputation does not equal the PIA 1 in the PREH/Rate History database record for that period. Therefore, an annuity adjustment may be due for the period prior to the current recomputation.

Return the G-90 to the Claims Certification Section via Form G-563 and
request all applicable PIA computations prior to the current recomputation.

POSSIBLE DF INVOLVED

A disability freeze appears to have been included in the computation of the beneficiary's SS benefit, but has not been included in the computation of PIA 21 or PIA 4.

This message will appear when:

1) The beneficiary is receiving a benefit on his own account, and
2) The SS DOE is prior to age 62, and
3) A DF prior to age 62 has not been entered on the TRIC request.

If the DF onset date is not available in the folder (e.g., from an RR-1e or SSA-3103), release a teletype or RR-6a to SS to request the DF onset date. If the DF date furnished by SSA affects the PIA computation (refer to RCM 8.11.15), request a manual PIA computation from the Claims Certification Section per RCM 8.11.122.

-POSSIBLE DUPLICATE EARNINGS BA 9999

This message is displayed if the employee has earnings reported by an employer listed on a table of known duplicate earnings problems see RCM 9.3 Appendix E). Duplicate earnings are defined as earnings that have been reported by an employer both as compensation AND as wages for a year or years after 1977.

If this message appears on a G-90 and the compensation and wages posted for the year(s) in question are equal (plus or minus $1), no action is necessary for the year(s). SEARCH is programmed to not use the wages in the computation when the compensation and wages are equal.

If the message appears on a G-90 and the compensation and wages posted for the year(s) in question are not equal (difference is greater than plus or minus $1), take the following action:

1) Request a DEQY for the year(s) in question.
2) Check the DEQY to see if the wages are from a railroad employer. If they are not, there are no duplicate earnings and the calculations shown on the G-90 can be used. However, if the wages are from a railroad employer, duplicate earnings are involved.
3) If there are duplicate earnings, send a copy of the G-90 and the DEQY printout to the Certification Compensation Unit (CCU) for manual calculations, using Form G-563. Advise CCU to provide the necessary calculations using the duplicate earnings as compensation only. If the calculations change, manual award action is required.

PRIOR SERVICE MAY INCREASE AMC

The employee has less than 30 years of service and at least one of the months of compensation used in the computation of the employee's AMC is less than $250. If higher, the prior service average may be substituted for the compensation of any subsequent service month(s) used in the computation of the employee's AMC.

Obtain the employee's prior service average. Attach Form G-26 to the G-73a/G-90 and send to the Claims Certification Section. In the "COMMENTS" section of the G-26 enter the following:

"Determine if prior service increases the AMC. If so, please furnish the increased AMC and Tier II amounts."

REENTRY A OUTSTANDING 240 DAYS CASE DELETED FROM PENDING FILE

The case was referred out for reentry A handling 240 days or more ago but the reentry A data has not been received by the system. The Claims Certification Section has dumped the request off the system.

If Form G-90 is needed, submit Form G-60.

RRSIA: EE HAS LESS THEN 60 MONTHS AFTER 1995.

This is displayed if the employee meets the 5 year vesting criteria but has less than 60 months after 1995.

RRSIA: INSUFFICIENT QC’S – PIA’s N/A

This is displayed when the employee meets the 5 year vesting criteria but has insufficient QC’s based on earnings from 1951 to the latest year indicated in field, RRSIA, Through

SERV. AFT. ABD.; CHK. ABD.; SERV. NOT USED

The above message is displayed when the reported service
months/compensation are after the annuity beginning date.

A) G-90 Calculations

1. PIA #1 - compensation posted is allocated to the year last worked up to the maximum for that year.
   - prior to 1993, the remaining compensation is not used.
   - after 1992, the remaining compensation is used to compute a recomputation if applicable.

2. Tier 2 - service months/compensation posted after the ABD are allocated to the year last worked up to the maximum for that year. If the ABD is in the year last worked, the maximum number of service months and compensation is limited to the number of months prior to the ABD for that year.

B) Possible Actions:

- Information in the file does not indicate return to service or is inconclusive

1. Less than 4 months reported - no action necessary, G-90 calculations are correct.

2. 4 or more months reported - follow succeeding directions.
   - Appears the employee worked, carried on payroll, or received a settlement or any type of payment for which service and compensation were credited after the ABD

a) Request CESC to investigate by contacting the railroad that reported the service months. This is done by sending an e-mail message to the QRSC mailbox with the following information: 1) “RR service After ABD” in the e-mail subject line, 2) the claim number, employee name, and BA# of the railroad employer, and 3) a statement requesting CESC to investigate the service after ABD, along with a mention of any pertinent information available from the folder, imaging, etc...

b) Do not use the G-90 until the investigation is completed.
c) Upon notification from CESC, verify corrections on EDM

1) If appropriate, request a new G-90 or complete Form G-563 for referral to CCU to obtain updated tier computations - adjust the annuity accordingly.

2) Otherwise use the original G-90 for any necessary annuity adjustment.

d) If a response has not been received within 90 days, trace with CESC.

C) RAIL reject 66 - Service after the ABD

The Calculation Analysis and Systems unit will provide a list (in place of manual G-563's), consisting of the employee's claim number and ABD, to:

- CESC to initiate the investigation
- Operations in order to track and trace open requests.

Once EDM is updated, CESC will notify Operations with a copy of the modified EDM screen. Operations will then request a new G-90 and adjust the case accordingly.

D) Employee returned to railroad service after retirement and has again quit working.

1. Send form G-563/G-90 to the Claims Certification Unit requesting tier 2 recomputations with effective dates corresponding to the ABD and the month after the last reported service month.

2. Correct tier 1 recomputation can be obtained via a G-90 request, but the service months will be cutback in calculating tier 2.

SICK PAY NOT USED DUE TO REJECT

The Sick Pay master file indicates that sick pay activity was rejected. If sick pay affects a year for which Tier I compensation is not posted at the maximum, forward the G-90 via Form G-563 to the Claims Certification Section requesting resolution of the rejected sick pay and recalculation of PIAs 1, 3 and 9.
SSA BENEFICIARY IND

A benefit is not being paid on this A/N; however, the SS W/R indicates that the account holder has filed for benefits on another A/N.

Prepare a G-60 on the other account number if known. If unknown, refer the case to the SSA on-site representative to contact the reviewing office holding jurisdiction over the WE’s account number.

SSA INDICATES MULTIPLE ACCOUNT NUMBER

This message is displayed on COL reject G-90’s if SSA has indicated the beneficiary has multiple SS account numbers.

SSA INDICATES WRONG ACCOUNT NUMBER

The name, DOB, and/or sex from the request data do not match the name, DOB and/or sex from SSA's wage tape. Wage and MBR data are provided, and computations have been made.

Reconcile the discrepancy. If our request data was incorrect, prepare a G-60 with the correct data. If the SS account number was incorrect for a mechanical RASI generated request, RASI will request TRIC if the correct SS account number is entered into RASI.

SSA WAGE REPLY OUTSTANDING 30 DAYS

SSA has not replied within 30 days of our tape request; the Claims Certification Section has deleted the tape request from the TRIC system.

Some reasons for SSA's failure to reply are No Match on Request Data (check the identifying data and claim numbers for accuracy), Wages in Suspense or Out of Balance. If the problem cannot be determined from the G-90, attach it to a G-563 and request the Claims Certification Unit to obtain the SS benefit and wage information manually.

If the G-90 does indicate what the problem is, correct the data on the PC G-60 request and resubmit. For a RASI case, correct the data on the system with a 996. When a new TRIC request is compiled, it will contain the corrected data.

SSEB INSURED STATUS DETERMINATION NOT MADE

This message appears on survivor G-90’s in which an SSEB insured status determination was not made mechanically. An SSEB insured status determination may be requested from the Claims Certification
Section, if necessary.

360 MONTHS NOT ESTABLISHED

This message is displayed when TRIC cannot establish 360 months of service for an employee filing for a 60/30 annuity. This takes into account all creditable service months through the last non-lag year, any lag months (including Title VII months) included on the G-60 or passed by RASI in the TRIC request and any creditable military service months established. Because the system must know the month in which 360 was attained, nothing further can be done at this point. A RASI case will not process further unless some change can be made in the total months available for crediting. The TRIC call-up will remain active. If no change is possible, the case must be dumped for manual handling.

A manual case should be re-examined for error in the reported data or the type of eligibility.

TIER 2 LAG COMP. NOT USED IN AMC AND TIER 2 CALCULATIONS

The employee's lag service and compensation was not included in the mechanical computation of the AMC and Tier II amounts on the survivor G-90. In these cases, the Claims Certification Section will manually compute the AMC and/or Tier II amounts including the lag. They will also usually cross out the message. If this message is displayed and a manual computation of the AMC and/or Tier II amounts including lag is not in file, return the G-90 to the Claims Certification Section and request a manual computation of the AMC and/or Tier II amounts including lag.

UI - 87 STOP: UNEMPLOYMENT OR SICKNESS BENEFITS CLEARANCE REQD

See RCM Sec. 5.9.41.

UNVERIFIED ACCOUNT

The account was established on the master record due solely to the receipt of a service and compensation report. Since employee Registration Form CER-1 was not executed, the master record is incomplete.

Attach a G-26 to a photocopy of the G-90. In the "Comments" section of the G-26 print "VERIFY ACCOUNT NUMBER" and the employee's full name. Route to the Claims Certification Section.

YEARS OF SERVICE ROUNDING MAY APPLY
The message will be displayed when:

1) The employee filed before April 1, 1982; and

2) The employee's date last worked was between September 30, 1981 and April 1, 1982; and

3) 1981 railroad lag service is involved; and

4) The G-88A shows the employee did not work in every month through the earlier of 12-31-81 or his date last worked.

The employee's rounded years of service through September 30, 1981 may be higher than his total years of service. However, the Tier II amount on the G-90 was computed using the employee's unrounded total years of service.

Develop for the number of service months worked in 1981 through September by requesting this information on Form G-115x from the district office which services the lag employer.

When the breakdown is secured, determine if the rounding provision applies. If it does, use the rounded years of service through September 30, 1981 to compute the annuity rates.

### 9.14.115 Subsequent Service and Compensation Date

<table>
<thead>

<td>This item displays a code indicating the employee’s railroad service months employment pattern for each calendar quarter of the year as follows:</td>
</tr>
<tr>
<td></td>
<td>0 = no service 1 = 1&lt;sup&gt;st&lt;/sup&gt; month 2 = 2&lt;sup&gt;nd&lt;/sup&gt; month</td>
</tr>
<tr>
<td></td>
<td>3 = 1&lt;sup&gt;st&lt;/sup&gt; and 2&lt;sup&gt;nd&lt;/sup&gt; month 4 = 3&lt;sup&gt;rd&lt;/sup&gt; month 5 = 1&lt;sup&gt;st&lt;/sup&gt; and 3&lt;sup&gt;rd&lt;/sup&gt; months</td>
</tr>
<tr>
<td></td>
<td>6 = 2&lt;sup&gt;nd&lt;/sup&gt; and 3&lt;sup&gt;rd&lt;/sup&gt; months 7 = 1&lt;sup&gt;st&lt;/sup&gt;, 2&lt;sup&gt;nd&lt;/sup&gt;, and 3&lt;sup&gt;rd&lt;/sup&gt; months</td>
</tr>
<tr>
<td>DEEM PAT</td>
<td>The pattern of deemed months using the same 0 through 7 code used above.</td>
</tr>
<tr>
<td>WG QC</td>
<td>The total number of SS QC’s earned for the year.</td>
</tr>
<tr>
<td>WGQC PAT</td>
<td>A code for each calendar quarter to indicate the SS QC pattern. Due to SSA’s change from quarterly wage reporting to annual wage reporting effective with 1978 earnings, the QC data printed for 1978 and later years differs from the data printed for 1977 and earlier years. For years prior to 1978, the wage QC pattern codes and their meaning are as follows:</td>
</tr>
<tr>
<td></td>
<td>N = No QC  C = Wage QC  S = Self-employment QC  A = Agriculture QC  M = Military QC  D = Military QC after 1974  G = Gift QC  F = Medicare qualified government employment QC</td>
</tr>
<tr>
<td>Code</td>
<td>Description</td>
</tr>
<tr>
<td>------</td>
<td>-------------</td>
</tr>
<tr>
<td>R</td>
<td>Railroad employment QC (this code means the EE has 120 RR service months and SSA has combined FICA wages with RR compensation to determine a SSA insured status to compute a SSA PIA.)</td>
</tr>
<tr>
<td>X</td>
<td>FICA wage QC (same as “C” above)</td>
</tr>
<tr>
<td>&amp;</td>
<td>&lt;$50 in earnings, not a QC</td>
</tr>
<tr>
<td>*</td>
<td>Type of work unidentifiable, but a credited QC</td>
</tr>
<tr>
<td>&lt;</td>
<td>&lt;$50 earnings, no QC</td>
</tr>
<tr>
<td>#</td>
<td>questionable QC</td>
</tr>
</tbody>
</table>

For year 1978 and later, codes are as follows:

- C = QC
- N = No QC

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A, B, or C</td>
<td>All earnings are SEI.</td>
</tr>
<tr>
<td>N or S</td>
<td>No SEI has been reported.</td>
</tr>
<tr>
<td>Q</td>
<td>Amounts posted are wages for an employer or agricultural earnings.</td>
</tr>
<tr>
<td>R or T</td>
<td>Amounts posted are a combination of wages for an employer, agricultural earnings and SEI.</td>
</tr>
</tbody>
</table>

For years before 1978, this item displays the total self-employment wage QCs (0, 4, or &) for each year.

For years 1978 and later, a self-employment indicator code will be printed for all wages earners who have wages posted after 1977. The codes and their meanings for G-90s with SSA Reply Date prior to 7/21/88 are as follows:

- A, B, or C = All earnings are SEI.
- N or S = No SEI has been reported.
- Q = Amounts posted are wages for an employer or agricultural earnings.
- R or T = Amounts posted are a combination of wages for an employer, agricultural earnings and SEI.

For G-90s with an SS Reply Date of 7/21/88 or later, the codes and their meanings are as follows:

- B, C, or Y = All earnings reported are SEI.
- N or S = No SEI has been reported.
- Q = Amounts posted are wages for an employer or agricultural wages.
<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>T</td>
<td>Amounts posted are a combination of wages for an employer, agricultural earnings and SEI. For purposes of making a current connection determination, when a code Q, R or T is displayed, it will be necessary to release a teletype to SSA to ascertain which portion of the earnings posted after 1977 are wages for an employer and which are SEI.</td>
</tr>
<tr>
<td>WG AG</td>
<td>For years prior to 1978, this item displays the total number of agricultural wage QCs credited for each year. For years 1978 and later, this item displays a code which indicates whether or not agricultural wages have been reported for each year. The codes and their meanings are: Y = Agricultural wages have been reported N = No agricultural wages have been reported.</td>
</tr>
<tr>
<td>WGMS PATTN</td>
<td>A code is displayed for each calendar quarter to indicate whether deemed M/S has been credited for M/S after 1967. The codes are as follows: N = No deemed M/S for this quarter. &amp; = Deemed M/S but not updated for this quarter. 1, 2, or 3 = $100, $200 or $300 respectively deemed M/S updated for this quarter.</td>
</tr>
<tr>
<td>TIER 1 COMP</td>
<td>Total tier 1 compensation up to the maximum allowable for each year. Sick pay is not included in this amount. Lag compensation is not shown for any lag year.</td>
</tr>
<tr>
<td>MISC COMP</td>
<td>Miscellaneous compensation earned for years 1982 - current.</td>
</tr>
<tr>
<td>TIER 2 COMP</td>
<td>Total tier 2 compensation reported for each year after 1978, up to the maximum allowable for each year. Lag compensation is not shown for any lag year.</td>
</tr>
<tr>
<td>WAGES</td>
<td>Total SS earnings credited for each year.</td>
</tr>
<tr>
<td>Comb Tier 1 + WG</td>
<td>Total tier 1 compensation and SS earnings credited for each year up to the allowable maximum for each year. Sick pay is not included in this amount.</td>
</tr>
<tr>
<td>*Indexed Tier 1</td>
<td>Indexed tier 1 compensation used to compute AIME PIA #3 for</td>
</tr>
</tbody>
</table>
### Comp for PIA3

| Indexed wage tier1 comp nonexcl | Indexed tier 1 wage/comp based on non exclusion eligibility year (EY). The column will display zero earnings if non disability case for G90 with date into system 10/14/2011 or later. |
| Indexed Wages & Tier 1 Comp for PIA1 | Indexed SS earnings and Tier I compensation used to compute AIME PIA’s 1 and 9 and the frozen minimum PIA. Miscellaneous pay is included. |
| DM/LAG | May display one of three possible values.  
- ‘P’ indicates a deemed service month manual determination is pending  
- ‘R’ indicates manual deeming has been resolved  
- ‘L’ indicates lag service months have been included |

### 9.14.140 Tier 2 and Basic Amount Computations

<table>
<thead>
<tr>
<th>Field Name</th>
<th>Description</th>
</tr>
</thead>
</table>
| AMC Computations | Computations based on the employee's prior and subsequent service. Prior service will be used in these computations if the employee has less than 30 years of subsequent service. This item is not completed on recomp G-90's.  

Information displayed is dependent on the type of computation requested. If the retirement G-90 was requested under the pre-1981 amendment provisions (see Exhibit #2), this item will show the employee's total pre-1975 and post-1974 compensation (up to the applicable maximum), AMC’s #1 through #5, optional AMC’s #1, #2 and #5, and the FAMC. If the regular and optional AMC’s are the same, the same figure will be shown in both places. If the Employee attains age 65 after 1974, optional AMC #1 will be left blank. If the employee attained age 65 before 1951, the word "MAN" will be displayed in the spaces for optional AMC’s #1 and #5. When this occurs, examiners would get a manual computation based on the yearly breakdown of earnings that the Claims Certification Section has on microfilm. If creditable M/S has been included in the computations, the service months, compensation, and AMC’s 1 & 5 will be shown with and without M/S.  

If the G-90 (retirement or certain survivor cases) was requested under the 1981 amendment provisions (see Exhibit #3), this item
will show the employee's pre-1975 service months and compensation, the total service months, the compensation from the employee's highest 60 months of service, and AMC, the employee's Tier II amounts, the FAMC, and in some cases, the employee's rounded months of service. If creditable M/S has been included in the computations, the service months, compensation, AMC, and tier 2 amount(s) will be shown with and without M/S.

Prior to the 1981 amendments, this item was always blank on survivor G-90's. Effective with the 1981 amendments, this item is completed if the employee died after September 30, 1981. The entries in this item should be used to compute current annuity rates only if the employee's ABD was after September 30, 1981, or if the employee died after September 30, 1981 and before becoming entitled to an annuity.

<table>
<thead>
<tr>
<th>Pre-1981 amendment</th>
<th>The entries in this item for pre-1981 amendment cases are as follows:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Pre 1975 - creditable service months, compensation, AMC and optional AMC based on the employee's railroad service through 12-31-74.</td>
<td></td>
</tr>
<tr>
<td>• With M/S - contains the above computations with M/S included.</td>
<td></td>
</tr>
<tr>
<td>• Post 1974 - creditable service months, compensation, AMC and optional AMC based on the employee's railroad service after 1974.</td>
<td></td>
</tr>
<tr>
<td>• 1976 Maximum - AMC 3 amount based on the 1976 compensation maximum.</td>
<td></td>
</tr>
<tr>
<td>• 1980 Maximum - AMC 4 amount based on the 1980 compensation maximum.</td>
<td></td>
</tr>
<tr>
<td>• Thru RR DLW - employee's service months, compensation, AMC and optional AMC based on his service through the last year in which he worked in the railroad industry (for grandfather computation).</td>
<td></td>
</tr>
<tr>
<td>• With M/S - computations immediately above with M/S included.</td>
<td></td>
</tr>
<tr>
<td>• FAMC - final average monthly compensation amount.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>1981 amendment cases</th>
<th>The entries in this item for 1981 amendment cases are shown as follows:</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Pre-75 - pre-75 service months and compensation (without</td>
<td></td>
</tr>
</tbody>
</table>
M/S).

- Total Months - total creditable service months to date (with and without M/S).

- Rounded Months - If the employee filed for an annuity prior to 4-1-82, the rounded service months (with and without M/S) will be shown on employee retirement G-90's.

(Rounded service months through 9-30-81, even if applicable (certain survivor "A" cases), are not reflected on employee survivor G-90's.

- High 60 Compensation - compensation (with and without M/S) from the employee's high 60 months.

- AMC - AMC (with and without M/S).

- Tier 2 - employee's basic tier II amount (with and without M/S) before any WF reduction or COL increases.

Since rounded service months through 9-30-81 are not reflected on employee survivor G-90's, the tier II calculation for an affected case will be understated.

- COL Tier 2 - In survivor "A" cases where the employee died after 9-30-81, the employee's tier II amount (with and without M/S) with COL increases from the employee's ABD through the employee's date of death will be shown. This tier II will be understated if rounded service months through 9-30-81 are applicable. If the employee died after 1981 and on the first of the month in which a COL increase is due, the tier II amount(s) with COL increases will include the COL increase effective in the month of death.

In retirement cases and initial "D" survivor cases, a Tier II amount with COL increases will not be printed. Therefore, any COL increase that applies must be included.

NOTE: The employee's tier II amount with COL increases should not be used as the basis for the survivor tier II amount if:

- the vested employee annuitant was entitled to a WF before (s)he died; or

- the vested employee annuitant died before entitlement to a WF and would have been age 62 on the survivor OBD; or
In the situations described above, a WF reduction must be applied to the employee's Tier II amount before including any COL increases. Therefore, the employee's basic tier II amount should be used for any case described above.

- FAMC - This line displays the final average monthly compensation (FAMC) amount. See RCM 8.6, G-354.4 instructions, item 12 for information on the computation of the FAMC amount.

- RAILROAD SERVICE BEGIN DATE IS MM/CCYY

This date is acquired from EDM and is displayed as follows:

- If the service beginning date is in the period before 1951, "99/1950" is displayed;
- If the service beginning date is in the period 1951 through 1959, "99/CCYY" is displayed. The "99" is constant and CCYY is the actual century and year;
- If the service beginning date is later than 1959, the actual month, century and year are displayed

<table>
<thead>
<tr>

<tr>
<td>_SSA I/S</td>
<td>The month and year the number of required QC’s is met.</td>
</tr>
</tbody>
</table>

**9.14.190 G-90 Online - Survivor Reentry B**

FOM 1 - Manual G-90 Listing will no longer be supported on TextBook. The section provides a list of all current survivor reentry B G-90’s. It provides the claim number, date the G-90 was entered onto the FOM, the date the examiner cleared the G-90, and the cause of the reentry B. This information is now available on the G-90 Online Database (GOLD).

**9.14.195 Effective Date**

The new process for the survivor reentry B G-90’s was placed into production effective October 3, 2001. Any open items on the FOM listing have been resolved. The Manual G-90 Listing in the FOM will be purged on November 1, 2001.

The following describes the survivor reentry B G-90 process.

1. Each business day GOLD is updated with SEARCH output.
2. The CCU supervisor will identify all survivor reentry B G-90’s that require a manual calculation. She will enter and update the ‘Assignment’ date daily.

3. CCU examiners are responsible for reviewing GOLD and reacting to any survivor reentry B G-90 containing an ‘Assignment’ date. Upon completing a G-90a, they will enter the ‘Completed’ date.

**9.14.205 CCU Action**

The following three types of survivor reentry G-90’s are reacted to by the CCU examiners.

1. Service after date of death
2. Military service after 1956
3. MS TR2 questionable - 37-50 overlap

If a manual computation is required for any other survivor reentry B, a G-563 is to be completed.

**9.14.210 Tracing**

Please send an e-G-115 to RIS Supervisor’s attention:

- If a survivor reentry B G-90 does not contain an “Assigned” date within three business days of the date the G-90 was loaded to GOLD; or
- If the ‘Completed’ date has not been entered within 10 business days from the date the G-90 was ‘assigned’ on GOLD.

All users with access to ‘rrbwebp01’ have access to GOLD. Please refer to RCM 9.14.20 for instructions how to access GOLD.
9.15.1 Datasets from Mainframe Programs

Monthly activity counts are mechanically created into datasets by the mainframe programs listed below for the STATS Reports. A copy of each of the datasets remains on TSO for at least 12 generations. The generations are numbered progressively, as they are created (i.e. 1, 2, 3, 4, etc.).

The line of data for each field office is considered to be “a record.” The KOR program P2678901 will pull in the first 53 records received from each dataset. This means that the records at the end of datasets with numbers, such as “810’ or “999” are bypassed.

If any of the datasets for the month are not ready, the KOR program P2678901, which creates the Field Office Workload Master dataset (P.BRC.#2789DD9), will abend. This happens because the latest generation of the dataset has a “Month of Activity” that does not match the “Month of Activity” for the KOR run. An exception is made for the monitoring dataset (see RCM 9.15.9). Since the monitoring dataset is only created once a year, the KOR program P2678901 will bypass it, unless BIS is notified that a dataset has been created for that month.

9.15.2 RRA Application Counts from KOR

P.BRC.#2454DD2 is a dataset of counts from the monthly KOR run with records in the following format:

<table>
<thead>
<tr>
<th>Source Code</th>
<th>Month of Activity</th>
<th>Field Office</th>
<th>Counts of Applications by Type</th>
</tr>
</thead>
</table>

9.15.3 Change of Address Counts from FAST

P.BRC.R26889/DD4 is a dataset of monthly counts from FAST/COA with records in the following format:

<table>
<thead>
<tr>
<th>Source Code</th>
<th>Month of Activity</th>
<th>Field Office</th>
<th>Code “R” COA</th>
<th>Other COA</th>
</tr>
</thead>
</table>

### RCM_9.15 Creating STATS Reports
Revised Feb 20, 2014
Page 1 of 10
9.15.4 First Notice of Death Counts From APPLE

P.BSB.RAPB20.DD1 is a dataset of monthly counts from APPLE with records in the following format:

<table>
<thead>
<tr>
<th>Source Code</th>
<th>Month of Activity</th>
<th>Field Office</th>
<th>First Notice of Death Initially Entered in Month</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>(MMCCYY)</td>
<td>(D/O Number)</td>
<td>9999</td>
</tr>
</tbody>
</table>

9.15.5 Non-Receipt Counts from Check Issue

P.BRC.#2029DD5 is a dataset of monthly non-receipt counts from check issue with records in the following format:

<table>
<thead>
<tr>
<th>Source Code</th>
<th>Month of Activity</th>
<th>Field Office</th>
<th>Non-Receipt Cases Entered in Month</th>
</tr>
</thead>
<tbody>
<tr>
<td>N</td>
<td>(MMCCYY)</td>
<td>(D/O Number)</td>
<td>9999</td>
</tr>
</tbody>
</table>

9.15.6 SPEED Monthly Counts

This is for future use. KOR program P2678901 will not abend if the SPEED dataset is not yet ready. This will be a dataset of monthly counts of work deduction cases from the Speed program with records in the following format:

<table>
<thead>
<tr>
<th>Source Code</th>
<th>Month of Activity</th>
<th>Field Office</th>
<th>SPEED Records Entered in Month</th>
</tr>
</thead>
<tbody>
<tr>
<td>S</td>
<td>(MMCCYY)</td>
<td>(D/O Number)</td>
<td>9999</td>
</tr>
</tbody>
</table>

9.15.7 W-4P Monthly Counts from TAS

P.BRC.#2271DD4.Y2K is a dataset of monthly W-4P counts from the TAS program with records in the following format:
<table>
<thead>
<tr>
<th>Source Code</th>
<th>Month of Activity</th>
<th>Field Office</th>
<th>W-4P Records Entered in Month</th>
</tr>
</thead>
<tbody>
<tr>
<td>T</td>
<td>(MMCCYY)</td>
<td>(D/O Number)</td>
<td>9999</td>
</tr>
</tbody>
</table>

### 9.15.8 RUIA Monthly Field Office Activity Counts from RUCS

P.BUS.#5141SD2 is a dataset of monthly RUIA counts for activity entered into RUCS by field offices. The records are in the following format:

<table>
<thead>
<tr>
<th>Source Code</th>
<th>Month of Activity</th>
<th>Field Office</th>
<th>UI Apps</th>
<th>UI Clms</th>
<th>SI Clms</th>
<th>UI Intv</th>
</tr>
</thead>
<tbody>
<tr>
<td>R</td>
<td>(mmddccyy)</td>
<td>(D/O No)</td>
<td>9999</td>
<td>9999</td>
<td>9999</td>
<td>9999</td>
</tr>
</tbody>
</table>

### 9.15.9 Monitoring Counts

P.BRC.#2789DD7 is a monthly dataset of counts for monitoring activity created in the month. Remind BIS whenever there is an updated monitoring dataset for the “Month of Activity” of the KOR run.

For months in which the monitoring program is not run, a new generation of this dataset is not created. KOR program P2678901 will not abend if a monitoring dataset is not created for the “Month of Activity” of the KOR run. For those months, when KOR creates the Field Office Workload Master dataset, KOR will enter zero as the monitoring counts for that month.

The records are in the following format:

<table>
<thead>
<tr>
<th>Source Code</th>
<th>Month of Activity</th>
<th>Field Office</th>
<th>Rep Pay</th>
<th>Aged</th>
<th>Parent for Child</th>
</tr>
</thead>
<tbody>
<tr>
<td>M</td>
<td>(MMCCYY)</td>
<td>(D/O No)</td>
<td>9999</td>
<td>9999</td>
<td>9999</td>
</tr>
</tbody>
</table>

### 9.15.10 Field Office Workload Master (Combined Counts)

P.BRC.#2789DD9 is the monthly Field Office Workload Master dataset of the combined counts from the datasets listed above. This dataset is created by the KOR program P2678901. This program pulls in the “last created” dataset from those listed above. If the “Month of Activity” on the “last created” and the month of activity for the KOR P2678901 run to not match, the KOR P2678901 run will abend.
The format of the Field Office Workload Master dataset is as follows:

<table>
<thead>
<tr>
<th>Source Code</th>
<th>Month of Activity</th>
<th>Field Office</th>
<th>Counts From Datasets Listed Above</th>
</tr>
</thead>
<tbody>
<tr>
<td>WM</td>
<td>(MMCCYY)</td>
<td>(D/O No)</td>
<td></td>
</tr>
</tbody>
</table>

This dataset is downloaded mechanically each month to a PC server as part of the KOR P2678901 run. A copy of the mainframe dataset P.BRC.#2789DD9 remains on TSO for 12 generations.

Once the data from the dataset is appended to the PC STATS database of field office activity, the dataset can be deleted from the PC server.

**9.15.11 Verifying the Monthly KOR Program P2678901 Run**

**A. A&T Duties Before Running P2678901**

A & T will verify that the regular monthly KOR run is correct. A&T will also verify that all the "last created" datasets describe in RCM 9.15.2-RCM 9.15.9 are for the correct "Month of Activity" and the datasets have valid field office numbers in the first 53 records.

There are two steps for checking each dataset.

First - View each dataset on TSO by typing in the dataset name and browsing the last generation created. Check to make sure that the last generation created has the correct "Month of Activity" and the correct RRB field office numbers in the first 53 records.

Second - Use the EXTRA! /Tools/Transfer File utility to download the datasets to your PC “H:”. If you save the dataset names (including the generation number) as a group on the Transfer File utility, you can simply edit those names to adjust the “generation count” by 1 each month before downloading the files to your PC.

If everything is okay, prepare Form G-569, Job Request/Control/Status Sheet and walk the form to the second floor incoming tray for job requests to authorize the monthly KOR program P2678901 run to create the Field Office Workload Master dataset (P.BRC.#2789DD9).

**B. A&T Duties After Running P2678901**

If all of the syslist condition codes are “000,” check to make sure the counts on
dataset “P.BRC.#2789DD9. (generation for the month of activity)” agree with the counts on the individual datasets described in RCM 9.15.2-9.15.9 for the generation for the same month of activity. One way to do this is to use “EXTRA!/Tools/ Transfer File” to download the dataset P.BRC.#2789DD9 to your PC “H:" with the other STATS datasets discussed in Section (A) above. Then open each one with Microsoft Excel and copy the counts to the Microsoft Excel workbook for checking STATS (currently STATSFISYEAR2004.xls).

Note: The STATFISYEAR2004.xls is simply a tool to use to check the datasets. It is not part of the STATS Microsoft Access program.

The files are downloaded to your PC as text files.

1. Open Microsoft Excel.

2. Then use File-Open and select the dataset from your PC “H:" that you want to open.

3. Microsoft Excel will convert that file to an Excel format by asking a few questions. Indicate that the datasets are “delimited” by “comma.” You can then click on finish.

4. The Microsoft Excel version of the counts can then be copied to the appropriate month on STATSFISYEAR2004.xls using Edit-Copy-Edit-Paste. Copy the counts from the individual datasets to the area with the yellow headings. Copy the counts from the P.BRC.#2789DD9 dataset to the area with the blue headings.

5. Then use Excel Auto Sum to total the counts in each column and compare the totals in the columns from the individual datasets to the totals in the columns from the P.BRC.#2789DD9 dataset. Also compare the totals for that month to the totals for previous months in that fiscal year or totals for previous fiscal years.

If everything looks okay, advise BFS that the dataset that was downloaded by KOR mechanically into the STATS input folder for that month is okay to import into the STATS Microsoft Access program.

C. When a Rerun of P2678901 is Needed

If a problem with the counts on the P.BRC.#2789DD9 dataset is not found until after the counts are added to the STATS Microsoft Access program, advise BFS to use the STATS function that purges that month’s counts from the STATS PC database. Then, request the Control Desk to rerun KOR program P2678901. When requesting a rerun of the KOR program P2678901, you must give the Control Desk the actual generation numbers of each dataset they should use as input to the program. Follow the same instructions explained in Sections A and B above to
verify the new generation of dataset P.BRC.#2789DD9 created from the rerun.

9.15.12 Basic PC STATS Reports

The PC based STATS program is a Microsoft Access program. It stores the monthly counts from the Field Office Workload Master datasets (P.BRC.#2789DD9) for at least three fiscal years. The STATS menu page allows the user to select several types of predefined detailed or summary reports with the click of a button.

9.15.13 Regional and National Totals

The mainframe datasets only include counts by field office number. The STATS PC program computes the totals by region and the national totals. The valid field office numbers for each region are stored in a table in the PC program. The authorized user may correct the field office number table by choosing the FTE reports button on the menu screen.

9.15.14 Field Office FTE Counts

The PC based STATS program allows the authorized user to update or correct the FTE counts for each field office. A PC table stores these counts for the STATS Consolidated Maintenance reports.

9.15.15 Field Office Error Counts and Accuracy Reports

The PC based STATS program allows A&T to update or correct the monthly error count for each field office.

The authorized user clicks on the Accuracy Reports button on the menu screen. A screen then appears with the error counts that have been entered into the program. The user may correct a previously entered count by typing over it with the correct count for that field office and corresponding month or may enter new counts for the month just ended.

A PC table stores these counts for the monthly STATS Field Service Accuracy reports, which are produced by the BFS.

9.15.16 Automated Distribution of Monthly STATS Reports

The PC based STATS program allows the BFS to create monthly fiscal year-to-date STATS reports. Part of the “Print” process allows BFS to electronically distribute the reports to established field office STATS folders that have been set-up on the RRB Network. A Form G-590 to STD is required to add a new user to this automatic distribution.
The reports can also be printed on paper or saved to a file.

9.15.17 Correction of Monthly STATS Reports

The PC based STATS program does not allow the correction of activity for an individual field office. Instead, when a correction is required, the counts for the entire “Month of Activity” are deleted from the PC database by BFS. The KOR program P2678901 must be rerun with the corrected data for that “Month of Activity” and the new generation of dataset P.BRC.#2789DD9 must be downloaded to the PC server.

9.15.18 Optional STATS Reports

The PC based STATS program allows BFS to create special reports that compare up to four different fiscal years for field offices, regions or national totals. These reports may be printed on paper, printed to a file or electronically mailed to field office STATS folders that have been set-up on the RRB Network.

9.15.19 OP-STATS Reports

The PC based STATS program also creates reports of monthly RRA application receipt counts by application type for RBD, SBD and DSUBD. These reports use the same table of activity counts as the regular monthly field office reports. However, they are formatted to show only the RRA application counts of interest to RBD, SBD and DSUBD.

9.15.20 Field Office Consolidated Maintenance With FTE’s Report

The Bureau of Field Service also can create a report titled Consolidated Maintenance With FTEs. This report includes the number of items processed along with an item processed/FTE calculation.

The FTE counts by field office number are included in a table in the program. This table is maintained by BFS.

9.15.21 Field Office Consolidated Maintenance With FTE’s/Weighted Scores Report

A. General

The Bureau of Field Service also can create a report titled Consolidated Maintenance w/FTEs-Weighted Score. This report has the same work categories as the Consolidated Maintenance With FTE Report described in RCM 9.15.20. But, instead of the actual number of items processed, this report assigns weights to the different types of work activities.
The score is calculated by multiplying the weight value by the number of work items processed and then dividing by the actual FTE. The FTE counts by field office and the assigned weights by activity type are included in tables in the program. These tables are maintained by BFS. The current weights are shown below.

<table>
<thead>
<tr>
<th>Activity</th>
<th>Weight Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Regular Ret Apps (AA-1, AA-3, AA-6, AA-7))</td>
<td>32</td>
</tr>
<tr>
<td>EE and Survivor Dis APP (AA-1d, AA-17b, AA-19a, EE Dis Med)</td>
<td>60</td>
</tr>
<tr>
<td>Regular Recurring Survivor (AA-17, S to W, AA-18, AA-19, G-315, AA-20)</td>
<td>32</td>
</tr>
<tr>
<td>LSDP APP (AA -21)</td>
<td>20</td>

<tr>
<td>SI Benefit Activity</td>
<td>1</td>
</tr>
<tr>
<td>UI Interviews</td>
<td>4</td>
</tr>
</tbody>
</table>

**B. Weighted RRA Applications**

For RRA applications, an additional calculation is done (adding the weighted totals for each type of application to arrive at the total score):

Step 1 - Multiplying each RRA application type by the BFS weighted value for that type of application; and,

Step 2 - Adding the results of step 1 together for the total BFS weighted value of the RRA Apps.

**C. Weighted RRA Maintenance**

For RRA maintenance activity, an additional calculation is done (adding the weighted totals for each type of activity to arrive at the total score):

Step 1 - Multiplying each RRA maintenance activity by the BFS weighted value for that type of activity; and,

Step 2 - Adding the results of step 1 together for the total weighted value of the RRA maintenance activity.
9.15.22 Purging the STATS Database

The PC based STATS program will not automatically purge any records. It will remind BFS to purge records that are more than three years old. It will only allow records less than three years old to be deleted when all the data for the “Month of Activity” is being corrected and rerun.
9.16.1 Create an Overpayment Letter Through the Overpayment Recovery Correspondence System (ORCS)

Accessing ORCS through Boardwalk

The ORCS program is located on Boardwalk under Applications. Go to Associated Links and click on ORCS.

NOTE: If this is the first time accessing ORCS, contact the Manager/Supervisor or ORCS Administrator for assistance.

The blue info button is located at the top of the main menu screen. This button is found throughout the ORCS program providing hints and reminders.

Click the show hide button to view the Main Menu screen. The Main Menu will pre-fill with the logon name, division, subunit, examiner number, phone extension, access level and title. A comment line is provided for user entry. Press the Update button to save the comments. To change personal information, use Misc on the menu bar or click on Edit Personal Profile. Update first name, last name, examiner number, authorizer (auth) number, phone extension and preferred number grid items. (Preferred number grid allows the user to select the amount of items shown per page. Depending on the screens resolution, the user may want to change the amount. The default is 25 items.) Inform the supervisor if the division, subunit, access level and/or access title needs to be changed. Press the Submit button to update data.

Click this link to view the Edit Personal Profile screen.

View Manager List – Current list of managers and supervisors.

What’s New? – A new notification feature that will provide updates to the ORCS program.

Work Packages Assigned to You – Allows the user to view their assigned work, delete a case that is PE (Pending Exam) or ResetToPE if case is PA (Pending Auth).

Click this link to view the Main Menu screen.

Actions Menu

The actions menu consists of a variety of ORCS functions. Based on the unit designation, access will vary between users.

RRA: Prepare New Overpayment Letter, Prepare PAR Action Only (G-205/G-206), Authorize, View My Cases, or Recall Case from Closed or OIG Status. (RRA includes Retirement and Survivor examiners.)
DRD: Prepare New Non-Entitlement Overpayment Letter, Authorize, View My Cases and Recall Case from Closed or OIG Status.

CSU: Prepare PAR Action Only (G-205/G-206), View My Cases, Recall Case from Closed or OIG Status.

RUIA: Prepare New Overpayment Letter, Prepare RUIA G-205R, Authorize or View My Cases. (FUTURE ENHANCEMENT)

MEDICARE: Prepare New Overpayment Letter, Prepare PAR Action Only, Authorize or View My Cases. (FUTURE ENHANCEMENT)

Click this link to view the Actions Menu screen.

**Prepare Overpayment Letter**

**NOTE:** It is recommended that all PAR actions be completed before preparing an overpayment letter. Before beginning an overpayment letter, ROC/SURPASS awards should be pending auth.

Select Prepare New Overpayment Letter from Actions Menu. The Debtor Selection screen will appear.

This screen is used to process RRA, DRD, RUIA and Medicare overpayment letters. The user can enter an RRB claim number or SS number (SSN). When the RRB or SSN is submitted, ORCS will retrieve the data from the mainframe. It may take a few seconds to retrieve this data. ORCS will provide the annuitant history under that claim number.

**NOTE:** If an RRB claim number is entered, ORCS will upload all annuitants associated with that number. If entering an SSN, leave the RRB claim number blank. ORCS will only upload that specific annuitant. If an incorrect annuitant or the wrong claim number was selected, go back to the top of the Debtor Selection screen and select a new annuitant or enter a new claim number.

ORCS alerts the user if an existing case matching the entered claim number or SSN is found. If so, check with the user before continuing so no duplicate case is created.

Click this link to view the Debtor Selection screen.

The Alternative Case Preparation buttons only appear when the user enters a claim/social security number and a matching mainframe record is not found. This would be used to send overpayment letters to debtors that have not been entered into PREH (Examples: an annuitant cancels their annuity or third party/legal partition cases). This functionality will also be used in the later phases of ORCS to send overpayment letters for RUIA and MEDICARE because many of their debtors are not in the PREH database.
A. Create OP Letter to Other Claimant – This will allow the user to enter the employee and annuitant/claimant information when no mainframe data is found. Click this link to view the Alternative Case Preparation screen.

B. Create Cancel (No Debt) Letter to Annuitant – This allows the user to create a RL-31A to the annuitant when no mainframe data is found.

Click this link to view the Alternative Case Preparation No Debt screen.

The “copy” button will enter the SSN if it is the same as the claim number. If the claim number is a six-digit number (Example: A 123456), the user will be required to enter the SSN. The “copy” button will also enter the annuitant/claimant information if it is the same as the employee. Choose a check symbol and payee code. Select “Begin” to continue.

After reviewing the data, select the appropriate payee. ORCS will retrieve the Pay Summary, if entered.

Click this link to view the Pay Summary screen.

ORCS will retrieve the mainframe data from PREH and ROC/SURPASS. Review the retrieved data, select Debtor Type (Current Pay, Non-Entitlement, Zero Annuity, Cancel with Debt) and then select “Use PREH” (for One Pay Only cases) or “Use ROC/SURPASS” (for Recert Cases) to continue. Dashes will be shown when no data is available.

Click this link to view the PREH/ROC/SURPASS screen.

The Work Package Confirmation screen will appear. The user will be asked to confirm the annuitant’s name and address. This is required because there can be some inconsistencies in the parsing of the name and address when data is retrieved from the mainframe.

Click this link to view the Confirm Name screen.

Click this link to view the Confirm Address screen.

The PAR table is uploaded each day with current data. If ORCS discovers an existing debt, a window will appear allowing the user to select this debt or establish a new debt.

1. Select an existing debt and click “Submit”, the Bill Doc ID and amount of the chosen debt will be displayed.

2. Select “Cancel”, the existing debt or debts associated with the claim number will be ignored and a new overpayment will be established.
3. Select “Make 10a Letter”, choose an existing debt and click “Make 10a Letter,” the Bill Doc ID and amount of the chosen debt will be displayed. 
   Click this link to view the Section 10a screen.

Click this link to view the Existing PAR Debt screen.

**NOTE:** If this is an 1856 case, see RCM 9.16.13.

Click this link to view the Work Package Confirmation screen.

The Work Package Confirmation screen provides the user with the Employee, Annuitant and Benefit Information that has been retrieved from the mainframe. Each of these items can be opened or closed by pressing the show/ hide buttons on the left side of the screen.

If a debt is found, a red-colored box appears at the top of the screen. Click on that box and details of the debt will be shown.

Click this link to view the Current Debt screen.

In some cases the payment summary may be missing or incomplete. The user will have the opportunity to complete these entries after selecting Begin Work Package.

The Work Package Confirmation screen allows the user to confirm that the data entered is correct, if not, the user can go back to the Debtor Selection screen and choose another claim number.

At the bottom of the screen, ORCS asks if this is a RRAILS RL-483 letter. This form letter is rarely used and it does not need any PAR action. If this form is selected, ORCS will by-pass the PAR information.

Select Begin Work Package. This will establish an ORCS record and the Work Package Preparation screen will appear.

Click this link to view the Work Package Preparation screen.

**NOTE:** Not all the entries below will be shown on the Work Package Preparation screen. It will depend on the type of letter that is created.

The Work Package Preparation screen provides the following information:

1. Overpayment Type (current pay, non-entitlement, zero annuity, etc)
2. Status History – Date and time for each status. 
   Click this link to see Status History.
   - PE – Pending Exam
• PA – Pending Auth

• P2 – Pending 2nd Auth (Any OP over the threshold amount. Currently, the retirement and survivor 2nd Auth threshold is $15,000.)

• PD – Pending DRD Review

• PG – Pending OIG

• PR – Pending Reminder Call-up

• CN – Cancelled

• CL – Closed, Action Completed (Letter and/or PAR Action)

3. Created – Date and time

4. Updated – Date and time

5. Mainframe Compare *– Date and time mainframe was compared.

6. Mainframe Update *– Date and time mainframe was updated. **NOTE:** If the date is different, ORCS will compare and update the mainframe. This assures that the most current data is being used.

7. Update Reminder – This feature is used when an examiner needs to set a date for completion of a case. ORCS allows a future date to be 90 days or less and will release a notification email to the examiner. Select a date and press “Update Reminder”. The status of the case will be Pending Reminder (PR). An examiner can work on a case in PR status but they cannot change the status until they remove the reminder date.

8. Change Status – Shows the type and status of a case.

9. View Events – Another way to view the status changes.

10. Reload Mainframe – When the Reload Mainframe button is pressed, the user is directing the ORCS program to check the mainframe data in PREH, ROC, SURPASS, PAR, etc. for any changes since the last time the user entered information for that claim number. **NOTE:** ORCS checks the mainframe once a day. If a change occurs in the same day, press “Reload Mainframe” to include any new updates. An Alert – Mainframe Automatic Update screen will appear when an update is made. Click this link to see Alert – Mainframe Automatic Update screen.

11. View and Add Remarks – Users can view or add remarks to a case. Click this link to see View and Add Remarks screen.
The **Benefit Information** screen will be prefilled with PREH data. This data cannot be modified by the user.

1. **New Actuarial Amt** – Actuarial amount will be shown, if applicable.

2. **Entitlement End Date** – Entitlement End Date will be shown, if applicable. In certain cases ORCS will ask for an entitlement end date. **Example:** Annuity is based on minor child and entitlement will end in less than 48 months. Enter the month and year the entitlement will end. This will allow ORCS to set recovery options based on the remaining months of entitlement. If a date is not entered, ORCS will not let the user proceed.

3. **Actuarial Table** – Actuarial Table information will be displayed, but will only be used when actuarial adjustment is offered.

The **Overpayment Information** screen will be prefilled with PREH data. This data cannot be modified by the user.

1. **OP Source** – Payment Summary, Manual or Undefined will be shown. If manual or undefined is entered, the authorizer is required to verify data entered.

2. **Pay Sum OP** – This is the overpayment found on the Payment Summary.

3. **Pay Sum Accrual** – This is the accrual found on the Payment Summary.

4. **Pay Sum Accrual on G-206** – This is the accrual amount shown on the G-206.

5. **G-206 Offset Amt** – This is the offset amount shown on the G-206.

7. **OP Amt for Letter** – This is the overpayment amount shown on the letter.

8. **OP Amt for PARS G-205** – This is the overpayment amount shown on the G-205.

9. **1856 OP Amt** – This is the overpayment amount shown on an 1856 letter.

10. **Penalty Amt** – This amount is assessed for annuitants who fail to notify the RRB about their earnings in a timely manner. This penalty can be assessed for all annuitants including those receiving disability annuities.

11. **Penalty Included** – Verify that the penalty amount was included in the Payment Summary, if not ORCS will include it in its calculation.

12. **OP Amt** – Total overpayment after penalty deduction.

13. **1856 Balance** – This is the projected balance of the overpayment in PARS. This amount will always need to be verified by the user for accuracy.
14. Action Out Amt – This amount represents all accruals applied to the current overpayment. This entry requires an action out code.

15. Net OP Amt – Net OP Amt will be pre-filled if an existing debt or a payment summary is completed.

16. Enter OP Amount – If no OP amount is shown, ORCS will prompt the user to establish an overpayment. Click this link to see the OP Amount screen.

17. Existing PWH – Pre-filled

18. Previous OP Amt – Pre-filled

19. PWH Start Date – Pre-filled

20. OP Letter Date – Pre-filled

21. OP Recovery Date – Pre-filled

23. Adjustments – Pre-filled

24. Accruals – Pre-filled

25. Months PWH – Pre-filled

26. Recovered Amount – Pre-filled

27. Remaining Amount – Pre-filled

28. 1856 – Choose “Yes”, to add the new debt to the existing debt.

29. Modify 1856 Entries

30. View Payment Summary – If a payment summary (ROC, SURPASS or ORCS version) has been established the user can view the screen.

31. Update Payment Summary – The user can make updates to the payment summary screen. The data will be recalculated through ORCS. See RCM 9.16.3 for payment summary instructions.

32. Edit Penalty Amount – User can edit the penalty amount.

33. Edit OM Amount – User can edit the O/M amount.

34. G-221 – When an overpayment is over the threshold amount, a prompt will ask if a G-221 is needed. Select “Yes” or “No”. If yes, the user will be prompted on the
PAR screen to complete the G-221.  
Click this link to view the Work Package G-221 screen.

35. Process PAR – Select this button to go to the PAR Action Preparation screen.

36. Letter Only No PAR – Select this button when only a letter needs to be processed.

37. Process Letter – Select this button to go to the Letter Preparation screen.

The PAR data must be completed first. ORCS will direct the user to the PAR Action Preparation screen. PAR instructions are found in RCM 9.16.2.

Select “Process Letter” button to continue.

The Letter Preparation screen provides the user with Work Package, Employee, Annuitant, and Letter information that has been retrieved from the mainframe. Each of these items can be seen by pressing the show/hide button on the left side of the screen.

Click this link to view the Letter Preparation screen.

The Letter Preparation screen appears only once. It primarily provides the user with the recovery options available and the letter selections. If the user selects the wrong recovery option or letter selection, the case must be deleted. Return to the Action Menu screen and reenter the case.

ORCS provides two types of letters:

1. ORCS OP letters – includes a list of commonly used code paragraphs and the option of adding custom paragraphs. The user can view the code paragraphs by number or category.

The Letter Edit screen allows the user to view all available paragraphs and assigned paragraphs by number or category. To view paragraphs by category, press the down arrow under Filter by Category. The drop down menu will allow the user to view all the categories. Click on a category and only those paragraphs will be shown.

Click this link to view the Letter Edit screen.

Paragraphs that are considered “required” will be labeled with an “R”. These paragraphs cannot be deleted or moved. Other assigned paragraphs, not labeled with an “R”, can be moved back to the available paragraphs column if not needed. Users can move any available paragraphs to the assigned paragraph column by selecting the paragraph and using the “>” key. Move an assigned paragraph back to the available paragraph column by selecting the paragraph and using the “<” key.
Custom paragraphs can be added to the assigned paragraph column. Click “Add Custom” button and a box will appear. Enter the custom paragraph in that box. There is a maximum of four custom paragraphs available for each letter. If a custom paragraph is not needed, use the “<” key to remove it.

Paragraphs can be moved within the assigned paragraph column. Select the paragraph and move the up or down buttons, located on the right, to the appropriate position. The user can preview the letter by selecting the Show/Hide letter button.

Inserts that are required in paragraphs have been labeled “U” for user and “S” for system. All inserts labeled “S” will be pre-filled by ORCS. All others will be completed by the user.

Paragraphs that require inserts will be shown under “Enter Insert Values”. The paragraph number, title and insert will be shown. The user will fill in the insert and then view the completed paragraph by pressing insert or format (FMT). To see the completed letter, press Show/Hide Letter. The letter is automatically saved.

2. **RRAILS OP letters** – includes 16 commonly used RRAILS letters with the option to add a custom paragraph. This enhancement allows the user to request RRAILS letters within the ORCS program.

The Letter Edit screen provides the user with all available RRAILS letters. Instructions on how to navigate through the letter edit screen are explained in Regular OP Letters, above.

Click this link to view the Letter Edit RRAILS screen.

Many of the RRAILS letters have variations to them that cannot be replicated in ORCS, so different versions were made to handle these situations. See the explanations below:

1. **RL31A** – Select ORCS RL31A and move to the Assigned Paragraphs column.

   With Rights – Select ORCS RL104.1 and RL104.2 and move to the Assigned Paragraphs column. Add a custom paragraph and move it under RL104.1. Enter the reason for the overpayment in the custom paragraph.

   Without Rights – Select ORCS RL104A.1 and RL104A.2 and move to the Assigned Paragraphs column. Add a custom paragraph and move it under RL104A.1. Enter the reason for the overpayment in the custom paragraph.

3. **RL140 Series** – ORCS RL140 consists of 4 letters:
RL140A – Attained Age 19

RL140B – Ceased FTS Attendance

RL140C – Changed Your Intent

RL140D – Completed Requirements

Select the appropriate letter and move to the Assigned Paragraphs column. Enter Insert Values.

4. RL166B Series – ORCS RL166B consists of 2 letters: Reinstate and Suspend.

Reinstate – Select RL166B1.a and RL166B1.b (Reinstate) and move to the Assigned Paragraphs column. Add a custom paragraph and move it under RL166B1.a. Enter the reason for the overpayment in the custom paragraph box.

Suspend – Select RL166B2.a and RL166B2.b (Suspend) and move to the Assigned Paragraphs column. Add a custom paragraph and move it under RL166B2.a. Enter the reason for the overpayment in the custom paragraph box. Enter Insert Values.

5. RL483 – Select ORCS RL483 and move to the Assigned Paragraphs column. Enter Insert Values.

6. RL484 – Select ORCS RL484 and move to the Assigned Paragraphs column. Enter Insert Values.

7. RL1855A – Select ORCS RL1855A and move to the Assigned Paragraphs column. Enter Insert Values.

8. RL1855B – Select ORCS RL1855B and move to the Assigned Paragraphs column. Enter Insert Values.

9. RL1855C – Select ORCS RL1855C and move to the Assigned Paragraphs column. Enter Insert Values.

10. RL8000 Series – ORCS RL8000 consists of 2 letters: Entitlement and Non-Entitlement.

Entitlement – Select RL8000A.1 and RL8000A.2 (Entitlement) and move to the Assigned Paragraphs column. Add a custom paragraph and move it under RL8000A.1. Enter the reason for the overpayment in the custom paragraph box. Enter Insert Values.

Non-Entitlement – Select RL8000B.1 and RL8000B.2 (Non-Entitlement) and move to the Assigned Paragraphs column. Add a custom paragraph and
move it under RL8000B.1. Enter the reason for the overpayment in the custom paragraph box. Enter Insert Values.

Select the Show/Hide button and preview the letter.

Select the appropriate ORCS letter option (Regular or RRAILS) and press Start Letter. The Letter Edit and Recovery Option screen will appear.

Click this link to view the Recovery Option screen.

The user is able to verify the recovery options available or request a G-422 to the Bureau of Actuary, if applicable. To hide this box, press Show/Hide Recovery Opt.

A G-422, Request for Actuarial Adjustment, is requested when the actuarial tables cannot be used to calculate an actuarial amount. ORCS will alert the user to print a G-422.

Click this link to view the Print G-422 screen.

Complete the Form G-422 and remit to the Bureau of Actuary. The case will return to PE status.

When the actuarial amount is received from the Actuary, click on the case and enter the amount, submit and a new Recovery Option screen will appear.

Click this link to view the Actuarial Adjustment screen.

Click this link to view the Recovery Option Actuarial Amount Results screen.

After completing the Letter Edit screen and any PAR action, go to the top right corner and select Status. The Change Status screen will appear.

Clink this link to see the Change Status screen.

The Change Status screen provides the following:

1. Status – Pre-filled
2. Start – Pre-filled (Date/Time)
3. End – Will be pre-filled with a date and time when case is completed.
4. Status By – Pre-filled with user name
5. Select Next Status – User entry – PA = Authorization; DL = Delete Case
6. Remarks – Enter Remarks if applicable.
7. Submit Status – Case will be sent to Authorization or Deleted
8. Cancel – Returns to the previous page.

When a case is ready for Authorization, select PA and press Submit Status. If a case needs to be deleted, select DL and press Submit Status. If a case is incomplete, the user can return to the Main Menu. This case will be shown as PE under Work Packages Assigned to You.

9.16.2 PAR (G-205/G-206) Instructions

The PAR Action Preparation screen can be accessed through the overpayment letter process or by selecting Prepare PAR Action Only from the Actions Menu.

A. Accessing PAR (G-205) Through the Letter Process

1. ESTABLISH – When establishing a new debt the user has the option to enter a G-205 and one G-206. Click this link to view the G-205 G-206 screen. Select “Process PAR” the PAR Action - Establish screen will appear. This screen includes the Work Package, Employee, Annuitant and PAR Action Information screens. Click on Show/Hide to view these screens. In cases where the overpayment is over the threshold and the case requires OIG handling, select “Create G-221”. Click this link to view the PAR Action G-221 screen.

Click this link to view the PAR Action – Establish screen.

The PAR Action Information screen consists of the following:

1. Bill Doc ID – Pre-filled
2. Action Code – Pre-filled
3. Bill Print Flag – Pre-filled
4. Transaction Type – Pre-filled
5. Waiver Flag – Pre-filled
6. Cash Receipt No – Pre-filled
7. Dunning Flag – Pre-filled
8. Text Type Code – Pre-filled
9. Counter – User selects from drop down menu.
12. Type Code – User selects from drop down menu.
13. ASTRO Code – User selects from drop down menu.
14. Gross OP Amount – Pre-filled
15. RR OP Amount – Enter OP amount
16. SUP OP Amount – Enter OP amount
17. Remarks – Enter Remarks, if applicable.
18. Save G-205 – Press this key to save G-205 data.
19. Preview G-205 – This allows the user to view the G-205. Scroll up and down to view the full screen. Press the “Close” button to return to the PAR Action – Establish screen.
20. Create G-221 – Press this key to create a G-221. Items 1-7 are prefilled. Complete the applicable items, submit and close. Click this link to view the PAR Action G-221 screen.
21. Preview G-221 – Allows the user to preview a completed G-221. Click this link to view the G-221 screen.
22. Delete G-221 – Press this key to delete a G-221.
23. Add G-206 – Press this key to access a G-206. Multiple G-206 can be entered. See below for G-206 instructions.

When the PAR Action is complete, go to the top right corner and select Letter. The Letter Preparation screen will appear.

2. **Modify** – When modifying an existing debt, the user has the option to enter a G-205 or a G-206. Select “Process PAR” the PAR Action Preparation – Modify screen will appear. This screen includes the Work Package, Employee, Annuitant and PAR Action Information screens. Click on Show/Hide to view these screens.

Click this link to view the PAR Action Preparation – Modify screen.

The PAR Action Information screen consists of the following:

1. Bill Doc ID – Pre-filled
2. Action Type – Pre-filled
3. Previous OP Amount – Pre-filled
4. Previous RR OP Amount – Pre-filled
5. Previous SUP OP Amount – Pre-filled
6. Action Out Code – User selects Action Out Codes only when decreasing the debt.
7. Adjusted OP Amount – Pre-filled
8. RR OP Amount – Enter OP amount, select increase or decrease
9. SUP OP Amount – Enter SUP OP amount, select increase or decrease
10. Remarks – Enter Remarks, if applicable.
11. Save G-205 – Press this key to save G-205 data.
12. Preview G-205 – This allows the user to view the G-205. Scroll up and down to view the full screen. Press the “Close” button to return to the PAR Action Preparation screen.

Click this link to view the View G-205 screen.

When the PAR Action is complete, go to the top right corner and select Letter. The Letter Preparation screen will appear.

B. Accessing Prepare PAR Only Action (G-205)

On the Actions Menu, select “Prepare PAR Action Only (G-205/G-206)”. The Debtor Selection screen will appear. Enter a claim number or SSN.

On the Debtor Selection screen the user has the option to:

1. **Select an Annuitant** – Review and press “Use PREH”.

   The Work Package Confirmation screen will appear. Review and select “Begin Work Package”. Confirm name and address. If an existing debt is found, the user can select the debt and press “Submit” or create a new debt by pressing “Cancel”.

   Click this link to view the Existing PAR Debt screen.

2. **Select Establish G-205 PAR Action, (Creates a PAR record for someone other than the annuitant(s) shown on the Debtor Selection screen.)** – follow prompts and then select “Begin”.

   Click this link to view the PAR Alternative Case Preparation screen.
The Work Package Preparation screen will appear. A prompt will alert the user if any entries are missing or incorrect. Select “Process PAR”.

The following prompts will appear:

Annuity Entitlement – Select Entitlement or Non-Entitlement to determine the correct Flags.

Click this link to view the Annuity Entitlement screen.

PARS Category – Select OIG Referral, Reclamation, Estate Handling or N/A. Your selection will be shown in the Remarks Section of the G-205.

Click this link to view the PARS Category screen.

The PAR Action Information screen consists of the following:

1. Bill Doc ID – Pre-filled
2. Action Code – Pre-filled
3. Bill Print Flag – Pre-filled
4. Transaction Type – Pre-filled
5. Waiver Flag – Pre-filled
6. Cash Receipt No – Pre-filled
7. Dunning Flag – Pre-filled
8. Text Type Code – Pre-filled
9. Counter – User selects from drop down menu.
10. Cause Code – User selects from drop down menu. Certain Non-Entitlement cause codes with text type require a payment summary because in these situations a mechanical letter is generated and will be released by DRD. Click this link to view the Non-Entitlement Cause codes screen.
12. Type Code – User selects from drop down menu.
13. OP Amount – Pre-filled
14. RR OP Amount – Enter OP amount.
15. **SUP OP Amount** – Enter SUP OP amount.

16. **Remarks** – Enter Remarks, if applicable.

17. **Save G-205** – Press this key to save G-205 data.

18. **Preview G-205** – This allows the user to view the G-205. Scroll up and down to view the full screen. Press the “Close” button to return to the PAR Action preparation screen.

   Click this link to view the Preview G-205 screen.

19. **Add G-206** – Press this key to access a G-206. Multiple G-206 can be entered. See below for G-206 instructions.

When the PAR Action is complete, go to the top right corner and select Status. Change the status to PA (Auth), CL (Close) or DL (Delete).

3. **Select an Existing Debt** – If an Existing Debt is shown on the Debtor Selection screen, click on the Bill Doc ID.

   Click this link to view the PAR Existing Debt screen.

   The Modify G-205 – Add G-206(s) screen will appear. Choose a check symbol, payee code and/or make a change to the annuitant’s SS number. Select a G-205 or a G-206.

   Click this link to view the Modify PAR screen.

   A consolidated Work Package Preparation screen will appear. Select “Process PAR “.

   Click this link to view the Work Package Preparation screen.

   Complete the PAR Action Preparation screen, go to the top right corner and select Status. Change the status to PA (Auth), CL (Close) or DL (Delete).

C. **Accessing PAR (G-206) Through the Letter Process**

A G-206 can be created through the letter process when the user is establishing a debt or from the Actions Menu, Prepare Overpayment letter.

1. **Letter Process** – Follow the G-205 instructions above. The user can request one G-206 to post an accrual, select “Prepare G-206”.

2. **Prepare PAR Action Only** – On the PAR Action Preparation screen, select “Prepare G-206”.

   Click here to view the View G-206 screen.
Instructions for the G-206 are as follows:

1. **Action** – Select from the following items: E – Initial Entry; M – Modify Increase; M – Modify Decrease; R – RECUR (Based on the selection, ORCS will determine the other fields to be completed.)

2. **Account Identification** – ORCS will pre-fill most items. The Cash Receipt DOC ID may be pre-filled. If not, ORCS will alert the user to enter that number.

3. **Transaction Type** – Select from the following items: AW (one time only); WO Waiver, Tolerance, Comp; CC Cash; NA Cancelled Payments.

4. **Payment Information** – Payment Amount – Amount filled in by user; Deposit Number – Pre-filled; Action Out Code – User can select from drop down menu.

5. **Withholding Action** – This section is used when RECUR has been selected. Select from: Start Full Withholding (date/amount); Start Partial Withholding (date/amount); Stop Withholding (date) and Withholding Action Completed (Full Recovery). Any withholding action requires a date and amount.

6. **Remarks** – Enter remarks, if applicable.

7. **Adjudication Section Sign Off** – Pre-filled.

8. **DRD Sign Off** – Pre-filled, if applicable.

9. **Submit G-206** – Press this button to enter the data to PAR.

10. **Cancel** – Press this button to cancel the data entered.

The PAR Action Preparation screen will show all the G-206 entries. The user will be able to view and edit each screen.

Click here to view the PAR Action screen.

When the PAR Action is complete, go to the top right corner and select Status. Change the status to PA (Auth), PD (DRD), CL (Close) or DL (Delete).

### 9.16.3 Payment Summary

The user will complete the payment summary on ROC or SURPASS. ORCS will retrieve the payment summary from the mainframe. If the user needs to make a change to the payment summary, it must be done on ROC or SURPASS. Once the change has been made, select the button “Reload Mainframe” from the Work Package Preparation screen. ORCS will retrieve the new data.
Click this link to view the Reload Mainframe screen.

If no payment summary was completed, the user will be allowed to create a payment summary within ORCS. Click the "Update Payment Summary" button on the Work Package Preparation screen. The Payment Summary Edit screen will appear.

Click this link to view the Payment Summary Screen.

A. ACCRUALS

1. Click the Accruals Calendar

2. Navigate to current month and year; click “<” arrow to go back a month or “>” arrow to go forward a month; to see all the months in the year, click on the month. To navigate to another year, click on the year. Clicking again on the year will show a 10 year period. The arrow keys can take the user 10 years in the past and future.

3. Select the appropriate Adjustment Effective Date.

4. Select the Accrued Through Date. Enter the amount of the monthly payment; navigate to the From Date.

5. Click calendar and select date.

6. Click “Insert”, the amount and date of the entry will be shown. If this information is incorrect, the user can delete the entry.

7. To add another accrual amount and date, follow the above instructions.

B. PREVIOUS

1. Click the Previous calendar.

2. Select the appropriate Previous Adjustment Effective Date.

3. Select the Accrued through Date.

4. Enter the amount of the monthly payment; navigate to the From Date.

5. Click calendar and select date.

6. Click “Insert”, the amount and date of the entry will be shown. If this information is incorrect, the user can delete the entry.

7. To add another previous amount and date, follow the above instructions.

C. ACCRUALS WITHHELD
1. Enter “Accrual Withheld” amount.
2. Enter a description.
3. Click calendar and select date.
4. Click “Insert”, the amount and date of the entry will be shown. If this information is incorrect, the user can delete the entry.
5. To add another accrual withheld amount and date, follow the above instructions.

D. OPO AMOUNTS

1. Enter “OPO Amount”.
2. Enter a description.
3. Click calendar and select date.
4. Click “Insert”, the amount and date of the entry will be shown. If this information is incorrect, the user can delete the entry.
5. To add another OPO amount, follow the above instructions.

E. PREVIEW

Select “Preview” to view the payment summary.

9.16.4 Authorize

When a user is assigned a case for authorization, go to the Actions Menu and select Authorize. Enter the RRB claim number and press “Search”, the Auth Assign screen will appear.

Click this link to see Authorize screen.

Place a check under “Chg Chk” and press Assign. Go the Main Menu and the case will be added to the user’s Work Assignments. Select the case and begin authorization.

Click this link to see Authorize Assign screen.

9.16.5 Authorization

From the Main Menu, under Work Package Assigned to You, search for cases Pending Auth (PA) status. Click the annuitant’s name to retrieve this case. The Work Package Review screen will appear. The tabs at the top of the screen allow the authorizer to review the following items:
Click this link to view Work Package Review screen.

1. Summary - Provides the Work Package, Employee, Annuitant, and Benefit Information.

2. Change Status – Provides the status of each case. Click this link to view the Auth Change Status screen.

3. Payment Summary – Provides the current payment summary for the case.

4. Status History – Provides the history of the case.

5. Remarks – Provides all remarks made for this case.

6. Events – Provides the event (chronological work package action of interest), name, date, and time for this case.

7. Letter – Provides a preview of the letter, including the enclosures and the paragraphs used. Click this link to view the Letter Review screen.

8. Recovery Options – Provides recovery options available.

9. PAR Action – Provides a preview of the G-205/G-206 and the G-221, if applicable. Click this link to view the Auth PAR Action screen.

After reviewing all the data, select the change status tab.

PE – The case needs to be returned. Enter comments and submit.
P2 – Second Auth
PD – DRD Handling
PG – OIG Handling
CL – The case is ready for upload, printing and imaging.

Click this link to view Auth Change Status screen.

After changing the status to CL, the letter and attachments will be automatically printed and imaged. ORCS will return the user to the main menu.

After the letter and necessary attachments have been printed, release the letter package to the Mailroom for delivery.

9.16.6 View My Cases

This screen allows users to view all their closed cases and pending authorization cases.

Click this link to View My Cases screen.

This screen allows the user to view the last 30 calendar days of cases. The user can change the date fields by using the calendar icons and then pressing Apply Dates.
This screen provides the following information:

1. Annuitant Name – Pre-filled.
2. Claim Number – Pre-filled.
3. Status – PA = Pending Auth; CL – Closed Case
4. Days to Close – The number of calendar days it took to close the case.
5. SSN – Pre-filled.
6. Type – CPS = Current Pay; Zero = Zero Annuity ; PAR-O = PAR Only; CAN-D = Cancel Delete; NON = Non-Entitlement
7. Status Date - Date entered into ORCS
8. Status By – Pre-filled.
9. Created – Date case created
10. Examiner Name – Pre-filled.
11. Auth 1 – Pre-filled.
12. Auth 2 – Pre-filled.
13. DRD – Pre-filled.
14. OIG – Pre-filled.
15. Reprint – Allows user to Reprint a closed letter and attachments.

9.16.7 Reports

ORCS provides a variety of reports. These reports are only available to the ORCS Administrator, Managers and Supervisors. Contact the ORCS Administrator if a new report is needed or changes to current reports are recommended.

9.16.8 UtilityTables

The Utility Tables contain pertinent data that is used by ORCS to process the overpayment letters. Utility Tables are maintained by the ORCS Administrator.

9.16.9 PAR LOOKUP – B2, B5, B8, UNC

The PAR LOOKUP screen allows the user to search for a PAR record (B2, B5, B8 and Uncollectible). The Search can be done by RRB claim number, Bill Doc ID or Bill Type
and Digit Range. The user can also Reactivate Uncollectible and Remove Charges from this screen.

Click this link to view the PAR Lookup screen.

Enter a claim number, press Search. All data pertaining to that number will be shown.

Click this link to view the PAR Lookup Result screen.

This screen provides the following information:

1. Source – PAR or UNCL will be pre-filled.
2. Prefix – Prefilled.
3. Claim Number – Pre-filled.
4. Counter – Pre-filled.
5. BillDocID – Pre-filled.
6. Debt Total – Pre-filled.
7. Charges – Pre-filled, if appropriate.
8. Name – Pre-filled.

A. Reactivate Uncollectible (UNCL)

When an accrual is found for an uncollectible debt, enter the claim number on the PAR LookUp screen and click on the highlighted UNCL under the Source Code. The Request to Reactivate UNCL Debt screen will appear.

Click this link to view the Request to Reactivate UNCL Debt screen.

Enter the name, address, city, state and zip code of the claimant. Check the box if entering a foreign address. Enter the accrual amount and Remarks. Submit the request and an email will be sent to the DRD, ORCS mailboxes and to the remitter. When DRD action is complete, the user will be notified by email. Take appropriate PAR action to complete the case.

Click this link to view UNCL Email.

B. Remove Charges

If charges are included in the debt, the source PAR will be highlighted, click on PAR. The Request to Remove Charges screen will appear.

Click this link to view the Request to Remove Charges screen.
Enter the accrual amount and Remarks. Submit the request and an email will be sent to the DRD and ORCS mailboxes and to the remitter. When DRD action is complete, the user will be notified by email. Take appropriate PAR action to complete the case.

Click this link to view Remove Charges Email.

DRD will release an email to the remitter, DRD and ORCS mailboxes when action is completed.

9.16.10 Library

The Library consists of all the RRA code paragraphs, RRAILS, and DRD letters. It also holds future RUIA and Medicare Letters. The Library is maintained by the ORCS Administrator.

9.16.11 Management Utilities

Management Utilities are maintained by the ORCS Administrator.

Managers have access to the following Utilities:

1. **Assign Work** – This screen allows the managers to select the division, subunit, view the cases in the division and subunit.

   Click this link to view the Assign Work screen.

   Select the Assignee – The drop down menu provides a list of examiners available. Select an examiner. Check the box next to the case you are assigning. Press “Assign Checked Cases”. The case(s) will be sent to that examiner.

   Click this link to view the Select Assignee screen.

2. **OIG Case Return** – Managers can check the status of an OIG case by using this menu selection. It will provide the OIG determination and what action should be taken. Click this link to view the OIG Case Return screen.

3. **Reassign Work** – This option is available for managers to reassign work. Select division and current assignee.

   Click this link to view the Reassign Work screen.

   Select the subunit and new assignee. Place a check mark next to the case(s) to be reassigned.

   Click this link to view the New Assignee screen,
Click the box “Reassigned Checked Cases”. The cases will be sent to the new assignee.

Click this link to view the Reassignment screen.

9.16.12 MISC

The Misc screen brings the user to the Self-Maintenance screen. This screen allows the user to make any changes in their own profile. This was explained in RCM 9.16.1.

9.16.13 1856 Paragraph

In cases where an overpayment is being recovered by partial withholding and the annuitant incurs another overpayment, ORCS will provide an option to include the 1856 paragraph in the overpayment letter. This paragraph provides details of the previous overpayment.

The 1856 paragraph details will be found on the Work Package Confirmation screen. The user will have the option to include this paragraph by selecting “Yes” or “No”.

Click this link to view 1856 Entries screen.

Click this link to view the Package Confirmation 1856 screen.

The Work Package Preparation screen will show the 1856 paragraph information. It will also allow the user to modify the 1856 amount and the partial withholding start date. This is also where adjustments and accruals can be added.

Click this link to view the Modify 1856 screen.

Click this link to view the Package Preparation 1856 screen.

On the PAR Action Preparation screen, enter the RR or SUP overpayment amount and indicate increase or decrease. If decrease is selected an action out code is necessary.

The Letter Edit screen will notate that the 1856 paragraph was included.

Click this link to view the 1856 Letter Edit screen.

To view the completed letter, select show/hide letter. Insert paragraphs will follow 1856 paragraph.

Click this link to view Sample 1856 Paragraph screen.

When the PAR Action is complete, go to the top right corner and select Status. Change the status to PA (Auth) or DL (Delete).
9.16.14 10A Letter

A 10A letter is used when a debt needs to be collected from another individual receiving a benefit on the same RRB claim number. (Example: Collecting the employee’s overpayment from a spouse accrual.) Begin by entering a claim number and select the appropriate annuitant from the Debtor Selection screen. Select “debtor choice” and press “PREH”. (ROC and SURPASS cannot be selected when 10A is chosen.) Select the correct existing debt and then press “Make 10A Letter”. A screen will appear requesting the debtor’s name and gender (male or female). Select “Submit 10A Letter”.

Click this link to view Section 10A Letter screen.

Continue through the letter process. On the Work Package Preparation screen select the appropriate billing document ID and press “Process Letter”.

The Letter Preparation screen will verify that a 10A letter is being processed. Select Regular or RRAILS letter, and Start Letter.

Add any custom or code paragraphs. Press “Show/Hide Letter” to view the 10A letter. No PAR action is needed. Select “Change Status”. The user can send the letter to auth, delete or return to the Main Menu if the case is incomplete.

9.16.15 OIG Handling

Overpayments that are over the threshold amount and with a possibility of fraud require Office of Inspector General (OIG) Handling.

After the letter and PAR action is completed, the authorizer will review and close the case. An OIG package will be produced (includes a draft of the overpayment letter, factsheets (OIG and PEMS) and G-221) and will be printed. The authorizer will release the printed package to OIG following established procedures. The PAR and ASTRO file will be uploaded later that day.

After the OIG makes their determination, they will notify RBD/SBD via email. The managers will be able to follow the status via Management Utilities – OIG Case Return. After receipt of the OIG’s determination, the manager will change the status to Pending Exam (PE). The examiner will review the case and send to Pending Auth (PA). The authorizer will review and then close the case. The letter and necessary attachments will be printed and automatically sent to imaging. The authorizer will release the letter and necessary attachments to the Mailroom.

9.16.16 PAR Non-Entitlement Handling

Operations (RBD or SBD) prepare non-entitlement PAR action cases that are submitted to DRD for handling.
The PAR cause code will determine the type of mechanical letter for Operations to release to DRD. When the authorizer changes the status, the PD (pending DRD review) code will be shown. The PAR file will be uploaded. DRD will review the case on the Work Package Review screen. If acceptable, DRD will change the status to closed (CL). The mechanical letter and necessary attachments will be printed and released by DRD. The letter and attachments will be sent to Imaging. However, if DRD notices an error in the case, it will be returned to pending exam (PE). The work package will not be complete until DRD changes the status to CL.

Click this link to view the DRD Change Status screen.

**9.16.17 DRD Processing**

**Accessing ORCS**

See RCM 9.16.1.

Click this link to view the DRD Main Menu screen.

**Actions Menu**

The following functions are available to DRD:

1. Prepare Overpayment Letter
2. View My Cases
3. Recall Case from Closed or OIG Status

Click this link to view the DRD Actions Menu.

**Prepare Overpayment Letter**

Select Prepare New Overpayment Letter from Actions Menu. The DRD Debtor Selection screen will appear.

**NOTE:** DRD requires an existing debt. If ORCS does not find an existing debt, it will alert the user. Return to the Debtor Selection screen and enter a new claim number.

Enter a RRB claim number or SSN. When submitted, ORCS will retrieve the data from the mainframe. It may take a few seconds to retrieve this data. ORCS will provide the annuitant history under that number.

**NOTE:** If an RRB claim number is entered, ORCS will upload all annuitants associated with that number. If an incorrect annuitant or the wrong RRB claim number was selected, go back to the top of the debtor selection screen and select a new annuitant or claim number.
ORCS alerts the user if an existing case matching the entered SSN or RRB claim number is found. If so, check with the user before continuing so no duplicate case is created.

Click this link to view the DRD Debtor Selection screen.

ORCS will retrieve the mainframe data. Select “Use PREH” to continue.

Click this link to view the DRD PREH screen.

The DRD Work Package Confirmation screen will appear. The user will be asked to confirm the annuitant’s name and address. This is required because there can be some inconsistencies in the parsing of the name and address when retrieving data from the mainframe. Corrections can be made directly on the confirmation screens. Also, modifications can be made to the name and address on the DRD Work Package Preparation screen, under Employee Information and Annuitant Information.

Click this link to view the Confirm Name screen.

Click this link to view the Confirm Address screen.

The PAR table is uploaded each day with current data. ORCS will show all existing debts, a window will appear asking which debt to be selected. The debt selected will show the previous billing document number.

Click this link to view the DRD Existing PAR Debt screen.

After selecting the appropriate existing debt, press “Submit”. This will bring the user to the DRD Work Package Confirmation screen. If “Cancel” is selected, the user will cancel the entire work package and return to the Main Menu.

Click this link to view the DRD Work Package Confirmation screen.

The DRD Work Package Confirmation screen provides the user with the Employee, Annuitant and Benefit Information that has been retrieved from the mainframe. Each of these items can be opened or closed by pressing the show/ hide buttons on the left side of the screen.

This screen allows the user to confirm that the data entered was correct, if not, the user can go back to the DRD Debtor Selection screen and choose another claim number. Once the Begin Work Package is selected an ORCS record will be established and the DRD Work Package Preparation screen will appear.

Click this link to view the DRD Work Package Preparation screen.

The user has the option to select a different Bill Doc ID. The drop down menu will show all the Bill Doc ID’s available for the case.
After reviewing the DRD Work Package Preparation screen select “Process Letter”.

**NOTE:** DRD only has the option to use the Process Letter feature.

The **DRD Letter Preparation** screen provides the user with Work Package, Employee, Annuitant, and Letter information that has been retrieved from the mainframe. Each of these items can be seen by pressing the show/hide button on the left side of the screen.

Click this link to view the DRD Letter Preparation screen.

The Letter Preparation screen appears only **once**. It primarily provides the user with letter information and the recovery option available. After reviewing the screen, press **Start Letter**. The DRD Letter Edit screen will appear.

The DRD Letter Edit screen provides the DRD user to view all available DRD paragraphs.

Click this link to view the DRD Letter Edit screen.

DRD users can move any available paragraphs to the assigned paragraph column by selecting the paragraph and using the “>” key. Move an assigned paragraph back to the available paragraph column by selecting the paragraph and using the “<” key.

Custom paragraphs are **not** available to the DRD user.

To preview a paragraph, highlight the appropriate available paragraph and select the “Preview” button. Select “Preview” again to close the window.

After selecting the assigned paragraph, click on “Show/Hide Letter”. This will allow the user to view the letter. Click “Show/Hide Letter” again to close window.

When the letter is complete, go to the top right corner and select Status. The **Change Status** screen will appear.

Click this link to view the Change Status screen.

DRD options are close (CL) or delete (DL). Select “Submit Status”. This will activate the Print Download screen. The DRD user will release the letter and attachments.

If a case is incomplete, select “Cancel”. The user will return to the letter edit screen. Select Main Menu and the case will be shown as PE under Work Packages Assigned to You.

**DRD Manual Handling of Operations Referrals**

DRD receives cases from Operations (RBD and SBD) that need special handling for charges. A G-205 will be completed using a non-entitlement cause code.

Click this link to view the DRD G-205 screen.
The cause code determines which mechanical letter will be produced. The DRD authorizer will upload PAR and ASTRO and send the case to PD (Pending DRD) for completion.

Click this link to view the Non-Entitlement Cause Codes screen.

The cases are sent to an Assign File for release by the DRD manager or leads.

Click this link to view the DRD Assign Work screen.

The DRD manager or lead will select the assignee, check the box(s) and then press “Assign Checked Cases.

Click this link to view the DRD Assignment screen.

The DRD user will find the assigned cases on the Main Menu. Select a case and ORCS will display the DRD Work Package Review screen.

Click this link to view the DRD Work Package Review screen.

The user will review the action taken (PAR, Mechanical Letter and Payment Summary). If acceptable, the user will go to the Change Status screen and change the status to CL (Closed). The letter and attachments will be printed and imaged. DRD will be responsible for releasing the package to the Mailroom. If the user notices an error in the case, return to the change status screen and select PE (pending exam). The case will be returned to Operations. The work package will not be complete until DRD changes the status to CL.
12.1 On-Line Disability Decision Sheet (OLDDS)

12.1.1 Introduction to On-Line Disability Decision Sheets

The On-Line Disability Decision Sheets (OLDDS) allow examiners to enter disability data via a desk-top terminal into mainframe systems and also retains information in the database indefinitely for easier access. This system pre-fills information from other database systems and also contains edits for basic content accuracy. These features will cut down on errors and shorten processing times.

12.1.2 Accessing OLDDS

A. General

To create a record on OLDDS, the main menu should be accessed and completed as described in this section. Once the menu is completed and the proper form selected, the appropriate items should be completed on the screen and hit PF2 to create a record. To add or change any entry on an unprotected field, the data can be typed over and then hit PF3 to modify the entry. To delete a record hit PF4. To page forward use PF8 and page back use PF7. To return to the OLDDS main menu hit clear or PA1. To leave OLDDS completely hit ATTN.

To browse a record on OLDDS, the main menu should be accessed and completed as described in the DCM. Once the form is completed and the proper form is selected, the latest record completed will be displayed. To view the next record hit PF12. To view the prior record hit PF11. To page forward use PF 8 and to page back use PF7. To return to the OLDDS main menu hit clear or PA1. To leave OLDDS completely hit ATTN.

Once a disability rating is completed, a print-out of OLDDS screens should be used as folder records of the disability decisions under the RR Act and disability decisions under the SS Act needed for disability freeze, vested dual benefits, PIA computations, O/M inclusion and Medicare purposes.

B. Sign-On to OLDDS

To access OLDDS sign on the Terminal Productivity Executive (TPX) system in the normal manner. From the TPX menu, move the cursor next to the Railroad Automated Processing Integrated Database (RRAPID) and press enter. Once on the RRAPID menu select option '32'. This brings the OLDDS main menu on the screen.
12.1.3 Completing The Main Menu Screen

By entering the employee’s prefix and SSA number, the OLDD’s user will be able to either create a new record or select a record to browse.

To complete the Main Menu Screen make the following entries:

Prefix - Enter the appropriate prefix in the proper space provided.

SSA No. - Next enter the employee’s SSA number for the claim. If there is no SSA number for the employee and the claim has a 6 digit RRB number enter zeros in the first three spaces. If the employee has a SSA number and the RRB number is a six digit number, then enter the SSA number in this space and enter the six digit number on the first page of the Disability Decision Sheet.

After completing the above information hit, ‘ENTER’.

The screen will list any record that has been previously entered on OLDDS under the claim number entered (up to a maximum of ten records). The list will display the following data:

- Claimant’s name (See Note)
- Birth year
- Twin code
- Type of record (G-325, G-325a or G-831)
- Activity type (pending or released).

Note: The claimant’s name will reflect the information that is entered on the Disability Decision sheet. For employees, this will be the first initial and first four characters of the last name. The claimant name for widows and children will reflect the widow or child’s name. The claimant name for the G-831 record will appear as “Employee”.

All pending cases will be listed first, followed by all released cases from most recent to oldest.

Access a record by placing an ‘X’ before the claimant’s name. If the activity type for the case selected is PENDING the record can be modified. If the activity type for the case selected is RELEASED, you will only be able to browse the record.

The user can browse records by returning to the Main Menu Screen or by accessing a record type and browsing that record type by using the PF-11 and PF-12 keys.
Creating a New Record

To create a new record, move the cursor to the record type fields (G-325, G-325a or G-831) found at the bottom of the screen. Select the type of record to be created by placing an ‘X’ in front of the record type and hit ‘ENTER’.

Two fields will appear on the screen:

- **DOB**
- **Twin Code**

**DOB Field** - Enter the claimant’s date of birth. After the birth year field is completed the cursor will move to another **Twin Code** field.

**Twin Code Field** - No entry is required for this field unless there are records being created for claimants with the same birth year (i.e., twins, triplets, etc.). If the user is creating a record for people with the same birth year, the twin code field can be properly completed by entering a number from 1 through 9. OLDDS automatically defaults to a twin code of zero.

12.1.4 Screen G-325, Disability Decision Sheet

This screen is completed by disability examiners and hearings officers in the Bureau of Hearings and Appeals. After completing the OLDDS main menu screen and selecting the G-325, the first page of the G-325 will come up on the screen. If the claim is currently on APPLE, available information will be pre-filled on this screen. Be sure to verify that pre-filled information is correct and/or has not changed.

The first page of the G-325 screen can be completed as soon as an examiner receives a claim for a disability decision. Once the first page of the G-325 is completed hit PF2 to create a record on OLDDS. The examiner name and number are protected fields and are automatically assigned to a claim based on the examiner's sign-on. When a claim is reassigned to another examiner, the examiner number will change based on the new examiner's sign-on as long as the case has not been submitted (i.e., a "Y" entered in the SUBMITTED field and PF-3 being hit). Once a claim has been submitted, the examiner name and number cannot be changed.

When any entries are made on page 2 and/or 3, but the claim is not ready for review enter a 'N' next to submitted on that page.

Complete a G-325 screen for a disability rating as follows:

- **Employee** - When the employee files an application for a disability annuity, a disability freeze or early Medicare coverage or a survivor file for a disability freeze after the employee’s death.
- **Spouse** - Request a disability rating for a child when the spouse files an application based on a disabled child "in care."

- **Child** - An application is filed to include a disabled child for inclusion under the O/M, for a survivor annuity or early Medicare coverage.

- **Widow(er), Remarried Widow(er) or Surviving Divorced Spouse** - An application is filed for a disability annuity and/or early Medicare coverage for a widow(er) remarried widow(er) or surviving divorced spouse.

Examiner entries are as follows:

### Page 1

<table>
<thead>
<tr>
<th>ITEM</th>
<th>FIELD NAME</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>1A</td>
<td>SSA Number</td>
<td>If the SSA number was entered on the main menu, it will be pre-filled and is a protected field. If a correction is necessary it must be made from the main menu. If a record has not been created, hit clear to return to the main menu and enter the corrected SSA number. If a record has been created, delete the record by hitting PF4 and clear then re-enter the correct number on the main menu.</td>
</tr>
</tbody>
</table>
| 1B   | RRB Number | If the RRB number was entered on the main menu, it will be pre-filled and is a protected field. If a six digit claim number is used and the employee has a SSA number, the SSA number should be entered on the main menu and the six digit number entered in this item. If there is no six digit RRB number, leave this item blank.  

The RRB number is a protected field and, if incorrect, it must be corrected on the main menu. If no record has been created on OLDDS, hit clear and enter the correct RRB number on the main menu. If a record has been created, delete the record using PF4 and correct the RRB number on the main menu. |
| 2    | Type Claim | Enter the number in accordance with the type of disability rating required. Choose from the following:  

0 When an age and service annuitant is filing an application for early Medicare based on a disability. |
1. For a child's disability rating to qualify a spouse for an annuity based on the disabled child in her care.

2. Employee disability annuity or disability freeze determination.

3. Widow(er), remarried widow(er) or surviving divorced spouse under age 60 or widow(er), remarried widow(er) or surviving divorced spouse between age 60-65 filing for early Medicare.

4. Surviving child filing for an annuity based on disability which began before age 22.

5. Disability freeze filed after the employee's death.

6. Child of a living employee for inclusion under the O/M and for Medicare entitlement.

<td></td>
<td>Enter one of the following:</td>
</tr>
<tr>
<td></td>
<td>1. For a disability decision under the Railroad Retirement Act only (page 2 to be complete).</td>
</tr>
<tr>
<td></td>
<td>2. For a disability decision under The Social Security Act only (page 3 to be completed).</td>
</tr>
<tr>
<td></td>
<td>3. For a disability decision under both The Railroad Retirement Act and Social Security Act (pages 2 and 3 are to be completed).</td>
</tr>
<tr>
<td>5A</td>
<td>Annuity Filing Date</td>
</tr>
<tr>
<td></td>
<td>Complete the official filing date of the application for an annuity in this space. This also applies when an application for a disability annuity is filed after the</td>
</tr>
</tbody>
</table>
|   |   | applicant is paid a reduced age and service annuity. Enter the filing date of the application for the reduced age and service annuity in such cases.
|   |   | This item may be pre-filled, verify the correct date is completed.
|   |   | There is a space after the century and year to put an "*". If any unusual situation involving the annuity filing date exists, enter the "*" and explain in the remarks section (e.g. protected filing date.).
| 5B | DF Filing Date | Enter the date the AA-1d was filed or the date on which the RRB received a letter or other document evidencing the applicant's intention to apply or reapply for a disability freeze. There is a space after the century and year to put an "*". If any unusual situation involving the DF Filing Date exists, enter the "*" and explain in the remarks section.
| 6A | Birth Year | This item is completed on the OLDDS main menu, is pre-filled on the screen and is a protected field. If the birth year is incorrect and a record has not been created yet, hit clear and re-enter the correct birth year on the main menu. If a record has been created on OLDDS, delete the record using PF4 and re-enter on the main menu.
| 6B | Age | Enter the applicant's attained age in years on his birthday just prior to the official filing date of his application.

**NOTE:** There are two exceptions for this entry. If an employee is qualified for an occupational disability, but will be rated as totally and permanently disability prior to being qualified as occupational, enter the employee's age on the total and permanent onset date. For example, if a claimant is age 60 on his filing date, with 120 to 239 service months, and a current connection, but met the listing of impairments when he was age 58, then item 6B should be age 58.

The other exception to this entry occurs when an employee is under age 60 at the time of filing, but has since attained age 60 and is being rated for an occupational disability. The examiner should enter age 60 in these cases.
### OCC
If the disability decision is for the employee this item must be completed, otherwise leave blank. Enter the employee's last regular railroad occupation only. To determine the last regular railroad occupation; refer to DCM 3.2.2(A).

### Ver S/M
Enter the number of verified service months in this item. Do not enter a lead zero in this item when less than 100 service months are being entered. Leave blank if rating is for anyone other than employee.

### C/C
Determine the current connection according to FOM1 225. Then enter a 'Y' if the employee has a current connection or a 'N' if not. If the rating is for anyone other than the employee, leave blank.

### Family Group
In any RR Act, Section 2a(1)(iv) case, enter the family group number. For claims filed before 1-1-98, refer to the Provisional Occupational Disability Rating Schedule (PODRS) to determine this number. For claims filed 1-1-98 or later, enter the appropriate letter for employee's occupation in the Tables. The appropriate letters are as follows:

<table>
<thead>
<tr>
<th>Letter</th>
<th>Occupation</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Trainman</td>
</tr>
<tr>
<td>B</td>
<td>Locomotive Engineer</td>
</tr>
<tr>
<td>C</td>

<td>Complete when the employee has eligibility based on total and permanent disability. Enter '3' if the rating is not disabled or '4' if the rating is an allowance, in the first position. If the employee is disabled, enter the actual onset date in month/day/century/year order in the appropriate spaces.</td>
</tr>
<tr>
<td><strong>19</strong></td>
<td>Widow</td>
<td>Complete when disability is claimed by widow(er), remarried widow(er), or surviving divorced spouse. If the claimant is not disabled or the onset is not in the prescribed period, enter a '1' in the first position. If the claimant is disabled enter a '2' in the first position and enter the actual onset date in month/day/century/year order in the appropriate space.</td>
</tr>
</tbody>
</table>
| **20** | Child | Complete when disability is claimed by a child. If the child is not disabled or not disabled before age 22, enter '1' in the first position. If the child is disabled before age 22 enter a '2' in the first position and enter the actual beginning date in month/day/century/year order in the appropriate space.  

**NOTE:** In cases where a child becomes re-entitled based on the “disincentive to return to work” the examiner should complete OLDDS with the date the child becomes re-entitled as the onset date. In addition, the examiner should make the following entry in the Remarks section on page 1, “Disabled Child Disincentive to RTW Case”. |
| **21** | Rep Payee | Leave this item blank, unless the applicant has a representative payee. If the applicant has a rep payee, complete as follows:  

0 = No rep payee (the system automatically assumes this answer, leaving the field blank is the same as entering a “0”).  
1 = Court appointed rep payee  
2 = Board appointed rep payee |
### RRB Status Code

- **Enter '0'** if no rating has previously been made based on this application.
- **Enter '1'** if the application was previously denied and, based on new medical evidence or re-evaluation of the old evidence, the application is now being rated disabled.
- **Enter '2'** when a rating is being made in any situation not covered above. Explain why the code '2' is entered (e.g. earlier onset date).

### Disability Exclusion Code

No examiner entry required on decisions rated on D-brief. All initial cases (including DAC conversion cases) not rated on D-brief and meeting any of the exclusion circumstances requires a numeric code to be entered. See D-brief instructions DCM 12.5.6.7 Examiner Decision, G325B, and Disability Exclusion Code, and OLDDS Button and Self Authorization for the appropriate circumstances and codes.

---

If only the Railroad Retirement Act screen (page 2) is to be completed, then go to the Disposition section and follow those instructions. If the Social Security Act (page 3) is to be completed, then hit PF8.

**Page 3 - SOCIAL SECURITY ACT**

</table>

| 28 | Status Code | Enter '1' if a disability decision under the SS Act provisions has not been previously made for applicant. |
|    |            | Enter '2' if the initial SS Act decision is revised upon reconsideration. |
|    |            | Enter '4' if a new freeze application is filed (or deemed filed), and a subsequent DF decision is made after a previous denial or termination of a disability freeze period for single freeze cases. |
|    |            | Enter '7' if DPS has previously granted a disability freeze and is now giving an earlier onset date because of previously unavailable medical evidence, or if SSA grants a freeze after DPS has granted a freeze unilaterally. |
DISPOSITION

When an examiner completes the disability rating, a 'Y' should be entered next to submitted, hit PF3 to modify, and a copy of all completed pages need to be printed out. The examiner should file these pages on the left side of the folder and sign the pages next to their examiner number. The file should then be logged to AFCS sublocation TORE and placed in the review tub.

When the reviewer is assigned the case, the review date will pre-fill when the case is accessed. The reviewer should enter a 'y' next to accepted and hit PF3 if they approve of the rating. This action will release the record to the appropriate databases. The reviewer should sign and date the file copy the examiner has in file.

If the reviewer disagrees with any aspect of the claim the case is to be returned to the examiner for correction. When the reviewer is satisfied with the claim, the correct date and 'Y' should be entered and hit PF3. If the reviewer approves the case on a date different from the pre-fill date, the authorizer can change the review date.

When the first position in item 24 contains a 4 or 6 or if the Bureau of Hearings and Appeals or the Board reverses a decision the screens are completed the same. However, since these cases do not require review by another examiner, the person completing the G-325 should enter the 'y' for submitted, the correct date and 'y' for accepted and hit PF3. A signed printout of all rating screens should be filed on the left side of the folder.

12.1.5 Screen G-325A, Determination Of Continuance/Cessation Of Disability Decision

This screen is used to record determinations of continuance or cessation of disability. When termination is being proposed for a claim, due process must be served. Termination cases are entered on OLDDS and the authorizer puts an “N” in the accepted field. After due process is over the authorizer will change the “N” to a “Y”.

<td>Enter a 'Y' (yes) if the medical review indicates a recovery. Otherwise enter a 'N' (no). No entry is required if type of review (Item 14) is '2'.</td>
</tr>
<tr>
<td>21</td>
<td>Disability Continued/ Ceased</td>
<td>'X' the appropriate selection(s) to the left of the determination shown and enter the month, century and year the decision is effective when appropriate.</td>
</tr>
</tbody>
</table>

**A - Continues** - Check this if the beneficiary is still disabled

**B - Ceased** - Check this if the disability ceased and enter the month, century and year of cessation.

**C - Disability Annuity Terminated at the Close of the Last Day of** - Check this and enter the month, century and year to indicate the month of the annuity termination. The month of termination is the second month after the month in which cessation occurs. (e.g. ceased in 12/94 terminated 02/95).

**D - Reentitlement Period Applies From** - Check this to indicate the beginning of the month of a reentitlement period. The reentitlement period begins with the first of the month immediately following completion of the 9th month of trial work.

**E - Reinstatement Allowed** - Check this and enter the month, century and year a reinstatement is allowed during the reentitlement period. The reinstatement allowed month is the month that SGA ceased during the reentitlement period.

**F - Suspended After Reinstatement** - Check this if the annuity is suspended after reinstatement during the
If only the Railroad Retirement Act screen (page 2) is to be completed, then go to the Disposition section and follow those instructions. If the Social Security Act (page 3) is to be completed then hit PF8.

A. **Continues** - Check this if the beneficiary is still disabled.

NOTE: This item is not to be selected in CDR cases where a decision to continue the disability is reached at the reconsideration or H&A level that reverses a previous termination decision. Rather, the Reconsideration specialist or Hearings officer should select Reinstatement allowed (see E below) and enter the appropriate date. This will update the PREH record with the correct information. See [DCM 7.4.3.1](#) for detailed instructions.

</table>

**DISPOSITION**

When an examiner completes the CDR rating, a 'Y' should be entered next to submitted, hit PF3 to modify, and a copy of all completed pages needs to be printed out. The examiner should file these pages on the left side of the folder.
and sign the pages next to their examiner number. The file should then be logged to AFCS sub-location TORE and placed in the review tub.

In cases not involving a proposed termination, the reviewer should enter the date they are reviewing the case, enter a 'Y' next to ACCEPTED and hit PF3 if they approve of the rating. This action will release the record to the appropriate databases. The reviewer should sign and date the file copy the examiner has in file.

If the reviewer disagrees with any aspect of the claim, the case is to be returned to the examiner for correction. When the reviewer is satisfied with the claim, the correct date and 'Y' should be entered before hitting PF3.

In cases involving a proposed termination, the reviewer should sign and date the paper Form G-325a, release the termination letter and place the folder in dormant with a sixty-day call-up. If the annuitant does not request a reconsideration of the proposed termination, the examiner will then complete the OLDDS screens. The file should then be forwarded to the reviewer for approval. The reviewer will enter a 'Y' next to ACCEPTED and hit PF3 to submit the record to the database.

If the annuitant requests reconsideration of the proposed termination, the reconsideration specialist will make the appropriate entries on OLDDS.

12.1.6 Screen SSA-831, Disability Determination And Transmittal

This screen is completed by the disability examiners in DPS post section for joint freeze determination information. This screen is used to enter the freeze determinations that have been certified by GLPSC on form SSA-831.

NOTE: When a claim for widow(er)s or children is part of the financial interchange, the disability determination must be coordinated with GLPSC. The claim is handled as any joint freeze with the disability rating being signed off by GLPSC on a SSA-831. However, this form will not update the widow(er)s or children disability records. Therefore, do not enter widow(er)s or children disability information using the SSA-831 screen on OLDDS. When the completed disability determination comes back from GLPSC on the signed SSA-831, enter the disability decision information by using OLDDS screens for the G-325. This will ensure that the correct records are updated.

Entries are as follows:

<table>
<thead>
<tr>
<th>ITEM</th>
<th>FIELD NAME</th>
<th>ENTRY</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Employee SSA</td>
<td>If the SSA number was entered on the main menu, it will be prefilled and is a protected field. If a correction</td>

</tr>
<tr>
<td>1</td>
<td>is necessary it must be made from the main menu. If a record has not been created, hit clear to return to the main menu and enter the correct SSA number. If a record has been created, delete the record by hitting PF4 and clear, then re-enter using the correct SSA number on the main menu.</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td><strong>RRB Number</strong></td>
<td>If a six digit RRB number was entered on the main menu, it will be prefilled and is a protected field. If a six digit claim number is used and the employee has a SSA number, the SSA number should be entered on the main menu and the six digit number in this item. If there is no six digit number, leave this blank. If the RRB number is incorrect and is a protected field, it must be corrected on the main menu. If no record has been created on OLDDS, hit clear and enter the correct RRB number on the main menu. If a record has been created, delete the record using PF4 and correct the RRB number on the main menu. If the RRB number is incorrect and is not a protected field, enter the correct number and hit PF3.</td>
</tr>
<tr>
<td>3</td>
<td><strong>Year of Birth</strong></td>
<td>This item is completed on the OLDDS main menu, is pre-filled on the screen and is a protected field. If the birth year is incorrect and a record has not been created, hit clear and reenter the correct birth year on the main menu. If a record has been created on OLDDS, delete the record using PF4 and reenter on the main menu.</td>
</tr>
<tr>
<td>4A</td>
<td><strong>Diagnostic Code</strong></td>
<td>Enter an appropriate diagnostic code as listed in DCM Ch. 3, Appendix B.</td>
</tr>
<tr>
<td>4B</td>
<td><strong>Diagnosis</strong></td>
<td>Enter the appropriate diagnosis.</td>
</tr>
<tr>
<td>5</td>
<td><strong>SSA Dis Code</strong></td>
<td>If the claimant is not disabled enter '0'. If the claimant is a disability allowance enter '1'.</td>
</tr>
<tr>
<td>6</td>
<td><strong>Actual Onset Date</strong></td>
<td>If the claimant is rated disabled, complete the actual disability onset date by entering the MM/DD/CCYY.</td>
</tr>
<tr>
<td>7</td>
<td><strong>Disability Onset Date</strong></td>
<td>If the claimant is rated disabled, enter the first full month/century/year of the disability onset.</td>
</tr>
<tr>
<td>8</td>
<td><strong>Cessation</strong></td>
<td>If the disability ceased, enter a '3' otherwise leave</td>
</tr>
<tr>
<td>Code</td>
<td>Cessation Date</td>
<td>Freeze Letter Code</td>
</tr>
<tr>
<td>------</td>
<td>----------------</td>
<td>-------------------</td>
</tr>
<tr>
<td>9</td>
<td>If item 8 contains '3' enter the month/century/year the decision is effective.</td>
<td>For freeze decisions enter codes as follows:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>210 If a freeze is allowed, enter in the Remarks section of OLDDS that no letter is released in cases when the freeze is allowed and a survivor filed the application;</td>
</tr>
<tr>
<td></td>
<td></td>
<td>212 If the freeze is denied for failure to meet the earnings requirement, even if there is Medicare allowance under section 7(d)(3);</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2131 If the freeze is denied for failure to meet the disability requirement because of lack of severity;</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2132 If the freeze is denied for failure to meet the disability requirement because the condition will not or has not lasted for 12 consecutive calendar months;</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2133 If the freeze is denied because the onset of disability is in or after the 5th month before age 65;</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2135 If the freeze is denied because the onset of disability occurred within 5 months of death.</td>
</tr>
<tr>
<td>10</td>
<td>Examiner</td>
<td>The examiner name and number is automatically assigned to a claim based on the examiner's signon and are protected fields. When the examiner completes the rating a “Y” should be entered next to SUBMITTED and PF2 hit. If the rating is not complete, enter &quot;N&quot; and hit PF2. This will hold the record in OLDDS until it is ready for release.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>When a signed off joint freeze decision is returned from GLPSC, the examiner enters the information from the form SSA-831, enters a “Y” next to SUBMITTED, and hits PF-2.</td>
</tr>
</tbody>
</table>
If the date the case is completed by the reviewer is different from the date on the SSA-831, the reviewer is to enter the date the SSA-831 is being accepted and enter a “Y” next to ACCEPTED and hit PF-2.

For certain categories of cases an examiner can complete the disability rating and accept the case. The examiner completes the disability rating as detailed above, but does not send the folder to TORE. The examiner will approve the rating by entering a “Y” next to ACCEPTED and hitting PF-3 to modify the record. When the reviewer is the same person as the examiner, an edit will appear after hitting PF-3, showing that the reviewer and examiner are the same. Pressing PF-3 again will allow the case to be reviewed.

When the decision is approved, a copy of this screen should be filed down on the left side of the folder.

EXHIBIT 7
12.2 Federal Financial System (FFS)

12.2.1 Federal Financial System (FFS)

The Railroad Retirement Board (RRB) first used the Federal Financial System (FFS) to secure medical examinations beginning May 2, 1994. FFS is a computer program used by all Federal agencies as a multi-purpose accounting system for the purchase and payment of goods and services. We have made extensive modifications to data input screens and certain FFS processes for convenient on-line entries to secure needed medical examinations.

12.2.2 FFS Access

Only authorized users are able to access FFS and utilize its various functions.

For ordering and paying for medical examinations the authorized users include:

- Disability Benefits Division (DBD) claims examiners (both initial and post),
- DBD Supervisors,
- DBD Senior Claims Examiners,
• DBD Operations and Claims Analyst,

• Reconsideration Examiners,

• Hearing and Appeals Officials, and

• Claims Representatives (ordering examinations only).

For scheduling and paying of consultative opinions made with DBD’s outside medical consultant the authorized users include:

• Disability Benefits Division (DBD) claims examiners (both initial and post),

• DBD Supervisors,

• DBD Senior Claims Examiners,

• DBD Operations and Claims Analyst

• Reconsideration Examiners, and

• Hearing and Appeals Officials,

• DBD Lead Clerk or DBD GS-4 Clerk (schedule consultative opinions only)

If you are one of the authorized users you may access the FFS system by:

Accessing the mainframe (screen with train logo),

• Type “TPX” and press ENTER.

• Enter your USERID and password and press ENTER twice

• Select FFS and press ENTER.

On the FFS FRONT END SCREEN enter "1" to select the REFERENCE TABLE START-UP SCREEN and press ENTER.

12.2.3 Reference Table Start-Up Screen

This screen allows you to enter the table to which you wish to access.

Type 'N' in the ACTION field and 'SUSF' in the table ID field and press ENTER.

NOTE: The SUSF screen allows you to create, modify, approve, or schedule a document.
12.2.4 SUSF Screen

After accessing the SUSF screen enter 'new' in the function field. Tab down to the TRAN field and enter the kind of document you wish to create (i.e., to schedule an exam enter ME). In the first column (01), enter your organization number in the organization (ORGN) field and enter the Doc-ID in the number field.

A. Document Number

The Document Number has 11 spaces and all must be filled in. **BE SURE TO CHECK THIS ENTRY FOR ACCURACY BEFORE PROCEEDING TO THE NEXT SCREEN.** Refer to Section 12.2.13 if an incorrect DOCUMENT NUMBER is entered.

B. Standard Guide for Document Number

The Document Number is a 9-digit claim number followed by two alpha codes. If the RRB claim number is not 9 digits, pre-fill using zeros. The 9-digit claim number does not include the prefix that distinguishes the type of RRB annuitant. Also, do not include the dash (-) between numbers of a social security number.

C. The First Alpha Code

This alpha code will reflect the month you are placing the order.

A = January  
B = February  
C = March  
D = April  
E = May  
F = June  
G = July  
H = August  
I = September  
J = October  
K = November  
L = December

D. The Second Alpha Code

This alpha code reflects the beneficiary type of the person being examined.

A = Employee  
B = Widow
C = Surviving child
D = Retirement child

NOTE: Whenever medical examinations are ordered after an initial order is processed, it is necessary to create a unique DOCUMENT NUMBER for each subsequent order. An explanation with examples is given in Section 12.2.12 under MULTIPLE DOCUMENT NUMBERS.

Press ENTER.

### 12.2.5 Medical Exam Order Screen

DO NOT PRESS ENTER UNTIL INSTRUCTED TO DO SO.

**DEL DATE**: Enter the date (MM DD YY) that the medical report is due in headquarters. Urgent requests are due in 19 workdays and standard requests are due in 25 workdays. Zero-fill when appropriate. For example, 05 09 94. Press the TAB key.

**ACTION**: Make no entry. Press the TAB key to move the cursor to the next item to be completed. The purpose of the ACTION field and its codes will be explained in Section 12.2.10.

**TYPE REQ**: Enter 01 if urgent or 02 if standard. A standard request is expected in 25 workdays, and an urgent request is expected in 19 workdays. Press TAB key.

**EE NAME**: Enter employee's FIRST NAME (11 spaces available)/SURNAME (19 spaces available). Use the TAB key to move the cursor to the SURNAME position if the first name is less than 11 spaces. Press TAB key.

**BENE NAME**: Enter the name of the beneficiary if other than the employee. FIRST NAME (11 spaces)/SURNAME (12 spaces). LEAVE BLANK if same as employee. Press TAB key.

**REASON CODE**: Enter the appropriate two-digit code identifying the reason for the examination and the type of beneficiary involved. See Section 12.2.14 for a list of these codes. Press TAB key.

**DESIGN UNIT**: Enter the unit that is to receive the medical report(s). Choose from the following: BDMO, BUSI, or BHA. Press TAB key.

**FO#**: Enter the 3-position code identifying the field office that services the area in which the examinee resides. Press TAB key.

**AUTHORIZED ORDERER**: Enter the LAST name of the authorized orderer of medical examinations. This is the name of the claims examiner, contact
representative, or H & A officer placing the order. This line only accommodates 15 spaces. **MAKE NO ENTRY IN TOTAL AMOUNT.** FFS completes this item after all entries are processed.

Move cursor to ACTION field by the pressing TAB key. Type t in ACTION field and **press the TAB key.**

The TEXT SCREEN will display for your use in furnishing required information about the examinee.

### 12.2.6 Text Screen

The TEXT SCREEN provides ten lines of text-writing for each screen. The first screen displayed is used for identifying information required by the company contracted to secure requested medical examinations. A formatted screen to enter this information is not available, so it is **VERY IMPORTANT** to strictly follow the instructions given for each line entry. Enter only the information specified for each line. If an entry does not apply, leave that line blank and use the TAB key to move the cursor to the next line to be completed.

**ACTION:** The cursor is positioned here upon access to this screen and the letter 'S' displays.

Press the **TAB key** to move the cursor to Line 01.

<p>| LINE 01 | Enter the examinee's area code and phone number. Use a dash (-) to separate the area code from the first three digits of the phone number and between the first three and last four digits of the phone number as follows: 123-456-7890. In rep-payee cases, enter the rep-payee's phone number. If no phone number exists, enter 999-999-9999. <strong>Press TAB key.</strong> |
| LINE 02 | Enter the examinee's street address only. The name of the city is entered on LINE 03. In rep-payee cases, enter the street address of the rep-payee. <strong>Press TAB key.</strong> |
| LINE 03 | Enter the examinee's city of residence only. In rep-payee cases, enter the rep-payee's city of residence. <strong>Press TAB key.</strong> |
| LINE 04 | Enter the two-letter abbreviation for the State in which the examinee resides. Leave one space after the State abbreviation, then enter the 5-digit zip code. <strong>Do not enter a 9-digit zip code.</strong> In rep-payee cases, enter the State and zip code of the rep-payee. <strong>Press TAB key.</strong> |
| LINE 05 | Enter the names of the examinee's treating physicians. There are |</p>
<table>
<thead>
<tr>
<th>LINES 06 and 07</th>
<th>List the examinee's chief complaints on these two lines only. If only one line is needed, leave line 07 blank. Press TAB key.</th>
</tr>
</thead>
<tbody>
<tr>
<td>LINE 08</td>
<td>Enter the name of the RRB assigned rep-payee, if applicable. LEAVE BLANK IF NO REP-PAYEE. Press TAB key.</td>
</tr>
<tr>
<td>LINE 09</td>
<td>FOR RECONSIDERATION OR APPEALS CASES ONLY. Enter the names of the physicians who performed previous consultative examinations. Leave blank if not applicable. Press TAB key.</td>
</tr>
<tr>
<td>LINE 10</td>
<td>Enter any miscellaneous information that you believe is important for the company that is arranging for the medical examinations to know. For example, speaks Spanish, uses wheelchair, etc.</td>
</tr>
</tbody>
</table>

**NOTE:** The information entered on these 10 lines should be all that is needed. Special instructions regarding examinations ordered should no longer be necessary because very detailed instructions were given in the contract signed by the company. However, if additional lines are needed for further communications about this order, refer to Section 12.2.8E.

Move the cursor to the **ACTION** field (#) using the **TAB** key.

Type **A**, then press **ENTER** (the message "ALL LINES ADDED" will display at the bottom of the screen).

Type **E** (cursor still in the **ACTION** field (#)) then press **ENTER** to return to the **HEADER SCREEN**.

The **HEADER SCREEN** displays the data just as you left it to enter text.

Press the **ENTER** key to display the next screen.

**12.2.7 Exam Data Screen**

Upon access to the **EXAM DATA SCREEN**, the cursor is positioned at the **EXAM NUMBER** line.

**EXAM NUMBER:** Enter the 3-digit code that identifies the medical exam you are ordering. For example, exam 12 should be entered 012. A complete list of these codes is in Section 12.2.14 and kept in the EXMC table.

**EXAM AMOUNT:** **MAKE NO ENTRY.** FFS completes this item after all entries are processed.
DELETE EXAM: After entering the EXAM NUMBER, the cursor automatically moves to this item. **MAKE NO ENTRY.** It is only used for canceling an exam. This procedure is given in Section 12.2.13E.

**NOTE:** To review your entries, move the cursor to the ACTION field at the top of the screen and type "H" to hold the document. FFS returns to the START-UP SCREEN. Now press ENTER to display HEADER entries. Type NS (next screen) in the ACTION field to display the EXAM DATA SCREEN. Repeat this step to display each EXAM DATA SCREEN. To return to the HEADER SCREEN, type NLO (next line zero) in the ACTION field and press ENTER.

Complete an Exam Data Screen for each medical exam to be ordered. Press the **ENTER** key to display a fresh screen to enter more exams. Move the cursor to the **ACTION** field once all exams are entered. Type Q and press **ENTER** (FFS returns to the START-UP SCREEN).

If the exams have been scheduled as indicated, the status at the top of the screen will read "SCHED."

To **EXIT**, press the **CLEAR** key and the FFS FRONT END SCREEN will display. Press the **CLEAR** key again and type 'CESF LOGOFF.'

**12.2.8 Use Of Tables On FFS**

Processed information on FFS is maintained on tables controlled by the Master Table Inquiry (MTI) facility of FFS. There are three kinds of tables in FFS: inquiry tables, reference tables, and data entry tables. Each table is given an identifying name referred to as a TABLEID code.

A. **Suspense File Inquiry Table**

Documents can be referenced on the suspense file table until the nightly FFS processing is completed. After the nightly FFS processing is done, data is referenced on a transaction table. Most columns are self-explanatory. The following are highlighted for your attention.

**ACTION:** FFS pre-fills this code to scan specified transactions.

Press the **TAB** key to move the cursor to the **TRAN** line.

**TRAN:** Specify the transaction to be scanned. Type ME for MEDICAL EXAM ORDER scheduled or RM for RECEIVER (payment) scheduled. Press **ENTER**.
STAT: FFS displays the status of your entered data as either ON HOLD, SCHEDULED, REJECTED, OR DELETED.

Variable data entered on a document order can be viewed by typing S (scan) in the ACTION field at the top of the table then pressing the TAB key to move the cursor under the TRAN CODE column at the line of the document to be scanned. Press ENTER and the selected transaction can be viewed.

To EXIT viewing or changing entries, move the cursor to the ACTION field at the top of the screen by pressing the TAB key. Type Q (quit), then press ENTER. FFS returns to the START-UP SCREEN and displays the message that the document has accepted any changes entered. Now press the CLEAR key to return to the SUSF TABLE. If no further action is required from this table, move the cursor to the ACTION field at the top of the screen, type 'E' to EXIT the table, then press ENTER.

NOTE: To view additional documents on the screen, press the ENTER key. The ACTION code 'R' allows you to roll from one screen to the next by simply pressing the ENTER key.

B. Orders Header Inquiry Table (OBLM)

Following the nightly FFS processing, medical exams ordered are maintained on this table. Use the transaction code and document number (order number) to view data from this table.

ACTION: The 'S' (scan) code is displayed by FFS. Press the TAB key to move the cursor to the TRANS CODE line.

TRANS CODE: Type ME (Medical Exams) and the cursor will automatically move to the ORDER NUMBER LINE.

ORDER NUMBER: Type the document number that you want to view. If the document number is unknown, press the ENTER key with only the TRANS CODE entered and FFS will display the first document maintained under ME. ROLL through the table by pressing the ENTER key until your number appears.

To EXIT the table enter 'E' in the ACTION field.

C. Commodity Line Inquiry Table (OBLC)

The COMMODITY LINE INQUIRY table allows you to view individual line entries, i.e., exam line entries of a document (order) processed on the nightly FFS run.
ACTION: The 'S' (scan) code is displayed by FFS. Press the TAB key to move the cursor to the TRANS CODE line.

TRANS CODE: Type ME and the cursor will automatically move to the ORDER NUMBER line.

ORDER NUMBER: Type the document number that you want to view. If the document number is unknown, press the ENTER key with only the TRANS CODE entered and FFS will display the first document maintained under ME. ROLL through the table by pressing the ENTER key until your number appears.

To EXIT the table enter 'E' in the ACTION field.

D. Medical Exam Cost Reference Table (EXMC)

This is a reference table of all medical exams and their costs. A brief description of each exam is also given. "No-Show" charges determined for each exam are identified beginning with code 500. (See Section 12.2.13F on Handling "No-Shows.")

ACTION: The ACTION 'S' (scan) code is displayed by FFS. Press the TAB key to move the cursor to the NUMBER line.

NUMBER: Type the number of the exam being referenced. If the number is unknown, press the ENTER key and the table will display the first exam number. ROLL to successive screens by pressing the ENTER key.

To EXIT the table enter 'E' in the ACTION field.

E. Text Table (PTEX)

The TEXT TABLE can be referenced to view typed information that was added during the process of scheduling examinations as described in Section 12.2.6. Text information on a medical exam order (ME) previously scheduled can be viewed or changed using appropriate table command codes. It will be necessary to identify the document to be viewed or changed by entering the purchase order identifier (PO ID) and commodity line (COMM LINE) of the ME text. Changes to text should only be made on the day that the ME is placed.

NOTE: It is not expected that additional lines will be needed for scheduling examinations besides the ten lines furnished on the first screen. Specific instructions regarding requested examinations and their
reports should no longer be necessary since such requirements are part of the contract with controls established for quality assurance.

**ACTION:** Command codes used are as follows:

A-enter text

S-scan text previously entered

C-change text previously entered

N-move to next (fresh) screen

R-roll from screen to screen when multiple pages are involved

E-exit the table

**PO ID:** The purchase order identifier is the transaction code (ME) and the DOCUMENT NUMBER.

**COMM LINE:** THIS WILL ALWAYS BE 000 for text associated with scheduled orders (ME).

To **EXIT** the table enter 'E' in the ACTION field.

### 12.2.9 Data Entry Action Codes

Command codes entered in the ACTION field, i.e., the first line of any given screen, allow for a variety of navigational or scheduling actions. Codes used on data entry screens are unique from those used on table screens.

**H:** This command allows you to put a document on HOLD to be completed at a later time or date. This feature is especially useful in situations that may detain you for a period that exceeds 20 minutes. A "time-out" results if no entry is made during a 20-minute period. Any information entered on a TEXT screen is lost and a "locked hold" is placed on other data entered that requires an override action to continue. Time-out can be prevented by simply pressing any key, such as the TAB key, before 20 minutes elapses.

**Q:** This command performs a QUALITY check of entries required by FFS. Entries which pass this quality check effectively set the order for processing by FFS done on a nightly basis. Examinations are thereby scheduled.

**P:** This command allows you PAUSE during data entry to access reference tables, then return to the data entry screen from which you paused.
DD: This command allows you to **DELETE** an entire **DOCUMENT** if such determination is made after completing the **Q** action and before the nightly FFS processing. Enter **DD** in the ACTION field then move the cursor to the DOCID by pressing the TAB key. Erase the letters **ME** by pressing the SPACE BAR and press **ENTER**.

DL: This command allows you to **DELETE** an exam data **LINE** if such determination is made after completing the **Q** action and before the nightly FFS processing. Enter **DL** in the ACTION field of the EXAM DATA SCREEN (LINE SCREEN). Move the cursor to the EXAM NUMBER line using the TAB key. Erase the exam number by pressing the SPACE BAR. Now press **ENTER**.

F: This command will **FINISH** the scanning action used to view previously inputted data. It can only be used when the SCAN mode is selected on the FRONT END SCREEN.

IL: This command allows you to **INSERT LINES** to enter additional exams to an order after a **Q** action is completed and before the nightly FFS processing. Upon re-entering the document, at the HEADER SCREEN’S ACTION line, type **IL**. Press the ENTER key and a fresh screen will display. Move the cursor to the DEL DATE line before pressing the ENTER key.

NS: This command allows you to move to the **NEXT SCREEN** in a forward progression only.

NL: This command allows you to display the **NEXT LINE** (EXAM DATA). This feature is mostly used to move back to the HEADER screen. To do this, type **NLO** in the ACTION field and press **ENTER**.

XD: This command allows you to **cancel all entries made prior to scheduling** the document, i.e., before the **Q** action. Type **XD** in the ACTION field and press **ENTER**.

### 12.2.10 Table Action Codes

**A:** Written text is **ADDED** to a TEXT table using this code typed in the ACTION field at the top of the TEXT screen.

**C:** Written text can be **CHANGED** by recalling the original text page and entering this code in the ACTION field at the top of the TEXT screen.

**E:** Enter the **EXIT** command when you have completed your activity in any given table function.

**N:** This command allows you to move from one table to the **NEXT**. Type **N** in the ACTION field at the top of the table that you are currently using.
cursor automatically moves to the TABLEID allowing you to enter the name of the next table desired. The action command is completed by pressing the ENTER key.

R: This action code is automatically displayed by the system allowing you to ROLL from one screen to the next on tables with numerous pages (screens) of data to view. The action is completed by pressing the ENTER key.

S: Like the R command, SUCCESSIVE entries in a table can be viewed using this command code.

<: Enter the symbol '<' in the ACTION field to view previous pages (screens) in a table. This function is limited to viewing four screens prior to the currently displayed screen.

### 12.2.11 Edit Referral Messages

A quality check ('Q' in the ACTION field) is the last step in the data entry process of scheduling medical examinations on FFS. It verifies completion of all required items and edits those which have been restricted to accept only certain entries. Edit messages will display on the bottom line of the data entry screen to indicate unacceptable or missing items. Usually, multiple edit messages are displayed even if only one item is unacceptable or missing. When the item is correctly entered and another quality check ('Q' in the ACTION field) is made, the document is accepted by FFS for processing in the nightly run.

Many of the edit messages are self-explanatory, but a list of them, their meaning, and the necessary corrective action follows:

**NOTE:** Whenever Edit Referral Messages appear after a quality check it is necessary to correct not only the missing or unacceptable item but also to enter the TOTAL AMOUNT on the Medical Exam Order Screen. (Refer to the Edit Referral Message H--Code 900E - DOC TOTAL NOT = DETAIL listed below.) Then do another quality check ('Q' in the ACTION field) and press ENTER.

**A--*S302 - ACTION NOT AUTHORIZED:** This message appears on the Entry and Correction Screen when an incorrect TRANS CODE was entered.

**CORRECTIVE ACTION:** Tab the cursor to the TRANS CODE position on the DOCUMENT ID line and type ME (Medical Exams). Press the ENTER key.

**A--*CD13 - BATCH AND DOC TYPE INVALID:** This message appears on the Entry and Correction Screen if no TRANS CODE was entered.

**CORRECTIVE ACTION:** Tab the cursor to the TRANS CODE position on the DOCUMENT ID line and type ME (Medical Exams). Press the ENTER key.
A--*CE53 - CURSOR POSITION INVALID: This message appears when the cursor was moved to an invalid position on the screen.

CORRECTIVE ACTION: Tab the cursor to a valid position.

A--*CD2A - DOCUMENT ID IS INCOMPLETE: This message appears on the Entry and Correction Screen if no entry is made under either DIVISION or DOCUMENT NUMBER.

CORRECTIVE ACTION: Tab the cursor to the DIVISION position and/or DOCUMENT NUMBER position on the DOCUMENT ID line. Type 2500 in the DIVISION position and/or the correct DOCUMENT NUMBER. Press the ENTER key.

A--*CD23 - DOCUMENT SEC 1 INVALID: This message appears on the Entry and Correction Screen if the entry for DIVISION on the DOCUMENT ID line is not a valid DIVISION code.

CORRECTIVE ACTION: Tab the cursor to the DIVISION position on the DOCUMENT ID line and type 2500. Press the ENTER key.

A--*CD31 - DUPLICATE DOCUMENT ID: This message appears on the Entry and Correction Screen if the DOCUMENT NUMBER entered on the DOCUMENT ID line was previously used.

CORRECTIVE ACTION: Tab the cursor to the DOCUMENT NUMBER position on the DOCUMENT ID line and type the correct DOCUMENT NUMBER. Press the ENTER key.

NOTE: The exact same DOCUMENT NUMBER is used only when correcting an order that has been "held," canceling an order, or handling "No-Show.s."

A--*CQ8H - DOCUMENT HELD: This message displays on the bottom line of the Entry and Correction Screen indicating that the entries made are being held for completion at a later time or date.

CORRECTIVE ACTION: None.

A--*CU13 - CONTINUING SAME DOCUMENT: This message appears on the bottom line of the Exam Data Screen to indicate that continuous screens are available to enter individual exam data.

CORRECTIVE ACTION: None.

A--CE11 - DOC ID CHANGE INVALID: Once a DOCUMENT NUMBER is entered on the Entry and Correction Screen it cannot be changed on subsequent screens. FFS displays the number on the top line of each data entry screen. This message appears if the number is changed in any way.
CORRECTIVE ACTION: Tab the cursor to the DOC ID position at the top of the screen and type the DOCUMENT NUMBER exactly as it was originally entered on the Entry and Correction Screen.

A--*CX2J - NO DETAILS PRESENT ON SCREEN: This message appears when attempting to view a data entry screen to determine if entries have been made when they were not.

CORRECTIVE ACTION: None.

A--*27 - 2ND ACTION INCONSISTENT W/1ST: This message indicates that an invalid action code was entered.

CORRECTIVE ACTION: Tab the cursor to the ACTION field at the top of the screen and type the correct code.

H--900 E - DOC TOTAL NOT = DETAIL: This message will appear whenever missing or incorrect entries prevent FFS from computing the TOTAL AMOUNT on the Medical Exam Order Screen. FFS has been programmed to calculate and enter the total cost of all exams ordered. FFS will only do this calculation once. Therefore, any system edits which detect missing or incorrect entries prevent that automatic one-time-calculation from taking place and result in no TOTAL AMOUNT being entered on the Medical Exam Order Screen.

CORRECTIVE ACTION: Tab the cursor to the TOTAL AMOUNT position and type in the correct total cost of all exams ordered. Press ENTER and FFS will display the first exam ordered with the cost shown in the EXAM AMOUNT position. Repeat this step to view the EXAM AMOUNT of any other exams ordered. After viewing all the exams ordered, and determining the sum total of their costs, return to the Medical Exam Order Screen. Do this by moving the cursor to the ACTION field, typing NLO (next line zero), and pressing ENTER. Tab the cursor to the TOTAL AMOUNT position on the Medical Exam Order Screen and enter the sum of all the exam costs. For example, if the sum total is $268 then type 268.00. Press the space bar to delete the zeros displayed to the right of this position.

H--S188EE - DELIVERY DATE INVALID: This message appears when an invalid DELIVERY DATE was entered on the Medical Exam Order Screen. FFS does not accept impossible dates, such as the number 45 entered as a month, or dates in the far future.

CORRECTIVE ACTION: Tab the cursor to the DEL DATE position and type the correct DELIVERY DATE.

H--S215E - DELIVERY DATE < TRANS DATE: This message appears if the DELIVERY DATE was prior to the date on which it was entered.
CORRECTIVE ACTION: Tab the cursor to the DEL DATE position and type the correct DELIVERY DATE.

H--S153E - DELIVERY DATE BLANK: This message appears if no DELIVERY DATE was entered on the Medical Exam Order Screen.

CORRECTIVE ACTION: Tab the cursor to the DEL DATE position and type the DELIVERY DATE.

H--ME09E - BENEFICIARY NAME REQUIRED: This message indicates that the BENEFICIARY NAME to be entered on the Medical Exam Order Screen was omitted.

CORRECTIVE ACTION: Tab the cursor to the BENE NAME position and type the BENEFICIARY’S NAME (FIRST NAME/SURNAME).

NOTE: A BENEFICIARY’S NAME must be entered if the second digit of the REASON CODE entered on the Medical Exam Order Screen is any number other than 1 or 2.

H--ME10E - DESIG UNIT = BDMO BHA, BUSI: This message appears if the DESIGN UNIT entered on the Medical Exam Order Screen is other than BDMO, BHA, or BUSI.

CORRECTIVE ACTION: Tab the cursor to the DESIG UNIT position and type BDMO, BHA, or BUSI depending on which unit is to receive the final exam report.

H--ME11E - AUTH ORDERER NAME REQUIRED: The name of the person ordering the examinations must be entered on the Medical Exam Order Screen.

CORRECTIVE ACTION: Tab the cursor to the AUTHORIZED ORDERER position and type the LAST name of the AUTHORIZED ORDERER.

H--ME13E - INVALID FIELD OFFICE (SHIP): This message appears if the field office number entered on the Medical Exam Order Screen is invalid.

p> CORRECTIVE ACTION: Tab the cursor to the FO # position and type the correct field office number.

H--ME07E - EMPLOYEE NAME REQUIRED: The railroad employee's name was not entered on the Medical Exam Order Screen.

CORRECTIVE ACTION: Tab the key to move the cursor to the EE NAME position and type the railroad employee's name (FIRST NAME/SURNAME).
H--S807E - NEW ORDER EXISTS: This message displays if the scheduling was attempted using a DOCUMENT NUMBER on which medical examinations have already been ordered.

CORRECTIVE ACTION: Tab the cursor to the DOCUMENT NUMBER and type the correct DOCUMENT NUMBER.

H--S216E - NO ACCOUNT LINE ENTERED: This message appears if no EXAM NUMBERS were entered on the Exam Data Screen.

CORRECTIVE ACTION: Press ENTER to access the Exam Data Screen. Tab the cursor to the DEL DATE line, complete, and then press ENTER.

H--ME08E - REASON CODE MUST BE NUMERIC: This message indicates that the REASON CODE entered on the Medical Exam Order Screen was not a valid code.

CORRECTIVE ACTION: Tab the cursor to the REASON CD position and type the correct REASON CODE.

H--S183E - TOT ACCT LINE NOT = COMM LINE: This message appears if a number of exams were entered on the Exam Data Screen and one or more was "erased" or changed without properly deleting the line.

CORRECTIVE ACTION: Refer to Section 12.2.13 for instructions.

H--ME06E - TYPE REQ MUST = 01, 02, 03: This message appears if the TYPE REQUEST entered on the Medical Exam Order Screen was not a valid code.

CORRECTIVE ACTION: Tab the cursor to the TYPE REQ position and type the correct code.

01--S474E - DECR ON ORIG ENTRY ILLEGAL

01--EP46E - CANNOT DECR COMM LINE ON NEW ENTRY

01--A031E - MISSING ACCOUNT LINE: These messages appear if the DELETE EXAM INDICATOR is entered on a new entry.

CORRECTIVE ACTION: Tab the cursor to the DELETE EXAM IND position and remove the entry by using the space bar.

01--ME05E - INVALID EXAM NUMBER: This message indicates that an invalid exam number was entered on the Exam Data Screen.

CORRECTIVE ACTION: Tab the cursor to the EXAM NUMBER position and type the correct EXAM NUMBER.
01--S164E - MISSING COMMODITY CODE
01--A031E - MISSING LINE AMOUNT
01--S162E - MISSING UNIT OF MEASURE
01--EP48E - MISSING COMM LINE NUMBER
01--S196W - UNIT COST = ZERO ON ENTRY

01--S105E - QUANTITY = ZERO ON ENTRY: These messages appear when an invalid EXAM NUMBER was entered on the Exam Data Screen.

CORRECTIVE ACTION: Tab the cursor to the EXAM NUMBER position and type the correct EXAM NUMBER.

*CA93 - DOCUMENT REJECTED: This message appears if a required entry was omitted or a restricted entry was incorrectly completed.

CORRECTIVE ACTION: Refer to the other Edit Referral Messages to determine which items were omitted or incorrectly completed. This message will disappear when the other items are corrected, the TOTAL AMOUNT is entered on the Medical Exam Order Screen, and a new quality check ('Q' in ACTION field) is done.

01--A032E - INVALID INC/DEC IND

01--S057E - INVALID UNIT/INC/DEC WD

01--S05E - INVALID QUANT INC/DEC IND: These messages will appear if attempting to delete an exam(s) using a code other than D in the DELETE EXAM INDICATOR on the Exam Data Screen.

CORRECTIVE ACTION: Refer to Section 12.2.13C, DELETING A LINE, for complete instructions.

01--*L006 - ADD KEY FOUND: This message appears on the TEXT Screen when adding or changing information which was previously entered while scheduling an exam. The message appears once for each line of TEXT up through the last TEXT line with typed information.

CORRECTIVE ACTION: None.

NOTE: Information can only be added ('A' in ACTION field) prior to the nightly FFS run.

06--*L030 - ALL LINES ADDED

06--*L030 - ALL LINES CHANGED
06--*L030 - ALL LINES DELETED: These messages appear to indicate that the desired action (add, change, or delete) on the TEXT SCREEN was accepted by FFS.

CORRECTIVE ACTION: None.

01--*L008 - END OF FILE: This message indicates that no subsequent screens follow the one being viewed.

CORRECTIVE ACTION: None.

05--*L033 - NO LINES ADDED: This message appears when entering additional information on a TEXT SCREEN.

CORRECTIVE ACTION: None.

NOTE: This Edit Referral message does not mean that the information added was not accepted. In order to confirm that the additional line of information was added to the system record, check the TEXT LINE column on the right side of the screen. If numbers appear in this column after adding the information, the information was accepted.

A--*L003 - REQUESTED TABLE NOT FOUND: The table code entered was invalid.

CORRECTIVE ACTION: Refer to Section 12.2.8, USE OF TABLES ON FFS, for the proper codes.

12.2.12 Multiple Document Numbers

The document number is an 11-position identifier that consists of the 9-digit RRB claim number followed by two alpha codes. The claim number prefix is not used in the DOCUMENT NUMBER entry. If the RRB claim number is not 9 digits, pre-fill using zeros. For example, claim number A 892431 should be shown as 000892431 plus the two alpha codes.

FFS allows only one order to be placed per document ID number. Since multiple orders are often required for one particular disability application, it may be necessary to use different alpha codes at the end of the document number to accommodate these requests.

A. The First Alpha Code

The alpha code will reflect the month you are placing the order. To keep this as simple as possible, we have designated the codes as follows:

A = January       G = July
B = February        H = August
C = March           I = September
D = April           J = October
E = May             K = November
F = June            L = December

**EXAMPLE:** If you are ordering exams 18, 45, and 55 for the Employee Jones, claim number 600-10-1111, in June 1994, the first 10 positions of the document ID number would be 600101111F.

There are times when additional examinations will need to be ordered in the same month, regardless of the year, as the initial order (reconsideration, appeals, etc.). These can be easily handled using alpha codes as follows:

M = January        S = July
N = February       T = August
O = March          U = September
P = April          V = October
Q = May            W = November
R = June           X = December

**EXAMPLE:** Using the above situation, if you need to place another order for Mr. Jones in June 1995, the first 10 characters of the document ID number will look like this: 600101111R. FFS will not accept 600101111F because that was used when the June 1994 order was placed.

If you need to order a third or fourth time for Mr. Jones and you need to place the order in June of any year, you should first use "Y" and, if necessary, then "Z" in the tenth position. These two codes are "wild cards" and can be used for any month in which multiple orders are placed.

**B. The Second Alpha Code**

The last position will be used to designate the type of beneficiary for whom medical examinations are being ordered. The codes are:

A = Employee
B = Widow
C = Surviving child
D = Retirement child

**EXAMPLE:** Using the same situation as before, four orders have been placed in the month of June, regardless of the year. These document ID codes would look like this:

First order: 600101111 FA
Second order: 600101111 RA
Third order: 600101111 YA
Fourth order: 600101111 ZA

As you can see, the above method allows up to four orders to be placed for any particular case in the same month, regardless of the year. But there is even greater flexibility using the second alpha code to accommodate more orders for the same month.

To place a fifth order in the month of June, regardless of the year, the last alpha code needs to be different from that of any of the four previous orders. You should, therefore, use the following codes:

E = Employee
F = Widow
G = Surviving child
H = Retirement child

**EXAMPLE:** In Mr. Jones' case, the fifth order placed in June, regardless of the year, would use this document ID number:

600101111FE

The rule of thumb is to exhaust all options in the first alpha code before changing the second alpha code. Subsequent document ID numbers for orders placed in June of any year will look like this:

Sixth order: 600101111RE
Seventh order: 600101111YE
Third order: 600101111ZE
It will be rare, indeed, for so many multiple orders to be placed in a particular month, regardless of the year. But if it does happen, FFS can accommodate it.

12.2.13 Special Situations

Even after carefully reviewing your entries before approving an order, changes may be required to correct errors or to react to new developments in a case. The following situations are possible and can be handled using appropriate action commands.

A. Correcting a Wrong Claim Number

The claim number entered on the START-UP SCREEN under DOCUMENT NUMBER is later found to be incorrect because of a transposed number. If this mistake is determined on the same day that it is entered, it will be necessary to delete the order. However, if the order was already processed with the nightly FFS run, it will be necessary to communicate this mistake to the vendor using electronic mail through Hybrid Systems Limited (HSL).

B. Deleting an Order

An order can be deleted if it has not been processed on the nightly FFS run. Each night FFS processes data which was entered during the day to actually complete the transaction of scheduling medical examinations. Prior to this nightly processing, entries can be changed including deletion of the entire order that was entered.

From the Suspense File, find the Document Number you wish to delete. Press the ENTER key to display the HEADER screen with previously entered data shown. Move the cursor to the ACTION field at the very top of the screen by pressing the TAB key and type DD (delete document). TAB to the DOCID and remove the transaction code, ME, by pressing the SPACE BAR and then press ENTER. The order will be deleted.

C. Deleting a Line

Erroneous or incorrect entries on an EXAM DATA SCREEN (LINE SCREEN) can be deleted using the delete line (DL) action command code if the order has not been processed on the nightly FFS run. The DL command allows deletion of one or more lines when it is not necessary to delete the entire order.

From the Suspense File, find the Document Number you intend to work on. Press the ENTER key to display the HEADER screen with previously entered data shown. Move the cursor to the ACTION field at the very top of the screen by pressing the TAB key and type NS (next screen) to
display the EXAM DATA SCREEN. Repeat the NS action until the desired screen to be deleted is shown.

Enter DL in the ACTION field at the top of the EXAM DATA SCREEN to be deleted. Move the cursor to the EXAM NUMBER line and erase the entry by pressing the SPACE BAR and then press ENTER.

It will be necessary to enter the TOTAL on the HEADER SCREEN before entering 'Q' (quality check) in the ACTION field successfully completes the transaction for processing on the nightly FFS run.

D. Canceling an Order

Once entries for an order are processed on the nightly FFS run, changes cannot be made to the previously entered data. If it is necessary to cancel an order, the vendor must be informed using electronic mail via Hybrid Systems Limited (HSL). For example, medical exams are scheduled on May 2, 1994, and a notice of death is received May 4, 1994. An HSL message is needed to inform the vendor about the death and to cancel the exams ordered on May 2, 1994. Also, corrective action is needed to remove the entries maintained on FFS to place the order.

From the Suspense File, find the Document Number you intend to work on. Press the ENTER key to display the HEADER screen; it will not display previously entered data. Move the cursor to the ACTION field directly across from the DEL DATE entry by pressing the TAB key and type an 'X.' Move the cursor to the ACTION field at the top of the screen by pressing the TAB key and enter a 'Q' (quality check). Press the ENTER key to complete the action.

This action will appear on the suspense table (SUSF) as a SCHED (scheduled) action. That means FFS is ready to process your request to cancel on the nightly run.

E. Canceling an Exam

It may be necessary to cancel only one or more exams from a previous order involving multiple exams. As previously explained under CANCELING AN ORDER, changes cannot be made once entries for an order are processed on the nightly FFS run. The vendor must be informed using HSL. For example, medical exams 018 and 013 are scheduled on May 2, 1994, and on May 4, 1994, a report is received from the applicant's treating physician that provides information which would be obtained from exam 018. An HSL message to cancel that exam should be sent to the vendor.
Corrective action to remove the ME obligation on the exam being canceled requires entries on FFS. From the Suspense File, find the Document Number you intend to work on. Press the ENTER key to display the HEADER screen; it will not display previously entered data. Move the cursor to the ACTION field directly across from the DEL DATE entry by pressing the TAB key, type an 'M' (modify), and then press ENTER. The EXAM DATA screen displays. Now type the exam number to be canceled; the cursor automatically advances to the DELETE EXAM IND. Type 'D' on this line. If additional exams are to be canceled, press the ENTER key and repeat the above steps for completing the EXAM DATA screen. Once all exams to be canceled have been entered, move the cursor to the ACTION field at the top of the screen and type 'Q' (quality check). Press ENTER to complete the action.

F. Handling "No-Shows"

Once notification is received that the person scheduled for an examination cannot, or did not, show up for an appointment, and it is appropriate to pay a no-show fee, a modified ME transaction is necessary to set up payment of the no-show fee. The examinee is required to notify the company contracted by the RRB to secure requested examinations if an appointment must be canceled. If the cancellation notice is received less than 24 hours before the appointment, a no-show fee must be paid. The no-show amounts have been determined and identified by separate codes explained below.

From the Suspense File, find the Document Number you intend to work on. At the HEADER SCREEN, simply enter an 'M' (modify) in the ACTION field across from the DEL DATE line. No other entries are required. Now press the ENTER key. When the EXAM DATA SCREEN displays, enter the exam number that you wish to cancel and type 'D' in the DELETE EXAM IND field. Press the ENTER key to move to the next screen. Enter the appropriate no-show code on the EXAM CODE line. The no-show codes are determined by adding "5" to the first digit of the three-digit exam code. For example, the "no-show" number for exam 018 is 518 or exam 153 is 653. A complete list is available in the MEXC table. Now move the cursor to the ACTION field at the top of the screen to complete the entries by typing 'Q' (quality check) in the ACTION field.

12.2.14 Reason Code

The reason code entered on the MEDICAL EXAM ORDER SCREEN (HEADER) is a two-digit code that identifies the reason for the examination and the type of beneficiary. Enter the appropriate two-digit code from the following list:

A. First Digit (Reason for Examination)
1 Initial development by the district office
2 Initial annuity determination, BDMO request
3 Annuity continuance, BDMO request
4 Initial freeze or early Medicare determination, BDMO request
5 Freeze or early Medicare continuance, BDMO request
6 Reconsideration, BDMO request
7 Appeal, BDMO request
8 Appeal, H & A request
9 RUIA eligibility, BUSI request
10 Reserved for future use

B. Second Digit (Type of Beneficiary)

1 Employee, A & S
2 Employee, D/A
3 Retirement child (IPI or Non-IPI)
4 Survivor child (DCIA)
5 Widow(er), remarried widow(er) or surviving divorced spouse (WIA)
6 Young mother, father or surviving divorced spouse (WICIA)
7 Disabled widow(er) or surviving divorced spouse (DWIA)
8-0 Reserved for future use

12.3 Continuing Disability Review Call-up Program

Use the Continuing Disability Review (CDR) call-up program to set call-ups for annuitants after a freeze determination has been made. Also, use it to close out the call-up when the CDR is completed. Click on a topic to for instructions that illustrate how to use the program for setting and closing call-ups.

12.3.1 Main Menu

This screen appears when you start the program.
Select Multiple Call-ups

Click on this item to select call-ups for a specific period and/or other selection criteria.

From there go to the:

Open Call-ups screen to view the call-ups you selected. Then to the

Edit Call-ups screen to

Close a Call-up or

Add a New Call-up
<table>

</table>

Click on the claim number you want to edit.
1. Click on a claim number to display the Edit call-ups screen showing all call-ups for the specified claim number.

2. Click the Print Preview button if you wish to view the list. To print, click File/Print, otherwise click File/Exit.

3. If you do not wish to work with any call-ups in the list, click the Return button to go back to the Selection screen.

12.3.4 Edit Call-Ups

While on the Open Call-ups screen, click the specific claim number you wish to edit.

With this screen you can perform several actions for an individual claim number.

Supervisors will have access to a delete key for erroneous entries.
<table>

12.4 RL-121f Letters on RRAILS

12.4.1 Navigation of RL-121f Letters on RRAILS

12.4.1.1 Overview

An RL-121f letter is sent as a notification of disability rating in all cases in which an initial disability decision is an allowance. It is also sent in cases in which an initial disability allowance is re-evaluated to determine whether an earlier onset date can be set. More information about the purpose and content of the letter is contained in DCM 11.3.3.

Since the information given in an RL-121f letter differs according to the type of annuitant, letters containing different combinations of standard and variable paragraphs have been designed for each type of annuitant. These include:

- employees,
- widows,
- survivor children,
- spouses with disabled children in care (IC Spouse), and
- disabled children (IPI Child) to be included in the Overall Minimum Computation (O/M).

An RL-121f letter has also been designed for use in cases in which the annuitant has previously been rated disabled and was subsequently asked for additional information to determine whether or not an earlier onset could be established. This letter is referred to as “previous” as opposed to “initial.”

12.4.1.2 Access of the Letter

The letter can be accessed through the RRAILS PC program. On the initial RRAILS screen, download name, claim number, address, etc. per instructions in FOM1 1596.20. If the case involves multiple beneficiaries or multiple applications, multiple tabs will be displayed. Click on the appropriate tab.

Note: If the rating is for an IPI child to be included in the O/M, click on the tab associated with the employee.

Select RL-121f from the menu on the right side of the RRAILS screen.

The RL-121f template will appear, with the beneficiary address and other identifying information pre-filled from the system you selected for the download.
A reconsideration paragraph and a standard closing paragraph with spaces for the name, address, and phone number of the appropriate field office will be automatically included on all letters.

12.4.1.3 Access of The Dialogue Box

Once you have accessed the letter, press control/shift/F2 and a dialogue box will appear.

The answers to the questions initially shown on the dialogue boxes are system defaults. You will need to change the answers when appropriate.

Depending upon the selections made in questions 1-3, different questions will appear after question 3, which the examiner must answer.

- select yes or no for other questions that appear and,
- fill in date boxes and, if applicable, box for child’s name.

Depending upon the question and upon the answer, RRAILS will

- print an appropriate paragraph in the letter, or
- ask for paragraph inserts, such as the onset date, or
• prompt the examiner to compose a paragraph by printing ***** in the letter, or
• some combination of the preceding, or
• skip ahead to the next item.

For more detailed instructions on dialogue box completion for the various types of letters see:

12.4.2 for Initial employee
12.4.4 for Initial IPI disabled child for employee O/M
12.4.6 for initial widow
12.4.8 for Initial spouse with disabled child in care
12.4.10 for Initial survivor disabled child
12.4.12 for previous rating, possible earlier onset date (any type annuitant)

When you have completed the dialogue box, click on the OK box at the bottom left and the letter will re-appear.

12.4.1.4 Code Paragraphs and Finishing Touches

Code paragraphs can be used to substitute for examiner-composed paragraphs. To access code paragraphs, press Ctrl/Shift/F4. A window, labeled "Make Selection", containing the paragraph numbers will appear.

**Note:** This is different from other RRAILS letters. In other RRAILS letters, code paragraphs are accessed by pressing Ctrl/Shift/F2. In all other respects, the instructions for inserting code paragraphs for the RL-121f is the same as for other RRAILS letters. See FOM1 1596.50.

If you are using a code paragraph in place of an examiner composed explanation of a difference between claimed and determined onset dates, you must delete the sentence that begins “The disability onset differs from that claimed because *****”. If you are not using a code paragraph, delete the asterisks and complete the sentence by typing a free form explanation.

Instructions for using the Field Office Lookup Feature and for sending RRAILS letters to authorization folders or imaging are contained in FOM1 1596.50.

For the exact text for the various types of letters see:

12.4.3 for Initial employee
12.4.5 for Initial IPI disabled child for employee O/M

12.4.7 for Initial widow

12.4.9 for Initial spouse with disabled child in care

12.4.11 for Initial survivor disabled child

12.4.13 for previous rating, earlier onset date (any type annuitant)

12.4.2 Initial Employee Dialogue Box

If the employee tab (rather than a beneficiary tab) is selected on the initial RRAILS screen, the following dialogue box will appear:

The answers to questions 1-4 shown above are system defaults. You may need to change those answers depending on the situation. The following instructions describe situations for a letter to an employee in an initial (as opposed to “previous”) decision.
Question 1: Is this letter addressed to the beneficiary directly? Select whether the letter will go directly to the annuitant. The only situation in which it will not go directly to the annuitant is when there is a rep payee. Your answer to this question will not affect the appearance of the dialogue box. However, if you select “no”, the text of the letter itself will be changed to replace pronouns such as “you” or “your” with the annuitant’s name or the annuitant’s name with an apostrophe “s” (‘s) and to correct verb forms accordingly. If you have pre-filled from a system such as APPLE, which knows the sex of the applicant, the first “you” will be replaced by the annuitant’s name and all subsequent pronouns will be replaced by he/she/his/her as appropriate.

Question 2: Choose whether this letter refers to the Employee or to a disabled IPI child of (employee’s name). If employee is selected, continue to Question 3. (If IPI child is selected, go to DCM 12.4.4.)

Question 3: Is this an initial letter? Or was disability previously awarded? If initial is selected, continue to Question 4. (If previous is selected, go to DCM 12.4.12.)

Question 4: Has medical evidence or other information been requested for possible establishment of an earlier onset? This question is answered “no” as a system default; you may need to change this answer. If “yes” is selected, a paragraph will be inserted in the letter to that effect. (Click here to see text of that paragraph.)

Date Boxes: Enter established onset date in the date box provided. A box will appear regarding claimed onset.

Has the disabled person indicated an onset different from the one established?

If “yes” is selected, the examiner must fill in the box for the claimed onset date. A sentence with asterisks will appear in the letter to prompt the examiner to give a free form explanation. (Click here to see that the text of that sentence.)

If “no” has been selected, RRAILS will fill the claimed onset box with the same date that was entered in the established onset box. The box for annuity beginning date will show an ABD based on the onset date, however, this date will not appear in the letter.
RRAILS will use this date to determine whether or not the claimant is in the waiting period and select the appropriate estimated payment date paragraph for the letter.

NOTE: If the waiting period is expired, but the employee’s ABD is in the future because he has filed in advance of the last day of compensated service, manually change the date in the Annuity Beginning Date box to the day after the last day of compensated service. The appropriate estimated payment date paragraph will appear in the letter.

To see the paragraph used when the employee is still in the waiting period, or in the future because of advance filing, click here. To see the paragraph used when the employee is not in the waiting period or does not have a future ABD, click here.

<table>
<thead>
<tr>
<th>Established onset date, (MM/DD/YYYY)</th>
<th>Claimed onset date, (MM/DD/YYYY)</th>
<th>Annuity beginning date, (MM/DD/YYYY)</th>
<th>Letter Date, (MM/DD/YYYY)</th>
</tr>
</thead>
<tbody>
<tr>
<td>01/05/2005</td>
<td>03/01/2004</td>
<td>07/01/2005</td>
<td>02/03/2005</td>
</tr>
</tbody>
</table>

Applicant is still in waiting period

The Established Onset Date Waiting Period ABD of 7/1/2005 is later than the Claimed Onset Date Waiting Period ABD of 9/1/2004.

Does the difference in onset date have an adverse effect on the ABD?  ☐ Yes  ☐ No

Does the difference in onset date have an adverse effect on ABD? This question only appears if the established onset date is different from the claimed onset date. If “no” is selected, RRAILS will print an appropriate sentence in the letter. (Click here to see the text of that sentence.)

When all entries have been made in the dialogue box, select OK. The dialogue box will close and the letter will re-appear.

12.4.3 Initial Employee Letter Text

Some paragraphs (standard) are always contained in an employee initial letter. Other paragraphs (variable) will be included depending upon entries in the dialogue box.

Standard Paragraphs

Exact text and order of the standard paragraphs are shown below:

Dear:
We have determined that you meet the requirements for a disability annuity. We have established a railroad retirement disability onset date of [RRAILS inserts date from dialogue box] in your case. Under the law, a disability annuity cannot begin earlier than the first day of the sixth month following the month in which the onset of disability occurs or earlier than the day after your last day of railroad compensation. Other factors also can affect your annuity beginning date or the amount of monthly benefits to which you are entitled.

[Variable paragraphs which depend on the way in which you answer the dialogue box questions are inserted here.]

If you have selected direct deposit, we will send your payment to the financial institution shown on your application. If you have changed financial institutions since you filed your application, please notify your field office right away.

Railroad Retirement disability annuities are subject to United States Federal income tax. If you did not file a form RRB W-4P, we must withhold taxes from your annuity as if you were married with three withholding allowances. If you wish to change the amount of your tax withholding, your field office can assist you.

You may have received benefits under the Railroad Unemployment Insurance Act after your annuity beginning date. If so, we will deduct the amount of those benefits from your first annuity payment.

If you believe that this decision is not correct, you may request that the decision be reconsidered. Your request must be in writing and should explain why you disagree. If you wish this reconsideration, your request must be received by the Railroad Retirement Board (RRB) within 60 days from the date of this notice. You may send your request to any field office of the RRB, or you may send it directly to the following address: Railroad Retirement Board, Reconsideration Section, 844 North Rush Street, Chicago, Illinois 60611-2092. If you have any additional evidence to be considered, you should include it with your request.

If you disagree with the reconsideration decision, you may then appeal to the Bureau of Hearings and Appeals within 60 days of the reconsideration decision.

If you have any questions about this letter or need additional information, contact our office located at [Field office look up will insert district office address]. The telephone number is [Field office look up will enter phone number].

Sincerely,

Variable Paragraphs

Exact text and order of the variable paragraphs is shown below:
Estimated payment date paragraph used when ABD is in the future: Therefore, your annuity cannot begin before [RRAILS inserts a date that is 6 months after the disability onset date or the day after the last day of compensated service]. Within 45 days of that date, you should receive your first payment and a letter explaining more about your monthly benefits.

Estimated payment date paragraph used when ABD is not in the future: We are in the process of calculating your annuity. Your first payment should be issued within the next 20 days. A letter explaining the payment will also be sent when the payment is issued.

Explanatory paragraph used when the established onset date is different from that claimed: The disability onset date differs from that claimed because *********[The examiner must replace the asterisks with an explanation or delete the entire sentence and replace it with a code paragraph or custom explanation.]

Paragraph used when additional medical evidence requested: If they have not done so already, your field office will be contacting you in regards to providing additional information to determine whether or not an earlier onset date can be established. When this information is received, your case will be reviewed again and we will determine if your onset date should be changed.

Paragraph used when an onset different than claimed is used but has no effect on ABD: Although your established onset date is different than what was alleged, this has no adverse effect on your annuity beginning date.

12.4.4 Initial O/M IPI Child Dialogue Box

If the employee tab is selected, and the answer to question 2 is IPI, the dialogue box will look like this:
The following instructions apply to situations for a letter to an employee whose child has been rated disabled for inclusion in the O/M in an initial (as opposed to “previous”) decision.

**Question 1: Is this letter addressed to the beneficiary directly?** Select whether the letter will go directly to the annuitant. The only situation in which it will not go directly to the annuitant is when there is a rep payee. Your answer to this question will not affect the appearance of the dialogue box. However, if you select “no”, the text of the letter itself will be changed to replace pronouns such as “you” or “your” with the annuitant’s name or the annuitant’s name with an apostrophe “s” (‘s) and to correct verb forms accordingly. If you have pre-filled from a system such as APPLE, which knows the sex of the applicant, the first “you” will be replaced by the annuitant’s name and all subsequent pronouns will be replaced by he/she/his/her as appropriate.

Note that although the person being rated is the IPI child, the letter is addressed to the employee. If the employee does not have a rep payee, select “yes”.
Question 2: Choose whether this letter refers to the Employee or to a disabled IPI child of (employee’s name). If IPI child is selected, continue to boxes. (If employee is selected, go to 12.4.2.)

Boxes: Enter the disability onset date and child’s name in the boxes provided. RRRAILS inserts the date and the child’s name in the appropriate places in the letter.

When all entries have been made in the dialogue box, select OK. The dialogue box will close and the letter will re-appear.

12.4.5 Initial O/M IPI Child Letter Text

A child who is not eligible for an annuity may be rated disabled in order to increase an employee annuity under the O/M provision. The text for the letters sent in these cases is shown below.

Dear:

We have determined that [RRRAILS inserts child’s name from dialogue box] is disabled. A railroad retirement disability onset date of [RRRAILS inserts date from dialogue box] has been established for [RRRAILS inserts child’s name from dialogue box]. We will send you a letter to explain if this affects your monthly annuity payments. You will also receive a letter concerning [RRRAILS inserts child’s name from dialogue box]’s possible eligibility for Medicare.

If you believe that this decision is not correct, you may request that the decision be reconsidered. Your request must be in writing and should explain why you disagree. If you wish this reconsideration, your request must be received by the Railroad Retirement Board (RRB) within 60 days from the date of this notice. You may send your request to any field office of the RRB, or you may send it directly to the following address: Railroad Retirement Board, Reconsideration Section, 844 North Rush Street, Chicago, Illinois 60611-2092. If you have any additional evidence to be considered, you should include it with your request.

If you disagree with the reconsideration decision, you may then appeal to the Bureau of Hearings and Appeals within 60 days of the reconsideration decision.

If you have any questions about this letter or need additional information, contact our office at [Field office look up will insert district office address]. The telephone number is [Field office look up will enter phone number].

Sincerely,

12.4.6 Initial Widow Dialogue Box

If a beneficiary tab (rather than employee tab) is selected on the initial RRRAILS screen, the dialogue box will look like this:
The answers shown on questions 1-4 above are system defaults. The examiner must change the answers when appropriate. The following instructions describe situations for a letter to a widow in an initial (as opposed to “previous”) decision.

**NOTE:** Choose the widow radio button for widowers, remarried widows and widowers, and surviving divorced spouses, as well as for widows.

**Question 1:** Is this letter addressed to the beneficiary directly? Select whether the letter will go directly to the annuitant. The only situation in which it will not go directly to the annuitant is when there is a rep payee. Your answer to this question will not affect the appearance of the dialogue box. However, if you select “no”, the text of the letter itself will be changed to replace pronouns such as “you” or “your” with the annuitant’s name or the annuitant’s name with an apostrophe “s” (’s) and to correct verb forms accordingly. If you have pre-filled from a system such as APPLE, which knows the sex of the applicant, the first “you” will be replaced by the annuitant’s name and all subsequent pronouns will be replaced by he/she/his/her as appropriate.
Question 2: Is (claimant’s name) a Widow, Child, or Spouse with disabled child in her care? If widow is selected, continue to Question 3. (If child is selected, go to DCM 12.4.10. If IC Spouse is selected, go to DCM 12.4.8.)

Question 3: Is this an initial letter? Or was disability previously awarded? If initial is selected, continue to Question 4. (If previous is selected, go to DCM 12.4.12.)

Question 4: Has medical evidence or other information been requested for possible establishment of an earlier onset? This question is answered “no” as a system default; you may need to change this answer. If “yes” is selected an appropriate paragraph will be inserted in the letter. Click here to see the text of that paragraph.

Date Boxes: Enter widow’s DOB, employee’s DOD, and widow’s date of filing in the boxes provided.

Enter established onset date in the date box provided. A box will appear regarding claimed onset.

Has the disabled person indicated an onset different from the one established?

If “yes” is selected, the examiner must fill in the box for the claimed onset date. A sentence with asterisks will appear in the letter to prompt the examiner to give a free form explanation. Click here to see the text of that sentence.

If “no” has been selected, RRAILS will fill the claimed onset box with the same date that was entered in the established onset box.

The box for annuity beginning date will show an ABD based on the onset date, however, this date will not appear in the letter. RRAILS will use this date to determine whether or not the claimant is in the waiting period and select the appropriate estimated payment date paragraph for the letter. To see text of the paragraph used when the widow is still in the waiting period, click here. To see text of the paragraph used when the widow is not still in the waiting period, click here.
Does the difference in onset date have an adverse effect on ABD? This question only appears if the established onset date is different from the claimed onset date. If "no" is selected, RRAILS will print an appropriate sentence in the letter. To see the text of that sentence, click here.

When all entries have been made in the dialogue box, select OK. The dialogue box will close and the letter will re-appear. The following window will appear on the letter:

Type the appropriate number in the white box and click OK. The appropriate annuity type name will appear in the first and fourth sentences of the letter.

12.4.7 Initial Widow Letter Text

Some paragraphs (standard) are always contained in a widow initial letter. Other paragraphs (variable) will be included depending upon entries in the dialogue box.

Standard Paragraphs

Exact text and order of the standard paragraphs is shown below:

Dear:

We have determined that you meet the requirements for a disabled [widow's/widower's/remarried widow's/remarried widower's/surviving divorced spouse]
spouse’s] annuity. A railroad retirement disability onset date of [RRAILS will enter date from dialogue box] has been established in your case. Under the law, a disability annuity cannot begin earlier than the first day of the sixth month following the month in which the onset of disability occurs. In addition, a disabled [widow's/widower's/remarried widow's/remarried widower's/surviving divorced spouse’]s annuity cannot begin earlier than the month in which the railroad worker died or earlier than the month in which the [widow/widower/remarried widow/remarried widower/surviving divorced spouse] attained age 50. Other factors may also affect the beginning date of the annuity.

[Variable paragraphs which depend on the way in which you answer the dialogue box questions are inserted here.]

If you have selected direct deposit, we will send your payment to the financial institution shown on your application. If you have changed financial institutions since you filed your application, please notify your field office right away.

Railroad Retirement Board disability annuities are subject to United States Federal income tax. If you wish to elect tax withholding or change the amount of your tax withholding, your field office can assist you.

If you believe that this decision is not correct, you may request that the decision be reconsidered. If you wish this reconsideration, you must request it in writing, and your request must be received by the Railroad Retirement Board (RRB) within 60 days from the date of this notice. You may send your request to any field office of the RRB or you may send it directly to the following address: Railroad Retirement Board, Reconsideration Section, 844 North Rush Street, Chicago, Illinois 60611-2092. If you have any additional evidence to be considered, please include it with your request.

If you disagree with the reconsideration decision, you may then appeal to the Bureau of Hearings and Appeals within 60 days of the date of the reconsideration decision.

If you have any questions about this letter or need additional information, contact our office at [Field office look up will insert district office address]. The phone number is [Field office look up will enter phone number].

Sincerely,

Variable Paragraphs

Exact text and order of the variable paragraphs is shown below:

Estimated payment date paragraph used when still in the waiting period:
Therefore, your annuity cannot begin before [RRAILS will enter a date that is 6 months after the onset date]. Within 45 days of that date, you should receive your first payment and a letter explaining more about your monthly benefits.
Estimated payment date paragraph used when not still in the waiting period: We are in the process of calculating the monthly annuity. Your first payment should be issued in the next 20 days. A letter explaining the payment will also be sent when the payment is issued.

Explanatory paragraph used when the established onset date is different from that claimed: The disability onset date differs from that claimed because *********

[The examiner must replace the asterisks with an explanation or delete the entire sentence and replace it with a code paragraph or custom explanation.]

Paragraph used when additional medical evidence requested: If they have not done so already, your field office will be contacting you in regards to providing additional information to determine whether or not an earlier onset date can be established. When this information is received, your case will be reviewed again and we will determine if your onset date should be changed.

Paragraph used when an onset different than claimed is used but has no effect on ABD: Although your established onset date is different than what was alleged, this has no adverse effect on your annuity beginning date.

12.4.8 Initial Spouse with Disabled Child Dialogue Box

If the beneficiary tab (rather than employee tab) is selected on the initial RRAILS screen, the answer to question 2 is IC Spouse, and the answer to question 3 is initial, the dialogue box will look like this:
The following instructions apply to situations for a letter to a spouse with a disabled child in his/her care in an initial (as opposed to “previous”) decision.

**Question 1: Is this letter addressed to the beneficiary directly?** Select whether the letter will go directly to the annuitant. The only situation in which it will not go directly to the annuitant is when there is a rep payee. Your answer to this question will not affect the appearance of the dialogue box. However, if you select “no”, the text of the letter itself will be changed to replace pronouns such as “you” or “your” with the annuitant’s name or the annuitant’s name with an apostrophe “s” (’s) and to correct verb forms accordingly. If you have pre-filled from a system such as APPLE, which knows the sex of the applicant, the first “you” will be replaced by the annuitant’s name and all subsequent pronouns will be replaced by he/she/his/her as appropriate.

Note that while the child is being rated, the letter is addressed to the spouse. If the spouse does not have a rep payee, select “yes”. 
Question 2: Is (claimant’s name) a Widow, Child, or Spouse with disabled child in her care? If IC Spouse is selected, continue to question 3. (If widow is selected, go to DCM 12.4.6. If child is selected, go to DCM 12.4.10.)

Question 3: Is this an initial letter? Or was disability previously awarded? If initial is selected, continue to Question 4. (If previous is selected, go to DCM 12.4.12.)

Question 4: Has medical evidence or other information been requested for possible establishment of an earlier onset? This question is answered “no” as a system default; you may need to change this answer. If “yes” is selected an appropriate paragraph will be inserted in the letter. To see the text of that paragraph, click here.

Enter the disability onset date and the child’s name in the boxes provided. RRAILS inserts the date and the child’s name in the appropriate places in the letter.

When all entries have been made in the dialogue box, select OK. The dialogue box will close and the letter will re-appear.

**12.4.9 Initial Spouse with Disabled Child Letter Text**

A child who is not eligible for an annuity may be rated disabled in order to qualify a spouse for an annuity. The text for the letters sent in these cases is shown below.

Dear:

We have determined that [RRAILS enters child’s name from dialogue box] is disabled. A railroad retirement disability onset date of [RRAILS will enter date from dialogue box] has been established in [RRAILS enters child’s name from dialogue box]'s case. This determination will qualify you for a spouse annuity. [RRAILS enters child’s name from dialogue box]’s disability onset date and other factors may have an effect on your annuity beginning date.

We are in the process of calculating your annuity. Your first payment should be issued in the next 20 days. A letter explaining the payment will also be sent when the payment is issued.

If you have selected direct deposit, we will send your payment to the financial institution shown on your application. If you have changed financial institutions since you filed your application, please notify your field office right away.

Railroad Retirement Board disability annuities are subject to United States Federal income tax. If you did not file a form RRB W-4P, we must withhold taxes from your annuity as if you were married with three withholding allowances. If
you wish to change the amount of your tax withholding, your field office can assist you.

If you believe that this decision is not correct, you may request that the decision be reconsidered. Your request must be in writing and should explain why you disagree. If you wish this reconsideration, your request must be received by the Railroad Retirement Board (RRB) within 60 days from the date of this notice. You may send your request to any field office of the RRB, or you may send it directly to the following address: Railroad Retirement Board, Reconsideration Section, 844 North Rush Street, Chicago, Illinois 60611-2092. If you have any additional evidence to be considered, you should include it with your request.

If you disagree with the reconsideration decision, you may then appeal to the Bureau of Hearings and Appeals within 60 days of the reconsideration decision.

If you have any questions about this letter or need additional information, our office at [Field office look up will insert district office address]. The telephone number is [Field office look up will enter phone number].

Sincerely,

12.4.10 Initial Survivor Disabled Child Dialogue Box

If a beneficiary tab (as opposed to an employee tab) is selected on the initial RRAILS screen, the answer to question 2 is child, and the answer to question 3 is initial, the dialogue box will look like this:
The following instructions describe situations for a letter to a survivor child in an initial (as opposed to “previous”) decision.

Question 1: Is this letter addressed to the beneficiary directly? Select whether the letter will go directly to the annuitant. The only situation in which it will not go directly to the annuitant is when there is a rep payee. Your answer to this question will not affect the appearance of the dialogue box. However, if you select “no”, the text of the letter itself will be changed to replace pronouns such as “you” or “your” with the annuitant’s name or the annuitant’s name with an apostrophe “s” (‘s) and to correct verb forms accordingly. If you have pre-filled from a system such as APPLE, which knows the sex of the applicant, the first “you” will be replaced by the annuitant’s name and all subsequent pronouns will be replaced by he/she/his/her as appropriate.

Question 2: Is (claimant’s name) a Widow, Child, or Spouse with disabled child in her care? If child is selected, continue to Question 3. (If widow is selected, go to DCM 12.4.6. If IC Spouse is selected, go to DCM 12.4.8.)
Question 3: Is this an initial letter? Or was disability previously awarded? If initial is selected continue to Question 4. (If previous is selected, go to DCM 12.4.12)

Question 4: Has medical evidence or other information been requested for possible establishment of an earlier onset? This question is answered “no” as a system default; you may need to change this answer. If “yes” is selected an appropriate paragraph will be inserted in the letter. To see the text of this paragraph, click here.

Date Boxes: Enter established onset date in the date box provided. A box will appear regarding claimed onset.

Has the disabled person indicated an onset different from the one established? If “yes” is selected, the examiner must fill in the box for the claimed onset date. A sentence with asterisks will appear in the letter to prompt the examiner to give a free form explanation. To see the text of this sentence, click here.

If “no” has been selected, RRAILS will fill the claimed onset box with the same date that was entered in the established onset box.

Does the difference in onset date have an adverse effect on ABD? This question only appears if the established onset date is different from the claimed onset date. If “no” is selected, RRAILS will print an appropriate sentence in the letter. To see the text of this sentence, click here.

When all entries have been made in the dialogue box, select OK. The dialogue box will close and the letter will re-appear.

12.4.11 Initial Survivor Child Letter Text

Some paragraphs are always contained in a survivor child’s initial letter. Other paragraphs will be included depending upon entries in the dialogue box.

Standard Paragraphs

Exact text and order of standard paragraphs is shown below:

Dear:
We have determined that you meet the requirements for a disabled child's annuity. A railroad retirement disability onset date of [RRAILS enter the date from the dialogue box] has been established in your case.

A survivor annuity cannot begin earlier than the month in which the railroad worker died. Other factors may also affect the beginning date of the annuity. We are in the process of calculating your annuity. Your first payment should be issued in the next 20 days. A letter explaining the payment will also be sent when the payment is issued. After you receive that notice, if you have any questions, contact your nearest field office.

[Variable paragraphs which depend on the way in which you answer the dialogue box questions are inserted here.]

If you have selected direct deposit, we will send your payment to the financial institution shown on your application. If you have changed financial institutions since you filed your application, please notify your field office right away.

Railroad Retirement Board disability annuities are subject to United States Federal income tax. If you wish to elect tax withholding or change the amount of your tax withholding, your field office can assist you.

If you believe that this decision is not correct, you may request that the decision be reconsidered. Your request must be in writing and should explain why you disagree. If you wish this reconsideration, your request must be received by the Railroad Retirement Board (RRB) within 60 days from the date of this notice. You may send your request to any field office of the RRB, or you may send it directly to the following address: Railroad Retirement Board, Reconsideration Section, 844 North Rush Street, Chicago, Illinois 60611-2092. If you have any additional evidence to be considered, you should include it with your request.

If you disagree with the reconsideration decision, you may then appeal to the Bureau of Hearings and Appeals within 60 days of the reconsideration decision.

If you have any questions about this letter or need additional information, contact our office at [Field office look up will insert district office address.] The telephone number is [Field office look up will enter phone number].

Sincerely,

Variable Paragraphs

Exact text and order of the variable paragraphs is shown below:

Explanatory paragraph used when the established onset date is different from that claimed: The disability onset date differs from that claimed because ******** [The examiner must replace the asterisks with an explanation or delete the
Paragraph used when additional medical evidence requested: If they have not done so already, your field office will be contacting you in regards to providing additional information to determine whether or not an earlier onset date can be established. When this information is received, your case will be reviewed again and we will determine if your onset date should be changed.

Paragraph used when an onset different than claimed is used but has no effect on ABD: Although your established onset date is different than what was alleged, this has no adverse effect on your annuity beginning date.

12.4.12 Previous for Employee and Beneficiary Dialogue Box

When a case has previously been rated disabled, and the case is now being reviewed to determine whether an earlier onset can be set, answer question 3 “previous.” If the answer to question 3 is previous, then question 4 and all that would follow it in the initial letter will disappear. This is true regardless of which tab is selected (employee or beneficiary) on the initial RRAILS screen and regardless of how question 2 is answered. The dialogue box will contain questions 1, 2, 3, and 5.
Note: The “previous” letters to beneficiaries will contain the same sequence of questions and results as the “previous” letter to employees. The only difference is the choices for question 2.

Question 1: Is this letter addressed to the beneficiary directly? Select whether the letter will go directly to the annuitant. The only situation in which it will not go directly to the annuitant is when there is a rep payee. Your answer to this question will not affect the appearance of the dialogue box. However, if you select “no”, the text of the letter itself will be changed to replace pronouns such as “you” or “your” with the annuitant’s name or the annuitant’s name with an apostrophe “s” (‘s) and to correct verb forms accordingly. If you have pre-filled from a system such as APPLE, which knows the sex of the applicant, the first “you” will be replaced by the annuitant’s name and all subsequent pronouns will be replaced by he/she/his/her as appropriate.

Question 2: Choose whether this letter refers to the Employee or to a disabled IPI child of (employee’s name), or
Is (claimant’s name) a Widow, Child, or Spouse with disabled child in care?
Select the annuity type, such as employee, IPI child, widow, etc.

Question 3: Is this an initial letter? Or was disability previously awarded? If “previous” is selected, Question 4 will disappear; continue to Question 5. (If initial is selected, go DCM 12.4.2 if the letter is for an employee, 12.4.4 for an IPI child, 12.4.6 for a widow, 12.4.8 or IC Spouse, or 12.4.10 for survivor child.)

Question 5: Has the claimant submitted additional medical information? (“No” will be shown as a system default. You may need to change this answer.)

If “no” is selected, no further questions will appear. Enter the previously established onset date in the box provided. Click OK and the letter will appear.

If “yes” is selected, questions 6 will appear, with “no” as the default answer. The dialogue box will look like this:

[Image of dialogue box]

Question 6: Has an earlier onset date been set based on the additional medical evidence or information? If question 6 is answered yes, boxes will appear for the
previously established and newly established onset dates. The dialogue box will look like this:

Enter the appropriate dates in the boxes provided.

If question 6 is answered “no”, the boxes for previously established and newly established onset dates will not appear.

When all entries have been made in the dialogue box, select OK. The dialogue box will close and the letter will re-appear.

**12.4.13 Previous Employee or Beneficiary Letter Text**

This letter is sent when a disability annuity is already being paid, but additional medical evidence or information has been requested to determine whether an earlier onset date can be established. Some paragraphs are always contained in a “previous” letter. Other paragraphs will be included depending upon entries in
the dialogue box. The text is the same for employees and all types of beneficiaries.

Variable Paragraphs

Exact text and order of variable paragraphs is shown below:

Paragraph used when additional medical evidence was requested for a possible earlier onset date, but it was not submitted. (Question 5 in the dialogue box was answered “no”): A disability onset date of [RRAILS will enter date from dialogue box] was established for you. You were requested to provide additional information in order to determine whether or not an earlier onset date could be established. Since you have not provided the requested information, an earlier onset date cannot be established. This decision has no effect on your current annuity payments.

Paragraph used when an earlier onset date was established based on the additional medical evidence that was submitted. (Question 6 in the dialogue box was answered “yes”). You have submitted additional information in connection with your disability annuity. After careful review of this information, it has been determined that your disability onset will be changed from [RRAILS will enter date from dialogue box] to [RRAILS will enter date from dialogue box]. Your annuity beginning date will be adjusted accordingly. In the near future, you will receive a payment letter explaining the payment amount.

Paragraph used when additional medical evidence was submitted but did not warrant a change in the onset date. (Question 6 in the dialogue box was answered “no”): You have submitted additional information in connection with your disability annuity. After a careful review, it has been determined that an earlier disability onset date cannot be established based on this information. This decision has no effect on your current annuity payments.

Standard Paragraphs

All “previous” letters will end with the following standard paragraphs:

Dear:

[Variable paragraphs, which depend on the way in which you answer the dialogue box questions, are inserted here.]

If you believe that this decision is not correct, you may request that the decision be reconsidered. Your request must be in writing and should explain why you disagree. If you wish this reconsideration, your request must be received by the Railroad Retirement Board (RRB) within 60 days from the date of this notice. You may send your request to any field office of the RRB or you may send it directly to the following address: Railroad Retirement Board, Reconsideration
Section, 844 North Rush Street, Chicago, Illinois 60611-2092. If you have any additional evidence to be considered, please include it with your request.

If you disagree with the reconsideration decision, you may then appeal to the Bureau of Hearings and Appeals within 60 days from the date of the reconsideration decision.

If you have any questions about this letter or need additional information, contact our office located at [Field office look up will insert district office address]. The telephone number is [Field office look up will enter phone number]

Sincerely,

12.5 D-BRIEF Program

12.5.1 Introduction

The Disability Briefing Document Program (D-BRIEF) is an interactive PC program that is accessed through RRAILS. This program is used by disability examiners for the completion of initial disability rationales. The D-BRIEF program asks the examiner all of the sequential evaluation questions involved in an initial disability annuity decision. It provides space for free form discussion of the medical evidence. It also asks questions needed for a simultaneous single disability freeze decision and those questions needed for the occupational disability Quality Assurance report (formerly taken from the Form G-253). Most questions that are answered by choosing a radio button will include a radio button for “unanswered”. This button is the default. Every question that contains this option will show as “unanswered” until the examiner changes it. The examiner can access D-BRIEF at any point in the decision process. The examiner can also exit the program at any point and all the entries made will be saved. This means that a decision can be begun on one day and finished on another. An uncompleted decision can also be re-assigned to another examiner.

The D-BRIEF program produces a document called a G-325B. This form replaces the G-325.1 in initial disability annuity decisions and the G-253 in occupational disability annuity decisions. A blank G-325B must be accessed from the RRAILS menu for those initial cases that are not done on D-BRIEF. Only post cases will be done on the G-325.1.

The D-BRIEF program must be used for all initial disability decisions, except for the following types of cases:

- Disability decisions being re-done to grant an earlier onset date
- Completed disability decisions that must be re-opened due to the death of the claimant during the waiting period.
• A child being rated for the employee O/M.

• A child being rated to qualify a spouse for an annuity.

• A disabled survivor child who was previously rated disabled for O/M or Medicare purposes. (These are considered to be post rather than initial cases and should be done on a G-325.1.)

• A child who had been previously entitled to a disabled survivor child’s annuity, been terminated, and now files a new application. (See DCM 3.10.10 for re-entitlement requirements.)

• A widow or survivor child whose annuity grant is based solely on alcohol or drug addiction.

• A widow or survivor child allowance where the case is included in the financial interchange. (See DCM 6.7.3D)

The D-BRIEF program must not be used for disability decisions other than initial disability decisions.

12.5.2 Access And Pre-fills

Access D-BRIEF from the Main Screen for RRAILS. Ensure that the RRAILS SHELF and Cases sections are open, as shown in the picture in Method 1, Step 1 below. See FOM 1596.10 for details about the Main Screen for RRAILS.

Information about the claimant must be either downloaded or manually typed into each field in the Disabled Applicant Information and Employee Information sections of D-BRIEF by the rating examiner. There are three primary methods of entering information into D-BRIEF, two of which are automated. The rating and reviewing examiners are each responsible for ensuring that accurate information is entered into each field regardless of whether the information is automatically transferred or manually typed into D-BRIEF.

METHOD 1 (Automated Entry Of Claimant Information From RRAILS)

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Click on the New Case button on the Control Bar or in the Cases section.</td>
</tr>
</tbody>
</table>
The RRAILS **New Contact** client window will appear. See [FOM 1596.20](#) for general information how to download information from the mainframe at this screen.

After typing in the employee’s SSA number (hyphens are not needed) in the **Number** box, click anywhere in the **Lookup No:** box.
3. Click on either the **APPLE** button or **REQUEST** button in the **Lookup Information** dialogue box.

When deciding whether to click on the **APPLE** or **REQUEST**
buttons, consider the following:

- **APPLE** will have protected filing date information; **REQUEST** converts a protected filing date to a regular filing date. Protected filing date information may affect the annuity beginning date (ABD) and time-lapse exclusion. For information on time lapse exclusion, see DCM 4.3.9.

- **APPLE** must be selected if the individual is already receiving an annuity but is now filing a claim for potential dual entitlement. The claim would be filed as a disabled widow(er), surviving disabled divorced spouse, or remarried disabled widow(er). Do not select the **FSIS** or **PREH** buttons.

- **REQUEST** will have the most updated information on employee’s service months, C/C determination, and address. Service month information comes into play when lag or settlement months are needed for eligibility. You will need the most current address if you use the Decision Letters feature in D-BRIEF for RL-121f (annuity grant) and RL-210 or RL-210d (DF allowance), RL-260, RL-260a, or RL-260b (DF denial), or for RL-216 (annuity technical denial) letters.

4 If the case only has one application or beneficiary, only one tab will be shown.

If multiple tabs are displayed, search each tab for a prefix such as “EMP” (designating information about a railroad employee) or “DIS” (designating information about a disabled widow or child) and then...
search the first few letters of the first name of the person who filed the application. Multiple tabs showing the same information most likely mean that there have been multiple applications by that person. Ensure that the correct tab is selected by clicking on it. The information for that applicant or beneficiary will be displayed. (In the example image below, there are two applications for disabled widow annuity when information is loaded using the **APPLE** button. Ensure that the correct application is chosen by selecting the correct tab.)

After ensuring that the correct tab is selected:

a) highlight **+DBrief** and then click on **Open**, or

b) double click on **+DBrief**.

5 Click on **Get from RRAILS** (yellow button at the top left corner of screen).
METHOD 2 (Automated Entry of Claimant Information Directly From APPLE Or REQUEST)

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
</table>
| 1    | On the **Main Screen** for **RRAILS** screen, either  
|      | a) highlight **+DBrief** and then click on **Open**, or  
|      | b) double click on **+DBrief**. |
A blank D-BRIEF Main screen will appear.

2 On the D-BRIEF Main screen, click on either Get from APPLE or Get from REQUEST. (Yellow buttons at top of screen).

NOTE: The Get from APPLE button must be selected if the individual is already receiving an annuity but is now filing a claim for potential dual entitlement. The claim would be filed as a disabled widow(er), surviving disabled divorced spouse, or remarried disabled widow(er).
3 Either the GetAPPLE Lookup Number

GetAPPLE Lookup Number

Please enter a claim number to lookup. [OK] [Cancel]

or GetREQUEST Lookup Number

GetREQUEST Lookup Number

Please enter a claim number to lookup. [OK] [Cancel]

window will appear. Enter a claim number (hyphens are not needed) in the box provided and then click OK.

4 If there is only one application on the number you have entered, the prefills will appear on the Main Screen.
If there is more than one application on the claim number you have entered, the **Data from** window will appear (sample image shown below). Select the applicant whose case you are rating. Click the **Load Selected Applicant** button. The window will close and the prefills will appear on the **Main Screen**.

![Data from window example](image)

**Method 3 (Manual Entry Of Claimant Information By Examiner)**

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
</table>
| 1    | On the **Main Screen** for **RRAILS**, either  
|      | a) highlight **+DBrief** and then click on **Open**, or  
|      | b) double click on **+DBrief**. |
2 All fields must be entered by typing the correct information.
For two additional methods of accessing cases that have already been entered on D-BRIEF, see DCM 12.5.9.

12.5.3 Main Screen

Disabled Applicant Information and Employee Information Sections
When using APPLE, all of the Disabled Applicant Information in the pink section and all of the Employee Information in the gray section is pre-filled from APPLE. When using REQUEST, all of the Applicant Information and all of the Employee Information are pre-filled from REQUEST except for the Protected Filing Date field. In employee-only cases in which the employee has died since the filing date, enter the employee’s date of death in MM/DD/CCYY format in the box provided. All of your corrections will be saved when you exit the program.

The rating examiner and reviewer must each ensure that the fields identified in the above image contain accurate information before completing any other D-BRIEF field or screen. If inaccurate information is found in any of the fields identified in either the Disabled Applicant Information or Employee Information sections, the rating examiner is required to manually type the correct information before submitting the case for authorization. If a change is made in the Date of Birth field, D-BRIEF will re-calculate the age at filing and the age today.

Dual-entitlement claims must be closely reviewed since the identifying information in the Disabled Applicant Information section is different from the identifying information in the Employee Information section.

When completing D-BRIEF in cases involving potential dual-eligibility, information in the Employee Information section always refers to the deceased railroad.
employee, not the applicant. In addition, special attention to accuracy must be afforded to the following fields when completing D-BRIEF in potential dual-eligibility claims:

- **Bene Sym** field (to the left of the Prefix) in the Disabled Applicant Information (pink) section must contain a “W”,

- the correct **RRB claim number** is shown in the Disabled Applicant Information section,

- the correct social security numbers are entered in the **SSA Number** field in the Disabled Applicant Information and Employee Information sections, and

- the deceased railroad employee’s name is correctly entered into the **Name** field in the Employee Information section.

**Item 1 Type of Disability Claim?** Based on applicant information pre-fills, choose the radio button for Employee, Widow, or Child.

**Item 2 Type of Claim** The radio button for **None** will be the system default. When **None** is selected, changes can be made to the pre-filled information above it. Once any necessary changes are made, select the radio button for Initial Disability Decision.

**Item 3 Application Type?** The default radio button for this question is **Unknown**. The other choices will depend upon how item 1 is answered. Based on the age, creditable service months, and C/C information in the Employee Information section, employees will show either a radio button for **Occupational** or a radio button for **Total and Permanent**. For a widow (including claims involving potential dual-entitlement), your only choice will be the radio button for **widow**. For a child, choose from among the following radio buttons: **Survivor, IPI Child, Child (Qualifies Spouse)**

Click on the **Open as Examiner** button.

**12.5.4 Control Center Screen**

After clicking on the **Open as Examiner** button from the **Main** screen, the D-BRIEF Control Center screen will appear. In widow and child cases in which the applicant has died since the filing date, enter the date of death in MM/DD/CCYY format in the box labeled Applicant DOD on the right. In employee cases, this will be pre-filled from the employee DOD entry on the **Main** screen.
**Item 1 Is there a Representative Payee?** Click on the appropriate radio button. If there is a rep payee, type the payee’s name in the box provided.

**Item 2 Is the employee/widow/child in compensated railroad service?** Select the appropriate radio button. In all cases in which yes is selected, item 3 will not appear.

For occupational employees, if you select yes, only those questions needed for QA report (formerly taken from Form G-253) will appear on the Employee Occupational Qualifications Screen. For total and permanent employees, widows, and survivor children, if you select yes, the Qualifications button will not appear.

**Item 3 Alleged Disability Onset Date** Enter the alleged onset date. Click anywhere inside the box and then type in the date in a MM/DD/CCYY format.

Click on the Qualifications button. After the Qualifications screen is completed and you have returned to the Control screen, the Qualifications button will display the word “done.” Click on the Decision Summary button.

For Instructions on completion of the Employee Occupational Qualifications screen, see DCM 12.5.5.1.

For instructions on completion of the Employee Total and Permanent Qualifications screen, see DCM 12.5.5.3.
For instructions on completion of the Widow Qualification screen, see DCM 12.5.5.4.

For instructions on completion of the Child Qualification screen, see DCM 12.5.5.5.

For instructions on completion of the Decision Summary screen, see DCM 12.5.6.

12.5.5 Qualifications Screens

The type of questions and order of questions on the Qualifications screens will depend on the annuity type. In addition, extra buttons that open windows will appear on some of the screens. For employee occupational cases, the Qualifications screen will have a button that opens an additional Qualifications window that contains the questions that used to be asked on the G-253. Employee and widow cases may contain an RFC Documentation button. Occupational cases with a simultaneous DF, total and permanent employee cases, and widow cases may contain a Vocational Rule Documentation button.

For instructions on Employee Occupational Qualifications screen, see DCM 12.5.5.1.

For instructions on Employee Total and Permanent Qualifications screen, see DCM 12.5.5.3.

For instructions on Widow Qualifications screen, see DCM 12.5.5.4.

For instructions on Child Qualifications screen, see DCM 12.5.5.5.

12.5.5.1 Occupational Employee Qualifications Screen (General)

Item 1. Click the Employee Occupational Qualifications Button to the right to view or edit Employee Occupational Qualification Information. For instructions on filling out the entries shown after clicking this button, go to DCM 12.5.5.2.

Item 2. Is the employee still working in non-railroad service in Substantial Gainful Activity (SGA)? For information on SGA, see DCM 10.4.

Item 2a. Is the employee still working in non-railroad service and earning more than $850 per month? If yes, a reminder regarding work deductions will appear on the Decision Summary Screen. For information on disability work deductions, see DCM 3.5.1.
**Item 3. Enter Disability 5-digit Diagnostic Code.** Using the drop down, select the appropriate diagnostic code; or type the diagnostic code in the box provided. If you type in the code, you must tab out of the box to get to the next question.

**Item 4. List medical diagnoses in order of severity.** (OLDDS limit 100 characters) Click inside the box. Type the names of the impairment(s) in order of severity. Check for correct spelling in the medical dictionary. If you need more than 100 characters for the diagnosis, type the remaining text in the box labeled **Diagnosis continued in Remarks.**

**Item 5. Is the impairment expected to last at least 12 months or result in death?** If this question is answered No, no further questions will appear on this screen.

**Item 6. Does the employee have a Disability Freeze insured status?** Select the Yes, No or Deferred radio button. The Deferred button should be selected if all Disability Freeze (DF) determinations are being handled by the Disability Post Section.

If this question is answered No, item 7 will prefill with Yes-Other and the following statement will appear: “This is a Simultaneous Freeze Denial because employee is not insured for a Disability Freeze.”

(Note: If you click on the words “insured status” in this question, an EDMA screen with the employee’s earnings will pop up for use in determining the insured status. See DCM 6.3.2.)

**Item 7. Is this a simultaneous Single Freeze decision?** If the Deferred radio button was clicked in Item 6, the No-Other radio button will be prefilled and the sentence “The disability freeze determination is being deferred because it was referred to the post section.” will appear.

If the (DF) is a Joint Freeze, select the No-Joint SSA radio button, and the following statement will appear in the box provided: “The disability freeze determination is not being made because it is a joint decision with the Social Security Administration.”

If the (DF) is a Single Freeze but is being deferred, select the No-Other radio button. The following sentence fragment will appear in the box provided: “The disability freeze determination is being deferred because”. Click in the box and complete the sentence.

(All sentences will appear under the General Case Information heading on the Data Collection screen and under the Disability Freeze Conclusion heading on the Disability Conclusion screen.)
Item 8. Is there a physical or mental RFC in file from the treating physician, the medical exam contractor, from SSA, or from the medical consultant? This question will appear in ICE cases, cases that meet or equal the listings, and in cases in which a simultaneous DF decision is being made and the employee has a DF insured status and is not working in SGA. If the impairment meets or equals the listings and using an RFC will not provide an earlier onset date than the date that the listings are met or equaled, answer No.

Otherwise, answer this question “yes” if you have any

- physical RFCs from the treating physician, the medical exam contractor, SSA, and/or

- any mental RFCs from RRB’s medical consultant or from SSA.

For purposes of this question, do not consider mental restrictions provided on a G-250a or a consultative examination to be an RFC. For purposes of this question, a G-250 with the revision date of 09-05 or later is not considered to be an RFC.

If you selected Yes, click on the RFC Documentation button. For instructions on filling out the entries shown after clicking this button, go to DCM 12.5.5.6. After you have completed the RFC Documentation screen, return to the Employee Qualifications screen and go to Item 8a.

Item 8a Is there conflicting medical evidence in file that is relevant to the decision? This question only appears in initial occupational ICE cases.

This question refers only to objective medical findings. It does not refer to opinions or to RFCs. A piece of medical evidence is relevant to the decision if it concerns the medical impairment on which the decision is based. For example, a piece of medical evidence describing an evaluation for carpal tunnel syndrome that was done 5 years ago is not relevant to the decision if the decision is based on a recent knee injury. A piece of medical evidence is conflicting if its overall contents substantially contradict the findings of another piece of medical evidence. For example, a flow volume loop that shows severe restrictions is conflicting if there is a pulmonary function test (PFT) in file that shows only mild restrictions. Of course, both the flow volume loop and the PFT are relevant only if the decision is based on a respiratory impairment.

Item 9 Is the claimant able to do Past Relevant Work? For occupational cases, this question only appears if you are making a simultaneous DF decision and the claimant has a DF insured status and the claimant is not in SGA. If Yes, as the claimant described or Yes, as normally done in the national economy is selected, no further questions will appear on this screen. Otherwise, Item 10 will appear.
Item 10 Is a medical vocational rule to be applied  This item will appear if:

- This is a simultaneous DF decision, and
- The employee has a DF insured status, and
- The employee is not working in SGA, and
- A physical RFC for which the lifting and carrying restrictions meet the criteria for sedentary, light, or medium work has been entered, and
- The employee is not able to do past relevant work

If this question is answered Yes, click on the Vocational Rule Documentation button and answer the questions on that screen. For instructions on filling out the entries shown after clicking this button, go to DCM 12.5.5.7. After you have completed the Medical Vocational Rule Documentation screen, return to the Employee Qualifications screen.

When all questions on the Employee Qualification screen are completed, click on the red button labeled Close Qualifications Window. The Control screen will re-appear.

To return to instructions for the Control screen, click here: DCM 12.5.4.

To go to instructions for the Decision Summary screen, click here: DCM 12.5.6.

12.5.5.2 Employee Occupational Qualifications Button (G253 Information)
Item 1. Does the employee have a covered railroad job title? Select the appropriate radio button to respond yes or no. The covered job titles are: Trainman, Locomotive Engineer, Train Dispatcher, Carman, Signalman, Trackman, Machinist, Shop Laborer, Sales Representative, and General Office Clerk.

Item 1a. What was the employee’s railroad job title? If item 1 was answered yes, use the drop down menu and select the appropriate job title. If item 1 was answered no, type the job title in the box provided.

Item 2. Enter the 3-digit body system code corresponding to the basis for your decision. Use the drop down menu. After you have answered this question, a bold sentence will appear as to whether this body system is covered by the tables. Another bold sentence will appear as to whether the job title is covered by the tables.

Item 3. Was a G-251a or G-251b Job Information Form received from the RR employer? If you select the No radio button, you must answer Item 3a. If you select the Yes radio button, Item 3a will not appear; however, another question will appear: Are there material differences between the G-251a/b and the vocational report? If the listings are met or equaled, the tables are met, or there is a carrier disqualification, answer this question No. Otherwise, self explanatory.

Item 3a. Has it been at least 30 days since the G-251a/G-251b was released to the employer? Self Explanatory.

Item 4. Was the medical evidence of record sufficient to make a determination? If any exams have been ordered, select No. If you have selected No, the Exams Ordered window will appear.
Click on **Select Exams** button. The **Medical Exams List with Costs** window will appear.

Multiple exams can be selected by holding down the **control key** and selecting the exams.

To select an exam, move the cursor to the exam and click on it. The exam will be highlighted. Note: there are two entries for each type of exam; one has a designation of the month and year that begins the current fiscal year and the other has a designation for the month and year that began the previous fiscal year. Choose the designation for the fiscal year in which the exam was ordered. For example, if the exam was ordered before 10/1/2005, select the exam designated (**QTC 10-04**). If the exam was ordered after 9/30/2005, select the exam designated (**QTC 10-05**). Multiple exams can be selected by holding down the **control key** and selecting the exams.

After all exams are selected, click on **Add Selected Exams** button at the bottom left of the **Medical Exams List with Costs** window. The **Exams Ordered** window will re-appear. The exam code, exam cost, and exam name for all of the exams you have selected will appear in the window.
Review the list of exams. If an exam on the list is not correct, select that exam and click on the Remove Exam button. If all is correct, click on Keep Exam List button. The General Medical Documentation screen will re-appear showing the number of exams ordered.

**Item 4b. Was a consultative medical opinion ordered?** Self Explanatory.

**Item 5. Does the impairment meet or equal the Listing of impairments?** If you select the *No* radio button, **Item 6** will appear. If you select the *Meets* radio button or the *Equals* radio button, **Item 5a** will appear.

**Item 5a The Impairment Listing considered is** Enter the appropriate listing number in the box provided. If a listing number is not provided for a case in which *Equals* is selected, enter the words “per medical opinion.” No further questions will appear on this screen.

**Item 6. Has the employee been carrier disqualified?** If you select the *No* radio button, **Item 7** will appear. If you select the *Yes* radio button, no further questions will appear on this screen.

**Item 7. Were the Tables or ICE used to make occupational disability decision?** If either the job title or the 3 digit body code is not covered, the system will pre-fill this answer as *ICE* and will pre-fill **Item 7a** as *D*. Otherwise, you must choose the radio button for *Tables* or *ICE*.

**Item 7a. (ICE selected in Item 7) Tables were not used because (Choose one: A,B,C,D.)**

A. there is no matching disability test

B. there is no D rating,
C. the information is not consistent or can not be simply clarified,

D. the job title and/or medical condition is not covered by the tables.

Item 7a. (Tables selected in Item 7) The following tables were used to make this decision. A box will appear. Enter the Table information inside the box provided. This should include the body system, the job title, and the page number on which the specific table criteria appears in the Disability Manual for Assessment of Occupational Disability Claims.

Click on the Return to Qualifications Screen button at the bottom of the screen.

To return to instructions for the general occupational Employee Qualifications screen, go to DCM 12.5.5.1.

12.5.5.3 General Employee Qualifications Screen for Total and Permanent Annuity

NOTE: In Railroad Retirement and Survivors Improvement Act of 2001 (RRSIA) cases in which the employee is under age 62, the order of items 1 and 2 is reversed. This is necessary because an employee filing for a disability annuity under the RRSIA provisions must have an insured status under the Social Security Act. See DCM 3.2.1.

Item 1. What was the employee’s railroad job title? Self-explanatory.

Item 2. Does the employee have a Disability Freeze insured status? Select the Yes, No, or Deferred radio button. The Deferred button should be selected if all DF determinations are being handled by the Disability Post Section EXCEPT in RRSIA cases.

If the employee is filing for an annuity under the RRSIA provisions, determine if the EE has a DF insured status and select Yes or No. (Note: If you click on the words “insured status” in this question, an EDMA screen with the employee’s earnings will pop up for use in determining the insured status. See DCM 6.3.2)

In RRSIA cases in which the employee is under age 62, if this question is answered no, Item 3 will not appear, Item 4 will pre-fill with code 80010, item 5 will pre-fill with a denial reason, and no further questions will appear on this screen after Item 5. If this question is answered No, item 7 will prefill with Yes-
Other and the following statement will appear:  *This is a Simultaneous Freeze Denial because employee is not insured for a Disability Freeze.*

**Item 3.** Is the employee still working in non-railroad service in Substantial Gainful Activity (SGA)? If you answer yes, **Item 4** will pre-fill with code 80010 and **Item 5** will pre-fill with a denial reason. No further questions will appear on this screen after **Item 5**. For information on SGA, see **DCM 10.4**.

**Item 3a.** Is the employee still working in non-railroad service and earning more than $850 per month? If yes, a reminder regarding work deductions will appear on the **Decision Summary** screen. For information on disability work deductions, see **DCM 3.5.1**.

**Item 4.** Enter Disability 5-digit Diagnostic Code. Using the drop down, select the appropriate diagnostic code; or type the diagnostic code in the box provided. If you type in the code, you must tab out of the box to get to the next question. In technical denial cases described under **Item 2** and **Item 3**, this will be pre-filled with code 80010.

**Item 5.** List medical diagnoses in order of severity. (OLDDS limit 100 characters). Click inside the box. Type the names of the impairment(s) in order of severity. Check for correct spelling in the medical dictionary. If you need more than 100 characters for the diagnosis, type the remaining text in the box labeled **Diagnosis continued in Remarks**. In technical denial cases described under **Item 2** and **Item 3**, this will be pre-filled with a denial reason and no further questions will appear on this screen.

**Item 6.** Is the impairment expected to last at least 12 months or result in death? If No is selected, no further questions will appear on this screen.

**Item 7.** Is this a simultaneous Single Freeze decision?

If **item 6** was answered Yes, then:

- If the (DF) is a Joint Freeze, select the No-Joint SSA radio button, and the following statement will appear in the box provided: *"The disability freeze determination is not being made because it is a joint decision with the Social Security Administration."

- If the (DF) is a Single Freeze but is being deferred, select the No-Other radio button, and the following sentence fragment will appear in the box provided: *"The disability freeze determination is being deferred because"*. Click in the box and complete the sentence.

**NOTE:** If the Deferred radio button was clicked in item 6, the No-Other radio button will be prefilled and the sentence "The disability freeze determination is being deferred because it was referred to the post section." will appear.
(All sentences will appear under the General Case Information heading on the Data Collection screen and under the Disability Freeze Conclusion heading on the Disability Conclusion screen.)

**Item 8. Does the impairment meet or equal the listing of impairments?**

**No/Meets/Equals**  If you select the Meets radio button or the Equals radio button, Item 8a will appear.

**Item 8a The Impairment Listing considered is**  Enter the appropriate listing number in the box provided. If a listing number is not provided for a case in which Equals is selected, enter the words “per medical opinion”.

**Item 9. Is there a physical or mental RFC in file from the treating physician, the medical exam contractor, from SSA, or from the medical consultant?**

**NOTE:**  This question will appear even if the impairment meets or equals the listing. If an RFC will provide an onset date that is earlier than the date the listings are met or equaled, answer “yes”. If the impairment meets or equal the listings and using an RFC will not provide an earlier onset date, answer No.

If you selected Yes, click on the RFC Documentation button. For instructions on filling out the entries shown after clicking this button, go to DCM 12.5.5.6. After you have completed the RFC Documentation screen, return to the Employee Qualifications screen and go to Item 10. If you selected No, no further question will appear on this screen. Otherwise, Item 10 will appear.

**Item 10. Is the claimant able to do Past Relevant Work?**  If Yes, *as the claimant described or Yes, as normally done in the national economy* is selected, no further questions will appear on this screen.

**Item 11. Is a medical vocational rule to be applied?**  This item will appear if:

- The employee is not working in SGA, and
- A physical RFC that meets the lifting and carrying criteria for sedentary, light, or medium work has been entered, and
- The employee is not able to do past relevant work

If this question is answered Yes, click on the Vocational Rule Documentation button and answer the questions on that screen. For instructions on filling out the entries shown after clicking this button, go to DCM 12.5.5.7. After you have completed the Medical Vocational Rule Documentation screen, return to the Employee Qualifications screen.

When all questions on the Employee Qualifications screen are completed, click on the red button labeled Close Qualifications Window. The Control screen will re-appear.
To return to instructions for the **Control** screen, click here: DCM 12.5.4.

To go to instructions for the **Decision Summary** screen, click here: DCM 12.5.6.

**12.5.5.4 Widow Qualifications Screen**

This screen is used for widows, widowers, remarried widows and widowers, and surviving divorced spouses.

**Item 1. Was the claimant previously entitled to an annuity on this claim number (disability or young parent)?** If you answer yes, Item 1a will appear. If you answer no, the prescribed period ending date will appear in the box provided. (Note: If you click on the words “previously entitled” in this question, PREH will open for you to check annuities on this claim number. If the employee died prior to 1995, however, you will have to check the file for previous entitlement information.)
**Item 1a. Date of Last Previous Entitlement** Enter the last date to which the widow was entitled to the previous annuity in the box provided. For example, if the annuity terminated effective June 1, 2002, enter May 31, 2002 and tab out of the box. The prescribed period ending date will appear in the appropriate box.

If the alleged onset date is after the prescribed period ending date, **Items 2 and 3** will not appear; **Item 4** will pre-fill with code 80010; and **item 5** will pre-fill with a denial reason. No further questions will appear on this screen after **Item 5**.

**Item 2. Has the widow(er) remarried since marriage to the employee ended?** If you answer **yes**, **Items 2a and 2b will appear**.

**Item 2a. Enter the date of remarriage** Self-explanatory

**Item 2b. Is the widow remarried now?** Self-explanatory. If the AOD is after the date of re-marriage and the widow is still married, **Item 3** will not appear; **Item 4** will pre-fill with code 80010; and **item 5** will pre-fill with a denial reason. No further questions will appear on this screen after **Item 5**. If the date of remarriage is prior to attainment of age 50 and the widow is still married, **Item 3** will not appear; **Item 4** will pre-fill with code 80010; and **item 5** will pre-fill with a denial reason; no further questions will appear on this screen after **Item 5**.

**Item 3. Is the widow still working in non-railroad service in Substantial Gainful Activity (SGA)?** If you answer **yes**, **Item 4** will pre-fill with code 80010 and **item 5** will pre-fill with a denial reason. No further questions will appear on this screen after **Item 5**. For information on SGA, see **DCM 10.4**.

**Item 4. Enter Disability 5-digit Diagnostic Code.** (Select from list above). Using the drop down, select the appropriate diagnostic code; or type the diagnostic code in the box provided. If you type in the code, you must tab out of the box to get to the next question. For various technical denial situations described under **Item 1a and Item 2b**, code 80010 will be pre-filled.

**Item 5. List the medical diagnoses in order of severity.** (OLDDS limit 100 characters) Click inside the box. Type the names of the impairment(s) in order of severity. Check for correct spelling in the medical dictionary. If you need more than 100 characters for the diagnosis, type the remaining text in the box labeled **Diagnosis continued in Remarks**. For various technical denial situations described under **Item 1a and Item 2b**, a denial reason will be pre-filled.
Item 6. Is the impairment expected to last at least 12 months or result in death? If you answer No, no further questions will appear on this screen. If you answer Yes, item 7 will appear.

Item 7. Does the impairment meet or equal the listing of impairments? No/Meets/Equals If you select the Meets radio button or the Equals radio button, Item 7a will appear.

Item 7a The Impairment Listing considered is Enter the appropriate listing number in the box provided. If a listing number is not provided for a case in which Equals is selected, enter the words “per medical opinion”.

Item 8. Is there a physical or mental RFC in file from the treating physician, the medical exam contractor, from SSA, or from the medical consultant? If you selected Yes, click on the RFC Documentation button. For instructions on filling out the entries shown after clicking this button, go to DCM 12.5.5.6. After you have completed the RFC Documentation screen, return to the Widow Qualifications screen and go to Item 9. If you selected No, no further question will appear on this screen. Otherwise, Item 9 will appear.

NOTE: This question will appear even if the impairment meets or equals the listing. If an RFC will provide an onset date that is earlier than the date the listings are met or equaled, answer “yes”. If the impairment meets or equal the listings and using an RFC will not provide an earlier onset date, answer No.

Item 9. Is the claimant able to do Past Relevant Work? If Yes, as the claimant described or Yes, as normally done in the national economy is selected, no further questions will appear on this screen. Otherwise, Item 10 will appear.

Item 10. Is a medical vocational rule to be applied? This item will appear if:

- A physical RFC that meets the criteria for sedentary, light, or medium work has been entered, and
- The widow is not able to do past relevant work

If this question is answered Yes, click on the Vocational Rule Documentation button and answer the questions on that screen. For instructions on filling out the entries shown after clicking this button, go to DCM 12.5.5.7. After you have completed the Vocational Rule Documentation screen, return to the Widow Qualifications screen.

When all questions on the Widow Qualification screen are completed, click on the red button labeled Close Qualifications Window. The Control screen will re-appear.

To return to instructions for the Control screen, click here: DCM 12.5.4.
To go to instructions for the Decision Summary screen, click here: DCM 12.5.6.

12.5.5.5 Child Qualifications Screen

Item 1. Is the child still working or does he/she have a history of working in non-railroad service in Substantial Gainful Activity (SGA) that would direct a denial? If you answer yes, Item 2 will pre-fill with code 80010 and item 3 will pre-fill with a denial reason. No further questions will appear on this screen after Item 3. For information on SGA, see DCM 10.4.

Item 2. Enter Disability 5-digit Diagnostic Code. (Select from list above). Using the drop down, select the appropriate diagnostic code; or type the diagnostic code in the box provided. If you type in the code, you must tab out of the box to get to the next question. If the AOD is after the child attains age 22 or if the child is working in SGA, code 80010 will be pre-filled.

Item 3. List the medical diagnoses in order of severity. (OLDDS limit 100 characters) Click inside the box. Type the names of the impairment(s) in order of severity. Check for correct spelling in the medical dictionary. If you need more than 100 characters for the diagnosis, type the remaining text in the box labeled Diagnosis continued in Remarks. If the AOD is after the child attains age 22 or if the child is working in SGA, a denial reason will be pre-filled and no further questions will appear on this screen.

Item 4. Is the impairment expected to last at least 12 months or result in death? If you answer Yes, no further questions will appear on this screen. If you answer No, item 5 will appear.

Item 5. Does the impairment meet or equal the listing of impairments? No/Meets/Equals If you select the Meets radio button or the Equals radio button, Item 5a will appear. If you select No, item 5a will not appear, but Item 6 and Item 7 will appear.

Item 5a The Impairment Listing considered is Enter the appropriate listing number in the box provided. If a listing number is not provided for a case in which Equals is selected, enter the words “per medical opinion”. No further questions will appear on this screen.

Item 6. Is there an assessment of physical impairments that is non-severe? Self-explanatory.

Item 7. Is there an assessment of mental impairments that is non-severe? Self-explanatory.

When all questions on the Child Qualification screen are completed, click on the red button labeled Close Qualifications Window. The Control screen will re-appear.
To return to instructions for the Control screen, click here: DCM 12.5.4.

To go to instructions for the Decision Summary screen, click here: DCM 12.5.6.

12.5.5.6 RFC Documentation Button (Used for Employee Occupational, Employee Total and Permanent, and Disabled Widow’s Annuities)

On the Qualifications screens for employees and widows, click on the red button labeled RFC Documentation. A window will open for the entry of RFCs.

In employee total and permanent and employee occupational and widow disability annuity cases, you must completely describe every physical RFC in the file from the following sources, including RFCs that are partially acceptable, completely acceptable, or completely unacceptable:

- The treating physician (a G-250 with the revision date of 09-05 or later is not considered to be an RFC for purposes of filling out this item. If there is a G-250a in file, enter the restrictions on that form as an RFC.)
- The medical exam contractor
- SSA
- RRB’s medical consultant.

In employee total and permanent, employee occupational and widow disability annuity cases, you must completely describe every mental RFC in the file, including RFCs that are partially acceptable, completely acceptable, or completely unacceptable, from the following sources.

- RRB’s medical consultant
- SSA

NOTE: Whenever you must enter more than one RFC, enter the RFC that you are actually using in the decision first.

A view list box will appear with the following column headings:

- Physician’s Name,
- Type,
- Acceptability,
• Date,
• Source, and
• Severity.

To enter an RFC, click the Add RFC button.

Both the acceptable and the unacceptable portions of a partially acceptable RFC must be described.

Physician and date fields are free form text boxes. The Type field contains a drop down with the following choices:

• physical
• mental

The Acceptability field contains a drop down with the following choices:

• not supported by the medical evidence,
• entirely supported by the medical evidence,
• partially supported by the medical evidence.

If you have selected “not supported” from the drop-down under the Acceptability column, the following sentence fragment will appear:

The RFC is not acceptable because.

The sentence fragment will be followed by a box with a drop-down which contains the following choices:

• The claimant’s condition has changed since the RFC was given;
• the claimant has had surgery since the RFC was given;
• the physical findings do not support the severity of restrictions,
• the RFC is based on medical evidence that is more than one year old;
• the RFC is for an impairment unrelated to job duties;
• the RFC is within 3 months after surgery,
• OTHER.
If you select “OTHER”, type free form text in the box provided.

The Source field contains a drop down with these choices:

- treating physician,
- medical exam contractor,
- SSA,
- medical consultant.

The Severity field contains a drop down with these choices:

- less than 10 lbs. occasionally,
- up to 10 lbs occasionally and up to 10 lbs. frequently
- up to 20 lbs. occasionally and up to 10 lbs. frequently,
- up to 50 lbs. occasionally and up to 25 lbs. frequently,
- up to 100 lbs occasionally and up to 50 lbs. frequently,
- more than 100 lbs. occasionally and more than 50 lbs. frequently
- non-severe
- non-exertional

Do not leave the Severity column blank for a physical RFC unless the physician has not given any lifting restrictions. For a mental RFC, select either non-exertional or non-severe for the Severity column.

For physical RFCs, another box appears under the view list box with a button that is labeled Physical Restrictions. (If you do not have physical restrictions other than lifting and carrying, ignore the button.) Click the button to enter restrictions not covered by lifting and carrying requirements such as climbing, walking, fingering, stooping, sitting, crouching, kneeling, crawling, exposure to temperature extremes. A window will appear with a list of restrictions:
Step 1: Highlight a restriction from the list on the left side. You may need to use the scroll bar.

Step 2: Click on the appropriate green button in the upper right corner. Different buttons appear for different types of restrictions.

- If you have highlighted any of the following restrictions from the list on the left side:

  unable to walk on uneven terrain
  must periodically alternate sitting and standing to relieve pain or discomfort
  speaking
  color vision

  you will see the following button in the upper right corner:

  Select

  Click the “Select” button. If you have highlighted any of the following restrictions from the list on the left side:

  •
If you have highlighted any of the following restrictions from the list on the left side:

- Sitting
- Standing
- Walking

you will see the following buttons in the upper right corner:

- Less than 2 hours in an 8 hour workday
- At least 2 hours in an 8 hour workday
- At least 6 hours in an 8 hour workday
- Less than 6 hours in an 8 hour workday

Click the appropriate button.

If you have highlighted any of the following restrictions from the list on the left side:

- Far visual acuity
- Near visual acuity
- Accomodation
- Field of vision
- Hearing
- Pulling limited in lower extremities
- Pushing limited in lower extremities
- Pulling limited in upper extremities
- Pushing limited in upper extremities

you will see the following buttons in the upper right corner:

- Right
- Left
- Both

Click the appropriate button.
you will see the following buttons in the upper right corner:

- Never
- Occasionally
- Frequently
- Constantly

Click on the appropriate button.

- If you have highlighted any of the following restrictions from the list on the left side:

```
must avoid extreme cold
must avoid extreme heat
must avoid fumes, odors, dust, gases, poor ventilation, etc.
must avoid hazards such as machinery and heights
must avoid humidity
must avoid noise
must avoid vibration
must avoid wetness
```

you will see the following buttons in the upper right corner:

- Avoid all exposure
- Avoid concentrated exposure
- Avoid moderate exposure
- Unlimited

Click on the appropriate button.

**Step 3:** Repeat steps one and two until all of the restrictions are entered. The text associated with the restriction will appear in the white box on the lower right side of the Restrictions window. If there are physical restrictions not covered the choices in the list, type them in the white box.
Step 4: Click on the gray Save button; and the RFC window will reappear. The restrictions will be contained in the white RFC narrative section of the RFC window.

NOTE: If you click on the Cancel button or the Erase button, all of your entries in the physical restrictions window will be deleted and the window will close.

For mental RFCs, another box appears under the view list box with a button that is labeled Mental Restrictions. If you have entered “non-severe” from the drop-down under severity, ignore the button. Otherwise, click on the button to open the Mental Restrictions window, and make entries as follows:

![Mental Restrictions window](image)

<table>
<thead>
<tr>
<th>Mental Restrictions reported by Dr. Smith</th>
</tr>
</thead>
<tbody>
<tr>
<td>The ability to remember locations and work-like procedures</td>
</tr>
<tr>
<td>The ability to understand and remember very short and simple instructions</td>
</tr>
<tr>
<td>The ability to understand and remember detailed instructions</td>
</tr>
<tr>
<td>The ability to carry out very short and simple instructions</td>
</tr>
<tr>
<td>The ability to carry out detailed instructions</td>
</tr>
<tr>
<td>The ability to maintain attention and concentration for extended periods</td>
</tr>
<tr>
<td>The ability to perform activities within a schedule, maintain regular attendance,</td>
</tr>
<tr>
<td>The ability to sustain an ordinary routine without special supervision</td>
</tr>
<tr>
<td>The ability to work in coordination or in proximity to others without being distracted</td>
</tr>
<tr>
<td>The ability to make simple work-related decisions</td>
</tr>
<tr>
<td>The ability to complete a normal workday and workweek without interruptions</td>
</tr>
<tr>
<td>The ability to interact appropriately with the general public</td>
</tr>
<tr>
<td>The ability to ask simple questions or request assistance</td>
</tr>
<tr>
<td>The ability to accept instructions and respond appropriately to criticism from supervisors</td>
</tr>
<tr>
<td>The ability to get along with coworkers or peers without distracting them or others</td>
</tr>
<tr>
<td>The ability to maintain socially appropriate behavior and to adhere to basic standards of behavior</td>
</tr>
<tr>
<td>The ability to respond appropriately to changes in the work setting</td>
</tr>
<tr>
<td>The ability to be aware of normal hazards and take appropriate precautions</td>
</tr>
<tr>
<td>The ability to travel in unfamiliar places or use public transportation</td>
</tr>
<tr>
<td>The ability to set realistic goals or make plans independently of others</td>
</tr>
</tbody>
</table>

Step 1: Highlight a restriction from the list on the left side.

Step 2: Click on the appropriate green button on the upper right corner:

Not significantly limited, Moderately limited, Markedly limited, No evidence of limitation in this category, or Not ratable on available evidence.
Step 3: Repeat steps one and two until all mental restrictions that you are using in your decision are entered. The text associated with the restrictions will appear in the white box on the lower right of the Mental Restrictions window. If there are mental restrictions not covered by the list on the left, type them in the white box.

Step 4: Click on the gray Save button; and the RFC window will re-appear. Note: If you click on the Cancel button or the Erase button, all of your entries in the mental restrictions window will be deleted and the window will close.

After you have completed the Mental or Physical Restriction window, or if you do not have any mental or physical restrictions to add to the RFC, click on the RFC Narrative button. All of the text for your RFC will appear in the white box below it. The text in this box is completely editable. Remove any “xxxxxxx” that appear. Complete any incomplete sentences (such as when describing unacceptable RFCs.) When you are satisfied with the text, click on the Update button.

Repeat the above procedure for each RFC that you wish to add.

If you wish to delete an RFC

- Use your cursor to select the RFC information from the gray box at the top of the window.

- Click on the Delete button.

If you wish to edit an RFC

- Use your cursor to select the RFC information from the gray box at the top of the window.

- Click on the Edit button.

- Make the changes you wish to make, click on the RFC Narrative button to check text. When you are satisfied with the text, click on the update button.

When you are finished adding/deleting/editing RFCs, click on the red button labeled Return to Disability Qualifications Window.

To return to instructions for Employee Occupational Qualifications screen, click here: DCM 12.5.5.1.

To return to instructions for Employee Total and Permanent Qualifications screen, click here: DCM 12.5.5.3.
To return to instructions for **Widow Qualifications** screen, click here:  
**DCM 12.5.5.4.**

**12.5.5.7 Vocational Rules Button (Used for Employee Occupational with Simultaneous Disability Freeze, Employee Total and Permanent, and Disabled Widow’s Annuities)**

On the **Employee or Widow Qualifications** screen, click on the button labeled **Vocational Rule Documentation**. The **Vocational Rules** window will open.

**Item 1 Is the rule to be applied strictly or as a framework?** Self-explanatory.

A sentence will be displayed that gives the claimant’s age on the alleged onset date and age now. A date box will follow the phrase “Apply vocational rule using”. By default, the alleged onset will be entered in the box. However, the examiner can change that date to whatever date the vocational rule will be applied. For example, the claimant was age 53 and 1 month on the alleged onset date, but is age 55 years and 8 months now. The examiner may wish to change the date to the date on which the claimant attained age 55. All vocational rules that apply to the age on the date shown and the RFC will be displayed in the box below. For example, if the claimant is age 54 on the date shown and has lifting and carrying requirements of 50 lbs. occasionally and 25 lbs frequently, and the rule is to be applied strictly, all vocational rules that pertain to a medium RFC for a person age 50-54 will be displayed. With the same facts, except that the RFC is to be applied as a framework, all vocational rules that pertain to light or sedentary RFCs for a person age 50-54 will be displayed. Using the cursor, select the vocational rule you wish to use.
If the rule you select states that the claimant has transferable skills, boxes will appear in which to enter the 3 jobs to which the skills are transferable.

2. Click 3 other jobs to which the claimant’s skills are transferable that are lighter work and/or not precluded by mental restrictions.

1. 
2. 
3. 

The claimant has a high school education or more. The education does not provide for direct entry into skilled work. The work experience is skilled or semi-skilled. Transferability of skills is not relevant to this decision. Vocational rules 203.22 and 203.23, applied strictly, both direct a finding of not disabled.

(Note: In the case of two rules that are exactly the same except for the transferability of skills, and both direct a finding of not disabled, select the rule in which skills are not transferable.) The text of the rule will appear in the lower part of the window.

Click on the red button labeled Return to Disability Qualifications Window on the bottom right.

To return to instructions for Employee Occupational Qualifications screen, click here: DCM 12.5.5.1.
To return to instructions for Employee Total and Permanent Qualifications screen, click here: **DCM 12.5.5.3**.

To return to instructions for Widow Qualifications screen, click here: **DCM 12.5.5.4**.

To return to instructions for the Control screen, click here: **DCM 12.5.4**.

To go to instructions for the Decision Summary screen, click here: **DCM 12.5.6**.

### 12.5.6 Decision Summary Screen

The Decision Summary screen contains Disability Data Collected-Read Only button and Summary of Medical Findings button. The RFCs Narrative Read Only button appears for employees and widows, but not for children. This screen also contains the claimant's name, annuity type, the SSA Number, the Claim number, DOB, filing date, the alleged onset, age at filing, age today, DOD and protected filing date if applicable, and employee information, as well as bold statements based on the information entered about the claimant.

![Decision Summary Screen](image)

After the Summary of Medical Findings is completed, additional questions and buttons will appear on the screen. For a complete description, see **DCM 12.5.6.4**.

### 12.5.6.1 Disability Data Collected –Read Only- Button and Screen

Click on the gray Disability Data Collected – Read Only button. A text screen will appear containing a synopsis of the data collected up to this point. The information will appear under two or three headings: General Case Information, Sequential Evaluation, and Exam Information. The Exam Information heading will only appear in occupational cases. You cannot edit this screen. If any of this information is incorrect, go back to the appropriate screen (Main, Control, or Qualifications) and correct it. The Disability Data Collected Screen will
update itself to reflect the new information. After clicking on Exit No Save button, the Decision Summary Screen re-appears.

12.5.6.2 Summary of Medical Findings Button and Text Screen

Click on the green Summary of Medical Findings is Clear button. A text screen will appear.

Under the heading Summary of Medical Findings, fully describe the medical findings. Write your free form narrative discussion of the case here. Include case history, diagnosis, signs, symptoms, objective exam findings (range of motion in degrees, muscle spasm, sensory deficit, graded motor strength, etc.), prescribed treatment and their effects (surgery, physical therapy, etc.), failure to follow prescribed treatment, medications, prognosis, and any clinical and laboratory findings, as appropriate.

If this is an occupational disability ICE case and there is conflicting medical evidence in file, resolve the conflict by describing which evidence has greater weight and which has lesser weight. (In this instance, you would have answered Yes to item 8a on the Qualifications screen.) You will see two sentences: “The following medical findings hold the greatest weight and are used to support the decision.” and “The following medical findings hold lesser weight and were not used to support the decision.” These sentences will be followed by “xxxxxxx”. Replace the xxxxxxxx’s with your free form descriptions and explanations. Use the weight of evidence methodology to explain how these findings support or do not support the medical restrictions imposed by the impairment. (See DCM 13.10.1.7 through DCM 13.10.1.11.) If you have a medical consultant’s opinion in file that addresses this issue, use the medical consultant’s language in your explanation.

Thoroughly proof read this entire screen and make any corrections to the free form text needed. When you are satisfied with the text on this screen, click on the Exit and Save button at the bottom of the text screen. You will get a pop up box asking if you want to spell check. Always select “yes”. When spell check is complete, click on OK. You will still be on the text screen. Since the spell-checker occasionally splits lines of text, check the screen and make any corrections necessary. Click on the Exit and Save button again. This time when the Spell Check box appears, click on No. The Decision Summary screen will re-appear. The green Summary of Medical Findings Needs Edits button will be changed to blue Summary of Medical Findings is Saved.

12.5.6.3. RFC Narrative Read Only Button and Screen

The text for all of the RFCs that you have entered will appear on this screen under the heading RFC Information. This screen cannot be edited. If you need
to make changes you must go back to the **Qualifications** screen, click on the **RFC Documentation** button, and edit the RFC you wish to change.

In occupational cases, a sentence as to whether or not a medical consultant’s opinion has been ordered will be displayed. Occupational cases will also have a second heading: **RFC Work Restrictions Definitions**. If an RFC has been entered, the definition of that RFC (sedentary, light, medium, heavy, very heavy), as it appears in the federal regulations, will appear. These definitions are for the benefit of outside auditors.

### 12.5.6.4 Disability Summary Questions, and Disability Conclusion Button and Text Screen

Select the appropriate radio button (yes/no) after the question **“Is the medical criteria met?”**

If you answer yes to this question, enter a date in the box following the phrase **“The medical criteria is met as of.”** In death cases for employees and widows, the system will calculate whether the claimant died during the waiting period or the first month after. In widow cases, the system will calculate whether this date is before or after the prescribed period ending or date of remarriage. In child cases, the system will calculate whether this date is before or after age 22. Where appropriate, the annuity decision will be pre-filled as a denial.

In an occupational employee case in which the employee is at least age 60 and has 120-239 CSM, an additional question is asked: **If applicant qualifies for TP onset date more than 6 months prior to age 60 (month/year that is 6 months prior to age 60 will be shown), enter earlier date.** If a date is entered in this item, the case will be treated as a total and permanent rather than an occupational annuity on OLDDS and the G-325B headings will be those that pertain to a total and permanent annuity.
Select the radio button corresponding to your decision (a grant or a denial) after the phrase: “The disability annuity decision is.”

If it is a grant, the established disability onset date is the date entered as the date the medical criteria was met.

In an employee case that is a simultaneous Single Freeze decision, you must complete the Disability Freeze section. Select the appropriate radio button (yes/no) after the question “Is the medical criteria met?” If you answer yes to this question, enter a date in the box following the phrase “The medical criteria is met as of.” These questions must be answered even if the employee does not have an insured status. For an employee who is not insured but meets the medical criteria, an additional question is asked: Eligible for early Medicare based on 74 Act or government service? Yes/No. (For additional information on special Medicare provisions based on 1974 Act or government service, see DCM 6.8)

Select either the grant or the denial radio button after disability freeze decision is. NOTE: If the employee is at least age 64 and 6/12 on the date the medical criteria is met, the disability freeze decision must be entered as a denial.

If it is a grant, the established disability onset date is the date entered as the date the medical criteria was met.

In some situations, radio buttons for annuity and/or for freeze will be pre-filled.

- If the question Is the employee/widow/child in compensated railroad service? on the Control Center screen is answered yes, the radio buttons for the annuity (and the disability freeze in employee cases) will be pre-filled as a denial.
• If the question *Is the impairment expected to last at least 12 months or result in death?* on the **Qualifications** screen is answered *no*, the radio buttons for the annuity (and the disability freeze in employee cases) will be pre-filled as a **denial**.

• If the employee annuity is a denial, the radio button for the disability freeze decision will be pre-filled as a **denial**.

• For an employee case that is not a simultaneous DF decision, the radio buttons for the disability freeze decision will be shown as **unanswered** and grayed out.

• In employee cases, if the question *Does the employee have a Disability Freeze insured status?* on the **Employee Qualifications** screen is answered *no*, the disability freeze radio button will be pre-filled as a **denial**.

• If the question *Is the employee/widow/child still working in non-railroad service in Substantial Gainful Activity?* on the **Qualifications** screen is answered *yes*, the disability freeze radio button will be pre-filled as a **denial** for occupational employees and the annuity radio button will be pre-filled as a denial for all other types of cases.

• For widows whose alleged onset date or the date the medical criteria is met is after the prescribed period ending date, the radio button for disability annuity will be pre-filled as a **denial**.

• For widows who remarried before age 50 and are still married, the radio button for disability annuity will be pre-filled as a **denial**.

• For widows who remarried after age 50 and are still married and the alleged onset date or date the medical criteria is met is after the date of remarriage, the radio button for disability annuity will be pre-filled as a **denial**.

• For children whose alleged onset date or date medical criteria is met is after age 22, the radio button for disability annuity will be pre-filled as a **denial**.

• For employees or widows whose date of death is in the waiting period or in the first month after the waiting period (based on the alleged onset date or the date medical criteria is met), the radio button for disability annuity will be pre-filled as a **denial**.

For all of the above denial situations, a computer generated-sentence giving the denial reason will appear under the appropriate heading on the **Disability Conclusion** text screen.
In widow and child cases and all employee cases with simultaneous annuity and freeze decisions in which the annuity is granted, a CDR Diary Callup Is Set At window will appear. The window has a drop down menu with the following choices: MINE, MIP, NONE-deceased, None- closed period of disability, and MIE choices of 6-18 months. In death cases, the system will default to NONE-deceased. Select None- closed period of disability when a closed period of disability is being done. In all other cases, choose the appropriate MINE, MIP, or MIE diary. For cases in which the claimant is at least age 54 and for cases in which an occupational annuity is granted and a freeze is denied, the system will default to MINE. The system will calculate the diary expiration date and compare it to the date of birth and age at expiration date to determine if a CDR call-up is required. For information on setting CDR call-ups, see DCM 8.5.3

Click on the Disability Conclusion is Clear button. A text screen will appear. In occupational cases, the following headings will be included: Comparison of Railroad Occupational Duties to Limitations, Occupational Disability Annuity Conclusion, Comparison of Past Relevant Work (PRW) to RFC, Disability Freeze Conclusion, and Diary. In total and permanent employee cases, the following headings will be included: Comparison of Past Relevant Work (PRW) to RFC, Disability Annuity Conclusion, Disability Freeze Conclusion, and Diary. In widow cases, the following headings will be included: Disability Annuity Conclusion, and Diary. In child cases, the following headings will be included: Disability Annuity Conclusion, and Diary.

Under the heading Comparison of Railroad Occupational Duties to Limitations, sentences concerning the G-251a/b will be displayed. If there are material differences between the G-251 Vocational Report and the G-251a/b, add a free form explanation of the differences and how they were reconciled.

Give a free form comparison of acceptable physical or mental restrictions to the job duties. You may include physical or mental restrictions from a G-250 or G-250a, a doctor’s notes, or the consultative examiner here, even if you did not list them on the RFC Documentation Screen. Provide only the restrictions that you are using and why this precludes the claimant from performing his/her job duties.

Under the Occupational Disability Annuity Conclusion heading, a statement will appear as to whether the annuity is a grant or a denial.

In grant cases, a statement of the onset date will appear. If the established onset is different from that claimed, the statement will be followed by this sentence: “The established onset date differs from the claimed onset date because xxxxxxx.” Replace the “xxxxxxx” with an explanation of why a different onset date was chosen.

Under the Comparison of Past Relevant Work (PRW) to RFC heading, a statement regarding whether the claimant is able to do PRW will appear. Give a
free form comparison of acceptable physical or mental restrictions to the job duties. Provide only the restrictions that you are using and why this precludes the claimant from performing his/her PRW or not. (Note: In occupational cases with a simultaneous freeze, this heading will appear above the Disability Freeze Conclusion heading. In total and permanent employee and widow cases, this heading will appear above the Disability Annuity Conclusion heading.)

Under the Disability Annuity Conclusion heading, a statement will appear as to whether the annuity is a grant or a denial. In cases in which the decision was based on a medical-vocational rule, a sentence with that information will precede the grant/denial statement.

In grant cases, a statement of the onset date will appear. If the established onset is different from that claimed, the statement will be followed by this sentence: “The established onset date differs from the claimed onset date because xxxxxxx.” Replace the “xxxxxxx” with an explanation of why a different onset date was chosen.

Under the Disability Freeze Conclusion heading, there are some situations in which you will have information that does not require any free form additions. These situations are:

- If this is a single DF decision that has been deferred, the following sentence will appear under the Disability Freeze Conclusion heading: “The disability freeze decision is deferred because (the sentence will be completed with the entry made in the text box on the Employee Qualifications screen.)”

- If this is a joint DF, the following sentence will appear under the Disability Freeze Conclusion heading: “The disability freeze decision is deferred because it is a joint decision with the Social Security Administration.”

- If the annuity has been denied, the following sentence will appear under the Disability Freeze Conclusion heading: “The disability freeze is also denied.”

- If the question Does the employee have a Disability Freeze insured status? on the Employee Qualifications screen is answered no, the following sentence will appear under the Disability Freeze Conclusion heading “The disability freeze is denied due to a lack of insured status.”

In all other simultaneous freeze decisions, a statement will appear as to whether the annuity is a grant or a denial. In cases in which the decision was based on a medical-vocational rule, a sentence with that information will precede the grant/denial statement. In grant cases, a statement of the onset date will appear.
If the disability freeze decision is a grant and the established onset is different from that claimed, the grant statement will be followed by this sentence: "The established onset date differs from the claimed onset date because xxxxxxx." Replace the "xxxxxxx" with an explanation of why a different onset date was chosen.

In all decisions, the Diary heading will appear and information will be pre-filled. If a diary is not being set due to the employee’s age at expiration date, a statement to that effect will appear. If the diary is not being set for another reason, a statement with the reason will appear.

Thoroughly proof read this entire screen and make any corrections to free form text needed. When you are satisfied with the text on this screen, click on the Exit and Save button at the bottom of the text screen. You will get a pop up box asking if you want to spell check. Always select “yes”. When spell check is complete, click on OK. You will still be on the text screen. Since the spell-checker occasionally splits lines of text, check the screen and make any corrections necessary. Click on the Exit and Save button again. This time when the Spell Check box appears, click on No. The Decision Summary screen will re-appear. The Disability Conclusion Is Clear button will be changed to Disability Conclusion is Saved.
12.5.6.5 Making Corrections to the Summary of Medical Findings and Disability Conclusion Text Screens

The text contained on the **Summary of Medical Findings, and Disability Conclusion** screens is a combination of free form and text. The screens are completely editable. However, if you make a change in a sentence, the corresponding question from the earlier screens will not change. Therefore, **never** change a sentence. Instead of changing text on a text screen, you must go back to the corresponding question on the **Main, Qualifications, or Decision Summary** screen and change it. The database that is used for statistical purposes is created from the **Main, Qualifications, and Decision Summary** screens (not the text screens) and it **must** be accurate. Once you have made your corrections to the questions, the buttons for the text screen will show: “**Needs Edits**” instead of “**Is Saved**”. Then go back and check your free form text.

(Note: On the **Summary of Medical Findings** screen, the only sentences that would require a change are used in occupational ICE cases and have to do with conflicting medical evidence. The change would be made in question 8a on the general **Employee Qualifications** screen.)

In order to save and re-use your free form text, take the following steps:

**Step 1**
Click on the button for the appropriate text screen. A split screen view will appear with your previous text in the upper window and the new text in the lower window.

**Step 2**
Highlight the text you wish to save from the upper window.

**Step 3**
From the **edit drop down** at the upper left of the screen, select **copy**.

**Step 4**
Place your cursor in the spot in the lower window where you want your free form text to re-appear.

**Step 5**
From the **edit drop down** at the upper left of the screen, select **paste**.

**Step 6**
Repeat until all of the text that you wish to save is copied from the upper window to the lower window.

**Step 7**
Delete xxxxxxx's.

**Step 8**
If you are correcting the onset date and the new onset date that you have selected is different from the claimed onset date, a sentence ending with XXXXXX will appear. Replace the XXXXXX with an explanation of the difference in the onset date.
Step 9  When you are satisfied with the text on this screen, click on Exit and Save button and continue with the Spell Check procedure as before.

The Decision Summary screen will re-appear. The button that previously showed as green and “Needs Edits” will be changed to blue and “is Saved”.

12.5.6.6 Narrative Summary Button and Screen

Click on the View Narrative Summary – Read Only button. The Narrative Summary screen appears. All of the information from all of the previous screens will appear here. Proofread the narrative summary for accuracy, spelling, and sentence structure. This screen cannot be edited. If corrections are necessary, they must be made to the questions screens and text screens.

The View Narrative Summary – Read Only screen will update itself to reflect the new information. After clicking on Exit No Save button, the Decision Summary screen re-appears.

12.5.6.7 Examiner Decision, G-325B, and Disability Exclusion Code, and OLDDS Buttons and Self-Authorization

Click on the Not Concluded Button. A pop-up box will appear with the following sentences: Add an examiner conclusion date. (Cancel leaves the date blank.)

Click OK. The green button labeled Not Concluded will now be blue and labeled Examiner Decision Date and show the date. The G-325B button will appear.
Click on the G325B button to access the **Disability Briefing Document**. The examiner’s name and the date will appear at the bottom of the document. This document contains all the pertinent information gathered from all the screens that you have completed. Proof read the document. (NOTE: If you wish to make any changes on the G-325B, you must return to the screen which contains the information you wish to change and change it there first. This includes changes in spelling and grammar.) Close the document and return to the **Decision Summary** screen.

Select an entry from the drop-down *Please indicate Disability Exclusion Code* in the left column of buttons. (Note: You will not be able to complete this item unless there is an examiner conclusion date.) If you select *Not Excluded*, no entry will appear on OLDDS item 22B. For any other entry, a numeric code will appear in that item. The drop-down selections are:

- Not excluded
- Claimant caused a consultative examination to be delayed (Code 1)
- Medical assessment delayed for recovery period (Code 2)
- Evidence needed was not submitted timely (Code 3)
- Protected or Deterred Filing Date (Code 4)
- Correctional confinement during case development (Code 5)
- Other (Code 6)

Tab out of the drop-down box.

Click on the **OLDDS** button in the right column of buttons at the bottom of the screen. (Note: You will not be able to open OLDDS unless you have completed the item for *Disability Exclusion Code.*) In occupational disability cases in which the railroad occupational title is not a covered job, a pop-up will appear with the following question: The applicant’s job title was ______. What is the family group for this job?
Enter a number from 1-8 in the white box.

In all cases, a popup window will appear that instructs you to check all entries and enter remarks before closing.

Click OK.

If the OLDDS screen does not appear on your screen, click on the mainframe (SESS) icon on the bottom of your screen.

The OLDDS screen will appear. Check all items on the OLDDS screen. Complete the OLDDS screens as usual. Close the OLDDS screen and return to the Decision Summary screen.

Click on the Decision Letters button. For instruction on completion of that screen, see DCM 12.5.8. When the letters are completed, return to the Decision Summary screen.

If D-BRIEF has saved your name as an examiner, you will not be able to click on the (Not) Review(ed) button at the bottom of the screen, as it will be “grayed out.”

Self-authorization is not permitted in disability cases per DCM 3.4.300. All disability cases must be authorized by disability post examiners, senior examiners, or supervisors.

When everything is completed on the Decision Summary screen, click on the Return to Control Center button. From the Control Center screen, click on the Return to Main Screen button. From the Main screen, click on the Exit D-BRIEF button.

12.5.7 Layout of Information on Text Screens and G-325B

D-BRIEF will use the information you entered and do two things:

- Create data tables from which statistical information can be extracted, and
Produce full sentence narrative text based on the information entered into D-BRIEF.

The narrative will appear on text screens accessed by clicking on the following buttons on the Decision Summary screen:

- Disability Data Collected – Read Only,
- Summary of Medical Findings,
- RFC Narrative – Read Only
- Disability Conclusion, and
- View Narrative Summary – Read Only.

The View Narrative Summary Screen combines all of the information from these screens:

- Disability Data Collected,
- Summary of Medical Findings,
- RFC Narrative
- Disability Conclusion.

The View Narrative Summary Screen cannot be edited.

12.5.7.1 Revising the G-325B

The G-325B is created from the text, and in the order, that appears on the View Narrative Summary Screen. The G-325B itself is not saved. The G-325B is re-created from the text screens every time the G-325B is accessed. For this reason, corrections made directly on the G-325B by the examiner without making the corresponding changes on the text screens and the questions screens will not be saved on the G-325B that the reviewer sees. If a spelling error is corrected by the examiner on the G-325B without being corrected on the text screen, the correction will not be saved on the G-325B that the reviewer sees.

Therefore, all changes to sentences must be made on the questions screens (Main screen, Qualifications screen, Decision Summary screen.) All changes to free form text must also be correct on the text screens accessed by clicking on the following buttons on the Decision Summary screen:

- Disability Data Collected,
• Summary of Medical Findings,
• Disability Conclusion.
• Reviewer/Authorizer (This screen must be spell checked by the reviewer.)

(See DCM 12.5.6.5 for further instruction on making corrections to text screens.) The Summary of Medical Findings screen, the Disability Conclusion screen, and the Reviewer/Authorizer screen can and should be spell checked. The G-325B that is imaged will be correct only if the information on the questions screens and the text screens is correct. The data table’s information will be correct only if the information on the questions screen is correct.

12.5.7.2 Description of G-325B

The G-325B is taken from 5 text screens. The information on most of the text screens is divided into two or more headings. The text screens are:

1. Disability Data Collected (2 or 3 headings)
2. Summary of Medical Findings (1 heading)
3. RFC Narrative (1 or 2 headings)
4. Disability Conclusion (2 to 5 headings)
5. Reviewer Comments (Optional) (1 heading)

The following sections detail the information contained on each text screen.

12.5.7.3 Disability Data Collected Section

Information under Disability Data Collected includes data that was formerly collected on the Form G-253 and data needed on OLDDS and data gathered from answering the questions concerning sequential evaluation. The information is placed under three headings:

• General Case Information
• Sequential Evaluation
• Exams Information. (occupational cases only)

General Case Information
The information under this heading includes:

• Applicant’s age at date of filing (from Main screen)
• Applicant's age at date of decision if it is relevant to his eligibility for an occupational disability annuity

• Annuity type (from Main screen)

• For employee cases, whether or not the employee has a disability freeze insured status (from Employee Qualifications screen)

• For employee cases, reason for disability freeze decision deferral, if applicable (from Employee Qualifications screen) or that this is a simultaneous freeze decision.

• 5 digit diagnostic code (from Qualifications screen)

• In occupational cases, 3 digit body code (from Employee Qualifications Screen.)

Sequential Evaluation
The information under this heading includes:

• Whether or not the applicant is in compensated railroad service (from Control screen)

• In employee cases, whether or not the applicant is earning more than $850 per month in non-railroad service (from Employee Qualifications screen)

• In employee cases, the regular railroad occupation (from Employee Qualifications screen)

• Whether or not the applicant is in SGA (from Qualifications screen)

• List of medical impairments in order of severity (from Qualifications screen)

• Whether impairment is severe enough to last 12 months or result in death (from Qualifications screen)

• Whether or not impairment meets or equals listings and listing used, if applicable (from Qualifications screen)

• In occupational cases, whether or not employee has been carrier disqualified (from Employee Qualifications screen)

• In occupational cases, whether or not tables were used for occupational disability annuity decision and Table used, if applicable. If the tables were
not used, the reason for not using tables will also appear (from Employee Qualifications screen)

- Whether or not the claimant is able to do past relevant work (from Qualifications screen) for total and permanent employee cases, widow cases, and for occupational cases with simultaneous DF decision, in which the DF is not being denied due to SGA, lack of insured status, or annuity also being denied.

- Whether or not medical vocational rule was used (from Qualifications screen) for total and permanent employee cases, widow cases, and for occupational cases with simultaneous DF decision, in which the DF is not being denied due to SGA, lack of insured status, or annuity also being denied.

**Exams Information (Occupational Cases Only)**
The information under this heading includes:

- Whether or not medical evidence of record was sufficient to make determination (from Qualifications screen)

- If exams were ordered, code number and name of exam (from Qualifications screen).

This set of information is contained on the text screen accessed by clicking the Disability Data Collected – Read It button on the Decision Summary screen. It is the first three sections of information that appear on the text screen accessed by clicking on the View Narrative Summary – Read It button and the first three sections of information on the G-325B. All of the information under these headings is computer-generated. This screen cannot be edited. In order to change any of this information, the examiner must go back to the Main screen, the Employee Qualifications screen, or the Control screen to make the changes.

**12.5.7.4 Summary of Medical Findings Section**

Information under the Summary of Medical Findings heading includes:

- Free form text describing objective medical findings (see DCM 12.5.6.2)

- A concluding sentence: All medical evidence in file was reviewed.

In occupational ICE cases in which there is conflicting medical evidence, the following sentences appear:

- The following medical findings hold the greatest weight and are used to support the decision.
- The following medical findings hold lesser weight and were not used to support the decision.

There is space under each of these sentences for a free form description of the medical findings pertaining to each sentence.

**12.5.7.5 RFC Narrative**

Information on the RFC Narrative screen includes the heading: RFC information. If this is an occupational decision in which RFCs are used, a second heading will also appear: RFC Work Restriction Definitions.

Information under RFC Information includes:

- In occupational cases, whether or not a consultative medical opinion was ordered (from Qualifications screen). Note: a consultative medical opinion does not always contain an RFC.

- Whether or not a G-250a from treating physician, RFC from medical exam contractor, RFC from SSA, or RFC from the medical consultant is in file (from RFC Narrative).

- In occupational cases, whether or not RFC information in file is fully acceptable, partially acceptable, or unacceptable (from RFC Narrative screen). For all RFCs that are not acceptable, a reason will be shown as to why it is not acceptable. In cases that are not occupational, only acceptable RFCs that are used for the decision are listed.

- Description of RFCs (from RFC Narrative Screen).

Definitions of severity (sedentary, light, medium, heavy, very heavy) of RFCs described will be shown under the RFC Work Restrictions Definitions heading.

**12.5.7.6 Disability Conclusion Section**

Information under Disability Conclusion heading includes comparison between work and physical or mental limitations, whether the decision is a grant or denial, and onset and diary information where applicable. The number of headings in the section for Disability Conclusion depends upon the annuity type:

- Comparison of Railroad Occupational Duties to Limitations (occupational cases only),

- Occupational Disability Annuity Conclusion (occupational cases only),

- Disability Annuity Conclusion (all cases other than occupational annuities),
• **Comparison of Past Relevant Work to RFC** (employee T&P, widows, and occupational cases with a simultaneous freeze in which the claimant has an insured status and is not in SGA),

• Disability Freeze Conclusion (employees only), and

• **Diary.** (all cases)

**Comparison of Railroad Occupational Duties to Limitations**

Information under this heading includes:

- G-251a/b information (from **Employee Qualifications** screen.) as to whether a G-251a/b was received and, if not, whether or not it has been at least 30 days since the G-251a/b was released.

- In ICE cases, whether or not the G-251a/b differed materially from the vocational report (from **Employee Qualifications** screen.) If it did differ materially, the examiner must type in a free form explanation of the difference and how it was resolved.

- In non-ICE cases, the following computer generated sentence will appear: **A comparison of job duties between the G-251 and the G-251a/b is not needed because the impairment meets/equal to the listings/ the employee has been disqualified by the carrier/ the employee is found disabled under the tables** (from **Employee Qualifications** screen.)

- In non-ICE cases, one of the following 3 computer generated sentence will appear: 1) **The impairment meets/equal to the listing, therefore, a comparison of limitations to job duties does not apply.** 2) **The employee has been disqualified by the carrier, therefore, a comparison of limitations to job duties does not apply.** 3) **The impairment meets the tables, therefore, a comparison of limitations to job duties does not apply.** (from **Employee Qualifications** screen.)

- In ICE cases, the examiner must provide a free form comparison between the occupational job duties and the limitations imposed by the impairment.

This set of information is the second section of information that appears on the text screen accessed by clicking on the **View Narrative Summary – Read It** button and it is the second section of information on the G-325B.

**Occupational Disability Annuity Conclusion-**

Information under this heading includes:

- **Statement as to whether grant or denial** (from **Decision Summary** screen)
• Onset date if grant (from Decision Summary screen)

• Free form explanation of any onset that is different from the one alleged. (The prompt for the explanation comes from the entries on the Decision Conclusion screen.)

• Free form explanation of any unsuccessful work attempt.

**Comparison of Past Relevant Work (PRW) to RFC**

Information under this heading includes:

• In cases in which the listings are met or equaled and an RFC is not used to provide an earlier onset date, the following sentence appears: The comparison does not apply because the listings are met/equaled (from Employee Qualifications screen).

• In cases in which the listings are not met or equaled or an RFC is used to provide an earlier onset date, the examiner must provide a free form comparison between the PRW and the RFC.

• When a RFC is entered, a sentence will appear as to whether the applicant can perform PRW (from Qualifications screen).

**Disability Annuity Conclusion**

Information under this heading includes:

• Medical Vocational rule information if applicable (from Vocational Rule Documentation screen.)

• Statement as to whether grant or denial (from Decision Summary screen)

• Onset date if grant (from Decision Summary screen)

• Free form explanation of any onset that is different from the one alleged. (The prompt for the explanation comes from the entries on the Decision Conclusion screen.)

• Free form explanation of any unsuccessful work attempt, if applicable.

**Disability Freeze Conclusion**

Information under this heading includes:

• Medical Vocational rule information if applicable (from Vocational Rule Documentation screen.)
• Statement as to whether grant or denial (from Decision Summary screen)

• Onset date if grant (from Decision Summary screen)

• Free form explanation of any onset that is different from the one alleged. (The prompt for the explanation comes from the entries on the Decision Conclusion screen.)

• Statement that DF decision is deferred, if applicable (from Employee Qualifications screen).

• Free form explanation of any unsuccessful work attempt, if applicable.

Diary

Information under this heading includes:

• Whether diary set (from Decision Summary screen.)

• Type of diary (MINE, MIP, MIE with months), if set (from Decision Summary screen)

• If not set, statement of the reason that diary is not set, such as applicant will be at least 61 ½ years old at diary expiration, or applicant is deceased, or no annuity entitlement, or freeze decision not being made (from Decision Conclusion screen.)

This set of information is contained on the text screen accessed by clicking the Disability Conclusion button on the Decision Summary screen. It is the third section of information that appears on the text screen accessed by clicking on the View Narrative Summary – Read It button and it is the third section of information on the G-325B.

There is information under all headings, however, the examiner may add free form text. This screen must be spell checked by the examiner.

12.5.7.7 Reviewer Comments (Optional)

This section is optional and consists entirely of free form text provided by the reviewer. This screen must be spell checked by the reviewer. If the reviewer does not make comments, this heading will not appear on the G-325B.

12.5.8 Decision Letters Button

Use the Decision Letters in cases in which the annuity is allowed or in cases in which the annuity is denied because the claimant is in compensated railroad service.
All disability allowances require RL-121f. Denials due to being in compensated railroad service require RL-216. A DF allowance will require RL-210 or RL-210d; a DF medical denial will require RL-260; a DF earnings denial will require a RL-260a or RL-260b.

Click on the *Decision Letters* button at the bottom of the middle row of buttons on the bottom of the *Decision Summary* screen.

The *Letters and Forms* screen will appear.

Name and address of the applicant and salutation will be pre-filled on the left side of the screen from the system from which you entered D-BRIEF (REQUEST or APPLE.) If a rep payee has been entered on the *Control* screen, the rep payee’s name, and “for” and applicant’s name will be entered on the right side of the *Letters* screen. Enter the rep payee’s address and the salutation.

To complete a letter:

- Single click the button on the right for the desired letter. The letter will appear with name and address pre-fills. Complete inserts and/or dialogue
boxes as usual. (NOTE: Buttons for letters that are not appropriate to the case will be grayed out. For example, if you are doing a widow case, all buttons pertaining to disability freeze letters will be grayed out.)

- Click auth icon and send letter to auth as usual. Close the letter. You will be returned to the D-BRIEF Letters and Forms screen. If you need to do another letter, repeat the above process.

- Click on exit. You will be returned to the D-BRIEF Decision Summary screen.

- Do OLDDS screens and other disability decision-making procedures as described in DCM 12.5.6.7. When everything is completed on the Decision Summary screen, click on the Return to Control Center button. From the Control Center screen, click on the Return to Main Screen button. From the Main screen, click on the Exit D-BRIEF button.

Note: Dialogue box questions for the RL-121f will be pre-filled from D-BRIEF. Item 4 Has the Medical Evidence or other information been requested for possible establishment of an earlier onset date? will show a default answer of No. When the established onset date is later than the alleged onset date, the following question will appear: Does the difference in onset date have an adverse effect on the ABD? The default answer to that question will be Yes. Check to be sure that the default answers are accurate and make changes when applicable.

12.5.9 Reviewing Decisions on D-BRIEF

There are several methods by which to access a case on D-BRIEF for review.

1. Follow the same instructions to access a case as the initial examiners used per instructions in DCM 12.5.2. NOTE: It is not necessary to use the same system that the examiner used.

2. Or, access the case in the following manner:

   Step 1 Access the main screen for RRAILS.

   Step 2 Double click on D-BRIEF in the menu on the right.

   Step 3 On the Main screen, click in the yellow Get Case Saved button. The Select Case window will appear

   Step 4 Using the scroll bar on the right side of the Select Case window, find the Applicant SSA number (not the RR claim number) you wish to access, or type the number in the white box at the top left. Select the case by clicking in the box that contains the number.
Step 5 Click on the Select button at the bottom of the Select Case window. The Main screen will re-appear with the information pre-fills for the case.

Click on the Open To Authorize button on the bottom of the screen.

If another reviewer has already worked on the case and it is being re-assigned, the following message will appear: Do you want to change the authorizer from ______ to you? Click on “Yes.”

The Control Center screen will open. From the Control Center screen you can go to the Qualifications screen, the Decision Summary screen, or back to the Main screen by clicking on the appropriate button on the bottom of the screen.

You will be able to see the examiner entries, but you will not be able to change them, as the buttons for the examiner text screens and entries will be grayed out.

From the Control Center screen, Click on Go to Decision Summary button. This will take you to the Decision Summary screen.
Click on View Narrative Summary - Read It button. This will bring up the rationale that the initial examiner saved on the system. See DCM 12.5.7 for the proper layout of the information that appears on this screen and on the G-325B.

Review case as usual. If you do not agree with the examiner’s decision or if you want the examiner to make changes, return to the main screen and exit program. Return the case to the examiner as you currently do. The examiner will be able to go back into the D-BRIEF program and make changes.

If you agree with the initial examiner’s decision, take the following steps:

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>If you wish to add comments, click on the green <strong>Reviewer/Authorizer is Clear</strong> button. Type in your comments under the <strong>Reviewer Comments</strong> heading. Click on <strong>Exit and Save</strong> button. You will get a pop up box asking if you want to spell check. Always select “yes”. When spell check is complete, click on <strong>OK</strong>. You will still be on the text screen. Since the spell-checker occasionally splits lines of text, check the screen and make any corrections necessary. Click on the <strong>Exit and Save</strong> button again. This time when the <strong>Spell Check</strong> box appears, click on <strong>No</strong>. The <strong>Decision Summary</strong> screen will re-appear. The button that was previously labeled “<strong>Reviewer/Authorizer is Clear</strong>” will now be</td>
</tr>
<tr>
<td>Step</td>
<td>Instruction</td>
</tr>
<tr>
<td>------</td>
<td>-------------</td>
</tr>
<tr>
<td>2</td>
<td>Click on the <strong>Reviewed</strong> button. The <strong>Review Date</strong> box will appear. If you have accidentally clicked the <strong>Reviewed</strong> button and/or do not intend to complete the review at this time, click <strong>cancel</strong>. Otherwise, click <strong>OK</strong>. This will cause the review date to be shown as today's date for the G-325B, OLDDS, and CDR (if applicable.).</td>
</tr>
<tr>
<td>3</td>
<td>Click on <strong>G-325B</strong> button. (See <a href="#">DCM 12.5.6.7</a> for further information.) The G-325B with medical symbol will appear on your screen.</td>
</tr>
<tr>
<td>4</td>
<td>Print out a copy of the G-325B for the file. The examiner’s name and job title and the date will appear above the appropriate label at the bottom of each page. The reviewer’s name and job title and the date will appear above the appropriate label at the bottom of each page.</td>
</tr>
<tr>
<td>5</td>
<td>Send G-325B to imaging. Close G-325B and return to <strong>Decision Summary</strong> screen.</td>
</tr>
<tr>
<td>6</td>
<td>If a diary is being set, click on the <strong>CDR</strong> button in the middle row of buttons on the bottom of the <strong>Decision Summary</strong> screen. The <strong>CDR Callups</strong> window will open. Check the information on the screen. If the information is not correct, click on the <strong>exit</strong> button and give it back to the examiner for correction. Otherwise, add comments in the box provided if desired and click on the <strong>Add/Update Callup</strong> button. The <strong>CDR Callups</strong> window will close and the <strong>Decision Summary</strong> screen will reappear.</td>
</tr>
</tbody>
</table>
Unless the claimant is in compensated service, click on the OLDDS button in the right row of buttons on the bottom of the Decision Summary screen. A popup window will appear that instructs you to check all entries and enter remarks before closing. Click OK.

If the OLDDS screen does not appear on your screen, click on the mainframe (SESS) icon on the bottom of your screen.

The OLDDS screen will appear. Check all items on the OLDDS screen. Complete the OLDDS screens as usual. Close the OLDDS screen and return to the Decision Summary screen.

Complete all other actions (check auth file for letters, etc.) as usual. When all actions are complete, click on the Return to the Control Center button on the bottom of the right row of buttons on the Decision Summary screen. Click on the Return to Main Screen button on the bottom right of the Control screen. Click on the Exit D-BRIEF button on the bottom right of the Main screen.

12.5.10 Re-Assignments, Examiner Corrections, and Browsing

Examiner Re-Assignments

The first examiner to work a particular case and to click on the Open As Examiner button on the bottom left side of the Main screen will be recognized by
D-BRIEF as the examiner who has been assigned to work the case, referred to as the examiner of record.

When an individual other than the examiner of record opens the case and clicks on the **Open As Examiner** button, a message box will appear which asks “Do you want to change the examiner name from _______ to your name?”

If the individual clicks on **Yes**, that individual becomes the examiner of record.

**Reviewer/Authorizer Re-assignments**

The first time a person opens the case and clicks on the **Open To Authorize** button, D-BRIEF will recognize that person as the authorizer of record. When an individual other than the authorizer of record opens the case and clicks on the **Open As Authorizer** button, a message box will appear which asks “Do you want to change the authorizer for this case from _______ to yourself?”

If the individual clicks on **Yes**, that individual becomes the authorizer of record.

**Examiner Corrections**

If the examiner wishes to make changes after an examiner date has already been entered on the **Decision Summary** screen, open the case by using one of the access methods previously described in DCM 12.5.2 or DCM 12.5.9. Click on the **Open As Examiner** button on the **Main** screen. A pop-up will appear with the following message: The examiner decision date has been set for this case. No edits can be made unless the Decision Date is removed. Do you want to remove the Decision Date for this case?
Click on yes.

Make your changes on the various screens. You will need to re-enter an examiner decision date on the Decision Summary screen.

**Browsing**

A supervisor or other individual who wishes to view data without becoming the examiner or authorizer of record may do so by clicking on the Open to View button. In this situation, all fields will be disabled (grayed out) for editing. That is, the supervisor will be able to look at those screens, but will not be able to change any data.
