IN REPLY
REFER TO

DTIC-R (FOIA 2010-24)

MAR 8 2010

This is an interim response to your letter of January 22, 2010, requesting information under the Freedom of Information Act (FOIA). Under Department of Defense rules implementing the FOIA, published at 32 CFR 286, your request was categorized as "other."

Enclosed are computer-generated bibliographies prepared by weighting/matching the subject terms or keywords listed in your request against our database (i.e., *corporate author GENERAL MILLS*). The bibliographies may contain some documents that do not apply to the specific subject area(s) in which you are interested; however, to eliminate any of the key search terms would also eliminate documents that do apply to your subject area(s) of interest.

The documents listed on enclosure 2 have been approved for public release and may be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. NTIS sells such documents to the general public and, if you wish, you can order the documents by telephone at (703) 605-6000. Be sure to include the AD numbers when requesting the documents. NOTE: Some of the documents listed on the bibliography on enclosure 2 can be viewed and/or downloaded in full text through the Defense Technical Information Center (DTIC) Online Public Technical Reports website at <http://www.dtic.mil/dtic/>.

Once at the site, type the full document number as its written (ex: AD0610125) in the "Search for" box, then click the "Search" button; in the Accession Number field, click on the link "View Full Text (pdf)".

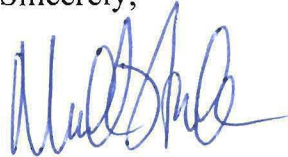

Enclosure 3 consists of a bibliography that contains unclassified descriptions of classified and/or unclassified/limited distribution documents related to your request. These documents may only be released by the controlling activity. Requests for these documents should be forwarded to the controlling activity, usually identified in the Distribution Statement field of

MAR 8 2010

the citation. This office upon request can research documents with no controlling activity identified. NOTE: Although some of the citations listed on the bibliography at enclosure 3 may indicate that the document can be viewed and/or downloaded in full text, be advised that these citations/documents are not available to the general public through the DTIC Online Public Technical Reports.

Please understand that other members of the public may submit a FOIA request for copies of FOIA requests received by this office or the names of those who have submitted requests. Should such occur, your name and, if asked for, a copy of your request will be released; however, your home address and home telephone number will not be released. Other private citizens who have obtained your name by using such a request may contact you. However, correspondence from the Defense Department about your request will be on official letterhead. Please contact me at (703) 767-9204 if you have any questions. Thank you for your interest in obtaining information from DTIC.

Sincerely,

MICHAEL A. HAMILTON
Acting FOIA Program Manager

Abstract:

(U) Tests were conducted on the muzzle burst feature of the MT T369 fuze. Twenty-five inert T388 shell were equipped with the MT T369 fuze and tested for direct fire, zero time performance. Twelve rounds were fired at Zone 10 charge and satisfactory muzzle burst fuze functioning was evidenced somewhere between 11.5 and 17 feet from the muzzle on six of the twelve tests. The other six rounds functioned at impact. Four rounds were fired at a charge to give 115% of rated pressure. Each of these performed satisfactorily giving bursts 14 to 17 feet from the muzzle. Five rounds were fired at Zone 10 charge conditioned at 140 F. Each of these functioned properly between 10 and 13 feet from the muzzle. Two rounds at Zone 9 charge and two rounds at Zone 7 charge functioned normally at 6 to 7.5 feet from the muzzle. No definite reasons for the failures were ascertained from the recovered parts of this test. (Author)
