TITLE INDEX

Material appearing in the Naval Aviation Confidential Bulletin, August through December, 1943, is included. Hereafter the index will appear semi-annually.

A
Aerodynamics and hydrodynamics ............... IV, 29; V, 38
Aerology
Aerological data, Request for ........................................ I, 25
H. O. 206-C-S .......................................................... V, 22
Operational weather analysis .................. V, 21
Upper air wind soundings by radar ............ V, 21
Air battle notes from the South Pacific .... II, 5
Interception of June 16 ........................ II, 5
PB4Y vs. 8 Zekes .................................................. II, 6
Experience and rescue of TBF crew ........ II, 6
Aircraft Design Projects
Glider Program .................................................. I, 37; II, 56
LTA .................................................. III, 40; IV, 34; V, 45
Seaplanes .................................................. II, 56
Trainer Program ........................................ I, 36; II, 56; III, 40; V, 43
VF ................................................ I, 35; II, 53; III, 37; IV, 33; V, 41
VJ, VR, VN ........................................ I, 36; II, 54; III, 39; IV, 34; V, 43
VOS, VSO, Rotary Wing I, 35; II, 53; III, 38; IV, 33; V, 42
VPB ............................................... I, 33; II, 48; III, 36; IV, 30; V, 38
VSB ................................................ I, 34; II, 51; III, 34; IV, 32; V, 40
VTB ................................................ II, 52; III, 34; IV, 32
Aircraft, friendly, in Rabaul ................. I, 11
Aircraft, Japanese
Developments in SSF TONY and SSF OSCAR .... II, 21
Flotation gear ............................................... I, 17
General comments ........................................ I, 17
HAP, Preliminary, last flight of ............ II, 22
Sakae, Models 12 and 21 ......................... I, 16
Structural weakness ........................................ I, 18
Aircraft spotting for naval bombardment .... V, 10
Aircraft, U. S., Performance and handling characteristics of ................ II, 30
Airplane flight restrictions as related to flight tests and service experience .......... II, 41
Aluminum alloy, New high strength .......... III, 21
Ama1attack .................................................. II, 34
Armament
Armor .................................................. II, 46; III, 25; IV, 24; V, 34
Bombing systems ........................................ V, 34
Equipment, miscellaneous ...................... V, 34
Experimental .................................................. II, 46; III, 26; IV, 24
Guns and accessories ............................. V, 34
LTA .................................................. V, 33
Turrets .................................................. II, 46; III, 25; IV, 24; V, 34
VF ................................................ II, 43; III, 24; IV, 23; V, 32
VOS-VSO, VJ, VR, and Airships .... II, 44; V, 33
VPB ................................................ II, 45; III, 25; IV, 24; V, 33
VSB ................................ .................. II, 43; III, 24; IV, 23; V, 33
VTB ................................................ II, 44; V, 33
ASW creeping attack .............................. IV, 12
"Automatic Control" ............................... III, 26
Automatic Flight Control Trainer ............ V, 23
"Black Cats" ............................................. II, 8
Boarding report, Excerpt from ............... I, 19
Bomb training ........................................ II, 37
Bombs, Japanese .......................................... II, 31
Bombing tactics against enemy shipping (NAAF) .... II, 9
Bombing and D/R trainer ....................... IV, 13
Booby traps in crashed enemy aircraft .... I, 20
British aircraft in India Command, National Markings of II, 32
British bombers, Evasive tactics of .... II, 19
Camouflage .................................................. II, 19; III, 23; V, 26
Captured aviation material .................. II, 22
Carbon monoxide indicators .................. III, 23
Carburetors ........................................ II, 47
Carriers
Approved changes ................................... III, 20
CV, CVB, CVL, CVE .................................. III, 18
Escort aircraft carriers modified for transport ........ IV, 23
Jet propulsion, aircraft take-offs .......... III, 20
Landing procedure, Notes on ................. I, 24
Operations in snow and ice .................. IV, 22
Combat between patrol planes ............. III, 6
Compasses, Aircraft ............................ V, 36

SECTION VI.

TITLE INDEX

Material appearing in the Naval Aviation Confidential Bulletin, January through June, 1944, is included. Roman numerals indicate month: January, I, February, II, etc.

A

Abandon plane procedure ................................ IV, 13
ACIOs
In Aleutians ........................................... II, 14
In Southwest Pacific ................................ III, 12
Aerology
"An angel riding on the yardarm" .................. IV, 18
Automatic weather station ........................ I, 24
Confidential weather broadcast .................... III, 21
Expendable chute automatic weather station developed ................ V, 20
H. O. 206-C-S ........................................ I, 26
Navy weather centrals ................................ III, 23
Need for ship weather reports in C. S. P. 1300(Å) ................ IV, 17
New aircraft weather landing code adopted .... VI, 33
Post flight weather reports ....................... II, 18
Radar wind sounding pulse repeater ............ IV, 16
Radio wind sounding equipment ................... II, 19
Summary of the weather during the landings on the Gilbert Islands ................ II, 19
United Nations Fermet Code Form ............... V, 24
Vertical cross section weather diagrams ......... II, 15
Water-activated cell developed for pilot balloon battery .................. VI, 35
"Weather at war" ..................................... VI, 32
Weather forecasts aid landing in Kwajalein .... V, 20
"Weather influences in radar wave propagation" VI, 36
Allied aircraft in enemy hands .................. I, 8
Air support for amphibious operations ........ I, 12

Aircraft Design Projects
Aerodynamics and hydrodynamics I, 38; II, 38; III, 48; IV, 59; V, 52; VI, 51
LTA ................................................. I, 47; II, 41; III, 54; V, 51
Special Design ..................................... I, 47
VF .................................................. I, 43; II, 38; III, 48; IV, 49; V, 50; VI, 49
VN .................................................. III, 54
VJ-VR ............................................. I, 46; II, 41; III, 53; IV, 51; V, 51
VOS-VSO-Rotary Wing
I, 46; II, 53; III, 53; IV, 51; V, 50; VI, 51
VPB ................................................. I, 45; II, 39; III, 50; IV, 49; V, 48; VI, 51
VSB ................................................. I, 45; II, 41; III, 51; IV, 50; V, 49; VI, 50
VTB .................................................. II, 39; VI, 49
Ammunition loading for VF aircraft .......... I, 20
Analysis of air-combat losses and fighter superiority in the South Pacific .................. III, 5
Analysis of enemy night torpedo attacks ....... III, 11
Anti-submarine warfare training targets Sub-surface towing target ................ II, 23
Stationary sub-surface target .................... II, 23
Armament .................................. I, 42; II, 35; III, 43; IV, 45; V, 42; VI, 47
Attack on Wake .................................. I, 5
Aviation gunners to be trained in use of new gyro gun sight ................ VI, 18

B

British planes at Patuxent River ................. IV, 21

C

Carrier borne aircraft over Rabaul ............... I, 10
Combat report ..................................... IV, 5
Comparative performance, PV-1 vs. Zeke .......... III, 8
Crash intelligence officer reports from China ..... I, 12

D

Development of the Radar planning device ........ IV, 20
Ditching ........................................... I, 13
Ditching of a B-25 ................................ VI, 13
Dive bombing with the SB2C ..................... IV, 12
Drone accident ..................................... V, 19

E

Equipment and Materials
Airborne rescue gear ................................ IV, 44
Chemical drinking water kits ..................... VI, 38
Corrosion protection ................................ I, 40
Cycleweld process approved ..................... VI, 39
Defogging airplane windshield during dive ........ III, 37
Diluter demand regulator installations in progress .... VI, 37
Effect of surface smoothness upon maximum speed of fighter aircraft .......... I, 40; II, 32; IV, 43
Fairing compound on fighter aircraft to be eliminated VI, 39
Fire hazard involved in carrying external droppable fuel tanks .......... II, 27; IV, 44; V, 44
Full-vision cockpit canopy ....................... III, 37
Fumeproofing against carbon monoxide required in Corsairs ................ VI, 37
High strength aluminum alloy developments ....... V, 45
Hydraulic systems ................................ I, 42; IV, 43
Improved goggles and sunglasses ................ IV, 44
Individual oxygen units .......................... V, 45
Liquid oxygen converter ........................ IV, 43
Naval aircraft tires ................................ I, 41; II, 31; V, 46
New technical order on hydraulic fluids .......... V, 44
Permanent finishes protect steel engine parts .... VI, 39
Portable oxygen recharging trailer ................ III, 38
Post heat-treatment of welded areas ............. VI, 38
Preservation and packaging of aeronautical parts and equipment ................ IV, 42
Reflection reducing coatings for transparent plastics and glass .......... III, 38
Safety notes on parachutes ........................ V, 45
Self-sealing fuel tanks ........................... III, 40
Thermal anti-icing systems ....................... II, 31

F

First American back from Gazelle Peninsula .... V, 5

VI, 52

VI, 52
NAVAL AVIATION CONFIDENTIAL BULLETIN JUNE 1944

CONFIDENTIAL

radio spectrum reconnaissance to give Axis communication headaches .................. V, 36
Test equipment standardized .............................................................. VI, 41
Unusual radio propagation conditions in northwest dictate local PV-1 transmitter exchange .... IV, 33
Use of sino-radio buoys in ASW .................................................. IV, 33
Relief maps now easily portable ................................................ I, 31
Remote control gunfire from U-boat ........................................... I, 20
Repairing a Catalina in mid-air ................................................... V, 8

S
Saratoga-Victorious operations ................................................ II, 5
Ships installations
Aircraft carrier bulletins ..................................................... IV, 46
Aircraft carrier lights for night flight operations .... IV, 46
"Bounce" in carrier landings taken out of F4U-1 ........ VI, 44
Catapults ................................................................. IV, 47
HE-1 catapult and arresting unit ................................................ I, 36
HII-1 catapults to be installed on CVEs ................................ V, 47
New carriers—CVL48 class ............................................................. IV, 47
Stowage of Ethyl alcohol aboard carriers .......... IV, 46
"Show me the way to go home" .................................................... V, 22
SOPAC Bombers visit Rabaul ................................................. II, 12
SOPAC suggestions on lost plane procedure for pilots of land-based aircraft .......... III, 9
Strengthening of flame dampers .................................................. I, 20
Standardization of terrain model making ............................... V, 11
Structural flight testing technique developed ............ V, 27

T
Tactics
Air-to-air bombing, history of .................................... I, 14
B-24s and enemy fighters ....................................................... I, 16
Glide bombing Jap pill boxes ...................................................... VI, 16
Hints for day fighters when employed as night fighters I, 19
Horizontal bombing of ship targets ........................................... I, 18
Jap fighter vs. Liberator ............................................................. V, 15
Japanese tactics ................................................................. II, 18
Japanese bomber mission routine ............................................... V, 18
"Nature of operation: routine patrol" ......................... I, 16
Operational report VF-32 ....................................................... V, 12
P-38s and enemy fighters ......................................................... I, 15
RAF night bombing tactics ............................................................. V, 14
Report of the combat performance of the F6F-3 ............ I, 18
SOPAC combat strafing experiences ........................................... V, 14
Tactical notes on fighter sweeps and escort over Rabaul .... III, 19
Tactical use of aircraft rocket projectiles ............... VI, 5
Use of P-38 ................................................................. VI, 15
Target objective models, use of ................................................ I, 29
Technical intelligence
Type 3 F Tony and Engine ...................................................... III, 6
Type 2 F Tojo ................................................................. III, 6
Type 97 TB Kate ................................................................. III, 7
Type 2 4EF B Emily .............................................................. III, 7
The Japs view the air situation ............................................... III, 13
Torpedo attack trainer ............................................................. III, 32
Torpedo squadron seventeen scores 18 hits in 37 drops VI, 12
Trainers, radar and electronic ................................................. IV, 22
Translations of enemy documents ................................................. IV, 15

V
Venturas in Aleutian operations ............................................. IV, 12

    Ratio and Technique for use of Incendiary and H.E. Bombs Against Japanese-Type Structures 28
    Armament ........................................ 30

SECTION V. ROCKETS ................................................................. 34
    Use of Rockets by U. S. Naval Aircraft in the Pacific .................. 34
    Training Syllabus Prepared for Rocket-Machine Gun Attack .................. 36
    Rocket Searchlight Attacks Prove Practical in Tests .................. 37
    Technical Notes ........................................ 39

DECLASSIFIED JAN 1945
DECLASSIFICATION OF THIS PUBLICATION.

DECLASSIFIED AT 3 YEAR INTERVALS
DECLASSIFIED AFTER 12 YEARS.

DOD DIR 5200.10

TITLE INDEX

Material appearing in the Naval Aviation Confidential Bulletin, January through June, 1945, is included. Roman numerals indicate month: January, I, February, II, etc.

A
Aerology ........ I, 24; II, 25; III, 19; IV, 21; V, 17; VI, 15
Airborne beach observer ......................... IV, 21
Aircraft Design Projects
VF .................. I, 51; II, 60; III, 62; IV, 70; V, 69; VI, 59
VJ-VF ................ II, 62; IV, 71; VI, 60
VOS-VSO ............ I, 52; II, 63; III, 62; V, 61; VI, 60
VPB ................. II, 62; III, 62; IV, 70; VI, 60
VSB ................ II, 51; II, 61; III, 62; IV, 61; V, 61; VI, 59
VTB ................. I, 52; II, 62; III, 62; IV, 58; V, 58; VI, 59
LTA ................ III, 62
Armament ............. I, 30; II, 33; III, 36; IV, 42; V, 37; VI, 34
Avengers to be fitted with target reels for carriers ... IV, 45

B
BAKA—Japan's bomb with a brain ................ VI, 5
Boats designed for use as bomb targets ........ IV, 27
Bomb duds caused by insufficient air travel ... III, 32
Bomb hoisting slings developed ................. III, 35
Bombing, low level or masthead .............. V, 27
Bombs, standard GP, composition B now used ... V, 27
Bombsight Mk. 23 permits low level attack accuracy VI, 30
Bridge-Busters ................................... II, 17

C
Ceiling and visibility unlimited: weather unfavorable. III, 22
China Sea strikes .................................. V, 17
Confidential courses NATTC ....................... VI, 27

D
Dazed pilot makes it back ......................... IV, 9
Dive bombing, Accuracy in ...................... I, 19
Downed pilot escaped clutches of Jap craft ..... V, 5
Droppable fuel tanks for use as fire bombs, Stabilizing .................. III, 33

E
Effects of dive angle on range impact errors of aircraft weapons .......... VI, 38
Eleven against one during seventy-five minutes .... IV, 5
Equipment and Materials.
50,000 parachute kits purchased for use of fleet ... II, 44
ADS-1 signalling kit effects rescues ............ V, 55
AR-8 airborne droppable lifeboat ................ III, 49
Camouflage technique ................................ V, 53
Drop tests completed on cylindrical steel engine container ............ I, 43
Droppable fuel tanks, Capacities, types and uses of .... II, 50
Fire hazard tests of droppable fuel tanks .......... IV, 66
High strength aluminum alloy development ...... III, 54
Hydraulic system reservoir design on new aircraft .. IV, 67
Improved aircraft brakes appear in new models .... II, 47
Installation of the CSFJ-1 transmissionmeter at NAS Patuxent River .......... I, 45
Liquid Oxygen recharge equipment ................. I, 41
Magnesium in naval aircraft ...................... II, 48
Mail pick-up and delivery by airplane to ships at sea ................ IV, 67
Mk-l aircraft exposure suit issued to squadrons on area basis ........ III, 49
Modification of the PB4Y-l life raft installation ..... I, 46
Night distress signal for over-water operations ... II, 46
Non-inflammable hydraulic fluids studied .... II, 46
Nylon armor provides flak protection ................ II, 47
Oxygen pressure breathing apparatus ............... VI, 46
Oxygen water vapor indicator ...................... II, 48
Parachute webbing for tie-downs ................. VI, 48
Pilot comfort ..................................... VI, 50
Plastic support panels developed for self-sealing fuel tanks ............ V, 54
Preservation and packaging of anti-friction bearings I, 42
Safety pressure diluter demand oxygen regulator III, 53
Sandwich materials for aircraft structures .......... I, 46
Substitutes for anti-friction bearing rod ends .......... I, 43
Synthetic grease under development ............... V, 54

F
Film will aid aerial camouflage detection .......... V, 13
Fire bombs, new weapon for devastation ........ II, 28
Flying classroom, R4D, for airborne electronics .... VI, 21
Frozen foods for transport passengers .......... VI, 50

G
GCA-Air Navigational Radio Aids ................ I, 11
German "company front" attack on heavy bombers IV, 6

H
IFF, Necessity for proper use of .................... III, 26
In again, out again ................................ VI, 9
Incendiary bomb (100 lb.) designed for land or water targets ............... V, 34
Incendiary clusters for use against enemy shipping .... V, 36
Incendiary & H.E. bombs against Japanese type structures .................. I, 28
Instances of ship failure to recognize planes ........ VI, 11
Instruments ........................................ I, 50; II, 58; IV, 69; V, 51
Instrument trainer, advanced, for fighter students .. III, 63
Integrated aeronautical program ................... II, 5
Intelligence notes I, 10; II, 23; III, 8; IV, 14; V, 8; VI, 12

J
Japanese aircraft destroyed by U.S. Navy—Year 1944 V, 9
Japanese develop "flying mine" version of German V-1 .... III, 12
Japanese intruder mission attacks transport planes .... III, 17
Japanese land mines .................................. IV, 16
Japanese morale in the outposts ..................... II, 22
Japanese meteorology .................................. V, 27
Japanese radio deception .............................. I, 8
Japanese strive to improve their fighter direction .... III, 11

L
Long air-travel arming fuzes ........................... V, 36
Low altitude photography by the Sonne camera ..... IV, 19
Lubricants', synthetic, for aircraft instruments ... II, 58

M
Mk. 6 float light, Pull-match ignition for .......... VI, 33
Meteorologists consider ways to improve forecasts .. VI, 15
Mission accomplished .................................. IV, 24

N
Naval Air Technical Training Command .............. V, 23
Night fighter action, A year of ....................... III, 11
Night fighter training aided by electronic devices .. VI, 25
Nose fuze AN-M103 restricted from carrier-use ... IV, 45

O
“On the deck” strafing as reported by AAF .......... V, 6
One trip—two rescues ..................................... VI, 11
Ordnance .... I, 28; II, 28; III, 32; IV, 37; V, 34; VI, 30

P
P-80, Army Air Forces' new weapon .................. V, 32
Parachutist evades strafing ............................ III, 13
Parachute mines, Effectiveness depends on ....... III, 32
Patrol bomber actions in the Pacific January-August 1944 .... II, 15
PB4Y downs Tessa—possibly with Jap admirals aboard I, 7
PB4Y tackles Jap seaplane base ........................ II, 20
Photographic Intelligence .............................. IV, 19; V, 13
Photo analysis of pilot sighting error .............. IV, 54
Pilot training, new method proposed ............... V, 41
Position firing, Airborne training sight gives instruction in..... IV, 25
Power plant design ...................................... I, 47; II, 55; III, 55; IV, 62; V, 56; VI, 56
Precipitation static problems studied in experiments II, 27
PT boats, Identification and recognition of .......... III, 27

R
Rabaul activity ........................................ IV, 13
Radar, airborne, Used at Leyte and Formosa ...... IV, 21
Radar and Electronic Trainers ........................ I, 21; II, 63; III, 63
Radar wind sounding pulse repeaters ............... I, 27
Radio and Electrical
AP-APS-3 radar proves valuable in operations .... II, 51
D-1 flash-tube unit to be used in night attacks .... I, 49
Directional sonoyuoys will aid in war on subs .. V, 48
Electric equipment aids night-fighting Tigercat .... V, 45
Direction finders help track down enemy radars .. III, 57
Equipment will check IFF on take-offs ............... IV, 62
Naval aircraft electronic nomenclature ............. VI, 56
Radar bombight, AN/APQ-5B ........................ VI, 54
Radar rocket sight now in production ............... IV, 60
Radar search receiver in production ................. III, 60
Radar training sets in production .................... IV, 60
Radar used at Leyte and Formosa .................... II, 18
Radio relay link extends VHF ranges ................. IV, 58
Target discriminator aids in radar target ..... VI, 52
Ranging scales devised to determine slant range .. IV, 53
Rawin—Determination of upper winds by radar ... VI, 16
Recognition and Identification ......................... III, 25; IV, 30; V, 27; VI, 11
Recognition, Enemy works hard on ................. IV, 32
Rockets .... I, 34; II, 36; III, 41; IV, 47; V, 40; VI, 37
Rocket nomenclature ................................... II, 38
Rocket searchlight attacks prove practical in tests .. I, 37
Rocket tactics, proposed, to be used against shipping by SB2Cs .. III, 41
Rocket training, RAF report ........................... V, 44
Rockets, aiming allowances for wind and target motion .. VI, 37
Rockets, night firing .................................. IV, 50; V, 40
Rockets, use of by U.S. naval aircraft in the Pacific .. I, 34
RPD handbook issued ................................... V, 26
Rubber terrain models ................................... V, 16

S
Ship installations ..................................... I, 51; IV, 70; II, 59
Ships' speeds determined from aerial photographs .. VI, 12
Storm activity and anomalous radio wave propagation V, 20
Storm detection by radar ............................... IV, 23
Statistical report of air operations in the Marianas, Western Carolines and Bonins I, 5
Statistical summary of Naval Air Operations, January-August 1944 .. II, 11
Stellite-lined barrels developed for cal .50 BAM guns IV, 40
Strafing locomotives, Technique ........................ VI, 9
Strafing tables for fixed guns, Tentative ............ IV, 51
Structures ........................................ VI, 51

T
Tactics suggested for low-level attacks ........... III, 8
Ten Jap planes downed in one encounter ............ IV, 9
Tiny Tim, the Navy's newest aircraft rocket IV, 47; VI, 45
Torpedo modified, Favorable reports ................. III, 5; IV, 40
Torpedo training revised ................................ VI, 33
Toss bombing technique ................................ IV, 37
Trainers provide thorough instruction in new ground controlled approach system IV, 25
Training ............................................ I, 11; IV, 25; V, 23; VI, 21
Training films ... I, 53; II, 65; III, 64; IV, 72; V, 62; VI, 61
Training syllabus prepared for rocket-machine gun attack I, 36
Typhoon .................................................. III, 19

V
VPB squadron fires Jap vessels ........................ IV, 6

W
Water discriminating nose fuze Mk. 243 .......... V, 34
Weather a vital factor in the strategy of war ........ II, 25
Weather and the landings on Iwo Jima ............... VI, 18
Weather-surface radar observations .................. I, 24
Weather, upper wind equipment and methods ........ III, 23

CONFIDENTIAL

NAVAL AVIATION CONFIDENTIAL BULLETIN OCTOBER 1946

TITLE INDEX, 1946

Material appearing in the Naval Aviation Confidential Bulletin in 1946 in the four issues, January, April, July, and October, is included. Roman numerals indicate the issue: January, I, April, II, July, III, and October IV.

A/C rocket installations .................................. III, 35
Aerology .................................................. I, 21; II, 33; III, 19; IV, 11
AEW system extends radar range ......................... I, 32
AEW in radar-weather detection .......................... III, 21
Air combat record World War II ........................ II, 5
Airborne electronics training program ................... III, 23
Airborne equipment ....................................... II, 42; III, 44; IV, 34
Aircraft barriers .......................................... III, 39
Aircraft armament, proposed ............................ IV, 27
Alloys, high temperature ................................ IV, 35
Armament .................................................. I, 43; II, 47; III, 35; IV, 29
Armor materials research ................................ IV, 28
Bikini tests, Meteorological aspects of ............... IV, 11
Bomber design ............................................. II, 43
BuOrd reports new developments ......................... III, 33
Cabin pressurization defined ............................ III, 44
Cadillac II trainer .......................................... I, 26
Carrier operation (U. S.) vs. Japanese home islands .. I, 5
Carriers ..................................................... I, 31
Catapults ................................................... III, 40
Chemical training, Naval training for .................. IV, 13
Comlynoy surfaces for arresting hooks ................. III, 47
Computing gunsight malfunction trainer ............... III, 24
Countermeasure equipments (new) reach fleet .......... I, 40
CVE combat air operation ................................ I, 11
CVE's make significant contribution to victory ..... I, 8
Dilbert Jap style ........................................... II, 11
Ejectable pilot seat program ................................ III, 46
Electronic brains of pilotless aircraft .................... I, 36
Electronics .................................................. I, 32; II, 43; III, 41
Fast carrier anti-shipping attacks ....................... III, 5
Fast new attack planes magnify carrier's striking power .... I, 31
F6F aircraft accidents .................................... I, 15
Fatal accidents, Summary June-July 1946 ................ IV, 7
Fighter design ............................................. III, 50; IV, 35
Flying electronics school ................................ II, 35
F4U aircraft accidents ..................................... III, 9
Fuels and lubricants ...................................... III, 47
Fuel quality gages ........................................ I, 42
Helicopter design .......................................... I, 45; IV, 39
Horizontal bomb bay rearming time ..................... III, 37
Instruments ................................................. I, 42; III, 50
Japs couldn't train ....................................... II, 16

Kamikaze, How they achieved ................................ II, 9
LTA ............................................................. I, 47
Marines train night fighters ............................. II, 38
Mark 18 sight scores against aerial targets ........ IV, 27
Mark 23 gunsight .......................................... III, 30
Navy's potent shore-based aviation ...................... II, 19
New planes to recognize .................................. III, 26
NRL field station ........................................... II, 26
Night fighter gunnector ready for tests .............. IV, 23
Non-inflammable hydraulic fluids ....................... IV, 34
Operation CROSSROADS, Use of drones at ........... III, 3
Operation NANKOK ........................................ III, 20
Parachute ten commandments ............................. II, 41
Patrol bomber design ...................................... II, 45; IV, 38
Peacetime recognition training .......................... III, 28
Pilotless aircraft .......................................... II, 43; III, 42; IV, 43
Planes destroyed by Japanese action ..................... II, 9
Power plant design ....................................... I, 43; II, 46; III, 47; IV, 30
Radar locates typhoon ..................................... I, 21
Ram jet propulsion ........................................ IV, 30
Recognition of Soviet warplanes ...................... IV, 17
Recognition training continues ........................ II, 41; III, 28
Rotary wing ................................................ I, 45
SB2C-5, Spin tunnel tests of ............................. I, 29
Scout Observation ......................................... II, 46
Ship installations .......................................... III, 39
Siberian weather centrals ................................ III, 19
60 caliber machine gun .................................... IV, 26
Spin-stabilized rocket ..................................... IV, 28
SWOD Mark 9 ............................................... IV, 26
Task Force 38 in South China Sea ....................... IV, 5
Tigercat electronic system modified for F7F-3N .... I, 39
Toward tomorrow's Navy ................................... II, 24
Training films .............................................. I, 48; II, 48
Turbine drive design ...................................... III, 49
UHF voice radio program .................................. III, 41
Upper atmosphere research with V-2 ..................... III, 13; IV, 15
Utility transport and training design .................. II, 45; III, 51
VP ............................................................. I, 47
VJ-VR-VN .................................................. I, 46
VOS-VSO ...................................................... I, 45
VPB ............................................................. I, 46
Winterization program .................................... IV, 34
TITLE INDEX, 1948*

Material appearing in the Naval Aviation Confidential Bulletin in 1948 in the four issues, January, April, July, and October, is included. Roman numerals indicate the issue: January, I; April, II; July, III; and October, IV.

Aerology ........................................ I, 31; II, 17; III, 31; IV, 22
Aerological aspects of atomic detonation ........ IV, 22
Aerological facilities at David Taylor Model Basin ... III, 37
Airborne communications by radio teletypewriter .... I, 57
Airborne equipment, progress in ................................ III, 20
Airplane conditioning ................................ III, 26
Aircraft systems design ................................ III, 30
Instrumentation .................................... II, 27
Materials research ................................... II, 29; III, 20
Navigation instruments ............................... III, 26
Navigation equipment ................................ II, 22
Photography ........................................ III, 22
Safety equipment .................................... III, 23
Aircraft conditioning ................................ III, 26
Aircraft machine guns ................................ IV, 33
Aircraft rockets ...................................... IV, 30
Aircraft systems design ................................ III, 30
Airships ............................................. IV, 48
Armament Installations, Fiscal 1949 .................. IV, 42
Atomic defense instrumentation ...................... II, 35
Atomic detonation, aerological aspects of ........ II, 22
Attack aircraft ...................................... I, 19; II, 39; IV, 47
Automatic navigation for pilotless aircraft ......... I, 45
CIRRUS Project makes important discovery ........ III, 31
D-558-2 engine passes test .......................... I, 40
David Taylor Model Basin, aeronautical facilities at II, 37
Development of attack aircraft ....................... I, 19
Development of materials for high temperature use II, 29
Escort carrier ....................................... I, 27
Fighter aircraft ..................................... IV, 46
Fighter development, the pre-war years ............ IV, 2
Fighters, faster, farther—and higher ................ III, 3
Fighter workhorse ................................... IV, 32
Fontana Laboratory .................................. I, 51
Flight safety and statistics .......................... I, 25; II, 11; IV, 16
Forecasts in peacetime amphibious operations .... III, 32
Guided missiles ...................................... II, 21; III, 33; IV, 27
Helicopter accidents, survey of ...................... IV, 16
Helicopters today .................................... II, 2
Hurricane tracking yields new knowledge ........... I, 31
Instrument flight, aircraft readiness for .......... II, 38
Instrumentation ..................................... III, 27
Intelligence officers for aviation .................... IV, 9
JATO applications ................................... III, 43
LARK program ..................................... I, 53
Liquid propellants for rockets ....................... IV, 37
Liquid rocket engine for D-558-2 passes test ...... I, 40

Materials research ................................... II, 29; III, 20
NAMTC becomes permanent installation .............. IV, 34
Navigation equipment ................................ III, 26
Ordnance .......................................... II, 35; II, 21; III, 33; IV, 27
Acoustic homing control torpedo now under test .... II, 26
Aircraft guns and cannons ......................... I, 37; IV, 33
Aircraft rockets .................................... IV, 30
Aircraft rocket launchers ........................... I, 37; III, 36
Anti-submarine weapon development described .... II, 25
Armament installation, fiscal 1949 ................. IV, 42
Bomb directors ..................................... II, 22; IV, 33
Bomb fuze information indicator announced ....... III, 36
BuOrd's guided missile program .................... II, 21; III, 33; IV, 27
Fighter workhorse .................................. IV, 32
Fire control equipment ............................. I, 35; III, 35
Ordnance notes ..................................... I, 39
Rocket blast program ................................ I, 36
Rocket flares ....................................... IV, 31
Underwater sound signal ............................ II, 27
Patrol planes ....................................... I, 56; IV, 47
Phynd sky compass .................................. I, 46
Photography ........................................ III, 22
Pilotless aircraft, automatic navigation for ....... I, 45
Proposed armament installation, Fiscal 1949 ....... IV, 42
Radio-controlled target program .................... II, 36
Radio teletypewriter ............................... I, 57
Recognition characteristics of new airplanes outlined I, 13
Recognition, submarine ............................ IV, 11
Rocket flares ....................................... IV, 31
Rotary wing design .................................. II, 2; IV, 49
Safety equipment ................................... III, 23
SB2C-SBW accidents reviewed ....................... II, 25
SC-1 accidents, resume of .......................... II, 11
Ship-based aircraft in Pacific operations, summary of II, 10
Skyhook balloons go to sea ........................ III, 31
Solar radiation research ............................ I, 33
Sounding system for the earth's newest frontier II, 17
Submarine recognition ................................ IV, 11
Systematic planning in naval aviation ............... III, 13
Target program radio controlled ..................... II, 36
Training ............................................ IV, 9
Upper atmosphere research, report on ............. IV, 25
XAN-N-2 Sparrow ..................................... III, 41
Weather forecasting by electronic computation .... II, 19
Wind data by radar .................................. I, 34
