RE: FOIA Request, Control No.: FI-2021-0047

This letter is in response to your Freedom of Information Act (FOIA) request, dated March 12, 2021, sent to the U.S. Department of Transportation (DOT), Office of the Inspector General (OIG). You requested the following records:

“[A] copy of all documents concerning any and all investigation(s) conducted by the Department of Transportation Office of Inspector General concerning the actions of the FAA on September 11, 2001, relating to interactions between FAA and the entities known as NEADS and/or NORAD.”

Some of the records, 255 pages, originated with the Federal Aviation Administration (FAA); and is therefore referred to the FAA. The appropriate personnel from the FAA will review the documents for FOIA and respond directly to you.

Attached are 4,376 pages of documents responsive to your request. Please be aware that all 9/11 Commission hearing transcripts are released in full, without redactions. For other records, some information was redacted or withheld pursuant to FOIA exemptions (5 U.S.C. § 552(b)(5), (6), (7)(C) and (7)(E)).¹

¹ Exemption 5 protects documents that are pre-decisional and a direct part of the deliberative process. Exemption 6 protects names and any data identifying individuals if public disclosure would be a clearly unwarranted invasion of privacy.

Exemption 7(C) protects personal information in law enforcement records. It prevents the disclosure of law enforcement information which could reasonably be expected to constitute an unwarranted invasion of personal privacy.

For any further assistance, you may contact Attorney-Advisor/FOIA Officer Barbara Hines at (202) 680-3084, Barbara.Hines@oig.dot.gov. You may also contact our FOIA Public Liaison, Marie Miller at (202) 366-1959, Marie.Miller@oig.dot.gov.

For your information, Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA. See 5 U.S.C. 552(c) (2006 & Supp. IV 2010). This response is limited to those records that are subject to the requirements of the FOIA. This is a standard notification that is given to all our requesters and should not be taken as an indication that excluded records do, or do not, exist.

If you are not satisfied with the DOT OIG's determination in response to this request, you may administratively appeal by writing to the Chief Counsel for the Office of Inspector General, Department of Transportation, 7th Floor West (JL), 1200 New Jersey Avenue, S.E. Washington, DC 20590. Appeals to the Chief Counsel should be prominently marked as a "FOIA Appeal." If you prefer, your appeal may be sent via electronic mail to FOIAAPPEALS@oig.dot.gov. An appeal must be received within 90 days of the date of this letter and should contain any information and arguments you wish to rely on. The Chief Counsel's determination will be administratively final.

You also have the right to seek dispute resolution services from the FOIA Public Liaison (contact information shown above) or the Office of Government Information Services (<https://ogis.archives.gov>) via phone—202-741-5770 / toll free—1-877-684-6448; fax—202-741-5769; or email—ogis@nara.gov.

Please be advised, due to the COVID-19 pandemic the DOT OIG FOIA Office is currently operating on a remote basis only. Therefore, there may be significant delays in the processing of current and future FOIA requests received via postal mail. Likewise, the delivery of printed copies will be impacted and experience significant delays.

Until further notice, we recommend (when possible) that FOIA requests be submitted using our online portal at <https://www.oig.dot.gov/FOIA> or the National FOIA portal

Exemption (7)(E) protects law enforcement techniques and procedures for law enforcement investigations or prosecutions that could risk circumvention of the law if released.

at <https://www.foia.gov/>. We apologize for any inconvenience this may cause. Thank you for your patience.

Sincerely,

Siera Griffin

Government Information Specialist

OFFICE OF INSPECTOR GENERAL

Case # 042R0122001

SWORN INTERVIEW OF

TONY MELLO

BY

JOHN AZZARELLO, 9/11 Commission

MILES KARA, 9/11 Commission

JEFF BROWN, 9/11 Commission

DAVID WIEGAND, FAA Counsel's Office

Friday, March 26, 2004

[TRANSCRIPT PREPARED FROM A TAPE RECORDING.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I N T E R V I E W

MR. AZZARELLO: It's March 26, we're at FAA headquarters in Washington, about to begin an interview with Tony Mello. I'm John Azzarello with Team 8, 9/11 Commission.

MR. KARA: Miles Kara, 9/11 Commission.

MR. BROWN: Jeff Brown, 9/11 Commission.

MS. WOODS: David WIEGAND, FAA Counsel.

MR. MELLO: Tony Mello, FAA, Air Traffic.

MR. AZZARELLO: Mr. Mello, can you start, generally, by giving us a brief overview of the various positions you've held with the FAA since you started your career with the FAA leading up to September 11 and then tell us, in a little bit more detail about the position you held on that day and the duties and responsibilities that went with that position?

MR. MELLO: Sure, I was hired by the FAA after serving in the military from '77 to '81. Hired at LaGuardia Tower in New York after the strike in '81. Spent three years as an Air Traffic Controller in New York.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Eighty-one to '84, you were at LaGuardia?

MR. MELLO: Eighty-one to '84, correct. I then transferred to San Juan, Puerto Rico, and did a three-year contract down there, from '84 to '87.

MR. AZZARELLO: You were a controller there, too?

MR. MELLO: Yes and that was both in the approach and in the center environment non-radar environment down there in the ocean. Came back in '87, was an employee of the Eastern Region, so I came back to Baltimore tower and Baltimore radar, which is an up/down facility. Spent about three years there, to '91. And I got hired by Dave Cannoles in the Investigation side of QA here at headquarters. Spent about four years with Dave and I transferred out to Washington Center as a supervisor.

MR. AZZARELLO: Let me stop you for a second, '91 to '95, you're in the QA Division?

MR. MELLO: Yes, I was in Air Traffic Investigations.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Air Traffic Investigations Division?

MR. MELLO: Yeah.

MR. AZZARELLO: And there you were part of a team that investigated accidents?

MR. MELLO: A staff worker on a team that would look at accident incidents and that type of air traffic incidents.

MR. AZZARELLO: Incidents including, like, separation errors?

MR. MELLO: Correct.

MR. AZZARELLO: And then from there after '95?

MR. MELLO: I think it was, yeah, late '95, early '96, I transferred out to Washington Center in Leesburg as a supervisor, a traffic control supervisor. I spent about 2 and a half years there; came back, basically the same outfit, due to organizational changes, I think the name changed probably, but the same function, job function, still under Dave Cannoles.

MR. AZZARELLO: That was around '99?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Yes, late '98.

MR. AZZARELLO: Late '98.

MR. MELLO: November '98. Back to a staff position with Dave and about six to eight months later, I get promotion as an Acting Assistant Division Manager with Dave and three or four months after that was made permanent as a Systems Division Manager, AAT-201 is the identifier.

MR. AZZARELLO: AAT-20 what?

MR. MELLO: One, and I've been doing that up till now.

MR. KARA: What was the final position?

MR. MELLO: Assistant Division Manager.

MR. AZZARELLO: Dave was he AAT-200, then?

MR. MELLO: At the time he was AAT-20 in charge of 100, which is Evaluations and 200 which is the Investigations side.

MR. AZZARELLO: And he was your direct report?

MR. MELLO: Yes.

MR. AZZARELLO: And tell us what, prior to 9/11, what would be a typical day of your duties

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and responsibilities prior to 9/11 in your role as AAT-201, Assistant Division Manager.

MR. MELLO: Well, I shared the duties of on-call which is 24/7, basically, after-hours type person to be on-call for incidents and accidents in the system. On a daily basis, we would compile whatever happened in the system the day before from, you know separation, any near mid-air collisions, accidents, any type of quality assurance problems in the system. And we'd compile a daily report on that and we'd brief that up. Back then, it was AAT one, which was Ron Morgan [ph], Bill Peacock, that type of position, we would brief that up daily. And the day more or less focused around following up on what happened the day before and trying to do some proactive stuff for quality assurance in the field to prevent reoccurrences.

MR. AZZARELLO: So, you were monitoring all accidents, incidents, and investigating them trying to find causes of the incidents or accidents?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: That's correct.

MR. AZZARELLO: And then, hopefully, I guess to learn lessons from what caused them and then if changes could be made to prevent it, going forward you would discuss those things?

MR. MELLO: Yes, and as a manager, I would be sending teams out to accident sites, if needed, to facilities that had a high level of operational errors, separation problems. And also we had a two-person group that supported the litigation side when accidents resulted in litigation against the FAA, we would provide Air Traffic Control Specialists to assist the attorneys in preparing for the case.

MR. AZZARELLO: So you had a litigation-support role, too?

MR. MELLO: Correct.

MR. AZZARELLO: For any FAA litigation?

MR. MELLO: Air traffic litigation.

MR. AZZARELLO: For any air traffic litigation?

MR. MELLO: That's where our expertise is,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

yes.

MR. AZZARELLO: How about prior to 9/11, if there was a hijack report--a report of a hijack in the system that was still airborne, would that trigger any duties and responsibilities for you and the office that you were in?

MR. MELLO: Prior to 9/11 if one was reported or occurred, the function of my office, at that time, would be in data collection to support making tapes, getting radar, it would be a post-type of investigation and ongoing as you speak, other than getting the data from the facilities.

MR. AZZARELLO: It would not involve the responsibility of coordinating, say, an FBI law enforcement or military response to the hijacking, that's ongoing?

MR. MELLO: No.

MR. KARA: During the first time you worked for Dave Cannoles in '91 to '95, do you recall working the hijack that occurred in early 1993 where a Lufthansa plane came across the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Atlantic and landed at New York City?

MR. MELLO: No, I did not.

MR. AZZARELLO: Now, about pre-9/11 general hijack protocol, if you know, was it your responsibility as you've said, or your office's or division's to respond in terms of getting to coordination with the military or with any element of the Department of Defense or law-enforcement. But do you know who would--where would that responsibility fall to, if you knew what the protocol was pre-9/11?

MR. MELLO: My understanding it would be the first persons in the FAA that had knowledge of it happening, being an Air Traffic Control facility or if that was elevated to the headquarters for dissemination, but I guess those are the first people who have knowledge of it and have access to the military. If it's a small facility, naturally, they would call their parent facility that oversees them on tower to center, and then the center has lines to the military to give notification.

MR. AZZARELLO: Where, this is not a test

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

or anything, I don't want you to feel that way. And we've seen some documents and it seems that there are different understandings, I guess, as we've gone out in the field and in the facilities. I understand that at a controller level as to what happened above them once they reported to their supervisors and once they've done that, then they're back at their scope watching planes, it is off their plate in a real way and they might not have been intimately familiar, then, with what happens after they report that.

But there are some protocols and I think the way we read them and understood them is that there's a hijack coordinator designated here at headquarters. And that once the information flows from the field facility--

MR. MELLO: Uh-huh.

MR. AZZARELLO: --of a hijack that it sort of goes up the chain of command, I guess that--certainly that part is in the controller guidelines, I guess, the FAA orders that provide the guidelines for controller conduct and duties.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

It says you notify your supervisor immediately, if you know of a hijack, and they use the example typical of squawking hijack code 7500?

MR. MELLO: Correct.

MR. AZZARELLO: And then, in terms of the paperwork, it tells you that you tell your supervisor and then the next piece of relevant paper on hijacking that we see appears at a headquarters level and it talks about escort procedures and an FAA order around is, like 7610--7610, you guys have that?

MR. KARA: I've got it.

MR. AZZARELLO: Here it is escort of hijacked aircraft. And this is the document that says that there's a hijack coordinator, either the Director or his designee of the FAA Office of Civil Aviation Security; that that person on duty at Headquarters at the time--

MR. MELLO: Uh-huh.

MR. AZZARELLO: --was the person that's supposed to request the military to provide an escort for a--excuse me, for a confirmed hijack and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

then it tells, you know, what the purposes are to secure a positive flight following and a report of unusual observances and aid--is that--did that comport with your pre-9/11 understanding or was it that it didn't formally have to go up to the headquarters that it could go--was it a dual track that the center could report it right to let's say a military entity, if they knew about NEADS or SEADS that the center could call right to that military sector?

MR. MELLO: Well, having both worked at--in San Juan in international waters and the Washington center, I'm familiar with what centers have. Centers have direct lines; they have a military office right there. You know, with a lot of the warning areas had direct contact with the military. So, my understanding is we would go direct to the military or talk to the MOS at the facility.

MR. AZZARELLO: Okay, just go right to the military ops specialist?

MR. MELLO: Yeah, anything out of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

ordinary we'd do that, you know, especially when you have the--be outside of the country, where you would have [unintell.] violations and stuff like that, which, you know, could just be for not squawking the right squawk coming in.

MR. AZZARELLO: And in addition to that, though, it was your understanding that you would also notify your supervisor at the center?

MR. MELLO: Yeah, I was the supe, my it would be to my second-line and from there it disseminated to regional centers, the WOC and--

MR. AZZARELLO: And when you were a supervisor, at, say, ZDC--

MR. MELLO: Uh-huh.

MR. AZZARELLO: --were you--what was your official title? Were you controller in charge or--

MR. MELLO: Supervisor Air Traffic Control Specialist, in charge of the controllers on my team.

MR. AZZARELLO: And who--would you report to OMIC or the Air Traffic Manager?

MR. MELLO: The Ops Manager--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: The Ops manager.

MR. MELLO: --the called them Area Managers back then, but--

MR. AZZARELLO: Is that the same as an OMIC?

MR. MELLO: Yes, an Area Manager is the same as an Ops Manager today.

MR. AZZARELLO: So, hypothetically, in 1998, you're at ZDC, you have a controller, you're a supervisor, he tells you, I think I got a hijack here--

MR. MELLO: Mm-hmm.

MR. AZZARELLO: --7500 squawk, you would tell the Area Supervisor?

MR. MELLO: Yes.

MR. AZZARELLO: And what was your understanding as to the Area Supervisor what he or she would have done with that information?

MR. MELLO: Take it to the Watch Desk to the OMIC.

MR. AZZARELLO: The TMU guys?

MR. MELLO: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: And where would they, did you have an understanding as to where they--

MR. MELLO: Well, Washington Center, the military specialist was right there, so, they would be getting notification at that point. And anything--any calls to the military would be made to our MOS, Military Operation Specialist at the Watch Desk, so--

MR. AZZARELLO: I would go right to the MOS?

MR. MELLO: Yeah.

MR. AZZARELLO: How about reporting in the chain of command within the FAA?

MR. MELLO: The Ops Manager would be calling the Region Operations Center, ROC, and, in turn get patched into the WOC.

MR. AZZARELLO: And the ROC would go right to the WOC here?

MR. MELLO: Correct.

MR. AZZARELLO: And I guess, is that when the FAA hijack coordinator at headquarters would sort of be brought into the loop?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Yes, to be honest, I didn't know it was the Aviation Security person back then, I just thought it was the FAA headquarters and they disseminated it, I didn't know how--

MR. AZZARELLO: Somebody would take control of the situation from the headquarters perspective--

MR. MELLO: Yeah.

MR. AZZARELLO: --from a management perspective?

MR. MELLO: Yes.

MR. AZZARELLO: Now, take us to-- do you have any other background stuff?

MR. MELLO: No.

MR. AZZARELLO: Take us to the day of 9/11 and tell us how your morning started and then take us to when you first realized that there was a report of a hijack in the system, the first report--came to your attention, anyway, there being a hijack in the system?

MR. MELLO: Day starts pretty normal, about 5:30 get to work. We start building the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

packages and briefing notes for the previous day to brief, you know, the Director of Air Traffic.

MR. AZZARELLO: And you do that daily?

MR. MELLO: Yeah.

MR. AZZARELLO: Whether there's significant incidents--

MR. MELLO: Anything--

MR. AZZARELLO: --or any incidents at all?

MR. MELLO: Yes. People and faces have changed you know, positions, but, basically, we still brief people. We brief the COO now, instead of the Air Traffic Director. But everything pretty much normal, we do a 7:00 o'clock and a 7:30 briefing. Takes us to right around 8:00 o'clock, by that time, you know, get with my people downstairs on the fourth floor--still on the fourth floor. And just kind of discuss what we were going to do for that day.

Usually, we've got a roundtable down there and just--

MR. AZZARELLO: On the fourth floor?

MR. MELLO: Yeah, we call it the POD, it's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

just a bay with a desk. And the exact timing, I don't know, but somewhere in the 8:15, 8:20, you know, Dave Cannoles walks by, which Dave Cannoles was a pretty hands-on boss, so he would come out to the group a lot just to say how's it going. But he came back and he said, come with me.

And as I caught up to him, because he never stopped, he said a plane just hit the World Trade Center. And he said something about a possible hijacking. And so, I asked Dan Diggins who was one of my specialists to join me and we came up to the tenth floor to AAT-1's office to the conference room.

MR. AZZARELLO: You grabbed, Dan Diggins was one of your assistants?

MR. MELLO: One of my employee specialist, yeah.

MR. AZZARELLO: So, you, Dan Diggins and Jeff Griffith go up to the--

MR. MELLO: Dave Cannoles.

MR. AZZARELLO: --Dave Cannoles, I'm sorry, go up to the tenth floor?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Yes.

MR. AZZARELLO: And we have a schematic here that we made--

MR. MELLO: Okay, sure.

MR. AZZARELLO: Take a look at that and see if you--I guess at that--I guess--it's fair and accurate depiction of what the floor looked like--

MR. MELLO: Oh, okay, here we go--

MR. AZZARELLO: --on the 11?

MR. MELLO: Yeah.

MR. KARA: Is it normal to come up to the tenth floor as opposed to configuring yourselves down on the fourth floor?

MR. MELLO: For that, when my boss said come, yeah. Normally, any, if we had a major accident a TWA, American 587, we'll come right up and do a face-to-face briefing with what we have and I considered this, at that time, definitely at that level.

MR. AZZARELLO: What did you know about the accident, did you just--did you know anything outside of Dave telling you we've had an accident?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: We had someone hit the World--and aircraft hit the World Trade Center is how he said it. And, no, I didn't, we didn't have a TV down there, it wasn't till I come upstairs, you know, I could see it on a TV.

MR. AZZARELLO: And you said if there was a major accident, you'd come to the tenth floor to brief the, what, the Administrator and Deputy Administrator?

MR. MELLO: Director of Air Traffic, not the Administrator, my bosses would probably brief the Administrator, Dave Cannoles probably would do that.

MR. AZZARELLO: So, the Director of Air Traffic at that time would have been Bill Peacock?

MR. MELLO: At the time of 9/11, yes, Bill Peacock.

MR. AZZARELLO: Did, when you saw--did you see when you came up to the tenth floor, did you see the results of the first crash that was on the TV?

MR. MELLO: Yes, but the TV was actually

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in Bill's office and we were next door in a conference room, divided by a wall. So, I happen to look in there--Bill wasn't in that day, Jeff Griffith was out in the entrance to the office, I remember passing him. And Dave says, you know, let's get going in here and we got set up and first thing Dave asked for was we need to get a telecon going.

The fortunate thing about what we do is we have access to that telecon without going through the normal procedures.

MR. AZZARELLO: Without going through the WOC?

MR. MELLO: Yeah, they sterilize a code for us 24/7, so we can just dial into it. Where you would have to call in and be placed into, they'll get a code. They just always give us one, in case we want to bring three or four facilities up to talk about an accident or something.

MR. AZZARELLO: And everybody--the facility know to call that number--

MR. MELLO: No, we tell them to come up,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it's ours we don't share it unless we want them.

MR. KARA: So, it's an invitation only?

MR. MELLO: Yes.

MR. KARA: Ah.

MR. MELLO: By us.

MR. AZZARELLO: And when you make that invitation, I mean, they know what number to call, they have a pre-assigned number--

MR. MELLO: Yeah.

MR. AZZARELLO: --and there's a code actually to make it on?

MR. MELLO: Yeah, we did it, we took our manual which is 7110.65 and so the pass code was 7110, 7-1-1-0, easy to remember, QA-type thing. So, we, instead of wasting time getting the WOC and then having to do whatever configuration back then, because it's all new equipment now, back then to put a telecon together, we just dial into the 7110--

MR. BROWN: It's an Air Traffic Bridge, is that right or not?

MR. MELLO: No, it's a WOC bridge, but we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

had direct access to it.

MR. AZZARELLO: Was there a name, the bridge as you set that Dave Cannoles said let's set up once there was an accident?

MR. MELLO: Well, it was the normal number you call in to get any bridge, but it allowed you to put your own pass code in without them assigning it, because it was permanently done.

So, once we did that, the first thing, and I forget the order of it, but he wanted New York Center, Boston Center, he started telling us people to contact.

MR. AZZARELLO: Let me see if I can put it in a time frame when it--when you're on your way up here to the tenth floor, you know of one crash at the Trade Center right?

MR. KARA: Not the second one?

MR. MELLO: No, not the second one.

MR. AZZARELLO: And Dave Cannoles tells you there's a possible hijack in the system. Did you equate those two at the time based on what Dave told you that the reported hijack might be one and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the same as the crash?

MR. MELLO: No--

MR. AZZARELLO: At that time, you thought--

MR. MELLO: --actually just the idea that a plane hit the building was scary in itself. So, I was in kind of awe from that, and then, you know, a hijacking, I didn't relate them at the time, no.

MR. AZZARELLO: So, at the time based on what Dave said to you, you thought they might have been two separate events?

MR. MELLO: Yes.

MR. AZZARELLO: And, did you have any idea, based on what Dave said to you, whether you thought it was a commercial aircraft that was--that hit the Trade Center or was it--

MR. MELLO: I don't know if it was Dave that told me, but early on, someone said something about a small airplane. I don't know if it was the TV when I got upstairs or someone said a light aircraft or a small aircraft. And I just remembered the first time I looked at the TV, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

said, yeah, a small aircraft.

MR. AZZARELLO: Based on your experience, you didn't--

MR. MELLO: Just based on the amount of damage that was done, but, still in my head I didn't think it was an airliner.

MR. AZZARELLO: Tell me when you learned of the second hi-jacking event?

MR. MELLO: Well, sometime in that very first 10 minutes, 15 minutes or so upstairs while we were trying to establish this telecon and get people on, I heard someone say another one hit. And, again, they're in the next room, there are several people in there. And they had the TV on and I remember just--I didn't go in there immediately, but a minute or two later went in there and they did a replay of it--

MR. AZZARELLO: Where's that, where are you now when you--

MR. MELLO: This is, we're talking over here okay? The door is here--

MR. AZZARELLO: Who's office is that the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Air Traffic Director's Office?

MR. MELLO: Yeah--

MR. AZZARELLO: Bill Peacock's office?

MR. MELLO: --his office is actually, right here, there's a conference room here and then there's a few more offices down here, AAT-1 was here and this is the conference room, this is really where we were. But they had the TV in here.

MR. AZZARELLO: Okay, you were in the conference room, though? Off of the Air Traffic, AAT-1--

MR. MELLO: Correct, door here, yeah, like that, door here, separated by one of these two walls they have.

MR. AZZARELLO: And where is the TV in that room?

MR. MELLO: It was, he had it on a desk, like, right here, he had it, believe it or not facing out, so, I don't know if someone turned it, but that's where I--we could see it from there.

MR. AZZARELLO: So you were in the conference room when you hear someone say another

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

one hit over here?

MR. MELLO: Yeah, in there I was doing something and I couldn't get right out of it.

MR. AZZARELLO: And do you have, is your telecon up yet or are you in the process of getting it going?

MR. MELLO: The telecon was up immediately but there was no one on it immediately, except us. So we were in the process of bringing people up. Get New York Center on and it was, I just remembered tough to start getting ahold of people, you know, you'd call the WOC, the line was busy--

MR. KARA: When you called to the ZBW or ZMI, who, specifically would you be inviting onto the Net, what entity within the centers?

MR. MELLO: Well, we would normally be given, like, at an Ops Manager level.

MR. KARA: Okay.

MR. MELLO: Or manager, in fact, New York Center it was the Manager we were talking to, Mike McCormick.

MR. AZZARELLO: Is--let's see if we can

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

put this in a time context and I know it's hard, you don't have the benefit of, I guess, all the other pieces that we have from talking to other people--

MR. MELLO: Sure.

MR. AZZARELLO: --I think Mike McCormick told us and his recollection might not, you know, be accurate--

MR. MELLO: Uh-huh.

MR. AZZARELLO: --so don't accept it as gospel if I say what he told you--you have a different recollection then by all means, tell us if you do.

MR. MELLO: Mm-hmm.

MR. AZZARELLO: Because, obviously, that's normal on a day like that when things are happening fast, minute-by-minute everybody has a little bit of a different recollection of the timing of things. Mike seemed to think that he might have been the first guy on your telecon, he referred to it as the Cannoles telecon.

MR. MELLO: I would say, I remember the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

first facility Dave asked us to get was New York. And we were looking at New York City, New York Center, you're just thinking New York, New York, you know.

MR. AZZARELLO: And do you remember if he said get both the TRACON and the en-route or just the NY first?

MR. MELLO: It was New York Center first and I think through New York Center, if I remember, we asked the TRACON to come up a short time later. Don't forget New York Center's in immediate contact with the TRACON through their own lines. So, anything we needed we could get through them, but they actually come up on the DEN in a short time, not the DEN the telecon.

MR. AZZARELLO: So, then, at the moment when you would hear somebody say there's been another one or another one went in--another one hit, you were in the process of getting the telecon up, but it is your recollection at that time at the time of the second hit, that there was no one on yet?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: No, I would say that New York Center was on at that time, at least.

MR. AZZARELLO: You think they might have been on then.

MR. MELLO: Yeah, I think.

MR. AZZARELLO: Is it possible they got on shortly after that, too?

MR. MELLO: Oh, sure, yeah.

MR. KARA: And then Boston, or who was next after that?

MR. MELLO: Yeah, Boston, Command Center somewhere in there, we asked them to come up. And I know Jacksonville Center, Cleveland Center, we had started expanding and so, I think almost everything was--

MR. KARA: When do you recall or do you recall the ZBC being--

MR. MELLO: Fourth, fifth person, I think in-between the Command Center and it was probably the third or fourth.

MR. AZZARELLO: So, ZBW and ZBC, at some point are on--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Yeah.

MR. AZZARELLO: Then the Command Center?

MR. KARA: And [unintell.] situations are, [unintell.] Indianapolis and Cleveland on--

MR. MELLO: At that time, no, we were growing with the incident--

MR. KARA: With the incident?

MR. MELLO: Yeah.

MR. KARA: As it emerged.

MR. MELLO: We're taking places where things were happening and bringing them up.

MR. AZZARELLO: Who would have been the Command Center point of contact, was there a particular position there that would have called into the bridge or--

MR. MELLO: Yeah, I imagine their Watch Desk is what, you know--

MR. AZZARELLO: Is that GNOM [ph] position or--

MR. MELLO: Yeah, GNOM. That's their equivalent to an OM out there.

MR. KARA: Was it on a speaker phone in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

your conference room?

MR. MELLO: Yes.

MR. KARA: So, nobody was manning it per se you could all hear it whoever came up on it?

MR. MELLO: Yes.

MR. KARA: And anyone could speak--

MR. MELLO: Just like this?

MR. KARA: Just like this?

MR. MELLO: Yeah.

MR. AZZARELLO: Maybe you can help us out because we're trying to find this--trying to see if we have it from the Command Center, I can see we don't, and we know it wasn't taped on your end here at headquarters right?

MR. MELLO: If it was, in WOC, I didn't think they recorded that thing to be honest with you.

MR. AZZARELLO: That's what I recall, I think they did, so we were trying to see if we could find the conversation from the other end from the Command Center, which we know recorded, certainly all the lines out on the floor in the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

[unintell.]. Jeff, did you bring any of those with you?

MR. BROWN: Yeah, I did.

MR. KARA: See the Command Center's spin on it.

MR. BROWN: The overall.

MR. AZZARELLO: Do you have the schematic of that, I have that.

MR. KARA: I have a couple of the lines.

MR. AZZARELLO: There's one line--I don't know, there's a line that people are referring to, they're calling it the Tactical Net at various points of the conversation. I think it comes in through position, like, 14 or 15, so it's coming in either through ZNY position at the Command Center or through 15, which then is ZBW's console at the Command Center. And someone appears to be, like a moderator on the line, saying this is FAA Tactical Net, the Eastern Region, you know, go ahead. Or FAA Tactical Net, New York TRACON wants to give a report.

MR. MELLO: Oh, okay, I never heard that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: You never heard that, okay.

MR. MELLO: I didn't hear it on our line that day, either.

MR. AZZARELLO: That would be a different line, I guess, some tactical net--are you familiar with the Tactical Net?

MR. MELLO: Now, I wasn't back then, I learned a whole lot in the last two years. Just from, I work up here a lot now.

MR. AZZARELLO: Well, from what you've learned, I'm going to ask you now, to sort of jumble it all together, what you knew pre-9/11--

MR. MELLO: Sure.

MR. AZZARELLO: --then all of what you learned afterwards, just for the purposes of this question, we're, as we understand from the documents, there's a Tactical Net that is generally stood up in the event of a hijack that's internal, it's just FAA only, and it's a way for the FAA and the people running the FAA Tactical Net, which would be, okay, it says it would be, who would be

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

running the tactical net?

The Net is established to transmit restricted communications and information pertaining to taskings between the FAA Security offices and it's not appropriate to discuss it on the Primary Net and it's authorized for CAS employees. Okay, so I guess it's the Primary Net has outsiders, so this is a way for the FAA in a more secure way to keep some confidential information within the cone of just the FAA.

MR. MELLO: Okay.

MR. AZZARELLO: That's stood up in the event of a hijacking, according to the protocol and it's called the Tactical Net.

MR. MELLO: Okay.

MR. AZZARELLO: Where we've encountered some confusion is, some people suggested that maybe there's also such a thing as a Tactical Net that the Regions can establish. So, therefore, I don't know that when we hear somebody on this tape from Command Center say Tactical Net, I don't know if the Command Center is monitoring a headquarters

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Tactical Net or a regional Tactical Net. Can you shed any light on that from what you learned?

MR. MELLO: No, none at all, never worked at the Command Center, been out there for tours and all my knowledge of any net now has been within the last couple of years. Don't know if it was up or what was available back then.

MR. AZZARELLO: This is a Command Center schematic that Shirley gave us.

MR. MELLO: Okay.

MR. AZZARELLO: And I'm going to ask you, you see, like, the Watch Desk area or the Watch Area of the Command Center which would be the likely place where someone would have gotten on?

MR. MELLO: That's the Command Center.

MR. KARA: You've been out to the Command Center, multiple times?

MR. MELLO: Yeah.

MR. AZZARELLO: From what we understand, that's the NOM position on 9/11.

MR. MELLO: Okay, screens are up here, right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Yep, screens are up here, the is severe weather positions are up here, I think SMOR 7 8 or severe weather, that's New York Center's console--

MR. MELLO: Okay, I just know East and West, though.

MR. AZZARELLO: All right New York Center's here, Cleveland, Indie and D.C. are behind them and then Boston and Cleveland to the right of ZNY as you're facing it. Then MTO East.

MR. MELLO: Okay.

MR. AZZARELLO: So, I guess they divide in an East and West management of the country. This is the traffic manager and officer for the Eastern part of the country. And then there's an MTO West on this side. Are you referring to this position National Operations Manager's position?

MR. MELLO: Yeah, where I would assume the call was up.

MR. KARA: What line's that, then?

MR. AZZARELLO: There's four lines there, two operations lines, 5134 and 5149.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: Do you recall any specific individuals that you talked to that day or that were up on that Net?

MR. MELLO: Um--

MR. KARA: --at the Command Center?

MR. MELLO: I don't know if he was at the Command Center but I thought he was, was Doug Davis?

MR. KARA: Doug actually was here.

MR. MELLO: Was he?

MR. KARA: Yeah.

MR. AZZARELLO: Doug was actually here.

MR. MELLO: I kept hearing him over here and it sounded like--

MR. AZZARELLO: Doug was in the Crisis Center.

MR. KARA: He was right in here. He was on your line.

MR. MELLO: Yes, he was probably dialing--

MR. AZZARELLO: He was speaking to John White for a good part of that morning--

MR. MELLO: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: --who was--and John was one of the NOMs.

MR. MELLO: Yeah, remember John on there several times.

MR. AZZARELLO: Do you have any of the NOM lines there?

MR. BROWN: I don't have, but I have--

MR. AZZARELLO: 4525, is that the one that Doug was on with John?

MR. BROWN: I have positions 14, 18, 15, I have 4525 if you want that.

MR. AZZARELLO: Yeah, could you pop 4525?

MR. BROWN: What about [unintell.]

MR. AZZARELLO: Start with the 4525 NOM position and see if--

MR. BROWN: It'll take me two or three minutes to pop it up.

MR. AZZARELLO: Okay, we'll go on and we'll come back when you find it.

MR. KARA: Let me back up one second. And the one entity we didn't ask about here was Eastern Region on your Net?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: The actual Region?

MR. KARA: Yes.

MR. MELLO: Frank Hatfield.

MR. KARA: Hatfield was on.

MR. MELLO: Don't know if he was physically at the Region, I just know I heard his voice.

MR. KARA: But he could have dialed in from anywhere?

MR. MELLO: Sure.

MR. KARA: All he needed was the pass code and he was in?

MR. MELLO: Yeah.

MR. KARA: Do you recall anybody else from the Region, Rejarm [ph] or Marcus Serillio [ph] or--

MR. MELLO: No, I mean, a lot of people, but specific ones, no.

MR. AZZARELLO: So, when you get, so when Mike McCormick gets on the bridge, do you have any recollection of what information was discussed with Mike McCormick in terms of situational awareness

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that you were trying to gain from what was going on in New York?

MR. MELLO: There was a lot of activity starting to happen. Someone not responding to a call; someone wanted to divert; this was early on, too, and this could have been normal business, but at that point we started suspecting everything, you know, everything seemed--everything was starting to happen. So, I know Mike was giving some updates on different things. Asking for some, I remember some guidance, do we want to do this? Do we want ground stop? It was that type of questioning and stuff going over there, specifically, each and every question, just dialogue about what was going on.

MR. AZZARELLO: What was the state of your situational awareness as to what caused the first two crashes at that point or the two crashes in the Trade Center? Were they equated with commercial aircraft that were reported hijacked at that point?

MR. MELLO: After the second one someone did see an airliner on the second one.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Commercial aircraft?

MR. MELLO: Yeah.

MR. AZZARELLO: Were you--but were you and the people with you, Dave Cannoles and company, were you trying to learn which aircraft it was that went into the first two crashes?

MR. MELLO: Yes, yes.

MR. AZZARELLO: What do you remember about that? What did you learn in the early stages about which aircraft they might have been?

MR. MELLO: There was some talk early on about a jet going down the Hudson River. Didn't know, I don't really remember it being an airliner, but just a jet going down the Hudson River. It kind of faded off and then, you know, a short time later, we heard the, you know, the second one had it. At that time, I didn't relate one to the other, either. Being up in that area, there's a lot of jets up and down the river. You know, normal traffic.

MR. AZZARELLO: Well, were you having discussions about, okay, what--do we figure out

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

which aircraft hit the tower and when we learned that there was something wrong with it, was it off course, what were the characteristics? Like what warning signals did we get, if any, before it went into the tower? Were you trying, as an accident investigator and given your background, are those the types of things that you and Dave Cannoles were trying to find out in the early stages? Like, what was going on with these planes, then before they hit?

Were you thinking--at what point were you thinking this isn't an accident, this is, this purposeful, it's intentional and it's probably the act or terrorists?

MR. MELLO: Still didn't think it was terrorists. We didn't know what it was still, personally I didn't know what it was--

MR. AZZARELLO: After the second crash, did--

MR. MELLO: Yeah, after the second one, something's terribly wrong, but I really didn't fathom, really, what it was, but I knew something

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was wrong. And, again, didn't see the second one, heard it, went in and I did see it later, whether it was a reply by the news or something, but it was--

MR. AZZARELLO: You weren't thinking intentional or terrorism or?

MR. MELLO: Not, terrorism.

MR. AZZARELLO: Were you thinking intentional?

MR. MELLO: I can't say I was at that second. Thinking back now, yeah, I probably should have but--

MR. AZZARELLO: Well, what did you learn when New York got on the bridge, did they tell you what they knew about the aircraft?

MR. MELLO: There was some dialogue going on about aircraft. I was in-between that room, the corner room--I was in-between, back here--I was in-between conference room and back in here and going down to the WOC down here a couple of times.

MR. AZZARELLO: Where was Dave Cannoles?

MR. MELLO: As far as I remember him, he

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was pretty much glued to the conference room.

MR. AZZARELLO: Oh, to the conference room?

MR. MELLO: Yeah, he might have popped in, but again, I was, I know I went out to the--I went back down to the fourth floor--

MR. AZZARELLO: And he was sort of moderating and running and overseeing this conference call, this bridge?

MR. MELLO: Yes.

MR. AZZARELLO: From that conference room?

MR. KARA: You were one of the out-and-about guys a little bit, then.

MR. MELLO: Yes.

MR. KARA: And how about people from the WOC coming down to your area?

MR. MELLO: No, I don't remember any WOC people coming down.

MR. KARA: Well, let me--not just the WOC, but the people that were in the ACC itself, I'm sorry, I didn't mean May Barry [ph] and company, I meant Jeff Griffith, not Jeff, Doug Davis--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Doug Davis

MR. KARA: Doug Davis or somebody.

MR. MELLO: No, it's funny, I talked to him on the phone, again, I thought he was out there. But didn't see him and I remember a couple of military people, Cheryl Atkins, Colonel Atkins and a couple of her people were up there. Jeff, Rick Hosteddlar [ph], couple of people but--

MR. AZZARELLO: Hosteddlar was here?

MR. MELLO: I'm pretty sure he was, pretty sure he was.

MR. AZZARELLO: What about Mike Scirillo, did you see him?

MR. MELLO: Yes. And they were working--they were working down in these two rooms. This would be where Linda Schuessler sits now, which is AAT-2 and that would have been Jeff Griffith's office at the time. And this is, Jerry Levy [ph] sits back there, I think. But they were using this room for conversations at a higher level than my clearance at that time, I think.

MR. AZZARELLO: Did any of the information

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that New York and Boston have filter down to you in the early morning hours when that telecon started going and then some of that information was that Boston was tracking the first aircraft that hit the Trade Center, when it shut the transponder off, basically, at first, they lost radio communications and then the transponder was shut off and then there was some transmissions that were overheard in the cockpit about threats and about having more--about having some planes and everybody stay in your seat--was any of that, did any of that filter down to you in the early stages that morning?

MR. MELLO: No, in fact, I happen to be, you know one of the people that probably heard that for the first time from [unintell.] from the tapes, because we got the tapes pretty quick and I got to hear that, but I don't recall any of that coming, you know, coming over that. Again, I was in and out a few times. Then, again, I don't know. I don't know if it came over that or not. But I don't recall that early on, no.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: And do you recall any information that you got early on, before you looked at any tapes or anything from New York about the second aircraft, about it switching the transponder code a couple times?

MR. MELLO: No, the only think I--as best as I can remember back then, I remember something about a plane on the Hudson, fast-moving, that's what I remember. I'm pretty sure it came over our telecon, but transponders on and off, primary down-river, then you'd have to say transponder off to me so I know it's either off or inoperative, so--

MR. AZZARELLO: After the second--after the first two planes hit and before the Pentagon was hit, just to put it in sort of a time frame for you--

MR. MELLO: Okay.

MR. AZZARELLO: --then the second plane hits around 9:02 at the Trade Center and the Pentagon around 9:37.

MR. MELLO: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: There's about 35 minutes in-between there.

MR. MELLO: Mm-hmm.

MR. AZZARELLO: At some point in-between there a report surfaces that the first plane that they thought was the first strike at the Trade Center, American 11, which we now know was American 11--

MR. MELLO: Okay.

MR. AZZARELLO: --may still have been airborne headed towards Washington and it might not have been the plane that crashed into the Trade Center, in fact, we talked to Doug Davis and he says he got that information from someone up on the tenth floor and then repeated it in the Crisis Center--

MR. MELLO: Uh-huh.

MR. AZZARELLO: --that American 11 is still out there and somebody had seen it. What do you--do you recall hearing any of that?

MR. MELLO: It was, you know, there was some confusion on, you know, who and what plane hit

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it, what type plane hit it. And it was, you know, you could hear it coming over, the telecon from a 75 and a 76, I remember there was, either Mike McCormick or someone from up in Eastern Region talking about a route of flight of an American--someone departed Boston, just some dialogue about planes. I do recall something like that.

MR. AZZARELLO: But nothing specific--this is sort of rather specific, it's like first there was a strong belief within the FAA system that American 11 caused the first crash. It was a belief, for example, strongly held at Boston because they were tracking it.

MR. MELLO: Mm-hmm.

MR. AZZARELLO: I imagine some of this stuff, you probably know from looking at or your staff would from reviewing all the tapes.

MR. MELLO: I'm trying to separate that from upstairs because that's, you know, I've got everything in my head, but a lot of it's from reconstructing it all you know.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: At the time of--through reconstruction, it was apparent that in the early minutes after the first crash, that Boston felt pretty sure that there was their plane that they lost that went into the Trade Center, that they thought was hijacked, okay. And that--

MR. MELLO: Is that a fact you're telling me?

MR. AZZARELLO: Yeah, I'm telling you that you could see Terry Biggeo [ph] was on the Command Center at, like, 8:55, which is like three minutes after it's hit the media and nine minutes after the crash saying I feel pretty confident that, yeah, I mean, they're asking him, was that, do you think that's the hijacked one? And he pretty much says, hey, as far as from where we stand here?

MR. MELLO: Uh-huh.

MR. AZZARELLO: We're pretty certain it looks like the one that we lost before that was hijacked [unintell.].

MR. MELLO: Okay.

MR. AZZARELLO: And that, sort of carries

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

for the next, you know, 15 minutes or so and it carries even after the second crash. The second one goes in and New York Center and New York TRACON as, at least early on, some people there have a fair idea that that's 175 because it never shut off it's beacon code, you know, I assume you learned that at some point--

MR. MELLO: Yeah.

MR. AZZARELLO: --afterwards, in the investigation that it didn't shut off the beacon code, it changed it--

MR. MELLO: Changed it.

MR. AZZARELLO: --but there weren't a whole heck of a lot of planes in that area of that controller's scope, so he was able to equate the coast path had with the coast with the original--with the primary.

MR. MELLO: Right.

MR. AZZARELLO: So, at that point, there was some firm situational awareness by New York and Boston that those are the two planes that hit, 11 and 175. But then, shortly thereafter, Boston

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

reports that they heard from Washington from a telecon in Washington that American 11 is still airborne and is headed to D.C. And what, if at all, did you find in going back in after the fact and trying to, you know, do the time lines and the accident investigations and the reconstruction and all those efforts?

MR. MELLO: Best as I can remember is there was a confusion factor on one or more, who it was and when it was, but--

MR. AZZARELLO: But we're talking about a plane that, initially, is thought buried in a building, that people in the system are confident about going from that to being, no, you know what, now we're sounding like we're pretty confident that that did not go in and it's still airborne headed South. And none of that--do you recall uncovering any of that and trying to figure out how that happened? Like, all right how did we go from out of the system collectively, go from the situational awareness of, yeah, 11 hit, to it didn't hit, it was a different plane and now it's still airborne

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and it's a threat, now headed toward D.C.?

MR. MELLO: No, I, no, I don't--I know it did happen like that where, you know, there was some dialogue about 11 coming back again, meaning, you know--I don't recall early on, them saying 11 hit the building.

MR. AZZARELLO: Okay.

MR. MELLO: Okay? I remember--

MR. AZZARELLO: It might not have reached you. I mean, it reached other people, but it might not have gotten to your ears.

MR. MELLO: --yeah, but I remember there was some confusion about--if it was 11 or 175, I don't know--but they thought one crashed, no that was the one out West. I don't know, I'd be guessing right now.

MR. KARA: Yeah, but speaking of the one out West. Thinking about 11, when did you first become aware that after the first two towers are--or the World Trade Center towers are hit that there are more problems out there in the national airspace system?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Something came over the telecon and, don't know if it was a military, but heard something to the effect of fast-moving aircraft heading towards Washington. And I could actually hear people calling out miles, 60 miles, 30 miles.

MR. KARA: Do you recall who was calling them out?

MR. MELLO: It sounded like a military person to me, don't know who it was, though.

MR. KARA: It was on your?

MR. MELLO: Yes, but it didn't sound like it was our group, it probably someone who was on our part of some other group, that's what it sounded like to me. Didn't recognize the voice or facility like that.

MR. KARA: Was Colonel Atkins there at the time?

MR. MELLO: She was in and out so much--

MR. KARA: I see.

MR. MELLO: It was a man's voice, not a woman's voice.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: Well, I was curious as to whether she had any insight as to who it might have been.

MR. MELLO: No.

MR. AZZARELLO: Tell us what you remember of that, someone was reporting a fast-moving aircraft?

MR. MELLO: Yeah, 60, Northwest,--

MR. AZZARELLO: You remember 60 Northwest?

MR. MELLO: Yeah, 30--30 miles--

MR. AZZARELLO: Thirty miles from where, D.C.?

MR. MELLO: Yes.

MR. KARA: What was the universe of possibilities of people that could have been on your Net? We've talked about the centers and we've talked about the TRACONS and we've talked about the Command Center; we've mentioned Eastern Region. Who else would have had the pass code to dial in and be on your Net?

MR. MELLO: All the other centers, Indie--I don't know who else I gave the code to.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Now, I know that if, I mean, the WOC could have put anyone in. Even though, they can access anyone they want, so did they--

MR. KARA: Oh, so somebody calls into the WOC and says we need to be on the Cannoles Net, they can just add it to them without them dialing in the pass code?

MR. MELLO: Mm-hmm.

MR. KARA: How about the towers and the TRACONS, other than New York?

MR. MELLO: I don't recall any. Some reason Dulles sticks in my head for a minute, but that could have been after the fact, but I thought I heard a conversation with Dulles Tower.

MR. AZZARELLO: Now you said you thought it was a military person who reported it, what makes you think that, what about that?

MR. MELLO: Just the voice sounded like military, like a tactical-type of 30 miles, it sounded, you know, military.

MR. AZZARELLO: You mean because it was with precision, I'm trying to get at what--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Yeah, I mean, the phraseology sounded to be that of a military person more than a controller. You know, like a, you know, a controller doesn't usually talk like that.

MR. AZZARELLO: Did any other--recall anybody saying asking who has a bead on that? Who's--

MR. MELLO: No.

MR. AZZARELLO: --where's that coming from, who's giving this report?

MR. MELLO: No.

MR. AZZARELLO: Have you found that, well, in going back and doing a recreation after the fact, I'm trying to get, you know, get down accurately, what happened for an after-action-type summary like this, I assume, did you work on this, like, for Dave?

MR. MELLO: Oh, yeah.

MR. AZZARELLO: Okay.

MR. MELLO: Oh, yeah.

MR. AZZARELLO: I know a lot of work.

MR. KARA: You recognize the work.,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: I know a lot of work into this, because you're quoting transcripts from facilities and even the threats, you know, as you say that came over the frequency in American 11 that they heard up in DBW. Obviously a lot of work went into this. Did you and your hunt through the tapes, did you find the Dave Cannoles telecon somewhere on the recording?

MR. MELLO: No, because, believe it or not, we never worked on tapes from the Command Center and that's the only place they would have been or that would have been recorded, you know.

MR. AZZARELLO: Okay, I have a question for you on that. And I'm trying to figure that out. The regions. I know to the extent the regions were on them, that the regions didn't record the times that were involved, the Eastern Region and New England Region.

MR. MELLO: Okay.

MR. AZZARELLO: Okay, so that makes sense. The Great Lakes, too, is that correct? The Great Lakes did not.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Did not, I don't think anyone did, regions, right.

MR. AZZARELLO: But there are people, according to, I think the recollection of a lot of people, including what's in about ground stop, you have facilities that people interviewed say that you know, that various entities were on, including FAA Centers and what comes to mind for us right away is, well, the centers usually do record, so wouldn't it be odd that--we haven't found it and we're trying to say, tell us, if you were us, where would you look, then to find a recording of the Cannoles telecon that day, the morning of? Shouldn't it be on, if the centers were on, wouldn't they ordinarily be recording it? New York Center or Boston Center?

MR. MELLO: Well, depends where they dialed in from, I guess.

MR. KARA: If they dialed in from the TMU on an unrecorded line, that would be one possibility.

MR. MELLO: Or the Watch Desk if it's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

unrecorded.

MR. KARA: The Watch-and your experience at ZBC was where the Watch Desk lines were--

MR. MELLO: Half and half, well, there's always a line that you can have a private conversation on, you know, if a wife calling or something like that at mostly all facilities. There was one at the Watch Desk at Washington Center when I was there, you know, that was a few years before this happened, you know, a couple years anyway.

If anyone dialed in on an unrecorded line, yeah at that point, but if anyone called in on a recorded line, it should be somewhere, but--

MR. KARA: On the recorded lines, people dial in and, again, let's use your experience in the ZBC, would it be possible that they dialed in on a push-to-talk to phone?

MR. MELLO: Yes.

MR. KARA: Well, no, that's not a good analogy, because push-to-talk you could hear it if it picked up.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Most of the stuff at the--

MR. KARA: But you guys aren't on push-to-talk at all because you're just simply talking into--

MR. MELLO: Correct, we were muting now and then, just because it was getting loud in our room in the conference room. But we heard--

MR. AZZARELLO: Was anybody in your room, down at--was anyone down in there trying to get a bead on and a handle on how many other aircraft now are out there in the system that might be in the process of being hijacked or are already are hijacked now headed for a building or headed for a target?

MR. MELLO: Actually what was going on in the system from my perspective there, was that was the Command Center side of it, I mean, they could see the system.

MR. AZZARELLO: When you say the Command Center side of it, you're talking about Herndon?

MR. MELLO: Yes.

MR. AZZARELLO: Okay, so you're thinking,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

from your perspective, Herndon was the eyes and ears to try and figure out what else is out there?

MR. MELLO: Well, they can see all the planes; they're talking to every center; they're on our line. Now there was talk--like I said, a lot of these anomalies started coming up, U.S. Air wanted to go someplace, like in Philadelphia or Pittsburgh, I forget. Just a lot of things started happening, and all of a sudden, everything you think that could happen is starting to happen. Meanwhile this 60-mile call; 30-mile call's coming. You know, this is all going on, from what I remember at this time. And now, we're saying--we're starting to look out the windows.

MR. AZZARELLO: Right.

MR. MELLO: And that's, I remember my buddy was over here in this room, you know--

MR. AZZARELLO: Was that Jeff--was that Jeff Logue?

MR. MELLO: Jeff Logue.

MR. AZZARELLO: Jeff Logue?

MR. MELLO: Yeah, yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: What entity in the FAA headquarters complex, and that's an arbitrary word to describe the Command Center, the WOC, with the ACC next to it and the air traffic situation room where you guys work. Of those three entities, which would have the best, most current of accurate information at any one time?

MR. MELLO: Other than individual facilities actually?

MR. KARA: Right.

MR. MELLO: Taping a plane.

MR. KARA: Yes, the guy on the scope's going to have the best, but in terms of that information merging up to these three entities within FAA headquarters, which one at any one point in time would have, included--

MR. MELLO: My opinion would be, at that time, the Command Center because it's not actual radar but they're getting a picture of all the planes, plus they're hearing everything we hear. We can hear it, we can't see nothing.

MR. KARA: They can hear and see, you can

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

just hear.

MR. MELLO: Yeah, I mean, they can look at a sector, they can look at a state.

MR. AZZARELLO: Do you know the plane that you heard was bearing down towards Washington, is that the one that actually you say started out at 60-Northwest, 30-miles?

MR. MELLO: Yeah, now, I don't know if we're talking 93 or 11 now--

MR. AZZARELLO: Ninety-three or 77.

MR. MELLO: Excuse me, 93 or 77.

MR. AZZARELLO: Well, let me ask you about that by trying to put it in a sequence of events.

MR. MELLO: Sure.

MR. AZZARELLO: After the two crashes in New York and before the Pentagon crash. In-between those two such events, what was the--did you hear, is that when you heard about the aircraft being 60-miles out, was it before the Pentagon was hit and after New York?

MR. MELLO: Say that one more time.

MR. AZZARELLO: After the two attacks in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

New York--

MR. MELLO: Mm-hmm.

MR. AZZARELLO: --and you're starting to get the telecon up, Dave Cannoles starting to get the telecon rolling and before the Pentagon was hit.

MR. MELLO: Okay.

MR. AZZARELLO: What, if anything, did you hear about aircraft approaching Washington?

MR. MELLO: Well, what happened in-between those two, the Pentagon and the two World Trade--

MR. AZZARELLO: Right.

MR. MELLO: --was an aircraft we thought crashed out near Kentucky.

MR. AZZARELLO: Tell me about that.

MR. MELLO: They lost radio and radar with an aircraft, which was simultaneous loss of radio and radar, is two things: one, is the airplane falls out of the sky; or, two, you have an electrical failure on the aircraft and you lose everything, can't talk to us, transponder and all type of communications are out. So, there was a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

lot of dialogue going on about American 77.

MR. AZZARELLO: That they thought it crashed?

MR. MELLO: Thought it crashed. And it was--we found out later, but a miscommunication with some local authorities about they were saying there's an accident and we thought they were reporting an accident; and a local sheriff was out there looking for an accident; I don't know how they got word of it, but, so we actually thought this plane was down on the border of Kentucky and Indiana.

MR. KARA: I'm sorry, John. And that was by name, that was by reference to American 77?

MR. MELLO: I think Indie said that.

MR. AZZARELLO: And we see on some of the Command Center tapes, and I don't know whether or not this was communications that you could were monitoring from Dave Cannoles telecon, I don't know whether you were linked in, but there are some Command Center conversations between say the 9:20 and the 9:30 range, where they're looking for 77,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

too. Where there's a thought that it might have crashed, but it's not accepted yet as ground truth and there's efforts, obviously, to find out if it is still out there and they're asking all the centers to look for it.

MR. MELLO: Right, right.

MR. AZZARELLO: Do you remember hearing that from the Cannoles end of things or his telecon?

MR. MELLO: From the telecon side of it, yeah, I remember it being is he down or isn't he down, well, where is he, type questions coming out. Because someone else reported that no, his tag is 40 miles West of something; and, no, no, no, a few minutes later someone says, that's just a tag that froze on the scope, you know, when his transponder went off, the computer froze it or projected he was going to go that way and painted it for a while. So, you know, we're saying where is this guy? Normally, you would think a plane that big fell out of the sky, you'd get immediate reports of it crashing, you know. We didn't get those.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: We didn't get those?

MR. MELLO: No, but this sheriff from a little hick town probably, you know.

MR. AZZARELLO: Yeah, give us the sort of, what is it, bring us back to that day in the room and the atmosphere in that room and the dynamics of what was the thoughts in there. Was it that the general thought was that they doubted that it had crashed because you weren't getting that confirmation, that slew of reports coming in that something big fell out of the sky, there's a big crater in Kentucky or the Kentucky/Indiana border? What was the mind set in that room? Was it generally that a belief that it did crash or that it didn't or was it completely unsure if you could let us know.

MR. MELLO: It was like you were going up and down; yes, it crashed; no, it didn't crash, the tag's 40 West. And then the report from the sheriff; no, it crashed. We got a plane, now we got a major accident, so we're thinking a major accident, but yet we had two planes at the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

building--to us there was still an accident out there in the Midwest so we're going to have to launch on and do our normal stuff, you know. And then, somewhere right in that time is something heading towards Washington; something came out about something heading towards Washington, I remember, because that's when we got the angst for we're sitting here at the top of a building in Washington.

MR. AZZARELLO: When did you or anyone else up here in your end of the tenth floor conclude that it was it didn't crash? At what point in the day did you say nothing--77 did not crash, it didn't go down? Or it didn't go down on the ground in Indie?

MR. MELLO: I'll tell you what, I'm talking after all four planes were down, there was still some discussion about where's 77?

MR. AZZARELLO: Okay. Still not knowing whether or not after all four whether there could have been five total, four that crashed into buildings and then one--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: We--we, you know, somewhere down towards the end of the four planes, okay, we're trying to reconstruct this and we're saying 93 did this, 77 did that and we still had a hole with 77 from what I remember, you know.

MR. AZZARELLO: Well, were there any thoughts, then, as to what might have hit the Pentagon?

MR. MELLO: Pulse sign [ph], no. A jet, Boeing jet, yes, because it was kind of media plus, you know, my buddy Jeff, he saw it, you know, he saw the circle, he didn't see the impact because it was below building level.

MR. AZZARELLO: He knew it was a commercial jet?

MR. MELLO: Oh, yeah, yeah.

MR. AZZARELLO: He didn't know what company it was and what airline--

MR. MELLO: No.

MR. AZZARELLO: --but so to the extent that you thought 77 might have crashed somewhere even after the fourth crash, even after the 93 went

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

down in Somerset--

MR. MELLO: Mm-hmm.

MR. AZZARELLO: --Pennsylvania, to the extent that you were still trying to figure out what happened to 77, the thought was that 77 didn't hit the Pentagon it was another commercial jet we just had to figure out what call sign and what company it was--

MR. MELLO: Yes.

MR. AZZARELLO: --that type of thing. What about another thing and I'm saying, I'm looking back now and putting together the after-action works. You talked a few moments ago about the aircraft that somebody reported over the Cannoles telecon you know, 60-Northwest, 30-miles out and thinking that it was military person who might have been reporting that. Did you--well, let me ask you this, did you, ultimately, when you went back and listened to the tapes and everything and reviewed everything, did you equate that with the plane that actually went into the Pentagon, then, that information that was coming over?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Haven't been involved in a while, but, no, I can't say it was either 93 or 77 because they were both in that not exact time frame but I relate both of them to coming towards Washington.

MR. AZZARELLO: Well, let's see if we can compare that report to what Jeff Logue did, when he looked out the window and saw a low-flying commercial jet that then disappears over the horizon and next thing you know you hear the report that the Pentagon's been hit. Were those, on that, before we get to what went on after--now, let's try and separate on that day, as you lived it and you remember your friend going next door to look out a window and then coming back with his report. Did you equate those two on that time that the report of, hey, 60-miles Northwest, 30-miles and then, at some point--

MR. MELLO: Personally, yes.

MR. AZZARELLO: --yeah, did you equate those two events--

MR. MELLO: Yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: --at that time, in your mind were you saying, oh, that must be the plane that Jeff just now saw out the window, which we now hear moments later that there's a crash at the Pentagon, it's probably the one that we just heard somebody reporting 60-Northwest, 30-miles out, you equated them on that day?

MR. MELLO: Yes.

MR. AZZARELLO: Then when you went back--now, you're going back after the fact--

MR. MELLO: Mm-hmm.

MR. AZZARELLO: --looking at tapes and radar, you know, [unintell.] and radar reductions and everything, did that confirm your thought that they were one and the same when you listened to the various facility tapes and looked at the radar data?

MR. MELLO: Well, we didn't have a time line for that, rather than what we reconstructed.

MR. AZZARELLO: You didn't have a time line for?

MR. MELLO: For the telecon.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay.

MR. MELLO: We didn't have a time channel to say, this happened at 30.42 seconds, you know, which is a calculation of, you know, whoever happened to be jotting something down on the white-board at the time or taking typing it in looking at a watch or a clock.

MR. KARA: We think this chronology came from--

MR. AZZARELLO: We showed this to Dave Cannoles yesterday, and he said he thinks this looks like probably a chronology that his people--some of his staff put together and he commented that he thought that it wasn't necessarily accurate either; there were a lot of things that, you know, just because of the nature of the confusion that day and the various reports that were coming in that these times might not be very accurate. So, if we show you this, don't take this as being accurate.

MR. MELLO: I understand.

MR. AZZARELLO: It says at 10:14 a.m.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

here, fast-moving aircraft, 60-Northwest, DC, Southeast-bound, headed towards D.C. Now, we don't know because we can't verify the accuracy of the time. We don't know whether or not this happened at or around 10:14 or that it happened before the Pentagon was hit, which was at 9:37 and somebody didn't log it until 10:14 that they had heard a report earlier, that there was a fast-moving aircraft.

And I don't know if looking at the other events, as they're logged here, and where in comparison to where the fast-moving aircraft was logged, whether that would jar your memory as to whether or not they would have been one and the same as the plane that hit the Pentagon or was it a separate event--would that have been a different aircraft after the Pentagon was hit that would be recorded.

MR. MELLO: Yes, I mean, at the time, the mileage that I heard being counted out over the telecon, I related that to 77--

MR. AZZARELLO: You related that to the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Pentagon?

MR. MELLO: This I related to 93.

MR. AZZARELLO: This entry, you do?

MR. MELLO: Mm-hmm.

MR. AZZARELLO: I don't know if I follow you on that.

MR. KARA: Let me--let me further muddy the waters a bit. At some point, ZOB, Cleveland Center is on a call with the Command Center. And I believe ZDC is on that Chicago is on it, Great Lakes is on it.

MR. MELLO: Okay.

MR. KARA: It starts because the Attorney General is in Milwaukee and wants to come back, so they get together to decide how they're going to bring November 4 back in, which is the Attorney General. In the course of that four-way or five-way conversation, Cleveland starts counting down 93. They don't count it down in terms of distance so much

MS. SULLIVAN: they count it down in terms of, he's turning left, he's turning right,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

but he's definitely coming southeasterly.

MR. MELLO: Right.

MR. KARA: Do you recall being on that or that being part of your Net concerning A) the attorney general, and B) Cleveland Center providing a real-time countdown on 93?

MR. MELLO: I remember 93 came over--discussion about 93 coming over the telecon. I remember November--I don't know if it was four, I thought it was one or two, but those discussions. I thought it was a little later with the November, though, after--

MR. KARA: There were--that saga continued on--

MR. MELLO: Okay.

MR. KARA: --it just simply started with him in Milwaukee and trying to get him back. It dominates the airways for a couple of hours on where's he going to land, what are they going to do.

MR. MELLO: Mm-hmm.

MR. KARA: But the genesis of it was he's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in Milwaukee, he's got to come back. And the interest to us is that it's concurrent with Cleveland having a primary coverage on 93--

MR. MELLO: Mm-hmm.

MR. KARA: --after it passes Pittsburgh tower.

MR. MELLO: Yeah. I remember the Pittsburgh thing coming over.

MR. AZZARELLO: Actually, I just noticed some things I think we could acknowledge now, looking back in hindsight.

MR. MELLO: Mm-hmm.

MR. AZZARELLO: And probably what Dave said we didn't have a lot of confidence in these times here being very accurate. If you look up here, it's got 10:07, second impact World Trade Center. And we now know that occurred around 9:02 and some seconds, so that's an entry, that's an hour and five minutes delay. Do you agree on that?

MR. MELLO: This one here?

MR. AZZARELLO: Yeah, 10:07. Just before the 10:07, it says lost radar with United 93 south

MILLER REPORTING CO., INC
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of Johnstown, Pennsylvania. I don't expect you to remember this off the top of your head, but in putting this together, that was one of the things your people did was look at when the transponder was lost on 93. That says, what, 10:07?

MR. MELLO: Yep.

MR. AZZARELLO: And here it says 9:41 the transponder signal was lost. So, again, there's a significant, there with about a 26-minute lag off an entry--I just want to finish with this and bring it down to here. This 60-miles fast-moving aircraft now at 10:14, 60-Northwest of D.C. The very next minute, 10:15, it says UA 93 is down, confirmed already by C130 on the site, so it would seem, wouldn't it seem a little bit unlikely that those two entries are related to the same plane?

MR. MELLO: Well--

MR. BROWN: Given where the United crashed?

MR. AZZARELLO: Given where it crashed, yeah.

MR. KARA: Let me interject something else

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

off the Cleveland count-down; in addition to the transponder on 93, going off at what was it, 9:40?

MR. AZZARELLO: Nine-forty-one.

MR. KARA: One, it comes back on at about 10:03, so they picked up the transponder, again on 93; so there's two different--and so they lose it again, so--that, I just wanted to put that in there.

MR. AZZARELLO: Okay.

MR. MELLO: I related--I always related the 60-Northwest, southeast-bound to United--

MR. AZZARELLO: To United-- you always did?

MR. MELLO: I always did. Because we had a report somewhere, you know, to me 60 Northwest is a little further southeast than Johnstown, Pennsylvania. 60-Northwest is about Camp David. Camp David, we thought if we had a plane crash in Camp David. So, that always to me, was 93. My recollection was from the West, East and coming in from the Southeast was American to the Pentagon.

MR. AZZARELLO: Okay. Let me ask you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this: In the aftermath of 9/11, when you were putting together the accident investigation, well, it was also actually accident packages, right, for each of the four aircraft?

MR. MELLO: Yeah.

MR. AZZARELLO: This is just a summary of all four events.

MR. MELLO: Yeah.

MR. AZZARELLO: Just from the amount we've learned in the short time in our Commission work in the meeting with FAA personnel, it's a very meticulous and sort of exact type of work even when there's--not only when there's an accident, but even when there's an incident.

MR. MELLO: Mm-hmm.

MR. AZZARELLO: And there's a loss of separation in aircraft. There is a certain amount of precision involved in pulling end caps and controller tapes and trying to say where did that error occur and let's see if that error will not occur again.

Tell me, if I'm wrong, but I would imagine

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that one of the things--not you, personally--but you the FAA would want to do after 9/11 was to say, well, now let's go back and see what's the earliest that A) somebody could have picked up American Airlines 77 that hit the Pentagon; and now, let's look at, listen to tapes from all the controlling agencies through whose airspace it traveled and let's see who, indeed, pick it up at the earliest; and then let's find out whether or not they reported it to the system at the earliest possible time that they picked it up. Was that done, am I accurate in thinking that something like that was done along the way, either here or somewhere outside of this summary work?

MR. MELLO: If anyone did it, we didn't do it in my shop. We didn't. We reconstructed the flight paths, the communications and that kind of stuff to present a pictorial for, maybe more law-enforcement, you know, for the FBI, for the antiterrorism. You know, we were providing them all the information. I mean, that's not a book we would have done under any other circumstances.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Well, how about the accident packages--

MR. MELLO: The packages we do. The packages we do for litigation. That's why we make an accident package.

MR. AZZARELLO: And in that incident, would that be one of the things you'd look at in terms of 77 and 90--or all of them, let's stay with 77--

MR. MELLO: Uh-huh.

MR. AZZARELLO: --let's talk about, for that matter, accident packages for litigation. To the extent that litigation would result even from the events of 9/11 by either someone on-board 77's aircraft or someone at the Pentagon who was killed--

MR. MELLO: Mm-hmm.

MR. AZZARELLO: --wouldn't one of the things that one might think about as an issue not just for litigation purposes, but for lessons learned and how can we improve going forward, if somebody else wants to, you know, in September of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

2002, hijack a plane, shut off the transponder and try to fake us out so that we can't follow it easily--let's find out when our system did pick it up; what was the earliest it was picked up that it could have been even reported? Was that done on 77?

MR. MELLO: After the fact?

MR. AZZARELLO: After the fact, yeah.

MR. MELLO: After the fact we found that people who were not probably aware of the situation, different sectors at Indie, or, as a matter of fact, I think it was another center who had overlapping coverage.

MR. AZZARELLO: Mm-hmm.

MR. MELLO: Where the controller sitting at the scope that was working 77, lost the tag--

MR. AZZARELLO: Mm-hmm.

MR. MELLO: --and lost the primary that someone else, if they were working the guy or had the responsibility to work him, they could see him, but they, you know, it was someone that wasn't in their airspace, wasn't under their control, so with

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a primary going across, it happens all the time, you know.

MR. AZZARELLO: Yet it could have been put up, you're saying--

MR. MELLO: Yeah, I mean, you know, I mean we found out that different systems were recording it, we gave you a picture of what the flight looked like.

MR. AZZARELLO: Right.

MR. MELLO: That's based on us reconstructing that somewhere, somehow, it was recorded somewhere. But the person working the scope at Indianapolis, that lost radar and radio communications with American didn't see what you're seeing there, they saw a blank scope with a guy going due West-bound and projected he was continuing West and off, went straight down.

MR. AZZARELLO: Okay, then, now, let's go back to your memory of the day when Jeff Logue goes to look at the window at the aircraft bearing down on D.C. What's the furthest out you recall that plane being reported to you through the Cannoles

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

telecon before it crashed at the Pentagon? Do you recall that--what do you recall it, how close to D.C. do you recall it being recorded?

MR. MELLO: I remember, 30 West, I remember a call at 30 West. And, again, Dulles tower plays in here somehow, but I don't know if it was them reporting it or someone else. Someone said something about a aircraft 30 West.

MR. AZZARELLO: Did you equate that with 77, though later--or wait till it gets to the Pentagon?

MR. MELLO: No, after the crash --

MR. AZZARELLO: After?

MR. MELLO: Yeah.

MR. AZZARELLO: And not just a aircraft--

MR. MELLO: No.

MR. AZZARELLO: --that might have just zipped by and was landing?

MR. MELLO: No, and when I say after, after we reconstructed it. Not after--

MR. AZZARELLO: Yeah.

MR. MELLO: --not after the crash itself,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Impression talking that night, maybe or the next day when we could see the actual track. Not that far. I mean, when we got reports that it probably was an American plane that hit the Pentagon, you know, then we put two and two together that it was American 77.

MR. AZZARELLO: If I were to say, and just tell me if I'm [unintell.] little confused now, but if I were to say your real-time recollection the day of, when the Pentagon was hit, not what you learned even later that night--

MR. MELLO: Mm-hmm.

MR. AZZARELLO: --but when it was hit that there was some countdown and then it was, Jeff looks out the window and it had hit, it was reported that the Pentagon was hit, was your recollection at the moment, oh, that must be the plane that they reported being about 30 miles out a little while ago?

MR. MELLO: No.

MR. AZZARELLO: No, okay.

MR. MELLO: No.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: So, do you remember--the countdown that you were hearing, was there more than one countdown or was it just one countdown?

MR. MELLO: No, there were several countdowns, yeah.

MR. AZZARELLO: Was there a countdown associated with, in your mind at the time it happened associated with the crash at the Pentagon?

MR. MELLO: No, there was different calls; we have aircraft 60-West; we have an aircraft 30-West; not a countdown.

MR. AZZARELLO: Okay.

MR. MELLO: I do remember more of a countdown associated with 93.

MR. AZZARELLO: I mean, we have, is it a Dulles tape or where is that, there's a Dulles TRACON or, where's the tape with them saying 6 fast-moving aircraft; 6--5-miles out, at Dulles or Reagan tower?

MR. KARA: But I don't recall any of the FAA tapes going 6, 5, 4, 3, or anything like that. We've got the fast-moving aircraft 6-miles from the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

White House.

MR. AZZARELLO: Well, that's reported not by Scott even up in Boston.

MR. KARA: Yeah, and that's reported initially by Dulles TRACON, or at Dulles, I'm not saying TRA--tower.

MR. AZZARELLO: Dulles tower's saying it's--well, the one the woman picked it up on the Dulles--Dan--Daniele O'Brian.

MR. KARA: Daniele O'Brian, picked it up.

MR. AZZARELLO: I don't know if that's something that you learned from your investigation afterwards? That you knew that Daniele O'Brian picked it up on her scope? And it was reported--

MR. MELLO: Yes.

MR. AZZARELLO: --over some open line. Six miles, I think was the furthest was the point it was out at that point.

MR. KARA: I'd have to go back and look to be sure. [off microphone]

MR. AZZARELLO: Did you go back in the after review and determine from listening to any

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

tapes what was the earliest that anybody picked up 77 and reported it? Was it Daniele O'Brian, was she the first one, as far as you recall that was able to pick it up? Bad question, not was able to pick it up on a scope, but, in fact, did?

MR. MELLO: Probably the first person to say something about it, but, again, people just based on what the radar recorded, both primary and secondary, you know, other positions or centers were recording it--did someone see it? Yep, did the note? No.

MR. AZZARELLO: Yeah, that's what I'm saying, did anybody see, I mean, I know that, yeah, you hear Command Center and they're telling people at the centers, put your primaries on, you know, keep your antennas up, beware of anything unusual; loss of coms, communications or transponder signals and be alert. When you went back and did your review in your investigation for the investigation packages and everything, did you--were you able to determine that somebody did pick it up before Daniele and it was a little bit further out and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

reported, hey, I have a primary here, I don't know what it is, and it's headed toward D.C.

MR. MELLO: We didn't find that, no.

MR. AZZARELLO: Didn't find that?

MR. MELLO: No. Again, it was recorded and we could reconstruct it, but did someone see and say something, we didn't find that. And, again, not to put words in her mouth, I don't know if she knew what it was either. She just knew it was an aircraft.

MR. AZZARELLO: Right she wasn't reporting it as American 11, when was saying--

MR. MELLO: Yeah.

MR. AZZARELLO: Mm-hmm. So, I guess, just to recap on 77, do you remember, you say, you do or you don't remember any countdown at all being associated with it, no countdown, but a--

MR. MELLO: Not a countdown, but I remember some mileage calls. I remember 60, I remember about 30. Those two ring in my head.

MR. AZZARELLO: Sixty and 30?

MR. MELLO: Yes, 60 out and then 30-West,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I remember.

MR. AZZARELLO: On the same aircraft or are they two different aircraft, the 60 and the 30, if you know.

MR. MELLO: I recall it as being the same.

MR. AZZARELLO: One and the same at 60 and 30, and do you--what aircraft did you acquaint that with? You don't know?

MR. MELLO: The 60 and the 30, I equated that with now, I know American, I equated it with the Pentagon, not knowing it was American.

MR. AZZARELLO: Oh, okay, you equated it with the Pentagon, okay.

MR. KARA: Was the--

MR. MELLO: We even said something to the, let's look at the window, Jeff or something like that.

MR. KARA: Earlier in the sequence on 93, this is off of the TNC radar associate position at Washington tower, we've got Beckey and I'm not sure who Beckey is, talking about United 93, said southeast of Pittsburgh, heading back towards D.C.,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

primary only headed our way; 20 Southeast of Pittsburgh coming down 518. Do you remember that kind of specificity on any of the tapes you listened to?

MR. MELLO: [off microphone] [unintell.]

MR. AZZARELLO: What do you remember about, on the day of, not after, on the day of, 93, do you remember that any reports coming in on United 93 before it crashed?

MR. MELLO: I remember, initially, something from Cleveland was headed on 93. Who they were on, now and again, on the telecon side. I do remember a, he's turning, something to the effect that he's turning back now.

MR. AZZARELLO: Do you know where it was coming from?

MR. MELLO: No, it was coming over the air, so--

MR. AZZARELLO: You said, Cleveland, did you know whether it was coming from Cleveland Center or--

MR. MELLO: Yes, Cleveland Center. And I

remember a call about Pittsburgh. Heading towards Pittsburgh, someone said heading towards Pittsburgh and then, I don't know two or three minutes later, we heard someone says, Pittsburgh tower evacuating. And we all kind of chuckled on it.

MR. KARA: Right.

MR. AZZARELLO: And this is coming over the Cannoles telecon?

MR. MELLO: Yeah.

MR. AZZARELLO: What were the reports, the specific reports about 93, what were they saying about 93 from Cleveland, what was the situational awareness?

MR. MELLO: I remember the transponder went off; there was a turn made; and I think we were--there was other aircraft in the area and I think they were trying get altitude reports from other, hey, where is this guy now; and I remember someone said he's--I remember the last one, the 8,000 feet or something like that. But I thought there was a report of an altitude before that one.

MR. KARA: That's what you just said is

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

off of that conversation I described between Cleveland Command Center in the Great Lakes.

MR. MELLO: Okay.

MR. KARA: Passably ZDC was on it. Sounds like you might have picked up part of that here.

MR. AZZARELLO: Like some Command Center position between--

MR. KARA: Yeah, that's one of those tapes we just got, back on original code, it's an 8200P, just when the transponder came back on, the 8,000 foot, the specificity of that comment is in that transcript.

MR. AZZARELLO: Did anyone sort of talk about the reports of bomb on-board, do you remember if that came over the--

MR. MELLO: I didn't hear that or any conversations about anything that was overheard until I started listening to the tapes. Not to say it wasn't said, I just didn't hear it.

MR. AZZARELLO: That day, you didn't hear it. Do you remember if anybody from Cleveland Center was reporting where it was headed, what

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

direction 93 was?

MR. MELLO: Southeast-bound, I remember at the time, they said it was Southeast-bound.

MR. AZZARELLO: Do you know if that information--or was any of that information taken out of that room out of the Cannoles telecon room and brought down to the WOC or do you know if the information was independently going down to the WOC in the crisis center?

MR. MELLO: I don't know. I know people were going back and forth, so I would--I don't want to assume, but that's probably what they were taking the information like that back and forth, but.

MR. AZZARELLO: How would you describe your role that morning, let's say after 9:00 o'clock, after the second crash, between then--let's take the time frame between--after the second crash in New York and when the National Airspace System was clear, no aircraft [unintell.] we're talking about roughly a two-hour period. If you were sitting at, you know, whatever you were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

sitting at the bar with your buddies and you said this is what I did that morning, this was my duties, how would you characterize it?

MR. MELLO: Fireman at headquarters, not to fight the fire, but trying to handle a crisis. In other words, someone needed a drink of water or call the Command Center and get me this person, I was doing all that. I was trying to keep up with what was on the board. I didn't write on the board anything. I was kinda like support for Dave. You know, he would give me something to do and I'd do it, you know. And that's usually my role with him anyway.

MR. AZZARELLO: So you were support?

MR. MELLO: Yeah, talked to Dave but it felt like it was, you know, we were fire fighters that day, we were just reacting to something we never did before, I never did before or, you know fathom.

MR. AZZARELLO: Was any part of your assignment that day, your role, to bring and courier information from the Cannoles telecon room

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

down to the WOC or to the Crisis Center?

MR. MELLO: No, I never went to either one that day.

MR. AZZARELLO: Okay. You never went to either the ROC or the Crisis Center that day, that morning, let's say between 9:00 and 12:00?

MR. MELLO: No, no, uh-huh.

MR. AZZARELLO: Did you, for the majority of the time, stay back in that area?

MR. MELLO: Other than I went, I remember I went to the bathroom one time, down to the fourth floor, because what I had my folks do down there was dial in from down there so there wouldn't be more people upstairs, but yet they could have the benefit of what's going on because you know, we needed to know what to ask for and start putting this thing together. Doug Gould was one of the person downstairs I had monitoring the telecon.

MR. KARA: Doug stayed downstairs?

MR. MELLO: Ninety-five percent of the time, yeah.

MR. AZZARELLO: What telecon was he

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

monitoring?

MR. MELLO: Same one, just a different location.

MR. KARA: He was monitoring that from downstairs?

MR. MELLO: Fourth floor, yeah. I can't help it but it's laughable, the telecon was monitored from a thousand locations, [unintell.] we forgot a copy of the tape. Pretty amazing isn't it?

MR. KARA: Were you involved at all in the study we just learned about yesterday for MITRE Corporation to put together a very detailed analysis of what they called the Air Traffic Situation Room, which is another room for the Cannoles telephone?

MR. MELLO: No, I knew MITRE, I mean, they have a lot of contracts with us.

MR. KARA: But you don't recall any--

MR. MELLO: Specifically, no, uh-huh.

MR. KARA: Do you recall anyone in Mr. Cannoles' shop asking MITRE to do a review of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

events of 9/11?

MR. MELLO: No, I do recall, I remember Nancy Kolonowski was working with MITRE had something to do with 9/11, but didn't know what the--

MR. KARA: And Nancy is head of [unintell.]?

MR. MELLO: No, she works, at that time she worked for ATA Sabre [ph], she worked for Sabre, she was her deputy. ATA-2, I think her designator was.

MR. KARA: She was the deputy to who?

MR. MELLO: Sabre Kalahia.

MR. KARA: How do you spell her last name?

MR. MELLO: Last, K-a-l-a-h-i, Kalahia, something like that, i-a.

MR. KARA: And Sabre is?

MR. MELLO: S-a-b-r-e?

MR. AZZARELLO: On that telecon that day, the Cannoles telecon, SIMULTANEOUS CONVERSATION: [unintell.]

MR. AZZARELLO: The Cannoles telecon, it's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

referred to as the Air Traffic Telecon, the Cannoles Telecon, well, because we have the Primary Net and the Tactical Nets and they had names, but Dave started one that day it seemed sort of ad hock, it became the Cannoles Traffic Telecon. On that telecon, were you able to tell from anything you were hearing on it that morning, other than, you know, you were already saying you think a military-type person was reporting 60-miles Northwest, did you hear any other activity that period to be clearly activity of a military entity trying to coordinate with the FAA to locate either 77 or 93, so that they can go and try to track it down?

MR. MELLO: On the telecon, no, I was hearing some stuff from the military people outside.

MR. AZZARELLO: Outside your room here?

MR. MELLO: Yeah, just outside the actual room we were in, you know, there's basically where the secretary sat out there, there's a lot of room out there. But the military people in and out;

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they'd come in and out, but there was talk about fighters being up and stuff like that, I but specific--

MR. AZZARELLO: General fighters being up?

MR. MELLO: Yeah, yeah.

MR. AZZARELLO: Nothing specific?

MR. MELLO: Uh-uh.

MR. AZZARELLO: Tell me about your role in the Summary of Air Traffic Events [unintell.] what was your role in helping to put this together?

MR. MELLO: Well, let's see, I was, well, as a manager, I kind of assigned tasks for that, myself and Tony Ferrante. I was, again, I was assistant division, Tony was Division, so he was my immediate boss, Cannoles is our second-line, you know, boss's boss. Ferrante wasn't here the day of 9/11, he was in Chicago.

MR. KARA: Chicago, yeah.

MR. MELLO: So, the initial and we didn't know what the product was going to look like or what we were going to do with this, initially, because, again, we normally do accident packages.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

But we started putting together something, you know. It started getting into each flight. But I was just, you know, you do the transcript, you take care of the tape, let's make re-recordings and, I mean, things were coming in, like--

MR. AZZARELLO: Who was sort of managing the whole project, who was overseeing it?

MR. MELLO: Dave was down there, I was there, and the following day Tony came in. So, it was, you know, who's in charge? Dave. And then me and Tony, you know, took, Dave's lead and worked the issues.

MR. AZZARELLO: So, if you had to say who was overseeing it it would be Dave Cannoles was overseeing it?

MR. MELLO: Yes.

MR. AZZARELLO: And if you had to describe your role--what was your role putting it together?

MR. MELLO: I did everything from fill the paper in the printers, get coffee, to help type up the transcripts. Yeah, review the data.

MR. AZZARELLO: Did you gather the--who

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

gathered the end caps and the radar reduction data?

MR. MELLO: Well, the regions did. I mean, they came from facilities.

MR. AZZARELLO: And who received them?

MR. MELLO: I did, Dan Diggins did.

MR. AZZARELLO: Diggins help out on this, too?

MR. MELLO: Yeah, right. Gould.

MR. AZZARELLO: Doug Gould?

MR. MELLO: Yeah.

MR. KARA: How is it that Doug keeps getting sent to Iraq and you don't get sent there?

MR. MELLO: Doug's living out something he probably couldn't live out when he was in the military. That's my figuring.

MR. AZZARELLO: So the people that worked on under Dave Cannoles direction were yourself, Dan Diggins, Doug Gould, Tony Ferrante.

MR. MELLO: Yes, Jeff Meyers [ph], and Captain Meyers was in the WOC.

MR. AZZARELLO: Jeff and Catherine Meyers?

MR. MELLO: Yeah. Molly Boyan [ph] did

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

some administrative stuff on it.

MR. AZZARELLO: Did you split up the responsibility of reviewing the tapes or was there a tape person, you know, was there a tape man and a radar person or was it all?

MR. MELLO: We all helped do everything.

MR. AZZARELLO: Everybody pitched in with everything?

MR. MELLO: Whatever was the hot thing to do at that minute, we were doing it.

MR. AZZARELLO: Something we actually talked about yesterday with Dave Cannoles was the first two aircraft, 11 and 175, had references to notifications to the military as reflected in the military logs, NEADS, the references in the NEADS logs.

MR. MELLO: Okay.

MR. AZZARELLO: They show the notification times for 11 and 175 for the military, but there's no notification times indicated for United 93 and American 77. And what do you know about that?

MR. MELLO: We couldn't physically fine a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

time associated to someone's log or anything that was recorded, other than the military being on here with us during the situation, the last two. And then being at the Command Center, and the military people right behind us, you know.

MR. AZZARELLO: What was the conclusion, then, collectively, yourself and the group? Let's start with, say, 93, was your conclusion that you couldn't pin a time on the notification of 93 and so, it was left out or that there was no notification of 93, which was it? Or that there was, you thought there was, but you couldn't pin a time?

MR. MELLO: If we pinned something down, we wanted to show you a document that it was written on or a tape it was recorded on. That's kind of how we did it.

MR. AZZARELLO: Did you review--you reviewed the Cleveland Center tapes, though, right?

MR. MELLO: Yes.

MR. AZZARELLO: And somebody did, I don't mean you, personally, a person did, just take a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

look at the first couple of pages--I think you have controller conversations, right?

MR. MELLO: Mm-hmm.

MR. AZZARELLO: Just sort of read through that to the next page.

[Pause.]

MR. MELLO: Okay, next page?

MR. AZZARELLO: Yes.

MR. MELLO: Okay.

MR. AZZARELLO: Most of those entries--

MR. MELLO: Mm-hmm.

MR. AZZARELLO: --aside from particular time are pretty much linked to specific datapoint, an FAA datapoint, for example the tapes. The transponder gone off is linked to the radar, right?

MR. MELLO: Radar returns, yeah.

MR. AZZARELLO: Radar returns. Then you've got, like, when the report went from Cleveland Center to Great Lakes Regional Operations Center, is that something, doesn't indicate whether it's tape or not, but I guess that would either be a tape or interviewing people?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: My recollection there is that it was a notification sheet from Cleveland Center to the ILC with a time written down.

MR. AZZARELLO: Sort of a checklist?

MR. MELLO: Yeah, a checklist, yeah. Either that or from their Operations Log.

MR. AZZARELLO: Then you've got, say, 10:00 o'clock, here an entry that says the time is approximate based on personnel statements [unintell.] so I guess would you have the opportunity to review them or did they interview the controllers?

MR. MELLO: After the fact, the statements came here, so we reviewed all those.

MR. AZZARELLO: You were reviewing the written statements, they weren't actual interviews then, that your people conducted?

MR. MELLO: No, we, my shop, didn't go out and do interviews. The FBI went out and did interviews.

MR. AZZARELLO: This last entry here at 10:41, it says a note, Although this is the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

officially documented notification time, FAA officials were aware of the accident--talking about United 93--

MR. MELLO: Mm-hmm.

MR. AZZARELLO: --as these events were reported as they occurred on a Critical Event Teleconference established at the Federal Aviation Administration Headquarters Building. What's that Critical Event Teleconference?

MR. MELLO: That's the Cannoles, that's what I assume it is. Critical Events.

MR. AZZARELLO: I don't know why you assume because you helped put this together and I assume that there's some--

MR. MELLO: That's what I believe it is.

MR. AZZARELLO: Well, help us out here, there's a couple of things going on that and from what we can tell there are two main notes, whatever so to speak, of communication. One was going on in the Crisis Center.

MR. MELLO: Uh-huh.

MR. AZZARELLO: The Aviation Crisis Center

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

on this end of the tenth floor.

MR. MELLO: Okay.

MR. AZZARELLO: There was a secure video teleconference with the highest level of executive level of the FAA, White House and others here. And then you had, down on your end of the floor which is the Cannoles, the Air Traffic end.

MR. KARA: Actually there's two nets in here, there's Primary Net going up and the Tactical Net within FAA.

MR. AZZARELLO: We don't know if the Tac Net was run out of here, yet.

MR. MELLO: At that time, I didn't have the clearance to be in any of that, so I didn't--

MR. AZZARELLO: In any of that.

MR. KARA: So we're not sure where the Tactical Net was being run.

MR. MELLO: Well, when you say telecon to me that's what telecon, you know.

MR. AZZARELLO: Well, you're referring to a Critical Event Teleconference, you were, your opinion is or you're saying the Cannoles

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Teleconference.

MR. MELLO: Yeah, I don't know whoever put that in there, again, I was involved in writing most of this, but to me that is that, that is [unintell.]

MR. AZZARELLO: I understand you're not speaking for everyone of those in the division, but your personal understanding is you would think this Critical Event Teleconference would be the one that Dave Cannoles was moderating--

MR. MELLO: Yes.

MR. AZZARELLO: --himself?

MR. KARA: Within the MITRE package that we just got yesterday, there's an appendix that is a Critical Incident List. CI-1, CI-2, up to about, there are as many 20 critical events. Was someone within this entity down here maintaining a critical incident or a critical events list, linearly as they occurred?

MR. MELLO: The closest thing I would say is our reconstructed log, it would be logged-

MR. KARA: the one we just looked at?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Yeah.

MR. KARA: What I was trying to do the terminology, John just gave you there, equates to the terminology that's written--

MR. MELLO: Sounds like it's their terminology, it's not something that we--

MR. KARA: It's not yours?

MR. MELLO: No.

MR. KARA: Okay.

MR. AZZARELLO: How about, sticking with Cleveland Center and 93, did you look at the TMU tapes, did you have those available to you, too?

MR. MELLO: After?

MR. AZZARELLO: Yeah.

MR. MELLO: No, we didn't. We had SATORI, which is a, basically, have you ever seen the SATORI.

MR. KARA: Yes, we've seen the SATORI.

MR. MELLO: To a controller a SATORI's better than the TSD which you see [unintell.] we see with the controller more or less, not identical, but close to it.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: So, you saw what the controller--

MR. MELLO: A replay of the radar cap.

MR. AZZARELLO: And you're also looking at what the controller's saying and communicating?

MR. MELLO: Listening.

MR. AZZARELLO: Listening to and communicating. And beyond those tapes, the controller tapes, did you ask for any other tapes, did you ask for any other tapes in the Centers. Did you ask them for the Watch Desk tapes to see what they were doing on their end?

MR. MELLO: No. We asked for ATC tapes and we asked for all logs of the facility.

MR. AZZARELLO: Did you ask for all ATC tapes or just the ATC tapes of the controllers that handled any part of the subject--

MR. MELLO: Well, we held everything from the day and then we took what we needed to reconstruct that, you know. We went through this sector we got that frequency, that position.

MR. AZZARELLO: And to the extent that for

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

each of these four flights it talks about the center notifying their chain of command either the Region or the Washington Operations Center that would have been sourced not from tapes, to the best of your recollection, but from logs or checklists?

MR. MELLO: Either at the facility level or at the regional ops center or the WOC level, yes.

MR. AZZARELLO: Here, I'll give you an idea, here's one on American 11. New England Regional Ops Center advised Washington Operations Center, the WOC, of suspected hijacking of American 11, would that have been based--what would that have been sourced on, if you know?

MR. MELLO: By your New England ROC log, WOC log. Because, the only reason I'm saying that is we didn't listen to tapes from either of those.

MR. AZZARELLO: So, the only thing is--is it your understanding that the only tapes that were listened to were the controller tapes for those that handled the four planes?

MR. MELLO: Controller tapes or there was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a couple of coordination lines, but ATC stuff.

MR. AZZARELLO: How did you and the other people in your group that was putting this together pin down notification times to the military, because that was one of the things that we talked with Dave Cannoles about yesterday that it was important from a lot of different perspectives to just try to figure out when did the FAA tell the military about each of the four planes?

MR. MELLO: From the center logs, I thought we got one or two off there. I know we had a couple of logs from the military--

MR. AZZARELLO: A NEADS log, from [unintell.] that's referenced.

MR. MELLO: Did you have, or, like, I remember, like with Cape, I think we actually heard the controller call to the unit out there, Otis or whatever's out there on the Cape, so we assumed that, I mean, we took that as a call to the military.

MR. AZZARELLO: You reference Boston Center, yeah calling the Cape TRACON and asking

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

them to notify--Boston Center's asking Cape TRACON to go let Otis know that they're co-located, go ask the military--tell the military we need some help.

That, by the way, I think was, was that a TMU tape CBW, call into the TRACON?

MR. KARA: Yeah.

MR. AZZARELLO: That was actually, I mean, I just happened to remember that one because it's the one that sticks out in your mind, that was Dan Bueno [ph], from Boston Center, he was at a TMU desk, he was a supervisor--an area supervisor. Went to the TMU and called the Cape TRACON. So I assume then, for that, that you did have a TMU tape for that and I guess it--

MR. MELLO: A TMU tape or a statement that says I did that.

MR. AZZARELLO: I don't know which it is it's either a tape. It's a tape with Dan Bueno's great recollection. All right so, there are, for the first two flights, as I said, there are specific military notifications. Not for the second two. Did that come to the attention of your

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

group as you were putting this together that there appeared to be no specific notification times that were in here on the last two flights, notification to the military?

MR. MELLO: It came to us that we didn't have a figure we could go to because anything we did--we knew that the military rep Command Center we didn't want to go with the time that they were there, because they were there the whole time. Did someone out there actually tell them, I think one of our statements from the Command Center or one of their logs is that they reached over and we mentioned something about I don't know which aircraft it is now, but, you know, they mentioned something to their liaison, military liaison. To them that's military notification.

MR. AZZARELLO: Who was this that was doing that?

MR. MELLO: Command Center.

MR. AZZARELLO: The Command Center you're talking about the CARF [ph]?

MR. MELLO: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Do you remember what, reading that in the transcript somewhere or somebody saying that they think they'd been notified by the--

MR. MELLO: Might have been in our log, [unintell.] log.

MR. AZZARELLO: I think we're done. We can actually pretty much wrap up here. I just wanted to know if, Jeff, if you were able to find that tape?

MR. BROWN: Yeah, well, I've got the--

MR. AZZARELLO: You have it loaded.

MR. BROWN: I have the 4525 one. Is that the one you'd like?

MR. AZZARELLO: Where does it start at?

MR. BROWN: It starts at 8:34.

MR. AZZARELLO: Yeah that would have been too early for you are up after the first crash, right?

MR. MELLO: Yeah.

MR. AZZARELLO: And you started getting the telecon rolling after the second crash?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. MELLO: Yes.

MR. AZZARELLO: So, start it after 9:05, you know after the second crash.

AUDIO TAPE PLAYED [unintell.]

MR. AZZARELLO: So would that indicate then that they're probably not yet [unintell.] on that?

MR. MELLO: I remember we had to call a couple times-- [unintell.]

MR. AZZARELLO: What does that say 8:30?

MR. BROWN: 8:32.

MR. AZZARELLO: 8:32, so that's near 9:08/9:07, it's still pretty early, I mean because the second aircraft crashed at 9:02 almost 9:03, I mean, you're talking a matter of 4 minutes, trying to get them up, you know, trying to get the Command Center on the telephone.

MR. BROWN: Further?

MR. AZZARELLO: So, Karen Montgomery [ph], is Jeff Griffiths

AUDIO TAPE PLAYED [unintell.]

MR. AZZARELLO: Do you know who that is

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

talking?

[END SEGMENT 1]

MR. AZZARELLO: We made some efforts when we were off the tape trying to locate, off the record here in the interview just trying to locate a tape to see if you can tell us [unintell.] part of a telecon that Dave Cannoles was running that day and we have Command Center tapes here and then we were unable to find the one that was linked into the--

MR. MELLO: Yeah, I recognized nothing on there that I heard on the telecon that day.

MR. AZZARELLO: Miles do you have any other questions?

MR. KARA: No, appreciate very much your time.

MR. AZZARELLO: Thanks for your time.

[END OF INTERVIEW.]

SWORN INTERVIEW OF

DARLENE FREEMAN

BY

SPECIAL AGENT JOHN AZZARELLO

SPECIAL AGENT JEFF BROWN

SPECIAL AGENT MILES KARA

BROOKE LEWIS, FAA

Tuesday, April 8, 2004

[TRANSCRIPT PREPARED FROM A TAPE RECORDING.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I N T E R V I E W

MR. AZZARELLO: It's April 8, and we're at FAA headquarters in Washington about to begin an interview with Darlene Freeman. I'm John Azzarello, Team 8, 9-11 Commission.

MR. KARA: Miles Kara, 9-11 Commission.

MR. BROWN: Jeff Brown, 9-11 Commission.

MR. LEWIS: Brooke Lewis, Chief Counsel of Federal Aviation Administration's Office.

MS. FREEMAN: I'm Darlene Freeman. I'm now director of Corporate Learning and Development in Human Resources Office.

MR. AZZARELLO: That's a long title. Director of Corporate Learning--

MS. FREEMAN: Corporate Learning and Development.

MR. KARA: You're in the Human Resources Office?

MS. FREEMAN: In Human Resources Management.

MR. KARA: You know my good friend Cary Lang?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. FREEMAN: Oh, yeah.

MR. KARA: I used to car pool with her.

MR. AZZARELLO: Could you start off perhaps by giving us a little overview of your career at the FAA in terms of when you started and the various positions you held, briefly describing those leading up to 9-11 and the position you held on that day.

MS. FREEMAN: Okay. I started with the FAA in 1977 with the Staff Attorney in the Office of the Chief Counsel. I then went here in Washington. I then went to Eastern Region as regional counsel for the FAA up there. I came back here, and I don't know if I should go through all of the positions I've held.

MR. AZZARELLO: Maybe just briefly. You don't have to give a description but if we have any questions about what the roles are in those positions, we'll ask you.

MS. FREEMAN: Okay. I came back here and I worked briefly on a special project for the Administrator's office which is called Impact '88,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

1988. From there I became deputy director for Civil Aviation Security. And from there, I became deputy associate administrator for Aviation Standards. After that, I was associate administrator for Aviation Safety. I then became associate administrator for Aviation Standards. And after that, I became deputy associate administrator for Air Traffic Services. I then took three years leave without pay to accompany my spouse to Brussels. He was transferred there. When I returned, I became--that would have been in the year 2000. I was director of Safety and Special Studies in the deputy administrator's office. That was the position I held on 9-11.

MR. AZZARELLO: That was Safety and Studies?

MS. FREEMAN: I worked for Safety and Special Studies.

MR. AZZARELLO: Thank you.

MR. LEWIS: Special Studies, and that was for you said the deputy?

MS. FREEMAN: For the deputy

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

administrator. And then after that, I took the position that I'm now in.

MR. AZZARELLO: You were with the Region 2 in the Counsel's Office--

MS. FREEMAN: Eastern Region of the Regional Counsel.

MR. AZZARELLO: When was that?

MS. FREEMAN: That was from 1985 to 1987.

MR. AZZARELLO: Eastern Region Counsel's Office?

MS. FREEMAN: Regional Counsel, yes.

MR. AZZARELLO: Were you the counsel for the region?

MS. FREEMAN: Regional counsel, yes.

MR. AZZARELLO: And how about your--you said deputy director of Civil Aviation Security? What year was that?

MS. FREEMAN: That was 1988 to about 1990 I believe.

MR. AZZARELLO: This Civil Aviation Security at that time, was it broken down? Under

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the umbrella of ACS, was there a civil aviation--in Operations or was it structured differently?

MS. FREEMAN: It was structured differently. Back then, Civil Aviation Security was--the organization was an office, and under it, there were divisions. There was an-- Division. There was also, as I recall, there was a division for domestic security and a division for foreign security. It was a different organization.

MR. AZZARELLO: And it was headed by the director position and you were right underneath the director as deputy director?

MS. FREEMAN: Correct.

MR. AZZARELLO: Who was the director then?

MS. FREEMAN: His name was Ray Salazar.

MR. AZZARELLO: Ray Salazar?

MS. FREEMAN: Yes.

MR. AZZARELLO: And your next position after that?

MR. KARA: Can I go back to that position for a moment? At the time you were within that umbrella of activity or line of business, was the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

role of hijacking coordinator part and parcel of the deputy director's duties?

MS. FREEMAN: Yes. I mean it was part of--not part of my role, my job specifically, but we did have an operations group and they would handle hijackings.

MR. KARA: You recall who had that role? I know we're going back a little bit.

MS. FREEMAN: Yes, and my recollection is that his name was Donnie Blazer. He's now deceased, but my recollection is that he was the one who had that role.

MR. AZZARELLO: You had an Operation division then you said?

MS. FREEMAN: My recollection is that the way it was structured back then it was domestic operations and foreign operations, but there was a reorganization during the time that I was there, so I may not have that quite accurately. But there was definitely domestic operations group, and Donnie Blazer was the division manager, and he handled the hijacking crisis center.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: Let me share this with you. This is the line and block chart that we understand was as of 9-11. So this would be maybe a couple of reorganizations removed, but the job sounds similar. The blocks have changed a little bit. This is Civil Aviation Security and this is ACO. This is ACI working for Claudia--today and this is where Lee-- was on 9-11 and Lee--we understand was the hijacking coordinator on 9-11. So given the fact that you had been in this organization, we were just probing you a little bit on that. But this sounds like the area where the hijacking coordinator--

MS. FREEMAN: Yes, it was. The organization evolved into that.

MR. KARA: Into this.

MR. AZZARELLO: Do you know if at that time in '88 to '90, was it pursuant to any written policy of protocol that the Operations Division of Security was the hijack coordinator, or was that just sort of--that it evolved as a practice as sort of a defacto?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. FREEMAN: I don't remember if there was anything in writing about that. I know, you know, it was the case, but I don't remember if it was an agency order.

MR. AZZARELLO: Did you have an understanding on 9-11, giving any familiarity you may have had with the FAA policy and protocol as to what office or position the hijack coordinator would fall under on 9-11? Is that defined in any written policy or protocol?

MS. FREEMAN: I don't know if it was at the time of 9-11. You know, I was no longer in the business of security, so I don't know what the current orders were.

MR. AZZARELLO: That's when you were the director of Safety and Special Studies, right?

MS. FREEMAN: Yes.

MR. AZZARELLO: Let me see if I have it with me.

MR. KARA: I've got it, John. This one--

MR. AZZARELLO: No, the other one.

MR. KARA: The other one?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Crisis management handbook?

MR. KARA: 4?

MR. AZZARELLO: You handed this one out the other day. Yeah, 4. Chapter 4. I have that in the box actually.

MR. KARA: This one, John?

MR. AZZARELLO: Yes, we'll have to dig it out.

MR. KARA: We weren't quite going to go down this path, but since you have some experience there, we decided--

MR. AZZARELLO: We apologize it wasn't the first thing asked at the top. This is one of the documents that we were given by the FAA in connection for our request for any written policy and protocol. We believe this could be the one even in effect on 9-11 and they're checking on that for us now. And Miles, if you can give me the chart you had before, the organizational chart.

It says that the FAA hijack coordinator parenthetically the director or his designate for

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this FAA Office of Civil Aviation Security on duty at headquarters may define if there's any certain responsibilities as hijack coordinator requesting escort aircraft for a confirmed hijack.

Just tell us based on your career in the FAA and based on reading that document, what office here in the chart of administration positions that would fall to, the hijack coordinator.

MS. FREEMAN: Well, as I read this, I would say that it was in the Office of the Associate Administrative Facilities Management Security. More specifically I would say it was in the Office of Civil Aviation Security Operations.

MR. AZZARELLO: Okay, and that's just where I was sort of having difficulty meaning how do we get to Operations just from here. Can you tell me? As I read it, I thought it fell right here because the ACS1 position--

MS. FREEMAN: It's very possible that it did and, you know, I may be speaking of more in terms of practice. I know that for the associate director or his designate, and my understanding is

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that whoever was in charge of Operations would be the one who would be running the hijack crisis command center whenever there was a hijacking.

However, I have to say also that when I was in Security, often it was the director of Civil Aviation Security himself, and that's Ray Salazar, he did run some of those hijacking crisis centers when a hijacking occurred. He was not there, you know, or sometimes he would delegate it to this gentleman I mentioned, Donnie Blazer, who was then the head of Domestic Operations.

MR. AZZARELLO: The terminology director, the director of FAA Office of Civil Aviation Security, is that synonymous or not with--I don't want to make the wrong conclusion here--is that synonymous with the associate administrator for Civil Aviation Security, or is it a different term?

MS. FREEMAN: My assumption is that, if I have to guess, I would guess that this is a throwback to the old Civil Aviation Security organization. Before it became an associate administrator, it was called director. So it used

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to be an office of Civil Aviation Security and this box here was a director. At some point, it got elevated to an associate administrator. If I have to guess, my guess is that the change was never made.

MR. AZZARELLO: Okay. All right. I'm with you now. So if this is a 9-11 document, Chapter 4, hijacked aircraft, which talks about the hijack coordinator role, if that was current on 9-11, then it just lagged, for definitional purposes, it lagged in the not catching up with the reorganization?

MS. FREEMAN: That would be my guess.

MR. AZZARELLO: Okay. What was in your role on 9-11 as the director of Safety and Special Studies? Can you give us a little bit more information or description? Sort of what was your sort of day-to-day duties consist of in that position?

MS. FREEMAN: Leading up to 9-11, I was working on a special project developing a proposal for how the FAA might provide safety oversight over

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the new Air Traffic organization that was about to be created.

MR. AZZARELLO: And what was the name--

MS. FREEMAN: The new ATO, the new Air Traffic organization that is now headed up by the chief operating officer--

MR. AZZARELLO: What in particular may have prompted that change in the organization?

MS. FREEMAN: It was a statutory requirement for the FAA to have a chief operating officer for a performance based Air Traffic organization. And as a result of that legislation, the deputy administrator asked me to put together a proposal for how the FAA might provide some safety oversight over the new Air Traffic organization.

MR. KARA: And who did you report to on 9-11?

MS. FREEMAN: The deputy administrator.

MS. KARA: Monty Belcher?

MS. FREEMAN: Yes.

MR. AZZARELLO: Anybody have any other background questions--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: No.

MR. AZZARELLO: Well, I guess I myself will step back a second. In your role as counsel in the Eastern region, what was your role in that position with regard to litigation that would result from any aircraft accidents or incidents?

MR. FREEMAN: The litigation was handled out of Washington, out of the Chief Counsel's office in Washington. What we did at the regional level was mostly enforcement cases, cases against pilots for violation of federal aviation regulations. We handled other legal matters, labor law, Freedom of Information Act issues, environmental law.

MR. AZZARELLO: In the position you held on 9-11, did you have an occasion to have any interaction, or what was the AT20 group, the role of Dave Kenols in this group?

MS. FREEMAN: When I was working on the safety oversights proposal, I had a team that was assisting me, and Dave Kenols was on that team. To be honest with you, I don't remember whether at

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that point he was still on the team, but at some point during my work on this proposal, I believe he was still on the team. I was going to say at some point, Tony Ferranci from that organization took over for him on my team. I just don't remember what point that was.

MR. AZZARELLO: In terms of your chain of command, you reported directly to Deputy Administrator Belcher?

MS. FREEMAN: Yes.

MR. AZZARELLO: I guess other than the people that would support you on the special project you were working on, was there anyone that would report directly to you?

MS. FREEMAN: No.

MR. AZZARELLO: If we could sort of shift gears to 9-11, and if you can just tell us where you were when your day started, and when you first came to learn there was a problem with the aviation system that day.

MS. FREEMAN: I was in my office which was in the Deputy Administrator's suite, and at some

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

point, I walked out, or I found myself in the outer area of the suite where there is a television, and the deputy administrator's secretary had the television on, and she was--the news, it was breaking news about that one aircraft had hit the World Trade Center. And so that's how I learned about it.

MR. AZZARELLO: So you recall your first knowledge that anything was wrong, that it was pretty much what was seen on the news that there was a report of an aircraft that hit the Trade Center? Do you remember whether or not they specified whether it was a commercial aircraft or GA?

MS. FREEMAN: No. At that time, they did not yet.

MR. AZZARELLO: And you see the damage. I guess you see the fire at the World Trade Center?

MS. FREEMAN: It was the first one.

MR. AZZARELLO: Did you learn any time after that news report that that was a commercial aircraft that hit that north tower?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. FREEMAN: I did. I don't remember at what point I did.

MR. AZZARELLO: But at some point you did? Do you remember how you learned of the second aircraft incident?

MS. FREEMAN: I was standing there. I may have walked away. I did not see it live, but I heard I believe it was Cecilia who was the deputy administrator's secretary saying something like oh, my God, a second airplane just hit the World Trade Center.

MR. AZZARELLO: Do you know if at that time while these events are transpiring when you learn of the first and second aircraft incidents where the deputy administrator is at that time?

MS. FREEMAN: He was either in his office or he was with the administrator in her office, or in the conference room between the two because I remember seeing both of them run out of his office and run across the hall into the Operations Center.

MR. AZZARELLO: --center?

MS. FREEMAN: Yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Did you see then the replay of the second aircraft hit after you heard--

MS. FREEMAN: Yes, I did.

MR. AZZARELLO: Had you heard anything yet at all about reports of hijacks in the system at that point in time when you see the second aircraft?

MS. FREEMAN: I don't believe I heard anything.

MR. AZZARELLO: When the deputy administrator--I guess you said you think the deputy administrator at that point came out perhaps with the administrator to go across the Operations Center, did you have any exchange at all about--?

MS. FREEMAN: I really don't remember. I have a recollection. Whether it was an exchange or whether I heard Monty Belger ask Cecilia to put in a phone call, I can't tell you exactly, but I have a recollection of Monty Belger getting on the telephone with American Airlines, with somebody from American Airlines. So I can't remember if he said something that I overheard or how I came to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

know that.

MR. AZZARELLO: But no one asked you at this point to take any action or assist them in any way with the events that were developing?

MS. FREEMAN: No.

MR. AZZARELLO: So where at this point now--where do you go after you see the replay of the second crash in the Trade Center?

MS. FREEMAN: Well, I went back to my office, and I turned my television on.

MR. AZZARELLO: So in terms of any activity that was going on here at headquarters at that time in trying to get a crisis center set up or anything of that nature to respond to the events, you didn't have any role in that?

MS. FREEMAN: I had no role in that. It was not expected. It was just not my position.

MR. AZZARELLO: I understand that's not your position. No one asked you to give anything outside of the confines of your defined position in an effort to respond to the events.

MS. FREEMAN: No. Not on that day, no.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay. Did that hold true pretty much for the remainder of the day?

MS. FREEMAN: Yes.

MR. AZZARELLO: Did you have an occasion to spend any--center that day?

MS. FREEMAN: No, I did not. In fact, I did not spend a whole day here. I left at some point. I wanted to leave and go get my daughter in school because I was concerned about what might happen.

MR. AZZARELLO: She was in school in the D.C. area?

MS. FREEMAN: In Virginia.

MR. AZZARELLO: Do you remember if you left before or after the Pentagon attack?

MS. FREEMAN: It was after the Pentagon attack.

MR. AZZARELLO: After the Pentagon was hit? Do you remember if it was before or after the fourth aircraft crash in Pennsylvania?

MS. FREEMAN: I believe it was before. I don't remember.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Do you remember how you learned about the Pentagon crash?

MS. FREEMAN: Again, I had the television on in my office and I learned about it on the news.

MR. AZZARELLO: So you didn't hear any reports or rumors or anything of that nature before the Pentagon crash from your vantage point about a potential aircraft that may have been approaching the D.C. area?

MS. FREEMAN: No. I was by myself basically in my office.

MR. AZZARELLO: So pretty much we can conclude as of that day you weren't asked to perform any roles respondent to the events as they unfolded?

MS. FREEMAN: No.

MR. AZZARELLO: How about--

MR. KARA: Did you conduct that day at all any--

MS. FREEMAN: No, I did not.

MR. AZZARELLO: That was a Tuesday. Did you come in on the following day, on a Wednesday,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

on the 12th?

MS. FREEMAN: To be honest with you, I don't remember whether I came in the next day or if it was the day after. I'm sure it had to with whether my daughter had school or not. I'm a single mother, so depending on what was happening with that, you know, that would've dictated whether I came in.

MR. AZZARELLO: Do you think that it may be two days after do you think that by then you were back?

MS. FREEMAN: I did come back, yes. If not the next day, the day after.

MR. KARA: And when you came back, what task were you given to do?

MS. FREEMAN: When I came back, at some point, and I apologize for not recalling exactly at what point, but when I came back, I did go to Monty Belger and I offered my assistance in any way that I could. And at some point, he and the administrator, Jane Garvey, asked me to put together a briefing book for the administrator for

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

an upcoming Congressional hearing which took place on September 21st, to put together a briefing book.

MR. AZZARELLO: And that was a briefing for the administrative for September 24th Congressional hearing?

MS. FREEMAN: Yes.

MR. AZZARELLO: And what subjects were you given with respect to the substance of the briefing book?

MS. FREEMAN: I believe that--I'm trying to remember exactly how it was that we decided what to cover in the briefing book, but I believe that where I got the guidance was from the legislative group in the Chief Counsel's office. They had some ideas about what some of the subject matters were that we should cover in the book. It's possible that I also got some guidance from Monty Belger or Jane Garvey, but I just don't remember.

MR. AZZARELLO: Do you remember any of the people in the legislative board of the Chief Counsel's office in this regard?

MS. FREEMAN: Yes, I believe it was Mary

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Walsh.

MR. AZZARELLO: Mary Walsh?

MS. FREEMAN: Yes.

MR. AZZARELLO: And what was her position?

MS. FREEMAN: I think she was the assistant chief counsel for Legislation, but I'm not sure if that was her position at the time.

MR. KARA: Do you recall what the major topics were or the major subdivisions of the briefing was?

MS. FREEMAN: I'm sorry?

MR. KARA: The major subdivisions of the briefing or the major topics to be covered.

MS. FREEMAN: It was one topic. It was like--about, you know, things that could be reasonably expected to be asked of the administrator at the Congressional hearing. What I did is I put a team of people together from the different organizations in the FAA that had something to do with these issues, and as a team, we added more things to the list.

MR. KARA: Who was on your team?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. FREEMAN: I'm sure I won't be able to remember everybody who was on my team, but we had somebody from Aircraft Certification, somebody from Flight Standards. We had at least two people from Civil Aviation Security, had at least two people from Air Traffic.

MR. KARA: These are the people who are specifically interested in who was from Air Traffic.

MS. FREEMAN: From Air Traffic, I believe Dave Kenols was there at the beginning of our meeting as a team, but I don't believe that he stayed for the whole time. We worked through the weekend.

MR. KARA: Right.

MS. FREEMAN: Jim Slate from National Airport was a more consistent member of this team from Air Traffic. I think that was it from Air Traffic.

MR. KARA: Tony Ferroti or Doug Gould involved at all?

MS. FREEMAN: No, not on my team. They

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were all working the issues. There was a lot of back and forth. It ended up, you know, with Jim Slate sort of being the representative, and I would ask him to find something out, you know, get a paper to include in the book, and he would go back. And I knew that he was working with that group, Dave Kenols, Tony Ferroti.

MR. KARA: Where's Jim today?

MS. FREEMAN: He's still at National Airport I believe.

MR. KARA: He's at national?

MS. FREEMAN: Yes.

MR. AZZARELLO: So was it your impression that Dave Kenols and Jim Slate had people under them assisting them in this project, that might have been reporting to you or taking part in the meetings at your level, but--

MS. FREEMAN: Yes, yes.

MR. AZZARELLO: Do you remember did Dan Diggins ever take part in any of the meetings?

MS. FREEMAN: I don't remember, no.

MR. KARA: And before we focus more on AT,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

who were the two people from CAS, from Civil Aviation Security?

MS. FREEMAN: David Tiedge.

MR. AZZARELLO: Tieg?

MS. FREEMAN: Yes. T-i-e-d-g-e.

MR. AZZARELLO: T-i-e-d-g-e.

MS. FREEMAN: Mike Morse, M-o-r-s-e, and I believe Terri Kraus. K-r-a-u-s. I believe that she was also with Security. I know that she was on the team and I believe that she was on the Security team.

MR. KARA: Terri Kraus? Do we know a Kraus? Mary Ellen?

MS. FREEMAN: Different from Mary Ellen.

MR. AZZARELLO: Different--

MS. KARA: Different from Mary Ellen, okay.

MR. AZZARELLO: Is that everyone from Civil Aviation Security?

MS. FREEMAN: Yes, that's my recollection, yes, and then eventually Leo Boivin was also on the team.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Was he Civil Aviation Security?

MS. FREEMAN: Yes.

MR. AZZARELLO: Leo?

MS. FREEMAN: Boivin. B-o-i-v-i-n. He has since retired.

MR. KARA: And how about from the WOC and the Aviation Crisis Center?

MS. FREEMAN: My recollection, and it's not a very good recollection, my recollection is that it was Dan Noell, but I believe that May Avery also came to some of the meetings. You have to remember we were, you know, the FAA was--there was a lot going on, and so people would come to meetings, or people would come to the gathering place and sometimes we got different people because somebody would get pulled off--

MR. KARA: Sure.

MS. FREEMAN: --to work on the real stuff that needed to be done as opposed to putting a briefing book together.

MR. KARA: Sure. How about the Command

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Center?

MS. FREEMAN: I don't believe that we had anybody specifically from the Command Center. I believe again that Jim Slate from Air Traffic sort of--he was gathering whatever information needed to be gathered from the different parts of Air Traffic.

MR. AZZARELLO: You don't remember--participating in this effort, like John Wiedle, Linda Schuessler, Jeff Keys or anyone?

MS. FREEMAN: No, not directly.

MR. KARA: How about the senior officials in Air Traffic, like Chellen or Brown or Jeff Griffith?

MS. FREEMAN: They were not specifically on this team. The administrator, when she asked me to do this tasking, she announced it at a staff meeting of which all of the senior officials were at, and she asked them to support me in any way that they could. So she basically said, you know, whatever Darlene Freeman requests in terms of people to be on the team or anything like that, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

expect you to support it. I did not request for the senior level officials to be on the team, but I did request for them to give me representatives.

MR. KARA: When she announced that and probably gave some general statements about your purpose and direction and the assistance that the--business heads could provide you, what was her guidance about reconstructing the events of the day or developing a time line?

MS. FREEMAN: It was not part of that announcement, but again, I don't remember exactly where the direction came from, but one of the things that we were asked to include in the book was a chronology of the notification sequence.

MR. KARA: And when you say notification sequence, notification--

MS. FREEMAN: Notification of the military.

MR. KARA: To the military?

MS. FREEMAN: Yes.

MR. AZZARELLO: Do you remember if Fred Davis was involved in any of these efforts?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. FREEMAN: No, I don't. I don't remember that he was.

MR. KARA: What points of contact did you develop within the Pentagon or within NORAD to assist you?

MS. FREEMAN: I did not directly. I did all of that through Air Traffic, so I relied on--for the chronology, the notification issues, I relied on Air Traffic, basically relied on the AT20 group, Dave Kenols and the people who work for him.

MR. AZZARELLO: So you relied on them for any contacts with NORAD or the military in trying to come up with a chronology?

MS. FREEMAN: And I again I can't say that they did contact the military. You're going to have to ask them, but I know that I dealt through them, so in coming up with a chronology, I basically asked Air Traffic to come up with it.

MR. KARA: At a senior level, though, with you as the project director, did you talk at all with General Arnold at Konar?

MS. FREEMAN: I did not.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: Or with Colonel Scott?

MS. FREEMAN: I did not talk to anybody, but I do believe that--oh, gosh, what was Jeff's last name? He was the deputy director of Air Traffic.

MR. AZZARELLO: Jeff Griffith?

MR. KARA: Griffith.

MS. FREEMAN: Jeff Griffith. I know that Jeff Griffith was in touch with some other military people.

MR. AZZARELLO: Was it your understanding that the chronology that was part of this briefing would include not just a chronology of notification for the military, but in a broader sense, the chronology of significant events as they evolved that day with respect to each aircraft that were hijacked?

MS. FREEMAN: Yes, from an air traffic perspective.

MR. AZZARELLO: Right. From the air traffic perspective anywhere from takeoff to impact for each one?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. FREEMAN: Yes.

MR. AZZARELLO: So anything in between there that would be deemed a relevant reportable event.

MS. FREEMAN: That's correct.

MR. AZZARELLO: Which would encompass obviously notification to the military?

MS. FREEMAN: Yes.

MR. AZZARELLO: Is it your position with regard to that project any part of that pulling together the chronology from takeoff to crash for each of the four aircraft that was something that was headed by Dave Kenols, head of AT20?

MS. FREEMAN: I believe it was, but I also believe that Jeff Griffith who was over him had something to do with it.

MR. AZZARELLO: Some oversight perhaps, or some--

MS. FREEMAN: Perhaps some oversight, and I specifically recall some contacts with the military, with I believe with NORAD.

MR. AZZARELLO: In terms of what the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

ground level work of pulling the information, like I'm sure you are well aware of because of the positions you held, for the kind of work-- Is it fair for me to assume that?

MS. FREEMAN: I'm sorry--

MR. AZZARELLO: Is it fair for me to assume that you have a good understanding of sort of the kind of ground level work that would be entailed in pulling together chronologies for the four flights?

MS. FREEMAN: I was aware of what they were doing, yes.

MR. AZZARELLO: So were you aware--were you reviewing for example tape recordings from various FAA facilities who controlled the aircraft company?

MS. FREEMAN: I can't say that I was aware that they were reviewing tape recordings, but I'm aware that they were reviewing radar--

MR. AZZARELLO: Radar data?

MS. FREEMAN: --data, and I have to assume that they were also reviewing recordings.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Anything that basically they could use as a source--

MS. FREEMAN: Yes.

MR. AZZARELLO: --from that perspective perhaps.

MS. FREEMAN: Yes.

MR. AZZARELLO: I would assume from my questions that I guess like anywhere else when the boss speaks, when the administrator says encourages the staff to support a particular project, the expectation would be that if there was a resource there and someone to help pull it together, the message is clear to pitch in and try to help out to put the resources together for this project?

MS. FREEMAN: Definitely.

MR. AZZARELLO: Do you remember if any particular issues arose that were of a nature that--as the chronology was being put together for the four aircrafts that was discussed with you along the way as the chronology part of the briefing work was being compiled, or either Jeff Griffith, anyone like at Jeff's level, or any level

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

for that matter, I guess, you know, talk to you formally or informally?

MS. FREEMAN: No, the only thing I remember was somebody coming in and saying that NORAD had a time line. NORAD had developed a time line, and somebody had a piece of paper with the times, notification times NORAD had.

MR. AZZARELLO: They had a sheet of paper with NORAD times?

MS. FREEMAN: Yes.

MR. AZZARELLO: Do you remember if it was--what the format of it was, like was it a--did it look like an official NORAD document? Did it look like a press release, a log, chrono log?

MS. FREEMAN: I think I remember a piece of paper that did not look very official at all, and then I remember seeing either a press release or a copy of a newspaper article that had some of the same time lines in it.

(Intervening matter.)

MR. AZZARELLO: I apologize for that interruption. They know we're in the middle of an

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

interview. Okay, so you're not sure whether it looked like--didn't look official, that was your recollection? Let me see if we can get that--do you have the press release?

MR. BROWN: Yeah, I think we do. I'm looking for it, and I can't find it.

MR. KARA: You're looking for that one-pager--

MR. AZZARELLO: Either the press release or--let me see what you have. Do you have the tech log?

MR. KARA: I gave you the tech log.

MR. AZZARELLO: Okay. Does this look familiar, the time line or--

MS. FREEMAN: No, no.

MR. AZZARELLO: That doesn't look familiar?

MS. FREEMAN: Not at all.

MR. AZZARELLO: Did--okay so--

MS. FREEMAN: No, what I remember it was typed, and it was typed and it was short--

MR. KARA: We got one page, notifications

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to the military.

MR. AZZARELLO: Oh, okay.

MR. KARA: And I can't find my copy of it.

MR. AZZARELLO: Is it like a press
release?

MS. FREEMAN: It could have been that. It
could have been the press release. I just don't
remember.

MR. KARA: That was the short two-pager.
The press release was a two-pager.

MR. AZZARELLO: Yes, there was a page,
notifications to the military, but my understanding
was that that was a document that was produced by
the FAA. Is that your understanding too, Miles?

MR. KARA: No, the 20th of September one
pager we had we got from FAA.

MR. AZZARELLO: That's what I'm saying.
It was an FAA document, not a military--

MR. KARA: That's correct, yeah. I'm
sorry. It was FAA, and then we had the 18
September, 2001 NORAD press release which was a
military document.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. FREEMAN: But it could have been the press release. I'd have to see it to recognize it.

MR. KARA: What was the issue with the paper coming to you with the notifications?

MS. FREEMAN: I just remember somebody bringing it to my attention. I just remember seeing it.

MR. AZZARELLO: Can you call Kevin and tell him to get the NORAD press release and the one page notification to the military and bring them over or send them over?

MR. KARA: I've got the FAA press release.

MR. AZZARELLO: Okay. Let me show you this document actually.

MR. KARA: Yeah, why don't you go with that one.

MR. AZZARELLO: That was the summary of--it's an FAA summary of air traffic hijack events on the day, September 11th, in terms of when it was produced and put together, September 17th is the date on that one page, and I guess we were told by some other witnesses that that was the day--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

sort of finalize it on September 17th which would have been the following Monday. I remember you said earlier you worked through the weekend with a group of people on the briefing book. Is that correct?

MS. FREEMAN: Yes.

MR. AZZARELLO: Was that part of the project for the briefing book as you look at it now, the summary of events? It's a chronology for each of the four flights treated separately and then pulled together at the end.

MS. FREEMAN: We did view some--I remember that they put this together, and we did use the chronologies for the book. They look like the chronologies that ended up in the book, but I do remember that they put together a more complete book like this with, you know, with the radar tracks.

MR. AZZARELLO: There were some--I think there are some radar data there, one page, chrono radar data.

MS. FREEMAN: Yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: Probably the only thing I need is the press release.

MR. AZZARELLO: All we need is the press release.

MR. LEWIS: And it's not in the box?

MR. AZZARELLO: If you have a Needs book in there, it'd be in there. I don't think the Needs book is in there. So was that part of a larger briefing book that was put together for the administrator, that document?

MS. FREEMAN: My recollection is that when that--at the same time that we were asking for Air Traffic to put together a chronology for the briefing book, my recollection is that they put this together, which was certainly more than we needed for the briefing book. But my recollection is that they put this together, you know, and gave it at least to the deputy administrator. I don't know.

MR. AZZARELLO: And did you say you don't know if they used that whole report? It might have been excerpts that made it's way to the briefing

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

book?

MS. FREEMAN: I know that that's a fact, that we did not include, for example, the radar, the maps, we did not include those in the briefing book.

MR. AZZARELLO: Do you know if that part, the written chronology was just sort of in paragraph form that sort of described the--

MS. FREEMAN: Yes.

MR. AZZARELLO: That would have--you're fairly certain that would have made its way into the briefing?

MS. FREEMAN: Yes, that would. Yes, that did make it into the briefing book. Yes, it did. What I don't know is whether--you know, this is dated September 17th. You know, I don't know whether this was the one that ended up--

MS. KARA: You don't know whether that was the final version.

MS. FREEMAN: The final--thank you.

MR. AZZARELLO: Okay. How about this document here? This has a got a date--on September

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

20th, '01, and it's titled "Notifications to the Military."

MS. FREEMAN: It looks somewhat familiar. I just don't remember this document specifically.

MR. AZZARELLO: Would it have been something that you think you would have been involved in putting together or pulling together that information?

MS. FREEMAN: It could have been. Yes, it could have been, or it could have been somebody in Air Traffic putting it together, you know, at our request. I just don't remember.

MR. AZZARELLO: The reason why I specifically wanted to ask you about that document to see--to understand the context of it from our perspective. We've interviewed some people from AT20 who are familiar with the summary, this sort of booklet underneath, and specifically with regard to the issue of notifications to the military from the FAA. We asked them about it and showed them that, and there was at least one witness who we recall when that person saw the notifications to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the military thought that--frankly he said two things. One, that they thought that that particular issue of the FAA as an agency trying to determine when the FAA notified the military with regard to each of the four hijacked aircrafts, they thought it was a particular issue that you were working on, that the administrator had assigned you to take a look at or asked you to take a look at. And then number two, that they thought you might have been the person who either helped pull that together or directed the sort of creation of that document.

MS. FREEMAN: It's possible. It's like I said it does look familiar. My recollection is that, you know, initially when we were trying to put together the information about specifically notifications to the military, I have a recollection that something like this was put together. Who exactly put it together, I can't say, and then, you know, as we--it's dated September 20th--I was going to say that, you know, as we worked on the briefing book, we had the more

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

detailed chronology in the briefing book, you know, more detailed than this, but this does look familiar.

MR. AZZARELLO: That I guess treats it as a separate issue. In other words, pulls out obviously--within a chronology of events for each of the four hijacked aircraft, there's a number of different issues that arise. For example, you know, when the controller, controlling the aircraft, first recognized that the plane might have been in distress or maybe even possibly hijacked. And among those issues obviously you can pull out the one issue of notifications to the military--at least treated separately on one document.

With regard to notifications to the military, there have been a few folks in the group that you've described to us as the group pulling together the briefing book. There have been at least a few folks within that group who recall notifications to the military being a topic of hot debate between the FAA and the military as to who,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what, when and how much time did the military have to react to each of the four hijacked aircrafts. And it was spirited is my word, but hotly contested debate that I believe were the words used by some of the officers and individuals that we talked about who were working with you and the group that, you know, who was asked to assist you in pulling together the briefing book. I want to ask you about your recollection of that issue and the debates or debate between the military and the FAA as to who, what, when.

MS. FREEMAN: Yeah, I can't say that I--again I was not involved in any discussions with the military, so I can't say that I was aware of debates with the military. I do remember that the issue was one that was of interest to particularly the deputy administrator, you know. It was one of the issues that he wanted us to, you know, to capture exactly when was the military notified, and I just--again that's why I remember Jeff Griffith being--I thought he was in touch with the military, but I just remember an effort to take what we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

had--what we, the FAA--had from an air traffic perspective and then, you know, and then see what the military had, you know. Again just trying to piece together the story, piece together the chronology.

I don't remember a debate. The only thing I remember was some--perhaps some reaction to--it seemed that NORAD put a press release out about the notification issue that I believe caught the FAA by surprise. So I remember some--I just remember that, and again, you know, the issue as I recall it was simply to try to--it was one of those things that we knew. We knew that the press would ask the questions. We knew at that the Congressional hearings this would probably be covered and, you know, it was just an issue of trying to make sure that what we got was accurate, what we had was accurate.

MR. KARA: Let me ask you this in the terms of--there's a lot of staff action work going on obviously. Jeff's doing contact with the military, and you're getting information that comes

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in, and then you probably had a couple of desk sides with the deputy in terms of where you were and what the final product. Do you recall anything he said at those desk sides or more guidance that you got?

MS. FREEMAN: I don't remember other than, you know, let's nail down exactly when, you know, when was the military notified.

(Intervening matter.)

MR. KARA: In your discussions with the administrator and the deputy administrator, and with Jeff and Dave Kenols and everybody else, was there a discussion about what constituted notification to the military?

MS. FREEMAN: No, I don't remember that discussion in particular, no.

MR. KARA: Were the roles of either Colonel Cheryl Atkins or the Air Traffic Services cell at the Command Center part of the discussion of what might have been notification to the military?

MS. FREEMAN: If so, I wasn't involved in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that.

MR. KARA: Your personal position, you were a senior staff person here and you were tasked directly with the responsibility by the administrator to prepare her for Congressional testimony. Did you think in that direction? Did it pop into your mind that notification to Cheryl Atkins might have constituted notification to the military?

MS. FREEMAN: No, I remember being made aware that we had some military liaison or whatever. I'm not sure exactly what the position is, but we had some military people at the Command Center. I remember being made aware of that when we were meeting together--

MR. KARA: There's not a military cell at the Command Centers. There's an Air Traffic Services cell, and that Colonel Zirvanik and Lieutenant Colonel Cherry. In addition to that, then you have the military cell here which is Colonel Atkins, and I think each of the four services is represented.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And we really asked you to search a little bit with us on this because we had been told by some people we've talked to that they thought notification to the internal military structure within FAA was sufficient to be determined as military notification. We're just trying to flush that out a little bit with you.

MS. FREEMAN: I mean all I can say is that what we focused on was--when I was piecing this together, we focused on notification to NORAD.

MR. KARA: To NORAD.

MS. FREEMAN: So I mean I don't recall capturing--

MR. KARA: Hence therefore, if I could just follow that line of thought, hence Jeff's discussions with the military of which you were aware, and hence FAA's corporate surprise at the NORAD time line when it was published on 18 September, 2001.

MS. FREEMAN: Right.

MR. AZZARELLO: Was there a discussion, sort of going over the issue of--let me step back

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

from that for a minute. There was the Congressional hearing in October that the administrator needed to be prepared for. Were there any events prior to the Congressional hearing? For example, any meetings with the White House administration that the FAA would have to attend and explain the same type of issues to the administration in terms of what the FAA knew, when and when they told the military on 9-11?

MS. FREEMAN: I was not involved in that, so I just don't know.

MR. AZZARELLO: I think there was--I've seen reference to a meeting I think on--perhaps even on the 17th of September I think, a White House briefing, and in fact, we were told by I think at least one witness that that might have been the summary that we showed you that might have been also the document used in the briefing of the White House. Are you aware of that?

MS. FREEMAN: I'm not. I just don't know. I wasn't there.

MR. AZZARELLO: So to the extent that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there was a White House briefing the week after 9-11, it would not have been one you attended?

MS. FREEMAN: No, no.

MR. AZZARELLO: If it involved what the FAA knew when and when they told the military about it with regard to the hijacked aircraft, would you expect that you would have been told about that meeting if the administrator or the deputy administrator had briefed the White House on this?

MS. FREEMAN: No, not really, no.

MR. AZZARELLO: You wouldn't even know that was one of the projects of the briefing book in preparing for the Congressional testimony?

MS. FREEMAN: I mean I would not have necessarily known about a meeting with the White House. I was focused on putting together a Congressional briefing book, and to the extent that there were other meetings, other briefings going on--

MR. AZZARELLO: Yeah, but my specific question is to the extent that this subject matter of your briefing book was going to be addressed at

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a White House meeting prior to the Congressional hearing, would you expect that you might be consulted on that or asked to provide the administrator or the deputy what you had on that issue in your briefing book?

MS. FREEMAN: If it had been my briefing book, but again this was not my briefing book. This is not the briefing book we put together for the Congressional hearing.

MR. AZZARELLO: Okay, put that aside. One of the issues that I think--of interest to the deputy administrator, military notifications. You don't know if they notified with--

MS. FREEMAN: Yes.

MR. AZZARELLO: And you indicated that yourself earlier, and would you agree that that issue probably would also be one of interest in the Congressional hearings that the administrator went to?

MS. FREEMAN: I would assume so, yes.

MR. AZZARELLO: And in fact, would you agree though that issue also was one of the issues

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that you were asked to address it, oversee addressing it as part of the briefing book that was being put together?

MS. FREEMAN: Yes.

MR. AZZARELLO: So if that issue came up prior to the need for the briefing book for Congressional hearing, if the issue of military notification came up, then that was an area you were asked to look at if it came up, and prior to the Congressional hearings and the White House meeting. I mean maybe my assumption is that they would come to you and ask you for what you have on that because it was an issue you were looking at for the Congressional hearing.

MS. FREEMAN: Again, you know, I don't know. I mean not necessarily. There were a lot of people working on a lot of things, and I was getting--I was sort of the intermediary. I was getting all the information from Air Traffic, so, you know, I would have assumed that they would've included people from Air Traffic, you know. I was just pulling the stuff together, but I would not

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

have expected that I would have been there.

MR. AZZARELLO: You wouldn't have--

MS. FREEMAN: Or known about it.

MR. AZZARELLO: Or known even about it.

MS. FREEMAN: Yes.

MR. AZZARELLO: Well, would it--

MS. FREEMAN: And I'm not saying I did or I didn't. To be honest with you, I really don't remember that there was a meeting with the White House, but I just don't remember.

MR. AZZARELLO: Well, wouldn't that have been sort of an event that might have stuck out in your mind if there was a White House meeting suddenly if you were asked to prepare the administrator or the deputy administrator for?

MS. FREEMAN: If I had been asked to prepare them for that meeting, yes, I would have remembered it.

MR. AZZARELLO: So it's fair for us to conclude then that you don't believe that you were asked at all to prepare either one of the--either the administrator or the deputy administrator for a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

White House briefing?

MS. FREEMAN: I don't remember that. I don't remember it, so I think that would be fair.

MR. AZZARELLO: Okay. You said earlier I think that you remember seeing that piece of paper. Maybe it was a press release from NORAD. And there was something on it, I think you said that something that came as a surprise to the FAA people or officials because of what NORAD had on there. Something that caught your attention--

MS. FREEMAN: No, no. The only thing that I think caught people by surprise was that NORAD put the press release out.

MR. AZZARELLO: Oh, the fact that they put it out, not anything in it substantively?

MS. FREEMAN: No.

MR. AZZARELLO: Why did that catch FAA by surprise if they put it out?

MS. FREEMAN: I don't know. I don't know. It just seems--I have a recollection that it seemed like it was early. You know, we were still trying to piece together who said what to whom when, and,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you know, when we learned that NORAD had put out a press release.

MR. AZZARELLO: So what was the nature of the surprise? Was it that you didn't--

MS. FREEMAN: The timing.

MR. AZZARELLO: I mean you were still putting together--you, the FAA--were still trying to piece together what happened.

MS. FREEMAN: Yes.

MR. AZZARELLO: So was the surprise that the NORAD press release was out time-wise meaning that you're surprised that they thought they had had a definitive--

MS. FREEMAN: So soon.

MR. AZZARELLO: So soon. A time line to issue, and I would imagine that when they did, that one of the things that--not you personally--the people working on the issue of military notification might want to take a look at what they said that you told, you the FAA, told them, right?

MS. FREEMAN: Yes.

MR. AZZARELLO: And so this is the press

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

release we just got, if that looks familiar. That came out on September 18th, so a week after the attacks? Does that look like the document that somebody might have shown you?

MS. FREEMAN: Yeah, it looks somewhat familiar, yeah.

MR. AZZARELLO: Well, could it have been one of the direct forms of that? Could it have been a draft form of that, even maybe over that weekend? The weekend after the attacks?

MS. FREEMAN: You know, it could have been. I'm sorry. I just don't remember.

MR. AZZARELLO: And I only asked you that question with a particular interest because you said it didn't have--the paper you saw didn't look very official at all.

MS. FREEMAN: No, right.

MR. AZZARELLO: And I guess it would be opinions on whether that was official or not.

MS. FREEMAN: This looks official to me.

MR. KARA: Yeah, but it didn't say this piece of paper.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. FREEMAN: No, yeah.

MR. AZZARELLO: So the document you believe you saw you think looked less official than this?

MS. FREEMAN: Yes, I believe that that's the case.

MR. AZZARELLO: Okay.

MR. KARA: Did the NORAD position in addition to the timing of it, they issued it so soon, did the position they took on any of the four aircrafts cause concern or catch you by surprise here?

MS. FREEMAN: No. I mean I seem to recall somewhere--in fact, in that chronology you just showed me. I seem to recall that we had something about 8:38 notifying, calling NORAD and they had 8:40. So I remember that was the only one I remember.

MR. AZZARELLO: If I could refer you back to the notifications to the military, which is the FAA document that they gave us, dated September 20th? Do you see 8:40 where it says Needs log

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

indicates Boston Center notified regarding American 11?

MS. FREEMAN: Yes.

MR. AZZARELLO: This is one of the logs from Neads that I showed you earlier that you don't believe you saw, but I just wanted to note something for you here. At 12:40, they have Zulu times, so that would be 8:40 Eastern time, possible hijack of American Airlines Flight 11. We believe that whether it was the FAA who drafted this notification to the military list was looking at, was referring to when you look at this Neads log here because it is in fact the Neads log from the Operations floor, and in fact the times match exactly. But to the extent that somebody had the Neads logs available to the review here at the FAA, it wasn't you directly but it might have been someone beneath you. Is that correct?

MS. FREEMAN: I don't remember seeing something that looked like this. I do remember seeing something that looked like this, and it's possible that the reference to Neads logs refers

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to, you know, something more official like this than this.

MR. AZZARELLO: Than this.

MS. FREEMAN: Yeah.

MR. AZZARELLO: 8:40 is the NORAD press release list as the FAA notification to Needs?

MS. FREEMAN: Yes.

MR. AZZARELLO: If you drop down to United 175, they put 8:43 as the notification time to Needs. Do you see that?

MS. FREEMAN: Yes.

MR. AZZARELLO: That's the September 18th release by NORAD. If you look at the log from Needs, there's no 8:43 a.m. entry at all there. And this is the notification to the military drafted by the FAA on September 20th, 8:43 a.m., and you see the FAA perspective on that is that the New York Center asked the military liaison specialist at New York Center to get military assistance. Then it says paren's "we believe this is still related to American 11, but it may be the source of the NORAD press release showing 8:43

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notification regarding United Flight 175."

MS. FREEMAN: Yes.

MR. AZZARELLO: It says New York Center was working UAL 175 at that time, but everything was still normal. In fact, that's something that would be borne out by the review of the controller tapes and the radar data that we think in terms of the transponder being on and communications--and not being able--no indication of a hijack at that point.

MS. FREEMAN: Yes.

MR. KARA: Let me interject this at this point now. The press release says 18 September, so clearly you had this almost in realtime, or at least FAA did--in realtime. This informal document that we've been looking at, and we now have two copies of it in front of you, is two days later on the 20th of September. Do you recall the administrator, the deputy administrator or yourself, asking somebody to sort this out? Can somebody please take a look at this and tell us why this is so? And this might lead to the kind of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

language that John just read to you here as--

MS. FREEMAN: Yeah, it's possible, and I have to tell you the more I look at this, the more this sounds like my language.

MR. AZZARELLO: So you mean that you might have drafted it yourself?

MS. FREEMAN: Yeah, I might have. You know, now as I look at it, I just--

MR. KARA: This is how you would've explained a different set of rows and you were asked to take a look at it by the deputy administrator or the administrator.

MS. FREEMAN: Yes.

MR. AZZARELLO: I mean I don't know who, you know, people that we were interviewing at the FAA were making suggestions as to who they think had a role, and they felt some part that you drafted there, the notifications to the military, but certainly in a general sense, you're stepping back and who drafted that document. For a minute it would certainly strike us and seem to us that if the administrator is going to go on the Hill under

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

oath and tell Congress and perhaps maybe the rest of the world what the FAA's position is, when they notified the military of each of the four hijacked aircraft. And before that happens, the military comes out and says well, this is when we say the FAA told us that the aircraft were hijacked.

It would certainly appear to be a great--an issue of great interest and concern for the FAA administrator to want somebody to look at those times and say well, are they accurate, do we think they're accurate because there's only--you know, the possibilities are if you don't agree with NORAD, well, then those two entities are going to be saying something different to Congress and then there's a debate on who's right or who's wrong, or is there a, you know, a right time or a wrong time, or if there's an agreement on it, and there's not an issue. And certainly to the extent that there is not an agreement, and there are times where there's not agreements, we would expect that to have generated some discussion or a debate within the FAA, and we wanted to know your recollection of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that as it pertained to the hijacked aircraft.

MS. FREEMAN: Yeah, again I don't remember the issue of a debate, but I do remember as you accurately pointed out that when NORAD came up with its times, that, you know, I remember I believe the deputy administrator saying let's look at our times, which we were already looking at. Let's look at our times and let's compare them to the times that NORAD had. Let's see if there are any inconsistencies and, you know, try to--I do remember looking at that.

MR. AZZARELLO: I want to see another entry on the second flight, by the 175. This is taken from the FAA summary of hijacked events dated September 17th. It says 6:30 a.m.

MS. FREEMAN: Yes.

MR. AZZARELLO: AAT20. I'm at 175. It says "9:05, Northeast Air Defense Sector Needs log indicates they were notified by the FAA of the events concerning 175." Again going to the Needs track log at 9:13:05 Zulu, which is 9:05, "United 175 possible hijack." Again this appears to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

be--this Neads log appears the one that's being referenced in the FAA summary on the time of notification of United 175 just as it appears to be on the American 11 at 8:40.

Did it come to your attention then in conjunction with putting together a briefing book as it related to the issue of military notification that here you have a document dated September 17th, which is the day before the NORAD press release where the FAA takes the position that NORAD was notified by the FAA, or Neads was, at 9:05, and then a day later, NORAD's press release comes out and it says 8:43 the FAA told NORAD or Neads about the second hijack.

MS. FREEMAN: I believe--my recollection--I believe that's why I started to remember that as I said it sounds like my language. I believe that's why I included this statement in here. In other words, 8:43 is what they had in their press release, and when we looked back at the whole air traffic chronology, you know, it appeared that 8:43--the only thing we could find was that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the New York Center had asked the military liaison specialist in New York Center to get military assistance. But frankly my recollection, at least from my point of view, I couldn't figure out where they, NORAD, had gotten 8:43.

MR. KARA: Where they got 8:43.

MR. AZZARELLO: On that issue, on 8:43, would you have--because we've listened, you know, to all the tapes in New York. We've looked at records. We can't seem to pin that to a data point. Would you have had some backup documentation, direct papers, or logs from the New York Center or something that you would've--led you to believe that that's what's generated?

MS. FREEMAN: Oh, I'm sure, yes. I'm sure that there was something from the New York Center.

MR. KARA: Do you still have your backup materials for this?

MS. FREEMAN: No, but--no.

MR. AZZARELLO: Did you turn them over to somebody?

MS. FREEMAN: No, I mean--and I hate to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

draw yet another--but I would say you might get that from Jim Slate. I think again Jim Slate was the one who was bringing me all the--

MR. KARA: And he commuted up and down from the tower. Did he camp out here permanently for the next few days?

MS. FREEMAN: Yeah, I think he camped out here.

MR. KARA: Let me ask you this on this very point, and you sort of confessed to being the author here so let me--

MS. FREEMAN: I believe, you know, now that I look at it.

MR. KARA: There's two ways you can go, and I'm doing this hypothetically here. As FAA and speaking for the administrator here, you could try to assist NORAD in understanding why they've made this error, or you could simply have said we can't support this. Did you think about taking that point of view as opposed to--

MS. FREEMAN: It wasn't my position to do that. And again, there were discussions that were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

taking place between the deputy administrator and Jeff Griffith and Air Traffic that I was not privy to a lot of discussions about this issue.

MR. AZZARELLO: Can we take a look at the next one then? Do you have anything else on--

MR. KARA: No, because you're going to segway right into another one of these.

MR. AZZARELLO: American 77, they have 9:24. Do you see the FAA notification dates?

MS. FREEMAN: Yes.

MR. AZZARELLO: That's in the NORAD press release and the FAA summary that's dated the day before that press release. On American 77 at 9:24, it says the Great Lakes Regional Operations notified the Washington Operations Center of the simultaneous loss of radio and radar. It doesn't say anything about notifying Neads or NORAD or any component of NORAD.

I don't want you to have to take my word for it, but if you page through these two or three pages and I think what you're going to see when you're done is that there is no time listed under

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

American 77 at all for notification from the FAA to the military, which seemed to me like that might be a significant issue that you might recall something about in terms of, you know, preparing your administrator to go and appear and testify before Congress if there was no notification at all or if there was--whether it means that there was none, or that there wasn't an ability to determine it. But it seems like it would be an issue that might have been discussed beforehand.

MS. FREEMAN: No, I mean again we tried to capture what we had in these chronologies, and where we had nothing other than the Neads logs--we, I'm saying we, FAA--Air Traffic, you know, for the most part they indicated it. Why they didn't indicate it for American 77, I don't know, but I mean other chronologies say the Neads logs indicate such and such. I don't know why this one did not include that.

MR. AZZARELLO: Is there anything on that last one?

MS. FREEMAN: The 9:24 is the Great

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Lakes--the Regional Operations Center notifying Washington Operations Center. So I don't know why they didn't include that.

MR. AZZARELLO: And then in the log which it appears was available to somebody, to the FAA, at 9:34, it says "American 77 flight to LA lost, unable to locate." So in terms of some data pointing available in the Neads logs which were referenced earlier on 11 and 175, but in the FAA in its very own brief does not reference the entry of 9:34 of FAA telling Neads that 77 was lost. They were unable to locate it. Do you remember any discussion about that?

MS. FREEMAN: I do not recall. I don't remember any discussion.

MR. AZZARELLO: And then I guess lastly is United 93. This is United 93. There's no notification time listed in here by the FAA and its summary of events. If you look at the Neads log, the first time that the call sign--there is a United tail number that appears at 9:16 here, but this is a tail number of 175. And the only

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

reference to United 93 is 10:07, bomb on board UAL 93 over Pittsburgh, and there's a note 3 listed. 10:07. Do you have any insight on why that wouldn't have been included in the--

MS. FREEMAN: In the chronology?

MR. AZZARELLO: Yeah, in the FAA one?

MS. FREEMAN: No, I don't know why it wouldn't have been. I mean it's like look at the NORAD press release, you know, look at their footnote here, you know. The FAA needs to establish a line of open communication discussion both American 77 and United 93. So I do recall--the only thing I do remember is that the Washington Operation Center had, when they set up the net, you know, I know that NMCC was on the net, so I mean at some point the information was flowing--

MR. KARA: And this should come back to the notes you've written here on the 9:26 time of a possible explanation?

MS. FREEMAN: That would have been it.

MR. AZZARELLO: Does that look like

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

something in your language there?

MS. FREEMAN: Yeah, that looks like something I would've said. Again, you know, I must have been trying to explain where the 9:24 came from, and--

MR. KARA: It's the evidence you had--

MS. FREEMAN: At 9:26, our net log showed--

MR. KARA: Yeah, but let me ask you this. This piece of paper we have stops at 9:26. Is it possible that there was a second sheet of paper and we only got one piece where you also talked about 93 later on at the 10:07 time and then we just didn't get it?

MS. FREEMAN: I don't remember.

MR. KARA: Any recollection at all that it was continued?

MS. FREEMAN: No, I don't recall that.

MR. AZZARELLO: If that's the FAA position that there may have been an open line established to discuss 77 and 93 that was going on at 9:24, then do you have any explanation for why it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

wouldn't be here in the summary of hijacked events?

MS. FREEMAN: The only explanation would be that this was prepared by Air Traffic, and the net logs were logs that belonged to the Washington Operation Center, so, you know, the only explanation I could offer is that perhaps the Air Traffic people who put this together were focused on air traffic communications.

MR. AZZARELLO: Would that be an issue you'd want to bring to the attention then of the people who put this together to tell them to update it if you found information to indicate that there was an earlier notification?

MS. FREEMAN: Not necessarily. I mean I--there were, you know, different sources of information and this was Air Traffic's chronology that they put together. I certainly didn't want to feed them or put words in their mouth. I mean this was what it was that they put together, and, you know, this was something that if I put it together, which I believe I did, was something where I tried to pull all these pieces together from different

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

organizations, with different organizations.

MR. AZZARELLO: But then it's not a great concern that this document might be different--this being the September 17th one--but I'm having a difficult time understanding what it was you were comparing the NORAD press release to that prompted you to grab two days later the list of notifications to the military. I mean you couldn't have been looking at just in a vacuum the NORAD response times, which noted FAA notification to the military. You must have had some document next to that where the FAA took a written position or formal or informal and draft or not, you know, final that said this here, this is what the FAA says--

MS. FREEMAN: Well, it was several documents, so I mean some of it was the Washington Op Center net logs. Some of it was information from Air Traffic, such as the information from the New York Center.

MR. KARA: Do you remember this document, the chronology of events on 9-11 and the note at

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the top is Tracy, and we understand that's Tracy Pettcrom from ARC, and then simply you come down here to pick up the--you're looking at your 9:26, you could come down here to pick up the Secret Service and MCC times. You can pick up 9:24, A77 disappeared from radar, and look at it. This sort of mirrors the language you had here, and I thought this might have been something that your referred to or was prepared for you.

MS. FREEMAN: Yes, possibly.

MR. KARA: Who's Tracy?

MS. FREEMAN: Tracy represents the regional organization, so here in Washington--or she did--she represented the Regional Operations Centers, and she was on my team.

MR. KARA: She was on your team.

MS. FREEMAN: Yes.

MR. KARA: And when you'd show all of the ROCs and the information they had, as you're preparing the testimony information about the ROCs where they--Tracy and then come into you because she was a member of your team.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. FREEMAN: Yes.

MR. AZZARELLO: Yeah, that 9:24 entry that when Tracy logged, it just says the WOC received report from the Great Lakes Region regarding 77 disappearing from air. It didn't say anything about sharing it with the military or any open line.

MS. FREEMAN: No, you're right.

MR. KARA: Except that, John, just for the record, if you look at the entry above--

MR. AZZARELLO: It says 9:20, Washington--FAA Washington Op Center sets up primary net including NMCC. It says 9:20. DOJ 9:23, Secret Service, 9:22, and there are other times for CIA, FBI, DIA, DOS and the White House, 9:29. But it doesn't indicate what if anything was communicated. Said setting up program. It doesn't indicate what if anything was communicated on that line. Is that fair to say?

MS. FREEMAN: That's fair, yes.

MR. AZZARELLO: So you're not quite sure what you were comparing those NORAD press releases

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to in terms of notification times, but you don't think it was the summary? At least part of the summary that Air Traffic put together with chronology the day before?

MS. FREEMAN: I'm sure it brought it from--it was summary from Air Traffic. The summary, you know, it was net logs from the Washington Op Center, and, you know, it--

MR. KARA: Let me come back to this issue a second because embedded in here are entries such as Neads logs shows. Could this be an indicator that it was Tracy that was looking at the Neads log to make these entries? Do you recall?

MS. FREEMAN: I don't know.

MR. KARA: Okay, and if you go to the second page, she also has Neads log shows FAA reporting American Air 77, 9:24 here.

MS. FREEMAN: I don't know which came first. Maybe this one came first. I just don't know.

MR. KARA: Okay.

MS. FREEMAN: I just don't know where she

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

got that from.

MR. AZZARELLO: In order to come to a conclusion in the September 20th draft that you put together, would you have wanted to see some documentation that substantiated it, and particularly if there was a difference between what was in the NORAD press release and what the Air Traffic people were saying? Like how would you resolve that? What--

MS. FREEMAN: Well, yes, how I would've resolved it was just to report the facts based on data that I had. So as you can see, you know, where the source was, the Needs or NORAD press release, you know, then I said Needs logs show FAA notifying them regarding American 77. I did not say FAA notified them regarding American 77 because I didn't have any documentation to go by.

MR. AZZARELLO: I'm trying to figure this out. On 9-26, your one-page note, you say FAA net logs. I guess the FAA--you say net logs. Are you referring to primary net?

MS. FREEMAN: Must have been I think.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Washington Op Center.

MR. AZZARELLO: They show a discussion of two airplanes hitting the World Trade Center, both possibly American flights, one out of Boston and one out of Dulles.

MS. FREEMAN: Yes.

MR. AZZARELLO: And then--I don't know if you knew it on the 20th, but--at this point--they weren't both American. One was a United out of Boston and out of Dulles.

MS. FREEMAN: Yes.

MR. AZZARELLO: And it says "this may be the source of the 9:24 Neads entry." And that says "NMC and Secret Service on the net, 9:26." Do you know what data plan you used--did you confirm that they actually were on the net, and if so, how'd you do that?

MS. FREEMAN: I don't know if--

MR. AZZARELLO: Tracy. Here's the Tracy one. Tracy's log or chronology. She's got two entries logged into NMCC. One is at 9:20. It says "the Op Center sets up primary net including NMCC,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

9:20." 9:24, nothing there on NMCC. Nothing at 9:26.

MS. FREEMAN: Right.

MR. AZZARELLO: I mean just to put it bluntly, you know, we're not trying to play any games or anything. We certainly don't see any evidence that the NMCC was on any primary net or any communications with the FAA at that time.

MS. FREEMAN: Should be if there are logs or the Washington Ops Center. That should be in the log.

MR. AZZARELLO: Should be in their logs--

MS. FREEMAN: I mean if you have it here, Washington Op Center sets up primary net including NMCC at 9:20.

MR. AZZARELLO: Now that's separate. When you say Washington Ops log, that would be separate from the chronology that the WOC put together, wouldn't it, or not--

MS. FREEMAN: I would think so. I would think this was probably done after the fact.

MR. AZZARELLO: Do you know if anybody

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

checked to see if the NMCC was actually on any primary net, or in any communication with FAA regarding--or at that time without getting into what was said? Did anybody even try to confirm where they are, or would they just try to call them then and there was no--we couldn't get through?

MS. FREEMAN: I don't know the answer to that whether somebody confirmed that, you know, it was--that's what the Washington Op Center logs showed is that they were on there, but I don't know if anybody called back to confirm that they in fact had been on there.

MR. AZZARELLO: Okay. It's a difficult area to explore then if you don't know what source was relied upon, but if the administrator was going to appear before Congress and say, for example, take a position specifically on when the FAA notified the military about a particular flight, like 77 or 93, and she was relying on some entry in her log that it was an open net, an open primary net, and the NMC was believed to be on it, is that the kind of documentation that in your view would

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

be sufficient to put in the briefing book and tell the administrator that she could feel comfortable that to know if they were notified, or would you want to actually have somebody listen and make sure that a, the NMCC was on the net, and that b, they were asked information about those flights, that they were notified that they were hijacked, those particular flights?

MS. FREEMAN: Well, I mean the statement is they were on the net, and if the net logs showed that they were on there, I would've felt that that was sufficient.

MR. AZZARELLO: Just that the NMCC was on the net, and the log showed they were on the net?

MS. FREEMAN: Yes.

MR. AZZARELLO: You think that would be sufficient. You wouldn't--necessarily to see if somebody listened to it to see if actually that information was passed regarding those flights?

MS. FREEMAN: I personally would have trusted the logs.

MR. AZZARELLO: Well, I'm drawing a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

distinction though between the log entry that says FAA, you know, notified AA 77 hijacked, or FAA notified UA 93, bomb on board on primary net at NMCC on. That's one scenario, okay, and I would tend to agree with you there that if you saw that in the log entry, you know, maybe you could take that at face value and expect that that was done.

But if that's not what you see in a log entry, I'm drawing a distinction, if what you see is a primary net activated, NMCC, 9:20. And then a subsequent entry that just says, you know, American Airlines--for example, Op Center received information from the region regarding 77. Disappeared from radar. Use that as an example. Now that doesn't tell me that the NMCC--at least me on its face--that the NMCC was told that over the primary net. It tells me that the WOC received that from the region, okay.

And another example is you might see something come in from the field facility level to the region or to the ROC about them reporting it, you know, hijacked flight, but that doesn't tell

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you that it was then relayed to the NMCC. And that's what I'm getting at. Like what level of log entries would you deem, you know, sufficient to rely on to then say, okay, notification was given on United 93? Let's use that as an example. Would you expect to see in the log entry that NMCC notified a primary net or words to that effect that the notification went to the NMCC about that particular flight being hijacked?

MS. FREEMAN: I think I would expect to see that.

MS. KARA: John, let me--as of this afternoon, we've got another version of this log. Actually not of that log, of the WOC log. Yeah, that one, and this one, which says a note at the top, an Excel crisis log, 9-16-01, which would be five days after. This would be the version five days later. We have an earlier version which has a couple of 9-20 entries. The 9-20 entry says primary net requested and activated by ACO, and above that, NMCC notified and in parentheses Major Chambers, and then these are handwritten notes that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

explain these two entries. And I'm enlisting your help here. I'm taking from this that this, which is the same version John just went over with you, it's a polished version of this. Does that make sense, or am I taking a leap in logic?

MS. FREEMAN: I believe that--you say--

MR. KARA: Well, I haven't gone line for line, but it appears to be.

MS. FREEMAN: Okay. I believe this is the Op Center, Washington Op Center log for lack of a better term.

MR. KARA: Right.

MS. FREEMAN: And I believe that this was an attempt to put together what the Regional Op Centers logs said and the Washington Op Center.

MR. KARA: So this chronology itself is not the log. This is the underlying log of all of the notification times.

MS. FREEMAN: I'm not sure. You'd have to ask--

MR. KARA: Right. But to conclude our conversation, this is the day of log or the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Center--

MS. FREEMAN: The Washington Op Center.

MR. KARA: And this is the chronology later on perhaps the 16th derived from that log.

MS. FREEMAN: Well, I think this is just Washington Op's Center--

MR. KARA: Right, and this is multiple sources in chronology.

MS. FREEMAN: This is the--Regional Ops Center.

MR. KARA: Good, because you mentioned the region, and that brings in Terry Pettcrom word or Tracy Pettcrom's word.

MS. FREEMAN: Yeah, I have to apologize, but--

MR. KARA: You got to go someplace?

MS. FREEMAN: I have to go pick up my daughter at school before it closes, and I'm already running late. If there's something--

MR. AZZARELLO: Maybe if we could come back next week for some other interviews. I don't know if you're available for a half hour say, we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

can pick up whatever times to interview. We'll be here next Tuesday and Wednesday. So maybe if we can steal a half hour from one of those days.

MR. BROWN: I thought some of those are going to be--

MR. AZZARELLO: Oh, that's right--

MR. KARA: Well, we'll just start early. We'll come in early. Whatever we have to do because there are a couple of critical things that flow into 2002, 2003 that we need to talk you about.

MR. BROWN: We might be out here Thursday because we have some people coming for other things--so maybe Thursday even, if next Thursday would be good for you for a half hour or something.

MR. AZZARELLO: One quick question I want to ask you. Did you have any involvement in preparing any administrative--for the testimony before our commission, the 9-11 Commission in May, 2003?

MS. FREEMAN: No.

MR. AZZARELLO: You didn't brief her or

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

prepare her in any way for that?

MS. FREEMAN: No. I'm sorry. When was that?

MR. AZZARELLO: May of 2003.

MS. FREEMAN: No.

MR. KARA: And just one follow-on question for the record. Did they enlist your support because she had mis-spoken on notification times? Did you get involved in correcting the record on that?

MS. FREEMAN: In May--

MR. KARA: In May of 2003.

MS. FREEMAN: No, no. I was on--the reason I ask you the date, I was on detail at that time to the Department of Homeland Security. So I wasn't here.

MR. KARA: Okay.

MR. AZZARELLO: Okay. We have a little bit more. Hopefully we can get together for maybe a half an hour maybe. Thanks.

MR. KARA: We're concluding the interview to be continued with Darlene--

SWORN INTERVIEW OF

DARLENE FREEMAN

BY

SPECIAL AGENT JOHN AZZARELLO

SPECIAL AGENT JEFF BROWN

SPECIAL AGENT MILES KARA

BROOKE LEWIS, FAA

Tuesday, April 20, 2004

[TRANSCRIPT PREPARED FROM A TAPE RECORDING.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I N T E R V I E W

MR. AZZARELLO: It's Tuesday, April 20th. I'm losing track of days. Tuesday, April 20th. We're at FAA headquarters. We're about to begin an interview with Darlene Freeman of the FAA. This is actually our second interview with Darlene. Our last one was abbreviated before we concluded. It's John Azzarello, 9-11 Commission, Team 8.

MR. BROWN: Jeff Brown, 9-11 Commission.

MR. KARA: Miles Kara, 9-11 Commission.

MR. LEWIS: Brooke Lewis, Chief Counsel's office, FAA.

MS. FREEMAN: I'm Darlene Freeman.

MR. AZZARELLO: Thanks for taking the time to meet with us again. Just a question that I had before we start actually I guess on preparation that you might have had before today's meeting. My colleague, Miles Karas, said that when he had stepped out before moments ago, he saw Monty Belger on the 10th floor hallway. We're right now on this floor and we have just interviewed right before you today. And you know Monty's no longer an FAA

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

employee. We were curious if you met with Mr. Belger prior to coming to this meeting today.

MS. FREEMAN: I happened to see him in Shirley Miller's office five minutes before coming here, but it was just a social--said hello to him.

MR. AZZARELLO: You didn't have any discussions with Mr. Belger regarding the content of the interview he had with us?

MS. FREEMAN: No.

MR. AZZARELLO: Okay. I want to see if we can sort of focus in on a particular issue that I think we were talking about last time, that obviously we had spoken to Mr. Belger about because he was involved in it, an assignment that you had, or task you were given by Mr. Belger, I believe, to compare information that you were able to gather with the assistance of others obviously, what the FAA knew and when they knew it regarding each of the four hijacked aircrafts on September 11th. Is that correct?

MS. FREEMAN: Yes.

MR. AZZARELLO: One of the things you were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

asked to look at--

MS. FREEMAN: Yes, I mean I would actually say that what he asked me to focus on was, you know, was the issue of when the military was notified more specifically.

MR. AZZARELLO: The issue of when the FAA notified the military after each of the four hijacked aircrafts?

MS. FREEMAN: Yes.

MR. AZZARELLO: Okay. Did he give any further I guess guidance or instructions as to what he wanted you to look at?

MS. FREEMAN: Not really, no.

MR. AZZARELLO: Did he also want you to look at what the military said they were told by the FAA and when to the extent that documentation existed?

MS. FREEMAN: Yes.

MR. AZZARELLO: Tell me about that.

MS. FREEMAN: I seem to recall that at some point the military put out a press release. It was either a press release or it was a newspaper

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

article. I can't remember which I saw first, and so one of the things--we were already looking at the issue of when did the FAA notify the military. So one of the things that he asked me to do was to look at--now that we had the times the military were saying they were notified--to look at those and see, you know, how they compared to the times that we were showing in our records that we notified them.

MR. AZZARELLO: Okay, so there was a military release regarding notifications, and he wanted you to compare that against FAA's universe of information on notifications and see if there were any discrepancies in comparison?

MS. FREEMAN: Correct.

MR. AZZARELLO: Is that a fair characterization?

MS. FREEMAN: Yes, that is.

MR. AZZARELLO: I don't know if we showed you this last time. I think we did. This is a copy. We have a photocopy of a NORAD press release dated 18 September, 2001, and as far as we know,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it's the only--certainly the first and earliest and we think only press release by NORAD regarding the notifications of the four hijacked aircraft on September 11th. Does that look like it's the document that you were--

MS. FREEMAN: Yes, it does.

MR. AZZARELLO: And I think last time we were also looking at this FAA document called "Summary of Air Traffic Hijack Events," and prepared under the direction of AAT20, and I think we established last time that was Dave Kenols' group.

MS. FREEMAN: Correct.

MR. AZZARELLO: And I think we looked at a separate chronology that they have in here in the FAA summary for each of the four hijacked aircrafts, correct?

MS. FREEMAN: Correct.

MR. AZZARELLO: And some of these do include a reference to a time for military notification. Is that correct?

MS. FREEMAN: Yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: I want to just take out two other documents that I think we will be referring to. One is a Neads log and then a one-page document. This one I'm pretty sure--yeah, we looked at this last time. If you recall it's notifications to the military. Just for the record, it was provided to us by the FAA in response to our request for documents. It's dated September 20th, 2001, and I guess just to sort of put it in time sequence for you, and I'm not suggesting that you saw them in this order, but I want to give you the sequence of the documents as we know them, at least on the face of the document to the time of them.

The FAA summary appears to have been--well, it's dated September 17th, 2001, 6:30 a.m., AAT20. Chronologically the next dated document we have is the NORAD press release the following day, September 18th, which would have been the following Tuesday after the attacks. The FAA-- certainly it would have been the Monday after the attacks. And then September 20th would be the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

one-page document notifications to the military. I think, and I don't want to inaccurately summarize this or paraphrase it, so you tell me if I remember this accurately. I think last time we were here, you looked at in particular on the September 20th notifications to the military, which is an FAA document, I think you looked at the 8:43 entry and thought that you might have drafted that because the language looked like language you may have used. Could you tell me if that's still your recollection and then maybe amplify that?

MS. FREEMAN: It's still my belief that I put this document together.

MR. AZZARELLO: Okay, the entire document. Was it only one page?

MS. FREEMAN: Yes.

MR. AZZARELLO: Okay, and I appreciate that clarification. I didn't know last time if we had gotten to the whole document, or if it was just that one part that you thought you drafted. And then the last thing I wanted to show you is the NCC. This is a log we did not get from the FAA.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

This we got in response to the request for information from the military, from the Department of Defense. I'll represent to you that it was told to us that this was the log from the Northeast Air Defense Sector. It's called the MCC, mission crew commander log, tech log, which is supposed to be a representation of some of the events that were occurring on the floor of Needs Operations on the day of September 11th, 2001. Had you ever seen this--did you see this Needs log from September 11th in connection with your work of comparing notifications to the military by the FAA on what the military had?

MS. FREEMAN: I don't ever recall seeing this document except when you brought it to my attention at the last interview.

MR. AZZARELLO: Okay. Didn't look like you thought you had ever seen it before the interview?

MS. FREEMAN: Did not look familiar to me at all.

MR. AZZARELLO: Okay. One of the things

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that I guess we know understanding that you did not--well, let's clarify. You did not prepare this summary of Air Traffic hijack events, correct?

MS. FREEMAN: That's correct.

MR. AZZARELLO: No part of it. Is that correct?

MS. FREEMAN: No. That's right, although I did review it. It was prepared for the deputy administrator's office, I mean, you know, I did--

MR. AZZARELLO: For your review, okay. Let's review it now and look at each flight and what it may or may not reflect on the military notifications. And this is obviously from the FAA dated September 17th, and I'm looking at FAA--I mean--I'm sorry, Flight AA 11, the first flight that we now know the first flight that crashed that day. There's an entry at 8:40 on the second page says, "Northeast Air Defense Sector logs indicate they were notified by the Federal Aviation Administration of the events concerning American 11."

Understanding you didn't see the MCC log,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I just wanted to point out so that you're aware of what we're looking at and what we think was referenced by somebody in the FAA. This is a Neads log, and as you can see at 12:40 Zulu, which corresponds to 8:40 a.m., the log states "Possible hijack AA 11 flight."

If you go to the second aircraft that is a chronology for that day, which is United 175, which was the second crash up in New York. At 9:05, there's an entry on the third page of the chronology again referencing Neads logs, and it says that "the logs indicate they were notified by the FAA of the events concerning 175." Now again if you could turn to the Neads log, it says "13:05 Zulu time," which is 9:05 a.m. It corresponds perfectly with the time "United 175, possible hijack, Boston to Los Angeles."

And so it would appear to us that somebody, whoever worked on putting this FAA summary together on September 17th either had access to the log itself or was given the information specifically from the Neads log on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

American 11 and United 175. Would you agree that it appears that way?

MS. FREEMAN: It would appear certainly.

MR. AZZARELLO: Any reason why it just--I just thought that one of the things you were looking at is, or one of the things you attest with examining is notifications to the military, and this is the realtime log from the military of when they received notifications. Any thoughts you might have on why you--was there any discussion about this document, this Needs log being in existence, of why you wouldn't have been privy to it?

MS. FREEMAN: No, no. I mean I recall tasking Air Traffic, specifically the AT20 organization, with developing the chronology and getting the information, and so it does not surprise me that I wouldn't have seen it directly.

MR. AZZARELLO: So you tasked the folks at AAT20 to get whatever documentation they needed to get to find out the universe of information on notifications, including whatever they needed to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

get from the military?

MS. FREEMAN: Correct.

MR. AZZARELLO: Do you remember if anyone came back to you and said that there was any problem getting any documents from the military because of the classification issue?

MS. FREEMAN: I don't remember.

MR. KARA: Do you hold a secret clearance--from at least a secret clearance? So the fact that the document in its original form was secret would not have kept it from you?

MS. FREEMAN: No.

MR. KARA: Okay.

MR. AZZARELLO: Did you know if--did Dave Kenols and the folks at AAT20--did Dave Kenols have secret clearance if you know?

MS. FREEMAN: Oh, I'm sure they did.

MR. AZZARELLO: Jeff Griffith recalled that the FAA did get this from Neads log. Did you ever discuss with him the fact that he knew it was a military log which indicated notifications?

MS. FREEMAN: I don't remember

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

specifically discussing it with him, but I do know that he was the person in Air Traffic--he was the person that Monty Belger or Jane Garvey tasked with getting in touch with the military, talking to them about, you know, about--whether it was about the logs or about the notification times, but Jeff Griffith was the primary who was sort of a liaison to the military. You know, he served in that capacity for the purposes of this tasking.

MR. AZZARELLO: I guess along the lines of that statement about Jeff being I guess the point of contact for the military, in his interview with us said that--in fact I think someone from AAT20 did too. I can't recall whether it was Mr. Kenols or Mr. Diggins--but there were at least two or perhaps more people who recalled that in the immediate days following 9-11 as the FAA was endeavoring to reconstruct the chronology of events on the four hijacks, and while the military they assume was doing the same, then why was this communication.

Now it was an item that was--I'm

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

paraphrasing, but clearly calling hotly disputed or hotly debated in the days that followed 9-11 that the issue that was hotly debated is who knew what when, vis-a-vis, the military and the FAA. And that the military was not on the same page with the FAA on when they were given information about the hijacked aircraft, with a particular focus on the last one, United 93. Were you privy to that or a part of any of these discussions or heated debates, or heated discussions and spirited debates?

MS. FREEMAN: No, I was not. I don't remember that.

MR. AZZARELLO: Do you remember if there was any one issue regarding notifications to the military that there was an agreement on between both sides?

MS. FREEMAN: Well, the only one that I remember, you know, was the 8:38 versus 8:40.

MR. KARA: And I think we talked about that the last time.

MS. FREEMAN: Yeah.

MR. KARA: And I would just pose the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

question on that one. Simply that it is defensible that the time was 8:38 and could have been defended from either side, either the NORAD paper that we looked at or your paper. And I'm just curious as to why ultimately when FAA's own time line came out later on that FAA adopted the NORAD position as opposed to simply establishing its own position on that.

MS. FREEMAN: On 8:38 versus 8:40?

MR. KARA: Right.

MR. AZZARELLO: Yeah.

MS. FREEMAN: It just--I think that given that some of our information was based on personnel interviews at the Centers, and I don't remember if this was one of them, but some of them were based on somebody at a particular air traffic center saying that they had done something. It just appeared to us that, you know, that the military--that perhaps the military had more official records of notification, and so if they said 8:40, some air traffic controller remembered calling them at 8:38. We sort of gave the military

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the benefit of the doubt. We assumed that perhaps their records were more exact and we thought, you know, well, maybe we should go with theirs, particularly since, you know, if anything it worked against us or--

MR. KARA: And for whoever was helping you in their own log here, they had put 8:40 as the notification time.

MS. FREEMAN: And perhaps that was it.

MR. AZZARELLO: Yeah, I guess what Miles is referring to is actually that is the--and you might not have known it, or maybe you didn't know it now or you didn't know it then, but there really was a call at 8:38, not just on the personnel statement. And we have both the Neads end of that call, a tape, as well as the FAA one. In fact, the FAA produced it to us in the aftermath of our document production.

And we do understand too that it was some of the things that the Air Traffic folks were pulling together in an effort to compile the summary, tapes of notifications and calls. So the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

call starts at 8:38 from the TMU desk where they call Needs. Now it might not have reached the log until two minutes later, but, you know, that's understandable at that time from the start of a call, process the information, and get it down on the log as near time possible--as near realtime as possible.

But I guess when you look at American 11, and you think about the question is there an issue regarding a discrepancy on notification, it certainly doesn't appear to be any--if there is an issue, it's a two-minute issue. And if you look at the military's saying well, our logs show us that the FAA told us about it at 8:40, and the FAA documentation or information shows that they believe they told the military 8:38. And the reality of it is that's when the call started. So it doesn't certainly appear to be an issue on American 11. Let's go to the second one that day, United 175.

And before we even look at anything here, I want to ask you independently, do you recollect

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there being any issue on the second aircraft, on United 175? In terms of discrepancy, beyond two minutes, something that's a significant discrepancy, and I'll describe it as being beyond 10 minutes.

MS. FREEMAN: No, I don't remember any. I do know that in the chronology that Air Traffic put together, they had an indication I believe it's at 8:55 that somebody--I think somebody overheard somebody at the New York Center. The controller in charge--

MR. AZZARELLO: Advised the Operations manager that she thought--

MS. FREEMAN: The CICD turned to the OM position and heard a request for military aircraft to scramble. That was at 8:55. I don't know what that means. I don't know whether that was specific to United 175.

MR. AZZARELLO: Or American 11.

MS. FREEMAN: Or American 11.

MR. AZZARELLO: Well, it's ambiguous from the 8:55 entry I guess, and as you said, it's a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

personnel statement, and we don't know if the controller in charge is hearing--if he or she is apparently hearing a request for military, but it's not there whether it's in response or with respect to American 11 or 175.

And what we have here is--they say 9:05 is--the military says is when they were notified of United 175 according to their logs, and again, you look at the log entry that coincides. 9:05 is 175. What do you have on your sheet that you prepared for notification to the military on 175? Do you have anything specific?

MS. FREEMAN: Well, I have the indication that the Needs logs show FAA notifying them at 9:05 regarding United 175, and then there's also this 8:43 entry, which again there was some confusion as to whether that was related to American 11 or United 175.

MR. AZZARELLO: How does that 8:43 entry--how is that affected if at all by the FAA summary that predates this September 20th one? The September 17th summary, it says that at 8:46 and 48

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

seconds that United 175's transponder code was changed, changed twice actually. And that the Air Traffic computers don't correlate either of those codes with obviously the call sign because that was an answered sign, beacon code. And then it also says--I'm reading ahead--the controller, it says, "Note, the controller communicating with 175 was also monitoring the flight track of American 11. Based on coordination received from Boston Center indicating a possible hijack, most of the controller's attention was focused on American 11."

And in fact, there's a five minute gap between I guess when the transponder code changes and when the next entry on the summary is, and that entry is that the New York Center controller transmitted to 175 quote--so this is from a transcript that appears from the New York Center. In fact, we've seen the transcript and the tape, so we can confirm that it is the New York Center controller who is controlling the aircraft. In fact, he's watching both aircrafts earlier, watching 11 and having 175 in the screen. He says,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

"Recycled transponder. Squawk code 1470. No response was received." And then the controller made these several attempts repeatedly to try and contact the aircraft over the next four minutes which would've taken him up to around 8:55, which is what--before impact anyway. "And that during that time the aircraft was observed making a left turn and descending."

So it appears from the face of this summary, and tell me if you agree or disagree, and if so why, it appears from the FAA internal summary that the first sign of something, we'll call it something unusual with regard to either communication or the tracking of 175, occurred at 8:46 and 48 seconds when they changed the transponder code.

MS. FREEMAN: May I look at this?

MR. AZZARELLO: Sure.

MS. FREEMAN: I would agree with that.

MR. AZZARELLO: And that because of the attention of the controller being focused on what he knew at that time to be a reported hijack, i.e.,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

American 11, that it appears he might not have even noticed the transponder code change until 8:51 and 43 seconds.

MS. FREEMAN: That I don't know.

MR. AZZARELLO: That's an inference I'm making without, you know, looking at what happened between 8:46 and 8:51. We looked at the controller transcripts, and I represent to you I don't recall him, you know, making any other attempt to contact United 175, but when he saw that the code was changed, it appeared that he immediately called him at 8:51 and asked him to recycle his transponder.

And other than that, it doesn't appear to have any indication on the FAA summary of the 17th that would purport to be an FAA notification to the military. Do you see anything else that would purport to be a notification?

MS. FREEMAN: No, I don't. No, it's not in this summary.

MR. AZZARELLO: So now let's go to the 20th, your one-page summary. Did you put down a position on behalf of the FAA of when the FAA

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

believes it notified the military on United 175?

MS. FREEMAN: Well, again I guess by inference I did reflect the 9:05 entry--9:05, the Needs logs show FAA notifying them regarding United 175, and then I did note the 8:43 a.m., New York Center asked the military liaison specialist at New York Center to get military assistance, and the statement, we believe this is still related to American 11, but it may be the source of NORAD press release showing 8:43 notification regarding United 175. And then I pointed out as you just did that New York Center was working United 175 at that time, but everything was still normal. So that was sort of my interpretation or my opinion that 8:43 notification time probably did not relate to United 175.

MR. AZZARELLO: Yeah, it looked to be a NORAD mis-interpretation of notification on 175. Is that what you're saying potentially?

MS. FREEMAN: Well, potentially. I mean I don't know what it's like there at NORAD. I don't know and I wasn't there and I don't know what the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

environment was like, so I don't know if they were--I don't know exactly how that works. It was New York Center, and New York Center was handling United 175, so, you know, I just don't know whether there was confusion at the time the notification was made, or confusion about the two airplanes because they were happening within a close period of time. I just don't know what it was that caused the military to say 8:43 was the time that they were notified on--

MR. AZZARELLO: Putting the military aside, from your perspective in terms of the FAA notifying, you did not believe that 8:43 was an FAA notification to the military on 175, to the extent that there was any communication. Is that accurate?

MS. FREEMAN: It did not appear to me to be logical, given the fact that the transcripts did not indicate a problem with 175 until after 8:43. So as to why New York Center asked the military liaison specialist to get military assistance, I don't know. I have to assume that that was related

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to American 11 because of the time frame and given the fact that the indications that problems with 175 occurred at 8:46.

MR. AZZARELLO: And the only other notification time on your one-page September 20th paper relative to notification on 175 is the 9:05 time but that cites to the Neads log, right?

MS. FREEMAN: Correct.

MR. AZZARELLO: As the military indicated.

MS. FREEMAN: That's correct.

MR. AZZARELLO: Is the inference in that that the FAA would agree or disagree that that looks like, given the information available of when approximately, you know, give or take a minute, when the notification was made by the FAA to the military?

MS. FREEMAN: The only--I would agree, except for this entry and "8:49 to 9:05 a.m., New York Center military liaison specialist contacts Huntress military facility." Frankly, I don't remember what the source of this was, but I do seem to recall that somebody had some New York Center

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

logs and there must have been an entry in there about that. What that notification was about, I just don't know, and I think if I had known that it related to a specific flight, I feel certain that I would have entered it in that entry.

MR. AZZARELLO: At 8:49 and 9:05--

MS. FREEMAN: 8:49 to 9:05.

MR. KARA: John, I think that's after the call to the New York MOS. That would be a different call.

MR. AZZARELLO: Yeah, it might be. Did anybody say they interviewed the MOS? I mean wouldn't that have been a good source to find out if he or she remembers making notifications to the military on either aircraft, the 11 or 175?

MS. FREEMAN: I just don't remember. I don't remember who would have done that.

MR. AZZARELLO: Did you know, based on your experience, did you know that each center has a military or most of them have a military liaison specialist at MOS position?

MS. FREEMAN: Yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: And what their function was?

MS. FREEMAN: No, I'm not intimately familiar with what their function is.

MR. AZZARELLO: But that they exist. Did you--

MS. FREEMAN: But that they exist.

MR. AZZARELLO: So you think that was from a log of that reference there in your document?

MS. FREEMAN: That's my recollection, yes.

MR. AZZARELLO: I don't remember off the top of my head what they said. We did interview an MOS gentleman, Robert Felzer. I don't know if that name rings a bell, and I'm just remembering, so I don't know if it's entirely accurate. But I recall him saying that he thinks he made a few calls to Huntress, one, regarding 11, one on 175, and then one later on confirming Air 175 had gone in. We do have the Neads end of that where there are calls in, and we can see some of those that have been repeated in the background or the original call into him where he gives, you know, confirms that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

175 was in. So that's my recollection of sort of contacts of the military liaison specialist.

We don't recall seeing anything--Miles, correct me if I'm wrong, and Jeff--we don't recall seeing anything earlier than 9:05, being a notification from the military specialist at GNY to Neads about 175.

MR. BROWN: No.

MR. AZZARELLO: Now taking you to American Airlines 77, is there any indication on this sheet of the representation of the FAA position on when they believe they notified the military about American Airlines 77?

MS. FREEMAN: There's the entry that the Neads log shows FAA notifying them regarding American 77 at 9:24.

MR. AZZARELLO: But that's a military document, right, the Neads log?

MS. FREEMAN: Yes.

MR. AZZARELLO: It's not an FAA--

MS. FREEMAN: No, no.

MR. AZZARELLO: So I read that citation to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a military document and that to their position on what their logs show that that's when the FAA notified them. So that's when they're saying that their logs show they were informed. Is there any entry on that sheet that takes the position of when the FAA thinks they told?

MS. FREEMAN: No, not on this sheet, and I'd have to look at the chronology to refresh my memory.

MR. AZZARELLO: Sure. I think this is 77. I think it's the last one. There it is. It starts at takeoff. Is this what you relied on to see if the FAA had something different on notification?

MS. FREEMAN: To some extent, yes. My recollection at the point that I put this together, I was relying on--

MR. AZZARELLO: Yes, so the FAA source of information on notification. Then this was the NORAD sequence.

MS. FREEMAN: Yes.

MR. AZZARELLO: Okay. Add to my highlight--9:24. Not coincidentally because that's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the time that the FAA logs show that the FAA notified them, so I was looking to see what the FAA said happened at 9:24. That entry on the FAA shows that the Great Lakes Regional Operations notified the Washington Operations Center of this simultaneous loss of radio communications and radar identification of 77. It doesn't say anything about the implication of that loss, whether that means hijack crash or anything else.

MS. FREEMAN: Right. Yeah, I don't see anything in that--

MR. AZZARELLO: There's one more page. I don't think there's anything back there.

MS. FREEMAN: No.

MR. AZZARELLO: Well, tell me what does that mean then that if you looked at this and all you put down was what the military log said. Does that mean that--well, you tell me. I don't want to put--I mean--why we would conclude that there is nothing on that one page representing when the FAA thought they called.

MS. FREEMAN: Right. I mean my conclusion

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

at the time was that we didn't have any information indicating-- independent of what we got from the military indicating when we had notified them. However, I do know that a net had been set up, and so when we tried to piece together the whole issue of when the military was notified, it was difficult to piece it together because at some point a hijacking net had been set up which would have included the military.

MR. AZZARELLO: It had or it did?

MS. FREEMAN: Well, it would have included them, and I guess my belief is that it did include them. I think there was something somewhere that indicated an MCC was notified or NMCC was--out or something like that.

MR. AZZARELLO: Would that be something that you would want to then cite to show that--in other words you're saying that they--lead you to believe that the FAA made the notification?

MS. FREEMAN: Well, I guess what I'm trying to say is that it seemed to me that with the first airplane, American 11, we had, you know,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

pretty specific evidence about notification, and it seemed like as you got later and later time with these airplanes that the information got more and more general. And given that, you know, given that there was some scrambling done by the military, you know, I think it was--you know, one of the things that we wondered about or assumed when they pieced this together was that the military was on the net and so as this day, this morning was unfolding, you know, I was assuming that they were talking on the net about these airplanes as these events were unfolding, as they were happening.

MR. AZZARELLO: They were talking--

MS. FREEMAN: On the net.

MR. AZZARELLO: An FAA representative?

MS. FREEMAN: Right. The FAA people who were on the net and the military people who were on the net.

MR. AZZARELLO: I guess what we're understanding though is a little bit of difference between let's say if a net is up, and someone says oh, there's another aircraft we think is hijacked,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

United 93, that gives a call sign. And if someone's listening, that someone's on that line and listening, well, now they've just learned that there's an aircraft, United 93 call center they think might be a hijack. That doesn't necessarily tell the person listening are you tracking it. If so, who is. What FAA entity. Where is it, and that kind of stuff, to coordinate the military response, if that's what was going on.

MS. FREEMAN: I mean I wasn't there. I don't know what was talked about on the net. I mean when they manage--you know, when there's a hijacking net--you know, whenever there's a hijacking, the reason you set up a net involving the various agencies is to coordinate actions. But I don't know what happened on this one.

MR. AZZARELLO: Okay, before we get to that, I just want to show the military log, the Needs log, that you, not you, but somebody obviously was privy to because they were citing it in the FAA summary. With regard to that, the American 77 flight, it starts at 8:40 in the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

morning with a report of 11, and if you go down all the entries, you'll see the next entry regarding American Airlines is at 9:24, but it just gives a tail number, and that's the tail number 211. And that the first mention of 77 is a call sign is at 9:34 a.m. "American 77 flight to L.A. lost, unable to locate." Obviously this is military Needs receiving this information from the FAA that the FAA can't locate 77 and it's lost and it was going to L.A., from I.D. Dulles.

Is this the type of information on entry that you would've thought was reflective of a notification on 77 to the military of it being lost, neither being hijacked, but exactly what it says, lost, unable to locate? That if you knew about would you have--that would have been the type of information you would have reflected in your notifications to the military on 77?

MS. FREEMAN: Well, it depends. I think I would've had I had--I would've focused on the first notification. So, you know, the continuing--with what I assume was happening on the net was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

continuing discussion about things as they were happening and they were being reported. But what I would have focused on would've been the first notification.

MR. AZZARELLO: Which is--their logs say, or your papers says their logs--and when you look at 9:24 on their log, it doesn't show--it says American Airlines--I'm quoting--"American Airlines N334 AA hijacked," and that's the tail number for American 11 not 77.

MS. FREEMAN: Okay. I hear what you're saying. I didn't have the benefit of this. I had the benefit of the news release which said that at 9:24 they were notified on American 77.

MR. AZZARELLO: I understand you didn't have it, but somebody in Air Traffic did. You say that you believe the point of contact for the military was Jeff Griffith. Jeff Griffith said he recalls getting a log, a Needs log, thinks this was it. And he did not directly represent that you had it in your possession but thought that this was circulated. It wasn't just kept by hand by people

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

who were working on the issue of notifications issues, of military notification were aware of its existence. I'm not saying that you were, but that people that were working on this project knew it was here to refer to it, when obviously somebody did because it's in the FAA summary.

MS. FREEMAN: Yeah. Again, I just don't remember ever seeing that before.

MR. AZZARELLO: And the Air Traffic folks that indicate that they have training which would obviously indicate to them seeing the tail number doesn't tell you which aircraft it is, but that you can then find out which American Airline that day, knowing that two were hijacked, you know, which one is this tail number go with. And we find out it was American 11 and parenthetically this information did come from Boston Center, from their military guy who gave the information to Needs.

MS. FREEMAN: You're asking me--

MR. AZZARELLO: No, I'm telling you.

MS. FREEMAN: Oh, okay.

MR. AZZARELLO: Because we have the Needs

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

tape and it comes in near realtime, like 9:23 or whenever the call starts, and they're giving the tail number of American 11. So it was clear to the FAA folks who gave this information in Boston that they're referring to American 11 and anybody who checked the tail number would know it's 11 not 175, which I would think would cause maybe somebody some cause for concern as to why someone would want to rely on that log entry as a notification regarding 77. Had you known that, would that have caused you concern about whether or not this was 77 or 11 that--

MS. FREEMAN: Had I known that, that there was a different tail number, yeah, I would have asked them to look further, you know. Yes, I would've, and again, I don't know if that's what Jeff Griffith was doing.

MR. AZZARELLO: And then I guess there would be certainly some discrepancy or ambiguity if one thought that the Needs log at 9:24, the tail number, that they thought that was 77 and it was hijacked, and then 10 minutes later at 13:34,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

American 77 flight goes to L.A. lost, unable to locate, which is a little bit different than and potentially inconsistent with hijack as lost and we can't find it. So none of this information was even brought to your attention outside of the document itself? No one said, hey, you know, there's some inconsistent entries in this log?

MS. FREEMAN: No.

MR. AZZARELLO: Okay.

MR. KARA: John, I want to for a moment approach this in a slightly different direction, the construct of this and the ultimate construct of the FAA press release in 2002. First of all we got hijack procedures that were in place which nobody followed that day, so you can pretty much set that aside. And that is focused on headquarters and what headquarters interacts with the military with. The fact of the matter that day, and we'll start with American 11, the notification to the military on 11 went from an in-route center to the Northeast Air Defense Sector. That establishes the paradigm for the day. This is the construct for how

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notifications--one construct. I'm not saying it's the only one, but it's certainly one that could be used to establish notifications. So, yeah, Boston notifying Northeast Air Defense Sector and in-route center on 11. You have either Boston or New York notifying on 175. On 77, it's actually part of a different conversation having to do with American 11. Washington Center makes the notification to the Northeast Air Defense Sector, and then finally on 9--

MR. AZZARELLO: --and I can't find it.

MR. KARA: Right. Then that line--but that is the notification that we're carrying forward. And then finally on 93 the notification is made after two other conversations that Northeast Air Defense Sector, Cleveland notifies zero, when he notifies Northeast Air Defense Sector. So just to summarize this as I'm saying this to you, we have times of notification and the constant on the other side or in-route centers setting aside what was supposed to happen that day. Did you or anyone in your group try to approach it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that way in terms of the notice that had been established at the very beginning by Boston Center?

MS. FREEMAN: No. I mean the only--what we did do is we just tried to gather data from all the sources we could think of.

MR. KARA: Whether it was an in-route center or headquarters or wherever you could get it from.

MS. FREEMAN: Exactly.

MR. KARA: And then as you look at the military--the military's a rather large place. The pointing end of the sphere, and I apologize for the use of the language, is the Northeast Air Defense Sector. Nothing is going to happen in an Air Defense response until they are notified. So to say notified the National Military Command Center or notify the Air Traffic Services cell or to notify Colonel Cheryl Atkins here could constitute notification to a military person. But operationally to get things to happen, the notification has to end up at the Northeast Air Defense Sector, and that's why I came back to this

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

construct. Does that construct make sense the way I just gave it to you?

MS. FREEMAN: Sure.

MR. KARA: Okay.

MR. AZZARELLO: So I guess to summarize what Miles is saying is there was an outside the box notification that was going on on 9-11, meaning outside the protocol, and that happened when Boston Center made an immediate contact to Northeast Air Defense Sector. But they also followed their protocol by telling their superiors. What was supposed to happen then, as we understand and tell us if you have the same understanding--is when Boston tells the region, the region tells the Washington Operations Center here where we are on the 10th floor, and then they go get a hijack coordinator or summon that person, and that person then calls the NMCC so that you don't have a disconnect. You have the Ops folks--down here at the lower level, but you have the decision-makers and the management at headquarters locked up with the NMCC who then bring in decision-makers. Did

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you and your folks try to confirm whether or not the upper level contact was ever occurring between the NMCC and FAA headquarters?

MS. FREEMAN: No. The only thing I remember was, you know, asking for the logs or, you know, asking the Washington Ops Center to check their logs and--

MR. AZZARELLO: Which logs for what?

MS. FREEMAN: For the net. You know, when was the net--

MR. AZZARELLO: That's what I need to know from you. What net because there's been references to more than one net and frankly without trying to confuse you people that interchangeably use terminology, two different terminologies to explain the same net, or they refer to two different nets but the same terminology. Either way you want to approach it.

So if I'm you, and I'm Darlene Freeman and I'm in your shoes on let's say September 12th, and Monty Belger tells me, okay, Darlene, go find out whether or not our management level, the folks who

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were supposed to be according to our protocol talking to the folks at the NMCC, could you do me a favor and go please check whatever records or tapes or logs and find out if that happened. Where would you go, what would you look for, what specific documents or tapes or whatever? What in addition would you look for?

MS. FREEMAN: I would go to the Washington Ops Center and ask them for, you know, ask them to check their logs to see when was the net activated and who was on it.

MR. AZZARELLO: Which net?

MS. FREEMAN: Well, initially when we asked the question, you know, they said the net was activated at whatever time they said it was activated. You know, after asking a few questions, we ascertained that that net that they initially set up was internal to FAA, and it was some time later they activated the net that included the military and I think CIA and others. I can't remember.

MR. AZZARELLO: So the first net set up

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you found out from the WOC was the one internal to the FAA?

MS. FREEMAN: Yes.

MR. AZZARELLO: And that's the tactical net you found out.

MS. FREEMAN: Yes.

MR. AZZARELLO: First net set up on 9-11 was the tactical net and it was internal to FAA. That's what we understand. Did you know that before you went in there and asked the folks in the WOC, or did you have a pre-existing understanding?

MS. FREEMAN: No, I did not have a pre-existing understanding of two different nets.

MR. AZZARELLO: Okay. And I'll give you--that purports with our understanding given what we've read. There's a crisis management handbook, and do you have a copy of that, Miles? I'm sorry. There's a crisis management handbook and in Chapter 4 of it, it talks about--there's a tab for primary net and the tactical, and the tactical net says it's generally internal. You can pull that outside parties according to the crisis

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

management handbook at the discretion of those running it, the Security folks running the tactical net, if you think somebody belongs in it from the outside. But it's primarily internal to figure out what's going on. And then you would set up, as we understand it from the document I'm speaking of some folks in Security, if it warranted, the event warranted it, then you would after the tact net, establish a primary net and bring in the outside folks when you need it to go outside the FAA. Is that how you came to understand it after 9-11?

MS. FREEMAN: Yes.

MR. AZZARELLO: Okay. So which net then of those--do you know if the second one was called the primary net?

MS. FREEMAN: Yes, primary net.

MR. AZZARELLO: Okay. Which one would you expect then to find the military under? The primary or the tactical?

MS. FREEMAN: The primary.

MR. AZZARELLO: So that's where you would look after 9-11 to see if the military element of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the NMCC was on.

MS. FREEMAN: Correct.

MR. AZZARELLO: So you'd look there for FAA communication with the NMCC.

MS. FREEMAN: Correct.

MR. AZZARELLO: Okay. We have a transcript from Command Center that we went over with Mr. Belger and other people. It's referred to as the tactical net, not the primary net, and there's a gentleman named Pete Falcone on it that was calling it a tactical net. Did you know who Pete was in the aftermath of 9-11 if not before?

MS. FREEMAN: No. I mean that name rings a bell, but are you talking about the Air Traffic Command Center in Herndon?

MR. AZZARELLO: No. Well, that's where we get the tape from, and they are on it with other entities, other FAA entities among other parties. FBI's on it too. And what you see when you read the transcript and listen to the tape is at some point after 9 o'clock, you hear a new party come in, this is almost as a moderator, this is FAA

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

tactical net to Eastern Region net. This is FAA tactical net to Command Center. What was that last report on Flight X or give us the update. Okay, that appears to be the tactical net because somebody's calling it that in FAA headquarters, Pete Falcone.

They asked repeatedly on the tact net where's the NMCC. Is NMCC on here yet, after 10 o'clock somebody asks. No NMCC on here yet. About a half hour or so later, it's almost 11 o'clock. Somebody wanting the tact net who we understand was running that tact net, Pete Falcone, is ACS Security. So he's in this building, I would assume, and so maybe even available--not for you, but for the folks running down the real sort of ground level facts what went on that day. He's at headquarters and he's one of the tact net in that aviation crisis center we think if that's where he's running it from, that's where people saw him. And he's there on that tact net as people were saying where's that NMCC.

We're getting the distinct impression that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

maybe someone thought that that was supposed to be the primary net and that they should have been on there and that they weren't. And what we're seeing from all our findings is we're getting a distinct impression that notwithstanding what the FAA folks here at headquarters might have thought should have been going on with the NMCC, that they might not have been on a primary net before all of the events concluded, before the four crashes concluded that day on September 11th.

And I'm just applying some logic. If the primary net is supposed to go on in the same room, in the same crisis center as the tactical net, it would strike me that the gentleman moderating it from headquarters on the tact net would be saying, sitting there silent, you know, when people are saying well, where's that NMCC, are they on the net. It would strike me that he might say yeah, they're on the net, but this is the tact net, and as I said before, this is FAA tact net, but you folks that are asking for them, they're on the primary net, and that ain't here, folks, because

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this is the tact net. That's my colleague over here, three chairs over, in the crisis center who was on the primary net. And we don't hear that, and--issue for you, and what we're hearing that the military was saying to Jeff Griffith after 9-11. In particular, a representative from Konar, perhaps even General Arnold himself, was saying hey, we didn't know about 93, United 93, the last one before it crashed. We didn't get any heads-up on that from you folks at the FAA.

And to the extent that the FAA folks that we're interviewing, and there's numerous ones at headquarters, they seem to be relying on the fact that they can't point to--Mr. Belger just met with us, and he said I can't, you know, they, meaning the FAA, can't point to--look at my notes instead of trying to guess--there's no record they, the FAA, can point to that the FAA asked the NMCC or any military component for assistance on United 93, or that they pointed out United 93 as a hijack to the NMCC. But yet there remained this consistent inference that well, we can't show you, but we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

think it happened because we're assuming that what was supposed to happen, given our protocol, we're assuming that it did happen, i.e, that there was a primary net set up and that the NMCC was on it.

MR. LEWIS: John, who were you just quoting?

MR. AZZARELLO: Belger. We're assuming that it happened.

MR. LEWIS: Your contact was not quite right.

MR. BROWN: Would it be helpful if I just read the whole paragraph I have?

MR. AZZARELLO: Yeah, read the whole paragraph then.

MR. BROWN: "Belger did not receive information that the NMCC was on the net when the information was communicated regarding UAL 93. Belger did not believe there was any information that the FAA asked the military to "do anything regarding UAL 93." Belger commented that there was not record "to point that UAL 93 was discussed with the military. He holds the position that the NMCC

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was on the primary net and not notified "of UAL 93" if UAL 93 was discussed on the net."

MR. AZZARELLO: Unless I'm missing something, and we should talk about this later because there's been a position taken by your folks and with an agreement with OJ that counsel present to monitor these meetings will not interfere with the questioning unless--

MR. LEWIS: I did not interfere. I was just--

MR. AZZARELLO: I don't think I'm going to defend myself here with all due respect, Mr. Lewis, and tell you that I think I said to Ms. Freeman that Mr. Belger said that, but there have been repeated representations that notwithstanding the fact that there's nothing to point to, that there's a belief that it did occur, that the military knew about it because they think protocol was followed. And with all due respect, I think that put it in context and did not mislead--

MR. LEWIS: (Inaudible).

MR. AZZARELLO: Let me ask the witness.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Do you feel that I misled you in any way in the way I approached that to you?

MS. FREEMAN: I mean my understanding is, again, not being privy to exactly what was discussed on the net, but this is what my understanding was when I tried to piece all of this together. My understanding was that first the tactical net was set up that was internal. When the primary net was set up and NMCC was part of it, that's what I understood, okay. The NMCC was part of it.

I would agree with the quote that you read from Mr. Belger. We could not find anything specific to show FAA notifying the military about United 93, but we knew--again, I hear what you're saying about talking to people, but this is what I believed is that NMCC was on the net at the time that 93 was taking place, and so that much we knew. We knew that the military was on the net--

MR. AZZARELLO: You believed--I'm sorry but I got to get a distinction between belief and knowledge.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. FREEMAN: We believe that the military was on the net at the time that United 93 was occurring.

MR. AZZARELLO: Okay.

MS. FREEMAN: So we, you know, we believe that they knew about it because it must have been discussed on the net.

MR. AZZARELLO: Did you have any hard knowledge that they were on the net beyond a belief? Tell me what was that belief based on that they were actually on the net?

MS. FREEMAN: I have a recollection of either somebody from the Washington Ops Center or--I have a recollection of NMCC, you know, seeing something that showed the NMCC came up on the net.

MR. AZZARELLO: Okay, that they came up. Now I want to take it a step further. Let's assume--did you ever hear a tape of the primary net?

MS. FREEMAN: No.

MR. AZZARELLO: Did you ever speak to any individual who identified himself or herself as a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

participant in the net from the FAA? Did somebody say hi, Darlene, this is, you know, Pete Falcone. I was on the primary net that day?

MS. FREEMAN: I think I did talk to somebody in Security, but I don't remember who it was.

MR. AZZARELLO: Well, what do you remember that person telling you? Did you talk to them about the primary net?

MS. FREEMAN: What I remember discussing with them was what was the difference between the two nets and, you know, what was their role, vis-a-vis the role of the Washington Ops Center.

MR. AZZARELLO: The difference between the two nets and the role of the nets--

MS. FREEMAN: The role of Security versus the role of the Washington Ops Center.

MR. AZZARELLO: Security, okay, versus the role of the Ops Center.

MS. FREEMAN: In other words, I was more interested in, you know, how do you get from a tactical net to a primary net, who set that up.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Right.

MR. KARA: That's the question we have too.

MR. AZZARELLO: Now let's take it a step further. Now did you see anything beyond a log or a document which indicated that a primary net was activated and the NMCC was on it?

MS. FREEMAN: No.

MR. AZZARELLO: Maybe I'm oversimplifying it, but I would think that maybe one of the avenues that could be pursued to try to verify that such a primary net existed separate and apart from the tactical net would be just to do a query. I don't know whether it's an e-mail or a memo or call all the folks together who worked that day and say does anybody here remember being on the primary net with NMCC while United 93 was going on. Was anything like that done? I mean even that's sort of a pretty straightforward way to try and find out who was on it?

MS. FREEMAN: I have no reason to question the information that was given to us.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay, so the log--I just want to understand, and I'm not suggesting that you should have questioned it. I'm just trying to gain an understanding of the universe of your--basis of your belief that there was a primary net, and that the NMCC was on it while United 93's transpiring. And so can I take away from this meeting that the universe of that belief was based on a piece of paper that the FAA possessed that said that the primary net was activated?

MS. FREEMAN: Correct.

MR. AZZARELLO: And that the NMCC was on it?

MS. FREEMAN: Yes.

MR. AZZARELLO: Could that be--was it one piece of paper or more than one piece?

MS. FREEMAN: I honestly don't remember.

MR. AZZARELLO: Let me show you one piece of paper that doesn't appear to be too official. It says Tracy with an extension in the upper--chronology of events on 9-11. It doesn't say who's chronology, whether it's the center or

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

headquarters or Tracon or--it says "at 9:20, FAA Washington Ops Center sets up primary net including NMCC" and it has the time, 9:20. DOJ, 9:23, Secret Service--you see all that?

MS. FREEMAN: Yes.

MR. AZZARELLO: Does that look like the document you might have looked at?

MS. FREEMAN: That might have been the document, yes.

MR. AZZARELLO: Now I want to draw a distinction that I think it's a very important distinction, and I want to be clear about it, and if I'm not clear, let me know if I haven't been clear. I think there's a distinction between what you said before which is there was a belief based on maybe this, maybe it was this very document I showed you that Tracy directed, but there's a difference between--Situation A is we believe that there was a primary net open at 9:20. We believe based on the document we see that the NMCC--that it included the NMCC at 9:20, and we know that United 93, the events surrounding its hijacking started

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

after 9:20. That's a certain set of facts.

But from those set of facts that doesn't answer the question of was the NMCC still on the line when the events surrounding United 93 evolved. If they were, was an FAA representative on the line with a primary net at the same time the military was. Was that FAA representative on the line, a person who was given--who had knowledge of what was transpiring with United 93, that it was reported to have been potentially hijacked with a bomb threat on board? And then B, did he or she communicate that information to the NMCC person who they believe was standing there listening?

Now all of those things occurred that I just went through in Scenario B. I would think that you or the FAA collectively would have a pretty solid basis to believe that there was a notification from the FAA to the NMCC which would have been--just happened to be in the protocol. I'm not understanding not all things went according to protocol that day. But we don't see any outside the box notifications by the centers until after

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the crash is on. Cleveland calls at 10:07, and we have the live date from both ends, from Cleveland Center and from Neads at 10:07 saying 93, bomb on board, hijack. In fact, Cleveland Center doesn't even know it went down yet four minutes ago when they're notifying Neads.

So that only leaves us with looking at did the primary net get it. We haven't even found any--that the primary net existed other than this one piece of paper that we just looked at and showed you, the one that Tracy had, and this one which is a ROC chronology which appears to be more of a formal document because it says terrorist attacks with the date, 9-11, and it says chronology for the AVA Authority, which is the manager of a ROC. And all that has is 9:20 primary net activated. It doesn't even tell you who's on it, if anybody's on it. Doesn't say who. So it gives us no indication on here that the NMCC was even on it.

MS. FREEMAN: Right, but there is a protocol. I mean there is some, you know, there's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a--I don't know if it's an order or what it is, but it's a protocol for--

MR. KARA: Well, I'll show you what John was--

MS. FREEMAN: --for the Ops Center to follow when they activate the primary net and who they--

MR. AZZARELLO: Here's a--this is the protocol of--"it's established immediately upon activation of the crisis center. It remains operational till it's disestablished by the manager. The actual participants are dependent on the situation. Normally it will consist of the following participants, who are automatically included during the establishment of the net." And it has NMCC.

But I'm going to--and I don't mean to facetious, but I want to throw it back at you in the spirit of a debate here. I'm afraid that I've heard a little too often from the FAA when I talk about normal and what's supposed to occur and what's protocol. If I had a nickel for every time

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I heard from an FAA rep that come on, John, normal, there's nothing normal about 9-11. Throw protocols out the window. There was all kinds of non-protocol stuff going on. It was all kinds of actions outside the protocol. And that would beg me to ask the very agency that's telling me that don't rely on protocols for answers on 9-11, then I got to throw that back at the FAA and say why would they just rely on a protocol that a document existed that's supposed to happen without trying to check did it happen because a lot of things that was supposed to happen evidently according to the FAA show didn't happen on 9-11.

MS. FREEMAN: Well, I mean I can tell you from my point of view when I see a log that has specific times for specific agencies being brought up, generally that's something I would not look past. I would've, you know--it just seems to me that somebody entered that in a log so therefore it must have happened. I did not see any reason to question.

MR. KARA: Let me just pursue that point

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

one step further. The WOC is set up to--it runs the place. The crisis center is activated, the WOC turns the lights on, turns air conditioning on, makes sure that this place is alright, and activates the nets. That's their job--they call organization X, let's call it the NMCC, and they talk to a similar type person over there who has exactly the same responsibilities, turns the lights on, the computers go on, they activate the net, and they say we're on at their technician level. Then once that net is activated, principles or representatives of principles get on it and keep it active. For example, the tactical net would have Peter Falcone from here, Marcus Royal from New England, and we would hear those voices back and forth.

We have an open window into the Aviation Crisis Center because the severe weather position at the Command Center left its mike open to hear. So we're hearing, and I must confess early on, we thought the voices we were hearing were the Command Center and here they were not. What we were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

hearing was here talking to New England Region. So we have a window. We have an audio window into the Aviation Crisis Center as John has said several times. We hear nothing about that line of communication talking to the primary net, or do we hear voices in the background that even lead us to believe that the primary net--once activated, we're not calling it if it was activated. We believe it as activated, but we don't hear it being used operationally.

MR. AZZARELLO: I'm not going to--

MR. KARA: Well, what I meant by that--

MR. AZZARELLO: I'm not going to concede that we believe it was activated a, at all, or b, if it was activated that it was activated at 9:20.

MR. KARA: Yeah, I said that from--

MR. AZZARELLO: I do hold the belief that it maybe that the folks thought that the primary net was activated when it was--it wasn't activated until much after 9:20, and that someone maybe mistaken. Maybe. Or maybe it was. We haven't concluded one way or the other on this yet,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

although there appears to certainly be a disconnect because the military is saying--and they're saying clearly now, notwithstanding what they put out there at NORAD having gone over their tapes and having walked through everything now themselves, they're saying that it looks like they didn't hear about anything until 10:07.

MR. KARA: And Mike Morris, when we talked to him, it was his--he was a little late getting there that day, but he operated up--nine or 12 positions. He thought the two nets, if they were established, would have an operator--an operational operator, not the May Averys, but here and here with recorders behind them. And that's why John and I are looking for any evidence--let's call it the primary net--we just have no evidence whatsoever that there's anything happening.

MS. FREEMAN: Well, but you do have--

MR. KARA: Other than this. Other than that, yeah.

MR. AZZARELLO: And let me expand on this, though. This doesn't say that the NMCC was on it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

when United 93 was evolving, the events which are later than 9:20. And my other point is that somebody in the FAA was on it who was getting that--in situational awareness on 93 and passing it on, which would constitute in someone's estimation, maybe not just mine, maybe your's, would you agree that that would be some indication of notification at NMCC? If somebody at FAA said, hey, United 93 is hijacked over--

MR. KARA: (Inaudible).

MS. FREEMAN: Yes.

MR. AZZARELLO: So are you saying then that no one--that the assumption was made upon seeing a document like this that the NMCC--a, that they stayed on past 9:20, b, that they were on during the evolution of events regarding United 93, c, that someone from the FAA was on it with knowledge of 93, and d, that they communicated it? All that was assumed from this that they were notified on 93?

MS. FREEMAN: I mean yes.

MR. AZZARELLO: Okay, I mean if that's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what it was, then that's what the assumption was based on. Then my question to you is this that United 93, and you can see from the time line here, it was a period of time where the controllers were aware that something was amiss when they hear some sounds about get out of here, get out of here. And it proceeds from 9:28 phone. And I can tell you at 9:34, headquarters knows about it because John White from Command Center is talking to headquarters, and he's giving the update to Jeff Griffith and Doug Davis on 93.

But now that leaves a whole window--let's say for the sake of argument that 9:34 is where we've seen the earliest time that headquarters and Command Center are both aware that United 93 looks like a hijack with a reported bomb on board. That's 29 minutes before it crashes. Understanding as I would have to say that if not you personally, people at the FAA and the military were sensitive to--okay, that's 29 minutes. Minutes count in the notification game--aircraft and get them to tail that aircraft, or be in a position to do something

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

should a higher authority like a commander-in-chief or the President of the United States give us an order to take it out. That's 29 minutes.

I would be surprised if somebody then at the FAA, and I'm asking you did they, did they go then and say when within that 29 minute frame did we notify the military about it. Just because we think that we had a primary net going, and just because we think the NMCC was on it because this document says so doesn't add to the \$64,000 question well, when did somebody--when did our rep on that net say hey, folks, heads up at NMCC, we got another one coming in, United 93, transponder off, turn--headed for D.C., i.e., Alway. Did anybody even make an effort to find out when that occurred, the time of the notification, because wasn't that part of your assignment? Part of your task was what was the specific notification that we gave to the military?

MS. FREEMAN: I don't remember if I asked the question whether, you know, there were any tapes. My recollection is that of the net. My

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

recollection is that what we had were these logs from the Washington Operations Center, and that's what we had.

MR. AZZARELLO: But that doesn't answer the question, right?

MS. FREEMAN: No, it does not.

MR. AZZARELLO: Do you think that somebody--did you take it further or ask somebody, well, hey, this doesn't answer the mail, and I don't mean that in a derogatory fashion, but you know what I'm saying. This doesn't put me, Darlene Freeman, in position to tell Mr. Belger and Administrator Garvey when we think--the time, give them a time--when we think we notified on United 93.

MS. FREEMAN: I have to believe, just looking at what I put together, I have to believe that I must not have been able to ascertain that, otherwise I would have included it. So I did not make any statements in here--

MR. KARA: Then there is no second page?

MS. FREEMAN: No.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Was that--

MR. KARA: It just stops at 9:29. There is no entry that goes further than this.

MS. FREEMAN: I don't see it here, you know, and I don't have this document anymore.

MR. AZZARELLO: Well, what about from your--because it's important obviously if there was a second page. Are your practices--if you did have one, if you had more than the one page document, would it be your practice to in any way denote that by putting one of two or two of two?

MS. FREEMAN: It would not have been, but I have to tell you--I mean, we have what we had, which was, you know, NA for notification on 93. I don't believe there was a second page.

MR. AZZARELLO: Your statement that you think--you're believing or inferring from that you didn't have a specific notification. Is that right? I don't want to put words in.

MS. FREEMAN: That's right.

MR. AZZARELLO: Would that have been something you would've raised with Deputy

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Administrator Belger like--when did we know what and when did we tell the military. Wouldn't you have gone to him and said Mr. Belger, on 93, I can't give you a time. I can't find a specific notification time. All I can tell you is that we think NMCC was on the line and that they--

MS. FREEMAN: It's possible that I did or somebody did.

MR. AZZARELLO: Do you recall a discussion of ever hearing it?

MS. FREEMAN: I don't remember specifically discussing it, but I remember being aware of the fact that the 93 we didn't have the time.

MR. AZZARELLO: You don't remember not being able to pin a time to it.

MS. FREEMAN: Right.

MR. KARA: Out of time.

MR. AZZARELLO: Thank you. Thanks for your time.

MS. FREEMAN: Thank you.

MR. AZZARELLO: I appreciate your coming

SWORN INTERVIEW OF

JANE GARVEY

BY

SAM BRINKLEY, 9/11 Commission

JOHN RAIDT, 9/11 Commission

BILL JOHNSTONE, 9/11 Commission

LISA SULLIVAN, 9/11 Commission

Tuesday, October 21, 2003

[TRANSCRIPT PREPARED FROM A TAPE RECORDING.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546 6666

I N T E R V I E W

MR. BRINKLEY: I'm Sam Brinkley, we've already met before. And thank you for being here with us, Ms. Garvey, and this is Team 7, which is the Aviation and Transportation Security Team for the Commission. There's a few formalities here, I have to sort of give us some preface to the--because we are recording it.

MS. GARVEY: Sure.

MR. BRINKLEY: So that--it's not going to be transcribed, we use the recording to--really to re-enforce our notes and to make sure we got it right. And, if at any time in the future that you want to go back and listen to it or see if it came away the way you want it to, we'll be glad to let you hear the recording--

MS. GARVEY: Thank you.

MR. BRINKLEY: --and make any corrections.

It is, I guess, the 21st of October and it's 10:00 o'clock and we are in the GSA Building in Washington, D.C.

And we're here to interview Ms. Jane

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Garvey, former Administrator of the Federal Aviation Administration.

I'd like to have everyone identify themselves, please.

MR. JOHNSTONE: Bill Johnstone, with the 9/11 Commission staff.

MR. RAIDT: John Raidt, with the 9/11 Commission Staff.

MS. SULLIVAN: Lisa Sullivan, also with the Commission.

MR. BRINKLEY: We have the ability to go to the Secret Clearance at this level. Do you still have the clearances?

MS. GARVEY: You know, I don't know. That's a very good question. I'm not sure, they were never officially revoked. I would assume I do.

MR. BRINKLEY: I would presume you do, too, at this point in time. And just by your own recollection, there may be some information that if you know that it was classified, when you received it, if you could let us know that so we can--that,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Kate, there, the recording is classified Secret, it does get locked up. It will also help us to identify our notes to make sure that they are classified properly and that we don't by mistake do something improper with something that would be secret at least.

If, later we thought we needed to go to the TS or SCI level, we would have to go to the other facility. But I don't anticipate that we'll do that, today.

You're fully aware of the Commission and its background and its charter. If you have any questions on that we can go over those again. But the way we're going to try to structure today is really talk to you about pre-9/11; the environment that led up to 9/11. The events of 9/11, itself; and the immediate aftermath of 9/11; and, finally, because the Commission has the charter to make recommendations, we really would like to talk to you about your recommendations and how you see things now and we would appreciate your providing that to us.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

If I could ask you to state your name, full name with the spelling of your last name and your former title, if you could, please.

MS. GARVEY: Certainly, Jane Garvey, G-a-r-v-e-y, former Administrator for the Federal Aviation Administration from 1997 to 2002.

MR. BRINKLEY: Thank you very much.

MR. GIBSON You're welcome.

MR. BRINKLEY: That's all the bureaucratic piece. I'd like to start.

MR. : Sam, you might want to just add that in addition to reviewing the tape, if you have--and this record, really, is open, until the final report is done. So, if you have--after the interview, if you have anything you want to add or modify, just get in touch with us.

MS. GARVEY: Good, thank you.

MR. BRINKLEY: I really want to start out by sort of asking you some questions concerning the overall time that you were with FAA, from when you first got there as Administrator to the time you left.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And it really deals with your view and how you viewed security in the overall roles and missions of FAA and how you were organized to look at security issues as the Administrator.

MS. GARVEY: Well, I'll go back to the 1997, which seems like very distant history at this point. But certainly coming in and I would say throughout the five years and looking at some of my early testimony, you may have seen that certainly the three goals that we focused on at the FAA were Safety, Security and System Efficiency.

And most of the strategic plan, for example, really was focused on those three areas. We had, in a sense, a Board of Directors or Management Board, made up of Associated Administrators. And, certainly, key among that or on that Board was Admiral Flynn, who headed the Security operation when I arrived at the FAA.

There was a colleague of his that headed Safety, at the time it was Guy Gardner. Today, it is Nick Sabatini and was when I left.

Air Traffic Control are Steve Brown, also

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was someone that I had brought in as the Associate Administrator. So we had, in a sense a management board and a board of directors made up of very senior people.

Some changes I made when I came in, but in terms of Security, Irish Flynn, Admiral Flynn, was in that role. He came and, certainly, I'd heard about Admiral Flynn, and had met him before I came to the FAA. I had been part of DOT since 1993 on the surface side. And I had certainly met Irish Flynn at briefings that the Secretary might have. Did not know him well, but knew of him.

And, certainly, he had a very fine reputation within the Security ranks, both within the agency, but, also, outside the agency. He had a good relationship with Dick Clark and the folks who were associated with national Security. He had an excellent reputation overseas. And so he came with a strong reputation.

And while I wanted to make some changes in some of the other areas, Security was an area that I felt we needed to change the leadership at the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

top. He had a good reputation.

Certainly coming again, but going back to that period, the agency had just come of a couple of very difficult years. Value Jet, TWA-800, even PanAm, was not so much of a distant memory, although, clearly, it had been a long time since PanAm. But the agency had come off a very difficult period.

Safety was a very large focus, clearly post-Value Jet, post-TWA-800. The White House Commission that was established, the Bore Commission, in a sense, I think, gave the agency, gave me, if you will, a blueprint, a series of recommendations that we needed to focus on. And so, the focus clearly from a Security perspective were those recommendations that gave us, in a sense, a blueprint.

Coming in in '97, Y-2-K which, again, seems like a very distant memory and a more pleasant one than it seemed at the time, was something that was looming very much in our arena. We had had a number of, frankly, very negative

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

reports out of Congress about how well the agency was prepared for Y-2-K. I think one of the first hearings that I had when I arrived at the agency was a Y-2-K hearing.

So, the agency faced a number of challenges. There were the Safety issues, certainly, always associated with an agency like the FAA. And, clearly, pretty paramount post-Value Jet and TWA-800. There were the Y-d-K issues. There was a general sense that the agency had not done well on modernization.

And then, of course, we had the Gore Commission recommendation.

From a management point of view, I met with my managers twice a week, every Monday and Friday, for the most part. I mean, there were occasional times when I'd be traveling and that wouldn't occur. But that was really, my Board of Directors meeting.

Each one of the Associate Administrators had a series of actions that they were responsible for, related to the mission Safety, Security, and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

System Efficiency.

And, again, to go back to Irish and to the Security Arena, the Gore Commission was the blueprint and he received, I think, a fair amount of cooperation from the rest of the Associates who had a role to play. Like most recommendations, it never one element of the agency that has to deal with it, but it involved the Counsel's Office, it involved Policy Office. So, he was calling on other members--or we were all calling on other members of the organization to pull their load.

MR. BRINKLEY: Now, I know, then, in FAA Security every day they had a daily intel summary. Did that, did you see that daily? Or how did you get--keep--besides, I know that you met with Irish, say, on Mondays and Fridays, but how did you keep a pulse on Security?

MS. GARVEY: Irish had a pretty direct line, both to myself and to Monte Belger who eventually became the Associate--or the Deputy, rather. At that point, he was--when I first came in, Monte was associated with Air Traffic but

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

someone I was relying on a great deal and saw a great deal and he eventually--he eventually became, as you know, the Acting Deputy. And really shared in that position for most of the five years.

So, Irish had a pretty direct line, either to Monte or myself. If there were any Security issues that he felt needed our attention, he got our attention. We never did it on the phone. We always did it in person. He would come up to the office. It was not unusual for him to call and say I just need to see the Administrator or the Deputy before the end of the day or in the next hour. And that would occur.

If it was period where it seemed to be problematic, I would receive the daily briefings as they were issues where, let's just keep on top of it. But I can't say that I was reading them every single day during the five years that I was there.

Irish, I never had any reason to believe he wasn't keeping us informed and, in fact, just the opposite. I felt he was very good about that. And if he couldn't reach me, if I was traveling, he

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

would always reach Monte. We had a policy that one of us would be in the office and he would reach Monte, and Monte would let me know by phone that he needed to see me as soon as I got back or something to that effect.

MR. BRINKLEY: In your workup or in your initial briefings--I mean, you were at DOT and so, you were obviously fully aware that, I mean, the DOT IG had looked at a number of security issues over some period of time. And when you got that, I would presume that you got some in-briefings on the status, the effectiveness, and efficiency of the security system as a whole.

How did you view that and did you think there were certain specific actions that you wanted to make or take in regard to overall Security and I mean, you are post--I understand you're still post-TWA-800, so that's--how did you think about that?

MS. GARVEY: Although, I have to say when I came in post-800, it was pretty much accepted that it was not a terrorist attack, you know, by the time I got there.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BRINKLEY: By the time you got there.

MS. GARVEY: By the time I got there, it was it was not viewed as that.

MR. BRINKLEY: You were back at the safety issue.

MS. GARVEY: And I will tell you, I spent a good deal of time with Ken Mead, I valued his judgment. I didn't always agree, as you would expect, but I valued his judgment and, to some degree, his counsel.

I think, one of the first acts that I took as Administrator was a joint review of some safety initiative, post-Value Jet with the IG. I wanted to send the message that I wanted this to be a cooperative, constructive, working relationship.

So, I had many opportunities to talk with Ken about a host of issues facing the FAA and, while I was aware of the report that he had made and, certainly, had been briefed on the actions that the agency had taken, there was nothing in my conversations with Ken or--in what I had heard from staff--that said, you know, he's really on us about

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this and we haven't done enough on that.

He had a number of concerns and he was very, and I mean this constructively, he was very constructive in both raising them with me and suggesting areas that he felt needed improvement.

He did not focus on security, certainly, in the initial months that I met. We both talked about the Gore Commission, we both talked about those issues.

Throughout the five years, particularly around airport access, there were a number of discussions that we had had and our Security people worked with his Security people on a number of initiatives to penetrate airport access.

I understand even before I came--and one of the things I remember being briefed on was an initiative that the agency had taken and had found many vulnerabilities with airport access.

And having been an airport director, I was very well aware of those. And that the agency got, sort of, on the airports, really, sort of got very aggressive and I remember it being described to me

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that the Director of Operations at the time, seemed to spend all his time on airport access and progress was made. But it wasn't sustained.

And I think that was one of the challenges that I found particularly frustrating. I'm sure people in the agency did. I'm sure Ken did and for me it did, and you know, it is sometimes because of the human elements involved, it's difficult to sustain that.

Mid--and please don't hold me to the dates, I will check--but airport access came up again both through efforts with the IG. And that was one where he and I talked quite a bit. You know, what should we do, how do we handle this which was frustrating, we brought the airports in. I asked him to meet with me. We had a number of the airport directors in. Some of the leaders, people that I would consider leaders, like Jim Wilding [ph], from National. Along with the associations to see we really need to, you know, we talked about it in detail. How can we handle this, what steps can we take. [

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

We sent out a pretty aggressive letter to all the airports with notifications that we would be following up. Again, I think we made some progress, but a concern is always, how do you sustain that. And I think, to some degree, that may still be a concern for GSA.

MR. BRINKLEY: How, do you recall, did you ever talk and do you recall ever having discussions specific discussions with the Secretary on we've got security problems here and that, along with F60, I mean, how did that relationship work?

MS. GARVEY: You know, F60 was, obviously, the key link with the Secretary. And I certainly did briefings with the Secretary over the Gore Commission and that having served two Secretaries, let me say, both Secretaries were briefed on those issues.

And I don't remember. And I will give it further thought, I don't remember a specific conversation except in more general terms. and knowing that F60 was there. It would not have been quite as likely for me to initiate talking with

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

them.

MR. BRINKLEY: Because the other side that's sort of backwards is did the Secretary ever say, hey, Jane, we've got to get a handle on this, this is not going well? I mean, that's the kind of--I'm trying to--

MS. GARVEY: I understand, yeah.

MR. BRINKLEY: I mean, you could go to the Secretary and say, boy, we've got a problem. But at the same time, the Secretary's getting briefed by F60 and, Ken, I presume and saying--

MS. GARVEY: He certainly was, because it would, and I can certainly remember talking to him about, for example, the airport access, raising that. But, again, more in the sense of I would often brief the Secretary on a number of IG reports that we were working on. And, again, I don't want to leave the impression that it was a great deal of huge detail, but, you know, we're working on this we've got some issues and it may. And I believe, you know, even the, bringing in airport directors would have been something for example at a meeting

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

with the secretary; either in the intermodal meeting with all the Administrators, were it was very common for me to say, this week, one of our big issues is, you know, we've got the airport directors coming in, we're focused on airport security.

Ken would be at those meetings, it would be very common for Ken to say, this is an issue we're working on together.

But, you know, I want to just--and I don't mean to take issue, but just to step back for a moment. Over all Security, while there were problems, this is a complicated agency with lots of complicated issues going on, which I know you know.

But, on balance, there was--well, there was, generally, I would say a positive feeling about security. We had made some. I mean, it's always an issue. And that's why I'm hesitant, I want to choose my words with precision and carefully.

I think you always worry about it. If you're the Administrator, you know, someone once

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

said to you what keeps you up at night? I mean, you have a lot of sleepless nights over whether they are safety issues or the potential of what could happen; what could go wrong. And it's the unknown--it's the uncertainty that, I think, is sometimes is what does keep you up at night.

MR. BRINKLEY: One last question, and then I'll turn it over to my colleagues. And then is--do you recall any briefings, directly on the threat, the domestic threat or any specific briefings from Irish on Red Team results which is internal work?

MS. GARVEY: I remember more discussions on Red Team results with Lynne Osmus. Lynne was my Chief of Staff for, you know, and in some ways, I think I was very fortunate. You know, I had Monte who certainly had his background in security; Lynne whom I have enormous respect for. And who I think has made wonderful contributions in public service.

And I'd certainly gotten some briefings from Lynne. And I also do remember briefings from Irish that were more, not specifically Red Team

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

briefings, but more generic briefings; changes that we are making; areas where we need to, you know, improve.

I certainly don't want to leave you with the impression I thought everything was perfect in Security, it certainly wasn't. There were enormous challenges; there were technology challenges that we would get that weren't ready for prime time; there were the human-factors challenges that are always there in aviation, whether you 're talking about Security or Safety. If you look at the record in Safety, you know, really, nearly 80 percent of all accidents are the result of human factors and human failure so there's always the human factors element.

There was the slowness of getting rules out, that was--

MR. RAIDT: We're talking about specifics now, we really, actually want to, we would like to get your opinion on them.

MS. GARVEY: So, there are--certainly there are a number of challenges. But I also, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

guess want to point out that I think it was a solid organization that had done some good work.

MR. RAIDT: Okay thank you. I think that was a good segue because we want to get into each of the layers of the Aviation Security System and just get your impressions about each layer and how they work together and start that, maybe a general question, talking about the Red Team results, which, you know, and the IG going back many years, many Secretaries and several, you know, FAA Administrators of problems of passing 30, 40 percent, which means it wasn't succeeding 60 percent of the time. And, obviously, that's in the context of a layered system.

So, if you could give us just, kind of your general thoughts about having received the Red Team results from Lynne, knowing that there was such a high failure rate that seeing that in context of other layers, how you viewed the system as a whole and how those layers are supposed to work. What your expectations of the system were?

MS. GARVEY: Yeah, I mean, I think that if

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you look at aviation just generally, it's a system that its strength is based on its redundancy. Whether you look at Safety, I mean, you look at an accident the way it's always described is you have to have a series of, you know, the holes in Swiss cheese have to line up exactly right. If one falls off, then the accident doesn't occur. So there are systems of redundancies, whether you're looking at Safety or whether you're looking at the efficiency of the system or whether you're looking at Security. So, you know, while, clearly, it's a concern when you're having failures in the system.

There was also the notion that you had a crew that was well-trained; there was the notion that you had extremely trained pilots; there was the notion that there were other ways to determine a security threat or a security risk. And it was, in fact, a system, based on redundancies.

Did it mean that there weren't concerns and that there weren't constant efforts to try and improve? No, of course, not. I mean, you knew that you had to do better. I mean, I think one of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the great challenges at the EDF and, frankly, one of my frustrations was when a deadline was put in place is that to some degree that technology is not--it is flawed; it does--it is not perfect technology by any stretch of the imagination.

And to see so much effort on that one piece was a concern to me. Intelligence was till, you know, again, part of the redundancy.

MR. RAIDT: Well, that's, again, a good segue. So, let's go down, we want to kind of five. And let me highlight them, and then we'll go back to talk a little bit on intelligence; then get into CAPS pre-screening; about checkpoint screening; a little bit about cargo, mail, checked baggage and then aircraft protection, including the crew training. Talk about, in general that we counted on the strengths and weaknesses and I'll ask you some specifics.

But with respect to intelligence, we've cover a little bit about how you received it. One of the things that we keep hearing from people in the intelligence community was, there was a great

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

deal of frustration, the fact that they felt blind domestically. In fact we had one quote that was we need more--the intelligence community, and, therefore, wait until you all received, that we knew more about what was going on on the streets of Beirut than we did in Detroit or Los Angeles.

How did you perceive that domestic blindness? How was that blindness communicated to you from people like Claudio, Monte, Irish Flynn, [unintell.] and then, you know, what steps did you take to say, okay, knowing, if you did know that there was a problem and how did you, either express that to the Secretary or to the intelligence community and say, hey, this is an issue for us?

MS. GARVEY: Well, with the benefit of hindsight, the blindness seems quite obvious. You know, we should have, you know, keep saying, we should have asked more or we should have pushed more, for example, but that's with the benefit of hindsight.

At the time, the way I would describe it is that the great emphasis--and I had some sympathy

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

for the person who said we knew more about, what was happening overseas. There was, certainly, a tremendous emphasis on what was happening overseas. And, in particular, the Middle East. To some degree, that may have even been a reflection of my own reading. I think reading The New York Times, you couldn't pick up a New York Times without reading a Tom Friedman editorial about, you know, the Middle East and the uncertainty and the unsettlement of that area.

So, the major focus was there. The way that I would describe the kind of domestic threat was sort of--it was definitely there. There were definitely questions. There were issues, I know that Irish Flynn had raised about concerns that the FBI and intelligence community, had on some Arab-American groups--about some Arab-American groups. Well, again, without much specificity. Were there actions that we could take? There were none.

And I might also add, this was also, you know, I can remember going to Detroit and meeting

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

with the Arab-American community because there were lots of concerns raised about that community's view of how we were treating them. So, it's a very difficult line.

I must say that even recently, I had enormous sympathy for Jet Blue and for, you know, to some degree the airlines and TSA. On the one hand, we want it so secure. I think this, still, I think is schizophrenic in the United States on our own views on this.

MR. RAIDT: Mm-hmm.

MS. GARVEY: We want it secure and I don't know whether Jet will follow the right procedures, i don't know enough about it. But on the face of it, they were trying to do the right thing. And, yet, the reaction that they received for doing that was, I think, you an only imagine what the climate might have been at that point.

MR. RAIDT: And that trip to Detroit, was that something that flowed right out of Jet Blue or how do you remember how that--

MS. GARVEY: Well, this was years--this

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was actually years ago. We had received a number of complaints from some members of Congress that Arab Americans were discriminated against through our Security program that, while we were--

MR. RAIDT: This was while ou were Administrator?

MS. GARVEY: While I was Administrator, I'm sorry. So, we went out to try to assure them that this was not out intent. But, again, so there was some--there was definitely questions that had been raised about elements of the community. But it was not specific and there was a sense that there was nothing imminent.

MR. RAIDT: Right.

MS. GARVEY: That we needed to prepare for, we needed to work on it, we needed to continue--

MR. RAIDT: And, I mean, when we talked to Irish and others, they talked about their frustration, you know, in that they would go to the CIA and go to the FBI and say we need more here and we need more there. And that they were told,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

including by John Deutsche [ph] and others that, you know, we've got plenty, don't worry about it. And I think Irish talked about wanting to go up to the Hill to, you know, pound on some desks, and, again, you know, was told by the CIA and others, you know, we're not going to support you on this you've got plenty.

More specifically, were you aware of those frustrations on his part and the idea that, hey, the CIA and the FBI are really blocking our efforts to try to get more?

MS. GARVEY: You know, I was aware to some degree of some frustration that Irish felt, I mean, he would express frustration to me about rulemaking, about a host of things and I'm sure he may have expressed that. I've never asked Monte if he expressed that directly to him. I'm sure he may have expressed it. In hindsight, I wish I had said, hey, you want me to go over and talk to the FBI?

MR. RAIDT: Talk to the Director.

MS. GARVEY: Talk to the Director. I did

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

not do that, but I can tell you, I don't think there was a thing Irish asked me to do that I didn't.

MR. RAIDT: Yeah, that's--

MS. GARVEY: And I don't want to push this on to him, I--

MR. RAIDT: No, no.

MS. GARVEY: I think he felt he had a good relationship with that he was doing--that he was getting as much as anyone was going to get.

MR. RAIDT: But there wasn't any point where Irish, or anyone else for that matter came to you and said, Jane, you know--

MS. GARVEY: Oh, absolutely not.

MR. RAIDT: --we need this because we're blind and they're not giving us this. And we need to raise this to the highest level?

MS. GARVEY: No, and in fact--in fact, quite the contrary. In the beginning when I was briefed, people made a point of saying post-PanAm. We have had a much better relationship with the FBI than we did previously. So, it may have been

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

baseline wasn't the right baseline. But people were more complimentary.

So, as I think back and think about what I knew about the domestic threat, I could certainly say that there was--and, anybody, again, reading the paper, post-World Trade Center would become concerned.

MR. RAIDT: Yes.

MS. GARVEY: That people felt that we had a plan, we were working towards that and the imminent threat was much more overseas, American interests abroad.

MR. RAIDT: And is it fair to say that hijacking versus bombing that was coming from others, like we kind of felt like we'd won the hijacking one, so it was--

MS. GARVEY: Right, we had had a good record with that.

MR. RAIDT: --the primary concern was closest to post-PanAm.

MS. GARVEY: Right.

MR. RAIDT: Let me just mention, three or

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

four very specific issues. Again, now, we're talking about a long period of time. So, but a few issues. Were you aware of made aware of, like, the National Intelligence Estimates, such as '95 and '97 more important saying, hey, not just for aviation, but the domestic problem was really heightened across the board? Was that something that, you know, Irish or anybody else had called to your attention, saying, you know, hey, this is NIE says we have a problem domestically, let's take a look at this and identify how this impacts civil aviation or is that--

MS. GARVEY: Not the way you've just described it. Did we talk about a growing concern domestically? Yes, again, post-World Trade, I think even before I arrived there there was a concern about that. Even the re-examination of the baseline in '97, grew out to some degree of that concern about--I can't say that someone said--

MR. RAIDT: Right, and then two others and we'll get out of that--

MR. RAIDT: Let me ask this, but, maybe

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and we'll talk about rulemaking a little bit is that, obviously, if you start down this arduous path of rulemaking, there was intel--

MS. GARVEY: Exactly.

MR. RAIDT: --suggested by that, so, it might be fair to say that if you're looking at the rulemaking and you're trying to justifying it, you're looking at putting in the certification and screening companies and other things, you're--

MS. GARVEY: You're recognized a concern.

MR. RAIDT: --yeah, you've had some recognition of a concern to that process, while you might not specifically have seen in NIE. Would that make sense?

MS. GARVEY: Yes, and I think that, when I felt we had a program underway that we needed to stay the course with that, that was in part a recognition of that.

MR. RAIDT: Let me ask two quick ones and then Bill's got some more specifics, on Moussaoui, the Moussaoui case, was that something that you were made aware of at all prior to 9/11? That was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

nothing--

MS. GARVEY: No.

MR. RAIDT: --in on the Phoenix memo of pilot training?

MS. GARVEY: No.

MR. RAIDT: And there was never any instance that you recall where anybody came up to you, Irish, or--said, you know, we've got terrorists training here as pilots, but we think that they're just kind of private pilots, not terrorists?

MS. GARVEY: No, absolutely not.

MR. RAIDT: None of that type of. Okay, Bill's got some and then we'll go to second vector and talk about prescreening and particularly CAPS.

MS. GARVEY: Sure.

MR. JOHNSTONE: Before we close out intelligence, I did want to show you some documents that we have received and give you a chance to look at them and, also, to find out whether you recall having seen them. The first, and these are both classified at the secret level. The first is from

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the Office of Civil Aviation Security Intelligence.
It says Threat Assessment from March 1998
entitled--

MS. GARVEY: March, 1998?

MR. JOHNSTONE: Yes, ma'am. I'm sorry, so
take the time you need, titled Osama bin Laden
World Islamic Front Threat to U.S. Civil Aviation.

MS. GARVEY: I'm sorry, I honestly don't
know if I actually saw it. I'm certainly familiar
with the name bin Laden, but I read it, but I
honestly don't remember.

MR. JOHNSTONE: All right, well, let me,
then pass this one to you, which is from a year
later.

MR. BRINKLEY: Would you routinely get
these kinds of documents?

MS. GARVEY: Yes, but, again, I don't want
to leave you with the impression that every day I
would get them. I would certainly get them if
Admiral Flynn thought there was a concern.

MR. BRINKLEY: Yeah.

MS. GARVEY: Although, I have to say, it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was more likely that he would come up and brief in person or bring it and sort of--

MR. BRINKLEY: Talk to you about it.

MS. GARVEY: --talk through it, yeah. I honestly don't remember whether--I can't say with certainty--

MR. JOHNSTONE: This second one is an FAA Intelligence Note from a year later, if you--particular attention to the section starting, marked Hijacking Scenarios and Evaluations and, again, this is an FAA document from 1999.

MR. JOHNSTONE: And that, I think what you're reading now is a part where the FAA Intelligence Division was evaluating various potential scenarios. And if you'll note, at the very bottom of that page, there is consideration of suicide hijacking within the United States.

MS. GARVEY: I don't, I cannot say for certain whether I did--

MR. JOHNSTONE: Okay. And the last page there's a distribution list and I don't believe it indicates it was routinely routed to your

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

department. Do you recall in this time period, because we see other reports, including a presentation that Pat McDonald, this was is SSI, because it went on the road, presenting what airlines and others within the larger civil aviation community--on the McDonald document there is a slide No. 24, which essentially refers to the same material in terms of potential domestic hijacking scenarios. And this went out. This one actually went out into earlier in 2001. And this one, this document was classified SSI; there's a classified version that also went to the carriers, but the information is similar.

Do you recall in this period, form 1999 right through 2001, having discussions about potential hijacking scenarios, whether overseas or in the United States?

MS. GARVEY: Hijacking that would involve suicide?

MR. JOHNSTONE: Or other scenarios?

MS. GARVEY: No, I mean, I knew that Pat did briefings for the airlines and I did hear about

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this one post-9/11, that he had gone out. But, again, it was low-risk not high probability from the perspective of the--or at the time.

MR. RAIDT: Let's go into the CAPS again, with the idea of the layered system with CAPS and this kind of conjoins when you were coming on as Administrator. What was your expectation of what CAPS was designed to do, just in general, what was its purpose?

MS. GARVEY: The purpose of CAPS, certainly from my perspective, was that it was an effective tool to be used, again, as part of a systems approach to security. That it was not going to--it was not going to highlight everyone, but it was a way to sort of narrow the field.

MR. RAIDT: And narrow the field?

MS. GARVEY: In terms of--narrow the field in terms potential threats to aviation.

MR. RAIDT: Across, whether it's bombing, hijacking--

MS. GARVEY: Exactly, it was, although I have that say that my own mind set at the time was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

explosives.

MR. RAIDT: Explosives, okay.

MS. GARVEY: Explosives, and I think that's probably it.

MR. RAIDT: Okay, let me get to a more specific question, because we are aware of kind of the lock out that the original design of CAPS and [unintell.] has to say okay, let's make it people who only check bags. And to be frank, that's been an issue that's been a concern to us. Because it looked like the initial aspects, we already had two fairly aggressive vectors of defense, you know, that CAPS has identified a pool of terrorists and subject them, as we did at one point, to extra personal screening and baggage screening and then EDS.

And families, you know, asked, I think it's a pretty good and tough question that we need to try and answer and any help that you can give us why, at a time when we had a National Intelligence Estimate where the domestic threat is going up, you have conviction of Rassam [ph] and the World Trade

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Center folks or no the African bombing folks in the bank, you got all the State Department and the IG saying, well, something's brewing.

And at the same time, you know, we decided that yes, it was a security directive that was allowed to expire that said, let's just make CAPS only to EDS that we won't require that it be at the selectee gets the extra screening. Can you take us through, do you remember that change in policy, any discussion surrounding that change in policy and maybe some of the influences that caused it?

MS. GARVEY: And I'm telling you, I'm really having a hard time in terms of sequence--

MR. RAIDT: Yeah, I understand.

MS. GARVEY: --of things. I mean, when I came in, I actually think that policy had been, a need to go back and actually double check. What I remember about CAPS--certainly, I remember it being controversial. Again, I think one of the first meetings I had fairly early in my tenure, by the first of the year was bringing the airlines in to say we are going to do CAPS, we've got a deadline.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

We've got an issue here, we're going to do it.

But the decision to go with the checked bags was, again, driven more by that was the notion and that was the view of where the bombs would be. We had people going through metal detectors, so we had, while, imperfect--and are not perfect--it was certainly a way to pick up some potential problems.

Linking it to the checked bag was, again, based on the intelligence that we saw. You know, a sensible approach. I think whenever you're looking at a program, there is always the balance, too, what can we get done? What can we achieve? And there is, and I say this without saying you should use it. This is not a question and I don't mean to suggest that you compromise anything that shouldn't be compromised. But there are also the practical realities of what can we get up and what can we get up quickly. And that may have been part of it.

MR. RAIDT: That's a good point.

MS. GARVEY: I'd like to go back and look. But that fall period for me was a lot of Y-2-K and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a lot of--

MR. RAIDT: That's a good point and let's talk about it from the airline perspective. And I don't mean this pejoratively in any way, but just from the airline perspective because, we are aware that CAPS was designed with hijack profiles in mind. And, again, the families came up with the question that, well, the thing's built on hijacking profiles, and all of a sudden it went from that to bombs and how did that happen and let me have you comment on this from the air carrier perspective, because we know, how they are through rulemaking; we know how they are with the Hill; and we know how the pressures that are brought on you.

MR. BRINKLEY: I'm glad we settled that.

MR. RAIDT: Do you, just let me state it, that based on opportunity to take two fairly aggressive vectors of defense and, this is not a good word, but I'll use it, is dumb-them-down a little bit. Saying, you know, CAPS is a pain in the ass for us, TBS is a pain in the ass for us; and here's a way to just--to not do away with them

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

both, because that's politically untenable for use being air carriers, so let's meld the two into an area where it disrupts it, the system, as little as possible and we're still doing something.

Is that fair; accurate, not fair?

MS. GARVEY: It's always easy to hit the airlines when I'm standing here. You know, look, the airlines were difficult. Not just on security. You know, there tends to be, when you're a regulatory agency, your relationship with the airlines is always going to be somewhat confrontational. Somewhat--you're going to look at things very differently.

You know, having said that, did they use that as an opportunity? They certainly didn't express that to me. They certainly didn't say it in that way. And I think then the question becomes if you make changes are you, in fact, making them at the expense of what we knew about security? And I certainly believe that we were not making any changes based on what, you know, that would compromise the security as we understand it.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT: So there was never any point where either internally or from externally with the air carriers where you got the impression that, you know, this was as good way to resolve their--

MS. GARVEY: Not as you've described it, but I can certainly tell you the reason for the meeting in the early part of that year was because Irish was saying we're having problems with the airlines. They're not being quite as cooperative as we--we needed them to really see the urgency. And I can remember talking very directly with Bob Baker about it.

MR. RAIDT: Yeah.

MS. GARVEY: You knock, who was a very respected member of the aviation community, a wonderful, wonderful man who made enormous contributions. And who was very active in any number of aviation issues, free flight, you know, on the rapid response team for the Secretary, any number of issues.

And I can remember him expressing frustration on his own. Because in his mind, we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were still--we were putting a lot of resources into something that even with knowing what he knew, didn't seem to be the threat that warranted it.

MR. JOHNSTONE: [unintell.]

MS. GARVEY: Well, just sort of general, yeah, CAPS and EDS, I mean, just sort of a general, sort of, and then, again, I don't want to suggest he was fighting it in that way, but a constant frustration.

I mean, here's a guy who probably is more worried about an uncontrolled engine failure, or who is thinking, do I have everything I need for, you know, in terms of controlled flight into the terrain. I mean, he's thinking safety issues as it relates to the--that's where he saw his biggest threat.

So, here comes the FAA, here comes Congress layering on in his view--layering on certain requirements, which, you know, in his mind didn't quite raise to the same level as some of the safety issues that he saw.

And, again, not to suggest that he wasn't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

trying to be cooperative, it was just, I think, a level of frustration he felt. It was a harder pill for them to swallow than some of the other unpleasant pills we gave them.

MR. RAIDT: [unintell.] kind of the walk out, and we had our document request but we need to--and we asked the families kind of get to the nub of how and why the decision was made to do--to join that. And inasmuch as it was a matter of the security directive being allowed to expire, there's probably not much of a record on, you know, whether you don't--

MS. GARVEY: No, and I honestly don't remember that, but when you say you've requested a roll out or documents, what--

MR. RAIDT: Well, we--I mean, we've asked for the Security Directives that not only were in place, but those that expired, but it's something that we can come back to later--but it

MS. GARVEY: All right and I apologize for that, I'm just not--

MR. RAIDT: Anything on CAPS or

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

[unintell.] training?

MR. BRINKLEY: Well, first of all, we are aware that the Gore Commission made the linkage, too, between CAPS and baggage.

MS. GARVEY: And that's why I guess I was a little puzzled because I think that had even been determined before I got there.

MR. JOHNSTONE: But a question that comes to mind is related to what John was saying, which is that the CAPS and you may or may not have knowledge on this, but CAPS was designed with the hijacking profile in mind, at least to a considerable extent in the weights and factors. And as, per the Gore Commission and then the system, as it came to be deployed, it ends up, as I think you corroborated, it ends up being applied to the bomb threat on-board.

It would seem that if you're looking for a hijacker and you don't think that they're suicidal--if CAPS is looking for hijackers and you don't at this time, really think that suicide is likely. That a focus on the checked baggage of a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

selectee holding a bomb in and that would tend to seem to be outside of the paradigm that the system is focused on.

I mean, it's a question that we would have for the Gore Commission, too. But it would seem--and you spoke about the layering earlier. And this just seems on the surface, I know we've had some comments from family members, just doesn't seem like, like John just referred to, it just doesn't seem to be intellectually rigorous.

MS. GARVEY: That's a fair question.

MR. BRINKLEY: Except for the dupe that I put it in Bill's bag--

MR. JOHNSTONE: Yeah, right.

MR. BRINKLEY: --and he probably doesn't know.

MS. GARVEY: Right.

MR. BRINKLEY: But then, the question is why would then, Bill have the P&R information--

MR. JOHNSTONE: Well, that's right--

MR. BRINKLEY: --to make him the selectee, because I would try to figure out not to have that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

happen, I mean.

MS. GARVEY: Right

MR. BRINKLEY: I mean, John can't just
be--the logic of it doesn't quite--

MR. RAIDT: And I would--

MS. GARVEY: I don't know the answer.

MR. BRINKLEY: You think about that.

MS. GARVEY: Yeah.

MR. JOHNSTONE: You could go a step
further and, you know, with the layers, that is
checkpoint screening was failing at such a high
rate, according to Red Team tests and others that,
and they're getting through and you had mentioned
crew training and that type of thing, in this
vector you know that the idea that you have system
to identify where that pool of terrorists were and
then say, all right, we've decided you're only
going to be a bomber not a hijacker, that doesn't
compute. And it's a good question and one that
we're struggling with.

MS. GARVEY: Have you had a chance to talk
to the people who designed the CAPS? I will tell

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you that I--I was briefed, by choice, only on the highest levels about what CAPS contained.

MR. JOHNSTONE: We're going to go back and talk to them in much more detail because it--

MS. GARVEY: --much more detail, I think that would be--

MR. JOHNSTONE: --anecdotally, we've sort of come to this conclusion--

MS. GARVEY: --yeah.

MR. JOHNSTONE: --and we're going to go back now and say, we're confused.

MS. GARVEY: Right.

MR. JOHNSTONE: I'm confused. I'm not going to speak for my colleagues.

MR. RAIDT: No--

MS. GARVEY: No, I think that's a fair question and I was just going to say, if you're willing to share that, I'd be interested in what--because I do think it's a very fair question.

MR. JOHNSTONE: But we are going to say talk to us about, the pilot program was Northwest.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Right.

MR. JOHNSTONE: And how did this come about, how did you create these factors and then, how did we, you know--we are. And I understand the level of briefing you would get would not--might not get into this inconsistency of--

MS. GARVEY: Right.

MR. JOHNSTONE: --how they got there. You would be, this is just what we would be doing and why we'd be doing it.

MR. RAIDT: [unintell.]--beat that dead horse but what somebody was saying that, one, we thought had hijacking beat and then kinda indicated that things were going so well that that's why we were able to focus on explosives. And yet, the kind of assessments that were being done didn't say it was going so well. So, that's what we're going to be. What we're [unintell.]

MS. GARVEY: Mm-hmm.

MR. BRINKLEY: We'd appreciate what you'd have to say.

MR. RAIDT: The checkpoint screening,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

[unintell.]--talked about the Red Team. And one of the big issues there and just kind of your comments on how, again, maybe it's the layering issue, was that we had a gap between, and this is pure physics, we understand that, between what was prohibited and what was detectable. And kind of what are your comments? Is that something that I assume everyone recognized and then how was that within the realm of acceptable risk, there's nothing we could do about it or, again, that was some layering that should have been able to take care of?

MS. GARVEY: I think it's certainly we'd like to think in an ideal world, but it was something layering could get at. Having said that, I think there was still enormous frustration that the technology was not perfect. That we were dealing with human beings who, perhaps, day in and day out lost some recognition of how important their jobs were.

And, again, not unique to Security, it's an issue--the human factor issue is something that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

aviation faces in safety and, frankly, I think TSA still faces it even with a, you know, a much better workforce. So, I don't want to say that it was ever anything that you would sort of say, well, it's just something we have to live with. I think it's something we recognized and knew had to be better. The Threat Imaging program was certainly an attempt to get at that. Certainly, the rulemaking that we were trying to do with certification of the screeners was something that we were trying to get out.

The work that was going on at the Tech Center. Again there again there's a sometimes a bit of a schizophrenia. We will say that the EDF machines don't pick up or that there's too much of a high false-alarm rate. And then others will say, well, wait a minute, the EDF machine, our standards are the wrong ones, we're asking too much of it. You know, we shouldn't have to pick up all that.

So, you know, we have some--I think we have some legitimate challenges around technology, that's still remains. So, it is a combination of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

thinking that we needed to do--we needed to have the redundancies that we first took. We needed to focus more on the human factors, and we needed to continue to pursue firm answers technologically.

MR. BRINKLEY: Maybe I--oh, go ahead.

MS. GARVEY: You know, and this is, perhaps, getting ahead of it because, just parenthetically, but I think if there--and then with the frustration that I certainly felt in watching Congress post-9/11, with the focus, and it was an understandable one, was get something physically that I can touch and feel and put into the airport.

But their will, it is virtually impossible to get a foolproof system, as we have seen in the last couple of weeks and saw with the fellow with the cargo--

MR. RAIDT: That killed himself?

MS. GARVEY: Right. But, so I always come back to one of the real key pieces is the intelligence.

MR. RAIDT: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: How robust is our intelligence system; how well are we sharing it; are the right people getting the right information? And I wonder what if we had continued with getting as many EDFs, but perhaps there had been less of that and, perhaps, more of an emphasis on intelligence piece.

MR. JOHNSTONE [?]: If we could, why don't we, just like in screening, I mean, we know that the screening system had some degrees of inefficiency and ineffectiveness.

MS. GARVEY: No doubt.

MR. JOHNSTONE: No doubt. We had DOT IG, you had GAO reports.

MS. GARVEY: We had FAA.

MR. JOHNSTONE: Had FAA Red Team--we know the special assessment program and we know the system is not really that good. I mean, now, if it's a percentage of effectiveness, obviously, there's some percentage of effectiveness that are expected that you would have as an expectation when you have, I mean, there has to be some comparison

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

going on somewhere on--we know that it's not perfect but how imperfect do we feel like it can be and so how we can determine how to structure the next layer. How do we fill in the gaps between the circles of--that we have in the layered approach.

So, I guess my question is, if we've seen the effectiveness of the screening checkpoint down in the teens and the 20 percent effectiveness and even though we think we may have hijackings done, I mean, one could argue that that's just because somebody hadn't decided to do it versus for their own self-interest and objectives versus the system.

MS. GARVEY: Well, it could have been that it was enough of a deterrent that they felt it--

MR. JOHNSTONE: --correct, but--

MS. GARVEY: --that they felt it was.

MR. JOHNSTONE: --and so--but the intel reports are somewhat contradictory to some of that. I mean, we're seeing some--there's some thinking in there that hijackings are still around, yet--

MS. GARVEY: Yeah, I'm--

MR. JOHNSTONE: --you see there's starting

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to be some disconnects--

MS. GARVEY: Right and I--

MR. JOHNSTONE: --but we don't and what I'm really driving to is the next layers which were obviously put in post-9/11 was the Air Marshal program and that piece. And was the hardening of the cockpit doors. Now, you're having air rage [ph] and where I'm really going is the hardening of the cockpit doors. This is obvious. You're having air rage incidents over time. There's been a history of some recommendations out of NTSB or through the system or through the system that we ought to do something about these doors to keep passengers from just breaking in.

MS. GARVEY: Really, I don't think--I don't remember seeing anything from NTSB.

MR. JOHNSTONE: Not probably during your tenure. It's actually--

MS. GARVEY: No, I mean, post-9/11, I remember, I specifically asked that.

MR. JOHNSTONE: Asked?

MS. GARVEY: Did we ever--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT [?]: Yeah, I asked Jim Hall and he said that they considered it--

MR. JOHNSTONE: Considered it.

MR. RAIDT: --at one point, but it never worked.

MS. GARVEY: Never worked, yeah.

MR. RAIDT: And--

MR. JOHNSTONE: There were some discussions--

MS. GARVEY: Never done it, yeah.

MR. JOHNSTONE: There were some discussions of it.

MR. RAIDT: Oddly, there was, I just ran into this the other day. In 1965 FAA issued a rule yeah, to lock--

MR. JOHNSTONE: To lock the doors.

MR. RAIDT: --block cockpit intrusions. We have no idea whether that was repealed by rule or just kind of evaporated--

MS. GARVEY: Or just ignored.

MR. JOHNSTONE: And we know there was some key issues that--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Yes.

MR. JOHNSTONE: --that had, you know, that all had the common keys from Boeing.

MS. GARVEY: Sure.

MR. JOHNSTONE: There were some key control issues that I think were just very commonsensical that had at least been discussed and some push-back on--

MS. GARVEY: Right.

MR. JOHNSTONE: --but that's why they were hanging by there and not hanging around people. I mean, there's something that's going on here in the other side and I don't know if it came out to like standards or somewhere somebody, and what we're thinking is, there was also a hardening of the cockpit door group that was meeting, led by flight standards in the late '90s. And trying to figure out how to do that retroactively, retrofit them--new stuff.

So, I'm just--and which FAA Security sat on. In saying that we need their in--they're putting input into this system of saying we need to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

do something at improving into these doors. I mean.

MS. GARVEY: Right.

MR. JOHNSTONE: Now that might be primarily from an IAD perspective of into the cabin IADs versus hijacking--

MS. GARVEY: [unintell.]

MR. JOHNSTONE: But you get two for the price of one approach.

MS. GARVEY: Yeah, although, ironically--

MR. JOHNSTONE: How do you think--how do you sort of think about, recall that process?

MS. GARVEY: Well, the flight, the securing of the cockpit door was actually an interesting one because I actually remember, you know, when I was at--when I was at the--at Logan, we brought [unintell.] and we brought some folks from Israel over to talk with us. And I remember a discussion with some of the Israelis about securing of the cockpit door. And it came up in one of the--Security wasn't even in the room. It came up with one of the flight standards--in one of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

flight standards discussions in relation, actually, to a general aviation decompression accident. And accident around decompression.

And, at that time, one of the flight standards people said this is why we've always struggled with the notion of a secure cockpit door, because there are safety issues around decompression. There's always potential of a heart attack or something like that. But the decompression was the big thing.

And I said, well, I remember talking to the Israelis how do they do it? And I remember the discussion. The answer was because for them the risk for terrorism was greater than the risk of decompression. Obviously, at this point in our history, we weren't there. We sure were after September 11. But, at that point, we were not there. So there was discussion. Until we can figure out how to solve the decompression issues, we are concerned.

And they're not, again, it's valuing and judging risks and making judgment-based on what you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

know. So, that was--but that's interesting about '65, I'd never heard that before--

MR. RAIDT: Yeah, it's one of the things we're going to look into is how it happened.

MS. GARVEY: But it was, clearly something that Flight Standards was aware of for different reasons, obviously, as you pointed out.

MR. JOHNSTONE: Yeah, now I guess this, in your management team, and you have standards in there and you have your management team--

MS. GARVEY: The AVR people.

MR. JOHNSTONE: --that's correct. You've got them all--we're getting some--now, it's just hindsight, I mean, I'm not--just not meaning to be critical, but the observation is you've got security; you've got air rage, we have this other issue, we've got an increasing domestic threat. I mean there are some things starting to--

MS. GARVEY: Well, yes--

MR. JOHNSTONE: --and you're working through--I know you're working through that--

MS. GARVEY: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSTONE: --because they had the group and you're working with the industry.

MS. GARVEY: Right.

MR. JOHNSTONE: But--

MS. GARVEY: But there was the decompression issue and I don't want to diminish that in any way--that was a very--

MR. JOHNSTONE: That at that time was basically overriding--

MS. GARVEY: --it was the safety issues that were--

MR. JOHNSTONE: --precedent--

MS. GARVEY: --yes.

MR. JOHNSTONE: --were taking the precedent?

MS. GARVEY: Right, because, again, based on what we knew, we felt--

MR. JOHNSTONE: And see, what the, but it from my official thought, though, is that that layer with a lessened effective security screen piece, checkpoint screen, not meeting, not coming up to some level, unless we were satisfied at 20 or

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

30 percent effectiveness, which I don't think we were--

MS. GARVEY: Mm-hmm.

MR. JOHNSTONE: --I mean, you're writing rules to try to make that better. It's that piece there is sitting there that doesn't have a layer because you can get to the cockpit--

MS. GARVEY: Mm-hmm, but again--

MR. JOHNSTONE: --but that's, I mean--

MR. GIBSON --mm-hmm, I understand and, again, I think your point is a good one that it's hindsight that makes that clearer. I think at the time their view was--and I want to clarify something. I don't think, I certainly would never say we stopped hijacking. We had, I don't ever view any problem in aviation as fully solved. I--

MR. JOHNSTONE: Actually, I think Jim May [ph], may have said that that--

MS. GARVEY: --oh, okay.

MR. RAIDT: Underwood, said that, too.

MR. JOHNSTONE: Yeah, Jim Under--

MS. GARVEY: We certainly had a better

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

record than--

MR. JOHNSTONE: We hadn't had one, domestically, since '91.

MS. GARVEY: Ten years or something, yeah.

MR. JOHNSTONE: They thought they'd won that war.

MS. GARVEY: I think, in aviation, that's probably a dangerous statement to ever make almost about anything. There may be some safety regulations where you feel--but even control flight in-training, as good as that is, you know--

MR. JOHNSTONE: That's a good point.

MS. GARVEY: --hmmm, you know, we get into the human factor issue again.

MR. JOHNSTONE: Let me backtrack for a second, then we'll go--let's get cargo and mail. And talk about aircraft protection and kind of the common strategy and aviation security alert levels. But we were talking about intelligence and the overseas threat.

Do you recall working with Irish or Canavan saying, hey, you know, we have a heightened

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

threat overseas--were there any measures that you can remember that were put into place to address this heightened overseas threat or was it kind of thought that, well, we have the system in place is pretty strong, it looks very, very solid?

MS. GARVEY: Well, I think, certainly, the extraordinary measures program, you know, and at one point, I think it went up and I'm not going to remember exactly the number, but there were certainly over 40 airports, I believe that overseas that would fall into that category.

So that really was, you know, that was sort of at the core of how you'd take extra measures, extra steps overseas. And that really was the core of it.

MR. JOHNSTONE: [unintell.] I think of the ACSS measures, extraordinary airport measures.

MR. RAIDT: Because, again, it's a tough question and it's one that comes to us from the families, because, you know, all the testimony was focused at, you know, we weren't looking domestically, it was overseas, that was the nature

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of the intelligence community--

MS. GARVEY: Right.

MR. RAIDT: --and the national intelligence assessment, you know, and world conditions and then the question arises, well, if that's where we define the threat, then what did we do to address it, then overseas?

MS. GARVEY: Right.

MR. RAIDT: It--

MS. GARVEY: Well, I think looking--I think, well, let me just first go back to the--I think you have to look at those individual measures, they were additional steps and I won't remember all of them. But, you know, it's almost, in a sense, I view it as a beefing up of a lot of the measures that we already had in place; it's sort of taking it to the next level. Similar to what we've been doing with the Code Red and the Code Orange, post-9/11.

MR. RAIDT: So, additional steps were taken that summer, as you recall?

MS. GARVEY: Well, I don't know that they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

actually were taken that summer, I'd have to go back and look. But just when you view the extraordinary airports program, that's what we would do.

Notification of the airlines during that sort of spring and summer about increased concerns about overseas issues, but, again, without a whole lot of specificity, but interests overseas; be on your guard at the airlines; keep your--be sure you have your measures in place. Be sure that in those places where we've identified in the past, extra steps need to be taken, make sure those are taken. So, this, certainly, were going out to the airlines for that sort of thing for the summer.

MR. JOHNSTONE: Well, let's talk a little bit about aircraft protection. And some of the layers and one of them being FAMS [ph], we all know that that was a program that atrophied over the years and part of what we've been told was that, you know, with sophisticated checkpoint screening, it then made FAMS less important, and then you get back to the same question that if that was at 30 or

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

40 percent, why would we, you know, eliminate a layer when we're performing at that low a level? If you can take us through kind of, from your perspective, what you were told about FAMS or the policy with FAMS or was it kind of a legislative thing that--

MS. GARVEY: Yeah, it was in place, FAMS, was obviously in place when I came to the FAA; certainly had been briefed on it; certainly knew about it. I certainly knew that its focus was international.

I guess I would give it a slightly different--and I'm always concerned about sounding defensive, but I think, as I look back, one of the great challenges--I don't think I ever denied Security any request for either dollars or for personnel. Certainly not to my knowledge. Irish might challenge me on that, but I don't think I did. As I don't think I did with safety inspectors, as well. We had one bad year that kind of OFT [ph], but we, I think. But, having said that, there still were constraints within the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

budget. There still was the cap that you deal with as part of an overall DOT perspective.

And, quite honestly, even the \$100 million, I was very grateful to the Gore Commission, because they really made it almost impossible for either OMB or OFT or anyone to really cut that.

MR. RAIDT: [unintell.]

MS. GARVEY: Yeah, so, but for that, I'm not sure we would have gotten and, I don't mean it to be critical. I feel for a Secretary of Transportation who has to weigh, the Coast Guard, the FAA, you know, federal highway, highway safety programs, extraordinarily powerful and important program.

So, within the context of the FAA budget, within the context of a security budget, and this may have been a wrong decision, but FAMS did not rise to the same level as some of the other programs. And it was a judgment call within the boundaries of what we knew we had to work with.

MR. RAIDT (?): Well, I appreciate that,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and we're going to, Sam's going to have a little discussion on budget resources and we will be very interested in kind of the process, you know, of how you were supposed to make your budget. Did you say tell us what you need and then we'll get back to you or was it here's the amount of money you're getting, no, you know, divide your programs like we would in Congress where the subcommittees get a certain amount of money, then they have to divide it up in kind of your relationship with your associate director all the way through Transportation, some of those things.

MR. BRINKLEY: Interesting.

MR. RAIDT: And there are no binders there within the agency which--

MS. GARVEY: Yeah, you want those answers now?

MR. RAIDT: Yeah. Just very quickly on the pilot and crew training. There was the common strategy and I know there were efforts that summer to try to upgrade it. Do you recall any conversations or issues about whether this whole

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

paradigm of--with the hijacking that, you know, cooperate, do what they say, get it on the ground because of past history, same events, what to do. Was there ever any discussion of whether that's the right paradigm in this era of, you know, suicide terrorists, if not suicide hijackers? Any discussions that you recall?

MS. GARVEY: I do not recall any discussion about changing it. And, again, I want to stress that people really thought that was the right approach and even the suicide incidents that were cited earlier, only look as obvious as they do with the perfection of hindsight. They were, at the time, still viewed as very low risk.

MR. RAIDT: Right.

MS. GARVEY: In an airplane that is 40,000 feet in the air, cooperating, working with, cajoling, to some degree, really became the basis--was the basis of all of our training. And, ironically, I remember being in the Operations and Command Center, the Operations Center--I was trying to remember this one. It must have been a couple

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of weeks-- [unintell.] so many incidents, post-9/11 of scares and it was unclear what was really happening. We spent a lot of time there.

But there was an incident at Dulles that I remember and I remember being there. There was a flight attendant that had left a disturbing message. Came to the dispatcher, came to finally ended up at the FAA. And we were communicating with the plane, it had never left, it was--it had taxied out to a secure location at Dulles. And the pilots followed the training that they had always had, I mean, it was a week or two weeks, and they climbed out of the window.

MR. RAIDT: This was post-9/11?

MS. GARVEY: Post 9/11 and it was, you know, again, they were doing what they--which is get out of the way because they won't have somebody to pilot the plane. Knowing, now, of course. It turned out to be nothing, it was another, you know, sort of misunderstanding. But it was, I think, just an indication that, while I don't think that anything like 9/11 could ever happen again. That

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was the discussion the other night on TV about the fellow who had put the box cutters through. And a security expert saying, no one will ever back down in the face of box cutter--

MR. RAIDT: We have a new layer of security.

MS. GARVEY: --yeah, we have a new redundancy, don't we.

MR. RAIDT: Yeah. Two quick things on that. On exercises, do you recall participating in any exercises with respect to, you know, large or small emergencies with Security and, specifically, in hijack exercises, whether tabletop or anything else?

MS. GARVEY: Well, we had a number of exercise pre Y-2-K, which were somewhat security in nature that I participated in. We had a number, I'm not sure I would call it official, no I would not call it an official tabletop exercise, but I've certainly been briefed on what we do in the case of a hijacking when the ops center was open. I live, you know, seven minutes from the FAA and there were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

probably a half a dozen incidents when I was Administrator, where we thought was a potential hijacking, so I had certainly opportunities then to--

MR. RAIDT: That was prior to 9/11--

MS. GARVEY: That was prior to 9/11, none of them, of course, turned out to be, someone had pushed the wrong thing. A couple of times I was there and, so, could just walk across the hall. Other times I was at home and in communication and one time came into check to see what was going on.

MR. RAIDT: And we'll want to talk to you a little bit later on that one. And then the last one on aviation security alert levels. We know it was a matrix of, you know, here's the conditions that leads to this alert level, Bill knows more about this than I do and at that alert level says you do these things. And, that, of course everybody could think--what alert level was it justified?

MS. GARVEY: Yeah.

MR. RAIDT: Do you recall as far as that,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there's two general questions, though: Do you recall any discussions about the adequacy of the aviation security levels, whether they needed to be looked at or kind of the justification that we remained at three in the environment that was leading up to that summer? Anything along--

MS. GARVEY: I don't, I don't.

MR. RAIDT: And who would make the decision as far as aviation security was concerned?

MS. GARVEY: Well, from my perspective, it was, clearly, coming out of Security arm of the FAA with Admiral Flynn and his successor. But, clearly, that was based on work that they were doing with--close work that they were doing with the FBI or with the intelligence agencies, which he would often communicate I mean, based on--

MR. RAIDT: So, if we wanted to go to four or take it back to two, how would that work, would he make a recommendation to you and you'd make it to the Secretary? Where did that decision end up?

MS. GARVEY: Generally, I mean, it would be Irish coming to me, S60 going to the Secretary.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT: Do you recall any changes--

MS. GARVEY: No.

MR. RAIDT: --in the level during your
tenure?

MS. GARVEY: No, oh, gosh, I don't want to
be so quick to say that. I just don't remember.

MR. RAIDT: Okay. You know, on any of
these, if you have more information later.

MR. JOHNSTONE: The process was,
definitely Irish would go to you, you'd go S60,
S60 would go to the Secretary?

MS. GARVEY: Actually I wouldn't go to
S60, that would almost happen, you know,
simultaneously, in other words Irish and S60 would
already have discussed and worked with the
intelligence community then they would
simultaneously--

MR. RAIDT: That was why the Secretary
would have to okay that?

MS. GARVEY: Mm-hmm.

MR. BRINKLEY: Do we want to--do you want
to take a few minutes break?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Um--

MR. BRINKLEY: If you're fine, we can continue, but, it's up to you.

MS. GARVEY: Well, how much longer is this going to take?

MR. JOHNSTONE: Seriously, we don't know.

MS. GARVEY: Well, let's take a break, then, if you don't mind. Thank you, I appreciate that.

[BREAK.]

MR. JOHNSTONE: We're resuming the interview and Mr. Brinkley is finishing up on some other business so we will start back up. John, were you finished with the vector?

MR. RAIDT: Yeah, compliance.

MR. JOHNSTONE: Yeah, we'll do just some short questions, including a couple from the 9/11 families on enforcement and compliance. I wanted to start with one that we've talked about the intelligence data that you received, in terms of defining the threat. And vulnerability data you received from inside the system on vulnerabilities.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

As we're trying to look at the decision-making process within the system, at large, including Congress and the White House in addition to the agency level.

We're trying to understand the process. And so, the question occurs about, you know, you were evaluating the threat through intelligence and vulnerability through performance testing and other forms of systems evaluation.

What about, how did you bring it all together to do risk assessment and risk management? And, in particular, we're looking for where in the system consequence assessment came into play. So, can you talk to us a little bit about--

MS. GARVEY: Do you mean consequences for the airlines or--

MR. RAIDT: Well, here it would be more in the form of when you're doing--I should make it just more general for you to explain how you did risk management or risk assessment at FAA during your tenure? On consequences, that's mostly an attempt to get at, okay, if something may have a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

remote possibility of happening. But if it has, well, like an asteroid impact. You know, something outside of this realm, you know, the chances are, in any one year are exceedingly remote, but the scientific record shows that eventually, there'll be another asteroid impact with global catastrophic impact. But in terms of, for example, in reading the documents that we looked at a little earlier on consideration of suicide hijackings in the intel summaries. They said, well, we think this is unlikely, but the question would be, okay, unlikely, but what are the consequences of successful domestic suicide hijacking would obviously be more than a traditional hijacking of, you know, the taking of hostages and negotiating on that.

So, how did you put it all together, in terms of making your budget and policy priorities?

MS. GARVEY: Right, right--well, certainly, in terms of risk management, many of those decisions were based very much on what intelligence was producing; based on their work

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

with the other intelligence agencies. We were better, though not perfect at data analysis. We were better and got better in the last, you know, few years. The FAA, I think, historically, can be data-rich, but information poor, like a lot of agencies; not unique to the FAA. And, I might add, like I'm finding, like many in the private sector, as well.

So the real challenge is how do you analyze that data. We were better at that on security; we were better than that on safety. But we were, you know, very much, as an agency, I think, relying on the professionalism of the people we had in the intelligence shop; their relationship with the intelligence community, the recommendations that would come from there.

And, again, not to lay too much on the Gore Commission, but we felt that had given us a fairly good blueprint that on the areas that we needed to focus.

MR. RAIDT: Would it be fair to say that your priorities, then, would be more threat-driven?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Oh, yes, I think very much so. In fact, I think it was--I've seen this quote and I may have included in my testimony, Brian Jenkins [ph] quote about security is often reactive. And I think, again, from an administrator's perspective, one of the great challenges both for security and for safety is how do you determine the precursors? How do you identify the trends?

Historically, as an agency; historically, as an industry, aviation has developed agendas, whether it's safety or security, on historical data. We look at past accidents; you do that with the NTSB. You look at those accidents; you make determinations, you look at past security events, you make determinations, you make policy judgments.

And so I think one of the great challenges, as a community, not just for the FAA, but as a community, is how do we identify the precursors. How do we identify the trends. I think we are doing--this may be unfair, but let me just say, I am more familiar with the way we're

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

approaching it from safety. Because that was purely the domain of the FAA.

I am, perhaps, less clear on how the intelligence community made be dealing with the same challenge. But for us, risk assessment, at that time, was based primarily on the intelligence that was gathered by the professionals. And the work that they did.

MR. RAIDT: Let me ask you to move on, to ask you a couple, one of the things the Commission is trying to do is to get answers that 9/11 families have submitted. Let's only ask you two of those at this point.

I think one of these may have even been asked at the hearing. Question? Why did screening contractors pay 10-cents on the dollar for fines imposed on them for violations? Why were the fines lowered?

MS. GARVEY: You mean, in what cases were they lowered? I mean, actually--

MR. RAIDT: This is a general question--

MS. GARVEY: --okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT: --and so I think what--

MS. GARVEY: And fines, if I might add, again, somewhat from out here on the safety side, fines were, we'd gone to Congress, as I understand it, way before my time, and take no credit for this, to raise the level of fines from \$1,000 to \$10,000. So, and there is, and I think from the FAA's perspective, the goal was compliance; the goal was to fix the problem. The goal wasn't necessarily to raise money from the airlines, but I do understand the argument that the larger the fine that the more you grab their attention.

MR. RAIDT: Is that within your recollection that they would be reduced as much as 90-cents--

MS. GARVEY: No--

MR. RAIDT: --on the dollar?

MS. GARVEY: --not at all, no. So, I'm puzzled by that and I'm not saying it's not true, I'm just not aware of that.

MR. JOHNSTONE [?]: Let me ask the question, though. Obviously, there's a piece

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in--when Irish or even Standards or somebody fines them, I mean, now it's going to go into some process.

MS. GARVEY: Right, there is an opportunity, absolutely.

MR. JOHNSTONE: How would you describe that process and the, you know, some of these things, language can they challenge, I mean, sort of describe this process and how do you think it would come out, even give a perception that we're down to 10-cents on the dollars in the fines that actually--

MR. RAIDT: And I think Ms. Giavo [ph], was the source of the 10-cents on the dollar.

MS. GARVEY: I wonder, did she ever recommend that we raise them or did she ever take a look at them?

MR. JOHNSTONE: I think she was--the inference, from my recollection, at the hearing--and I guess I can go back and look--was that it was the negotiation process that got them this 10-cents on the dollar.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: And I don't know whether I'd call it a negotiation process. Although that--

MR. JOHNSTONE: Well, it leads to that--

MS. GARVEY: Sure, absolutely.

MR. JOHNSTONE: --perception.

MS. GARVEY: Yeah, and the way the process would work is that the fine would occur, you know, on site with an individual inspector. He would make a finding, you know, make a recommendation. It would then go on to the regional office and then on to the, in some cases, to the headquarters--and then on to the headquarters, obviously.

And there were opportunities for the airline to submit--

MR. JOHNSTONE: Rebuttal?

MS. GARVEY: Rebuttal, if you will.

MR. RAIDT: Basic due process?

MS. GARVEY: Exactly, it's a due process and so there probably were opportunities and that there probably were times the amounts were reduced.

MR. RAIDT: Were you involved in--

MS. GARVEY: No, no, not to my

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

recollection.

MR. JOHNSTONE: Would that be General Counsel?

MS. GARVEY: It would be General Counsel, that really became very much--

MR. RAIDT: Would there have been any cases where you would have been involved in--

MS. GARVEY: I don't recall any.

MR. JOHNSTONE: Do you recall ever being talked to by members of Congress or by Secretary, saying, Jane, you know, this guys can't sustain a lot of penalties and fines or anything like that?

MS. GARVEY: No, I do remember, I do know that we had a policy to publish it, which was fairly new post-Gore Commission to publish some of the fines.

MR. JOHNSTONE: This was after a year or two years after--

MS. GARVEY: Yeah, after it had been resolved. And the airlines were not happy with that, and we heard a lot of complaints about that. And, you know, in fairness to them, I supposed if

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they felt that they had corrected the problem and it was a year later the public was left with the sense that they hadn't corrected it, we continued, though with that policy, we felt it was important.

MR. JOHNSTONE: Did you have that publication having a good effect that they were so worried about that that they--

MS. GARVEY: Well, I think it obviously had enough of an effect that they were calling to complain about it. But I do think, I will say that I think the whole issue of fining and so forth is probably one that deserves a review.

MR. JOHNSTONE: The question is now, for me, now in retrospect, now, I mean, you inherited this system of compliance and enforcement. Did you think that you had all the enforcement tools you needed?

MS. GARVEY: No, clearly, we didn't, because just by the very virtue, I think of our going after the rulemaking and changing that, I think we felt this was not working. I mean, part of it is that I think the airlines view was that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this was the cost of doing business. And I'm not sure--

MR. JOHNSTONE: That's like [unintell.]--

MS. GARVEY: --right, I'm not sure, you know, it would--I'm not sure at what level, but I bet it was pretty darn high if you reach a point where they would say, boy, this is just too much. So, I'm not even sure the fining process per se--

MR. RAIDT: Did you seek any changes while as Administrator?

MS. GARVEY: You know, I don't know. That did not, I have to say that in a list of priorities and list of things that we were dealing with, you know, we were getting compliance, it was not a system that I would tout as one of the best systems. But it was not the highest on my priority list.

MR. RAIDT: Let me ask another--the other question from the families. They have asked--the 9/11 families have asked the Commission to ascertain whether the Attorney General--now this is coming up for the period just before 9/11--whether

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the Attorney General or any other high federal officials stopped taking commercial flights in the period just before 9/11 because of security concerns. Do you have any information with respect to this question?

MS. GARVEY: No, I have no knowledge of that, not at all, not even heard that.

MR. JOHNSTONE: And it would be your expectation if there were any such policy, you would absolutely be in on it?

MS. GARVEY: I think so, absolutely.

MR. JOHNSTONE: That takes us to

MS. GARVEY: Must be time for lunch.

[Simultaneous inaudible conversation.]

MR. BRINKLEY [?]: It's a very succinct conversation or it could take you a long time, I guess. And then, we know it's an arduous process and there's a lot of now, previous interviews with the Security staff. And I'll give you my own, I was there--I worked on the background check for over a year in ACP and between having to spend a year working with Mike Chase every day, which is

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

maybe cruel and unusual punishment in itself, is, in fact. One thing I haven't said to him today, you know, we never went anywhere. We never got the thing passed and the only way that ever got passed, is it was through legislative authority. We never got it through the rulemaking process, which is--you know, that's my own personal experience with this process.

Tell, me, what--I mean, you're having to do it for more than just security. So, just sort of tell us what you think the whole, this, what the issues are and why, maybe what are some alternative approaches that should be considered for things that need to go fast and for security.

I mean, we started putting out SDs almost as a work-around--

MS. GARVEY: We did.

MR. BRINKLEY: --to rulemaking, so--

MS. GARVEY: And we've done it with safety and AD.

MR. BRINKLEY: So, what do you think about this?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: It's enormously frustrating and the tension and the challenge between balancing what should be an open and public process, for people, people should have an opportunity to comment, probably most of the time, with few exceptions. Balancing that with the need to be responsive. And it is a balance that we have never--and I don't know that any agency has, in government, has successfully--that they successfully found the right balance.

For us at the FAA, it was probably more of a challenge, certainly more of a challenge than I remember in Federal Highways, we had so few rules in Federal Highways, if any, when I was there. So we were, for me this was a very new challenge. It was not an experience I had seen, at least personally experienced at Federal Highways. We had an enormous number of rules, enormous number of safety rules, security rules, we had airport rules, which are not in the scheme of things, probably nearly as important but aren't important to airports.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And Congress made an attempt to--before I got there to say that there would be kind of expedited process for the FAA. That there should be a category of rules that didn't have to go through the process of going to OMB, of going to DOT and then to OMB.

MR. JOHNSTONE: Do you remember what the period of that was?

MS. GARVEY: Was it included probably in the '96 Act, was there something in that?

MR. JOHNSTONE: Yeah, that was a reauthorization.

MS. GARVEY: I think it might have been in that. And I'm quite sure it was a congressional directive. I have to say, in practical reality, everything was still a significant rule. In other words, Congress didn't say, what was significant and what wasn't. And from the Secretary's office perspective, and it may have been, you know, I don't know why. But, everything was still a pretty significant rule, there were few exceptions.

We had the one level of safety before I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

got there, which moved very quickly. But you can certainly see what would happen when you don't have those layers post-9/11, because there were a lot of things that got out in TSA I notice as not the same. Their TSA legislation, I think, has more of a streamlined ability. Be interesting to see how well that's worked.

MR. BRINKLEY: Rumor is they're not going to use it. OMB's still going to use the regular process.

MS. GARVEY: So, it's a real challenge. We tried several things. We had a task force to look at ways we--

MR. BRINKLEY: Was that Challenge 2000--

MS. GARVEY: Yes, exactly, we made a series of recommendations in that. We tried bringing OMB and OST in earlier and into the table, you know, very early in the discussion, but OST has, I think one person who does the FAA rules. And it God help us if he's ever ill or he's not able to deal with the rules, he's a very competent person, I know, and, certainly, professional, but

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it's really a lot for one person to take on.

We tried meeting with the General Counsel, [unintell.] McPhaton [ph], first and Kurt [ph], when he came. And there were, you know, I think all these assurances that we would try to move them faster and we might move a little bit. But it just--institutionally, we had not yet sort of crossed the code to really get this done in the kind of expedited way that we should. I think the notion of--and we have had very interested Secretaries offices in relationship with the OMB. So in even the kind of direct relationship to kind of deal with it, sometimes, was not encouraged.

MR. BRINKLEY: One of the things that sort of strikes me, is that it's a dilemma that I don't know how to address, but maybe you have an idea, is, in fact, cost-benefit piece of this.

MS. GARVEY: At some point.

MR. BRINKLEY: Drives you down two paths: One, it opens up a path for the industry, who, in this particular case in aviation security, expanded prior to 9/11 is paying the bill. I mean, you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

could have your budget and resources issues is more FAMS than your FTEs and the EDS machines and that kind of stuff. But, in fact, and your Civil Aviation Security Inspectors, but the people that are footing the primary bill in the operational end of this. Is, in fact, you're regulating it and they're having to implement it, were, in fact, the carriers.

So, the cost-benefit analysis piece of that drives the ability for the industry to push back in any manner and methods of push back that they have access.

MS. GARVEY: And that occurred with the screener because some of the first, one of the reasons we pulled it back at one point is we had gotten in all kinds of trouble with the small business community, since most of these are small businesses. And the first years in Congress were devastating. You know, we were going to put people out of business; we were, you know, what we were going to ask of them was just and we had to, I don't remember the exact sequence, but the first

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

cut at that, had to come back and we had a pretty active small business administration and was legitimate. And, again, you know, I don't want to minimize them, they are legitimate concerns. But at what point do those concerns take precedent over the security issues.

So, you're right. Examining the cost-benefit analysis. And it's actually something that I had talked to Jim Hall about, and we had, I felt he was going to be a helpful ally. Because we certainly see that on the Safety side, as well. I said, can we, can you and I figure out a way to offer an alternative?

I mean, it's never enough, as you know, to say, let's just toss out the cost benefit. But what are some--let's talk to some of the smart people we know. Are there some economists at MIT or are there some folks that we can turn to? And it was late in Jim's tenure, unfortunately, and we never really took that. I mean, we never really took that. I asked our folks to--I had asked our folks from policy to try to come up with some

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

alternatives. This was pre-9/11. This was just sort of generally.

MR. BRINKLEY: Did you ever have any discussions, though with the CEO's and the senior leadership in air carriers, most specifically about security issues, that there was a study done in FAA, post PanAm-103 that basically indicated that PanAm-103 cost the industry, about \$800 million for the system, and there was a finite period of time and Lynne was probably most familiar with that.

MS. GARVEY: Right, yes, she was.

MR. BRINKLEY: But in fact is, the backside of that is the overall cost to the air carriers, they lost their airline. So, I mean, when you start dealing with cost-benefit analysis, there's a philosophical difference approach over and above sort of their business model a different view.

Did you ever have those kinds of verifying discussions with the air carriers--

MS. GARVEY: Not necessarily with the CEOs but with the Bob Bakers, you know that sort of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

level, you know, the operating guys. And, as a matter of fact, Bob Baker was on the MAC the Management Advisory Board and one of the things they looked at was rulemaking and I can remember the discussion in that group which included, you know Ed Bolin [ph], and oh, gosh, the fellow who heads Atlantic, Wisconsin Air, Crowley. I mean, there were enough people from the industry when those discussions were taking place.

And, you're right, I mean, in some ways the best business decision they can make is to invest more in safety or invest more in security--

MR. JOHNSTONE: In security.

MS. GARVEY: Absolutely. And at one level, they understand that and the operating guys probably understand it better. I'm--they understand it sort of intellectually, but then somehow when the rule hits the street and they see a dollar figure, it becomes, perhaps, it's not always expressed in their comments that they would get back.

MR. BRINKLEY: Because the other side of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that, the other piece of that, I think, the other flip side of the coin. Now, I'll go to the specific rule now, it said out in the Federal Registry, the summer of '01, was the changes to 107 and 108, which has a domestic threat in it, for 12 737 Bojinka type--and they used that--

MS. GARVEY: They used that as an example--

MR. BRINKLEY: --example to deal with the cost.

MR. JOHNSTONE: In the cost benefits.

MR. BRINKLEY: In the cost-benefits estimate. Now the question we asked the intel guys is that, is that based upon the intel or is that based upon the [unintell.] to cost-benefit analysis with the carriers? I mean where is the--

MS. GARVEY: And what was the answer do you--

MR. BRINKLEY: Well, the answer is, we had 12 airplanes in Bojinka--

MR. JOHNSTONE: Yeah.

MR. BRINKLEY: --and so they used that,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

but in quite frankness is, it's a way to get to the cost-benefit analysis, to change the rule.

MS. GARVEY: So, I think--

MR. BRINKLEY: So, my dilemma that I'm seeing in the rule-making process is when you're asked, when, I don't mean to put words in your mouth, but when Bill says when you're risk-management approach is driven that the same time for rule-making, it might not be totally threat driven, it's driven, also, by this cost-benefit analysis process. So, we've got a chicken-and-egg problem. If I have a threat and the only way I can get through it is do I hide the threat so I can get through the cost-benefit analysis because sometimes the threat is not that concrete?

MS. GARVEY: Or sometimes you want to get their attention and--

MR. BRINKLEY: Do you want to get their attention and how do I get there from here--so--

MS. GARVEY: And, in a sense, I mean, that had occurred, so there was a view that--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BRINKLEY: It was a way to get there.

MS. GARVEY: --it was a way to get there.

MR. BRINKLEY: So, the question was that the real threat in the summer of 2001?

MS. GARVEY: Right.

MR. BRINKLEY: Or was that example from 1995 used to help you get there in 2001?

MS. GARVEY: Right.

MR. BRINKLEY: Especially when you spent all this money on EDS.

MS. GARVEY: Yeah, you know, I guess from my perspective, it's, you almost have to come at the cost benefits from two ways. One is, as you pointed out, you make a case to the airlines and I don't know that you should need to make a case, but there is a case to be made that says the more you invest in safety, the more you invest in security, the better you are.

I mean, I always felt that there was some contradiction, when folks would say, well, you know, airlines don't really care about safety. Well, you know, what, they have to care about

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

safety because if you have a catastrophic accident, then it's the end of their business. And the best of them understand that.

MR. RAIDT: Do you think that, [unintell.] a quick aside, do you think that would be the same with regard to security? I mean, we have some indications that they created safety in a different way.

MS. GARVEY: I think because they had more recent terrible experiences with safety. I mean, 1998, without a civil aviation accident was an extraordinary year. But it was, you know--

MR. BRINKLEY: The exception.

MS. GARVEY: --the exception. I mean, the following year was Alaska; was Little Rock. So, their world was, much more driven, I think, by the [unintell.]

But the second piece on cost benefit is--and this is where I was going with Jim is--is there either an alternative to the basic sort of cost-benefit approach that we take or are there a cluster of rules that we can agree to and say,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

guess what? It doesn't matter what it cost, we simply must do it. And how do you, then, define how do you develop a criteria to determine, and that's a very big challenge, because we'll have different points of view on that and I would suspect even the NTSB and FAA would have to face up to it.

MR. BRINKLEY: Well, that brings us actually to my last piece on the rule-making process and these other outside influences, besides the industry and special interests and associations and this congressional pressure from backwards at you. How did you view that--in the role of oversight from the Hill an the informal congressional pressure that ATA or can be--

MS. GARVEY: There is no doubt that the airline industry has proven its effectiveness at various points, whether it's on technology that they want or so-called a bail-out bill that they feel that they need post-9/11. And, certainly, they would either go directly to Hill and ask for legislation.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I mean, again, this is before my time, but you mentioned the background checks. There was a heck of a lot off pressure, I think, even that ended up in legislation, some language in legislation that precluded the FAA from doing--carrying the background checks as far as they wanted. So, that's probably the, you know, the clearest.

MR. JOHNSTONE [?]: We were already doing the rule-making percent, diluting it, but I think in the end it got even more--

MS. GARVEY: Eve more.

MR. JOHNSTONE: --more so.

MS. GARVEY: Right, right, so there's no doubt that they can exert that pressure. And we would often see it in budgets and so forth. Can I recall a time when an individual congressman or a chairman or a senator called me to say, don't do a security rule? No, I think where we had probably some of the most difficulty on some of the security issues is the L-3 and envision piece which you all have been through and know about.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

So, I'll give it a little more thought. I don't particularly, I certainly--you certainly knew there was pressure out there; you certainly knew that people were doing some work on the Hill. We saw in a couple of instances, like the background checks; we certainly felt it on some of the direction we were trying to take the EDS machines and how quickly we could get both technologies out. And I don't remember other ones, but other ones may have--

MR. RAIDT [?]: And along those lines, do you remember any instances where OMB or the Secretary or somebody from the White House would say, Jane, you know, the air carriers, really don't want this, is there anything that you recall that kind of stood you up and said, wow, you know, that's--

MS. GARVEY: I don't really recall that. I don't--I cannot recall, certainly not the Secretary. I mean, we would get rules back, again, the screeners. You know, because OMB felt it was too--we weren't justifying it, there wasn't a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

cost-justification. Crew rest, I mean, I remember that even the last days that I was there at the FAA, you know, getting that back because it just wasn't working out with the cost benefit. Which I think drove some people to take what might have been--

MR. BRINKLEY: Creative steps?

MS. GARVEY: --right, right.

MR. RAIDT: But you never say any naked political--

MS. GARVEY: No, I really didn't, I really didn't. I really didn't. Maybe I just didn't recognize it.

MR. RAIDT: [unintell.] were concerned more about safety and security because they had more recent experience. Do you--did you ever at all perceive or do you think in retrospect that part--that there was an attitude, too, that with security is that, well, with safety, we're responsible for our air frame, you know, it really is our--with security, or acts of God, you know, no one's really going to blame us if a terrorist does

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

X, Y, or Z and it's really the government's responsibility anyway. And, besides, you know, we want a little bit of hands-off, that's why we've got a contract, rather than we take this so seriously, let's build our own team and really see this as part of our business model.

Did you get the feeling that they regarded security as an externality?

MS. GARVEY: I think that safe, your characterization. And to some degree, I think that's a concern, maybe even more of a concern today, that post-9/11 when the government stepped in and--I personally just think, you may have heard from others, but I'm concerned that the airlines are saying we can really wash our hands of it.

And, in fact, I think one of the really great challenges for government as we move forward is to determine more clearly than it is determined right now, what are the roles of the various players within the industry.

MR. RAIDT: We do want to get your recommendations at the end and we really appreciate

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

your--

MR. JOHNSTONE: And that's one that you really put your finger on that's been troubling us and we have a couple of issues we'd like to run by you on that.

MS. GARVEY: Mm-hmm.

MR. JOHNSTONE: But before we move rule-making and kind of pinned to this other issue, we're going to be interviewing Carol Hallet [ph]. Are there any questions you would suggest that we ask Carol Hallet?

MS. GARVEY: Oh, I'd love to come back.

MR. JOHNSTONE: Would you think about that question?

MS. GARVEY: I would.

MR. JOHNSTONE: We have until 10:00 o'clock tomorrow morning.

MS. GARVEY: Oh, all right.

MR. JOHNSTONE: You have a little bit of time.

MS. GARVEY: Got a little bit of time, good.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT: You were going to talk hijacking and--

MR. BRINKLEY: In the end, I really wanted to, did you feel like you really had the resources you needed, I mean, in a [unintell.] sense? We know you get capped; you get OMB; you get through this process; it goes through this sausage-making machine and you're trying to enforce here and you're getting--you're trying to cajole to compliance, but you've got to have the tools to enforce.

MS. GARVEY: Yeah.

MR. BRINKLEY: So, part of that is actually having the resources to enforce.

MS. GARVEY: Yeah, and I don't want to sound like I'm attacking, because, you know, how hard did I push, you know, and how hard did we all push and should we have gone to Congress and really often--

MR. BRINKLEY: Did the normal DOD back-door approach to--

MS. GARVEY: I know, I should have

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

learned--

[Simultaneous inaudible conversation.]

MR. BRINKLEY: You had a perfect model--

MS. GARVEY: Yeah, I know, I know, we tried it couple of times and were successful, but not always. You know, I don't think there was an element within the agency that, if I were really, if I were really, if I really examined it carefully or answered you honestly would not have said I could not have used more resources. I mean, that's true for inspectors, safety and security.

But it's not true for controllers at the time, because I think the controllers had always as, some of you know, been pretty [unintell.] on the Hill themselves, they had beefed up their own members. But if you look at other areas, in terms of personnel and in terms of training. I think training was the thing that, again, across the Board, when you go through, like all agencies when you go through, you know, some shrinkage, you tend to let that go.

MR. BRINKLEY: The reason I ask and it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

really started before your time, was that the Red Team, actually shrunk in the mid-'90s, with budget limitations, they lost personnel. Post PanAm-103 that that was supposed to be a much, when Administrator--

MS. GARVEY: Fucci [ph].

MR. BRINKLEY: Fucci, yes, started it, created it, it was supposed to be about 30-some people, you know, we're down to a Red Team of a handful.

MS. GARVEY: And now, there's no Red Team, is that right?

MR. BRINKLEY: Well, it's different in TSA.

MS. GARVEY: Okay.

MR. RAIDT: It's not where you're sitting.

MR. BRINKLEY: It's organized differently, but it--

MR. RAIDT: Yeah, it's not the same.

MR. BRINKLEY: --it's hard to, it's really--but they do have some--they do have resources, but there's probably a question do they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

have enough resources at the same time. So, I mean, I'm just trying to get a feel for, when you do get constrained, I mean, there is not an infinite amount of funds here.

MS. GARVEY: Right.

MR. BRINKLEY: Now, let me ask it, in your day-to-day work, I mean, you listed three of the major roles and missions of FAA and you have to divide your time, basically, between those three. What percentages would you sort of thing about you dealt with in a macrosense in safety and security and systems?

MS. GARVEY: Much more with safety and efficiency. In part, because that was what was eating our lunch. If you look at the congressional record, for example, you're going to see probably, I think in the double digits by the time the summer of 2001 came. Double digits the number of times I had been before Congress on congestion and delays. It was an issue that was paramount for the IG; it was an issue that was, certainly, paramount for the industry; so, it was capturing and demanding a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

great deal of my time. You know, I'd be at the Command Center, working directly with spring/summer teams. Safety, the same--the same thing, I mean, there were concerns about crew rest; we had been looking at a lot of the issues of post-Little Rock crash. How we were going to get the crew rest issue resolved. We knew we were going to get pushed back from the industry. We were not sure that our cost-benefit analysis would support it.

So, we had a number of those issues. I also, at the time, just parenthetically, had a change in leadership at Safety and it was very important for me to get the right person there, so I spent a fair amount of time.

Having said that and that is the reality, having said that, I never felt that, and I hope Irish didn't or Canavan or Irish or people in that time period didn't feel that if there was an issue they couldn't get my attention.

MR. BRINKLEY: That's not, I don't mean to--they have not--

MS. GARVEY: So, I mean, that is one of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the challenges that a place like the FAA that you, and, clearly, post-9/11 when you were on a wartime footing, setting up a separate agency whose only mission was transportation security, certainly was the right one in my view.

MR. BRINKLEY: Anything else on the pre-9/11?

MR. RAIDT: No, just, we were talking about the IG and Congress and Industry. To what extent do you think that the public, because I remember that summer, you know, a lot about the customer bill of rights and--

MS. GARVEY: Yeah, the customer bill of rights, exactly.

MR. RAIDT: I mean, and one thing is, you know, our charge is to present an honest depiction of the country and, you know, no one gets a pass.

MS. GARVEY: Right.

MR. RAIDT: And, you know, what, do you have any comments with respect to the public demands, what they were?

MS. GARVEY: Yeah, certainly, and, again

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the Jet Blue experience of two weeks ago is just a, that's a mild indication, could you imagine what it would have been if we combined the delays in the skies with long security delays? The public was focused on, you know, get this country, keep this country moving. Let's, we want to travel; we want to get where we need to go. And that was really the mood of the time.

I remember reading an article that described the summer of 2000--2001, rather as every day was like the Wednesday before Thanksgiving. And that was the perception out there. That was the perception. And to some degree, it was the reality, certainly in places.

And, by the way, underneath all that from my perspective is were we getting a system, were we being faced with a system that was getting so congested that safety was going to be affected. You know we stepped in and put a lot of the system in place at La Guardia and we took hell for that, frankly. We took buck from our friends in Congress, too. But because it was reaching that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

saturation point. You know, where our [unintell.] are we having more of those? I mean, there were some really serious safety issues, as well as just keeping the country moving and [unintell.]

MR. BRINKLEY: That brings up a question that I've read and there's one document that uses this term and it's alluded to in another. And fact is that security was a disruption to the system, that it was considered a disruption to the system. And we talked about that briefly at the beginning. Where this is sort of that security was never engineered into the system like changing out aircraft engines at so many hours, which is engineered to the whole ops tempo that security was never engineered into this system and a system's approach with the carrier.

Does that, how do you view that? Does that make sense to you?

MS. GARVEY: It makes sense that others outside the agency would view it as a disruption. I don't think internally that was the view. I mean, you know, the Air Traffic side of the house

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

can be pretty kind of the big gun, so to speak, they're the big guys on the block. But they understood the security issues. Certainly, the safety folks did. But I think it's probably a fair assessment to say that if you were working at an airline, you might view it as a disruption.

MR. BRINKLEY: Because in the end if you look at roles and missions security is there starting at implement.

MS. GARVEY: Right.

MR. BRINKLEY: I wouldn't even plot it if it was outside--viewed that way inside the agency.

MS. GARVEY: Right, exactly. Yeah, yeah.

MR. BRINKLEY: But if you look at it--if you step back and look at it from the industry perspective, the industry figured out how to do maintenance and take care of stuff out of the system. And figured out how the process was going to work--

MS. GARVEY: Right a very good point.

MR. BRINKLEY: --and how/what the delays were and crew rest and crew transfer. I don't, did

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they figure--did you ever see an indicator that they understood that you need to check in and get through security in a certain length of time and you can't show up 15-minutes later for some business traveler all just because he wants to be there?

MS. GARVEY: Right, no, I--

MR. BRINKLEY: He expects you to do--he does what to the security system to make the customer satisfaction higher than security factors.

MS. GARVEY: Right, and to get back to John's point, I think even the public expected to be able to come 20 minutes before the flight.

MR. BRINKLEY: Because we allowed them to do that.

MS. GARVEY: Because that was the, yeah.

MR. BRINKLEY: I mean, if you had said, no, if the industry had said--

MS. GARVEY: That would have been an interesting and it would have been interesting to see what would have happened. Do you think that congressman--do you think the public really would

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

have stood for that?

MR. BRINKLEY: Don't know. We do know now, we have a better feel. It took an event like 9/11, but they're pushing back; they're even--

MS. GARVEY: They're even pushing back on that.

MR. BRINKLEY: --nothing now, I mean, that's my personal opinion.

MS. GARVEY: I mean, it's a good--you're right.

MR. BRINKLEY: What happens if we say, no? In the industry, if the industry really thought that this was that major an issue for them. They could have said no different than, I'm going to pull the door down 10 minutes for you're done getting on because I--I mean, you can do positive passenger bag match, we know you can, because you do it all that he time overseas.

MS. GARVEY: Yeah.

MR. BRINKLEY: But can we do it domestically? I guess so. If you decide you're going to cut everything off at 15, 20 minutes and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

once they check in they--once they go on you put the bag on.

MS. GARVEY: Mm-hmm.

MR. BRINKLEY: But that's sort of in retrospect.

MS. GARVEY: Right.

MR. BRINKLEY: But, was it engineered into the system? Maybe I'll ask you to think about that.

MS. GARVEY: I'll think about that, yeah. And my initial reaction is that I think you make a good point that it was not engineered in quite the same way.

But, in fairness, let me think about that, not engineered in quite the same way that safety was. Which they had had, again, much more experience with. I mean, the safety piece was, really, built in--

MR. BRINKLEY: Well, you could argue when you find the security director about four layers down, versus the safety director, the vice president for safety who sits next to the--on the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

right-hand seat/

MS. GARVEY: Although, then you have people like--then you have the airlines like, United that has Soliday right up there who is Safety and Security.

MR. BRINKLEY: You mean, legislatively, Irish belongs in your triumvirate around the table--

MS. GARVEY: Around the table.

MR. BRINKLEY: Because earlier in the FAA it was three or four layers down.

MS. GARVEY: That's a good point.

MR. BRINKLEY: and it had to be legislated after PanAm-103 to be directly answerable to the Administrator?

MS. GARVEY: That's right and then the FAA had to require of the airlines that they have a counter, with Soliday's reporting to the CEO.

MR. BRINKLEY: That was something that they--

MS. GARVEY: Yeah, I am told that that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was, again, that was slightly before my time in the Busey period. I've talked a little bit with Busey about this.

MR. BRINKLEY: They tried to do that, I don't think they ever--

MS. GARVEY: It was not mandated, it was the bully pulpit sort of thing. And, you know, again, I think of this Soliday because he was such a leader in that field. There was a fellow at Northwest who was very good--

MR. BRINKLEY: Doug Laird [ph].

MS. GARVEY: Yeah, who was that? Was it Doug Laird?

MR. BRINKLEY: He was there when I was, in the early '90s, he was head--he headed--

MS. GARVEY: Yeah, he had influence at Northwest, that's always the key, uh-huh.

MR. BRINKLEY: As a matter of fact he was there, I think when they did start CAPS.

MS. GARVEY: Right, right, that's right.

MR. BRINKLEY: Let's change gears and talk a little bit about 9/11, if we could please.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Mm-hmm.

MR. BRINKLEY: And I want to talk to you, first, about the overall view, your view of hijackings. We've talked a little bit about hijackings. We hadn't one for ten years. It's in the system, but it's--it would appear, now, and it may be an unfair view, that hijackings were really not viewed as an equal threat to explosives. That we had done a good job on hijackings. We had screening checkpoints, we felt that PanAm-103 obviously was IADs, we, at lease TWA-800 re-enforced that with \$100 million, so it really re-enforced PanAm-103 findings with more IAD emphasis and the baggage piece.

MR. RAIDT: No domestic hijacking since '91.

MR. BRINKLEY: No domestic hijacking since '91.

MS. GARVEY: And I think there was another piece if I could; there was no domestic hijacking since '91 and there still was a sense that with hijacking, you had some kind of control and that if

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you negotiated and followed the, you know, followed the procedure, you had a good shot, that generally what these people wanted was transportation somewhere or they wanted political prisoners released. So you had a shot at surviving, which is what it's all about. With an explosive, the horror--

MR. BRINKLEY: Of catastrophic--

MS. GARVEY: --of catastrophic events, I think put it in a different category.

MR. BRINKLEY: And so in that regard--

MR. RAIDT: Can I ask, an aside on that. This goes back to the consequence question of suicide hijackings. You know, something that was considered but considered unlikely. But just as explosions would have catastrophic effects--

MS. GARVEY: I think it was more, again, because of the risk associated with the whole likelihood of it.

MR. RAIDT: Mm-hmm.

MS. GARVEY: But there was so little, I mean, truthfully and, again, I don't want to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

suggest what Irish would say or what Mike Canavan would say, but I think if they really thought there was an oppor--that this was so real that we better make it, this has got to be reflected in our baseline or we better do something. I don't think they shouldn't be [unintell.]

MR. BRINKLEY: At least you didn't.

MS. GARVEY: No.

MR. BRINKLEY: Even though we've had a lot of suicide bombers; we had a lot of suicide--

MR. RAIDT: Truck bombs.

MR. BRINKLEY: --truck bombs, we had suicides using other modes of transportation over periods of time. I admit that none of that ever, we never had the transfer to aviation.

MS. GARVEY: And the thought of the training that they needed to go through, what they needed to know to get there, as opposed to a driver's license or something maybe not even a driver's license, you know, it just--it did not seem--it does not rise to the same level as these--

MR. BRINKLEY: Okay, I just wanted to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

touch on that particular item.

MR. JOHNSTONE [?]: And I think you testified before during the hearing kind of where you were and how you found out, so I don't see any need to really cover that again. But to kind of get in more of the process. And you talked about how there--you had heard half a dozen instances where there was a hijacking that may have occurred that you came into the office. Describe--

MS. GARVEY: Before, yeah.

MR. JOHNSTONE: --yeah, describe to me what your responsibilities as FAA Administrator would be. You were told they were what you perceived they were in the event of an emergency. And to the extent that was backed up with standard operating procedures or memoranda and, you know, whether, Zellers or the chief of staff or somebody would call and say, okay, Jane, here's the situation, here's your legal authorities and that type of thing. And kind of the idea who is supposed to be the hijack coordinator at FAA. If you can kind of go over those realm of issues.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Right, well, I'll divide it, for general statements, then, perhaps relate it specifically to 9/11.

MR. JOHNSTONE: Yes.

MS. GARVEY: Certain, again, for the lead in hijacking, it was security. If you had a potential hijacking, the security ops center was activated quickly. I would, in the cases where you'd had six incidences, it would be someone very senior in security who would notify me. And I would be notified probably quietly before the Secretary's office and those at DOT. But there's a whole list of people who are notified in those cases.

Some of that was changed slightly when Secretary Mineta came in, John Flaherty wanted to be notified of more incidences than we had done in the past, so there were changes, depending on the individual Administrators. I did not--I would not be the one notified. I mean, my view in the hijacking was that if it was serious enough I needed to get--and this is what I was told that I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

needed to get to the Ops Center or be in direct contact with whoever was on at that time. And I could do that if I was home through the phone network that was set up. It would not be unusual, for example, to have myself and Monte on a phone call if there were difficulties of any sort, whatever the hijacking or at anything else.

MR. RAIDT: And were you expected to go on the system expecting I've got to make these particular decisions?

MS. GARVEY: Not necessarily; not necessarily. I mean, fortunately, all the instances that I mentioned resulted in it was generally monitoring something as it arrived at its destination or waiting for it to get to its destination. Knowing that the FBI, again, you know it was protocol for knowing that the FBI had been notified; intelligence community, so those folks would be taking the appropriate steps. I mean, I think I saw my role as mostly there to oversee what was happening; to, obviously, make a decision if it needed to be, but we did not have that pre-9/11.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

We did not have that sort of a situation.

MR. RAIDT [?]: And there was the direct checklist that someone was--

MS. GARVEY: I didn't have a checklist. I think Security may have, Lynne would know that. And then I would be available to talk to the Secretary's office, which would, occurred with almost everyone of the pre- the instances that we, once they'd been notified, sort of midway through, I'd give a call over to, plane's coming in, it's, you know, a certain distance away or whatever.

MR. RAIDT: Okay.

MS. GARVEY: So, I'd be available. But, quite honestly, because everyone of those instances turned out not to be an issue, probably it was--it's hard to imagine those as kind of a warm-up for 9/11.

MR. RAIDT: Yeah.

MS. GARVEY: Closer to, in some ways, for the preparations to Y-2-K, where, you know, it was clear that we all had to be prepared for--

MR. JOHNSTONE: I think I asked this

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

before, but just to clarify, with respect to these sets of instances, we're going to get into 9/11 and before we really should get your account of kind of what happened that day.

MS. GARVEY: Sure.

MR. JOHNSTONE: Do you recall, again, any particular exercises where different elements of FAA, FAA headquarters, Air Traffic Control, and to the extent military and law enforcement be called in. To kind of go over how that was supposed to be orchestrated. Was there any--

MS. GARVEY: I don't recall that. And Monte would be a good one to ask. He did participate in some exercises. And I had certainly been briefed on where I was supposed to go and so forth, in terms of--

MR. JOHNSTONE: So, sorry, you were pretty confident, you know, on those sleepless nights that all managers have at work, what could be that you were pretty confident that whatever contingency you knew what your role was supposed to be in--

MS. GARVEY: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSTONE: --and that your subordinates knew what they were doing.

MS. GARVEY: Right, and vis-a-vis Security, again, having Monte as the Deputy who had many years of experience was certainly a plus. And Lynne was there, that was certainly a plus, as well. Lynne was, of course, not in that role, on 9/11.

MR. JOHNSTONE: And do you recall any conversations with Irish or anybody like, or Canavan to say, you know, did you kind of go over any scenarios, contingencies, either around the table, like, okay, this happened--

MS. GARVEY: You know, actually, not with Canavan, but early on with Irish. We were at a management meeting. Where were people going to be and the need to always keep them making sure we knew exactly where people were. We had a couple of issues at times where pagers weren't working and sort of reminding them once again, and saying, you know, let's make sure, you know, let's make sure we all follow the procedures, know exactly where we're

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

going to be et cetera.

MR. JOHNSTONE [?]: Let's, why don't we go into, kind of, just tell us about the day, when you were notified, when you thought particularly important decisions were made or when matters were called to your attention, or when you knew other elements of the system were notified.

MS. GARVEY: Right.

MR. JOHNSTONE: And then, I'd like you, as you do that, to kind of think of three or four different areas and what you expected was their role in the kind of roll-out of the day. And that would be headquarters, you know; Air Traffic Control; what the Command Center there was doing. Law enforcement, particularly the FBI. And then kind of the National Command Authority, White House, President, Vice President. And the air carriers. And this is a lot of players in this drama.

MS. GARVEY: Sure.

MR. JOHNSTONE: So, take us through the day and kind of identify where those support points

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were and kind of what your expectations were of these different kinds of areas.

MS. GARVEY: Right, right. And I apologize if I'm repeating what I said to you in the past, but that morning wa--I had just returned from a trip to Texas the night before. Very grateful, still, that I was here that day. And we were at the Secretary's office having breakfast with Madame Durand who was, at the time, head of the Transport Minister in the EU and we were discussing the upcoming Montreal session on environmental issues. We had great, great differences with Europe on where we needed to be environmentally, what the regulations ought to be and this was the Secretary and my attempt to reach a compromise before we went into a Montreal session, that would be, without the compromise somewhat contentious.

So, we were sitting in the Secretary's conference room. We had, literally, just begun the breakfast. The Secretary was there, I was there, Madam Durand was there, two staff people, I believe

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

from the Secretary's office, one from the FAA and she had Michel Auriel [ph], her chief of staff and, I believe one other staff person.

MR. JOHNSTONE: Who was the person with Michel Auriel?

MS. GARVEY: Auriel and it's actually Michael, it's a male, I was trying to do the pathetic French pronunciation, which I'm not very good at.

MR. JOHNSTONE: Oh, I'm sorry, on the French side.

MS. GARVEY: Yes, Michel Auriel was the chief of staff to Madame Durand.

MR. JOHNSTONE: The FAA person was?

MS. GARVEY: You know, I think it was Karl Burlson [ph].

MR. JOHNSTONE: Okay.

MS. GARVEY: I think it was, it was either Karl or Louise and I apologize for not remembering exactly.

MR. RAIDT: And Karl is no longer chief of staff then?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: That's correct. Karl was doing the environmental and that's why he was there. I don't think Louise was there. He was doing a great deal of the environmental work for us, so he would have been the staff person there.

MR. JOHNSTONE: And Mineta was there with Flaherty, was he--

MS. GARVEY: Flaherty was not in the room, actually, Flaherty, may have been someone from Chief Counsel who was in the room for the Secretary, I'm not sure.

MR. JOHNSTONE: And, I'm sorry, again the room was the--

MS. GARVEY: The, you know where the Secretary's office is, it was the conference room, the large conference room where we had all of our intermodal meetings with the--we were having breakfast.

MR. JOHNSTONE: Okay.

MS. GARVEY: So, we were still sort of very much in the pleasantries and the opening of the meeting and so forth. And all of a sudden,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

John Flaherty opened the door and very uncharacteristically said, Mr. Secretary, Administrator, we need you in here right away. No, pleasantries, no, good morning, just, we need you right away.

MR. BRINKLEY: The time, when that was?

MS. GARVEY: It was, literally, just as the plane had hit.

MR. BRINKLEY: Okay.

MR. JOHNSTONE: The first plane?

MS. GARVEY: The first plane, yes.

Because, yeah, yeah. So we walked into--actually rushed into the Secretary's office. CNN was and I believe it was always on, so I honestly don't know whether John got a call or whether he just literally saw it on the TV. I think it was that he said they just had the TV on and someone said, oh, my goodness, look at this. We walked in, the Secretary said, oh, my God. And all of us, I think had an initial first reaction unspoken, but an initial first reaction which we said to each other afterwards, which was it was a small plane, someone

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

either had a heart attack; someone horribly and inadvertently went into the World Trade Center.

I went to the phone and called the Ops Center and said what's going on, what do we know? They said, what's going on in New York. And the answer I got was, we're not sure, we have, you know, we're not sure and we have literally just gotten word that we may have a potential hijacking.

So at that point, I don't think there was a connection--there was not a connection.

MR. JOHNSTONE: Between what you were seeing

MS. GARVEY: Right--

MR. BRINKLEY: Between it first hit and the hijacking?

MS. GARVEY: Yes, yes, so I just put the phone down and said to the Secretary, I will head right back to the FAA and will be in touch with you. So, I left immediately. The Secretary went back into explain to Ms. Durand what was going on. The meeting, obviously came to a pretty quick conclusion.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSTONE: Do you remember the time?

MS. GARVEY: The time, yeah, it was literally right after--

MR. JOHNSTONE: It was before the second one hit?

MS. GARVEY: Yeah, because by the time I got back to the FAA, which is diagonally across from the Secretary's office, the second plane had hit. So, by the time I got up to the 10th floor, we now had two airplanes.

At this point, I went right into the operation and the net, the two centers there at the FAA, both were very active; there were people already in the room. The Deputy was there in the room and it began--that began the series of briefings.

MR. JOHNSTONE: Okay. Let me ask you about the room and then, do you remember when you placed the call to the Ops Center, do you remember who it is that--

MS. GARVEY: No, I don't.

MR. JOHNSTONE: All right. So, you get up

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there and you see the Operations Center and then there was another room the video-teleconferencing center, is that correct?

MS. GARVEY: Yeah, there are essentially three rooms. I mean, there's essentially the two principal rooms; one is the Ops Center, which is the regular communication; the second one is the room that Security would use as a kind of--as the net where--and they're adjacent to each other separated by, at that time, a kind of glass wall with a door that goes in.

The third, of course, is just right off that would be what we call the vault. The room where you get the secure briefings from the White House and that was unknown to anyone else. I mean, that wasn't obviously the security and--so that nobody would just--you wouldn't use that ordinarily.

MR. JOHNSTONE: So, when you went up to that, which room did you go to?

MS. GARVEY: First stopped right in the Ops Center and then immediately went, I mean,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

really, I think I immediately went into the Security area. Number of people were up there. You know, many of them, of course, I wouldn't know, but people from literally, by that time, people coming into the room, literally from all aspects of the FAA.

MR. JOHNSTONE: Any people you did recognize in the room?

MS. GARVEY: Lee was there.

MR. JOHNSTONE: Longmire?

MS. GARVEY: Yeah, Lee Longmire?

MR. JOHNSTONE: This was in the secure room or in the Operations Room?

MS. GARVEY: Security net room.

MR. JOHNSTONE: Security Operations?

MS. GARVEY: Yeah, Security Ops room, yeah, where the net is. You know, Mike Canavan, of course, was not there. There was a great deal of concern about making sure we could get ahold of General Canavan.

And at that point it was, really, information flow. What do we know, what's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

occurring, what's happening. Tremendous, tremendous concern. But, still, somewhat, you know, somewhat unclear what was happening.

MR. JOHNSTONE: And was the Deputy there?

MS. GARVEY: Yes, he had already come over from his office. I mean these two rooms are directly across from the Administrator's suite, so it's very easy access.

MR. RAIDT: And he was in the head room, also?

MS. GARVEY: Yeah, yeah.

MR. JOHNSTONE: Okay.

MS. GARVEY: You know, at that point, it was we were in communications with the Command Center. The Command Center was reporting, you know, essentially what was happening in the system. Which, at this point, we weren't quite clear. We weren't quite clear.

MR. JOHNSTONE: The Command Center, you mean the Herndon--

MS. GARVEY: Herndon, yeah.

MR. JOHNSTONE: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: And our communication was essentially through Herndon, I believe, and you'd have to ask Monte direct. He may have had a direct conversation with the Boston and New York folks, but for the most part, Herndon was our sort of central point for that.

MR. JOHNSTONE: And who was, kind of the person in charge at the Herndon Center?

MS. GARVEY: Well, Linda Schuessler was there. I don't believe Jack Keyes [ph] was on that day, in fact I know he was not. Linda was really, the key person. And Keyes' Deputy, whose name is completely escaping me--

MR. BRINKLEY: Sligo ph?

MS. GARVEY: Yeah.

[Simultaneous inaudible conversation.]

MR. JOHNSTONE: Okay.

MS. GARVEY: So, I, at this point, went back to call the Secretary's office, said, you know, we know there's been the second plane, great concern, we're gathering information from the regions and are gathering information from centers

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in communication with the Air Traffic Control center. And you know, we'll certainly keep you informed. And I honestly do not remember [unintell.] came over. But I know that--

MR. JOHNSTONE: Jim came--

MS. GARVEY: Yeah, I'm just trying to remember--

MR. JOHNSTONE: Jim said he came to the SVTS room.

MS. GARVEY: Okay, yes, that was probably closer, that was probably about an hour later that we had the--

MR. JOHNSTONE: That's the vault.

MS. GARVEY: Yeah, what I call the vault. Yeah.

MR. JOHNSTONE: I think that's what he said in our interview--

MS. GARVEY: That's when he came over, okay.

MR. JOHNSTONE: He said he came on over.

MR. RAIDT: And the call from the information guy and the calls that are coming in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

from the regional offices and air traffic control facilities, was that something where people at the Ops Center would have to call them saying, hey, what's going on? Or was the calls flowing from them to providing information or was that--was it coming to the Ops Center or was it going to APC and then to the Ops Center or was it just a mix of them?

MS. GARVEY: It was all of the above. I mean it was all of the above. Boston and New York was, first of all the lines are open, so you hear a lot of this stuff, you almost, you don't have to pick up the phone and call, I mean, there are communications lines that the Command Center can open to the field, and so a lot of that was coming in.

And, quite honestly, I was not asking who was giving what information, I was just asking, yeah, what do we know. Where are the Security people? What's happening in Boston. I mean, at that point, the Security people were out doing the interviewing that they needed to do, looking at the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

[unintell.] machines looking to make sure that the calibrations--

MR. JOHNSTONE: Is this before the third or Pentagon crash where we're falling?

MS. GARVEY: You know, even before the Pentagon crash they were starting to do some work at Logan and gather some folks and get some information. But it was, clearly, the Pentagon crash that was the final, you know, as the Secretary said, what, he says, once is an accident, twice is something else, but the third time you know you're dealing with a program, you know, you're dealing with something that is, you know, beyond what is normal.

And, quite honestly, at the second plane, there were discussions, even internally, is this something, is this a terrorist attack?

What was probably the most problematic in that morning and I'll get to the notion about bringing down the planes. But what was most problematic was the last plane and there still was and I do not, to this day--and I've asked the FBI

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

about it, as well. We do not know where this came from, but somewhere someone believed that a plane had gone down on Ohio border.

MR. JOHNSTONE: Yeah, we've heard that.

MS. GARVEY: Had you heard that? You've gotten that, as well?

MR. JOHNSTONE: Feedback--

MS. GARVEY: But we never could trace that down, I mean, it was something that sort of came up in the Security Operations Room.

MR. JOHNSTONE: I tell you what we do understand about that is that a call came from a county sheriff--

MS. GARVEY: Sheriff, county official--I--

MR. JOHNSTONE: --that someone, and by that time the transponder had gone off and they said well, transponder off, no coms, plume of smoke, and then that became the reality.

MS. GARVEY: Reality, mm-hmm.

MR. RAIDT: Wasn't it, too, and then I want to take this away too long, but the sheriff had heard reports of look for--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GIBSON Oh, right, right.

MR. RAIDT: --regional or the

MR. JOHNSTONE: The ITC--

MS. GARVEY: He thought he was responding.

MR. JOHNSTONE: Yeah

MS. GARVEY: Yeah, yeah, and it became a kind of almost a fact. You know, again, and the one regret I have and actually, I think you'll hear this from several people at the FAA, but we did not take copious notes of times. We should have done that. We were so, so in the midst of it that we just simply didn't do that. But I do remember saying to Monte and this was probably after the Pentagon, look, stay here, get things organized. I want to go downstairs. I want to check on the day care center and I want to check on people who are leaving--keep people who are leaving; we had people in the FAA who had spouses in the Pentagon and so forth. I want to check on the day care center. I want to make sure our people are leaving without panicking and are leaving quietly and as well as they can be.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And then I also wanted to call the CEOs, I wanted to do a round of calls at least to United and to American. I'll tell you, before I got to the door, I think, I mean, it's not always clear, before I even got to the door, I got a call from Don Cardy. Tremendously concerned about American 906.

MR. RAIDT [?]: Did you have any conversation with the airlines prior to the Cardy call?

MS. GARVEY: Our folks did, we were working with dispatchers--

MR. RAIDT: Did you?

MS. GARVEY: No, prior to the Cardy call, it was--

MR. RAIDT: And Cardy called after the Pentagon crash but before the fourth plane was down?

MS. GARVEY: Yeah, I'm pretty sure about that, I wish I could be more definitive about that.

MR. JOHNSTONE: Back up, just a couple, two points. The dispatchers or FAA was talking to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

dispatchers, was that communications that was direct from the Operations Center or from the Command Center in Herndon to the dispatchers?

MS. GARVEY: It's the Command Center that would be--

MR. JOHNSTONE: The Command Center was talking in the dispatchers.

MS. GARVEY: Yeah.

MR. JOHNSTONE: So you were kind of clued in on that?

MS. GARVEY: Right.

MR. JOHNSTONE: And then, when you, there was a room that you were in and you kind of understood that this was a terrorist situation?

MS. GARVEY: Yeah, and I can't really tell you at what point we really knew that. I mean, certainly

MR. JOHNSTONE: In general, before or after the Pentagon would you say, in general, if you had to guess?

MS. GARVEY: I'd say slightly before the Pentagon.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSTONE: Okay.

MS. GARVEY: Before the Pentagon.

MR. JOHNSTONE: Okay, and--

MS. GARVEY: Just when the second plane went in, it just felt terrible, it felt all wrong, we knew it wasn't a small Cessna, we knew that couldn't happen, just, I mean. In fact, I remember going back in the car and hearing it on--that a second plane had hit and saying to myself, this, you're under attack, you're under attack.

MR. JOHNSTONE: Yeah.

MS. GARVEY: Definitely the view by the time I got to the Command Center. I mean, to the 10th floor, that we were under attack.

MR. JOHNSTONE: So, now let's kind of get into these other--these other areas. You got into the car to go back over to the FAA. You hear on the radio, and your sense is this is not right something's wrong. You get up there, people are gathering information. You have this personal sense that, you know, until you can get it confirmed, what, kind of what was your expectation

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of what that room was supposed to be doing, what the air traffic control command center was supposed to be doing and then kind of with the Secretary and White House or was the nature of such a riotous event kind of just one of confusions?

MS. GARVEY: It was, I don't know that I reflected on what every, you know, what each person should have been doing, but what I can tell you is that even though it was extraordinarily busy, extraordinarily tense, it was still pretty calm and very professional.

People were uncertain, but there wasn't hysteria in the room. There was an intensity that I've never seen; certainly a level of concern that I had never seen, but people assumed positions; people, there was not a sense of I don't know what I'm doing. There was a sense of professional, what we need to do is find out what's happening in the system. And that was really the focus.

No one said, we're under attack. And people said here's what we know. You know, we got this call at x-time, here's--and it was clear from

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the conversation in the room that others had already been pulled in. It was always my understanding that NORAD was part of that. I know this would come to debate back and forth, I've not seen anything since the hearing, but, clearly, there were other people on the phone on the call, it was clear that it was broader than the FAA.

You know, my assumption was it was the FBI and the intelligence committees. We had people, I believe, and want to go back and check that, but it was not unusual to have people from Defense ever at the Command Center.

MR. JOHNSTONE: Well, that's an important point because--and, incidentally, there's another team, as you know, that's been working on our stuff--

MR. GIBSON Yeah.

MR. JOHNSTONE: --but I guess, it's kind of the expectation where we have a situation, where, you know there are two planes in, and the third one in, and the idea that, okay, we've got to muster our resources. You know, we don't know what

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

else is going on up there. Let's find out what's happening in the system. To the extent there had to be some coordination, the expectation was that something air traffic control would do because they're to date have direct access to the dispatchers and air carriers; they have direct access to, you know, their air traffic control towers. That that's where, kind of the rubber was hitting the road with respect to, you know, notifying NORAD, although that wasn't an expectation and within the Operations Center that we've got to get on the phone to NORAD, we've got to do X, Y, Z?

MS. GARVEY: It was, no, because, again, at this point, we didn't know for sure, you know what it was, so it would ordinarily be an air traffic issue, you know, that would be the initial reaction would be let the air traffic control folks do what they need to do, but let us gather. You know, be ready, we're not sure what this is, so we need to be prepared. An that's often the case, I mean, it's--you know it was often the case that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

until it's very, very clear, I'm trying to think of something comparable and I'm afraid at this time I can't quite think of anything, but, so, initially, it really was the air traffic controllers.

But, again, remember that the air traffic controllers would have been hooked in even to the Security piece very quickly, I can't tell you exactly when, perhaps Monte could. But at what point did they get--did they immediately--or did they join the net.

And, by the way, that's not to say, and you'll hear this, and certainly, I'm sure the FAA will go over this, if they haven't already with the other team. Post-9/11, there were changes. I mean, I think the air traffic controllers did a terrific job.

Having said that, I think we, institutionally learned that we needed to tighten, you know, our lines of communication, clarify our lines of communication. I think it worked, but, like, every catastrophic event, there are always, I think a series of improvements that you can make.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And we did that, post-9/11.

We changed the whole Operations Center. the Operations Center, the communication, not the Security side, but just the regular Ops piece, quite obviously has wonderful people in it. But not people with, perhaps, training that you'd like to see in a state of near war.

MR. RAIDT: Right.

MR. JOHNSTONE: And--again, little hindsight issue, but with respect to, liking it to a fire department, if an alarm gets rung, you know we don't know the nature of it, but everyone has a good idea of their roles and missions.

MS. GARVEY: Right.

MR. JOHNSTONE: Describe your view of kind of on that day, how you felt everyone, whether everyone understood their roles and missions. And obviously, that's been improved upon since.

MS. GARVEY: Right.

MR. JOHNSTONE: But just describe--

MS. GARVEY: Yeah, and I--I and I wasn't there, initially. I think people by the time I got

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there were very, very professional, were assuming the right roles. I am told that there was a little confusion at the beginning, there was some uncertainty. I was not in the room when, you know, the initial event occurred. So, I can't speak to that directly and perhaps Monte could, but I am told that there was some confusion, just making sure people got there as quickly as they wanted them to, and some sort of intensity and, you know, calling people up and getting them up there.

MR. RAIDT: And did you feel like everyone knew what they were supposed to do out of preplanning or out of professional, you know, instinct or kind of a combination?

MS. GARVEY: Probably a combination. Probably a combination and having them now, having said that, recognizing that there was nothing--there was no sort of--nothing in our recent past that would prepare us, that real right--

MR. JOHNSTONE: [unintell.]

MS. GARVEY: --exactly a real experience

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

phase for that. You had to draw a lot on the professionalism.

MR. JOHNSTONE: We'll go ahead and take

MS. GARVEY: Cardy's greatest concern when I talked with him was that he could not quite believe that that was his plane that went into the Trade Center. He said, is that an American plane? I mean it was as though, it was just almost incomprehensible.

MR. JOHNSTONE: Yeah.

MS. GARVEY: He knew what the answer was, but it was--you almost had to say it. He asked what we knew. I told him what we knew at that point, which was still very little. I asked him if he had a sense of where all of his planes were. Were there concerns. He said they were pulling all of that information now. I offered him, of course, assurances that we would do everything that we could and that we ought to keep the lines of communication open.

MR. JOHNSTONE: Was there any discussion at that point or later about anything you were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

requesting him to do in terms of notifying his flights, using their ACAR system or in some other way or did you inquire of him what were they doing?

MS. GARVEY: No, at that point, I did ask him what they were going to do. He said at this point we're trying to get a read on exactly where all of our aircraft are--

MR. JOHNSTONE: He didn't elaborate on what they were doing?

MS. GARVEY: No, and I also knew that our, you know, our folks were in close communication with theirs. And that was one of the questions that I asked are we talking to the airlines? Yes, we've got them, yes, we're hooked in.

And, and in some ways, by the way, that spring/summer plan served us well. We had begun a process of every morning beginning at 5:30 in the morning calls with all the dispatchers on what was the condition of the system, what were we planning for that day and we would run conversations every two hours, so there was, a, you know, institutional kind of frame work for people to communicate and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

communicate well.

I went downstairs, Monte was in the main, at the net, taking information, gathering information. I went downstairs first, to the day care center, to make sure that parents who were collecting children who needed to, those that were going to stay behind, making sure that there was proper coverage. I remember running into and walking down, rushing down with a lawyer from the FAA who was going down to get his children. I remember telling him, be careful, you know, take them home and be careful going home.

And I stayed downstairs for not a very long period, but for a little bit of time just to make sure people were exiting carefully. There were still a number of people who were staying behind or the decision had not yet been made but just making sure that those people who had questions, many people standing in the foyer just fixed on the TVs that were there.

MR. JOHNSTONE: Then after you made your rounds downstairs in the day care center--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Came back upstairs and called Jim Goodwin [ph] and Leo Mullen [ph] and called Goodwin, first, again, it was really just more, just really reaching out, saying, you know, we are here to keep the lines of communication open, what do you know at that that point, we're still gathering information, although he--

MR. JOHNSTONE: You did know it was United flight.

MS. GARVEY: Yeah, and he knew that, as well. The reason for the Leo Mullen call which occurred a little bit later in the day, a little bit later in the morning.

MR. RAIDT: So Goodwin was first?

MS. GARVEY: Yes. Was because at one point, when I went back over there, there was concern that we were not able to, we had lost contact with four other planes and I think they were all Delta, but I cannot swear to that. But I knew just a couple of them were Delta. And called Leo, same kind of conversation. Here's what we know, he was saying we are gathering information.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

He knew at that point that our folks were in very close communication with his own team. At that point, frankly, Leo was more concerned about American and United. He knew they had lost planes and they had lost passengers. And was really also inquiring after that. So they were very brief conversations, very short conversations. But just more to reach--to reach out to them.

MR. JOHNSTONE: At this point, where, you know, Delta is at a loss for other--contact with four other planes. There was a sense that we don't know what's going on.

MS. GARVEY: There was a great sense, but, yeah, that what is happening, what's going on in the airspace.

MR. JOHNSTONE: And place this generally in time, is this before 93 is reported down or--

MS. GARVEY: Yes.

MR. JOHNSTONE: This is in the period between the Pentagon crash--o

MS. GARVEY: And the call's very, very quick, yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSTONE: So the fact that I got major event going on, we don't know how extensive it is, we need to worry about what's going on in the rest of the national airspace. At what point did the deliberations start and with whom did it start about, okay, how do we respond to what we don't know? Talked about what happened, talked about closing down the airspace?

MS. GARVEY: Right.

MR. JOHNSTONE: And how we address other flights?

MS. GARVEY: Exactly. And just to be clear, while new information was being gathered by the security folks, in places like Logan, quite honestly I was not focused on that at that point. I knew they were doing it. I knew that the initial read was nothing unusual that nothing unusual had occurred, but the real challenge at that point was what do we do about the airspace system.

MR. JOHNSTONE: Okay.

MS. GARVEY: And the first indication was that Monte and at this point, I think I may have

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

been on the phone with the Secretary's office and Tom Flaherty. The Secretary by this time had left, had gone to the White House, which is, you know, the standard procedure for him. And we were in pretty direct communication. Either he was calling over right away or we were calling him, we kept the line open so we could do that very quickly.

And I think I may have been talking to John Flaherty. And at that point, Monte said, the air traffic controllers are bringing some planes down in certain areas, obviously, focusing on the Boston/New York. We had kind of a ground stop for the Boston/New York area first. And it was pretty clear that the controllers were concerned and concerned enough to, on their own, which is, by the way what they should do, take the appropriate action at the local level. So, they were bringing down--not bringing down, that they were first of all created a ground stop and both Boston and New York.

MR. JOHNSTONE: Since--I'm sorry--

MS. GARVEY: They then sort of created what was kind of a sterile zone where they wouldn't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

let any planes into that area. So they were taking action that clearly, now as you look at them, were leading to get them all down.

MR. BRINKLEY: And it was it your sense that those decisions were being made, you know, from towers from RTs, from TRACONS or was it from Linda saying--

MS. GARVEY: It wasn't from Linda. I think it really began in, you know, it began in the centers. It began in the centers, it began at the facility. They, to their credit, I mean, obviously, checking right back in with, so it was coming into the Command Center, almost simultaneously.

MR. BRINKLEY: Okay.

MS. GARVEY: And that piece of it, by the way, I don't know that I'd ever change, because they are the closest to it. They're there. They're making those decisions, so that piece, I think was the right way to do it.

MR. BRINKLEY: They do that every day in weather?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Exactly. I was just going to say that, yeah.

MR. BRINKLEY: I mean, that's what they do.

MS. GARVEY: That's what they do. That's their job.

MR. BRINKLEY: That's their job to make this decisions, every do, no stop and I don't like this.

MS. GARVEY: Right, right, exactly. So, in my view they were doing what they should do, there was no reaction on my part about dear, God, what are they doing?

MR. BRINKLEY: The system was working?

MS. GARVEY: That's right.

MR. JOHNSTONE: So, you're on the phone, you believe, with Mineta who had gone--and then somewhere Monte had notified that okay, we're making the sterile some spots here, take us from there.

MS. GARVEY: So at that point, we said to each other, we gotta bring the Secretary's office

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

into this a little bit more. We've got to let him know, these guys are moving faster, probably than even we knew. So we called the Secretary's office. Actually I had gone out. And I don't even remember, there was an incident, I think just out in the hall with some folks. For some reason, I had stepped out and right at that point, the Secretary called and Monte said, we were just getting ready to call you. He said--

MR. JOHNSTONE: Was that incident outside--

MR. GIBSON No, I don't even, I think my chief of staff had phoned home and was anxious to go home, and I was telling him go ahead, you know, at that point to go ahead. He had young children and a wife who was not home and out of town, so--

MR. JOHNSTONE: That was not Bill
[unintell.]

MS. GARVEY: Right. It was not a big deal.

MR. JOHNSTONE: Right let me draw on that just for a second. I mean, it's not a terribly

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

important deal. But was it that concerned you is that here we are our system is in a huge emergency here and the chief is--

MS. GARVEY: I said to him, I said if you feel you need to go home, you should. He did not go home at that point. He did go home about two hours later. So he actually didn't leave right at that point, but I said, if you really feel you need to, you've got to take care of your family.

MR. JOHNSTONE: You didn't feel ill served, then?

MS. GARVEY: No, because you know, what, I really found, I mean, you know, in those situations and the way the chief of staff position at the FAA, and I think that this Administrator has a very similar. That's sort of the administrative piece. The real operations person is your Deputy. So the Chief of Staff is kind of your administrative arm, keeps the trains running on time, make sure that the paperwork is going, but your key person is for operations is Monte. But Tom did not go home, made another call, but I understand.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSTONE: All right. okay, so.

MS. GARVEY: So, at that point, Monte said to the Secretary, we really think we need to bring down, to bring down the system. But the goal is our concern where there's enough uncertainty in the system we think we need to bring the planes down. The Secretary listened, cupped his--the phone and clearly was in communication with someone else in the room, I am told it was the Vice President. I assume it was the Vice President. And he said, bring them down. Okay, bring them down.

Now, the reality is, and I think the Secretary has since acknowledged this, that the controllers were beginning to do it, as you said, Sam, they were doing their job.

And here's where there may have been, this is where the communications in the time stress are not always what you'd like them to be. The Secretary had been trying to get a clarification, said to Monte, well, they'll come down, won't they? I mean, they will come down? In other words, if you tell them they'll come down?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And Monte being the good, by-the-book guy that he is, said well, theo--you know, he was saying--he was speaking theoretically, he said, well you know, it's always the pilots call. Because that is the rule, the pilot's the main man.

MR. JOHNSTONE: It's the international rule.

MS. GARVEY: Yeah.

MR. JOHNSTONE: It's his airplane.

MS. GARVEY: That's right. That's right, so he was being very precise and exact. And I think what the Secretary heard was well, we'll kind of leave it up to them, which is not what Monte meant, and he said.

MR. JOHNSTONE: did the Secretary understand that?

MS. GARVEY: I hope so, I think so, yes. Yeah. So there was a kind of a and at this point, I said, Mr. Secretary, they're all coming down, yeah, they're all coming down. God you're being so precise, but there was clearly a misunderstanding

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

on--both on Monte's part on what the Secretary was really trying to get at and then when the Secretary heard it.

MR. JOHNSTONE: The Secretary had in mind, though that he must have known that, hey it is the pilot's aircraft, you know, do we have the authority to tell him to come down.

MS. GARVEY: I think he must have, or he, I think if you asked him now, he'd say, of course, I knew that the pilots. But he heard Monte say, what he heard was, and there was not a pilot in the system who didn't.

MR. JOHNSTONE: But there's no doubt in your mind Monte meant that--

MS. GARVEY: Oh, no doubt at all.

MR. JOHNSTONE: --that we will--

MS. GARVEY: No, doubt at all.

MR. BRINKLEY: Well, and I think there's another thing. There's an issue of negotiation of where you come down, I 'm not.

MS. GARVEY: Well, that's true.

MR. BRINKLEY: I think that's the real

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

issue is where do you want me to go. You want me to do what?

MS. GARVEY: Yeah, no thank you. Or and there is that negotiation.

MR. BRINKLEY: They do talk like that, I can get here better than I can--

MS. GARVEY: Right or I'm concerned about my fuel. So, I'd rather go here, absolutely.

MR. BRINKLEY: Very seldom that I do that, I mean

MS. GARVEY: That's a good point, Sam. Yes.

MR. BRINKLEY: There's runways, there's tons of things now that are going to the detail. The devil is in the details. And this guys, se the pilot is still responsible for everybody sitting behind him.

MR. JOHNSTONE: Right.

MR. BRINKLEY: And they're got to work, that's a whole, that's not that I won't come, it's just--

MR. JOHNSTONE: What are the technical--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Sam this is a good time to raise the issue again, because this is where, you know, at least from the Secretary's mind, Vice President mind, your mind, everybody's mind that, okay, we've got to do whatever we can to stop any other plots that might be in the offing.

MS. GARVEY: Or we were just uncertain, we didn't know what was out there.

MR. JOHNSTONE: And, again, this kind of goes back to answering the family question of--not that, you know, there's evidence it could have made a difference, but just how did the system operate, of okay, we don't know what's up there, so that's why we've got to bring them down. Let's, you know, we need to notify how the cockpits, you must secure your cockpit, don't let anybody in because you're know you're going to be a weapon of mass destruction. Was there any discussion about, you know, one doing that or who is responsibility for actually making that step?

MS. GARVEY: It was really, you know, the direction was to bring them down, and that was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

really the focus. And it was, really the controllers and the facilities, I suppose as I look at back at it now, discretion how much information they were going to give the pilot.

A number of the pilots knew what was going on, they had heard from their colleagues in other planes--

MS. GARVEY: Who had picked up some of the radio. Some of the controllers, just because of the limited amount of traffic they had in their sector might have given the pilots more information.

MR. JOHNSTONE: Right.

MS. GARVEY: But honestly, we didn't do that, though, because there was a lot of concern. I was worried about Towers that we're used to getting three aircraft in a week, all of a sudden, perhaps being--we didn't know, were they going to be asked to take more--the important thing was to give clear correction to the pilots to bring the planes down. To just get to a destination as quickly as they could. And if we felt there was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

enough--to answer your question, did we give them clear orders, secure the cockpit? I know I didn't. It's probably a question worth asking Monte. whether he felt there was more discussion .

MR. BRINKLEY: The training, and I think and then this is a question in retrospect. I think, basically the training was--and we'll review this with the air traffic guys--that did not share a lot of hijacking information--

MR. GIBSON Right.

MR. BRINKLEY: --to everybody else in the system, it's in the protocol.

MS. GARVEY: Right.

MR. BRINKLEY: So, you would have remember we're already implementing protocol--we're already using their training and what they did, they're dancing with their training in this point in time.

MS. GARVEY: Right.

MR. BRINKLEY: As they start their own initiatives. So, their protocol, it would have taken, I think, a direct requirement to override what they were inclined.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSTONE: Start using the code words.

MR. BRINKLEY: The code words and some of those things are there and they don't do that. So--

MS. GARVEY: And that's always the balance, you don't know all of the pilots, you don't know how they're going to react; how they're going to respond. But I have to, we did not have that sort of conscious discussion.

MR. BRINKLEY: Do you remember later ever going back afterwards and reviewing what happened that day, if you said, you know, maybe we should have told everybody? I mean?

MS. GARVEY: Absolutely and--

MR. BRINKLEY: I mean, and reviewed that?

MS. GARVEY: --in fact, Monte did a couple of pretty intensive reviews that I was briefed on at least once or twice a week as they went through the process. Made one mistake which I will tell you about, but one was on the operations room itself. I mean, the whole operations, both the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

kind of people we had there, who we were going to have lead that room. So, we made a number of changes there. We made some changes with respect to how we notify and who notifies Defense. I mean, when the first notification, I do remember, I think it was around 8:20, I can check. But somewhere around that when the first notification went to NORAD. I mean, it essentially went at a pretty low level and that's because we had a pretty good controller who said, if I'm not going to get the right response from the NORAD supervisor or my supervisor isn't going to go get the right response, I'm going to call directly myself.

And he did, and good for him that he did. so, we clarified some of those things. People that we didn't do a good job on. And this is really one that bothers me. I don't think we documented enough of what our--you can see the results in the changes in the protocols; you can see the results in the changes and the way the operations centers works, but I'm not sure we actually wrote enough down in those months or the month or so afterward

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

about what our deliberations were, what we considered. There was so much going on, not the least of which was the beginning of the standing up of the tail [unintell.] that we probably didn't do as much toward capturing--

MR. JOHNSTONE: Capturing the thoughts and rationale.

MS. GARVEY: And the rationale and what out thinking was and what the concerns were. So, in hindsight, that is another, you know, that's an area that we--well.

MR. BRINKLEY: SVTS, when did you go to the first SVTS?

MS. GARVEY: I'm going to--and this is I think it's around 11:00; I think it may have been earlier than that, though, does that sounds a little bit later. But I think it was after we we'd started to bring the planes down. But it was somewhere in that period.

And my recollection of that is it was pretty much information from each--

MR. BRINKLEY: If I remember correctly,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

everybody went around and said this is what we're doing.

MS. GARVEY: Right, this is what we're doing; this is what we know; yeah, yeah.

MR. JOHNSTONE: Could we ask son the question of when that he planes are coming down and they're landing and your concern is, primarily, to get them down safely. And the air traffic control system, as many have said, had performed a Herculean task that day.

Was there discussion either with the FBI or anyone else about, okay, you've got, you don't really know what's going on and the four planes had crashed now. You don't know what's going on about other possible plots and all that. You bring the planes down. Is there a discussion about, okay, what do you do with them when they land. In terms of the passengers and the aircraft.

MS. GARVEY: Not in an intelligence sense. And that's an interesting observation. There had not been that. there was a sense of what do you do with the passengers and, not immediately, but

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

certainly within the next several hours. What do you do with the planes, they're all in the wrong place?

The biggest concern were the passengers that were stranded in Canada. Under terribly difficult conditions. But not in a sense of should we secure--

MR. BRINKLEY: And check them--

MS. GARVEY: I'm not sure, frankly, that there would have been the resources to do that. I mean, again, in other places where the planes were landing, were probably places that I don't know, you'd have to go back and look, but were they places that even had a Security network in place or a system in place or would there have been enough FBI. We did not do that.

MR. BRINKLEY: It wasn't a subject that Lee or somebody came up--

MS. GARVEY: No, no--

MR. BRINKLEY: --and said, you know, we really need to screen--

MS. GARVEY: --no--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BRINKLEY: --try to figure out--

MS. GARVEY: --no--maybe we should keep everybody for, say 12 hours or five hours or whatever.

MR. BRINKLEY: Keep them on the plane long enough till we can get them off and frisk them and--

MR. JOHNSTONE: You wouldn't know the basis of Secretary Mineta's testimony to the Commission where he said that there were anecdotal reports that the grounding had prevented a number other plots that day, but we don't know the details and we'll never know them. I mean, I'm paraphrasing him somewhat. But that was the gist of his testimony.

MS. GARVEY: No, I had one fairly intensive briefing with the FBI post-9/11. And quite honestly, my focus shifted pretty quickly after 9/11 to one, how do we get the system up? But, then, also, what do we do, what does an agency do? How do I support the Secretary in standing up to TSA? I thought the FBI had a lot to do without

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

getting a call from me to get briefed every other day.

What I did want to know, and what was often asked of our representative over there. And, frankly, I think what was a given with the FBI is anything in your investigation turning up something that you need to respond to? Are you learning anything that would cause us to either change a security directive; create a new security directive; and, in fact, there were security directives that came in place because of that sort of information. So, the lines are definitely--the communication was definitely open at that point.

MR. JOHNSTONE: And this is something that [unintell.] going to--

MS. GARVEY: Right.

MR. JOHNSTONE: --let us know tactics, plots, anything that we can--

MS. GARVEY: Right, and he was there, I mean he was hearing a lot of the same things.

MR. BRINKLEY: This was post-9/11?

MS. GARVEY: Yeah, that's post-9/11,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

post-9/11. And I remember--the reason I mention that is because I remember the question being asked, were there other plots and it was kind of an evasive answer, to be honest with you and I don't know if it was evasive because people didn't really know--not dissimilar from what the Secretary says, you know, it would not be--

MR. JOHNSTONE: Reservation that came from the FBI?

MS. GARVEY: The FBI, yeah. And evasive may be the wrong word, but it was an imprecise answer.

MR. RAIDT: Anything else, talk about the Executive Summary, talk--

MR. BRINKLEY: Yeah, talk about that, and then I have one other question.

MR. RAIDT: On the tactics and everything, as information was flowing in--well, where did information flow into ATS-1, about, okay, box cutters in the cars at the airport, the phone calls from flight attendants and some of the passengers to the relatives on the ground suggested knives.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Where was that information flowing to? It's just going to you or everybody simultaneously and then, you know, this issue, I want to get to the Executive Summary and the gun issue. Were you ever apprised that there was some suggestion that a gun was involved?

MS. GARVEY: Not on 9/11. And I could not tell you exactly when, but certainly when it began to surface, maybe even through the cracks, but it began to surface and that was, really, the first time that we had--that I had heard that. I know GAO took a look at it and so forth. We, certainly went back internally; we could find no validation of that.

MR. RAIDT: We have a sequence of four documents called Executive Summary. They were prepared at FAA. The first one is dated September 11, 2001--

MS. GARVEY: Yep, we would get these--

MR. RAIDT: This one is dated September 12, though at the bottom is it was actually prepared in the afternoon of the 11th. And we've

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

received testimony earlier that these summaries were prepared for you and the senior leadership--

MS. GARVEY: Right.

MR. RAIDT: --in a working center set up on the third floor where--whose goal was to write down

MR. JOHNSTONE: --[unintell.] lot of grunt work downstairs, while you were doing the nets and stuff like that.

MS. GARVEY: Exactly.

MR. RAIDT: Did you--do you recall receiving these at any point on the 11th or seeing them afterwards?

MS. GARVEY: Yeah, we received many of them.

MR. RAIDT: Oh, okay.

MS. GARVEY: I mean, we would receive them quite frequently.

MR. RAIDT: You received many of these?

MS. GARVEY: Well, sort of summaries of what was happening. I mean, there was a lot of information and really got your information, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

guess, essentially, in two ways. I mean, there were the sort of oral briefings that you'd get from the Security people, sometimes a couple times a day. And then the Executive Summaries that would come in, like, quite frequently, I'm trying to remember if it was as often as once a day--but--

MR. RAIDT: Okay.

MS. GARVEY: --we'd get.

MR. RAIDT: And if you'd look at the second paragraph of, that one's more readable, but it's basically the same information--it's the one you were looking at is more legible.

MS. GARVEY: Okay.

MR. RAIDT: It's essentially the same information. And this is the second document which is the 5:31 on 9/11 document.

MS. GARVEY: Mm-hmm.

MR. RAIDT: Which contains accounts of, mainly, things happening on American 11.

MS. GARVEY: Right, right, and I'm sure I saw it, whether I actually saw it on the 12th or a day or so after--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT: Well, here is the same document that was prepared on the following day, i's the next in a sequence.

MS. GARVEY: Well, they both say September 12.

MR. RAIDT: Yes, if you look at the bottom line there--

MS. GARVEY: Oh, I see.

MR. RAIDT: --you can see and they say that this one was, in fact, produced on the 11th, even though it's dated the 12th, so this one precedes the one that you're looking at now. But in the second paragraph, the information is basically the same.

MS. GARVEY: Mm-hmm.

MR. RAIDT: Which does relate a report from Ms. Clark at American about the gun.

MS. GARVEY: Right.

MR. RAIDT: And has some information about reported bombs on the flight. Do you recall seeing those?

MS. GARVEY: I'm sure I did see them. I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

mean, I really, saw most of them. What I can't tell you is whether I actually saw it on September 12.

MR. RAIDT: Okay.

MS. GARVEY: And it may have been that I was relying more on the oral briefings at this point.

MR. JOHNSTONE: But you did see one that talked about the gun? And we spent a lot of time--

MS. GARVEY: Yeah, yeah, I'm sure I did, but I can't tell you, John, is whether I saw that before or after some of the questions were raised and I went back and may have looked at this again.

MR. RAIDT: Let me ask a quick question on that, then, because we've been doing our own inquiries and interviews on that--

MS. GARVEY: Right.

MR. RAIDT: --and between us, I mean, it's not turning over anything--

MS. GARVEY: New.

MR. RAIDT: --particularly new, although we think we've pinpointed how it is that this story

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

got in the system.

MS. GARVEY: Okay.

MR. RAIDT: But, was there any discussion that you recall with respect to that Executive Summary or all three things that John or Bob said that either from the air carriers or within FAA that said, hey, that's a whole different ball game, if we're getting into the area of prohibited items, the guns and things that were detectable, you know, the air carriers are at great risk--the FAA is at great risk of, you know, public criticism, that type of thing. I mean, the question again that always raises a suspicion is right or wrong was an Executive Summary. And, then, you know, John Flaherty kicks in and just says, hey, you know--

MS. GARVEY: Right, yeah.

MR. RAIDT: --this is a huge allegation, check that out and then it disappears.

MS. GARVEY: Right.

MR. RAIDT: But there could be very good reasons why that happened, but was there a feeling that, boy, this--this put us and the system at risk

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

as opposed to what are the facts.

MS. GARVEY: Right. No, I mean, I would have been naturally horrified if that were the case. But I don't ever remember anyone, you know, anyone saying to me, you know, God, this is horrible. What I do remember is, look there's been a report of a gun is that accurate? How would we have gotten a report like that and the discussion that, look, these things are being pulled together at a lower level; they're getting it from lots of sources. [unintell.], as Condee Rice says, created some confusion. And, frankly, that made eminent sense, particularly having been 9/11 when we were hearing about, you know, the plane going down in Ohio.

And when I went to the FBI, which was sometime, I believe, in October, there was no mention of a gun. They showed us--this may be classified, so I'll just be careful about that, it may not be.

MR. BRINKLEY: That's all right if it's up to the Secret level we can handle it here--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Okay.

MR. BRINKLEY: --we're all actually cleared at the ES level, but--

MS. GARVEY: All right, I mean, they certainly showed a number of pictures of things that they found and there was certainly no discussion of guns, no evidence of that; not--things that I've not seen reported in the press, but were not--

MR. RAIDT: Just to give you a chance, because I want to read from your testimony on this point before. And just relate it--first in direct response to a question you said that you had, quote, "no evidence with respect to the use of guns, bombs, or box cutters," but then you added, "there was a report--quote, "there was a report that at one point surfaced, and it may have been even part of a written report, but it surfaced from somewhere in the field. It may have been from American Airlines in particular that spoke about a gun." Would this--would these documents have been the written report that you were recalling?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Yeah, I mean, if I saw anything, it would have been this.

MR. JOHNSTONE: An then with respect to other weapons or tactics, did you ever hear anything from the FBI or from your internal people about other tactics, such as riding in the jump seat; or having, you know, pilots uniforms or any other tactic that--

MS. GARVEY: The Secretary had received a report about a uniform that had been shredded in a hotel room in France. And the pilot's, all the pilot's identification was stolen, this was post-9/11. And there was tremendous concern about that. In fact, I think the Secretary mentioned it a couple of times publicly. It turned out to be a fabrication. And it turned out that the flight attendant had shredded the uniform himself, because of difficulties he was having and so forth and so on. So, that was the one that I remember created a great deal of concern. I did not hear and no, nothing from the FBI.

In fact, what I found interesting with the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

FBI is that there were a number of things found at the scene that could have been used as a weapon, that were very harmless. I mean, theoretically, letter opener; but we've never heard, you know, and, again, it was just sort of showing pictures of what was on display there.

MR. JOHNSTONE: Mainly at the Pentagon and at Pennsylvania?

MS. GARVEY: Right, Pennsylvania.

MR. JOHNSTONE: Then you didn't see any evidence from--

MS. GARVEY: No, what--and even a very small, a very thin, you know, piano wire had been used in one way. And that, I mean, it just made you realize how, if somebody is determined to do that, how even the most mundane articles could be--

MR. JOHNSTONE: Right, become weapons.

MS. GARVEY: --become weapons.

MR. JOHNSTONE: Yeah.

MS. GARVEY: But I heard nothing about the jump seat.

MR. BRINKLEY: Let's talk about the jump

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

seat just a tad, procedurally.

MS. GARVEY: Right.

MR. BRINKLEY: And we're trying to run this to ground. There's been the reports that--essentially reports that a number of the--some of the hijackers my have actually used jump seats--gotten into jump seats and flown some. Now, whether the--

MR. JOHNSTONE: Before 9/11.

MR. BRINKLEY: Before 9/11.

MS. GARVEY: In commercial air flights?

MR. BRINKLEY: Yes.

MS. GARVEY: Really?

MR. BRINKLEY: Yes, and so, we're trying to--talk to us about, now we're not sure if that was true or not. But the question is, talk to me about--what is the procedure to get jump seat authority? I mean, just because you show up in--

MS. GARVEY: Yeah.

MR. BRINKLEY: --a uniform and it looks like, you know, another--I mean, there's got to be reports. I mean we know that uniforms can be

MILLER REPORTING CO., INC
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

bought, they can be stolen, they can be lost at the cleaners--

MS. GARVEY: Right, right.

MR. BRINKLEY: What is the process and who can--and who watches that stuff in FAA?

MS. GARVEY: Yeah, yeah. A lot of that is watched by Flight Standards. I mean, for example, the controllers like the jump seat and would, certainly, use the jump seat privilege and that is the sort of professional argument is that they need to understand it. And then, there is an argument to be said for that. The flip side is that, as Ken has pointed out in one of his very early reports to me that it was also used as a convenient way to get to vacation spots and so forth. So, you know, like many good things, it can be abused. Right, and it was with the FAM program, with the Familiarization Program as we knew it. So we actually had to suspend it for a period of time and worked with the IG and came up with a series of changes that the controllers needed to go through.

For flight inspectors, I think we didn't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

see nearly that kind of abuse, but it was often the same principle of riding in the jump seat, just to familiarize themselves with the aircraft and so forth.

But there are procedures that people have to go through. You can't just show up. You have to have, you know, a special authorization that's given to, you know, that's given to the individual. Between airlines, I probably want to get more clarification from the FAA. The airlines, themselves, would often--

MR. JOHNSTONE: Recognize their colleagues?

MS. GARVEY: Right, their fellows--that's right their colleagues and, I suppose, theoretically, if they had a pilot's license and there was a spare seat or whatever. My experience with the airlines is they were more apt to dead-head and not use the jump seat. But they could, they could use the jump seat. And, in fact, post-9/11, I think a number of the pilots raised that concern of not, actually, I think it was just

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the opposite of not wanting to go back using the jump seat much. So we had a period of time when it was not being used. I don't know what the status is now, but how the individual colleague, the colleague between the airlines, how that was regulated, I think you'd want to go back to the FAA and clarify that a little bit.

MR. BRINKLEY: See if we had regs, and then, of course, how the airlines did--

MS. GARVEY: Yeah.

MR. BRINKLEY: I mean I would assume a few pieces, how we regulated it or not or had--

MS. GARVEY: Right.

MR. BRINKLEY: --or how we allowed the--or how they treated it among themselves.

MS. GARVEY: Yeah, among themselves. exactly. And I think there is a--there's still, again, a bit of a contradiction between wanting to allow the crew to move quickly and easily, even through the system as it is now. And then, also recognizing, as you pointed out, Sam, that it is possible to steal a uniform and that just showing

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

up in a uniform may not be enough.

MR. BRINKLEY: That's sort of my last, from my perspective. I just--I want to talk a little bit about the follow-on SDs [ph]. Obviously, somewhere in this process, we're going to turn this system back on. Before we can turn it on, we need these guys, we're looking at what SDs did we have to put in place to--before we'll flip the switch on letting them fly.

MS. GARVEY: Right, right.

MR. BRINKLEY: How did--I mean, how intimate were you with that process and how and how did you talk with the carriers about determining what we're going to do and what we're not going to do?

MS. GARVEY: Yeah. Both Monte and I were briefed pretty regularly on what the changes were going to be. Some were obvious, like the no knives, which was an interesting conversation with the CEOs, but some were obvious, like the no knives; no curbside checks; the re-enforcement, some kind of re-enforcement of the cockpit door.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Some came about as we learned more, again, through the whole FBI process. Some were more controversial than others. Airports had a lot, particularly small airports had a lot of difficulty with the 300-foot rule. But, while I think both Monte and I relied on the professionals who were working with the FBI to come to us with their suggestions or with the notions or the ideas that they had--and we were briefed very regularly on them--

MR. RAIDT: The professionals within FAA?

MS. GARVEY: Yeah, within FAA, but also knowing that they were bringing in, you know, the FBI, they were basing it on intelligence. There was not the notion that we were going to say this is what you ought to do.

The Rapid Response Teams, I'm not sure that they actually produced, thinking about it, the recommendations that came out of it, I don't think necessarily resulted in SDs, but they certainly resulted in actions that we were going to take. For example, changing the crew training; the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

re-enforcement of the cockpit door, was sort of more of a time line, in 90 days, to get it done.

So, some of those may have actually turned up in an SD, but they all resulted in actions that we needed to take. So, we got briefed pretty regularly.

MR. JOHNSTONE: What was you--what was the interesting conversation with the CEOs on--

MS. GARVEY: Well, I just, one I've seen reported, but I never felt it myself, but it was questioning whether getting rid of the knives, what would we do about first-class?

MR. JOHNSTONE: Oh, for silverware?

MR. RAIDT: For silverware.

MS. GARVEY: Yeah, sort of left meat loaf, I think is really the answer isn't it?

MR. JOHNSTONE: Yeah, pretty easy answer to that question.

MS. GARVEY: And, actually, in fairness it was just once--and I think the others kind of groaned. I think it was kind of like an initial kind of without thinking kind of reaction.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BRINKLEY: When you started briefing them on the Sds, did you get any push-back?

MS. GARVEY: I think--I did not get push back. We were pretty clear and the Secretary was involved and a number of those conversations were pretty clear that, look, we're going to be making some changes.

And, at that point, I think people were--there were two things that were occurring: One is they really wanted the system up again. You know, when you have those first conversations. And, secondly, they did realize the severity of it. I mean this was--this was pretty horrendous. And I remember one very difficult conversation the Secretary had with the CEOs where he sort of banged the table and said, do you realize what's happened? You know, do you realize? And they finally, you know, this was two or three days into it. We had conversations with them the first night. And I think the second night sort of on their own and they were fine. They were, I mean, again, I think it was the severity of the moment.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And the desire to get it up.

Having said that, of course, with each passing month, and as more and more SDs were coming out, there was, at the Security Director's level, I think, some questioning of what we were doing. Some questioning whether these were the right things or it was really a waste of time. And to some degree, I understand that. I mean, some of this was we were--we didn't have a lot of options at the time and a lot of things we could do very quickly. So there was, there were certainly some, including, perhaps, the 300-foot rule for some of the small airports. That, you know, we put it in quickly, we said, let's get it in and then we'd re-examine.

So there were some difficulties, yes, with the Security Directors. I think there was also, in the beginning, some communication problems. Where we were moving fast and, perhaps, the right and amount from the airlines perspective of outreach to prepare people for it wasn't there. But, those things happen. It is essentially my view of that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BRINKLEY: Well, we did have one interviewee, basically, that said they had an SD they drafted downstairs, came upstairs, now, and upstairs, did that person mean, basically, you? Now, I'm not sure if it meant you, it could have been Monte. But basically that the interviewee indicated, the testimony was, the original SD came up and it came back downstairs and it said you guys gotta water this down--this isn't--

MR. RAIDT: We were told this was on the day of 9/11.

MR. BRINKLEY: Yeah, this was the original on that started--

MR. JOHNSTONE: After a consultation with the airlines, that was the--

MR. BRINKLEY: Yeah, and the allegation was that after consultation with the airlines they came back down and said this is too harsh. And I mean, we have that, there's a data for it. So, do you recall--

MS. GARVEY: I do remember--I do remember a very, when the first SD, and I don't remember

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that it actually came to me, I'm not sure it even got that far. But that the initial reaction is, we put everything on the table. We put everything and then we, that is the FAA and that--and I can't remember which element--I would be surprised if anyone said water it down. I would not be surprised--

MR. BRINKLEY: That was the description.

MS. GARVEY: --right, and I would not be surprised if someone went back and said we need to make sure that all this really makes sense; meaning we need to make sure we can do all of this. Sometimes there was actually the implementation of it. And I'd want to think a little bit more about which elements of it and how, I don't think the actual SD, but we did go through an exercise, really, of just sort of laying down, not in an SD but in a piece of paper saying what are all the things that we need to do. And some were deferred [ph] to slightly later. I'd be, and I should go back, even for my own memory just to look at what was taken out--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT: Do you recall--

MS. GARVEY: --and see how significant it was.

MR. RAIDT: --do you recall any modifications based on input from the airlines that day?

MS. GARVEY: I don't remember that it was really based on the airlines input, I really don't. I don't know whether Monte had conversations with folks, I don't recall him saying that.

MR. BRINKLEY: Okay.

MS. GARVEY: I mean, I do think there was an issue of also trying to be fair about it, too. But I'd like to take a look at it to see what was either deferred or deleted.

MR. BRINKLEY: Well, if you could clear that with us whenever you get a chance, that would be helpful.

MR. JOHNSTONE: Just one quick question, you had said that you felt like one of the deficiencies when you looked back was not documenting the changes in looking back. More

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

specifically, since there were so many elements of FAA between headquarters and then the regional offices, the [unintell.] all the air traffic control facilities, I mean we're dealing with an enormous number of auspices that had some input or, maybe, had communications with the aircraft. Was there an individual at FAA headquarters that, okay, let's get in everyone's stories into one central spot? Or was that seen as the FBI's job, or would, take us through that a little bit. I know, it wasn't documented to the extent that you would like to have. But was there an effort made to try to bring everybody's story together?

MS. GARVEY: Sometimes, there was an effort made. And, as a matter of fact, just, even, from a practical point of view, the opening up of the airspace system and, in particular the opening up of Reagan National involved all of the players being at the table. So, it was not unusual for us to begin the day with a meeting with all the key players, end the day with a meeting of all the key players.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSTONE: Mm-hmm.

MS. GARVEY: And, for example, and Lynne would be a great one to talk to about this. But, for example, opening up Reagan National. First of all we had to hear--Air Traffic had to hear from Security what were the measures that they felt were necessary. Security was--but then, Air Traffic had a whole series of things that they had to do to make sure that, okay, they could respond to that, including, by the way, talking to the Secret Service, about some of the provisions that the Secret Service cared about.

When it came to crew training, for example, that involved AVR as well as Security. There was really, there were none of these issues that could be dealt with even by Security in isolation or very, very few.

MR. JOHNSTONE: And it's absolutely important for it to get on the record, I guess the first of my question is a little bit different, inasmuch as, for instance, all air traffic control centers that had contact with the aircraft or the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

air carriers, was there an effort to say, everybody who had some connection to the flights--

MS. GARVEY: I know what you're saying.

MR. JOHNSTONE: --tell your story and then we want everything in here so we can put something--

MS. GARVEY: I don't think we did that well. And the reason--I'm basing that more on my recent readings of the press reports of what the Commission has tried to get from it. From what I understand, I actually called Shirley Miller because I was pretty horrified to see--and I said, how did this happen? And she said, you know, we actually thought we had everything, but you know there are facilities out there and we didn't push hard enough.

MR. JOHNSTONE: Mm-hmm.

MS. GARVEY: You know, she said, we've got to get it--we'll get it and she said, she thought they'd get it quickly, but--

MR. RAIDT: Culturewise with respect to FAA why, I mean, on something of such enormity to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

everybody, you know, that if, particularly now, I mean, and realize that there were other parties of getting the system safe and addressing looking forward and that the FBI was investigating. You know, I think we all agree it would have been important to do such a thing. You've been very candid that, you know, that you wished there had been more documentation.

But in the aftermath, how is it that you think that that type of--culturewise--that people would say, well, we've got these files bearing on our communications with the aircraft and what happened that day, you know, that it wouldn't dawn on somebody at these centers that this might be important not only for headquarters but to the Commission?

MS. GARVEY: I think post-, sort of pre-Commission, but post-9/11, I think people really believed that they did have the most significant documents, that the Command Center had such--and we have made some changes which gave the Command Center more prominence into that. And I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

think we probably, honestly believed that we had the necessary information and that anything that might be in the field might even be redundant. I'm supposing here because, certainly, we've asked that, you know, I'm sure they've had enough briefings and I know Monte had probably even more than I did on sort of what happened and what occurred, even in preparation for some of the hearings we were going through that.

And I think we believed we had all the relevant information. Sort of post-Commission, I think there's a little bit in talking with Shirley, I think there may be a little bit of folks have gotten involved in a new Administration and a whole bunch of new issues and they may not have focused on it, quite as much as say, Shirley Miller, might have wanted them to focus on it.

MR. JOHNSTONE: Right.

MS. GARVEY: And I think--

MR. JOHNSTONE: They are now ?

MS. GARVEY: They are now, yeah. But there is sometimes in big bureaucracies and I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

certainly have learned this, you know, it's always like the question you were asked--

MR. JOHNSTONE: Right.

MS. GARVEY: --and you hope that people understand that the question you ask, if you haven't asked exactly the right one, then, you know--but if you haven't asked it, you may not get always the right information. I've had a little bit of experience with the FAA on that.

MR. JOHNSTONE: Anything else.

MR. BRINKLEY: I know we want a change in the recommendation.

MR. JOHNSTONE: Before that, that's such a perfect segue, is there anything with respect to 9/11 or beforehand that we should have asked that we didn't or that you think it's critical that we know for our mandate or maybe something you prepared yourself to talk about that we didn't ask?

MS. GARVEY: No, and I'll tell you, if you're asking, primarily for the Commission or are you asking more do I think we should have done something?

MILLER REPORTING CO., INC
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSTONE: Either way.

MS. GARVEY: You know, I've thought a lot about, you know, should the FAA have done things differently. What should we have done differently. And it's always, I think a little bit easier to respond to and there's probably no one in government who doesn't say, gosh, we should have paid more attention; we should have done this and I think if you ask any agency, they will tell you that.

It is though, most evident with the beauty of hindsight. When I now look at here some of the things, and forget that it was in the midst of a whole bunch of information and, you know, so, it's been a hard question for me to come to a good solid answer on.

I feel we did a very good job knowing what we knew. I believe there were lots of areas where we could have done even more, you know. The Red Team is one example where, you know, Ken, in his report--and he and I talked a lot as he was doing that, mostly again to say, what am I missing here,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

give me some help. And one of the things he had made the point, which I think is a very good one, is just even circling back to people and letting them know what you're done with recommendations. What ones were implemented and what ones that may have been started. Lynne recognized that even before the IG, when she came in. She did a first briefing on that. She said, in hindsight, she should have done, you know, more. She did one thing with the Red Team when she brought them in and said, I want you guys to know about the work that you've done and what changes we've made because of that.

So, there are those sorts of actions. In total, I think we responded well to what we understood the threat to be.

In terms of the Commission, I guess, my greatest and this is, I'm going to be maybe more candid than I should be. I guess I feel we have a lot riding on your, you know, on your sense of looking at it and recognizing that hindsight will lead you one place, but I think one of the great

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

challenges you must have, among many is putting yourself into what it was like, as you said in the very beginning, John, what was the tenor of the times, where were we? And I think that's a great challenge as you sort through all of the information that you're getting.

I think I'm running out of steam. I don't feel like I'm being articulate anymore.

MR. JOHNSTONE: One of the things, though, and we're looking at one of the things that concerns us, actually is not just to tell the story fairly in the tenor of the times, One could argue you may get too many dots to connect, not enough dots to connect.

MS. GARVEY: Gets back to sometimes too much data but not enough information, exactly, yes.

MR. JOHNSTONE: And a system that allows you to work that. And that might be--with that comes--okay, if that's a fairly, I mean, I don't want to say it's a common, flaw, but it's a recognized problem for a lot of bureaucracies.

Is recommendations, our real challenge, we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

have the fairness issue of telling the story --and getting the facts right. At the same time, it's where--we now have to figure out from now, what am I going--what are we going to recommend to the American people to try to mitigate prevent or mitigate this from happening again.

So, now, you've been at DOT for a number of years. And so, we're not just--we have to be not only somewhat clairvoyant to defend the aviation system but the entire transportation security system. So, given your experiences and time in DOT, what do you think?

What are your recommendations?

MS. GARVEY: Well, the first one I'm going to make is probably one you've heard before and that is--and I think it's particularly, Sam, because of what you just said, this is not just about aviation. But one can only imagine what the TSA is beginning to wrestle with in terms of ports and containers and so forth.

The whole basis of good intelligence and how is that intelligence shared, probably in a much

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

more institutional and systematic way than we've done it in the past. How are we set up to gather--well, first, to gather the intelligence and then to share the information. And I think that's really critical.

And it probably needs to be--and I don't know how it should be. I mean, I have no idea how it should be institutionalized, but, I mean, clearly, somehow, whether it's within the FBI or whether it's within the CIA or whether it's someplace separate. But someplace that really has all of the relevant information. So that an agency or the affected industry is hearing from, you know, in a sense one entity. So, I think that's a very big one.

I think, secondly, clarifying the roles and responsibilities is something that we have not fully done yet. We alluded a little earlier to the notion that there may be a sense that the airlines can walk away from this now. And, obviously, that's not the case. But even with that, what's the role of the airports? I think there's some

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

tension now between the TSA and the airports.

MR. RAIDT: Do you have any--do you want to elaborate on how--

MS. GARVEY: Well, you know, this is interesting, because in some ways it's counterintuitive to the idea of having an established TSA that is sort of omnipresent and responsible for everything. But I think you could--and I haven't given it enough thought--but I think you really could carve out a role for the airports that would not give the TSA, for example, all the responsibilities for the perimeters and for some of their airports that they know so well.

I mean, when you look at the way local authorities are set up--we've got local police--it's not the FBI that's doing everything, there is a real, you know, sort of local presence and local responsibilities.

MR. RAIDT: Mm-hmm.

MS. GARVEY: So, I think that there is a role that airports can play.

MR. RAIDT: Let's talk about airlines.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSTONE: What do you think about going back to the previous system--where they own the security, I mean, they had the five pilot programs through the five levels, Cat X, Cat 1, Cat 2, that's still privatized. I mean.

MS. GARVEY: Would you have the airlines own it?

MR. JOHNSTONE: There's a school of thought that says, regulate them and really hold them accountable.

MS. GARVEY: Well, that's, you see, actually if you go back to where we were. And this does not put me instead with where the Congress ended up. But, I think you can have them. The question is, is there federal control? Is there federal control as opposed to does it have to be a federal officer?

MR. RAIDT: It seems to be the emerging thinking around Dulles that what about private screeners under contract with the federal government?

MS. GARVEY: Exactly.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT: Contractual arrangement.

MS. GARVEY: It's a contractual arrangement, we have that all the time in aviation. I mean, the issue is, is it wholesale/retail, you know or what kind of a relationship is it with the screeners. Where I thought we had difficulties is because we were, you know, we were more wholesale--we were up here and we had the airlines in-between. And so, it's the full, I think control being able to really manage that from a control point of view.

MR. RAIDT: Let me ask you for your reaction or recommendation and by very brutally honest about it is that I mean, you have one school of thought that's saying that when you take the screening role away from the air carriers, the it further indemnifies them against lawsuits that you take away a very powerful hammer. I think Mary Scallo [ph] and others would say. And I think there's something to that.

MS. GARVEY: Sure, sure.

MR. RAIDT: That one way to address that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

is to call on through the bully pulpit are recommendations for boards of air carriers to have a committee on security. You know, you've got people walking looking with their audits and executive compensation and everybody has it. Does that make--you've worked a lot with the air carriers, does that make a sense? Is security represented on their boards to a point where it gets built into a system as opposed to--

MR. BRINKLEY: The board of directors have to have a security subcommittee to be active--

MS. GARVEY: Right to be effective, and they don't now. Yeah, that's an interesting notion. It certainly creates a higher visibility and brings in the real directors.

MR. BRINKLEY: And if we were--one of the things that we're bound to do is we want to make sure that any recommendation that is made is vetted well. And thought through and--

MS. GARVEY: Yeah, I'd like to think about that, yeah.

MR. BRINKLEY: If you can identify, maybe,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a couple of people in the air carrier world that may be outside of their corporate structure now who could give us some good candid dispassionate advice on whether that is workable.

MS. GARVEY: Yeah, I wonder about Ed Soliday, do you know, I mean do you know Ed Soliday at all? Ed was Captain Ed Soliday was at United. He's very, very straightforward.

MR. BRINKLEY: How do you spell that?

MS. GARVEY: S-o-l-i-d-a-y, I actually think I have his number. Have you talked to Arnie Barnett [ph], too, at MIT, he was very big on the Bag Match, Dr. Arnie Barnett. Let me think about that. Ed can be a bit inflammatory, but--

MR. RAIDT: Well, that doesn't rule us out talking to him--we've talked to plenty--

MS. GARVEY: I will tell you the one, I'm still a little bit hesitant about getting them back, I want them on the hook, but I haven't figured out--

MR. RAIDT: And how.

MS. GARVEY: --how, because I still get

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

concerned that even if they are supervising it, if they're connected to it at all that their mission is.

MR. BRINKLEY: The question is, how to engineer it in. We're back to the--

MS. GARVEY: We're back to the engineering, yeah.

MR. BRINKLEY: How do you engineer it into the system if they're not part of the system.

MS. GARVEY: If they don't own it?

MR. BRINKLEY: Or they don't own it. I understand, I don't have the answer.

MS. GARVEY: No.

MR. BRINKLEY: One of the things a number of years ago, for example, was to talk about to put, create, for lack of a better word, a non-profit security.

MS. GARVEY: Oh, yes, Bob Crandall [ph],

MR. BRINKLEY: We said, uh, uh, uh, and they owned, they're getting the money in their tickets. And if you took 600 million tickets at \$10 a crack. If I can't run security in America

MILLER REPORTING CO., INC
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

off that amount of billions of dollars.

MS. GARVEY: It might be worth looking at that recommendation.

MR. BRINKLEY: It is hugely--

MS. GARVEY: The last [unintell.] of authority [unintell.]

MR. BRINKLEY: I mean they're hung. I mean, they're into this, I mean, they're having--and you create this board of directors, not only are you requiring their corporate boards, but you create this overall board of directors of government and private to regulate it, to oversee it.

MR. JOHNSTONE: It's kind of like that accounting standards board where it's--

MR. BRINKLEY: Yes, so the question is how do you pull them all back in and they all you can't take anybody out of the system that way. Nobody gets a free ride.

MS. GARVEY: Right, I mean, there's certainly--

MR. BRINKLEY: I don't know the answers.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: --they're certainly on ramp control, which I think is still an area that needs a lot of--access control--

MR. BRINKLEY: Access control--

MS. GARVEY: Those are certainly elements where, even if the feds stayed directly with the screeners, there's the baggage handlers, there's the ramp guys--

MR. BRINKLEY: That's right, you've still got SIDA [ph] issues and SIDA challenges and all the issues associated, if there involved in it up to their necks--

MS. GARVEY: That they'd really have to take more a role in--

MR. JOHNSTONE: And what about this issue that no matter where it is, we're still going to have this imperfect screening system. And you put your finger on it immediately about the fact that we look to crew training as the big layer that--people are going to get through. Now, how are they going to get through and succeed in the cabin? And, yes, we have FAM, what about the idea

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that now that the air carriers have been relieved of the screening layer that they put a lot more attention, time, and money into that layer, start training flight attendants--

MS. GARVEY: Absolutely, that's a great idea.

MR. JOHNSTONE: --wh--

MS. GARVEY: I mean, frankly, that's and you're going to get and I'm sure you already have, a lot of support from Pat Friend [ph]. Did you see that in the recent reauthorization bill, Northwest changed, got changed from Shell to May and Pat Friend is very, very--she called me about that, very concerned about that, on training. And that to me, I mean, you're right. Passengers think differently now, and even just given the--

MR. BRINKLEY: But one of the things that we thought, and like to get your impression on this, is that the way the system is built and I always have to draw it and these guys have seen this, like 50 times and I apologize. Is we always build things like this. These are the security

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

circles that you start all the way out here at the airport edge and you have any and you have screening and you end up having--this will be the FAMS and the on-board kind of stuff.

But we know, that through inspections that's the way you usually see it drawn. What we really know is that they don't look like that. They look like this.

MR. RAIDT: So, they're not perfect?

MR. BRINKLEY: They're not perfect, they have deficiencies and defectiveness in them.

MS. GARVEY: Isn't that interesting, yeah.

MR. BRINKLEY: This is how they really are.

MS. GARVEY: Yeah, that's true.

MR. BRINKLEY: Because this is somewhat percentage; and this has some percentage of effectiveness an this has some percentage of effectiveness. The bad guys went through like this, because they were able to observe it and watch it and it was static.

MS. GARVEY: That's the other piece, too,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

isn't it?

MR. BRINKLEY: It's randomness, it has to be movable, it has to be not observable. And it gets back to engineering. Then you got, how much time do you have to be there to get, so you can get through this, so you can get on the airplane, so you can push tack on time. And so, and they're diametrically opposed.

The randomness is that it is diametrically opposed to the predictability of push back and take off and landings on time. And this is an unknown out here, and the only way you'll get the whole system to work is it has to all be built in together to include where the bags come in sideways.

This always--and I don't, this is my point about it's never been looked at--

MS. GARVEY: From a systems--

MR. BRINKLEY: --from a systems approach. So, and how do you build in this randomness and still maintain the overall systems predictability?

MR. JOHNSTONE: Can I follow up on that,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Sam, because you testified a recommendation, you said that for the future, we need to increase the layering of the aviation security system and make security measures more unpredictable to the enemy. And I'm just on this point.

MS. GARVEY: Right.

MR. JOHNSTONE: Could you elaborate? I mean, do you have any?

MS. GARVEY: Yeah, well, frankly, I mean, that's, it's also, and I think it's another Brian Jenkins' quote, when he talked about the veils of secrecy between it. And that it has to be random and unpredictable, because you can't, I mean, you're absolutely right, it's too easy for a terrorist to spend time and these are the folks who are willing to spend years and--

MR. BRINKLEY: Watching the system.

MS. GARVEY: --watching. And so, you have to keep changing, you have to make it random. And one of the concerns, and I've, again, because I don't want to be. I don't want to be critical. But I have not yet seen our of TSA--and it may be

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that they've just been so dedicated to getting these deadlines met--but I've not yet seen what a systems approach really means. What is the security system ten years from now or five years from now?

And I've actually acted because I'm spending a day a week at MIT and said to my colleagues out there, do you guys have any ideas for what a systems approach really looks like? I mean, how do you start from the time somebody makes an inquiry about a ticket to the time he or she gets to his or her destination?

MR. BRINKLEY: But you have to have some basic fundamental principles of security embedded into the system--

MS. GARVEY: Right, right.

MR. BRINKLEY: --to do that. You have to actually have an understanding of the basic security principles so that you can then figure out how it ought to look and how technology changes and what to spend money in R&D on and how you--

MS. GARVEY: Right, and we're not there.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BRINKLEY: I don't--I'm a little like you, I haven't seen that.

MS. GARVEY: Yeah.

MR. BRINKLEY: But I mean, those are the--we're looking at those types of recommendations on trying to make something that--whether it's legislative authorities; whether it's roles and responsibilities, you can cajole people to do, basically sign up for; whether it's some very specific near-term things that can improve the system more efficiently and effectively now, in the near term with a view of the long term; and the relationship, of these pieces. And then, of course, from that is how to transfer those into the other segments into the five modes of transportation.

MS. GARVEY: Do you--

MR. BRINKLEY: And I have one other thought.

MS. GARVEY: No, I was just going to ask if you feel as though Israel has done that well? Do they have a systems approach? Is there any place

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in the world that has a systems approach?

MR. BRINKLEY: When you only have that few airplanes, the answer's, yes, but it--they can [unintell.] profile, they don't have civil liabilities issues--civil liberties issues, they just--

MR. JOHNSTONE: One main airport.

MR. BRINKLEY: No, as you know, no El Al airplane spends [unintell.].

MS. GARVEY: Right.

MR. BRINKLEY: So, the best answer is that's easy. It's not, it's actually not a model. Too many people look at it as a model and it is not.

MS. GARVEY: It's not a model for us?

MR. BRINKLEY: It is not a model. One question I have for you in thought for a recommendation is: risk-management. How did you--a systems approach to risk-management? I mean, you've got a finite amount of resources; you've got, I mean, you've got four or five--there's three basic principles in risk

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

management and that's figuring out the threat; figuring out what your capability/vulnerabilities are and weighing out what the consequences are and you sort of figure out.

Because in the end, there's a lot of policy and there's a lot of politics and there's a lot of other issues associated with this process.

Did you have a risk-management process inside FAA or if you had to think about that would you do it, maybe, to have a systems approach to that?

MS. GARVEY: Oh, I think that's definitely in the area where there could be more robustness. I mean, I don't think--partly, I don't think that we, as an agency, we did it, perhaps, more intuitively and maybe based more on the professional expertise that we had. But is there and it was better. I mean, the data analysis was far better, which gave you, I think a more robust approach to risk management. But I think that could be an area. In fact, I just made a note to myself to ask some of the MIT folks what have they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

seen in risk management.

MR. BRINKLEY: Great.

MS. GARVEY: And, again, I think we're a little further along in the area of safety because we've had more experience and longer experience.

MR. BRINKLEY: But you've got a lot of mechanical business, there.

MS. GARVEY: That's right--

MR. BRINKLEY: Because you've got [unintell.]

MS. GARVEY: Exactly, they argue about that standards, you got it.

MR. BRINKLEY: But you've got a standard and you can figure out whether you want a duplicate or a non-duplicate based upon when it breaks. Security doesn't have that sort of rigor to it mechanical--

MS. GARVEY: Right.

MR. BRINKLEY: --on hydraulic failures or systems failures, so how do you, I mean, some of it is intellectual, I mean, human factors failures that are embedded in this process.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Yes.

MR. BRINKLEY: You can do it in the safety side, because, anecdotally, along with mechanical failures, you can look at some ability at times to be duplicative on the mechanical side because you know of the human factors failures.

MS. GARVEY: Mm-hmm.

MR. BRINKLEY: And you can sort of weigh that out with experiences. On the security side, on the threat side, and in an evolving, warning threat--

MS. GARVEY: Right.

MR. BRINKLEY: --who has patience to observe and whatever, it becomes a little more difficult.

MS. GARVEY: More challenging.

MR. BRINKLEY: More challenging, much more challenging. So, maybe some thoughts on--

MS. GARVEY: I will, I'll give some thoughts. I have a list of five questions, which I'm not going to remember right now, but I know I used to sort of keep [unintell.] rules and so

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

forth, I'm going to e-mail you those.

MR. BRINKLEY: Great.

MS. GARVEY: And if it's all right with you, I will follow-up with some of my MIT colleagues and see if they have anything.

MR. BRINKLEY: Please do.

MR. RAIDT: And your thoughts on the rulemaking process.

MS. GARVEY: Yeah.

MR. BRINKLEY: We are open for business. We're open for ideas. We would hate to be limited to only the brain cells in this room.

MR. RAIDT: God help us.

[END OF INTERVIEW.]

(202) 546-6666

I N T E R V I E W

MR. AZZARELLO: It's March 25 and we're at the FAA Headquarters about to begin an interview with Dave Cannoles. I'm John Azzarello of Team 8, 9/11 Commission.

MR. KARA: Miles Kara, 9/11 Commission.

MS. HYDE: Dana Hyde, 9/11.

MR. BROWN: Jeff Brown, 9/11 Commission.

MR. WIEGAND: David Wiegand, FAA Counsel's Office.

MR. CANNOLES: Dave Cannoles.

MR. AZZARELLO: Dave, thanks for taking the time to come and meet with us today. I'd like to actually start off by having you give us a brief overview--a brief overview of your career in the FAA in terms of various positions you've held leading up to 9/11. And then a little more detail of the position you held on 9/11 and the duties and responsibilities attended at that position.

MR. CANNOLES: And I'll be as brief as I can. I'm celebrating my 33rd year with FAA. I started out as an Air Traffic Controller;

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

progressed through the ranks of staff and supervisory positions; became a facility manager of Erie, Pennsylvania; later, Newark, New Jersey; came through a couple of staff positions in Washington headquarters.

I entered the Executive Service in 1987 as the Division Manager for the FAA's Eastern Region, Air Traffic organization. Since 1985, I spent a lot time either as Deputy or Director of the FAA's Office of Air Traffic Investigations and Evaluations. And it was that post that I held on September 11, 2001.

In November of 2001, I left to head up a new position created by the FAA, Director of Emergency Operations and Communications. And I have just recently, within the past couple of weeks, been named the Director of Air Traffic Safety Oversight.

MR. AZZARELLO: In November you became the Director of Emergency Operations and Communications?

MR. CANNOLES: Yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: And today, the position you have now?

MR. CANNOLES: The Director of Air Traffic Oversight.

MR. AZZARELLO: Can you tell us a little bit more about the position you held prior November 1, the one you had on 9/11 as an Air Traffic Investigations and Evaluations--what sort of the not 9/11 duties, which, obviously, which were vastly different--

MR. CANNOLES: Right.

MR. AZZARELLO: --or somewhat different, at least, but the ones of the daily routine, daily responsibilities.

MR. CANNOLES: The organization had two divisions, I reported to the Director of Air Traffic. One organization handled the investigation of accidents and incidents which involved Air Traffic. We also did litigation support for the Department of Justice in representing FAA in litigation connected to aircraft accidents.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

The other was an internal evaluation process, conducted within Air Traffic. We did several hundred facility evaluations each year. I had four field branches that performed that function that were located in Dallas; Fort Worth; Seattle; one out here at Dulles; and the other one in Atlanta, Georgia.

So the principal duties were to monitor the operations system each day. I had specialists on-call 24-hours-a-day along with myself. Where we were briefed of air traffic incidents that occurred in the system. Part of my job was making sure that the Air Traffic leadership was briefed on those each day, so that we could bring any anomalies to their attention. Through the analysis of those events and the evaluation processes and the trends we saw in the field, we were able to make recommendations for system improvement to the other directors within Air Traffic.

MR. AZZARELLO: In your chain of command, who did you report directly to?

MR. CANNOLES: The Director of Air Traffic

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

through the Deputy Director of Air Traffic. On 9/11, the Acting Deputy was Jeff Griffith and the Director was Bill Peacock.

MR. AZZARELLO: Bill Peacock was out of town on 9/11, is that right?

MR. CANNOLES: Yes, he was.

MR. AZZARELLO: So, on 9/11, you reported directly to Jeff Griffith?

MR. CANNOLES: Yes.

MR. AZZARELLO: And would Jeff Griffith have reported to ATS-1 or right up to the Deputy? Did he report to Steve Brown or Peter Challen [ph] or did he go--

MR. CANNOLES: I think it was kind of circumstantial. I mean, formally, his report was to Peter Challen and to Steve Brown, but, you know, with an urgent need for information, for example, I'm sure Jeff was permitted and encouraged to go directly to the Administrator.

MS. HYDE: I want to check the senior level here, it's a pretty small group of folks and if we could, technically, on the chart you report

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to someone, but you talked and worked and interacted all the time?

MR. CANNOLES: Yes.

MR. AZZARELLO: Why don't you take us through the morning of, when you arrived to work and take us through sort of leading up to the first report of the hijack of American 11?

MR. CANNOLES: I got to the office between 5:30 and 6:00 a.m. on 9/11. As was my habit, sat down and began independently reviewing the previous day's activities, instances that had occurred in the system; so on and so forth.

My staff began arriving about the same hour and we would, after 30 or 40 minutes of review on our own, we'd get together and kind of compare notes; discuss what we might know individually for the benefit of the group.

Bill Peacock was out of town that day. I recall getting a text-page sometime between 8:00 and 8:30 in the morning, which stated there was a confirmed hijacking in progress out at Boston Logan. I had a television in my office, so I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

turned it on to CNN because frequently, they developed information about as quickly as we did and I wanted to see what they had.

Shortly after I tuned in, I saw the hole in the World Trade Center and the report that I think the initial report was that a small airplane had crashed into it. Having been manager of Newark tower, my view out my office window was the World Trade Center and I have a familiarity with the area and looking at the damage, I recognized that it was a large aircraft that had crashed into the structure.

Knowing that, I left my office on the 4th floor and came here to the 10th floor to report to Mr. Griffith my suspicions that the hijacked airplane had crashed. I passed him in the hallway, actually before passing him in the hallway, I went by another office and saw that, indeed, a second aircraft had crashed.

I saw Jeff, he said there's a hijacking in progress. I said, no, it's not a hijacking, it's now an accident. He said go set up a telephone

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

conference, which I proceeded then to do.

MR. AZZARELLO: If we can go back over some of this. You said the text page you got between 8:00 and 8:30, you said it was a confirmed hijack out of Logan?

MR. CANNOLES: Yes.

MR. AZZARELLO: Do you remember who sent you that?

MR. CANNOLES: It was sent to me by someone in the New England Air Traffic Division, I believe it was one of their quality assurance specialists.

MR. AZZARELLO: So, it came from the ANE to ROC?

MR. CANNOLES: Yeah. I'm not sure it was the Regional Office Center, it could have--our structure, each of the nine Air Traffic Divisions has their own quality assurance department. And while they weren't straight-lined to me, I didn't have direct authority, they kind of got program guidance from my organization. So, we had a close affiliation with these people; we knew each other;

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

interacted, frequently. So, I think it was from an Air Traffic specialist in the Region that I got that page, I don't recall exactly.

MR. AZZARELLO: The ROC has their own QA guy separate and apart from the Boston Center?

MR. CANNOLES: Yes, it's not the ROC, it's the Air Traffic Division.

MR. AZZARELLO: Oh, okay.

MR. CANNOLES: The ROC's kind of a separate entity.

MS. HYDE: The procedures in a hijacking before 9/11, from your position, would you have, formally, in the protocol had any role to play in the hijacking?

MR. CANNOLES: No.

MS. HYDE: No. And, because your job is, on a daily basis, we have some familiarity with the QA folks, with the Centers of Accident Investigation, that's what you were doing at the time?

MR. CANNOLES: Right.

MS. HYDE: And, were you on the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notification list from May and Jesse and the folks up in the WOC who were making--around the same time, making notifications to senior people in the Department about the same information, the hijacking information?

MR. CANNOLES: I doubt if I was on the list. They may have let me know as a courtesy, but I would have been down on the bottom of the list, because hijackings--

MS. HYDE: This was clearly not your role?

MR. CANNOLES: Right.

MS. HYDE: Okay.

MR. AZZARELLO: What was your office's position at that time, the acronym, I don't have all these things down?

MR. CANNOLES: AAT-20.

MR. AZZARELLO: AAT-20?

MR. CANNOLES: Right.

MS. HYDE: And when you were notified via page, did you pick up and call somebody at ANE or talk to anybody?

MR. CANNOLES: No, I grabbed two people

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

out of my organization, Dan Diggins and Tony Mello--

MS. HYDE: Mm-hmm.

MR. CANNOLES: --and told them that I suspected there had been an accident with an airplane flying into the World Trade Center--

MS. HYDE: Mm-hmm.

MR. CANNOLES: --and asked them to accompany me to the 10th floor. Again, we met Mr. Griffith in the hallway. And we went down and set up a telephone conference among the affected parties, which was pretty much our protocol when an accident occurs.

MS. HYDE: Your pro--oh, I see, so normally not your hijack--not the hijacking--

MR. CANNOLES: Right.

MS. HYDE: --when there's an accident, you

--

MR. CANNOLES: right.

MS. HYDE: --you go set up a telecon?

MR. CANNOLES: Yes.

MR. AZZARELLO: You set that telecon up

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

where?

MR. CANNOLES: We set this particular one up in the Director of Air Traffic's Office in his conference room.

MS. HYDE: Yeah, we sat with May this morning and she--

MR. AZZARELLO: Yeah, we have a--

MS. HYDE: --did a bit of a schematic for us what the floor looked like.

MR. AZZARELLO: The WOC here, duty officers, the [unintell.] center that stood up?

MR. CANNOLES: Right.

MR. AZZARELLO: SVTS, then there's a skiff right here.

MR. CANNOLES: Right.

MR. AZZARELLO: We understand that your--the Air Traffic suite's down here?

MR. CANNOLES: Yeah, they're actually over in this corner of the building.

MS. HYDE: Right, we just sort of drew it out so we'd have a room there we could visually think.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: Great artwork.

MR. AZZARELLO: We thought Doug--

MR. CANNOLES: We're impressed, okay.

MS. HYDE: I bet, we were so confused after a while and then we thought we had to stop and draw it out.

MR. CANNOLES: I'm sure.

MR. AZZARELLO: Who's office did you set that up in?

MR. CANNOLES: Director of Air Traffic.

MR. AZZARELLO: By name whose office?

MR. CANNOLES: Bill Peacock.

MR. AZZARELLO: That was Bill Peacock? Is that where you were saying there was ordinarily that for an aircraft accident, actually, you would set up a telecon and would it generally be set--is that true or?

MR. CANNOLES: I've run them before out of my conference room on the 4th floor. It just kind of depended on circumstances.

MR. AZZARELLO: There's no assigned location--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: No.

MR. AZZARELLO: --to conduct it from?

MR. CANNOLES: Right.

MR. AZZARELLO: But, generally, if there were an aircraft accident, that would trigger some follow-up responsibility for you--

MR. CANNOLES: Right, right.

MR. AZZARELLO: --ordinarily?

MR. CANNOLES: Right.

MR. AZZARELLO: And on your way up to the 10th floor you take Diggins and--Dan Diggins and Tony Mello with you?

MR. CANNOLES: Yes.

MR. AZZARELLO: And you saw the second crash on TV before you saw Jeff Griffith?

MR. CANNOLES: Yeah, I saw that up here somewhere, I think it was by the Deputy Administrator's office. I think they had a television on and I saw the second one.

MS. HYDE: And so you set up the telecon after the second one?

MR. CANNOLES: Yeah, that's my

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

recollection.

MR. AZZARELLO: Let me just stop for a second here, because I'm putting this together in my brain which tacks differently than anybody else's. You established a telecon immediately to handle an accident in the [unintell.] office. Concurrently, there is a crew that's being set up in the WOC/[unintell.] to handle the ongoing operational situation?

MR. CANNOLES: Exactly.

MR. AZZARELLO: With those two separate nodes set up on this floor, how did the regions and the Command Center know who to call with which information?

MR. CANNOLES: The regions were all following their own stated protocol, so they'd know, for example, that you call in an accident to the WOC. All that was done. What I was doing was kind of over and above, if you will. The people I called in were the managers of the key facilities, and the executives from the affected region to kind of do an off-to-the-side management of the crisis.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

So, the protocol, I mean, for example, Jeff Griffith was down in this facility for a good part of the day and he would come down periodically, give me direction, I could give him information. Once or twice I sent people down here with messages to him, but we were kind of doing separate things.

MR. AZZARELLO: When you say Griffith would come to you, you mean, down in the Air Traffic suite?

MR. CANNOLES: Yes.

MR. AZZARELLO: Down there and then, where would--when he left there, where else would he primarily spend his time that day?

MR. CANNOLES: I think he was, primarily, up here in this operation with the Deputy Administrator.

MR. AZZARELLO: This general area here, the WOC and the Crisis Center?

MR. CANNOLES: Yeah.

MR. KARA [?]: I see an inherent danger here and let me just put this up, I see an inherent

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

danger of where perishable, tactical information out in the field might get into one node here and not to the other node. How do you de-conflict that? As a senior Manager, how does FAA deal with that?

MR. CANNOLES: Well, first and foremost, the regions weren't simply talking to me, for example. The regions had dual linkage set up. So they were plugged into the Ops Center, as well as the telecon that I was running. Plus, anything I thought that was germane to the leadership of the agency that had to be passed on was passed on immediately.

But, I know, for example, I had New England and Eastern Regions on initially and Frank Hatfield [ph], was not only reporting through those venues, but would also share with us on our telephone conference things he was picking up off the other ones that we weren't monitoring.

MR. AZZARELLO: Was Hatfield your primary contact in the Eastern Region?

MR. CANNOLES: Yeah, he was on, as well as

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

two or three of his field managers. But he was the principal. He was the executive for that division.

MR. AZZARELLO: How about--did you speak to Rick DeShawn [ph] that day?

MR. CANNOLES: I'm not sure if Rick was on or not, he may have been, but I don't recall.

MR. KARA: Let me carry my analogy one step further where we have two nodes in FAA headquarters and we've talked of that information coming up, through these two nodes.

Now, from these two nodes, upwards to the national level or to the military, does that not come from you at all? Yours is strictly downward or do you also flow upward to, for example, to the White House or to the National Military Command Center?

MR. CANNOLES: No, I had no communications with the National Military Command Center or the White House. That was all being done from here and I knew it was being done from here

MR. KARA: So, can I--based on what you've told me--there are parallel paths of information

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

coming up to this headquarters, but there's de-confliction [ph] and cross-communication doing--going on among the senior management, but from this level upwards, it's a single line of communication from the WOC?

MR. CANNOLES: Right.

MS. HYDE: Well, just to infuse reality here. There was a lot of chaos that morning.

[Simultaneous inaudible conversation.]

MS. HYDE: You know, like [unintell.] of a herd and it's understandable chaos, you know.

MR. CANNOLES: I wouldn't call it chaos. It was--

MS. HYDE: Describe for us--

MR. CANNOLES: --it was unusual.

MS. HYDE: --your sense, I don't want you to get honed in on some sort of model--

MR. KARA: Let me just make it perfectly clear that I'm looking at the flow of information and I want to establish that the flow upwards from this was not on two paths, but was on one path.

MR. CANNOLES: Yeah, yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: Thank you.

MR. CANNOLES: Bear in mind that we went in to work an aircraft accident. You know, that's what my team was trained to do. And, as such, we would probe the region, you know, the region would give us what they knew; we would ask compelling questions that, you know, needed answering. We would provide guidance to, you know, go get this information; look for this; give it to us and we would provide that upwards in a formal briefing.

You know, this thing suddenly became, obviously, much more than an accident. So, yes, we did a lot of invention on the run. And this thing, rather than becoming just a device for gathering information, became part of the command-and-control structure one way or the other.

MS. HYDE: This thing being your telecon?

MR. CANNOLES: Right.

MS. HYDE: Okay, well, let's sort of backup and get, from your own words, what happened. So, you go down to the conference center there?

MR. CANNOLES: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Are you still with your staff folks?

MR. CANNOLES: Yes.

MS. HYDE: And then, how did you go about setting up the conference? What do you recall you did?

MR. CANNOLES: We--I recall the three of us, initially, the size of the group grew very quickly.

MS. HYDE: Mm-hmm.

MR. CANNOLES: And I probably can't tell you with any accuracy everybody that was there, but I can tell you many of the people.

MS. HYDE: Okay.

MR. CANNOLES: I went in and instructed, I think Tony Mello, I said, get Eastern and New England up on the lines; they did, we operated from a speaker phone.

MS. HYDE: Now we have some familiarity, but tell me, when you were asking for Eastern and New England, who are they contacting--those were the regional centers, right?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: We probably would have made the first call through the Regional Ops Center.

MS. HYDE: Probably gone through the ROC, okay.

MR. CANNOLES: However, given what was going on, if we weren't successful in getting through right away, which is likely, we would have gone directly to the Air Traffic Divisions because, again, of our familiarity with working with the people. We know their numbers, we know where they live, so--

MS. HYDE: Mm-hmm.

MR. CANNOLES: --but one way or another, we got them--and we had a dedicated conference line, for events like this. So we didn't need any help in setting that up. We already knew a bridge number to call and the password and so forth.

MS. HYDE: You mean, you had, like an 800-number with a PIN that was always active or I'm just bringing it down to my level of familiarity?

MR. CANNOLES: Yeah.

MS. HYDE: So, you had a dedicated

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

conference line, so you said you were calling people or your staff was calling people saying call in--

MR. CANNOLES: Right.

MS. HYDE: --and this is how we're all going to get together on the bridge?

MR. CANNOLES: Right.

MS. HYDE: So you didn't actually need any of the operators or duty officers or duty officers with the facilities to work a bridge, for you?

MR. CANNOLES: Right, right.

MS. HYDE: So, your first up was to get Eastern and Northeastern. Did that mean that you go to the [unintell.] level, the center level or you're just talking to the Administrator at the Administrative level?

MR. CANNOLES: No, I'm sure, again, my focus was to get the executives from those two divisions. But, I'm sure, as the conversations started, I either directed or on their own volition, they started bringing up the key managers.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Mm-hmm.

MR. CANNOLES: I know we had the manager of New York Center, Washington Center, I believe the New York TRACON, probably Newark Tower, Boston Center and possibly, Boston Tower.

MR. AZZARELLO: So you had the Air Traffic Managers of all those facilities--

MR. CANNOLES: Yeah.

MR. AZZARELLO: --at some point in the time on the line?

MR. CANNOLES: Yeah.

MR. AZZARELLO: I'm sorry, could you just run through those again, New York Center?

MR. CANNOLES: Yeah, remember, initially, it was New York Center, New York TRACON, Washington Center, Boston Center, Boston Tower, I think we had Newark Tower up, but I don't recall precisely. We may have had LaGuardia, as well. And this was the initial group, before the day was over, we had, virtually, the entire nation on the line.

MR. AZZARELLO: These were the initial people on?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: Right.

MS. HYDE: And when those people start beeping in, do you, what--do you recall what were usually your first questions? What were you trying to do at this point?

MR. CANNOLES: The first thing we were dealing with was the accidents. You know, candidly, we didn't know why the accident occurred at that point. We knew there was an airplane down, so we're trying to get information from Frank Hatfield and his managers. Slowly the information surfaces that, you know, both airplanes, you know, for example, their transponders were turned off. Screams were heard on a frequency. And slowly--slowly, the picture comes together that, you know, these were hijackings and probably intentional crashes. You know, which is something we didn't have a great deal of experience dealing with.

Then--

MS. HYDE: If I could just step back a little bit.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: Sure.

MS. HYDE: If you would have had the Boston folks on from the get-go, we know that pretty early on, they heard some startling stuff--

MR. CANNOLES: Yeah.

MS. HYDE: --and they started before around the 8:30 to 9:00 time frame, there was a conference between Security and, I thought the Regions and the Boston Center, before we even had the first hit. Was that information fed into your telecon, when you first got it up?

MR. CANNOLES: Yeah, I don't recall the timing, exactly, but, yeah, we got that information.

MR. AZZARELLO: After you set the telecon up?

MR. CANNOLES: Yeah.

MS. HYDE: And, do you remember at this point, did you hear any specifics about what the threats were that they heard--

MR. CANNOLES: No.

MS. HYDE: --from Boston, do you recall

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

hearing the Controllers there had heard, we have some planes?

MR. CANNOLES: No. We, my office gathered that information. We had it all collected in this building by sometime that afternoon. And, as a matter of fact, I recall listening to the tapes myself for the first time, and it wasn't until I had replayed it many times that I could even make those things out. So, I don't know if a Controller understood it the first time or not. It took me two or three iterations before I could make out what the individuals were saying.

MR. AZZARELLO: Well, let me, just throw something specific out there on that. Terry Biggeo [ph] was the [unintell.] in EBW [ph] and he calls and speaks to the Command Center in Herndon what they had about the time of the second impact, which was around 9:03 to report that the tapes had been pulled and that they can confirm at that juncture hearing the phrase, we have some planes. Is that something that--was that a line that you were monitoring? Was that something you heard from the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

carrier?

MR. CANNOLES: No, we had the Command Center on our conference, initially, but, again, when, you know, this could have been a separate operational telephone conference they had. I don't recall hearing that, specifically. But I do recall that we knew early on that there was enough heard on the frequencies that we knew it was relative to an aircraft being seized.

MR. : Who was the primary point of contact at the Command Center?

MR. CANNOLES: I don't recall who was on and it changed several times during the day.

MS. HYDE: Okay, so you bring up the call, you think you have the Command Center on when you first--

MR. CANNOLES: Yeah, I'm sure we did.

MS. HYDE: --you've got a speaker back in that room or--

MR. CANNOLES: Yes.

MS. HYDE: --or were each of you on a different speaker?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: I was on a speaker-phone just like this one on the table.

MS. HYDE: And you're the moderator, you're directing the conference?

MR. CANNOLES: Right.

MS. HYDE: And are Tony and Dan next to you around this point?

MR. CANNOLES: Yes.

MS. HYDE: Was anybody taking notes around you?

MR. CANNOLES: I asked someone, when we went in. We started putting notes up on a white-board, similar to this over here. I, you know, I recall that somebody probably had a legal pad or something and at some point, somebody either introduced or we asked for a laptop computer, which was brought up. I recall Dan trying to operate it, he was seated at the end of the table. And we produced a summary or chronology, which is full of errors, based upon my subsequent review.

But we were trying to chronicle the big stuff that was taking place, with the full

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

knowledge that the real logs being held by the facility would contain the exact times that, you know, this sort of thing was executed. But we were just trying to keep a broader view of what was happening in our world down there.

MS. HYDE: So, the notes back on the white-board, that wasn't white butcher-block paper, it was a white-board?

MR. CANNOLES: Right.

MS. HYDE: And so, then, at some point, there's, maybe there's a legal pad and someone's making notes. And then, also, the laptop, a request for that--

MR. CANNOLES: Right.

MS. HYDE: --get the information down. And as you're gathering situational awareness, do you hear about other aircraft that are acting funny or acting suspiciously?

MR. CANNOLES: Yes. And I've never been able to track any of this stuff down. But, for example, at one point we had a high-speed target heading towards Boston. We had reports of four

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

aircraft heading for Norfolk. We had a bomb threat at Pittsburgh; a bomb threat at Boston; a bomb threat at Cleveland, as I recall.

You know, Delta won't take instructions, he's over Cleveland. So-and-so won't divert to so-and-so, there was a tremendous amount of traffic. And I'm sure a lot of it was based on confusion. There was a tremendous of volume being exchanged.

MS. HYDE: So, in terms of the Command Center, did you see--to you're sort of [unintell.] or [unintell.] into that coordinating information-sharing node here?

MR. CANNOLES: Mm-hmm.

MS. HYDE: And the Command Center's linked into you? What was your sense at the time what the Command Center was doing?

MR. CANNOLES: The Command Center was doing what they should have been doing, which was handling the traffic flow. And that's why, when we talked about, you know, information possibly being disconnected earlier--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Mm-hmm.

MR. CANNOLES: --I had comfort in the knowledge that despite the Command Center's presence on this telecon, that they had other people who were off doing what they should be doing, which was the interaction with the field facilities. And, similarly, that FAA's intelligence capability, security entities and so-on and so-forth were being taken care of up in this facility.

MS. HYDE: When you said what they should be doing, do you mean grounding the aircraft? You talked a little bit about positions to land or at least ground stop first and then land the aircraft?

MR. CANNOLES: We've read a lot about that. The only first-hand experience that I had with it was that Frank Hatfield made a statement or asked a question about, you know, we don't know what's going here, maybe it would be prudent to stop the system and I concurred with his suggestion and said, words to the effect, that you're right, let's stop the traffic in the Northeast.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Some minutes later, Jeff Griffith either came down or I met him in the hallway or something and I told Jeff that we had stopped traffic in the Northeast and he said, yeah, we just did a national ground stop. So I think there were a lot of efforts, even from the facility level to stop traffic, a lot of parallel efforts that took place that about the same time.

MR. AZZARELLO: Can I back up just a second to your initial contacts with the Eastern Region Air Traffic People in the New England Region? Who were your primary initial contacts up there, was it in the Eastern Region, Frank Hatfield?

MR. CANNOLES: Yes, because that's where the accident was.

MR. AZZARELLO: And, if you remember, I think, I believe that [unintell.] in the Eastern Region he was, I think not in the office at the time of the first impact, might have been at a dentist appointment or something and delayed and came in later. Do you recall any difficulty in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

connection with that in terms of trying to reach him or did you get him on a pager or a cell phone while he was out of the office?

MR. CANNOLES: You know, I don't know how we connected with him. But I can remember his voice on the line so he was there.

MR. AZZARELLO: Okay, and how about the New England Region?

MR. CANNOLES: You know, I don't recall who was on up there, who the principal was. It was probably Bill Yuclivitz [ph] or one of the branch managers acting in the Division Manager's absence because I don't--the Division Manager wasn't there, so--

MR. AZZARELLO: Bill?

MR. CANNOLES: Yuclivitz?

MR. AZZARELLO: Yuclivitz?

MR. CANNOLES: Yeah, he's a dear friend, but please don't ask me to spell his name.

MR. KARA: You call him Bill a lot?

MR. CANNOLES: Yeah. Y-u-e-k and something else after that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: I think, I don't know had been developed yet, but I think it was a meeting in Boston [unintell.] the New England Air Traffic Manager might have been there?

MR. CANNOLES: I'm not sure. But I don't recall being on that conference.

MR. AZZARELLO: Okay, what about New York Center, when you got there, was that Mike McCormick [ph]?

MR. CANNOLES: Yeah, yeah. I knew Mike, I worked with him years before, so--

MR. AZZARELLO: How about, do you remember who from the TRACON in New York was linked in through the initial telecon would that have been?

MR. CANNOLES: It should have been Lorretta Martin [ph], but I don't recall, precisely.

MR. AZZARELLO: Do you remember if Bob Berch [ph] was on?

MR. CANNOLES: No, I don't remember.

MR. AZZARELLO: Do you remember Karl Juraseck [ph]?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: No.

MR. AZZARELLO: How about GDC, do you remember who, was that Ramirez [ph]?

MR. CANNOLES: Not, sure, I'm not sure if Louis was out there, and he probably was, if you're asking. I don't remember who was on there from there. I know the facility was on.

MR. AZZARELLO: How about Boston Center, do you remember was that Terry Biggeo or someone else?

MR. CANNOLES: I seem to recall it was a woman and I can't recall her name at the moment. I should know it, I believe she was the manager at the time.

MS. HYDE: Back in sort of the sequence here. The call was set up after the second hit on the World Trade Center. Was it before the Pentagon had been hit?

MR. CANNOLES: Yes.

MS. HYDE: And what information, if any, do you recall about that aircraft?

MR. CANNOLES: We had, of course, we were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

still looking for two other aircraft at this point in time.

MS. HYDE: You say, of course, but at what point and which aircraft were you referring to?

MR. CANNOLES: I can't give you the call signs with specificity, but, of course we knew two airplanes that hit the World Trade Center.

MS. HYDE: Mm-hmm.

MR. CANNOLES: We also had two other airplanes that were unidentified out in the system that we couldn't pinpoint and say precisely where they were. Dulles TRACON was on the line with us and, at some point, Dulles reported or, perhaps, Frank Hatfield reported, that Dulles had reported to him that there was a fast-moving target coming towards Washington.

By that time, there were a number of people on our conference room. One of whom was Jeffrey Logue, who was a member of my staff and I asked Jeffrey to step into the next office and look out the window to see if he could see the airplane. There was a progress report being given on our

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

telecon, I don't remember precisely, but it was that the airplane is, for example, 20 miles from Washington, it's now 15 miles from Washington, and so on.

Jeffrey went next door, came back and reported that he had seen smoke from the Pentagon. So we surmised at that point that this airplane had flown into the Pentagon.

MS. HYDE: When you say that countdown of miles time in-bound, so that must have been from somebody who had it on a scope, you don't have any scopes from--

MR. CANNOLES: Right.

MS. HYDE: --did you?

MR. CANNOLES: Right.

MS. HYDE: And so you're thinking that that must have been Dulles--

MR. CANNOLES: Yes, it was.

MS. HYDE: Do you recall, was National on this Telecon?

MR. CANNOLES: I don't recall.

MS. HYDE: And had you heard anything from

MILLER REPORTING CO., INC
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Indie before this?

MR. CANNOLES: No, no.

MS. HYDE: Would they be on the call, at this point?

MR. CANNOLES: I'm not sure if we brought Indianapolis in, but I don't recall having heard anything from them at this point. I think we brought Cleveland in before Indie, it would kind of be the normal progression for traffic up in the Northeast.

MS. HYDE: I see, you would have brought Cleveland in before?

MR. CANNOLES: I believe so, yeah.

MR. AZZARELLO: You said that after the second crash, before the Pentagon crash, there were two aircraft, that I guess, you were getting some concern about?

MR. CANNOLES: Right.

MR. AZZARELLO: After the Pentagon was hit, did you equate the Pentagon strike with either of those two aircraft?

MR. CANNOLES: Yes, I mean, obviously, we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

didn't have absolute identity or knowledge of who, specifically, the aircraft was, but it was very clear to us that it was an intentional crash like the ones in New York.

MR. AZZARELLO: Okay, actually what I'm--what I want to know is the two that you were concerned about after the two crashes in New York and before the Pentagon crash, did you then equate the Pentagon crash at some point afterwards with one of those two planes that Air Traffic was concerned about that--

MR. CANNOLES: Yes.

MR. AZZARELLO: --you couldn't pinpoint?

MR. CANNOLES: Yes.

MR. AZZARELLO: And how did you, on what basis did you make that connection? What information did you have before the Pentagon crash that led you to equate it with, oh, that must have been one of the two that we were concerned about that we couldn't pinpoint?

MR. CANNOLES: Well, you know, first of all, it's very unusual in the MASS, even with the

MILLER REPORTING CO., INC
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

volume of traffic that's handled, to lose identity of an airplane. So, when you've got two airplanes and you don't know where they are. And you have a crash, the odds are pretty good that's one of them. We got a report either before or after the fact--probably from Great Lakes. We had probably brought Great Lakes up when we brought Cleveland Center in. And we had gotten a report from someone, probably, Great Lakes, that there was a missing aircraft in Indianapolis.

And from that they would have given us the airplane's call sign and we would have, at least theorized that this was one of the two aircraft we were still looking for.

MR. AZZARELLO: So you think that--the initial information led you to equate the two came from Great Lakes region when they got, at some point, into the telecon you were on?

MR. CANNOLES: Yeah.

MS. HYDE: Do you think that somebody, because you started by saying, you knew there were two unidentified aircraft. And as I sort of piece

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

together what you just said then that Great Lakes or somebody, Cleveland, must have said one of them was out of Indie. Was there an instruction given to you, the participants on the telecon to be looking out for these aircraft? I mean--

MR. CANNOLES: I'm sure, yeah, I'm sure at some point we said something along those lines, yeah.

MS. HYDE: Do you remember requesting the participants to tell their Controllers to put on their primaries, if they weren't already selected?

MR. CANNOLES: No.

MR. AZZARELLO: Was somebody in the room trying to log down, note these suspicious aircraft that were being reported? For example, those two, was somebody trying to note down like the Great Lakes Region called in and said we can't find American, you know, 1? Somebody writing and trying to keep track of these?

MR. CANNOLES: Yeah, I think there was an attempt to do it and it turned out to be a very poor attempt. I reviewed what was produced on that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

laptop and I don't know how many inaccuracies are in there. And, again, I probably didn't pay a great deal of attention to it in the heat of battle. And, also, with the knowledge that official logs were being kept elsewhere that could help us reconstruct this thing later.

So, I don't know if they captured everything we discussed or not, I--there's a lot in there that I recall.

MR. AZZARELLO: It would have been some combination of the note pad on the wall and/or note takers and the laptop?

MR. CANNOLES: Yeah.

MR. AZZARELLO: And was all that preserved post-events, post-time line?

MR. CANNOLES: I know the laptop--I know there was a disc produced off the laptop and there was a printout done of it, which, again I was pretty disappointed in.

The white-board was not--and my suspicion is that many of the inaccuracies that I saw were caused by somebody trying to take data from the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

white-board and plug it in at the right times. And we didn't do a real good job with it.

MR. AZZARELLO: You don't think the white-board paper, you think was--you think it was not preserved?

MR. CANNOLES: No, it was not. It's an erasable board, there wasn't any paper involved. So--

MS. HYDE: Well, if you say you were sort of disappointed, were you judging the product, against sort of the facts that we know now that we know what happened--so that there were inaccuracies first what, you know, what we now know as reality or the product was not, as you recall, the reports, however false those reports may have been, it didn't reflect the reports that were coming in and actually what was being discussed at the time?

MR. CANNOLES: Well, when I expressed disappointment, it's at the product, itself. The people I had asked to do it were making a banging effort to keep up, but there was, again, such an extreme volume of activity--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Mm-hmm.

MR. CANNOLES: --and in the middle of trying to capture something that was being said on the telecon, they were also following instructions to, hey, call this person, get them in here. So, it wasn't directed at the people who were trying to do it. I just--I don't believe that it was absolutely reflective of what all was taking place all along.

MS. HYDE: What was taking place contemporaneously?

MR. CANNOLES: Yes.

MR. AZZARELLO: Could I show you a log quickly on [unintell.]--

MS. HYDE: Sure.

[PAUSE.]

MR. CANNOLES: Don't know what this one is. This is not the document that I refer to.

MR. AZZARELLO: So, that's not, you don't believe that could be a chronicle--

MR. CANNOLES: No, this appears to me to be something that was produced in Eastern Region

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

somewhere.

MR. AZZARELLO: Okay.

MR. CANNOLES: Yes, this looks like the one that was produced on the telecon that I was running. Yeah, this is the one--that's the one.

MR. AZZARELLO: And for the record, we're looking at Chronology of Events September 11, 2001, and it's a straightforward listing of times.

MS. HYDE: That's a helpful description.

MR. KARA: As opposed to the ABA-30.

MR. AZZARELLO: Let me ask you this, Dave. There's a report, I mean, we were just looking at a log that you thought might have been produced by the Eastern Region.

MR. CANNOLES: Mm-hmm

MR. AZZARELLO: And there's an entry in there around 9:35 a.m., it says, maybe not American 11 into the World Trade Center per McCormick. Before, I guess--I have a question to ask before I get to that, so I'll also add to that that there's various pages that we reviewed from all facilities. What we've seen of that from a number of different

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

FAA facilities and locations, interjected into the system, so to speak, after the two world Trade Center Crashes and, yet, before the Pentagon crash was some information that American 11 that maybe it's still airborne; and maybe is not one of the two aircraft that impacted the Trade Center.

In fact beyond that it may be headed to Washington, D.C. Tell me what you recall about that?

MR. CANNOLES: I'm not sure if it was American 11 or United 93. United 93 was the aircraft that crashed in Somerset, correct?

MS. HYDE: Right.

MR. AZZARELLO: Mm-hmm.

MR. CANNOLES: I remember we were trying to identify the location of both of those airplanes at one time. There was some confusion and it was from other facilities, not involved, one of which reported at one point, hey, we're seeing on the traffic situation display, he's over, you know, Kansas city or something, which was--turned out not to be the case.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Which aircraft do you remember as that?

MR. CANNOLES: I think it was United 93. But the initial--the initial indication, I can't remember if I remember this from when it happened or if it was a subsequent investigation. But Indianapolis was convinced at the time that they lost American, that that was a downed aircraft, that that was an accident.

So, while there was interest in looking for him, I'm quite sure that the initial reports were we lost the airplane, he crashed, he disappeared, he did something. And, then, of course, confusion developed after that one, when the FAA reached out and said, you know, we're looking for the possibility of an airplane crash in this area, one of our flight services called a few law enforcement agencies, who then called back into the center and said, hey, we hear there's an airplane crash near such-and-such. So, we assumed, initially, that airplane was down.

MR. AZZARELLO: That's 77 you assumed was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

down?

MR. CANNOLES: Yeah.

MR. AZZARELLO: Tell me what you assumed about the first two crashes based on, when you set up the telecon, you have a rep from the Eastern New England Region; the plane from the Northeastern Region--crash in the Eastern Region, you have a ZBW and a New York rep on the line, you've got McCormick, who is pretty close to the Ops for what's going on real time in New York. What was your situational awareness, when you start that telecon, vis-a-vis the two impacts at the World Trade Center--in terms of equating them with an aircraft? Based on your conversations with McCormick when he first saw you and others?

MR. CANNOLES: You know some investigator had a lot of questions and very few answers. The first accident, for all I knew, could have been a malfunction on the airplane; could have been any number of things. By the second one it was quite clear that the airplanes had been taken and intentionally crashed. And I don't remember any

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

specific statement that validated that conclusion. But as information became forthcoming, and I'm sure at some point, someone at Boston told me that, yes, we heard screams or, yes, we heard the phrase we have some planes, or something like that.

MR. AZZARELLO: Did you equate it, though with the two planes that were initially reported--

MR. CANNOLES: Yes.

MR. AZZARELLO: --from Boston as they hijacked and in danger?

MR. CANNOLES: Yes. And in both cases, regarding this two aircraft, we were fortunate or not in knowing that both airplanes had turned in the general direction in which they had turned. So, we kinda knew where they were headed.

MR. AZZARELLO: How about the concurrent reports that ELTs associated with those two aircraft, how did that play into your analysis?

MR. CANNOLES: That just simply tells you that an airplane's impacted with something. It didn't tell us, you know, who it was, but it added a degree of certainty to it.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Well, can you remember hearing either directly from Mike or through Frank Hatfield in the region, any belief for saying to the effect that maybe there wasn't any doubt about whether or not American 11 had impacted the World Trade Center as it said in this Eastern Region time line?

MR. CANNOLES: I don't remember, it, there could have been some uncertainty, but I don't remember it.

MR. KARA: Do you recall Mike ever saying at all that he thought that two different things had--that there was more than one instant aircraft that [unintell.]

MR. CANNOLES: Yes.

MR. AZZARELLO: How about there were some media reports, initially that it was a GA aircraft that might have--

MR. CANNOLES: I heard that, myself, on CNN, I'm sure. And, again, just looking from the first television clips, I knew that was wrong, just based on some aviation experience, it was,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

obviously, a much larger aircraft. And I don't even recall that being discussed once we got the telephone set up. I think we were all past that stuff and we knew that it was a big transport category airplane.

MR. AZZARELLO: So you don't remember at all any report that said that after the first two Trade Center crashes and before the Pentagon that American 11 might still be out there headed to Washington is completely something you have no recollection of whatsoever?

MR. CANNOLES: I don't have any recollection of it. It's possible, but I don't recall it.

MR. KARA: Were either of the two carriers American or United up on your net?

MR. CANNOLES: No.

MR. KARA: We didn't get any inputs from the companies at all?

MR. CANNOLES: I recall asking, I think I went out to one of the regions and said has somebody called the company to check and see if

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they're in communications? and the answer came back negative.

MR. KARA: How about in terms of the identification of the aircraft that impacted the towers or the Pentagon?

MR. CANNOLES: No.

MR. AZZARELLO: How about, when, after the first two crashes, when you set up the telecon and you hear that there's two other aircraft that are around that there's some concern about in the system because they can't be located. Do you know, one way or another, whether that same information is over here on this end of the--or in the Operations Center? Do you know if they have that same information that there's two out there, that--we'll call them two missing aircraft, or whatever you want?

MR. CANNOLES: My assumption is that it was because that would have been the formal reporting process. And even if that were not the case. Jeff Griffith and I were in contact, I don't know, every several minutes and were exchanging

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that sort of information?

MS. HYDE: Via telephone or walking back and forth?

MR. CANNOLES: Actually, I had Jeff Logue go out and commandeer a couple of walkie-talkies someplace, be that was one of the few things we could get to work; the cell phone system, obviously, wasn't doing too well. So, we were using that, somewhat, but more than likely, it was face-to-face. If something of tremendous importance given the circumstances came up, I either sent somebody down here to tell Jeff we're missing another airplane or I did it myself or he came down or whatever.

MR. AZZARELLO: So are you--

MS. HYDE: And what do you recall falling into that category on that morning?

MR. CANNOLES: I remember telling him we had shut traffic down on the Northeast and he responded that that's fine, we just issued a national ground stop.

MS. HYDE: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: He came to me at one point and he said, hey, make sure that, you know, we've got adequate staffing to keep our facilities going, which I did. I'm sure I shared some of the early reports that turned out to be unfounded, you know, those four airplanes heading for Norfolk, coming in from the Atlantic and there's a high-speed target here and there. You know, is that stuff came in that the attempt was to share it as rapidly as possible, but you had to do a lot of filtering and prioritizing to determine what was real and, of course, those didn't turn out to be that way, but I'm sure I shared those threats with them.

MS. HYDE: Did you share the in-bound from Dulles? The information of fast-moving in-bound target counting down towards Washington?

MR. CANNOLES: I don't recall, specifically. I do know, and it seems to me that Frank Hatfield volunteered that the White House situation room had been notified.

MS. HYDE: How would--this Hatfield seems to have good way of, you raise his name a number of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

times and seems to know a lot of what's going on.

MR. CANNOLES: Yeah.

MS. HYDE: How is he getting his information?

MR. CANNOLES: Hatfield's the manager of the manager at Washington National--

MS. HYDE: He's the manager of the manager?

MR. CANNOLES: Right.

MR. AZZARELLO: He's the lead

MR. CANNOLES: And since I used to have the job, I was familiar with the assets he had available to him.

MR. KARA: That would be Louis Ramirez or whoever he sees at ZDC keeping Hatfield informed--

MR. CANNOLES: Yeah, and Louis is out at Washington Center.

MS. HYDE: He's at National Tower, is that what you're saying?

MR. CANNOLES: No, he's at ZDC?

MS. HYDE: He's at ZDC?

MR. CANNOLES: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: So, Hatfields at ZDC--

MR. AZZARELLO: No, Hatfield's at the Region.

MR. KARA: No, Ramirez is at ZDC.

MR. CANNOLES: It's like Who's on First. But, Frank, and you know, I wasn't there, I don't know what he's got, but whether he's in the facility or not, he had done the same thing that I had done. He'd brought handful of his people and, you know, started a phone bank up and started this management of information.

MR. KARA: Did your net merge with his net at some point or were they--become almost indistinguishable?

MR. CANNOLES: I really don't know how to answer that. He, obviously, you know, he was getting information from an individual on a phone down there and sharing with me, you'd say that it merged. But, as far as putting the lines together, no. But there were, you know, there were a lot of people sitting around with two phones to the side of their head that day. And that's how a lot of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

stuff was getting back and forth.

MR. AZZARELLO: What is it, again, specifically, that you recall Frank saying about that approaching aircraft?

MR. CANNOLES: I'm pretty sure that it was Frank. Someone had, someone stated on the telephone, and I think it was Frank, logically, it would have been Frank that the White House situation room had been notified about a fast-moving target coming towards Washington.

MS. HYDE: That could have been Dulles, too, I mean, you know, at a much lower level than him to pick up the phone and they talked, yeah.

MR. CANNOLES: Could have been, but I suspect it was Frank.

MS. HYDE: Okay. So, you, stepping back, said, that early on, you would be--or, rather, missing aircraft, various people have thrown out different numbers, but [unintell.] from the folks at the Command Center that from early on, they thought they were in the universe of 11 and the White House thought that it was the universe of 6;

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

are you pretty clear that your, you know, from your vantage point, your universe of missing or way off-course, wayward aircraft of 2?1

MR. CANNOLES: Initially, yeah, ultimately, I mean, we knew very decisively who the four airplanes were; their identity, where they come from and all that the rest of that. But, obviously, that didn't happen as we walked in the room and turned the phone on.

And, as I said, you know, during this period of time, there were the varied reports of the high-speed airplane heading towards Boston; four airplanes in-bound off the Atlantic in distress. So, at any one point in time we were probably trying to figure out what was going on with a half-a-doze to a dozen airplanes.

MS. HYDE: Mm-hmm.

MR. AZZARELLO: To define, initially, though that the period after the second Trade Center crash and before the Pentagon, is that generally--is that the period where you have the two aircraft that were missing that you were trying

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to locate?

MR. CANNOLES: Yeah, I'm--I'm, yeah.

MR. AZZARELLO: One of them you believe you were able to equate later with 77 hit the Pentagon, correct?

MR. CANNOLES: Right.

MR. AZZARELLO: The other one, is it likely that one of those, the other one could have been Delta 1999, which came into the picture, too, from Boston?

MR. CANNOLES: I recall two events with Deltas and I don't know if it's the same flight, in either case. But I remember one Delta, who was giving us some trouble on the orders to the de-bird [ph], he didn't want to do that, and for that reason, he became suspect and it seems to me that there was an inquiry made much later in the morning, well after the fact about the possibility of another Delta having been hijacked back several hours earlier. And we chased it down and found there was nothing to it, but that's--those are the only two events I remember with Delta.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: With Delta?

MR. CANNOLES: Yeah.

MS. HYDE: So, on your telecon, aside from the information of the fast-mover coming toward Washington, was that, at any other point, information being fed in about an aircraft that was, you know, hijacked and that was being watched its movement?

MR. CANNOLES: Yeah there was a Delta and Cleveland comes into mind for some reason. I don't know if we told the guy to land at Cleveland and he said, no, he was going to continue on to Dulles or what the deal was. But he was very much suspect and there was a great deal of concern following that flight because we feared that, you know, somebody had taken command of the aircraft.

There were some other ones. And, you know, these things were cropping up all over the chart. There was a Korean Airlines later on in the day that was in-bound to Alaska that erroneously got reported as being hijacked.

MS. HYDE: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: So, there were a number of kind of lesser events--

MS. HYDE: Mm-hmm.

MR. CANNOLES: --that went on during the day and during that period of time.

MS. HYDE: Well, I'll ask the question this way, you don't want to ask it according to a call time you probably didn't know these call signs, maybe you did, but what was your awareness at that point about what we now know as Flight 93?

MR. CANNOLES: The preliminary information was that--and, again, I can't recall the precise source--but was that they had lost radar identity and radio capability with that flight that call sign somewhere in Indianapolis Center's airspace.

MR. AZZARELLO: You say 93 lost radar coverage in COMS?

MR. CANNOLES: Yeah.

MR. AZZARELLO: That was the preliminary information?

MR. CANNOLES: Yeah.

MR. AZZARELLO: Okay, in Indie's airspace?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: Yes, and that's significant in Air Traffic terms because Air Traffic will assume an aircraft accident if they have simultaneous loss of radar identity and radio contact. So that verbiage was significant that to us and that told us that they had an airplane crash or disappeared.

I don't recall if we accepted it as that at the moment, but that would have been the preliminary second test.

MR. AZZARELLO: Well, were you aware at that point that that was similar to the characteristics of the first two aircraft at the Trade Center?

MR. CANNOLES: No, there's a more than a subtle difference here because the first two aircraft stopped responding to us and either changed transponder settings or turned transponders off. This guy disappeared. And that's a totally different story to us.

MS. HYDE: Tell me, so, did you do that--when you were in investigations, did you do

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

accident packages on all four of these flights later?

MR. CANNOLES: My staff did, yeah.

MS. HYDE: Then you must be familiar with a lot of stuff we know now, like, I appreciate you our trying to take your head back to what you knew then, but your head must be infused with a whole bunch of information we know now having done these Air Traffic investigations of what actually happen.

MR. CANNOLES: Yes.

MS. HYDE: So you know what you're describing is Flight 77, what happened in Indie's airspace was that the target, it disappeared; it wasn't primary coverage. Are you saying that your head back that morning was that that was--that information was what you thought was the Pennsylvania flight, the Flight 93?

MR. CANNOLES: I would honestly say, I didn't know.

MS. HYDE: So, what you recall is learning on the teleconference that in Indie's airspace there had been lost radio and radar contact and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that there was this, you know, assumption maybe not iron clad, but that aircraft was down?

MR. CANNOLES: Right.

MS. HYDE: Put that aside for a moment. What do you recall, specifically, if anything, about an aircraft around Pennsylvania or another aircraft heading towards Washington. Was any of that information being received on your telecon?

MR. CANNOLES: Again, there was either information coming from the Eastern Region Air Traffic Division or from Dulles, higher, direct, it could have been either one that was giving us this countdown of this airplane heading towards Washington.

MS. HYDE: Right.

MR. CANNOLES: The other aircraft, we knew was missing. I can't determine from what source, I can't recall from what source. And we were polling different facilities, you know: Do you know where this airplane is? Did you work this airplane? And it took us a fair amount of time to sort that down.

The first reports we got on United 93,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was, I believe came from a Kentucky police dispatcher who said that they had a report of an aircraft in so-and-so; Longdon [ph], Kentucky, or someplace. And, you know, I remember in my own mind saying, you know, my God that must be him. It turned out to be a real nasty crash in Pennsylvania, instead.

But, no, we didn't have good identity on where the airplanes were.

MS. HYDE: Let me just tell you some facts.

MR. CANNOLES: Okay.

MS. HYDE: Now, that are in your accident package that you know afterwards. Did you know that Cleveland Center's watching 93? They've got a tag, they've got a data block; they have awareness of other aircraft turning off transponders and being hijacked, dropping out of the sky?

And they believe they hear screams more toward 11:00; they hear funny sounding voices and transponders turned off and they've got a primary target that they're watching for a 30-minute period

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of that aircraft, traveling through airspace and ultimately goes down. watching it all the way.

Are you saying that information, that's a different character of information than what you're describing and that's what, you know, maybe we can go back to the accident package and talk to these people.

That information about the 30-minutes of time, we've got an aircraft; we've heard screams; it's a clear sign of hijack. and here's it's path, I can see it. That information wasn't being fed into your telecon?

MR. CANNOLES: Not that I recall. I recall information being given to us that there was a target headed towards Pittsburgh because Pittsburgh decided they were going to evacuate in the middle of all of this. And I don't remember if I was told that that correlated to that flight track specifically or not.

MS. HYDE: Yeah, this is a different character. This is a disappeared plane. This is I hear screaming in the cockpit, I'm damn sure this

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

is hijack and I see a target.

MR. CANNOLES: No.

MR. AZZARELLO: Bomb on-board.

MS. HYDE: Bomb on-board.

MR. AZZARELLO: Bomb on-board.

MR. CANNOLES: First of all, I don't think, if I had a frequency with 10 airplanes on it and heard a scream. I wouldn't bet money on it being any of those airplanes.

MS. HYDE: This is their account of the people who were from Cleveland. Having been out there and interviewed and they've written statements. This isn't my characterization.

This is when you're talking, everyone from the bay supervisor to the ALMICK [ph], and to the manager of the facility that morning. There wasn't a lot of ambiguity in their minds, because, first of all, they've already gotten from other centers, you know, hey, this is, you know, I've had hijack; I've had hijack. So, it's not, you know, where you are at 8:30 in the morning, when this hasn't happened in a decade.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

So, they've heard that, then they hear, in fact it was on a speaker and more than one person heard it. They hear bomb on-board; they hear an airplane; and down the line they all say, it wasn't--you know, they know what's happening here. And they also say that they're burning up the phone lines calling people, telling them, okay, I've got a primary here's where it is, I've heard bomb on-board.

MR. CANNOLES: Mm-hmm.

MS. HYDE: And there's about 25 minutes of time before it actually plowed into the ground. So, if Cleveland was on--it may be that Cleveland was not on your call at this point, or that Cleveland's information, for whatever reason wasn't being fed into your call. It seems like information, having talked to all the people and seen their statements from that facility that you would remember because it was specific.

MR. CANNOLES: I do remember somebody telling me about a target headed towards Pittsburgh. I remember that much. And I remember,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

subsequently, we were looking for where the airplane was going. There was an initial report of an aircraft accident. We thought it was in the vicinity of Camp David.

MS. HYDE: Mm-hmm.

MR. CANNOLES: First came the report of the crash near Longdon, Kentucky or someplace in Kentucky; then I recall it was Camp David; then I think we finally got the precise location based on the eyewitness of another airplane.

MR. KARA: Who was your POC at HEL on your, was HEL up on you net and who were you talking to?

MR. CANNOLES: It should have been Chris, no, Nancy Shelton [ph], I think.

MR. AZZARELLO: Dave, were you AAT-20 on--

MR. CANNOLES: Yes.

MR. AZZARELLO: --on 9/11?

MR. CANNOLES: Yeah.

MR. AZZARELLO: Did you put this together, this summary?

MR. CANNOLES: Yes, my staff did.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Let me ask you a question about this, they put it together, I assume you reviewed it and approved it, being it was released as an official FAA document?

MR. CANNOLES: Yes.

MR. AZZARELLO: It says at 9:39 here, ZOB Cleveland Center, notified Great Lakes Region about United 93. And as you see up above that, the information that was passed to the Great Lakes Region is that screaming, bomb on-board and that they were tracking it; so that it had changed altitude, without a command from them. And that it was, they clearly linked that up with the screams and what they were hearing over the frequency to Controller and reported that to his supervisor and up through the ROC and when I say the ROC, I'm saying the Great Lakes Region, could have been through--

MR. CANNOLES: Mm-hmm.

MR. AZZARELLO: --the Air Traffic Division.

MR. CANNOLES: See, this was a summary and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a synopsis that my staff compiled after much review of data and so I don't know if this was somebody at 39 and 12 seconds that had listened to this tape five times and discerned these words or if this was a natural reaction.

MS. HYDE: [unintell.] all of what we are wanting is what you recall from your conversations that morning.

MR. AZZARELLO: Yeah.

MS. HYDE: We've been and we've talked to all the people so we talked to the controllers and they told us that they knew it immediately. I know it takes five times and pulling the tape and the whole thing. I've known it, so we don't-and, you certainly don't have a reason because you weren't conducting all these interviews. What we want to make sure that we get right is that to the extent you're sitting Washington and you're sitting in headquarters that morning, and you are a coordinator contemporaneous that morning of information--

MR. CANNOLES: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: --do you recall receiving the information that morning here--

MR. CANNOLES: No.

MS. HYDE: --that Cleveland had this flight all on-board screaming, everything, you're right, we now know about it?

MR. CANNOLES: I don't recall anything that specific.

MS. HYDE: Okay, because if you did the plane was tracking, you know, towards Washington. It was something they knew, you sort of see where it's heading in terms of coming this way. But you don't recall any of those threats to Washington or knowing that the plane was coming?

MR. CANNOLES: Not before the information from Eastern Region and/or Dulles Tower.

MR. AZZARELLO: Let's take a look back at your chronology that you've identified that there were two times right around 10:00 o'clock.

MR. CANNOLES: Okay.

MR. KARA [?]: Are those a fair assessment of what your net was picking up on 93?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: I can't testify to the accuracy of the times--

MR. KARA: Right.

MR. CANNOLES: --but I'm sure those reports were, yeah, I'm sure those reports are the character of what we were receiving that morning.

MR. AZZARELLO: Do you know who would know best--who would be in a position to be able to tell whether or not that information on your chronology from your telecon was accurate and how close in time it was to when they received it, you know, the person who was responsible for trying to log the chronology events on the telecon you were working on?

MR. CANNOLES: Probably Dan Diggins or Tony Mello. I think Dan was the primary note-taker. And he's about adept at a laptop as I am, so, but he might be able to give you more definitive information on that.

MR. AZZARELLO: And I don't--when I show you this entry--or was it a step that means that they were on the telecon with you, but I guess,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

having looked at it afterwards or your staff having reviewed it and trying to find out after the fact, the information flow and how far it got; this, I think, was put together the 17th of September, I think.

MR. CANNOLES: We actually started that on the 11, so--

MR. AZZARELLO: And it carried forward for about a week?

MR. CANNOLES: --yeah.

MS. HYDE: What was the purpose of putting this together? I mean, was there a task, an assignment?

MR. CANNOLES: Yeah, the first thing we focused on on the 11th--I ran that telecon until mid- or late-afternoon.

MS. HYDE: Mm-hmm.

MR. CANNOLES: And then I went down with the staff to start putting information together for law enforcement. We briefed the FBI very early the next morning.

MS. HYDE: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: And we had, you know, while it wasn't a glossy product at that point in time we had transcripts. And the reason that I questioned whether or not that was somebody hearing it the first time or not--

MS. HYDE: Mm-hmm.

MR. CANNOLES: --was when we brought--when I called the FBI late on the 11th, I said we have voice trans--voice tapes and you can hear someone speaking in Arabic and, while I don't profess to be a linguist, at that point in time, I'd heard some of those things two or three times and didn't realize that it was an Arabic-speaking person speaking English.

MS. HYDE: Mm-hmm. Well, you know there are two planes, I don't know whether--

MR. CANNOLES: Oh, yeah.

MS. HYDE: I don't know whether you're referring to 11 or 93. Of the four hijacks, there are two aircraft where you had captured on your tape.

MR. CANNOLES: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: One is 11.

MR. CANNOLES: Right.

MS. HYDE: And you've got a certain [unintell.] what it has to say. And then the other is 93.

MR. CANNOLES: One of them was clearer than the other one.

MS. HYDE: Yeah. So, I don't know which one you're referring to.

MR. CANNOLES: Okay.

MS. HYDE: So, did you brief the FBI early next morning and did they ask you to put together this summary or how did this come about?

MR. CANNOLES: No, we did that internally for FAA purposes. There were, as you know, congressional hearings that took place, and we did it to try to build a factual representation of what Air Traffic had in the way of data.

MR. AZZARELLO: You put it together for purposes of informing who, again?

MR. CANNOLES: Our own leadership--

MS. HYDE: But this [unintell.] did you do

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the briefing at the White House or did Jeff Griffith do the briefing at the White House?

MR. CANNOLES: Jeff may have, I did not.

MS. HYDE: Okay, do you know if this product was requested for a briefing at the White House?

MR. CANNOLES: I know I gave Jeff copies of this briefing, but I don't know that he specifically presented this.

MS. HYDE: Okay, but do you recall when you were asked to do it, were you asked to put something together for the White House?

MR. CANNOLES: No, I don't think so.

MR. KARA: And there was no communication between you and the military so, anybody in NORAD in terms of preparing a briefing?

MR. CANNOLES: No, no.

MR. AZZARELLO: I noticed that on some of the four aircraft, on the entries of the chronology, there's notations of when not only the WOC was notified, but when--the Operations Center when the WOC was notified, headquarters or Command

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Center even.

MR. CANNOLES: Mm-hmm.

MR. AZZARELLO: If you look at 93, it had the notification from Cleveland Center to Great Lakes Region, but there's no indication of any notification time to either headquarters or to the Command Center in Herndon. Did that mean that--what does that mean?

MR. CANNOLES: Again, and I recall reviewing the transcripts on that, it seems to me that the supervisor at that facility, called the ROC and said we have--we suspect that there's an airplane down and it's so and so and so and so and so and so. That would have migrated its way into the WOC as an aircraft accident. So, there wouldn't have been a requirement nor a necessity to tell Herndon about it necessarily.

MR. AZZARELLO: I was going to raise that question because some of the tapes at Herndon have conversations about United 93. I believe one of them, there's the one from Cleveland--

MR. : Cleveland counts it down

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

with the Command Center.

MR. AZZARELLO: Cleveland Center called the Command Center at some point and told them about problems with 93 prior to its crash. And at other Command Center locations where there were manager NOM positions, there's discussion about United 93 before it crashed. And I guess it strikes me that there's nothing in the report about the notification to either the Command Center or the WOC about United 93.

Do you remember if you--in discussions with your staff about that, okay, did you go over the records, did you look at the transcripts or, you know, talk to people and see when, if at all, the Command Center or the leadership was advised of the situation of 93?

MR. CANNOLES: No, I don't recall.

MR. AZZARELLO: How about the--there were some entries in the summary about military contacts with NORAD. And there's references to logs from the NORAD logs. Is that something that you know you and/or your staff said that's something you had

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

access to--any NORAD documents or was that pursuant to discussions that your staff had with people from you or the other side with NORAD?

MR. CANNOLES: Jeff Griffith either gave me or showed me a copy of NORAD's logs early on the development of this document.

MR. KARA: Post-9/11?

MR. CANNOLES: Yeah. So, I'm sure we used, you know, some of that information. I recall, for example, that NORAD had an earlier time of us notifying them on one of these events than we had in our logs. Don't ask me why I remember that, but I do. And I failed to add and I probably should have, that on this telephone conference that I was running, one of the first things we did was reach out to our military liaison people here and brought them into that, so we had the military out there, was pretty early on.

MR. KARA: When you say here?

MR. CANNOLES: Here on the Air Traffic staff.

MR. KARA: Colonel Atkins or--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: Yeah, yeah.

MR. KARA: Was she down in your office, then, as opposed to here in the ROC--or not your office but where you had your--

MR. CANNOLES: Yeah, Cheryl was next door to me.

MR. KARA: Okay.

MS. HYDE: She was next door to you, but listening to your teleconference?

MR. CANNOLES: She was--she was down, I'm sorry, she was next door to my office on the fourth floor. After we got up and started this, I asked one of my staff to get ahold of her and get her up there. And I remember she came up and joined us at some point that morning.

MS. HYDE: At some point in the morning. So, do you recall whether she was a part of the teleconference when it first got going?

MR. CANNOLES: No, she was not, she came up after the fact.

MS. HYDE: Well, in your mind, did you ask her to come, because you thought you needed a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

military, would you usually have a military liaison on your conference?

MR. CANNOLES: That, and I felt she had need to know the information. She didn't know it otherwise.

MS. HYDE: Okay, so if she wasn't on there in the beginning of the conference, did you reach out to somebody else in the beginning? Is that because she wasn't in the facility at the--I seem to recall something that she sort of arrived here, late or something.

MR. CANNOLES: Hmm. I don't remember, you know, asking to find her until, you know, I don't know--it's so difficult to place the times that we were--I'm guessing, but we were an hour into it. And it suddenly occurred to me or someone else in the room, I think it was me, that, hey, we ought to have Cheryl up here. So somebody did an outreach to her and, as I recall, she came herself. I don't recall one her other people being there, I think it was here.

MS. HYDE: Were you familiar with NORAD

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that morning? Do you know who NORAD was or what they did?

MR. CANNOLES: Oh, yeah.

MS. HYDE: And, do you recall any of the participants on your call asking if the fighter planes had been scrambled or jets were--military was involved in--

MR. CANNOLES: I think we were told once or twice based on information from our centers that, for example, NORAD had scrambled out of--out of--it wasn't P's [ph] Air Force Base, I forget where it was, but there were fighters dispatched from the Northeast and there were also fighters dispatched from Langley. So, I knew that on the telecon. The primary interface with NORAD--and I know this from being a controller and having worked with them before, is at the facility level where we have procedures for how they take off and get to where they need to go and so on and so forth. So, I was quite confident that that was taking place.

MS. HYDE: Actually, from a hijacking perspective, the protocols at the time were all the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

opposite, that the coordinator of hijacks at NORAD is supposed to be between the NMCC and headquarters folks here. What you just described is sort of an every-day control of airspace--

MR. CANNOLES: Right.

MS. HYDE: --and training scenario. Did you--were you familiar with the hijack protocols and the idea that the coordinator would reach out to the NMCC, in terms of getting fighters scrambled and that being the process?

MR. CANNOLES: I knew, generally, that in a hijack situation that NORAD was a player.

MS. HYDE: Mm-hmm.

MR. CANNOLES: Because I really didn't do hijacks or wasn't involved with security, I didn't know the precise procedures.

MR. KARA: Did you--were you aware of who the FAA headquarters hijack coordinator was on 9/11?

MR. CANNOLES: I think I did, I think it was Aviation Security, it should have been, to my way of thinking.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: You're right in thinking that somebody the office, that's not, you don't really have an individual, it's the office in charge of hijacking would be the security office--

MR. CANNOLES: Probably Ross Hamory, but--

MS. HYDE: Was the security [unintell.] office, by Canavan or was that a different office?

MR. CANNOLES: Was Canavan the guy that quit?

MR. WIEGAND [?]: You say ACS, right?

MR. CANNOLES: Yeah.

MR. WIEGAND: He was ACS-1 on 9/11.

MR. CANNOLES: Yeah, yeah, it was.

MR. KARA: That would have been the office that was the hijack coordinator?

MR. CANNOLES: Yeah. And Air Traffic had a role in that, too. But it was on the operational side of the house, so it's not something that I had a lot of familiarity with.

MS. HYDE: You said a role in that too, where do we look for that? What do you mean?

MR. CANNOLES: I mean that they have an

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

office that does pretty much constant interface with NORAD on security-related issues. They do a lot of work with the White House on intel matters, so they're kind of on the intel side of Air Traffic, if you will, for a lack of a better term. So, they would have had involvement in that.

MS. HYDE: Who was that office headed or part of that office on 9/11?

MR. CANNOLES: Jeff Griffith had formerly headed it. I think his deputy, Mike Scirillo [ph] was probably in charge of it on 9/11.

MR. KARA: Right.

MR. CANNOLES: And a couple of individuals, Ricky Hostettler [ph] and Scott, his boss, were two individuals I can think of that did it.

MS. HYDE: Mm-hmm. So, in terms of the fighter scramble issue, it's fair to say that your recollection was that you received information from participants on your call that fighters had been scrambled?

MR. CANNOLES: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: And that your assumption, then, was that it was a matter that the Center should be handling in terms of that. And that you weren't giving any directions to anybody to involve fighters in any of these instances?

MR. CANNOLES: Absolutely not.

MS. HYDE: Well, stepping back from it, after you heard, even as early as the first two incidents that went into the towers. I assume that by the telecon, pretty soon, you concluded it was deliberate or not?

MR. CANNOLES: Yeah.

MS. HYDE: So, it was part of an attack.

MR. CANNOLES: Mm-hmm.

MS. HYDE: Surely by the time the Pentagon gets hit, I would think it now seems like an attack. To the extent there's still information about others out there, why do, you know, the obvious thought would be, we're being attacked, the FAA can't control or do anything to respond to that situation, this is a matter for the military.

MR. CANNOLES: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Were you concerned that the military may not be receiving all the information they needed to launch an air defence operation to guard against this attack?

MR. CANNOLES: As far as I recall, before the Pentagon was hit, I was aware that there were fighters in the air. And I assumed they were in the air because proper coordination had taken place at some level, military was alerted, and so on and so forth. I'm sure it would have been appropriate on this telecon for me, for example, to say, hey, have you guys notified the military about this? I may have done that, but I don't recall any specific instances. But, clearly my effort in bringing Colonel Atkins up there was so that the military would have a voice and, you know, set of hands in the activity that we were trying to manage.

MR. AZZARELLO: When did the thought that it might be an action--at what point in time of this sequence of events did you say, all right this is deliberate, it's not an accident, it's an attack?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: Probably just before the second airplane hit the World Trade Center or right after the second airplane hit the World Trade Center.

MR. AZZARELLO: After the second?

MR. CANNOLES: Yeah.

MR. AZZARELLO: So, it didn't take, it didn't actually have to wait, in your mind, have to wait till the third strike on the Pentagon to say this is deliberate?

MS. HYDE: Do you remember anything about this entry that's on your time line 10:14--fast-moving aircraft, 60 NW of DC Southeast-bound, headed towards DC?

MR. CANNOLES: I think that's the one I referenced earlier and that would have been either a description by Frank Hatfield or Dulles or Washington Center, one of the Eastern Region facilities.

MS. HYDE: Oh, I took that earlier description to be what we now know as 77, I'm sorry, were there two different--am I confusing two

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

things? Before 77, do you recall a count-down situation where in-bound 20 miles, 15 miles--

MR. CANNOLES: Mm-hmm.

MS. HYDE: --and then you sent Jeff to look at the window and smoke comes up from the Pentagon? Right?

MR. CANNOLES: Right.

MS. HYDE: Okay, separate from that, tell me what was your recollection of this other crash?

MR. CANNOLES: I'll bet it's the same--I'll bet it's the same, but I'll bet the time is not correct.

MS. HYDE: Well, we know from your--I see what you're saying. Because we know--you recalled the go look out the window and then there was smoke coming out the window. You can pretty much correlate that that was all about the Pentagon.

MR. CANNOLES: Right.

MS. HYDE: This report, I think is a separate report, because I've seen it not just on your telecon, but it's not just--it's about that same time [unintell.] so my sense is that somebody

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was putting out to the system, then, that there was another fast-mover coming and what comes to mind, if it's 60 miles away, is some notion of 93.

MR. CANNOLES: Could have been, but I don't recall.

MS. HYDE: You don't recall anything about that?

MR. CANNOLES: No.

MS. HYDE: It says at 10:20 DOD reports two more--two more, suspicious wayward--

MR. CANNOLES: I'm sure it happened, but I don't have any specific recollection.

MS. HYDE: Not communicating with the aircraft?

MR. CANNOLES: Like I said, there was--at any one time there were a number of suspicious activities--I think everybody's awareness was fairly heightened by then, and everything looked suspicious.

MR. AZZARELLO: The reference to the logs, I think you said Jeff either showed you or gave you from NORAD?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: Mm-hmm.

MR. AZZARELLO: Do you remember if those, I think you'd seen, I think you [unintell.] with tail numbers in them. At certain points in the log, United Airlines tail number and American Airlines tail numbers, do you remember that?

MR. CANNOLES: I don't remember.

MR. AZZARELLO: Who would have--who on your staff, if it wasn't you, yourself, would have been the person that would have looked through those logs and sort of see where, if at all, did that fit in the chronology with the FAA materials that the tapes stress [unintell.]

MR. CANNOLES: Probably either Tony Ferrante, Tony Mello, or Dan Diggins.

MS. HYDE: So, at some point, do you remember, in terms of the sharing back and forth between the two, the ATC and the WOC, did you send one of your folks down to sit at a position in the ATC and--May thought this might have happened--an Air Traffic person came down to participate in what was the Primary Net.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: I don't think it was one of my folks.

MS. HYDE: Do you recall getting information from other agencies that the ATC folks may have been gathering from the Primary Net?

MR. CANNOLES: No. We were reporting out, but we weren't getting a lot back.

MS. HYDE: Did Mr. Belger come into your call at any point?

MR. CANNOLES: Not that I recall.

MS. HYDE: Do you know where he was receiving his information from?

MR. CANNOLES: Jeff Griffith was with him and Jeff told me he was with him, so I knew they were down here, probably in the ACC or the SVTS.

MS. HYDE: Did you know who was on the SVTS, at any point?

MR. CANNOLES: No. As a matter of fact, it wasn't until two months later that I was briefed on the SVTS, when I became [unintell.] to the organization.

MS. HYDE: You mean, [unintell.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: I knew essentially what was there, but I didn't know the parties and all that.

MR. AZZARELLO: When you say briefed on--you mean briefed specifically what occurred that day in connection with SVTS or--

MR. CANNOLES: No, [unintell.] capabilities. There were issues related to it that are pretty highly classified so, they did their job and they didn't tell me before then.

MS. HYDE: What was your sense of what the Administrator was doing?

MR. CANNOLES: I don't think I worried about it tremendously, but I, you know, if someone had asked me at the time, I would have been certain that she was with Belger down here.

MS. HYDE: You don't recall seeing he, either?

MR. CANNOLES: No.

MR. AZZARELLO: So, you assume she was with Monte Belger?

MR. CANNOLES: Yeah.

MR. AZZARELLO: Did you see Peter Challen

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

or Steve Brown much that morning?

MR. CANNOLES: Not that morning. I saw--I recall seeing Steve that afternoon and Peter may have bounced in maybe once or twice, but--

MR. AZZARELLO: During sort of the height of the activity, though, between, say, 8:00 and 11:00, you don't remember seeing--

MR. CANNOLES: No.

MR. AZZARELLO: --either Steve or Peter?

MR. CANNOLES: No, no. The only superior that I saw at that point in time was Griffith.

MR. AZZARELLO: So that would also include Shirley Miller--you didn't see her down by your--was she down by your--unit--you have nothing to recall--

MR. CANNOLES: She might have dropped in, but I don't recall.

MR. AZZARELLO: Your main POC, though, was Griffith?

MR. CANNOLES: Right.

MR. AZZARELLO: Did you go over this with your staff, like, who would have--well, let me just

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

back up, before that, who on your staff would have contributed to pulling this together? Tony Ferrante?

MR. CANNOLES: Tony Mello.

MR. AZZARELLO: Tony Mello, Diggins, anyone else?

MR. CANNOLES: Doug Gould, Jeff Logue, I think Molly Boyne assisted in it B-o-y-n-e. Catherine Meyers [ph], I think those were the main players, if not all of them.

MR. AZZARELLO: And to what extent did you review this, if at all, with those that produced the product, along the way and/or after completion?

MR. CANNOLES: Both.

MR. AZZARELLO: Tell us about that, the process or the review process.

MR. CANNOLES: We would have been turning this out as we developed it, so, you know, as quickly as we got a transcript, I'm sure I was giving it to Griffith and later Peacock. So, and some pieces of it were developed, I'm sure much, earlier than others. And we kind of refined this

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

thing as we went through it, too, you know, there were political needs to be met, e.g., the hearings that were going to take place.

MR. AZZARELLO: Congressional hearings?

MR. CANNOLES: Yeah, therefore, you know, kind of a plain language synopsis became important at some point. I'm not even sure if we incorporated one in that. But I think we had that thing produced, I don't know, 72 hours, probably.

MR. AZZARELLO: You have quotes from actual transmissions made from the various centers, so--

MR. CANNOLES: Yeah.

MR. AZZARELLO: --is it safe to assume that somebody was reviewing the actual tapes--

MR. CANNOLES: Absolutely.

MR. AZZARELLO: --and transcripts that's how they were produced. And there's actually specific times when the secondary radar [unintell.] transponders were shut off or changed?

MR. CANNOLES: Mm-hmm.

MR. AZZARELLO: So, I guess you had the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

end pats [ph], and the radar [unintell.] as available to you?

MR. CANNOLES: Yes.

MR. AZZARELLO: What other sources, to your knowledge was available for review as this was an ongoing project--or were all transcripts from any facility I would imagine would be available if they wanted to pull from them?

MR. CANNOLES: Correct and we had those--if memory serves me correctly, we had most of the key re-recordings in here that afternoon, electronically. Most of the radar data, we had the ability to ship around electronically, too, so I think we had that that afternoon, as well.

MR. : Did anybody start working the issue of buying in American 77 and [inaudible] dropping completely off the radar?

MR. CANNOLES: You know, I don't think we got around to that for a day or so. That was the one in--was that Indie Center?

MR. : That's Indie Center.

MR. CANNOLES: Yes, I think, as I recall,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Monte Belger asked me that question and I said, you know, we probably know the answer, but we're going to probably have to go back and research it. And at that point we involved airways facilities and they got into radar sort boxes and all that kind of stuff that, you know, finally led us to the conclusion that, hey, gee whiz, we don't have any primary radar coverage in that area.

MR. : And was that analytical pushed any further than that or was it just a one-time shot to figure out that you didn't have primary coverage? Did anybody ever ask the more compelling question, why didn't you have primary coverage?

MR. CANNOLES: No, the agency had, you know, pretty much discarded primary coverage as an essential tool, you know, in the preceding years. So, that question didn't come up. I mean, obviously, when we didn't have data on that airplane, it was very unfortunate, but--and it was my understanding, actually, that there was one system that tracked it, but it wasn't somehow

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

presented to the processor.

MR. : From your investigating perspective, wouldn't it be important to you to have the primary capability?

MR. CANNOLES: Yes, but--

MR. : And the but is?

MR. CANNOLES: The but is the agency decided we didn't need it anymore so I didn't have it at my disposal.

MR. : Did you get a vote on that?

MR. CANNOLES: No.

MS. HYDE: Do you remember, did you put a backer on figuring out, as well [unintell.]

MR. CANNOLES: That was something, yeah, I'm sure I did, I don't know--it was probably Diggins. Diggins is an automator and he's got a very, very high degree of understanding of automation and systems, much better than my own.

MR. AZZARELLO: As each of the four flights were broken down, Dave, on 11 and 175, with a specific reference to NEDS logs and time of FAA

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notification of NEDS? I'm sorry, FAA notification--yeah, to NEDS about the hijackings of 11, let's say a specific 8:40, the Northeast Defense Sector logs represent they were notified by the Federal Aviation Administration on the events 711, then a similar entry for 175 at 9:05.

There are not entries, however, for American Airlines 77 and United Airlines 93 about notification, at all, from the FAA to NEDS about those two flights. Did you discuss that with the staff?

MR. CANNOLES: I'm sure I did at the time. And I recall the question was debated rather hotly around the time of the hearings.

MR. AZZARELLO: What do you recall being the nature of the debate--the hot debate?

MR. CANNOLES: The nature of the debate was did the FAA give the military sufficient time? Did the military take too much time to respond? You know, who's at fault here?

As I recall, the first word went out to them, I don't know, very early on in the process

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

through Otis RADCOM.

MR. AZZARELLO: The word went out to who?

MR. CANNOLES: To the military and I couldn't tell you who the specific detachment was or anything. But a supervisor, I believe at Boston Center or at Otis or something made the first call out and said, hey, tell the military this is what we see going on. I believe that was--

MR. AZZARELLO: That they put on with respect to American 11?

MR. CANNOLES: Yes.

MR. AZZARELLO: Mm-hmm.

MR. CANNOLES: I recall that was the first signal out. The second flight--the second flight, it occurs to me it took us some 20 minutes to get to them or something like that. And I could be wrong, I'm really dealing off ancient memory here.

MR. AZZARELLO: On United you're talking about the second?

MR. CANNOLES: Yeah.

MR. AZZARELLO: Okay.

MR. CANNOLES: The second airplane that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

hit the World Trade Center.

MR. AZZARELLO: Mm-hmm.

MR. CANNOLES: Um--

MR. AZZARELLO: Well, I don't know if you--I'm going to ask you, if it was, the controller on the position when [unintell.] was tracking 11 as a primary, as handed off to him as a primary by Boston Center--

MR. CANNOLES: Mm-hmm.

MR. AZZARELLO: --it just so happened that it was his own lucky day, that when 175 turned off its transponder, and went off course, it was on his scope, too.

MR. CANNOLES: Right.

MR. AZZARELLO: So, there was some lag in that controller noticing, maybe roughly a five-, six-, seven-minute lag from that controller noticing that, wow, there's a [unintell.] targeting host--a tracking host and it's a different transponder signal.

But then that was passed to Mike McCormick and Mike, when he met with us, I don't know

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

[unintell.] some frustration he had in trying to communicate that to the Eastern Region, when he became aware that we might have a second hijack in the system on this 175 and he had some attempts to contact the Eastern Region, but that on more than a few occasions was told by some staff people ongoing that they could not and refused to interrupt regarding a hijacking, which was obviously American
11--

MR. CANNOLES: Wow.

MR. AZZARELLO: --was that considered at all with--

MR. CANNOLES: I've never heard that.

MR. AZZARELLO: Okay.

MR. KARA: You actually didn't get started until after that, though in your telecon.

MR. AZZARELLO: Your telecon didn't get started until after the second hit.

MR. CANNOLES: Right.

MR. AZZARELLO: Okay, that's on 175. But now, going forward to the last two flights, I mean, it does sort of--I mean, let's be honest here, it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

jumps out at you. You're looking at notifications from the FAA to the military. And, as you said, there was a debate or a spirited--it's my word, I guess, debate or discussion about when did the military have notification? And was it their reaction time that lagged or was it FAA reaction time in either recognition or communicating the information over to the military.

And that's when it jumps out at you that there are times on 11 and 175, pursuant to NEDS logs of when they were notified. Now, obviously, from the FAA perspective, you don't just have NEDS logs or NEDS data available to you, but you have a host of FAA data and I would venture to say that the closest or probably the most accurate to the ground troop that would occur that day are tapes of controllers who would have been on position when that plane ran afoul of it's course or when screaming was heard on-board--

MR. CANNOLES: Mm-hmm.

MR. AZZARELLO: --and I would, I mean, I'm assuming that, to that degree, that those tapes by

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

your people were looked at to see, well, when did we first have an opportunity, whether it was recognized or not by the controllers--was our first opportunity to recognize something was a miss--

MR. CANNOLES: Absolutely.

MR. AZZARELLO: --was that done?

MR. CANNOLES: Yes.

MR. AZZARELLO: A third check?

MR. CANNOLES: Yes.

MR. AZZARELLO: Well, then, I would imagine that there was some specific discussion about, well, what did we say about three and four, there's just--there's nothing in here, what does that mean? does that mean we didn't notify them? Does that mean we did tell the military, but we disagree with the military about when we did notify them, based on what our records say and what their records say?

MR. CANNOLES: I never had to answer those questions. But it was--it has always been my assumption that by the time the first two airplanes hit the World Trade Center, the military was firmly

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

plugged into this series of events with FAA, through the SVTS, if nothing else. And I don't know that to be factual. But that's always been my assumption.

MR. AZZARELLO: You assume that they are assuming and going forward, but what about when your people are then digging in sort of a source document, the primary source type of stuff, like, transcripts, tapes, FAA logs, Command Center logs. And then, now, they come back to you after some effort--I'm sure a lot of effort and hours spent in listening to tapes and reviewing documents.

And I mean, I'm imagining that this happened. And if I'm wrong, then stop me and tell me, but I imagine if they reviewed a lot of these source materials from the FAA perspective they had some military documents, like logs and they would have reached a conclusion as to when on each of the four aircraft, the FAA made a notification to the military. Did that occur?

MR. CANNOLES: I don't think so. And it was my conclusion that there weren't, nor does

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there have to be four separate notifications. That, because, again, NEDS cedes whoever it was plugged into what the FAA was doing by this point in time, they were getting it real time the same as we were.

MR. AZZARELLO: Well, was that--was that a topic of discussion? Did you and your staff conclude that there were not separate notifications on 93 and 77, but that you assumed because some element of the military was already plugged into on 11 and 175, that that notification would spill over and cover those two planes, is that what--

MR. CANNOLES: That was my assumption.

MR. AZZARELLO: That's the conclusion you drew after discussion with your staff?

MR. CANNOLES: Yes.

MS. HYDE: Well, you know, because of the nature, David, we know of the system, that you have centers that control pieces of the pie of airspace, and all these aircraft were involved and went wayward or NORDO from different centers, and one center doesn't know what the other center is

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

doing--

MR. CANNOLES: Right.

MS. HYDE: --and so they said all the centers knew what [unintell.] was largely from your telecon. You know, that when you go back out to the center world, then you're three states away from somebody else.

MR. CANNOLES: Mm-hmm.

MS. HYDE: So, if I could just sort of ask you if that was your assumption, given that these were all aircraft that went wayward or off, as you know when you reviewed the investigation in Cleveland and Indie that two happened to both be in Boston or New York right next to each other, but the other two aircraft were miles away in different airspace, with different people handling them.

MR. CANNOLES: Well, again, remember that the third aircraft was assumed to be a crash. So, I know of no protocol that would have the FAA--I mean, yes, down the list in accident notification, you would call somebody affiliated with the military. You certainly wouldn't call NORAD and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

say, hey we had an airplane crash.

MS. HYDE: And why was that assumed to be a crash?

MR. CANNOLES: Simultaneous loss of radar and radio and the disappearance of a target after that.

MS. HYDE: The key there is the third factor because--

MR. CANNOLES: No, no.

MS. HYDE: --well, we know that the other two planes had that same set of circumstances, the only difference being that, I guess the happenstance, there happened to be primary radar coverage over in that part of the country.

MR. CANNOLES: But I'm not sure they turned their transponders off, either.

MS. HYDE: Eleven did.

MR. AZZARELLO: Eleven did.

MR. CANNOLES: Okay.

MR. AZZARELLO: Totally, didn't put it back on.

MR. CANNOLES: I know one changed

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

code--two of them changed code, one of them turned off.

MR. AZZARELLO: One changed code and the second did--

MS. HYDE: 175 changed code, 11 turned off.

MR. CANNOLES: Okay. But the simultaneous loss of radio and radar would have been the first triggering event. And I, you know, you guys presumably interviewed the controller at Indianapolis. I don't know if the controller at Indianapolis was aware of what was going on in New York.

MS. HYDE: They were, some of them were aware of what was going on in New York. Command Center, actually, by the time this happened, 8:56 we'd already had a hit on the first Trade Center and, certainly, by the second one or whatever, calls were going out, but [unintell.] penetrated in one way or the other. As I said, let me just to follow this. So, and what you speak about the sort of false notification of Kentucky, whatever, that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

really happened an hour and a half later. But when you go look at the military side of things, they actually kept good records there, and so, yes, that false reporting came back in, but it's, like, 11:00 o'clock.

So for two hours, you have a system where and you were in charge of the investigation that day, so you know, I don't, certainly, tend to tell you what, I'm sure you or your staff must have found out from going and talking with these folks. But I guess, maybe I should stop there and say are--were you aware of any of this from your investigation, from your efforts that day or in your role after that day?

MR. CANNOLES: I was aware of the concern and the criticism about timely notification, certainly. And I remember we put forth a lot of diligent effort trying to find out, okay, when was the first contact made and did what and so on and so forth. But I can also remember that--and I'm surprised, today, when you tell me that we didn't make any notifications on the last two. There had

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to have been communications between the FAA and the military. But it's my sense that the military was engaged with us fully at that point, so they knew about it as quickly as we did.

MS. HYDE: Probably, the FAA, as we know [unintell.] you're absolutely right, Dave, dead center. The FAA--somebody in the FAA was talking to somebody in the military, the problem being that between the center structure and Herndon and the WOC and the ACC and the Cannoles and the NCC that you don't get--the twain shall not meet, in terms of the people who actually have the information about the aircraft and the people who, from the military, are passing on.

MR. CANNOLES: Okay.

MS. HYDE: And, as a leader, I mean, again, tell us, this wasn't your billet on 9/11, your billet, as I understand it was the investigations part, just sort of I think post facto looking at it, not the day of. But from your vantage point of looking at it afterwards, did you reach these conclusions, that there was not the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notifications between the facilities and MEADS
[ph]?

MR. CANNOLES: You know, I'm sure I did,
but, again, it was with the comfort and security
that I felt we were joined at the hip with DOD by
that point in time so that the appropriate
notifications would be made.

MS. HYDE: I'm trying to understand why
you had that comfort and security, what was the--

MR. CANNOLES: Because of my limited
knowledge of hijack procedures and how we interface
with DOD and other entities, I was pretty sure that
a net and a conference had been set up by that
point in time and that all the players were active
in it. I didn't have time to go check on it. And
it wasn't my role to do that.

MS. HYDE: Mm-hmm, that morning, certainly
not. Afterwards, when you were--

MR. CANNOLES: But I was pretty sure that
was being taken care of.

MS. HYDE: Okay. Hi.

MR. : [unintell.] Deputy Chief

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Counsel.

MS. HYDE: Right.

MR. : My boss [unintell.] talking to Mark [unintell.] and he asked us to give this to you right away. Here's what--we found out that there was a document back in March of '02 that MITRE had put together concerning 9/11, and we never formally got it. But when we were talking to one of our folks, Nancy Kalmonowski [ph], who you're supposed to interview later today, we realized this is something you're going to want to see. Our biggest concern was that because you were talking to her today, we want to make sure that you had it so that if you wanted to discuss it with her how it was put together whatever, you wouldn't be surprised. Mr. Marcus asked us to get it to you and let you know. He said get a copy to you, he wasn't looking for it directly.

MS. HYDE: Well, that's okay.

MR. : So, I brought two copies here. Basically what happened is, Nancy had conversations with MITRE, oh, we think somewhere

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

about October of '01, about putting together kind of a summary of what happened, recommendations. There were discussions for about three or four months, a meeting, maybe around about February. And then, in March, she was invited to kind of see what they tentatively put together. Other things were going on in FAA and, so, it wasn't important to get it, so we never asked for it; we never got it. And again, it wasn't something FAA generated, and, frankly, that's why it took us a little while to recognize that it's something that you'd want.

But, what it has, in addition to summaries of what they looked at, there are some MITRE recommendations in there of things that they thought would be a good idea. Because we got this today, we've asked some of our folks to look at those recommendations. Because we figure once you see them, you're probably going to want to know from FAA, either what we've done or what we think of them.

The MITRE folks, I assume, if you wanted to talk to them about why they recommended they'd

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

be willing to do it. And we kind of gave them a heads up you may want to talk to them.

MR. KARA: MITRE was contacted?

MR. : Yeah, we, they are a federally financed research and development corporation. We have an existing contract with them for lots and lots of services. And so, this is something we can routinely get from them about doing a special procurement.

MS. HYDE: Okay, you know what I might recommend? We're sort of ten minutes away from finishing with this witness and I very much appreciate you wanted to get this to us. We're running a little bit behind, anyway.

MR. : Okay.

MS. HYDE: I think I've understood about 60 percent of what you've said, but I have a lot of questions for you. But--

MR. : [unintell.] come back later.

MS. HYDE: I don't want to take this gentleman's time--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : Okay.

MS. HYDE: --and ask any questions. So, why don't we leave this and then, if Mr. Wiegand can find you right after--

MR. : I'll be in the Deputy's office waiting for you. All right, sorry to interrupt.

MR. KARA: I'm just glad it wasn't mine, James. [unintell.]

MS. HYDE: We were almost done with May's issue [unintell.] I think we're supposed to be talking about the weather or baseball or something. Since I know nothing about baseball.

MR. CANNOLES: I got conscripted. I mean, we recognize we could have done a lot of things a whole lot better in the way of communications. I felt pretty good about being given a challenge to try to turn this into something above what it was on September 11 and May was, you know, it's real easy for an old manager to be stuck in their ways and not want to progress and change. But she was wonderful

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: May, yeah.

MR. CANNOLES: Had a good time working with her.

MS. HYDE: Actually reminds me we're [unintell.] but I do want to tap your knowledge of all the changes that have taken place.

MR. CANNOLES: Okay.

MS. HYDE: Okay, so let's just wrap up in terms of, again, not the hat that you were wearing that morning, because that morning, you didn't have those responsibilities. But the look-back effort afterwards. The effort that went into producing that document and the other documents. I mean, is it the case that some of the things that we're discovering two years later having gone and schlepped out to all these facilities and talked to all your people about, you know, the conversations were happening, but the notifications were going between the right people who had to be having them.

Was that stuff that you knew because of your efforts after in the weeks or couple weeks after 9/11?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: I gotta--being totally candid--I thought that the system worked as well as it could, given it's design on 9/11. I think it did pretty much what it was designed to do. But, yes, given the magnitude of the tragedy and the way we performed in light of the attack on the United States, we recognized a lot of things to change. And I, you know, was part of the way things got changed subsequently. So, yes.

MS. HYDE: You generally answered the question, I just--on the specific point, is it the case that before hearing us today, that you always did believe that notifications took place [unintell.] on the last two flights, 77 and 93?

MR. CANNOLES: Yeah.

MS. HYDE: You did?

MR. CANNOLES: Yeah.

MS. HYDE: You thought that they--even sitting here today, that before you walked in here, that those notifications did occur?

MR. CANNOLES: Yeah, and I, you know, I don't know--I sit here with a degree of comfort

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

when I say that. And I don't know if it was because Cheryl Atkins had joined my conference and she was sitting there and aware of it or if it was just because I had some knowledge of how hijacks were run that I--

MS. HYDE: Well, and those examples make me think that you're addressing the response to that morning.

MR. CANNOLES: Yeah.

MS. HYDE: Actually, I can see how you would think and have that degree of confidence that morning. I'm saying afterwards, when you were charged with heading up the look-back effort, did you think from your investigation that those specific notifications had happened? What you learned afterwards, when you had your staff go out there and put it all together?

MR. CANNOLES: Obviously, not from the product we prepared, but I think this is an accurate recollection. I think I can recall a conversation with a member of my staff saying it doesn't matter, the military was working with us by

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

then. They knew about these things when we did.

MS. HYDE: Mm-hmm.

MR. AZZARELLO: Because, I want to just clarify an early statement you made, Dave. You said that you didn't--you were surprised until I told you that there was apparently no notifications on the last two. Just so we're clear, I think what I said is that what jumps out at me as I look at this summary, which, was prepared, as you say, in part for questions that Congress is going to have on who knew what when, what they do with the information.

I said what jumped out at me as you read it is there's reference to NEDS logs and specific notifications on the first two and there's nothing, it's just the lack of an entry regarding the last two. And is the reader supposed to conclude from that that there was no entry or what is the reader supposed to conclude from that, was my first question.

And then I asked if you discussed that with your staff, because I would imagine that that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

would have jumped out at you and you would have said, all right, well, we have specific notification times on the first two, which would show how much time, if any, the military had to reaction, why don't we have them on three and four? Did you have that specific discussion with your staff?

MR. CANNOLES: I'm sure I did. And, again, in the case of 93, if that's the one that crashed in Somerset, I would not have been surprised to see no notification there--

MR. AZZARELLO: Why is that?

MR. CANNOLES: Again, because it was a presumed crash.

MS. HYDE: I thought you said--

MR. CANNOLES: I'm sorry,--

MS. HYDE: Seventy-seven's out of Indie's airspace.

MR. CANNOLES: Seventy-seven's Indie airspace--77 would not have surprised me, a presumed crash, I can fully understand nobody talking to NORAD about it. The other one, again,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

if I'd have seen it, I would have said, hmm, we didn't find anything in the logs, well, they were working with us by then, so.

MR. AZZARELLO: Okay, good. Ninety-three, as we said, the controllers were watching, they were having discussions, actually there's more than two or more Command Center discussions where the primary target is being tracked, with the knowledge that there's screaming on-board or screaming on the frequency and the threat of a bomb on-board. And, you know, when you put that sort of against the background of your other comment, that there was a spirited or heated debate about who knew what when--was that--let's just focus on 93, what do you recall being discussed about the notification or lack thereof from the military perspective and the FAA perspective on United 93, which is the last plane that went down in Pennsylvania?

MR. CANNOLES: I don't have any recollection of anything specific to that flight. I remember statements on the telecon indicating the airplane was heading towards Pittsburgh. I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

remember a subsequent discussion of the airplane being crashed near Somerset which followed an assumption by somebody with a false report of a Kentucky crash and the one near Camp David. I don't recall any conversation relative to the--

MR. AZZARELLO: Do you recall any conversations with your staff about the reporting of each separate flight from FAA facility to--on up that chain of command and then, if it was reported over to the military? For example, when you look at 11, there's sort of a chronology of Boston Center and then the military being notified.

When you look at 77 and 11, they talk about notifying the region on the WOC, but you don't sort of see that chain of reporting on the other two. Was that discussed? Did you know, that?

MR. CANNOLES: I don't recall.

MS. HYDE: Let's talk for a couple minutes about the changes. Your new position, explain or maybe the position that you were given immediately after 9/11, Director of Emergency--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: Operations and communications. In November of 2001, Monte Belger called Frank Hatfield down here, here's Frank, again.

MS. HYDE: Frank's all over the place.

MR. CANNOLES: Yeah.

MS. HYDE: I don't know how we've missed Frank.

MR. KARA: We know how we missed him.

MR. CANNOLES: Yeah, but you're going to have to go to Baghdad to find him for the next month. You don't need to talk to him, don't worry about it.

MS. HYDE: Okay.

MR. CANNOLES: He brought Frank down and he said, hey look, you know, we could have done a lot better things in the way of communications, you know. Frank, take a look at it and see what you think. Frank's a respected division manager. He's got a fresh field perspective. So, Frank got in touch with me for a lot of it, because he knows I have experience with it. So, anyway, when he got

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

through with the work group. Monte asked me--he asked Frank and Frank said, no. He asked me if I'd head up a new Emergency Operations and Communications Group. And the idea was to modernize what the Command Center had in the way of capabilities--

MS. HYDE: Mm-hmm.

MR. CANNOLES: --personnel, you know, a number of other things. So, this telecon that I started on September 11 became a living thing. We have never hung up the phone. And one of the early things we did with that as that day progressed was bring the military, NORAD, NEDS, SEDS, a host of other people into it.

So, the first think I did was institutionalize that telephone conference, which is still going on in the next room, as the Domestic Events Network.

And that way, today, we assure that, lest there be any confusion, or late reports to anybody, that right now, as we speak, if there's a lost communications with somebody in the system, it's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

reported here and NORAD gets it the same time we get it.

MS. HYDE: Mm-hmm.

MR. CANNOLES: We also put in some other improvements. For example, we record that now so that, God forbid, there's ever another tragedy like this we can reconstruct it and find out precisely what happened.

MS. HYDE: Mm-hmm.

MR. CANNOLES: And, in addition to that, upgraded the equipment infrastructure; hired some people; brought on some supervisory people with a broader knowledge base, perhaps than those that we had at that time. And we've also brought in a liaison from TSA that sits beside us and they're in the operation 24 hours a day so we can coordinate activities.

MS. HYDE: So, where you definitely involved in working with NORAD to figure out--

MR. CANNOLES: Nope.

MS. HYDE: --you still didn't--you worked for the FAA side of how to talk to NORAD?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. CANNOLES: Right.

MS. HYDE: Were you in the group that was out there introducing yourselves and finally sort of understanding NORAD's operations?

MR. CANNOLES: No, that was Jeff Griffith, primarily and, later Linda Schuessler.

MS. HYDE: That's all. So, if you had to name the changes to post-9/11, there are physical changes to the WOC; we've heard about the staffing of the WOC; which included supervisors, plus the PSA person, since PSA was set up; and then there's the BEN. What else is missing?

MR. CANNOLES: Those are the biggies. The BEN's probably the single largest enhancement, I think, we've made to monitoring the nation's airspace. And that may or may not have been described to you. But that consistently has somewhere between 40 and 50 participants between our facilities, law enforcement, various military entities. We tried, based on what we learned from 9/11 to make sure that all the players are plugged in all the time, so there's never any doubt who has

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what when.

MS. HYDE: [unintell.] in the field and talked to [unintell.] about it.

MR. KARA: Everyone speaks highly of its usefulness.

MR. CANNOLES: Good.

MR. AZZARELLO: The other two, do you have those other more minor changes?

MS. HYDE: Which ones?

MR. CANNOLES: Equipment upgrades.

MS. HYDE: The equipment and the physical changes to the WOC and the ability in staffing.

MR. CANNOLES: TSA liaisons.

MS. HYDE: What about NORAD liaisons? Cheryl Atkins, you know, 10 of her or something?

MR. CANNOLES: Air Traffic handles that. When I took over the Emergency Operations, I left the Air Traffic family. So, Air Traffic still continues to do that on their own because of security requirements. So, as the host of the BEN, for example, you know, I know that NORAD's a party to it, but Air Traffic determines who in NORAD that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

should be, through their coordination and liaison with the military.

MS. HYDE: I see. The people, post-9/11 working with NORAD are the Air Traffic side, you're doing upgrades here that would facilitate communications with NORAD. And I assume there's a bunch of facilities people that are joining with NORAD on the radar issues?

MR. CANNOLES: Yes, yes.

MS. HYDE: Do you know who those people were?

MR. CANNOLES: A guy named Greg somebody who went back to the Great Lakes Region, started the effort. I can't think of his last name at the moment. I don't know who is currently doing it, but there was a massive effort right after 9/11 to provide FAA radar and radio capabilities in the NORAD. And I got a couple of early-on briefings that the project was underway. I don't know what the--I know they had some successes, but I don't know what the status of it is.

MS. HYDE: And the position that you're

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

taking soon, is that also a coordination--

MR. CANNOLES: No, this is brand-new, this is a brand-new one that the Secretary of Transportation announced today. It's the Director of Air Traffic Safety Oversight.

MS. HYDE: What would be the responsibilities of that position?

MR. CANNOLES: I will be regulating Air Traffic from a safety standpoint. I will be to Air Traffic as Flight Standards is to the air carriers.

MS. HYDE: I see.

MR. AZZARELLO: This is a new position that was created?

MR. CANNOLES: Yes.

MR. AZZARELLO: When was it created?

MR. CANNOLES: We started talking about doing this about five years ago and I actually participated in a study to build the concept and it mimics what many of the European countries have done as far as safety oversight in air traffic. And it also complies with some international requirements that were levied on us that we're

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

trying to stand up for.

MS. HYDE: Safety from the perspective though more of the sort of day-to-day safety with airspace management issues or emergency crises? It's more the former, yes?

MR. CANNOLES: More the former, yeah.

MR. AZZARELLO: Would it be day-to-day stuff?

MR. CANNOLES: The regulator.

MS. HYDE: The regulator.

MR. CANNOLES: So if they want to change a procedure that could adversely affect safety, they've got to get my buy-in to it, that sort of thing.

MS. HYDE: Okay. Well, in terms of looking back on the day, now, do you have anymore thoughts that you think would be important for us to understand, or to know. Also, do you have any recommendations?

MR. CANNOLES: I think you've seen evidence of the recommendations I would provide and that's basically in our ability to communicate m

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

ore rapidly with NORAD and others.

MS. HYDE: Mm-hmm.

MR. CANNOLES: In retrospect, I don't think anybody anticipated a threat that looked like this one, and I wish we had.

MR. AZZARELLO: Do you think that that line solves as to the best it could be solved, the need to or meets the need to communicate rapidly with NORAD and others at a player's insistence?

MR. CANNOLES: Absolutely.

MS. HYDE: Before 9/11 and since you've held so many Air Traffic positions in the field in here, were there exercises between you and NORAD to avoid doing a hijacking or a crisis of this type?

MR. CANNOLES: You know, I'm not sure about the hijacking stuff, I'm sure there was. But we did exercises but it was more along the lines of national defense stuff. And, again, I was never on the security side of the house, so I can't say for sure whether or not they did things with hijackings. I'm sure somebody did, but I'm just

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

wasn't--

MS. HYDE: But even in Air Traffic Control, there are some folks out in the field remember I did do this exercise, but it was almost always of a tabletop flavor, that they weren't real people real participants.

MR. CANNOLES: We did, I can remember operational exercises where, you know, we're going to scramble these airplanes; we're going to do this; we're going to do that and, you know, we'd play those games with them. And they weren't tabletop. For the most part they were very real exercises. But I can't remember anything ever specific to a hijacking.

MS. HYDE: So what would be the emergency crisis that we'd scramble aircraft, like, what would be a scenario that would include--

MR. CANNOLES: The way I grew up with NORAD was NORAD was to defend our shores. So, as a controller down in Norfolk, Virginia, for years, you know, I'm familiar with, you know, unknown airplanes being picked up and the Air Defense

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Identification Zone and NORAD scrambling and us participating, and so on and so forth.

MS. HYDE: Okay.

MR. AZZARELLO: I just want to go back, briefly, Dave to two areas on the day of. On 93, after it crashed, was there any report then, according to you, given your position in aircraft or aviation accidents and instances was there specific reports floating in to you once it was confirmed on the ground that there was a crash in Pennsylvania? Did you receive that type of information that confirmed there was an aircraft down there?

MR. CANNOLES: I remember that coming across the telecon and it was a report from another--it was confirmation from another aircraft that was in the vicinity and saw the airplane crash.

MR. AZZARELLO: Now, second, and lastly, back to 77. I want to know if you were aware of: At the same, I guess, overlapping the time when it was considered that it might have gone--the plane

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

might have crashed somewhere on the Ohio/Kentucky border, there were still discussions and efforts from Command Center of the time located. With the information being--lost, we don't know where it is and are unable to locate it. It was completely off radar and they were saying they were trying to find it. And they were reaching out to the various centers, even going back to Dulles, saying, hey, is it on the ground there? Is there any chance it didn't take off? Were you keeping--were you being kept abreast of that effort? Were you aware it was even going on on the Command Center side through other FAA facilities?

MR. CANNOLES: Not directly, no.

MR. AZZARELLO: Were you independently making efforts, though, to see if it was still out there as opposed to just assuming that it had crashed?

MR. CANNOLES: We were making efforts and I can't tell you with certainty if they were independent because the Command Center might have been operating off what we were asking them. So,

MILLER REPORTING CO., INC
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it could have been one and the same.

MR. AZZARELLO: Okay. You say you would consider it as a possibility, but you didn't conclude that it had crashed without some more definitive evidence?

MR. CANNOLES: Right.

MR. KARA: Based on the package that was just given to us during the course of this interview, it appears to [unintell.] the MITRE Corporation conducted a series of interview with key personnel. Were you interviewed by MITRE for this study?

MR. CANNOLES: I don't remember.

MR. KARA: And they have an appendix which refers specifically to the Operation you set up and that they used the formalized term Air Traffic Situation Room, is that there terminology or was that the terminology that was developed for what you established?

MR. CANNOLES: That came, yeah, that the Air Traffic Situation Room [Technical interruption.] --on this corner of the building

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

for a while and then, before the Domestic Events Network it was known as a Sit Room.

MR. KARA: And you don't remember being interviewed. Do you remember if any of your people were interviewed for this and if those interviews were taped?

MR. CANNOLES: I don't remember being interviewed personally. I don't know if anybody in AT-20 was. And if they were and if they were taped, I'd be very surprised.

MR. KARA: Okay.

MS. HYDE: Well, in terms of producing this report, not that we've had more than 30 seconds to look at it, but--

MR. CANNOLES: Please don't tell me there's a chapter with my name on it.

MS. HYDE: I'm sure there will be.

MR. KARA: No but there's an appendix that describes what you just talked to us about.

MS. HYDE: What I'm struck by is your office, or your staff. I would think would have fed them some of this information unless they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

totally created the wheel with that and started from ground zero. I would think that your office with have worked sort of close with these guys in doing this.

MR. CANNOLES: Well, remember, I left that office two months after September 11.

MS. HYDE: Right. So, did you know of this effort?

MR. CANNOLES: You know, I think I heard about it, but not until James Whitlow came in here and presented it to you, did I recall, it was, I don't think it was anything I was involved in. And, one other clarification: This thing that started out very small with my staff, you know, like I said, they never hung the phone up, so this thing--my people eventually went back to investigative work.

MS. HYDE: Right.

MR. CANNOLES: We only stayed till about midnight on the 11th and the next day we were briefing the Secretary and the FBI and we were doing what we typically did. And other people

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

moved in behind us. Because now came a need for, you know, granting waivers to emergency operators in the airspace; and coordinating foreign and international flights and doing this and doing that.

So, there was a migration. So, there were people who worked the Air Traffic Sit Room, which, again, I think is a generic discussion of the BEN and they could have worked with them, I don't know.

MS. HYDE: Okay, actually, this is all a look-back effort, so it all goes to the job that you went back to doing September 12 as opposed to the job that you ended up doing on September 11.

MR. CANNOLES: Okay.

MS. HYDE: So, this all speaks to that side, just going back and recreating what the effort was. Do you know in the two months before you left that office was anybody on your staff working with these people to put this together?

MR. CANNOLES: Not that I'm aware of.

MR. AZZARELLO: After the after-the-fact review in an attempt to [unintell.] earlier when

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you referred to this, it was a bit of a hot topic [unintell.] especially between the military and the FAA, do you recall there being exchanges or being present at any meetings or conferences where there was a NORAD representative present to discuss the issue of notification of the planes?

MR. CANNOLES: No.

MR. AZZARELLO: How about your staff, did they at any time tell you, well, we think that we notified NORAD at x:time, but someone from NORAD's telling us otherwise? Anything like that? I'm trying to get a sense for why?

MR. CANNOLES: Yeah, there were discussions like that and specifically I go back to the log that Jeff Griffith showed me or gave me.

MR. AZZARELLO: Mm-hmm.

MR. CANNOLES: I think, if I recall, that was classified and I think he showed me the document, but I think we did a comparison of times and we found some ambiguity between them.

MR. AZZARELLO: Do you remember that even being discussed between NORAD element and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

[unintell.]

MR. CANNOLES: I don't ever remember talking to anybody from NORAD about it. Dan Diggins or Tony Mello may have.

MR. AZZARELLO: Maybe you could help me out with what would be the source of your basing that statement that you know it was a topic of hot discussion?

MR. CANNOLES: Oh, I'm sorry, I was referring to, for example, I recall there being some debate in the media. Or perhaps, it was a question posed to the Administrator on the Hill. But I recalled there being a question, about you know, who did what to whom and, you know, did everybody do the right things?

MR. AZZARELLO: To the extent that you recall it being hotly debated, it would be external to the FAA and not being debated by the FAA either internally or with NORAD representatives?

MR. CANNOLES: I know we debated it with the NFA, I mean, because there was concern that, you know, did we do the right thing, and I think in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the final analysis we felt like, yeah, pretty much we had.

MR. AZZARELLO: You debated it, I'm sorry, with who?

MR. CANNOLES: Within the FAA.

MS. HYDE: I think we're good. I think we've got all afternoon.

MR. CANNOLES: I'm sorry, I didn't do it.

MR. KARA: I just looked, Appendix T is the Air Traffic Situation Room and Notes from 11 September, but it starts later in the day, it doesn't start with the morning of.

MR. : You have to forgive us, but somebody gave them.

MR. AZZARELLO: That concludes the interview, it's 3:40 p.m. with Dave Cannoles, thank you.

[END OF INTERVIEW.]

SWORN INTERVIEW OF

LYNNE OSMUS

BY

SPECIAL AGENT JOHN AZZARELLO

SPECIAL AGENT MILES KARA

SPECIAL AGENT JEFF BROWN

DAVID WIEGAND, FAA COUNSEL'S OFFICE

Tuesday, March 30, 2004

2:27 p.m.

[TRANSCRIPT PREPARED FROM A TAPE RECORDING.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I N T E R V I E W

MR. KARA: It's March 30th. We're at FAA headquarters about to begin an interview with Lynne Osmus. I'm Miles Kara, 9-11 Commission.

MR. BROWN: Jeff Brown, 9-11 Commission.

MR. WIEGAND: David Wiegand, FAA Counsel.

MS. OSMUS: Lynne Osmus, Assistant Administrator for Security.

MR. KARA: And we will be joined shortly by John Azzarello, 9-11 Commission. Lynne, we've had a chance to look over the interview that was conducted by Team 7, and we understand that you were late arriving that day.

MS. OSMUS: Yes, I was.

MR. KARA: Just to set some common ground if you could pick it up that morning as you're notified at home and just walk us through your getting here and where you go--

MS. OSMUS: Okay, sure. Claudio Manno called me at home. He was our director of our Office of Intelligence at the time. I was home getting over the flu and called me somewhere after

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

9 o'clock, give or take, maybe a little bit earlier than that, and left a phone message because I was actually downstairs in the basement where we don't have a phone, and he said just wanted to let you know there's an aircraft that perhaps has been hijacked. It's off course heading towards New York City. So I immediately hopped in the shower because I figured no matter what happened, I better get in there. My boss, head of the Security organization, was out of town that day, so that was another reason I wanted to get in.

By the time I got out of the shower, Claudio had left another message saying that aircraft that he had talked about before had evidently flown into the World Trade Center. So I tried to call him back and the circuits were busy. I was never able to get a line through. By the time I got into the car and heard Lee Giopino on the news, he was reporting two aircraft. And so I made my way into Washington. I live out in Gainesville about 40 miles due west of here.

You know, it was one of those surreal

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

things. Hardly any traffic on the road until I got inside the Beltway on 56, and then there were more unmarked, black police vehicles than I thought existed in northern Virginia, screaming past me every few seconds. I mean amazing, and I got into the Roosevelt Bridge and hit a long traffic crawl from the river and sat there for probably 30 or 40 minutes watching pedestrians walk out of town. This would have been--I'm sure I consulted my watch at the time, somewhere around 10:30-ish and I think maybe a little closer to--

MR. KARA: This is after the Pentagon has been hit then.

MS. OSMUS: I think at this time, right, all four aircraft had been involved, and, yes, after the Pentagon because I could see the smoke coming out of the Pentagon while I was sitting on the bridge. Probably took me, oh, I would guess, 45 minutes, maybe even an hour, to get from the bridge to this building just because the city was gridlocked. And then of course everybody was told to vacate, so I had a hard time getting in the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

garage because not many people were coming into the building, but anyway got that taken care of.

Came into my office which is on the third floor here as you know to check in with my immediate staff and find out what the status of my boss, who actually was in San Juan, to make sure he was trying to get transportation back, which he was. And then I came up to the 10th floor to the Operations Center, poked my head in to see Lee Longmeyer who was the director of Operations at the time. He was the executive in the Aviation Command Center, which we called it at the time, and then went into classified facility next door where Jane Garvey was seated along with Monty Belger and two or three other people, and for the life of me I can't tell you who they were because I just don't remember. But my initial conversations with Jane was to see what IOU's we had for her and kind of get the status of what was going on. And then went back out and talked to Lee a little bit. Went downstairs to try and figure out what we knew, what we didn't know, and, you know, to think it through

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a little bit to figure out what our next steps ought to be.

Part of what we did subsequently was, as you know, we had some staff sitting in the Aviation Command Center getting reports in. We had our principle Security inspectors up there that were in communication with United and American specifically--

MR. KARA: Let me actually stop you at that point and share with you a rather sophisticated schematic--

MS. OSMUS: Isn't it, though?

MR. KARA: Actually May Avery helped us put that together. And just to orient you, we believe this is where Lee was sitting in the ACC, and these were the nine positions or so--

MS. OSMUS: Right.

MR. KARA: --four in front of him. The WOC where May Avery and her people were over here. This is the mock. David Kenols was down here and what we now know is the Air Traffic situation. And of the two secure facilities you mentioned, one of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

them is this skip area over here, but then there was also this secure video teleconferencing system over here.

So let's drop back a second to you coming up from the third floor to the 10th floor. And you enter this complex and hit which direction?

MS. OSMUS: I would have come in through the walk--take that back. Something about today's setup.

MR. AZZARELLO: I'm John Azzarello. How are you?

MS. OSMUS: Nice to meet you, John.

MR. AZZARELLO: Nice to meet you.

MR. KARA: I got started already, John.

MR. AZZARELLO: That's fine.

MS. OSMUS: Right, the door was on this side, so I would've come in to see what was going on with Lee, and I don't remember if all these positions were filled. I kind of think perhaps not, but maybe they were. We had at least four or five folks there, including some of our principle Security inspectors and other staff that worked on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the external program area that knew aviation security.

Essentially on the phone with United and American and our field facilities and Boston and Dulles. Jeff taking report. They were just taking, running logs of anything that was being reported because it was so early in the game we just didn't know what had happened. We were trying to capture all the incoming information to be reported out by--

MR. KARA: Lee was supervising the operation.

MS. OSMUS: Yeah, I think Lee was in there when I first went in. Subsequently he also went into this room to give Jane and Monty updates on what we were hearing.

MR. KARA: Right. Let's just set that back for a moment if you could, Lynne, and who is with Tim? We understand this is sort of a raised dysam. Do you recall who was with him?

MS. OSMUS: No, I don't.

MR. KARA: Throw a couple of names at you.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: At some point in that day or next, I mean it's a fog to me in terms of chronology, Sam Labido was in there who was the manager of the principle Security inspectors for some time. Terry Reilly was in there at times. Mike Morse was in there at times. I can't tell you who was in there when I first went in there.

MR. KARA: How about Jeff Griffith and Doug Davis?

MS. OSMUS: I don't remember.

MR. KARA: You don't remember the two of them?

MS. OSMUS: No, I saw them around in the course of the day. I can't tell you who was in there when I first--I was actually fixated on Lee just to find out from him what he had in terms of--

MR. AZZARELLO: Does anyone--

MR. KARA: We're on the agency.

MR. AZZARELLO: Okay.

MR. KARA: Had you been here that morning--would you have been here instead of Lee?

MR. AZZARELLO: No, Lee would have been

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there. I would've been helping in that to assist him. I probably would have been over with Jane and Monty in the M Classified facility.

MR. KARA: And when you say Declassified facility, you're referring to the secure video teleconferencing system.

MS. OSMUS: Right.

MR. KARA: And that's the national level system.

MS. OSMUS: Right.

MR. KARA: So Jane was on with whoever. This is the other end. In addition, to this connection to the outside world, was the ACC also connected to the outside world? Was Lee connected to other agencies? You mentioned the two airlines.

MS. OSMUS: Gosh, let me think. I don't know. I don't know at that time if they had any net going or not.

MR. KARA: Are you aware that there were two different nets set up off this bridge, a primary net and a tactical net?

MS. OSMUS: I knew there had been earlier

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in the day. I know that from looking at the log entry.

MR. KARA: And could you help us out? What's the difference between a primary net and a tactical net?

MS. OSMUS: Primary net is a--there's a--let me back up a little bit. Operations Center has a book. Today they still have one. Back then they had one before we took--the responsibility went to TFA, and for all kinds of instance, there was an automatic list for people that would be put on a net. So in the event of a hijacking or some kind of aviation incident, there would be a primary net set up with FBI. If it involved international folks, Department of State. White House situation, --was on there, DOB was on there, and NMCC I think would be the DOB rep and was typically on there. You know, and some folks on in listen mode only. And that was the net that we or the official in charge would run from the FAA perspective. It was an FAA net.

MR. KARA: To connect to the rest of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

government.

MS. OSMUS: Right. So all the interested parties that either wanted to know or had some input into decision-making about a particular event had access all at once. Now in addition to that, one or more tactical nets could be set up based on what instant was being managed, and let me make up a different one just to give you an example.

We had a hijacking out of Frankfurt to the U.S. some years before this, mid-1990's.

MR. KARA: Lufthansa, '93.

MS. OSMUS: Lufthansa, that's exactly right. A primary net was set up as I described it to you, including State Department and those folks, and oh, the carriers to the ground there too. We had a couple different tactical nets set up. One was the FBI because we wanted to make sure we were giving them the right kind of support, at Dulles, where I think the aircraft was going in case they wanted to practice with a similar aircraft their hostage rescue technique. We had a tactical net set up with our field facility to make sure we were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

deploying folks. The kind of logistical support stuff that you don't need to clutter the national net with. So that's kind of conceptually how to do.

MR. KARA: Did you actually work the '93 hijack team?

MS. OSMUS: Yeah, I did. That was mine. It started out about 7 in the morning, finished by close of business at 5 that night.

MR. KARA: What role did you play on that team?

MS. OSMUS: I was this person. Then I was director of Operations, so I was the lead for the--

MR. KARA: You were actually in this position in February, March of 1993.

MS. OSMUS: Yes.

MR. KARA: I'm going to come back to that in a moment. But we understand that in addition to the tactical net that was set up here, the Air Traffic situation room set up, what, until a couple of days ago, we thought was the Kenols net, and it was strictly an Air Traffic situation that was run

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

down here next to Peacock's office.

MS. OSMUS: In the conference room, yeah.

MR. KARA: Were you aware that that net was set up?

MS. OSMUS: I'm aware of it now. I wasn't aware of it then. I knew Air Traffic had ongoing discussions with their field facilities, but I was kind of oblivious to where they were doing it and who was on it and that sort of thing.

MR. KARA: From a management perspective, our question of interest is with two tactical nets, one here and one here, who did the regions and the centers know who they're talking to, and where are they supposed to funnel the time sensitive information that Jane and Monty needed in here?

MS. OSMUS: Well, I'm not sure we ever had this set up like this before because it was such a different circumstance, but we had different populations on the net. I mean Lee would have had field facilities within the Security organization reporting up. I gather these were essentially Air Traffic controllers?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: This was straight Air Traffic. This was more of the security oriented net.

MS. OSMUS: Right, so for that period of time anyway, we had two channels and connection coming to Jane and Monty--

MR. KARA: Who was the deconflictor for them if there was a difference between who--

MS. OSMUS: I suspect Monty was probably the deconflictor.

MR. KARA: Monty was kind of the deconflictor.

MS. OSMUS: Yeah, yeah.

MR. KARA: And, John, Lynne actually got caught in traffic and didn't get here probably till well after the Pentagon and then in fact after all four incident aircraft had been resolved and then she gets here about 11 o'clock, give or take--

MS. OSMUS: Give or take.

MR. AZZARELLO: So it was definitely after reported aircraft crash in Pennsylvania.

MS. OSMUS: Right, right.

MR. AZZARELLO: Can we go back for a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

second to something Lynne mentioned?

MR. KARA: Sure.

MR. AZZARELLO: The primary net you said is sort of a pre-established list of people to contact. Is that actually synonymous with this list in the Crisis Management handbook? This sort of lays out I guess some responsibilities in the event of an air crisis, and there's a tab at the back. It's tab 4.2 I think it is and 4.3. One references attack and the other references a primary net.

MS. OSMUS: Yes, this looks like the one. I don't know whether this edition is the most recent. I just haven't looked at it in some time. But it's conceptually the same thing.

MR. AZZARELLO: I think that was the one that I marked on the front page where it says 9-11, etcetera, if you can read it. I think it's a little--

MS. OSMUS: 9-11-01.

MR. AZZARELLO: Okay.

MS. OSMUS: No, you have two on 9-11-01.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Oh, this page?

MR. AZZARELLO: --was the manager of that.
It would have been--

MS. OSMUS: Yeah.

MR. AZZARELLO: We were given a couple of different versions of it and one of these--I guess this one is dated October 23rd. It's not to my knowledge not my handwriting. We're trying to figure out who might have been put on there by an FAA rep as opposed to a Commission rep just to establish that as the one that came out--a draft that came out maybe after 9-11 with some revisions.

MS. OSMUS: I know there were some revisions going on. We're kind of in the midst of it. It's not because of 9-11 but, you know, updates are already in process. Maybe that's what it is. But, right, that's essentially the primary net members and the conflict of the tactical net.

MR. AZZARELLO: This is I guess part of a larger Crisis Management handbook, an FAA's headquarters handbook. Is that right?

MS. OSMUS: Yes. The Washington

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Operations has something like this where I think we have somewhere between two dozen and maybe 30 kinds of incidents that folks tried to plan ahead to think through if X, Y and Z happened, who'd need to be in communication, who'd be the lead on it, who'd want to know about it, and that sort of thing.

MR. AZZARELLO: In this particular chapter, it's titled Air Piracy, I guess that would cover some of the various protocol that would be triggered in the event of a hijack.

MS. OSMUS: Right.

MR. AZZARELLO: It's governed in part by this--protocols laid out here.

MS. OSMUS: Right.

MR. AZZARELLO: So the AVA--see if we have a correct understanding of it, the AVA 30 or the manager of the WOC, once they're instructed to initiate a primary net, would then default to a similar list like what's in that tab and then they would start bringing those people in--into the primary net. But as far as moderating the information coming over the primary net and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

deciphering its usefulness or credibility, that would be generally the job on 9-11 of Lee Longmeyer or whoever sat in the position--

MS. OSMUS: Right.

MR. AZZARELLO: --of hijack coordinator, is that right?

MS. OSMUS: I'm not sure what we called them. The executive in charge, whatever. I don't know if there's a title in this order or not, but the person in charge of the net.

MR. AZZARELLO: Maybe you can help us out then if you--

MR. KARA: I'll go--and she can look--yeah.

MR. AZZARELLO: What's the interaction or the interplay if you can tell us between this document which is an FAA order. Is that the 7610, the military--

MS. OSMUS: Yes.

MR. AZZARELLO: Yeah. And it lays out up front I guess purpose and an individual FAA that they call a hijack coordinator, and you can just

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

take a minute to review that and I might ask you a few questions.

(Interviewee reviews document.)

MS. OSMUS: You call them a hijack coordinator in this document. Decisions--help or other actions like that in the event of a hijacking would all be coordinated with a Lee Longmeyer type position, so this is an internal--that rings a bell with me, but for practical purposes, if Lee was the person in charge of the ACC, he would have coordinated responses to NMCC like this. And the reason that FAA had ever asked an NMCC for support--in fact we were asking Lou--if he needed it. Typically where you have an aircraft out of radar range and it's hijacked and you don't know because the pilot and co-pilot can't speak overtly with us, you can't tell where they're going necessarily when they're out of radar range. What the NMCC or their other assets could do is follow them and essentially give geographical identifiers to us. We knew that the aircraft was still heading to the U.S., but they'd taken a swing up north and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that sort of thing.

MR. AZZARELLO: And that was--, right?

MS. OSMUS: Yeah, and NMCC came on the line and asked us if we needed flight following for Lufthansa.

MR. AZZARELLO: And my understanding is that the Canadian Air Force that day passed off the coverage.

MS. OSMUS: They had a flotilla coming down off that aircraft because we had the flight following the aircraft--

MR. KARA: Was some protocol in existence from the Lufthansa case?

MS. OSMUS: I don't know whether this document was to be honest, but, right, the protocol was in existence, yeah.

MR. KARA: The formalized protocol of FAA notifying NMCC and then there are things that the military is supposed to do on its side actually resided in this position during Lufthansa and this was you, and Lee held this position, and let me back up one step. If General Canovan had been here

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that day, where would his position have been?

MS. OSMUS: Probably like what I said mine would have been. In and out of this to monitor the situation to see if they needed help.

MR. KARA: And with the presence of both of you, this still would have been Lee Longmeyer--

MS. OSMUS: Yeah, yeah.

MR. KARA: Okay.

MS. OSMUS: Yeah.

MR. AZZARELLO: Excuse me. Maybe you could help me out, Lynne, with the language of the document. It says the FAA hijack coordinator, and then in parentheses the director of the--what is--the director or designee of the FAA Office of Civil--what position on 9-11--who held the position of the director of FAA Office of Civil Aviation Security?

MS. OSMUS: Lee's position was director of the Office of Security Operations. This title I think is an old one when the director used to be the head of the Security organization. He was elevated to, I don't know, some 10 or 12 years ago

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I guess, to an associate administrator.

MR. KARA: In light of block chart E, is this the entity we're talking to about whatever the name?

MS. OSMUS: This is the one that was current on 9-11, where it's an associate administrator. This order I think is dated prior to becoming an associate administrator, it was a director position.

MR. AZZARELLO: So on 9-11, Lee was the director of ASC Operations and Op Center.

MS. OSMUS: Yes.

MR. AZZARELLO: And was there a director on the Intel side?

MS. OSMUS: Yes.

MR. AZZARELLO: Who was that on 9-11?

MS. OSMUS: Claudio Manno.

MR. AZZARELLO: Okay.

MR. KARA: So actually on this line of block chart, this would be--ACO would be Lee. ACI would have been Claudio, and then ACS would have been John Tennevan, and you would have been ACS2.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: Yes.

MR. AZZARELLO: Okay, now I understand where some of the ambiguity comes in. And so by saying the director of the FAA Office of Civil Aviation Security, if that phrase was used on 9-11, that doesn't clearly tell you whether or not you're talking about the director on the Op side or the intelligence side, right?

MS. OSMUS: This doesn't because the language is director or designee, so if you want to change it to the organizational thing that was current on 9-11, it would have been the associate administrator or designee, and the designee was Lee Longmeyer. We had the director of Operations undertake that responsibility for some time. I'm kind of surprised this wasn't updated actually.

MR. KARA: But he was aware that was his duty that day? Given that events hadn't happened, it was his job to fill--

MS. OSMUS: Yes.

MR. AZZARELLO: You were saying the pre--let see--we know on 9-11 there was an ACS1 and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

ACS2, Canovan and yourself. And then beneath those positions we have ACS Intel which was Claudio Manno, and ACS--

MS. OSMUS: Right, ACI is the Intel office.

MR. AZZARELLO: Okay, that's Claudio and this is--

MS. OSMUS: And that's Lee.

MR. AZZARELLO: That's Lee Longmeyer.

MS. OSMUS: Right, right.

MR. AZZARELLO: Okay, and then that was the sort of lineup so to speak on 9-11. And this was drafted you're saying before this was broken in?

MS. OSMUS: It must have been because this title appears to me to be a title that was in effect prior to the establishment of the associate administrator, which means--let's see. It was early '90's I think that change was made.

MR. AZZARELLO: Does that mean that when this was written, there was no ACS1 and 2, or was there no ACI and ACO?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: AS1 at the time was called director. Same designator, just called a director.

MR. AZZARELLO: Oh, ACS1 was the director at the time.

MS. OSMUS: Yeah.

MR. AZZARELLO: Okay.

MS. OSMUS: Yeah.

MR. KARA: And actually you were ACS2 on 9-11. During Lufthansa which--

MS. OSMUS: ACO1.

MR. KARA: You were down--

MS. OSMUS: Director of Operations.

MR. KARA: You were it. You had Lee Longmeyer's job.

MS. OSMUS: Yeah, yeah.

MR. AZZARELLO: Okay, so when this was written, this would have really referred to--this would have been ACS1, or his or her designee.

MS. OSMUS: Exactly.

MR. AZZARELLO: Okay, so it would have been the associate administrator for the Higher Civil Aviation Security Division.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: Yes.

MR. AZZARELLO: Or whoever they wanted to designate to be the hijack coordinator.

MS. OSMUS: Right.

MR. KARA: You said that designation was to Lee Longmeyer. Was that a formal designation in writing or was that verbal?

MS. OSMUS: Well, it was certainly practice and had been for years since we went into this organizational setup.

MR. KARA: At least since spring of '92.

MS. OSMUS: Yeah, yeah. I would think then the position description for Lee for AC01 would indicate the lead on crisis management I would guess, you know. You'd have to look and see. It was clearly understood throughout the organization though that AC01 was the lead on that.

MR. AZZARELLO: AC01.

MS. OSUMS: Yeah.

MR. AZZARELLO: Okay. Now it's very much clear.

MR. KARA: You cannot believe how

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

confusing this is.

MS. SCHUESSLER: Yes, I can.

MR. AZZARELLO: When I first looked at this, the way I interpreted it, Lynne, was I thought in reading this and then having this chart beside me, I saw that on paper they were saying that the ACS1 position, or General Canovan would have on paper, either he would be responsible for being the coordinator or his designate.

MS. OSMUS: I see.

MR. AZZARELLO: And then I thought it would just go down the line. If you were around as ACS2, it would fall to whoever the senior Security person, and then just on down the line. I didn't realize that this sort of was trail somewhat, that it wasn't modified to reflect the sort of new division of hierarchy here at the ACS.

So you're saying if you walked or run to ask upper management on 9-11, or pre-9-11, in the event of a hijacking and there needs to be coordination with NMCC, what position fills that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

You're saying you're understanding at least it was pretty widely known it would ACO1 to fill that position.

MS. OSMUS: Right.

MR. AZZARELLO: And let's say Lee Longmeyer weren't around on 9-11, would that just fall to the most senior ACO person?

MS. OSMUS: Yes.

MR. AZZARELLO: Okay.

MR. KARA: So Lee was here that day and he filled the job he was supposed to fill.

MS. OSMUS: Yeah, yeah.

MR. KARA: Now, Lynne, let me ask you the more global question. The procedures are well established here, and they're well established on the NMCC side and the DOD side. The FAA will make the request. NMCC will query NORAD as to whether there are assets available. The approval will go to the--and then things will happen. That's not the way it happened on 9-11 because the fields had simply went straight. Did that help or hinder the fact that the field took matters in their own hands

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and called the military direct as opposed to exercising the protocol as we see it here?

MS. OSMUS: Well, I don't think this protocol really had application on 9-11, meaning it certainly wasn't the traditional hijacking where you knew you had an aircraft that started from this position and was going some place, and you had some time, even if it was just a short period of time to work it. The whole concept of the hijacking protocol and the way they were negotiated in all of the thing becomes strategy in all of that stuff that you all are aware of is predicated on a hijacking that took some period of time. This was a series of events happening so fast, even calling them hijackings the way we used to define hijackings is really a misnomer.

So this escort of hijacked aircraft I don't think was an issue that entered Lee's mind. They were just trying to figure out what the heck was going on out there. And they really weren't from Lee's office managing the action. It was simply reporting what was coming in because there

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was so much confusion. We couldn't define what action there was to be managed, you know.

MR. AZZARELLO: And I understand what you're saying what might have been crafted obviously with a view toward the events that evolved on 9-11, but what we're I guess trying to figure out now is as we read the protocol that was in existence to the extent that one could default any protocol for the military assistance, which obviously was enlisted that day at some point, from reading this document here, the Escort of Hijacked Aircraft, it lays out a procedure where the hijack coordinator reaches the highest level of the NMCC for military, let them know what sector a hijack was reported from, and then when the NMCC gives its blessings, so to speak, or authorizes direct coordination between the FAA and field facility, the responding military of--then they can coordinate FAA's tracking of the primary target and relay any information to the military so they can try and tail it. And we've gone through I guess the other protocol about tailing it from behind,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

not being within sight, and being covert about it.

And what we've seen is that on 9-11, even as the multiple events unfolded, as Miles said at some field level, Boston Center went directly to Neads at some point and also reported up their chain of command, but told Neads about the aircraft and the information they had so that they could take, you know, whatever action they were authorized. And I guess what we're trying to figure out is even though that might not have been--obviously the--short-circuited this--takes a long time to go up to the top of the FAA headquarters chain at NMCC and then say, okay, well, now the people at the operational level who really need to converse with one another can now start passing the vital information back and forth to take operational action at this level.

If you had to say that that was going on somewhere, even if it wasn't following this protocol to the T or maybe it was way off the protocol, but what location and people would you point to on the 10th floor on 9-11 when you got

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

here that you observed or learned afterwards, as the people and the location where that was being done, that being there was some attempt to pass the knowledge as to each of the four hijacked aircraft from the FAA headquarters level when they got it to make sure that the military had it at some level so that they could coordinate the operations at the operational level?

MS. OSMUS: I don't know. I just don't have any first-hand knowledge of where that was going on.

MR. AZZARELLO: Did you learn in the aftermath or in the aftermath of the attacks when there was after-action reviews, there were summaries put together. You know, one summary we've seen is the summary of Air Traffic events that AAT20 put together. Was there any discussion on an upper management level as to how that worked that day in terms of that being--how did we as an FAA entity, as the FAA, was doing at passing institutional knowledge that we had about each of the four hijacked aircrafts, whether that was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

passed directly from the centers or whether it was information that they passed up to headquarters. Let's see what happened when--did it all get over to the military in a timely fashion, and if so, great, if not, why not? Was that done after the fact?

MS. OSMUS: I know there were a lot of discussions with Air Traffic and Monty and others kind of looked at how that all transpired. To be very honest, I was up to eyeballs in trying to figure out security counter measures and what this new threat was, and I was just not involved in that discussion. I know they happened after the fact because I talked to Shirley Miller and kind of tracking the discussions and the reports that have been provided to you folks. But they weren't meetings that I was in.

MR. KARA: Was Lee Longmeyer because of the position he held that day been a part of that process?

MS. OSMUS: No. The folks in the three organization were just--I mean staffing the ACC

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

permanently, getting counter measures out, deploying our folks--to make sure they were being implemented the right kind of way, and then also started working to figure out how the common strategy needed to be adjusted, and there was some staff level work with Air Traffic to take their adjusted procedures after this scrub that was done to incorporate them and how future events were managed, but these were just discussions we just weren't in because we were focused on other issues.

MR. KARA: And as ACS2 when you showed up that day and Lee was in position and doing what he was supposed to do, there was no management step you had to take or direction you had to give.

MS. OSMUS: No.

MR. KARA: And so you positioned yourself really to help the administrator and the deputy administrator in what they were doing.

MS. OSMUS: And tried to get folks organized on the third floor because we recognized we were in this 24/7 for a while. So trying, you know, to get the organization set up to see what we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were--

MR. KARA: I'm glad you mentioned that because when I looked back over your--

MS. OSMUS: Is that where you're going for?

MR. KARA: Well, it's a sidebar we need to look at because when you were interviewed by John Raidt and Bill Johnstone, you had described three centers of activity at FAA headquarters, the Aviation Crisis Center that we talked about. And then the other two entities were on the third floor, and I gather at that point, you had not recalled or perhaps weren't that well aware that ATC had its own tactical net down here. So I could--

MR. WIEGAND: Excuse me, Miles, when you refer to tactical net, and the order that you're referring to, are you using such a term of--to find in FAA handbooks or as in layman's terms?

MR. KARA: Let me change it. The tactical net is as we described it and it's up here. This was the Air Traffic situation or a net. And I'll

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

refer to it hereinafter as the Kenols' net.

MR. BROWN: Or Kenols' console.

MR. KARA: Yeah, to distinguish and that's a good point, but we could add then to John Raidt's interview that the fourth level of activity, but you focused primarily on the three you knew about.

MS. OSMUS: The one that I was working, right.

MR. KARA: Right. And the other two down on the third floor, they was an ACS working room.

MS. OSMUS: ACS is the Security organization.

MR. KARA: Security organization, and that was your own?

MS. OSMUS: Yeah, is this the Security director, what became the Security director room?

MR. KARA: And then there was an ACI watch office, so that would have been Claudio.

MS. OSMUS: That's right.

MR. KARA: And did either of those two entities also--

MR. WIEGAND: You working with a Chuck--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: Right, right.

MR. KARA: Would any of these two entities down on the third floor have their own telecon that day?

MS. OSMUS: No, let me talk to you a little bit about what those were. The ACI watch, the watch in Claudio's shop and the Intelligence office is one that pre-existed before 9-11, been around for years and years. 24/7 operation where they had their--work in there, getting incoming Intel stuff and these folks would be available to reach out to us at off-hours if there was some breaking intelligence that caused new counter measures to be developed and issue a warning to be sent out to the carriers whatever. They have secure communications with other folks in the administration, and they had some communications that day because I've seen log entries. They keep log entries of all calls that connect, so they've got excellent tracking, and I imagine you guys have looked at that sort of thing. There were some calls from a system called Annoy 1, at least that's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what we call it, which is sort of a red line instant, sort of a telecon, I guess you could call it. Multiple parties are hooked into a line. When somebody within the intelligence community were to get information out of--

MR. KARA: On that point, on Annoy 1 line, that rang downstairs on the third floor.

MS. OSMUS: Yes, and there may have also been a line here, but I'm not sure whether we had people in that skip the whole time.

MR. KARA: The skip would have been manned by Claudio's people up here.

MS. OSMUS: Yeah, that's right.

MR. KARA: And then it's conceivable the Annoy line call which is originated by CIA could have come in up here.

MS. OSMUS: Well, I know for sure we had it on the third floor.

MR. KARA: But you had it on the third floor?

MS. OSMUS: So I know there were some intermittent discussions using Annoy 1. It wasn't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

like a standing telecon type thing. The other room on the third floor which Chuck Berk wound up being in charge of was simply a room about maybe a third of the size of this one, down the hall from our Security front office, that we used for different things over the years. In this case we put about six or seven Aviation Security specialists in there with computers, and their first tasking, just because we were trying to get organized, was bring down the logs and the other notes that were being taken by our folks here to start putting them together into briefing documents.

MR. KARA: So that was sort of later in the day actually.

MS. OSMUS: That's right.

MR. KARA: As opposed to the--the point would be that Crisis Management stayed up here and the activities down on the third floor were--

MS. OSMUS: Where staff support could pull together the results of that, right, exactly.

MR. KARA: So we didn't have a separate entity down there--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: That's right. No telecon, no communication with the field, nothing like that.

MR. KARA: Okay.

MR. WIEGAND: That was down on the third--

MR. KARA: That's the third floor, yeah.

MS. OSMUS: Right. And then some days after 9-11, I want to say, Chuck will know the date because it's burned into his memory, five or six days, something like that, we established that room as the focal point for a Security directed working group. Chuck was asked to be in charge if it came in from the group that he had been working which deployed the EDF equipment. And we had again six to eight specialists in there that their full job was to develop the Security directive, get daily input from the field and from the carriers about what was working, what wasn't clear, what needed adjustments, and the Security directors that were out there, and pumping them out with revisions on a daily basis.

MR. KARA: Let's come back now to the 10th floor and the interface between Lee and the SPTS,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

which is sort of where you got in sort of the middle of that. What were the questions that were being asked and answered by that point and time that you got there to the national level?

MS. OSMUS: When I went in there, and there was a connection. You could tell that there's pictures on the wall as you can see the TV shots of other entities. I don't--

MR. AZZARELLO: This is in the civics?

MS. OSMUS: Yeah. I don't remember any--Jane was sitting like this on the phone and facing the door when I came in. Monty was over here. So they were not actively involved in the communication at the time. And the other folks asked me if I could remember if anybody was on or talking about anything, and I don't. I think we would have been paying attention even if it wasn't directly questioning the FAA about something, which is why I suspect I was in there at the time in between discussions that they have a line active so that if anybody needed anything, they could immediately come on. So I don't remember hearing

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

anything from the national level.

MR. KARA: Do you recall if the shoot-down authority had been discussed at that time, or were there ongoing discussions about that authority?

MS. OSMUS: I don't remember hearing anything about the shoot-down authority then.

MR. KARA: Okay.

MS. OSMUS: And I can't tell you when I first heard that was even an issue.

MR. KARA: Not even that day perhaps?

MS. OSMUS: It may not have been. There was confusion about--I mean there was confusion for a while about what aircraft it was that went into the Pentagon and what happened to the one that went down that crashed, and, you know, questions about whether that was DOD action, and that's when I think when I first started even hearing the issue, the shoot-down authority. Honestly I can't tell you if it was in the press or in this building. Again we were just so focused on the external Security counter measure piece that, you know, and I wasn't watching a lot of TV. I didn't want to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

see that. We just had to keep focused on doing the job we were doing.

MR. AZZARELLO: Was that part of when you say questions about whether or not DOD action caused the fourth to come down in Pennsylvania--not that the DOD caused it to come down. Do you remember hearing questions of that nature would you say on the civics or elsewhere?

MS. OSMUS: No, it was on the civics. Literally it was on WTOP coming in in the morning. That was my only outside source of data at that point.

MR. AZZARELLO: Through the media. CNN. That's how most people saw the second crash.

MS. OSMUS: I know.

MR. AZZARELLO: Can I just go back to the tactical net for a second, just to clarify. You said, I think that Lufthansa--well, you said this tactical one. I want to clarify that. So in the Lufthansa, you said there was more than one tactical that was going on, right. You were in conference with the FBI and maybe you wouldn't want

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

them in the loop at all and the other FAA facilities. Well, do you know if there are more than one tactical net to become along after 9-11 or any point after that morning, that there was more than one tactical net going on that morning within the FAA?

MS. OSMUS: I've only heard of one, but I haven't asked that question directly, so I don't have any personal knowledge of it. In the Lufthansa, when we had some kind of short-lived tactical net set up and served it's purpose and then went away, you know, so it kind of just depends on the nature of the circumstance and what other information needs to be discussed. I'm not aware of another one. I'm aware of one tactical net that was set up, but again I haven't, you know, looked into that one way or the other.

MR. AZZARELLO: Okay, and we understand that that would be something where they would call in for the Operations Center here and just give a code to get on that phone--it's not something that they have to hook up through the Washington

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Operations Center, but it's a pre-established code if you need to get on the tactical net with headquarters. They just call in and they get bridged through and it connects the various FAA facilities, so it could be--

MS. OSMUS: I think that's right, but if May told you that, it's right.

MR. KARA: From your perspective, the various centers of activity that we talked about and the position you held up in this particular area, what was the role of the Command Center out at Herndon and the information that was gathered that day? How was that getting into the mix up here at headquarters?

MS. OSMUS: I didn't have any involvement with information from Herndon. I shouldn't put it that way, but when I was talking to Monty and Jane, and I was finding out from them what was going on, I'm sure their status reports came in part from Herndon. So I did kind of get it indirectly.

MR. KARA: Straight to them or through Lee, or how would they get this?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: I gather it was through Lee. I would suspect that it was here, but I'm sort of making that up because I haven't asked that question.

MR. KARA: Okay. The two possibilities were through Lee up here and through Dave Kenols then?

MS. OSMUS: Yes.

MR. KARA: Now on '93, for Lufthansa, the Command Center at Herndon didn't exist, right, because it wasn't in existence in '93?

MS. OSMUS: I don't think it was yet. The use of the small version--building, and in the old traditional hijacking, some of the seats would be sold by Air Traffic people to be on-line to whatever facilities they needed to monitor to kind of pull them--

MR. KARA: Was there any Air Traffic people in these seats on 9-11?

MS. OSMUS: I don't remember. I know there was darn near a full room, but I can't tell you who all was in there.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: But your observation would have been that that was Lee on the Security side more than the Air Traffic side.

MS. OSMUS: There may have been Air Traffic folks in there because we typically--I mean they knew routinely. Hijackings they would come, so would Public Affairs. So would other, so it's possible that they were there. Again, I'm just focused on Lee and I'm kind of oblivious to who the others were.

MR. AZZARELLO: I probably should direct this question to Lee--by all means tell me, but I'm going to take a stab here. Your ability to help me already in understanding these documents.

MR. KARA: Plus you had the last hijacking in '93.

MR. AZZARELLO: The Crisis handbook for Air Piracy on the primary net says that it's established immediately upon activation of the ACC, which is the Region Crisis Center. Then it says that the net--what we mean operational, that this is established by the net manager, the primary net

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

manager I guess. Would that be, if you know, was the manager of this primary net and the moderator of that be one and the same in the person of Lee Longmeyer?

MS. OSMUS: Yes, it'd be Lee, yes.

MR. AZZARELLO: Okay. And the tactical net, it says the CAS Crisis Management team, that their manager has the--is the person I guess who activate the tact net if necessary. Would that be, if you know, is that also--the tact net is that moderated or managed by someone other than in Lee's position?

MS. OSMUS: Usually it's moderated by somebody else with Lee's knowledge because it's hard to be on two nets at the same time. So typically, and you need to confirm this with him because I'm just sort of giving you the sort of history of how this usually worked, typically he would rely on one of the senior folks with expertise in a certain area to talk with the FBI, as an example, through somebody that knew airport layouts and the FBI would want to deal with. He'd

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

have them be the lead, and the reason his desk was with an elevated level is that it allowed him to kind of monitor the discussions that are going on around the others, and they'd be reporting back to him on what was going on in the tactical net.

MR. AZZARELLO: So although the tactical net is generally something for a net for internal communications for FAA entities, my guess the discretion lies for someone moderating it to allow outside parties to--if they think that it's necessary for them--

MS. OSMUS: If relevant, exactly.

MR. AZZARELLO: --to get information, to get proper clearance security.

MS. OSMUS: Right, right.

MR. AZZARELLO: Okay. Tapping on your involvement in the Lufthansa hijacking event, the primary net listed one of the potential participants being ACC. And then also with the FAA regions involved and likely to be involved and the Air Traffic control facilities, and we want to see if we understand this correctly if we're

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

misinterpreting it. It seems like to us from reading the cold document is that having those parties on the line in response to an air piracy event allows the communication flow between--if we're reading into this--would be not just any air control facility but those affected in tracking the aircraft to be able to share that information with you and NMCC. Was that your understanding of what went on in the Lufthansa event? Was there a primary net set up so that--did you have the facility that I guess would have picked up the Lufthansa aircraft as it approached U.S. air space, and were they on the line at that Air Traffic facility with the NMCC representative?

MS. OSMUS: We had the Air Traffic facilities--on the East Coast because we're coming down the corridor from, you know, Maine down past New York and here at--not a good time of the day to come down. So it was heavy traffic time.

MR. AZZARELLO: And you didn't know obviously what part of the East Coast was going to be--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: Well, it was following a designed route. I mean they were coming into Dulles and that's where they wanted to come. The thing that I was just going to clarify a little bit is the purpose of having everybody on the line is--is to inform the FAA manager, and NMCC is one of the resources that can be used by FAA if needed.

MR. AZZARELLO: It's to inform--who is to inform you say?

MS. OSMUS: It's to inform Lee Longmeyer in this model and me in the Lufthansa model because that person is the decision-maker in that particular event.

MR. AZZARELLO: Okay, so they monitoring it, getting all the up-to-date field information to the primary manager.

MS. OSMUS: Exactly.

MR. AZZARELLO: And then you're the link to that NMCC if they're on the list there.

MS. OSMUS: Exactly, exactly.

MR. KARAS: Let me just take that one step further because over on the other side of the fence

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the military has established a thing called air--conference call where they're looking to FAA to be the inputer for precisely the same region to keep the Secretary of Defense informed and commander-in-chief NORAD. Did you recall the air--conference call being up that day, and who in the 10th floor would have been participating in that?

MR. AZZARELLO: Which day?

MR. KARA: 9-11, I'm sorry.

MS. OSMUS: I actually didn't know of that thing until you just said it, so, no, I wasn't aware of that on 9-11. Honestly the whole issue about NORAD and Air Traffic communications was not something I focused on at all until more recently knowing of the interest of the Commission.

MR. KARA: Okay. We haven't talked to Lee Longmeyer yet, but John Raidt and Bill Johnstone did and he, Lee, recalled that most of his dealings with senior officials on 9-11 were with Belger and Lynne Osmus, that you became sort of a right-hand person, if you will, or not a right-hand person,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

but between him and Monty and Jane. Were there any major issues that morning that we haven't talked about that you can recall?

MS. OSMUS: No, not really. I think the reason that day is such a blur to me is that there was so many unknowns. We were just, you know, reviewing and reviewing every information that came in to try to figure out what the heck had happened and what we were going to do next to start Air Traffic operating again because we knew it couldn't until we knew enough about the problems to put fixes in place.

MR. KARA: What did we learn? What are we doing better and what do we still need to do better?

MS. OSMUS: Today?

MR. KARA: Yes.

MS. OSMUS: I think the key to me in all of this is getting the right intelligence because we have--I mentioned in the other interview--intelligence community knows enough about what's going on as we did during--specific

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

threat. The government responds and the industry responds, and that was--and we heard it on WTOP again just this morning that there were confirmations from some of the detainees that there were more attacks planned on or about 9-11 and other places a few days after, but when air service started again, the security was too tight. So I mean the counter measures have worked in the past, but you have to know what you're protecting against.

MR. AZZARELLO: There was actually an incident that was noted and it's actually even in Dave Kenols' and the Air Traffic suites, they kept a log of what they considered I guess some relevant and significant events. And one of the entries was an event referenced in JFK Airport that after--I think after the first four attacks were completed, that there were some men who were unwilling to disembark from an aircraft, I think it was a TWA aircraft in the JFK Airport.

MS. OSMUS: The ones that were just put on the ground?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Yeah. They were not allowed to take off in light of the events in New York. They were grounded with the New York ground-stop, and there were three men they believe of Middle Eastern descendant who were at JFK on a TWA aircraft who when refused to get off at--and it was reported through ACS and Security. And we have some people looking at it. I don't know what they found on field level out in New York in terms of their listening to NYPD to go figure out what it was about. But do you ever remember having discussed in the aftermath of 9-11 whether or not that was potentially another attack?

MS. OSMUS: There were a couple of them. I don't know the details about them, but I'm sure I did at the time. There was another one, another group of people that wound up in the El Paso area after having--I can't remember if the aircraft was on the ground. They traveled by train to El Paso, and those were working--they were kind of tracking him through the Intel office through the Bureau and others. And I had never heard that any of them

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were confirmed as other tag teams or anything. But there were two or three groups of people that looked pretty suspicious to us at the time.

MR. KARA: I got a question about those telecons again. I'm sorry to be going back and forth between the two. How was Intel on that day? How did you learn--this is through the news media, or were you getting information in a different way?

MS. OSMUS: Oh, that day we got the report from I think it was from a carrier that there was one individual who had managed to smuggle a gun through the security checkpoint in Frankfurt.

MR. KARA: And that's a good point because we didn't talk about that in terms of input information from the two airlines that day, and I'm talking 9-11 here. Both American and United set up their own crisis management system. How was that information that they held in their perception and awareness of events getting into the--

MS. OSMUS: The principle Security inspectors as I mentioned earlier. There was one flying to American and one flying to United. I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

don't know if those people were specifically up here, but they were alternately with other folks hooked in with the carriers' crisis management unit reporting back and forth.

MR. KARA: Do you recall who those people were?

MS. OSMUS: Janet Riffe was the CFI for American, and I know she was up in the ACC on 9-11.

MR. KARA: Janet Riffe for American?

MS. OSMUS: Yes. R-i-f-f-e. And United was Steve Jenkins, and I don't remember whether he was here. I think he was, but I have to confirm that.

MR. KARA: And their specific title was--

MS. OSMUS: Principle Security inspector.

MR. KARA: And they specialized, or one of their duties was for those two specific airlines individually as we talked about?

MS. OSMUS: Yeah.

MR. KARA: Principle Security inspector.

MS. OSMUS: Yes.

MR. KARA: Okay. Did John Raidt and Bill

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

talk to you at all about that, their duties?

MS. OSMUS: I don't think so.

MR. KARA: I'll mention it to them. These two people, are they still here? Do they work in this building?

MS. OSMUS: They both work at TFC.

MR. KARA: They're with TFC.

MS. OSMUS: Janet I think is down in North Carolina. I think Steve Jenkins is still in the area.

MR. AZZARELLO: And this might not be accurate in terms of the time entry. This is a log of Dave Kenols. It says asked him to keep a log of events to find out--he cautioned us they might not be accurate in terms of the time entries. But JFK correlates Middle Eastern person who refused to embark--UAL 93, gate 2, 10:07. So at some point do you specifically recall any follow-up to that? Do you recall any?

MS. OSMUS: I don't remember this specific one, but as I said there were two or three that the Intel office was tracking with the Bureau and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

others, and I'm not aware that we ever got confirmation in any of them, but they identified the people and figured they were bad guys. I'm not sure whether, you know, the Bureau was still working it, and they just don't know yet, but we've not gotten any affirmation that I'm aware of.

MR. AZZARELLO: In the aftermath of 9-11 and the weeks that followed, did anyone at headquarters, anyone at executive level, assign the task to particular individuals to find out, well, what did the FAA know collectively from the Air Traffic Control field facility level all the way up to headquarters? You know, what did we know and when did we know it, and what is the earliest that we could have conveyed any information that we had to the military so that they could process it in and then take any appropriate action if they deemed it appropriate? Did that fall into--

MS. OSMUS: I think that whole discussion about what the Air Traffic actions were done, and the thing that I mentioned earlier where Monty scrubbed those issues with the Air Traffic folks,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

but again I wasn't--

MR. KARA: Something like this?

MS. OSMUS: Yeah, I've not seen that either, but I think there were some revisions made to the procedures as a result of some of those discussions, but I wasn't in them, so I've only sort of learned about them after the fact.

MR. AZZARELLO: You were sort of on the periphery in any of that?

MS. OSMUS: I wasn't even on the periphery. I was on the third floor in the little--looking at the scary Intel stuff.

MR. KARA: So if I show you the list of notifications to the military that day that were generated some time after 9-11, you were not--

MS. OSMUS: I've seen some of these documents in the last few months but not in the moment--

MR. KARA: And as a senior executive within FAA, were you in the next step that came up with the news release that was put out in August of 2002, the FAA time line?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: I don't think I was. We worked on some time lines, again on the external security stuff, you know, when the airports opened, about the process, but I don't remember contributing to this one.

MR. KARA: But the corporate one in the Office of Record is actually a gentleman. Do you know who that gentleman is?

MS. OSMUS: Bill Schumann.

MR. KARA: Or was?

MS. OSMUS: No, I don't actually. No, I don't.

MR. KARA: Dave, do you?

MR. WIEGAND: I can tell you that during a little break, I went to my FAA director and I typed the name in and the name doesn't appear anywhere.

MR. KARA: So he's not with us.

MR. WIEGAND: It appears he's no longer at the agency, at least according to what the--

MR. KARA: And we appreciate you taking that step for us. Lynne, you're a fountain of all knowledge, and obviously we don't know what we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

don't know.

MS. OSMUS: Put your feet up. Here we go.

MR. KARAS: Have we covered the ground with you? Is there something that we would be remiss if we hadn't asked you?

MS. OSMUS: I really can't think of anything. Yeah, nothing comes to mind.

MR. AZZARELLO: Is there anything that you could suggest in going forward? The Commission is obviously concerned about their ability to make recommendations, and then they liked to be able to make recommendations, I should say, to this Administration and Congress about what changes could be made that haven't already been made that would either help prevent or mitigate the damage from a future attack. And I guess that would affect the use of the aviation industry.

We know you've made a lot of changes post 9-11. One of the ones we've highlighted is the--were there any ones that haven't been made yet that you think could and should be made? Maybe there are financial constraints that are holding

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

them back. Maybe there's just not money in the budget being approved. And I mean not just resources but, you know, technology, equipment, better radar, whatever, anything that you're aware of that you would like to recommend or have the Commission think about as a possibility?

MS. OSMUS: The only thing that comes to mind, and it's a very big picture only because I don't have any specific concern about any technology or, you know, kind of small slice of it, but in aviation crisis management as we've sort of been talking about here, because decisions have to be made so quickly, I think that the efforts that the TSA and the FAA have started already need to be really focused on with DHS and any others that have--to practice how we do this because PSA was new and now they've gotten experience from some of this and their learning curve's a lot shorter. DHS is still in the formative time. FBI has a big role in this. --has a big role, and I know there's a big exercise coming up in May where I think some of this will be sorted through. But as we add folks

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to the pot that have an important role in aviation crisis management, we all need to figure out how to continue to do this in some kind of coordinated practice way. And I think that gets to be a challenge as you have more and more entities with some--ready for it.

MR. AZZARELLO: Sure, I mean I think one of the issues in the media recently as a result of our hearings among other reasons to generate the discussion was the discussion about the two hijackers--who at some point right before 9-11 the FBI was made aware of, or the CIA, and they were watchlist individuals, but that--those particular names never got to the FAA Security people as people to be aware of, a flag if they tried to get on a flight. And I guess in terms of how that flow of information works post 9-11, we should direct that to TSA, right?

MS. OSMUS: From the Intel piece. I mean, yeah. I was actually thinking more of once you have an incident, you know, there's FAA and TSA and DHA and NORAD and everybody else who has a play,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

able to talk and some kind of communications then, whether it be a telecon or other, and make informed decisions back and forth.

MR. KARA: What's the exercise in May coming up?

MS. OSMUS: It's going to be Topoff 1, and there's sort of two parts to it. I don't know that it's going to be aviation specific, but it's, you know, kind of underscoring the need to do the practice so that we if we have the real events, we'll be ready to do it. I just think we weren't--you can't have enough emphasis on that sort of thing.

MR. AZZARELLO: Doing the drills, actually walking through it, so you know what works.

MS. OSMUS: Yeah.

MR. AZZARELLO: On that note, actually I did just remember something else. We would be remiss not to ask you about it. There was a hijack exercise that we heard about. It's under the FAA field facilities that was run, an FAA sponsored exercise that you--at NORAD participated in in the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

mid-'90's. I mean I don't know the--roughly '95, '96 where the FAA enlisted the assistance and the assets of a commercial airline. One of the companies volunteered one of these, and one of its commercial jets to use, and in fact some FAA employees we were told volunteered to be passengers on this airline, and it actually got airborne and they simulated walking through a hijack scenario. And they're calling the DOD and calling NORAD and trying to facilitate the tracking of the commercial jet as it was crossing the country reported as a hijack. Do you remember anyone who participated?

MS. OSMUS: I didn't participate in it. I don't know when it happened. I left the Security organization in '95 and didn't come back again until 2001.

MR. AZZARELLO: Where were you in between? I'm sorry I missed the intro.

MS. OSMUS: I was Chief of Staff for about four years and then I went to Brussels for a couple of years.

MR. KARA: See, when you become the Chief

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of Staff, then--then you get a reward, like Brussels.

MS. OSMUS: Yeah, so I was out of the Security organization for about six years.

MR. AZZARELLO: Would you still be kicking and screaming in Brussels?

MS. OSMUS: It was awful--but what you're describing isn't inconsistent with the approaches that have been used before where, you know, the carrier gives an aircraft, the people pretend to be hostages, you know, that sort of thing. But I don't know the specific example that you're reciting.

MR. WIEGAND: I think it might have been called Twin Star.

MS. OSMUS: That name doesn't mean anything.

MR. WIEGAND: That was '95.

MS. OSMUS: Yeah, it doesn't mean anything.

MR. AZZARELLO: If we wanted to set a follow-up on that with someone in terms of trying

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to find out who the person who might have knowledge of the result of that exercise--

MS. OSMUS: I would recommend Terri Reilly at TFA.

MR. AZZARELLO: Terri Reilly?

MS. OSMUS: She runs their Operations Center that's currently located out at Herndon literally across the street from the FAA Herndon facility. R-e-i-l-l-y. And she, while she was still with FAA, had the responsibility for doing our own crisis management training and orders in-house and, you know, doing the data tracking. That's why I know she was one of the people that spelled Lee in the ACC on 9-11 and thereafter. She was out of the country on 9-11, but she was there after, and she has a very good recollection of this sort of thing, so if she doesn't know off the top of her head, she will probably remember the staff folks who were involved and working it and she can at least point you in the right direction.

MR. KARA: We'll tell her you said so.

MS. OSMUS: Yeah, she'll love it again.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: No, we'll just have to tell her we heard it from some little birdy.

MS. OSMUS: The phone will ring on my end. No doubt about it.

MR. KARA: Anything more, John?

MR. AZZARELLO: No.

MR. KARA: Lynne, thank you very much.

MS. OSMUS: You're welcome.

[END OF INTERVIEW.]

Case # 032R-024-2001

SWORN INTERVIEW OF

DANIEL DIGGINS

BY

SPECIAL AGENT JOHN AZZARELLO

SPECIAL AGENT JEFF BROWN

SPECIAL AGENT MILES KARA

UNKNOWN PERSON, FAA

Tuesday, March 30, 2004

[TRANSCRIPT PREPARED FROM A TAPE RECORDING.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546 6666

I N T E R V I E W

MR. AZZARELLO: It's Tuesday, March 30th, 2004. We're at FAA headquarters in Washington about to begin an interview with Dan Diggins. I'm John Azzarello, 911 Commission, Team 8.

MR. KARA: Miles Kara, 911 Commission.

MR. BROWN: Jeff Brown, 911 Commission.

VOICE: --Chief Counsel's Office, FAA, Washington.

MR. DIGGINS: I'm Dan Diggins, Accident Investigation, FAA.

MR. AZZARELLO: Dan, if you could just start by--we generally start by trying to get a flavor for your background and your career in the FAA. So if you can tell us sort of briefly when you started and take us through briefly the various positions you held leading up to 9-11, and then when you get to 9-11, I'd like you to explain in a little more detail what position you held on that day and what duties were--duties and responsibilities that went with that position that you held on 9-11.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: Sure. I got hired by the FAA in 1979 as an air traffic controller out in Seattle, Washington. I remained a controller for--an active controller for about six years, and then I did staff work in the field facility, the air traffic control facility, and I designed procedures that the airplanes flew.

MR. BROWN: So around 1985, is that--

MR. DIGGINS: Yeah, 1986, somewhere around there.

MR. BROWN: 1986.

MR. DIGGINS: Yeah, somewhere around there.

MR. BROWN: And you went to field facility then?

MR. DIGGINS: I was in the field facility and I worked in the field facility as both a controller and a staff person. It was a center, so it took a whole lot of air space, the northwestern part of the country.

MR. BROWN: And you were a controller and also a--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: A staff person.

MR. BROWN: Okay. Where'd you go from there?

MR. DIGGINS: From there I went to the regional office as a regional staff person in the procedures branch.

MR. BROWN: What year was that?

MR. DIGGINS: That was 1988.

MR. BROWN: And what region was that?

MR. DIGGINS: That was Northwest Mountain Region.

MR. BROWN: Northwest--

MR. DIGGINS: Northwest Mountain Region.

MR. BROWN: Mountain Region?

MR. DIGGINS: Right.

MR. BROWN: And you went there as a staff person?

MR. DIGGINS: Correct, until 1990.

MR. BROWN: What did you with the staff there at the Northwest? Procedures and--

MR. DIGGINS: Procedures and environmental assessments, environmental impact statements.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BROWN: And then in '90, you said
you--

MR. DIGGINS: Then in '90 I went to work
in the Air Traffic Evaluation Division which is a
part of Washington headquarters, but I was based in
Seattle.

MR. BROWN: And this is sort of a shift
now, right, a basic shift of positions from
procedures and all?

MR. DIGGINS: Correct. And I stayed in
that position until 1995 or 6. I actually can't
remember. '95 or '96, and then I went back to the
Center as an operational supervisor.

MR. BROWN: Back to the Seattle Center?

MR. DIGGINS: Seattle Center. That's
correct.

MR. BROWN: As a floor supervisor?

MR. DIGGINS: Yes.

MR. BROWN: Of controllers?

MR. DIGGINS: Yes.

MR. AZZARELLO: Okay. Prior to that it
was an investigative background that you were--I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

mean investigative duties?

MR. DIGGINS: Correct.

MR. AZZARELLO: And how long were you at the Seattle Center as a supervisor?

MR. DIGGINS: About two and a half years.

MR. BROWN: Then where did you go to?

MR. DIGGINS: Then I moved to Washington here as an air traffic investigator.

MR. AZZARELLO: '98, '99 roughly?

MR. DIGGINS: '99.

MR. AZZARELLO: '99?

MR. DIGGINS: Yes.

MR. AZZARELLO: So you came to FAA headquarters as an air traffic investigator?

MR. DIGGINS: Correct.

MR. AZZARELLO: And who were you working under?

MR. DIGGINS: Dave Kenols (sp).

MR. AZZARELLO: You reported directly to him?

MR. DIGGINS: No, there was an intermediate manager, Tony Frily (sp).

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay. So it would be you--chain of command?

MR. DIGGINS: Correct.

MR. AZZARELLO: Okay. How long did you hold that position for?

MR. DIGGINS: Three years.

MR. AZZARELLO: So you were in that position on 9-11?

MR. DIGGINS: Correct.

MR. AZZARELLO: Maybe you could describe for us, Dan, what your job duties and responsibilities would be on a typical day pre-9-11 in the absence of an aircraft accident or incident.

MR. DIGGINS: Investigate air traffic incidents within the system. Anything that was reported that involved Air Traffic Control, investigate it fully and see what Air Traffic's involvement was, if any.

MR. AZZARELLO: Any incident, any Air Traffic incident?

MR. DIGGINS: Anything unusual, whether it was classified as an incident or an accident,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

anything that was not normal.

MR. BROWN: So that would include separation there as it occurred at the facility?

MR. DIGGINS: Correct.

MR. AZZARELLO: Is that something that they would notify headquarters on if there was like an error in separation by a controller at a field facility--headquarters?

MR. DIGGINS: Well, the facility would notify their respective region, and the respective region would in turn notify headquarters.

MR. BROWN: So it would go up the chain of command in an event like that.

MR. DIGGINS: Correct.

MR. AZZARELLO: What about in the event of an accident, an aircraft accident, there's a crash? What kind of response would that trigger for you?

MR. DIGGINS: We'd check and see what Air Traffic Control's involvement was, if any. And there are two things I was involved in mainly is supplying radar information if they couldn't locate the airplane, getting radar information and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

analyzing the radar to try to locate the wreckage and then also see if Air Traffic had a part in the cause of the accident.

MR. BROWN: So your responsibilities in crashes would include radar analysis?

MR. DIGGINS: Correct.

MR. BROWN: What else? Would you also look at cold tapes--

MR. DIGGINS: Cold tapes, Air Traffic services. Basically review the air traffic services.

MR. BROWN: Air traffic controller communication analysis?

MR. DIGGINS: Communication, techniques used. Just the performance of the air traffic system.

MR. BROWN: So you want to see how the system performed, and if it affected in any manner the crash.

MR. DIGGINS: Correct. And if we needed to make any changes, then we'd make changes if there are some things that presented themselves

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that were flagrant problems.

MR. BROWN: How about if there was a hijack pre-911 reported in the system? Would that trigger any specific role or responsibility for you in particular and then after you, comment on your division that you worked in?

MR. DIGGINS: We would be notified. I'm not an air traffic controller anymore, so it's been a few years since I looked at it, so I don't really remember what the exact response is and what the requirements are.

MR. BROWN: So your division would be notified but wouldn't have, if I'm understanding you correctly, wouldn't have any direct responsibility in responding to the--? Is that fair? I don't want to mischaracterize it.

MR. DIGGINS: I can't say either way because I don't know what the rules are. I don't remember what the rules were prior to 9-11.

MR. BROWN: Do you remember if your division even had a role if there was a reported hijack pre-911, or if it did or didn't have a role,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

could you at least comment on that?

MR. DIGGINS: I actually can't remember if we did or not. I know we'd be notified, but I don't know what the official response would be or the requirements would be.

MR. BROWN: So you don't recall if you had a response while in your division?

MR. DIGGINS: Correct.

MR. BROWN: And that would've been--what's the official title of your division?

MR. DIGGINS: Air Traffic Investigation.

MR. BROWN: Air Traffic--what's the--

MR. DIGGINS: AAT 20.

MR. BROWN: AAT 20.

MR. DIGGINS: Right.

MR. BROWN: But you do remember that you would be--no AAT 20 would be notified in the event of a hijack.

MR. DIGGINS: Yes.

MR. BROWN: But in terms of having the role, you're not sure whether they had--

MR. DIGGINS: We played some role at that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

point, but I couldn't quote line and verse what that role would be.

VOICE: I think the difficulty might be, if I may, is he's probably thinking what responsibilities are outlined specifically in, for instance, 7110.65, the Air Traffic Control Manual. I mean they undoubtedly had some involvement. The question is what that manual says. I guess maybe that's the problem.

MR. DIGGINS: There is confusion. Like Andy says there is because there are specific things to do as a controller and you're aware of a hijacking, but I'm not sure we have it so detailed to that letter for other offices that get notified what they do with that information.

MR. AZZARELLO: And you do have an understanding I guess of what goes on in that controller level. They have their guidelines that are published and the FAA orders in the manual in terms of if you think you have a hijack. Example, somebody's squawking 7500, you tell your supervisor. Your supervisor goes up the chain of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

command, it gets to headquarters and that triggers some responsibilities, so weeks pre-911 for some people at headquarters, like a hijack coordinator. Were you familiar with that that there was a hijack coordinator pre-911 according to FAA protocol?

MR. DIGGINS: I think I remember that, but it's hard to distinguish between pre-911 and post-911 for things that I'm no longer working.

MR. AZZARELLO: Sure. Let me see if I can help you out with that. Maybe we can focus in a little on some areas. There was a--now you wouldn't have been here anyway, if I can remember back to your chronology year. '93, where were you?

MR. KARA: He was in--

MR. AZZARELLO: There was a Lufthansa hijacking in the early '90's, ballpark 1993, that the system responded to, both military and FAA headquarters involvement, but you weren't here. You were out in Seattle I think.

MR. DIGGINS: Correct.

MR. AZZARELLO: So you wouldn't have had--you've never experienced pre-9-11 being in the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

middle of a hijack, reported hijack, and responding to it, correct?

MR. DIGGINS: That's correct.

MR. AZZARELLO: Okay. Well, how about when you come to headquarters in '99? You come to support AAT 20, which is Air Traffic Investigations. Do you recall at any point after you got here in '99 at headquarters, from that point up to 9-11, did you ever participate in any hijack training or drills at a headquarters level?

MR. DIGGINS: No, I don't recall.

MR. AZZARELLO: Don't recall whether or not you did, or you don't think that you did?

MR. DIGGINS: I did not participate in any formal training, but I do not recall if there was any informal training.

MR. AZZARELLO: But no formal training.

MR. DIGGINS: No formal training. I'm sure of that.

MR. AZZARELLO: Now you say formal, but you say there may be informal training that you don't recall?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: Yeah, we could have had discussions informally going through the ranks and things like that. That could've happened because that happens on many different subjects and at many different times. But I don't remember if that happened for hijacks. I just don't remember.

MR. AZZARELLO: Okay. Because they were drilled obviously in a field facility level, and you probably--I don't know. Maybe you were familiar with that--controller and a supervisor in Seattle that they would often have, what they call, dice and dynamic simulated training sessions where you'd sit at a computer as a controller and see if you can detect a hijack scenario on your radar screen, either by the squawk code or someone--did they have that type of training when you were in Seattle?

MR. DIGGINS: Yes.

MR. AZZARELLO: I know we've been told it varied from, you know, flashing the hijack code to someone playing the role even of the pilot and using the code word "trip" so that the controller

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

could discern that situation as a hijack and report it up the chain of command. So to the extent that they had those say field exercises at a controller level, you don't recall having those type of specific formal exercises that you participated in any way here at headquarters after you got here in '99? Might have been going on somewhere else here at headquarters, but not that you participated in.

MR. DIGGINS: I don't believe I participated in anything.

MR. AZZARELLO: Okay.

VOICE: I think the difficulty in that question, if I may, is you're talking operational in the field as to how to deal with a hijack. In Washington, the type of thing you're talking about or what an actual controller is doing, hijacking, isn't quite the same animal. They're more sort of after the fact evaluating how the system functions, how the controller handled a specific incident. So he wouldn't really be on the operational end. He would be on the evaluation end after the fact.

MR. AZZARELLO: Your group would come in,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

AAT 20, after there was an incident or an accident. So, for example, if there was a hijack that resulted in a crash, you'd come in after the fact to evaluate it?

MR. DIGGINS: See if they did their jobs because their jobs are clearly spelled out how they're supposed to respond.

MR. AZZARELLO: Okay, but there is, just so we're clear, there is protocol on the record in terms of responsibilities at the headquarters level in the event of a hijack being reported from the field level up to headquarters. It triggered some responsibility for people at headquarters level in terms of--

MR. DIGGINS: I'm sure there are. I personally, of course, don't get involved with it, but--

MR. AZZARELLO: And I just wanted to make that clear. I'm not suggesting that that's your responsibility. I just wanted to see if there was any cross training in that, or if you were ever exposed to that. That's all I was--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: Most of the time in the job that I held there, just like Andy said, we're notified after the event, and we provide any support to investigate that event, but we don't generally react during the operational phase of the event.

MR. AZZARELLO: Okay. So you sort of react after the operational phase proceeded then.

MR. DIGGINS: We do.

MR. AZZARELLO: I think that's a good sort of segway to 9-11, unless--I want to make sure my colleagues don't have any questions--do you guys have any background stuff for him?

MR. BROWN: All right. Let's take us to the day of 9-11. Tell us about how that day evolved when your tour duty started and then when you first became aware that there was either a hijack or an incident recorded in the system of concern to the FAA.

MR. DIGGINS: I was sitting at my desk. It was prior to 9 o'clock. I know that. I can't tell you exactly when. But Dave Kenols and Tony

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Mellow--I know you talked to Dave. Have you talked to Tony yet?

MR. BROWN: We've spoken to him last week.

MR. DIGGINS: Both of them, though, walked by my desk and Dave says come with me.

MR. BROWN: This is prior to 9 o'clock?

MR. DIGGINS: Prior to 9 o'clock, and it was before 9 o'clock.

MR. KARA: Were you on the fourth floor?

MR. DIGGINS: Fourth floor, correct.

MR. BROWN: Okay.

MR. DIGGINS: Dave looked visibly stressed, I think is the way to look at it, and--

MR. KARA: Who was with him?

MR. DIGGINS: Dave and Tony Mellow. He said come with us. We're going to the 10th floor. I says okay, what's going on. He says an airplane just ran into the World Trade Center.

MR. BROWN: That was the first--I mean you might not have know it then, but now with the benefit of hindsight, that was American 11 as the first aircraft crashed?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: Correct, correct. My first inclination was to think it's a small airplane.

MR. AZZARELLO: Is it fair to say then that that's the first information you had that day that something was wrong was actually after there was a crash when Tony and Dave Kenols came by and said let's go, there's been a crash in the Trade Center?

MR. DIGGINS: It's fair to say it's accurate. That's the first time I knew about it.

MR. AZZARELLO: I'm saying you didn't--there was no news report you heard or anything like that? Okay. So take us from there. What happened?

MR. DIGGINS: I went in the elevator with Dave and Tony. We went up to the 10th floor, and on the way up, I asked, you know, what was the weather, thinking, well, maybe it's a small airplane and somebody got caught in the weather, it didn't hit, and he says it's a--which means ceilings and visibility unlimited.

VOICE: The old Empire State Building

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

crash.

MR. DIGGINS: So it was a clear day up there in New York, and I think Dave said something to me about he thinks it's a big airplane. This is either in the elevator or once we exited the elevator before. I don't know, somewhere in that process going to the 10th floor. Then I said what the hell's going on here.

MR. BROWN: You'd never heard that term before. We've heard about how beautiful a morning it was and how clear the skies were. Was that--what was that?

MR. DIGGINS: Ceilings and visibility unlimited. It's an old pilot term. I'm an old pilot.

MR. AZZARELLO: Did you have background in the--

MR. DIGGINS: Commercial aviation.

MR. AZZARELLO: Commercial?

MR. DIGGINS: Yes.

MR. KARA: Did you fly what, 727's?

MR. DIGGINS: 727's and turbo--I wasn't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

too good flying in the '70's. I was living in my Volkswagen so I thought there was a better way to make a living.

MR. BROWN: So Dave tells you on the way up then that he thinks it's a larger aircraft.

MR. DIGGINS: Something like that, yeah.

MR. BROWN: Where did you guys go when you got up to the 10th floor?

MR. DIGGINS: We went to a conference room off of the director's office.

MR. AZZARELLO: Is that off Peacock's office?

MR. DIGGINS: Yes.

MR. AZZARELLO: This is now a famous diagram--and this is the layout of the 10th floor, and let's see if you agree that it's fairly accurate. That's the west end, and this is where the walk is on the east end with the crisis center, and at the west end, there's an air traffic room of suites in the corner. And if you flip it over, we're told in the corner of the west end was Peacock's office, AAT 1, and then the conference

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

room, and then Jeff Griffith's office, and then another room over here. Is that fairly accurate, or how do you remember it?

MR. DIGGINS: Yeah, that's about right. Yeah, AAT and the conference room right here, and the secretary's over here.

MR. BROWN: Now where did you and Dave and Tony go to?

MR. DIGGINS: We just came right in here.

MR. BROWN: Into the conference room?

MR. DIGGINS: Yes.

MR. BROWN: Is that pretty much Bill Peacock's conference room, which is for the Air Traffic suites?

MR. DIGGINS: I think it's for the Air Traffic suites up there. Anybody can use it.

MR. BROWN: Just want to put a name on it to refer to it. It's been called a few things. But it's a conference room in the Air Traffic suites.

MR. DIGGINS: Yes.

MR. AZZARELLO: And then what did you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

proceed to do when you entered the conference room?

MR. DIGGINS: There was a telecon. I think somebody dialed into the telecon, but I don't know if they were already dialed in, whoever was in the room before we got in there. I don't know if they were dialed in already or Dave dialed in or something, but there was a conference going on.

MR. BROWN: So somebody started the telecon going?

MR. DIGGINS: There was a conference call, and I don't remember the mechanics of it, but I was not involved in setting it up.

MR. BROWN: What do you remember about when in the sequence of events did you learn that there was a second crash?

MR. DIGGINS: Oh, well, we were getting set up in this room for the conference call. People are checking in and I'm hearing some conversation from the New York facilities, names, people that I recognize--Mike McCormick from the New York Center, Frank Hatfield, the division--I'm recognizing the voices on the conference call. We

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

didn't have a television in this room, so it was obvious that we were trying to get updates, or wanted to get updates from CNN, so there was a television in this room--

MR. KARA: Peacock's office?

MR. DIGGINS: Peacock's office, so me and Jeff Lowe go on into this room and get the TV and try to drag it into the conference room. We did, but we didn't have enough cable. The cable wouldn't go far enough. So as we're fustering around with the cable, and I'm trying to pull it into the doorway here so we could see, that's when I saw the second one hit on the TV because the TV was this close to me as I was doing it.

MR. AZZARELLO: So you saw the second crash on the TV.

MR. DIGGINS: On CNN. My first instinct was as the first one, but then it became clear it was the second one.

MR. BROWN: So you thought it was a rerun at first.

MR. DIGGINS: Yeah, my first instincts

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were that. It said live up in the corner, and I'm thinking live. And then the announcer said something.

MR. AZZARELLO: Just for the record, we're just joined by Dave Wiegand. Okay, so what are you thinking? What sort of goes through your mind now when you see the second one and you realize it's not a replay of the first crash but a second crash?

MR. DIGGINS: A moment of disbelief, like what the hell is going on now, you know, and I think I went in and told Dave it looks like we got a second one or something. Jeff Lowe and I, we were--it basically took our breath away. I remember that, and we just didn't know how to react to this. We just went in and told Dave and company, Dave Kenols and whoever else was in the room, looks like we got number two or something. I don't remember the exact words, but it was--it made it clear that it was another event. We made it clear to them there was another event.

MR. AZZARELLO: In terms of causes, are you thinking now--are you having any thoughts on,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

all right, it's a clear day, like you said, it's--in your former pilot--are you drawing any conclusions now as to is this intentional or unintentional? Is it an act of terrorism? Is it are we being attacked? Is that entering in yet or not in your thought process?

MR. DIGGINS: No, no. I didn't have an explanation. It defied explanation at that particular moment in time, and it didn't make any sense to me what I was seeing. My first thing was maybe it was an incapacitated pilot, but what's the chance of having two incapacitated pilots, so it wasn't making sense to me at all.

MR. AZZARELLO: Were you thinking that it was probably really intentional after the second one, that's it's some more intentional acts?

MR. DIGGINS: I can't say as I was at the moment. Within short order, it became clear whether--surrounding discussion. It was a little bit chaotic in this room at this particular moment in time. So it's hard to say what you thought, what somebody said and then you would absorb what

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they said and then you think it too. I don't know so.

MR. AZZARELLO: Sure, but before--let's say before the Pentagon was hit, we now know there was about 35 minutes in between. 9:03 was the second crash and 9:38 was the Pentagon. So about 35 minutes in between. In that 35 minute period, do you remember thinking to yourself--and I ask you this because you're a former pilot, so you've flown a commercial aircraft. You've flown a 727. You know how that sort of works and how they relatively fly with a lot of precision and then you have a clear day.

Now you've got two crashes, and you're--investigation--to try to determine what caused these crashes. Just try to get your sense for historical purposes what's going through your sort of mind at any point then after the--before the Pentagon--then at some point in between there start to think about whether or not this is not pilot error, not accident, not medical reasons, but intentional acts by someone.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: After the second one hit and before the Pentagon, it was clear these were intentional acts to me. It was clear to me. But I can't tell you how--

MR. AZZARELLO: Just asking if that thought--

MR. DIGGINS: Absolutely, before the Pentagon, yes.

MR. AZZARELLO: So now you're in that room and the telecon's getting up and you see the second aircraft go in and you tell Dave, or you and Tony let them out, and then take us from, as best you can recall, after seeing the second crash on TV, and take us up to when you learned that the Pentagon had been struck. Tell us what, as best you can, recreate what transpired in the room, or what you did in between the second aircraft crash of the Pentagon.

MR. DIGGINS: Okay. More and more people are joining the telecon from more and more facilities and regions. They're checking in. I think there was somebody on there from the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

FBI--some law enforcement was on the telecon, but I can't tell who or when they joined, and it became apparent that we were into unknown territory here of what's going on. We're not quite sure we understand what's happening here, but we're trying to react the best we can to the air traffic system, trying to understand what's going on out there, you know, because we had a lot of airplanes flying out there. You know, there's a chance we might lose a couple more. So we're trying to--and I guess the Command Center's on the line also, and we're trying to alert people to be aware that this activity is going on. Of course, not everybody's on the telecon, so we're all kind of just sharing information what we know, when we know it.

People reporting that anything strange--when I say people, the air traffic facilities who were actually monitoring the airplanes and reporting if there is anything strange is happening to an airplane under their surveillance. I remember an American--and it turned out to be American 77--Indy Center lost

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

radios and radars simultaneously with the airplane.

MR. AZZARELLO: So you remember hearing this on the telecon that the Indy Center lost radio coms and radar--

MR. DIGGINS: And radar, and they were treating it as a suspected aircraft accident.

MR. AZZARELLO: Radar with 77.

MR. DIGGINS: I'm sorry?

MR. AZZARELLO: They lost radio coms at Radio 77. They were treating it--

MR. DIGGINS: As a suspected aircraft accident, which is a normal response when you simultaneously lose radios and radar.

MR. AZZARELLO: Okay, let's back up to something you said a moment ago. You said that you were learning of the activity. Was this only over the telecon or was there also other phones in the room--

MR. DIGGINS: People were coming in and out of the room and discussing it. It was just a beehive of activities, so it was mainly through the telecon. The remote areas, the places that weren't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

located right here would give us the information over the telephone.

MR. AZZARELLO: The people that were in and out of the room with information, was that information that was flowing in to a different location than the FAA headquarters? Right down at the other end, you're saying you have the WOC and the crisis center. Do you know if any of those people were bringing information that was coming into the WOC or the crisis center? Were they bringing that down to the suites to make sure that--

MR. DIGGINS: I have no idea. I didn't follow those people around, so I don't know where they were getting the information and how they were getting it. I just know people were coming in and out of the room and sharing things. Some of it was duplicate, some of it was new information.

MR. BROWN: Who were the people that were coming in and out of the room?

MR. DIGGINS: I remember somebody from the Air Force.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BROWN: Someone from the Air Force?

MR. DIGGINS: Yeah. Didn't know the individual. I think Jeff Griffith came in, and I think there were other people that I did not recognize.

MR. BROWN: So an Air Force representative?

MR. DIGGINS: Somebody with an Air Force uniform on. I don't know if they were--

MR. BROWN: You don't remember if it was any member--do you know, Colonel Adkins? Do you know if it was her?

MR. DIGGINS: It was a woman, but I don't know--I don't think I ever learned her name.

MR. AZZARELLO: You didn't know on 9-11 who Cheryl Adkins was. Just a woman with an Air Force uniform that was coming in and out?

MR. DIGGINS: It was a woman--because I eventually--the woman I'm thinking of, and I don't know if it's Cheryl Adkins or not, the woman I'm thinking of, once I started a running log on my laptop, I asked her if she could type, and she says

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

yes, and I says start typing, and she said what'll I type. I says everything important you hear in this room.

VOICE: And she was in uniform?

MR. DIGGINS: She was in uniform, yes. Never did find out her name, though.

MR. BROWN: You had a running log going on the laptop?

MR. DIGGINS: Yeah, I need to back up here a little bit. As the information was coming out, people were saying that there was a Delta airplane, Delta 18, 1989 or something like that, that there was--it seemed like somebody was thinking it was hijacked and then the airline says no, it's not. Then the controller was talking with the pilot, and the pilot didn't seem to indicate anything strange was going on, but people were suggesting that this airplane was--maybe next in line to something, and I never did find out why they believed that.

So we were writing things on the white board, such as that, American 77--these things were being written on the white board.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: On the white board?

MR. DIGGINS: Right. And other things were written that we already knew. Like number one had hit the Trade Center at this point--and whatever. And I don't remember exactly everything that was on the white board, but I wasn't writing on the white board, but other people were, and it was pretty apparent that this white board isn't going to last very long at this method.

So I don't know how I came downstairs to the fourth floor and I grabbed my computer back and grabbed my laptop. I don't know if Dave told me to do that or did it instinctly. I don't know. So the result is I went down to get my laptop, fired it up, and I started typing everything I saw on the white board.

VOICE: --

MR. BROWN: --

MR. DIGGINS: That was me.

MR. AZZARELLO: That was him. Was Dave Kenols reminding everyone that whatever was said or any instructions given must be remembered and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

recorded, and the white board was used at first and then later the questions and answers meticulously were committed to the laptop computer?

MR. DIGGINS: Meticulously?

MR. AZZARELLO: I didn't write the book.

MR. DIGGINS: That's a little bit of literary license. Dan, you have to take that up with Pamela--

MR. DIGGINS: I don't know who she is. She never interviewed me.

MR. AZZARELLO: Let's see if we can go back over some of these events. You've covered a lot of ground here, Dan. You're in the conference room, and before we get to the report from Indy Center on 77, I want to see if I can get a handle on the situation of awareness of the first two crashes. Before the Pentagon's hit, what was the situation awareness regarding which aircraft might have caused the first two impacts at the Trade Center? Do you remember if it was equated with--

MR. DIGGINS: Keep in mind I was out of the room for a little while when I went down to get

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

my laptop, so probably no more than four or five minutes. But I think it was clear to us that the first one hit. We probably were about 90 percent sure it was American 11.

MR. AZZARELLO: So you were--

MR. DIGGINS: But there was still a doubt because we--you know, I don't think anybody really spotted it, but it kind of intuitively made sense.

MR. AZZARELLO: And just see if I can jog your memory on maybe this never reached the headquarters level on you said Delta 1990 was in a mix and you didn't know what was happening, why that was being looked at as a potential hijack. We heard up in Boston from interviewing the field facility individuals that they quickly started to evaluate what was in their system,, and so you've developed so you can take and develop some sort of a profile to fit the form of the first two--as they both left from Logan, 11 and 175?

MR. DIGGINS: Oh, I see.

MR. AZZARELLO: They were both 767's, Transcontinental, from Logan to LAX, and the Delta

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was a 767 from Logan to I believe Las Vegas.

MR. DIGGINS: I remember that was discussed on the telecon too. That was discussed, but I remember there was something--the controller asked the pilot if he was okay, and I guess the pilot's response was we're okay, but somebody felt that the pilot wasn't okay, and I don't remember--it's one of those things that became a circular reasoning type of thing, you know. He fit the profile perhaps. That's the first time I had heard that, but it makes sense.

MR. AZZARELLO: So they talked to the Delta pilot but I'm sure trying to read the pilot they had--maybe someone had a sense that maybe thing aren't all right? Was it that type of thing like--

MR. DIGGINS: It was confusion. People thought this airplane was in danger, but the pilot said no, he's not, but now that we're tuned into thinking hijack, just because the pilot says he's not doesn't necessarily mean that's accurate.

MR. AZZARELLO: Was there anything though

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in particular, was it a feeling that somebody reported that it seemed like the pilot wasn't speaking openly or might have had--or was it just we should take some precaution?

MR. DIGGINS: I don't recall we took it to that level of detail on the phone.

MR. AZZARELLO: Okay.

MR. DIGGINS: Then again, this was all second and third-hand through the phone because the controller's actually talking to the airplanes relaying to the supervisors, supervisors relaying it to somebody else, and then they're relaying it to us.

MR. KARA: You were 90 percent on American Air 11. How about United 175?

MR. DIGGINS: I think at that--what I recall. Let me think about it here a second. I'm not sure I was aware of 175 losing its transponder or being a subject airplane at that particular moment in time. Shortly after the second one hit, I don't think I was aware that United 175 was a candidate.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: You don't recall Mike McCormick's voice on that telecon at all talking about another--

MR. DIGGINS: I don't recall.

MR. KARA: Were you aware in the immediate aftermath that New York and New York Trade com were running the technical side of business to try to find out what happened on 175? --pulling the tapes or running the--

MR. DIGGINS: I was aware of that, but I can't tell at what time that I became aware of that.

MR. AZZARELLO: I guess did you find out either that day or in the aftermath that 175 was actually different from the other three flights in the sense that it didn't completely shut off the transponder but changed the code twice?

MR. DIGGINS: Oh, sure.

MR. AZZARELLO: Changed briefly--

MR. DIGGINS: Sure, I was--to analyze the radar initially.

MR. AZZARELLO: We've seen that the Tracon

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

people were following it I guess under the new transponder code as it was pointed out to them, and they watched it sort of descend and then some personnel statements, which maybe you were even privy to at some point, you know, they watched it go 4,000, 3,000, 2,000. Was it your recollection, though, that that Tracon wasn't reporting--they weren't on this open telecon reporting that type of real live information on 175? Certainly not at that point--not at the point you were up on the telecon--

MR. KARA: Actually, John, it might've been the New York tower that--

MR. AZZARELLO: The New York tower reported seeing an aircraft go into the building but the Tracon was watching the sort of target descend--

MR. KARA: Right.

MR. DIGGINS: I don't remember that discussion, but if that discussion happened, that might've been the time I was out of the room. The timing is about right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Could it also be that--I mean that was the point of impact. Could it be that the telecon was just sort of in its infancy stage and was getting up and going at the point of the second impact?

MR. DIGGINS: I know why I didn't hear it. I was in the other room getting a TV.

MR. AZZARELLO: You were getting--

MR. DIGGINS: I was in the other room getting the TV. That's why I didn't hear it.

MR. AZZARELLO: At that point when you were getting the TV, was the telecon--to your recollection, was it up and going, or was it really just--

MR. DIGGINS: Gaining speed.

MR. AZZARELLO: Gaining speed.

MR. KARA: At that point, was there already somebody writing on the white board?

MR. DIGGINS: Yes.

MR. AZZARELLO: Now take us to early when you said Indy reported that they lost coms and radar. Did that come over the telecon?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: Yes.

MR. AZZARELLO: Do you know if that came from Indy Center where they were on the telecon, or was it coming through a region to the Great Lakes?

MR. DIGGINS: Who I heard it from on the telecon, I can't tell you.

MR. AZZARELLO: Okay. You said that they reported it as--whoever was reporting it was saying that they thought it was suspected action. How was that information evaluated by yourself and others in the air traffic situation. I know you said ordinarily that's a--simultaneous loss of radar and coms, but this isn't sort of a normal, but--still developed as a not so normal day if there have been two crashes at the Trade Center. And after the second one, pretty much a lot of people were thinking well, this is an intentional act by some group of people.

So given that background, how were you and the others in the room evaluating this information that there's another one that they lost radar coms

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

with? Are you thinking--are you in this situation, yourself and the others, thinking, yeah, an accident, or were you thinking something else?

MR. DIGGINS: I can't answer for the other folks.

MR. AZZARELLO: Yourself, you.

MR. DIGGINS: There's no question in my mind. I believed there was an intentional--if it was an accident, it was an intentional crash. If it was a crash, it was an intentional crash.

MR. AZZARELLO: If it was down, you're thinking done intentionally.

MR. DIGGINS: Right. I think it was intentional, yes.

MR. AZZARELLO: How about--did you have any thoughts yourself on whether or not it was down at that point based on what they were telling you they knew about it, had lost radio com. Did they have anything more specific on confirming one way or another why they thought it might've been down?

MR. DIGGINS: Just because of the simultaneous loss of radios and radars. That's how

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

we're trained to react. That usually means an accident, means a crash, whether it's intentional or not, that points to a crash.

MR. AZZARELLO: But I guess what I'm getting at, and that wasn't a good question. But I mean is if you have any awareness at that point that the first two crashes did involve--or at least American 11 involved shutting off the transponder and both planes stopped communications with the controllers before they crashed, how much weight are you giving to the fact at that point that well, maybe it's not a crash, but, you know, maybe this is a third hijack in the system and it's aiming for a building and it's out there somewhere and we need to find it? I mean was that also in your--

MR. DIGGINS: There was discussion whether we were getting any primary radar returns on the telecon. I remember that discussion, and the answer was negative. No primary radar returns, and that could mean a couple of different things.

MR. BROWN: Tell us what that could mean.

MR. DIGGINS: There's no radar being

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

displayed, no primary targets being displayed, and in high altitude environment, the controllers don't display primary targets. So there was some discussion, is it being displayed and they just haven't selected it yet. Something along those lines, but it was pretty clear that there were no primary targets being displayed period. So to me that meant the airplane might have just gone straight in.

MR. BROWN: And I guess we came to an appreciation in the field of how that works then that generally a high altitude and--transponding aircraft and don't have primaries on but they can--

MR. DIGGINS: But they can select it, they can select it. If it's being sent for their selection.

MR. BROWN: If they're getting the return from the--

MR. DIGGINS: If the--radar is sending them primary returns. The radar might be recording primary returns, but it may not send--

MR. BROWN: Might not be feeding that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information--

MR. DIGGINS: Correct, to the controllers. So it doesn't matter if the controller pushes the button or not, it's not going to display it because the radar processor is not sending the information.

MR. AZZARELLO: Do you recall part of the discussion being about--there being no primary radar returns on 77? Do you recall there being any instructions being given to have those controllers try to turn on their primaries? What was their--if you know, what was their situation where it's an Indy Center? Do they realize that there were two crashes out in New York, and that the primary transponder was off on one of the aircrafts?

MR. DIGGINS: I can't tell you if any Center was even on the line. So I just know somebody from either the region or the Center was on the line, but I can't tell you--you know, you're talking about a controller with a headset on talking. I can't tell you what that individual knew at that particular moment in time. I can't tell you that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: No, we can get to that. I think what we'll do is we'll try to go through that area later if that was something you looked at in the aftermath as an accident investigator with what they knew what the situation awareness was after, but before we get to that, I appreciate your separating and let's go with the day of.

Let me ask you this then. Did anybody in headquarters then say, hey, help make sure they have the primaries on because he just might not be squawking with his transponders. So let's make sure they have their primaries on and they're looking for this.

MR. DIGGINS: There was discussion about it, but I can't tell you whether it was commanded or just information that was shared with us. I can't tell you that, but it was clear they were not receiving primaries.

MR. AZZARELLO: Okay.

MR. KARA: John, let me interject for a second. --air traffic situation, the telecon that you were familiar with. We were told that within

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the ACC complex and the bridge that there were two nets, primary net and a tactical net. Primary net we understand is they send it outward to other entities. Tactical net we understand was an internal FAA net. How did we distinguish that net from your net down here? Or are they same? Are we talking the same thing or are they two different nets?

MR. DIGGINS: Two different. From my estimation, they were two different things. But I can't tell you if that person was on our line or if--I don't know. I didn't set up the telecon so I--

MR. AZZARELLO: In terms of the focuses of them, though. You can shed some light on whether they were really is a distinction in the purposes of them or maybe not. Did the tactical net telecon as we understand it in an event of a hijacking incident could be activated at the direction of someone in management so that there could be internal discussions among FAA entities, like field facilities and Tracons, etcetera, to gain some sort

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of, you know, some sort of realtime situation awareness of what's going on within the air traffic system.

Would you describe that generally as similar to what was going on in the Kenols' telecon trying to gain sort of situational awareness on a broader regional/national perspective on what was going on within the FAA system air traffic-wise in terms of there being any other potential hijacks out there?

MR. DIGGINS: That's pretty much what was going on in this conference room. Trying to understand the air traffic, trying to get information about the air traffic system and what's happening out there as the clock moves on.

MR. AZZARELLO: And to distinguish not just trying to gain situational awareness and information on the two that are already crashed, but was it also a purpose in that conference to gain going forward to try and figure out are there any other problem flights in the system now that are out there that could be hijacks that we need to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

deal with? Did you think that--

MR. DIGGINS: I think it's easier to say that now in hindsight, but at the time, I think we were just trying to understand what's happening and what any events that are happening realtime and try to figure out what's going on, see if they're related.

Because we knew pretty much at that point that these things were intentional, the first two were intentional, and then we were talking about maybe a hijack of a Delta 1989 or 1988 or whatever the number was, and then American 77. It becomes clear that there seems to be some type of activity going on in the system, but we don't know where it's next going to show up.

MR. AZZARELLO: So the involvement that that become one of the elements of the telecon as that information flowed in to try to keep a handle on it?

MR. DIGGINS: We're trying to discuss anything unusual happening from any controller who's monitoring, that are controlling the flights

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of any unusual activity and report that to us.

MR. AZZARELLO: And you're using Command Center as sort of a lynch pin or point of contact because they're in touch with all the facilities too, the field facilities?

MR. DIGGINS: Any way we can get it.

MR. AZZARELLO: Do you remember who from the Command Center might've been on the line? Was it one of the NOM's or perhaps some of the millions of people on duty that day, Ben Sliney (sp), John White, Linda Schuessler, any of those people you recall being on--

MR. DIGGINS: I don't know Sliney, but I know John White and Linda Schuessler, and I can't tell you.

MR. AZZARELLO: Do you know if it was a male or female voice representing Command Center?

MR. DIGGINS: Can't tell you that.

MR. AZZARELLO: Okay.

MR. KARA: Let me ask this question. If the administrator or the deputy administrator who were in the SPTS or talking to the national level

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

entities, who would they turn to for their tactical information internally and what FAA knew and what the situational awareness was? Would they turn to the Kenols telecon down here, or would they turn to the ACC?

MR. DIGGINS: Either one. Any method. There's different communication routes to get to the guy actually with the headset on.

MR. BROWN: Let me ask you about 77, following up on any further information. Did you learn at some point prior to the Pentagon being hit that they've lost radio and radar within? What's the next piece of information, if any, that you receive on American 77?

MR. DIGGINS: State police were notified to look for what we call a smoking hole in the ground. That's my term to look for a crash.

MR. BROWN: To look for a crash.

MR. DIGGINS: Yes, exactly.

MR. BROWN: And do you remember how they were given--were they given a location as to where you thought the plane went down?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: Somewhere in Kentucky.

MR. BROWN: Would it have been where--generally in the location where they lost radio and radar?

MR. DIGGINS: A good place to start looking, and the airplane was headed westbound, so airplanes usually go crash in the same direction they're traveling, so you can go from the point there west.

MR. AZZARELLO: And, Dan, you said earlier I think that even if they turned the primary on, it doesn't necessarily mean they were getting the feed to their console. I guess we now know in hindsight that where Flight 77 did commit it's turn back to the east coast, that it went into sort of a spot, a dead spot, so to speak for lack of a better term, where the FAA believes that there was no radar feed, primary skin pain feed going back to the controllers and Indy Center. Did you know that that--gap existed on 9-11?

MR. DIGGINS: During the event?

MR. AZZARELLO: Well, prior to the event.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: Prior to the event, no. During the event, no. Later on at 9-11, I did.

MR. AZZARELLO: Okay, then I guess maybe was that related to when you said it doesn't necessarily mean--was that knowledge that you gained afterwards when you said it doesn't necessarily mean that they're getting the primary feed even if they turn the switch on?

MR. DIGGINS: Well, I used to be a radar guy, so I know radar pretty well and air traffic. There's a couple of reasons why you may not see a primary target. It's not being processed and sent for display, it might be outside of radar coverage. It could be something else, some letter out there blocking out the return. There's many different reasons why you wouldn't see primary.

MR. AZZARELLO: And that's from your experience, just general experience of radar analysis?

MR. DIGGINS: Yes. Where the guy is--in reference to the radar site, how close he is, whether he's going to--or straight towards it, how

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

far away. I mean all those things affect the radar performance. That's just RF energy bouncing off the airplane.

MR. AZZARELLO: Now you talk about the crash site in Kentucky. When do you learn that the Pentagon has been struck, or how do you learn? Tell us how you learned that the Pentagon was hit.

MR. DIGGINS: I'm not sure. I really don't remember, but I remember there was discussion of a fast-moving, unidentified target.

MR. AZZARELLO: Was that coming over the telecon?

MR. DIGGINS: Yes. Headed towards Washington.

MR. AZZARELLO: Do you remember where it came from?

MR. DIGGINS: They said it was headed eastbound, that it was out to the west headed eastbound. So I went to the window and looked. I don't know what I was expecting to see, but they were giving us the play by play. Somebody was giving us the play by play that had radars going

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

from them, in front of them. Dulles said it was moving and they were giving us how many miles away from D.C. it was.

MR. AZZARELLO: Do you remember who was giving that play by play, what location it was coming from?

MR. DIGGINS: No.

MR. AZZARELLO: And again, this sort of play by play of the aircraft approaching?

MR. DIGGINS: Yeah.

MR. AZZARELLO: Approaching D.C.?

MR. DIGGINS: I can't tell you the mileage, but somebody was clicking off miles for us.

MR. AZZARELLO: Could you narrow it down to when they started clicking off at the earliest point out? Like what was the farthest point out? Was it less than 10 miles, more than 10, less than 50 miles?

MR. DIGGINS: No, it was around the 50 range, but I don't know where they were measuring from, so downtown D.C. is a vague term and it was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

50 miles away, something like that. So away from more, I can't tell you.

MR. AZZARELLO: Not much longer then is your recollection--it was not much longer than 50 miles out if they were tracking it? Was it for--

MR. DIGGINS: I wouldn't hold me to 50, but that's about the ballpark figure. It could've been 40, it could've been 30. I don't know, but it was more than 10 I can tell you that.

MR. AZZARELLO: How did that end? They're giving you a play by play. Does it go down like single digits, like it's five miles out, it's four miles out?

MR. DIGGINS: No. No, never thought about this in two and a half years, so bear with me.

MR. AZZARELLO: Sure.

MR. DIGGINS: Somehow I think somebody said they see smoke from the Pentagon or something. And Jeff Logan and I went out to look out the window to see if we could see it, and I don't remember seeing anything.

MR. AZZARELLO: So you don't remember

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

looking out and seeing a plane approach the Pentagon area.

MR. DIGGINS: I'm not sure we could see the Pentagon from the window I went to.

MR. AZZARELLO: Which window was that?

MR. DIGGINS: It was in Peacock's office.

MR. AZZARELLO: And you were--

MR. DIGGINS: It was over in here, yeah. We didn't spend much time. We just went to look out the window to see if we could see anything.

MR. AZZARELLO: Could you see smoke?

MR. DIGGINS: No, no, I couldn't. Then I went back into the room, conference room.

MR. AZZARELLO: Did there come a point in time after that where someone reported the Pentagon was hit right after that?

MR. DIGGINS: Yeah, it came to us, and I don't know the time frame, but it came to us that a pilot, a C-130, reported seeing what he thought was a--I think he estimated it as a 757 or 767 or something. He said something about the type and the shiny airplane or something like that hitting.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I haven't listened to these tapes in two and a half years.

MR. AZZARELLO: --C-130--

MR. DIGGINS: The pilot reported an airplane had struck.

MR. AZZARELLO: He reported that a commercial aircraft struck the Pentagon?

MR. DIGGINS: Correct. He gave some details that kind of led us to believe that it might be the American 77. That's the thought I had in my mind.

MR. AZZARELLO: You just took me into my next question. You equated to at that point, based on situational awareness of what you were hearing that 77 was lost and a fast-approaching aircraft and then his report of the commercial aircraft, you took that to be 77--

MR. DIGGINS: As a possibility.

MR. AZZARELLO: Yes, you're not certain, but one of the things that entered your mind as a possibility.

MR. DIGGINS: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Do you know if prior to the report of the Pentagon being struck by an aircraft, by the C-130, was there any discussion in the telecon room about coordination with the military, either on that report of 77 being lost, or just in general a military aircraft being scrambled to assist?

MR. DIGGINS: Well, there was conversations about the fighters scrambling out of Otis for American 11 earlier on. I remember that. Are you asking about the military responding to American 77?

MR. AZZARELLO: Yeah, what I'm talking about I guess is, you know, on 11 there was a report, the hijack report reaches the military at some point and they launch Otis and they're up over the New York area some time after 9 o'clock. Was there any discussion about has these new aircraft--not new as the reports--new reports of other aircraft that could be potentially hijacks like 77 or later on 93? Was there any discussion about making sure that the military had that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information?

MR. DIGGINS: I don't recall. I don't recall. I'm not sure this was the purpose of the telecon that I was on.

MR. AZZARELLO: Tell me about that. We'd like your insight on that. Was that perceived by you as one of the purposes of that telecon, or was it perceived not to be to coordinate with the military--coordinate information such that whatever your situation awareness was in that room, that that was going over to the military side if they needed that information?

MR. DIGGINS: Again, I believe the purpose of the telecon was to understand what was happening in the system air traffic-wise.

MR. AZZARELLO: Internal to the FAA air traffic.

MR. DIGGINS: Internal, yes.

MR. KARA: At what point in time in this telecon now and in that room was discussion of United 93 and Delta 1989 come into play?

MR. DIGGINS: I think some of them are

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

happening within the same time frame, but I can't tell you when or how, but there was discussion about United 93 made an unauthorized turn, and it's headed towards Pittsburgh, and I remember the Pittsburgh towers--we got word that the Pittsburgh tower controllers were going to evacuate. But I can't tell you where in the time frame the discussion was had.

MR. BROWN: Do you remember if you first heard about 93 before or after the Pentagon--you heard that the Pentagon was struck?

MR. DIGGINS: I can't tell you that.

MR. AZZARELLO: How about at some point that morning you learned, I assume, that 93 was reported crashed somewhere in Pennsylvania. If you can, do you recall how soon prior to that that there was any reports about United 93 being a potential hijack or in distress or reports of, you know, this screaming frequency and the bomb on board? How much lead time would you say relatively speaking did you get at all on that coming over the telecon before it was reported crashed?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: I don't know.

MR. AZZARELLO: Did you get any--do you recall hearing reports though about 93 coming over that telecon before the report that it had crashed?

MR. DIGGINS: Oh, yeah. As I just said we were talking about it. There was discussion about it, but I can't tell you the time continuum of where that was. Prior to obviously a crash. You know, once I look at all the time sequences of all the events, I can give you a general idea, but I don't have it committed right to my brain.

MR. KARA: --Kenol's chronology. Is that what you put on your laptop?

MR. DIGGINS: Yeah, except for the mistake on the time, that's me. It was kind of confusing in the room, so I was in the middle of copying things off the board and typing out what I heard at the same time.

MR. BROWN: What was the time mistake you're referring to? Was there a particular entry?

MR. DIGGINS: Well, 9:47, first impact with the World Trade Center. Well, it was 8:47.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

So I think that was my initial mistake. I typed this one--the Pentagon and I just continued with the 9 and I just carried it on for the time frame.

MR. KARA: We're not holding you to the time you put in. That's a state of the art document as of the day.

MR. DIGGINS: Doesn't look too meticulous, but--

MR. KARA: Yes.

MR. AZZARELLO: You never talked to Pamela--

MR. DIGGINS: I remember looking at this after the fact, and I didn't get my laptop back for three months.

MR. AZZARELLO: -- believe she said that.

MR. BROWN: I definitely do believe that she said it.

VOICE: --

MR. DIGGINS: --ahead of time I could remember things a little better.

MR. KARA: Actually I'm sitting here--I hadn't looked at that in terms of '93, and I--On the left-hand margin the entries on '93--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: And we don't mean to suggest in any way, Dan, that that, you know, that those times are accurate. We understand there's a lot going on in the room, and you're getting information, you know, realtime and yet at some point along it ended, and I'm sure discussing the realtime information was important, you know.

MR. DIGGINS: I don't type as fast as--

MR. AZZARELLO: And if your recollection is different from, you know, what those times are, by all means we're interested in your recollection.

MR. KARA: And it's part of the sequence--

MR. DIGGINS: May I take a moment here?

MR. AZZARELLO: Yeah, go ahead, take your time.

VOICE: Can we stop the recorder?

MR. KARA: Yeah. We'll just cut it off.

(Pause.)

MR. KARA: We're back on the record with Dan Diggins on March 30.

MR. AZZARELLO: --give the chronology of events which we think was kept at some point in the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

situation room that day by yourself and/or others. Was that generally your recollection of the sequence of events?

MR. DIGGINS: Yes, it does.

MR. AZZARELLO: Tell us what you recall now.

MR. DIGGINS: Yes, it does. Talks about Delta 1989, and that's pretty much the way I remember it because when it became clear the pilot said we were not being hijacked or something, that's where I typed in capital letters. I remember that. And I remember the United 93 report stopped east of Pittsburgh headed eastbound. The VFR saw them. I remember that. I remember that now. VFR is another little--

MR. AZZARELLO: So is the report from the VFR--

MR. DIGGINS: From VFR. I remember that.

MR. BROWN: Where was it at that point?

MR. DIGGINS: 40 miles southeast of Pittsburgh, heading eastbound.

MR. BROWN: So pretty much southeast of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Pittsburgh headed eastbound?

MR. DIGGINS: Right. And then the countdown of an airplane headed towards Washington was--that countdown was for United 93, not American 77. I remember somebody giving us countdown, but evidently it was for United 93, not American 77. I just know it was an airplane headed eastbound.

After reading this, it looks like it's--

MR. BROWN: Okay.

MR. AZZARELLO: Okay, so you think that it wasn't then 77. The earlier countdown was related to 93?

MR. DIGGINS: --fast-moving aircraft 60 northwest to D.C. southeast bound headed towards D.C.

MR. KARA: That specific line item is a reference to '93 you think--

MR. DIGGINS: Yes.

MR. AZZARELLO: Which one is that? The 60 northwest down at the bottom?

MR. DIGGINS: --

VOICE: Okay, your recollection is that--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: 60 northwest.

MR. KARA: 60 northwest is a '93 reference.

MR. DIGGINS: Right. That's when they were counting down.

MR. KARA: And I'm not sure we got this on tape. I think we did, but you're the person that was typing these entries in that day.

MR. DIGGINS: Correct.

MR. KARA: And your source of information was one of two places, either coming from--so this was coming from the telecon.

MR. DIGGINS: Correct.

MR. AZZARELLO: Did you have a recollection that there weren't two separate mileage distances given on that day after--on the Pentagon and the 93? Could there have been two separate instances of report of aircraft approaching?

MR. DIGGINS: I don't believe so. I remember one countdown, and I remember the window I went to look out was up in the northwest direction.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

So that would make sense. I don't know what I was expecting to see.

MR. KARA: So there was not another at least aircraft in the system at this point in time based on your recollection of the chronology as you executed it that day.

MR. DIGGINS: Well, we were aware that the American 77 had lost radios and radar.

MR. KARA: That was the other loose airplane in the system at this point in time, 77 and 93. Delta 1989 was a different sort of an animal, and there was not yet a fourth aircraft sitting aside 11 and 175.

MR. DIGGINS: There was a TWA--something about refused to go somewhere, and there was some discussion about that, but I'm not sure that that was just the pilot's not understanding what's going on.

MR. AZZARELLO: Do you remember whether there was any discussion about military notification on that at the 93, if that's the one 60 miles out and it's approaching the Capital area,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and now you've had two crashes in the Trade Center and one at the Pentagon. I'm not suggesting that it should have been done from that area. I'm just asking was any discussion going on back in that conference room that geez, if it's approaching, it could be headed for, I don't know, it could be headed for us. It could be headed for the FAA building, it could be headed for another Washington building. Let's make sure the military--is anybody saying, hey, let's make sure the military had this info? Any discussion like that?

MR. DIGGINS: I don't recall that.

MR. AZZARELLO: Okay.

MR. DIGGINS: I think if there was, I would have typed it.

MR. AZZARELLO: Did you think at the time, though, that that was going on somewhere else in the 10th floor, or were you down at the other end, if you did at all? Did you have any understanding of that in terms of military coordination that that was a function being performed somewhere else in the FAA headquarters?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: I'm not sure my thought patterns even went in that direction.

MR. AZZARELLO: Okay. Fair enough.

MR. DIGGINS: We were still trying to understand what was going on with American 77. Again I was one of many people involved here, so I can't tell you about all the other participants.

MR. KARA: You said at one point you thought law enforcement was on. You thought it was the FBI. Do you recall any more about that when they came on and what their participation was?

MR. DIGGINS: No, but I remember some conversation, and I can't tell you what it was, but something maybe--on the telecon. Whether it was FBI, Secret Service, I don't know. I was left with the impression that there was somebody there.

MR. AZZARELLO: Was there any discussion that you heard come over that telecon about authority being given by the President or Vice President to take commercial aircraft out and shoot down whatever that was issued that day?

MR. DIGGINS: I remember hearing about it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and discussing it that day, but I can't tell if it was during the telecon or later on in the day when my activities took me out of the telecon. I don't know. I remember the discussion that day, but I can't tell you.

MR. KARA: Do you remember any discussion about an aircraft with respect to Air Force One?

MR. DIGGINS: Aircraft being what?

MR. KARA: Just being a threat to Air Force One?

MR. DIGGINS: There was some discussion of Air Force One being on the ground at Andrews. I remember that or something like that, and there was some discussion of the timing of the departure of Air Force One and somebody had some concerns, but I can't tell you. But I remember there was discussion about Air Force One. I thought I had it in here somewhere.

MR. KARA: On the ground in Florida? You said Andrews. I just wanted to--

MR. DIGGINS: No, I remember there was some discussion about Air Force One and maybe I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

just assumed it was Andrews or something. I don't know, but I remember--yeah, here it is. Air Force One. Airborne. I don't know what that means.

MR. KARA: Okay.

MR. AZZARELLO: Your recollection back here--do you recall talking about it later, or did you recall hearing about it over that telecon in Kenols' telecon?

MR. DIGGINS: Like I said I can't tell you. I remember some discussion but I can't tell you with whom or what venue.

MR. AZZARELLO: Well, let me ask you if you recall if it occurred in connection with hearing about--the fast-moving aircraft 60 miles out which you say now you're equating with United 93. Do you remember that being any part of the discussion, like as it's approaching, was there any discussion about all right, well, you know, what are we going to do. What's going to happen. Is anybody positioned to do something because there's been three crashes now. Was that not part of, as best you can recollect, not part of that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

discussion?

MR. DIGGINS: I don't remember. I don't really remember discussing too much military activity on this telecon because I would imagine I would've written it down.

MR. BROWN: Do you recall if anybody that came down into your room, that not your room, but that Air Traffic suite area, like Jeff Griffith, for example, somebody in that position in Air Traffic, or anyone like that at that level of management, did anyone like that ever come down into the room to discuss coordination of the military that was going on elsewhere on the 10th floor?

MR. DIGGINS: Griffith came down once, and Dave left the room and went out and talked to them briefly out in the hallway. So I don't know what those discussions were. I haven't--

MR. KARA: Where was Doug--

MR. DIGGINS: He was downstairs on the fourth floor.

MR. KARA: He stayed downstairs on the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

fourth floor.

MR. DIGGINS: Yeah.

MR. AZZARELLO: Can we go to--do you have anything else on the day of?

MR. KARA: No.

MR. AZZARELLO: Can we go to--sort of shift gears now a little bit and go post-9-11?

MR. DIGGINS: Okay.

MR. AZZARELLO: In your efforts to sort of go back and look at--realizing that there's a lot of issues going on in the air traffic systems. The national system was shut down and brought back up roughly a week later. But in the aftermath, in the immediate aftermath, say the first week after, we understand there were efforts made understandably to go back now and try to find out just what happened when with each of the four hijacked aircraft. What did the FAA know in terms of the field facilities and the controllers, when did they know it, who did they communicate it to, and they're just following the chain of communication as well as looking at the radar, to try to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

reconstruct what happened. Can you tell us about the extent of involvement if any you had in those efforts?

MR. DIGGINS: Well, that first night, or that first day, after I left the interview room or the conference room, I went down to my office on the fourth floor, and I proceeded to collect radar information on the four airplanes. It was sent to me via e-mail.

MR. AZZARELLO: This was later on 9-11.

MR. DIGGINS: Later on 9-11, yeah. Now we had an FTP site.

MR. BROWN: What's that called?

MR. DIGGINS: File Transfer Protocol. It's a website that you can transfer large amounts of information to. Both Doug and I were pulling radar information off the FTP site through e-mail. We were getting voice communication, digital voice communication sent to us.

MR. BROWN: Voice meaning the controller communications?

MR. DIGGINS: Controller, yeah. ATC

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

communication. I spent the rest of the afternoon working on that, and then in the early evening after I got some of this voice communication, specifically with United 93, because that was probably the most gruesome with all the voice communications that went across the ATC frequency.

MR. BROWN: Do you remember the--

MR. DIGGINS: Yes, I screened it and made a CD of it and eliminated a lot of background noise so it could be heard a little bit clearer. I did believe it enhanced it so you could hear what was going on, burned a CD, and actually went up to Marty Belger (sp) and company and played it for them. That was about midnight on the 11th. Also did some coordination with the FBI.

MR. BROWN: And you played that for the 93 comms? You put it on a CD and played it for Marty Belger?

MR. DIGGINS: Correct, and the head of FA Security as I recall. He was in the room.

MR. BROWN: Was that Canivan? Was he back then?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: Was that Mike Canivan (sp)?
Was he back from Puerto Rico?

MR. KARA: Or was it Lynn?

MR. BROWN: Was it Lee--

MR. DIGGINS: I can't remember the name.
It was just a fleeting moment in the office, and I
remember saying to Marty this is tough to listen
to, so you might want to discriminate who listens
to it.

MR. AZZARELLO: We heard a cockpit voice
recorder from 93. You hear like this screaming--

MR. DIGGINS: You hear a gruntle attack.

MR. AZZARELLO: Invasion of the cockpit?

MR. DIGGINS: It was pretty clear on the
ATC tape.

MR. AZZARELLO: Were you able to get an
approximate time then of the cockpit intrusion and
takeover from that--listening to the communications
of the air traffic controller?

MR. DIGGINS: I don't know if that
particular moment in time. Having that and the
radar information, I could do it, but at that point

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I wasn't focused on--

MR. AZZARELLO: Not that early on, but did you subsequently learn, though, then that I think the radar reduction data shows that the transponder would show up 9:40 or 9:41?

MR. KARA: Or rather 93--

MR. AZZARELLO: Yeah. By the way, I'm looking at the summary of air traffic hijacked events, Source AAT 20, and at the date on some of the radar reductions, or some of the radar data that says prepared by AAT 20 on 9-17.

MR. DIGGINS: Yeah, I did all those.

MR. AZZARELLO: Did you do these here?

MR. DIGGINS: Yes.

MR. AZZARELLO: So that was prepared roughly six days after the event, some of this data, September 17th?

MR. DIGGINS: Well, the--product was done--

MR. AZZARELLO: But it was ongoing--it was an ongoing work in progress.

MR. DIGGINS: Right. I started working

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that the night of.

MR. AZZARELLO: Actually started on 9-11 work.

MR. DIGGINS: Right.

MR. AZZARELLO: Yeah, actually--so I guess in the aftermath and the days that followed at some point you come to know that the transponder was shut off after the cockpit intrusion and the communications?

MR. DIGGINS: I knew it that night.

MR. AZZARELLO: Oh, you did know it at some point later that night?

MR. DIGGINS: Yes, because I had the radar information. The radar was sent to me. I could correlate the radar--

MR. AZZARELLO: Summary of it.

MR. DIGGINS: Yeah.

MR. AZZARELLO: When was the first transmission 9-28. Am I right?

MR. DIGGINS: Let me just--

MR. AZZARELLO: Unknown origin, and then it evolves in the screens, and I think--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BROWN: Could I see it?

MR. DIGGINS: The night of 9-11, I knew all this information. I put it together with a radar and some of the voice clips that were sent to me. And one of our guys was out in that direction and I directed him to bring back the original voice tape. He was out there, and he drove during the night, and he brought back the original voice tape.

MR. AZZARELLO: You got the original recording from Cleveland Center--

MR. DIGGINS: I told him to bring it back because I knew that the FBI would--

MR. AZZARELLO: Want to hear it?

MR. DIGGINS: Yes.

MR. AZZARELLO: Who actually did a lot of the legwork on the groundwork on putting this document together, this summary. Was it yourself and who else? Did you have anybody else helping you on this?

MR. DIGGINS: Oh, sure, I did. There was a whole bunch of us doing it. Doug Gould, Tony Mellow, Jeff Meyers.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Jeff Meyers?

MR. DIGGINS: Yes. Actually I think he was around, but I'm not sure he did much hands-on work, and Tony Ferroni (sp).

MR. AZZARELLO: Tony Ferroni you said. Would you say the four main people who worked on it were yourself, Gould, Tony Mellow and Tony Ferroni?

MR. DIGGINS: Yes, without question. Doug and I did most of the technical stuff, and I think Tony did the typing.

MR. BROWN: Doug did a lot of typing the work?

MR. DIGGINS: Technical stuff. He worked with the terminal radar and worked with the in-route radar.

MR. BROWN: So he just did technical radar work?

MR. DIGGINS: Right.

MR. AZZARELLO: What was your understanding as to the purpose of putting this together, or it was multi-purpose, but who actually asked you to it together? Who instructed you to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

develop this summary?

MR. DIGGINS: I don't know.

MR. AZZARELLO: Was it Dave Kenols--

MR. DIGGINS: I don't know. We knew what our duties were, and I was just putting the technical stuff together and I'm not sure. I'm sure there was a plan. I'm sure you can ask Dave or Tony.

MR. AZZARELLO: It's ordinarily the type of thing you'd get to work on in your division--

MR. DIGGINS: The technical stuff analyzed what happened. We were trying to analyze what happened.

MR. KARA: Let me put a question in here. All right, at this point in time and the immediate aftermath when your compiling the essential details, what radar information or what additional information did you get from either the 84th--or from the Northeast Air Defense Center?

MR. DIGGINS: I had all available radar information on the--I talked with the facilities themselves to find out--the field facilities--to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

find out what--

MR. KARA: The FAA field facilities.

MR. DIGGINS: FAA--I went through the NTSB to get information from--the 84th--also asked for any terminals along the way, any type of radar source that we could get, and I left it up to the other facilities because they knew their regions better than I did.

MR. KARA: That was on the radar site. Did you get any tapes or logs or that kind of information from the Northeast Air Defense Sector or the military?

MR. DIGGINS: Logs? You mean administrative type stuff like that?

MR. KARA: Right.

MR. DIGGINS: I didn't ask for that. I don't know--

MR. KARA: We're still on the immediate aftermath as it plays out over the months. Things are little bit differently, but let me just for the record. Very soon after the Northeast Air Defense Sector put together a briefing of events that day

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and within those, say, the first week after 9-11, did you have access to the Northeast Air Defense Sector's briefing of events that you recall?

MR. DIGGINS: I remember seeing something, but I couldn't tell you the source of it. I remember a military--

MR. KARA: Well, there was an additional briefing that was done, and that was done over at Andrews by the 113th Wing by the Air National Guard.

MR. DIGGINS: I was not part of that. I don't know.

MR. KARA: And the person who put that together is Major Kane. Do you recall a briefing by a Major Kane?

MR. DIGGINS: No.

MR. KARA: Okay.

MR. BROWN: When you say you remember seeing something from the military, was it like in the form of like a chrono, a briefing?

MR. DIGGINS: It was a document.

MR. BROWN: A timeline type document?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: Yes, yeah. But I can't tell you what source.

MR. BROWN: Did you have any--there's some logs here that are cited military logs from--did you have--I understand somewhere here at AAT 20 you might have had access to the log, the--log of events. Do you remember if you--

MR. DIGGINS: I remember having one in my hand, but I don't know where it came from. Maybe if you could show it to me.

MR. AZZARELLO: Sure. Does this look familiar? That's a copy of a log from the Northeast Air Defense Sector.

MR. DIGGINS: No, this doesn't look familiar. There was a typed one that I saw from somewhere.

MR. KARA: You also have provided by FAA, and it's dated 9-20-01, a list of times which represents notifications to the military. Does that ring a bell, or did you prepare that?

MR. DIGGINS: I didn't prepare that, but I remember watching somebody prepare it. I think it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was Tony Ferroni, but I'm not sure.

MR. KARA: You think Tony prepared this very specific list of notification?

MR. DIGGINS: I remember seeing it.

MR. KARA: Did that become an issue more than it had to be addressed by Tony and the staff, that includes you, about when the military was notified and what they were told?

MR. DIGGINS: Become an issue?

MR. KARA: Yeah.

MR. DIGGINS: Not that I recall.

MR. AZZARELLO: Do you have the military press release with the times? See if that's in there.

MR. KARA: I've got three FAA press releases. I didn't bring the NORAD one with me.

MR. AZZARELLO: I'm sure we have that. Do you remember seeing--there was a NORAD timeline that went out on September 18th, and it listed--it was bullet fashion with one page. It would have each of the four flights, FAA notification, when they scrambled and when the aircraft crashed.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: That's probably the thing
I'm--

MR. AZZARELLO: Is that what you think we
were looking at?

MR. DIGGINS: But I'd have to see it to
make sure.

MR. AZZARELLO: We don't have that with
us?

MR. KARA: I don't.

MR. DIGGINS: But this is not familiar to
me.

MR. AZZARELLO: Okay. Make sure I don't
have it with me.

MR. KARA: I have one but not the other,
John.

MR. AZZARELLO: You have that one, not the
other one, okay. I don't think I have a copy. I
want to take one shot. There's one folder here it
might be in. Well, let me ask you about--what do
you want to do?

MR. KARA: No, he was just saying there's
an online, and I said--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

VOICE: --

MR. AZZARELLO: Kevin probably has it at his fingertips, but one thing that I do recollect from the NORAD timeline is it had an 8:33 a.m. notification time on there for the press release, September 18th, for notification on United 175. It was one of the things we discussed with the NORAD officials, and it's actually on this list of--the list that I showed you was I guess was a list of notifications to the military regarding the four hijacked planes that the Commission asked the FAA to produce after the hearings. I believe this was in response to the hearing, is that correct, in May--

MR. KARA: This was done in the immediate aftermath.

MR. AZZARELLO: Okay, it was done--there's actually a date on there. I stand corrected, you're right, September 20th. So this was done within two weeks after. Because the New York Center asked our military liaison specialist to give military assistance, and you think that was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the source of the NORAD press release showing 8:43 as the notification for 175.

When you look at the radar data, they didn't change the transponder on 175 until 8:46, till three minutes after that, and it doesn't appear that the controller working 175 even recognized that the transponder was changed until about five minutes after because he was working American 11, which he was tracking as a primary at that time as a reported hijack. Do you recall that issue being looked at at all when you were putting together--you and the others were putting together the FAA summary of events and times of notification on 175 to the military?

MR. DIGGINS: No.

MR. KARA: John, you might just point out that on this document, he has this line item right here.

MR. AZZARELLO: This is all 175. It says--

MR. DIGGINS: I'm not sure I understand where you're going with this. Maybe I can--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

VOICE: If I might interject something. I apologize if I confused anything to you, but the times you're talking about aren't necessarily synchronized. What I think is between the military and the FAA.

MR. KARA: We understand that but--

VOICE: I understand that.

MR. KARA: Appreciate the fact that the--concerning 175, there are two times at issue that are in the public domain. One is the--and the other is the time we're about to discuss which is the 9:05 time.

MR. AZZARELLO: Initially at 9--on the NORAD press release on September 18th, they said at 8:43 Eastern Standard Time that the FAA notified the military about United 175 as a possible hijack. And there appeared not to be any source for that in the FAA records as being an 8:43 notification. I mean I'm not going anywhere other than trying to see if it was a topic of discussion on the FAA end when you were trying to put together the FAA timeline of--well, when did we notify the military

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

on each of the four aircrafts. And if it did break from what the military was saying that they believe the time of notification that they received was, if there was any discussion about that between the people putting together the FAA timeline and the people putting together the NORAD timeline.

It would seem to us that there could have and potentially should have been some cross communication between the two entities. You know, if--I'm talking about when I notified you with something, and you're talking about when you received notification from me of an event that, you know, one might think there was some interaction between the two agencies to figure out who knew what, when. And I guess if you look at the summary that the FAA put together, it says 9:05 according to the--logs is when they received notification of 175 as a possible hijack.

MR. DIGGINS: Okay.

MR. AZZARELLO: Do you see that entry? One of the reasons why we do want to show you the MCC log from--is because there is an entry in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there, a log at--this is Zulu time obviously--13:05, which equates to 9:05, United 175 possible hijack, Boston-LAX. That's why we asked you if you saw that because we were wondering whether or not that was the source of the--this is the--MTC--log, and it's cited in there. We wondered if it's something you looked at because it appeared somebody did look at it and try to put together the timeline of chronology of events.

VOICE: If I may quickly--and I apologize if I'm confusing this, but my observation is more mechanical, and perhaps I'm missing this because I don't--if the point is--the question is to what the specific times are. It can well be that the military clock is not the same as the FAA clock, so there can be a variation because they are not synchronized on supposedly on--

MR. KARA: And I appreciate that and that really is not the issue and we have separately checked the clocks on both sides, and we know what the error is, and the error is very small between the two. What we're looking at are the times that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

show up. For example, on the FAA press release in August, 2002, this 8:43 time shows up again quite definitively. So that's where we're coming from on that.

MR. DIGGINS: Well, I think I can explain it to you.

MR. KARA: Okay.

MR. DIGGINS: Do you have the transcript of the United 175? The ATC transfer.

MR. BROWN: I don't have it right here with me, but it's probably--

MR. AZZARELLO: It's in that book.

MR. DIGGINS: I think it's in here. Because United 175--American 11 passed underneath United 175. They crossed--

MR. KARA: Correct. That's correct.

MR. DIGGINS: American 175 was instructed to look for traffic down or where, altitude unknown.

MR. BROWN: 175 was actually--

MR. DIGGINS: And that happened at about 8:43 in the morning, okay? So United 175, he

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

looked for the traffic. They said altitude unknown. Then he switched over to New York Center frequency. His first word on New York Center frequency, "We don't know what's going on back there, but it seems like it's a hijacking. We need to get to your frequency to report it." That might be why United 175 is tied with American 11, and that might've been what was reported.

The United 175 said he heard something, so that might be the time because when you showed me your initial NORAD log, it talked about--that thing right there, it talked about we believe this is still related to American 11, but it's United 175 that's reporting it to New York Center. So that's probably the origin of that. It's not saying it was reported to the military. Probably saying New York Center asked to get military assistance. We believe this is related to American 11 because that was probably the--when he checked on with the New York Center, United 175, the controller says okay, we'll check it. He probably turned around and said to his supervisor this guy says something's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

happened on Boston Center frequency. New York Center probably entered something in their log that says they checked with the military about it. That's probably the origin of that. It's about American 11, not about 175.

MR. KARA: Let me continue the discussion for a moment because I looked at the radar reduction. The two flights crossed paths about 8:38. The discussion when he comes up on frequency certainly happens later than that and could be another timeframe that we're talking about.

But also in the transcripts we see from New York Center there's a call from the--desk at ZMY to the Northeast Air Defense Sector that is time contemporary to the discussion we're having. And I just put that out as another possible source of the 8:43 timeframe.

MR. DIGGINS: I think just the way that's written, it might be written wrong. It deals with American 11, but it's United 175 reporting events of the last frequency, and he doesn't know the call center of the airplane.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Well, this says that the Center asked the military liaison specialist to get military assistance--believe it relates to American 11.

MR. DIGGINS: Correct.

MR. AZZARELLO: And not 175. Understand.

MR. DIGGINS: So I think that's--

MR. AZZARELLO: Let me just give a little more background from what we've seen on that. When the 175 gets into New York air space, and then around 8:41, they get on and they tell the controller there listen, we thought we'd wait till you got to New York to tell you this. We've heard some--on takeoff, we heard some suspicious transmissions on takeoff from Boston, which would sort of coincide with when the cockpit conversations are calling on 11 with the hijackers in the cockpit saying stay in your seats, don't move, being heard by 175, okay, and he tells him about that. This is after he's crossed over 11 and looked for the altitude of 11.

MR. DIGGINS: Correct.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay, and what we're trying to figure out then if this is equated to a report on 11 back on September 20th, then this press release comes out in August of '02, and I think they still have--it says FAA notifies NORAD, Northeast Air Defense Sector, about the suspected hijacking of 175. Why would that still be carrying the day almost a year later if--

MR. DIGGINS: Somebody got confused. It was United 175 doing the report. It was somebody just getting confused --in there. Nothing happened at that particular moment in time yet to United 175. What are we arguing about?

MR. AZZARELLO: No, no, we're not arguing. We're trying to find the source of the 8:43 time because we don't see any call from New York Center and 8:43 to the military, and we're asking you then in your work on this and the other staff work on this summary of events were they able to find the call at 8:43, which would show that the military and New York Center was calling on anything, calling the military on 11 or 175?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: I don't know. I don't recall, but I think that entry has to do with American 11 as reported by United 175. We didn't know it was--

MR. AZZARELLO: No, and we're not--

MR. BROWN: We agree with you. We agree with you.

MR. AZZARELLO: Logically it would have to be if the call was made, it would logically have to be about 11 because 175 wasn't being hijacked at the time. We agree with that. We're just hoping that maybe you could tell us that you saw or was able to pin this to a source because we haven't been able to pin an 8:43 call.

And obviously you looked at part of that--not you particular, but the people at the FAA in their efforts to reconstruct what happened that day obviously pulled tapes from the various facilities, and I would imagine if there was a tape, an 8:43 call from ZMY to the military, that would be something that maybe you could help shed some light on for us.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: On your timeline--this is a contemporary document shortly after 9-11.

MR. DIGGINS: Right.

MR. KARA: That is helpful because you do not memorialize the 8:43 time in there, but then what's happened is, and there are other timelines out there etched in the public domain which have--this 8:43 time has assumed a mythology of its own, and we're trying to dispel the mythology of 8:43.

MR. AZZARELLO: Yeah, we're just simply looking for your help to see if we could further explain this mythology and pin it to something and say here's the data point that somebody along the way, you know, misinterpreted and suddenly they thought that it was on, you know, notification at 8:43.

MR. DIGGINS: 8:41 and a half. That's when United 175 checks on Boston Center and said hey, we heard something weird back there. It's not too farfetched within the next minute and a half somebody from New York Center talked to the MOS and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

said hey, this is what United reported back here, but what they did with that information, I don't know. But that's probably the--in this whole thing. So I don't know. It's the only thing that makes sense to me.

MR. KARA: You're the author.

MR. AZZARELLO: You're the author, so we're just asking if somewhere along the way somebody said, yeah, we have a communication from New York military about reporting an aircraft that they felt was in distress. But to your recollection, there was no case like that that your staff came across.

MR. DIGGINS: No.

MR. AZZARELLO: Okay. Because there's a call at 9:03 from New York military position to--. We don't have the live call, but what you hear is--it's made to the IV section, and you could hear another IV tech at--say second hijack, and this is occurring right about the time of impact, and the IV tech is saying--, second hijack. And then they repeat a call sign, United 175, and then a few

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

minutes later in that-- transcript, she says where did you get that from, and the woman in the back, the recipient of the call, says New York military guy. So that's on 175 because it's connected to the call sign, and that comes in at roughly 9:02, 9:03, at or about the point of the second impact. And frankly that's probably tied to getting in their log at 9:05. You got to give or take a minute for--on the time entry on the log on 175. If we could follow up just one last--

MR. KARA: Maybe we could just summarize for like--I think I'm not--at this point in time, we had the definity work.

VOICE: --

MR. KARA: Dan Diggins is one of the authors of "Summary of Air Traffic Hijack Events, September 11th, 2001." The 8:43 time which shows up in various documents we talked about is not captured in here. And this is a contemporary document that you did in the radar and the transcripts available to you immediately after 9-11.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. DIGGINS: Is that a question or a statement?

MR. KARA: No, that's just a statement. Is that an accurate statement?

MR. DIGGINS: I haven't looked at that thing in two and a half years. I can't tell you if it's in there or not. If you say it's so, then--

MR. AZZARELLO: It's not--we're not here to quiz you, and we're not trying to be adversarial. What we're struggling with is, as you could imagine, there's a lot of information in the public domain. Some of it's accurate, some of it is not. Unfortunately one of our tasks by the commissioner is to nail the facts of the day, and when nailing the facts of the day, you have to look at what's out in the public domain already. And if it's accurate, corroborate it, and if it's inaccurate, we have to explain that it's inaccurate. And with the help of you and the other good people at the FAA, if you can help give us some insight as to why you think it might have been an inaccurate report, we would greatly appreciate

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that.

It doesn't have--I don't think--so we're clear. I mean this is not a game. There's nothing here at 8:43 on United 175. It has the 9:05 time as the notification to the military on 175, okay? I wanted to ask you a question about the other two aircraft that came later in the day, the 77 and the Pentagon, and the 93 that crashed in Pennsylvania. And we'll certainly give you time to look at this because you didn't look at it in two and a half years, and you know what, frankly, if I had realized that you didn't know we were going to be going over this with you, my mistake or our mistake, we could've told you to look at this beforehand because I don't want it to be a quiz. I don't want you to feel like we're playing a gotcha' game because we're not playing a gotcha' game. And I would've liked it better if you had the opportunity to review it. If we had thought of that collectively beforehand, we would've afforded you that opportunity. This would've gone maybe quicker and you might not have felt like we're

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

trying to play a gotcha' game. But, please, by all means we're not playing that. We're just trying to nail the facts of the day. The facts of the day, just nail them.

And what I wanted to ask you is that on 77 and 93, and you can look at this if you want right now, there's no notification in there to the military for either one of those two aircrafts. And you can page through the chronology from the last two flights and then we want to just ask you a couple of questions about that.

(Pause.)

MR. KARA: We're back on the record with Dan Diggins on March 30th.

MR. AZZARELLO: Yeah, one of the things I wanted to ask you about is there was no notification times on--because of the military--on the last two flights. When we met with Dan Kenols, he said that that was one of the topics that I think--I mean I'm paraphrasing him. It was a hot topic of debate, or hotly debated or disputed subject matter in terms of what did the military

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

know when on the last two flights and what did the FAA know when on the last two flights. And I just wanted to tap on your recollection of that issue and any discussions that were had that you were either privy to, participated in or heard about notification on the list.

MR. DIGGINS: Don't remember discussing it. I don't remember it happening. I wasn't paying attention to military notification during the entire time.

MR. BROWN: During which entire time?

MR. DIGGINS: Through the events happening.

MR. AZZARELLO: Maybe you didn't, but somebody, right, thought it was important enough to put a military notification on the first two flights but not on the last two. And I guess my question to you is if we the reader, or someone picks it up and reads it, what if anything do they infer that there's no note entry for the last two? Are we to infer that that means that there wasn't any notification, or that the FAA didn't even know

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

whether there was notification or not to the military in the last two?

MR. DIGGINS: I can't tell you. I just don't know. I wasn't privy during the time about military notification. I wasn't paying attention if it happened or it didn't happen. And I didn't research that particular aspect of these post-events.

MR. AZZARELLO: Do you know if somebody did? Somebody must have looked at the--log and researched that aspect. Would you agree that it appears that way at least because, you know, somebody's referencing the--log in terms of when they say they were notified by the FAA of the first two accidents.

MR. DIGGINS: It could mean they were notified and nobody recorded it. It could mean that they were already on line here and the events as they were happening and reacting so notification wasn't necessary. I don't know. I mean all those things are possibilities, but I can't explain why it's not in here.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: You say it's your recollection it wasn't ever even discussed--you never participated in any discussion in trying to figure out what the notification was to all four flights and not just the first-

MR. DIGGINS: I didn't participate in any discussions about that. I'm left this job within three weeks of 9-11 happening, just after this document was published, and I was no longer in this position, so I can't tell you what happened after that.

MR. AZZARELLO: Did anybody have that role? Doug's working on it. Doug Gould, Tony Mellow, Miles Ferronti and yourself. Did you corroborate with one another? Did you talk about the roles that you each had in putting that together? I mean was it divided out in the roles? For example, did you say you were looking at radar and Doug Gould did some technical radar. Was somebody separately assigned to listen to all the comms or communications with controllers?

MR. DIGGINS: We were doing it all

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

together. Doug and I did most of the listening to the comms, synchronizing the-

MR. AZZARELLO: Doug Gould.

MR. DIGGINS: Doug Gould. We did most of that. As to looking to see if notification to the military was done, if that box was checked, I didn't do that. I can't speak for Doug whether he did or not. I didn't.

MR. AZZARELLO: Well, let's talk about the bigger picture in the aftermath of 9-11. As Dave Kenols said, in the aftermath of it as the following week approached, it was clear to him and I don't know if it was clear to you, but at some point it was clear to him that an AAT 20, they were asked to reconstruct the events and that Jane Garvey would be potentially responsible for going and testifying on Capital Hill before Congress to let Congress know what the FAA knew in the reconstruction of the events and what happened and when it happened.

And also on another hand, that NORAD and the military would be asked, and General Everhard

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was, the four-star general at NORAD, asked to go before Congress and give the military side of what happened, when and when did they know. And I think as Dave himself agreed, and you don't have to agree with this, but it would seem to us that one of the fundamental things that the parties would look at, the FAA and the military, is when did we, the FAA, know about each of the four aircraft, that they were potentially hijacked, especially when you get to three and four because now you've had two crashes in New York. And now it's sort of beginning to set in the system that this is intentional. So that if there's a third and fourth potential missile out there that's going to be used on the suicide mission that when do we have the first opportunity to recognize that--we, the FAA as a whole--and communicate that to the military who then have the obligation to get fighters up in the air and, if they get approval, do something in response to the attack on the country.

And I guess having said all that as a background statement, were you part of any of that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

discussion about trying to figure out when did the FAA know about all four aircraft, each of them individually, and then when did we communicate that to the military so that they could take action?

MR. DIGGINS: I wasn't part of that discussion.

MR. AZZARELLO: Don't recall any of that discussion.

MR. DIGGINS: I prepared the radar information with the voice communication and with other notifications in a PowerPoint presentation and in this to make a pictorial display of the events and how they happened, but it was never designed to include every particular notification, so I didn't have any discussions specifically about notification of the military on any of them. I included some, the ones I knew about, and the ones I didn't include, I didn't know about I guess.

MR. AZZARELLO: Okay. So to the extent that somebody did review the-logs that wouldn't have been you. That would've been someone else who contributed to the summary. To the extent that the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

logs, the military logs, are quoted for notification times in the first two, that wasn't you that was reviewing the logs.

MR. DIGGINS: Somebody had access to it, but it wasn't me.

MR. AZZARELLO: Okay, okay. Fair enough.

MR. DIGGINS: Okay, I think it was Ferroni, but I'm not sure. You have to ask him.

MR. AZZARELLO: Okay, okay.

MR. DIGGINS: Yeah, that's what I prepared.

MR. KARA: This is your PowerPoint--

MR. DIGGINS: Because it was hard to understand the sequence of events.

MR. AZZARELLO: I noticed that you do have the Cleveland Center tapes and the controller who was listening to the United 93 who heard the screams on board and all that. That's the tape I think you said you wanted them to drive over. Did you also, you and any of your staff, get help on this listening to the watch desk tapes? Like were they looked at as an area that we should look

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

at--we, the FAA--should look at and listen to to see--in terms of when did management or TMU people know about what was going on and what did they do with the information?

MR. DIGGINS: What watch desk?

MR. AZZARELLO: The TMU at Cleveland Center.

MR. DIGGINS: Okay. I didn't.

MR. AZZARELLO: Okay. I mean I asked that because I noticed that some--there's also some times given for notification from the Centers to the ROC, to the Regional Operations Center and also to the WOC, to your headquarters. And some of those I think are connected to calls that are from the watch desk of the various FAA in-route facilities, so I was just wondering if that was--

MR. DIGGINS: I did listen to some watch desk tapes, but I think it was the Boston Center and New York Center.

MR. AZZARELLO: Okay.

MR. DIGGINS: I'm sure I didn't listen to Cleveland.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Do you remember if--I guess maybe if you did, give you an example, of Cleveland--someone at Cleveland Center, and I think it might have come from the OMEC position, does call the Northeast Air Defense Sector about United 93 at one point that morning? Do you remember if you ever heard that, anything like that? Were they given that notification?

MR. DIGGINS: I don't remember ever seeing that.

MR. AZZARELLO: Okay.

MR. KARA: I'm looking right now at the PowerPoint demonstration which you put together. This is a dynamic presentation. I think we saw this and we were just given the slides, but this is your work?

MR. DIGGINS: Yes.

MR. KARA: And there's one entry. It's on the slide having to do with the return eastward bound flight of American Air 77, and the entry is "9:24 to 9:30, Eastern time. Dulles Airport ASR 9 radar displays the fast-moving primary radar

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

return. Several controllers working radar positions at Dulles observed the same primary target tracking eastbound." Do you recall or how will we determine the genesis of the 9:24 time as to why that says 9:24 to 9:30?

MR. DIGGINS: They're two separate entries.

MR. KARA: Okay.

MR. DIGGINS: The first one is--it's in red, and the one I'm showing is the actual looking at the radar after the fact, and that's when the radar presented itself in that six minute period in there. That's when the radar actually gave a return, so that's what the time is meant to signify. And then somewhere during that time, can't tell you when, you know, because--a report somewhere in that time that that happened.

MR. KARA: So we take from that that it's not necessarily at 9:24 that someone saw it on the radar.

MR. DIGGINS: Correct. That's when the radar first showed the target.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: That's when it could have been.

MR. DIGGINS: That's when the radar first showed the target.

MR. KARA: The radar--the Tracon radar distinguished from the--

MR. DIGGINS: Right. That's when it first saw the target.

MR. KARA: And do you recall when we visited the Tracon, there are two radars--Dulles and Martinsburg, West Virginia, and we were told that Martinsburg did not come into play in terms of the--

MR. DIGGINS: I was at Martinsburg, and you couldn't see anything in Martinsburg because of the hills.

MR. KARA: And you did check Martinsburg.

MR. DIGGINS: Yes.

MR. KARA: Okay. So the earliest the Tracon could have seen it--let me put it in your terms. The primary displayed at 9:24 on the Tracon radar--

MR. DIGGINS: Available for display.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Whether--saw it, I can't tell you that.

MR. KARA: Okay.

MR. BROWN: Can I see the other--

MR. AZZARELLO: Just another quick question if you know. On the FAA timeline release--you have a 9:24 as a notification on FAA notifies NORAD, the Northeast Air Defense Sector, about the suspected hijacking of American Flight 77. That's not in the summary, the FAA headquarters summary here--I said summary. There's no notification--in this summary, and from what we can discern from the tapes, the people that could have seen potentially 77, we're looking at ZBC or the Tracon, there's no calls out to the military at that time. The first call that we see comes from ZBC to the military around 9:34, three or four minutes before impact. At that point, they say we've lost. They called--because--wants to talk to them about other reports they're getting from Boston that involve potentially Washington, and so Washington Center calls and says well, let me tell you about the one we lost. We can't find it, but

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it's out there somewhere. We can't locate 77.

As far as we can see from our review indicates that's like the earliest that that call sign is even advised to--the military is even advised that there's a problem maybe with that aircraft, that call sign American 77 that's lost. We can't locate it. We haven't seen anything that would take that time from 9:34 back to 9:24 and make it even a suspected hijacking. Did you see anything of that nature along the way in putting together this summary here?

MR. DIGGINS: Well, I don't know. This was prepared a year after the event pretty much, and I don't know who prepared this and what they used for their source to prepare this. That was prepared within weeks of the event. We took whatever we had available to prepare that. I know it's the same government, same agency, but I can't comment on this because that doesn't make any sense to me.

MR. BROWN: What doesn't make any sense?

MR. DIGGINS: That time doesn't make any

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

sense.

MR. AZZARELLO: Okay.

MR. DIGGINS: Because at the time of the event, we didn't know that there was a primary target there. That's the first moment the primary target showed up. Nobody knew what that meant.

MR. AZZARELLO: Right. And that's what we've seen.

We wanted to see if that was your recollection.

MR. DIGGINS: That doesn't make any sense. I think somebody's taken some license with this.

MR. AZZARELLO: Let me ask you about--

MR. KARA: I'm sorry. Who's the OPR for that?

VOICE: You mean the name here?

MR. KARA: The office record.

VOICE: It says contact, William Schumann.

MR. DIGGINS: I don't know who that is.

VOICE: Okay.

VOICE: He may not be air traffic.

MR. KARA: Right.

MR. AZZARELLO: We'll talk to whoever put

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that together hopefully at some point, and one would like to think that if there's a press release on behalf of the FAA, that they might want to check with the investigators and the people who did the ground work. One might think that they'd want to do that. Far be it for the world to be round.

MR. DIGGINS: I can tell you right now 9:24, we had no idea where American 77 was.

MR. KARA: That's actually--

MR. AZZARELLO: And I appreciate you're getting right to the point. We just want to make sure we're not missing something. See we have to interview everyone because we don't know. You know, you've got a timeline there that says one thing. You've got a summary here that doesn't sort of coincide with that 9:24. We've got to talk to the people who lived it to see if maybe that's right, maybe this is right.

MR. DIGGINS: We were looking west. We weren't looking east.

MR. AZZARELLO: Thinking that it was on its intended path. Yeah, let me ask you about

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this. One other element that really strongly thrust itself into the situation that morning, one other report that gained a lot of traction, not just at the FAA, but at the military side, gained a lot of traction was a report came in after the two towers were hit, after 9:03, and before the Pentagon was hit. That American 11 may not be the aircraft that impacted the Trade Center, that it may still be out there and it may still be airborne headed south to Washington.

And in fact, I don't know if you or your people looked at this, but it's all over the Boston Center tape for Collin--who is the MOS guy. He calls--and says it may still be out there. And Doug Davis, who was working in the crisis center, he said that he got that information from someone in headquarters after the first two crashes and repeated it in the crisis room where everybody's manning the line. So I don't know where it went from there. But it got in the system and I can tell you we see it at various points of the FAA system and the NORAD system, a concern that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

American 11 may still be airborne. What do you recall about that?

MR. DIGGINS: We didn't know for sure. We absolutely did not know for sure, and if we did zero in and think American 11 was the absolute airplane that hit the North tower, you folks would be here critical saying well, it wasn't, if it wasn't, okay. So we didn't know who was who. The thing is this is a primary target fast moving. It makes sense it would be American 11 but not absolutely. There's a chance it could've been somebody else. You don't know. You just simply don't know.

Nobody had any idea what size the airplane was that hit the North tower at this moment in time, so you keep your options open. Like I said, I was pretty much 90 percent sure it was American 11, but there was still 10 percent that he could still be wandering around out there. That's what you're picking up on.

MR. AZZARELLO: What we're saying I guess is that if there was a thought at some point after

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the first two crashes in New York that American 11 may still be out there, then I guess that would have raised the issue then of what was the other plane--there was two crashes in New York at the Trade Center. So if 11 is still going south to D.C., then what was the other plane that hit the second Trade Center? Was there any discussion about that?

MR. DIGGINS: Not that I recall.

MR. AZZARELLO: Do you know if something entered the system to cause somebody to think oh, it may be American 11 didn't crash? Because obviously there's always a question, and I'm trying to draw a distinction that maybe it's a little bit of a fine line, but I think there's a distinction between--we're 90 percent sure that 11 went in, but we can't be virtually certain until we get some real concrete information after putting together the radar, listening to the comms, obviously if there were records to recover, and people putting together a--number and that would be one of the obvious ways too. But I did visit a distinction,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and tell me if you disagree, between that and you know what? We're now thinking, though, that that's incorrect that 11 went in there, and that we think it's heading southbound. That there's some piece of information leading someone in the air traffic system to believe that it's still airborne and heading towards Washington. I mean that's a little bit more specific--

MR. DIGGINS: I don't think his characterization is accurate.

MR. AZZARELLO: What characterization?

MR. DIGGINS: Something leading them to believe that. I don't think that's right. I think it's a possibility, and that's a lot different than leading you to believe that it's still airborne. It's just a possibility. And I think it's prudent if somebody did discuss that possibility.

MR. AZZARELLO: What I'm referring to is the conversation from Boston Center is they called--and they say we just got information from Washington that American 11 is still airborne headed to Washington, that it's not the one that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

hit. And you hear it on the military side repeat in--chat logs--

MR. DIGGINS: It's his opinion.

MR. AZZARELLO: It's not the one that went in there. From you're looking back on the events afterwards, it was just someone's opinion then that it didn't crash and that it was definitely still going southbound towards Washington?

MR. DIGGINS: It was a possibility. It was a possibility in my mind. Did I have any factual data to support that? No, but it's a possibility.

MR. AZZARELLO: Well, did another factor enter to bolster that possibility? For example, we saw that the New York Tracon at some point later that morning on 9-11 was recording the Sikorsky (sp) helicopter, they thought hit one of the Trade Centers. Somebody at the Tracon did a data radar reduction and said, pull the end tabs or whatever, and said we think that it's a Sikorsky helicopter that left Poughkeepsie at 8:03 was the first plane that crashed at the Trade Center. And I guess what

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I'm trying to ask is did that factor in? Did that cause somebody to then say well, if that Sikorsky hit the Trade Center, the first Trade Center, that maybe American 11 is still going to D.C., and we ought to give the heads up to somebody in D.C.

MR. DIGGINS: Keep in mind that the moment and time here right after the first one hit the Trade Center, radar replay is an instant. You can't just--

MR. AZZARELLO: I understand.

MR. DIGGINS: So if you're looking at the radar scope, and you saw a fast-moving target, unidentified target, and it looks like it may have terminated at the North tower, you don't know who it is, where it came from. You have an idea of the relative speed so you know it's going pretty fast, but you didn't happen to be the one monitoring the radar at that particular moment in time, you're going on--information from other people that were looking at the radar. And if that's the information you're going on, you're going to think of different possibilities.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And if I show you a radar route play one time because it's live, and you don't get the opportunity to see it again, your mind will go many different directions on what you think you saw. And that's what those people were dealing with at the time. So I can't speak for a guy that thought maybe American 11 is still out there in his reasoning, but I'm just telling you that I do remember some discussion, and I was just going by what somebody told me they saw on the radar at that moment in time. So I was using other ideas.

MR. AZZARELLO: And I understand that the day of things don't necessarily happen realtime, like getting radar. I guess my question is now more focused on after the fact when there's time to review it, and it's not 9-11, and it's 9-12, 13, 14, or 9-17, and when this is put together, did anybody consider whether or not that was an event, a report to the military that American 11 was airborne headed to Washington. That that was an event because it entered the system, that was something to be considered as to whether it should

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

be filtered somewhere in the timeline, that that was a report that the military, frankly at some point took action on, the report that it was still airborne.

MR. DIGGINS: Then you already know more than I do. I don't remember that.

MR. AZZARELLO: You don't remember any discussion about that, okay.

MR. DIGGINS: But I remember discussion about it may be still out there.

MR. AZZARELLO: Still headed--

MR. BROWN: Did that come over the telecon?

MR. KARA: On the telecon, was the companies on there? Was American and United on there?

MR. DIGGINS: Eventually. I'm not sure when.

MR. KARA: But not in the early going probably, but at some point--

MR. DIGGINS: Unless they spoke up. We didn't have a list--this was an ad hoc telecon

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

happening in realtime.

MR. BROWN: Do you remember if that came over the telecon that American may still be out there? Was that discussed by someone on the telecon?

MR. DIGGINS: I don't recall. It was discussed in the room, but I can't tell you.

MR. BROWN: You don't know whether it was live--okay.

VOICE: --

MR. DIGGINS: I'm sorry?

VOICE: --

MR. AZZARELLO: Yeah, the controller in Boston said it came from a telecon in Washington and from a week ago it wasn't--though it might have potentially been AA headquarters telecon, one of the various telecon's that were going on here at headquarters. So that's why we thought--obviously that's why we're asking Dan and we'll ask anybody that was part of any telecon because there might have been circular.

MR. DIGGINS: I do remember now some

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

discussion on the telecon about something coming toward Washington from the north.

MR. BROWN: From the north?

MR. DIGGINS: Right, but I can't tell you what time frame it was and how detailed it was. I think people are starting to see ghosts.

MR. AZZARELLO: After the first two Trade Center hits.

MR. DIGGINS: You know, the thing is primary targets, they're just dots in the radar. It's a moment in time trying to connect the dots. I was on the space shuttle investigation also when that came apart. Had a billion little dots out there. Which ones do you connect together to show which one's a previous snapshot in time.

MR. AZZARELLO: Was that the kind of thing he's talking about now is something that could be very helpful to us and help us piece this together. And one of our thoughts was or theories was that everyone now is looking for primaries at the second crash in New York. Everyone's more alert about primaries in the system because they had shut off

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the transponder and could someone have seen the primary target heading southbound from the north that they couldn't equate with a commercial airline or call number that they believed could be a commercial airliner based on the space in between the primary targets on the sweeps that they think, hey, this looks like a commercial jet, commercial airliner. We can't tie it to a call sign. Maybe this is 11, and maybe that's what caused the report to go out in the system and somebody in Boston hears it and says oh, and more affirmatively tells the military, hey, I think American 11 is reported it's out there.

That's why we're, you know, we're hoping to tap on everyone's memories to see if they can shed further light on what might have created that or led to that report that it was still out there. Do you remember if maybe somebody said on this telecon or in the room, hey, well, there's a primary heading south? Maybe that's 11. You know, maybe it didn't go into the Trade Center.

MR. DIGGINS: I don't remember it tied to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

American 11, but I do remember somebody saying there's a primary target heading towards Washington from the north.

MR. BROWN: From the north. Was it--that was before the Pentagon was hit.

MR. DIGGINS: Oh, hell, I don't know.

MR. BROWN: You don't know.

MR. DIGGINS: No, I don't know.

MR. AZZARELLO: Okay. Do you remember what that was--was it ever resolved like we find out where it was, and it was just a fleeting report?

MR. DIGGINS: I think it just went away.

MR. AZZARELLO: Went by the wayside.

MR. DIGGINS: Like I said, I think people are starting to see ghosts.

MR. AZZARELLO: Understandable.

MR. DIGGINS: That's your opinion only.

MR. AZZARELLO: Sure, sure. Do you remember if Boston was tied into that telecon?

MR. DIGGINS: Oh, yeah.

MR. AZZARELLO: Was that at a regional

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

level or the Center level? Do you remember?

MR. DIGGINS: Probably both, but I can't tell you.

MR. AZZARELLO: Okay, okay. Thank you. Anything more?

MR. BROWN: I think we definitely owe it to you to definitely ask you--very focused on changes to the system that could be effectuated some. I know there have been many since 9-11 already made by the FAA, including the--which is one that everyone cites that was very important--change in the system. You have a tremendous amount of experience, and you have a sort of nice meld of background. You were a pilot. You know what it's like to be a commercial pilot dealing with a large aircraft. You have radar experience and controller experience. And given that blend of experience you have, if you were sitting in the shoes of the Commission, and you had an opportunity to make recommendations to Congress as to what changes could be made, either technical changes, equipment availability that the FAA

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

doesn't have yet, staffing, resources, any changes you can think of that would either make the system safer against either to prevent the future attack or to mitigate the damage in the event of a future attack, using the AVH and, you know, against the background of use of aircraft by terrorists, what changes if any would you recommend making and have already been made or consider making?

MR. DIGGINS: You want me to just come up with something?

MR. AZZARELLO: No, and you know what? This is something you could spend the time to think about, and if you think of something that you think is important that you would like to see considered by Congress in terms of making a change to make the system safer, then you know what? By all means you can--you have Miles' card?

MR. KARA: He does now.

MR. AZZARELLO: You can call us or call Andy and tell him, look, these are the recommendations, you know, that I would consider making if it would make the system safer. I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

realize it's not the kind of on-the-spot--I would've thought it might have filtered down by now because we generally ask everyone.

MR. DIGGINS: It probably did.

MR. AZZARELLO: So if you do, there's something you think of, we'd appreciate your interest in this.

MR. DIGGINS: The only thing I can say to you is use a radar. The radar was a primary source to identify something's gone weird in the system for these events. I mean radar helped in the voice communication also, something like that.

Using radar to try to determine what a plane is doing is not an easy task. It's easy after the fact when you know the answer to tell what he should have done and what really happened. But during the time, you don't have the luxury of seeing the projection of where this things going to go. All you have is a little history on it. And there's many reasons why a plane loses transponders, and hijacking is about the thousandth thing that you have in your mind as a controller.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

So it's just very, very difficult realtime to use radar and try to make that leap that a loss of transponder and an unauthorized turn--I think we're kind of--we'll do that now but at the time--but the next events, trying to figure out what an airplane's doing by looking at the radar, they might be a little more creative.

MR. BROWN: Sure. You can think of a different way now.

MR. AZZARELLO: I think someone has mentioned the issue of whether or not aircraft, commercial aircraft, should have a transponder code embedded somewhere in the aircraft where if someone invaded the cockpit, they couldn't turn it off. Do you think that that's something that is practical and would be an option that should be considered, or does it have drawbacks having it permanently set on the transponder code where it can't be turned off, somewhere buried in the equipment of the aircraft? If it could be seen technologically, it could be done?

MR. DIGGINS: Oh, sure, it could be done,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

but then you have massive caught on the radar scope and then you can't do the job which the radar was intended to do-

VOICE: So many codes, they couldn't reassign them because they wouldn't have enough numbers.

MR. DIGGINS: You just assign enough numbers. I mean technically it's feasible operationally. It puts a lot on the--time responses. It's very difficult to do what the air traffic system was designed to do. The air traffic system was not designed to detect hijacking.

MR. BROWN: Right. Well, I think now there's more of a focus on that post 9-11. Or do you think not?

MR. DIGGINS: To be aware of weird things that might go in a different direction, but again it's not designed primarily to detect hijackings.

MR. BROWN: Do you think it could be improvements in there where it could be--I mean in the aftermath of 9-11, whether it's a role that--seems to be part of a role that's was put on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the FAA to some degree that now they have to sort of be, you know, investigates. Controllers have to have like the eye in the sky. They have to be sort of having an investigative hat on too that if something goes wrong, start to think well, is this a hijack. Is this another 9-11 when--

MR. DIGGINS: The choice of words you use is prevent. This is prevent. Radar is a historical information. Whatever you see on radar has already happened, so I don't know how you put--

MR. BROWN: Litigate, or litigate the damage, meaning potentially gaining an early recognition of the hijack in the system and reporting it to the military--position to take some action potentially if need be.

MR. DIGGINS: It's historical information.

MR. KARA: Okay, we're concluding the interview with Mr. Diggins.

[END OF INTERVIEW.]

I N T E R V I E W

MR. AZZARELLO: [in progress] --by the FBI and CIA and other agencies. This book this particular group that you're looking at today is a part of [unintell.] looking anything the day-of events that I'll saw we're looking at the immediate response to the attacks on the day of. And what we're trying to do is, at best we can, have a full and complete understanding of what happened that day and try to recreate it; particularly, with a real specific emphasis on the crucial morning hours when the four aircraft were hijacked. And then following on to the rest of that day. And we're looking at the interaction between the FAA and NORAD that day [unintell.]. So, obviously, that leads us to the FAA number of people interviewed including yourself. So, hopefully, you can bring us back, as best you can to that day, you know, events and what you were doing and your interaction that day with the events as they evolved.

And is there anything before we start that you want to ask of us before we start the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

questions, is there anything you want to talk about?

MR. GRIFFITH: No.

MR. AZZARELLO: Well, I guess, I'd like to tell you that we're collecting so much information and in an effort to make sure we collect it accurately, I mention [unintell.] tape record it--

MR. GRIFFITH: Sure.

MR. AZZARELLO: It's March 31, we're at the Commission Office in Washington and we're about to begin our interview of Jeff Griffith and I'm John Azzarello, Team 8, 9/11/Commission.

MR. FARMER: John Farmer, 9/11 Commission.

MS. SULLIVAN: Lisa Sullivan, 9/11 Commission.

MS. HYDE: Dana Hyde, 9/11.

MR. KARA: Miles Kara, 9/11 Commission.

MR. GRIFFITH: Jeff Griffith, citizen.1

[Laughter.]

MR. AZZARELLO: Jeff, thanks again, for taking the time out from your schedule to meet with us, we really appreciate it. And we'd like,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

actually, to get a sense--I know you said you were with the FAA for 36 years in total or thereabouts. And if you could give us a brief--it has to be because there's 36 years here--give us just sort of a flavor of the various positions you held at the FAA leading up to 9/11 and then, when you get to 9/11, tell us a little bit more, obviously, about the position you held that day and the responsibilities that were attendant to that position.

MR. GRIFFITH: Okay, I will. My total federal service was 36 years. I had--I enlisted in the military for four years in '66, after receiving a letter from the Draft. So, I went into the United States Air Force, four-year-enlistment and became an Air Traffic Controller. And my field of work was, really, a computer programmer, but I'd gone to vocational school and learned how to be a programmer. But ended up as an Air Traffic Controller in the Air Force. Served three and a half years, a year of that in Vietnam; discharged in January of 1970 and hired on with the FAA as an

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Air Traffic Controller in June of that year 1970.

I was a controller for a number of years; started out in a small place in Macon, Georgia; went to Atlanta, Georgia, as a controller; and then, in '76, moved into management and held different supervisory and management positions through the years. I won't go through all of those, but they were all Air Traffic Control-type jobs, staff jobs.

I ended up as the manager of Minneapolis in 1990; '91, I was the manager of Chicago for several years. And left there into a regional management position Chicago. In 1996, I came to FAA headquarters as an SES and was a program director in three organizations, all SESs. The first was the Airspace Management Group; in '97, I moved into the Ops side of the house and, essentially ran the Air Traffic operation from '97, as a program director for Ops and then plans and procedures. And then, in around '99 or 2000, I was selected as the Deputy Director of Air Traffic, which was the Deputy to the Air Traffic

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

organization, AT-2 was the designator for that if you're looking it up on the WOC chart, AAT-2.

MR. KARA [?]: That would be over in this--

MR. GRIFFITH: Yes, right here. AAT, I was the Deputy over here under the Associate. And that was the position that I held on 9/11 of 2001. Essentially the job was--we had 24,000 people in the group. Our Ops budget was about \$3.5 billion. And our job was to operate some 500-plus Air Traffic Control facilities on a day-to-day basis. And maintain, first, the safety and also the efficiency of the Air Traffic Organization.

MS. HYDE [?]: Who was the director of that on 9/11?

MR. GRIFFITH: Bill Peacock.

MR. AZZARELLO: And so, you would report to Bill?

MR. GRIFFITH: Right.

MR. AZZARELLO: And then from Bill's office it would be right to the Deputy Administrator?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: No, we went to the Associate which was--the Deputy Associate, was Peter Challen [ph], and the Associate was Steve Brown and then Monte Belger and, then, the Administrator, Jane Garvey.

MR. GRIFFITH: I had 15-direct reports, all but one of them were SESSs and they each had a certain piece of the group; we had nine regions; we had nine regional division managers and then we had a group of program directors, which was the job that I came up through and then a couple of staff people that--one of them did evaluations and the other one did international.

MR. AZZARELLO: When you were managing facilities in, you said Minneapolis and Chicago, was that en-route centers?

MR. GRIFFITH: No, they were both towers and TRACONS, approach control tower at the airports.

MS. HYDE: Did actual investigations report through Air Traffic Service group or through AAT?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: No.

MS. HYDE: Oh, I'm sorry, they're over there.

MR. GRIFFITH: Accident Investigation reports up to Regulation and Certification--

MS. HYDE: Mm-hmm.

MR. GRIFFITH: Nick Sabatini [ph].

MS. HYDE: Okay.

MR. AZZARELLO: You said they report to Nick Sabatini?

MR. GRIFFITH: Yes.

MS. HYDE: Yes, over here we have [unintell.] they're actually over here.

MR. AZZARELLO: Okay, and they report to Regulations?

MS. HYDE: Mm-hmm.

MR. KARA: Let me get one question out of the way here: Where were you at in Nam?

MR. GRIFFITH: Lu CAT [ph] Central Highlands.

MR. KARA: Central Highlands?

MR. GRIFFITH: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: As a controller?

MR. GRIFFITH: Right.

MR. KARA: You had all that heat--

MR. GRIFFITH: Mobile RAPCON [ph], we actually served Bucan [ph] Air Base and Koon Yahn [ph], and On Kay [ph].

MR. KARA: Right, and what year were you over there?

MR. GRIFFITH: Sixty-nine.

MR. KARA: I was down in the Northern Delta.

MR. GRIFFITH: Really?

MR. KARA: You didn't control me.

MR. GRIFFITH: No one controlled you. You were out of control.

MR. KARA: We did admire, I must tell you, we did admire the Air Force's ability to have air conditioned trailers for no electricity.

MR. GRIFFITH: We had to keep those radar units cool or they won't work.

MR. AZZARELLO: Jeff, could you give us pre-9/11, just a little like, flavor of what type

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of operational issues you would deal with on a normal, sort of routine, day-to-day basis?

MR. GRIFFITH: Okay, first thing every day, we reviewed the day before's operations to look at number of what we call operational errors, breakdown of separation. There would usually be anywhere from zero, which was usual, to 10 to, sometimes more than 10 a day. So, we'd get a briefing on what caused the breakdown of separation, how close they got, what was there a near mid-air collision report filed, those kinds of things. Then we'd go through and receive a briefing from the Command Center on the efficiency of the operation; how many delays were encountered; what airports; what caused the delays; was it weather; was it congestion.

And then we'd go through other things that were kept in the Administrator's daily log, like, runway incursions; anything that affected safety. We'd look at staffing problems, those kinds of things. That briefing in the morning usually took an hour and we'd get through that. Then, my job

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

as first level to the field was to go back and pick up the phone and call the division manager where these situations occurred and/or were significant and get a more detailed briefing and possibly schedule a telecon for later in the day where we would listen to tapes and get that kind of information.

And then, you know, with program responsibility, we usually had meetings to go through on budget; meetings to go through on modernization of the Air Traffic System, so we had a facilities and equipment budget, F&E budget that usually ran about \$2.9 billion a year and we were constantly looking at ways to spend money better and the different contracts; there were a couple of systems that were draining a lot of money and always answering congressionals and those kinds of things.

There was usually a lot of activity by the IG, so, you know, we'd have strategy meetings, we'd go meet with the IG. At times we would meet with the NTSB on closing out certain recommendations

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that they would have.

MR. AZZARELLO: Were you involved with the issue prior to 9/11 about whether or not to decommission certain of the primary radar capabilities?

MR. GRIFFITH: I was.

MR. AZZARELLO: Tell us about your involvement in that and your recollection of that issue.

MR. GRIFFITH: The FAA had issued some kind of a paper and I can't remember whether that was a decision document, I think that's what it was--a decision document to decommission primary radars. There are, I'm just going to say, as a matter of example, because I don't remember the exact number. But there are about 150 of these systems out there that, first of all, cost a lot of money to buy. And, secondly, cost a lot of money to maintain. Some of the systems, ASR 1's and 2's [ph] were 30- to 40-years old. And the quality of the radar you would get from those systems, was not as good as it could have been if it were a newer

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

system. So, the decision was made to--we went through the safety analysis--because right on top of a primary radar dish is another radar dish--a secondary--it's not a dish, it's a rectangular--there's a secondary radar that's getting similar information, the only thing it's not doing is it's not getting a skin ping from the fire of a signal from a transmitter or a receiver. But what the second one does is it receives the information that the aircraft has the equipment and it says here I am, here I am.

And the secondary radar is much cheaper because you don't have to process radar or anything else, you just have data and you flow it. So the decision was that primary radar was no longer needed to separate graphic in the [unintell.] environment. Now we were going to keep primary in the terminal environment and there are approximately 250-plus terminal radars out there that have a range of 60 miles up to 20,000 feet, something like that, where you still have primary coverage and you could--and the likelihood of a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

collision with an aircraft without transponder was in lower altitudes, because above 10,000 feet everybody had to have one of these transponders under the rules.

And, so, the whole idea was to provide safe and efficient air traffic control service, you did not need primary radar.

MR. KARA: At the high altitudes?

MR. GRIFFITH: Yes, at the high altitude. And, so, in an effort to save a significant amount of dollars that the FAA was spending on primary radar, that was--my shop, in fact, landed--when I was the program director for operations, which was Ops and Planning and Procedures, my shop ran it.

MR. AZZARELLO: It was your belief or opinion that the safety at those higher altitudes would not be compromised by the elimination of the--

MR. GRIFFITH: Absolutely, absolutely, in fact, in the air traffic control environment today, controllers don't look at primary radar above 18,000 feet, because that's called Class A air

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

space and you have to have a clearance juste to go above 18,000 feet in the U.S.

MS. HYDE: But they--as we understand it, the NTSB had objections and DOD had objections to this and, I believe, as I understand--and tell me if I'm wrong--NTSB's objection was that in the event of electronic failure of an aircraft, the rule says, yes, you need your transponder, but transponders do fail. And that you'd have a plane up there blind and you'd have a controller blind, in terms of directing the aircraft and, so, when--tell us a little bit about the--didn't the FAA do a study or some sort of safety analysis?

MR. GRIFFITH: Yes.

MS. HYDE: Was there a statistical analysis that was done?

MR. GRIFFITH: Yes, that was done by the certification people and they do a safety-risk analysis at 10 to the minus-seven or 10 to the minus eight, and we had long discussions about that. I can't quote any of that to you because I remember being involved in it several years ago,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

but--

MS. HYDE: Who are the certification people who do the safety analysis? Would it be here, airport certification?

MR. GRIFFITH: It would be, no, it would be under Nick Sabatini and the AFS people.

MS. HYDE: Oh, the AFS Flight Standards?

MR. GRIFFITH: Right.

MS. HYDE: Okay.

MR. GRIFFITH: Right.

MS. HYDE: Do you remember any of the debate from the DOD's perspective?

MR. GRIFFITH: I don't recall a debate with DOD. The NTSB was really the entity that raised the major objections. And it was because of what you said. But, you know, I don't recall any time in the last, I'll say 15 years where we've had a situation where an aircraft has lost total transponder capability at high altitude and it's been reported through the system. Now, if that did occur, remember the Air Traffic Controller's job is to always separate airplanes. And then radar is an

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

aid to do that. So, if for some reason you don't have radar capability, you revert to what we call procedural control.

So, every aircraft files a flight plan that's cleared on a flight plan route at an altitude. So, if, for some reason, you lose a target on an aircraft--

MS. HYDE: Mm-hmm.

MR. GRIFFITH: --then what you do is you protect that route from point to point at that altitude at the required separation. And then you use time after that. So, you'll protect that altitude for a period of time after that aircraft passes a particular point and then you tell them to report at point. And there are many waypoints, intersections, navigational points along these routes where you could, if you wanted to, you could get an aircraft to report to you every five or ten minutes, so you did have procedural controls that you used in the event of the loss of that transponder.

MS. HYDE: The DOD--thank you for

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that--the DOD concern, I believe, related to the perimeter of the country and to the extent that those were--and they might have been in the old system, too, I don't know how many [unintell.] 1's and 2's were around the perimeter.

MR. GRIFFITH: They're the new ones, though there are some fours.

MS. HYDE: The 1's and 2's were just in the interior?

MR. GRIFFITH: Right.

MS. HYDE: I see.

MR. GRIFFITH: ASR 4's were bought joint by the FAA and the DOD and there was never any intention to take the primary radar off of the perimeter sites, you know, it was only going to be in the interior.

MS. HYDE: I see. And the plan, do you remember, you used the word decommission--was the plan to go out there and essentially unplug and collect the equipment or was it just to let, through attrition, those that broke not to fix them--what was the decommissioning plan?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: The plan was to, when--and we had a date picked out--and I won't try to remember it.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: But we had a date picked out and on that date, we were going to turn the high voltage off on the primary radars of the selected sites. That did a couple of things for you: First, it meant that you no longer had to maintain the parts supply in case of outages, and there were significant outages that we were addressing. And, also, the personnel that were required to do the preventative maintenance checks on these pieces of equipment, which were very extensive, no longer had to do those, so you could use your person-hours elsewhere and, you know, as you were continuing to try to reduce the number of people that you have in the workforce.

MR. AZZARELLO: So they were going to be shut down--when you say turn the high voltage--

MS. HYDE: Turn the high voltage--

MR. AZZARELLO: Turn them off?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Turn them off.

MR. AZZARELLO: Not a phase-out, it was just going to be shut them down?

MR. GRIFFITH: Turn them off, yeah. And when you did that, then the plan was to come back, because, you know, the buildings would continue to be air conditioned because there was a secondary radar there.

MS. HYDE: Uh-huh.

MR. GRIFFITH: And you still had to do the requirements for secondary radar. And, you know, a sail would still be spinning that big primary sail around but, you know, you'd come back and eventually replace the antenna with just a standard antenna and pull the racks out of the building and those kinds of things. And then when you were building additional sites, they would be built to a different standard.

MS. HYDE: Mm-hmm. So you didn't really need to pull out the equipment because you had the secondary radar stuff co-located with it?

MR. GRIFFITH: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: You would just keep the building cold, service the secondary and turn off the power for the old ASR 1 and 2 primary?

MR. GRIFFITH: Right.

MS. HYDE: Do you remember, had that date happened by September 11?

MR. GRIFFITH: No, we never got to that. The NTSB had really raised some questions that, you know, as an agency, we did not feel comfortable moving ahead until we had resolved their issues. And so, we were working resolve NTSB's issues and we never got to the point where we even considered--like we always maintained the spare parts and, you know, we never went into kind of a transition of not buying spare parts and those kinds of things.

MR. AZZARELLO: Do you remember what some of the NTSB issues were that the FAA wanted to address before turning the switch off?

MR. GRIFFITH: The primary one that I recall was they were obsessed with this notion that an aircraft not under Air Traffic Control without a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

transponder would collide into an airliner full of people. And that their thought was that primary radar was something that would prevent that from happening. Which, could in a terminal environment, where those small airplanes fly, but, again, above 10,000 feet, their likelihood was, as proven through these safety-risk analysis, was nil.

MR. KARA: At any time in those discussions whatsoever did the notion that an airplane could be used as a weapon or hijacked and used as a weapon come up?

MR. GRIFFITH: No.

MS. HYDE: That someone would purposely--

MR. GRIFFITH: No.

MR. AZZARELLO: It was an electrical malfunction they were worried about?

MR. GRIFFITH: Right.

MR. AZZARELLO: And then a mid-air collision by commercial aircraft with one another?

MR. GRIFFITH: No, not with one another because, again the likelihood--the likelihood of a commercial airliner losing a transponder at the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

altitudes that they operated at, was just--it just didn't happen.

MR. FARMER [?]: What would, well, they would have had a GA at that altitude?

MR. GRIFFITH: Yes.

MR. FARMER: A GA at that altitude would--

MR. GRIFFITH: All above 10,000 feet.

MS. HYDE: We've been out and we've talked to a lot of controllers. They, as I recall, the testimony from the controllers we spoke to was, it happened sometimes, it wasn't frequent, but, like, maybe once a year at a high altitude, you'd have somebody lose their transponder. Certainly it happens frequently that you'd have to ask them to recycle as a controller--

MR. GRIFFITH: Oh sure, that happens.

MS. HYDE: But I do recall from the interviews that we had that every now and then you would have somebody have some sort of failure and lose their transponder. That's not to say--I don't think we talked to many controllers who ever had this sort of--had a [unintell.] lose all

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

electrical. But I think--

MR. AZZARELLO: Yeah, and that's the point that I--I did want to come back to that because I think you said just a little while ago that, did you say in the 15 years, sort of prior to 9/11, you don't recall an aircraft completely losing it's transponder that you could remember or being reported up to headquarters, certain?

MR. GRIFFITH: Right.

MR. AZZARELLO: I did want to come back there because it was my recollection, too, that when we met in the field with the en-route controllers, that they said, in talking about the events of 9/11, that it was very typical to lose radio for brief periods of time--

MR. GRIFFITH: Right.

MR. AZZARELLO: --pilot inattentiveness, malfunction. And then when we got to the transponder issue, there was enough controllers who said, unusual, but I recall it happening, you know, say, maybe once a year or, you know, once or twice in my career, where it's happened, where you've

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

lost the transponder, but not for a significant period of time?

MR. GRIFFITH: Right, I'll agree with that.

MR. AZZARELLO: You agree with that?

MR. GRIFFITH: But what I was referring to was for the duration of the flight.

MR. AZZARELLO: Okay, okay, I wanted to clarify it because I didn't know how long--

MR. GRIFFITH: Sure, I mean, the number one will fail and you'll lose, you know, you'll lose it and your computer datablock will go into what we call coast configuration. You know, it coasts along with it, so the first thing you do is check your equipment then you go to the pilot and say, not receiving transponder, reset, squawk, 2365. Okay, and, you know, the pilot says, okay, well, we'll just turn on our--we'll turn the other one on is what they'll say--and then they're turn the other one on.

MR. AZZARELLO: There's a backup one?

MR. GRIFFITH: Yeah, and then it come

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

right on.

MR. AZZARELLO: If they had temporarily lost transponder signal at an en-route facility, is that the type of event that you would expect, whatever it should have been reported up to headquarters?

MR. GRIFFITH: Not temporarily, but if an aircraft had lost a transponder for the duration, let's say, a transcontinental flight, that would be very, very unusual.

MR. AZZARELLO: Were there any guidelines, either formal or informal about that, like that would inform the field [unintell.] managers about when to report? Like how would--if I were a field facility manager and someone, one of my controllers said, you know, I've got a New York to L.A. flight and it lost its transponder, you know, for an hour of the flight, versus two or three hours, is there any--is that just use your judgement?

MR. GRIFFITH: No, that would show up. It would show up in two places: Each facility keeps a daily log of what happens in that facility.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay.

MR. GRIFFITH: And there's a person responsibility for filling out that log. So, if something happened at this minute, you know, they put it in the log. If something happens the next minute they put it in the log. Next, it's all reported to--a situation like that would be reported to the command center. And it would be in a Command Center daily log. And something like that would be briefed in that morning briefing, when I told you.

MR. AZZARELLO: That would be an event worthy of briefing headquarters?

MR. GRIFFITH: Right.

MR. AZZARELLO: Okay.

MR. KARA: Let me just--in your experience, at the headquarters reviewing each day, the events of the day before, it doesn't stick in your mind that there was a duration loss of transponder?

MR. GRIFFITH: It does not.

MR. AZZARELLO: Do you recall any of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

daily briefings let's say in five to ten years preceding 9/11 ever being informed by a Command Center that there were even temporary losses of transponder signals--

MR. GRIFFITH: No.

MR. AZZARELLO: --no? Okay.

MR. GRIFFITH: Even working in Chicago, you know, I mean, you know, we had a tower and approach--our approach went out to 40 miles up to 14,000, 15,000 feet. And I was the manager there for three and a half years or so, and, you know, we were working 3,500 airplanes a day in and out of there, and never in that period of time did we have somebody that had a complete transponder failure where we had to work them on primary radar, air carrier.

MR. AZZARELLO: And where would you rank the occurrences where you lose radio communications and transponder, any recollection of that ever occurring in your tenure? On either side, either at headquarters or in the field?

MR. GRIFFITH: Only in the event of a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

crash. And that's what happens when an airplane crashes.

MS. HYDE: When you have electrical, well, has there, that's complete electrical failure on a plane?

MR. GRIFFITH: I'm talking about commercial airplanes.

MS. HYDE: Right.

MR. GRIFFITH: If somebody had a Cessna 310 that's 40 years old, you know, that, you know, they take out on the weekends--

MS. HYDE: Right.

MR. GRIFFITH: --that's going to happen. What happens at 3,500 feet in [unintell.] conditions.

MR. AZZARELLO: But for commercial--

MR. GRIFFITH: In commercial airplanes--

MR. AZZARELLO: --you don't recall where it was lost other than for reasons of crash?

MR. GRIFFITH: Other than crash, no I don't.

MR. AZZARELLO: So, you never got back to,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I guess, shifting back to the primary radars the date was sort of, I guess, at some point, there was a date to shut down the primaries, but before that date ever occurred, before you reached that date, there were concerns that the FAA was trying to address that the NTSB raised, that they wanted to address before going forward?

MR. GRIFFITH: Never got there. So, then, I have to believe it was after 9/11, this group called JITANDA [ph] was formed, which was a joint military civil group that was looking at, okay, what are we going to do about having a common operating picture for everybody, because you had Customs and you had all these other agencies, now, that said, hey, we gotta know what's moving--

MS. HYDE: JITANDA?

MR. GRIFFITH: J-T-A-N-D-O.

MS. HYDE: J-T-A-N--I'm sorry, spell it again.

MR. GRIFFITH: J-T-A-N-D-O and it was Joint, I remember the J was for Joint, but--

[Simultaneous inaudible conversation.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: And, you know, we had generals and everybody on that thing.

MS. HYDE: Right.

MR. AZZARELLO: Sounds like a marshall art.

MR. GRIFFITH: It was incredible the number of people that went in there, you know.

MS. HYDE: You never knew radar was such a hot topic.

MR. KARA: It was joint but was it led by the civilian side or the DOD side?

MR. GRIFFITH: Both, it was led by General Eberhard [ph] from NORAD, four-star. An the FAA side was a guy named Jim Washington, who was our requirements director. And so they--and they had a whole lot of people working on that group with them. Because, of course, you know, what the military wanted was, you know, a 3-D, one-second update rates and we're saying, well, don't forget we don't need this to separate airplanes. Because you have to remember, when you put something like that in an operational environment, you have to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

take it out for maintenance. It doesn't just do that on its own. Sometimes you have to take it down for six hours, you know, just to--

MS. HYDE: And we can quote you on the military wanted 3-D?

MR. GRIFFITH: Yeah.

MR. KARA: One-second refresh rate. Universally shows up on all scopes that are of interest to it.

MR. GRIFFITH: They wanted 3-D, you can't [unintell.] one second. I mean, and I was kind of the bad-guy in the group, because, you know, I said, you don't want to put this in an operational environment, where people are screaming about being stuck on an airplane for six hours because of a radar lapse. You don't want to do that.

MR. AZZARELLO: Were you at these group meetings?

MR. GRIFFITH: No, I wasn't on a team--

MR. AZZARELLO: Were they based in Washington?

MR. GRIFFITH: Jim was on the team and his

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

office was given lead on it, so I sent people to it, you know. There's no sense in two SESs eating up all that time, so, you know, I sent some L-bands, 15s or whatever.

MR. AZZARELLO: Anybody have any radar issues?

MR. KARA: At this point, it's a little bit of a digression but it's on the radar side. Blank spots in the interior? Lack of radar coverage interior of the United States? Are you aware that there was absent coverage?

MR. GRIFFITH: Oh sure, yeah, you can look at the coverage charts. We had coverage charts, we knew where all the gaps were. And it's usually mountainous terrain because, you know, we try to put these things on top of mountains, but, you know, sometimes there are mountains that are still higher, so you know, mountainous terrain causes you to lose sectors of primary and secondary coverage, so, but you know, we know where they are. We have engineers that do all our coverage charts for us and all controllers are briefed. Here's where you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

don't have radar coverage. And we had minimum [unintell.] altitudes and, you know, all those things so that.

MR. KARA: Were there blind spots in the Eastern United States?

MR. GRIFFITH: There were a couple, yeah. In Pennsylvania, there were a couple.

MR. KARA: Is that knowledge that would have been commonly known? Could I as a private citizen or an interested citizen get on the Internet somewhere and learned where those--

MR. GRIFFITH: No,

MS. HYDE: You mentioned the coverage charts--so there were actual charts that were available to controllers as to where there was or wasn't primary coverage?

MR. GRIFFITH: Well, the coverage charts weren't available to controllers because they were a planning and an engineering tool, but the coverage charts were used to develop the training material the controllers, so instead of a controller looking at, you know five different

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

colors of lines that mean nothing, you know, you put that down into training and you give them one chart that says, look, in these areas you don't have radar coverage at these altitudes. And so, they're trained where that is and they learn it and retain it.

MR. AZZARELLO: The controller, are you saying?

MR. GRIFFITH: Yes.

MR. AZZARELLO: So that when they're working a particular geographic area, they're familiar with where gaps are?

MR. GRIFFITH: Right.

MR. AZZARELLO: And where is that chart, at the facility level that training?

MR. GRIFFITH: Yes.

MR. AZZARELLO: And where are the charts--the coverage charts, where would they be kept or maintained? Are they at headquarters, in the field, both?

MR. GRIFFITH: In the regional offices.

MR. AZZARELLO: Doesn't go below the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

region, though, the coverage charts?

MR. GRIFFITH: Only if requested.

MR. AZZARELLO: And headquarters, I assume, has a--the training people have--

MR. GRIFFITH: Yes, now, there may be, you know, out of a couple hundred, you know, 20 centers and a couple hundred approach controls, you know, there may be coverage charts at some of those facilities, but the idea was that, you know, we provided the information to the facility in a non-technical format and we didn't want them interpreting where, you know, we didn't want them interpreting. We said, look, you don't have radar coverage here, the flight check shows that they are given copies of the flight-check information because the flight checks are actually done by the facilities. But, you know, the idea is you take technical engineering information, you convert it to air traffic controller training information and then, you know, they apply that when they--

MR. AZZARELLO: So, the technical information that the charts would contain was--I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

want to see if I understand it correctly, was sort of converted into controller language and they were tutored on it in that respect?

MR. GRIFFITH: Right, the technical information, the diagrams, show, you know, the way radar works is it fires out all these signals and--it's nanoseconds and they're fired out and if it hits something it bounces back into the receiver and it picks it up and it measures the time that it took to do that and it says, okay, there's something there. But, you know, an airplane, you might get 10 or 12 hits on an airplane so you can validate the position of the aircraft and then, you know, you make assumptions for assigned range, et cetera. And say, okay, that's where the aircraft is.

Well, in areas where you have terrain or buildings or other things that, you know, either reflect the signal or prevent it from getting out in certain areas, then you are, you know, the technical engineering charts just have all this information about how many signals were fired and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

how many were received and all that. But what we do is cook that down into, in this area, you don't have radar coverage below 8,000 feet. So, if you're going to be vectoring airplanes, don't vector them in an area below 8,000 feet.

MR. AZZARELLO: You distill how much you tell the controller--

MR. GRIFFITH: right, between the 310 and the 330 radial off of a certain DOR from 25 to 30 miles, you don't have radar coverage below 8,000 feet.

MR. AZZARELLO: So you're oversimplifying the math ahead, I'm thinking, well, should that not be--if I'm the controller, shouldn't I have the radar coverage back if I'm at scopes or the manager there, as opposed to the region that doesn't have the scopes or the headquarters that doesn't--

MR. GRIFFITH: The controller does have it at the scope and they have it, either in a little TV display up there that they select a page on or in their position binder or something like this; or if it's significant enough for the map to be drawn

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

on the radarscope, then, you know, you can draw that on the radar scope with lines.

MR. AZZARELLO: Draw, you mean, the part that there's a gap in?

MR. GRIFFITH: Right.

MR. AZZARELLO: Right on the screen and they can see it as they're directing traffic--

MR. GRIFFITH: Right.

MR. AZZARELLO: --so that they know if it's going to go into a gap area potentially--

MR. GRIFFITH: Right.

MR. AZZARELLO: --or in a binder?

MR. GRIFFITH: Right.

MS. HYDE: If what you're speaking to--my sense is that you're speaking to the area of, primarily, low altitude where there's known to be, because of the terrain some significant airspace that's not covered by radar?

MR. GRIFFITH: Right.

MS. HYDE: That's what you're were just describing. I mean, we'll take this to the relevance here and I'm sure you know what it is,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

which is the flight 77 and the testimony and the statements from the Indie controllers that were controlling this aircraft and it disappeared and we hit our primaries and nothing's there. And the consequence of that was, essentially, that that aircraft went undetected for 30 minutes to Washington, without anybody seeing where it was because it made this turn and that turn was not captured on primary radar. And there it went in.

So, I--we've talked to those controllers, but their statement is that we didn't know that there was a gap at that particular area, you know, because this is at 30,000 feet.

MR. GRIFFITH: It probably wasn't.

MS. HYDE: Whatever it was.

MR. GRIFFITH: Mm-hmm.

MS. HYDE: What's your understanding of the situation that happened with 77? Is everything, have you known what I just told you?

MR. GRIFFITH: Oh, sure.

MS. HYDE: Yeah. So, what happened to 77, then? There wasn't a gap in the radar?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Well, you know, I would say what happened is, first of all, the four aircraft were at four different centers.

MS. HYDE: Don't talk to the four aircraft, just 77. Just what happened with respect to 77 in Indie?

MR. GRIFFITH: Okay, the transponder was turned off.

MS. HYDE: Uh-huh.

MR. GRIFFITH: The controller was trained to do something. The controller was trained to separate everything in front of that airplane because in all of history, for hijackings or any other situation where an aircraft has been taken over, the aircraft has always continued on a planned route of flight and gone to a destination and landed and some kind of negotiations were carried out--I'm talking about in the U.S. now.

MS. HYDE: Yeah, yeah.

MR. GRIFFITH: Some kind of negotiations were carried out. That was the hijack scenario that we trained to. And we--so, first of all, they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

didn't know the airplane was hijacked--first of all

MS. HYDE: Mm-hmm.

MR. GRIFFITH: All they knew was they lost the target. And they couldn't talk to the airplane.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: So, they did exactly what they were trained to do. They were trained to look ahead to see if any other airplanes were climbing or descending through that airway and immediately protect that block of airspace.

Now, while they were doing that, the airplane, obviously turned around and went the other way. And when airplanes are moving at 500 miles an hour, it doesn't take long for them to get out of that controller's area of jurisdiction. So, you're looking for an unknown at that point. You're not looking for a known.

MS. HYDE: Let me--the question I have is a primary radar question.

MR. GRIFFITH: Mm-hmm.

MS. HYDE: Is it your understanding that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

77 was picked up by Indie Center as a primary target after the transponder was turned off?

MR. GRIFFITH: I'd have to go back and look at the data to tell you that, because I haven't looked at the radar data.

MS. HYDE: Well, we have looked at it and it wasn't [unintell.] and we're looking at the subject. The consequence of that is and if you're--there's a controller here who feels very strongly about this situation, that he doesn't see anything--

MR. GRIFFITH: Mm-hmm.

MS. HYDE: --in front, to the left, to the East, nothing when that transponder turns off. Had there been a primary target in any direction, he would have been able to--as was the flight with Flight 11, happened to see the primary target, he would have been able to see that primary target, understand that it was likely to be the aircraft that he just watched. And watched the path of that aircraft.

MR. GRIFFITH: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Because there was no primary coverage, he was not able to do that.

MR. GRIFFITH: I don't know that to be true so I can't say one way or the other what the controller was thinking.

MS. HYDE: Yes, and I didn't mean you to. I really meant to address the question of the gaps in coverage.

MR. GRIFFITH: Mm-hmm.

MS. HYDE: The fact, as I understood you to say, controllers knew areas of the country geographic area where there wasn't coverage and that there was a process where they were trained on it and that there were maps given to them or maps available at their desk or at the scopes, whatever.

MR. GRIFFITH: Right.

MS. HYDE: Is it your understanding that that's universally that every gap in the country is, first of all, known by the FAA and then, also, memorialized somehow and then finally communicated to the controllers?

MR. GRIFFITH: Yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Every gap?

MR. GRIFFITH: Yes.

MS. HYDE: And how--

MR. GRIFFITH: It's part of the certification. But controllers are also given theory training on radar. They're given theory training on things like what happens when an aircraft turns, perpendicular to an antenna and the antenna is firing at the same rate the airplane is moving, so you don't see that airplane on primary radar. So, air traffic controllers are trained on navigational aids and theory and those other things. So, remember that we use--the FAA uses Air Traffic Control radar for separating airplanes. And when airplanes do something different and you have a non-logical environment where they're turning, descending, and the reflectivity of the aircraft is not re-enforced with secondary radar--

MS. HYDE: Mm-hmm.

MR. GRIFFITH: --then that's not what air traffic control is all about.

MR. AZZARELLO: You're understanding that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

when 77 did make its turn that it did go into an area where there was a lack of radar coverage, was that your understanding, after the fact and going back to look at this?

MR. GRIFFITH: I recall this general knowledge that we did not see some of these airplanes on primary radar. Now, I'm, you know, it's been a while and I'm not going to go on record and say it was [unintell.].

MR. AZZARELLO: Let's say, to the extent that there was a flight any one of them that did pass through a gap in coverage, do I understand you correctly to say that if it did, that the controllers should have known about that because they would have been trained on that--

MR. GRIFFITH: Yes.

MR. AZZARELLO: Okay.

MR. GRIFFITH: Yes, these controllers work in sectors every day of their life. They know where they don't have radar coverage.

MS. HYDE: But, to get back to your first point, when you're working high altitude--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Mm-hmm.

MS. HYDE: --you're not working a low-altitude sector, you never have reason to use primary coverage because, by definition, you're working planes at 30,000 feet and everybody has a transponder. So, how would they know from their experience in working that sector that there isn't primary coverage up there unless they were specifically told that at 30,000 feet in this particular area, you don't have primary coverage?

MR. GRIFFITH: Well, because they're trained for contingencies. And contingencies are things like what if you lose the secondary radar? Well, a controller is required to maintain the skill of the use of primary radar. And so, they should be, from time to time, when they're not, even though they're not required for separation purposes, they should be reaching over, you know, in DSR, they should be turning on their primary radar at certain times during light traffic at 10:00 o'clock at night where they're working three airplanes. And they should be refamiliarizing

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

themselves with their environment.

MS. HYDE: With the primary radar coverage in the environment?

MR. GRIFFITH: Absolutely, that's their job.

MS. HYDE: To me it seems inconsistent with the fact that the FAA is saying that they don't need primary radar coverage. So, how would you both have signed off on a plan to take primary coverage out of the picture because it's so irrelevant, but then be saying that controllers ought to periodically be just checking out to see if they have primary radar coverage in those areas?

MR. GRIFFITH: Because the notion of taking primary radar out of the en-route environment, was a plan. And a decision had been made on it. But controllers had not been trained that they were going to be doing things differently, so the training that they had was a radar environment with primary and secondary radar.

MS. HYDE: Okay.

MR. KARA: Can I make just one more

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

thought on that? Seventy-seven, there's a technical side to this which we are reportedly understanding and getting better in that and that is the matrixing system which has radar sort boxes and it would be a controller's contention, for example, that it simply wasn't on my scope, but it might have been in the system and didn't get there because of the matrix. Can you speak to that?

MR. GRIFFITH: I know that. I cannot speak to it from a technical point of view. I can speak to it from an operational point of view. You know the term is called mosaicking.

MR. KARA: Mm-hmm.

MR. GRIFFITH: And, you know, and I know that when systems are certified, they're certified based on the number of--you may have three sites that have coverage in the same area. And so, the automation system works in all of the target returns; it looks at the strength of those returns; and, you know, they may be--not may be, they're probably not at the same location, which is why we have separation standards, which is why separate

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

airplanes by five miles in the en-route environment, because sometimes the equipment may only have them four and a half miles apart, but, you know, we're showing them as five.

MS. HYDE: Right.

MR. GRIFFITH: Okay, so, yes, I understand from mosaicking, but I won't try to tell you from a technical point of view.

MR. KARA: Were questions asked by the senior management level in FAA about that anomaly, or the possibility of that anomaly with 77 in the aftermath of 9/11?

MR. GRIFFITH: No, not from me.

MR. KARA: Or that you are aware of at other senior level?

MR. GRIFFITH: No, I was not asked that, nor did I ask it.

MR. AZZARELLO: Any sense of how big these guys are on the radar?

MR. GRIFFITH: East of the Mississippi River, they're very small, if at all. And as Dana said, in the terminal environment, where, you're

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

down, you know, 12,000 feet and below, you're going to have more of them because, you know, airports have buildings around them. And different things and terrain, but at the high altitude, there are enough of these sites where the number of gaps East of the Mississippi would be very small. I'm not going to tell you they don't exist because sometimes an inversion of temperature where the air gets warmer as you go up, bends radar signals and so you may have a temporary time where you're not getting a good primary target because of temperature inversion. So, the controllers are briefed and trained on all these anomalies.

MR. AZZARELLO: How about West of the Mississippi?

MR. GRIFFITH: There are gaps because of mountainous terrain, yes. And because of sparse population, we don't have them as, you know, in as many places, so, you know, you're going to be working at some of the long-range ends of the systems in some cases.

MR. FARMER: So, if a plane were flying

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

off primary radar for 10 minutes or so, would that be--and 77 disappears from radar for about what 12 minutes?

MS. HYDE: The question is it doesn't disappear from everybody's radio?

MR. FARMER: Well--

MS. HYDE: It disappears from the controller's at some period in time.

MR. FARMER: Yeah, and one of the theories is that it was flying through gaps in the radar coverage. That's a pretty big gap, basically.

MR. GRIFFITH: Yes, I would say that, you know, it was a combination of things that caused us not to be able to see where that airplane was once we lost it.

MS. HYDE: Combination of the matrix problem on the radar?

MR. GRIFFITH: Well, it could have been a matrix, it could have been a gap, but it's also the whole thing to do with, you know, flying perpendicular to an antenna, you know, who knows the attitude of the aircraft? Normally, we work

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

airplanes in a certain climb-descent configuration, turn-rate configuration. So, you know, and the speed of the aircraft.

You know, the controller's sector that was working this, I would guess, if the airplane would not have been in that controller's sector, more than 10 to 15 minutes because, you know, we have seven--we have this airspace divided up into 753 different sectors. And so that controller has an area this big. And once that airplane gets outside of there, then, you know, you've lost your chance of opportunity to find it. Let me pose this, maybe you can help us answer this question. American Air 11 does significant things. It, first of all, it goes NORDO, then the transponder stops and there's some change in altitude and direction. Moreover, it's being worked in two different en-route centers, Boston and New York.

MR. GRIFFITH: Right.

MR. KARA: Yet, the controllers of record for 11 are able to track all of that and establish another track to 11 also on American Air 11.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Controller in Indianapolis, only one center involved, not two, was faced with the same set of circumstances that occurred with 11 are not able to do that. How do we explain that to ourselves and to the American public?

MR. GRIFFITH: It's like trying to explain two different drivers going through an intersection. One hits the red light and goes through and the other one stops. You know, controllers personalities, while in many cases, the same, they're just like every other part of, you know, the population, they're all different. And so, you know, these particular controllers were sharp, they were on top of it, they nailed it, you know, on 11. On 77, you know, I don't know how many airplanes--I don't recall how many airplanes the controller was working, but--I mean, you've got to remember these people come to work every day and nothing like this ever happens.

MS. HYDE: Is that your assess--did you look at the controllers who lost 77? I mean, is that based upon you having looked into this issue?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: No.

MS. HYDE: Okay.

MR. GRIFFITH: But listen, I've managed big facilities--

MS. HYDE: But do you know that 77 that from an equipment standpoint that the controllers who were working 77 actually had the means to see that target?

MR. GRIFFITH: Oh sure.

MS. HYDE: That you think there was a primary target displayed to their scope?

MR. GRIFFITH: Well, I don't know if there was or not, but--

MS. HYDE: So, if there wasn't a primary target displayed to their scope, what were they to do?

MR. GRIFFITH: Controllers have capability--first of all to turn primary radar on--

MS. HYDE: Okay, so if you have a controller who tells you, the minute I see it disappear, I hit primary, and there's nothing there.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: The second thing they do is they raise their hand and get a supervisor over there--

MS. HYDE: None, none.

MR. GRIFFITH: And then everybody--

MS. HYDE: Everybody's looking at a blank scope because the equipment doesn't record it.

MR. GRIFFITH: I don't believe that.

MS. HYDE: You don't believe that?

MR. GRIFFITH: I don't believe that at all.

MS. HYDE: You don't believe--so you think that actually there was--do you know what was--did you look into whether the SATORIS and all the--

MR. GRIFFITH: I looked at them all, yeah.

MS. HYDE: And so you think that the controllers for 77 did see it or, I'm sorry, could have seen it had from an equipment standpoint?

MR. GRIFFITH: Well, I know from what you've told me that the controllers on 11 started a primary track on 11 and the controllers in Indie had the same capability.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: But, as I understand it, they didn't have a primary target being communicated to that scope.

MR. GRIFFITH: They didn't see one.

MS. HYDE: You think they didn't see it?

MR. GRIFFITH: That's what I'm telling, you they didn't see one.

MS. HYDE: And this is based on you going back and looking at the SATORI and this isn't your supposition, you know, this to be true?

MR. GRIFFITH: Well, I'm not going to--I looked at a lot of data and it's been a long time ago. So, I'm not going to sit here and tell you that I recall every detail.

MS. HYDE: It seems like you're pretty certain of your recollection and so, I--and I appreciate that, I very much appreciate it and we need to know that.

MR. GRIFFITH: Well, I know how the system works and I know that the FAA spends millions and hundreds of millions and billions of dollars for infrastructure.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Right.

MR. GRIFFITH: And the purpose of that infrastructure is to provide the best tools. Now, I will agree with you that we had made a decision to turn primary radar off--

MS. HYDE: Mm-hmm.

MR. GRIFFITH: But that's not part of this discussion at all.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: I ran that infrastructure for a number of years and I know there are holes in it. I know that, you know, the training standards that people are training by and for me in my experience to believe that someone would not have been able to see a primary target on that aircraft, it's very difficult for me to accept.

MS. HYDE: Did you, for 77, look at the issue of the Higbe [ph] tower and the other tower whether the signal actually picked up a target and whether it was communicated to Indie Center?

MR. GRIFFITH: No.

MS. HYDE: No, okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: You're doing well, John.

MR. AZZARELLO: Before we get to the hijack scenario, in the event of an aircraft accident, a crash, what would you play individual at Air Traffic Division, you, Bill Peacock, what roles would you fulfill in the event of a crash or oversee the management of the inquiry, tell us about that relationship--

MR. GRIFFITH: Okay.

MR. AZZARELLO: --between you and Accident and Investigations and how that works.

MR. GRIFFITH: Okay, I'll define crash. If it's a Cessna 172 on a Saturday morning, I'll learn about that on Monday morning. If it's an air carrier with people on it, I'll learn about it in a few minutes. And, you know, this particular situation happened, we were all there. Had we not been there, we had a very disciplined notification process where everything is brought into the Washington Operations Center. But, you know, inside of Air Traffic, it goes to the Command Center, we carry text-pagers with us all the time

MILLER REPORTING CO., INC
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and, you know, so division managers and everybody would get that word to Bill Peacock and I very expeditiously.

Now, my job at that point is to Peacock and I--our job is to get as much of the information as we can and begin briefing to the Administrator, because she's going to have other associates in there, and you know, that was kind of the protocol we had with Steve Brown and Peter Challen was, you know, we were a team of Peter and Steve and Peacock and I were a team. So, you know, we always worked as a team. so, if anybody had information we all worked it together on something significant.

MR. AZZARELLO: So, if there was an accident you would get your information from? Who would you get it from in order to brief the Deputy and the Administrator?

MR. GRIFFITH: Well, the first notification would probably come on the text-pager from the division manager because the Washington Operations Center usually does some kind of a call-up. You know, they'll configure, maybe, 8 or

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

10 people on one conference at a time. And so our people normally, just, you know did the direct notification. Also, the Command Center, as soon as something like this happens, the Command Center finds out about it from the Center, right away. And then, you know, the Command Center does an automatic text-page to Peacock and I, so, you know, we're either in the building headed down the hall or we're at home grabbing our coats and cell phones and headed for the building.

MR. AZZARELLO: And who were the people who would look to get the data to reconstruct the accident or the cause of it and look into those issues?

MR. GRIFFITH: We had our evaluations group and quality insurance staff; those people were 24/7 call. And as soon as anything happened, their job was to work with the same--with their counterparts in the 9 regions. Because we really trained these people to be experts in handling these situations. And the worst thing you can have is some SES like me trying to say, hey, you know,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

did we get an ARPS [ph] print-out, did we do this; did we do that, you know? Usually they try to be real nice, but, really, what they say is, hey, back off a second, you know, we're doing everything right, you trained us right. so we work down through our quality assurance people in headquarters who reported directly to me, into the regional office, who reported to the Air Traffic Division into the facility. Okay?

So, if it were a center, that network goes right from the people in the facility talking to the controllers and the supervisors that were working the event, right up to the region and, you know, right into the front office.

MR. FARMER: Center, Region, Command Center, Headquarters, is that right?

MR. GRIFFITH: Well, at that point, once notification's made by the Command Center they're kind of off to the side, so it works all the way through the QA chain right into the front office.

MR. AZZARELLO: I mean who does the actual--is it AAT-20, is that the office that does

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the Accident Investigation, Dave Cannoles' group?

MR. GRIFFITH: They do the aircraft incident investigation. The accident investigation is done by Nick Sabatini's group, AAI. And those people, they work hand-in-hand all the time, you know, know what I mean. So, you can imagine they're automatically talking to each other, too, you know. And then, you know we're putting a team together. A team's going to go to the site. You know and support the NTSB. We have union requirements where union reps are permitted, via the contract, to go to the site. So, you know, all that is put in motion because we have these check lists. We put everything in motion and we get everybody where they need to be.

Because, you're right, you know, everybody wants data. They want to know right away. So, we're playing tapes, we're interviewing controllers; we're getting radar data. The AF people are out certifying equipment to make sure it was all working properly, you know, and so, in very fast order, you know, you put together, you know a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

one-page to the Administrator, okay, this is what we know.

MR. AZZARELLO: You mean, equipment and control and conduct all those related issues?

MR. GRIFFITH: Listening to tapes. We'll listen to see if a controller made a mistake, if they inadvertently issued a wrong altitude; if they inadvertently issued a wrong heading. We're looking. And we're also looking to see if there were any negligence on our part, you know, where a controller, you know, may not have been paying full attention to duty. We do drug and alcohol testing, all that stuff's going right away.

MR. AZZARELLO: And I want to shift gears a little bit and talk about protocol for hijacking pre 9/11.

MR. GRIFFITH: Okay.

MR. AZZARELLO: If there was a report of a hijacking in the FAA system. Tell me about what role you would play in your office and the interaction white-board the other FAA facilities.

MR. GRIFFITH: Hijack situation, people

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

would convene in the Washington Operations Center. The FBI would immediately be brought on-board because they have the lead--had the lead. And, you know, again, what you're doing is trying to stabilize the situation; get information; keep airplanes out of the way. And then begin to, you know, work through the scenario with FBI as the lead and, you know, bring it to some kind of resolution. So, our job is to, you know, be right there in the Washington Operations Center, linked up with the Administrator, in conference areas, you know, and maybe every 15 minutes we would--

MR. AZZARELLO: Let me ask you, the FBI's the lead law enforcement investigating agency. But what about the--enlisting assistance from the military to track the aircraft? How would that--tell me about the protocol for that pre-9/11 for getting military assistance?

MR. GRIFFITH: Notification capability included DOD. One of the things that we had in my group was a group of senior military officers that were in our building. We provided office space for

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

them. They reported to me. There was a senior person that oversaw the group, but it was the ability for us to have instant dialogue with the military on anything that was going on in the system. And so, prior to 9/11, you know, hijacking events were serious, they were critical. But they usually could be orchestrated. So, you could plan what are we going to do in the next 10 minutes, be we're talking to the airplane, they're on radar surveillance; we know where they're going. They told us they're going to go to this airport. You know, you're beginning to--other people are beginning to do things about that, if they--

MR. AZZARELLO: But before we get to that factually the operations and tracking the operations and tracking the aircraft. There's still the notification to the military. You say you had these senior military people at headquarters and they reported to you?

MR. GRIFFITH: right.

MR. AZZARELLO: And are you saying that one of the purposes of having those people there

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was to coordinate a hijack event?

MR. GRIFFITH: to make them aware of a hijack event. You know, before 9/11, as I said, the whole hijack scenario was a procedure written down that was orchestrated. And so--and you had time to deal with things. And if the military, if there were a plan being considered to involve the military, then, you know, it was done at the high level and it was done as part of the people in the Washington Operations Center.

Okay, the military people, you contact your office and, you know, if you know, if the Administrator or the Secretary of Transportation wants to do this, what will you do about that?

MR. AZZARELLO: What were the military people, the senior military people at headquarters, what would they do on a day-to-day basis, being that hijackings didn't occur on a sort of, you know, obviously, on a day-to-day basis? What would they do then?

MR. GRIFFITH: Well, we had--the FAA was formed in 1958 under the Act, the FAA Act. And

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

before that, we had a Civil Aviation Agency. And we were like many other countries around the world where you had a civil agency and you had a military environment. And you always kept everybody apart. So the military had all these big pieces of airspace and the civil airplanes had to stay out of it. And, you know it was, really, not a very good joint use operation.

The Act of '58 was intended to create a federal system where the FAA promoted air commerce and supported the military. And under the Act, we began to set up a series of agreements, back and forth, between DOD, DOT, FAA and these agreements had things in them, like, you know, we had agreements with, for example, the different commands of the military. Not the different--not like with the Army or the Navy or different commands, like, inside of the Air Force or different commands inside the Navy. And these agreements set up protocol and put processes and procedures in place to operate the system as a federal system where the military and civilian

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

airplanes could operate in the entire airspace and everybody accomplish their mission.

So, you know, if you dig down through the Act and the different agreements between the FAA and different military organizations, you'll see that there's protocols and procedures. And we've got a handbook this thick on military operations; 7610.4. And so, and a handbook on operations and administrations 7210.13. And all these agreements, processes, and procedures are laid out in there.

MR. AZZARELLO: How long were the senior military people at the FAA headquarters, how many years, that you're aware of?

MR. GRIFFITH: Many years, I can't tell you exactly.

MS. HYDE: Who were these folks on 9/11?

MR. GRIFFITH: What?

MS. HYDE: On 9/11, who was the senior military person?

MR. GRIFFITH: Cheryl Atkins.

MS. HYDE: Colonel Atkins?

MR. GRIFFITH: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Now, I'm trying to get an understanding on what the senior military people, like Cheryl Atkins would do on a day-to-day basis, absent a hijacking incident.

MR. AZZARELLO: They reported to Bill Peacock and I and I was the rating official for several.

MR. AZZARELLO: Let me ask you this. If you're military, let's say the Air Force, NORAD, is running a major exercise, which, actually, is one of the things that did happen on 9/11. And they're coordinating, obviously, the reservation of airspace for them, wherever it may be [unintell.] five or whatever to conduct their exercise. Would that be an example of an instance where, let's say, a Cheryl Atkins as an Air Force representative would help coordinate the use and reservation of that airspace at a headquarters level? Was she, like, a liaison at the headquarters level to coordinate those type of events?

MR. GRIFFITH: The people that did that worked under Cheryl and under people that she

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

worked with. So the only time it would get up to here level was if there was a problem, like, if, you know, the military said, we're going to shut down the Eastern half of the United States for four days. You know then we would raise the flag and say, hey, Colonel Atkins, these guys are asking for something we can't do. You know, and then she'd get involved and, you know, start knocking heads.

But, you know, usually--now, like, we in Air Traffic, had people assigned to all of the air defense sectors. We had one at Tindle, we had one at Griffiths Air Force Base in New York and we had one at Western Air Defense Sector out in Washington State. We had one at NORAD in Cheyenne Mountain. So, this four people were FAA people that were on our staff that were required to coordinate on a day-to-day basis all of the activities with NORAD.

MR. AZZARELLO: So you had them in NORAD and the three NEADS, SEDS and WATS at the three sectors.

MR. GRIFFITH: Right, and at Cheyenne Mountain.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: With NORAD at [unintell.]?

MR. GRIFFITH: Right.

MR. AZZARELLO: And, again, that would be the other half of the equation, the FAA liaison back to the military to coordinate the use of that airspace?

MR. GRIFFITH: Right.

MR. AZZARELLO: Now, let's go pre-9/11 and, as I say, a hijack reported in the system. And hypothetically, they're going to commandeer a plane to take it to Cuba and you want to get military aircraft to tail them--how do you practically--take me through the steps--how do I get somebody in a position of authority at the military to then take the military action that's necessary--I'm on the FAA side, I want to get somebody in a position of authority with a uniform on to now say to NORAD, go. Help the FAA launch. Go call ZBW because the plane's in Boston Center and I need you to get on it and they know where it is. Okay, what do I do? Take me through the steps.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Washington Operations Center people start working through that. Say, okay, we need to get DOD. The person in charge is four-star Eberhard in Cheyenne Mountain. The Administrator or Deputy Administrator would call the general and say, look, it's been determined by "X" whether it's FBI or whomever that they want to scramble on this aircraft and they want it to occur at this time and this place. And then the general would say, okay, we'll do that. Or, hey, all my guys are out training today, we don't have time. You know, who knows what they would say. But, usually, in a significant situation, they're going to say, absolutely, they got people on strip alert, you know, and they say launch. And those guys are in the air in seven minutes.

MS. HYDE: So that's what somebody at Washington at the WOC or within headquarters to call Eberhard?

MR. GRIFFITH: That's, since we never did this before, that's the way it was--

MS. HYDE: That's right, we shouldn't get

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

too stuck on sort of a procedure when we know that procedures were never used. So, we can talk about what actually happened that day and then sort of, but I guess what this conversation is is to take out of your head what actually happened that day and tell us as you're walking to work on 9/10, you know, what your understanding of what would have happened?

MR. GRIFFITH: You go to the Washington Operations Center, it's a very high-level decision.

MS. HYDE: That's the next question, who at headquarters, I mean, the folks, the duty officers at the Washington Operations Center are certainly not--they're facilitators. So, who in your mind on 9/10 would have been the person to coordinate with Eberhard?

MR. GRIFFITH: The Deputy Administrator.

MS. HYDE: And did you have in your inadvertently that you would go through the NMCC, there was this paper process, on paper it was that the hijack coordinator would contact the NMCC and the NMCC would get in the loop. Was that in your

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

thinking at all before this event?

MR. GRIFFITH: We would have pulled the book and laid it down right in front of us and we would have followed it step-by-step-by-step.

MS. HYDE: And so, the pulling the book out would have gotten you somehow a hijack coordinator--

MR. GRIFFITH: Who would have arranged--

MS. HYDE: Who, wasn't, under whatever interpretation within Air Traffic Services, was somewhere in Security? Not clear where, but someone in Security would have called the NMCC. So, how does that jive with your gut reaction, which I take to be very genuine that Monte or the Deputy Administrator would have called Eberhard. It's two different processes?

MR. GRIFFITH: Because those, well, those, that's the way it was really done. Any decision that would consider a shoot-down of an aircraft would be done at that level. It would not be done--

MR. AZZARELLO: Yeah, we don't want

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to--we're not on a day of 9/11 yet. And I don't want to meld the two together.

MS. HYDE: Let's just go, because--the conversation about how it would have happened always ends up in the process.

MR. AZZARELLO: Had you ever worked a hijack before?

MS. HYDE: Have you ever worked a hijack?

MR. GRIFFITH: No.

MR. AZZARELLO: You weren't around with the Lufthansa hijacking?

MR. KARA: He was out in Chicago.

MR. AZZARELLO: Did they ever, well you know, they did have a training exercises, I'm sure you're well aware in the field, where the controllers would go into a [unintell.] facsimile training. They'd see the 7500 code pop up or someone would be playing pilot on the other end and yell trip and whatever and they would go supervisor, I got a trip, I got a 7500. But what would happen from there, in terms of, was that ever drilled all the way up the chain of command to say,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

well, okay, well, now, how does this play out if we really need to get military assistance?

MR. GRIFFITH: Oh, sure, I mean, we had--everybody has an undisclosed location. But we had this undisclosed location that we went to once a year, you know sometimes for a couple of days and we played all these games. You know, and we tabletopped and we tabletopped and, you know.

MR. GRIFFITH:

MS. HYDE: Well, actually, we're going to ask more about those undisclosed, but we're talking about from headquarters. I think the question that John was drawing on was your experience and years at the centers. And help us with the following. Both from the paper perspective and from a training perspective and from interviews with controllers, it seems very clear what the controllers do at centers when there is a hijack. And that's all that's written down.

MR. GRIFFITH: Right.

MS. HYDE: What we can't find and maybe you can point us to is, first of all the paper that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

would tell a supervisor and a manager, either if it goes to a base supervisor and then to an OLMICK [ph] what they were supposed to do?

MR. GRIFFITH: Okay, do you have a handbook? It's 7210.3. And in there you will find the topic of hijack. And you will find a general description of what you're supposed to do with hijacks.

MS. HYDE: Even if you're a supervisor, not from a controller's perspective, but from supervisors and a manger?

MR. GRIFFITH: Yes.

MS. HYDE: Okay.

MR. GRIFFITH: Then, at the facility level, there will be an order that has hijack procedures in it that the Air Traffic Manager is responsible for having. And, you know, it will be in a contingency handbook. You have contingencies for hurricanes, floods, tornadoes, hijacks a whole number of--bomb threats. And in there you will have a section on hijacks.

MS. HYDE: And that'll vary from facility?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Yes.

MS. HYDE: When you were in Chicago and you were the manager of Chicago, you wrote, there's the national guidance would you say embodying 7210.3?

MR. GRIFFITH: Yes.

MS. HYDE: But there was also a Chicago-specific--

MR. GRIFFITH: Yes.

MS. HYDE: --order about hijacking?

MR. GRIFFITH: Yes. There was a specific order about Air Traffic Control in Chicago that had contingency planning in it, so there wasn't this separate order about hijackings, it was a section in an order that said, if you have a hijack here is your responsibility. And on the 7110.65 has Air Traffic Control procedures on the code 7500.

MS. HYDE: Right.

MR. GRIFFITH: And there's a separate order that talks about flaps down--

MS. HYDE: Right and there are certain things for controllers.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Right.

MS. HYDE: The guidance, though, for supervisors and managers is in 7210.3.

MR. GRIFFITH: No, it's the facility order.

MS. HYDE: Well, I thought you said the first--your first response was first you go to the supervisors and managers, the national guidance for them was 7210.3.

MR. GRIFFITH: Right. And then you have a facility order that applies to your facility. So, and in the facility, you have, for example, supervisors desk drawer. Pull the drawer open, they're might be 10 envelopes in that drawer, brown envelopes.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: One of them says hijack. And you pull that thing out, you lay it down in front of you and it's got excerpts from 7210.3; it's got the facility notification procedures; it's got an accident incident reporting form in there with everybody's name and phone number that you're

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

supposed to call and what time you call them. You know, it's--

MS. HYDE: Do those facilities hand in their orders to the Chief to national? I mean, reality is that however many facilities there are and, you know, you as a manager will react different than somebody else. This is the point you were making to me earlier, a different point. Different people. If they really went out there and ask for every facility to give us their order that directed managers what to do in a hijacking on 9/11, would we find, first of all that every facility has such an order--

MR. GRIFFITH: I hope so.

MS. HYDE: You hope so, do you think that you would?

MR. GRIFFITH: Well, here's how I know that they probably would. Ever Air Traffic Control facility is evaluated every year by an evaluation team.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: And they have a checklist.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And we hate those guys. Because they come in and if you spell hijack with a hyphenation in it, rather than a single word, you get a demerit, okay, but the idea is they have a checklist and they evaluate every large facility and medium facility every year. Now, one year is called a full facility evaluation. The next year, it's called a follow-up. So they go in and they look at your demerits, they report them to you. They say, okay, you've got 90 days to fix these problems or whatever it is.

Okay, so, then you're kind of put on watch if you've got a lot of problems. They come back the next year, hey drag the old report out and they compare it to the same checklist and they go through it again. Okay. And if you don't have a hijack order, it's going to show up as a problem in your report.

MS. HYDE: Do you know if the evaluators, one of the items that they have to look for is a hijack order?

MR. GRIFFITH: Yes. It might not say

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

hijack, but it says emergency procedures or contingency procedures or, I don't have a thing in my brain that--

MS. HYDE: And what I could guess is that I--that makes perfect sense, I wonder when, if we really drilled down on it, that emergency procedures were required to include hijack?

MR. GRIFFITH: Oh, yeah, yeah. Should be a brown envelope in everybody's drawer because we train it, you know. And everybody knows where that drawer is.

MS. HYDE: So, then my second question is, if we could go out tomorrow and gather everybody's order, and we find that everybody has one. What would your estimation--what would we find in terms of the directions that these orders would be giving to managers in terms of notifications? Do you think there would be consistency and that everyone, all of these orders say, manager, you know, should some say manager you call the Command Center; some would say manager you call the region; some would say manager you call the Command Center and the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

region; some would say manager you call headquarters?

MR. GRIFFITH: They will all call their Regional Operations Center.

MS. HYDE: Okay.

MR. GRIFFITH: And the Regional Operations Center will begin setting up a bridge of regional people and make notification to Washington Operations Center immediately.

MS. HYDE: Do you think that the obligation of the facility is discharged, so to speak, by calling the Regional Operations Center? Are they supposed to do something more than that?

MR. GRIFFITH: Yes, they have a list of who to call; local FBI is Joe Smith; office is this; phone number is this; local law enforcement; airport management. The list applies to that specific location. If it's an en-route center, then it's more of a regional call, okay, but--

MS. HYDE: In terms of the obligation, though, to make internal FAA notification does--

MR. GRIFFITH: It's on the--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Does the Regional Operations Center satisfy that obligation or would you also need to call the Command Center, would you need to do anything beyond, in terms of internal FAA notifications, anything beyond the calling--

MR. GRIFFITH: You'd notify the Command Center, you'd notify your Air Traffic Division manager.

MR. AZZARELLO: When you say the Command Center are you talking Herndon or the Regional Operations Center?

MR. GRIFFITH: Herndon.

MS. HYDE: And you think anyone within the facility it's their responsibility to call headquarters, to call the Washington Operations Center?

MR. GRIFFITH: You know, I don't recall, I'd have to get it out and look at it, but, you know.

MS. HYDE: But there's not going to be one uniform, as you say.

MR. GRIFFITH: The reason you don't want

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

everybody calling the Washington Operations Center is because what if they already had one two hijack--

MS. HYDE: I'm not advocating everybody to call the WOC, I'm just trying to get--

MR. AZZARELLO: We're just trying to get an understanding?

MS. HYDE: --I'm just trying to get an understanding, I'm not advocating that you should call the Washington Operations Center.

MR. GRIFFITH: The protocol was that you call your Regional Operations Center because you had trained people to deal with that and they knew what to give--

MR. AZZARELLO: Would it fall on the Regional Operations Center, then, the Regional Center to notify headquarters, is that how--

MR. GRIFFITH: They would notify the Washington Operations Center, yes.

MS. HYDE: Okay.

MR. AZZARELLO: So they would notify the regional to notify the WOC.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: And then you follow the checklist and you do everything that checklist says.

MR. AZZARELLO: See, we're looking for your assistance here and struggling a little bit on the documents with this because, you know, you've mentioned the 7210, right?

MR. GRIFFITH: Right.

MR. AZZARELLO: We've looked at that and that shows you--we've looked at 7210; 7110.65, that's the Controller says notify supervisory personnel.

MR. GRIFFITH: Right.

MR. AZZARELLO: So, that's, I'm Joe Controller, I let my area supe know, or it goes to the OLMICK, on your desk and as far as their training goes, they've all pretty uniformly said, we're done, because understandably, they've got a scope and they got aircraft to control. They can't leave the scope and coordinate a response or further action.

MR. GRIFFITH: Right. So, they're done.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Now, we're just trying to figure out how it gets from the supervisor at the facility to headquarters, so that when you get to the tie, you have it where you say, where the Deputy Administrator has to then coordinate with the highest level or a higher level of the military. How do we get from Point A to Point B? How do we get from Joe Controller at the field facility to Monte Belger, then saying, okay, I'm going to go call General Eberhard? And I haven't, we haven't been able to find that in paper how you get to headquarters, although now you're saying is the paper should be at each field facility?

MR. GRIFFITH: Aply.

MR. AZZARELLO: Okay.

MR. GRIFFITH: There's 8020.11, did you look in there? 71--7210.56 did you look in there, System Effectiveness. You know, there's a whole series of orders that pertain in the way you build your local procedures inside that facility.

MS. HYDE: Though you just cited, it's not hijack specific, so what you just said is orders

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that address how each facility is supposed to have it's own emergency--

MR. GRIFFITH: Accident Incident reporting yes.

MS. HYDE: Accident Incident reporting?

MR. GRIFFITH: Yes, so a hijacking is an incident. They used to be in more detail in the 7210.3 for hijacking, then they pulled it out a few years ago and I think we put it in that 7210.56 and 8020.11, we kind of pulled that out of--

MR. AZZARELLO: Taking a look at that 7610 that you mentioned, at that military order. Escort of aircraft?

MR. GRIFFITH: Right.

MR. AZZARELLO: This says here that the FAA hijack coordinator the director or his designee to the FAA Office of Civil Aviation Security.

MR. GRIFFITH: Yes.

MR. AZZARELLO: And this is a chart that's getting us to the various--that's ACS--

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: How would I--how do you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

interpret this in terms of who the hijack coordinator is? Are they saying it's the ACS or someone else?

MR. GRIFFITH: I wouldn't see it happening that way. But what I would see is, yes, there is, when you go in the WOC and you have--have you seen it?

MS. HYDE: Well, we've seen the new, but we can't--

MR. AZZARELLO: They gave us a map, this is one of the--there's that, and these are the stations--crisis center.

MR. GRIFFITH: Yeah, they have a Security person sitting right up here and that person's the boss.

MR. AZZARELLO: Okay. That's the hijack coordinator, whoever's sitting up here--

MR. GRIFFITH: Right that person is the boss.

MR. AZZARELLO: Okay.

MR. GRIFFITH: And Monte will come in and stand behind him and ask him questions, you know.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And while this person may be calling the NMCC, I can assure you that the Deputy Administrator is going to be calling the guy over at NORAD saying hey, we got people working this down here about an intercept, you know, are you guys, you know. I want to know at this level because, you know, the accountability is so high in these situations.

MS. HYDE: Well, let's, maybe we should get to the day of.

MR. GRIFFITH: I'm not going to speak for Monte in this situation, at all, you know--

MS. HYDE: Sure.

MR. GRIFFITH: --because the only thing I can tell you is what--

MS. HYDE: Well, it's hard to do the paper situation [unintell.] necessary and I think you've been helpful in terms of alerting us to each facility's own emergency preparedness procedures. But--

MR. GRIFFITH: I wish I was still as up as I used to be, but I'm not, you know. I make money now.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: I have just one question before we move to the day of. You were very specific when you said accident/incident reporting and a hijacking is an incident?

MR. GRIFFITH: Yes.

MR. KARA: Which incident management is over here on the Air Traffic side?

MR. GRIFFITH: Well, I would use this as the guide, okay?

MR. KARA: Because on 9/11, as we move into that discussion now, the incident which is the hijacking of American 11 becomes an accident.

MR. GRIFFITH: Right.

MR. KARA: Where do these people over here on the Accident Investigation side get into this structure that we're going to be talking about?

MR. GRIFFITH: There will be people from Nick Sabatini, everybody's got a place in here--

MR. KARA: They'll be down in here?

MR. GRIFFITH: Yeah.

MR. KARA: But the boss, still comes from, yet, a third-line organization?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Yeah, nobody did anything without talking to this person.

MR. KARA: So the boss is here; the incident is here; accident is here, both sides are represented here.

MR. GRIFFITH: Yeah, but, you know, at this point, you become a team.

MR. KARA: Okay.

MR. GRIFFITH: Okay, we got a problem, we gotta fix it.

MR. AZZARELLO: Let's get to the problem of the day. You're at work on 9/11 and tell us.

MR. KARA: You need a short break before we move on?

[BREAK.]

MR. AZZARELLO: Okay, we're back on after our break. And, Jeff, you were just about to tell us about the day of 9/11,

MR. GRIFFITH: Yep.

MR. AZZARELLO: When you first became aware that there was a report of a hijack or a problem in the aviation system.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Okay, I was in my office on the 10th floor, Bill Peacock was away at a union meeting in New Orleans. And Dave Cannoles, who was the manager of our Evaluation staff walked in my office and said we just had an aircraft hit the World Trade Center. I said what do you know about it? He said, we don't know anything, just know an aircraft hit the World Trade Center.

My assumption was that it had to be a small airplane. I said, okay, what am I doing. [unintell.] we're getting information. I said okay. Then, I can't remember a lot of detail after that because--like whether I walked down the hall at that time--we were--our office was right down the hall from the Administrator's and right down the hall from--

MR. AZZARELLO: The Air Traffic suites, the West end, I guess?

MR. GRIFFITH: Right we're down in this corner, my office was here, Jane was here and then--

MR. AZZARELLO: Actually someone's drawn

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a--I guess a diagram of that, corner suite--with Peacock--

MR. GRIFFITH: Yeah, Peacock was there, conference room and then my room and then, oh, yeah, this is what we did on 9/11, yeah.

So, I turned on my TV in my office to CNN and saw that people were saying it was an airliner. So, then, at some point, I said, okay, I headed down the hall. It might have been a minute later, it might have been five minutes later, I don't recall that part. And I headed down the hall and I went in this door, into here, and it was packed.

MR. AZZARELLO: You went into the Aviation Crisis Center?

MR. GRIFFITH: Yes.

MR. AZZARELLO: The ACC room?

MR. GRIFFITH: Yes.

MR. AZZARELLO: When you, just for one second, let me ask you one question, about when you turned on the TV and you saw CNN, and you said that when Cannoles told you about it you had this vision that it was a small aircraft. Did you share that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

same vision when you saw the TV screen or were you thinking something else?

MR. GRIFFITH: No, when I, as soon as I turned CNN on, there was information about it being an airliner, okay? I said, there's something really wrong here. So, then I, you know, I headed down here and ended up at this position, next to Lee Longmire. And had the Command Center on the phone and started a dialogue with the Command Center about what do we know, what are doing?

MR. AZZARELLO: And you said you were standing next to Lee Longmire and who's on with the Command Center?

MR. GRIFFITH: I was on with the Command Center. Lee was, you know, pulling all the Security elements together. You know, they were setting up a SVTS, you know, Secure Voice thing--

MR. AZZARELLO: Where was that?

MR. GRIFFITH: Have you been told about that?

MR. KARA: We know about that, yeah.

MR. GRIFFITH: All right, so they were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

setting that up which was in a location nearby. And the White House wanted information, everybody wanted information.

MR. AZZARELLO: Had you heard, at the moment when you walked in the Command Center, had you heard the word hijack yet from anybody?

MR. GRIFFITH: No.

MR. AZZARELLO: Just crash?

MR. GRIFFITH: Right.

MR. AZZARELLO: Okay.

MS. HYDE: Had the second plane hit yet?

MR. GRIFFITH: No, I don't believe so.

MR. AZZARELLO: So, wouldn't that have been pretty quick to set up the Command Center, though if it was after the first crash, if you walked in there and then Longmire was already there and--

MR. GRIFFITH: Well, it would have been 20 minutes, if I recall.

MS. HYDE: I think, well, we have some--

MR. AZZARELLO: Well, yeah, maybe we can find the time with--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: We have the WOC log.

MR. AZZARELLO: We have the WOC log--do you have the WOC log out? Oh, here, I'm sorry. But let me ask you another point about orientation: Do you recall that when you walked in to the Command Center and walked up here--hold on to that, though. When you walked into the Command Center and came up here by Lee is one of the first things you did get on with the Command Center, do you remember?

MR. GRIFFITH: Oh, yeah, yeah.

MR. AZZARELLO: Okay, I think we can orient the time then. We have the Command Center transcript where you were on at some point. And is that when you, then, handed the phone to Doug Davis and asked him to stay on with the CC?

MR. GRIFFITH: At some point. I rem--here's what I remember. First of all this whole thing was a blur. And that's why I'm having trouble remembering when I went in there. It may have been after the second one hit the tower that I actually went into this room.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Because I can tell you, I think, when you get on with the Command Center.

MR. GRIFFITH: I'm just trying to pull it together.

MR. AZZARELLO: Sure.

MR. GRIFFITH: You know, I, very early into this, I spent a lot of time in with Monte and Jane, you know, there's that conference room between their offices.

MS. HYDE: Right, actually, we talked to Shirley later, I think she would tell you that there was a meeting happening in terms of the first notification.

MR. AZZARELLO: Did you have your regular staff meeting that day?

MS. HYDE: You have that staff meeting on Tuesday, that morning.

MR. GRIFFITH: That was done.

MS. HYDE: And you get a page about the--

MR. GRIFFITH: Who reported that?

MS. SULLIVAN [?]: Shirley, I mean this isn't like a, [unintell.] at the end of the day,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

isn't that everybody's recollection--we just want to ask you about--

MS. HYDE: She said, [unintell.] conference that went on, it would have come through [unintell.] breaking up [unintell.] I don't know.

MR. GRIFFITH: Thing that I distinctly remember about the first aircraft was Cannoles telling me and I was in my office alone, when he told me.

MS. HYDE: Okay.

MR. GRIFFITH: So, it could have been that we had been at, you know, who knows what we were talking about.

MR. AZZARELLO: Do you recall prior to his telling you about the plane hitting the Trade Center you recall getting a page where they informed you that a plane was missing and might have been hijacked?

MR. GRIFFITH: No, I don't recall a page. The first thing I recall is Cannoles and--here's what's coming through my mind right now.

MR. AZZARELLO: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Cannoles notified me on the first one on a telephone call. And I remember I was in my office alone. I turned CNN on and not long after that, he showed up in my office.

MR. AZZARELLO: So he called you first and then he showed up in your office?

MR. GRIFFITH: Yeah, I'm pretty sure that's the way I recall it. And I think at that point is when the second aircraft hit. That may be the point that I rushed down the hall into--that may be the point at which I entered this room. Now, between those--I don't recall if--

MR. AZZARELLO: Do you remember if you saw the second aircraft strike on the TV?

MR. GRIFFITH: I did, but it was a playback, you know, I don't think I saw--because it kept rerunning every--you know, all day long.

MR. AZZARELLO: Mm-hmm.

MR. GRIFFITH: You know, and I remember in short order I was on the phone. I was up here with the Command Center, John White.

MR. AZZARELLO: That's his transcript

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

here, I think, with the Command Center. Mike is it Audis [ph] Mike Audis at the Command Center?

MR. GRIFFITH: I don't know his name.

MR. AZZARELLO: And Mike Susmansi [ph], and Susmansi said I Mike Susmansi said I have Jeff Griffith on the line, he needs to talk to either Linda or John.

MR. GRIFFITH: Okay.

MR. AZZARELLO: Would that be Nancy Kolonowski [ph]? Do you remember, was she with you?

MR. GRIFFITH: Could be. I'm not real good about this part of it because--[unintell.] and reacting, okay?

MR. AZZARELLO: Mm-hmm. And it says I talked to Linda Schuessler and John White.

MR. GRIFFITH: Yeah, yeah.

MR. AZZARELLO: Okay.

MR. GRIFFITH: Because Keyes [ph] was out of time.

MR. AZZARELLO: John White gets on with you?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Yeah, John gets on.

MR. AZZARELLO: This is--it's an FAA transcript so the time is around 9:18 is when you get on with the Command Center, which is roughly 15 minutes after the second Trade Center was hit. You asked him for a number that you can call anytime to talk to him and you get a non-number.

MR. GRIFFITH: Okay, so here's, I remember before I left my office, I had Cannoles in front of me, and I said to Cannoles, go in this room, which was our conference room and set up a situation line and get all the division managers on it and get a situation line going. Get your people to immediately start collecting data, right this minute, because I knew that we were going to get a barrage of press and everybody else wanting to know what was said, when it was said--NTSB and everybody else. I said, start at this minute with your people collecting data. And don't stop until I tell you to.

I mean that may not have been my exact words--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Mm-hmm.

MR. BROWN: --but, you know, I put a whole lot of intensity in get data and get it now. And a whole lot of intensity in, you know, getting the management team up there, getting this situation line set up and, you know, getting us together as a team so that we could start responding. And that was, you know, that's my recall of the first few minutes of this.

MR. AZZARELLO: So, Dave Cannoles you asked him set up the situation line in the Air Traffic Suites area.

MR. GRIFFITH: I didn't ask him to, Cannoles's is the kind of guy you gotta look in the eye to get him to do it.

MR. AZZARELLO: All right.

MR. GRIFFITH: So, that's what I did.

MR. AZZARELLO: So, they're back here in the conference room?

MR. GRIFFITH: Right.

MR. AZZARELLO: And setting up a situation line. And did you want him to get the Command

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Center on the line, too?

MR. GRIFFITH: Everybody.

MR. AZZARELLO: Everybody, okay.

MR. GRIFFITH: Set up a situation line and get everybody on it. Because in my mind that was going to be my vehicle for, you know, I knew I was going to be up front somewhere and if Monte or Jane or somebody said I need this, then, you know, it ended up I was sending runners down there, you know.

MR. KARA: This hub of activity down here, then, becomes an extension of you up here?

MR. GRIFFITH: Yeah, it actually did. In fact, this, what we were doing down here in the Air Traffic conference room, ended up lasting for days and days and days and days. And then it was finally transferred up into the WOC, but, yeah, it just kind of became a network to the operational element in the field.

MR. AZZARELLO: Do you happen to know when the Boston Center called, or the region called to report the hijacked plane? Do you know who they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

talked to?

MR. GRIFFITH: No, I don't, I may have known that, but I don't recall that.

MR. AZZARELLO: Who, if they called the right person, who should they have been calling, I guess, is my question.

MR. GRIFFITH: The Regional Operations Center.

MR. AZZARELLO: But I mean, so when the Region calls the WOC?

MR. GRIFFITH: Right.

MR. AZZARELLO: And who, in the WOC should they have asked to talk to?

MR. GRIFFITH: Oh, the Duty Officer picks the phone up, I mean, that's the procedure.

MR. AZZARELLO: So they report to the Duty Officer?

MR. GRIFFITH: Yeah.

MR. AZZARELLO: And then he or she transmits the message to--

MR. GRIFFITH: Yeah, they set up the notification process whatever they have as an SOP.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Do you remember when you first heard that the plane was hijacked?

MR. GRIFFITH: No, I don't because the things that jogged my mind are, first aircraft at the World Trade Center, okay. Well, wait a minute, it's commercial aircraft, something bad wrong, okay? So, we're getting our team response ready, trying to get information, then second aircraft hits World Trade Center, you know. At this time, you know, my recall is I'm down here at this position and I'm talking to John White.

MR. AZZARELLO: And that's where--

MR. GRIFFITH: Yeah, I'm talking to John White and I'm getting a little rough with him, you know, but essentially, we were getting ready to get on a SVTS and brief up, you know. And so, you know, I was getting information. Okay, what do we know? What airplanes are lost? From to--to where; what are the call signs and, you know, and we were getting false reports, you know, it was a Delta, a Continental that turned up as false reports. There was a false report of a crash in Kentucky. And

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

we're trying to sort through all this. And then, you know, somebody says, hey, an airplane just hit the Pentagon.

Okay, and that's when I, you know, in my mind, I said, we gotta shut this thing down. So, at that point, you know, someplace along the line, Doug Davis was standing in the back of the room and I said, you come here, sit here, you know, you're my eyes and ears. And we're getting reports of people, you know, closing down facilities and all this stuff and, you know, ordering people back to work. And, you know, name it and it happened.

MR. KARA: When Doug takes your place, what does that free you up to do? What becomes your activity?

MR. GRIFFITH: Well, I headquartered to be able to talk to Lee and, you know, we had Lee in there. We had Lynne, you know, this kind--this corner up here got real busy, you know, of people asking what have we gotta do--what have we gotta do? Cheryl Atkins shows up, so, you know, we're all going through what are we gonna do--what are we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

gonna do? I walked in to Monte and said, Monte we've got to shut this thing down. He said, can we do that? I said, yeah, we can do it. He said, well, then do it.

And I went back in and, you know, Doug Davis, we got into this conversation about, okay, we gotta shut the system down. Put everything on the ground. And the Command Center says something like, we already did that. I said, wait a minute, you guys don't go running off on your own here, you know. Let's get this thing together and get it done, you know.

And so we went through that. Go in do another SVTS.

MR. KARA: Were you on the SVTS calls?

MR. GRIFFITH: Yeah, I was kind of the, you know, Lee, I think it was Lee, I can't remember if Lee was doing it--I think Lee did a lot of it. But whenever they wanted to know operational things about, you know, who are the airplanes, where are they now, what do we know, then, you know, I threw a lot of stuff away when I left FAA, but, you know,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I was keeping one of these pads with me and I was writing down times and, you know.

MR. KARA: When you used the term "they" here, you know, who's the they?

MR. GRIFFITH: The SVTS.

MR. KARA: Well, the SVTS, the SVTS is a room, so you're looking at other people, when you go in there you're sitting and you're looking at other people aren't you?

MR. GRIFFITH: Yeah.

MR. KARA: Who are, now in that context, who are the they?

MR. GRIFFITH: I can only tell you labels, Justice, FBI, you know, because sometimes they had four people, you know, four pictures on one screen, you know. I didn't have a clue who they were, they were all, you know Administrator and above level, so--

MR. KARA: Was the White House on at the point in time that you were in the SVTS?

MR. GRIFFITH: I don't remember, because we were in there so much, I mean, sometime during

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that day they were on, but, you know, the intent was to get information to them because they were sending out some kind of crisis team.

MR. KARA: And this line of communication upwards, there's also established in the room where you and Doug go are--

MR. GRIFFITH: Doug Davis.

MR. KARA: Doug Davis, excuse me, there was also established a Primary Net?

MR. GRIFFITH: the Primary Net was over here for inside the Air Traffic Organization.

MR. KARA: No, no, let me, John help me out.

MR. AZZARELLO: Let me note for the transcript, this second [unintell.] you got on the line with John White in the Command Center, okay? You ask him for--to give you a number where you can get him because you've been calling and it's been ringing off the hook.

MR. GRIFFITH: Right.

MR. AZZARELLO: He tells you about New York's ATC-zero, you ask why, and then he says

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

because they don't know what the security threat is to their facility, they're trying to work it out, they get a first-hear ground stop for ZNY for New York Center.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: You then tell them to go ahead with the New York Report. He continues on that we went, first-hear ground stop on all New York arrivals; we just went to nationwide; then he talks about the TRACON believes they can still work aircraft. Then he says, reference the agency, see if we can start getting the aircraft--take an inventory of all the aircraft [unintell.]. And he still have some suspected aircraft. There's a third aircraft at Delta out of Boston that we're still checking on and we haven't really established the second aircraft that hit the second tower. You say all right; he said it's either American or United, we don't know which. You say, it's United 175, see if you can find out the departure point and destination.

And do you remember, I guess, at this

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

point, you've been made aware that 175--

MR. GRIFFITH: Yeah.

MR. AZZARELLO: --do you remember where that information came from?

MR. GRIFFITH: In this corner.

MR. AZZARELLO: You're up here--

MR. GRIFFITH: Yeah, we're up there, you know, there's the group up there. And I don't know where it came from.

MR. AZZARELLO: Then you tell them to, the United 175 was going to Los Angeles because--okay?

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: And then you tell them there's a question about a Chicago to L.A. flight, you ask them to check with the Center. And then you say, could he get awareness out to all the TMCs or the Traffic Management Unit and report any unusual circumstances direct to the Command Center of loss, identification or any radio--any unusual radio transmissions, everything.

MR. GRIFFITH: Right.

MR. AZZARELLO: Now, you give him, John

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

White that direction, I guess.

MR. GRIFFITH: Right.

MR. AZZARELLO: You want Command Center to reach out to the field facilities, anything unusual report up to them.

MR. GRIFFITH: Right.

MR. AZZARELLO: And how are you going to monitor that from Command Center to headquarters? Are you going to do it from the Command Center or will you go somewhere else to monitor that?

MR. GRIFFITH: Right here.

MR. AZZARELLO: Okay.

MR. GRIFFITH: And that's what I had Doug there for. I eventually gave the phone to Doug and--

MR. AZZARELLO: Yeah, that's about four pages later.

MR. GRIFFITH: --and, you know, but what we were trying to do at this point is figure out what's going on, you know, are there more; where are they; you know, are we missing other airplanes, you know. And we're feeding that to everybody in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the room. I don't know if Cheryl Atkins was there at the time, but I know she was in that room--

MR. AZZARELLO: At some point?

MR. GRIFFITH: --at some point. But, you know, our thing was to figure out what was going on.

MR. AZZARELLO: And then I'm going to ask you about this next one. John White tells you, I have one of those reports for you and this is roughly 9:25 a.m. because there's the--American 77 comes about, Dulles to L.A., flight level 35 zero, West of Charleston, West Virginia and Indianapolis airspace they have lost the target. They're going back and looking for the aircraft now. They don't have a primary or anything like that.

MR. GRIFFITH: Right.

MR. AZZARELLO: Is that the first knowledge you had of 77 that day?

MR. GRIFFITH: Yes.

MR. AZZARELLO: You ask what time, and then he tells you about 10 minutes ago, reference the earlier statement that they lost and can't find

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the primary. So, he then goes on to tell you about the Delta. And what do you remember about the Delta aircraft that John White told you about?

MR. GRIFFITH: The only thing I remember about the Delta, and I was writing them all down on my pad I was carrying around with me, but in fact, I remember on one of the SVTS, I reported that Delta, I reported up on the Delta, I remember that going out before they figured out that we had it. but, you know, the thing I remember about the Delta was, it was a problem--it was a problem, oh, no, it's not a problem, draw a line through it and get on with the next problem.

MR. AZZARELLO: And then, how about the discussion about trying to do a nationwide ground stop? This continues on with John White himself and he tells you that there's some sort of threatening tape from somebody. Do you want to do a nationwide ground stop? And you said, we're talking about that right now. Just have Cannoles, correction, let's make sure we get this information out to all the centers to report to you any unusual

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

transmissions or any loss of radio.

MR. GRIFFITH: Right.

MR. AZZARELLO: Then you tell him to stay on the line, don't hang it up--don't hang up the line. And that's when you see here, John thinks you're still on, he says-- John thinks you're still on, he says, Jeff, and he says this is Doug sitting next to Jeff, so, is that, I guess, was that, I guess at this point you turned the phone over to Doug.

MR. GRIFFITH: Yeah, Doug was a trustworthy guy, you know. I mean, you had people that you knew could get the job done and people who couldn't. I saw him in the back of the room, he was doing a totally different job. I drug him in and sat him down, you know. He was a champion.

MR. AZZARELLO: Do you remember Doug said that he received some information prior to sitting down at that phone, he remembers you telling him, that, hey, man this line for me.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: But that prior to that, he

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

had entered the c and based on some information that somebody gave him about American 11, which we now know is the first aircraft to hit the tower--

MR. GRIFFITH: Yeah.

MR. AZZARELLO: --that someone gave him some information that it was still airborne and headed South to Washington and that he entered the Crisis Center and pretty much announced it that, hey, American 11 is--it's still airborne, it's headed to D.C. Tell me what you recollect about that?

MR. GRIFFITH: I don't remember that at all.

MR. AZZARELLO: You don't remember him saying that at all?

MR. GRIFFITH: No.

MR. AZZARELLO: Well, do you remember anything about that report? Anything at all about a report that American 11, which Boston initially believed had impacted the first Trade Center, that subsequent to that, believed being held by the system that something directive had changed and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

someone said, well, wait a minute, we think it might still be out there headed South to--we don't think it went in the tower?

MR. GRIFFITH: What I was doing with that information was, I had one of these and, you know, I was writing down a time and making a notation, just doing that, that kind of thing. But I don't recall that piece of information, just don't recall it.

MR. AZZARELLO: What do you recall doing when John White tells you about American 77 and that it was lost and they don't have a primary on it or anything like that, what did you do with that piece of information?

MR. GRIFFITH: I made it known, again, I can't remember--I can't remember who was converging in this corner right here, but, you know, there was a railing here and then a kind of a ramp that went down to this door into the SVTS, and there were four or five people there that were, like, really key people. Monte was in and out, but, you know, there were, there were people from Security there

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that, you know, how you work in a building and you see these people for five or six years, you know, and you see them in the elevator and you wave in the hall and stuff, you know? You never know what they do, you know, and all of a sudden you're in this crisis situation and--

MR. AZZARELLO: And there they are.

MR. GRIFFITH: --there they are, you know, they're all Security people.

MR. KARA: You mentioned Lynne Osmus was one of them?

MR. GRIFFITH: I'm pretty sure that Lynne--well, I can't be--I know that Lynne was either over here or over there.

MR. AZZARELLO: I want to ask you one more question--I want to ask you some questions about the SVTS, but one more question before we get there is: You have Command Center on the--first you're on with John White and then you have Doug Davis as the conduit--

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: --between Command Center

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and headquarters and if I heard you right that back in the Air Traffic suite you told Cannoles to get a situation line open including Command Center there.

MR. GRIFFITH: Yes.

MR. AZZARELLO: So, you've got, you've sorta got two ends to the 10th floor. You've got Cannoles down on the West end talking to Command Center trying to figure out what the air traffic situation is and then you have the Crisis Center, Command Center's on, John White with Doug Davis, what's your recollection of what efforts, if any, were made to coordinate that information or to deconflict [ph] it if there was conflicting information coming from the Command Center?

MR. GRIFFITH: The purpose of Cannoles setting up a situation line was, initially, to get information out to our division managers and out to our team, it wasn't necessarily one to set it up as, okay, this is going to be a new command post. It was set up a situation line so that we can get information out to our people, because--

MR. AZZARELLO: You mean, Air Traffic

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Division?

MR. GRIFFITH: Yes, to our 500s and to our program directors. Air Traffic Division 500s.

MR. AZZARELLO: What's the 500, is that regional level?

MR. GRIFFITH: Yes. So, because, that's one of the things that was important to me, you know, when things happen, get--what information, you have two people so that you know, you don't have rumors and other things causing problems about coordination. So, you know, I had Cannoles set that up, in turn, you know, some of the regions chose to set up a separate one inside their organization out to their field facilities, you know, because they're telling me things, like, people are leaving facilities and stuff. And then saying no, no, everybody goes to work, everybody stays, nobody leaves, well, the Union's objecting; I don't care about the union we'll fix that in a month or two, but right now, nobody leaves. We've got airplanes to put on the ground.

So, that was the tone that was set and--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Did you also have field facilities on, was your intent, initially, was that you were going to go below the region, too, though to get the en-route centers and the TRACONS on?

MR. GRIFFITH: We ended up with the centers on there, and at some point, some of the TRACONS, but--

MR. AZZARELLO: Was that by design or--

MR. GRIFFITH: --that was, really, to get the system started back up, you know. Because, you know, as tragic as it was, there was a real urgency to get those airplanes back in the air. Aviation is a \$900 billion-a-year industry for the U.S. and it's a genuine engine for the economy. So, you know, part of our job was not only get it shut down, but get everything thing in place where you can get it going again as quickly as possible, but you're now, making sure first that it's secure and then safe. And then efficient.

MR. AZZARELLO: Okay, so I'm Jeff Griffith on 9/11 and I want to know what's the universe of potential, additional potentially hijacked aircraft

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that are out on the system, after the first two crashes. You've got two crashes at the Trade Center. You get on with the Command Center and now they're beginning to tel you about reports that are filtering in on a Delta, on American 77 that was lost.

MR. GRIFFITH: Right.

MR. AZZARELLO: If I'm you, that day on that floor and I want to get a handle on the situational records, how many other potential suicide bombers are in the system right now, where do you go for that information?

MR. GRIFFITH: That's why I had John White--

MR. AZZARELLO: You say here?

MR. GRIFFITH: --you heard me say to John White stay there and do not hang up that phone. And then I told Doug Davis, you sit down there and you stay here and don't move and you talk to John White and I had already told John White, go out and get unusual reports reported directly to you.

MS. HYDE: Right, I mean, but, again, sort

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of what's happening that day that we know from the Cannoles call. For example, the real-time countdown of 77 plowing into Washington, you know, 30 miles out, 20 miles out, 10 miles out, is being reported on the Cannoles call. The way we know that is that Mike Scirillo [ph] is standing or actually has a relay person and Mike is conveying that information, actually, ultimately to the White House. So, our sense is that either Dulles had to have been on that, somebody with a scope that had that target that had countdown information about how close. And that's early. We know that that would have been sort of in the 9:30/9:35 time frame. And I appreciate you telling us what the purpose of the call was, what the call was servicing was actually, at least from some that we know of, was actually serving, though, as a center for information being driven in that the Command Center, plus the Command Center's POSC display and doesn't have a real-time scope that maybe the Command Center didn't have. So, I want your reaction to, first of all, you know, take 77, as an

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

example, and that it's bearing down on Washington. Does that information that you were getting from your connection Command Center or did you get it from somebody down in the Cannoles' room or elsewhere?

MR. GRIFFITH: I got--I did not get it from this room. I had information that there was a fast-moving target 30 miles West of Dulles moving East. I had that information and I don't recall where it came from.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: I recall that I had it and I shared it. And I--

MR. AZZARELLO: Who did you share it with?

MR. GRIFFITH: The people in the room you know.

MS. HYDE: The people in the ACC?

MR. GRIFFITH: The people here.

MS. HYDE: Did you share that, do you know if that went into the SVTS?

MR. GRIFFITH: I don't think that went into the SVTS because, you know, initially, we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

thought that--we didn't know who it was, but we thought it might be military jets scrambling to the Capital region. I remember that thought. I didn't share that, but I remember that thought.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: And I recalled that we had a requirement at Washington National to report any unusual aircraft situations to the Secret Service.

MS. HYDE: Right.

MR. GRIFFITH: And this report, generated at Dulles and got to the Secret Service and I was told that that had happened. And that met my--the concern in my mind at that point was, okay, did we tell the Secret Service, somebody told me we did. Okay, that part was done.

The next think I heard was that there was a C130 off of Andrews that had reported that on Air Traffic Control frequency that American 77 went into the Pentagon, was not American 77, that aircraft just hit the Pentagon on the West side.

MS. HYDE: And--

MR. AZZARELLO: You equated the fast-mover

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

with the crash at the Pentagon?

MR. GRIFFITH: Yeah.

MR. AZZARELLO: Because of the timing of it?

MR. GRIFFITH: Yes.

MS. HYDE: Well, that gets to two points, actually. First of all, you're down here, you're on the line with the Command Center. Where else are you getting Air Traffic information, if not from, you know, either Cannoles or people down here?.

MR. GRIFFITH: Well, as I said, I had runners from here to here.

MS. HYDE: Right, and that makes sense because there's a lot of information coming in here and the runner idea we've heard about. What I'm wondering if we're missing is was there someplace else that Air Traffic information--

MR. GRIFFITH: No, not a word, no.

MS. HYDE: So, basically, you had Air Traffic information here, primary source was the Command Center?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Right.

MS. HYDE: And then you had Air Traffic information down here, which was much broader than the Command Center, which was--ended up being centers and local, at least we know local people were on it with scopes, and there were runners going between the two?

MR. GRIFFITH: Right.

MS. HYDE: On the issue of 77 and hearing about the C130 report, that report came from National and the folks at National with their own binoculars, virtually saw it go into the Pentagon.

MR. GRIFFITH: Mm-hmm.

MS. HYDE: Nevertheless, we've heard from many people in the ACC or the WOC that day that there was confusion for hours later about what hit the Pentagon. What aircraft, you know, first of all, was it a commercial aircraft as opposed to, say, a helicopter and then trying to identify which carrier and which plane it was. Do you recall that frustration, trying to understand what actually went into the Pentagon?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: No, I think it was--I think in my mind, I had resigned to the fact that, you know, an airplane hit the World Trade Center once; an airplane hit the World Trade Center twice; an aircraft hit the Pentagon, there were airplanes missing in the system, so the only conclusion that you could pull out of the back of your mind is, it had to be one of those airplanes.

MS. HYDE: Well, and that makes sense, certainly now and we know that National folks watched it go in and the C130 report. Yesterday, speaking to Shirley, you know, she recounts Monte being so frustrated with not knowing what went into the Pentagon that he was, you know threatening to get in his car and go over there and figure it out himself.

MR. GRIFFITH: Yeah.

MS. HYDE: Do you have any insight into how it was that Monte didn't know what had hit the Pentagon?

MR. GRIFFITH: Well, I hadn't, let me just put it this way. I had no report that it was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

American 77.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: I had no report of that,
but--

MS. HYDE: But you had a report from the
C130 that it was a commercial, a big aircraft.

MR. GRIFFITH: I think it was described as
that aircraft.

MS. HYDE: As which one?

MR. GRIFFITH: "That."

MS. HYDE: Just the fact that the C130 had
seen what, an aircraft?

MR. GRIFFITH: Yes.

MS. HYDE: Just an aircraft?

MR. GRIFFITH: Yes.

MS. HYDE: I see. So, the C130 report
wasn't anymore specific than aircraft as opposed to
helicopter?

MR. GRIFFITH: No. It was articulated to
me that a C130 off of Andrews observed that
aircraft or the aircraft hit the West side of the
Pentagon. That's what was relayed to me. And then

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

through some kind of conversation, I determined that the C130 was going back to Andrews to land. That they pulled it off of whatever mission it was on and it went back to Andrews. But, did I know at that point that it was 77? No, but, in my mind in thinking--you know, I'm thinking that, you know we've already had two commercial airliners hit two sites, we're missing airliners--

MR. AZZARELLO: You're including it as one of the missing airliners, but you equated the fast-moving vehicle over at the Pentagon crash, when you first heard of the fast-moving VFR, did you equate that with any particular aircraft that was reported missing at the time?

MR. GRIFFITH: Yeah, I think I did. Yeah, because I remember very specifically report, you know, we've got a fast-moving airplane 30 miles West of Dulles, and it's headed East, you know, for D.C. or something like that, you know, in my mind it's gotta be fighters, they're coming here to protect us, you know. And then the next one C130 reports an aircraft hit the Pentagon, in my mind,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I'm--

MR. AZZARELLO: You're thinking commercial, but you're not thinking airline company at that point?

MS. HYDE: You not thinking AA 77?

MR. GRIFFITH: Right, no.

MR. AZZARELLO: You're not even thinking American or United or--

MS. HYDE: You just know that you've got a list of missing aircraft and AA 77 was one of them?

MR. GRIFFITH: Right. Well, I don't even know if 77 was one of them at that time. I can't recall that. Because I remember that my list had American 11, it had United, what was it 193?

MS. HYDE: 174.

MR. KARA: 175.

MR. GRIFFITH: 175.

MS. HYDE: And United 93.

MR. GRIFFITH: I don't think I had United 93 on there yet. But I had a Delta airplane on there; I had a Continental airplane on there.

MS. HYDE: Did you keep that list from the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

day?

MR. GRIFFITH: No, I shredded everything when I left.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: Yeah, for months I kept this folder in my desk, I kept it locked up, thinking somebody's going to want this, you know. And then, when I left, you know, I couldn't take anything with me, so--

MS. HYDE: right.

MR. AZZARELLO: Did you think you got beyond the fast-moving vehicle information, you said from which end, because what I'm seeing on the transcript on this end with John White and Doug, he tells you, John White tells you around 9:25 about the American 77?

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: Then the next thing you see on this transcript regarding the crash is that a plane crashed into the Pentagon comes in at 9:41, which is roughly three minutes after the crash. So, there's nothing on this line about fast-moving

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

VFR. So, I guess, my question is are we to conclude [unintell.] was there any other lines of communication for Air Traffic situational awareness?

MR. GRIFFITH: No.

MR. AZZARELLO: I mean, this was limited to the Crisis Center and the Cannoles telecon.

MR. GRIFFITH: Yeah, the intent was to set up with the Command Center to get minute-by-minute notification and to get everything, anything unusual reported to the Command Center and reported into this room. that was the intent.

MR. KARA: Regardless of where it came from, whether it came down from--

MR. GRIFFITH: Whether it came here--

MR. KARA: --or it came from John White--

MS. HYDE: Right.

MR. GRIFFITH: --or it came from the SVTS.

MS. HYDE: Well, but, at the end of the day we can say that 77 was reported at and we have a time to it up to here, right? You say--

MR. AZZARELLO: At 9:25 they say they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

can't find it, it's missing.

MS. HYDE: Right, but what's reported about 77 is that it's missing, there's no detailed--there's no information about position of the target, where 77 is.

MR. AZZARELLO: It's where they lost it, West of West Virginia.

MS. HYDE: So, I want us to get this right. I want us to know that 77's reported up to here, we know this to you, that 77's missing. But there's nothing that the Command Center's reporting about the position of where 77 is. Separate than that, and I think without a call sign associated with it, there's a report coming in from Dulles that there's a fast-moving target. The two are not married up to be 77?

MR. GRIFFITH: Right.

MS. HYDE: We know 77's missing, we know we have a fast-moving target heading towards D.C. And once Dulles picks up that target, someone's got it on a scope and someone's able to give position information at where it is and where it's going.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Right to notify Secret Service.

MS. HYDE: And to notify Secret Service.

MR. GRIFFITH: Right.

MR. KARA: Let me throw one more piece of information in on the time line. We know from the tapes and transcripts from Dulles TRACON that the controller who actually first spotted it on the scope, that time is about 9:32/9:33, John is that correct.

MR. AZZARELLO: [unintell.] 9:30.

MR. KARA: At the time she sees it when we plot the lat/longs for it's position, it's not West of Dulles, it's actually East of Dulles, so that's 30 miles West of Dulles piece of data that's floating out there, 30 or 60, plane [unintell.] suddenly doesn't start to compute?

MR. GRIFFITH: Thirty miles east of Dulles would have been East of D.C.

MR. KARA: No, right, no, the plane at that point of time when Danielle O'Brien [ph] picks it up on her scope, the plane is actually East of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Dulles, not West of Dulles.

MS. HYDE: The plane is East of Dulles airport?

MR. GRIFFITH: How far East of Dulles?

MR. KARA: Yes. See if I've got the times on here. This is 9:33 and these are 12 seconds, so you can back off to 9:32 and here's Dulles over in here, so at 9:32/9:33, this is American 77, it's actually over in here someplace, I don't know exactly, but Dulles is up here.

MS. HYDE: Okay, so getting back to the report is that we've seen in the system, the words are that it's West of Dulles?

MR. KARA: Well, I don't know that that report's on 77, the--the terminology here is 30 miles West, the terminology later on in their own chronology is 60 miles West, but that comes much later in the morning, it's not contemporary with the fast-moving aircraft approaching the White House.

MR. GRIFFITH: I don't know where the discrepancy is. I know that that's what registered

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in my mind, we had a fast-mover--

MS. HYDE: Right and it may be that the time is earlier, it may be that the time is--

MR. KARA: Because we had this entry in the Cannoles' chronology is at 10:14 a.m., fast-moving aircraft 60 Northwest of D.C. And I just want to make sure we're not equating this to 77.

MS. HYDE: No, I think this is a different aircraft.

MR. KARA: Actually, Dan Diggins, told us that he--Dan Diggins did that, he said that's 93, when we talked to Dan Diggins.

MR. AZZARELLO: You see the timewise at least it's being logged around--

MS. HYDE: But, but--

MR. KARA: He typed this in.

MS. HYDE: Yeah, and does he remember hearing 93, but he just didn't type it

MR. KARA: We drilled him on that a couple of times and he came back both times to that was the 93 entry, right?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: I don't know.

MS. HYDE: Actually, we, John and I, of course will have another interview, so I wanted to maybe get out of sequence a little bit and talk about what you've mentioned a couple of times, which is the SVTS?

MR. GRIFFITH: Mm-hmm.

MS. HYDE: Do--what you recall about the SVTS, and were you participating in the SVTS?

MR. GRIFFITH: Yes.

MS. HYDE: Picked it up?

MR. GRIFFITH: Mm-hmm.

MS. HYDE: Do you recall when you first went in it or--not a time, but in terms of a sequence, even if we take the 77, the Pentagon hit as a, maybe, a reference point?

MR. GRIFFITH: No, I don't, I know that, you know, what my recall is it's somebody gets my shoulder and says, look, we've got a SVTS coming up, the White House wants to know what the situation is, get information. So, you know, and I started asking John White, okay give me call signs,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

give me point of departure, give me point of arrival.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: A point of destination, tell me what you know at this time.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: So, I remember writing that down--

MS. HYDE: Mm-hmm.

MR. GRIFFITH: --and then going into the SVTS and reporting what I had gotten.

MS. HYDE: So, when you went into the SVTS, do you recall was there video pictures up or was it just audio?

MR. GRIFFITH: That was video.

MS. HYDE: You could see some faces?

MR. GRIFFITH: Yeah, I was pretty sure it was video. You know, we used to do these military SVTS a fair amount of the time.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: But yeah, I can remember speaking and looking at--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: People?

MR. GRIFFITH: --people, yeah.

MS. HYDE: And do you remember who else from FAA was in there, when you were in there?

MR. GRIFFITH: I can't say for that particular one because we did a number of these things that day and for the rest, you know, forever. So, I can't--

MS. HYDE: Was it Monte or the Administrator, do you recall?

MR. GRIFFITH: I don't recall if they were specifically in there or not.

MS. HYDE: Okay.

MR. GRIFFITH: I was taking my direction from the person in charge, you know, sitting there--

MS. HYDE: You were taking direction from Lee?

MR. GRIFFITH: Well, sometimes it was Lee, sometimes it was some other guy, a great big guy?

MS. HYDE: Mike Morris?

MR. GRIFFITH: I don't remember, I mean,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

as far as people I see in the hall, you know, I'm taking orders from this guy.

MS. HYDE: Do you think he was the one who directed you to go into the SVTS?

MR. GRIFFITH: I don't know, I just know that I remember somebody getting my attention some way saying, look, we've got a SVTS coming up, the White House wants information, they want to know what the situation is. Get information.

MS. HYDE: Is it your impression, when you went in there, was it that this was a call that was already underway or that this was a call that was just being formed?

MR. GRIFFITH: I don't have the impression it was already underway.

MS. HYDE: So, you think you were sort of there at the beginning?

MR. GRIFFITH: Oh, yeah.

MS. HYDE: You were there at the beginning of the SVTS being set up, put up? I'm trying to get a sense when you walked into it, was the conversation going on and you're coming in to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

report information or you're sort of in there as the conversation's getting going about what's out there?

MR. GRIFFITH: It seems to me, like, it was one of these things of, you know, there were different agencies on there, I can't remember who they all were, you know, the FBI and the State Department, whoever, and the Coast Guard was on there. But, I mean, that's my recall, the logs may show that they weren't on there, I don't know.

MS. HYDE: I'm only--

MR. GRIFFITH: My recall is that there was a certain set of people there and, you know, they were talking about different things, you know in the security forum and then something came up about okay, what's the status? Do we know what airplanes are missing, et cetera, et cetera. And that was my cue and I said here's a report that we have as of this time and I reported what I had gotten from the Command Center.

MS. HYDE: And then did you stay after that? I mean, about how long were you in there,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was it--

MR. GRIFFITH: Five to seven minutes, probably.

MS. HYDE: Okay, so you didn't linger that for an hour or something?

MR. GRIFFITH: Oh, no, no, I had work to do.

MS. HYDE: You went back out to figure out the information?

MR. GRIFFITH: Yeah.

MS. HYDE: Did you go in there more than once that morning and give a report? Did that happen a couple of times?

MR. GRIFFITH: Oh, yeah.

MS. HYDE: So, you would sort of periodically come in and give reports about the aircraft situational?

MR. GRIFFITH: Yeah, but I don't remember the SVTS, like, being an endless thing. You know, I remember going in there and several times we had, you know, it was this thing of, okay, we're going to be on a SVTS in 10 minutes, you know, here's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what we need.

MS. HYDE: So you remember the SVTS constantly being up?

MR. GRIFFITH: No, I don't.

MR. KARA: Did you sign in and out when you went into the SVTS?

MR. GRIFFITH: I'd like to say that I did, but, probably not. We won't worry about that?

MS. HYDE: Not worried about the log keeping. When you went in that--so your recollection is in the morning that there was a couple times when you sort of did the same drill, go in there and giving updates?

MR. GRIFFITH: Yeah, yeah, I'm pretty sure.

MS. HYDE: Do you remember the substance of any of those updates? I mean, for example do you remember if the news you'd heard from 77 was reported on the SVTS? You had said before you didn't think it was.

MR. GRIFFITH: Didn't think it was, I think that we had determined by this time that the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

two aircraft that hit the World Trade were--

MS. HYDE: Mm-hmm.

MR. GRIFFITH: --I can remember saying we believe it is American 11 and United 175.

MS. HYDE: Right.

MR. GRIFFITH: I think we had that much information. But not 77.

MS. HYDE: All right. That would be consistent with Dick Clark's book. The part about, except those words were coming out of--

MR. GRIFFITH: I read in the Post about his 357 magnum--

MS. HYDE: Those words were coming out of Jane Garvey's mouth.

MR. KARA: And speaking of him, who was moderating the SVTS when you were in there? Or even the tag at the bottom of the screen that said--

MR. GRIFFITH: I don't know, the moderation was always done by, there was, like, a--there was a group of people and it was always a squashed picture and you couldn't tell who they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were--

MS. HYDE: Because the narrow, it was a
wide--

MR. KARA: The view mount?

MR. GRIFFITH: I guess so, but I can
remember, they weren't in one of those four
screens, you know, one or two TVs had four screens
to it.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: And it seems to me like
they were always up there where you couldn't tell
who they were.

MR. KARA: They got real fuzzy?

MR. GRIFFITH: Yeah.

MS. HYDE: Do you recall seeing "Stars and
Stripes?" DOD on the SVTS?

MR. GRIFFITH: Oh, yeah, yeah, the Joint
Chiefs was on, yeah.

MS. HYDE: Do you recall, I mean, did you
recognize anybody?

MR. GRIFFITH: No, not from--not from
knowing them before than, subsequently, I--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: In uniform or civilian?

MR. GRIFFITH: Uniform.

MR. KARA: [unintell.] JCS.

MR. GRIFFITH: Yeah, it was one guy that was a one-star that was always in there. He and I got to know each other afterwards, but--

MR. KARA: General Winfield [ph]?

MR. GRIFFITH: No, he was a black guy and I can't remember his name.

MR. AZZARELLO: That was on the SVTS that day, you said?

MR. GRIFFITH: Well, I have to be honest with you on that particular SVTS that day, I can't tell you that he was the guy that was there. But there were people there with stars, you know.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: And there was one guy that always sat at the head of the table that had a suit on and I didn't know who they were.

MS. HYDE: Did you hear a conversation about military aircraft or scrambling military aircraft?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Yes.

MS. HYDE: What do you recall of that?

MR. GRIFFITH: That conversation came up several times during the day, so I don't remember at which point was the first time I had heard it.

MS. HYDE: It came up on the SVTS several times?

MR. GRIFFITH: Oh, no, I'm back out of the SVTS, now.

MS. HYDE: Okay, stick in and we want to talk about that conversation, but in terms of the SVTS, do you remember a military aircraft being discussed on the SVTS?

MR. GRIFFITH: No, not early on, I mean, you know, obviously, in days subsequent when we were setting up the CAPS and, you know, doing a lot of those things, but--

MS. HYDE: Right, aside from the compromise or hijacked aircraft, were you discussing on the SVTS, do you recall, about the ground stop and the decision to take down all the planes, to land all the planes?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Not in the first one because we hadn't done it yet. But, yeah, at some point, yeah, we said--

MS. HYDE: You reported?

MR. GRIFFITH: --yeah, we reported. You know, we put direction out, you know, put everybody on the ground ordered aircraft to land at the nearest airport where you're capable.

MS. HYDE: Ground and landing planes, right. You talked about 77, do you, I guess the first thing to ask about would be your knowledge of 93. And you may not have known the call sign then, you may have known about it as an aircraft over Pennsylvania or something like that. Do you recall what information you had about 93?

MR. GRIFFITH: I did not have much information on 93.

MR. AZZARELLO: I have something here that may help jar your memory.

MS. HYDE: Okay.

MR. AZZARELLO: Here's the Command Center transcript, between Doug and John and it's when

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Doug gets on and says sitting next to you in the Crisis Center. Doug, we just had another report, he tells you about--he tells Doug about 93, lost, was in Cleveland Center's airspace around [unintell.] just reported they heard screaming on the frequency and people have a bomb on-board the aircraft. Departed Newark en-route to San Francisco was the report. Doug finds out the type of aircraft, we're tracking him, right? And the Command Center says, White says, we're--correct, we're still tracking him at this time. And then they interject another report on the Continental 321 over South Bend, Indiana, that squawked the hijack three times, but they made contact with the pilot and the pilot said everything's okay. But they wanted to find out why he squawked the hijack.

And then they go back to 93.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: After the plane crashed in the Pentagon and he says, United 93, we spoke about it before, he's reversing course over Akron, they just lost his transponder and he's heading East

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

now. So, now, he's done the U-turn, he's not going to San Francisco and they lost the transponder. And it's a 757, it descending they say; and then there's reference to the crash in the Pentagon in the background again, on CNN. The diversion of all international aircraft in-bound, they had to divert to Canada.

And then the ground stop is discussed and then, United 93, actually, on the ground stop, Dough asks the Command Center, says we did it on our own already and that's when Doug said don't take any action like that, this needs to be coordinated. And you referenced that before and Doug was--

MR. GRIFFITH: Yeah, I told Doug to tell them that, yeah.

MR. AZZARELLO: Yeah, Doug recalls you standing there telling him, listen you've got to coordinate this--

MR. GRIFFITH: I didn't quite use that language, but that's

MR. AZZARELLO: Heard you were a little

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

more colorful.

MR. GRIFFITH: Yeah, I was.

MR. AZZARELLO: So, this puts us at around 9:46. And then he goes right back to, so you tell Doug to tell them, look, don't take those actions on your own. He says, okay, United 93, go ahead, it's 29 miles out of--290 minutes out of Washington, D.C.--29 minutes out of Washington, D.C., and tracking towards us. This is the one that reversed course in Ohio, that's all I have, White says. And then Doug says keep someone on the line, I need you on the line, pretty much, okay.

Then we go to 9:48, John, okay, the United 93 is 29 minutes out of where? He's heading toward the Washington area, he was at flight level 35 Zulu, he turned around in Akron, Ohio, and is tracking toward the Washington area at this time. What type aircraft? Again, United 93, Boeing 757. You there, John? Yeah, White's here. Doug says they're pulling Jeff away to talk about United 93. And then John says, okay, oh, do we want to think about scrambling aircraft. Doug, Oh, God, I don't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

know. John White, that's a decision somebody's going to have to make, probably in the next 10 minutes. And Doug said, oh, you know, everybody just left the room. And there's some garble, fragmented unintelligible background conversation, then he says, Doug, I have another one. And then for Delta 1989 entry. Tell us about, what's going on here where there's a discussion going on on 93 reversing course and approaching, where--who's pulling you away, where to discuss what?

MR. GRIFFITH: I have to think about that.

MR. AZZARELLO: I guess the question is who's the they that's pulling you away to talk about 93?

MR. GRIFFITH: I have to think through that one a little bit. I know one of the conversations that was going on is who really has the authority to shoot down an airplane? And we all pretty much decided that it was the Secretary of Defense.

MR. AZZARELLO: Is that a conversation that was going on in the SVTS or in the WOC or--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: No, this was in a corner.

MR. AZZARELLO: In a corner?

MR. GRIFFITH: Yeah.

MR. AZZARELLO: In a corner where, by the Crisis Center?

MR. GRIFFITH: It was somewhere, you know, it could have been in this corner, it could have been back here, I don't remember exactly, but somewhere we had this conversation about, you know, wait a minute, there's talk about shooting down airplanes. Okay, who has the authority and we gotta get this right, because you know, the--I had not read anywhere in our publications about shoot-down authority. So, you know, who gives the signal to shoot down? Because in my mind there were fighters in the air; and they were responding, you know, to the situation. And there wasn't anything specific in my mind about shooting down Flight 93, but there was this thought of, wait a minute we've got to start defending ourselves here, this thing's getting way out of hand.

MR. AZZARELLO: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: And, you know, part of that was shutting the system down. And another part was this people talking about shooting down airplanes. So, and I have to tell you the protocol for shoot-to-kill at that point, I don't think anybody could have said what it was.

MS. HYDE: But, should I read in to what you're saying is that there was concern about notifying the military and getting them involved because they might actually shoot down? I mean, sitting here today, it sounds all of like that's a decision for somebody else, not--it's not the FAA's decision to figure out who in the chain of command and the military person, I'm sure you know that. It's not--it's so above everybody's pay grade or it's not even within your agency. But what I take from you recounting that is that there was sort of a concern about getting the military in there because they might go ahead and do that. And there was concern about getting the military involved.

MR. GRIFFITH: Yeah, I never had a concern about getting the military involved, because I know

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that those military officers that I told you about, you know, that are in our building, that report in the Air Traffic organization, I know that those people were doing things. I just know that. And so, you know--

MS. HYDE: How do you know that--what do you know about what they were doing? For example, the sort of real time, 30 miles out or 30 minutes--

MR. AZZARELLO: Twenty-nine minutes out?

MS. HYDE: Twenty-nine minutes out--how do you know that--do you recall giving to Cheryl Atkins, Cheryl, we've got one 29 minutes out of D.C. after we've already had [unintell.] on the Pentagon?

MR. GRIFFITH: No, not that, but, you know, I remember one time going back to this room and there were people in military uniform in there, I won't name them for you because I don't remember which ones they were, but there were people in military uniform in here and I'm pretty sure Cheryl Atkins was in here, you know, I can't tell you at what point she showed up, but you know, I--I--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Well, Cheryl reports to you, just let me play devil's advocate for a moment. And to make an assumption that Cheryl, because she's a military person, somehow knows what you know, when you--you or Doug your are the primary, you know, clearing house for information. If you not, you know, you would have to tell Cheryl that and instruct Cheryl to do these things. What Cheryl picks up and what she happens to do with it, it doesn't sound to me, but tell me if I'm wrong, like a very intentional way of asking. I've heard you say a number of times that the military people or Cheryl were there. Do you have any sense, were you directing the military people to do anything?

MR. GRIFFITH: Never.

MS. HYDE: And do you have any specific--

MR. GRIFFITH: Giving them information.

MS. HYDE: You were--so you were giving Cheryl information.

MR. GRIFFITH: Anything that I knew if she was beside me, I would say this or this, in fact, she may have been telling me some things.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Do you recall seeking Cheryl out if she didn't happen to be standing beside you to tell her any information to convey to the military?

MR. GRIFFITH: Seeking her out? No, you know, if my, in my mind I can have a vision of, you know, there were a couple of times that I was over here, but most of my time was spent in this corner in the SVTS or a couple times back here. But there were a couple of rare times that I was over here. I can remember Cheryl Atkins somehow there. Now, whether it was in those moments, I don't know. I can't tell you that.

MS. HYDE: And whether she happened to be there next to you, what I'm saying is, did you ever because she reported to you, did you ever convey to her, Cheryl, this is something we've got to get to the military? This is information the military has to have?

MR. GRIFFITH: Listen, with Cheryl Atkins, I had no concern about her conveying anything to the military because we had a relationship where I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

told her what I knew, everything I knew and I knew that she was reporting back in, [unintell.] wasn't there, but, you know, people were over there and I knew that she knew the people to get to.

MS. HYDE: My question wasn't directed at to who she was going to tell it. My question was, do you recall giving Cheryl information and telling Cheryl, Cheryl, convey it to whoever you convey it?

MR. GRIFFITH: No.

MS. HYDE: Just get it to the military?

MR. GRIFFITH: No, the only thing I recall in that area is--here's what my concern was. When people started talking about shoot-to-kill, shooting down airplanes. We have a responsibility called Rules of Engagement, okay, and that's where the controller vectors the military guy until they see the airplane they're going to shoot down. We have never done that before. And aside from a controller passively reading it, you know, in fact the rules of engagement for the shoot-down of aircraft, didn't exist at that point. The only Rules of Engagement we had that existed at that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

point, were for drug interdiction. So, a controller had never had a responsibility to vector military airplanes to a point where they could engage another aircraft, a civilian aircraft to shoot it down. And so, that's what was going on in my mind.

MR. AZZARELLO: FAA Rules of Engagement, versus military Rules?

MS. HYDE: Did you know that NORAD had controllers that could vector--

MR. GRIFFITH: Oh, sure.

MS. HYDE: --that they didn't need the civilians to controllers to vector them?

MR. GRIFFITH: Oh, sure, I've been to NEADS.

MS. HYDE: So, then, tell me, why did you think that you had, what you just said about there was no controller, I take it you mean civilian controller, FAA had ever done that before?

MR. GRIFFITH: Right.

MS. HYDE: But then, a civilian controller wouldn't have to do that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: But remember, that it's, you know, under the rules of the day, this was a federal administration and that the airspace didn't belong to the military at that point and civilian airplanes were being vectored to land at airports. There were 4,500 civilian airplanes--

MS. HYDE: Mm-hmm.

MR. GRIFFITH: --who were being put on the ground.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: So, the military, unless they were doing due-regard, would not intentionally just go out and vector airplanes for intercepts--

MS. HYDE: Unless they're told that it's a target that's a hijack. What I take you say before, you said there was a conversation going on about who has authority to shoot down aircraft.

MR. GRIFFITH: Right.

MS. HYDE: So the folks, whose ever gathered in that small group understands that these are now aircraft that are controlled by CARF [ph]. That this is, you know, you've had a plane into the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Pentagon, you've had two into the World Trade Center; so now, you've got a different situation. If you were having that conversation about an aircraft controlled by a terrorist and who would have the authority to shoot it down--I'm trying to understand why you were concerned if an FAA controller would know how to vector or perform Rules of Engagement when it seems clear to me that that's wholly a military function, you know, that the military wouldn't need a civilian controller to vector him or here in there. The military would just need to know.

MR. GRIFFITH: Well, remember that that aircraft is operating in airspace with a lot of other airplanes that are civilian. and so, you know, whether or not NORAD had, what are we talking about, 93? Whether they had him identified, I don't know. But I wasn't having that kind of a conversation. The only conversation--the only thought that was going through my mind is that if they're going to start talking about shooting down airplanes in a civil system--remember the fighters

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that were up in the air were talking to the centers of whose airspace they were in.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: And they were also using UHF or HF or whatever they had to talk to NORAD.

MS. HYDE: Mm-hmm.

MR. GRIFFITH: But, you know the person, they were operating inside the airspace system that we had control over. And so, my thought at the time was, they're going to be talking to air traffic controllers about shooting down airplanes or about something and, you know, that's something that we have never done before.

MS. HYDE: So, did that lead you to conclude that you didn't want to tell military about those?

MR. GRIFFITH: Oh, absolutely not.

MS. HYDE: This conversation is about, we're thinking about scrambling aircraft. And that decision, someone's going to have to make it and then everybody left the room.

The point is that the military.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: --[unintell.] from the military, never.

MS. HYDE: So did you convey the 93 information to the military?

MR. GRIFFITH: I don't know whether I did or not.

MR. AZZARELLO: The next reference to scrambling is--

MR. GRIFFITH: I can't tell you whether I did or not.

MR. AZZARELLO: --John--he tells John, Doug that Peter's talking to Monte now about scrambling; that's at, like, 9:53, which is roughly 10 minutes before 93 crashed.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: Do you remember--were you part of any conversation with Monte Belger and Peter Challen about whether to scramble or not on 93?

MR. GRIFFITH: No.

MR. AZZARELLO: Let me ask you--

MR. GRIFFITH: Well, I'm not going to say,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

no, because I was talking to Peter and Monte like all the time, so, you know, I don't know where that conversation went.

MR. AZZARELLO: Well, let's follow it up. It says Doug, I was just advised that we are scrambling in the Washington and New York area, this is John White telling the Crisis Center--

MR. GRIFFITH: Okay.

MR. AZZARELLO: --that's what I've been told, he said. Doug says, okay. Then they go to an update on Delta 1989, okay, it's not being hijacked, as you said, that was the one that went back and forth. And then he says, okay, we don't have a position any longer on United 93. He did pass right over Pittsburgh, last time we saw him. So, they're tracking him real-time at Cleveland Center.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: 9:56 and we lost him over Pittsburgh. That's the general area.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: United 93 is 20 miles

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Northwest of Johnstown. So, somebody's picked it up now. 20 miles Northwest on Primary. Back on Primary--we now know that there was a momentary switch of the transponder on-and-off on 93, right, Miles?

MR. KARA: No, once it's off, it's off till the very end.

MR. AZZARELLO: Then someone picks it up on Primary.

MR. GRIFFITH: Right.

MR. AZZARELLO: It's a report from another aircraft and pretty much, if you follow this through, and it's almost crash time. At least we don't see it from this line. Just a second the United 93 was spotted by a VFR at 8,000 feet 11 miles south of Indianhead just North of Cumberland, Maryland, that's 10:00 o'clock, three minutes before crash.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: And then it pretty much crashed. Secrets [unintell.] talking about NORAD, what, I guess the fundamental question that I have

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

following up to what [unintell.] says--

MR. GRIFFITH: Yeah.

MR. AZZARELLO: --it sounds like, they're telling me, we don't want mischaracterize, but it sounds like you have some concern and maybe it's shared by others--tell us--about the fact that the military may want to take action, as in shooting down a commercial aircraft within a system that you say is a national airspace system that the FAA still has control of and that you have concern that your controllers are not trained in vectoring military aircraft to shoot down a commercial aircraft. Was my summary of your concern accurate?

MR. GRIFFITH: Yeah, I mean,--

MR. AZZARELLO: Who shared that concern with you? Was that shared by others at or--at your level, above your level or, did Monte Belger, for example, share that concern that your controllers may be asked to vector--

MR. GRIFFITH: Well, see, I don't know. But, remember, the story continues. I mean there were other airplanes that they were talking about

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

shooting down, okay? And I remember at some point, you know I got on the phone with General Eberhard, I ran back to my office, got on the STU [ph] phone, I called General Eberhard and I talked to him for a little bit, you know, we're shutting this thing down. You know, he said, yeah, we're launching. Okay, then--

MR. AZZARELLO: Who spoke to Eberhard?

MS. HYDE: He did.

MR. GRIFFITH: I did, I called Eberhard, yeah.

MS. HYDE: When was that, was that after the--

MR. GRIFFITH: Oh, I don't have a clue, you know, I don't have a clue. And then, you know, the next thing was, you know, I--you know, my focal became Larry Arnold, who was a major general down at Tindle, he and I, like, for 24/7 for a few days after that, but I remember, you know, we were going through this thing of, you know, this thing about shooting airplanes down may be a real thing here, you know. And so--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Your focal point on 9/11, General Arnold of your--

MR. GRIFFITH: Cheryl Atkins was my focal point as far as I was concerned.

MR. AZZARELLO: Did you talk to General Arnold on 9/11?

MR. GRIFFITH: Oh, yeah, yeah.

MS. HYDE: Yeah, what you're saying is, you talked to General Arnold. Do you know when, again, that conversation that you reached out--did you reach out to Eberhard first?

MR. GRIFFITH: Yeah, because to be honest with you, I had never talked to Larry Arnold in my life.

MS. HYDE: So, Eberhard directed you to Arnold?

MR. GRIFFITH: No, I asked my guys, I said, okay, whose the commanding general at NORAD something like that, you know, And It's Ralph Eberhard. I said, okay, what's his number, you know, and I called him. Told him who I was, told him what we were doing. I said I'm sure you've got

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a lot of information, I just want to give it to you straight what we're doing. He said, I'll give it to you straight what we're doing.

MS. HYDE: And do you have any idea--

MR. AZZARELLO: [unintell.] secrets--

MR. GRIFFITH: No, no, I don't.

MR. KARA: But the purpose of your call was to inform him that you were bringing the system down?

MR. GRIFFITH: Oh, yeah, the purpose was just, you know, we hadn't gotten a real strong link with the command element of the military. And, you know, and Cheryl was doing here thing and--

MS. HYDE: What was Cheryl's thing as you understood it? What was Cheryl's thing, who was Cheryl coordinating with, as you understood it?

MR. GRIFFITH: The people that she coordinates within the Pentagon.

MS. HYDE: You don't know?

MR. GRIFFITH: No, I--I didn't even know--

MR. AZZARELLO: Hold on, one more question. I understand the concern about, you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

know, the shoot down and the lack of maybe FAA controller training in that area, but as Dana said, that decision has to be made by a pay grade well above everyone in this room and I'm sure many other people in the room that day at the Crisis Center, with all due respect. So, but in the interim, all right, while that decision is being contemplated by the FAA and whoever else--who, in the meantime, is addressing the issue, if anyone, well, let's let at least NORAD know that we've got this United 93 that's bearing down on the capital and the capital's already been struck, the Pentagon's been struck and this may be coming for another government building, it could be coming for who knows where and while the people at the right pay grade are contemplating whether or not to pass the authority down to the fighter jet to open fire, let's at least let them know where it is and see if they can track it and be in position if somebody decides that the appropriate action is to open fire or do something else for that matter.

Was that issue being addressed as best you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

can recall, by you or anyone you are aware of?

MR. GRIFFITH: Here's the way I would assume that would be address.

MS. HYDE: It's so, we've got to leave. The reality is that we're going to come out with a report and that we have to address where information was on Flight 93. And one of the things that we have to talk about, I'll be very straight with you. And I certainly don't want our report to catch you or anybody else by surprise, you know, we want to give you the full opportunity to respond to it and tell us, you know, we don't come to the table with any agenda. We want to try and understand these facts.

MR. GRIFFITH: Mm-hmm.

MS. HYDE: So we have to focus on 93. We have to focus on what people's recollections are of that day and what data sources we have from that day. And we understand that years have passed and that if you don't have a recollection, we certainly don't want you to invent one, you know.

MR. GRIFFITH: I'm not going to do that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: It may not be there. But with respect to 93 and whether anybody the word about that aircraft, we have from the source trickled up to the WOC or the ACC to headquarters. And then we have this segment that says they're discussing whether to scramble, we take that means to notify because you don't scramble aircraft on your own, the FAA. So that means to notify. And then the last we have is everyone's left the room.

MR. GRIFFITH: We would not even initiate the idea of scrambling airplanes.

MS. HYDE: No, all you would do is--you're the FAA, you're not the military, all you would do is notify the military that you've heard bomb on-board--

MR. GRIFFITH: Right.

MS. HYDE: --got his transponder off that is 29 minutes out--that is whatever minutes out. To your knowledge did anyone, you or anyone else notify the military about 93.

MR. GRIFFITH: I did not. Here's what my expectation would be on 93. That the system that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

we had in place with the representative that I had up at Griffiths Air Force Base in the Northeast Air Defense Sector, as you said, those people are watching, they are looking and seeing what's going on. And I would expect that the person that I have up in, I call them NEADS would be talking to Cleveland Center direct to exchange information.

MS. HYDE: Why would you expect that?

MR. GRIFFITH: Because that's their job.

MS. HYDE: So you're saying, your testimony is that the--

MR. KARA: Is that Steve Culbertson [ph]?

MR. GRIFFITH: Steve, yeah.

MR. KARA: But Steve to Cleveland or Cleveland should initiate that to Steve?

MR. GRIFFITH: Oh, listen, NEADS knew what was going on at this point in terms of airplanes--in terms of the system being disrupted. And, you know, my expectation is that those guys in NEADS were on their high alert--NORAD--

MS. HYDE: As a manager, did you do anything to ensure that your assumption that your

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

people, many, many below you were actually conveying real-time information about targets that were known to be hijacked?

MR. GRIFFITH: Did I do anything to convey?

MS. HYDE: No, as a manager, did you do anything to ask whether that assumption that you're saying, whether Steve Culbertson, the person, knew what you knew about and the Command Center knew about hijacked target and that everybody was lashed up and speaking in real time about this target?

MR. GRIFFITH: As a manager, the first thing I did was require the Command Center to put the word out to get any unusual information.

MS. HYDE: Right, we got that.

MR. GRIFFITH: And the avenues--

MS. HYDE: And when they get the information about a target that's clear as day, bomb on-board, they've heard, I mean, there's no question that this is somebody whose no longer being controlled by the pilot and the crew--more over it's heading towards Washington. Did you do

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

anything to ensure that that specific information was passed to NEADS through Steve Culbertson or through whomever?

MR. GRIFFITH: No, I--if I had information. My recall on this information that you just read to me was that Steve was--or that Doug was kind of broadcasting that information. When it would come in over his headset, it was kind of broadcast out in the room. You know. And for those that were around, you know, I can remember him doing things like that. Now whether it was 93 or not, I don't know. But I can remember that Doug became a very significant resource of information.

But, you know, the other side of this is there are military people in the Command Center 24 hours a day, 7 days a week, in what we call--

MR. AZZARELLO: In the CARF you're talking about?

MR. GRIFFITH: In the CARF, right.

MR. AZZARELLO: I've got to ask you this, Jeff.--

MS. HYDE: I apologize for having to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

leave.

MR. AZZARELLO: I have to ask you this, Jeff. You're now talking about there's military people in the CARF, okay. And there's Cheryl Atkins and military people at headquarters. And we're talking about Steve Culbertson is at NEADS as a liaison.

MR. GRIFFITH: Right.

MR. AZZARELLO: And now, that's three different locations and people that you've pointed to as--if I'm understanding you correctly, as people that you would expect somewhere there would get the word to the military about aircraft that day.

But that doesn't comport with either the protocol that's laid out in the crisis handbook and the policies that we talked about earlier today.

MR. GRIFFITH: Right, right.

MR. AZZARELLO: Nor is it laid out in your description of putting the policy aside of what would have happened in a hijack scenario and you talked about each center has their instructions and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the center would call the ROC and the ROC would call the WOC.

MR. GRIFFITH: Right.

MR. AZZARELLO: And at some point there would be coordination by the guy who runs--the Security person running the ACC with the military. And then at another level, a dual sort of track, the Deputy Administrator would be, if there was a hijack and military assistance was requested would be calling General Eberhard, or somebody at a higher level at DOD?

MR. GRIFFITH: Right.

MR. AZZARELLO: Now, those were the two procedures that you said, these are your words that the way the system worked on 9/11 that that's how the notifications would go? But now, you're talking about three different kinds of notifications that we haven't seen anywhere on paper or as--

MR. GRIFFITH: No, what I told you was what I view as my assessment of what should have been happening.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay.

MR. GRIFFITH: I told you about those procedures that were in each facility. I believe that hijacks NMCC is one of those people that the, like that the Air Traffic Control Center would call. I believe so. If not, then I--

MR. AZZARELLO: You mean in the center orders. The think the Center is supposed to call NEADS directly?

MR. GRIFFITH: No, NMCC is the National Military Control Center.

MR. AZZARELLO: It's the--right at the Pentagon?

MR. GRIFFITH: Yes. Well, I don't know if they're at the Pentagon or if they're down at Langley, to be honest with you, but--

MR. AZZARELLO: This net that's set up here in the Crisis Center?

MR. GRIFFITH: Yeah.

MR. AZZARELLO: One of the nets that's set up there is the Primary Net. And that's referenced in the Crisis Management Handbook. And the Primary

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

lists, as one of the participants, as the National Military Command Center.

MR. GRIFFITH: Right.

MR. AZZARELLO: Okay.

MR. GRIFFITH: Okay.

MR. AZZARELLO: Now, that's basically what we need you to help us with. So, the way we read the procedures in place, such as in the Crisis Management Book for Air Piracy, that there's a hijack coordinator, someone in Security that you've talked about up at this desk in the Crisis Center?

MR. GRIFFITH: right.l

MR. AZZARELLO: Lee Longmire, that's where Doug Davis is; you're standing for a lot of the time that day.

MR. GRIFFITH: Right.

MR. AZZARELLO: And that's where the information comes in. And the way we read the policy, that's the position that coordinates with the NMCC on reports of hijacked aircraft, so that the military can take whatever action they deem appropriate?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Right.

MR. AZZARELLO: Decide whether to scramble; decide whether to tail the plain; decide, I guess on 9/11, whether to shoot a plane?

MR. GRIFFITH: Right.

MR. AZZARELLO: So, that's the way we understand the flow of information was supposed to get to the NMCC. And what we see is we want you to help us. We see it at least it coming into the ACC--

MR. GRIFFITH: Right.

MR. AZZARELLO: --because this is the conversation where the Command Center is now doing what you instructed them to do, which is go out to the centers and let us know about any suspicious aircraft. And how, here's the report of one, 93, it's reached FAA headquarters and it's reached the Crisis Center--isn't that supposed to get--isn't that supposed to go from somebody at the Crisis Center at an Upper Management Level, over that the NMCC, aren't they supposed to then--why are now saying, well, no we think Cheryl Atkins maybe would

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

have called--

MR. GRIFFITH: No, I'm not saying that they should or would have done anything other than what the procedures said. But what I'm saying to you is that in my mind, you know, I know that I've got Steve Culbertson up at NEADS and I know that he's going to be engaged doing his job. He's got a job to do and that's when NORAD, you know, forget 9/11, when they see an unidentified target 40 miles out over the coast moving in a that a high speed that nobody knows who they are, they scramble on that aircraft.

MR. AZZARELLO: That's when NORAD sees it, but this is the FAA sees it on its cope in there system.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: And it's not Culbertson, he doesn't have a scope over Cleveland Center. It's Cleveland Center that's watching this aircraft that's reported to have--they hear screaming and bomb on-board.

MR. GRIFFITH: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: So, how does Culbertson, being up at NEADS, Northeast Air Defense Sector, how is he supposed to be the play in that notification to NEADS when it's Cleveland Center looking at a scope and telling their Command Center and their headquarters that there's a plane, here it is, we're tracking it on Primary and it's got a report of a bomb on-board?

MR. GRIFFITH: Well, what I said was forget 9/11, okay?

MR. AZZARELLO: Okay.

MR. GRIFFITH: Any other day of the week, if NEADS sees an unidentified target out over the Atlantic headed in, and they decide to scramble, then it's Steve's job to be the interface with the FAA facility that's, you know, that these fighters are going to move into their air space.

MR. AZZARELLO: I hear you and I don't mean to argue with you, Jeff, but that's not what happened on--let's talk about 9/11. It wasn't NEADS spotted the aircraft.

MR. GRIFFITH: I agree with you.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: It didn't come in from overseas. It wasn't coming in over the ocean. It was inland over Cleveland.

MR. GRIFFITH: I agree with you.

MR. AZZARELLO: So, how, would you suspect--how would you expect that information, given the systems in place on 9/11--what's your understanding of how that information was supposed to get from Cleveland Center's eyes on the scopes to the military?

MR. GRIFFITH: My--I did not go back and look at Cleveland Center's checklist for hijack, so I don't know what they did. But my suspicion is that that log still exists and it would say NMCC for hijacks.

MR. AZZARELLO: So, you're saying that you think the Center's supposed to call NMCC on 9/11, that was the procedure? That's different than the procedure that we've seen here in an headquarter's document.

MR. GRIFFITH: Yeah, well, you have, here, let's see what you have here.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Let me show you the hijack escort procedures here. The military order it's a special military order 7016. See this one, escort of hijacked aircraft.

MR. GRIFFITH: Right.

MR. AZZARELLO: The hijack coordinator, the escort service from the military will be requested by the hijack coordinator by direct contact with the NMCC. Normally, NORAD escort aircraft would take the required action--whatever that action is. And then it says, however, for the purposes of these procedures, the term escort aircraft applies to any military aircraft assigned to the escort mission. Then the military can provide escort aircraft, the NMCC will advise the hijack coordinator of the identification and location of the squadron that's tasked to provide the escort aircraft and then the NMCC will then authorize direct coordination between the FAA and the designated military unit.

MR. GRIFFITH: Right.

MR. AZZARELLO: So, I mean, the way I read

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this is, the request has to be made formally to the Pentagon to the NMCC and then when NORAD says okay, well, where's the aircraft, FAA? Oh, it's in NEADS region, so NEADS will coordinate and where are you tracking it? Oh, Boston Center, okay, well, now, let's put together Boston Center in direct-line of communication at NEADS so they can pass the information on where the aircraft is on the scope and then vector the military to tail it.

MR. GRIFFITH: Right.

MR. AZZARELLO: In accordance with the procedures. And I guess what we're saying is we didn't see that--we don't see that happening with 93. And where would you say the system broke down if that didn't happen with 93? I mean, I can't be anymore straightforward than to say where did it break down.

MR. GRIFFITH: Well, what this says is that this person will do it.

MR. AZZARELLO: Right.

MR. GRIFFITH: That's what this says. This meaning the special military operations, which

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

is an FAA Order 7610.4

MR. AZZARELLO: Right, right.

MR. GRIFFITH: That the hijack coordinator will do that.

MR. AZZARELLO: And I'm not, I think, you know, I'm trying not to be argumentative, but I'm at a loss to understand--

MR. GRIFFITH: Well, you should be.

MR. AZZARELLO: There's no, if there hasn't been a hijacking in the system since '93 in Lufthansa, okay, and if it's not being drilled, a scenario where there's a hijack where Steve Culbertson is called, okay, Steve, you're up at NEADS, so, therefore, if any aircraft becomes hijacked within an FAA center that overlaps NEADS geographical location, you're responsible for getting that information from the Center and coordinating with NEADS. We talked to Steve Culbertson, that's not our understanding of--

MR. GRIFFITH: No, that doesn't exist.

MR. AZZARELLO: No, that doesn't, I mean, so then why would we think that Steve Culbertson

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

would be the guy to look to on 9/11 to tell the military about United 93? If it's not in the protocol, then how would he know, did somebody tell him that? Was that the training? Was the training different from the protocol?

MR. GRIFFITH: No, Steve would follow the 7610.

MR. AZZARELLO: Let me give you a hypothetical: Hypothetically, if NEADS didn't know anything about United 93 until after it crashed, okay, and, yet, we see it has reached specific information on United 93, its location as it's bearing down and approach D.C. is being passed to FAA headquarters and FAA Command Center in Herndon, if that information never got from those locations at the FAA's highest level of management to NEADS, so they could even be aware of it, as being a potential suicide bomber, where did the system fall apart then, if it did, indeed.

MR. GRIFFITH: Well, I think that on 9/11, the system was never designed or tested to respond to what happened on 9/11. Because, if you remember

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what I told you earlier, hijacking situations and this is just me speaking, in my mind, hijacking situations were things that you could anticipate what was going to happen next, you know.

MR. AZZARELLO: Usually they'd go to Cuba--

MR. GRIFFITH: They'd go to Cuba or--

MR. AZZARELLO: --they'd make terrorist demands to release some prisoners?

MR. GRIFFITH: They would always land somewhere and begin some kind of--

MR. AZZARELLO: But that's a different issue from you still had a system in to notify a hijacking. Now, let's look at what happened on that day. On American 11, Boston Center notified their superiors at the ROC, at the region. They simultaneously reached out for Cape TRACON because they knew they were co-located with Otis because they wanted to get the information to them quickly.

MR. GRIFFITH: Right.

MR. AZZARELLO: And then they called NEADS correctly. I'm sure I'm not shedding any new light

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

on you because I know you were instrumental in having this Summary of Hijack Events prepared after the fact. So, if the system works in terms of the military did find out about American 11 about eight, let's say six to eight minutes before it crashed. On United 175 for a myriad of reasons, one of which is the same controller who was tracking 11 as a primary was tracking 175, for that and other reasons, there is not a realization that 175 is now a second hijack in the system, until roughly ten minutes before it crashes. But they notified the military. Okay, New York Center's military operations specialist calls NEADS and tell them about it.

MR. GRIFFITH: Right.

MR. AZZARELLO: So they get notification on the second one, although it's too late to do anything. On American 77, it was lost, no one knew where to locate it, they didn't know where it was, but they knew it was lost. That, even, eventually gets reported to NEADS by ZDC. Now, I understand that none of this is going in accord with the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

policy.

MR. GRIFFITH: Right.

MR. AZZARELLO: Okay, which is that it's not going directly to policy because you don't go directly from the Center, at least as we read it right to the military--you go up your chain of command and you get someone at a higher pay grade at FAA, you know, among others the hijack coordinator, specifically, to contact the NMCC and maybe there's that other upper layer of, like, you said, Monte Belger, the Deputy Administrator, may call the NORAD four-star general, but that's where the coordination starts, at the highest level and then they say, okay, let's put together the two operational people facilities together; the FAA operational people who have the scopes and the NEADS operational people who have the fighters in order to control them.

So, I mean, it seems to me that although that didn't happen on the first two flights. At least the military did get notification.

Now, on 77 a few minutes before it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

crashed, someone from ZDC called NEADS and said we lost it, we don't know where it is, but it's lost out there in the system. What we see on United 93 is it doesn't get there. It doesn't get there at all until after it crashed, to NEADS.

MR. KARA: And then gets there from ZOB.

MR. AZZARELLO: And it gets there from Cleveland Center, five minutes--roughly four or five minutes after it crashes, Cleveland Center calls and says, you know, we got a plane here with a bomb on-board. But, way prior to that, Cleveland Center, it seems has discharged its obligations by going up the chain of command and they told the Great Lakes Region, it's in the summary prepared by Dave Cannoles and his group, that United 93 in the summary it says, 9:39, Cleveland Center notified Great Lakes Regional Operations Center of screams and statements from an unknown origin believe to be United 93. That's 9:39, to be fair and 59 seconds, we'll call it 9:40.

But we know that even six minutes before this, at 9:34, at least as early as 9:34 the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Command Center possesses the same information about screams on 93; bomb on-board and headquarters knows it because Doug Davis is on the phone sitting in that room with the rest of the people who are trying to manage the crisis response.

MR. GRIFFITH: Right.

MR. AZZARELLO: And we also know from what we've read that they track it, it's on Primary. They see other characteristics develop, transponder shut off. Well, that happened with American 11 and it happened with 77. We're told that it changed course. That happened with the first three aircraft that crashed, went off course.

There's no radio communications at all; that happened with all three of the first three aircraft that crashed on 9/11. So, as this situational awareness continues to develop, if you know, otherwise, let me know, because obviously, you people spent time too, putting the summary together and I'm sure one of the things that they looked at was, well, when did we know that each of the four aircraft were possibly hijacked, they're

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in distress.

Then what did we do with that information? Did we notify the military. I mean, we know notification to the military is an important issue. What we've seen is there was basically a disconnect on 93. And that information never got, pre-crash, to the military despite the fact that for roughly 30 minutes, it's being tracked and reported, as it's being tracked to the Command Center and the headquarters.

Now, I've given this long speech.

MR. GRIFFITH: [Laughs.]

MR. AZZARELLO: Now would you say, then, that the system somewhere then, did fall apart, that that information should have gotten over--would you agree that that information should have been at least communicated to the military? I'm not suggesting you should call the military and say, shoot it down, if that's your decision. But would you agree that the FAA, as an entity, should have conveyed the information it had on United 93 to the military as they did on the three previous

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

planes?

MR. GRIFFITH: The procedures that were in place at the time, should have allowed for that to happen--for military notification. My thought is, if you go back to the other three aircraft and apply the procedures that should have been followed to and a search through the record for each one of those aircraft, the procedure of, you know, get the Center log out, okay who are they supposed to notify and who are they supposed to notify, and follow that string, that if people hadn't gone beyond the procedure, similar things could have happened with the other three aircraft.

And that's what I was trying to explain a few minutes ago about, you know, we've got Steve Culbertson up at NEADS. Okay, we've got Cheryl Atkins in the room. We've got people out at the Command Center. there's a full-bird colonel, you know, I wrote his rating on the Command Center that you know, in peaceful times ran the CARF, but in other times we set up what we called the cell.

MR. AZZARELLO: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: On how to deal with situations like this on a real-time basis.

MR. AZZARELLO: Situations like a hijack the services cell is supposed to deal with a hijack?

MR. GRIFFITH: How to deal with movement of aircraft through the system, military aircraft, what the military aircraft are going to do, whether we're going to war or whatever we're doing, making sure that we have a coordination with the war staff down at Langley. Okay, so, you know, at this point you have to decide, you know, when does this become a full-scale military action. And we ended up setting up the cell at the Command Center, because once we got the system shut down, we made the determination with the military that nothing would move in the system unless it were coordinated through the cell. So, you know, those were other things that were going on.

MR. AZZARELLO: But on 93, you talk--Doug has said they were talking about, whether to scramble right now.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Yeah, I don't know who "they" are, to be honest with you.

MR. AZZARELLO: Well, he said, Jeff's being pulled away so--

MR. GRIFFITH: May they thought it was me that was talking about scrambling, but--

MR. AZZARELLO: Well, it says you're being pulled away.

MR. GRIFFITH: Yeah, I understand what it says, I can't remember who I was pulled away by or--

MR. AZZARELLO: They're pulling Jeff away to talk about United 93.

MR. GRIFFITH: Right.

MR. AZZARELLO: Are we to assume, then that the people at headquarters assumed that the Center was doing it. Did they just assume that, well, Boston Center reached out for NEADS, so maybe Cleveland is.

MR. GRIFFITH: We didn't have a procedure at that level--at my level to relay that information because we considered ourselves--the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

way the system should have worked is the procedures should have required that to happen at the operational element before it was--

MR. KARA: John, I need to take another shot at this one--

MR. AZZARELLO: This is, the way we read the procedures is, and we've talked to the people out--I'll use Boston Center as an example.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: The knew that some elaborate written procedure was set out. Some policy and protocol that in the event of a hijack you have to go all the way up their chain of command--that "they" "headquarters" an somebody there in a higher position than them, would call the NMCC and then once the people at the NMCC got the approval for NORAD to get involved, as we just read before, then NORAD will say, okay it's Northeast Air Defense, now marry them up with Boston Center and let them coordinate the response to the hijack.

MR. GRIFFITH: I understand that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Boston Center understood that, but they also understood that would take a significant amount of time, to go up the ladder and across and they thought outside the box.

MR. GRIFFITH: Right.

MR. AZZARELLO: They said, well, we're going to do both, we're going to tell our supervisors and start that chain of command going up. And at the same time, we're going to reach out to NEADS directly and we're going to let them know what we know so they can get a head start on this.

MR. GRIFFITH: Right.

MR. AZZARELLO: Which they did.

MR. GRIFFITH: Right.

MR. AZZARELLO: Now, let's go to United 93 and at the end of the--not the end of the day, but it's the end of the fourth attack.

MR. GRIFFITH: Okay.

MR. AZZARELLO: Now, I understand that on that day that things, I'm sure, were quite hectic and I'm sure that there was a lot of anxiety and that we were being attacked. So, I'm not

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

suggesting that everybody had the time to pull out its procedure and say, okay, let's make sure we did this--up the chain, over and down, okay? But did somebody on United 93, take a moment to say, okay, look, we know you have a written policy, okay and, in terms of notifying the NMCC to get military assistance. But we know that maybe that wasn't followed on some of the prior aircraft and who was saying, well, let's make sure that either this policy was followed so that the military does know. Or, if it wasn't followed, let's take an effort that the military knows from somebody thinking outside the box like Boston.

If it's not the Command Center or headquarters that's telling the military about 93, well, then that leaves it to go back to the center and say, well, did they tell them? Did they do like Boston did and go off-script, so to speak and think outside the box? Because if they didn't and we're sitting here and we don't call the military and tell them about 93, then the military doesn't know about it.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And I mean, that's where we're at now.
We're asking for your comment on that.

MR. KARA: Yeah, let me--let's turn this
over.

MR. AZZARELLO: Turn that over.

MR. KARA: Turn that over.

MR. GRIFFITH: Let me give you one answer,
I did not report 193 or flight 93 to the military.
I don't recall reporting 93 to the military.

MR. AZZARELLO: Well, do you recall,
obviously, it was on the radar screen at the Crisis
Center because Doug is getting updates on it by the
minute and he's sharing it with you and I don't
imagine that you kept that to yourself. Is it fair
to say that you shared that information?

MR. GRIFFITH: Oh, sure, yeah.

MR. AZZARELLO: Did you discuss what you
were getting on United 93, what Doug was telling
you about its approach to D.C.? Were you
discussing that with Monte Belger, for example--or
Peter Challen or Steve Brown?

MR. GRIFFITH: I don't remember who,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

specifically. But what I said earlier, Doug was broadcasting the information he was getting, as I recall and not on just this one, but when he was getting important pieces of information, he'd hold up his hand and he'd make sure it was known. Okay, so I know that that was happening. And I know that we were there. My recall was that Cheryl Atkins was in the room.

MR. AZZARELLO: When you were discussing 93?

MR. GRIFFITH: No, my recall is that she was in the room. But, you know, did I personally have a procedure that I was following to say, I am going to notify the military? No, I did not.

MR. AZZARELLO: Well, did anybody notify the military?

MR. GRIFFITH: Well--

MR. AZZARELLO: What was discussed about 93? Did anything at all get--about 93.

MR. KARA: Can I--let me step into this. At this point in time, procedures apply, we understand what Boston did. And that's one

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

aircraft. By this point in time, we've got three aircraft and a fourth that now, you're aware of. National-level mechanisms were put into place, FAA has established its own mechanisms and there are additional lines of communication that are set up and are supposed to work to include the SBTS. But within the ACC, there is a Primary Net and you had the protocol on the Primary Net to include the NMCC would be up on the Primary Net, if we read your procedures. So that would be a line of communication to the military, I would think.

MR. GRIFFITH: Oh, yeah, that was back here someplace, I mean, I just--

MR. KARA: But you were part of that but you weren't part of the--you were part of the ACC latch-up but you weren't part of the Primary Net to the military?

MR. GRIFFITH: No.

MR. KARA: In addition, on the military side, they set up an air threat conference call to which FAA was supposed to be a party. Do you recall being up on the air threat conference call

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that was set up on the DOD side at all that morning?

MR. GRIFFITH: No.

MR. KARA: Okay, so those are two lines of communication that were available over and above any of the procedures that were established or over and above what the centers, themselves, might do.

In addition to that, now, we've got, let's talk about Colonel Atkins for a moment.

MR. GRIFFITH: Yeah.

MR. KARA: We understand, talking to Dave Cannoles--Dave Cannoles said, Cheryl and her people, she's got about three officers, you probably rated Cheryl, but she's got three or four additional officers--that when they made their presence known, he established them in a sub-cell in this conference room down at--

MR. AZZARELLO: Opposite end of--

MR. KARA: Down here. Now, it's probably the case that Cheryl as the senior officer is back and forth because you describe her as a proactive person, so she could have been here periodically.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

But we understood her role to be more to assist Dave Cannoles to grab ahold of that piece of the pie and not be an outreach to the military. Did you see her differently than that?

MR. GRIFFITH: This didn't happen until day two or day three.

MR. KARA: Okay, this is not a day of?

MR. GRIFFITH: No, I mean, they may have camped out in there.

MR. AZZARELLO: Not a day of?

MR. GRIFFITH: I remember when we did this and because we had to put STU phones and everything else in there.

MR. KARA: So your understanding would be that Cheryl, if she was camping, she might have been down here, but she would have been up here, as well, because she's the senior military officer on-board?

MR. GRIFFITH: Oh yeah, yeah, no, she, Cheryl was in the thick of it, I can tell you that. I just don't remember--

MR. AZZARELLO: You don't know when she

got--

MR. KARA: And we'll have to talk to her about what her lines of communication were. But--

MR. AZZARELLO: You don't have one recollection one way or the other whether she got in the thick of it before or after the fourth crash?

MR. GRIFFITH: I don't.

MR. KARA: Okay.

MR. GRIFFITH: I gotta tell you, at this time, yeah, I'm worried about that airplane, but I'm worried about 4,500 other airplanes.

MR. AZZARELLO: Yeah, but there wasn't reports of bombs on-board the other 4,400.

MR. GRIFFITH: Well, I know that.

MR. KARA: But he's going to bring them down because they made the decision to do it.

MR. GRIFFITH: You know, we decided to put 4,500 airplanes somewhere and I had to do it fast.

MR. AZZARELLO: And that's a lot of work, I know.

MR. GRIFFITH: And we did it without

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2862
(202) 546-6666

error, you know. Some people don't understand just, you know, how good this air traffic system runs. But, you know, we did that and we had other things going on in the system.

But the other thing is, we didn't know how many more of these we were going to encounter while we were doing it.

MR. AZZARELLO: But that Washington the one on the radar screen then that appeared to be the most--

MR. GRIFFITH: I know, and, I mean, shoot me--

MR. AZZARELLO: No, no, no.

MR. KARA: Oh, no, let's take you up to Steve Culbertson now, because Steve and Bill--

MR. GRIFFITH: What can I say?

MR. AZZARELLO: I'm not suggesting it was--I'm not suggesting that--

MR. GRIFFITH: Put me in there because, you know, I'm the guy they can't fire.

MR. KARA: No, let's try--

MR. AZZARELLO: I wanted to get your sense

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

as to who--obviously, it's a point of concern.

MR. GRIFFITH: Yeah, it is.

MR. AZZARELLO: You said people were talking about--

MR. GRIFFITH: I'm concerned about it, too.

MR. AZZARELLO: --I'm sure, everyone, like you said, people in the room were saying, look, we're being attacked, we've got to defend ourselves, what are we going to do?

MR. GRIFFITH: Right.

MR. AZZARELLO: The next sign of an attack is this, okay, bomb on-board, reverse course it fits the profile. And I'm just trying to get at, did somebody at a level, say above you, discuss this or at your level or above, say what are we going to do about 93 now? It is approaching, what are we going to do. Do we try and get military assistance. Do we tell them about it and do we think that they may shoot him down? I mean, that was a concern, I guess, if they were going to shoot it down if the controllers weren't train.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Let me ask it bluntly, was that--did that cause somebody in that room to say, let's hold off, wait a second, let's hold off and think this out before we call the military and specifically tell them that we heard a report on 93 of a bomb on-board, because they, then, may ask our controllers to vector them right up to that plane and take it down and shoot it. And let's think out the ramifications of that before we make the call. Did that occur?

MR. GRIFFITH: No, that didn't happen. I just have to tell you that by this point, it may have been a wrong assumption, but it was an assumption of mine that we had the military in the loop. And, you know, we had people sitting at these phones and it was an assumption of mine that the military was getting information and I was satisfied the way Doug was broadcasting the information, you know, he wasn't saying to two or three people come over here this is what I've got, he was speaking loudly in the room saying, hey, this is what I got, this is what's going on now.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and it was my assumption that, you know that x-number of people that were out here were doing that

MR. KARA: And we believe that your assumption should have been right and accurate for this reason: The Primary Net should have brought up the NMCC to be a part of it. Doug shouted that out, it should have been heard on the NMCC at the Primary Net, conversely, the air threat conference call should have had FAA looped into it and Doug's broadcast of this information should have gotten to the NMCC through their own telecon, if you will.

Were you aware that there were difficulties and that neither one of those nets was able to effectively bring the other up that day?

MR. GRIFFITH: Only after the fact.

MR. KARA: You knew that after the fact?

MR. GRIFFITH: Only after the fact. I knew we had com problems after the fact, you know.

MR. KARA: So, we accept, we think your assumption is accurate as a senior manager, that's you probably should have made that assumption, but

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the fact of the matter is, neither of those nets was brought up effectively so that [unintell.]

MR. GRIFFITH: That's the hole, you know, what I mean. But I can tell you it's plugged, it's fixed. I mean, Larry Arnold and I, you know, we sat down and said this is never going to happen again. I mean they were talking about shooting out a Korean airliner--

MR. KARA: That was later on in the day.

MR. GRIFFITH: But, you know, I'd kick some butt over that, you know, just because of the way it was being handled.

MR. KARA: At what point in time did you learn that the two entities were not on at some substantive level as they should have been?

MR. GRIFFITH: I don't even, it wasn't on 9/11.

MR. KARA: Right, it was--

MR. GRIFFITH: It was like, the--in the--the way things finally went was, this line back here actually became a very reliable source of information.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: The Cannoles one?

MR. GRIFFITH: Yeah, because we had all the senior managers in the regions were on it and we had really good dedicated people that--

MR. KARA: Let me bring up Steve Culbertson. Let me tell you a couple little things we know about Steve and his activities at the Northeast Air Defense Sector and an individual named Bill Ayres [ph], do you Bill Ayres--long, long time--he's a NEADS employee that works airspace management. So, he and Steve Culbertson were sort of hand-in-hand. Steve does two things. In about this same time frame, 9:30; 9:35; 9:40; Steve approaches the floor and he says, I've got to have a STU-3 line and I've got to call somebody, we know nothing more about that. And Steve is trying to reach out to somebody on the STU-3 line; in about the same time frame. Is it conceivable that he was trying to--who would Steve have been reaching out to on a STU-3 at FAA headquarters?

MR. GRIFFITH: At FAA headquarters?

MR. KARA: Yeah, during this time of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

crisis?

MR. GRIFFITH: He would have been reporting in to Alton Scott [ph].

MR. KARA: Who is?

MR. GRIFFITH: His boss.

MR. KARA: And where does Scott sit on the--

MR. GRIFFITH: He worked for me.

MR. KARA: So he would--

MR. GRIFFITH: In this organization, he actually was--

MR. KARA: So, Culbertson actually works for you down through--

MR. GRIFFITH: Oh, yeah, yes, see, you know, before I went up as AT-2, I ran the Ops group, and Steve reported in there to one of the division managers, who happened to be Alton Scott.

MR. KARA: And was Alton Scott a part of this management construction with the agency?

MR. GRIFFITH: No, he wasn't up here.

MR. KARA: He was not in the ACC?

MR. GRIFFITH: No, he--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: So Steve could have been trying to call h impression in his office and he--

MR. GRIFFITH: If he was calling FAA headquarters, my guess is he was calling Alton Scott.

MR. AZZARELLO: Is that who he said he was calling, somebody at FAA.

MR. KARA: No, I just meant, I just interjected and that's a good. Now, the next thing Steve did, he and Bill Ayres in the battle cab at Northeast Air Defense Sector, they set up a phone bridge. they realized that hey had to have that and he set it up with, do you remember, John?

MR. AZZARELLO: I don't know.

MR. KARA: I think they set it up, maybe with the centers and maybe the Command Center; maybe the WOC we don't know and that was Steve's attempt also to reach to heal the community. Were you aware that Steve had set up that additional line to--

MR. GRIFFITH: No, I, you know, Steve's one of those guys, I knew he was up there. I can

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

tell you, before 9/11 the NEADS job and the Tindle job SEADS [ph] were both vacant and we had a hiring freeze on and we weren't allowed to move people; weren't allowed to do anything. And the guy that we headquartered out at Cheyenne Mountain was retiring, you know.

MR. AZZARELLO: Oh, yeah, I think we heard about him.

MR. GRIFFITH: Dan Schmekel [ph].

MR. AZZARELLO: Yeah.

MR. GRIFFITH: So, I just, I went outside, I went against my superiors, orders and everything else, and I filled those positions with, I put Paul, can't remember his last name, but I put the guy down in [unintell.] and I put the guy in the NEADS and made sure that Cheyenne Mountain was covered, you know by detail while we were doing this.

If we hadn't done that, you know, it would have been worse.

MR. KARA: Yeah, Steve was trying to help.

MR. GRIFFITH: Yeah, he was trying to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

help, he was a great tool.

MR. AZZARELLO: I guess what we see is it seems like there was one pipeline of information coming in the Command Center that included an aspect of air traffic situation awareness and then, also, in the Cannoles room there was a similar line feeding information about air traffic awareness and sometimes the twain didn't meet, as you well know.

MR. GRIFFITH: Oh, yeah, yeah.

MR. AZZARELLO: And I think the example that we used earlier was when Dana talked about 93, I'm sorry not 93, 77 approaching and they didn't call it that, they called it a fast moving vehicle, or and then the Pentagon was hit. And that, as we can see, was coming over the Cannoles telecon. And, in fact, Mike McCormick was on that. I don't know if you remember--do you know Mike from the New York Center?

MR. GRIFFITH: I know who he is.

MR. AZZARELLO: Mike was on that telecon and he says he remembers--

MR. GRIFFITH: He's the guy I ordered back

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to work.

MR. AZZARELLO: Told him to get back in there? Mike said he remembered being on that telecon when that report was made.

MR. GRIFFITH: Yeah, he showed up as a real hero here and let me tell you, if I could have fired that guy on the spot, he'd have been gone.

MR. AZZARELLO: Really.

MR. KARA: How about Terry Goodshoe [ph] at Boston?

MR. GRIFFITH: Who?

MR. AZZARELLO: Terry Goodshoe?

MR. KARA: Goodshoe at Boston?

MR. GRIFFITH: No. You know, the only thing I knew about Boston was Batina the tower chief up there, the lady that's a tower chief; she started doing some things that made sense, you know. and there were other people, as well, but this guy in New York Center, you know, I'd have fired him on the spot.

MR. AZZARELLO: What--

MR. GRIFFITH: Well, he shut his airspace.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: He shut it down.

MR. GRIFFITH: Yeah, give me a break.

That's beyond the point.

MR. AZZARELLO: But he was saying, I guess he was on the phone with Cannoles and he said, hey it's approaching, five, six, seven miles out a VFR and that information [unintell.] Cannoles telecon from what we could see it didn't appear to get up to the Crisis Center.

MR. GRIFFITH: He should have been reporting that to the operational element, because the operational element was here. The administrative element was here and this was never intended to be an operational system.

MR. AZZARELLO: Oh.

MR. KARA: Okay, that's a key point.

MR. GRIFFITH: That's--

MR. AZZARELLO: You're one of the first people that described that in the distinction that was--Cannoles felt that was more of an administrative?

MR. GRIFFITH: Yeah, like, hey, this is,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

hey, we just, you know, Cleveland Center just reported that their whole evening shift says they're not coming to work because they're afraid. Okay, well, that's administrative, it's labor, let's get a labor law guy in here and let's handle that. You know, but this is the operational element over here--

MR. KARA: This is where it should have been.

MR. GRIFFITH: --you know that shows you guys like Mike McCormick who are always wanting to be the hero instead of following protocol and doing things the way they're supposed to be done.

MR. KARA: Here's, let's back up to 77 for a moment. The controller at Dulles sees a fast-moving aircraft and she says, National anybody, so the National tower, Dulles tower, the Secret Service and maybe Washington Center are aware and they're following that plane in real time.

MR. GRIFFITH: Good for her.

MR. KARA: But that information that is

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

held in the Washington area, doesn't get to this building except when Eastern Region calls the Cannoles line about three minutes later. The information sifts up and comes and gets reported in to you guys three minutes later from Eastern Region through the Cannoles line.

MR. GRIFFITH: And what should have happened was, you know, that's why, in my \$3.5 billion a year that I staff a traffic management unit at Dulles where they hire people and pay them \$120,000, \$130,000 a year, they know what their job is, they report that to the Command Center, it's the operational element, and then it goes up here the way it's supposed to go. You know, but everybody's out here trying to be--you know, the managers are all trying to be heroes, you know. Tell me, don't tell them, tell me.

MR. AZZARELLO: On that note, when we were in New York Center, and I want to know if you found out about this in the aftermath putting together the summary--Mike McCormick says that after the first crash, when they saw--when the controller

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

handling 175 realized that it had changed transponder code, he did make an assumption which turned out to be accurate that the new code was probably 175, because it was so close to where the--

MR. GRIFFITH: I doubt he assumed--

MR. AZZARELLO: He thought that that was a possibility, I shouldn't say he assumed, he thought this may be 175 that now was on this new code, because he couldn't find it anywhere else and that he reported it up the chain and that when Mike McCormick got it, he tried to call the region, the Eastern Region to let them know but couldn't get through to let them know.

MR. GRIFFITH: Hey, Mike McCormick, again, I pay 12 people in New York Center as traffic manager people to provide that information direct into the Command Center, the operational element, you know. Managers shouldn't try to be heroes and report this through another side. That's what we have the operational element for and that's why you fire people, you know. I don't know if you saw

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Mike McCormick on national TV giving his recount of all this--

MR. AZZARELLO: No, I didn't.

MR. GRIFFITH: --you know, but I'll tell you it made me almost sick to my stomach, you know, about this was the worst day of his life and, you know. You know how I feel about Mike McCormick now.

MR. KARA: Your frustration tells me that you weren't getting the information and you're now learning that information is going everywhere but where it should have been, which is right straight into this room.

MR. GRIFFITH: You're right.

MR. KARA: When you and Lee Longmire could have done something about it.

MR. GRIFFITH: We pay people a lot of money to a year to be the operational element. And that's why we have that Command Center. If you haven't been there, you ought to go see it. It's the nerve center and it's where things happen. And that's exactly why we spend millions of dollars a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

year for that thing to be there.

MR. KARA: When you say Command Center, you're saying Herndon.

MR. GRIFFITH: Herndon.

MR. KARA: Herndon, yeah, we've been there.

MR. GRIFFITH: Yeah, you know, that NOM on that floor should be the most knowledgeable person about what--

MR. KARA: Yeah, you're talking to John White, so you're talking to the guy that should know everything.

MR. GRIFFITH: Yes, and these people have been told earlier, if you remember, anything going on tell the Command Center.

MR. AZZARELLO: Did you know, I don't know if you knew this, maybe you do or you didn't, but we were told that the message that Mike McCormick said he got a message from Dave Cannoles that said, get on this telecon now with Cannoles, he wants you on it. Exactly what you understood happened, that Dave ordered--did Dave Cannoles order Mike to get

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

on the telecon with him, though?

MR. GRIFFITH: I don't know.

MR. AZZARELLO: Even assuming he did, though, you're saying that Mike should have had enough of an understanding that if he needed to be on the line with someone giving operational information, it shouldn't have been with Cannoles, that it should have been--not with the Accident Investigation people, but it should have been with the operations people?

MR. GRIFFITH: What can people in conference rooms with speaker phones do about stopping airplanes? Nothing.

MR. KARA: Let me take advantage of your--the military operations specialists at the centers--that's--the military operations specialists at the centers, seem to be, their performance [unintell.] appear to be uneven.

MR. GRIFFITH: Oh, yeah, well, I'll tell you all about that. I was a proponent that there ought to be one at every center. And, you know, we went through this staffing cut, where we had to cut

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

positions. And I've always been a proponent of the military and interaction with the military. And, you know, it was always my position that there ought to be an MOS at every center and they ought to be linked in at there operational level with an element of the military

And so, what happened was, over the years, you know, decisions were made that we're not going to have these positions anymore. Well, we kept some guys around, you know, like Hank Tracy [ph], down at Miami and some of these other guys around the center, you know, that are my age that, you know, k should be out cutting grass somewhere.

But, you know, we kept them around and they were very dedicated at what they did and they maintain a perfect liaison with the military. And you'll find that on 9/11 and other days where we had one of those people in place, that things got done with the military and things happened.

MR. KARA: There was only one place that happened, that was at Boston, that was, I think Cullen Stoggets [ph].

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Sure.

MR. KARA: Performed well that day. But I don't think we can make that same assessment about his peers at the other three centers.

MR. GRIFFITH: About Miami, you couldn't say that?

MR. KARA: No, no, no, no, no, not Miami. New York, Cleveland and Indie.

MR. GRIFFITH: I don't think he had peers at New York, Cleveland and Indie.

MR. KARA: Well, there were people that were in the position, let me put it that way.

MR. GRIFFITH: What I'm talking about is the--see what the centers did was they off-loaded the military operational specialists duty to the traffic management function.

MR. KARA: Exactly.

MR. GRIFFITH: And so, they didn't have true MOS specialists, they had somebody doing a collateral duty that was called an MOS worker.

MR. KARA: That's it, with the exception of New York. New York had--in fact the MOS in New

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

York sits in his own little space because he's got the STU-3 and there's some classified things in there.

MR. GRIFFITH: Who is that?

MR. KARA: Who's the New York, Felzer [ph] was New York.

MR. GRIFFITH: Bob Felzer.

MR. KARA: No, I was talking about the difference between Cullen Stogget's performance and the other MOSS. And what he told me was that he had thought--had that MOS position to be a robot's position and it was. And what has happened is they've collapsed it into the TMU and people has it as an additional duty.

MR. AZZARELLO: Just like another duty?

MR. GRIFFITH: Yeah, one of the first things Larry Arnold and I agreed on was we were going to put a staff military officer in every center. And we did that, we put them out there before we even launched the system.

MR. AZZARELLO: It all makes sense.

MR. GRIFFITH: And we had 24/7 coverage in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

each center where we had a military person sitting right in there. And if there was anything funny going on, they knew about it.

MR. AZZARELLO: Put an end to it right away.

MR. GRIFFITH: Absolutely. Like I said, when we start this system back up, the military is going to be fully aware of what's going on.

MR. AZZARELLO: We should get to the aftermath.

MR. KARA: Yeah, we're ready to move--

MR. AZZARELLO: One more question before we go to the aftermath. Not to belabor the point, but you strike me as a strong-willed individual.

MR. GRIFFITH: I am.

MR. AZZARELLO: You strike me as someone who has a lot of character and strong will. In that I don't see you being pulled away from an important situation by any schmo, for lack of a better term. And just so that we can get an accurate picture of, at least how high up the ladder at headquarters that people were aware, at

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

least, of the 93 situation; when Doug is repeating it from Command Center and you're there.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: I don't see any--just anybody sort of pulling you away at that point in time who's just not your boss or not somebody in a superior position.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: I guess I'll give you one last crack, do you remember who may have pulled you away, who might have been privy to hearing the information about United 93?

MR. GRIFFITH: I wish I could, I don't. I, you know, I gotta tell you, at this particular point in the game, I had my hands full. You know. Because I, you know, I understand all the problems with hijacks and all these other things, but I also understand all the problems associated with trying to get 4,500 airplanes on the ground without running into each other, you know. And so--

MR. KARA: Was it the Administrator that pulled you away?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: No, I don't think so, Jane, you know, most of the time I talked to Jane was in her office, I would go to her or she would already be in the SVTS and, you know, I'd go in and sit down next to her. But, you know, I spent a lot of time with Peter. Peter was excellent that day.

MR. AZZARELLO: Peter Challen?

MR. GRIFFITH: Yeah, yeah, Peter and I spent a lot of time together. Steve Brown was, you know, any--any policy things that came up, you know where they could help, I mean, they were in the game.

And then, of course, I talked to Monte a lot but, you know, Monte, he was the Deputy Administrator, so I had to, if I had something for Monte, it had to be important because, I mean, they were talking to the Secretary and everybody else.

MR. KARA: Do you remember Secretary Mineta's chief of staff, John Flaherty being over there that day? When I say over there, I mean in the--

MR. GRIFFITH: SVTS?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2832
(202) 546-6666

MR. KARA: --yeah in the SVTS or--

MR. GRIFFITH: Well, DOT didn't have a SVTS, so they had to use the one at FAA, so I'm sure Flaherty was around.

MR. KARA: Yeah, for them to even be on the national level, they had to be over here in your space.

MR. GRIFFITH: Yeah, I didn't interact with them.

MR. AZZARELLO: Did you find out--what about in the aftermath, because after 9/11, I know we've heard that, obviously, the Administrator wanted to be briefed and Monte Belger wanted to be briefed--

MR. GRIFFITH: Yeah.

MR. AZZARELLO: Okay, what happened, [unintell.] recreate the situation, [unintell.] type of thing. Did you come to learn after 9/11, one way or another, whether or not Mr. Belger or Jane Garvey were made aware of 93 as that information was coming in from the Command Center?

MR. GRIFFITH: I didn't.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: You don't know one way or another whether they knew afterwards?

MR. GRIFFITH: I didn't.

MR. AZZARELLO: Do you remember being in any meetings, though where they were briefed where, when they were told about what happened with 93 that they expressed any ominous surprise, whereby they said, jeeze, how come I don't remember knowing about that on that day or--

MR. GRIFFITH: Oh, there were a lot of tough questions being asked a lot after 9/11 by Monte and Jane. So, you know, but specifically to that, I don't recall.

MR. AZZARELLO: So, even as we stand here today and after all the after-action and review with kind of the tapes and the transcripts and the radar and the people tried to remember what happened, you would say you still don't know one way or another. You, personally, don't know one way or another whether Monte Belger or Jane Garvey were made aware of 93 before it crashed?

MR. GRIFFITH: No, I don't. And I have to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

go back, again, to what my mind tells me and, you know, at the point we were dealing with 93, I felt confident that, first of all, when I pointed to that and said, you know, somebody was getting this to the military, but I also felt confident--and that's what I was trying to explain before--I know I didn't do a very good job. But that I know our traffic controllers and I know that air traffic controllers in a touch situation are going to go outside the box, just like Boston did, and so, you know, that's why, you know--I knew that we had military at the Command Center; I knew we had people at NEADS and SEADS--

MR. AZZARELLO: You were certain somebody was covering?

MR. GRIFFITH: --and you know, I just--I thought we were all joined at the hip by that time and that, you know, when Doug Davis makes his broadcast and we're all saying, aw, man, this sounds really bad, that, you know, that people are sending information and, you know, the military's making their decision about--and then, you know,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the word, scramble came up, you know. And I went into my own little internal thinking about you know what are we going to have to do if we have to provide an intercept, you know.

MR. AZZARELLO: Well, who would you--you were there that day, so help us with the atmosphere. Who did you perceive as Monte and Jane relying upon to give them updates on additional aircraft that are in the system and reported as hijackings as possible suicide missions? Who did they look to? Who Washington their management person that they look to--

MR. GRIFFITH: They looked to me. I don't know whether I told them or not. I'll be honest with you.

MR. AZZARELLO: But did they look just to you or were they looking to others, too?

MR. GRIFFITH: Well, they were, you know the person that was in charge of the room there--

MR. AZZARELLO: The Security person?

MR. GRIFFITH: --right. You know, that person's--I wish I could remember his name, but I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

can't--but that person's--

MR. AZZARELLO: If I threw it out there would you remember? Lee Longmire?

MR. GRIFFITH: --no, it wasn't Lee, Lee was kind of in and out

MR. AZZARELLO: Mike Wikert [ph]. He's on one of the logs, Mike Wikert, as having.

MR. GRIFFITH: I was really impressed with the guy, I can tell you that.

MS. SULLIVAN: Mike Morse [ph], specified that he was the moderator for that room for a part of the morning on 9/11.

MR. GRIFFITH: Is he a big guy?

MS. SULLIVAN: Yes, very big guy, middle-age; [unintell.]

MR. GRIFFITH: He was probably the guy, loosing some hair?

MS. SULLIVAN: Yeah, [unintell.] a comb-over.

MR. KARA: She picks up details we don't.

MR. GRIFFITH: I don't have that problem.

MR. KARA: It might have been Michael

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Morse?

MR. GRIFFITH: It might have been, I know that I'd only see this guy in the elevator and stuff, you know, and I think, you know, he looked like a GS-14 bean counter to me.

MR. AZZARELLO: Let me throw an observation out and let me know if this is something that you discussed after 9/11 in reviewing the facts of what happened in talking to the various centers. One thing that Miles and I and the team have observed is that Boston Center seemed to know where to go quickly to think outside the box because they're a center that borders controls planes on the border of the ocean.

MR. GRIFFITH: They've got this much airspace.

MR. AZZARELLO: And they interact often with the military because of Whiskey 105 and the warning areas, so they sort of, it wasn't foreign for them to say, oh, we know where to go if we want to think outside the box and go right to NEADS.

MR. GRIFFITH: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Because we deal with those people on a frequent basis.

MR. GRIFFITH: Right.

MR. AZZARELLO: Ditto, New York. We're on the oceanic sector here.

MR. GRIFFITH: They've got this much airspace.

MR. AZZARELLO: They flood it with a lot of traffic, too, in the State of New York, and Boston. But they knew, the issue I'm sort of getting at, it wasn't foreign to them. NEADS wasn't foreign to them because they often interacted with them on their exercises. And we saw a different picture, our team when they went out to Cleveland Center because they're inland and they're over land and they didn't have an occasion--

MR. GRIFFITH: Very little restricted airspace.

MR. AZZARELLO: And they didn't have an occasion to interact with the military often to know, oh, we go out of the box we know who to call

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

here?

MR. GRIFFITH: Right.

MR. AZZARELLO: We would know it's NEEDS and we had a number for them. Did that at any point after 9/11, when you looked back at it was that discussed, or did you think about that issue? That--

MR. GRIFFITH: Oh, well, I can't say that specifically, but, you know, the one thing that I did was re-enforce this military shop that I had, you know, Alton Scott that Steve Culbertson made his reported in to, you know. I mean, you know.

MR. AZZARELLO: The FAA liaisons at the various sectors?

MR. GRIFFITH: Oh, yeah, we ended up putting three or four of those people at every one of those locations. And, you know, we really expanded our presence in all the air defense sectors and at NORAD. And, you know, put a lot more responsibility on that one shop so that, you know, we had an operational link--

MR. AZZARELLO: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: --24/7 to the military.

And it--

MR. AZZARELLO: Did you talk to the folks out at Cleveland Center, though, about, you know, the events of 9/11, how they ultimately did, after 10:00 o'clock somebody, I don't know how, but somebody there got the number to the NEADS and called them direct.

MR. GRIFFITH: No, I didn't talk to them about that. No, see my link to Cleveland Center was through the division manager in Chicago. So, you know, that's the difference between the operational element and--

MR. AZZARELLO: The division, Chicago's after the region--the--

MR. GRIFFITH: --yeah, see the manager at Cleveland Center reports to the division manager in Chicago.

MR. AZZARELLO: Great Lakes ROC, Great Lakes Region?

MR. GRIFFITH: Yeah, so, you know, that's why I try to keep focusing on the operational

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

element, you know, we had an outstanding operational element in place. You know, where we had people reporting directly into the Command Center--

MR. AZZARELLO: Which was what you said, let me know--remember that?

MR. GRIFFITH: Yeah.

MR. AZZARELLO: You told White you go out and canvas the centers let them report to you anything unusual, radio loss, anything.

MR. GRIFFITH: Yes.

MR. AZZARELLO: I guess what I'm looking at behaviorally, like, that's like, my--our opinion, I don't want to speak for all of the team members, but some of us felt that that's what led Boston and New York to think out of the box so quickly because of their familiarity with NEADS.

MR. GRIFFITH: Oh, sure, yeah.

MR. AZZARELLO: Whereas, that didn't exist with Indie Center or Cleveland Center. And I guess from a behavioral perspective trying to understand why people did certain things under pressure on the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

day of 9/11, is that an issue that you guys, I guess at a management level, did you ever get down to the leads at that level to discuss well what caused our people in Boston and New York to immediately think outside the box and reach for NEADS as opposed to the people in Indie and Cleveland. Was that an issue that was explored?

MR. GRIFFITH: Well, sure, they did what they knew. You knew.

MR. AZZARELLO: But was it explored? I mean, now looking back, assuming that that was happening. Was it discussed? Did somebody go and talk to Cleveland about it and say, jeeze, why didn't you--did you guys think to call direct to NEADS like Boston and New York and if not, why not? What was your--

MR. GRIFFITH: No, we assumed that if we let things continue to happen, that they would continue to happen that way. And that's why Larry Arnold and I put a military staff in each center immediately so we had a military lieutenant colonel 24/7 in the center and my direction to the division

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

managers was, you have a person--you have a military person in every one of your centers and the person running that watch is going to be joined at the hip with that person until we say stop.

MR. AZZARELLO: So, is that sort of the stopgap that took you to the deadline until the deadline got up and running, that was going to be--

MR. GRIFFITH: Yeah, yeah, absolutely.

MR. AZZARELLO: Okay. Let's talk about the aftermath now. Is this document--was this one of the documents that was used to brief the White House on September 17?

MR. GRIFFITH: No.

MR. AZZARELLO: It wasn't?

MR. GRIFFITH: No.

MR. AZZARELLO: Because we were, I think Shirley said that it was when we asked. We asked Shirley Miller in the production of documents, we understand there was a meeting where some of the White House representatives wanted to be briefed.

MS. SULLIVAN: She said that was one of the documents Jane Garvey was using to go the Hill.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Oh, to go to Congress.

MS. SULLIVAN: Yeah, I don't know what she said about the meeting with the White House, she might, also take that.

MR. AZZARELLO: Yeah, she did in an e-mail to Dana. Dana asked, we understand that there was--well, let me ask you.

MR. GRIFFITH: Well, what meeting are you talking about, let's get there first.

MR. AZZARELLO: Let's get there first. Let's put this book, the summary aside, and I'll ask you this. After 9/11--well, starting that day even, from 9/11 going forward to the following--till the end of September.

MR. GRIFFITH: Right.

MR. AZZARELLO: Were you involved at any point with trying to figure out what the FAA's knowledge of events was on that day? Kind of, basically, just recreate what happened?

MR. GRIFFITH: Yes.

MR. AZZARELLO: And tell me about your efforts, there.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Well, my efforts there started with Dave Cannoles, when I told him, before I left his face, your job is to get information. And start getting it now. I have to tell you, I wasn't real happy with him. He was dragging his feet, you know, because I know, you know, from TWA 800 or John F. Kennedy, Jr., or any time you have any significant incident, you can't get information fast enough. Because the only thing people will do to you, until you show them the information, is criticize you. So, that was one of the first things in my mind when I looked Cannoles in the eye and I said your job is to get data and start right now. And get it fast. And, you know, I mean, days later, I'm asking for, hey, can I see the radar tape from Cleveland Center, we don't have it yet? Why not, you know, and I'm calling the division manager up in Chicago saying, you know, why can't you do this it's a simple--it's a simple process, put it together and get it here. Okay, so it was like pulling teeth getting information. And, you know, Cannoles doesn't like me a lot, since then,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

because, you know, I was in his face a lot.

But, you know, we finally got it together. He's got a guy working for him named Tony Ferrante that, you know, is really great. And that poor guy worked night and day for weeks. But we finally got it to the point where we could brief the FBI and other--the Secret Service and other elements. And, you know, that may have been one of those meetings on the 17th that you're talking about. The only meeting that I went to at the White House--

MR. AZZARELLO: Was I think the one on the 17th, does that--

MR. GRIFFITH: --I really don't know what day it was.

MR. AZZARELLO: Roughly, well, did you go there like within a week of the attacks?

MR. GRIFFITH: Yes.

MR. AZZARELLO: Okay. You were only at one White House meeting?

MR. GRIFFITH: No, I was at a lot of White House meetings, but this was like the one where we went and did a briefing.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Oh, okay, tell me about that one.

MR. GRIFFITH: And the briefing was associated with protecting the National Capital Region. It was primarily a Secret Service Briefing of a lot of PowerPoint slides. We, the FAA, had maybe five or six slides in the package, of which Mike Canavan who was the chief of security at the time briefed some of them, and I briefed the others. Our briefing focused around how are we going to keep airplanes from taking off at National on Runway 36 and flying right into the White House? How are we going to--

MR. AZZARELLO: So was it how to prevent a Reagan National departure from attacking the White House?

MR. GRIFFITH: Yeah, yeah. Or one landing on 18 from, you know, flying by and doing a left-wing down and popping it. And there was a whole lot of classified stuff there. Dick Clark was there and, you know, it was a long briefing and, you know, the whole purpose of the briefing

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was to--

MR. AZZARELLO: It was protection of the National Capital Region purpose of the briefing?

MR. GRIFFITH: Yeah, yeah.

MR. AZZARELLO: Was that the sole purpose of it?

MR. GRIFFITH: Sole purpose, that's what it was, that was a briefing that I attended. Now, I have to tell you that the briefings that were done on this document, I delegated to Dave Cannoles.

MR. AZZARELLO: Okay.

MR. GRIFFITH: I did not give any briefings on this document.

MR. AZZARELLO: And this White House meeting where you did present a briefing on protecting the Capital region, the one that Secret Service made a presentation to?

MR. GRIFFITH: Yeah, they were the primary and--

MR. KARA: Clark took the brief? Was he the person?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: He was the guy we were briefing.

MR. AZZARELLO: So, Secret Service, you would say, had the lead?

MR. GRIFFITH: Yes, and then there were DOD people there and they were briefing on, you know, what eventually became the exercise, if you recall, in the paper, you read that they had these missile sites around D.C. and they were ready to shoot down airplanes and that kind of stuff.

MR. KARA: So that wouldn't have been Arnold, then, that was there?

MR. GRIFFITH: I think Larry, no, Larry was not there. The Pentagon guys that were coming over were mainly Army guys.

MR. AZZARELLO: In any briefings on the Summary was it delegated to Dave Cannoles?

MR. GRIFFITH: Yes, any briefings on this document were delegated to Cannoles.

MR. AZZARELLO: Was this--well, let me ask you this: did they brief you when they put it together, Cannoles and his group?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Oh, yeah, I got tons of briefings. I got briefed on half a dozen versions of that before we decided we had the right one.

MR. AZZARELLO: So, they had you in the loop as they were starting to develop it?

MR. GRIFFITH: Yeah, I was looking at tons of stuff.

MR. AZZARELLO: Were there any meetings, post-9/11, internal to the FAA just about discussing what did the FAA know when, and what did they do with the information? Which, I guess, is part of what's in that summary?

MR. GRIFFITH: Oh, yeah, I mean, we were briefing, I can't tell you specifically, but, yeah, we were, I mean, that was like a constant daily--

MR. AZZARELLO: How about coordination with the military because we've seen some e-mails and some documents that are even referenced in the summary, like a NEADS, the Northeast Air Defense Sector Logs--

MR. GRIFFITH: Yeah that came about--

MR. AZZARELLO: Do you have a copy of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

log?

MR. KARA: Which log?

MR. AZZARELLO: The MCT Tech Log?

MR. KARA: Yeah, I do.

MR. AZZARELLO: And somebody indicated, I forget who it was--it might have been Dave Cannoles, even that you thought, someone, either Cannoles or Brown or somebody thought that you were given a copy of a NORAD log to sort of help coordinate, you know, notifications between the FAA and the military.

MR. GRIFFITH: During 9/11?

MR. AZZARELLO: No, after, in the aftermath.

MR. GRIFFITH: Oh, yeah, because they--

MR. AZZARELLO: They called it NORAD log.

MR. GRIFFITH: Yeah, Larry Arnold, I talked to Larry and said, look, we need information, you know, and so he made sure that we got, you know, whatever we needed and I made sure he got whatever he needed.

MR. AZZARELLO: So, who was--was General

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Arnold your main point of contact for--

MR. GRIFFITH: Yeah.

MR. AZZARELLO: --the aftermath trying to pull together what happened between shared information between the military and the FAA?

MR. GRIFFITH: Yeah, because what they did was, they designated CONAR, who was Larry Arnold, as the principal NORAD person. And, you know, but General Eberhard was a four-star, he couldn't be involved in day-to-day stuff, so they designated Larry Arnold. He was already CONAR and, you know, and they gave shoot-down authority to three people, which was Larry Arnold, a general in Alaska and Eberhard. And then they had a Rules of Engagement for Shoot-down and that kind of stuff. Then we coordinated other things, you know.

MR. AZZARELLO: To the extent that there was communication between the FAA, any FAA facility and the military that day, you got, obviously two ends of communication. You have records, you the FAA have records to show you what was going on, say, in the field facilities, their tape

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

recordings, radar, impasse and stuff. But, in terms of trying to get the whole picture on conversations and communications with the military.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: It would be fair to say that General Arnold was the point of contact that you needed at the local top.

MR. GRIFFITH: Right.

MR. AZZARELLO: And I imagine was there someone on General Arnold's end who was asked to put together the military time line and then to reach out to--

MR. GRIFFITH: Yeah, they had some colonels and I had my guy, Alton Scott, and, you know, obviously, Larry and I didn't have time to, you know, go searching through logs and making an okay send them this and not that one. We had somebody do that for us and brief us and then, you know, we'd authorize it.

But, you know, after 9/11, before we even started the system back up, we put an order out to all controllers, Ikes Rillo [ph] signed it, and it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was like a conformance monitoring order that it made it a requirement for all controllers to report unexplained loss of com; unexplained transponder interruption; unexplained altitude change or heading change, immediately, you know, back into the Command Center and then immediately to the military.

And so, that was one of the things that we put in place before we even started the system up. Because there was a concern that, you know, you start getting airplanes in the air and all of a sudden, it happens again.

MR. AZZARELLO: Right, right.

MR. GRIFFITH: And then we had the military people in the centers that I told you about and then we had the hotline that everybody was--

MR. AZZARELLO: What led you to--well, let me ask you this: Did you look--do you remember seeing this log at some point? If so did you--

MR. GRIFFITH: I can't tell you if I saw that one to be honest with you. I remember,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Darlene Freeman was doing this work.

MR. AZZARELLO: Darlene Freema?

MR. GRIFFITH: Freeman.

MR. AZZARELLO: F-r-e-e--

MR. GRIFFITH: M-a-n.

MR. AZZARELLO: Freeman, and she was doing work on what, on?

MR. GRIFFITH: She was tasked to come up with doing a review of the coordination between the FAA and the military on 9/11. And I can remember giving her, you know, things. I don't know if she was able to get this direct from somebody like Cheryl Atkins or if I got it from Larry.

MR. KARA: Would [unintell.] come of her work and one that you would have approved? What he has, for the record, is a list of notifications provided to us by FAA of when the military was notified on which aircraft.

MR. GRIFFITH: This looks like that, I know that Darlene sat down with me and went over everything she had. I mean, she was really good about it.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Did anybody at the White House or Administration ask to be briefed, too, on the overall picture of what was the interaction between the FAA and the military that day?

MR. GRIFFITH: Not to me.

MR. AZZARELLO: Are you aware that any briefings occurred where somebody else represented the FAA?

MR. GRIFFITH: No, I'm not. I want to say I don't recall, but the meetings that I was going to at the White House--

MR. AZZARELLO: Tell me about those, what were they about?

MR. GRIFFITH: Most of them were SVTS, except for every Friday at 4:00 o'clock, of all times, we had this meeting over there with, first it was Wayne Downing [ph].

MR. KARA: Jim O'Downing [ph].

MR. GRIFFITH: And then after him was another Air Force four-star, he might have been a three-star, can't remember his name. But, in fact, all the ones with Downing, he did them all by SVTS,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

which made it pretty nice.

MR. AZZARELLO: Oh, so you're saying that any--these other meetings that you attended post-9/11, not the briefing--on protection of the National Capital Region, but the other meetings a lot of them were done by SVTS at FAA?

MR. GRIFFITH: Yeah, we just said, hey, let's get together on the SVTS at 4:00 o'clock [unintell.] come over here.

MR. AZZARELLO: What was all of the different subject matters that were discussed at those meetings?

MR. GRIFFITH: A lot of it had to do with intelligence. And my part of it was any issues that came up regarding the air traffic system, I'd provide a briefing on.

MR. AZZARELLO: Any other issues, intelligence, anything else discussed in those?

MR. GRIFFITH: Oh, they had a protocol that they went through. They had, like, an intelligence briefing and you know, the different elements would report out and you know, I can't say

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

who they were because when we were together, they were all in a blue suit with a blue tie and--

MR. AZZARELLO: Who were the different agencies represented?

MR. GRIFFITH: Secret Service; DOD--

MR. AZZARELLO: When you say DOD was it a big DOD or NORAD or--

MR. GRIFFITH: Joint Chiefs kind of guy. FBI, CIA.

MR. AZZARELLO: Those were the people that were present. Anybody from--anybody like in Dick Clark's position, similar to that.

MR. GRIFFITH: Dick was not in those meetings. He'd be on the--if we had a SVTS, he would be on the SVTS from time to time, but he had people he delegated some of this stuff to.

MR. AZZARELLO: So, Dick Clark may have been on some of them or his designee?

MR. GRIFFITH: Yeah. And they, really to be honest with you, most of this was making sure that everything was secure; making sure that people were aware of, you know, what the current chatter

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was.

MR. AZZARELLO: So, the purpose was to share intel and talk about--and security?

MR. GRIFFITH: Yeah, and then, you know, like Homeland Security was putting in this color-coded system and then we were having meetings; separate meetings about that. And what the responses would be. So, we in FAA put together a scheme of okay, if it goes to yellow, we're going to take these actions.

MR. KARA: Let me step back for just a second. Pardon me for--

MR. GRIFFITH: No, go ahead.

MR. KARA: Prior to 9/11, in early July 2001, do you recall a meeting with Dick Clark or with the White House concerning the threat level that summer?

MR. GRIFFITH: No, I didn't attend those meetings. You know, the Security people--

MR. KARA: That would have been Canavan and--

MR. GRIFFITH: Yeah, Mike and those guys

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

attended those.

MR. KARA: Okay.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: so when it came time for the FAA to present their, sort of account of the events that day, was that done, as far as you could understand, was that done by Jane Garvey when she testified before Congress?

MR. GRIFFITH: I know that I didn't do it.

MR. AZZARELLO: Okay.

MR. GRIFFITH: I'm not--I'm not sure how Jane and Monte handled those things.

MR. AZZARELLO: When this Summary of Events that Cannoles put together at your directions, this was a finished product? Was Jane and Monte briefed on it?

MR. GRIFFITH: Oh, yeah.

MR. AZZARELLO: And who was present for that briefing?

MR. GRIFFITH: The only thing I can tell you is that, you know, Cannoles did the briefing--

MR. AZZARELLO: So, it was briefed to the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Deputy and the Administrator by Cannoles?

MR. GRIFFITH: I think it was briefed, if I recall right, it was briefed to a group of principals, you know, which would have been associate administrators and, you know, because they, obviously, wanted everybody to know what was going on. And so I can't give you a lot of detail about it, you know, because we had so many meetings after 9/11. But I remember--I remember this: I remember there were a half dozen runs at it, you know, and--

MR. AZZARELLO: How high up the loop did the runs go--

MR. GRIFFITH: Just to me.

MR. AZZARELLO: Just to you?

MR. GRIFFITH: Yeah, you know and I--

MR. AZZARELLO: Who presented it, though, when it was a final product, when Administrator Garvey and Belger and a group of principals, who did the briefing to them.

MR. GRIFFITH: Cannoles. Yeah, I feel pretty confident about that, because, you know, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

mean, I told him I wanted him to be the expert on this. And, you know, that we needed to be able to articulate what was in there and it needed to be right. So, he and Tony Ferrante were the two principal people involved in doing the briefings.

MR. AZZARELLO: Let me show you some references in here to notifications to the military as they exist in here. This is on American 11. There's an 8:40 Northeast Air Defense Sector logs indicate--we could represent, you know, that we got this from NEADS and this is the NMCC kept log from 9/11. And we think this is the log that they're referring to in the FAA Summary. The logs indicate they were notified by the Federal Aviation Administration on the events concerning 9/11, when you look at 8:40, which is 12:40 Zulu, possible hijack AA-11.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: Okay, 175, second, crash that day; 9:05, they have a--I believe. Northeast Air Defense Sector logs they were notified by the FAA of events concerning that would be 1305 Zulu,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

right?

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: United 175, possible hijack, Boston/LAX. And, again, this is, we didn't put this together, but we think this is the log they're referring to, the problem was Dave Cannoles didn't remember seeing this log, he didn't think he did, which sort of seems a little odd now, to me, because he thought that this log was given to you and that you had--not this--I won't say this particular log, no, I have to say it correct, he said a NORAD log, he believed that was given to you and that you might have seen at one point, but, to your recollection, too, Miles--but that he didn't actually put this together. He does not remember using this as a reference to put the military notifications in.

MR. GRIFFITH: Yeah, this was the work that Darlene was doing.

MR. KARA: That's what I was just going to say, it's probably done by Darlene Freeman.

MR. AZZARELLO: Now when you get to 77,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

though, and 93, there's no NEADS notification indicated here.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: And, if you look at--you can look at all the entries down here, right?

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: If this, indeed, was a document that Darlene or someone else was looking at, you don't see anything on United 93, it's says scramble on Langley, I got Langley on battle stations, okay; and you have 9:11 a.m., both hijacks, UAL 175 and American 11, hit World Trade Center. And there's a 9:16 Eastern Time a United tail number listed and souls on-board. And then an American tail number at 9:24. We now know, from looking at the records that the--this tail number is to United 175.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: And this tail number at 9:24, it goes to American 11, so they go with the first two hijacks.

MR. GRIFFITH: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Then you see hijack American 11 flight headed to Washington, D.C. We've listened to the NEADS tapes, this seems to coincide with exactly what the report that they thought American 11 was still headed--didn't hit the Trade Center, it was heading South to Washington.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: And Langley is scrambled on the American 11 flight at 9:24. And you go down here, you see American 77, 9:34 a.m., lost, unable to locate; that was the call I told you about early ZDC, Washington Center.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: [unintell.] couldn't find it. Langley airborne, then they hit Delta 1989, possible hijack.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: It was before we were told it was a special track and then they said will land in Cleveland possible. Now at 10:01 and then finally at 10:07 bomb on-board, UAL 93 over

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Pittsburgh with a mode 3.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: It seems to me that if somebody had this log and that's what they used to put the notifications of 11 and 175 that raises the obvious question, why didn't they put 10:07 as the notification of UAL 93. And why didn't they put 9:34 as the American 77 notification, lost and unable to locate, because it appears by call sign in here.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: Do you--put that aside for a second, okay. Did it come up as a topic of discussion when it was briefed by Dave Cannoles or whoever? Did anybody in the room say, it would seem to me an obvious question, that, we got a notification here a time on 11 and 175, what do we say and what does the military say about the last two flights, when did we notify them of them? Dave Cannoles said he remembered it being a topic, I'll use his---try and use his exact words--

MR. GRIFFITH: I don't remember are these

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in here?

MR. AZZARELLO: I'm sorry?

MR. GRIFFITH: Are these in here?

MR. AZZARELLO: The other, the various other entries?

MR. GRIFFITH: Yeah?

MR. AZZARELLO: Which of these, you'll have to point--no, that's not anywhere in here.

MR. GRIFFITH: That's not in here?

MR. AZZARELLO: No.

MR. GRIFFITH: And here is--

MR. AZZARELLO: Bomb on-board, at 10:0--there's no notification, I'll show you what happens on 93.

MR. GRIFFITH: It doesn't show up in here?

MR. AZZARELLO: No. Here's United 93. If we're to--this is the FAA time line, right?

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: It's got the controller overhearing the screams and no reply and the bomb on-board.

MR. GRIFFITH: Did you get a copy of

Darlene's [ph] report?

MR. KARA: All we and the reason I showed you this is, we had--we do not have a report attributed to Darlene, we have this single piece of paper, which may be a synthesis of her work. This is dated the 20th of September 2001.

MR. AZZARELLO: As you can see in here, we were told it ends here. They're saying in here 9:24, it shows them regarding--the NEADS log show them regarding notifying, FAA notifying 77. If you look at 9:24, it just says American Airlines 11 hijacked but that doesn't say 77, call sign and, in fact if you look at the tail number, that's 11. I would think that that, whoever--would it be fair for me and if it's unfair tell me--would it be fair for me to assume that someone in an FAA position putting this together would recognize the significance and importance of checking the tail number to see which flight it goes with? It would seem that that would--may be somewhat fundamental from an FAA perspective in trying to identify an aircraft by call sign if you have a tail number.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: The likelihood of us having a tail number of a commercial aircraft operating in the system is very nil. We just don't do it.

MR. AZZARELLO: So, if I were the person putting together the FAA Summary of Events and I was looking at this log--

MR. GRIFFITH: I'd wonder how they got a tail number.

MR. AZZARELLO: Okay, well, if I don't have a call sign associated with it, is it fair to say that I'm not in a position to assume one way or another whether this is American 77 or 11 if it doesn't give me the call sign, it just gives me a tail number?

MR. GRIFFITH: Well, you could go back to the airline operations center and say, hey--

MR. AZZARELLO: Who had that tail number on that day--334AA on 9/11?

MR. GRIFFITH: Yeah.

MR. AZZARELLO: Which of the two aircraft was it, 77 or 11?

MR. GRIFFITH: But, I mean, the likelihood

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of us knowing the tail number of any of these airplanes without the pilot telling us is--

MR. AZZARELLO: No, and this is a NEADS log. I meant after the fact if you tried to put together.

MR. GRIFFITH: I don't know how NEADS would know.

MR. KARA: Oh, they got it from the center--

MR. GRIFFITH: They got it from the Boston Center.

MR. KARA: They got it from the Boston Center, another example of Boston Center sharing information.

MR. GRIFFITH: So, Boston Center went to the American Airlines Operations Center and said, what's the tail number?

MR. AZZARELLO: But there's no notification in here if you go through the Cleveland Center tells the ROC, it says at 9:39. In fact, the conversations we saw before with Doug Davis and the Command Center being notified is not

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in here nor at headquarters on this. And nothing on NEADS. It ends, the crash time was, they have down as--what time do they have the crash 10:0--it should be--

MR. KARA: Of 93?

MR. AZZARELLO: Yeah, they don't put the crash time, they say the primary radar terminated at 10:04. And there's nothing in here about notice to the military on this.

MR. GRIFFITH: Yeah--I don't know where Darlene's work is, but--

MR. KARA: Is she still here?

MR. GRIFFITH: I don't know.

MR. AZZARELLO: Aside from here work, though, wouldn't that be an obvious question for somebody to raise when this is briefed and discussed, like, all right, well, we have notification times on the first two, but what about the last two?

MR. GRIFFITH: Oh, yeah, we had, Larry Arnold and I and other people had numerous discussions about, you know, who notified what to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

whom and when was it done and, you know, how do we react to it? How do we respond to it? And so, that's what Darlene's was asked to do was, okay, look Jeff says one thing, Larry says another thing, you know, we've got all these pieces of paper, so, you know, sit down and go through them; and give us one report, which she did and it's longer than one page, I know that.

MR. AZZARELLO: Well, Dave Cannoles remembers it being--try to paraphrase it, use the words he used, though, it was a topic of hot debate. Who knew what, when?

MR. GRIFFITH: Oh yeah.

MR. AZZARELLO: And when did the FAA tell the military? Did the military have time to react?

MR. GRIFFITH: It did.

MR. AZZARELLO: They did not have time to react and that was hotly debated.

MR. GRIFFITH: It was, yeah.

MR. AZZARELLO: And who, were you present for any of those debates where it was spirited

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

debated in a spirited fashion?

MR. GRIFFITH: No.

MR. AZZARELLO: Well, you said you talked to Larry Arnold, did you debate with him?

MR. GRIFFITH: Well, yeah Larry and I, you know, I'm assuming by what you say that--you didn't know about my meetings with Larry till I told you--

MR. AZZARELLO: Right.

MR. GRIFFITH: --you know, so I'm assuming that this is coming from, the White House, I don't know where it's coming from.

MR. AZZARELLO: Well, do you know if the questions are coming from the Administration or the White House about who knew what when?

MR. GRIFFITH: No, I knew that--here's what I knew. I knew that people were saying, hey, the military's saying one thing; you know, other people are saying another. And--

MR. AZZARELLO: The other people being the FAA?

MR. GRIFFITH: Yeah. And, it's--

MR. AZZARELLO: Who, when you say people,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

say it's people from where?

MR. GRIFFITH: I can't tell you that, I--

MR. AZZARELLO: Outside the FAA or inside
the FAA or--

MR. GRIFFITH: You know how it is after an
accident or anything else, everybody's pointing
fingers.

MR. AZZARELLO: Right.

MR. GRIFFITH: Wasn't my job, you know,
they should have told us. So, Larry and I just
approached it from a very pragmatic point of view.
We said, look, the truth is there somewhere, so,
you know, get the people to get the logs and, you
know, wherever the truth is, we don't care, we just
want to know the truth.

And, so, Darlene was given the task of,
you know, go find out. And--

MR. AZZARELLO: Go find out what the truth
is--

MR. KARA: On the FAA side, who did Larry
give that task to on his side?

MR. GRIFFITH: I don't know who Larry gave

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it to because, you know, I remember that, I talked to Larry about the logs. I said, hey, Larry can we have your logs? Well, they're classified. Okay, well, you know, what do we need to do to get the information we need? Well, let me work on it. And then, you know, finally at some point, he said, yeah, we're going to sanitize some of the logs and we'll provide them. And they were. But as far as, you know where all that went, I mean, I don't know whether that was between--

MR. AZZARELLO: Well, Darlene has pointed out once she can get one side of the picture unless she has a counterpart in the military--

MR. KARA: She works as--

MR. AZZARELLO: --who's saying, well, this is what we think happened, right, to put together the big picture.

MR. GRIFFITH: Well, her job was to screen the logs.

MR. AZZARELLO: Screen the military logs?

MR. GRIFFITH: Yeah.

MR. KARA: And she was working with Scott

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

or for Scott, Alton Scott was some point above her?

MR. GRIFFITH: No, Darlene was SES.

MR. AZZARELLO: Who did she report to on this task?

MR. GRIFFITH: No, no, no, her office was right next to Monte's. So, you know, she was an SES, was like a Senior Advisor or something.

MR. KARA: A special assistant to Monte or to Jane?

MR. GRIFFITH: I really don't know what her title was.

MR. KARA: Okay.

MR. GRIFFITH: All I know is when Darlene said do something I did it. So--

MR. KARA: Oh, when she said do something, you did it?

MR. GRIFFITH: Oh, I did, yeah. She sat up there in the front office.

MR. AZZARELLO: If you're Joe citizen, we'll pick up this summary and you see there's two notifications on 11 and 175, one on each the first two. And there's no entry in this FAA summary of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Events for Notification to the Military on the last two flights, what is it we're supposed to, if anything, what are they supposed to assume, either that there was no notification or that it's unknown from an FAA perspective when they did notify the military on each of the last two flights?

MR. GRIFFITH: I think it's unknown. I mean, if I were Joe Citizen it would--I'm confident that the military got the information, you know. Can I go back and say here's where it was--

MR. AZZARELLO: At some point, that, and like on the day for each of the four planes?

MR. GRIFFITH: Oh, yeah, when things were going on, I'm confident that, like, when Doug made the announcement on 93, I'm confident that, through the process that we were using that had evolved from people being in that room--

MR. AZZARELLO: Right.

MR. GRIFFITH: That the military got the information.

MR. AZZARELLO: Well, unfortunately, their logs show that they got it--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Yeah I know. Did you get the NMCC logs?

MR. AZZARELLO: We got the NMCC logs?

MR. KARA: Yeah, we got the tape of the air--

MR. GRIFFITH: See if we had a breakdown in the way we were giving it to them, then--

MR. AZZARELLO: But wouldn't it have gotten, I mean I'm just--to play devil's advocate, right? You got the finger-pointing going on, obviously the military would like to say, well, we didn't have enough notice. Obviously, the FAA would like to be in a position to say well, we gave them notice to do whatever it was--

MR. GRIFFITH: As soon as we got it.

MR. AZZARELLO: Right, but if you're the military and you know you got an NMCC logs, you got NMCC tapes, and you got operations--they know where to go. They're just like, you at the FAA collectively know where to go to find out what happened when--when did we know something was wrong with a flight?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: Right.

MR. AZZARELLO: The know where to go to the Ops Center and find out when did they know?

MR. GRIFFITH: Right.

MR. AZZARELLO: You go to the Ops on 93, you see that they know after crash on 93. Was that, I have to imagine that if you had any sort of spirited debate with Larry Arnold that that might have come up, like, him saying, well, you know, our people at NEADS tell us that they didn't know about 93 until after it went down.

MR. GRIFFITH: Yeah, oh, yeah, Larry and I had a lot of heated conversations.

MR. AZZARELLO: But did you have one of that nature, where he said, you know, hey, I gotta tell you, Jeff, on the last one our position is we didn't know about it, according to all the NEADS people in the logs and what the tapes show on the floor that they weren't told about that last one that crashed in Pennsylvania till after it went down?

MR. GRIFFITH: I'm sure that either Larry

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

or one of his colonels working for him said that. Which got us to the point of saying, look, we don't, Larry and I agree. We Just want the truth. So that we can fix whatever the problem is. It didn't matter to me, if it was me, then, you know, fire me, I don't care, you know. But it's just the idea that--well, I don't know what government agency you work in, if you do, but you know, I've worked in government for a long time and I know that people are looking for scapegoats, you know. It got into a lot of that.

MR. AZZARELLO: I worked at [unintell.] for about 10 years.

MR. GRIFFITH: Did you, okay, so it's like, for me, I say I don't care about that stuff.

MR. AZZARELLO: I worked at a line level and I worked at a supervisory level. And we were trained similarly as you reflected, let's just find out the truth, whatever happened happened and we're here to achieve justice whatever that justice is.

MR. GRIFFITH: Exactly and that's where Larry and I were and so.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Did Colonel--do you remember talking to a Brigadier General Moore [ph]? Doug Moore?

MR. GRIFFITH: Doug Moore, yeah, that name sounds very familiar, yeah.

MR. AZZARELLO: Because I think he's on, like one or two written communications talking about coordinating, you know, what does the military have in their time line, what does the FAA have in their time line of notifications and all that.

MR. KARA: It's possibly--

MR. AZZARELLO: Now, I don't want--and, Jeff, I don't want to put words in your mouth or make any assumptions, I want to see if you really do have an independent recollection of, at least on one occasion of discussing with either General Arnold or one of his officers that the issue of 93 that, hey, the military them saying to you, either General Arnold or one of his representatives saying, you know, Jeff, I gotta tell you on 93, our people at the Ops level in the military and NEADS

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

are saying they didn't know about till after it went down, so that's the truth. So, if something broke down, so let's talk about the DEN and obviously it didn't get where it should have gotten, so let's talk about how that's going to happen now, how can we make that work. And make the country safe for going forward.

Because the DEN is a great creation from what we can see, and everybody praises it, but it seems to have resulted from someone's realization that there was a problem, that somewhere there's a manifestation of it, you know, a lack of communication and someone says, all right, well hey how do we fix that? And I think it was a brilliant move by whether it be yourself or whoever to say, know, here's where it broke down, this is the truth. Ninety-three didn't reach there and maybe if we had a DEN, it would have gotten there quicker.

And I'm asking you if you have any specific recollection on that?

MR. GRIFFITH: I have some recollection on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that, I can't--I can't tell if it was Larry because, I can remember when we were going through this finger-pointing thing. I can't remember if Larry told me that--directly that it was fighting a fight if we didn't get 93, because Larry and I didn't have a good relationship or whether somebody was telling me that, you know.

MR. AZZARELLO: Did you ever talk with a Colonel Marr [ph] or a Colonel Spiker? Bob Marr?

MR. GRIFFITH: Bob Marr, yeah.

MR. AZZARELLO: You talked to Bob Marr?

MR. GRIFFITH: I'm pretty sure, yeah--

MR. KARA: How about Colonel Scott?

MR. GRIFFITH: Don't remember Scott.

MR. AZZARELLO: Because Marr was the guy fighting the battle that day in your battle commander, he was the battle commander. So, he would have been the guy--

MR. GRIFFITH: At [unintell.]

MR. AZZARELLO: He was at NEADS.

MR. GRIFFITH: Oh, he was at NEADS.

MR. AZZARELLO: He was the battle

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

commander at NEADS, so he would have been the guy with a finger on the pulse of the operational floor at NEADS that day for what they knew when.

MR. GRIFFITH: I gotta tell you, you know, my attitude when we got into the finger-pointing and all that stuff was--

MR. AZZARELLO: Let's solve it.

MR. GRIFFITH: --I don't care, you know.

MR. AZZARELLO: Let's just fix it.

MR. GRIFFITH: If it's us, then shame on you, you know, we'll deal with it. If it's them, then let's help them fix it, but, you know, I don't care what happened, what I care about is that it doesn't happen again.

MR. AZZARELLO: So, is it fair for me to assume that you had a conversation with someone, you're not sure whether it's Arnold, but someone in the military, perhaps, General Arnold or someone else about the fact that the military said they didn't think they had any prior notice on 93?

MR. GRIFFITH: Yeah, that's fair.

MR. AZZARELLO: Is that a fair assumption

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

for me?

MR. GRIFFITH: Yeah, yeah.

MR. AZZARELLO: Then we have--you know what's interesting is that--then you have the FAA time line.

MR. GRIFFITH: Okay.

MR. AZZARELLO: Does that have--

MR. KARA: He needs his lunch. No, I just wanted to know if this was the outcome of the discussions. FAA didn't put out a press release until nearly a year later in what were the internal discussions at the senior level in FAA is why it took so long to put that time line down and finally what drove the decision to put it out?

MR. GRIFFITH: I don't know.

MR. AZZARELLO: This wasn't something did you have any input in or did anybody consult you on it before they released it?

MR. GRIFFITH: Schuman [ph] always talked to me.

MR. AZZARELLO: Did he?

MR. GRIFFITH: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Well, is it fair for us to assume that the Public Affairs unit of the FAA, if they're going to release a time line of events in 9/11, if they can't sort of do it of their own accord, they have to look at somebody in Air Traffic--

MR. GRIFFITH: Oh, yeah, Schuman was good about that, he never put anything out that we didn't approve.

MR. AZZARELLO: They have 9:24 being FAA notifies NEADS about the hijacking or suspected hijacking of Flight 77. As you know, from our interview with you, we don't think that happened until 9:34 and it was notified as lost, unable to locate, not hijack.

MR. GRIFFITH: Mm-hmm.

MR. AZZARELLO: And then we don't have United 93, as you say, after 10:00 o'clock.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: Maybe you could help us on this. This is interesting, given your discussion with General Arnold. The military comes out with a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

time line and, indeed, they present it at public hearings, last May, that says at 9:16, they were notified of United Airlines 93. Okay. A couple of things on that now.

MR. GRIFFITH: Yeah.

MR. AZZARELLO: We now know that United 93 wasn't even hijacked then. Because the screaming on the frequency and the bomb on-board doesn't occur until 9:28, we've heard the cockpit voice recorder it was played for us by the FBI. The takeover of the plane hadn't even occurred yet. Now, how do you square that--that seems to run directly counter to the military advising the FAA that, hey, we didn't even get any--we didn't get any advance notice, we got post-notice on 93.

MR. GRIFFITH: That's wrong.

MR. AZZARELLO: Well, none of these are wrong, but if you have any insight of this, if you saw it or in discussions about it, why, then would they want to come out with something that says they had 45 minutes advance notice when they didn't get it until after the fact?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. GRIFFITH: I don't know.

MR. AZZARELLO: It doesn't make any sense.

MR. KARA: Did the 9:16 time come up in your discussion with General Arnold? A very early notification--

MR. GRIFFITH: Larry and I didn't talk about, you know, that particular level of detail--we didn't sit down, with, you know, numbers.

MR. AZZARELLO: Okay.

MR. GRIFFITH: What we talked about was, hey, your bosses and my bosses are saying things, you know, we're the guys that are supposed to fix it, so let's fix it.

MR. AZZARELLO: And the DEN pretty much addressed many of the [unintell.]

MR. GRIFFITH: I think so.

MR. AZZARELLO: People like it and people praise it when we go out to the centers and the TRACONS. Do you have anything else, let me-- Jeff, you're a wealth of experience, I'll ask you one final question we ask everyone. You are the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Commissioners and you've got to make recommendations to the Congress and the Administration on changes to make that haven't already been implemented, things like the DEN. Or maybe it's even equipment or technology that you think should be available now, to the military or FAA. Anything from resources to equipment and technology, to procedural or substantive changes as it affects the aviation industry that you think haven't been made and could be made to make the country safer to either mitigate the damages from a potential future attack, terrorist attack, using aircraft or this industry, or to prevent one way or the other.

I know preventing is hard and the easiest way is to keep them off the plane or from coming into the country. But either on prevention or mitigation, you have a wealth of experience. You have a military background, you have many years at the FAA. Anything you'd like to see done that from your perspective you think could be done as practical that would make the safety of the system

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and mitigate damage in a future attack if it should happen. And it's a tough question to just ask on the spot and expect you to come up with, I know generally people would like to reflect on that. And so, to the extent that you want to reflect on that and you think of things in, you know, the coming weeks even before we close out our Commission work, you have Miles Kara's card, we really do encourage you to call, Miles or any one of us and say, you know, what, I thought about this it's a serious question, it's a good question, and these are the recommendations that I would make if I were the Commission to enhance the safety of the system.

So, I don't want to put you on the spot now and say you've gotta come up with something, now, I'd like the benefit of your reflection and your thoughts. Because you've got a lot of experience. Okay.

MR. GRIFFITH: Yeah, I'll think about that.

MR. AZZARELLO: Yeah, if there's something

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you think of--

MR. GRIFFITH: I'll tell you where my brain takes me. It takes me to immediate notification, so that and notification to the right place. And that's one of the things that we tried to do with that order when we put it out and said any unexplained heading change, altitude change, et cetera, report immediately

MR. AZZARELLO: When the new orders went they're going to constantly be modified adding moved in to look for, you mean.

MS. SULLIVAN: They were all put out, right, to all the centers?

MR. GRIFFITH: Yeah, yeah, because Mike and I sat down and said, look, we've got to get something out before we start the system up. So Mike, I said put this order out, Mike, it's got to cover at least this. And he did, he did a good job.

But then, you know, you know, I just have to think back to what these controllers were going through. Those airplanes did what they did, and,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you know--it's what, 8:30, 9:00 o'clock interest he morning whatever it was when these guys were working these airplanes. It's a busy time in the morning for center controllers. Some of them were working 20 airplanes, you know, and--

MR. AZZARELLO: We can say the Indie Center guy was working about--approximately 16 aircraft and John who was here before, John Farmer, Dana interviewed the controller who had 93 on his screen--

MS. SULLIVAN: Out of Cleveland.

MR. AZZARELLO: Cleveland, I'm sorry right.

MS. SULLIVAN: He had--

MR. AZZARELLO: He did an incredible job--

MS. SULLIVAN: Marine sector, marine center?

MR. GRIFFITH: Yeah.

MR. AZZARELLO: He did from what, from looking at the tapes and listening and their interviewing him, he did just an incredible job of feverishly moving anything and everything that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was--

MS. SULLIVAN: It's tough work being a controller.

MR. GRIFFITH: But, you know, so the FAA's the only [unintell.] now, you know, and everybody's fighting over dollars. I'm looking at the 05 budget talks and all that. Everybody's fighting, well, we're going to take a half a million away from you or, excuse me, a half a billion away from you and all that.

But, you know, I ran that budget for three years the F&E budget for the Air Traffic Organization about modernization and, you know, when the FAA is bringing new technology into the operational environment, it's already ten years old, you know. Because you're gone through so many processes of the acquisition and so many processes of budget and, you know, you've got this much money this year, you plan on this much next year, well, wait a minute, you know, Congress says, no, you're going to get this.

And until the FAA gets a capability to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

mange it's own budget, I mean, you can have congressional oversight from the DOT or OMB, anybody else, but, until they get a fair shot at raising their hand and saying, okay, I've identified where my problems are, and I've identified what needs to be done to fix them. Now, give me the dollars to go fix them, you know, instead of saying, oh, okay we'll get to it in ten years.

And by the way, when you put in front of the controller in ten years, it's already ten years old.

MR. AZZARELLO: So you're suggesting we just streamline the process.

MR. GRIFFITH: Conformance monitoring should not be a controller responsibility. Controllers are separating airplanes. So, airplane down in this corner of their sector which is this big, you know, comes in reports in, says I'm here, okay you're here, I check your altitude, I check your real flight, you're clear, you can get all the way through my sector without me having to talk to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you again.

I got 18 other airplanes that are climbing and descending and pointed at each other, but I've already in my mind decided that this airplane can get from here to there in the next ten minutes and I don't have to do a thing with them. Okay, so what am I doing? I'm separating airplanes.

Well, if that airplane turns around and goes the other way, it might be three minutes before that controller notices it, because they're marking strips and they're doing keyboard entries, and they're talking, they're coordinating, you know. So, automate conformance monitoring, you know.

MR. AZZARELLO: Well, look at American 11, the same controller who was tracking it as a primary before it crashed happened to the unlucky guy to have 175 get hijacked on the same screen on his watch.

MR. GRIFFITH: Yeah, so automate conformance and make the system do something when it occurs. In other words, you know, just because

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a controller filters out primary radar, doesn't mean the system doesn't have primary radar on that aircraft, it just means the controller's not watching it.

MR. AZZARELLO: So you're saying, are you saying, let's see if I can understand how that can work in practice. So, you're saying, like, let's say, the controller's watching a flight to the left of the screen and it's transponding and one to the right turns its transponder off and goes primary have the system signal him.

MR. GRIFFITH: Yeah, put up a red flag.

MR. AZZARELLO: Start beeping, red flags up--

MR. GRIFFITH: And have the computer automatically seek and find the primary target that's somewhere in that system down in the basement and track it. Don't make it a controller responsibility.

MR. KARA: Well, that comes back to the day when the primary's in the system, but it's for whatever reason.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: It's the 77 issue--it's--

MR. GRIFFITH: It's not there for air traffic control, it's there for issues unfortunately that involve bad guys. So, you know, don't make a controller say, oh, while you're separating those 17, 18 or some controllers separate 30 airplanes, you know, while, you're doing that, oh, by the way, if you don't see this guy make a 180 and get outta Dodge, you know, you're fired. Let--and it could be done, I mean, I do a lot of automation work now, you know, in the private sector, it can be done.

MR. AZZARELLO: Hadn't heard that one before. That would--

MR. KARA: What that the private sector can do it or that--

MR. AZZARELLO: No, the suggestion to get that suggestion.

MR. KARA: We're concluding the interview.

[END OF INTERVIEW.]

WASHINGTON, D.C. 20003-2802
(202) 546 6666

I N T E R V I E W

MR. AZZARELLO: It's Tuesday, April 6. We're at FAA headquarters about to begin an interview with Linda Schuessler. I'm John AZZARELLO, Team 8, 9-11 Commission.

MR. SHAEFFER: Kevin Shaeffer, 9-11 Commission.

MR. KARA: Miles Kara, 9-11 Commission.

MR. BROWN: Jeff Brown, 9-11 Commission.

MR. LEWIS: Brooke Lewis, Office of the Chief Counsel, FAA.

MS. SCHUESSLER: Linda Schuessler, FAA.

MR. AZZARELLO: And Linda, could you just for the record spell your last name?

MS. SCHUESSLER: S-c-h-u-e-s-s-l-e-r.

MR. AZZARELLO: Could you sort of start off, Linda, by giving us an overview of your career with the FAA, the various positions you've held along the way with brief descriptions, and then when we get to 9-11, tell us what position you held that day, and then we'll go in a little more detail in what duties are attended to that position.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Okay. I was hired in the FAA in 1974 as an air traffic controller in the Atlanta Center. And I've spent the majority of my career in Atlanta Center. I held numerous staff positions, first-line supervisor, area manager, assistant manager for air station procedures, assistant manager for training. I was also the assistant manager for the air traffic facility and would detail to the air traffic manager for a period of--in total, I don't know, eight or nine months.

Subsequent to that, I came to Washington headquarters. I was the assistant division manager for in-route and terminal procedures.

MR. AZZARELLO: When did you get to headquarters?

MS. SCHUESSLER: 1998.

MR. AZZARELLO: Were you at that Atlanta in-route center then from '74 to '98?

MS. SCHUESSLER: Well, when--a couple of other positions that I held I went also to the Southern Region headquarters. During that time

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

span, I think probably the first stint in the Southern Region was somewhere around 1985, 1986. This is as a standardization and certification specialist.

MR. AZZARELLO: At the Southern Region headquarters?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Where is that located?

MS. SCHUESSLER: That is also in Atlanta. Subsequent to that, I went back to Atlanta Center, what position I can't tell you at this point, you know, one of the positions that I've named. I went back to a facilities and equipment specialist back in Southern Region headquarters prior to going back to Atlanta Center I believe as a first-line supervisor.

So in headquarters initially I came up here as a assistant division manager for in-route and terminal procedures. Subsequent to that I went out to the Command Center as I believe the efficiency--you're not going to hold me to these titles now--manager for Efficiency. Then also at

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the Command Center, manager for tactical operations. And as a manager for Tactical Operations, that means I'm the facility manager for the Command Center, and that's where I was on September 11th.

MR. AZZARELLO: Let's go back up to '98. At FAA headquarters, you're assistant division manager for in-route--

MS. SCHUESSLER: And terminal air traffic procedures.

MR. AZZARELLO: Could you give us just a little idea of what that role consisted of?

MS. SCHUESSLER: It was national oversight for the procedures used in the air traffic control facilities in the country. That also included runway--program, and at the time, contract tower program as well.

MR. AZZARELLO: So you're involved in runway-- program?

MS. SCHUESSLER: Federal contract towers and the development and implementation of air traffic control procedures.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Federal contract towers. Is that--I think we visited one--the tower off of Cape--at Otis? Is that a federal contract tower?

MS. SCHUESSLER: Oh, I don't know. I'd have to go back and look at records, but there are numerous contract towers throughout the national air space system. And they're contracted out and certainly the FAA oversees--

MR. AZZARELLO: The performance?

MS. SCHUESSLER: --the performance and management of those facilities.

MR. KARA: Does that include the military-run towers, like for example Langley is a military-run tower?

MS. SCHUESSLER: No, it does not.

MR. AZZARELLO: And you were working at the FAA headquarters in that position and you were also working on the overall efficiency of the air traffic system?

MS. SCHUESSLER: At the Command Center, there were two--

MR. AZZARELLO: I'm sorry. I'm talking

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

about headquarters.

MS. SCHUESSLER: No.

MR. AZZARELLO: You're not in that position--overall efficiency of that?

MS. SCHUESSLER: That's part of it, but it was certainly not a major part of that particular role.

MR. AZZARELLO: Okay, so then we'll call it the headquarters. I'm sorry, the Command Center. You got there around roughly what year?

MS. SCHUESSLER: It was May of 2000.

MR. AZZARELLO: That's when you started at that Command Center?

MS. SCHUESSLER: I believe so.

MR. AZZARELLO: We won't hold you to the month. Roughly. What was your first position at Command Center?

MS. SCHUESSLER: It was the division manager for efficiency.

MR. AZZARELLO: And just jumping ahead a little bit for a second. Is that the position you held on 9-11?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: No.

MR. AZZARELLO: Okay. Let's start with that one then.

MS. SCHUESSLER: Okay.

MR. AZZARELLO: Division manager for Efficiency. Just give us a general idea of what the day-to-day functions are.

MS. SCHUESSLER: Day to day, it was the management of the administrative staff that included training, quality assurance and procedures and automation.

MR. AZZARELLO: Management you said of the administrative staff?

MS. SCHUESSLER: Pretty much. The administrative staff which consisted of quality assurance, training, procedures and automation.

MR. AZZARELLO: Quality assurance, procedures--

MS. SCHUESSLER: Training and automation.

MR. AZZARELLO: Is it fair then to assume that you were not involved in--how involved were you in the operation of--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Certainly you've got to be involved in the operation to be able to develop procedures and training, but I did have a peer and that was John White, and he was the manager for tactical operations, and subsequent to this position, and I believe it was somewhere in the December, January time frame, John and I were assigned the different roles, and I became the manager for tactical operations, and he became the manager--division manager for the efficiency.

MR. AZZARELLO: For efficiency. Okay, now when did that occur then?

MS. SCHUESSLER: I believe it was December, January time frame.

MR. AZZARELLO: Of--

MS. SCHUESSLER: Well, January, '01, December '00.

MR. AZZARELLO: So at that point you become division manager--

MS. SCHUESSLER: For tactical operations.

MR. KARA: Was one of those two position more senior than the other?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Not more senior. They're peers. However, the division manager for tactical operations is considered the facility manager. So they're responsible for the entire facility, although as a peer, you are responsible for again the training procedures type of oversight.

MR. AZZARELLO: And John White was--if I'm mistaken, correct me--John White fell more into the role you had in May of 2000 at that point?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: What was some of the roles and functions you filled in that position as tactical operations manager?

MS. SCHUESSLER: Again, as the facility manager, so, yes, I was responsible for the day-to-day operation and the operational quotas, but I was also responsible for the integration, for instance, of some of the products and services that were being provided by John and his staff.

MR. AZZARELLO: I assume there's a lot of overlap and interplay then between John and yourself.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Very much independent services and products that we have to work very close with together.

MR. AZZARELLO: In terms of an operational issue, he would be the boss of the operations?

MS. SCHUESSLER: That's correct.

MR. AZZARELLO: How about Jack Keyes? Where does he fit in this?

MS. SCHUESSLER: Jack Keyes was the program manager, so he was responsible for the traffic management program itself. And so he was the superior for John White and myself.

MR. AZZARELLO: The program manager?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: And what are his--outline just briefly for us his various responsibilities as program manager.

MS. SCHUESSLER: Well, a program manager--he's the program manager for the traffic management functions throughout the national air space system, whereas John and I, we did have oversight on some of the facilities in the fields.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Our main focus was the Command Center proper itself.

MR. AZZARELLO: So Jack's focus would be on a national global or a national sort of level, and your focus is a little more than operation of the Command Center?

MS. SCHUESSLER: Most of our focus is on the Command Center, but in order to be focused on the Command Center, you have to understand the role of the Command Center because they do provide the umbrella organization for all the traffic management in the national air space system. So for instance if there were disagreements between the field facility as far as the traffic management, the initiative that needed to take place, the Command Center holds the trump card in making that determination what is to be accomplished.

MR. AZZARELLO: Is it fair for me to assume, and I'll ask for your comments on this, but is it fair for me to assume that in your position in January, '01 as tactical operations manager that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you would have a full and complete--would have to have a full and complete understanding of the operations on the field level, for the in-route center level and the Tracon level, and, you know, the terminal approach?

MS. SCHUESSLER: Well, I think so because again we're an independent--interdependent system. So the calls that we would make at the Command Center, we would need to understand the impact, but we would have not only on the field facilities but on the customers as well.

MR. AZZARELLO: If there was an operational decision that needed to be made and you were at the Command Center as well as Jack Keyes, would you have the ultimate decision on that, or be on your own accord, or would you have to consult with Jack Keyes on it?

MS. SCHUESSLER: Well, I would have the decision-making authority, but certainly there would be decisions if he were in the facility that I would consult with him prior to making that determination. But from an operational

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

perspective, tactical operational perspective generally speaking, even if he was in the facility, I would make that decision.

MR. AZZARELLO: Day-to-day routine stuff you wouldn't necessarily consult him on, is it fair to say?

MS. SCHUESSLER: Correct, correct.

MR. AZZARELLO: Issues that bear importance you would--is it fair for me to assume those maybe you would consult with him if he were there?

MS. SCHUESSLER: More strategic type decisions that might need to be made, you know, so we can make plans for the future in the traffic management world, you know, what impact it would have on customers long-term, what impact it would have on field facilities, what impact it would have on the Command Center. Again, more strategic type decisions. Certainly we would sit down in consultation and work through those issues.

MR. AZZARELLO: Let me ask you a question about the relationship between the Command Center

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

within the FAA and the airline companies. Was there any one of either yourself, John White, or Jack Keyes that was responsible for sort of overseeing that area, the relationship between the company airlines and--as it affected the business of the Command Center?

MS. SCHUESSLER: Well, we don't--well, as you know, we don't oversee the airlines. We work in consultation with them and a lot of Jack's role would be to work with airlines at his peer level, but that's not to say that John and I also wouldn't have discussions and routine phone calls with airlines as well. Again it depends on the issue at hand and what needs to be done. If it's tactical, certainly John and I would handle it. If it was more long-term type concerns and issues, it might Jack. It may be the three of us.

MR. AZZARELLO: How about the relationship between the Command Center and headquarters? Can you give me a description of what that relationship was in 2001?

MS. SCHUESSLER: Well, the Command Center

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

is a headquarters facility. Even though it's out in the field, it is considered a headquarters facility. So if you're asking was a management member of the headquarters staff, yes, as well as we were.

MR. AZZARELLO: Is that considered a headquarters facility?

MS. SCHUESSLER: Yes, it is.

MR. KARA: What is the showup on this--

MS. SCHUESSLER: Okay, so if you're look at under Air Traffic Services, under Air Traffic Service, we did have several programs at the time. One of those happened to be the program that Jack was responsible for, and that was for--I've forgotten the exact title.

MR. KARA: So was he a direct report to Bill Peacock or to Challen?

MS. SCHUESSLER: Well, actually he was a direct report at the time to Jeff Griffith who was the deputy for Air Traffic Services.

MR. KARA: Okay.

MS. SCHUESSLER: And then Bill Peacock was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Jeff Griffith's superior.

MR.KARA: Right.

MS. SCHUESSLER: And then Challen was Peacock's superior.

MR. KARA: Right.

MR. AZZARELLO: So Keyes would report to Peacock and Griffith.

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Thank you. Well, let's say not a long-term range but on a tactical operational decision that was of a great magnitude, let's say, like the nature of 9-11 was, there were major aircraftings. For operational purposes, would Jeff Griffith be the, say, point of contact for Jack Keyes and upper management level to coordinate a major operational issue?

MS. SCHUESSLER: That would be his direct superior, and certainly if Jeff was not available, he would go through Mr. Peacock and, you know, continue on up the chain.

MR. SCHAEFFER: As the tactical operations manager at Herndon Command Center, did you have

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

any--counterpart within a WOC or within headquarters here?

MS. SCHUESSLER: No, did not.

MR. AZZARELLO: Want to focus now actually on pre 9-11 procedures and protocol. What was your understanding of the procedures and protocol in place for a highjacking pre-911, both in a macro sense and as a role if any that the Command Center had?

MS. SCHUESSLER: Pre-911, we did have procedures in place for a specific transponder code to be squawked, and I think you've probably also seen documentation as far as the--if it needed to be relayed covertly, you know, to use the word trip. Also included in that directive was procedures to have--also send a message to air traffic controllers if necessary.

And pre-911 I think the indication that when an aircraft was hijacked, that the people that commanded the aircraft would be to take it some place and land it safely. So most of the procedures were geared for that type of handling of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the aircraft in a hijack situation.

MR. AZZARELLO: Take us through the procedures. Take us through, let's say, pre-9-11 from a control level. Let's work with the scenario where a controller that is screened, and he has reason to believe for whatever he observes or she observes, they believe they have a hijack on their hands.

MS. SCHUESSLER: Okay.

MR. AZZARELLO: Now take us through how that gets from the controller to the upper executive management decision.

MS. SCHUESSLER: Okay. Specifically since my background is a Center controller, if I was a Center controller working and I observed 7500 on the radar screen, certainly I would try and alert the supervisor to come work with me, but I would also be talking to the pilot to confirm that they meant to squawk 7500. And there our procedures in place if they do not respond, or if they respond, you know, covertly with their call sign and use--behind it rather than confirm, yes, we're

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

squawking 7500, then we would take appropriate action. And in this particular case, that appropriate action would be the supervisor would notify the operations manager at the time.

MR. AZZARELLO: That's the--position?

MS. SCHUESSLER: Right, right.

MR. AZZARELLO: Okay.

MS. SCHUESSLER: And then the operations manager would inform in the region the Regional Operations Center, and then they would inform headquarters.

MR. AZZARELLO: So it goes from the facility OMEC to the region?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: And when the OMEC notifies the region, is he calling like a 24--an equivalent of a ROC, like a 24/7 ops--

MS. SCHUESSLER: Correct. That's exactly what it is. And concurrently, you know, they would be also notifying their management chain. You know, they would be notifying--you know, we've done some realignment since September 11th, but at the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

time, they would've also been notifying their superiors in the Air Traffic divisions in the regions as well as notifying the ROC.

MR. AZZARELLO: You need to help us with this, this terminology. The ROC. That would be the operational center?

MS. SCHUESSLER: Yeah, Regional Operations Center.

MR. AZZARELLO: That's the ROC, and that's like equivalent analysis to the WOC?

MS. SCHUESSLER: Exactly, exactly. So you've got nine regions and so you've got nine ROCs. And they're a 24/7 facility, and they're responsible for gathering this type of information, and they would forward it to the the headquarters operations center.

MR. AZZARELLO: So it would go from the ROC then to the WOC.

MS. SCHUESSLER: Correct.

MR. AZZARELLO: So the ROC would notify the WOC of a hijack.

MS. SCHUESSLER: Right. And, of course,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I'm not the expert piece here. You would have to also find out people that worked the ROC, what other notifications did they make, but I do know they notified the WOC. So headquarters personnel are cognizant of the situation.

MR. AZZARELLO: Do the ROC's have their own written protocol for informing hijacks that you're aware?

MS. SCHUESSLER: I don't know. You'd have to find out from them.

MR. AZZARELLO: From a ROC facility.

MS. SCHUESSLER: Yes.

MR. AZZARELLO: Okay. We've seen documentation at a controller level on the FAA orders and the protocol--followed. I think it's the--

MR. SCHAEFFER: On the WOC, do they simultaneously inform the Command Center?

MS. SCHUESSLER: Pre-911, there was not I don't believe a process in place. Typically what would happen would be the Command Center would be notified by the facility. But again the Command

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Center pre-911 didn't really have a role to play in hijack situations per se because the WOC would be notified, and at the headquarters level, we had a hijack coordinator who at that point would work through the hijack situation. And they would be the individual responsible for notifying DOD components of the situation and ask for an escort if that would be necessary.

MR. SCHAEFFER: Is that normally because the Command Center then has to continue squawking with the facility, the effected facility--

MS. SCHUESSLER: Probably.

MR. SCHAEFFER: --get that information to the Command Center.

MS. SCHUESSLER: Correct.

MR. AZZARELLO: So the Command Center will become aware of it because they have this sort of interaction with the field facilities.

MS. SCHUESSLER: Exactly.

MR. AZZARELLO: We're looking at this part of--

MS. SCHUESSLER: Some of the thought

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

process there is the Command Center is responsible for, you know, the flow of traffic through the net, so this could be a disruption in the traffic. Therefore, it would be a natural inclination to notify the Command Center.

MR. AZZARELLO: For example, you're saying in a traditional hijacking scenario for commercial aircraft hijacking, I'm going to take it all through, say, from--they're supposed to go to Boston. They're going to take it to Cuba, you'd have to coordinate, you're saying, other aircraft and keep it clear and that will be to a Command Center.

MS. SCHUESSLER: Sure. Well, the local facility would do that, but it would also have an impact, you know, because just because you're moving one aircraft or two aircrafts, you would have an impact on the flow of the net to the Command Center and would become cognizant of it, and if necessary, take some national initiatives.

MR. AZZARELLO: Reference the controllers' guidance for a hijack procedure, would that be part

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of the 7210.3 where it talks about air piracy?

MS. SCHUESSLER: It would probably be both in the .3 and also the .65, and we also had a long-standing order how to handle hijack procedures.

MR. AZZARELLO: Looking now at 7110.65 and Section 10-2-6, Hijacked Aircraft. In reading that, I highlighted here in yellow. It says, "Notify supervisory personnel of the situation." So that would have applied, correct--is that what you're referenced earlier--you're the controller. You see this hijacked squawk code--

MS. SCHUESSLER: Correct. One of the first things you do is try, you know, and bring your supervisor--make your supervisor aware of the situation. As you are handling the situation, the supervisor can ascertain as well, you know, whether you need any other assistance.

MR. AZZARELLO: Help us with understanding on the basis for the understanding that goes then from the supervisor to the OMEC, and how do we get from the OMEC at the field facility to the ROC and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the WOC. We've heard that described before as the understood protocol. Is that understood just as a matter of practice, or is that whole chain of notification also in a document somewhere because we haven't seen any document that says well, the supervisor then has the obligation to notify the ROC and then the ROC notifies the WOC?

MS. SCHUESSLER: Well, I'd have to look and see in the .3, but certainly it is common practice if it is not documented in most of the FOP's and at operational quarters that the Operations manager, when they have significant events, then I believe it's documented in the .3. I would have to find it. Any significant event would be forwarded to the WOC.

MR. AZZARELLO: So you think it would be in this same 7110 or the 72--

MS. SCHUESSLER: I think it's probably in the .3 that indicates that you would forward any--

MR. SCHAEFFER: I got--instead of .3--what is it John?

MR. AZZARELLO: 7210.3--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: 7210.3, I believe is probably procedures outlined in there that give guidance to facilities when they need to elevate a significant event.

MR. AZZARELLO: So that should have some written guidance or protocol for Centers' obligations to notify their superior in the event of a hijack?

MS. SCHUESSLER: I think so, yes.

MR. AZZARELLO: I guess it would be a Center or any field facility including Tracon.

MS. SCHUESSLER: But typically Tracon's route that information through the Center.

MR. AZZARELLO: How about after--we've been told at the Center levels--I think Miles, we were at one Center visit where you saw a sort of a book like this, a binder, the Center had with I guess their procedures and their protocol in it. Would that be protocol for hijackings? Are they required to be kept at the Centers too, like sort of on-hand, or is that something that doesn't have to be kept, just either kept or understood? Let me

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

just back off and ask you this. Those procedures to the extent they're in 7210.3, would they be uniform in terms of--

MS. SCHUESSLER: Yes.

MR. AZZARELLO: Okay. So it wouldn't be that the Centers had--different Centers would have different protocol then?

MS. SCHUESSLER: No, they should not--you know, the 72.3 is national direction and guidance to all the facilities.

MR. AZZARELLO: It should be uniform guidance.

MS. SCHUESSLER: Correct.

MR. BROWN: John, this is the name of the manual that you're referring to.

MR. AZZARELLO: The Facility Operation--Manual?

MR. BROWN: Right.

MR. AZZARELLO: What's the number on that?

MS. SCHUESSLER: 7210.3.

MR. AZZARELLO: The section that I had--the part that I had showed you was .3R. Is

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that just one of the chapters within the--is that the relevant chapter or--

MS. SCHUESSLER: Well, when you say R without looking at the title--because throughout the year, we do revisions and updates to the handbook, and usually at the very front of each handbook, it tells you when the revisions are. And until a new handbook is put in place, they will put letters behind it. So that's revision R.

MR. AZZARELLO: Oh, and then at--

MS. SCHUESSLER: If that's what it is.

MR. AZZARELLO: And then a subsequent revision might be .3S?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Okay.

MS. SCHUESSLER: .3S.

MR. AZZARELLO: .3S.

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Now you sort of outlined the procedures only up to the WOC in the event of a hijack pre-9-11. And our understanding is the Command Center didn't have a defined role other

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

than obviously being affected by the flow of traffic. Is that accurate?

MS. SCHUESSLER: That's accurate.

MR. AZZARELLO: Would one of the Command Center stood up for operations--

MS. SCHUESSLER: The Command Center that you visited has been in operation for 10 years. There was a smaller version of what we used to call flow control in headquarters, and I don't know the exact standup date of that particular facility.

MR. AZZARELLO: But the new one that we were at at Herndon, 1994 that opened?

MS. SCHUESSLER: 10 years, yeah. They just celebrated their 10th year anniversary.

MR. AZZARELLO: And prior to that, there was a smaller version?

MS. SCHUESSLER: Yeah, there was a smaller version here in headquarters.

MR. AZZARELLO: And how long was that at headquarters?

MS. SCHUESSLER: Oh, I don't know. You'd have to validate that with someone else.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Do you know if the hijack protocols that are spelled out in the 7610.4 is the special military operations, escort of hijacked escort? Do you know if that was drafted before or after the new Command Center was opened in '94?

MS. SCHUESSLER: Oh, gosh, I wouldn't know.

MR. AZZARELLO: Okay.

MS. SCHUESSLER: Yeah, wouldn't know.

MR. AZZARELLO: I'll leave this out, though, because you mentioned the hijack coordinator pre-9-11. Is this the chapter of the FAA orders, Order 7610.4, special military operations, that lays out and defines the role of a hijack coordinator?

MS. SCHUESSLER: Yeah, but I can't tell from this whether this was pre-9-11, post-9-11. I don't have the date on here, but just looking at it, outlines what we have talked about pre-11, pre-September 11th is far as the hijack coordinator. "The escort service will be requested by the FAA hijack coordinator by direct contact

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

with the National Military Command Center."

MR. SCHAEFFER: And then for the 7610.4 as it existed on 9-11, those are--the legacy of those regulations are kept in tact, right? You'd be able to get that if it existed.

MS. SCHUESSLER: Right. Yes, we should.

MR. AZZARELLO: I think our understanding is that this was provided to us as the one that was in existence on 9-11. Is there any way we can verify that?

MS. SCHUESSLER: Oh, we can. You know, I just don't see dates--you know, aviation--yeah, you can see the directive and the date. This is a different directive than the 7610.4. And I don't see any dates on here. That's the reason I'm saying I'm not sure exactly whether this is pre or post September 11th.

MR. AZZARELLO: So these generally don't have a date on them. Do you know what the mechanism would be for instance?

MS. SCHUESSLER: That I don't know. We'd have to look and see whether they were just

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

inadvertently--

MR. SCHAEFFER: --that's after 7, so it would probably be up front maybe on the whole thing--

MS. SCHUESSLER: Well, it certainly would be on the cover, but you don't have the cover here. But some of these other directives have it up at the top.

MR. AZZARELLO: If we maybe at the conclusion of our meeting today--of our interview, if I can get a copy of this to you and maybe you can confirm for us then whether or not that was the one in place on 9-11?

MS. SCHUESSLER: Yes, we can do that.

MR. KARA: On my copy, which we pulled off the Internet and this states the date we pulled it off the Internet, but at the end of the URL, it says 07-01. Would that be July, '01 perhaps?

MS. SCHUESSLER: Maybe. I don't know. We can go back and validate that.

MR. AZZARELLO: So your understanding then of the role of the hijack coordinator, is that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

someone--is that a position held at headquarters?

MS. SCHUESSLER: Correct. Someone that is head of the Security organization.

MR. AZZARELLO: And what in your words is the description of that person's role as it affects enlisting the assistance of the military in the event of a hijack?

MS. SCHUESSLER: Well, you know, again looking at that documentation, and I believe this was probably--if not the document that was in effect, it was very, very similar. And that is that individual would be the coordinating individual to work with DOD, you know, to ascertain what actions need to be taken, and certainly if we needed escort assistance, that they would make that request.

MR. AZZARELLO: So the coordinator would work with DOD to coordinate a military response?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: On 9-11, what was your understanding as to who the hijack coordinator was at headquarters?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: I don't know who that was. And of course again from my role in the Command Center, nor would I know who that was at the time, you know, because I was going through the Air Traffic chain, management chain rather than working directly with that individual.

MR. SCHAEFFER: I'm not sure I understand it. I don't think we've seen it in terms of laying out--in terms of a traditional pre-9-11 hijacking. And the role of the Command Center there, you mentioned that you didn't think there was any like--protocol for the ROC to notify the Command Center, but the Command Center would likely get awareness of that because of the time at the facilities, but the WOC, definitely there was protocol to notify the WOC. Once that notification, you have to deal with the hijacking, what role then did the Command Center play in, say, the aircraft that's going to land at a given airport asked and things like that. Was that--anywhere in terms of the Command Center's role once you have to deal with a hijack scenario?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Well, you will find in all our directives that it talks about making decisions and on best information that you have got. So there probably, to my knowledge, there was not any documentation that said in a hijack situation the Command Center shall do bump, bump, bump, bump. So what we do is make our best judgement call. So typically the Command Center's role is to monitor the flow of traffic in the national air space. So the example that you used, John, if you say you've got an aircraft at Boston that a request is made that we're now going to Cuba. Certainly the local facilities would work through because they're talking to the pilots right there and make sure that the pilots are out of the way. But from a Command Center perspective, they would also be involved in working with the local facilities to see what we needed to do with the national flow of traffic. So we would keep all that traffic out of the way. But from a tactical perspective, the field facilities are talking to the pilots and moving the aircraft.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. SCHAEFFER: And then when there's a tactical operations manager in that scenario that we're talking about that wanted to go to Cuba, does that individual assume a role of connectivity between the WOC or headquarters here to take direction? I'm assuming that headquarters is not going to direct the facilities that they've got to go through the conduit of the Command Center. So who within the Command Center becomes the--I assume it's a tactical operations chain.

MS. SCHUESSLER: Well, it would either be the tactical operations manager or the NOM on duty, the National Operations manager, you know. As far as protocol, what would be set up, you know, you would have various telecons set up to provide the direction and guidance from headquarters. So we would probably have, you know, either Bill Peacock or Jeff Griffith on the phone talking to the Command Centers saying these are the decisions that we're making, and therefore we need to do whatever actions we need to take. And we'd be working that in concert with headquarters and the Command Center

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and then taking the appropriate actions with the local facilities.

MR. AZZARELLO: On the hijack coordinator on 9-11, you said you did not know who it was then, and I guess you say in your position, it wouldn't be someone then you'd be required to know?

MS. SCHUESSLER: No, not really because we'd be working it through the Air Traffic chain.

MR. AZZARELLO: Just asking you to do me a favor and take a look at the document and understanding the titles and the hierarchy of FAA headquarters. Could you tell me by reading first the introduction what position, what office that the FAA hijack coordinator is defined as? As what office or what person would hold that position?

MS. SCHUESSLER: Well, again, I believe it to be in the--the designate in the FAA Office of Civil Aviation Security.

MR. AZZARELLO: Okay, so ACS would be the office.

MS. SCHUESSLER: Correct.

MR. AZZARELLO: And, Miles, do you have

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

your chart?

MR. KARA: Yes.

MR. AZZARELLO: Would that be the associate administrator's office in Civil Aviation Security?

MS. SCHUESSLER: Yes, and again, I know they've also done some restructuring since September 11th.

MR. AZZARELLO: Would the associate administrator for ACS would that be the equivalent of a director?

MS. SCHUESSLER: You'd have to ask them. I don't know.

MR. AZZARELLO: Ask who?

MS. SCHUESSLER: Well, I would start with Lynne Osmus. She is now the associate administrator for Security. So she would have that background and knowledge.

MR. AZZARELLO: So you're reading on this would be someone in the Associate Administrator's office for Civil Aviation Security that would be deemed the hijack coordinator as defined here.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Okay, and in the manual,
7610.4.

MS. SCHUESSLER: Yes.

MR. AZZARELLO: Did you have an
understanding on 9-11 or prior to 9-11 the
relationship of the Office of Civil Aviation
Security intelligence and operations levels?

MS. SCHUESSLER: Yes.

MR. AZZARELLO: Did you know who held the
highest position in those offices on 9-11, ACI1 and
ACL1?

MS. SCHUESSLER: Probably not.

MR. AZZARELLO: Okay. What about Lee
Longmeyer? Did you know Lee Longmeyer?

MS. SCHUESSLER: Well, I knew of him and,
you know, several other names, but I couldn't--I'm
not sure on September 11th or even before or
shortly thereafter I could've told you the names of
the individuals because that was not--those were
not the people that I typically would interact
with.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Who would you most frequently interact with in headquarters?

MS. SCHUESSLER: Well, again, you know most of my interaction would be with the Air Traffic world, so at the associate administrator level, if you look at this organizational chart, peer to peer you're looking at Peter Challen and Steve Brown being the peer of the associate administrator up here. So those two individuals would have perhaps daily or routine contact.

MR. AZZARELLO: And who would you have routine contact with in Air Traffic and Air Traffic Services?

MS. SCHUESSLER: Again Bill Peacock and Jeff Griffith.

MR. AZZARELLO: That would be your most frequent points of contact in Air Traffic.

MS. SCHUESSLER: Correct.

MR. AZZARELLO: How about do you have an understanding--did you pre-9-11, Linda, as to where headquarters in the event of a hijacking pre-9-11, where would headquarters look to to gain the best

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

realtime situational awareness of the air traffic situation as it affected the hijacking?

MS. SCHUESSLER: From a headquarters perspective, you know, when the administrator would become involved in this type of a situation, they would turn to the Air Traffic Services organization. And then subsequent to that, it would roll down to Air Traffic Service, again Bill Peacock and Jeff Griffith. They would reach out to the appropriate facility. It may be the Command Center in some cases. It may be a local facility in others.

MR. AZZARELLO: So it would depend on the situation as to where they reached out to in the field to get realtime situational awareness?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: And were you to come from a field facility or you said a Command Center could be too?

MS. SCHUESSLER: Yeah.

MR. AZZARELLO: How about prior to 9-11, your knowledge of hijack training as it existed?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Let's start at a field facility level, at a Center, and Tracon level. Did you have any understanding as to the nature of the training that was implemented at all at the field facility levels for hijacks pre-9-11?

MS. SCHUESSLER: Well, I think most facilities routinely what we call refresher training would include hijack procedures in the refresher training.

MR. AZZARELLO: What type of training would that be?

MS. SCHUESSLER: Refresher training, we have several different types of training we call refresher training. Those procedures that just need to be reviewed periodically.

MR. AZZARELLO: So is that--that training is you have to review the written materials of the protocol as it affected among other things--

MS. SCHUESSLER: Well, I think each facility tailored it to what might be appropriate. It might be that you reviewed the written documentation. It might be classroom style. It

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

might be computer-based instruction. Whatever they deemed appropriate for that particular facility.

MR. AZZARELLO: So--cover the gamut of training mechanisms. You have basically just--one method would be to review the protocol in place, and I guess what would happen? Would they have to sign off that they reviewed the appropriate protocol?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Then you mentioned I think there would be classroom training?

MS. SCHUESSLER: It would be classroom training. There could be team training where, you know, a supervisor with a group of controllers that he or she is responsible for might review various documents.

MR. AZZARELLO: And you mentioned computer training. Would that be equivalent to what people refer to as dynamic simulated computer dysam?

MS. SCHUESSLER: It could be dysam, but, no, what I was speaking to more so was a PC-based, computer-based instruction. CBI is what we call

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it.

MR. AZZARELLO: CBI?

MS. SCHUESSLER: Yes.

MR. AZZARELLO: How does that work? Can you give us sort of an example?

MS. SCHUESSLER: You have lesson plans that a controller can go in and sign in and take a lesson off a computer, answer questions, get positive, negative re-enforcement depending on the answers that they give.

MR. AZZARELLO: Such as posing questions to you, or is it--

MS. SCHUESSLER: Oh, it can be posed a question and let's say you get the answer wrong, and they come back and say, no, that's not correct. Here's the answer and here this is why the answer is correct for instance.

MR. AZZARELLO: How about prior to 9-11, do you know if the facilities also had training whereby a controller would sit at a computer and simulate a hijack? And specifically I mean they're looking at a computer screen with squawking

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

transponding aircraft in their assigned space, and then all of a sudden, let's say, one squawked 7500.

MS. SCHUESSLER: It's possible, but I don't know for sure.

MR. AZZARELLO: How about when you were in Atlanta in the in-route Center? What types of training did you participate in or have knowledge of then at the Center level when you were in Atlanta?

MS. SCHUESSLER: Just as I spoke of, you know, various types that we just mentioned.

MR. AZZARELLO: Did they have at that--in Atlanta, did they have a computer dynamic simulator in its areas where a controller goes sits at the computer as if--at a radar screen like a real-life--

MS. SCHUESSLER: Yes, yes.

MR. AZZARELLO: Did any of that training--was there any hijack training pre-9-11 that occurred at the Command Center when you were there?

MS. SCHUESSLER: I don't remember. We'd

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

have to go back and check any records.

MR. SCHAEFFER: Do you recall that being a part of the regular training? Do you have a regular training program?

MS. SCHUESSLER: There is a regular training program out there and, you know, that training would be documented, but I couldn't tell you whether that was part of the training or not.

MR. AZZARELLO: You don't recall one way or the other whether hijacking was a scenario training at the Command Center?

MS. SCHUESSLER: Oh, it wasn't a scenario that was training because that at the Command Center, you do not have the radar screens like you would at the in-route facilities to do the simulation that you just mentioned.

MR. AZZARELLO: Okay, well, do you recall one way or another whether it was trained in a sense of okay, here's a report of a hijack and it's coming from Cleveland Center and it's come into Command Center. Okay, now, let's follow that through. What's the role of the Command Center?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: That type of training I don't believe was conducted, but you would have to validate that.

MR. AZZARELLO: And we can validate that through you say records of part of training--

MS. SCHUESSLER: You could go back and check training records.

MR. AZZARELLO: I don't believe I'd ask for those or have those. Is that something when we conclude here you'd help us follow up on?

MS. SCHUESSLER: Yes.

MR. KARA: I've got a training control question, Linda. I'm sensing that the Air Traffic managers at the in-route centers do not report to the Command Center. They're not direct reports.

MS. SCHUESSLER: That is correct.

MR. KARA: Who is their direct report.

MS. SCHUESSLER: Their direct report, again we restructured, but what we call our assistant division managers, the 501's, and they report through them to the division manager, the 500's. And so then they would report, the 500's in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the field, would report to Jeff Griffith-

MR. KARA: Jeff Griffith.

MS. SCHUESSLER: --and Bill Peacock.

MR. AZZARELLO: That's a good point, Miles. Let's just follow that. Let's go back to earlier when we said there would be a hijack, let's say, at a Center level. And I think you mentioned, Linda, that one of the things he would call the ROC.

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Then you also said something about they probably also call Air Managers. Let's say I was an Air Traffic manager at New York. I'm Mike McCormick, and I have a report of a hijacking, and I tell the ROC. Who would be my Air Traffic superior at the region?

MS. SCHUESSLER: In his particular case, it would be Eastern 501, the assistant division manager.

MR. AZZARELLO: That's 501, the position at the--

MS. SCHUESSLER: It used to be. I mean

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

all that's been changed now.

MR. KARA: But we're dealing with 9-11--

MS. SCHUESSLER: Correct, correct.

MR. KARA: (Inaudible).

MS. SCHUESSLER: Right.

MR. SCHAEFFER: So the 501 is at the ROC level?

MS. SCHUESSLER: No, the ROC level is actually a position that is in the regional office, and they're in a different line than Air Traffic.

MR. SCHAEFFER: Okay.

MR. AZZARELLO: So if we say ZNY, he would report to--the Air Traffic manager would report to AEA 501.

MS. SCHUESSLER: Right, and then 501 reports to AEA 500.

MR. AZZARELLO: Okay, AEA 501 reports to--was Rick Deshaun, was he the 501 in New York, do you know?

MS. SCHUESSLER: Oh, I don't know.

MR. AZZARELLO: Okay.

MR. KARA: And then they would report to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Griffith.

MS. SCHUESSLER: Correct.

MR. KARA: And you had the same reporting channel out at CC.

MS. SCHUESSLER: Correct.

MR. KARA: So in general terms as I look at it from the outside in, the Command Center is equivalent to an in-route center in terms of management structure.

MS. SCHUESSLER: Correct. With the exception--it's equivalent, but again the Command Center has 51 percent of the vote if you needed to--

MR. KARA: You got the trump card.

MS. SCHUESSLER: --to do tactical traffic management type issues.

MR. AZZARELLO: Frank Hatfield held our position in the Eastern region.

MS. SCHUESSLER: I think you're right.

MR. AZZARELLO: If he was the manager of the region, and that would be AEA 500.

MS. SCHUESSLER: Correct.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay.

MS. SCHUESSLER: Correct. And, you know, going back to the Command Center training on hijack, remember the Command Center really didn't have a role to play in hijack situations other than to be able to effectively manage the flow of traffic. So whether or not they got trained on hijack procedures, I tend to think not, but I don't know that. There was no reason for them to be trained other than the fact we need to be responsive to moving the flow of traffic if that became necessary.

MR. AZZARELLO: They, you mean the employees at the Command Center?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: What about at FAA--

MS. SCHUESSLER: Because they don't talk to pilots.

MR. AZZARELLO: Basically they speak to the Center people?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Or the Tracon people.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Or the tower people.

MS. SCHUESSLER: Yeah.

MR. AZZARELLO: We can cover it all. What about at FAA headquarters? Do you know if pre-9-11 if they had any, if you're aware, did they have any hijack training and drills here where you have to, you know, the WOC gets a call. You got to stand up the crisis center?

MS. SCHUESSLER: Yeah, that I don't know.

MR. AZZARELLO: You're unaware?

MS. SCHUESSLER: Yes, I don't know.

MR. AZZARELLO: And who would be, if you know, in your view would be the person that we should direct those type inquiries to here?

MS. SCHUESSLER: Well, again you might start with Lynne Osmus from the Security organization. But at the time, I know that the WOC did not report to her, and I don't know who it reported to.

MR. AZZARELLO: So we should check with ACS people. That would be I think ACS1 was Mike

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Canervan and Lynne Osmus from ACS2 on 9-11? Does that ring a bell?

MS. SCHUESSLER: Yes.

MR. SCHAEFFER: Do you know if the headquarters WOC had a training program?

MS. SCHUESSLER: That I don't know. Yeah, don't know.

MR. AZZARELLO: Well, I guess we might not know that generally, but what about specifically. As best you can recall, in your time at the Command Center, did the Command Center participate in a hi-jack training exercise with headquarters?

MS. SCHUESSLER: Not to my knowledge, but again, you know, if you look at protocol, it wouldn't necessarily mean that we would be involved from a Command Center perspective. It might have been that they played out the roles and responsibilities here at headquarters, you know, without any involvement from the Command Center.

MR. AZZARELLO: When actually I'm not implying that they should have training at the Command Center. And maybe the answer is they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

didn't because it wasn't seen as necessary, given what the protocol was for responding to a hijacking. But I guess just asking for your independent recollection, understanding we have to confirm it with the training records. Is your independent recollection that the Command Center while you were there never participated in a hijack training exercise--headquarters?

MS. SCHUESSLER: With headquarters, I don't remember that occurring, no.

MR. SCHAEFFER: Would the Command Center have been notified that headquarters was participating in training with the facility? Would they be notified of something like that on a regular basis?

MS. SCHUESSLER: I wouldn't say yes or no. I would say not necessarily.

MR. AZZARELLO: I guess before we get to the day of, maybe one or two preliminaries and pre-9-11 protocols and procedures, what if there was--let's start with an action, if there was an aircraft action pre-9-11. Would that be something

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that Command Center would be tasked to perform a role in in the event of an accident?

MS. SCHUESSLER: Not per se, other than to be involved again in the flow of traffic. It might be, you know, you have an accident. Typically what would happen is a particular airport, for instance, the local facility would, you know, talk to the Command Center and between the two facilities, we'd make sure that we either cleared aircraft in the vicinity or ground-stopped aircraft coming into the facility and got that word out to city aviation community. If it was more widespread than that, more actions were necessary, the Command Center would initiate those traffic management initiatives.

MR. AZZARELLO: And as far as the division responsible for investigating an accident, that would be at headquarters.

MS. SCHUESSLER: Correct.

MR. AZZARELLO: What did they--

MS. SCHUESSLER: At the time, it was AAT20.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: AAT20?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Do you know who held that office?

MS. SCHUESSLER: Yes. That was Dave Kenols at the time.

MR. SCHAEFFER: That's the Evaluation Investigation staff?

MS. SCHUESSLER: Correct.

MR. SCHAEFFER: And after 9-11, you went from the Tactical Operations manager at the Command Center since 9-11 to where you are today have been where?

MS. SCHUESSLER: After the Command Center, I also held the job that you just talked about, AAT20.

MR. SCHAEFFER: And when did you go to AAT20?

MS. SCHUESSLER: I would say it was probably--and this is real wild guess here--I'm thinking it was probably somewhere in the summer of 2002 maybe.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: How long--

MR. SCHAEFFER: The year 2002, not in--

MS. SCHUESSLER: Well, I'm thinking it's
May time frame, 2002.

MR. SCHAEFFER: Okay. How long did you
hold that position?

MS. SCHUESSLER: Let's see. In
November--kind of getting my dates here--in
November. And I'm trying to remember whether it
was 2002. Yes, it had to be. In November of 2002,
I was detailed to the deputy director for Air
Traffic when Jeff Griffith retired. Held that
position for four months. Returned back to AAT20
until I was selected for the deputy director for
Air Traffic Services permanently, and I'm thinking
that was April-May time frame of '03.

MR. AZZARELLO: So you returned to AAT20
until roughly May of '03?

MS. SCHUESSLER: I think so.

MR. AZZARELLO: And that's when you were
appointed a perm position?

MS. SCHUESSLER: Yes, but again we've

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

undergone a realignment, so in February of this year, my title now is vice president for System Operations.

MR. AZZARELLO: In May of '03, what was your title again?

MS. SCHUESSLER: May of '03, let's see. We went from--what did I just give you?

MR. AZZARELLO: When you left, you went back to AAT20--

MR. SCHAEFFER: VP, Systems Operations Services is current.

MS. SCHUESSLER: Right. One prior to, okay. The deputy director for Air Traffic Services.

MR. SCHAEFFER: Same position.

MS. SCHUESSLER: As current?

MR. SCHAEFFER: No, I mean did they just change the name?

MS. SCHUESSLER: No.

MR. AZZARELLO: So I take it that the AT20 is the deputy director of--

MS. SCHUESSLER: AAT2.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Oh, AAT2, that would be the director for Air Traffic Services?

MS. SCHUESSLER: Right.

MR. AZZARELLO: Is that equivalent to the position that Griffith held?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: So you were acting for four months and then you went back to AAT20, and then came back as the--

MS. SCHUESSLER: Permanently--

MR. AZZARELLO: Permanent--okay. If there is a--if there was an error in separation of the Center or facility level, would that be something at headquarters and Command Center would get involved in?

MS. SCHUESSLER: Command Center would not get involved in that. It would be handled at the local facility level through the regional office to AAT20.

MR. AZZARELLO: So that would fall under Kenols pre-9-11.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Can you tell us a little bit about the aircraft tracking capabilities at Command Center, the TS--system, traffic situational display? What's your understanding of the nature of that information, the ability? Could you describe to us how one at the Command Center is able to track aircraft if at all through that system?

MS. SCHUESSLER: Well, the Command Center is really not tracking aircraft per se, you know. What you have out at the Command Center is a radar feed from the host data, and again, you're better off talking to an automation specialist rather than myself. But out at the Command Center, that is more for reference rather than certainly for any type of separation use.

MR. AZZARELLO: It's certainly not for radar, right?

MS. SCHUESSLER: No, that's correct.

MR. AZZARELLO: Who would be, if you would direct us to the guru of the understanding? Who

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

would that be?

MS. SCHUESSLER: Tim Grovak.

MR. AZZARELLO: Tim Grovak?

MS. SCHUESSLER: Yes.

MR. AZZARELLO: Anybody have any pre-9-11 questions? Let's go to the day of.

MS. SCHUESSLER: Okay.

MR. SCHAEFFER: Do you need a break or anything? Are you okay?

MR. AZZARELLO: Want to take a break or anything?

MS. SCHUESSLER: I'm fine.

MR. SCHAEFFER: Okay.

MR. AZZARELLO: Want to go to the day of 9-11, and I guess before we get into of where you were and--

MR. KARA: Excuse me. We can use my chart.

MS. SCHUESSLER: Okay.

MR. AZZARELLO: These is just a chart with some names we were able to fill in with the assistance of some of the people who were on duty

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that day on 9-11 at Command Center. We understand that Severe Weather positions. There were numerous of those positions that are up front in the Command Center as you're facing the screens that are on the front wall. And then behind them, we have a position 14 we understand is a New York Center position. To the right of that, 15 was a Boston and Cleveland position, and then 16 to the right of that is a Atlanta, Jacksonville and--

MR. KARA: Miami.

MR. AZZARELLO: Miami. And 25 behind me we understand was Indy Center and D.C. Center. And to the right of that at 26 we understand was the MTMO position. Is that accurate understanding?

MS. SCHUESSLER: If it's not completely accurate, it's very, very close.

MR. AZZARELLO: Was there anything there that doesn't sound right?

MS. SCHUESSLER: No, no, I mean it sounds very accurate.

MR. AZZARELLO: And then the 34 position we understand is a NOM. I think we--got from

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Command Center. Yeah, they did find it. 34 would be NOM. 14, New York. So we're just going to leave that up as sort of a reference if we ask you to reference to the day if you were on the floor at a particular point or conversing with somebody. We'll just ask you to reference that on the diagram.

MS. SCHUESSLER: Okay.

MR. AZZARELLO: Why don't you just start out if you could, Linda, by telling us when you came to work that day, when your shift started, and then when you first became aware that there was a problem with the national air space system regarding a potential hijack and how you became aware of it?

MS. SCHUESSLER: Okay. Typically my day would start, I don't know 6:15, 6:30 when I reported to work, and I'd go, you know, put things in my office, and then I would go out to the operational quarters, talk to the NOM on duty. Typically it was someone left over from the mid-ship so I could see how the night went. And I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was also either there when the day shift NOM showed up, so I heard the position relief briefing so I could, you know, get a feel for what the day was going to present, or I would ask the mid-shift person if the day shift person was not there, I needed to go back to my office. You know, I would maybe talk to a few people.

I'd go back to my office. I would review the previous day's log, and I think we've talked about this before. You know, one of the things that we would do on a routine basis is review the previous day. So I'd go back to my office, review the data and then we would have our staff meeting at 8:30.

MR. AZZARELLO: Your staff meeting at 8:30 was to review the previous day's with the staff?

MS. SCHUESSLER: Yeah, with the staff, you know, but prior to that, you know, I would look at the logs so I could either be prepared to say well, how did this happen, or I think this was a good idea.

MR. AZZARELLO: Is that a daily meeting?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Oh, yes. It's a daily meeting.

MR. KARA: And as the facility manager, you led those meetings as opposed to John, or did you--

MS. SCHUESSLER: Yeah, I led the meeting.

MR. KARA: You led the meeting?

MS. SCHUESSLER: And so at 8:30 we would meet. And on that particular day, what I remember that day, it was a day like today. I mean it was gorgeous. It was beautiful, and so a few minutes before 8:30 is where we're gathering to sit down and talk about the previous day's events. Ben Fliney was the NOM--

MR. SCHAEFFER: Ben was the NOM?

MS. SCHUESSLER: Ben was the NOM.

MR. AZZARELLO: You mentioned before mid-shifts and night shifts. How did the NOM's shifts run? How many shifts in a 24-hour period?

MS. SCHUESSLER: Well, there's typically three, and usually the mid-shift NOM would be--it would not be a NOM, a permanent NOM. It would be

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

one of the first line supervisors, one of the NTMO's that would be working the mid-shift.

MR. AZZARELLO: When does the mid-shift go? From when to when?

MS. SCHUESSLER: You'd have to ask them, but, you know, it could be anywhere from, you know, 10 to 6 or 11 to 7, you know, those type shifts.

MR. AZZARELLO: Be overnight?

MS. SCHUESSLER: It'd be the overnight shift.

MR. AZZARELLO: 3 to midnight.

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Okay.

MS. SCHUESSLER: Correct. So I would come in in the morning and, you know, before they got off duty and ask them, you know, how was the evening shift, how was the mid-shift, what do we anticipate occurring for the day.

MR. AZZARELLO: So Ben would have been sort of just starting his shift too that morning.

MS. SCHUESSLER: Right.

MR. AZZARELLO: So that meeting starts

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

roughly at 8:30 and then--so when you go in that meeting, do you have any knowledge going into that meeting that there's any problem with a hijacked aircraft?

MS. SCHUESSLER: No, and that's what I was getting ready to say. If you remember since you've been out to the Command Center, the meeting room that we usually met in was the EOR, which is right out here, remember?

MR. AZZARELLO: Is that where we met yesterday?

MS. SCHUESSLER: Okay.

MR. AZZARELLO: It's a conference room?

MS. SCHUESSLER: Yes, yes, and so the staff would come in there, and typically what you would have is the NOM on duty would come in and actually report out to the previous day's events and also report what we can anticipate for the current day. So on that particular morning just as we are gathering and we're started, Ben comes in and says Linda, I'm just getting word that we may have a hijack in progress. He says I'm going back

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to the floor to monitor the situation.

MR. AZZARELLO: Would he typically then not be at the meeting when it started then?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: He would have to stay on the floor?

MS. SCHUESSLER: He went back into the operational quarters so he could monitor the situation.

MR. KARA: He was coming to the room for the meeting.

MS. SCHUESSLER: Correct.

MR. AZZARELLO: He would've participated in the meeting, but he found out about a potential hijacking and came in and reported it?

MS. SCHUESSLER: Right, and said this is what we have. And then one of the things that you will find that, you know, we do a pretty good job of sharing information on the status of what is occurring in the national air spaces. I mean that's what he was doing. He says I won't be at the meeting, you know. He didn't use those words,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

but, you know, just that word that we have a possible hijack. I'm going back to the operational quarters to monitor the situation. And that was all right because we had enough other people in the room to review the previous day, and certainly I had looked at the log as well. So we began going through the previous day's log.

MR. SCHAEFFER: In terms of if there's a hijacking, was there a general reaction within the room in terms of--Ben's got it. He's going back to look for--

MS. SCHUESSLER: Yeah, he's got it. We had certainly capable people out on the operational quarters and he was the operations manager for the day. Nothing out of the ordinary other than the fact a hijack situation certainly is something that had not occurred in a while, and it beared keeping a close eye on it.

MR. AZZARELLO: At that point, did Ben have any other amplifying information other than a potential hijack in the system?

MS. SCHUESSLER: No, that's all we knew

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

about, and that's all he shared at this point.

MR. AZZARELLO: Do you recall what you personally at that point--I mean you mentioned at that point hadn't been--I guess there hadn't been a hijack in the system in a while. In terms of the opinions that you might've formed at the point, what did you think about the potential of it being an actual hijack versus maybe not, maybe a false report?

MS. SCHUESSLER: I don't think that I really had an opinion one way or the other. You know, again we had quite capable people on the floor and they would handle it, and if there was anything that became more pertinent for me to be cognizant of, I felt quite comfortable they'd come and inform me. And in fact, that's exactly what happened.

MR. AZZARELLO: What happened?

MS. SCHUESSLER: Probably within five to 10 minutes, we had a first line supervisor. It was Tommy Pacion (sp) came into the EOR and he says, Linda, he says we've gotten word now that we have a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

possible stabbing of a flight attendant on the hijacked plane. So with that, I disbanded the staff meeting and asked everybody to report to the operational quarters to see what support we needed to give to the operation.

MR. AZZARELLO: So this Tom Pacion reported a possible stabbing of a flight attendant on the reported hijack?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Did he say where he learned that from?

MS. SCHUESSLER: I don't believe that he did, no.

MR. KARA: As--time frame, do you recall if the meeting started on time at 8:30?

MS. SCHUESSLER: I think so. Pretty close. Maybe a few minutes afterwards.

MR. AZZARELLO: Is that report of a possible stabbing of a flight attendant--did that transform from a possible hijack in your mind to an actual one?

MS. SCHUESSLER: Certainly with more

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information that was significant and, you know, on the surface, certainly it appeared to be a very serious situation.

MR. SCHAEFFER: Did you know at that time if it was American Airlines?

MS. SCHUESSLER: No.

MR. AZZARELLO: So you ended the meeting at that point?

MS. SCHUESSLER: Ended the meeting, asked everybody to report to the operational quarters.

MR. AZZARELLO: What was the next development with regard to the reported hijack?

MS. SCHUESSLER: So when we reported to the operational quarters, if you remember in the Command Center, we have large screens up front, and one of the capabilities is to put in one of the television channels. And about that time, we had gotten information that CNN was reporting a small general aviation aircraft had hit the World Trade Center. If you also remember out at the Command Center, there's also TV monitors. At some of the consoles we keep the weather channel on. We keep

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

CNN, you know, just for any developing aviation type or related situation. So we put I think the center monitor on CNN, and by that point they had already put a camera on the World Trade Center and we could see the smoke, and again they're reporting small general aviation aircraft hitting the World Trade Center.

As typical in any type of incident where you have a crash, it's very common for the local facility and the Command Center to work to move the traffic from that general area, and that's what was occurring in the New York area shortly after that happened.

MR. AZZARELLO: Was Tom Pacion the NTMO that day? Was he one of the NTMO's then?

MS. SCHUESSLER: I think he was down in Severe Weather, but you would have to validate that.

MR. AZZARELLO: I think we called him a four--three NTMO's? Is that correct on a normal--

MS. SCHUESSLER: On normal, and what I remember was I believe Tommy was down in Severe

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Weather, and you had Mike Ardist in the east area and Ken Smith in the west area.

MR. AZZARELLO: And I guess Arthur Classen was there but I guess who's training that day I think you said?

MS. SCHUESSLER: I really don't remember Arthur being part of that equation right now.

MR. AZZARELLO: Well, did they have training, say, one a week for the NTMO positions, or is that a weekly or a monthly training--

MS. SCHUESSLER: Well, there is periodic training out at the Command Center. Typically on Tuesdays is when the training would occur.

MR. AZZARELLO: So now the screen's on, the center screen's on, and they're reporting a small GA and you see, the I guess the hole on the Tracon, the smoke. What are you personally thinking--how are you processing the report of the small GA aircraft accident with the report of the hijack? Are you acquainting the--

MS. SCHUESSLER: No. Not acquainting it to it at all.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: And are you hearing anything more about the reported hijack at that time and you get back out to the floor?

MS. SCHUESSLER: Not that I can recall. What I remember next, though, was the--again with the screen up there seeing another aircraft flying close to the World Trade Center and thinking gosh, they're getting awfully close to do some sightseeing to see what's going on. And that's when it became very obvious at that point that it was a large commercial jet and obviously that one hit the World Trade Center as well.

MR. AZZARELLO: So you remember seeing the second crash carried live by CNN?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Had you heard about that the first reported hijack yet was an American Airline, or you still didn't know what company it was?

MS. SCHUESSLER: No, didn't know.

MR. AZZARELLO: And that holds true for when you saw the second crash?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Right, still didn't know.

MR. SCHAEFFER: Can you tell me again in this time frame is John on the floor as well at that time?

MS. SCHUESSLER: I believe John was on the floor, and Ellen was on the floor. Loraine Lamachka (sp) was on the floor. And again after the second aircraft, we were working with local facilities to ensure that the air space was clear so they could handle the situation at hand. I think at that point, we had issued ground stops going into New York. We were working with local facilities too. They were clearing aircraft out of that general area, you know, the transitioning traffic around that time frame. We did the same thing for Boston Center.

MR. KARA: Let me step back just a second here, Linda.

MS. SCHUESSLER: Okay.

MR. KARA: At this point, something has happened to both World Trade Centers. You have a report of a hijacking in the system. You now have

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

flushed the managers, if you will, to the operations floor. What becomes the division of labor among yourselves and then John and Ellen and the others?

MS. SCHUESSLER: Okay. At that point, what I felt we needed to do was, you know, for Ben being the NOM, he needed to help orchestrate what was going on in the operational quarters. He did not have the time nor should he have staffed the NOM position per se, so I asked Ellen if she would staff that position.

MR. AZZARELLO: Which position was this?

MS. SCHUESSLER: The NOM position. That doesn't mean that Ben wasn't the NOM because Ben was the NOM, but he was sitting at the NOM position answering the phone calls because that's where a lot of the incoming calls were coming from. I think by that period of time, a telecon had been established with Air Traffic headquarters, and they had asked for a person to be on that line full-time, and that was John White's role.

MR. AZZARELLO: So John White's role was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to communicate with headquarters?

MS. SCHUESSLER: Correct, and I think he was on the line with Jeff Griffith.

MR. KARA: Lorain?

MS. SCHUESSLER: And Lorain, I don't remember her being, other than a--oh, I know. Lorain was the shadow for John.

MR. KARA: For John White?

MS. SCHUESSLER: For John White, correct.

MR. AZZARELLO: Can you sort of elaborate a little more on the shadow?

MS. SCHUESSLER: Shadow, go-for. So if he needed information to feed headquarters, it might be Lorain going to the appropriate party to ask those pertinent questions or to feed that pertinent information to John so he could relay it to headquarters. That doesn't mean that she was the only one doing that because he was relaying information because I know I talked to him. I know Ben talked to him and some of the other NTMO's talked to him.

MR. BROWN: Can you go back to the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

watching--recall, if you can, where you were. You see the second hit. You're standing there. How soon after then are we talking about these divisions of labor working--how close would you characterize it for that point in time?

MS. SCHUESSLER: I would say it was pretty close only because I think we were all in the operational quarters, and I don't know what this signifies on your map, but that's about where I was standing.

MR. KARA: Center of the--I think the note I have there is the hub of activity.

MS. SCHUESSLER: Okay, because I was going to say that's generally speaking where I was standing, and so as we divided up the labor, you know, we tried to use some of our staff support too to be in supporting roles. If you remember about this same time, we started getting information from field facilities. As I said earlier, field facilities would notify Command Center of situations that may have an impact on the flow of traffic. And this particular case, I think we had

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

specialists in the Command Center reaching out to their responsive geographical areas that they're responsible for and asking them, because we had asked them to go out and have them report anything unusual. So at the time, pre-9-11, if an aircraft was off frequency for, you know, a few seconds, a minute or two, you know, it was worthy to keep an eye on, but it was not anything significant that you would become overly concerned with.

On that particular day, we did, or if we were to lose a radar track for a few seconds, because that happens sometimes with what we call radar stitching between sort boxes, etc., we knew it would come back. If it didn't, again we would deal with the situation. So any of those type situations we were telling the field facilities please notify us of those type of unusual events.

MR. KARA: And if I could just two points. Otherwise I'm going to lose my bubble here. Tim Goldback (sp), did Tim also have an operational role out there as part of that management structure?

MILLER REPORTING CO., INC
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: He was part of the management structure, and I can't picture Tim being there.

MR. KARA: And at this point, do you see a need, or have you established a--manager between what John White is going to hear from headquarters and what the various positions are going to hear from the field facilities themselves?

MS. SCHUESSLER: Well, not a deconflicting, but what we were doing--what I was doing was bringing the management team, you know, every few minutes because again, all these positions were staffed. The NTMO's were working with their specialists. Every few minutes I would gather the management team in the middle of the operational quarters and say, okay, what information are you hearing, what is going on, and we would try and put those pieces together. And we explored various options, so, and then I know I'm jumping ahead here, but by the time the decision was made to have all airborne aircraft land, we had already explored that option to say, well, do we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

need to do that. But we didn't think earlier that that decision was warranted with the information we had.

MR. AZZARELLO: Yeah, before we jump further ahead, actually I want to backtrack for a second to go over some other situational awareness. You see the second aircraft go in on the PD, and at the point when you saw that, had you even heard anything about a potential second hijack in the system?

MS. SCHUESSLER: No, well, as I say, no. I don't know. I don't know, but again, we're operating with the mindset that that first aircraft is a general aviation aircraft.

MR. AZZARELLO: Okay, so you--

MS. SCHUESSLER: The mindset is still there. The general aviation aircraft is the first one in--

MR. AZZARELLO: When you see the whole in the building, you're not equating it with a hijacking.

MS. SCHUESSLER: No.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: You don't think the--a small GA.

MS. SCHUESSLER: Sure, sure. I mean that's what CNN is reporting. We've not at the Command Center heard of information to tell us otherwise, and so it's the second aircraft that we visually see of. This is a commercial jet. You can see the commercial jet coming in.

MR. AZZARELLO: Well, let me ask you this then. Did you equate the second crash as you saw--did you equate that with oh, that must be the first reported hijack?

MS. SCHUESSLER: No, no. I mean hijack to us--a paradigm has changed since September 11th. You know, a hijack in the past has always been somebody is commandeering an aircraft to go to another location, certainly not to hit a building.

MR. AZZARELLO: On the question of if you remember hearing about a second reported hijack prior to seeing the live crash, the second one, wouldn't that be something you think you might remember? I mean having one hijack you referenced

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I think to most people--sort of unusual because there hasn't been one in the system in a while. There were two reported prior to seeing that last--

MS. SCHUESSLER: I don't remember when we had notification of the second one, John. I don't know that. All I can tell you is when the second aircraft hit, to equate hijack with that particular incident was not there.

MR. AZZARELLO: I understand that. Separate question, though, is that--just so I understand it. My second question was just you remember one way or another whether or not you even heard about a second possible hijack before seeing the crash.

MS. SCHUESSLER: Yeah, I don't know.

MR. AZZARELLO: Not sure one way or the other?

MS. SCHUESSLER: No, no. Don't know.

MR. KARA: Let me approach it a little more globally.

MS. SCHUESSLER: Okay.

MR. KARA: Let's say there is emerging

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information within the system about both the first and now a second hijack, and that information is coming up. Would you expect that information to flow to the region from the facility and to headquarters from the facility to headquarters, or from the facility to both headquarters and at Command Center? What was your expectation of the flow of information?

MS. SCHUESSLER: Again it's typically, you know, hijack, flow of information would be through the ROC and through the Regional Office up into headquarters.

MR. KARA: And then--

MS. SCHUESSLER: And then at some point--

MR. KARA: --John White--would be the expected flow?

MS. SCHUESSLER: Probably, but we would also probably have some of the specialists in the Traffic Management units in the facilities also calling the Command Center specialist. And see that was the information that we were starting to get in. We were starting to get lost call, we were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

starting to get, you know, losses of radar. We were starting to get bomb threats, all that type of information. So one of the other things that I had one of our staff specialists do was to--there was a white board down in Severe Weather, and Gail Carter was the specialist. I asked her to gather the information of all the aircraft that we had that type of data incoming on--

MR. AZZARELLO: You're referring to--which area is that? 3 and 4?

MS. SCHUESSLER: Right in the middle. Yeah, right in the middle of Severe Weather. And then she would track the aircraft by call sign, and she would have the pertinent information that we knew of and was reported to us, and then throughout the course of the, you know, the next couple of hours, we'd have the dispensation of--

MR. AZZARELLO: What was the name?

MS. SCHUESSLER: Gail Carter.

MR. AZZARELLO: Gail Carter?

MR. KARA: This comes back to my point on the confliction, Linda, because you are describing

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that there are going to be two parallel chains. You're going to have the TMU's at the various facilities calling ZBW--TMU will be calling the ZBW position here, but you've still got the formal flow of information down back to John White. And what I perceive based on what you just told me was the management decisions in order to manage it was to set up the whiteboard down--or you--

MS. SCHUESSLER: To try and sort through the information that we were getting. That was part of the whiteboard, but again remember every few minutes, you know, the management team--

MR. KARA: And the huddles if you--

MS. SCHUESSLER: Right. Would come together and say okay, what have you heard now.

MR. AZZARELLO: Is the whiteboard, is that like an easel of paper? Is that an erasable board?

MS. SCHUESSLER: No, it's erasable.

MR. AZZARELLO: Erasable board?

MS. SCHUESSLER: Yeah.

MR. AZZARELLO: Before you got the word out to all the Centers and field facilities to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

report any unusual circumstances, I'm imagining that something led you to do that, meaning something that did lead you to believe then that what you were seeing on TV was a hijack, an intentional act. How'd you get--

MS. SCHUESSLER: Again, I don't make that nexus at all.

MR. AZZARELLO: Well, does anybody at any point tell you or report that Boston Center at some point has reported that they believe that the hijacked aircraft that they reported was the one that went into the tower?

MS. SCHUESSLER: I think that came out I'd say much later. I don't know what much means, you know, but all it is is kind of a blur in my mind. You know at some point, yes, I did hear that information, but I can't tell you when.

MR. AZZARELLO: When you saw the second crash on TV live, you were able to recognize it as a commercial airline.

MS. SCHUESSLER: Yes. Just because of size.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Because of the size of it. What was your thought process at that time? Given the fact that it was a clear day, did you draw any conclusions?

MS. SCHUESSLER: Well, I did. We thought it was--you know, what was going through my mind was they saw an incident. They were trying to get a little bit closer to see what was going on and perhaps misjudged it. You know, again the nexus was not made in our minds, in my mind, as far as the hijack in that particular incident.

MR. AZZARELLO: Did you say in the second crash you thought it was accidental? You thought it was a commercial--

MS. SCHUESSLER: Initially, sure.

MR. AZZARELLO: --airliner. Pilot trying to get close to view the damage at the first Trade Center and then--

MS. SCHUESSLER: And then certainly I think the normal reaction too was shock and disbelief because pilots don't do something like that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. SCHAEFFER: Did you think--at all at that point?

MS. SCHUESSLER: No.

MR. AZZARELLO: At the Boston position, 15, there was a report. I think it came in from the facility, from their OMEC shortly before 9 a.m., roughly 12, 15 minutes after the first impact that they believe it was one in the same, meaning the crash was the hijack that they reported. So to the best of your recollection, I'm asking you to try and recall it, did that information get to you after you saw the second crash?

MS. SCHUESSLER: I don't remember whether it did or not. At some point it did during the day, but I couldn't tell you when.

MR. AZZARELLO: Well, I mean how wide open should we leave that then? At some point in the day, should we leave that--

MS. SCHUESSLER: No, not the later on in the afternoon.

MR. AZZARELLO: Can you give us a ballpark?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Yeah, I don't remember. In my mind, I do not remember it being before the second incident, you know, immediately after the second incident.

MR. AZZARELLO: How about before the Pentagon was hit? Do you remember if it was before the Pentagon was hit it came to your attention that they believed that the facilities had reported that there were two crashes that they thought were connected to the two hijacks?

MS. SCHUESSLER: Again, I don't remember, John. I don't remember.

MR. AZZARELLO: How about--I'm going to press that.

MS. SCHUESSLER: Well, and--

MR. AZZARELLO: How about before the fourth crash in Pennsylvania?

MS. SCHUESSLER: Well, and I think, you know, I don't know when the connection was made in my mind. All I can remember was after the second aircraft, obviously it was a commercial. We were getting information coming in about unusual

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

situations. We were exploring the options trying to ascertain what we thought was going on in the national air space system. I think some time after the second incident, we did make a decision to ground-stop all the aircraft in the NAD.

MR. AZZARELLO: Who made that decision? After the second incident?

MS. SCHUESSLER: I believe it was after the second incident, and I believe it was made immediately after the second incident because again we were trying to pull all the pieces together. Again most of these decisions were made. They were collective decisions, you know. It wasn't one person that says oh, this needs to happen. We were pulling all the information together.

MR. AZZARELLO: How about New York? Before you get to the national--sequence-wise, where does that fit in with the New York and Boston deciding to ground all their departures?

MS. SCHUESSLER: Well, without having the time line in front of me, typical protocol would be after an incident of--the first incident, we would

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

institute a ground-stop for the New York area and transition the aircraft in the New York air space out of that area so they can deal with the immediate situation.

MR. AZZARELLO: Understanding that that's typical--so you say normally even after the first crash, then typically in the New York area, ground-stop departures from New York?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: How about arrivals and traffic through the--

MS. SCHUESSLER: And that's--yeah, and all the transitioning traffic, aircraft that are in air. You would make a determination, okay, can we allow, depending on where the incident happens to occur, can we allow those that are in the air in bound to a particular airport, can they land, or do we need to divert the aircraft. So all those decisions typically are made, and to my recollection were made that day after the first incident. And then it was after--I'm thinking it was after the second incident. We also expanded

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that to the Boston Center air spaces as well.

MR. AZZARELLO: And then--

MR. SCHAEFFER: Just go back to this so I'm clear. I've written it out maybe differently. After the first hit, was a ground-stop instituted or ordered from the Command Center to the New York area, after the first hit?

MS. SCHUESSLER: I don't think it was ordered from the Command Center. Generally speaking a local facility will work with the Command Center to say this is what we need to implement.

MR. SCHAEFFER: And then through the second incident, just to be clear, was that the same thing? The extension to Boston--

MS. SCHUESSLER: Correct.

MR. SCHAEFFER: --that was generated from the Command Center, or was that in conjunction with--

MS. SCHUESSLER: It was an in-concert, you know--and again, you'd have to check the time sequence to get the accurate time.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: In tracking that, let's say New York Center after the first or second crash decided they wanted to ground departures, prevent arrivals and not have any traffic to their air space, could they issue that notification, or would they have to go through Command Center for advisors?

MS. SCHUESSLER: Well, they'd go through the Command Center to get that full dissemination to all the aviation community.

MR. AZZARELLO: Could they do anything of their own accord to start that beforehand?

MS. SCHUESSLER: Yes, they can call the adjacent facilities and implement ground-stops.

MR. AZZARELLO: So they can call the Tracon, the towers, and say we're going to ground-stop everything?

MS. SCHUESSLER: Right.

MR. AZZARELLO: Including no more arrivals and no traffic through the air?

MS. SCHUESSLER: Correct, because they need to handle the immediate situation.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay. --Boston.

MS. SCHUESSLER: Correct.

MR. AZZARELLO: So they could initiate it and then ask the Command Center's assistance.

MS. SCHUESSLER: Yes.

MR. AZZARELLO: What about a national ground stop like the one that was issued?

MS. SCHUESSLER: That would be the Command Center only. And so after the second incident, sometime thereafter, determination was made with the information at hand to implement a national ground stop.

MR. AZZARELLO: Was that something after the incident? Do you remember if that occurred after the Pentagon was hit?

MS. SCHUESSLER: Yes, yes, I know it did.

MR. AZZARELLO: After the second incident before the Pentagon, the national ground stop was ordered by the Command Center.

MS. SCHUESSLER: Correct.

MR. KARA: And at that point in time, it's after the two World Trade Center towers are hit,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

then within the national air space system it's a bit quiet and there aren't any more reports for a little bit. So something's driving you to make that decision before there really was something else going on.

MS. SCHUESSLER: Well, we are still getting information, you know, from even West Coast facilities saying we have an unusual situation and this is what it is, or we've lost com with a particular aircraft or lost radar. You know, so it was enough little bits and pieces that again we were getting throughout the national air space system. It wasn't just the East Coast facility, and so we were--

MR. KARA: It was the totality of the picture you were getting.

MS. SCHUESSLER: Correct. So we were trying to pull that information together, and as we were pulling that information together, we were saying, okay, what do we need to do, what are our options, what do we need to explore. Then recognize too John White is on the phone with

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

headquarters and they're also discussing what decisions need to be made as well. So we're all sharing information.

MR. SCHAEFFER: Was the national ground-stop correlated to knowing that there was multiple hijackings reported within the national air space?

MS. SCHUESSLER: That was part of the decision that was made, but again it wasn't just the hijack situation. Again as I remember we were getting information saying that we had the bombs on board aircrafts or, you know, we were losing communication with aircraft, etcetera. So it was all those pieces of data being put together that we thought that we needed to keep the aircraft that were on the ground on the ground.

MR. SCHAEFFER: So to go back to what John was--what he was pursuing before in terms of when you realized that there are now multiple hijackings reported within the system, you're trying to put a--you said, you know, you didn't know if it was later in the day, but now knowing that the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

ground-stop ordered before definitely was before the Pentagon was hit and that is as you recall partially deduced from the fact that there are multiple hijackings, so we can say that there are--

MS. SCHUESSLER: Yeah, that would be part of the equation, but again I don't have a clear memory of saying oh, yes, the two aircraft that have hit the World Trade Center are part of the hijack scenario. I do not remember that at all.

MR. AZZARELLO: Who made the national ground-stop decision? What individual or individuals--

MS. SCHUESSLER: Well, again, you know, a lot of these decisions that were made were options that we had already explored and collectively said, okay, these are are our options. So to the best of my recollection, you know, the management team, we said, okay, we think we need to implement the ground-stop.

MR. AZZARELLO: You weighed in. John White weighed in.

MS. SCHUESSLER: Not so much with John

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

because he was on the phone over here, so when we pulled the management team together, again we kind of congregated in this area. John was not--he was close, you know, but not within touching distance, and that's where Lorain helped provide his input.

MR. AZZARELLO: Who would you have consulted with on the ground-stop position?

MS. SCHUESSLER: Well, part of the information flow certainly is back and forth at headquarters, you know, so as we're making some of these decisions, we are feeding that information through John up to headquarters.

MR. AZZARELLO: On the national ground-stop, just so we can define it, that is preventing departures--any further departures from the United States, correct?

MS. SCHUESSLER: Correct. Any aircraft that are on the ground, they're required to stay on the ground, but you have to remember too that we've got, you know, that applies to all aircraft, but as I remember, we also had to go back and make sure that everybody understood this also applies

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

for--aircraft because they're flying somewhat with a different set of rules.

MR. AZZARELLO: Just so we're clear too on our understanding, that's different from--isn't that different from taking all aircraft out of the sky? That was a separate--

MS. SCHUESSLER: All that's a separate--yeah, that's correct.

MR. AZZARELLO: Let's not add any more aircraft to the system right now.

MS. SCHUESSLER: Let's deal with the situations that we have. Don't let anybody else get airborne.

MR. AZZARELLO: Let's freeze the national air space picture so to speak.

MS. SCHUESSLER: Yeah, the best we can.

MR. SCHAEFFER: John, he's on the telecon into headquarters. That's your link. Are there any other links then that you're conveying then--all that information's going through him?

MS. SCHUESSLER: Well, it's going through him, and I do remember there was another telecon

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that was set up, and it was over here on console I believe 43. And I don't remember the exact time that was set up, but early on someone answered the phone saying they were setting up a telecon. They had asked for me to be on it, and I can't tell you even who was on there. You know, I picked up the phone and I told them that I had various issues that I needed to tend to. I would get somebody to be on the telecon, but it probably wouldn't be me.

MR. SCHAEFFER: Do you know who that was calling? Who called--

MS. SCHUESSLER: No. I don't even--you know, because I didn't spend much time on that line at all.

MR. SCHAEFFER: They didn't identify themselves?

MS. SCHUESSLER: Oh, they probably did, but, you know--

MR. AZZARELLO: But it was the headquarters' request for somebody at the Command Center to get on?

MS. SCHUESSLER: Yeah, well, they were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

specifically asking for me, and at the time, you know, John was on one line, they wanted me on another line, and I felt like I needed to do more in the Command Center and part of what I was also trying to do was to send all non-essential people--I mean because at this point, we had a lot of personnel in the facility coming in to watch. Again, you've got the big TV screen up there and, you know, just to watch what is occurring. I sent all non-essential personnel out of the facility so we could just deal with the situation at hand. I worked--

MR. SCHAEFFER: Before we get off that--on that position 43, someone answered that phone and said they wanted to establish a telecon with Linda. They called you over, you pick up the line and then you explain that you're not going to stay on it. Do you remember what was conveyed then?

MS. SCHUESSLER: Yeah. I said I don't have time. I've got to do things at the Command Center. I'll get somebody else to monitor it.

MR. SCHAEFFER: So left that open and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

brought somebody else over?

MS. SCHUESSLER: Yeah, but I couldn't tell you who it is.

MR. SCHAEFFER: Okay.

MR. KARA: Let me come back to the ground-stop, Linda, and what I have in front of me are the advisories that were put out by the Command Center as provided to the Commission. These are the ones that were given to us, and could we just briefly--the New York ground-stop, I've got an effective time--this would be the effective time, 9:05 or not?

MS. SCHUESSLER: That would be the effective time, but you also have to remember a lot of the paperwork, administrative actions, were taken after the verbal direction was given.

MR. KARA: Okay, so the verbal direction could have been before the 9:05 time--

MS. SCHUESSLER: In most cases, the verbal direction was given and then this followed.

MR. KARA: And the signature line is workstation 14 alpha. So does that mean that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

whoever was station 14 is the responsible official on this?

MS. SCHUESSLER: Right, and that morning, what we also had is everybody--you know, this is probably the neatest thing that I've ever seen as far as teamwork. Everybody in the facility really helped and supported each other in what needed to be accomplished. So when someone saw something needed to be done, you know, they was oh, I've got it. So it didn't matter whether they typically were responsible for that particular dissemination of information. For instance, they took ownership for it and everybody was okay with that.

MR. KARA: And for the record, the advisory for the New York ground-stop was Advisory 27 and Advisory 29 was the ground-stop for Boston, effective time 9:24, but the verbal could have been earlier than that. And the workstation is workstation 15 for the New York ground-stop. And then D.C. ground-stop is at 9:29 and workstation 25 is responsible for that, actually effective time--I'm sorry. I mis-spoke--is 13:30, which will

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

be 9:30. And I'll come back to this ground-stop in a moment, and when we ground-stop all departures is Advisory 31, effective time 13:30, and that's workstation 24, which we really haven't talked about. So would that have been Ben over here at 24?

MS. SCHUESSLER: It was probably Tim Smith.

MR. KARA: Tim Smith that did the ground-stop for all departures.

MS. SCHUESSLER: Or one of his specialists working for him.

MR. KARA: Okay. And then we come back. It's 9:30, the effective time here. The two World Trade Center strikes are at 8:46. Is that right, or is it 8:48? And 9:03 for the second tower. The Pentagon hasn't hit yet but we're doing a ground-stop for Dulles, Baltimore-Washington and National. Do you recall why that was?

MS. SCHUESSLER: Well, if you look at the flow of traffic, the New York-Washington Center area are very much interdependent with each other.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

So a lot of times what you'll have to do is also move out a little bit further to adjacent facilities and keep that aircraft on the ground as well to keep them away from the New York area.

MR. KARA: Do you recall then if that was tied in any way to reports of American 11 or any other aircraft threatening Washington, D.C.?

MS. SCHUESSLER: No.

MR. KARA: This was not tied to except Washington, D.C.

MS. SCHUESSLER: No, not to my knowledge.

MR. SCHAEFFER: Did you say Tim Smith was on 24?

MS. SCHUESSLER: He was the West--

MR. SCHAEFFER: He was the West 24?

MS. SCHUESSLER: --for the day.

MR. KARA: Yeah, 24 was the position according to this that issued the nationwide ground-stop.

MR. AZZARELLO: Let's talk about before the Pentagon is hit and after the two crashes up in New York. Was it that time frame, Linda, when you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

said you were asking the people to go out to the facilities to tell them to report--

MS. SCHUESSLER: I think it was prior to that. I think it was shortly--well, it was that time frame.

MR. AZZARELLO: Shortly after the second crash.

MS. SCHUESSLER: I think so.

MR. AZZARELLO: Asked them to sort of canvass the facility.

MS. SCHUESSLER: Right, I mean we were already getting some of that information, but we thought it was significant enough to reach out to the facilities and ask them to report that information to us so we would have all that data as we were trying to ascertain what was occurring in the system.

MR. AZZARELLO: Okay, so some of them are already starting to report, but you wanted to make sure that you reach out to make sure you know everything in the system in case that they're not self-reporting.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Correct.

MR. AZZARELLO: You mentioned I think something earlier about, you know, losing radio communication where ordinarily that might not raise a red flag pre-9-11, but on that day, you were asking for those types of things to be recorded?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: According to your recollection?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: How about loss of transponders? Do you remember that also?

MS. SCHUESSLER: Yeah, and then that typically as I talked about what we call kind of a radar stitch. Sometimes if you're going between radar short boxes or radar sites, you know, you may have a couple of seconds there where you lose radar contact, but it's a known location and you know about it, so you keep an eye on it to make sure it's going to come back. It's those type of incidents we--when you're aware of them and you routinely handle them. On this particular day, you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

report them.

MR. AZZARELLO: So it's not unusual then to lose a transponder for a very brief period of time in certain parts of the air space?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: In your experience going back to your Center days too, how unusual was it to lose a transponder for a significant period of time? Let's say in excess of five minutes.

MS. SCHUESSLER: Five minutes typically is a situation that you would check into. I mean that's very unusual.

MR. AZZARELLO: That's unusual.

MS. SCHUESSLER: Yes.

MR. AZZARELLO: So usually it's a brief loss, not something in excess of five minutes.

MS. SCHUESSLER: Right.

MR. AZZARELLO: Well, what information do you think you received that would lead you to then canvass the Centers to report something that otherwise would be usable, like loss of radio for a brief period of time or loss of transponder? Like

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I'm imagining something came to your attention about those characteristics that led you and the others to say let's make sure that this situation isn't going on somewhere else in the system?

MS. SCHUESSLER: Well, it just seemed that we had a large number of unusual events occurring in the system. So we went out and canvassed the facilities to report that information to us.

MR. AZZARELLO: Well, putting aside for a second the large number of those reports coming in, we now know obviously in hindsight characteristics of American 11 and of United 175. Those are the first two aircrafts to go in. Let's start first with American 11. They lost radio and they lost transponder. They lost the radio roughly 8:14. They lost the transponder at 8:20, and the crash came at 8:46. We do know from what we've seen that the people in the Boston system were aware of that and in fact reported those characteristics fairly early on before the crash to Command Center. And I guess my question to you is then did that come to your attention at some point when you were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

canvassing, or did that lead you to canvass the facility? Then somebody then bring your attention--by the way, Linda, the aircraft--that the first crash we think was the hijack out of Boston, and they said these are the characteristics of it.

MS. SCHUESSLER: No, no. That was never formally said. Linda, these were the characteristics, so this is the events leading up to that event, no.

MR. AZZARELLO: So then just so I understand correctly is it your recollection then that when you asked the people, your employees, to reach out to the various FAA field facilities, at that juncture, you did not have any idea of what the characteristics were of those hijacked aircraft that crashed into the towers in New York?

MS. SCHUESSLER: Not that I remember, but again remember we're getting reports also from the West Coast of unusual events too. So again it's not just the East Coast Air Traffic facilities that were getting reports from. We're getting that from

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

throughout the national air space system.

MR. AZZARELLO: I know the reports are coming in, but I'm looking at the actual events, not reports, but actual crashes. These are two aircraft that your facilities lost in New York reported as hijacked and observed certain characteristics of those aircraft while they were being hijacked and before the crash. They recognized that there was a loss of radio and a loss of transponder on one, and a change of a transponder on another. And I'm saying it certainly was reported to the people at say 14 and 15, and maybe I'm wrong, but that's the type of information I would expect somebody at those positions to bring to the level of their superiors to let them know--give them situational awareness. You know, hey, remember that hijack we reported from Boston that they thought was a possible? Well, now they're saying it's not a possible, it's a definite, and they think that's the one that went into the tower, and by the way, they lost coms and transponder. Is it your recollection that none of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that ever reached your level prior to the Pentagon being hit?

MS. SCHUESSLER: As I said before, you know, some time that information--that type of information was probably shared, but I can't tell you, you know, no, it wasn't at the end of the day. I do know that. Some time during that time frame, and certainly some of that type of information and unusual circumstances were used to pull the picture together what was going on, but I can't say, oh, yeah, I remember when so and so told me this particular piece of information.

MR. AZZARELLO: But are you saying it didn't play a role in your decision to canvass the field facilities. That's what I'm having difficulty understanding.

MS. SCHUESSLER: Not to my knowledge, no.

MR. AZZARELLO: So that was independent. So to the extent that you were looking for the characteristics of loss of radio or loss of transponder, it wasn't because you knew those were the characteristics of the first two crashes, or

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was it because other facilities were reporting similar?

MS. SCHUESSLER: It was more the other facilities were reporting that type of information coming in that we went out and canvassed anything unusual, including loss or radar, including com, including bomb threats.

MR. AZZARELLO: Okay. What about a report that American 11, which was reported first as being one of the first hijack that was reported from Boston, and then as Boston reported believing that was the one that crashed in the Trade Center, there was subsequent to the two crashes in New York a report surfaced that American Airlines 11 is still airborne, that now they believe that not have been one of the planes that went into the Trade Center but still are airborne and headed to Washington, D.C. Do you recollect that information coming to your attention?

MS. SCHUESSLER: Well, again, I remember that type of information being floated out. That's why it was so difficult to ascertain what was going

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

on because you're getting conflicting information. You're getting information on one hand that this is the situation. Then within a short period of time, no, no, no, that's not true. So again, you know, I think--perhaps, I don't know--you know, that was one of the rationales for going out and soliciting assistance from the local facilities. Tell us what's going on so we can pull some of this information together. When we issued the national ground-stop to the best of my recollection, you know, we still did not have a clear picture what was happening in the NADS.

MR. AZZARELLO: After the two crashes in New York and before the Pentagon, did there come a point in time before the Pentagon was struck where it was brought to your attention that there may be an aircraft that was headed towards D.C. or posing a threat to the D.C. area?

MS. SCHUESSLER: No.

MR. AZZARELLO: How and when did you learn of the Pentagon crash?

MS. SCHUESSLER: Well, I don't remember

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

how I learned it occurred, but I do know after, you know, because we had explored, you know, various options and actions that we needed to take. So immediately upon learning the third aircraft had hit the Pentagon, we did make a decision to get all the airborne aircrafts on the ground regardless of their original destination. I don't remember how we learned that, whether we learned that through a facility, whether it was CNN. Don't know.

MR. SCHAEFFER: Just before we launch into that next phase, John, again before the Pentagon crash, recognizing which aircraft went into the World Trade Center, did you have any knowledge of that aircraft or the tail number or airline that was associated--that you recall.

MS. SCHUESSLER: Not to my knowledge. I remember, you know, the Command Center does not have--they've got TSD but they do not have radar, you know. We are not a facility that we are tracking individual aircraft on a small scope so we can say oh, okay, here is this geographic location and here is the aircraft in that vicinity. That's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

not what the Command Center does, so we are relying on local facilities and in this particular, John White sharing some of the information that maybe he's learned from headquarters, the CNN reports that are up there to try and ascertain what the picture is.

MR. AZZARELLO: But you have contact with the Centers, right?

MS. SCHUESSLER: Yes, that's correct.

MR. AZZARELLO: And they would be--

MS. SCHUESSLER: They would be our eyes I guess.

MR. AZZARELLO: They would be the relevant FAA entities who would have been controlling the aircraft and would have been in a position at least to recognize that they were being hijacked, right?

MS. SCHUESSLER: Correct.

MR. KARA: At this point in time, Linda, let me--for a moment. We've just now had the Pentagon struck. What has been the awareness of, any input from the Operations floor for military response?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Oh, gosh, let me think. I know we had the cell active that day, and what I remember is after we left the EOR that morning after we all reported back to the operational quarters, there was one of the cell representatives in the hall that we shared the information. This is what we think is going on in the system.

MR. KARA: Now when you say the cell, you're referring to the--

MS. SCHUESSLER: Air Traffic--

MR. KARA: Air Traffic Services cell.

MS. SCHUESSLER: Correct.

MR. KARA: And who from the ATSC attended that 8:30 meeting that morning? Do you recall?

MS. SCHUESSLER: They don't typically attend.

MR. KARA: They don't attend the 8:30 meeting.

MS. SCHUESSLER: No.

MR. KARA: But soon after the 8:30 meeting, or as you flush all the managers to the floor, somehow one person from the ATSC was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

involved.

MS. SCHUESSLER: But they were in the hall.

MR. KARA: They were in the hall.

MS. SCHUESSLER: They were coming out of the breakroom area. We were--

MR. KARA: Do you recall who that was?

MS. SCHUESSLER: No.

MR. KARA: Probably throw a couple of names in.

MS. SCHUESSLER: Probably not.

MR. KARA: Lieutenant Colonel Cherry or--

MS. SCHUESSLER: No, I know it wasn't Lieutenant--

MR. KARA: It wasn't Michael--

MS. SCHUESSLER: No.

MR. KARA: How about Colonel--

MS. SCHUESSLER: It was a male, but that's all I can remember.

MR. KARA: It was a male, okay. But you're not involved with the Centers or with the Northeast Air Defense Sector from the Command

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Center in terms of scrambling aircraft--

MS. SCHUESSLER: No.

MR. KARA: At this point in time.

MS. SCHUESSLER: No.

MR. KARA: What is the role at this point in time of the--are they involved at all? Are they on the floor? What are they doing?

MS. SCHUESSLER: Well, since you've been out to the Command Center, you know--is in their separate room, and, you know, they work the movement of aircraft and certainly the role of the Service itself is a DOD-FAA joint mission to provide assistance to various types of situations, internal turmoil and that sort of thing. So they would be working very closely with--with the movement of military aircraft.

MR. KARA: But neither of those entities, the--or the ATSC is playing a mainstream role on the Operations floor.

MS. SCHUESSLER: No. I know we are sharing information sporadically with them as the day unfolded, but I--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: And the ATSC, are these uniformed Air Force officers that are in the Service itself?

MS. SCHUESSLER: Correct.

MR. KARA: Their awareness of or any knowledge they gained of hijacking activity that's on the floor, does that in your mind constitute notification to the Department of Defense or to NORAD of a hijacking?

MS. SCHUESSLER: Well, again, we didn't have the responsibility for notifying NORAD, but we thought if it was pertinent enough to share with the Service, the cell individuals, and I think our expectation was that they would probably elevate it through their chain of command.

MR. KARA: And what was their chain of command?

MS. SCHUESSLER: We don't know. Don't know.

MR. KARA: Okay.

MR. SCHAEFFER: We were doing so, though, trying to effect a military response, or by doing

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

so, by sharing that information? Was that the mindset?

MS. SCHUESSLER: Well, I think our mindset was more information sharing because that was not our role and responsibility first of all to make those decisions for the military, but we wanted to make them cognizant of what might be occurring to the best of our knowledge and they can do whatever action they think was appropriate.

MR. AZZARELLO: Is it accurate if we conclude that you didn't have any discussion with anybody at headquarters along the lines of well, we told the Air Traffic Services, the cell people, about the situation and the reported hijack, so the military isn't, you know, aware now and taken--

MS. SCHUESSLER: I know I didn't. I don't know how much information John may have shared with headquarters, but I know I didn't.

MR. SCHAEFFER: Were you familiar with what types of information was passed to the--and to the military via those routes? Specifically what types of information was passed to them?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Well, I know I wasn't doing the direct coordination with them. I think to the best of my recollection, you know, once they became cognizant of it, they would also, you know, send a representative out to the operational quarters, you know, like all of us trying to gather information. If you remember, we also had representatives for Air Transport Association on the operational quarters. We also had National Business Aircraft Association. So I think everybody at that point, you know, was sending a representative to ascertain what information so they could take the appropriate actions for their own organization.

MR. KARA: At one time, Linda, and this is sort of anecdotal, but let me share it with you. We've talked to a--representative yesterday, and at some point, headquarters called him because they couldn't get through and they needed to talk to your unit, talk to someone on the floor. And the person from the--when he went to the floor to tell the floor that headquarters was trying to reach

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

them, he was very careful to go to you first. Had you established that as an operating principle? If people was coming onto your floor, had to come to you first?

MS. SCHUESSLER: No, I don't think so, but I think in these type of situations, I think from an air traffic facility protocol, I think it's pretty well ingrained before you go into an operational quarters you check with the ranking official to get approval to do so.

MR. KARA: And you were the 51 percent holder of that card that day.

MS. SCHUESSLER: Yes.

MR. AZZARELLO: I just want to show you a couple of transcripts of the floor. This is a transcript from the--I believe it's the 15th position. Let me just check the tab. Yeah, position 15, so that's the Cleveland-Boston Center position?

MS. SCHUESSLER: Yes.

MR. AZZARELLO: This is after the first crash and before the second. Bob Pierce from NPSB

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

is calling and he's trying to get information on departure, time and souls on board, destination for the first crash?

MS. SCHUESSLER: Yes.

MR. AZZARELLO: And this is a question coming from someone we believe at the Command Center at that position 15, was sure this was the flight that obviously hit the World Trade Center is the same as the references for the first reported hijack from Boston. Terry Biggio says working from what we say, there's no doubt. So that type of specific information, you don't remember reaching you that early on?

MS. SCHUESSLER: No. But remember too, you know, one of the thing that I was also trying to do was make sure the Command Center itself was taken care of. I was trying to get non-essential people out of there so we could deal with the situation. I was also concerned for the physical security of the facility itself, you know, and I don't remember who I was working with to make sure the facility was secure, but we made sure that the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

guard gate was closed. We didn't have any other incoming personnel without checking with us first, those type of issues.

MR. AZZARELLO: I'm not trying to suggest that--I'm sure you had plenty to do. I was trying to find out whether this was brought to your attention.

MS. SCHUESSLER: Yeah, no, no. No, it wasn't.

MR. AZZARELLO: This is continuation of the position 15. That's the UA person who's recording the start time as 9:05 time. That was 9:05 local?

MS. SCHUESSLER: What is that again?

MR. AZZARELLO: This is the lead-in. In other words, the quality assurance person who made the recordings at Command Center tells us when the second tape stops, starts at 9:05 local. And it starts out with, I think that's supposed to be Tom, Tommy Paseon. It's confirmed on that--and it says we have claims, so one of the things that was going on was they were--at some point. I'm sure you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

learned it, if not that day afterwards that Boston was pulling tapes to try to find out what they had all heard from the cockpit. So it's roughly 9:05 when Terry Biggio from Boston reports to Command Center to position 15 that we confirm that they did say we have some planes as in plural. You see that as an important piece of information obviously because it means that United only maybe had the two in the system but maybe there's more. Was that brought to your attention at least that they pulled the recording--

MS. SCHUESSLER: But I don't know about pulling the recording. At some point I do remember being informed that we thought, and whether it was Boston, I don't remember all the particulars, but they thought that they did overhear a transmission with that type of information. But again you have to remember the mindset of that particular day. We were getting an awful lot of information incoming, some of it misleading, some of it disputing previous information that we had gotten. Our paradigms of a hijack was that they were going to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

commandeer the aircraft and land safely. The paradigm was not to hit buildings.

MR. AZZARELLO: I understand, but wouldn't it be fair to assume that the paradigm started to quickly shift on 9-11 after the first two crashes?

MS. SCHUESSLER: Well, and then it did, and if you're actually--you know, if you go from start to finish, from the time that the first incident occurred to when we said okay, let's get all aircraft in the air on the ground, you're talking 45 minutes. You know, roughly 45 minutes. You'd have to look at the time line. 45 minutes for us to make those determinations. I think that's pretty darn good.

MR. AZZARELLO: I don't think anybody here wants to make any comment on that it wasn't a good decision. I hope you can appreciate all we're trying to do in asking these questions. Among other things is just to try to find out the flow of information as it came to the Command Center. All we're trying to get at is did they had information that came to the position at the consoles filter up

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to upper management. Because I mean let's face it. The people making the decisions, are they at the consoles or are they more of the upper management people?

MS. SCHUESSLER: Well, I think you probably saw we had some of both. You know, probably the major decisions as far as the ground-stops and to land all the aircraft came from upper management.

MR. AZZARELLO: Sure, and to the extent that information that we have some planes was reported being overheard at one of the hijacked aircraft. To the extent that's relative to deciding to take planes out of the national air space system, would you agree that the type of information you as a manager maybe would like to have known?

MS. SCHUESSLER: Sure, and as I said earlier, you know, I know I got that information. At what point, I can't tell you, John.

MR. AZZARELLO: Okay. How about that same time when they reported that there was some planes,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were the words that were overheard, that Boston asked about is there a way to get messages to the airborne aircraft, to the crew, for security for the cockpit or something like that, through--or some other method? Do you remember if that issue was brought to your attention that morning?

MS. SCHUESSLER: I don't remember whether that particular issue was brought specifically to my attention, but I do remember I had conversations with the ATA representative that was on the floor at the time.

MR. AZZARELLO: Who was that? Do you know?

MS. SCHUESSLER: Oh, I can picture him, but I can't think of his name at this point. Maybe if you gave me a list of names, I could tell you, but I can't think of his name right now. But we were sharing information, you know, obviously that we had and we were asking him to contact the carriers with the information that we had. We also had Tommy Faceon with the Severe Weather people--they typically would have relationships and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

direct communications with the airlines. They were also sharing that information with them as far as what we thought was going on.

MR. AZZARELLO: Separate and apart from sharing information, do you remember if that specific request was ever made to the ATA rep? Do you remember specifically if he or she was ever told listen, why don't you call all the airlines and see if they can get a message out?

MS. SCHUESSLER: Well, I do remember talking to him saying, you know, that this might be an avenue for you to get the information out to the carriers. And I don't know whether Tommy did that down in SBT and Severe Weather or not.

MR. AZZARELLO: What avenue were you--what method--

MS. SCHUESSLER: Well, again, we had two avenues to get communication with the airlines. We had our ATA representative that was there, and that's the individual that I was talking with, and then generally you had Tommy and his staff working with the customers from their perspective.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: When you said to the ATA rep that this may be an avenue, how? What method were you suggesting?

MS. SCHUESSLER: Well, first of all, share the information that we had and that there was one suggestion that you might want to share information that's going on in the system. You know, there's two different ways that they share that information. They can do it via company radio and--, you know. That was their choice to make. That was certainly not an Air Traffic decision to make.

MR. AZZARELLO: Okay. That's certainly what I was getting at. Did you consider that to be the airline companies' decision, not an Air Traffic decision?

MS. SCHUESSLER: Correct.

MR. AZZARELLO: Because similarly actually while we're on that issue, there's a call at Ellen Kingfield, at the position she was at, the non-position, and it came in from Bill Ellis, who's a 500, which we now learned as the Air Traffic

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

manager. He would have been the highest ranking Air Traffic man of the region, right, in the New England region.

MS. SCHUESSLER: In New England, yes.

MR. AZZARELLO: He suggests that--I'm sorry. This is someone calling on behalf of him. It says, "Bill Ellis to 500 has suggested or requested that you get an advisory out to all of his staff. Suggested running international traffic coming into New York to cockpit security." Ellen says, "Okay, send your request again." And he says, "That you put out an advisory to all dispatchers to advise that any traffic coming into New York internationals, especially to Boston Center--this is EBW--to increase the cockpit security." Maybe a no-brainer and you've already done it, but we just want to make sure that you know we tried to do something. Ellen does not recall whether or not she passed that on to anybody. Do you recall whether or not she passed that on to you specifically?

MS. SCHUESSLER: Well, I'm not sure about

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the specific request, but I do know at some point, again, I don't know the time frame, we did reach out to the international community and, you know, shared what we could with what was going on, and at some point, we also ground-stopped all international from coming into the country.

MR. AZZARELLO: Reach out, you mean the international community meaning tell the international airline companies what was going on?

MS. SCHUESSLER: Not the companies, but the air traffic facilities. So we would call Europe Control. We'd call Gander. You know, the Air Traffic service providers.

MR. AZZARELLO: Service providers in those other locations that involved international travel.

MS. SCHUESSLER: Right.

MR. AZZARELLO: But was any request made that they contact the aircraft and tell them to secure their cockpits, or no?

MS. SCHUESSLER: Not that I remember.

MR. AZZARELLO: Is it your statement that that's not an Air Traffic decision to make but an

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

airline decision to make? Would that apply to domestic and foreign international flights?

MS. SCHUESSLER: Right.

MR. AZZARELLO: Why is it that--just want your opinion on why you think it's not an Air Traffic decision to make on that day?

MS. SCHUESSLER: Well, because Air Traffic is responsible for the prevention of collision and the flow of air traffic. Prior to 9-11, certainly we were not responsible for any of the airline schedules, any of the decisions they made to divert any of the security elements. You know, that was not the pervue of Air Traffic.

MR. AZZARELLO: Was it part of the pervue of Air Traffic, though, to ensure the safe transportation of passengers from point A to point B in international air spaces?

MS. SCHUESSLER: If they--the aircraft and by extension, yes, that would be the passengers.

MR. AZZARELLO: So that would include the passengers? So that's why I'm just trying to figure out wouldn't that be something to consider

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the safety of the aircraft, then it's passengers were a concern or the FAA, that they would maybe want to consider themselves--who, the Centers, having the Center controllers call the--and tell the pilots they might want to think about--

MS. SCHUESSLER: Yeah, I understand what you're saying, but that certainly was not the paradigm that we ran the national air space system prior to September 11th. You know, that was the responsibility solely of the airlines. If they had disturbances in the cabin, for instance, we would respond to whatever the pilots needs, whatever the airlines' needs were, you know, but our responsibility is not to deal with the immediate situation in the cabin.

MR. AZZARELLO: Okay, but that's a different situation than 9-11. Is there something about the paradigm or the culture or the relationships between the airline companies and the FAA prior to 9-11 that would have led the FAA or you in particular to feel constrained to implement that type of decision and say, hey, let's us, the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

FAA, tour our Centers, have them contact the pilots and tell them listen, you might want to see if you can secure your cockpit. You want them to be aware of an invasion?

MS. SCHUESSLER: No. Again, I don't see that as an Air Traffic responsibility, an FAA responsibility. The airlines are aware of what's happening in the system, and certainly it's their role and responsibility to share that information and expectations with the pilot, not the FAA.

MR. AZZARELLO: On American 77, which was actually--we know in hindsight was the aircraft that hit the Pentagon, there's conversations going on at the 25 position, I guess. Would that be the relevant one for Indy Center? 25 back there?

MS. SCHUESSLER: Yeah.

MR. AZZARELLO: I think that's supposed to be Indy. Can you take a look at that one?

MR. KARA: 25A is Denzel Simmons.

MR. AZZARELLO: Just wanted to make sure if there's any additional--jars your recollection or if it was brought to your attention or somebody

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

else's, or maybe someone on the floor. Apparently they were looking for 77 that morning?

MS. SCHUESSLER: Yes.

MR. AZZARELLO: Prior to its impact at the Pentagon, Jeff was able to time this off of the FAA tapes to see what time this actually occurred. It's roughly 9:21 a.m. So it's about 17 or 18 minutes before impact, so that would put impact 17, 18 minutes after the second crash in New York. This is Denzel Simmons from Command Center. He's called Dulles to talk to Mark Mecides, and they're asking about American 77. Dulles, anything unusual he wants to know with them coming out of departure. And this is Mark Mecides, "Not that I'm aware of. Is there something you guys need to tell me?" And then he says, "Well, you know what's going on here, right?" And he says, "Oh, very much so, Mark." And Denzel says, "Okay, all right, American 77. We're trying to find him, trying to find out what's the latest we had on him. We've got a couple of airplanes that we can't seem to locate." He says, "You know about 11 went in already and another one

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

went in, and we don't know about 77 where he's at and what he's doing." He hangs on while Mark checks to see if there's any paperwork to indicate that he left the ground. Doesn't think he's on the ground because they don't have any paperwork on him. They're surmizing that at least he took off, and then there's some conversation about whether he's just appeared or reappeared on somebody's radar scope west of West Virginia. Want to clear that up.

That's 25A and by parallel, almost simultaneously, the 25B position, somebody's talking to--this is Bob, and I might be wrong, at the Command Center because we don't have anybody named Bob. But there's a Rob Rasky or Race, who was working there?

MS. SCHUESSLER: Rasky?

MR. AZZARELLO: Rasky maybe? I'll show you the list that we have. We're trying to figure out--that might be a typo. They might have written Bob, but it might actually be Rob?

MS. SCHUESSLER: Yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: And somebody noted that they didn't think there was a Bob working that day. This is the roster that Shirley Miller gave us of the people working at Command Center that day, and obviously the managers and TMO's, the ones that I tallied, so those who are working. And Rob, I see a Rob Rasky. I don't see any other.

MS. SCHUESSLER: Yeah, that's probably right.

MR. AZZARELLO: There's a Robert Williams, but he wouldn't be sitting at that position.

MS. SCHUESSLER: No, no.

MR. AZZARELLO: Whatever it is, it's somebody from Command Center talking to the gentleman named Andy at the Indy Center, and he calls up and he says, "This is Command Center. I need you to tell me anything or everything you can about 77, where he is and if you have radar or not." We could just go down to they said we were talking to him right in the vicinity of Henderson. And then the person from the Indy Center I believe says, "I guess we were talking to him in the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

vicinity of Henderson, HNM. We lost communication on radar with him. Hang on, and I'm going to have the Ops manager tell you the story." Then the Ops manager gets on, "Hello, Command Center." "Yes, sir." The Ops manager at Indy, "This is John Thomas." He identifies himself. "Ops manager, I think we need to let everybody know this right away if they don't already. American 77 was over just west of Charleston, West Virginia, 3:50. It's a heavy Boeing 752 and disappeared off our radar scope about 12:56 Zulu." It's 8:56 Eastern time, which is in between the first and second impacts on the Trade Center. Along with lost frequency. We were treating it as a lost not--procedures to notify Search and Rescue and what-not when American Airlines told us they had some aircraft or an aircraft hijacked. We now believe that the aircraft may have been hijacked, although no one has, you know, we have nothing to verify that. But with the World Trade Center, we could have another loose aircraft out there somewhere. And then at the time of the loss, they want to know--Center

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

asks, Command Center asks what altitude was he on, and they say flight level 350. And then Indy says, "He just lost primary also?" I'm going to ask the question from Command Center, and Indy says, "Lost all, yes, lost no primary or that we could see. Of course, we wouldn't necessarily be able to up the primary there anyway." And then they just sort of rehash what time this was that they lost primary and when they lost them at 12:56 Zulu. No ELT in their report.

It says, "Okay, any more information you get I'd appreciate it and I'll forward this immediately up to the--it says NOMEN, but it sounds like it's probably the NOM, and everybody that's standing up there. When we read this, hearing about how you were gathering in the center of the floor, we thought that maybe this was the type of information that was passed--when you said passed to the NOM and the people standing up there. Does that, reading the transcript, refresh your recollection about any of that? I'm not suggesting that you pointed that out with the Pentagon when

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that happened, but does that information on an American--

MS. SCHUESSLER: Well, that was one of the aircrafts certainly we were looking for, and that was one of the aircraft we had on our whiteboard, and, you know, as I say, they thought initially that the aircraft had crashed, and they started search and rescue efforts to my recollection. You know, so we thought the aircraft was already down. But again, it was up on the whiteboard waiting final dispensation before we, you know, totally discounted it.

MR. AZZARELLO: And I guess that leads us to one of the follow-ups that Miles was talking about before, and that is do you have a mechanism in place, either you or any of the other managers there that day, to ensure that any of that type of information that's going to the various consoles is making its way to the decision-makers, to the managers. What mechanism if any did you have to implement that?

MS. SCHUESSLER: Well, kind of on the fly,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

at that point, the specialists were trying to feed the information to the MTMO's.

MR. AZZARELLO: Specialists would be the people at the consoles, like the center area.

MS. SCHUESSLER: Correct, right. So they were trying to feed that information to say, like, Mike Artiston and Tim Smith. And so as they were getting that information, you know, they were sharing it as we gathered with and perhaps prior to, depending on where I was and what was going on. Again that's the reason I put Ellen in in the NOM position to free Ben up to be responsible for the operational quarters. So, yes, they would perhaps share that information with Ben, and then we would try and pull all our cells together periodically to share the information that we had received so far, and that included information that John could share from a headquarters perspective.

MR. AZZARELLO: John White.

MS. SCHUESSLER: John White, correct.

MR. AZZARELLO: So if I can recap it to try and understand it. The console specialists

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were expected to or pass the information to the NTMO's. Was that pursuant to instructions that came from either you or another manager?

MS. SCHUESSLER: That's normal protocol, you know. Again, you know, through the chain of command, it's typical a specialist would report information, especially of an unusual nature to the NTMO. The NTMO would report the information to the NOM.

MR. AZZARELLO: But I guess there's one caveat there that typically they wouldn't report like momentary loss or short period loss or--. How did they then learn that this is something that now they should be telling the NTMO's, reporting what they ordinarily would do.

MS. SCHUESSLER: Because in one of our little huddles, we said okay, let's go out to the local facilities and ask them to report that information. So the specialist went out and retrieved that information. But the other thing that's unusual about this particular day and the protocol, yes, the specialists would report that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information up to the NTMO, but remember typically speaking you may have one unusual circumstance of piece of information being fed at the same time. You know, it's not common, but you may have, you know, two or three, but certainly with the vast amount of information we were receiving that day, you know, we had more than one or two specialists reporting that same or conflicting information to the NTMO, and that's to Ben, and then collectively to all of us.

MR. AZZARELLO: And what was the mechanism again that you said you used to make sure that whatever that information was was reported to headquarters here? That was John White?

MS. SCHUESSLER: John White, yes, and again as I remember Lorain was assigned to provide assistance to him and whatever his needs were.

MR. AZZARELLO: And was that John White open a line with headquarters? Was that also looked upon as the way that you could get information to headquarters? That maybe you worked that NOM--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Right.

MR. AZZARELLO: And how would John get that information being he was sort of looping the phone back to Lorain? How would he get that back to you?

MS. SCHUESSLER: Well, sometimes people, and depending on again what we were all doing at the time, sometimes it would be funneled through Lorain, sometimes, you know, it was a loud enough conversation that he would hear that information and feed it up, but typically through Lorain or somebody would walk over to him and make sure headquarters was aware of it.

MR. AZZARELLO: You did say earlier that there was a report that came in at some point that morning about a bomb on board. That actually was one of the reports that came from United 93. There might have been others, but what if anything do you recall hearing about United 93 before it crashed in Pennsylvania that you would be able to connect to the flight that crashed in Pennsylvania?

MS. SCHUESSLER: I'm not sure that I can

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

think of anything that I would remember to connect with United 93.

MR. AZZARELLO: Well, what's your recollection of the situational awareness, you know, both generally and you personally on the floor regarding the last one that crashed in Pennsylvania?

MS. SCHUESSLER: Well, again, that was one of several that was still missing. I remember at some point, but I couldn't tell you when, when somebody thought that that was confirmed that it was United that went into the ground.

MR. AZZARELLO: Would before it went into the ground, Cleveland Center had reported to the Command Center about hearing screaming on board, hearing the screaming on frequency as well as the report of a bomb on board. Do you recall that reaching you on the floor that morning prior to the crash of 93?

MS. SCHUESSLER: I remember receiving the information on the screening. Whether the bomb was part of that, it could have been, I don't know.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. SCHAEFFER: Linda, do you recall the Command Center having situational awareness on where 93 was or focused attention at all on United 93?

MS. SCHUESSLER: I mean I don't remember that being one that stood out. I just remember that being one that was part of the collection of aircraft we were trying to try and find out where the aircraft was. And I think that was the one that we thought had maybe gone in earlier and perhaps it really did.

MR. AZZARELLO: Where do you think it had gone in?

MS. SCHUESSLER: Well, if I remember correctly, that's the one we thought had crashed earlier than the actual crash time. I mean we found that out much later I think.

MR. AZZARELLO: Where do you think it crashed, on the ground or in one of the Trade Center buildings?

MS. SCHUESSLER: On the ground.

MR. AZZARELLO: On the ground?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Yeah.

MR. AZZARELLO: Do you remember if it was reported to Command Center before the transponder was shut off? With that background, do you remember if anybody was trying to track it up on the TSD after it was reported?

MS. SCHUESSLER: Well, we couldn't have tracked that.

MR. AZZARELLO: Well, couldn't you have called up the call sign to see at least where the PSD reported was?

MS. SCHUESSLER: Yeah, but that is based on, you know, kind of future information, and you wouldn't have a target.

MR. AZZARELLO: At least give you some time lag information, isn't it, if it's transponder? It's based on the host radar data feed.

MS. SCHUESSLER: Yeah, and I don't know what the time lag is. I don't remember we even thought about putting a tag on United 93. They may have done that at the specialist position, but I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

don't remember it being up on the TSD.

MR. AZZARELLO: Now you say John White was one of the avenues, or the avenue used to sort of have a flow of information between Command Center and headquarters that day, correct?

MS. SCHUESSLER: Yes.

MR. AZZARELLO: So they would have situational awareness of what you knew and vice versa. Is that fair to say?

MS. SCHUESSLER: Right.

MR. AZZARELLO: John White was on the phone with headquarters that morning specifically discussing United 93 at least as early as 9:34 a.m., which is in the transcript here, and I'll show you the passage where John's on here.

MS. SCHUESSLER: United 93 is the last one that went in, right?

MR. AZZARELLO: Right.

MR. KARA: Right.

MR. AZZARELLO: It was asked by Jeff Griffith to man the phone on the headquarters side.

MS. SCHUESSLER: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Jeff was in earlier. I can show you by reference that it was Jeff. This is an FAA transcript by the way that was provided to the Commission on October 21st of last year. And early on, it's New York Center is talking to Command Center, and I'll show you where Jeff comes on. Command Center East, Mike Artist answers the phone and says, "Mike, this is Nancy. I have Jeff Griffith on the line. You need to talk to either Linda or John." And Mike says, "All right. Linda is down here. John's right here. Hang on one second." And John gets on. John's on with Jeff citing a 918, and then Jeff's--sort of talking about--Jeff wants a number where he can call any time so he can reach John and someone at the Command Center. He gives them this number, 708-5144 will be open all the time. He says he's been calling that one. It's ringing off the hook, so make sure someone answers it, and wants to know about restrictions in the New York area, what the Air Traffic Control picture is there, and John informs him it's ATCO in New York, talking about

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the security expected at their facility. And when the first air-ground stop from New York Center, John tells him on all New York arrivals and then talking about an inventory of all the aircraft in the first year. They say we still have some suspected aircraft, that there's a third aircraft that Delta out of Boston that we're still checking on and we haven't really established a second aircraft that hit the second tower.

Then John says, "It's either an American or United. We don't know which." Jeff says, "It's United 175." So you can--that the departure point and destination. If that's the flow of information, at roughly 9:22 from headquarters to Command Center at least telling them what they believe the second--the call sign of the second aircraft. Was there any mechanisms to sort of get that down from here to the pit in the Severe Weather area so they could at least put that as reported by headquarters as to what they think happened to--

MS. SCHUESSLER: Well, the mechanism

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

certainly would have been, you know, Lorain being the runner for John, you know, to share that information. Whether it was shared by--

MR. AZZARELLO: Another--

MS. SCHUESSLER: Yeah, couldn't tell you.

MR. AZZARELLO: So then they talked about its departure and destination point for the United. And then Jeff says, "There's a question about Chicago to L.A. flight. Can you check with Chicago Center or someone. In fact what we need to do is get awareness up to all the TMC's of the Traffic Management units and report any unusual circumstances direct to the Command Center of loss of identification or any radio or any unusual radio transmissions." Do you recall is that what sort of generated--

MS. SCHUESSLER: It could have, yeah. Don't know.

MR. AZZARELLO: Now John says I have one of those reports for you. So this is something that John knows of. How we know them, I'm not quite sure. It's not apparent from the transcript.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

He says go ahead, and John says American 77. This is roughly 9:25. And we see in the other transcripts from the 25 position that we looked at before, at 9:21, they're looking for it, and they called Dulles, so at least, you know, for a period of time now, at least as early as 9:21, they're looking for 77. And John gives them the information. It's Dulles to Los Angeles. The flight level west to west Charleston, West Virginia, and at Indy's air space, they lost the target and then they'll go back and look for it. They don't have a primary. Is that sort of near as what we saw in the 25 position, and he tell him about 10 minutes ago is when they got the report. So I guess roughly that sort of puts it in reference.

And then they talk about--ground stuff. John is telling Jeff about threatening tape, and I guess they were trying to confirm what was said on that threatening tape. Jeff talks about getting the information out to all the Centers to report any unusual transmissions or any loss of radio.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And then at 9:34 is when you see John tells Doug,
Doug who's now jumped on--

MS. SCHUESSLER: And Doug is replacing
Jeff?

MR. AZZARELLO: Yeah, he says--John's
asking Jeff, he says, "This Doug sitting next to
Jeff."

MS. SCHUESSLER: Okay.

MR. AZZARELLO: So he's sitting next to
him and he's on the phone. John White just
initiated a ground stop. He's reporting this at
9:27, and they talk about requesting information
about other aircraft and they're checking the
Chicago departures for--there's a problem about the
Chicago to L.A. flight. And he says, "I'm setting
the phone down. I won't hang up," and then he's
setting it down. And then he asks for Jeff.
Doug's on the line again, and he says, "Doug, we
just had another report. United 93, it was in
Cleveland Center's air space somewhere around Dryer
intersection. Just reported they heard screaming
on the frequency and that they have a bomb on board

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the aircraft. Departed Newark and went to San Francisco was the report.

So this starts at 9:34 and they continue to discuss that up through 10:03, which is the point of impact of 93. What do you recall if anything about that information on 93 coming to your attention?

MS. SCHUESSLER: Well, I remember, you know, hearing some information about there may have been something on the frequency that was unclear, but I think that's about the same time frame that we had already issued the ground stop, and that was about the same time frame that we also issued the notification to get all airborne aircraft on the ground, you know, to go ahead and clear out the net.

MR. AZZARELLO: Is there some sort of tracking of 93? Just to see if any of this sort of jars your recollection. Some of it already was brought to your attention, somebody carried the message for him. "United 93, we spoke about it before," John says. "He's reversing course over

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Akron. They just lost his transponder, and he's heading east about now." Wanted to know what kind of airplane. He identifies 757 and the aircraft is descending. Doug confirms he's descending. Correct. And then Doug says, "You heard that somebody crashed on the Pentagon." He says, "Yeah, I see the picture on NBC." Talks about diverting all international aircraft in the U.S., diverting them, then they come back to 93. "Okay, United 93, John says, go ahead." And this is roughly 9:46. "He's 29 minutes out of Washington, D.C. 29 minutes out of D.C. and tracking towards us. This is the one that reversed course in Ohio. That's all I have." Doug says, "Keep someone on the line at all times." "Back to United 93. At 9:48, United 93 is 29 minutes out of where?" John says, "He's headed towards the Washington area and he was at flight level 350. He turned around in Akron. He was tracking towards the Washington area at this time." Doug asks type aircraft again. John tells him the type, and Doug says, "They're pulling Jeff away to talk about United 93." John says, "Do we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

want to think about scrambling aircraft?" Doug replied, "I don't know." And John says, "That's a decision somebody's going to have to make probably in the next 10 minutes." Doug tells him everybody just left the room at that point and then they go into another report about the Delta 1989.

About whether or not it's a hijack or not and where he's headed. And then we come back to 93. There's a reference Doug is saying John--talking to Monty now about scrambling. John says that he was advised that they're scrambling in the Washington and New York area. That's what he's been told. Do you know if you learned any of that information about scrambling in those areas from somebody?

MS. SCHUESSLER: Well, I remember we did get some information that they were scrambling, but I couldn't tell you specifics or time frames.

MR. AZZARELLO: Then at roughly 9:56, John White says, "We don't have a position any longer on United 93. He did pass right over Pittsburgh. That was the last time we saw him. That was the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

general area." And then John says, "United 93 is 20 miles northwest of Johnsville." Doug confirms that on primary. He says, "Well, that's a report from another aircraft."

That pretty much takes us up through 10 o'clock. As you can see, there's conversations though from 9:34 through 10 o'clock. And you could see John is getting information, and it appears is getting information fed to him by somebody who's watching it.

MS. SCHUESSLER: And then I'm guessing, you have to find out, but I suspect he's probably getting it from one of the specialists who's been in contact with the local facilities. You know, but again, from a Command Center perspective, I think by that time, we have taken all the actions that we can take to keep aircraft on the ground and to get them on the ground safely. So at this point at that time frame, all we're doing is monitoring and sharing information.

MR. AZZARELLO: Just want to get a sense though of your situational awareness. Were you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546 6666

plugged into this information that John was getting about 93 amongst the other things he talked about?

MS. SCHUESSLER: Well, I remember John sharing information with Jeff and in the back of my mind, I was thinking it was more American 11, you know, how far out he is, that maybe it was United 93. You know, I don't remember at this point.

MR. AZZARELLO: And then were you always looking right in the center here?

MS. SCHUESSLER: Generally speaking, or, you know, if talking to MBAA and others, you know, within probably a couple of feet, you know, generally speaking, I stayed in that general location.

MR. SCHAEFFER: And did you stay here on the floor the whole morning?

MS. SCHUESSLER: Yeah.

MR. AZZARELLO: Going forward that morning, I guess, when John's talking about the scrambling, you know, passing to Doug the bit about scrambling, do you remember if he consulted you, or did Ben consult with you at any point about that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

issue, whether somebody in the FAA headquarters, or else we should be addressing the issue of whether to scramble on 93?

MS. SCHUESSLER: That specific flight, no.

MR. AZZARELLO: Any flight?

MS. SCHUESSLER: I don't recall those conversations taking place, no.

MR. AZZARELLO: Do you recall headquarters wanting a report as the morning progressed about how many aircraft were left in the international air space system once the decision was made to ground all aircraft?

MS. SCHUESSLER: Yeah, I remember those type of questions being asked, and John would provide that information.

MR. AZZARELLO: And how is that information being obtained at Command Center?

MS. SCHUESSLER: Yeah, on the TSD, there's a feature that you can access and it will give you the number of aircrafts that are airborne.

MR. AZZARELLO: That will tell you whether it was--and that's based on the host B--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Right.

MR. AZZARELLO: And do you remember any other specific requests coming into Command Center from FAA headquarters about closing down the--air space system?

MS. SCHUESSLER: Closing down.

MR. AZZARELLO: Grounding all aircraft, taking them out. Any other further requests from headquarters to Command Center on that?

MS. SCHUESSLER: Not that I recall, no.

MR. AZZARELLO: Just sharing your information on how the system--how the planes were coming down out of the systems?

MS. SCHUESSLER: Yeah, you know, we had collectively made the decision to go ahead and land all the aircraft, and I remember John sharing that information with headquarters to make sure they were informed of what actions we thought were appropriate.

MR. AZZARELLO: There's a reference in one of the transcripts of either the 14th or 15th position, New York or Boston, just after the second

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

aircraft. Someone from the center reports, one of those two Centers, they're saying do the procedural series and then we have two of them now. What do you think about those--should we think about getting the military involved? How about you folks down there? Do you have any knowledge on that or any input on that, and the person at Command Center console says one of the supervisors is going to the--right now. In context, it looked like they might have been referring to you, but they don't use your name. In fact, do you know if that was you?

MS. SCHUESSLER: Well, I don't know. You know, again, you know, we had the Services field personnel out there and we were sharing information, well, periodically. You know, they were coming out to gather information, and they were making the phone calls. But did I say, hey, I think you need to scramble, no, I did not do that.

MR. AZZARELLO: Yeah, this specific reference was not in the sense of sharing information. It was more of a reference, hey, what

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

about getting military help and then I don't know who they were referring to, but they said sounds like, well, one of the supervisors I think is going to the--now.

MS. SCHUESSLER: Well, and we knew that there were some military aircraft that was scrambling. You know, again, that's not our call to make. That was not the Command Center call to make.

MR. AZZARELLO: The headquarters call.

MS. SCHUESSLER: It was the headquarters call. It was the military call, so we felt like we were sharing pertinent information for them to make those determinations.

MR. SCHAEFFER: Okay, you don't personally recall going into the spaces requesting the military get involved in responding to the events? And if you didn't go, were you aware of anyone else, any other supervisors, going into the--to get the military involved in responding?

MS. SCHUESSLER: Not directly to get the military involved in responding. It was more to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

share the information that we had.

MR. AZZARELLO: Linda, Dave Kenols had a telephone in the Air Traffic suites on the 10th floor that day, separate and apart from the crisis center and the WOC, and respectfully I'll refer to I guess, for a lack of a better term, as the Kenols' telecon or the Air Traffic telecon.

MS. SCHUESSLER: Was that the one that Jeff was on, or no?

MR. AZZARELLO: It was actually--

MR. KARA: A different one.

MS. SCHUESSLER: A different one.

MR. AZZARELLO: Different one.

MS. SCHUESSLER: Okay.

MR. AZZARELLO: In fact it's referenced in the book ground-stop--referenced by numerous individuals we've interviewed.

MR. KARA: Yeah, Jeff was here in the crisis center and was on the--

MR. BROWN: Primarily focused up here--

MR. KARA: --on the tactical net.

MS. SCHUESSLER: He was in the old WOC

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

then.

MR. KARA: Yes.

MR. AZZARELLO: They stand up as a crisis center in the event of an accident or a hijack.

MR. KARA: The Kenols' telecon was ongoing then until Peacock's--

MR. AZZARELLO: Between Peacock and Griffith's office, Dave set up a telecon in here.

MR. KARA: Okay. Were you aware that there were two different--

MS. SCHUESSLER: Yes, and that's the reason I say I know I was called to this particular telecon and I told them that I couldn't staff that position, but certainly I'd have somebody on there.

MR. AZZARELLO: Was that Kenols--do you know if that's what happened--

MS. SCHUESSLER: No, don't know.

MR. AZZARELLO: Do you know if Dave--we've interviewed Dave and he was fairly certain that he did have somebody on from Command Center but couldn't identify who.

MS. SCHUESSLER: Other than that, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

couldn't tell you either.

MR. SCHAEFFER: Do you know him well?

MS. SCHUESSLER: David? Yes.

MR. SCHAEFFER: So if it was him on the line, you recall that in fact if that was him, or you just don't recall?

MS. SCHUESSLER: I don't recall who it was. Yes, I can't quite--I know somebody wanted me on the line. I remember somebody answering the phone from the Command Center and, you know, I answered the line and whoever it was said I need you to stay on this line because we're going to have, and I don't know if they used these words, but the implication was certainly in my mind that we're going to have an open telecon. And I knew that we already had John on one, and I had other duties to tend to, so I wasn't going to do it, but I would make sure that it gets staffed.

MR. AZZARELLO: Did you understand the line that John was on to be sort of an operational situational awareness line?

MS. SCHUESSLER: Well, I knew it was with

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Jeff Griffith, so, yes, from an air traffic perspective, it was very operational.

MR. AZZARELLO: So what was your understanding of that other telecon that they wanted you on from headquarters?

MS. SCHUESSLER: Didn't know and at the time, you know, it didn't--I mean it mattered that we have somebody on there because they wanted a presence from the Command Center.

MR. AZZARELLO: What would be the purpose if Dave Kenols is running a telecon knowing his position on that day? What would be the purpose of his telecon? Would that be for operational purposes, administration or otherwise?

MS. SCHUESSLER: I don't know.

MR. AZZARELLO: In your opinion, did you think there was a need to have two open lines with headquarters on that day?

MS. SCHUESSLER: Well, to the best of my recollection, most of the information that I remember flowing back and forth was the telecon that John was on. So I'm not sure what information

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was on this other line.

MR. AZZARELLO: Do you think there'd be a need for two lines though between--

MS. SCHUESSLER: Well, I don't know. It depends. You know, it depends on if--I don't know. You know, not knowing how busy the line that John was on. I mean it was so busy that they couldn't share the information and in a timely enough manner maybe they needed another line to discuss various situations. So it was possible.

MR. SCHAEFFER: The telecon that John was on to the WOC, you say that was according to standard protocols for a situation that would be standard?

MS. SCHUESSLER: Yeah.

MR. SCHAEFFER: Would it be outside of the standard to establish other telecons if necessary?

MS. SCHUESSLER: Oh, no, no. That would be part of the norm.

MR. SCHAEFFER: Part of the norm.

MS. SCHUESSLER: But again, they may have, not knowing, but they may have had a situation on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the line that John White was on that they needed to explore further, but they needed to continue to address maybe realtime tactical information and the other line could be used to continue sharing information. So it's not inconceivable for me to have two lines, but I don't know what was on the second line.

MR. AZZARELLO: During the real sort of height of the hijackings that morning, whether it was say between 8:30 and--let's say from the first hijacking to when the air space was cleared and all aircraft on the ground roughly. Were you on any of the lines for any significant amount of time, meaning more than five or 10 minutes?

MS. SCHUESSLER: No.

MR. AZZARELLO: We just ask that because we just want to make sure we're not missing something. We know John White's on the one open line at the NTMO position. But we don't see that you're on any open line or in any prolonged communication.

MS. SCHUESSLER: That's true because if

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you remember right after the aircraft got down, you know, we had certain aircraft that we needed to get back to Washington, key government officials. We had Medo-Vac. We had, you know, the situation certainly in New York that we were trying to get lifeguards. We were getting phone calls on lifeguard aircraft and could we allow that aircraft to go in. We were getting calls about military aircraft. You know, so a lot of that is what I was either fielding questions or sharing information.

MR. AZZARELLO: Did you spend the majority of that time on the floor area?

MS. SCHUESSLER: Oh, yeah. It was all on the floor.

MR. AZZARELLO: So you didn't go back to like one of the admin offices that get on a hard line or a phone there.

MS. SCHUESSLER: No, no.

MR. AZZARELLO: And to the extent that Dave Kenols did have somebody from Command Center on his telecon, it would not have been you. Is it fair for us to assume that?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: That's correct.

MR. AZZARELLO: It would've been someone else.

MS. SCHUESSLER: That's correct.

MR. AZZARELLO: Do you know who that someone might have been, or you don't know?

MS. SCHUESSLER: No, I can't remember at this point.

MR. AZZARELLO: Okay. Anyone want to ask questions?

MR. SCHAEFFER: Just in terms of--the conduit to the ROCs terminating to the Command Center, who would they be coming in to?

MS. SCHUESSLER: They wouldn't be coming in to.

MR. SCHAEFFER: Not at all?

MS. SCHUESSLER: The ROC would not generally speaking have interfaced with the Command Center. The ROC is the interface between field facilities and the regions and headquarters.

MR. SCHAEFFER: But do you recall then on 9-11 any information flow to and from any ROC?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: I don't think so. You know, the ROC would have gone up to the WOC, and then all of that would have been cascaded down through the headquarters--

MR. SCHAEFFER: Oh, sure, sure it would.

MS. SCHUESSLER: --telecon.

MR. AZZARELLO: In the aftermath of the attacks of 9-11 and the weeks that followed, we know there was substantial efforts on the part of the FAA to sort of--among other things obviously there was a group of people who were focused on pulling together a summary of events for a number of reasons. Obviously to memorialize a rather historic and important event, to prepare--

MS. SCHUESSLER: Oh, we thought we did good. That was the other thing.

MR. AZZARELLO: To prepare Administrative Garvey, things for her appearance and testimony before Congress, and obviously not at that point because they didn't know about it, but at some point thereafter Administrator Garvey came by--after she left the position came back before

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the Commission in May also to testify. Were you involved in any of that, the efforts in the aftermath to try to pull together a chronology of events as it affected all of the FAA facilities in management levels.

MS. SCHUESSLER: Chronology of events, I would say no. In preparation for Secretary Manetta's testimony, I would say yes. Did not believe there was any role in preparation for Administrator Garvey testimony.

MR. AZZARELLO: So you would've been involved in the preparation of Secretary Manetta's?

MS. SCHUESSLER: Just from an Air Traffic group perspective. I'm an Air Traffic representative. It was part of some of the discussions.

MR. AZZARELLO: You were there at the Center preparing him for a testimony before Congress?

MS. SCHUESSLER: Yes.

MR. SCHAEFFER: How about for our testimony before the Commission?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: For--

MR. SCHAEFFER: For the Commission, Secretary Manetta's and Ms. Garvey's testimony before the Commission.

MS. SCHUESSLER: I was not involved with Administrator Garvey at all, and I know on two different occasions I went over to have discussions with Secretary Manetta and his staff.

MR. AZZARELLO: Those discussions that Secretary Manetta and his staff, were any of those discussions focused on the facts of the day of, what occurred the day of 9-11?

MS. SCHUESSLER: Well, I'm sure they were focused on the facts, but it was quite honestly a very, very minute part of it really focused on the Air Traffic actions per se.

MR. AZZARELLO: Small part of it you're saying?

MS. SCHUESSLER: Yeah.

MR. AZZARELLO: How about one of the issues that was discussed in the aftermath and as we've been told by some of the people at FAA

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

headquarters that they were looking at issues like the obvious, like when did we, the FAA as a system, learned of each of the four hijacked aircraft, and that in turn when did we notify the military about each of the four hijacked aircraft so that they could take whatever action may be appropriate.

MS. SCHUESSLER: Sure. I think that's probably been one of the questions that continually gets asked, when was the military notified of any of the events.

MR. AZZARELLO: In the FAA's effort to put that together after 9-11, were you consulted or involved in any of that, about your knowledge of events?

MS. SCHUESSLER: Certainly I was asked to the best of my recollection what I remember, and there were other people gathering information from--and I did not go out and talk to anybody else to ascertain, you know, what they remember. They came to me and said, okay, Linda, what do you remember in the sequence of events.

MR. AZZARELLO: Who were those people that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were trying to gather your recollections for that purpose?

MS. SCHUESSLER: Some of that was the AT20 staff.

MR. AZZARELLO: Is that Dave Kenols' staff?

MS. SCHUESSLER: Yes.

MR. AZZARELLO: Do you remember who it was?

MS. SCHUESSLER: Well, I know Tony Ferronti and probably Doug Gould.

MR. KARA: Do you recall Darlene Freeman getting involved at all from the Administrator's office?

MS. SCHUESSLER: I never had any contact with her, no.

MR. KARA: Then or now?

MS. SCHUESSLER: No, no, not at all.

MR. AZZARELLO: And did Dave Kenols staff, be it Tony Ferronti and/or Doug Gould, did they speak with you specifically about the issue of notification to the military, your knowledge or

your recognition of it?

MS. SCHUESSLER: Yeah, yeah.

MR. AZZARELLO: What was the nature of their discussions?

MS. SCHUESSLER: You know, what do you remember about when the military was notified, and, you know, when I would walk through the Services--aspect of it out from the Command Center. And that was coupled with some of the information that we had heard through the specialists as far as the facilities up in the northeast, and that was the extent of it I believe.

MR. AZZARELLO: What was your knowledge of notification to the military?

MS. SCHUESSLER: Well, we did not make a formal notification from the Command Center. You know, our notification was information sharing with the Air Traffic Services cell and the fact that we received information, and again, I don't know whether it was the Boston Center or what New England type facility, but we did have information that one of the Air Force majors--that they had

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

been notified.

MR. AZZARELLO: Did you find it at all unusual or normal that they would come to you from your Command Center perspective that day and ask you about what you knew about notification to the military?

MS. SCHUESSLER: No, and again we're just gathering information on today's events.

MR. AZZARELLO: I'm a little confused about--you said to us that your understanding of the protocol is that it wouldn't have been your role to do so.

MS. SCHUESSLER: Right.

MR. AZZARELLO: So were they coming to you saying that look did you have discussions. Well, we know it's not your function as laid out, but we want to see if you did tell the military?

MS. SCHUESSLER: I don't remember them saying specifically we know it's not your role and responsibility, but, you know, what notification did you make if any. I don't think it was framed that way. It was just did you have contact with

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the military. If so, what did it look like.

MR. AZZARELLO: Okay, and when you had those discussions, though, did they ask you about when you had those contacts with the military, did you ask them to scramble--

MS. SCHUESSLER: I don't know whether they asked that or not, but I know we did not ask the military to scramble.

MR. AZZARELLO: Did you make that clear to the AAT20 people who were asking you about your conversations with the military on 9-11 in terms of having notification sent?

MS. SCHUESSLER: Well, I think so because what we did at the Command Center was share the information that we had with the Service itself. We did not notify DOD.

MR. AZZARELLO: Did you get the sense from the questions that the AAT20 people were asking you, did you get the sense that they were trying to find out whether or not you or anyone at the Command Center made a request to the military for fighter assistance, whether it be formal or

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

informal?

MS. SCHUESSLER: Yeah, because again I think one of the questions is being asked in a lot of circles is did the FAA notify the military, and if so, when did it happen.

MR. AZZARELLO: And so yet you did get that that was pretty much one of the issues--was trying to find out if anyone at the Command Center had asked for any official assistance in terms of getting a fighter aircraft?

MS. SCHUESSLER: Right.

MR. AZZARELLO: And where we can clearly then understand from you that you made it clear to them that you did not request any military assistance for fighter aircraft to scramble on any of the aircraft that day?

MS. SCHUESSLER: I can't tell whether I told them point blank no, we did not.

MR. AZZARELLO: What do you remember? I don't want to--

MS. SCHUESSLER: You know, again, I don't remember that I said no we did not make that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

request because I don't know that their question was that specific. I think their question was what notification did you make from the Command Center to the military if any.

MR. AZZARELLO: Did they elaborate on what they meant by notification, or did they say information sharing? What about requests? Did they ask you specific questions? Did you make any request of the military?

MS. SCHUESSLER: I don't know. Yeah, I don't know whether they asked me that specific question or not.

MR. AZZARELLO: Do you think they left the meeting with you with the impression that military assistance was requested by you and the Command Center?

MS. SCHUESSLER: No, no, I don't believe they left with that impression.

MR. AZZARELLO: Do you think they should have left with a clear impression that you did not ask for military assistance?

MS. SCHUESSLER: Correct.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. LEWIS: When ATT20, when they did that re-visit with that, when was that roughly?

MS. SCHUESSLER: Oh, it's been a while. I don't know.

MR. LEWIS: Well, was it like in the immediate aftermath of the attacks, or was it in 2002, or was it last year?

MS. SCHUESSLER: Well, I do remember it may have been after, you know, as they're trying to pull the information together. It could have been then. Don't remember that but certainly do remember it after the initial round of hearings when it became very apparent, you know, one of the questions was, you know, when did the FAA notify the military.

MR. LEWIS: After the initial May, 2003 Commission hearings. Is that correct?

MS. SCHUESSLER: But the time frame, just the initial hearing--

MR. LEWIS: Of the Commission hearings?

MS. SCHUESSLER: Yes.

MR. LEWIS: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: Let me start with this list
and--

MR. AZZARELLO: I want to just ask if you remember--in the immediate aftermath of events in terms of the testimony that was requested on the Hill, Congress, from both the FAA and the military is who, what, when, and then when was the military notified. Do you remember if those questions could have been posed to you in conjunction with that or early on?

MS. SCHUESSLER: Yeah, early on as they're gathering information. You know, I can't remember that being posed, but as we're sharing information, this is what we get at the Command Center. I would imagine that would be one of the questions asked, but I don't know that.

MR. AZZARELLO: Do you remember this is all in the summary that the AAT20 put together on September 17th, it's dated. Do you remember if you were ever consulted on preparation, which it has notifications to the military on two of the four flights?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. LEWIS: Are you familiar with that, Linda?

MS. SCHUESSLER: Now that I'm looking. I think I have subsequently seen this, but it was probably--the first time I saw this was when you guys first came into the FAA to, you know, start the preliminary work to find out the sequence of events, and that's probably when I became aware of that.

MR. KARA: This document was contemporary to the testimony that John just mentioned in October of 2001, which is notification to the military prepared in September of 2001. Do you recall having any input to that or seen that?

MS. SCHUESSLER: I think I have probably--well, I don't know. What is this? CIA network. This doesn't seem like a typical FAA--well, a typical Air Traffic log just because CIA network is one here, so I don't--

MR. KARA: Now this appears to be a headquarters compilation of entries from different logs if you will.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Oh, okay, and I'm looking at the date on there, you know. If we're looking at September of '01, I was not in headquarters. I would be at the Command Center, so, no, I don't think I would have seen that.

MR. SCHAEFFER: Linda, as far as the AAT20 leading--basically they led the reconstruction efforts, is that fair to say after 9-11?

MS. SCHUESSLER: Correct.

MR. SCHAEFFER: Within the 2001 time frame following the attacks of 2001, while you were still at the Herndon Command Center, did those folks or did headquarters folks send people out to Command Center to talk to you and any of your personnel about the events of 9-11?

MS. SCHUESSLER: No. Now I know they had routine--I say routine--I know they had contact with Ellen King because Ellen came with the Quality Assurance manager, and she was the focal for the effort of gathering the information for the Command Center.

MR. SCHAEFFER: Do you know what types of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information gathering they were doing with the Herndon Command Center?

MS. SCHUESSLER: Well, some of it was the log information. Some of it was--well, I don't know. You'd have to talk to Ellen because I'm under the assumption that some of it was taped transcripts and that sort of thing as well.

MR. SCHAEFFER: Of those tapes, did you review those tapes? Did you review any of the transcripts of those tapes following the events from the Herndon Command Center?

MS. SCHUESSLER: No.

MR. SCHAEFFER: Did the FBI come out to the Herndon Command Center at all post-9-11?

MS. SCHAEFFER: I don't know. You'd have to talk to Ellen. I do know subsequent to September 11th, the FBI did call us on several occasions the day following and asked us to do several different runs on call signs of aircraft. For instance, you know the second digit is a two. You know, run all the aircraft with the second digit two and send it to this particular number.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

We had a number of those types of--

MR. SCHAEFFER: But not in terms of going back to interview any of your personnel relating to their actions on 9-11?

MS. SCHUESSLER: No.

MR. SCHAEFFER: Okay.

MR. KARA: Linda, you replaced Jeff Griffith, right?

MS. SCHUESSLER: Correct.

MR. KARA: Did you and Jeff have a turnover concerning an on-going conversation he had developed in relationship with General Arnold at Konar?

MS. SCHUESSLER: General Arnold was one of the--if I remember correctly--Jeff tried to introduce me to most of his contacts prior to him leaving, and currently I have relationships with--

MR. KARA: General McKinley?

MS. SCHUESSLER: --General McKinley and General Brussard.

MR. KARA: General--he's the deputy down there, right?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Correct.

MR. KARA: Yeah, but in terms of Jeff and General Arnold had a sustained conversation over time about mixing and matching the two time lines that each agency held, and were told sometimes heated discussions concerning who told who when. Was the flavor of that passed on to you from Jeff?

MS. SCHUESSLER: No, not even aware of any of that.

MR. KARA: And did you continue that kind of dialogue with General Arnold?

MS. SCHUESSLER: No.

MR. KARA: Or with General McKinley leading up to our May, 2003 hearing?

MS. SCHUESSLER: No, General McKinley and I did have a brief conversation just to indicate that, you know, our records have, you know, a little bit different information and, you know, that's the extent of it. We didn't try and marry any data together or have any further dialogue to say, you know, this is what we need to do about it.

MR. KARA: And you were AAT20 in the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

summer of 2002 I think you told us.

MS. SCHUESSLER: I think so.

MR. KARA: At that point in time, NORAD provided this headquarters information that had been developed just subsequent to 9-11 done by an individual named Sherry Gott, and she was asking for clearance for a briefing she was going to give, and she forwarded the information here to two entities. She forwarded it to Major Nix who-within your domain. She also forwarded it to Tony Ferronti to take a look at it, and Tony said we don't have any problems with this. Do you recall that?

MS. SCHUESSLER: No.

MR. KARA: Okay.

MR. SCHAEFFER: Linda, going back to your conversation, do you recall one conversation with General McKinley?

MS. SCHUESSLER: Yes.

MR. SCHAEFFER: Was that before our hearing or was that after our hearing?

MS. SCHUESSLER: To the best of my

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

recollection, it was probably after the hearing, you know, because again, you know, I think that hearing highlighted the fact that we had disparities as far as maybe some of the time frames.

MR. KARA: And those conversations continued subsequent to our visit to headquarters NORAD, within the past month or two?

MS. SCHUESSLER: Yes, not with me.

MR. KARA: Not with you.

MR. AZZARELLO: Was there discussion about different information on time lines, notifications to the military by the FAA?

MS. SCHUESSLER: Yes, yeah.

MR. SCHAEFFER: How did you leave things with General McKinley? How were things left in terms of the--

MS. SCHUESSLER: Just acknowledging the fact that there were differences and, you know, part of the conversation was that he was not the official on September 11th. He was not in that position on September 11th anyway. You know, he

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

came in inheriting that situation. So we just talked, you know. Again we have an information sharing relationship and, you know, contact and after the hearings were over, you know, we just comment on the fact that, you know, that was one of the elements that came out of the hearing, that we have different information on what time the contact was made. But again no dialogue to say oh, we need to change things. Oh, we're concerned about it, you know. This is just the way it is.

MR. SCHAEFFER: Which notification times were the subject of that conversation?

MS. SCHUESSLER: Well, I've forgotten on some of the time frames. If you were to probably go back and look at some of the testimony, and I've forgotten who in the FAA testified one day. I don't know whether it was--

MR. SCHAEFFER: None of those stand out to you as which notification times of the four hijacks were the ones who--

MS. SCHUESSLER: Well, the difference was I think the FAA--one of the time lines had DOD

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notification because of the Otis Air Force Base call. And then there was a time frame I think when NORAD had--it was, I don't know, 15, 20 minutes later that their first notification to--I don't know if it was Konar or NORAD now, occurred. And that was I guess the time gap that came out in the hearings that the FAA and DOD had a difference of what was logged.

MR. SCHAEFFER: How about anything regarding United Airlines 175?

MS. SCHUESSLER: No. We didn't talk about any specific flights. We just talked notification in general.

MR. SCHAEFFER: Did General McKinley call you, or did you initiate contact with him?

MS. SCHUESSLER: I think I probably initiated to the best of my recollection.

MR. AZZARELLO: Did you have any discussions with General McKinley regarding any attempts by either the FAA or the military to try and verify the sources, being that they seemed somewhat flinching?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Well, I think both parties--I think they both felt comfortable that we have already tried to verify with tapes and transcripts and talking to people, so the fact is this is what we show in the difference.

MR. AZZARELLO: So to an extent they were different than the conversation would have been in that each side felt comfortable with their--

MS. SCHUESSLER: Well, I think so because again the sequence of events that day I think in all arenas that yes, we have logs that we're responsible for maintaining, but not all the information on that particular day was put down in the time frame that notification was made. You know, people were making wags as far as the time. Certainly you can validate some of that information with tapes, and I think in both cases that's what we did.

MR. SCHAEFFER: And I'm sorry because I want to go back, and I'm sorry to revisit it, but when we went through your post-9-11 jobs, I was writing down, and maybe I wrote them down wrong,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

but you were tactical operations manager until about May of '02, and that's when you went into AAT20?

MS. SCHUESSLER: Yeah.

MR. SCHAEFFER: And then you were there until November of '02?

MS. SCHUESSLER: Yeah, but then--

MR. SCHAEFFER: And then you were here at headquarters.

MS. SCHUESSLER: Well, at AT20 is also here.

MR. SCHAEFFER: Right.

MS. SCHUESSLER: So I left the commander, came up here and was AT20, and then in November, I replaced Jeff when he retired.

MR. SCHAEFFER: That's AT2.

MS. SCHUESSLER: Correct.

MR. SCHAEFFER: Okay. And you stayed there you said for about four months?

MS. SCHUESSLER: Right, and then went back to the AT20 job.

MR. SCHAEFFER: And that's in the April,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

May '03 period.

MS. SCHUESSLER: I think so.

MR. SCHAEFFER: Okay.

MS. SCHUESSLER: Well, November, December, January, February. Had to be February. February, March time frame. And then went back to AT20.

MR. SCHAEFFER: And then stayed there--I'm just trying to--you're saying following the hearing which was in May of '03, you're talking to General McKinley in your capacity as AT2 or as AAT20?

MS. SCHUESSLER: In that particular case, it's kind of a--it doesn't really matter because one of the things that Jeff did when he retired, he handed off most of the security elements to me. I mean because I had my clearance, and at the time when I was upstairs replacing him, I was assuming the Security roles that he had AT20, or excuse me, of AT2. And so behind me was Bruce Johnson, and then rather than try and get Bruce up to speed, the decision was made by Bill Peacock for me to continue on with the Security role until we filled that position in AT2 permanently. And at that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

point, we'd make that permanent handoff.

MR. SCHAEFFER: Okay.

MR. AZZARELLO: Linda, in some of the military time lines that they compiled, they reference a line of communication between the FAA and the military on the morning of 9-11, referencing particularly the latter two hijacks, the Pentagon and the crash in Pennsylvania. Would you have any insight as to what line do you think they were referring to?

MS. SCHUESSLER: No.

MR. AZZARELLO: Would it be one that you would have heard at the Command Center?

MS. SCHUESSLER: No.

MR. AZZARELLO: Okay. Are there any other comments on that?

MS. SCHUESSLER: No, I was just thinking I know you had talked to Colonel Atkins prior to me. I was under the impression, but maybe incorrectly, that she was on the same line that John was on.

MR. AZZARELLO: On the John White line?

MS. SCHUESSLER: Yes, yes, and that may

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

not be true because she may possibly have set up another line that she's talking to the military on, but she's in the room with some of the FAA folks.

MR. AZZARELLO: How long have you held that impression that Colonel Atkins might have been on the line that John White was on?

MS. SCHUESSLER: Well, I know she was in the headquarters arena.

MR. AZZARELLO: But is that a recently formed impression, or is that one you held as far back as the immediate aftermath of 9-11?

MS. SCHUESSLER: It's been a while. I mean that's part of her role and responsibility as the liaison.

MR. AZZARELLO: What's that? What do you understand her role to be?

MS. SCHUESSLER: Part of her role for the FAA is to be the liaison to the military.

MR. AZZARELLO: Including in a hijack scenario?

MS. SCHUESSLER: Well, no, no. I mean this was obviously more than a hijack scenario.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

She was in the headquarters arena, so she would be one of the resources that the headquarters people would utilize to work through some of the issues on that current day.

MR. KARA: Let me share your impression what we understand based on our talk with Cheryl, and since we've talked about it today, again to refresh this is from Jeff Griffith and Jeff's talking to John where you are out there. The other telecon we talked about was on Dave Kenols' setup down here which was set up in this room right here. We understanding talking to Cheryl Atkins that when she came to the 10th floor, she actually came to this facility here, and over time was talking to whoever she talked to out of her phone bay over here but was in and out of the Dave Kenols' telecon arena. She does not recall going up to this location, but she does recall Jeff from time to time coming down to here. That's our current understanding. We're perfectly willing to change that if you have something different.

MS. SCHUESSLER: No. I mean she and the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

people up in headquarters certainly they know better than I.

MR. KARA: Yeah, and Dave Kenols also thought that she had established her position down there. So we're just curious as to how you gained the impression that her role might have been different than that on 9-11.

MS. SCHUESSLER: Well, and you know it may have been, you know, bits and pieces as far as the information shared with John White. I don't know, but if indeed she was sharing information with people here in headquarters, you know, the conduit between headquarters and the Command Center mainly was through John White. So it wouldn't surprise me at all that information wasn't shared through that avenue.

MR. AZZARELLO: Did that issue come up in connection with your discussions with Kenols' staff about recreating the events? Did they discuss with you the issue of Cheryl Atkins and her role here at headquarters?

MS. SCHUESSLER: Not her role. Part of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that would be the notification question again as far as when was the DOD notified.

MR. AZZARELLO: Again what was the nature of that discussion that you had with Kenols' staff because you wouldn't be here to know what she did? So were they informing you about what they thought her role was?

MS. SCHUESSLER: Well, again, when the question came up as far as, you know, when was DOD notified, she would be one of the conduits that would be used here in headquarters, and I had been here in headquarters. Tony Ferronti worked for me for a period of time in AT20. So as you are beginning to gather some of your information, you know, he was one of the information gatherers that was pulling some of the information for the, you know, your Commission together.

MR. AZZARELLO: Well, during these discussions, did you talk about the notifications to the military that would have been in accord with the existing protocol? In other words, did they AT20 people say to you did you have discussion with

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

them about--well, what about the hijack coordinator? Did that person call the NMCC area?

MS. SCHUESSLER: Not to my knowledge, no.

MR. AZZARELLO: So the discussions would be outside the confines of the protocol that we looked at earlier here that you discussed with the Kenols' staff people?

MS. SCHUESSLER: I think that's--

MR. AZZARELLO: When the Kenols' people talked to you about military notifications and your knowledge of that and their knowledge of it, were those discussions outside the context of notification that would be in accord with this procedure?

MS. SCHUESSLER: Yes, and I think people were just trying to gather information, you know, with their other notifications at FAA facilities or a representative made to the Department of Defense.

MR. AZZARELLO: That would be outside the written protocol.

MS. SCHUESSLER: Right.

MR. AZZARELLO: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. SCHUESSLER: Right.

MR. AZZARELLO: I understand.

MR. SCHAEFFER: You spent some time in AAT20, can you give us a flavor as to what do you consider some of the touchstones of the events of 9-11 that exist within the FAA in terms of products or bodies of materials that capture what happened on 9-11?

MS. SCHUESSLER: Well, again, I became aware of this which was just before I guess as you were coming into headquarters, and from my time at AT20, you know, that was not necessarily a closed issue, but it was a closed door. All that information gathering had been accomplished already. So there was nothing for me to do in that regard in the AT20 perspective until, you know, you came into being and said okay, we need information on the events of September 11th.

MR. SCHAEFFER: You know, AAT20, their folks as you were said went out to the Command Center, or contacted the Command Center. Were those interviews that were conducted, or were they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

discussions, or how were those kind of instituted?

MS. SCHUESSLER: To my best recollection, they worked through Ellen King. I do not remember them coming out and doing any interviews, whether on the phone or in person.

MR. AZZARELLO: Was her discussion with you about notification more formal or informal?

MS. SCHUESSLER: Well, again, this came out of the, you know, what I remember. I'm sure they must have asked that after the events. I don't remember that specifically, but where I'm going is after the hearings. Then the questions became very apparent that there was a discrepancy.

MR. SCHAEFFER: And for my question, going back to after the events, in terms of after the events, reconstructing what happened close to the events before the Commission existed. Do you have any knowledge of interviews that resident within AAT20 of interviewing FAA personnel after the events?

MS. SCHUESSLER: Not at the Command Center, no.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. SCHAEFFER: How about anywhere else?

MS. SCHUESSLER: That I wouldn't know.

MR. SCHAEFFER: And you don't have any knowledge of that--meaning AAT20 after 9-11 that does exist at all?

MS. SCHUESSLER: No, because again that was kind of a closed issue by the time I got to AT20, the investigation was completed, and it was over and finished.

MR. SCHAEFFER: And I'm sorry, when you left AT20 to go to your current job now, what month again was that?

MS. SCHUESSLER: It was--let's see. Left it in November when Jeff Griffith retired, and that was November of '02. I was there till February, March time frame. I was there for 120 days.

MR. AZZARELLO: February, March, '03.

MS. SCHUESSLER: Right, and then went back to AT20 and then was selected for AT2 April, May time frame I think.

MR. AZZARELLO: May of '03.

MR. LEWIS: '03, yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. SCHAEFFER: You went back to AT2.

MR. AZZARELLO: To Griffith's position.

MS. SCHUESSLER: Right, right, and there was a detail. You know, mine was a four-month detail and then behind me Bruce Johnson came in, and he also had a four-month detail, and then he was selected for AT1 and I was selected for AT2.

MR. AZZARELLO: Who was AT20 from say May of '03 until the end of the year of '03?

MS. SCHUESSLER: Tony Ferronti was acting until we made a permanent selection, and I don't remember when that was made, and Tom Davidson was selected as the permanent manager.

MR. AZZARELLO: Would it be Tony Ferronti's position then--he held that position after the Commission hearings in May from then until the end of the year. To the extent that there was any need to discuss discrepancies between military notifications and FAA, that came up at the hearing? Would he do that then following up on that issue?

MS. SCHUESSLER: If we needed to go back

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and, you know, contact transcripts, tapes because that's the office that would hold that responsibility.

MR. AZZARELLO: Or answer, for example, the specific Commission questions. Like did you go check on this. There were some questions--Administrator Garvey was asked to go submit answers--

MS. SCHUESSLER: Well, that office is the primary information gatherer for that type of issue, but that wouldn't necessarily mean that they would be the only ones involved.

MR. AZZARELLO: Would it sort of start there?

MS. SCHUESSLER: Yes, yes.

MR. AZZARELLO: Okay. I don't have any more questions.

MR. BROWN: Linda, we appreciate your great indulgence. It's been a long time to go with a bathroom or lunch break.

MS. SCHUESSLER: Are we supposed to have lunch?

(202) 546-6666

I N T E R V I E W

MR. AZZARELLO: It's April 19, 2004, we're at FAA Headquarters in Washington about to begin an interview with Tony Ferrante. I'm John Azzarello of Team 8, 9/11 Commission.

MR. KARA: Miles Kara, 9/11 Commission.

MR. BROWN: Jeff Brown, 9/11 Commission.

MR. LEWIS: Brooke Lewis, FAA Chief Counsel's Office.

MR. FERRANTE: Tony Ferrante from Air Traffic Operations.

MR. AZZARELLO: Mr. Ferrante, can you sort of just give us a brief interview of your career in FAA, when you started and leading up to the various positions you held leading up to the position you held on 9/11?

MR. FERRANTE: Actually, I started on June 18, 1982, at Pittsburgh International Airport. I had spent the previous 10 months at Pittsburgh as a military controller deployed following the strike in 1981. I liked it so much, I never left.

I stayed there for about four years. I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

transferred to Miami, Florida, and at the end of 1985, again, as a controller in Miami and I moved into a staff specialist position in 1988. In 1989, I was promoted to a supervisory position. In 1991, I was promoted to the Assistant Manager for Plans and Procedures.

MR. AZZARELLO: Can you back up for a second?

MR. FERRANTE: Okay.

MR. AZZARELLO: '88, what was your position there, you were still a--

MR. FERRANTE: Supervisor, at Miami tower.

MR. AZZARELLO: In 1988?

MR. FERRANTE: Yes.

MR. AZZARELLO: And what was the supervisory position in '99?

MR. FERRANTE: I'm sorry, it was '89--

MR. AZZARELLO: And that was?

MR. FERRANTE: A staff position in '88, supervisory position in '89.

MR. KARA: All at Miami tower?

MR. FERRANTE: At Miami tower.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay.

MR. FERRANTE: And then an assistant manager position in '91.

MR. AZZARELLO: An assistant manager's position at the tower?

MR. FERRANTE: Yes.

MR. AZZARELLO: In Miami?

MR. FERRANTE: Yes.

MR. AZZARELLO: Okay.

MR. FERRANTE: In 1993, I transferred to Washington headquarters, December of '93. And I was a specialist in the Civil Operations Division.

MR. AZZARELLO: Civil Operations Division?

MR. FERRANTE: That was an organization that actually closed in 1995 or 1996, as a result of a reorganization. So, let's see, that was December of 1993; in April of 1994, I was promoted to the Assistant Division Manager of the Civil Operations Division. In 1995, is when the reorganization took effect and at that point, I was named the Manager of Terminal and Flight Service Operations and Procedures.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: That was in '95?

MR. FERRANTE: Yes, approximately April.

MR. AZZARELLO: And your title again?

MR. FERRANTE: Manager, Terminal and Flight Service Operations and Procedures. That was ATO-120 for acronyms. I stayed in that job until October of 1997, when I moved into Air Traffic Investigations, first as the Assistant Manager and then, approximately one year later as the Manager of the Air Traffic Investigations Division.

MR. AZZARELLO: So, in '97, you started as Assistant Manager for Air Traffic--

MR. FERRANTE: Air Traffic right, that was AAT-200, actually 201, as the Assistant.

MR. AZZARELLO: 201?

MR. FERRANTE: Right. And then approximately a year later as the Manager. I was detailed for a while in there, so I don't know the exact dates.

MR. KARA: And the Manager's position is AAT-?

MR. FERRANTE: AAT-200.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: In '98, you had that position?

MR. FERRANTE: Yes. And I have held that position since then. I have done various details as the Acting Manager of the Evaluations and Investigations Division; that's an SES slot and I've acted for approximately two years out of that five-year period.

MR. AZZARELLO: So, that's the position you still hold today, AAT-200?

MR. FERRANTE: Yes.

MR. KARA: And you report to--in AAT-200, you report to--

MR. FERRANTE: Well, on September--

MR. KARA: --11th you reported to who?

MR. FERRANTE: Dave Cannoles.

MR. KARA: Dave Cannoles, okay.

MR. AZZARELLO: And Dave Cannoles was what? AAT--

MR. FERRANTE: AAT-20. AAT-20 has two divisions; one is Evaluations; one is Investigations. Dave was the direct report to the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Director of Air Traffic, managing both. MR.

AZZARELLO: So, AAT-20 is two divisions?

MR. FERRANTE: Two divisions, Evaluations and Investigations.

MR. KARA: And you head the Investigations?

MR. FERRANTE: I head the Investigations Division.

MR. KARA: Curiosity, who had the Eval?

MR. FERRANTE: Tom Carmody. Tom passed away approximately two years ago.

MR. AZZARELLO: Investigations--okay, so you headed the Investigations--

MR. FERRANTE: Yes.

MR. AZZARELLO: --Division. And then he reported--he being Cannoles--reported up to Air Traffic?

MR. FERRANTE: Yes--

MR. AZZARELLO: To--

MR. FERRANTE: --at that point it was Jeff Griffith and--

MR. AZZARELLO: Peacock?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: Bill Peacock.

MR. AZZARELLO: We understand on 9/11, you were out of the state, out of D.C.?

MR. FERRANTE: That's correct, I was in Chicago

MR. AZZARELLO: I picked that up from Fran Frenier [ph].

MR. FERRANTE: Oh, okay. She had a little bit of edit--I guess writer's little bit of a writer's license in some of her comments, but pretty good reading.

MR. AZZARELLO: Did she--you were interviewed by her?

MR. FERRANTE: Yes. Most of that she was able to piece together to herself. At that point we were not able to discuss most of what we knew from those events. That was at a request of the FBI, also the NTSB.

MR. AZZARELLO: Tell me about, when you got back from Chicago to the D.C. area, when you arrived back and when you got to work what was your personal involvement in the aftermath of 9/11.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: I arrived about 1:00 o'clock in the morning to my residence on September 12. I reported to the FAA building at about 7:00 a.m. on Wednesday the 12th. I immediately started to see what information we had already gathered; what information we still needed. At that point, there was, I guess the forerunner to what we now call the Domestic Event Network. That was an open conference bridge that had been set up in the Director of Air Traffic's Office.

I checked in through there, periodically throughout the day. Dave Cannoles, I believe, at that point still spent most of his time up there. I think, sometime early that morning we met with the FBI. That was the first time we met with them concerning what information we could provide. We started turning over radar data, voice communications data.

MR. AZZARELLO: You and Dave Cannoles monitored the data, also?

MR. FERRANTE: I did not monitor the data.

MR. AZZARELLO: He did--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: I think Dave was still there at that point.

MR. KARA: Bill Peacock's office, there's a conference right next door--

MR. FERRANTE: That is the conference room--

MR. KARA: An that's where the network you're talking about was down there?

MR. FERRANTE: Yes.

MR. KARA: Very sophisticated we have.

MR. FERRANTE: It is.

MR. AZZARELLO: So the FBI--you met with the FBI on this call, you and Dave?

MR. FERRANTE: Yes, along with, I think Doug Gould was there, as well, and he was actually the technician running the equipment for us. One of the first thing were voice communications that I know you guys have heard all of the tapes, but there were some communications from the alleged hijackers and up to that point, we really thought they were speaking in a foreign language. It was the FBI who pointed out to us that they were

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

actually speaking in English.

MR. AZZARELLO: You were reviewing some ATC tapes?

MR. FERRANTE: We were reviewing ATC tapes. We were reviewing controller statements; facility logs; primarily still in the data-gathering stage.

MR. BROWN: How about, did you review any SATORIS ph?

MR. FERRANTE: I don't believe we had a SATORI available until later the day of the 12th, perhaps even the 13th but, yes, we did review SATORIS.

MR. AZZARELLO: Do you remember if you reviewed them at the FBI that week or--

MR. FERRANTE: I was not present when the FBI viewed the SATORIS. I was present when they viewed what we call RAPTOR or the terminal recordings, since that we do in a common bay. But I'm relatively sure that Doug Gould had the FBI in our SATORI lab, there's only one area where we're able to play SATORIS there because--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: That's the one we've been in from time to time.

MR. FERRANTE: You have?

MR. KARA: Right.

MR. AZZARELLO: So, he--Doug Gould probably was the liaison for that?

MR. FERRANTE: Yes, Doug Gould was our primary focal point between the agencies and the FBI at that point.

MR. AZZARELLO: How about, could you tell us what TSDs were located on 9/11, if you know, in FAA headquarters? I'm told there was one in the ACC. Did you know that?

MR. FERRANTE: No, the ACC being--

MR. AZZARELLO: The Aviation Crisis Center, I have a really good sketch here of the Aviation Crisis Center. Yes, I know there was one there. There were others in various Air Traffic offices, I don't know exactly where. I believe there was one on the 6th floor from when Jeff Griffith--

MR. KARA: The 6th floor?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: The 6th floor. Mike Scirillo's office.

MR. AZZARELLO: Tell us, where this sort of universe of TSD locations in headquarters as best you can on 9/11, where they were then?

MR. FERRANTE: One in Monte Belger's office; one in Mick Scirillo's office--

MR. AZZARELLO: Mick Scirillo's--well, Monte's up on the 10th floor, right?

MR. FERRANTE: Yes, mm-hmm. Jeff Griffith's was also on the 10th floor.

MR. AZZARELLO: Did Jeff Griffith's office have one?

MR. FERRANTE: Yes. And I believe Mike Scirillo still had one, although Mike moved into the office that Jeff had vacated. I don't know if Jeff took his upstairs when he went or not.

MR. AZZARELLO: Mike Scirillo was on 6th, you think?

MR. FERRANTE: Yes.

MR. AZZARELLO: Sixth Floor, that's three, any others?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: Actually I've got four.

MR. AZZARELLO: I have Belger, Griffith,
Scirillo--

MR. KARA: And the one in the ACC.

MR. FERRANTE: And the one in the ACC.

MR. AZZARELLO: One in the ACC room, is
that it?

MR. FERRANTE: To my knowledge.

MR. AZZARELLO: Fourth floor, Peacock.

MR. FERRANTE: You know, I believe he had
one, I can't say with certainty if he did or
didn't.

MR. AZZARELLO: Do you know if the data
from those TSDs was something that was preserved
and then given to the FBI or reviewed by the FAA
after 9/11?

MR. FERRANTE: I don't believe that it was
given to the FBI with the exception of certain
pages or certain pictures that were taken that
showed snapshots of events as they were taking
place in the country. Primarily, it was when the
system shut down because it has the ability to show

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the number of active flights. I know we used some of those same pictures in a book we put together within the first couple of days after that's called "Summary of Air Traffic Hijacking Events."

MR. KARA: I think I have that.

MR. FERRANTE: Okay.

MR. AZZARELLO: Like this one?

MR. FERRANTE: That is that one.

MR. AZZARELLO: Would that be maybe--

MR. FERRANTE: That would be a picture from a RAPTOR or an ASR-11, I'm sorry an ASR-terminal radar source. TG would be a picture from a center, probably taken off of a SATORI display.

MR. AZZARELLO: Trying to find where a TSD or a slide of a TSD displayed, if one exists. Do you think you had some of those in here?

MR. FERRANTE: I thought--that's Boston Center. I thought there was one in there indicating the number of flights that were active after the ground stop had been issued. I think that's it at the very end.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Oh, is that it?

MR. FERRANTE: That's a TSD picture.

MR. AZZARELLO: That's a TSD?

MR. FERRANTE: Right.

MR. AZZARELLO: Okay. That's the traffic in the Northeast at 8:47?

MR. FERRANTE: Yes.

MR. AZZARELLO: And it shows 77 and where its location and 93?

MR. FERRANTE: Yes, yes.

MR. AZZARELLO: It shows each of the four subject aircraft?

MR. FERRANTE: Right.

MR. : Tell us about the FAA efforts at headquarters, post-9/11 to know the chronology events to try to find out what happened when? What did the FAA know and when in its various field facilities and its upper levels of management?

MR. FERRANTE: Well, starting, I believe on Thursday afternoon is when we started putting together this book with--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: This one?

MR. FERRANTE: --right--with the original goal of having that completed on Saturday, although we didn't meet that because information was still pouring in. We were trying to be as factual as we could and gathered data from all of the facilities that had contacts with any of the four flights. And we started to develop a chronology from the time that they started their taxi out or even requested an ATC clearance, up to the point where they either impacted with the terrain in Pennsylvania or in one of the buildings either the Trade Center or the Pentagon.

MR. : So you started on Thursday, you wanted to complete it on Saturday, but you had a lot of information come in--

MR. FERRANTE: There was a big push that the Administrator wanted more briefings, more materials. And that's what the real driver behind putting this together was. MR. AZZARELLO: The big push was for more--

MR. FERRANTE: Information material on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what had taken place and what we knew factually for each one of the aircraft.

MR. AZZARELLO: Was that in connection with any briefings that the Administrator was scheduled to deliver or was it just a general: I want to know what happened, when coming from Administrator Garvey?

MR. FERRANTE: Actually, my direction would have come from Dave Cannoles and I don't know of any scheduled--I learned later that there were going to be some hearings on the Hill, but I don't think I knew that at that point. Dave told me that we needed to have a chronology; we needed to be able to depict what had happened with each one of the flights.

MR. AZZARELLO: Mm-hmm.

MR. FERRANTE: And that's when we took him to the very laborious process of developing that, while at the same time still working with radar files; still working with voice data; still getting tapes in from various facilities and still having contact with the FBI to make sure they had all

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

these information that they needed.

During that first week, there were probably three or four visits that FBI agents made where they would generally leave with CDs that had WAV files with the voice communications or the radar pictures, as well as radar data.

MR. AZZARELLO: And give me the parameters of the chronology for each of the four flights as laid out for you by Dave Cannoles?

MR. FERRANTE: From start to finish? That was what our parameters were, so we looked at. I think if you read the chronology that we put together, we started from the point where the aircraft received taxi instructions up until the point that there were confirmed either accidents or crashes into buildings or terrain.

MR. AZZARELLO: You said to the time of crashes or past the time of crash to when it was confirmed to have been the aircraft that crashed in that particular building?

MR. FERRANTE: Till the time it was confirmed.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: So to the time of crashes, including the time after the crashes were confirmed?

MR. FERRANTE: Yes.

MR. AZZARELLO: Should we, assume that that also includes or did that also include, then the time in-between taxiing to confirmed crash that somewhere in there would also include a time when the military may have been notified by the FAA on each of the four hijacked aircraft?

MR. FERRANTE: Yes, we tried to put in all the significant events that we could identify at our--you know, our resources at that point were either facility logs, personnel statements, of course the radar data, the voice data and so forth. So, what we did was, we tried to build a chronology that had all four of the events. And our office routinely does this. A normal accident investigation process, we start five minutes before the first contact with the ATC system and we go until five minutes after the last contact, or, you know, if it's a crash, and we know it's a crash,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

five minutes after that event.

MR. AZZARELLO: Can we list separately, the various sources for that chronology you had, Air Traffic Control tapes, is that correct?

MR. FERRANTE: ATC tapes.

MR. AZZARELLO: Mm-hmm.

MR. FERRANTE: Radar from both centers and terminals.

MR. AZZARELLO: Radars from TRACON and en-routes?

MR. FERRANTE: Yes.

MR. AZZARELLO: Mm-hmm. What else?

MR. FERRANTE: Personnel statements.

MR. AZZARELLO: Personnel statements.

MR. FERRANTE: And facility logs.

MR. AZZARELLO: And facility logs?

MR. FERRANTE: Yes.

MR. AZZARELLO: Is that the universe of everything?

MR. FERRANTE: To my knowledge at that point, yes.

MR. KARA: What's interesting about that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

list is that there's nothing, there's no data sources from inside, in terms of logs or anything else that was maintained in the headquarters, itself. This all came from the field?

MR. FERRANTE: Yes.

MR. AZZARELLO: You didn't have any WOC logs--that would include WOC logs?

MR. FERRANTE: No.

MR. AZZARELLO: Why, wouldn't that be part of--

MR. FERRANTE: We've never had WOC logs, you know, our role as Air Traffic Investigations in determining how the Air Traffic system performed.

MR. KARA: Who was separately gathering together all the relevant information from 9/11 as it related to the headquarters itself?

MR. FERRANTE: I know security had their own efforts underway. I don't know what the WOC would have had underway at that point.

MR. AZZARELLO: I'm going to get [unintell.] on American 11, a New England Regional Center advising the WOC of a suspected hijack of 11

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and it's not clear to us, I guess, where that source of that would have been, Can you shed some light on that--what--the source was?

MR. FERRANTE: It probably came from the logs we received from Boston Center.

MR. AZZARELLO: ZBW's logs?

MR. FERRANTE: Yes.

MR. AZZARELLO: They would have when the New England Region advised the WOC?

MR. FERRANTE: Well, they would have that in the form of personnel statements from supervisor said when this was notified and so forth.

MR. AZZARELLO: Well, wouldn't that be when Boston Center notified New England Region?

MR. FERRANTE: But, see they would have been on lines with them and had their own conference bridges set up with those entities.

MR. AZZARELLO: So, that wouldn't have been, I would mean, just from the layman's view, I would think that--being unfamiliar with how you reconstruct your events. An entry for when the New England Region told the Washington Ops Center, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

would think would come from either New England Region log or the Washington Operations Center Log. You're saying it wouldn't come from either one of those.

MR. FERRANTE: Well, it could have come from either of those, I don't know the exact source.

MR. AZZARELLO: Okay. And then--

MR. KARA: Let me back up a second. When you get the facility logs in relevant data that kind of facilities in your terminology is towers, TRACONS, and en-route centers.

MR. FERRANTE: Yes.

MR. KARA: How about the Region logs from the ROC, the ROC at HEL; the ROC at AENE and AEA, did that come in to you as part of your data gathering?

MR. FERRANTE: More than likely.

MR. KARA: Okay.

MR. FERRANTE: It's not a normal part of an accident investigation that we would get that.

MR. KARA: But you think it might have

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

been in--

MR. FERRANTE: Here's what I do know, that every entry in here, we had a piece of paper that documented that entry, because if you look at some of the entries we made, we even, if we didn't have an official FAA log that listed that, we listed that this time derived from a personnel statement. Let me see if I can find a sentence that said that. There are probably some of those in almost all of them. We tried to stick to facts, yeah, right here. This time approximately based on personnel statements from XNY.

So, we didn't have a log entry that said that, but we thought it was important information and we took it from another source.

MR. AZZARELLO: Well, what about here, see you seem to be trailing--tracking the information through the FAA system. And you have it going, earlier on, you have the Boston Center reporting the hijacking. And then you have the region notifying the WOC and then you have the WOC notifying ACI, that's a headquarters activity,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

correct?

MR. FERRANTE: Right.

MR. AZZARELLO: And then conferencing the region in with her. Wouldn't you have had a WOC log available to you to, you know, somebody, not you personally, but somebody in your group to be able to cite to that entry for the WOC to notify ACS?

MR. FERRANTE: More than likely.

MR. AZZARELLO: So, just to clear up the confusion, you said you had facility logs but not including the WOC logs, do you want to modify that now--

MR. FERRANTE: We may have had WOC logs, I don't recall if we did or didn't. But it would seem that this entry came from either a ROC log or a WOC log. Again, in a normal course of business, we would not access either of those two logs.

MR. AZZARELLO: Right, but I think, recognizing this is not--this probably wasn't the normal course of duty.

MR. FERRANTE: This was not a normal

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

course of duty.

MR. AZZARELLO: It is also citations in here to NEADS logs or military logs, did you have that available to you and your staff, the NEADS logs?

MR. FERRANTE: Some of that information we got from the military liaison, Colonel Atkins. So, I'm sure that we had some level of NEADS logs that indicated what time we had given certain notifications to them.

MR. AZZARELLO: Where do you have NEADS logs, indicate they were notified by the FAA on the events concerning American Airlines 11?

MR. FERRANTE: Okay.

MR. AZZARELLO: This is--

MR. FERRANTE: Now, we may have derived this information from Boston Center, Boston Center may have told us that the NEADS logs indicate such and such. I don't know if we had specific copies of the NEADS logs, but we had someone who told us that this is what the NEADS logs said. We may have had the actual logs.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: Here's our problem with the NEADS logs, that's not a problem, Tony, but here's what we did. The NEADS logs, in and of itself, is a classified document.

MR. FERRANTE: Okay.

MR. KARA: We happen to have an unclassified extract with us, so the transmission of that log to fairly and accurately portray the log that day would have had to have been a secret document. Did you accumulate classified documents as part of this?

MR. FERRANTE: No, none.

MR. KARA: Okay.

MR. FERRANTE: None that I'm aware of.

MR. KARA: None that you're aware of, right.

MR. AZZARELLO: I'm going to show you this unclassified version of the NEADS log.

MR. FERRANTE: Mm-hmm.

MR. AZZARELLO: Take a look at that and just see if it appears to be a document that you might have seen.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: No, I have never seen this before. And, to me, it's kind of interesting that it's a handwritten log.

MR. AZZARELLO: Why is that?

MR. FERRANTE: Because, normally, all the logs that we see are typed.

MR. AZZARELLO: Would you have recognized that kind of thing if you had seen it before?

MR. FERRANTE: Yes.

MR. AZZARELLO: Somebody in Dave Cannoles, I may have to look back in the interview, I don't recall exactly, who, but either Dave Cannoles staff, Dan Diggins or someone, seemed to indicate that they did recall a NEADS log was given to somebody in the FAA to compare to see what the military said they knew, when, because--

MR. FERRANTE: I don't know that we had NEADS logs that--I know I've never seen this particular log before. I think we had information that was provided by NEADS on what time they were notified of specific incidents and that's what we used.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: But you don't know the source of where you got the information of what NEADS was notified and when?

MR. FERRANTE: Correct.

MR. AZZARELLO: Well, who were the people sort of, at ground level, pulling that together, if you could tell me? I mean, like, who's responsible, for, say, these entries and who drafted them?

MR. FERRANTE: I didn't do all of the typing myself, I did 90 percent of it. A lot of it--what we did was, Miles, you've see the bay that we operate in.

MR. KARA: Right.

MR. FERRANTE: We put up a big piece of cardboard, we took a computer, hooked it up to a projector so we could project it on the wall and we started developing the log. So, it had input from Dan Diggins; it had input from myself; it had input from Doug Gould. Many of the entries were physically typed by myself or by Catherine Meyers who was a specialist that worked for me. And it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was based on what I told her to type.

MR. AZZARELLO: Does that apply for each of the four hijacked aircraft?

MR. FERRANTE: Yes.

MR. AZZARELLO: And each of the incidents?

MR. FERRANTE: For this entire document.

MR. AZZARELLO: The entire document.

MR. FERRANTE: Yes.

MR. AZZARELLO: So you--

MR. FERRANTE: I oversaw the production of this entire development.

MR. AZZARELLO: And oversaw, it what about drafting, were you--did you draft it--

MR. FERRANTE: A good portion of it.

MR. AZZARELLO: --who else drafted the language in it?

MR. FERRANTE: Well, again, I had Catherine doing some of the typing on it, so it may have been where I told her to make an entry, you know, pertaining to notification of "X" and she used her own words in making that notification. But, again, it was being projected on a board where

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I'm able to read what's being typed and then I would say, move on or what the next entry is.

MR. AZZARELLO: I'm not talking about the personnel who was sort of doing the typing. I mean, in terms of the decision-makers, who decides what substantive information goes in that summary in those chronologies? Other than you. You said a good portion of it.

MR. FERRANTE: The decision making of what went in these chronologies was me. The physical entry, I did the majority of, but not all of them.

MR. KARA: You were the author of this document

MR. FERRANTE: Yes.

MR. KARA: And the document was approved by?

MR. FERRANTE: The document was given to Dave Cannoles, I believe, on Sunday evening, maybe Sunday afternoon. He came back and told us how many copies to be made, how many copies we needed.

MR. KARA: Who did he get it approved by?

MR. FERRANTE: I don't know--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: But he came back--

MR. FERRANTE: --I don't know--

MR. FERRANTE: --relatively quickly and
said X-number of copies?

MR. FERRANTE: Right, I don't know that he
actually got it approved, you know, Dave, at that
point, was in meetings a good portion of the day
with the Administrator or the Deputy Administrator,
with Bill Peacock, Jeff Griffith--

MR. KARA: On Sunday.

MR. FERRANTE: Yes, yes.

MR. AZZARELLO: So you gave the report to
Cannoles on Sunday afternoon?

MR. FERRANTE: I believe it was Sunday
afternoon.

MR. AZZARELLO: Do you remember if--we
were told that the Herndon folks were asked to work
that weekend, including Sunday on putting together
their chronology and looking at--reviewing their
own tapes from their Command Center. Was that
connected to this assignment?

MR. FERRANTE: No, no.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: It was not?

MR. FERRANTE: No.

MR. AZZARELLO: What was that connected to?

MR. FERRANTE: I'm sure that they were trying to go through the same exercise that we were going through and develop all the information that they could. We worked weekends for at least three weeks.

MR. AZZARELLO: But they seemed to have been directed to do so by somebody in the chain or command.

MR. FERRANTE: It may have been directed by Jeff Griffith to put together all of the Command Center entries and all of their logs.

MR. AZZARELLO: Would that be an element that you'd want to put in here in a chronology and, if so, why? And if not, why not?

MR. FERRANTE: There may have been elements that were germane to this, but this document was geared towards what we normally did following any major aircraft accident. We have

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

traditionally done briefing items for the Administrator that have gone all the way up through the food chain detailing those events. Those events, we try to be as factual as we can and stick to information that we're able to derive.

They're preliminary in nature, they're done very quickly to get a picture of what's happened, and they are all subject to change in the weeks and months that follow. So, initially is, within the Air Traffic Investigations group, we reach out to the facilities; we get radar data; we get voice data; we get facility logs; we get personnel statements and we build briefings based on those.

MR. AZZARELLO: Do you usually leave the Command Center out of the loop in terms of looking for their tapes or their chronology and their notes and their time lines of what they knew when?

MR. FERRANTE: At that point in time, yes.

MR. AZZARELLO: At that point in time
you--

MR. FERRANTE: On September 11 of 2001, we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

had very little, if ever, interaction with the Command Center.

MR. AZZARELLO: Okay, I'm not talking about interaction, I'm saying, let's say, pre-9/11, there's an accident, and it occurs in Boston Center's airspace or in Boston TRACON.

MR. FERRANTE: We have nothing to do with the Command Center.

MR. AZZARELLO: That's not a branch or an element of the FAA that you would look to to get their tapes to see what they knew when or--

MR. FERRANTE: No. The only time we would ever have contacted the Command Center is if we had an incident that we were conducting an investigation on and that investigation indicated there might have been traffic management issues associated with it. For example, if we had two aircraft that collided in Boston and it was because the two sectors were overloaded with traffic, at that point, we might have reached out to the Command Center to get what they knew of the event or what they knew of the traffic loads. But short

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of that, never.

MR. AZZARELLO: But how about under the unique circumstances of 9/11, did it, was it discussed--did it occur to anybody that--to think about whether or not Command Center had information that might have been relevant to the four hijackings that you might want to look at in the bigger picture and weave in with a big-picture chronology?

MR. FERRANTE: We may have had some of the Command Center logs when we were developing, this, I don't recall. But normal course of business, we had very little interaction with the Command Center at that point and I don't think we thought about looking outside of the Air Traffic facilities where we knew we had the actual voice communications; we knew we had the actual radar; those were the factual things we knew that we could point to and say, here's what happened at what time and when.

MR. AZZARELLO: I understand that that would give you what happened and when, as communicated from the Centers. But, as it would

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

pertain to the flow of information within the larger FAA wouldn't you want to look at the Command Center and what they knew regarding the four hijacked aircraft if they had relevant information on them?

MR. FERRANTE: Not necessarily, because remember the roles were very different then. The Command Center had knowledge of flow restrictions in the system. We were not interested in any flow restrictions in the system. We were not interested in the shut-down of the system following the hijackings, except to the extent where we--

MR. AZZARELLO: Let's look--

MR. FERRANTE: --no we never looked to the Command Center for any information that they may have had.

MR. AZZARELLO: But let's look at what really happened on 9/11 and what I would assume somebody in FAA headquarters in investigations or chronology reconstruction may have been privy to. And let's look at the fact that there was an open line from the Command Center manned by John White,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

who was the manager of the Command Center and somebody here in ACC at headquarters. And right next to the WOC in the Crisis Center. Did you, I assume that's something that you became aware of, am I wrong?

MR. FERRANTE: I did become aware of that.

MR. AZZARELLO: When did you become aware of that?

MR. FERRANTE: I don't know, probably when I came back to Washington on Wednesday. But I didn't think much about it because that was a line that primarily involved Security and the Air Traffic Command Center.

I was more interested in the material that was gathered in the conference room down in Air Traffic because that was more of what happened when. Again, when I looked at the Command Center and the materials they gathered, most of their information dealt with the shut down of the system or any restrictions that they would have put in place. The actual departure of the aircraft, the routes of flight that they were flying, I mean,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that was much more accurate sources getting that from the facilities involved.

MR. AZZARELLO: But, let's go back to you said you thought that that open line between John White and the Aviation Crisis Center, you know John White is the Manager at the Command Center?

MR. FERRANTE: Yes.

MR. AZZARELLO: I assume at some point in trying to reconstruct this that somebody made you aware that John White was told to stay on that phone to give information to--by Jeff Griffith who told him to stay on the line.

MR. FERRANTE: I don't think I learned that at all until you telling me right now. I think what I knew is that there were more than one teleconference that were taking place. That there was a teleconference that was taking place within the Air Traffic Conference Room because, initially, my staff had been up there.

Of course, I was in Chicago at the time. I learned this after the fact. I also learned that there was another teleconference that was going on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

between the Command Center and field facilities, as well. I don't know what information was shared. But, again, that information wasn't as germane to me because it was all in the aftermath of what had taken place not with what had led up to what had taken place.

Now, for a period of, probably a month, the Command Center had their own separate telecons going on. I don't remember the exact date, but at one point, the function of what we now all the Domestic Events Network, or the Situation Room, depending on how you title it, at one point that was assigned to us in AAT-20.

MR. AZZARELLO: Okay, let me--

MR. FERRANTE: So, at that point is when the Command Center asked if they could consolidate and we'd only have one telecon going because I understood at that point that the Command Center was actually on both.

MR. AZZARELLO: Right, let's talk about that now. We see the Command Center giving situational awareness on some of the hijacked

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

aircraft on the morning of 9/11 before they crashed. Okay, passing that up to FAA headquarters through two different nodes of communication; two different modes. One was the John White speaking to either Jeff Griffith or Dough Davis, were you aware of that after 9/11?

MR. FERRANTE: No, no.

MR. AZZARELLO: You were not--I believe you said you were aware that John White was speaking somebody in ACC?

MR. FERRANTE: I was aware that the Command Center had a teleconference going and that John White had been manning it.

MR. AZZARELLO: And were you aware of who was manning it on the headquarters end?

MR. FERRANTE: No.

MR. AZZARELLO: So, you didn't know that Jeff Griffith and Doug Davis was manning that line?

MR. FERRANTE: No.

MR. AZZARELLO: Okay, and did you know Doug Davis prior to 9/11?

MR. FERRANTE: Yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: And--

MR. FERRANTE: I've known Doug Davis for probably 15 years.

MR. AZZARELLO: Okay, and you've known, I assume you know Jeff Griffith and who he was?

MR. FERRANTE: Yes.

MR. AZZARELLO: They're both Air Traffic people, right?

MR. FERRANTE: Yes.

MR. AZZARELLO: So, why wouldn't you want to know what Command Center was saying to Air Traffic people at headquarters, because then you know it's not Security on the other line, you know it's Air Traffic people on the other line.

MR. FERRANTE: I didn't know who the teleconference was going with, my assumption was that the Command Center had field facilities on; the Command Center had much more instantaneous communication ability with field facilities than we've ever had in headquarters, up until the point where we established that Net.

MR. AZZARELLO: Right, right, but they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

had--but you did understand that John White from Command Center was speaking to two people from Air Traffic, did you understand that after 9/11, when you were looking at recreating the chronology of events?

MR. FERRANTE: In the first two or three weeks after 9/11, no. Yes, I learned of that after 9/11.

MR. AZZARELLO: After the--after this--

MR. FERRANTE: But this was already--this was--in fact the copies of this were done in our graphics office on the 6th floor on Monday morning, which would be the 17th.

MR. AZZARELLO: So, when you drafted this--let me ask you this? When you drafted this and it was made final on the 17th, when this was made final, were you even aware at that point in time that there was a telecon between John White and anybody here at headquarters?

MR. FERRANTE: No, no.

MR. AZZARELLO: So you didn't even know that John White was on a telecon when this was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

drafted?

MR. FERRANTE: No.

MR. AZZARELLO: You found that out afterwards?

MR. FERRANTE: Yes, sir.

MR. AZZARELLO: Did you know at the Tactical Net that was open here in the Aviation Crisis Center before you completed this?

MR. FERRANTE: No, and if you ask me today, I couldn't even tell you what the Tactical Net is or who's on it.

MR. AZZARELLO: So, you didn't even know there was a tactical net when you drafted this?

MR. FERRANTE: No. Air Traffic, to my knowledge has never been a part of the Tactical Net. I know that Secure--I know this now; I know that Security had two different types of Net, they had a Primary Net and a Tactical Net. And the exact day I learned that, I don't know, but it was.

MR. AZZARELLO: Did you know prior to 9/11 that there was such a thing as a Primary Net?

MR. FERRANTE: I don't know if I knew the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

term Primary Net, I knew that the way the old set up of the Command Center was, prior to 9/11 and they refurbished it, there used to be a series of desks, in fact, you have it set up here, okay, this is the WOC--

MR. AZZARELLO: Mm-hmm.

MR. FERRANTE: --I had a lot of interchange between the WOC. Every now and then, they'd invite me to come in and I had to walk through a door here and come up through here and walk in. So, I knew of all these desks with the computer screens, but never had any action, except for one occasion where we had a suspected hijacking event involving a Northwest flight that had inadvertently squawked the wrong code.

MR. AZZARELLO: Well, let me as you--

MR. FERRANTE: And at that point, Admiral Flynn was the Director of Security, he called me at home and had me come out at 2:00 o'clock in the morning.

MR. AZZARELLO: Let me ask you this: Did part of Administrator Garvey's desire for

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information, you said there was, I think did you say there was some sort of push to get information?

MR. FERRANTE: Yes.

MR. AZZARELLO: Understandable, because national tragedy, country was attacked, correct?

MR. FERRANTE: Yes.

MR. AZZARELLO: Catastrophe, four planes crashed, three into buildings, one on the ground, right?

MR. FERRANTE: Yes.

MR. AZZARELLO: Over 3,000 people died, right?

MR. FERRANTE: Right.

MR. AZZARELLO: I assume that Administrator Garvey was one of many people in national leadership in federal government that wanted to know what happened, when? Would you agree?

MR. FERRANTE: I would agree.

MR. AZZARELLO: Would you agree that part of Administrator Garvey's desire to know who knew what, when would include what FAA headquarters knew

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and when?

MR. FERRANTE: I believe that she did because there was a group that was formed. And I don't know exactly when this formed, but Darlene Freeman was heading up a group that was pulling together all of the pieces from within the agency, or at least that was my understanding of what that work was.

For example, that book was given to them after it was published.

MR. AZZARELLO: Okay, now--

MR. FERRANTE: So, that was a separate entity, that wasn't like Air Traffic was putting it together.

MR. AZZARELLO: So, I want to understand your assignment so I don't ask you any unfair questions. So, is it your statement that this summary of Air Traffic Hijack Events as it encompassed the flow of information within the FAA as an entity--is it your statement and your position here today that this was not supposed to address what FAA headquarters knew and when they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

knew it?

MR. FERRANTE: That is correct.

MR. AZZARELLO: Okay, so this is--

MR. FERRANTE: That was designed only to provide factual information as we would have if it had been one aircraft that had crashed, for example, American 587, we would have developed a similar type of understanding of what had transpired and developed a briefing. This just happened to be with four that were termed to be terrorist attacks. So, this is only how the Air Traffic System performed. Not how the FAA in whole performed.

MR. AZZARELLO: And not how headquarters was made aware of the situation and what kind of decision-making the headquarters might have gotten involved in?

MR. FERRANTE: Correct.

MR. AZZARELLO: And is that traditionally the case, whenever there's an accident or a hijacking?

MR. FERRANTE: Yes, my role in Air Traffic

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Investigations, that is my title, Air Traffic Investigations is to determine how the Air Traffic System performed. And that would be from the clearances issued to aircraft, to the services provided to aircraft; up to the point where we had either a you know, a terrorist incident that crashed into a building, we'd never seen those before.

MR. AZZARELLO: So, to the extent that you do in this document talk about what the Washington Operations Center did, for example, notifying ACI about the situation, that's just fortuitous that that happens to comment on something that was done at headquarters?

MR. FERRANTE: Yes.

MR. AZZARELLO: Okay.

MR. FERRANTE: A part of any accident is the notification chain we go through. Because we normally--you know, any accident that happens in the system, even if it's a VFR with one fatality, I've got somebody on call 24-hours-a-day. We get notified of all of those.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: But doesn't that notification change, usually, go at some point to headquarters? Doesn't headquarters, somebody at headquarters want to know if there's an accident and, you know, 200 people died in a plane crash?

MR. FERRANTE: Absolutely.

MR. AZZARELLO: And that's not doesn't ordinarily--part of your function your division, though?

MR. FERRANTE: Oh, absolutely, it is my responsibility to do that, because what I do is, again, I have people on call 7-days a week, 24-hours a day. So the phone rings at 2:00 o'clock in the morning, right? And they have an item that they think needs to be briefed up to senior executives. Before they could call Dave Cannoles, they had to call me, because I made the decision whether or not we're going to get Dave out of bed.

So, if it were a VFR with one fatality, I would say, no, we'll brief him in the morning. But if it were an IFR, American 587 with 200 fatalities, you can bet that I'm going to get Dave

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Cannoles up, who would then get Air Traffic up, who would then bring up the ATS, as well as the Deputy Administrator and the Administrator. And many times we brief them at 2:00 o'clock in the morning of events that took place.

MR. AZZARELLO: And when you reduced that to a chronology or a report later, you don't usually put in then, when you notified somebody at headquarters? Or would you put in, notified Dave Cannoles; called him at 2:00 a.m.?

MR. FERRANTE: No, we wouldn't have put that in. We would have put just the factual information on what was done when it was done, what happened.

MR. AZZARELLO: Why would you--then explain to me why would you just cut out the chain of notification prior to it getting to headquarters in an accident?

MR. FERRANTE: If I had briefed the Administrator at 2:00 o'clock in the morning--

MR. AZZARELLO: No, in general, I'm not, just in general.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: In general, if I brief the Administrator at 2:00 o'clock in the morning and then I come to work the next day and I'm putting together a briefing on what happened in that particular accident, I would not add that I notified the Administrator at 2:00 o'clock in the morning. That would not be part of the formal briefing package that goes up.

MR. AZZARELLO: And it would not go in the formal chronology of events?

MR. FERRANTE: Correct.

MR. AZZARELLO: Headquarters notification is always left out, you say.

MR. FERRANTE: Well, headquarters notification to executives is information purposes. The primary thing is, you know, obviously, we've got a bit Public Affairs staff that are going to be getting calls. And part of our decision-making on when we wake up executives is what's the potential for media and do we need to brief them at 2:00 o'clock in the morning or can this wait?

MR. AZZARELLO: Put executives aside.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: Okay.

MR. AZZARELLO: Let's talk about staff in Washington Operations Center, the 24/7 Watch Center, on the 10th floor.

MR. FERRANTE: Okay.

MR. AZZARELLO: Aren't they usually notified when there's an aircraft incident?

MR. FERRANTE: Yes, they are.

MR. AZZARELLO: An accident, incident, or air piracy?

MR. FERRANTE: Yes, they are.

MR. AZZARELLO: Would that normally be something you would include in a chronology if you were looking at an event after the fact?

MR. FERRANTE: No.

MR. AZZARELLO: You wouldn't?

MR. FERRANTE: No.

MR. AZZARELLO: Because WOC notifications--

MR. FERRANTE: Because WOC notification takes place before I know about it. Because if it happens in Kalamazoo, Michigan, tonight, Kalamazoo,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of course, is going to call the Regional Ops Center in Great Lakes, who's going to call the Washington Ops Center, who's going to call me at home. So, I'm getting notified from the WOC of what happened and I get a phone bridge between me and the Great Lakes Region in Kalamazoo, and I start going through the Air Traffic investigatory process of what happened when and so forth, and then I build a briefing based on that factual information I can derive from that.

Now, if I have to subsequently brief that up to other executives, that's not part of the briefing that I'm going to produce.

MR. AZZARELLO: And if you reduce it to a written chronology, you are not going to put in the notification from the Region to the WOC in that instance?

MR. FERRANTE: Correct.

MR. AZZARELLO: You're not going to?

MR. FERRANTE: No.

MR. AZZARELLO: Even if, does that apply even if the Washington Operations Center is

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notified of an event before the event [unintell.], for example, let's take 9/11, the WOC was notified about American 11 before it crashed.

MR. FERRANTE: Okay.

MR. AZZARELLO: Would that then, make the notification to the WOC something you might want to include because they were aware of it before the event came to an end?

MR. FERRANTE: No, because the WOC had other notification requirements besides Air Traffic. They bring Air Traffic in so that we can start developing information.

Another example for you is Payne Stewart's accident. Several years ago, I don't recall when. They departed from an airport in Florida; they lost pressurization; the aircraft goes in flight-level 410, actually a little bit higher than that and it flew for four and a half hours. We flight followed that aircraft for hours. Yes, we got notification from the WOC, from the Southern Region to us here in the building as it happened on normal duty hours.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

But when we wrote a briefing of what took place in that accident, we talked about the ATC clearances the pilot had received; when we lot radio communications; and the fact that the military had actually shadowed the aircraft because it was pertinent only to the point to where at some point during that particular accident, the military pilots had looked in the cockpit and said it was frozen.

MR. AZZARELLO: So there was nothing beyond what happened in the aircraft, even though the notification to the Region or--

MR. FERRANTE: Correct.

MR. AZZARELLO: Yet you put notifications to the regional sites.

MR. FERRANTE: We were probably asked to in this particular case.

MR. AZZARELLO: Well, now, explain that to me, because now I'm having difficulty understanding why would you want to then know what the ROC knew, when, but not what the headquarters knew then?

MR. FERRANTE: I think one of the first

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

issues that came out and I don't recall the flow of how this came out, was--because we had already started on putting together briefings, in fact, we probably did two or three different briefings with limited amounts of information that got translated into this book. For example, the chronologies that you see, there are individual chronologies for each one of them, when they received their clearance; when they taxied out; when they departed; and the communications we had.

At some point, we were asked to put all of that together into one master chronology--

MR. AZZARELLO: Mm-hmm.

MR. FERRANTE: --which we did. And at some point, I think the question of when we notified the military on each of those events was asked and we went back and tried to recreate to the best of our knowledge when who was notified in terms of military messages.

MR. AZZARELLO: Military notification was an issue we understand that did come up.

MR. FERRANTE: Yes, but notifications to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

other headquarter elements were not something we looked at.

MR. AZZARELLO: So, then, when you look at this and you do see there are references to regions to Great Lakes notifying Washington Operations Center about a loss of radio and radar with American 77, for example, is an entry in here. Is that an entry you would not ordinarily put in here?

MR. FERRANTE: Ordinarily, I would have had an entry in there that we were notified of a simultaneous loss of radar and radio contact. It would not have said it was done by the Great Lakes Region to the WOC. In a normal--

MR. AZZARELLO: When you would say "we" in a normal, who does the we encompass, FAA headquarters?

MR. FERRANTE: AAT-20. The inves--the Air Traffic Investigation staff.

MR. AZZARELLO: That element of headquarters?

MR. FERRANTE: Right.

MR. AZZARELLO: Do they notify AAT-20

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

through the WOC when there's an accident?

MR. FERRANTE: Yes.

MR. AZZARELLO: Okay.

MR. FERRANTE: Ninety-nine percent of the calls, and I happen to be on call this week--

MR. AZZARELLO: So then maybe this is--

MR. FERRANTE: --so they all come through the WOC.

MR. AZZARELLO: --would you put that in a report, usually? We were notified of an aircraft incident?

MR. FERRANTE: Normally it would say something like, received notification of, if I were doing a briefing on it. But I wouldn't specify who I received that notification from.

MR. AZZARELLO: But you would put we were notified?

MR. FERRANTE: Yes.

MR. AZZARELLO: And that would be in the chrono?

MR. FERRANTE: Yes.

MR. AZZARELLO: So, then maybe we just

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

misconnected and this is semantics and stuff we're just not on the same page. But it would seem to me you--you said before, you would not ordinarily put any notification into the WOC or to headquarters of an aircraft incident or accident. But, now, you're saying you would ordinarily put in a briefing and in a chrono, we were notified of an aircraft incident and the we would refer to AAT-200?

MR. FERRANTE: It would depend on--every accident case is different. All right, every single accident is different, I've never seen two alike yet.

MR. AZZARELLO: Okay, understanding accidents are different, but what about, don't you have a protocol for trying to put in a briefing or a chronology what FAA entities were notified and when?

MR. FERRANTE: Normally we would start with at 21:11 and 14 seconds American 11 or ATC experienced a simultaneous loss of radar and radio communications with American 11. And we would start from there, normally.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Depending upon what might be significant in any of those notifications we would say we received notification something happened. Because it means that there were some that were germane to that. For example, we received notification from a sheriff's office of a downed aircraft.

MR. AZZARELLO: Right.

MR. FERRANTE: To us, that confirmed the crash. So, in that regard, information like that would have gone in as far as a notification, but to say that we were notified by the Great Lakes ROC, 99 percent of the time would never have been put in.

MR. AZZARELLO: But it was here?

MR. FERRANTE: It was here and I believe it was, somebody asked us to go back through the chronology of who was notified?

MR. AZZARELLO: Including headquarters, then did somebody ask you to go back and include notifications to the WOC or to headquarters--to any headquarters folks?

MR. FERRANTE: The primary, what, I don't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

know what the specific tasking was, but the idea behind it, at least to my knowledge or recollection is the idea was to find out who we told when about each one of these aircraft.

MR. AZZARELLO: Who the FAA told?

MR. FERRANTE: Yes.

MR. AZZARELLO: Who the FAA, at what level, headquarters, who they told and when or at any level of FAA?

MR. FERRANTE: At any level.

MR. AZZARELLO: Well, then, wouldn't you have to examine what every level of FAA knew, including at a headquarters level?

MR. FERRANTE: From my position in AAT-20, that would be impossible. I don't know what everybody in the agency knows. I only know what Air Traffic knew. So, in those cases where I was trying to build a chronology of what took place. The information I had available to me, I used.

MR. AZZARELLO: Okay.

MR. FERRANTE: Information I didn't know, I didn't go seek.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Then let's stick with me on this issue and let's play this out okay. If part of this overarching assignment for the FAA as a whole was, find out what the FAA knew when and who they told it to, okay? That would include TRACONS; en-route centers; regional offices; and headquarters, correct?

MR. FERRANTE: No.

MR. AZZARELLO: And they would all be elements of the F--

MR. FERRANTE: No, because notification of an incident begins with the facility, so, when I went through to determine notifications, it was when facility A or Facility B notified either an operations center or how we notified anybody pertaining to those.

MR. AZZARELLO: Would that include military--would that include a military notification, right? Part of this overarching--

MR. FERRANTE: In this particular document, we went through to find out when we had made military notifications.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Right, that was part of this, right?

MR. FERRANTE: Yes.

MR. AZZARELLO: To go through and see when we the FAA made military notifications, right?

MR. FERRANTE: When, we, the Air Traffic System made military notifications.

MR. KARA: He's talking Air Traffic consistently here and you're talking headquarters FAA. You guys are on two trains on different tracks.

MR. AZZARELLO: Well, let me ask you that--was there

MR. : His office puts out an Air Traffic package after [unintell.] it takes a standard format, he's been doing it for 20 years. And this is the slight modification of that, that kind of effort.

MR. FERRANTE: That is correct.

MR. : He's taking a snapshot which is not agency-wide, he's looking at his facility--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: I don't have knowledge of what information is available to the agency. I've known of Civil Aviation Security for years. I don't know what they can develop. I don't even know how I would go about getting access to it.

MR. AZZARELLO: I'm not talking Security--let's take Security and let's throw it right out the window, okay, I'm going to open a window, I'm going to take Security and take ACS, and I'm going to throw it right out the window.

MR. FERRANTE: Got it.

MR. AZZARELLO: And I'm going to look at Air Traffic.

MR. FERRANTE: Okay.

MR. AZZARELLO: I'm going to look at AAT-1, all right, I'm looking at Bill Peacock, Jeff Griffith.

MR. FERRANTE: Okay.

MR. AZZARELLO: Are they in Air Traffic?

MR. FERRANTE: Yes, they are.

MR. AZZARELLO: They're an element of Air Traffic in FAA headquarters, correct?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: Yes, they are.

MR. AZZARELLO: Did you or anybody else, when they put together this "FAA Summary of Hijack Events," make an effort to determine--not down below, not at the TRACON level; not at the Center level; not at the Tower level; and not at the Regional Operations Center level, but at the FAA headquarters level, the people that supervise Air Traffic in the FAA at headquarters--did anybody make an effort to determine what they knew when regarding each of the four hijacked aircraft and who they told what with respect to that, when, at a headquarters level. What did they know when and what did they tell the military and when did they tell the military? Did anybody say, let's take a look at what the decision-makers at FAA headquarters did? That's a fair question, does he know if anybody looked at that?

MR. FERRANTE: Not to my knowledge.

MR. AZZARELLO: And it wasn't part of your assignment?

MR. FERRANTE: That's correct.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Nobody said to you in putting this together--and that's a fair question, I think, what with all due respect because--

MR. LEWIS: [off microphone] you can't hold that heat in here, I mean, you've already drilled this man about areas that are way outside his purview.

MR. AZZARELLO: I'm going--well, it's not way outside his purview, Brooke, if it says--

SIMULTANEOUS CONVERSATION: [unintell.]

MR. AZZARELLO: And, Brooke, for the record, it was Mr. Ferrante that said that they were asked to look at notifications to the military. Okay, by the FAA, so--

MR. LEWIS: By Air Traffic.

MR. AZZARELLO: --by Air Traffic and there's an element of Air Traffic at headquarters, do you agree.

MR. FERRANTE: See that would have come--

MR. AZZARELLO: All I'm trying to find out is if that was encompassed--that's a fair question. When you were asked to look at Air Traffic

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notification to the military, did they say that they were restricting that to levels below FAA headquarters, that it was just field facilities notification to the military?

MR. FERRANTE: No, but that was how we approached it, because that's where the notifications would have taken place.

MR. AZZARELLO: Notifications to the military would have taken place from the field facilities?

MR. FERRANTE: From a field facility, it would have come--it would have gone through an ROC and ROC may have notified a military entity because they had different reporting obligations than we did. See, in a normal accident, we don't have military notifications.

MR. AZZARELLO: Right, but I'm talking about--this is a hijack.

MR. FERRANTE: Right.

MR. AZZARELLO: Let's go with, in a hijack scenario, as we understand the protocol, and--

MR. AZZARELLO: Get the Crisis Management

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Handbook out so that we will be on the same page.

Do you have Chapter 7, Miles?

MR. : Was that in effect on September 11 or did that come out after September 11?

MR. AZZARELLO: No, this was effective. Escort of hijacked aircraft is supposed to be an FAA Hijack Coordinator.

MR. : And that's always from Civil Aviation Security.

MR. AZZARELLO: Okay, and that's a person in Civil Aviation Security?

MR. : Yes.

MR. AZZARELLO: That makes direct contact to the National Military Command Center. Okay. And they are the entity then, and that person, the Hijack Coordinator is responsible for notifying the military, correct?

MR. : Correct.

MR. FERRANTE: Correct.

MR. AZZARELLO: And, asking, if appropriate, for an escort aircraft, a fighter

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

escort aircraft, correct?

MR. FERRANTE: Okay.

MR. AZZARELLO: So, you're saying that comes from ACS?

MR. FERRANTE: Yes.

MR. AZZARELLO: It's headquarters, it's not Air Traffic people asking for the military escort?

MR. FERRANTE: Correct.

MR. AZZARELLO: It's FAA, but Air, but security.

MR. FERRANTE: What made this different and what made us want to look at other notifications was an individual in Boston Center who took it upon himself to reach out and call Otis Air Force Base and try to get aircraft scrambled.

MR. AZZARELLO: Okay.

MR. FERRANTE: Now, there was no protocol for that that I ever knew of within Air Traffic. I have been a controller working an actual hijacked aircraft; I have been a supervisor in a facility where a potential hijacking was in place; and I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

have been an investigator called into this building at midnight for a suspected hijacking event. All of them were run by Security. All of them.

MR. AZZARELLO: All right, then this is the issue, then. How do you answer the question in this summary, okay, for your superiors--how do you answer the question of when the military was notified without looking at what the protocol was in existence at that time, which would be FAA headquarters here in the hijack coordinating position would notify the military and ask for assistance? So, how could you do that task then, without taking a look at--without looking at what did the Hijacking Coordinator do, even if it is a person in Security. Maybe he's not in Air Traffic, but if they're asking you for--but to make an inquiry of when did "we" the FAA notify the military on each of the four hijacked aircraft, how do you, I mean, isn't it fair to say you can't perform that task without looking at what the Hijack Coordinator, what protocols existed and whether or not they were following them?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: No, I don't think so, at all, because again, starting from Boston Center where we had a controller reach out and call Otis Air Force Base, there's an entry in there to that effect, that that took place. So, when we were asked to find out other notifications, we looked through there to see, okay, what notifications were made. From an element of Air Traffic to either a WOC or an ROC that later translated into a notification to the military. So, some of the information was from the military. And I think, in one particular case, the only notification, United 93, Somerset, Pennsylvania. I think the only notification to the military in that particular case was the military liaison that happened to be in the room. When they turned around in the conference down the hall.

MR. AZZARELLO: What conference room?

MR. FERRANTE: The AT-1--

MR. AZZARELLO: Bill Peacock's room?

MR. FERRANTE: --Bill Peacock's room.

MR. AZZARELLO: And what military liaison

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

are you referring to there?

MR. FERRANTE: Colonel Atkins.

MR. AZZARELLO: On 93?

MR. FERRANTE: Yes.

MR. AZZARELLO: So, do you think that was before 93 went down or after?

MR. FERRANTE: That I don't recall. But at that point, they had that conference going and all that information was coming in. They had other. I don't even know who was on this conference, but I know they had military elements on this conference. And those information were discussed on those bridges.

MR. AZZARELLO: Who looked--just so we're clear, though, you said it's the obligation, you would look at the centers because they would call the military. That's not our understanding. That might have been what Boston Center did on 9/11.

MR. FERRANTE: Okay, I looked at the centers to see who they notified, right? If they notified the ROC or the WOC, because in order to notify Civil Aviation Security, there was never a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

direct link that went from Air Traffic into Security. We didn't have that--

MR. AZZARELLO: Okay, how would--

MR. FERRANTE: --we would do that through the ROC and the ROC would bring in Security or we'd bring it up with the WOC and they would bring in Security.

MR. AZZARELLO: Walk me through pre-9/11, if there's a hijacking. What's your understanding of how the FAA, as an entity, notifies the National Military Command Center and asks for a fighter escort? Walk me through your understanding of the protocol.

MR. FERRANTE: It is that someone from Civil Aviation Security makes a determination that we want to--

MR. AZZARELLO: Before it gets there--how does it get there?

MR. FERRANTE: Okay.

MR. AZZARELLO: I'm at Boston Center, I think I have a hijack, I'm a controller, I tell my boss--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: Right.

MR. AZZARELLO: I tell the Almick or I tell the supervisor.

MR. FERRANTE: The supervisor--

MR. AZZARELLO: Take it from there on.

MR. FERRANTE: --the supervisor or the Almick should have called the ROC and described what they had. And at that case, it probably would have been elevated to the WOC because a suspected hijacking event is relatively rare in our system. The WOC would have notified Civil Aviation Security in the course of their notification process. So, this Crisis Management that you have here, that was Crisis Management procedures that the WOC had. You'll not find this in any Air Traffic facility.

MR. AZZARELLO: Okay.

MR. FERRANTE: That's how--

MR. AZZARELLO: Well, what you find at the Air Traffic facilities they have an obligation at the center to tell the ROC, right?

MR. FERRANTE: Yes, that's correct.

MR. AZZARELLO: And at the ROC level,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you'll find, and am I correct in assuming, then, at the ROC you'll find some guidance that they should notify the WOC if there's a hijacking?

MR. FERRANTE: I believe that to be correct. I have never seen what the relationship is between the ROC and the WOC. I can only tell you from my firsthand experience what it has been.

MR. AZZARELLO: Okay, so if I understand you correctly, pre-9/11, you understood the protocol for notifying--for enlisting military assistance would be from the Center to the ROC, from the ROC to the WOC, the WOC at headquarters notifies ACS, which is a headquarters element, who then calls the NMCC and says we need a hijack escort, correct?

MR. FERRANTE: Correct.

MR. AZZARELLO: Okay. That's the way, at least, the protocol had it laid out?

MR. FERRANTE: Yes.

MR. AZZARELLO: And you were asked to, as part of the summary, right to answer the question when did "we" the FAA notify the military correct?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: It was more--it was more like, see when we made notifications to the military or see if anybody else reached out and called the military.

MR. AZZARELLO: Anybody other than the protocol--were you asked to look at the protocol and say was that followed and when did ACS, when did the Hijack Coordinator notify the ACS--were you asked to look at that or no?

MR. FERRANTE: No.

MR. AZZARELLO: You weren't.

MR. FERRANTE: It's Fond [ph], from Boston Center making notification to Otis.

MR. AZZARELLO: Okay, so you would ask to look at that?

MR. FERRANTE: So, what we looked at was to see did Cleveland Center make any notification--

MR. AZZARELLO: Okay.

MR. FERRANTE: Even though there was no protocol for it, did Cleveland Center notify the military? All right, did Indie notify the military?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay, let's look at that.
Let's take Cleveland Center.

MR. FERRANTE: Okay.

MR. AZZARELLO: Did they notify the military who did they notify? In looking at Cleveland Center, did you see that they called and notified their Regional Operation Center relating to United 93?

MR. FERRANTE: Yes, yes they did. I believe they did, because the information came in from the ROC, so it had to have come from the facility.

MR. AZZARELLO: Let's find 93 here in your report. Let's see, 93 Newark to San Francisco. 9:28 is when the--9:25 appears to be the last regular communication, correct--

MR. FERRANTE: Mm-hmm.

MR. AZZARELLO: --from the aircraft? And at 9:28, you have the radio transmission of possible screaming and the struggle?

MR. FERRANTE: Right.

MR. AZZARELLO: Then you have the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

controller transmission--9:39, you have Cleveland Center notified Great Lakes Regional Operations Center about the screams and statements?

MR. FERRANTE: Correct. And you see, again, my look at this is who the facility notified in order to try to make that change. And only what I could document, either through a facility logs or from another source and somewhere we had information from NEADS on when they said they were notified.

MR. AZZARELLO: And you had tapes from Cleveland.

MR. FERRANTE: Yes, or we had personnel statements where we would --

MR. AZZARELLO: Personnel statements?

MR. FERRANTE: Right.

MR. AZZARELLO: Did you know then that Cleveland Center also notified the Command Center?

MR. FERRANTE: No, I did not.

MR. AZZARELLO: You didn't know that? Okay, you didn't know that they did that?

MR. FERRANTE: No, and I would ask in that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

particular case, the Command Center would not have had a role in that with the exception if we were going to restrict traffic flow through Cleveland Center's airspace as a result of it.

MR. AZZARELLO: But they told them and gave them periodic updates? And did you know that those updates went from Command Center to the Aviation Crisis Center, from John White to the Crisis Center?

MR. FERRANTE: I did not know that, no, but I'm not surprised by it.

MR. AZZARELLO: Why are you not surprised at it?

MR. FERRANTE: Because if there was a link established between this building and the Command Center and the Command Center was getting information, the information came flooding in, from a variety of different sources. So, I can tell you that if I had been interest room--if I had got information from one entity, I would certainly have, you know, given it to another entity. So, I'm not surprised that the Command Center said,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

hey, we got an update on United 93, whatever that update might be.

MR. AZZARELLO: Do you know that Cleveland Center was, as they reported that information about United 93, that it was also monitored on the Tactical Net--

MR. FERRANTE: No.

MR. AZZARELLO: --at FAA--in headquarters in the Aviation Crisis Center?

MR. FERRANTE: On that particular day, I didn't even know what a Tactical Net was.

MR. AZZARELLO: Okay.

MR. FERRANTE: Nor there was one that had been established.

MR. AZZARELLO: Okay, no idea about that. Would that be why those communications are not in here?

MR. FERRANTE: That's correct.

MR. AZZARELLO: Did anybody look at what--this is the difficulty I'm having. If the Hijack Coordinator is the person supposed to notify the military--the Hijack Coordinator is the person

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

who is supposed to notify the military and ask them for a fighter escort, okay? And if that person sits in the Aviation Crisis Center, works up in this area when there's a hijack and they activate the Crisis Center and he's in here, okay. And that information was coming into there. Then how could this document then, address whether or not the military was notified if you don't look for logs, tapes, communications that would have occurred in the normal channel where the military would have been notified? Do you follow my question or no?

MR. FERRANTE: At that point in time, I had no idea what the role of this group was. As I said, i had been invited in there on one occasion and this was Admiral Flynn was a former director of security for the agency. They had a Northwest flight that inadvertently squawked 7500 as it was flying across the coast as to London or somewhere across the pond. They had just left U.S. airspace, they had no direct communications with us. They called me at home and asked me to come out only because of my Air Traffic knowledge, not because of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

anything else.

So, I spent a total of a half hour here, I gave Admiral Flynn a short briefing and I went back home. Because it was a Security issue and they handled it. And most of the work they did was confidential, secret, top secret, whatever they never invited outside entities. so we never went to Security asking them what information they had learned, who they passed it on to?

MR. AZZARELLO: On what event are you talking about?

MR. FERRANTE: On any of the events--

MR. AZZARELLO: Now, let's see 9/11, specifically.

MR. FERRANTE: Right.

MR. AZZARELLO: It's after 9/11, you're involved in some much bigger effort to try and pull together what happened when in all the different facets of that day, is that fair to say?

MR. FERRANTE: No, my--I'm involved in trying to pull together everything that happened within Air Traffic.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Okay, then, let me ask you this. There's two ways to approach notifications here, right? There's a protocol that was in existence on 9/11, correct?

MR. FERRANTE: Correct.

MR. AZZARELLO: That protocol would include an element from Security asking--formally asking the NMCC to assist in a hijack scenario, correct?

MR. FERRANTE: Correct.

MR. AZZARELLO: That's one avenue to look at to see what did the FAA, when did the FAA ask for military assistance, correct?

MR. FERRANTE: Correct.

MR. AZZARELLO: Did you have anything to do with looking at that formal notification?

MR. FERRANTE: No.

MR. AZZARELLO: Who looked at that?

MR. FERRANTE: I don't know.

MR. AZZARELLO: You have no idea?

MR. FERRANTE: I have no idea. I would assume that Darlene Freeman group there was trying

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to pull together the agency response, not the Air Traffic response.

MR. AZZARELLO: Let's leave that aside, then, you don't know who was doing it. Okay, let's put that aside.

Now, let's go to, there's--it was very evident that Boston Center acted outside the box, let's say outside the written protocol on 9/11, is that fair to say?

MR. FERRANTE: Yes.

MR. AZZARELLO: You agree with that?

MR. FERRANTE: I agree.

MR. AZZARELLO: They did not have an obligation to call Northeast Air Defense Sector, under the protocol to ask for help?

MR. FERRANTE: That's correct.

MR. AZZARELLO: But they, nonetheless, acted outside the box and called the military?

MR. FERRANTE: That's correct.

MR. AZZARELLO: You also wanted to, then, look at, well, did Cleveland act outside the box, right?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: That's correct.

MR. AZZARELLO: Did they call the military about United 93?

MR. FERRANTE: That's correct.

MR. AZZARELLO: And what about American 77? That was lost in Indianapolis airspace, did you look at Indie Center and see if they acted outside the box and called?

MR. FERRANTE: Yes, we did.

MR. AZZARELLO: Okay, how about New York Center?

MR. FERRANTE: Yes, we did.

MR. AZZARELLO: You looked to see if they had acted outside the box? So, was it your role, then--so I understand your role--was it your role, then, to look at let's see, you, Mr. Ferrante, take a look and examine what notifications can you find that Air Traffic made to the military outside of which ones might have occurred under the protocol?

MR. FERRANTE: Yes.

MR. AZZARELLO: Somebody else is going to do that, maybe, but you're going to look at what

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were the notifications to the military by Air Traffic that were not in accord with the protocol--that were outside the box of the protocol?

MR. FERRANTE: I wasn't thinking about the box of the protocol. I was thinking about who did Air Traffic tell and when

MR. AZZARELLO: Who did Air Traffic tell and when? Okay, But that would have been not in accord with protocol to notify the military to depend on looking at Air Traffic.

MR. FERRANTE: But I wasn't looking for the protocol or specific to the military. Who did Air Traffic tell and when?

MR. AZZARELLO: Okay.

MR. FERRANTE: So, if they told and ROC, all right, that was one form of notification. If they told the WOC direct, that was another form of notification. If it was broadcast over what we now call the DEN log, that was a different form of notification.

MR. AZZARELLO: Right, but there was no

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

DEN on 9/11?

MR. FERRANTE: Well, it wasn't called the DEN, it was the forerunner of DEN, in Pam Frenier's book, I think she refers to it as "the never-ending telecon."

MR. AZZARELLO: That's the Cannoles, the one that Dave Cannoles started?

MR. FERRANTE: That's correct, that's the conference room--in the Air Traffic Room of 1000 West, end of this hall--

MR. AZZARELLO: Mm-hmm.

MR. FERRANTE: --right? They started a conference with Dave Cannoles and Tony Mello, Tony was my deputy at the time, still is. We both worked for Dave Cannoles. I don't know who was in there, I wasn't here at the time. They started the teleconference--

MR. AZZARELLO: Mm-hmm.

MR. FERRANTE: --that is now monitored inside this room, still to this day, 24-hours a day/7-days a week.

MR. AZZARELLO: And that's how the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

military finds out today?

MR. FERRANTE: Today.

MR. AZZARELLO: But on 9/11, when Dave Cannoles set that up, are you saying that he set that up and that, on 9/11 with the intent that that would be the way that they would notify three-year military?

MR. FERRANTE: No, absolutely not.

MR. AZZARELLO: Okay, well, then, let's separate those. I might be the DEN today, and the way to notify them, but it wasn't on 9/11, as Dave Cannoles ran it?

MR. FERRANTE: That's correct.

MR. AZZARELLO: On 9/11, there were two ways you can look to determine what notifications went to the military right? One would be, well, what's our protocol? Did we follow it? And you didn't look at that, you weren't asked to?

MR. FERRANTE: Correct.

MR. AZZARELLO: The other way would be, did we act outside our protocol and did somebody that wasn't supposed to call the military to ask

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

for help--to ask for help, right?

MR. FERRANTE: Yes.

MR. AZZARELLO: And that's the part you looked at?

MR. FERRANTE: Not looking at did we act outside of our protocol, did we act inside of our protocol, looking only at who did we tell, when did we tell them.

MR. AZZARELLO: Who did we tell and what did we tell them at Air Traffic Facilities?

MR. FERRANTE: Yes.

MR. AZZARELLO: Which, it jut so happens would then fall out of the protocol because if not, the Security people? Okay.

MR. KARA: And because of what Boston did.

MR. AZZARELLO: Right.

MR. KARA: As I sit here and listen to this, the one thing that comes through loud and clear is because Boston did what they did and they proceeded to do what they did here.

MR. FERRANTE: I've got to tell you, I'm born in Massachusetts, if you would have asked me,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Otis Air Force Base closed 25 years ago and there's nothing there. So, had I been a controller on duty in Boston Center, unless I had other knowledge that had changed my perception of it, I would have never thought to call Otis, because that's an Air Force Base from when I was born. It's not active anymore.

MR. AZZARELLO: So, I understand, you weren't paying attention to protocols--

MR. FERRANTE: Right.

MR. AZZARELLO: -you were just looking at what did we, Air Traffic facilities tell--notify the military and when? When do we notify and when do we don't?

MR. FERRANTE: Yeah.

MR. AZZARELLO: But now taking a look at Air Traffic Headquarters to see if they acted outside the box?

MR. FERRANTE: That's correct.

MR. AZZARELLO: Now, let me--

MR. FERRANTE: Because I didn't have knowledge of Air Traffic--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: --hold on--one question--

MR. FERRANTE: --doing anything in or out of a box. I have knowledge that these teleconferences were taking place, but from the knowledge I had is they had field facilities, as events were happening, they had these field facilities brought up on these lines. Today, we have all 20 centers all the time. Back then, they had Boston Center come on. When it moved into the New York area, they had New York Center come up. When it moved into the events taking place in Great Lakes, they had Cleveland Center come up.

I walked into the ROC--I don't know, it might not have been the ROC, I was in Chicago. I walked into the Great Lakes Regional Office because I could not get a car--obviously, the system had already been shut down. And I was trying to make arrangements to borrow a government van.

This was approximately 11:00 o'clock on Tuesday.

MR. AZZARELLO: I read that in the Frenier book.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: Okay.

MR. AZZARELLO: Let me ask you a question now about Boston Center, you knew the controller, himself, is watching planes. So, he's not going to be the guy that called NEADS and asked for help, right?

MR. FERRANTE: Right.

MR. AZZARELLO: That would be from the TMU area right?

MR. FERRANTE: Not necessarily.

MR. AZZARELLO: The Traffic Management Unit area? Well, where did you find him, where did Boston notify Northeastern? It wasn't at a controller's station, right? It would be one of the supervisors?

MR. FERRANTE: It would have been one of the supervisors, it would be my estimate.

MR. AZZARELLO: Where did you look, then, to see if Cleveland acted outside the box and called the military?

MR. FERRANTE: Facility logs; statements from the supervisor as to who they notified when

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and what we had access to in tapes at that point.

MR. AZZARELLO: So, tapes, would that include tapes that you had access to from the Traffic Management Unit area and the supervisors area, the Almick and the TMU area?

MR. FERRANTE: If there had been any pertinent transmissions, we had, that's what we had asked for, any position that had pertinent transmissions with anything to do with 9/11.

MR. AZZARELLO: And you would ask the, part of that I assume, then you would ask Cleveland's management, supervisors, and Almicks, and at the TMU supervisors, hey, did you make any notifications?

MR. FERRANTE: Yes.

MR. AZZARELLO: No.

MR. FERRANTE: I don't know if we asked that specifically notifications to the military. We would have ask the questions who did you notify on this and when, because that's how we learned--

MR. AZZARELLO: Well, didn't you --the military if you were looking to see if they acted

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

outside the box like Boston and called the military?

MR. FERRANTE: We were asking who they notified, we didn't care who it was. Anybody that we notified and when we notified them. Because that's how we came to closing the loop to on American 11, is it? Seventy-seven, excuse me, that hit the Pentagon.

MR. AZZARELLO: But didn't you--you said that Boston acted outside the box and called the military directly and you know that. That's not what they were required to do, but they were thinking on their feet and they did it?

MR. FERRANTE: Yes.

MR. AZZARELLO: And you said you tried, didn't you say you tried to find out if Cleveland did the same thing?

MR. FERRANTE: But we didn't ask, did you operate outside the box?

MR. AZZARELLO: No, did you ask them--

MR. FERRANTE: We didn't ask did you go outside the protocol

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: You didn't ask did you call the military?

MR. FERRANTE: We asked who did you notify on the aircraft, right? And when did you make that notification?

MR. AZZARELLO: To include the military, was it clear to them that you didn't mean just FAA?

MR. FERRANTE: Oh, it was anybody--

MR. AZZARELLO: --anybody you notified. And did they tell you that they called Northeast Air Defense Sector?

MR. FERRANTE: No, they did not.

MR. AZZARELLO: Oh, they didn't tell you that?

MR. FERRANTE: No, not that I can recall.

MR. AZZARELLO: You never heard the tape where the--one of the supervisors from the Cleveland Center called Northeast Air Defense Sector?

MR. FERRANTE: No.

MR. AZZARELLO: No idea that that tape existed?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: I'm hearing it from you.

MR. AZZARELLO: Until I'm telling you today?

MR. FERRANTE: I mean, there are hundreds and hundreds and hundreds of tapes.

MR. AZZARELLO: Well, are there--how many supervisors were there, were there hundreds and hundreds of supervisors out at Cleveland Center. Would you have interviewed all the management on duty at Cleveland Center and say--to find out if they did notify the military?

MR. FERRANTE: no.

MR. AZZARELLO: You wouldn't have asked all of them who were on duty?

MR. FERRANTE: In fact--

MR. AZZARELLO: So, how could you be sure that you didn't get in touch with somebody who did notify the military.

MR. FERRANTE: We asked the Regions to do that to determine who we had that notified anybody--

MR. AZZARELLO: That notified anybody?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: --right and what we got was information such as this, where they notified the Great Lakes ROC. So we added that in here. I don't know who else may have been notified from Cleveland Center.

MR. AZZARELLO: Cleveland Center is on a phone call calling--receiving a call from Northeast Air Defense where they discussed United 93. At sometime after 10:07, 10:08.

MR. FERRANTE: Unless that was contained in somebody's personnel statement, within the first week of the events, we would not have known it at that point, nor would we have gone backwards in time after the event because the rush to put this together, I mean, this was printed on Monday morning.

MR. AZZARELLO: What about the three years that have passed since this? No one's ever brought to your attention that Northeast Air Defense Sector was told by Cleveland Center that there was a bomb on-board United 93 and there was screaming on the frequency? This is--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: No.

MR. AZZARELLO: --this is the very first time, April 19, 2004, as we sit here today, is the very first time you become aware that Cleveland Center did make the military notification?

MR. FERRANTE: They may have told me that, I don't recall, but, again in the aftermath of--

MR. AZZARELLO: If they had told you that--

MR. FERRANTE: --before I produced this?

MR. AZZARELLO: --would that have been in there.

MR. FERRANTE: It would have been in there.

MR. AZZARELLO: What if you learned that after producing that, would you have thought that that was something you could bring to the attention of somebody or amend the report to put it in there?

MR. FERRANTE: At the time that we completed this, we turned a copy of this over to Darlene Freeman and there was another group. And as we developed additional information, if we had

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

learned that within the first few weeks of it, more than likely, we would have turned that over.

MR. AZZARELLO: Would have told them.

MR. FERRANTE: Yes.

MR. AZZARELLO: The--

MR. FERRANTE: And we would have done that through Dave because Dave was the one working with Darlene. I saw Darlene once during that--

MR. AZZARELLO: Dave?

MR. FERRANTE: --Cannoles.

MR. AZZARELLO: --Cannoles was working.

You were the author of this document that says at 8:40 Northeast Air Defense Sector logs show that they were notified by the FAA of the events concerning American 11, correct?

MR. FERRANTE: Yes.

MR. AZZARELLO: The FAA, but really, what it was was Boston Center, right, that made the call, it wasn't FAA, I mean, as after it wasn't headquarters it was FAA, you just didn't modify where it came from--

MR. FERRANTE: That's correct.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: --it's FAA notified the events concerning 11. This is the log entry at 8:40. This is the NEADS MCC log--

MR. FERRANTE: Okay.

MR. AZZARELLO: --which is where all their information sort of comes into it. Somebody identifies an aircraft as a suspect aircraft that day. 1240 Zulu, which is 8:40 a.m., possible hijack AA-11 Flight.

MR. FERRANTE: ?Okay.

MR. AZZARELLO: So, this appears to accurately, at least reflect this NEADS log here. And you're the author of this, but you're saying you didn't see these logs?

MR. FERRANTE: No, I never saw this log, I probably have a chronology, in fact, I don't know exactly what's it titled, but I know that there is a chronology, probably on one sheet of paper that has four or five different notifications to it.

MR. AZZARELLO: Oh, that might be it, then. That one--

MR. KARA: Have you seen this one?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: --have you seen that one?

MR. FERRANTE: Yes, I have, but I don't know if I saw this at the time we were producing that.

MR. AZZARELLO: The date on this is September 20, so that would have been produced after that.

MR. FERRANTE: But we have--

MR. AZZARELLO: So you saw [unintell.]

MR. FERRANTE: I saw something else, you know, for example, in looking at this now, I've been asked about this document recently. I couldn't tell you what [unintell.] stands for, that's not a term that I think anyone in Air Traffic would understand. Washington Ops activates the Primary Net which includes the NMCC and Secret Service. The NMCC, until you just told me the National Military Coordination Center? Well, it's also the National Maintenance Coordination Center that we have in the Command Center at Herndon.

MR. AZZARELLO: Take a look at this NEADS log and tell me where you see the first reference

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to United 93 on there.

MR. FERRANTE: First reference is at 1407, where it says bomb on-board, United 93 over Pittsburgh.

MR. AZZARELLO: 1407, 10:07 Eastern Time right?

MR. FERRANTE: Absolutely.

MR. AZZARELLO: Take a look at the chronology you authored for 93 and tell me if you see anything in there 10:07 of notification to the military?

MR. FERRANTE: No.

MR. AZZARELLO: In fact there's nothing--

MR. FERRANTE: At 10:07 is when we say he crashed and that was based on a pilot report.

MR. AZZARELLO: That was based on the Falcon jet?

MR. FERRANTE: Right. And we didn't know that, you know, that's why this time is approximate, there's a lot of personnel statements on United 93.

MR. AZZARELLO: Help me with this, then,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what were you--when you put that together, help me with this, Tony, what were your thoughts, then on United 93 and there not being any notification time for the military, when you drafted that and handed that up to Cannoles? Did you have any conversation with him? Because what strikes me, you know, bluntly is there's a notification time there on American 11 and it refers to the NEADS logs?

MR. FERRANTE: Right?

MR. AZZARELLO: Okay, we just looked at that. Now, let's look at United 175, I'd like to see what you say on that. Okay, United 175, again, this is the document you authored, what does it say at 9:05?

MR. FERRANTE: NEADS logs indicate they were notified by the FAA on the events concerning United 175.

MR. AZZARELLO: See if you can find that on the NEADS log right here, 9:05; 1305 Zulu.

MR. FERRANTE: United 175, possible hijack Boston to LAX.

MR. AZZARELLO: So that's in there?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: That's in there.

MR. AZZARELLO: And that's in this report?

MR. FERRANTE: Yes, sir.

MR. AZZARELLO: Then, it strikes us and I would like your comments, as why it's found at 10:07, report of United 93 bomb on-board, why wouldn't that be in here, too. And the other two references are in this?

MR. FERRANTE: In the first place, I've never seen this log before. From some chronology, we got notifications of what we made. If we had a notification that Indie--or a log--

MR. AZZARELLO: So did somebody give you something then, you didn't see this, but somebody gave you a sheet of paper that would have had the 8:40 time the NEADS logs--

MR. FERRANTE: Yes.

MR. AZZARELLO: And it would have the 9:05 time?

MR. FERRANTE: Yes.

MR. AZZARELLO: But it would have not included the 10:07 time in it?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: It may have included the 10:07 time, but in reading our chronology, we're showing it crashed at 10:07. So is it germane to the issue that we notified the military at 10:07, although the aircraft has already crashed. So, we may not have thought it important enough to even add in there at that point.

MR. AZZARELLO: So, if the notification came at the same time that you got a notification of a crash, you might not have put it in there, because you would not have thought it might have been germane?

MR. FERRANTE: We may not have put it in there, that's correct.

MR. AZZARELLO: Even though part of your assignment was to find out when the FAA advised the military? So, you, are you saying that if you advised the military after the fact, you would have left it out because it's too late they can't do anything about it?

MR. FERRANTE: I don't know what the reasons were behind it, but if it didn't go in the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

chronology, because, again, in keeping with what happened prior to the impact with any of the buildings or with the crash he had in 93, we were looking for what transpired during the flight. So, if we made notification of a possible bomb on United 93 at the same time we're saying he crashed, we probably would have left that out.

MR. AZZARELLO: Why again, I'm having difficulty in understanding why you wouldn't have put it in.

MR. FERRANTE: I don't understand the importance of the relevance of it at the point where he crashed, we're also telling them about the aircraft with a bomb on-board.

MR. AZZARELLO: Well, wouldn't that just mean that they got late notification?

MR. FERRANTE: I could.

MR. AZZARELLO: If that's the first reference you see to it?

MR. FERRANTE: But I've not seen this log. I'd have to go back and find what logs we did use because we did have log entries and how we made all

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of these.

MR. AZZARELLO: But there's nothing prior to 10:07 that says the military was advised through another avenue about United 93?

MR. FERRANTE: That's correct.

MR. AZZARELLO: So, just so I understand, if there was no indication to you, no evidence that they were notified prior to 10:07, would that have been left out because it was after the fact or at the same time that your report, that there's a report that 93 crashed? Was there a discussion about it?

MR. FERRANTE: About the--

MR. AZZARELLO: The 10:07 time?

MR. FERRANTE: --you know, it's two and a half years ago, I don't recall if there was discussion about it or not. In looking at, when we made notifications during the flight of each of those four aircraft, anything that we could point to and say, okay, we have a log entry that says we did A at such and such time, we'll put that in there.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: That's what I'm having difficulty here.

MR. FERRANTE: But if we had a log entry that said that we notified the military and we also have a log entry that showed the aircraft that crashed at the same time, we might not have put that in there. I don't know that I knew United 175 had ever been notified to NEADS, because when you asked me the question when we started this, I told you I didn't believe we notified them at all, except through the individual who was down at the end of the hall, Colonel Atkins. Because at that point, the military was on that line.

MR. AZZARELLO: Okay, well if you thought it was Atkins, then where is it in here--where's the entry that says Atkins--military Atkins was aware of United 93 down the hall talking to Cannoles or what? Why isn't her, why isn't the notification to her if that's the only one you thought existed?.

MR. FERRANTE: Because I don't think we had that information when we put this together.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: What that Atkins had--

MR. FERRANTE: That Colonel Atkins had been in the room. Remember I was not in the room at all during September 11.

MR. AZZARELLO: Well, I'm just asking you because you said Atkins was the--you thought maybe was in the--

MR. FERRANTE: I learned that after the fact be there was a lot of discussion that by the time that United 93 had crashed and also by the time American 11 had crashed, you know, my understanding was there were numerous military entities that were in that conference, as well. I don't know who was on it.

MR. AZZARELLO: Going back to the NEADS log, you see 14:15, it says down, UAL 93 down North of Camp David bomb?

MR. FERRANTE: Mm-hmm.

MR. AZZARELLO: So that would indicate, at least, on their chronology that they were advised of it with a Mode-3, before they were advised that it was crashed, right?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: Oh, okay, 15:27, okay. I thought that was a time, that's a beacon code, right.

MR. AZZARELLO: That's a beacon code right. So this is not, to the extent that there was a decisions, a conscious decisions to leave the WOC to 10:07 notifications, you did not make that conscious decision?

MR. FERRANTE: No.

MR. AZZARELLO: Did you-and you don't remember discussing it with anybody?

MR. FERRANTE: I don't recall any notifications that we had made on United 93. My--up until you showed me this, I thought that the only notification had been made through Cheryl Atkins who happened to be in the room and--

MR. AZZARELLO: But you found that out afterwards?

MR. FERRANTE: --and that was, and again, when I put this together--

MR. AZZARELLO: You didn't know--

MR. FERRANTE: --unless I had a piece of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

paper that I could show, where's how or I had a personnel statement, I didn't add it in there, because I tried to stay factual.

MR. AZZARELLO: Well, when you gave this to Cannoles, Dave Cannoles, did you have, wasn't there some discussion of or what--where's the notification on 93, you have one on 11, Tony, that you cite in the logs. You have one in this document you gave me on 175; and it says the NEADS logs indicate at 9:05, that they were notified of United 175. Well, what do the logs say, Tony, about United 93 and American 77?

MR. FERRANTE: I can't find you anything in the logs that indicated we notified the military. And that's what I would have said to David.

MR. AZZARELLO: That you can't find anything in the logs to indicate that the military was notified?

MR. FERRANTE: Right.

MR. AZZARELLO: How does that square with this, though, here's an entry right here--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: I never saw that.

MR. LEWIS [?]: [off microphone] That's coming through Atkins.

MR. AZZARELLO: This is not coming through Atkins.

MR. LEWIS: He says that he never saw that document. [unintell.]

MR. AZZARELLO: It wasn't Atkins, so he didn't say this came from Atkins?

MR. LEWIS: [unintell.]

MR. AZZARELLO: You said this information came to you from Cheryl Atkins?

MR. FERRANTE: I have never seen that information before.

MR. AZZARELLO: You didn't say this came from Cheryl Atkins?

MR. FERRANTE: No, what came from Cheryl Atkins was the fact that she was in that room. And at one point, I don't recall when it was, she acknowledged she had been in there when there was discussion of that aircraft.

MR. LEWIS: [off microphone] [unintell.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: No, he said he saw a one-page document, not this log, you said you saw a one-page document that had--

MR. FERRANTE: Someone else had put together a chronology of when notifications had been made.

MR. AZZARELLO: The NEADS, was it from the NEADS perspective of what they were told it was?

MR. FERRANTE: You know, I can't recall, what perspective it was, I know it's going to be in the documents that we've turned over to you.

MR. AZZARELLO: Well, the only--

MR. FERRANTE: But there are volumes and volumes of materials.

MR. AZZARELLO: Well, the logs--the NEADS log that you are citing in the report that you oversaw and drafted, you're citing to the very thing that you say you never got to see.

MR. FERRANTE: I never saw this particular log, never, today was the first time.

MR. AZZARELLO: You cited to a NEADS log.

MR. FERRANTE: We had a sheet of paper

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that looked similar to this, although it's not this one that I don't know if Jerry Shakely [ph] putting it together or somebody in the Air Traffic staff that was based on what they had transcribed from the Never Ending Telephone Conference down there since you don't want to call it the DEN, although that was the forerunner of the DEN.

MR. AZZARELLO: It became the DEN.

MR. FERRANTE: But there was some sheet of paper on who we had notified, when. So, if we had something that we could point to and say, okay, here is--bingo, we made notification.

MR. AZZARELLO: But somebody apparently had access to the NEADS logs because it's quoted in your summary.

MR. FERRANTE: Yes.

MR. LEWIS: [off microphone] [unintell.]
classified.

MR. AZZARELLO: It's cited here.

MR. FERRANTE: Somebody put together information on when we notified NEADS, but it doesn't contain all of this information.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: And it just pulled out on the information on what, on each of the four flights?

MR. FERRANTE: Yes, well, I don't know if it had United 93 on it.

MR. AZZARELLO: Who was that? Who gave you the NEADS information?

MR. FERRANTE: I don't recall, it was something that we generated during the course of trying to write this. We had information that was being faxed in--

MR. AZZARELLO: Well, who did you work with on military notification, there must have been somebody you worked with on when was the military notified, that had classified clearance that was able to look at the log?

MR. AZZARELLO: I may have cut the sheet from Dave, who got it from somewhere on the 10th floor. I may have got the sheet from Dan Diggins, who had done some of the work in capturing the notes on the day that it happened. But we had a sheet of paper that deals with chronologies that we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

used as our basis of when we notified them.

MR. AZZARELLO: That was--deals with an FAA chronology?

MR. FERRANTE: Yes.

MR. AZZARELLO: Well, I wanted to know, though, if you know, who dealt with the NEADS chronology, what they had given to the FAA?

MR. FERRANTE: I don't know who dealt with the NEADS chronology. What I saw, similar to this Notification to the Military, right? You see this entry says the NEADS log show--

MR. AZZARELLO: But.

MR. FERRANTE: I never saw a NEADS log, I saw a line that says NEADS log shows.

MR. AZZARELLO: That an FAA person gave you--

MR. FERRANTE: Yes.

MR. AZZARELLO: --that may have that--

MR. FERRANTE: So we would use that as far a notification for United 175, although I never saw the NEADS log, this tells me and this is--and I don't even know who put this one together.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Well, this was three days after.

MR. FERRANTE: I have to suspect this was done by Security. Yeah, but this was done on the 20th and this probably is not the first version of it. This is probably the final version of it.

MR. AZZARELLO: The person that may have put this together, indicated that they were asked to look at what differences there might be between what the FAA summary said on notifications and what the military had said.

MR. FERRANTE: Okay.

MR. AZZARELLO: And I'm curious as to whether you were brought into that.

MR. FERRANTE: No.

MR. AZZARELLO: Because if you drafted this and somebody was looking at differences or inconsistencies between what the FAA said they told the military when in here, versus, what the military said they were told by the FAA and when--they didn't bring you into that?

MR. FERRANTE: No.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Even though you put this together?

MR. FERRANTE: no.

MR. AZZARELLO: Okay.

MR. FERRANTE: See, but I had a sheet of paper that had some--had some resemblance to this--

MR. AZZARELLO: It's a sheet of paper and you don't know who gave it to you, though?

MR. FERRANTE: No, you know, I gotta think it was probably given to me by Dave or it could have been given to me by Dan. Because we had a lot of people that were involved in the writing of this.

MR. AZZARELLO: Dave Cannoles again, but why would you think that they might have been one of those two people, that it might have been one of them that gave you the NEADS, the information of what the NEADS log showed?

MR. FERRANTE: Because our quest for information in trying to develop this, there were really three main people that I relied on for information. It was Dave that was coming back with

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what he needed or what was going on; Dan Diggins; and Doug Gould.

MR. AZZARELLO: Okay, so those were--

MR. FERRANTE: I had four or five other staffers that helped, you know, assemble things and, you know, take care of documents and store and so forth. In fact, at one point in time, when I told people that they were going to have to work through the weekend, you know, that's always a real popular thing that you do as a manager, right?

MR. AZZARELLO: I was a [unintell.] decision--

MR. FERRANTE: So, when I told them, I said, you know, everybody had volunteered repeatedly, we'll do whatever it takes, we'll help you have what we want. I said, I need to have Dan, I need to have Doug, the rest of you are welcome, but you're not required to be there. And they all came.

MR. AZZARELLO: Tell me about American 77, where do you have, do you have anything on a notification to the military on that?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: I don't think there was any notification to the military on American 77 because I recall it was, to me, a comedy of errors that we confirmed that the aircraft had crashed. So, I would think that the first time we have anything on here are these end entries, where we're on a line with the Secret Service at the time. So, this would not be--would not constitute notifications to the military, unless the military was somehow notified in this time frame up here, to my knowledge, there were no military notifications other than what I read in your log.

MR. AZZARELLO: What did you read in here? See anything in here about notification on 77?

MR. FERRANTE: No, American Airlines, hijacked 13:24, but it doesn't have a number, it has a registration number.

MR. AZZARELLO: That's a tail number.

MR. FERRANTE: So that could have come from American Airlines to another entity because we would not necessarily have been able to get a tail number. The only way I can go in and get a tail

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

number is if we go into the actual flight plan where it's filed.

MR. AZZARELLO: That actually came your Boston Center folks.

MR. FERRANTE: Oh, it did?

MR. AZZARELLO: Yeah.

MR. FERRANTE: I don't know whether they probably had it in the flight plan information they have.

MR. AZZARELLO: They got it from the Airline, that's the tail number to 11.

MR. FERRANTE: Okay.

MR. AZZARELLO: But if, hypothetically, you saw this log, you wouldn't know from this whether that was 11, 77, or--

MR. FERRANTE: Could have been a completely different airplane.

MR. AZZARELLO: But would you know as an accident investigator that you could with a tail number call the airline and say find out in an accident investigation which of your aircraft had this tail number?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: Absolutely.

MR. AZZARELLO: And then they would have told you 11?

MR. FERRANTE: Absolutely.

MR. AZZARELLO: What about here, 1334 Zulu, American 77, isn't that a refer flight to LA, lost, unable to locate. It doesn't say where it is, but it says lost, unable to locate rather than a specific call zone.

MR. FERRANTE: And that's all it says, it doesn't say anything about notification. I don't know where they picked it up. They could have got that from the company. Again, it wasn't that they were notified of that and, again, to my knowledge the only notification we did was right here when we notified the Great Lakes ROC.

MR. AZZARELLO: Okay.

MR. FERRANTE: And I don't even know, all I know of how the process works, but I know we had a flight service station in Terre Haute that had reached out and started calling trying to find a downed aircraft. They ended up talking to a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

sheriff's office in, I believe it's Ashland, Kentucky, right?

MR. AZZARELLO: Mm-hmm.

MR. FERRANTE: Who, in turn calls Indianapolis Center and says we have a report of a downed aircraft are you missing one. We just closed it--and confirmed that that aircraft crashed.

MR. AZZARELLO: You think that's what happened there.

MR. FERRANTE: Okay.

MR. AZZARELLO: That's a good memory even though it was almost three years ago.

MR. FERRANTE: A lot of this I've relived in working with Miles of the course of the last 8 months or so and I don't mean that--

MR. AZZARELLO: Did you spend a lot of time with the Boston Center folks who did think outside the box and had a--was giving up some periodic updates to the Northeast Air Defense Sector?

MR. FERRANTE: I did not spend any time

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

with any of the individuals, personally.

MR. AZZARELLO: Did any of your staff?

MR. FERRANTE: No, because the FBI said that they wanted to conduct their own investigations, so we facilitated the investigations of those personnel. In the first three weeks, following September 11, I would go home, on an average day, I'd go home that midnight and be back at 5:00 and that was what I did, every day for the first three weeks. So, I did not go to any facility, the only interview I asked to be conducted I think I sent Jim Fosse [ph] to Cleveland Center to talk to the controller that worked United 93. And I think that was a request that was made a week or so after the events had taken place where the Administrator wanted to know how the controllers were doing.

MR. AZZARELLO: So, just so, I'm clear on the final analysis here in the summary. So, when you had this in on the 17th as a final product on the 17th--

MR. FERRANTE: As a preliminary final

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

product.

MR. AZZARELLO: --preliminary final product on the 17th, was it your understanding that this document did not address any military notifications as they might have been under the normal protocol through the Aviation Crisis?

MR. FERRANTE: That is correct.

MR. AZZARELLO: Well, was that discussed--well, along the lines did you have a discussion with Dave Cannoles, for example, that hey, Dave, this has got the Air Traffic Element below headquarters Air Traffic. This is just TRACONS and centers and what they did in terms of talking to the military. But there could have been other military notifications that the FAA made at a headquarters level either by Cannoles, down in Air Traffic or somebody in the WOC or somebody in the Crisis Center, so you ought to look at that because that's a gap that's left open here? Did you have that kind of discussion?

MR. FERRANTE: No, I didn't and I probably wouldn't even have considered having that type of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

discussion. I probably would have told Dave this is what we're able to validate through facility logs and the facility records as well as statements and information that we had.

But when we developed this, I don't know exactly when, but I did know that Darlene Freeman had been tapped to chair a group that was looking at the overall response and I do know that we gave her a copy of this so, you know, if I were to have that conversation Dave, it would just be make sure Darlene's got a copy of this, because this is as far as we went with it. With the assumption that they're going to go--

MR. AZZARELLO: Going to go the rest of the route?

MR. FERRANTE: Right and I never saw a product--

MR. AZZARELLO: IT was clear to Dave Cannoles then that this did not include the Security notifications that could have occurred?

MR. FERRANTE: Yes.

MR. AZZARELLO: Through the formal

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

protocol?

MR. FERRANTE: Yes.

MR. AZZARELLO: It was clear to Dave?

MR. FERRANTE: I'm relatively certain it was clear to Dave.

MR. AZZARELLO: How about to Doug Gould and Dan Diggins, was it clear to them that this didn't include the formal notification branch that you didn't look at that?

MR. FERRANTE: Yes.

MR. AZZARELLO: Okay. What about what was going on with Cannoles that later transformed into the DEN. Did you, as part of your inquiry to form this summary, did you look down there, finally try to find out from them whether or not they made notifications?

MR. FERRANTE: I looked at the log they had and the first couple of entries that they had in the log, I thought there were some glaring discrepancies in the time.

MR. AZZARELLO: Let me know if this looks like the log. It was given us by Shirley on the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

16th which was Friday. I had asked for--just so you know, what yielded this document, is in the Frenier book.

MR. FERRANTE: Okay.

MR. AZZARELLO: She references that Dave Cannoles said that anything that's recorded has to be taken down, they have to keep track of any questions or any answers that are given from that telecon he was running.

MR. FERRANTE: Right.

MR. AZZARELLO: And asked somebody to commit it to a laptop?

MR. FERRANTE: Right.

MR. AZZARELLO: So, he asked her for any documents that would reflect the chronos he kept either on paper or typewritten and this is what we got. And I want to know if this is a log, did you look at this chrono from the Cannoles?

MR. FERRANTE: No, I never saw this. I saw a typed version of this, but believe--

MR. AZZARELLO: It's page 30, I think it is.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: I did see this.

MR. AZZARELLO: Does that seem to be the Cannoles one, then that this is time lines, Catastrophic Occurrences?

MR. FERRANTE: I don't know who titled it and here's what I know of that. And, in fact, I believe it's been determined that Tony Mello made that statement, not Dave.

MR. AZZARELLO: Okay.

MR. FERRANTE: And what had taken place. It's similar to what you have here, a white-board, people are writing stuff all over the white-board, the white-board's getting full. Dan Diggins says, hey, let me run down and get my laptop. This is Tony's recollection that he gave. Because I was familiar with the document request you had asked for. In fact, I provided another copy to Shirley, but I knew we had already provided you with this one.

So, in any event, Dan gets his laptop, he starts typing this. So, yes, we start looking at this, but you know, when you see some of the things

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that are fast-moving between from Poughkeepsie towards the Trade Centers, you know, I don't know where that came from. 10:10, 9/11 calls, 40 southeast of Johnson, PA, black smoke, that one's not even that bad. But when you look at some of these times--I remember the first time I looked at this it seemed to me like they had the first impact with the Trade Center, about an hour after it actually occurred.

MR. AZZARELLO: Seventy-seven they have at 10:41 in Kansas City's airspace 10:45, possible crash--

MR. FERRANTE: Right, and you know, what this was, the only thing I can guess is if you look at the aircraft situation or the TSD, you refer to it, it continued to project the aircraft's flight across the country. So, how it got into holding, I don't know.

MR. AZZARELLO: So there was something about this?

MR. FERRANTE: But, obviously, you know, this is long after he hit the Pentagon.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Sure, it's over an hour later.

MR. FERRANTE: So, when I'm looking at the chronology on this, I said, okay, this is, you know, obviously the work of people who are pressured--

MR. AZZARELLO: You're not counting on it to be reliable or very reliable?

MR. FERRANTE: Correct. So rather than rely on this that I could not say, yes, we can document this happened when; this happened when, we went to the facility logs. We went to what we could prove this is what happened, when it happened.

MR. AZZARELLO: Then somebody, I guess, alerted to you to the fact that they were having a telecon down there and you might find some relevant information down there from what they were doing there is that--

MR. FERRANTE: No, I knew that they had the telecon down there. But then again, I got back into Washington, early in the morning on Wednesday.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Right.

MR. FERRANTE: I know at least twice during the day, I had actually gone up to the room. One time it was to see Dave Cannoles, another time was, probably, 11:00 p.m. of that first day, when I went up to see Eric Harrel [ph], who was working at the time. And this is, I mean you guys have probably seen it by now, but there used to be a sensitive document called "Unlawful Interference of Aircraft Hijack Procedures?"

MR. AZZARELLO: Yep.

MR. FERRANTE: So, I went upstairs. I remember going upstairs to have a conversation with Eric because I was kind of concerned that I didn't think Eric understood it that well and Eric was the procedures manager.

MR. AZZARELLO: That's referenced in this Crisis Handbook?

MR. FERRANTE: Yes, I think it's what 72--

MR. AZZARELLO: 7210?

MR. FERRANTE: --.149?

MR. AZZARELLO: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: It's like two pages, it's a 1980 document that was signed by [unintell.].

MR. KARA: Tony, if you had been here on 9/11, where would you have been?

MR. FERRANTE: In the bay. Or, if--I probably would have been in the conference room with Dave, at least for the start.

MR. KARA: Down here?

MR. FERRANTE: Down here in 1000 West.

MR. KARA: Okay. And Jeff Griffith was up here, would you have been involved up here at all?

MR. FERRANTE: As I've said, I'd only been in there once. I knew it existed, I'd been through there several times on going in to see that the folks in the WOC, but we were never a player in any of the events they had.

MR. AZZARELLO: Is this the one that you were talking about, 7210, 7110.149?

MR. FERRANTE: Yes, that is it.

MR. AZZARELLO: Unlawful Interference? This is the one that was in effect on 9/11 in 1980?

MR. FERRANTE: Yes. So--and I don't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

recall all the specifics, but there was a question, don't we have an order that covers hijacking? And Eric Harrel commented that, no, it's been cancelled. And all three-year information is not contained in 7110.65. And I said, no, that's not true, Eric was the procedures manager, I wasn't, but I was trying to have this conversation with Eric because I thought that document still existed. Later that night, it was probably midnight, maybe even 1:00 o'clock on Thursday morning before we found a copy of the document.

MR. AZZARELLO: Were you aware that there were the procedures, though, the protocols for a Hijack Coordinator, someone from Security to make military notifications?

MR. FERRANTE: I didn't know all the functions at that time. I learned them after. I've been in kind of a unique situation. I worked a hijacking very early on in my FAA career.

MR. AZZARELLO: Which one, Lufthansa?

MR. FERRANTE: It was United and I got to think of the flight number, it was a United flight

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

going from Chicago to Pittsburgh and the hijacker wanted to be flown to Washington, D.C.

MR. KARA: That was in the '80s, then?

MR. FERRANTE: It was in 1983, I believe, because I remember, I was working the 3:00 to 11:00 shift. The supervisor had come in, because in Pittsburgh we had two controllers that went to the tower; one controller and supervisor came to the TRACON because by midnight there was quiet enough to the point where the supervisor unplugged and just one controller worked in the TRACON.

So, the supervisor comes over to relieve me. The phone rings, he says I'll be right back. He comes back over, he says I need you to stay for two hours overtime. And then tells me that we have a hijacking. And that I'm thinking, wow, this is really something.

So, we've got this order in front of us, we've got the FAA 711065 in front of me, and I've got nervous; I have sweaty palms, I want to do all the right things. And so, I'm looking at all this overt/covert phraseology,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and the guy checks in. He says, Pittsburgh approach this is United--I don't remember his number--United 93, gentleman sitting next to me says he's got a bomb, we're going to need to land opposite direct on runway 10-Left. So, all that training and all of those sweaty palms was, United so-and-so, Pittsburgh approach, roger.

But in that particular event, I do know that my supervisor at that time was a gentleman named Darryl Knopple [ph], he stayed on the phone with Civil Aviation Security in the ROC, I didn't even know what ROCs and WOCs were at that point. I finally got relieved, maybe 12:30 or so. I went up to the tower cab because this was a United 727 that was parked parallel to Runway 14--

MR. AZZARELLO: Mm-hmm.

MR. FERRANTE: --and Security was in the tower, they were directing all kinds of things from within the tower cab, and what they did was they convinced this guy they didn't have enough fuel to make it to Washington and if he didn't release the passengers, they weren't going to give him the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

fuel. and the flight crew ends up walking out with the passengers. Turned out to be nothing.

MR. AZZARELLO: Let me just, sort of non sequitur, though. From that back to the Command Center. Miles and Jeff help me out, but my recollection is we met with Linda Schuessler and asked her about any inquiries that were made by Dave Cannoles or yourself and the Accident Investigations people. She said that there was an inquiry at the Command Center about did they make, were there any, you know, what's the earliest that we told anybody in the military about any of these aircraft. and that Dave Cannoles and you know the Cannoles/Ferrante group, maybe not you personally, but that while your collective effort and Dave Cannoles, under his supervision was to found out what they may have told the military. Let's see what the earliest possible notification might have been from there. Even outside the box, because they're not--as you said earlier, they're not even usually part of the hijack notification system.

MR. FERRANTE: I think that's very

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

possible that Dave had communications with the Command Center.

MR. AZZARELLO: About trying to find that--

MR. FERRANTE: About trying to find notifications. I had no communications myself with the Command Center trying to find those. But I do recall something now about CARF [ph], and that's an element I don't fully understand that's located out at the Command Center.

MR. AZZARELLO: Right.

MR. FERRANTE: That CARF made some notifications. And, so, they probably picked those up from the teleconferences that the Command Center was involved in.

MR. AZZARELLO: But how's there, I mean, there seems to be, I mean, how do you guys connect this whole agenda, then, because if it's your assignment, so to speak, Tony, to pull this together and to look outside the box and say what did Air Traffic do outside the box, noted by the military? Well, Command Center's part of Air

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Traffic correct?

MR. FERRANTE: Correct.

MR. AZZARELLO: And they would have been outside the box notification if they made it, right?

MR. FERRANTE: Correct.

MR. AZZARELLO: Just like Boston?

MR. FERRANTE: That's right.

MR. AZZARELLO: Well, Dave Cannoles, asked Linda, lookit, but if you're ultimately responsible for drafting this and putting this together, don't you and Dave have to discuss that, hey, Tony, I got somebody checking on the Command Center for you, too, to make sure that maybe--make sure that they don't have any military notifications.

MR. FERRANTE: We may have had that discussion, but I don't recall it. And in the normal course of business, we would not have even considered it. Because, again, we were looking for facility notifications that we could document, we could say this happened when.

MR. AZZARELLO: Right, so what should we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

infer from that then is that if somebody did ask Command Center to check their records, check their logs or tapes, whatever source it is to see if they notified--somebody from there notified the military about any of these four aircraft. If it's not in here, then what are we to conclude from that? That they didn't make notification or what? Tell me.

MR. FERRANTE: I would suggest you need to conclude one of two things. Either that contact never existed and I believe that it may have, between Dave or somebody in the Command Center notifications or that, perhaps, there was a chronology that was put together by the Command Center of what they knew as far as when NEADs had been notified of certain things. It could have come from them because I described that one sheet that I looked at. It has entries similar to this, but it was not this.

MR. AZZARELLO: Okay, so let's look at--

MR. FERRANTE: We may have got something from the Command Center that said--

MR. AZZARELLO: [unintell.] was notified.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I apologize that before, I was a little bit worked up as you may could tell--

MR. FERRANTE: No, no, please don't--

MR. AZZARELLO: Italians are want to get worked up sometimes and I apologize for that. But this is the issue I'm having difficulty grasping or coming to terms with and that is: Linda Schuessler recalled that there was some effort to ask the Command Center whether or not they made any military notifications. Because there was an effort by the FAA to find out, well, did we notify the military, even if it was an unconventional notification. If it wasn't according to protocol. Let's just scan, you know, let's scan the field here and find out if any of our FAA facilities notified the military, anybody in Air Traffic; TRACON centers, Command Center anywhere.

Obviously, even headquarters, if you were looking at maybe what Cannoles was doing down there with his Air telecon, that would have been potential notification there from headquarters to the military.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

It makes sense to us that in the aftermath of 9/11 that it's going to be a big issue at some point from a higher level of government to find out who knew what, when. And, as Jeff Griffith, himself, said, it was a topic that was hotly debated in terms of how much time did the military have to react?

Did we give them early notice and what kind of notice did we give them on each of the four flights?

And I'm not paraphrasing some of your former colleagues and current colleagues who have come here before us and said, clearly, when something goes wrong in government, there's going to be finger-pointing and there's going to be an issue of, if there is fault to log, at that point, before everyone even knows, you know, could anything be--could anything have been prevented, there's going to be an oh, a lot of finger-pointing going on. Who knew what, when? Did we communicate the information--we, the FAA--to the military and then you know did they react in a timely manner?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Did we react in a timely manner? That would sort of make sense that that inquiry would go on at some point.

And, against that background, I'm asking you if you participated in any conversations like that where there was a discussion and debate about notifications between the FAA and the military and the military and the FAA not agreeing on that?

MR. FERRANTE: No.

MR. AZZARELLO: So to the extent that that did occur, if it did, it would have been at a level above you?

MR. FERRANTE: Yes.

MR. AZZARELLO: And to the extent that somebody asked Command Center to look at whether or not they notified the military outside the box, you were not notified of that or you're not sure.

MR. FERRANTE: I was unaware of that.

MR. AZZARELLO: You aren't aware that they were making that effort?

MR. FERRANTE: I seem to recall something, but not in the time frame that we were working on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this. They-

MR. AZZARELLO: They were called in to work at the Command Center that weekend, Friday, Saturday, Sunday, the weekend that this was being, this was Monday the 17th?

MR. FERRANTE: Right.

MR. AZZARELLO: They were working feverishly that weekend--

MR. FERRANTE: And they possibly could have produced a document that was dated September the 17th that we never saw. You know, I don't know if they did or they didn't, they possibly could have.

MR. AZZARELLO: What did you think--

MR. FERRANTE: But remember--

MR. AZZARELLO: --if they were tasked to see if there were any notifications to the military form the Command Center outside the box as part of Air Traffic?

MR. FERRANTE: Mm-hmm.

MR. AZZARELLO: Would you expect to have been notified of that for the purposes of your

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

summary here because that was--

MR. FERRANTE: It depends on who tasked her to do that.

MR. AZZARELLO: Well, Dave Cannoles.

MR. FERRANTE: Well, if Dave Cannoles did, he probably would have said something to me, but it would make more sense to me that Jeff Griffith tasked them to do that, and that may have been because Jeff was attending meetings white-board he Deputy and the Administrator at the time. I never saw the Deputy or the Administrator other than one pass through they gave, probably a week or so after the event, when they thanked people for all the hard work.

But, also, recall that at some point during this time, they had set up the group with Darelene to do that. And that tasking may have been, if Dave was involved in it as a result of what they were trying to get Darlene in trying to come up with the final FAA position in response of what they did.

MR. AZZARELLO: If there was--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. FERRANTE: See, my role has been wonderful, for the last five years, I haven't had to worry about the finger-pointing and the blame because I've been reporting facts. So, you know, if we're at fault for things, we're at fault for things.

MR. KARA: Tony, why was the formal final FAA chronology not published until 2002?

MR. FERRANTE: I couldn't tell you. Up until about six months ago, I never even got news.

MR. KARA: Up to six months ago, you didn't even know that you had a chronology on the street?

MR. FERRANTE: Well, I've never seen this chronology, but, you know.

MR. AZZARELLO: You weren't consulted on that?

MR. KARA: No.

MR. FERRANTE: No, they probably took it from this document, you know, just a quick scan, does it resemble what's in here?

MR. AZZARELLO: It's got a 9:24

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notification on American 77. So, is that--

MR. FERRANTE: I never saw the product that was produced--9:24 is the time we showed that we notified the Great Lakes Region.

MR. AZZARELLO: Right it doesn't say anything about the--

MR. FERRANTE: Doesn't say anything about the military, right.

MR. AZZARELLO: But it says--

MR. FERRANTE: It says FAA notifies NORAD's Northeast Air Defense Sector about the suspected hijacking of American Flight 77; FAA and NORAD establish an open line to discuss American 77 and United 93.

MR. AZZARELLO: I know, I know you're not--

MR. FERRANTE: At this point, we'd already confirmed he'd crashed, if I'm not mistaken.

MR. AZZARELLO: You do on 77?

MR. FERRANTE: Yeah.

MR. AZZARELLO: I know you know on 93, because you were citing the controller frequency

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

communications that United 93, you know, wasn't even hijacked at the--

MR. FERRANTE: Absolutely, right. I don't know where this came from, I never saw this.

MR. AZZARELLO: Clearly, you couldn't have notified the military about a plane that wasn't hijacked?

MR. FERRANTE: That's correct. And gentlemen, I really do gotta go to the dentist, I mean, I've got three teeth, I can pull them all out if you want. I am here all day tomorrow. I mean I'll spend all eight hours with you if you'd like.

MR. KARA: We're concluding the interview.

[END OF INTERVIEW.]

SWORN INTERVIEW OF
MONTE BELGER
BY
JOHN AZZARELLO, 9/11 Commission

Tuesday, April 20, 2004

[TRANSCRIPT PREPARED FROM A TAPE RECORDING.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I N T E R V I E W

MR. AZZARELLO: It's Tuesday, April 20, 2004, we're at GSA about to begin an interview with Monte Belger. I'm John Azzarello, Team 8, 9/11 Commission.

MR. KARA: Miles Kara, 9/11 Commission.

MS. HYDE: Dana Hyde, 9/11.

MR. BROWN: Jeff Brown, 9/11 Commission

MR. LEWIS: Brooke Lewis FAA Chief
Counsel's Office.

MR. BELGER: Monte Belger.

MR. AZZARELLO: Thanks for taking the time to come, from what I understand you've spent some time already spent some time with one of the other teams on the Commission. Could you just start briefly by giving us just a real brief overview of your career with the FAA, where you started and the various positions you held leading up to 9/11?

MR. BELGER: Well, I was a 30-year career employee at the FAA. I started my career in 1972, as an entry-level security inspector. Had a variety of jobs in the FAA Security program up

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

through Washington to the New England Region to the Great Lakes Region.

And then when I got to the Great Lakes Region in 1980, around that time frame, I then moved out of Security into another program in FAA, I became a division manager in the FAA's Airports Program, which is a safety and grants program focused on airports. And then, shortly after that was selected to be the Deputy Director of the Great Lakes Region.

And in 1988, I was selected to be an Associate Administrator in the Washington headquarters. And I moved to Washington in 1988. And finished my career there. I had several Associate Administrator jobs in the Washington headquarters.

And in 1997, when Jane Garvey became the Administrator, she asked me to assist her for a while as the Acting Deputy Administrator, and that while turned into five years. So the last five years, I was the Acting Deputy Administrator and retired in September of 2002.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: September '02. Could you just give us an explanation of sort of the scope of responsibility of a The Deputy Administrator?

MR. BELGER: Well, as The Deputy Administrator, my responsibility, number one, was to, you know, support the Administrator and be her number one advisor and assistant. The way that Administrator Garvey worked was that we worked as a team. Virtually everything that shew as involved in, I was also and, obviously vice versa.

My responsibilities were FAA-wide. Every program, 50-some-thousand people. The FAA's responsibilities and I would say that the Administrator and Deputy were responsible for the whole scope of the FAA activities.

MS. HYDE: And were you ever confirmed?

MR. BELGER: No, no. That's a long story, interesting, story.

MS. HYDE: I'm sure.

MR. BELGER: And that's fine with me, it really wasn't in my personal best interest to be confirmed.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: You took it for retirement?

MR. BELGER: Nominated, but--yeah, yeah. Nominated by President Clinton, but by that time, by the time the nomination went to the Hill, it was in the last year of his Administration and there were no--I mean, nobody was being processed.

MS. HYDE: Right. It was good luck.

MR. BELGER: But that was fine, it turned out just perfect for me.

MS. HYDE: Okay.

MR. BELGER: And it was obviously, those five years were obviously okay with the Administrator and two Secretaries, so--I mean, they could have made a change anytime they would have wanted to.

MS. HYDE: So, the Secretary when you started was?

MR. BELGER: Secretary Slater.

MS. HYDE: Secretary Pena and were you there for both?

MR. BELGER: No, when Jane became the Administrator, when Jane Garvey became the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Administrator, Secretary Slater was already in office.

MS. HYDE: Okay.

MR. BELGER: Actually, he selected her. So I was the Deputy through his four years, and then until I retired in 2002, after Secretary Mineta came.

MR. AZZARELLO: Who was, on 9/11, the highest ranking Air Traffic person under you?

MR. BELGER: Well, I guess the highest ranking would have been Steve Brown, who was at that time ATS-1, I guess it was. Associate Administrator for Air Traffic Services.

MR. AZZARELLO: So, then it goes down from him, [unintell.] under him, an the Peacock--

MR. BELGER: Peacock, and Jeff--

MR. AZZARELLO: Report up through Allen Brown?

MR. BELGER: Yes.

MR. AZZARELLO: And what about in Security was that Canavan?

MR. BELGER: Mike Canavan, General Canavan

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was in that office at that time.

MR. AZZARELLO: And under him was Lynne Osmus?

MR. BELGER: Lynne Osmus was his Deputy.

MR. AZZARELLO: Anybody have any other background questions before we get to the day?

MS. HYDE: Well, maybe we should chronologically start a bit with the summer before the day.

MR. AZZARELLO: Okay.

MS. HYDE: and I know you discussed these matters with Team 7. We wanted to revisit them in the area that we're focused on, which is understanding the protocols for hijacking and what happened in terms of hijacking response on 9/11.

MR. BELGER: Okay.

MS. HYDE: In that context, to the extent that--well, I guess the predicate question is: Were you aware of heightened threat activity during the summer of 2001 and, specifically, threat activity that contemplated hijacking?

MR. BELGER: Well, I'm aware of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information circulars that the FAA sent out, obviously I saw those. I am aware and remember a couple of times when, I guess it was Admiral Flynn, actually, at that time, the year before, had brought up some concerns. So, I think my answer is, yes, I was ware of the circulars that were being disseminated. I was aware of what was on the news. I was aware of Al Qaeda as a potential threat, I think they were mentioned in a couple of information circulars that the FAA sent out that summer.

So, yeah, I was generally aware.

MS. HYDE: Well, let's, taking Admiral Flynn and whatever concerns of the year before. And honing specifically into that summer, the information circulars--this is where John is more useful. What specifically do you remember about the threat that summer to Aviation Security? And, particularly hijacking risk?

MR. BELGER: Well, the general--my characterization of the general theme all the types of threats that were discussed that summer was that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

number one they were predominantly focused on overseas, U.S. interests abroad; and when there was a discussion of aircraft and hijacking, it was, generally, in the context of a more traditional hijacking in order to get something, you know, hostage release or money or whatever. So, I would characterize it more, mostly focused internationally and then, secondly when there was a discussion about hijacking it was more international in scope.

MS. HYDE: What were you learning, specifically that summer, did General Canavan brief you, bring information to your attention about these threats. You just characterized your impression, I'm trying to get beyond to, how did you get that impression?

MR. BELGER: From the information circulars, from the discussions about the information circulars and from just my general discussions with the Security people.

MS. HYDE: So, your discussions with the Security people would you, that summer, do you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

remember that they briefed you on a heightened threat alert?

MR. BELGER: I don't remember any particular briefing in which there was a focus on heightened Security that was given to me.

MS. HYDE: You don't remember given to you any briefing that summer?

MR. BELGER: That was focused on a heightened level of threat.

MS. HYDE: Do you remember any meetings on that subject?

MR. BELGER: I mean, I talked to the Security people all the time. Talked to them all the time, but I don't recall any specific, you know formal briefing or any relevant discussions where they said, you know, this is really heightened, this is extraordinary, this is different, I mean, I don't remember that.

I knew all the Security folks, I grew up in Security. And there's absolutely no doubt that if there was something like that, the intel folks and Lynne and General Canavan would have brought it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to my attention.

MS. HYDE: And to the extent you don't remember any of it being brought to your attention, do you, is your understanding that they didn't know of that?

MR. BELGER: No, I can't say that they knew, I'm just saying it wasn't brought to my attention and I think they would have.

MS. HYDE: So, my understanding is that there was not a circular that summer that dealt with hijacking threats, certainly not in this country.

MR. BELGER: I think that's what I said.

MS. HYDE: So, you had mentioned before that you are aware of the circulars, and, do you think I'm wrong there, was there a circular that summer dealing with the hijacking threat?

MR. BELGER: I'd have to go back and look at them, but what I said, the general aim was when hijacking was mentioned in those circulars, it was mentioned in the context of overseas.

MS. HYDE: Do you know that any of those

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

circulars that summer mentioned hijacking?

MR. BELGER: I'd have to look at them, I think they did, but, again in the context of overseas. I mean, that's clear, I can go back to look at them, it's not a hard question to answer.

MS. HYDE: And would the circulars pass through your desk, you would approve them, how would they be sent up from Canavan's shop?

MR. BELGER: They would just come up in the context of making me aware that the circulars were going out.

MS. HYDE: As a formal process was there sort of a distribution sheet where you needed to, you know, they needed to go up to your office and sign off on it before it went out?

MR. BELGER: No, not for the circulars. It's fundamentally ethic, they're the best people to make that call. They made that call and, generally, they--depending on, again, on the severity of it, they might talk to me beforehand, or I'd certainly look at it afterwards.

MS. HYDE: They might talk to you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

beforehand, so it wasn't a prerequisite that they speak to you before sending it out the door?

MR. BELGER: I did not have to sign off on information circulars that were going out.

MS. HYDE: And you would learn after they were sent out about the content?

MR. BELGER: Generally at the same time, yes.

MS. HYDE: And that would be in calls every day between the Security office and you or how--there wasn't a briefing, there wasn't a meeting with them, a process that you met with them once a week?

MR. BELGER: I don't think there was a standard process to meet with them on a regular basis. They met with us every day or twice a week in staff meetings. They clearly had an entree into my office any time they wanted. They came to see me whenever they wanted to or needed to.

MS. HYDE: But you don't recall them coming to see you that summer about a heightened threat activity?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: No, not, like I said, other than the normal information circulars that were distributed.

MR. : Did you get the impression from the level of circulation of the ICs that summer that it was any different, say, than previous 12 months or two years? Was it in your perspective did it appear heightened or did it appear that it was a normal flow of threat information coming through?

MR. BELGER: Yeah, you know, I've thought about that. I've gone back and thought about that and I haven't gone back and looked at the number of information circulars that were sent out in 2000 or beyond. So, I can't give you a numerical comparison, because I haven't done that. I'm sure you can get that and see how many information circulars were put out in 2000 or '99, I don't know if you've done that. Is it similar.

MR. : The other team that interviewed you has got that focus and I apologize--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: No, it would be curious to, actually, I've thought about that several times to see just from a numerical comparison whether there were more in 2001 than there were in 2000 or '99 or '98. But to get back to your question. And, again, this is my recollection of what I was thinking about three years ago. And my thought was that those information circulars, as I said before, were fundamentally focused overseas or fundamentally, when they did reference hijacking were the typical traditional type of hijackings, I should say.

And I didn't get the sense, nor was it ever recommended to me that the FAA should do something beyond what we were already requiring the airlines to do, which they were already at a heightened level. I mean, when you look at the aviation industry compared to other modes of transportation and they were clearly already at a heightened state of awareness and preparedness. And there were no recommendations to, send out any directives, do anything different and I didn't come

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to that conclusion myself.

MS. HYDE: Well, we now know that the President was briefed on August 6. In a briefing that said that there were people in this country taking actions, preparations consistent with hijacking. Did that information ever come to you?

MR. BELGER: No.

MS. HYDE: And if you would have received that information, first of all, it's not overseas, it's in the country and the action is specific hijacking, would it have led you to do something?

MR. BELGER: Well, it would have certainly led us to look at what we could have done. It's a hypothetical question and I can't answer it without knowing what would have actually been presented to me. But I can assure you--

MS. HYDE: It's been in the New York Times what the TDB said for you and I can get it for you off the line.

MR. BELGER: Well, again, it's a hypothetical. I don't know I can't assume that everything that was in the presidential briefing

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

would have been given to me, so I don't now.

MS. HYDE: Well, for purposes of this, say that information came to you.

MR. BELGER: I think it, I don't know. I mean that's a hypothetical and I can't answer that. It really depends on what information was given. All I can tell you is that in every situation going back to the 1970s when there was specific information given to the FAA about a specific threat and there were some countermeasures that could be taken, the FAA took them,

MS. HYDE: Okay.

MR. BELGER: That's the--I can't answer that any better than that.

MS. HYDE: Well, let's try and let's say this. The information, as I understand what you just told us is that the news that there was a terrorist organization in this country making preparations consistent with hijacking, okay. So, it's not overseas.

MR. BELGER: Right.

MS. HYDE: And the threat is hijacking.

MILLER REPORTING CO., INC
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Right.

MS. HYDE: First of all, that news never came to your attention at the FAA?

MR. BELGER: Right.

MS. HYDE: Do you know if that news ever came to Jane Garvey's attention?

MR. BELGER: I don't know.

MS. HYDE: In terms of passing Security information was it the case that she had some route to General Canavan or some conversation there that you wouldn't have been involved with?

MR. BELGER: I--

MS. HYDE: Was she meeting with anyone?

MR. BELGER: I'm not going to speculate. I mean, I don't think she knew, I don't think she would have known anything that I didn't know.

MS. HYDE: About Security?

MR. BELGER: Yeah, but I can't answer that question [unintell.] 24 hours.

MS. HYDE: But she never mentioned anything to you that, Monte we've got

MR. BELGER: No, absolutely not.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: So, take the information that came to you in August of that summer was a terrorist group, in this country, making plans and preparations consistent with hijacking, that's not in any information circular that went out, you know that.

MR. BELGER: That's correct.

MS. HYDE: You know that.

MR. BELGER: That's correct.

MS. HYDE: Would that kind of news prompt you to take what steps? Issue an information circular?

MR. BELGER: Yeah, look that type of information coming from the highest levels of the government would have prompted, I think the FAA, Department of Transportation, the FBI, Justice, Secret Service, CIA and everybody else to come together and do something, it wouldn't have been the FAA in a vacuum.

MS. HYDE: Mm-hmm.

MR. BELGER: The FAA would not have been out there, you know, the FAA would not have been

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

leading the charge [unintell.]. That clearly would have been a law enforcement, intelligence organization lead. The FAA would have done its part from an aviation standpoint. The Department of Transportation would have done its part, but, you know that's--and, again, that would not have been an FAA initiative in a vacuum. It would have, in my opinion, been a governmentwide multi-agency type of response.

MR. : Let me ask you this question, Mr. Belger, the PDB, the famous August 6, PDB, we now know is in the public domain. There's a companion distribution called the Senior Executive Intelligence Brief. Were you or Jane Garvey on distribution to receive--

MR. BELGER: No.

MR. : Do you know if, perhaps, General Canavan was at the FAA headquarters was even getting this?

MR. BELGER: I don't know how far down that particular went.

MR. : But it didn't flow up to--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: No.

MR. : --headquarters.

MS. HYDE: Aside from the August PDB, do you recall from that summer knowing of a White House Terrorism Working Group meeting in July, at the beginning of July that talked about domestic threats to the country?

MR. BELGER: I don't remember that.

MS. HYDE: Were you familiar with the CSG or Dick Clark?

MR. BELGER: Yes.

MS. HYDE: And had you spoken to Dick Clark? I mean, what relationship, better question is, actually, could you describe what relationship, if any you had--

MR. BELGER: I did not have personally any relationship with intel. I mean, I was aware of the group, I was aware of Dick Clark by name, probably only, I'm not sure I ever talked to him before 9/11. I was certainly aware--

MS. HYDE: Who was the FAA's representative?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: It would have been General Canavan and before him Admiral Flynn. It was the head of Security who was our representative to those groups.

MS. HYDE: And did General Canavan report to you after he attended those meetings and the threats, what he learned at the White House.

MR. BELGER: My recollection is that he generally did, I can't say specifically about this meeting you referred to in June or July, I just don't remember.

MS. HYDE: Do you recall any meetings that summer him reporting to you about any meetings of threat--

MR. BELGER: I don't recall any specific, you know, briefings or meetings. I knew they met, I mean I knew about the group, but I can't tell you that I remember any specific discussions or recollections of any meetings.

OFF MICROPHONE: [unintell.]

MR. BELGER: No, brief, I'm sorry brief. I'm not aware of any specific briefs from General

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Canavan about any of those meetings.

MR. AZZARELLO [?]: Insofar as those meetings might have been held on the Security teleconferencing system, who had the authority to attend in your name?

MR. BELGER: Well, it wasn't in my name, I mean it was the ACS-1 who was the representative to those groups.

MR. AZZARELLO: That would have been General Canavan, then? Had those meetings been SVTS? My question is: That would have been General Canavan and not you?

MR. BELGER: No, I don't think I ever attended any of those meetings during that time period. I mean, in my previous career, I was in charge of Security back years ago and I went to those meetings, and I did the same things that General Canavan and Admiral Flynn and the others did, but for the 1994 or 5 on, I didn't do those things.

MS. HYDE: So, your impression of the threat that summer, to the extent you characterize

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it, you said your recollection is that it was focused over--the threat was focused overseas and to the extent hijack was mentioned it was a traditional kind of hijack.

So, you characterized your recollection of the threat, does that mean that you believe that there was a heightened threat of those two types of activities, traditional hijackings overseas, that summer?

MR. BELGER: It means that--

MS. HYDE: I guess I'm not getting the sense that you because you don't have any specific briefings on it, you know, you're not aware of the CSG, and the other agencies, certainly not aware that the President was receiving about domestic activities and preparations for hijacking. So, I'm sort of tossing back the question to you and I'm struggling with were you aware generally that there was a heightened threat of terrorist activity.

MR. BELGER: Well, you're using the word heightened, which I haven't used yet.

MS. HYDE: That's my question.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: I'm not going to use it just because you're asking me to use it.

MS. HYDE: No, no, no, I'm not asking that. The question is were you aware of a heightened and the answer may be yes or no.

MR. BELGER: Well, I'm going to answer it the same way. I'm aware of the threat information that was disseminated, I'm aware of how it was characterized. My recollection is kind of the way I summarized it. And whether that was heightened or not, you know, I'm not sure. I'm honestly not sure if it was heightened. I mean, I can tell you that in light of the circulars that were put out in that summer, none of them were accompanied by suggestions or recommendations that the FAA ought to require anything more than we were already doing. So, I mean, that's just the facts.

MS. HYDE: Yeah. But you've been and I appreciate; and I now seek when you were thinking about volumewise whether there was a comparison. Because your career was in Security and because you were at the FAA for 30 years, you're uniquely

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

qualified to assess and compare, you know, because you've seen the '70s, the '80s and the '90s and the threats in each decade, so I'm asking you to do that based on your experience.

MR. BELGER: If ou want to go back to the '70s and early '80s, there was an actual hijacking every weekend. So, that's not, you don't want to do that. I don't think you do. I mean there was a hijacking every weekend.

MS. HYDE: I want to draw on your knowledge and to say, how would you--you look back on it--

MR. BELGER: There was a hijacking every weekend in the '70s and early '80s. After PanAm-103 in 1988, my guess is, I don't know this. My guess is, if you went back and look at the circulars and information in the year after that there was probably an increase, probably a greater number.

MS. HYDE: There's a difference between actual events and threat information about intel information--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Yeah, I agree.

MS. HYDE: --about Security and that. So, judging it not by whether they were actually carried forth, but whether there was an increased level of intel about these kinds of threats and I guess just isolate it to the '90s then. Looking back to the summer of 2001, how would you compare your knowledge and understanding of that intel level, threat level to other years.

MR. BELGER: I'm going to answer it the same, way. I honestly don't remember the threat levels, the circulars and the information that came in 1990 or '88 or '87. I can only tell you factually what I remember about '91.

MS. HYDE: About 2001?

MR. BELGER: 2001, I'm sorry, 2001. About how those circulars were worded, what the information was, and the fact that the FAA thought, and I still think today, that the procedures that we were requiring were adequate, based upon the information that we had.

MS. HYDE: Mm-hmm, okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Just from your perception, without, you know, how accountable the information circulars were, let's say after the attacks on that day unfolded, in the ensuing days, do you remember having the thought that while, you know, we were sort of flat-footed here in terms or do you remember having the thought of, well, I guess, you know, there was a little bit of a heightened awareness here at some level, so maybe they knew something was coming but, you know, nothing--

MR. BELGER: That's a very good question and I thought a thousand times, I'm sure, as have other people, you know, is there something I should have done; is there some questions that I should have asked; is there something the FAA should have done to have been better prepared. And I honestly can tell you, I'm not sure that I can come up with any specific thing. Based upon what I knew in the summer of 2001 that would lead me to say, jeeze, I wish we had, you know, done something different.

MR. AZZARELLO: I probably wasn't clear, then, Mr. Belger, my question, I wasn't getting at

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that or asking--

MR. BELGER: Okay, I'm sorry.

MR. AZZARELLO: It's more along the lines, I guess of what Dana was asking you about, which is sort of looking back, did you have a general sense without knowing what the number of circulars were--

MR. BELGER: Yes, okay, no--

MR. AZZARELLO: --what I'm looking at, is in a reflective way, you might have had a sense of whether or not there was a heightened threat leading up to that, by your reactions to the event of that day, by saying, you know, on the one hand, was your reaction either, wow, you know, I don't remember even seeing anything on this, that this might have been coming, I guess no one knew it. Or, was it, well, I guess there was a little bit more of heightened information or a little more heightened threats that summer, but nothing specific enough, still, for us to know that something like a hijacking like this was going to occur?

MR. BELGER: Yeah, my reaction, I think at

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that time was surprise that, you know, that an event like that could occur and did occur in the United States. I've got to tell you I was genuinely surprised. I did think back about, you know, what did I know, what did we know. I can't--I think my reaction at that time was, again, you know, jeeze, we thought the threat was fundamentally focused overseas and we thought that if it were a hijacking it would be a more traditional two- or three-day long hostage-type of situation, in which, you know, we and the FBI had learned how to manage.

MR. : Do you recall, in 1993, the last hijacking that had domestic consequences was what Tom said in the spring of '93, do you recall that?

MR. BELGER: No, tell me more and I might.

MR. : It was an individual who had demands, he hijacked a plane in Europe. It was, everybody knew it was coming, it was coordinated and the Air Defense Response was Canadian was handed off to [unintell.] Air Force

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Base, this was in the spring of 1993. Lynne Osmus ended up sitting in the ACC--I guess in the AC-01.

MR. BELGER: Okay, I don't remember it.

MR. : It is the last hijacking--

MR. BELGER: Yeah, I knew.

MR. : --where the National Air Space System responded.

MR. BELGER: I knew it had been a long time.

MR. AZZARELLO: Do you know, to the extent that you talk about the threat being focused fundamentally overseas, that's one issue, I understand that, obviously, it speaks for itself; but then, you said also to the extent that hijacks were considered still as a threat that summer, it was based on the traditional paradigm of, you know, hostages or ransom?

MR. BELGER: Mm-hmm.

MR. AZZARELLO: Was that still focused overseas or was there any information on threats that summer regarding a potential domestic hijack, but based on the traditional model?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Well, you can go back and look at the information circulars and answer that question, specifically. But my recollection was that a couple of the circulars, you know, in 2001 or even earlier--even the year before. Generally, I'm sure you're seen all those circulars--

[Simultaneous inaudible conversation.]

MR. BELGER: You guys ought to look at them, I mean, you really ought, you know, if you're going to ask this detailed a question, you really ought to look at them. Because they're very specific in terms of what they say. Many of them there's a comment paragraph, that's just kind of an FAA comment that says, you know, we have no specific information that there's a threat within domestic air space. Or we have no specific information there's a threat against U.S. carriers or whatever the comment was. So, you have to--you gotta really look at each one of them and see--

MR. : Team seven is in detail and I don't want you to think that we're not, we on the Commission are not addressing it--we--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: I understand, it's just that it's hard to answer those types of questions without really looking at the document itself and seeing what was the information that was passed and what was the comment or what were the comments?

MR. AZZARELLO: That's a fair question, but I think we were trying to get a sense, in a much more general nature of whether or not your reflections at the time equaled--leading up to it and in the aftermath of 9/11, whether your reflections on the events were, well, there was a heightened awareness this summer. Or that there wasn't, wow, this came out of left field because this seemed to be no different than any other summer.

MS. HYDE: Yeah, my understanding when I tried to reach is that the information circulars that summer, I believe I know that the few certainly, like August to September 11, I'm less familiar with the July, there were two during that time frame, one dealt with heightened security on flights that Salman Rushdie was on.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Okay.

MS. HYDE: And the other dealt with
Pakistani--

MR. BELGER: Okay.

MS. HYDE: --Americans in Asia,

MR. BELGER: Okay.

MS. HYDE: --were very, very specific.

MR. BELGER: Well, that's consistent with
what I said.

MS. HYDE: There was nothing and I think
you probably know these facts better than we do.
There was nothing at all about a terrorist group,
let alone a terrorist group--

MR. BELGER: Well, I'll tell you what,
let's get the circulars and look at them.

MS. HYDE: Do you recall anything?

MR. BELGER: Mm-hmm

MS. HYDE: And I guess I can do that.

MR. BELGER: Yeah, I think I do, yeah.
Let's get them and look at the circulars for 2001.

MS. HYDE: For the summer

MR. BELGER: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: I will try to do that.

MR. BELGER: Whatever you think the
circular

MS. HYDE: Then we can come back to this.

MR. BELGER: I mean, that's not a--I'm not
trying to play games, I mean, they are what they
are. I mean, they're there, and you can look at
them and see what was said, I mean, it's not, you
don't have to rely on what I think they said.

MS. HYDE: Mm-hmm.

MR. BELGER: I mean, they're there and
what they said is what they said.

MS. HYDE: And you can rest assured that
that will be done, for purposes of this
conversation and, as you can imagine from a
scheduling perspective, we don't want to have you
have to come back here again for another
conversation.

MR. BELGER: I appreciate that.

MS. HYDE: Unfortunately, we are in the
winding down days--

MR. BELGER: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: --and each team has more interviews to do than there are hours in the day. So, for purposes of this conversation and to keep the schedule, we went ahead knowing that John and I are not particularly well, versed in the circulars. And hoping that you would sort of help us out in telling us what they say.

MR. BELGER: Okay, I mean, I think I have, I mean, I think I characterized what I thought they said. And I do think there were some in the 2001 time frame, I don't know if it was summer or spring or--

MS. HYDE: Okay.

MR. BELGER: --or that made reference to the potential for terrorist activities, again, fundamentally overseas.

MS. HYDE: Mm-hmm.

MR. BELGER: But I mean, that's a very straightforward factual thing to just look at them and see what they said.

MS. HYDE: So, we look at them and see what they say, outside of what they say, and, as I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

understand the process was, you didn't necessarily sign off on them before they went out and that you would be informed of them after they did go out.

MR. BELGER: Or at the time they went out.

MS. HYDE: You don't recall any briefings on a heightened terrorist threat that summer; you don't recall any specific meetings on a heightened terrorist threat; you don't recall having the White House--a meeting at the White House that, you know, Canavan would have informed you had happened that he had attended or that you attended or any knowledge.

You don't recall having any knowledge of the information that was in the President's PDB which was specific to preparation to hijackings, and domestic activity. And I want to make sure that I'm summarizing all this. And my impression is because I think you've assiduously avoided using the word heightened, pointing out that it was my word and I didn't mean to put that word in your mouth.

Your impression is that my impression from

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

our conversation about that summer in general and how that compared with other periods of intel and threats that you experienced in your career, is that you don't know and you can't compare it to other times. So you can't say whether you thought it was heightened or about the same or less even.

MR. BELGER: I mean, look, Dana, all I can tell you is that there were a number of information circulars that went out that year. They characterized as best the FAA could what the threat to aviation was based upon the information that the FAA had. Now, clearly, you know, the FAA didn't have all of the intelligence information that you guys might be uncovering. You know the FAA got what was relevant--

MS. HYDE: We're trying to figure out what the FAA had and what I'm saying is did the FAA have anything that wasn't reflected in those circulars, to your knowledge?

MR. BELGER: Not to my knowledge.

MS. HYDE: So, if the circulars don't say it, then the FAA didn't have it.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: To my--they didn't have it or they weren't permitted to say it.

MS. HYDE: Do you have any knowledge that the latter--

MR. BELGER: No, no, no, I'm just saying that could be a condition, given by the intelligence organizations that you can't pass this information on.

MS. HYDE: Okay, but, in terms of internally--

MR. BELGER: I have no knowledge of that.

MS. HYDE: --as a leader of the FAA the Deputy, did you know of anything, any constraints that were placed on the FAA about knowledge that they had that they couldn't--

MR. BELGER: I have no specific knowledge.

MS. HYDE: Do you have any general knowledge?

MR. BELGER: Yeah, I mean, that happens all the time. I mean, there's a general. You know, sometimes it's sanitized and you can't use the raw material that's provided. So, sometimes it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

has to be cleared through the originating organization in terms of what you can pass on in an unclassified way.

MS. HYDE: So, in the summer of 2001, was it ever brought to your attention that there was threat information that that restriction was--

MR. BELGER: No.

MS. HYDE: --being placed on the FAA disseminating it?

MR. BELGER: No.

MS. HYDE: Okay.

MR. BELGER: There's one way you characterized what I had said, that I would say a little bit different.

MS. HYDE: Okay.

MR. BELGER: I mean, I did have, you made it kind of sound like we never talked to security, which is just the opposite of what I was saying. We talked to the Security folks, got information from them and talked to them almost on a daily basis. I do remember some, you know, discussions about, along with the information circulars, about

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

terrorist organizations and those types of things.

But to answer the question as specifically as you asked it, I can't recall any specificity of a particular meeting.

MS. HYDE: Well, why don't you tell me about the conversations that you do remember

MR. BELGER: I think I just did, I mean, that's all I know. I remember a short briefing that actually Admiral Flynn gave at one of our staff meetings, about the status of one of the terrorist groups and I don't even remember which one it was.

MS. HYDE: From that summer and General Canavan took over from Admiral Flynn before the summer, right, earlier in the year?

MR. BELGER: Yeah, sometime early in 2001, I think yeah.

MS. HYDE: Do you remember any of those conversations, I won't call them briefings, I won't call them meetings, any conversations with General Flynn or General--

MR. BELGER: Canavan?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: --Canavan, about--

MR. BELGER: I don't remember any specific ones, no, no, I don't.

MS. HYDE: Well, why don't we move on and then, we can double back to the circulars.

MR. AZZARELLO: Yeah, just one other issue I want to discuss before we get to the data. Was there any in the year or two preceding 9/11, were there any hijack drills or training at the, let's say, the headquarters level of the walk in the air Aviation Crisis Center level where, you know, they drilled down, on, okay, here's a mock hijack comes in, how do we set up the Command Center and open the lines of communication to see if everything works, you know, test the plumbing-type of think for a lack of a better description.

MR. BELGER: I don't remember the timing, but there were, periodically, national hijack-type of exercises that involved multi-agencies. I don't remember if one was done in 2001 or 2000, but there were multi-agencywide exercises. It's also possible, I don't remember, but it's also possible

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that our Security groups might have had their own exercise or--I just don't remember the timing.

MR. AZZARELLO: Yeah, we know there were some multi-agency ones, in fact, I might as well ask you while we're on this subject, about, there was one, apparently, in the mid to late '90s, loose Twin Star, it was a hijacked training exercise. It was live, they had actually simulated it.

They got an aircraft from an airline company that the airline said you can use the aircraft. And FAA people volunteered to be passengers on the hijacked aircraft. Do you remember that?

MR. BELGER: I don't remember it specifically, but over the years, I know those things have occurred. I mean, that's not the first time, probably, that that's happened. So, I don't remember specifically.

MR. AZZARELLO: We learned from the field at the facility level that they had various hijack drills as part of their regular training.

MR. BELGER: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: You know, they go to a screen and it simulates

MR. BELGER: Right, right, right.

MR. AZZARELLO: I'm interested now more within the FAA, leaving out the other agencies--

MR. BELGER: Sure.

MR. : --was the hijack protocol, exercised at the upper level management at FAA headquarters? Meaning, what does the Security folks do; what do the upper executive management level do?

MR. BELGER: Good question and that's going to lead me to talk about the future, if I can for a minute.

MR. AZZARELLO: Mm-hmm.

MR. BELGER: Again, I don't remember a specific testing within the FAA, That doesn't mean it wasn't done in the months preceding 9/11. But, you know, it's time to start talking about the future. When I retired, one of the things that was high on my priority list. Actually, I mentioned this in my first interview with you all's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

compatriots is that prior to 9/11, in my opinion, the management and the response protocols between the FAA the DOD and the FBI, fundamentally, those three, were very well established. I mean, there were memorandums of understanding between the FAA Administrator and the FBI Director; it was clear who had decision authority between the FAA and the FBI; it was kind of clear when you brought the military in and whether it was the FBI's decision or the FAA Administrator's decision, depending on whether the aircraft was in flight or not in flight. And there was a definition of that.

Excuse me, a legal definition of that. And I don't know, I hope, my concerns are--I hope my concerns are overflowed. But I don't know if that type of specificity exists today. I mean, the DOD has a much bigger role, obviously. You've got a whole new organization TSA, the FAA's role is greatly diminished.

The FBI's role, in my opinion, is diminished from what it used to be. And talking about demonstrations and tests and exercising the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

system, I would hope that one of your all's recommendations would be that those key agencies start doing that pretty regularly. And that it gets funded and done in a pretty, you know, a pretty formal and sophisticated way.

MR. AZZARELLO: Let me, just tell you what we're sort of, you know, going through and interviewing some people, obviously, from headquarters. And I'm not getting the sense that there was any specific training or drilling at headquarters and I don't want to come to that conclusion unfairly or inaccurately.

MR. BELGER: Yeah, and I don't remember any.

MR. AZZARELLO: If there were, would that be the type of thing that would be brought to your attention as a Deputy Administrator, if there was a hijack training exercise that involved the upper level of headquarters management at your--

MR. BELGER: Yes, yeah, I think it would have been, yeah.

MR. : In terms of a report to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you, maybe, the drill that this is the result--

MR. BELGER: Yeah, again, I don't remember any of those, but I think it would have been brought to my attention, yeah.

MS. HYDE: Well, I'm glad to let you decide. Can you comment on those division of responsibility prior to 9/11? Specifically, we hear a lot from DOD that FAA ha the lead on hijacking. And I think the paper bears that out to be true.

MR. BELGER: Correct.

MS. HYDE: And I believe even between FAA and the FBI there--FAA ha the lead until aircraft was on the ground and there was some determination made that--

MR. BELGER: It was no longer in flight.

MS. HYDE: It was no longer in flight and that there was an actual threat and that the FBI would sort of switch to be the agency on point?

MR. BELGER: That's generally right.

MS. HYDE: So, in either scenario, it's not DOD, it's a law enforcement issue with the FAA

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in charge, while the aircraft's in flight?

MR. BELGER: Right.

MS. HYDE: I'm trying to understand why that division?

MR. BELGER: Okay, I can explain that. You have to go back to the 1980s. There were a couple of situations, hijackings, I think, down in Florida

MS. HYDE: Mm-hmm.

MR. BELGER: In which law enforcement took action, including the FBI, took action which put the aircraft in more jeopardy than it was otherwise. In other words, they--one I remember, and I don't know the particulars other than just to tell you this. The tires were shot out as the aircraft was departing.

There were other instances where law enforcement was just kind of off doing their thing without regard for the consequences to the aircraft from a safety standpoint.

MS. HYDE: Mm-hmm.

MR. BELGER: So, actually, I think this

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was--I think it was actually by law, by legislation, I believe--I might be wrong, but I believe it was through legislation that the Congress came to the conclusion that a hijacked aircraft is an aircraft in distress.

MS. HYDE: Mm-hmm.

MR. BELGER: And it's fundamentally a safety issue, while that issue is in flight. And there was a definition of in-flight, which basically, if I remember right, said from the time the doors close for departure until it's open and the passengers are free to leave. That might not be precisely, but something like that.

And, so, given the act that it was an aircraft in distress and it was safety factors involved, there was an agreement that the FAA Administrator would be in charge during the time that the aircraft was in flight. And the FBI being in charge after the aircraft was no longer in flight.

MS. HYDE: And is that a role that the FAA advocated in that legislative process? I mean, is

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that the role that the FAA wanted?

MR. BELGER: I wasn't involved at that time, so I don't know. I can't answer that. I don't know. I was a lowly inspector in Tampa, Florida, at that time. But it worked pretty well from the early '80s an the legislation was then followed up by MOUs between the FAA and the FBI and the roles were kind of--

MS. HYDE: And when did DOD get in the picture to the extent it was included in those MOUs?

MR. BELGER: When requested by either the FAA or the FBI.

MS. HYDE: And, I guess, that's what the paper says. I was wondering why--do you have any understanding of how DOD, because it seemed to be an FAA/FBI issue up till then. How was DOD brought in, but what was the thinking behind bringing DOD in at all into the situation?

MR. BELGER: Well, I mean, I can answer that maybe by giving you some scenarios.

MS. HYDE: Uh-huh.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: First of all, when there was a hijacking, the DOD would have been brought into the communication net immediately, I mean, they were part of the team managing the incident. If the FAA wanted DOD, for example, to send up aircraft to follow a hijacked aircraft, they would have requested DOD to do that. If the FBI, on the other hand, needed DOD assistance for whatever they were planning to do, you know, they would request it.

MS. HYDE: So, then DOD was always considered to be a player that the role of DOD was unlike what needed to be ironed out between the FAA and the FBI?

MR. BELGER: Right.

MS. HYDE: The role of DOD was always static, which is upon request?

MR. BELGER: If needed, they would respond.

MS. HYDE: If needed, respond and respond in a way that would simply monitor, i.e., they've got the assets, get the asset up, but not take any

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

other action.

MR. BELGER: Right.

MS. HYDE: To your knowledge, prior to September 11, was there ever a hijack situation that contemplated DOD playing a different role than--

MR. BELGER: You mean like shoot-down?

MS. HYDE: --and monitoring, yeah.

MR. BELGER: No, not to my knowledge.

MR. AZZARELLO: And, conversely, were there hijacking situations where DOD was not requested. As I read the protocols that were in effect, the DOD could be requested to escort but not necessarily--

MR. BELGER: That's right and, again, it depends on the situation.

MR. AZZARELLO: Do you recall any hijack instances back in the hey-days when DOD was not called upon?

MR. BELGER: Well, I suspect there were a lot of them, you know, depending if it was a 25-minute flight from Miami to Cuba, I don't think

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

DO would have been requested to do anything. But on the flip side, I remember a 1976 or something like that. The first real kind of terrorist hijack in the U.S. the Croatian hijacking that went from Chicago to Gander to Paris and London, the DOD followed that aircraft into Canadian airspace. And, you know, it would depend on the situation.

MR. AZZARELLO: And then turned it over to the Canadians, presumably?

MR. BELGER: Yeah.

MR. AZZARELLO: You remember, I guess, conversely, you don't remember any other incident pre-9/11, where the DOD was asked to perform a role other than just tracking and monitoring an aircraft pre-9/11, other than what's laid out sort of in the protocol?

MR. BELGER: I don't recall other than those types of requests that you just said.

MR. AZZARELLO: Tracing, Identifying.

MR. BELGER: Monitoring.

MR. AZZARELLO: Monitoring.

MR. BELGER: Yeah, visual contact. Yeah,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

do you remember, well, also, I'll check. Remember the golfer?

MR. AZZARELLO: Payne Stuart?

MS. HYDE: Payne Stuart.

MR. BELGER: It wasn't a hijacking, but the military went up and followed that airplane.

MR. AZZARELLO: Is it, just so I understand correctly, did you say, though, that the DOD would, even in pre-9/11, whenever there's a hijacking situation unfolding, they would be brought into the loop as someone to at least monitor, tune in--

MR. BELGER: They were always a part of the communications.

MR. AZZARELLO: Oh, is that right, okay.

MR. : And with that background and understanding, then as we move into 9/11 and we look at the escort of hijacked aircraft protocols, there is established in here and at some point it was established, the role of the hijacking coordinator. Do you recall when that role was established and where in the headquarters it was to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

reside?

MR. BELGER: I mean, since 1970, there's been somebody coordinating, you know, the management of the situation. So, I mean somebody's been in charge,

MR. : But somebody below the role of the Administrator or Deputy Administrator?

MR. BELGER: Oh yeah, I don't ever recall it being the Administrator or the Deputy Administrator.

MS. HYDE: Oh but then, we talking about the protocol designating that thou shalt have a position, so to speak.

MR. : Right and whose profit line or whose dollar line does it belong?

MR. BELGER: Well, I don't know, I'm not quite sure I understand. I mean, obviously, it would ha been security. Bank in the early days ACS-1 was the manager of security incidents. That changed over the years as the organization got bigger and grew when there was a director of operations and those types of things, but there was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

always a senior Security person.

MR. : And do you recall when that responsibility was fixed in the ACS that the term hijack coordinator came into being?

MR. BELGER: No, no.

MR. : Is it your recollection that it was usually always a Security person?

MR. BELGER: That?

MR. : Was always a hijack coordinator?

MR. BELGER: Oh, yeah, yeah, I can't ever remember a situation where it was--

MR. : I mean, maybe you can help us out with this, I mean.

MR. BELGER: Okay.

MR. : It's the '76 Para Military operations order.

MR. BELGER: Is that an Air Traffic Order?

MR. : My understanding is that it is.

MR. : Chapter 7, Crisis--

MR. : No, that's not the crisis,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I guess it's the '76 [unintell.]

MR. BELGER: I'm just thinking is it a Security order or is it an Air Traffic order?

MS. HYDE: Air Traffic.

MR. BELGER: Okay, that's what--I thought the 7600 was an Air Traffic, okay. Okay, so this is not what we were talking about. This is not security.

MR. : Right but it's also got a hijack coordinator.

MR. BELGER: Within Air Traffic?

MR. : Right.

MR. BELGER: Okay, got you.

MR. : Well, it's a little confusing because if you look at the 7.11--

MR. BELGER: Okay, so this is what I was--this is the FAA hijack coordinator.

MR. : Mm-hmm.

MR. BELGER: Which would be a Security person, a director, this would be Canavan.

MR. : That's Canavan.

MR. BELGER: That's Canavan.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : Or his designee.

MR. BELGER: And I think on 9/11, it was, I forget the guy's name, the hijack coordinator which would be ACS-1 or his designee on duty, Washington headquarters, request military [unintell.]

MR. : And then it talks about, right here what the escort service when the DOD would be requested by the coordinator directly from the military command.

MR. BELGER: Right, okay, right.

MR. : And then it talks about the NMCC authorizing direct coordination between the FAA and the designated military unit.

MR. BELGER: Right.

MR. : So putting the field operations level--

MR. BELGER: Right directly together, right, through the NMCC.

MR. : Right, this is, I guess we've been struggling with, I guess, on sort of the definitional basis is they call this individual the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

director of Office of Civil Aviation security.

MR. BELGER: Okay.

MR. : And this is sort of the start, given us by the FAA, in terms of the positions held on 9/11 and the designations of the offices.

MR. BELGER: Okay.

MR. : Now, I'm having trouble equating the Director of--

MR. BELGER: This.

MR. : --okay, so it's synonymous with the associate Administrator?

MR. BELGER: Yes, the date of this is 2003?

MS. HYDE: No that was pulled off the Internet.

MR. BELGER: Oh, okay, I'm sorry, so I don't know what the date is.

MR. : That was one that was in effect on September--

MR. : We believe this was the one that was in effect and most of the people, of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

all the people we have asked that they believe that this was the one in effect.

MR. BELGER: Yeah, okay.

MR. : Is it that this lag, in other words, that lagged sort of the reorganization?

MR. BELGER: Yeah, this reorganization, with which we started calling, Security Associate Administrator was probably a 96, I'm not sure, '96, '97, something like that; maybe, even, '95, I'm not certain.

But prior to that, it could have been '94, '95--prior to this designation, this person was called the Director of the Office of Civil Aviation security. It was an office.

MR. : So, Canavan's position--

MR. BELGER: Yeah.

MR. : --pre [unintell.] organization, he was the director?

MR. BELGER: Right, so my guess is, I don't know, but my guess is when this order was written, this was accurate, it was the director--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: [unintell.]

MR. BELGER: It was not updated to keep track with the organizational title, would be my guess.

MR. : Now, the question on that is the designee, is he, is that something, if you know, is that done, like, formally, was there an internal memo sent around that actually designates, you know, Mr. X or Ms. X, as the hijack coordinator? How would that become through upper management?

MR. BELGER: It could have been, I don't know how, exactly they did it but it could have been done two different ways in my view. One, probably he designated someone, ou know, to have the watch, to be there ot manage an incident, should it occur. Then they probably had procedures if that person was incapacitated or for some reason couldn't be there. They probably had a kind of a hierarchy of who's next in line. [

I remember a situation, I hate to tell you guys all these old stories, 1975, again, when I was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a staff specialist in the headquarters on a Friday afternoon and there was a hijacking and I was like the 10th guy on the list and I ended up being the coordinator.

MS. HYDE: Is it the situation that's not only a paper, you know, it's not like every day when someone goes away from a weekend or is out on live, but says, okay, today you've got the designation. It's basically the senior person within ACS.

MR. BELGER: I don't know exactly how they did it, but it could have been just as you said.

MS. HYDE: Your example sort of shows that reality is--

MR. BELGER: Yeah, Friday afternoon at 6:00 o'clock and I'm the only one there, so I was the coordinator until--

MS. HYDE: You're now the coordinator.

MR. BELGER: --the senior folks came back in.

MR. : Lynne Osmus told us, and she was the hijack coordinator for the Lufthansa

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

hijacking--

MR. BELGER: Okay.

MR. : --she told us, traditionally, and we're trying, with your help to get where this tradition started. The tradition really evolved to the AC-01 position.

MR. BELGER: That's generally right, I think. Like I said when the organization got big enough to have a director of operations and, which are the AC-01, right. That's consistent with my thought.

MR. : And Lynne, in fairness to her, recalled that happening, but she couldn't recall if there was a piece of paper of some specificity that designated the AC-01 as the hijack coordinator.

MR. : But you would expect it to fall, if it went down the sort of chain of command, to fall in the ACO more than the ACI?

MR. BELGER: Oh, yeah, yeah, yeah, operations, yeah. And you want the intelligence folks off doing their thing, not managing the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

situation. That's my opinion. You want them helping to get intelligence.

MR. : Monte, I'm retired military, so let me just put it in plain simple military terms. If that were a military chart, ACI would be the J-2 or the G-2 and the ACO would be the G-3 or the J-3.

MR. BELGER: Okay.

MR. : And the three always run the operations, the Intel is the supporter does that make sense?

MR. BELGER: That's the way I see it, yeah, yeah. You want the Intel folks not burdened by managing the situation, you want them off--

MR. : Feeding the information.

MR. BELGER: Yeah, yeah.

MR. : Do you recall who the AC-01 was on September 11?

MR. BELGER: Well, I was trying to think of his name.

MR. : We're going to help you in a minute.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: We--well,

MR. BELGER: Lee Longmire

MS. HYDE: Lee Longmire.

MR. BELGER: Lee Longmire, yeah, I think Lee was the person who was running the show. Yeah. Well, I hope that helps.

MR. : Well, would that be, I guess, would that be the person, let's say as the hijack event unfolded, the hijack coordinator or the AC-01 be it Lee Longmire or anyone else for that matter, would that be the person that, as events unfolded at headquarters, you wanted to go to get an operational picture or snapshot of where we are at, you know. Give me a briefing. Was that the guy you would go--

MR. BELGER: I would go directly to that person, absolutely, like I did that morning, absolutely.

MR. AZZARELLO: Okay, let's go to 9/11, the day of. And sort of tell us how you--when you came to work and when you first realized that morning that there was a an issue with an aircraft

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

being in jeopardy in the system?

MR. BELGER: Well, I usually got to work about 7:00 a.m. or a few minutes before 7:00. So I assume that day was no different. It was a very typical morning. I think we had a meeting with our Air Traffic folks that morning, as we generally did on a Tuesday morning, just kind of a summary of where we are and, you know, what the issues were and just kind of a general status meeting with the Air Traffic people.

I think, during that meeting--my recollection is--during that meeting, Jeff Griffith got a page or a call and I don't remember exactly what he said, but he said he got a page and there was an aircraft that had lost transponder contact. So, he stepped out to go see what that issue was.

I think the meeting ended, I think I went to the men's room and probably got a cup of coffee. It was a few minutes--I think it was a few minutes after the first aircraft had hit the World Trade Center that I was walking back into my office.

Shirley Miller met me at the door and said

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

an aircraft has just hit the World Trade Center and we immediately walked into the Operations Center which is right across the hallway from my office. And I went to the position where Lee was, right up in the front of the room and was looking at the television monitor and started to get status reports and started to monitor what was going on.

MS. HYDE: Just stepping back to Jeff, your recollection of what ever notice he got during the meeting. Is it that the aircraft had lost--was there any news about a hijack?

MR. BELGER: No. All I remember him saying was the transponder.

MS. HYDE: So, when you saw the first hit, you had no knowledge of a hijacking?

MR. BELGER: No, absolutely not.

MS. HYDE: When did you first learn about that there was a hijacking being reported?

MR. BELGER: I don't think that that dawned on me that that was even a possibility until the second aircraft hit.

MS. HYDE: Well, stepping back, we know

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that early on, there was a [unintell.] walk information of the hijacking in the Northeast and even set up a call between the region and security. Did any of that news filter up to your level?

MR. BELGER: What time did they do that?

MS. HYDE: 8:25, 8:30, before the first hit.

MR. BELGER: Okay, no.

MS. HYDE: Did any of this news about, there was a hijacking in the Northeast out of Boston, Boston's starting up the phones on--

MR. BELGER: No, let me put the timing in perspective I think. It was, 10 till 9:00 or maybe even 5-minutes to 9:00 by the time I got back and walked into the Operations Center.

MS. HYDE: Mm-hmm.

MR. BELGER: And the picture was on CNN. I had got a quick update from Lee and the folks in the room. The phone started ringing off the hook.

MR. BELGER: So, Longmire was already in the room?

MR. BELGER: I believe he was there, yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: But Longmire doesn't tell you, besides this burning tower, we've got news of a hijacking?

MR. BELGER: No, I don't remember any discussion about a hijacking. I mean, my--the thought--the discussion that we had when I was standing in the Operations Center was, jeeze, you know, could that be a general aviation aircraft? It doesn't look like the damage was big enough to be a commercial aircraft. And there was an incapacitated general aviation pilot, I didn't have any idea what happened.

So, it was just a matter of, probably less than 10 minutes before the second aircraft hit.

MS. HYDE: Backing up to you didn't have any idea what happened, so did you have the audio on for the news broadcast when you were watching it on CNN?

MR. BELGER: I don't remember if the audio was on or not.

MS. HYDE: And your view of the scene, just visual was that the smoke wasn't warning of a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

bigger aircraft? You're still thinking small?

MR. BELGER: That was what I thought.

MS. HYDE: And the person that you're speaking to, when you're in the--so you walked into the WALK [ph], actually or--

MR. BELGER: We walked in here--

MS. HYDE: --an then you'd gone over to the ATC?

MR. BELGER: --right, this is where--Lee was--

MS. HYDE: And Lee's giving you an update?

MR. BELGER: I think it was Lee, I believe it was Lee.

MR. : And so you didn't stay in the WALK?

MR. BELGER: No, like I said, I went immediately to the Operations Center--as you see here, Security Operations--

MS. HYDE: Do you recall who--are you sure that Lee was there?

MR. BELGER: I'm not positive. I remember during the morning he was pretty much there, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

don't know if he was there at that time.

MS. HYDE: So, you're not positive it was Lee who sort of informed you. Do you recall any of the other people?

MR. BELGER: The room was--there were quite a few people in the room.

MS. HYDE: Your sense at that phase was that there was quite a few Security people?

MR. BELGER: Oh, there were, yeah.

MS. HYDE: But you don't--

MR. : So when you say Longmire briefed you, it might not have been that early, it might have been later, you mentioned that Longmire briefed you but--

MR. BELGER: Well, I walked in, I started talking to people, what's going on? You know, whoever's there, I'm talking to; I'm trying to find out what the hell's going on.

MR. : Mm-hmm.

MR. BELGER: There's no formal briefing.

MS. HYDE: Right, and then what the hell's going on, nobody says we've got, we've had a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

hijacking? You don't--

MR. BELGER: I was in there for two minutes, maybe.

MS. HYDE: Okay.

MR. BELGER: Then the phone starts ringing and I'm back in my office, talking to Air Traffic to see what they knew.

MS. HYDE: So, the phone starts ringing--

MR. BELGER: The secretary's--

MR. : Was that back in your office or the in the ACC--

MR. BELGER: --no, in my office which is right here, right across the hallway--

MR. : Okay.

MS. HYDE: So somebody pulls you back in your office because you've got a phone call?

MR. BELGER: I don't know if I had a phone call or if I just went back to call Air Traffic.

MS. HYDE: Okay.

MR. : Who would you have called at Air Traffic?

MR. BELGER: Probably Jeff.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : Air Traffic was not in--

MR. BELGER: They probably never picked up
the phone.

MR. : Right down the hall--

MR. BELGER: Yeah--

MR. : They were not represented
in the Air--in the Aviation Crisis Center at that
time?

MR. BELGER: I don't remember, don't
remember, they could have been, could very well,
have been, they've got a desk there. So, an then
there was, I mean, the Secretary's Office started
calling to get status reports. I had several
discussions, I think the second airplane hit at
what, 9:0--

MR. : 9:03.

MR. BELGER: --:03, okay, so, probably
less than 10 minutes after I had initially walked
into the Operations Center. And I was actually on
the phone with John Flaherty when the second
aircraft hit. I didn't see the second aircraft
hit. I don't remember seeing that until 2:00 or

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

3:00 o'clock the following morning, when I was home to take a shower.

MS. HYDE: So you go back to your office to talk to try and get the Air Traffic people. Do you remember, did you reach anybody or you just called down there and you're not sure who you talked to?

MR. BELGER: I talked to a million on that day, literally, I mean--

MS. HYDE: Okay, but you remember you were on the phone with John Flaherty when the second aircraft hit?

MR. BELGER: And the reasons I remember that is, I didn't see it. I remember him saying a second aircraft has just hit. And, like I said, I didn't even see that replay until the following morning.

MS. HYDE: And had he--had the Secretary's Office, was he the person that--

MR. BELGER: I spoke with him, I talked to the Secretary; I talked to Michael Jackson, I talked to some of the staff people over there.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: And was the Administrator calling over to you, as well?

MR. BELGER: She was, she was over in the Secretary's office in a meeting. I talked to her about that same time, also.

MS. HYDE: Mm-hmm. And they're all calling you saying what's going on?

MR. BELGER: Mm-hmm.

MS. HYDE: And at this point, you know what's being reported on television, you don't know of anything about a hijacking.

MR. BELGER: I'm not even sure I knew what was reporting on television. I'm telling you, I was in here for, like two or three minutes and then went back to my office to--

MS. HYDE: So, in this two or three minute conversation or brief or whatever you describe it, what did you learn?

MR. BELGER: Airplanes hit the World Trade Center.

MS. HYDE: That's it?

MR. BELGER: That's it.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Nothing about hijacking?
Nothing about terrorism?

MR. BELGER: Uh-uh.

MS. HYDE: Nothing about commercial
airplanes? If anything your impression, I believe
you said was that small because was that because of
the size of the hole?

MR. BELGER: That was the discussion we
were having, yeah.

MR. : So, your Security folks
didn't have any--no mention of the reports that
were coming in even from the American Airlines
calling in from the field facilities about American
Airline representative Bob Moreno even called in
and said they thought one of the stewardesses was
stabbed and people were in control of the cockpit?
None of that--none of that flowed up to--

MR. BELGER: Not in those two to three
minutes.

MR. : In that early time.

MR. BELGER: Not in those two or three or
less than five minutes--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Right, so before the second, if you isolate the second plane being hit, which is you recall you were back on the phone and you may have talked to some of these people and were on the phone with Flaherty. So, up until the point of the second aircraft being hit, you, from the head of the FAA, don't know anything about hijackings, about stewardess being stabbed, about anything other than an aircraft hit the World Trade Center?

MR. BELGER: Right.

MS. HYDE: Which is what everybody's seeing on television?

MR. BELGER: Right, right. Doesn't mean that there weren't 84 people trying to get to me to tell me that in those two or three minutes.

MS. HYDE: Well, the aircraft was hijacked about 8:15 and the conference call was set up around 8:25 so, I'm not wanting to limit the question to the two or three minutes, I'm saying at any point up until we know 9:03--

MR. BELGER: No, like I said, I didn't have any indication until I walked back to my

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

office, which was 10-till 9:00, 5-till 9:00 something like that, had absolutely no idea.

MS. HYDE: And then, all you had indication was what was evident from the television?

MR. BELGER: Right.

MS. HYDE: So none of this information within Security and the FAA and the Centers and all of this, none of that got to you?

MR. BELGER: No, no, no.

MS. HYDE: When do you recall the first time you heard of news about any hijacking of one aircraft, two aircraft?

MR. BELGER: I think after the second aircraft hit, which was, like, 9:03, my recollection is, I went back into the Operations Center and started talking in more detail with people and that's when this information started being made available to me. And I think about that same time, Jane was on her way--the Administrator was on her way back, also.

So, then we started getting more detailed

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information from the Duty Officer, from the Security people and from Air Traffic.

MS. HYDE: So you're right up to this point that you've seen or not seen, you know, you've been told of the second hit?

MR. BELGER: Mm-hmm.

MS. HYDE: The second tower.

MR. BELGER: Right.

MS. HYDE: Go back into the Ops Center or to the ATC?

MR. BELGER: We were back and forth.

MS. HYDE: Back and forth in-between the two?

MR. BELGER: Back and forth here in my office the phone's ringing off the hook, you know, it's trying to go back into my office to take the calls with the Secretary or the Deputy Secretary just because it was a quieter place to talk

And it was right across the hallway.

MS. HYDE: Mm-hmm.

MR. BELGER: So we were on the phone almost constantly.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Do you remember if, when you were on with Flaherty, you learned of the second aircraft, crash, did that, do you remember if that prompted you to quickly get off the phone, did you then go to get what information had been gained--

MR. BELGER: I think we both got off the phone pretty quickly. Yeah, I don't recall any detailed discussion after he said that to me. I think we pretty much both got off the phone.

MR. : And your mind set at that time was to go down and try to find out, am I correct, and I understand that that's when you said we're going to the WALK area, see what else you could--

MR. BELGER: That's when I walked back over, right, to find out what was going on.

MS. HYDE: So, what are your thoughts about, when you walk back over, who did you talk to or what did you learn?

MR. BELGER: I talked to everybody I cd.

MS. HYDE: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: That's when I started learning that there were, you know, the potential of a hijacking, the potential, the problems with the second aircraft that hit. We started getting, through Air Traffic reports of other aircraft that might have been in distress.

We started getting all kinds of reports coming in that were some strange and we just started trying to manage through all of that and find out what was fact and what was fiction.

MS. HYDE: What was the process you started to manage through all that, who was doing what?

MR. BELGER: Well, you know, the Security person here--

MS. HYDE: Who you think was Lee?

MR. BELGER: Lee was, I'm not sure if he was there 100 percent of the time, but I do remember that Lee was the senior person, yeah. He was kind of running the net. He--

MS. HYDE: Do you know that he had the net up at this time?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: He had a net up.

MS. HYDE: When you went back after learning of the second crash?

MR. BELGER: I think so, I mean, there were a lot of people there they were all talking, so I gotta assume they've got a net up.

MS. HYDE: So, I'm trying to understand if you knew that or it's an assumption that you made?

MR. BELGER: That's an assumption I made, I mean, I didn't ask is the net up? I mean, i that was just operating it was functioning.

MS. HYDE: You knew he was on the phone, so the assumption was the net, he was talking through the net.

MR. BELGER: He was talking to airlines, he was talking to airports, he was talking to people that I would normally assume would be on the net. Can't tell you I asked specifically, is the net up? It's just kind of routine that it is.

MR. : Do you recall either Jeff Griffith or Doug Davis sitting next to him up there on the dais, do you recall who else was on the dais

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

with Lee?

MR. BELGER: No, I mean, people were in and out, at one point I ran people out there were so many people in there. I literally, got upset and said, get the hell out of here if you don't need to be here. I mean, we just had too many people in there. I mean, so there were people in and out constantly, in and out of here constantly. In and out of my office constantly. In and out of, well those were the three primary places I was.

I mean, it was constant, you know, talking to people and trying to figure out what was going on.

MR. : Did you get into this area at all, in Bill Peacock's arena and what he had set up down there with Dave Cannoles?

MR. BELGER: Yeah, I don't, I mean, I knew they were down there. Actually, I don't think I had time to go down there until later in the afternoon.

MR. : But that morning, you don't think you got down there?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: I don't think so, I don't remember, I don't remember even having a minute or second to do anything other than talk to the Ops Center, talk to the Security folks, talk dot Jeff primarily as an Air Traffic interface and talking with the Secretary's office; talking with thousands of other people who were calling from the airlines, the airports.

MR. : You say Longmire was talking to people you expected to be at the airport, airlines, and stuff like that. Was it on a box or how do you know he's talking to the people that he would ordinarily talk to on the net? Is he telling you that? Is he taking a break to tell you that? Or is it on an open speaker or?

MR. BELGER: Well, there are some open speakers and you've got people talking back and forth. You know, the person sitting here says, I'm talking to American, Lee or I'm talking to United or i'm talking to DOD or whatever, I mean, it's kind of a--

MR. : So there's open

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

communication, in the room--

MR. BELGER: Oh, yeah.

MR. : --verbally, back and forth?

MR. BELGER: Yeah, you say, hey, Lee, I've got United what do you--do you need anything or--

MS. HYDE: When you think of "the" net what--and because you had said, talking to airports and airlines and people you'd expect to be on "the" net. Who, what is "the" net that you're referring to? Is it a net that involves airports and airlines and who else or is there something different? What do you have in mind?

MR. BELGER: Well, there, this is a technicality that I guess I learned, even after 9/11, so let me not answer it in terms of what I learned after 9/11.

MS. HYDE: Mm-hmm.

MR. BELGER: Always, going back to the '70s, there was a reference in Security to two types of nets.

MS. HYDE: Mm-hmm

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: The Tactical Net, which was kind of internal to Security, internal to FAA, I should say.

MS. HYDE: Right.

MR. BELGER: Internal to FAA. When you're trying to find out what the heck do we really have here? Do we need to get other agencies involved.

MS. HYDE: Within an agency, right.

MR. BELGER: An then, what's generally referred to, at least in my terminology is the Primary Net.

MS. HYDE: Mm-hmm.

MR. BELGER: At which time you bring in the other federal agencies and those were, typically, and they might even be described in an order, but they were typically the Secret Service, FBI, DOD, which would be the NMCC, generally as a point of contact.

MS. HYDE: Mm-hmm.

MR. BELGER: If it was a hijacking of a particular airline, obviously, that airline, if it was at an airport, obviously that airports; you'd

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

get the primary Air Traffic facilities involved on that Primary Net. In other words if it was at an airport, you'd get the tower on that net and whoever needed to be in the loop in terms of communication, would be on what I call the Primary Net.

MS. HYDE: Okay.

MR. : If I understand the interplay between the two and the evolution, so to speak of them, would you expect in an air emergency situation for the tact net to go up first to find out what's going on internally? Or is that not the assumption that I should make that it could be that the Primary Net goes up first?

MR. BELGER: Well, it could be, my answer to that would be depending on what do you know at the time. In other words, if your first information that you learn is I got a hijacked airplane squawking the hijack code and you know something kind of that definitive, then I think the coordinator should immediately implement the Primary Net.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

If it's another scenario saying, hey, we've got this airplane, we don't quite know what's going on and the Security folks need to talk within air traffic to find out what they've got going on, then you do the Tactical Net first.

MR. : So how [unintell.] on the day of it the Security folks who were involved in establishing the net if they were aware that there was a reported hijacking in the system and then there were reports of violence on-board, for example, then you would expect the Primary Net to go up sort of instantly?

MR. BELGER: That would have been my expectations.

MS. HYDE: Well, let's not talk--what do you know happened in terms of the nets being established on 9/11? Do you know if there was a Tactical Net established on 9/11?

MR. BELGER: I only know after the fact, you know, by reviewing the data.

MS. HYDE: Okay, so after the fact.

MR. BELGER: I gotta tell you, when all

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this was going on, the last think I was thinking about was, you know, which net did they have going--

MS. HYDE: So, what is--

MR. BELGER: --that was the last thing I was thinking about?

MS. HYDE: --why was that the lat thing you were thinking about?

MR. BELGER: Because I was talking to a million people and doing a thousand other things. And I'm assuming that they've got the right people on the nets. Because they always have been before.

MS. HYDE: Okay, so after the fact you learned that the Tactical Net was established?

MR. BELGER: Right about 10-minutes to 9:00, is that about right?

MS. HYDE: You know, I don't know the--I don't know.

MR. BELGER: I think--

MS. HYDE: What's your understanding of the--

MR. BELGER: My recollection of the logs

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that I saw was that the Tactical Net was requested by the Security folks and set up about 10-minutes to 9:00.

MS. HYDE: Uh-huh.

MR. BELGER: Which was a few minutes before I walked in.

MS. HYDE: Mm-hmm, and the Primary Net--your source is those logs that says that the Primary Net was set up about 9:20?

MR. BELGER: Right, right.

MS. HYDE: And on that morning, do you remember speaking to anyone who informed you or said, I've got the tact net or I've got the Primary Net?

MR. BELGER: No, no.

MS. HYDE: So, from the morning, people were just feeding you substantive information and not really telling you--they must have in some conversations said a source for it, but you don't recall anyone saying this is from the Primary Net and this is from the tact net?

MR. BELGER: No, no.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : What do you recall about those two nets in relationship to the net that the Eastern ROC [ph] set up?

MR. BELGER: I don't know. I don't know what they were doing in the regions.

MR. : From your perspective, it would be intuitive for the ROC to set up it's own?

MR. BELGER: Oh, absolutely, oh, absolutely, yes, definitely and for the regional Air Traffic people to set up their coordination; and for the regional Security people to set up their coordination, yeah.

MR. : And then that tie-in to the net you have established in the ACC, then would be on the tactical side since that's as opposed to the Primary Net?

MR. BELGER: Generally, the tactical side, like I said before, though, unless it was one of the primary facilities--

MR. : If it was a prime facility would then go over to get into world outside of FAA.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : Would it be protocol for the regions, the ROCs to set up both a Security net and Air Traffic net or do they merge those two?

MR. BELGER: They could have done it either way.

MR. : Either way. How about if you--if you could separate what you learned on the day of or in the aftermath.

MR. BELGER: Okay.

MR. : We know, in the aftermath, I guess, we learned that Dave Cannoles had a little telecon going down on his end that they called the Cannoles Telecon for lack of a better term or the Air Traffic Suite Telecon, which they now, let's solved evolved into the Den but there's a lot of people that want to say that the Den evolved from that or from some other people's ideas. But putting all that aside, when did you learn that Dave Cannoles had a sort of separate or a node of communication going on down at the other end of the --the East end, I guess, of the 10th floor?

MR. BELGER: Are you talking about down in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Air Traffic?

MR. : Yeah, down in Air Traffic,
yeah.

MR. BELGER: Oh, well, I knew those folks
were together that morning, I don't know what time,
but I knew Air Traffic was having their
communications.

MR. : What did you think was,
this doesn't, because I don't have an understanding
in terms of not looking at the protocol is not
something that I see in any crisis management
handbook or any other guidance in terms of what
role or function that would be expected to perform
those folks down there if they were running it
properly.

What is your understanding of what
role--how did that fit in the overall information
gathering process?

MR. BELGER: Well, my understanding was,
like I said, I didn't really go down there, I think
until the early afternoon. But they were--my
understanding was that they were talking--they,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

down here in Air Traffic, were talking to the Command Center, the Air Traffic folks out at the Command Center in Herndon.

And they were probably talking to some of the field facilities, getting, you know, Air Traffic, what's the word I'm looking for, Air Traffic-specific type of information. You know, within their organization, which, I think kind of is not an abnormal thing to do.

MR. : Are they getting specific Air Traffic information.

MR. BELGER: Right.

MR. : Let me step back a minute on that point, on Air Traffic. Now you had the Command Center out there, which is sort of a focal point, if you will, for real time information--

MR. BELGER: Right.

MR. : --because they're talking to the people that have the scopes, they have their own TSD display?

MR. BELGER: Right.

MR. : And as they look back up

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to headquarters, where is their primary responsibility for reporting? To Dave Cannoles down in his suite or to the Aviation Crisis Center? Or are they reporting to both places?

MR. BELGER: Both. They should have been, you know, tied into the communications here in the on the net and I see absolutely nothing wrong within their organizational chain of command, also talking to the folks here.

MR. : And within headquarters, now, just reflect back on September 11, 2001, within the Aviation Crisis Room, bill Peacock's office, your own office, and General Canavan's suite down on the third floor--

MR. BELGER: Third floor, right.

MR. : --who had TSD displays?

MR. BELGER: The only one I'm aware of is in the Operations Center. Air Traffic might have had one, I don't know.

MR. : In the WALK, itself--

MR. BELGER: Yeah.

MR. : --as opposed to the ACC?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: I don't know, I don't remember if there was one in the ACC. I know there's one in the WALK, because I remember looking at it, after we'd made the decision to bring everything down and we could see the airspace clearing.

MR. : You remember seeing that in the WALK Center?

MR. BELGER: Oh, yeah.

MR. : And then you and Administrator Garvey did not have TSD in your complement.

MR. BELGER: No, I don't need to have--Jesus, the last thing they want me to do is start trying to copy airplanes.

MR. : Do you know if they had it in Air Traffic, for instance, or Bill Peacock?

MR. BELGER: I don't know.

MS. HYDE: That morning, do you remember somebody monitoring the TSD or feeding information from there?

MR. BELGER: I doubt it, I mean, it's not

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

real time radar, you don't want to use it for that purpose.

MS. HYDE: Mm-hmm.

MR. BELGER: It's a delayed.

MS. HYDE: Delayed, that's what the Command Center has, so to the extent you're reaching out to the Command Center for their information, they've got the same think you've got sitting right there.

MR. BELGER: Right, but they are a heck of a lot better interpreting it than I am.

MS. HYDE: No, I'm not saying you, personally, but I'm saying I believe there were trained Air Traffic Controllers--

MR. BELGER: Right.

MS. HYDE: --from Air Traffic--

MR. BELGER: But they would never use a TSD for precise location of an aircraft.

MS. HYDE: I understand the difference but to the extent that you're calling out to the Command Center for their knowledge about location of aircraft--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Right. What I said was, now, no, no, don't. I said, after we made the decision--

MS. HYDE: Uh-huh.

MR. BELGER: --to bring everybody down--

MS. HYDE: Uh-huh.

MR. BELGER: --we were looking at the TSD to get a picture of how the airspace was clearing.

MS. HYDE: Mm-hmm.

MR. BELGER: Nothing more precise than that.

MS. HYDE: So, when you're trying to figure out later on if there's an in-bound aircraft heading towards Washington, as reports were coming up be it whatever, you wouldn't use the TSD sitting in the WALK to see if you could see it?

MR. BELGER: No.

MS. HYDE: But you would call out to Herndon to try and ask them about it?

MR. BELGER: No, no.

MS. HYDE: No, you wouldn't do either?

MR. BELGER: No, you'd rely on the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

facilities they have the real time radar there.

MS. HYDE: And the facilities are they linked into this net, all the facilities because this was a crisis involving many different facilities.

MR. BELGER: No, that's one of the reasons you have this communication down here is so these folks can talk directly--

MS. HYDE: So how are these people getting their information to the decision makers over here? If these are the guys who've got the real information--

MR. BELGER: Well, they're talking.

MS. HYDE: Well, this is as I've been told, is a long hallway and it's not like you sort of shout across the room, we've got three minutes out, two minutes out.

MR. BELGER: I'm missing our point. Ask me something, I'm missing our point, so.

MS. HYDE: I'm trying to understand in terms of crisis management--

MR. BELGER: Mm-hmm.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: --with threatening planes that you now know are missiles.

MR. BELGER: Well, okay.

MS. HYDE: And understanding having two strikes and by now, let's just assume we've got the Pentagon under our belt, too. So we've got aircraft that are--

MR. BELGER: So, we'll narrow it to 9:40.

MR. : A part of the Pentagon being hit which was at 9:38.

MS. HYDE: Yeah, we could step back, but just so there's--

MR. BELGER: The Pentagon at 9:38, okay.

MS. HYDE: --no ambiguity that aircraft out there are threatening, some are compromised, they can be used to attack us. I'm trying to understand why not put somebody here so that you've got somebody over your shoulder telling you, obviously a trained Air Traffic Controller, not you or Shirley, but why not put a trained Air Traffic Controller here so that they can understand at least know.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: I'm relying, at that time, I'm relying on almost constant communication with the Air Traffic people.

MS. HYDE: So, now you're in constant communication with Air Traffic people so you're not walking down there, how are you?

MR. BELGER: I told you I didn't walk down there until later in the afternoon.

MS. HYDE: So you're talking to them on the phone?

MR. BELGER: Absolutely.

MS. HYDE: And that's Dave Cannoles?

MR. BELGER: Dave, Jeff, most of my discussions were with Jeff.

MS. HYDE: Jeff says he was mostly over here.

MR. BELGER: Good. That's where I was, mostly.

MS. HYDE: Right, exactly and--

[Simultaneous inaudible conversation.]

MR. BELGER: He's got one phone in his ear talking to these folks.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: So this is, they've got the important information, this is where you need to get your information from, the Air Traffic people?

MR. BELGER: In terms of the location or the activities of aircraft?

MS. HYDE: In terms of the threat that you now have buzzing about the skies, the reason you--

MR. BELGER: That's what I said, location.

MS. HYDE: That was the whole ball game, right.

MR. BELGER: Yes, it's got to originate from the controllers.

MS. HYDE: It's got to, right, it's got to originate from the Controllers, the whole ball game is, everybody's focused on what's going to hit us next, where's our next wayward aircraft coming, right?

MR. BELGER: Right.

MS. HYDE: So you're not thinking about, you know what happened at the magnetometers in the airports,

MR. BELGER: Exactly.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: You're past that.

MR. BELGER: Exactly.

MS. HYDE: You've grounded your aircraft, the whole thrust of the crisis now is [unintell.] Air Traffic. So, all that information is coming from down here?

MR. BELGER: A lot of it is, it could have been coming directly into here. Could have been

MS. HYDE: Do you recall any source of that information--

MR. BELGER: No.

MS. HYDE: --that you relied on from here?

MR. BELGER: There was an Air Traffic person in this room--

MS. HYDE: Mm-hmm.

MR. BELGER: --as there always is.

MS. HYDE: Do you recall who that was?

MR. BELGER: No, I have no idea, we were in and out there were different people during the day.

MS. HYDE: Mm-hmm.

MR. BELGER: I don't know who it was.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Jeff was--would have been the leaders. There was a DOD person in this room

MS. HYDE: Who--

MR. BELGER: I don't know who it was.

MS. HYDE: There was a person

MR. BELGER: I remember seeing uniforms there in the morning. I don't know.

MR. : You only got a very few uniformed people, to draw on.

MR. BELGER: Yeah.

MR. : And the senior person, we understand was Colonel Cheryl Atkins?

MR. BELGER: Cheryl, yeah.

MR. : Do you know Cheryl?

MR. BELGER: Oh, yeah, sure, yeah.

MR. : She thought she was, actually if you flip this over, this is Bill Peacock's office, the conference room where Dave Cannoles sets it up and then the military, see right there where it says military.

MR. BELGER: Yeah, okay.

MR. : Cheryl thought she set up

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

an additional conference room down here, but later in the day.

MR. BELGER: Yeah, could very well be.

MR. : Well, let me see if I can gain an understanding of so how the flow of information is coming in for Air Traffic situation warnings. You're trying to get your best. I assume that, and tell me if I'm wrong, I don't want to put words in your mouth. But I 'm assuming that after the second strike up in New York, you're trying to--you and your people here at the Crisis Center are trying to get as best they could of a real time picture of what's unfolding in Air Traffic.

MR. BELGER: Absolutely.

MR. : And I guess what I need to know is you mentioned Command Center. And let me just step back and ask you did ou expect the Command Center to have a line of communication open to this room, the ACC Room?

MR. BELGER: Yeah, I think that was my expectation, yeah. I said, like, I said before, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

expect them to have both.

MR. : Both?

MR. BELGER: Here--

MR. : Oh so you expected the
Command Center to have two lines?

MR. BELGER: That would have been my
expectation, right.

MR. : Okay.

MR. BELGER: The Air Traffic folks here,
the Air Traffic representative in the ACC
Operations Center, would have been talking to the
Command Center; they would have been talking to
Boston, New York or wherever else and, also, I
would have expected that from an Air Traffic
management standpoint, they're also talking to them
down here?

MS. HYDE: And that's your expectation.
Do you know that that was happening on the morning
of 9/11?

MR. BELGER: I know that it was happening
here.

MS. HYDE: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: And my expectation was it was happening here. I can't tell you that I heard them talking to them and I can't tell you I saw a transcript, but that's what they should have been doing.

MS. HYDE: Okay.

MR. : And from your perspective, we understand we've been told consistently by everybody we talked to that none of those lines at either location were taped on 9/11?

MR. BELGER: I don't know.

MR. : Did our Administrator Garvey ascertain that at your level that there were no recorded conversations?

MR. BELGER: As far as I know, they were not recorded.

MR. : Is that something that you would have expected and is something that being on line with the communication center going into, perhaps Air Traffic and the Aviation Crisis Center, not from a written protocol, but just sort of a common-sense application of what they should be

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

doing in a crisis situation?

MR. BELGER: Well, I think, you all tell me, if I'm wrong, but I think the Command Center, lines were recorded.

MS. HYDE: Mm-hmm.

MR. : Yeah, from all

MR. BELGER: So I would expect that, I mean, that's kind of an operational ongoing precision facility but--

MR. : And we do understand that there was a line of communication open and I don't know if you were aware of it, between John White--do you know John White down at the Command Center?

MR. BELGER: Yes.

MR. : He had an open line going from Command Center to, initially, Jeff Griffith.

MR. BELGER: Okay, that would make sense to me.

MR. : And do you know Doug Davis?

MR. BELGER: Yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : Okay, Doug was then asked to sit that phone and not get off the phone.

MR. BELGER: Okay

MR. : Do you know--do you remember where that was occurring, on the headquarters end, where would Doug and Jeff speak to John White.

MR. BELGER: I assume it was down here. I assume that was down here in the Air Traffic organization.

MS. HYDE: I'm going to have to leave for another interview in about 20 minutes. So, I wanted to go through a series of questions before I do.

MR. BELGER: Sure.

MS. HYDE: Specific to the SVTs that morning and your recollection of how you learned of the SVTs, when you first participated in the SVTs, could you speak a little bit to that?

MR. BELGER: Well, there were numerous--

MS. HYDE: Well, they're all happening in this room.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Right.

MS. HYDE: Let's take SVTs as a facility in the other room.

MR. BELGER: Yeah, there were numerous, I don't remember what time they started, I mean, they were going on all day.

MS. HYDE: Uh-huh--and--

MR. BELGER: So it was myself, the Administrator, it was Jeff, Lynne, we would have been the primary people participating in this. I don't remember what time the first one was called, but they were going on, like all day long.

MS. HYDE: Okay.

MR. BELGER: No, they were going on for days.

MS. HYDE: Right. So, what is your first recollection of walking into the SVTs room.

MR. BELGER: I don't have a first, I mean, they were, they started and then they were kind of continuous. I mean it was a status, they generally, were call for I think for the White House. It could have been different people, but

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they were generally for the purpose of status, you know, what's going on, what do we have, what decisions. They were multi agency, it was, generally state.

MS. HYDE: I think I know, I generally know,

MR. BELGER: So, I don't, I mean, I can't--

MS. HYDE: I'm interested in any specific--you have no specific recollection about anything related to the SVTs? That is who the participants were, when in terms of sequence.

MR. BELGER: I just told you.

MS. HYDE: Okay, so that's general--

MR. BELGER: Yes.

MS. HYDE: --that morning you remember seeing--

MR. BELGER: Yeah, yeah.

MS. HYDE: --okay, the participants--

MR. BELGER: It's all day long, I mean, they were going on kind of regular.

MS. HYDE: And what is your recollection

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of the participants, DOD?

MR. BELGER: DOD.

MS. HYDE: Mm-hmm.

MR. BELGER: State.

MS. HYDE: Mm-hmm.

MR. BELGER: FBI.

MS. HYDE: Mm-hmm.

MR. BELGER: Secret Service.

MS. HYDE: Mm-hmm.

MR. BELGER: FAA, DOT.

MS. HYDE: Mm-hmm.

MR. BELGER: White House, CIA. I can't tell you they were all on every one.

MS. HYDE: Mm-hmm.

MR. BELGER: But those were generally the people that were on those.

MS. HYDE: And who do you remember seeing from DOD?

MR. BELGER: I don't know their names.

MS. HYDE: Would you recognize Secretary Rumsfeld?

MR. BELGER: Oh, yeah, I don't recall

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Rumsfeld being on any that I was in.

MS. HYDE: Okay, would you recognize General Myers [ph]?

MR. BELGER: General Myers was not in on any that I was on.

MS. HYDE: So, was it somebody--

MR. BELGER: These were people like Pete Varga or Verga [ph], that's a name that comes to mind. There were other uniformed people, that I did not know at the time. The reason I remember that name is that he came--I think he's civilian, but he kinda consistently stayed on those conference calls throughout these weeks and months.

MR. : Let me just clarify a point on that, because DOD has its own SVTs node separate from JCS.

MR. BELGER: Okay.

MR. : Were the uniform people on at the same time that Pete Verga was?

MR. BELGER: Sometimes, yes, yeah.

MS. HYDE: Do you remember who from the White House was?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: The only one I remember was Dick Clark, he chaired a couple of them. I guess assistants. No, I'm thinking of a woman.

MS. HYDE: Lisa [unintell.]?

MR. BELGER: Lisa, yeah, I think she might have chaired a couple of them, if not chaired, she was right there with him. I don't remember, I don't know those people, so I don't--

MS. HYDE: Mm-hmm. And, as you recall, you recall this as being a sort of series of SVTs is this from the equipment people we learned that the video was up all day, but that people would sort of come and go from their chairs and provide updates. So, it's not call a meeting; call a meeting; call a meeting, it's sort of an open meeting that people come and go in and out of.

MR. BELGER: It was both, I mean, some were called. There were calls so that we had the right people there at specific times.

MS. HYDE: Are you talking about that morning there were some that were called.

MR. BELGER: Throughout the day, yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: So, if we focus on before noon. The idea, do you recall any being--any meeting being sort of called before--

MR. BELGER: I don't remember, I don't remember.

MS. HYDE: Uhhh--

MR. BELGER: But it wouldn't surprise me. But, again, there should be a record shouldn't there of when they were activated or?

MR. : Actually your log, FAA did maintain the log every day but that morning.

MR. BELGER: Well, what about from the point of origin, which was really the White House.

MS. HYDE: There's some record of if.

MR. BELGER: Okay.

MS. HYDE: The--you have no recollection of who first asked you to go into the SVTs?

MR. BELGER: No, I have no idea.

MS. HYDE: Was it before the second strike, before you--

MR. BELGER: Oh, no, no.

MS. HYDE: Was it before the Pentagon had

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

been hit?

MR. BELGER: I don't think so, that was--

MR. : 9:38--

MS. HYDE: Forty, and we'll not fixate on times, but sometimes in sequence that morning, do you remember going in there and talking about, you know, is there an aircraft hitting the Pentagon?

MR. BELGER: No, I don't remember going into the--I don't remember going into the SVT room before the aircraft hit the Pentagon, no.

MS. HYDE: Do you recall when you went in there were you the one that was providing the information? Were you the one to speak?

MR. BELGER: Well, it's like I said, it was myself, it was Jane, Jeff.

MS. HYDE: Who's talking, was it Jane?

MR. BELGER: It depends, sometimes I went, she didn't go; sometimes she went, I didn't go, depending on what else we were doing?

MS. HYDE: So you provided information?

MR. BELGER: If she's there she's providing it.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Okay.

MR. BELGER: If she's not there I'm doing it.

MS. HYDE: Mm-hmm

MR. BELGER: Sometimes Jeff would step in if it was a level below what I knew. Generally it would have been one of the three of us.

MS. HYDE: Mm-hmm.

MR. BELGER: If Jane was there, she would do the talking. If she wasn't, I would.

MS. HYDE: Mm-hmm. And would you, what's the type of information you were asked to provide?

MR. BELGER: Well, it's general status, you know. How many aircraft are in the system? What kinds of reports do you have of aircraft that might be in distress, is there other threat information available, you know, general, what's the status of what's happening in the airspace.

MS. HYDE: And sort of alluding back to this conversation; where were you getting that status from, folks here in the ACC?

MR. BELGER: Getting it from everywhere,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the ACC and from out here.

MS. HYDE: And are you going back and forth between SVTs and around here?

MR. BELGER: Oh, absolutely.

MS. HYDE: From gathering information and then feeding it into the SVTs?

MR. BELGER: Right.

MS. HYDE: And if it's not you, it Jeff or Jane doing that.

MR. BELGER: And to through the Secretary; and through the airlines and, you know a thousand other people that are calling at the same time.

MS. HYDE: Do you remember providing any information to the SVTs about the flight that we now know the call sign and probably didn't know then of 93?

MR. BELGER: I don't remember any specific real time discussion about any of those flights on the SVTs.

MS. HYDE: So that would be, any of those flights meaning 77 that hit the Pentagon?

MR. BELGER: Yes, any of them, right. I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

don't remember any specific, you know, before. After the fact, obviously, but I don't remember about any--

MS. HYDE: About any of the hijacked flights and the SVTs wasn't up for 11 and 175?

MR. BELGER: No, I don't remember that at all. Are those supported, I don't know.

MS. HYDE: I don't know either.

MR. BELGER: That would answer your question.

MS. HYDE: So, your role, either when I say you, I'm encompassing Jane or Jeff Griffith was to provide general information about the status of aircraft that were up or that were being reported to you as in distress. You don't recall any specific conversations about the aircraft 77, 93, that we now know was hijacked?

MR. BELGER: No.

MS. HYDE: Did you learn from the SVTs, do you recall learning from the SVTs, about either one of those, DOD or others were telling you about reports--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Not in the SVTs, I don't recall learning that, no.

MS. HYDE: You didn't learn anything, you don't recall learning anything from the SVTs that you didn't know about distressed aircraft?

MR. BELGER: No, right, right.

MS. HYDE: Do you recall any conversations in the SVTs about scrambling fighter aircraft?

MR. BELGER: No.

MS. HYDE: Not by DOD, not by Dick Clark? Not by anybody?

MR. BROWN: Uh-uh. Now, again, you know, this was, the timing that you're asking to scramble, that would have been--

MS. HYDE: To pick apart what we know now, there's a lot of things, you know realities don't match there. There may have been conversations 20 minutes after, what we know now happened 20 minutes before.

MR. BELGER: Right, no, what I'm saying is, I'm trying to answer your question precisely. I don't remember any, make sure I'm understanding

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the question. I don't remember any discussions on the SVTs, kind of real time discussions, kind of DOD is doing this or I think most of these SVT discussions were after that timing.

MR. : After the aircraft?

MR. BELGER: After, like, 9:40 or so.

MS. HYDE: But, actually, I don't want to put you in the position to try and put a clock on things and make that. Just tell me anything recollection you have. I mean don't sort out the next day and try and sort out, you know, sort of 2:00 p.m. on or something like that. But any discussion with, say, from whenever you got into the SVTs, until noon or 1:00 o'clock, any discussion you recall about scrambling fighter aircraft?

MR. BELGER: No, not until after the fact.

MS. HYDE: You mean after my question that afternoon or the next day?

MR. BELGER: I'm sure there were discussions, yeah, and about what happened. There were general discussions about what happened, who

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

did what, you know. What was the status? What do we know. I mean that was the general purpose of those SVTs on that day is who knows what and what do we know?

MS. HYDE: There was general discussions about what we do know. My question was about scrambling. And as I take your answer that--

MR. BELGER: I don't remember any specific discussions about scrambling.

MS. HYDE: That morning, say up till 2:00 o'clock?

MR. BELGER: No, none, not on those calls. Not to say that the DOD didn't say, you know, we scrambled x-amt of out at Langley at x-time and we did this at Otis, I mean, they could have said that, but I don't remember that in those context.

MR. : The SVTs can be used for two things: they can be used for crisis management or consequence management. You're describing consequence management. What Dana's focusing on is this real time, crisis.

MR. BELGER: Oh, okay, that helps me. No,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

no, no, the SVTs, the meetings I was in, the SVTs were not incident management type of discussions.

MS. HYDE: Well, you're being asked to provide information about how many aircraft are airborne, how many aircraft are distressed. I don't want to provide ambiguity by calling it one--

MR. BELGER: That cleared it for me, that wasn't ambiguous to me, that clarified it.

MS. HYDE: I'm want to ask broad questions about whether you recall at anytime in any of those meetings and I'll put the time up until, say, that early afternoon any conversation about scrambling aircraft?

MR. BELGER: No.

MS. HYDE: And you recall no information on the SVTs, from you or from any other source about 77 or 93?

MR. BELGER: I don't recall that, no.

MS. HYDE: And the nature of what you--

MR. BELGER: Other than after the fact when we were relaying what we had learned.

MS. HYDE: Well, tell me after the fact

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what you would place when, the next day?

MR. BELGER: No, that afternoon, probably, yeah.

MS. HYDE: So, after the fact, when you relayed what you learned, and then you're referring to the afternoon?

MR. BELGER: Probably, yeah.

MS. HYDE: So, it's in the afternoon that you would relay.

MR. BELGER: No, wait, wait. So, whenever we knew which aircraft hit the first World Trade Center, for example.

MS. HYDE: Mm-hmm.

MR. BELGER: If there was a SVTs after that, whatever information we knew about that flight, would have been provided. You know, it American Flight umpty-ump from X to You, the information we had is it departed at whatever time it was; I mean whatever general information we had, we would have provided it.

MS. HYDE: So do you recall providing for the SVTs or Jane of Jeff anyone from FAA, while you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were there as a witness, providing any information to the SVTs about 11 or 175, the aircraft that hit the towers?

MR. BELGER: No. not until after the fact.

MS. HYDE: Well, I'm not saying before the fact, I'm saying at any time.

MR. BELGER: Yeah, five times I've said, yes. Yeah.

MS. HYDE: Okay.

MR. BELGER: We gave whatever information we had to the folks on this calls.

MS. HYDE: And what information did you give to the folks on those calls about the aircraft that hit the towers.

MR. BELGER: I mean, whatever we knew at the time, I can't answer any more specific than that. I mean whatever we knew at that time, we passed on.

MS. HYDE: Did you know at that time that it was American 11 that hit the first tower?

MR. BELGER: At what time?

MS. HYDE: Did you know anytime before

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

noon?

MR. BELGER: I think we probably, did, yeah.

MS. HYDE: Do you have a specific?

MR. BELGER: I think that was known, is that the first one that hit the tower?

MS. HYDE: Mm-hmm.

MR. BELGER: That was identified pretty shortly after it hit, wasn't it? I think it was.

MS. HYDE: Ten different people have ten different views on this. So, I don't think there is any ground truth. We've disassociated ourselves from what going to now. Put yourself, you're there that morning, do you recall informing people on the SVTs about.

MR. BELGER: Like I said, I don't recall. I mean, I had a thousand discussions that day and I can't tell you specifically what I said in which discussion.

MS. HYDE: The discussion we're focusing on is the SVTs when ou were relating to the White House and to DOD and we're focusing on the aircraft

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that we now know were hijacked.

MR. BELGER: All I can tell you is, whatever we knew at the time the questions were being asked, we provided it.

MS. HYDE: Turn to the conversations with the Secretary. Describe those--well, describe first of all, did the Secretary contact you or did you contact the Secretary? How was that initiated.

MR. BELGER: I think the first call was from the Secretary. And it seemed like we were talking to him, you know, like every other minute, it seems to me. Giving him status reports. It was either talking to the Secretary or to John Flaherty or to, I think a couple times to Michael Jackson. So, we had kind of--it wasn't an open line, but it was kind of continuous, you know, multi minute calls with the Secretary. Starting from about a little before 9:00 o'clock.

MS. HYDE: And were you taking those calls in your office or in the ATC or in the SVTs room, where were you--

MR. BELGER: Generally, we took them in my

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

office because it was a little bit quieter and easier to talk. Couple I took and Jane and/or I took here in the Operations Center. I don't recall ever talking to the Secretary when I was back here because this is kind of noisy and active. So, I would have done it here or in my office; generally in my office.

MR. : I'm sorry where was the here?

MS. HYDE: In the office.

MR. BELGER: Here in the Operations Center which is a little more open, it was less crowded and less noisy than--

MS. HYDE: Did anybody else, to your knowledge, besides you and Jane speak to the Secretary that morning?

MR. BELGER: Not that I'm aware of.

MS. HYDE: And did you recall speaking with him once we got to the kiosk, the bunker at the White House?

MR. BELGER: Yes. I didn't know where he was.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Did he ever tell you that I'm in the bunker at the White House?

MR. BELGER: I don't remember. I don't know if he told me where he was.

MR. : To the extent you became aware of that after, where he was?

MR. BELGER: I don't remember if he told me or if it was afterwards. Because he didn't need to tell me where he was.

MS. HYDE: Do you recall, and maybe this would have clicked and been a memory you remember, him saying that I'm next to the Vice President. Did you know that morning that he was next to the Vice President?

MR. BELGER: I don't think so. I don't think so.

MS. HYDE: What kinds of questions was he asking?

MR. BELGER: Well, obviously all this who, what, when, where, and why, status questions. He saw some reports on television that he was asking about, you know, things that the media was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

reporting. As we got into the morning, there were a number of reports of various aircraft that might have been in distress, mostly of which were false.

There were a number of reports, you know, of bombings and bomb threats, and things like that and, you know he was asking what we knew about any of those situations. I remember just one specific I remember, there was a report of a--I think it was a Korean aircraft, but I'm not positive now. That was squawking the hijack code up in Alaska and we thought it might have been hijacked and it turned out it was nothing, I think the pilot was just trying to get attention. Trying to get somebody to talk to him to find out what was going on.

So there were a number of situations like that that were being reported. We were trying to clarify all those, sort through what was real and what wasn't and try to give him the best information we could about what, you know, what was going on.

MS. HYDE: do you remember speaking to him before the aircraft hit the Pentagon?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Oh, yeah, I spoke to him, like I said, shortly after the first aircraft hit the World Trade Center.

MS. HYDE: Did you know that an aircraft was coming into Washington low and fast, the aircraft that we now know as 77 that hit the Pentagon? Did you know that before it happened.

MR. BELGER: Let me think, tell me the time again? Because I have to, I work off times, that's just the way my time works.

MS. HYDE: And, again, I don't want to put a time on it. My question before you knew at one point that the Pentagon had been hit. Do you recall, and this would have been after the second crash.

MR. BELGER: Yeah, yes, yeah.

MS. HYDE: Do you recall there was an aircraft bearing down on Washington--

MR. BELGER: Yes.

MS. HYDE: --flying low and fast

MR. BELGER: Yeah, I do remember, yeah, yeah, I do remember, yeah. So, let me put that in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

perspective from what I knew at that time.

We had thought, by this time, we had thought that American 77 had crashed, just looking back on it, I would say that was a likely scenario that the Air Traffic folks were thinking.

They lost contact with it. I remember at one point we were thinking that we had five aircraft that we needed to be really concerned about. The two that had hit the World Trade Center and American 77 and United 93 and at that time, what we thought was, maybe an unidentified, could have even been VFR, aircraft high-speed flying back in an easterly direction. So, yeah, I remember that.

MR. : Do you recall [unintell.] hit the Trade Center?

MR. BELGER: Right American 77 which we thought had crashed and it was actually kind of confirmed by some reports from state police, which, in retrospect, was probably circular reporting. United 93 and an unidentified target that Dana was asking about.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. HYDE: Actually, I'm not sure, and, again, I want to recall taking your head back to not everything you learned afterwards and look back.

MR. BELGER: No, this is real time.

MS. HYDE: That morning, do you recall learning that there was an aircraft flying low fast, coming towards Washington, you know, it was minutes out?

MR. BELGER: Right, yeah, I just said, I guess I did.

MS. HYDE: And that, what I'm referring to is the incident that we now know was 77 and hit the Pentagon. I think there was some confusion as I understand it about what hit the Pentagon. You all weren't familiar with that at first.

MR. BELGER: Right, right.

MS. HYDE: So, that report that there's at this point, you know that there's been strikes in New York?

MR. BELGER: Right.

MS. HYDE: One does not necessarily know

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that Washington is a threat here or is at risk. This aircraft that we now know is 77 that it went, circled and hit the Pentagon. Did you learn that that aircraft was coming towards Washington, before it hit?

MR. BELGER: I think so, yeah.

MS. HYDE: And do you recall if you conveyed that information to the Secretary? And if you don't, recall--

MR. BELGER: I don't remember talking to him about that. Doesn't mean I didn't, it's just that I don't remember.

MS. HYDE: Is that an experience where you thought that, you know, we've got a plane heading toward our Capitol somewhere. Is that how it registered with you or was it of a different sort?

MR. BELGER: I think the timing that I'm thinking about, it wasn't that we got--it was an unidentified primary radar threat.

MS. HYDE: Mm-hmm.

MR. BELGER: The folks West of Dulles had identified, if I remember right and the speculation

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was that it was a VFR aircraft.

MS. HYDE: I guess just to focus on the conversations with the Secretary and then I'm going to have to leave. Next question would be, and maybe it wasn't conveyed to you in this manner. After the Dulles primary track speculation of VFR, do you recall learning that there was another track of an aircraft that was compromised, hijacked also on en route to Washington? I'm referring to what we now know as 93, but I wouldn't expect that you'd have known it at that time as 93?

MR. BELGER: Well, if I remember right, I mean the log is--or the chronology can clarify this, but it was like, it was a little before 9:30, I think that we first knew that there was a problem with United 93 and it was about that same time, I think that there were the first reports, at least that I was aware of that there was this unidentified track heading East. So, I think we might have known about United 93 at the time. I don't remember that we knew that it was actually turned and heading back towards Washington at that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

time.

MS. HYDE: The one that turned and headed back toward Washington that hit shortly after 9:30 was 77.

MR. BELGER: Right.

MS. HYDE: Ninety-three's meandering around Pennsylvania.

MR. BELGER: Right.

MS. HYDE: Do you recall if you would have known about this track at the time that it would have been described to you as meandering around Pennsylvania or coming out of Cleveland or something like that. And when you say we knew, certainly the Center knew, my question to you is--

MR. BROWN: No, I would say I.

MS. HYDE: --yeah, is whether you knew, what you knew about track. And my next question is did you convey what you knew about track to anybody? And you may not recall either one.

MR. BELGER: Oh, sure, if I knew, I would have provided it to whoever we were talking to?

MS. HYDE: Did you know?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: I knew that we had a problem with United 93 about that 9:30 time frame it seems like to me.

MS. HYDE: When do you recall hearing about the problem with 93.

MR. BELGER: Wait back up. There were dozens of situations where we thought we had hijacked aircraft.

MS. HYDE: Mm-hmm.

MR. BELGER: Dozens.

MS. HYDE: Mm-hmm.

MR. BELGER: So, United 93 was one of those. It turned out to be a real one.

MS. HYDE: Mm-hmm

MR. BELGER: But there were just as--there were dozens of reports that, initially, you know, came in to us just as seriously as United 93.

MS. HYDE: Mm-hmm.

MR. BELGER: You know, pilots squawking the hijack code. Aircraft that aren't following Air Traffic Instructions or whatever. So the first time, I probably learned about 93 or somebody said

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

something to me about 93 was probably in the context of all those others of dozens of ones that people were telling me about.

MS. HYDE: Do you, you're using the word 93, do you remember from that morning hearing about 93 as one of the call signs that were popping up?

MR. BELGER: I don't remember, oh, yes, I'm sorry--did I--93?

MS. HYDE: That morning, you were being told United 93?

MR. BELGER: Yeah, that's what I said before.

MS. HYDE: I mean we know it now, but that morning, you knew it was United 93.

MR. BELGER: Absolutely.

MS. HYDE: And what did you know about that situation? Did you know that it was heading towards Washington?

MR. BELGER: I mean I think I knew--I'm not sure I can answer that specifically. I knew as we were going along everything that everybody else was hearing. I mean, I'm sorry, but I can't--I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

mean, so I guess the answer is, yeah, I knew what everybody else knew.

MS. HYDE: Well, I think that, I mean, I don't want to quibble with words there, but I think our experience is that not every--one cannot assume that everybody knew what everybody else knew.

MR. BELGER: Okay, I understand. That's fair.

MS. HYDE: So, that's not particularly helpful.

MR. BELGER: I got you.

MS. HYDE: The best thing I can do is ask you what you recall that morning?

MR. BELGER: I was getting reports of United 93. We knew it by the call sign. That's what I said before, we thought we had 93 and 77 under VFR aircraft. I don't remember specifically what people were telling me about 93 other than it was another one of those aircraft in distress.

MS. HYDE: Thank you.

MR. : We're going to take a small break.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

[Break.]

MR. AZZARELLO [?]: We'll back on with Mr. Belger on the 20th, second session.

I'd like to just come back in.

MR. BELGER: Can I, I've been reflecting these last five or ten minutes. Can I say a couple of things, just to before we get into a whole bunch of other specific questions.

MR. AZZARELLO: Sure.

MR. BELGER: In response to Dana's last question about United 93. I said, I think, that, you know, I was hearing things and passing it on kind of at the same time as other people. I should have been clearer there. Because my recollection is that the time United 93 was in distress, everybody was kind of following that realtime, including the military. And the Primary Net had been set up; the F16s out of Langley had already been scrambled, they were being held over the Washington area and I recall interviews in the news media after 9/11, where the military said they were holding them there in preparation for, you know,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

United 93, if it came close to the Washington area.

The point I was trying to make is everything was realtime with United 93, with I think, in my view all the participants.

MR. AZZARELLO: Including, you're saying the military?

MR. BELGER: In my opinion, yes.

MR. AZZARELLO: Including the military and the Primary Net you're saying you knew was up then?

MR. BELGER: The logs that I have gone back and looked at have indicated that the Primary Net was set up at 9:20 and I think United 93, the first indication was six or seven minutes after that.

MR. AZZARELLO: Well, independent of what the log said which I imagine you saw after 9/11.

MR. BELGER: Yes.

MR. AZZARELLO: I want to sort of focus really on what you remember occurring that day regarding 93, because we've seen a number of logs we showed to some folks, we even created them and we've said there's a lot of inaccuracies in these.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: No, I meant to be that specific. My recollection, my memory, my memory is that by the time of United 93 everything, the people, the military, the FAA, were hearing that information realtime at the same time.

MR. AZZARELLO: That the FAA people were hearing it realtime.

MR. BELGER: And the military.

MR. AZZARELLO: And what's your basis of believing that the military was hearing it real time?

MR. BELGER: The net was set up. I have three bases, I guess, but one of these bases is after the fact so.

MR. AZZARELLO: I want you to give the day of bases.

MR. BELGER: Okay, the day of and then I'll tell you the other one after. The day of, we knew that the F16s had been scrambled. We knew they were over the Washington area. We knew that--I knew that the military folks were on the net, so my assumption was they were hearing it at

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the same time the FAA was.

MR. AZZARELLO: Your knew the F16s were scrambled and over the Washington area?

MR. BELGER: Right, they were scrambled in response to 77.

MR. AZZARELLO: And then you say they were scrambled in response to 77?

MR. BELGER: Right.

MR. AZZARELLO: That would be Langley, was it?

MR. BELGER: I think that was Langley, I believe it was. Mm-hmm.

MR. AZZARELLO: Okay the second thing was the military was on the Primary Net or--

MR. BELGER: Right.

MR. AZZARELLO: And that's the day of, how did you know they were on the Primary Net?

MR. BELGER: I saw them there, I mean, they were there. I mean.

MR. AZZARELLO: Saw them physically in the room, you think?

MR. BELGER: I think I did, yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: In the ACC room?

MR. BELGER: Yeah. I think I did, but let me, even if I didn't. If you want to, I mean, the Primary Net was up the NMCC should have been on the Primary Net, I mean, that's just the way it's supposed to happen.

MR. AZZARELLO: Well, let me, I mean, there's a difference between the bases here and I want to make sure I don't misunderstand.

MR. BELGER: Yeah, and I want to be clear, too.

MR. AZZARELLO: Was the second basis is you saw a person with a military uniform in the ACC or you knew that the net was up, the primary--

MR. BELGER: I knew the was up would be a more precise way to say it.

MR. AZZARELLO: Because there's a difference, because the person in the room might not be.

MR. BELGER: I understand, you're right, you're right. I knew the net was up.

MR. AZZARELLO: And then, secondly, did

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you know, have any indirect or indirect knowledge that they were on the line, I mean there's a difference between they're supposed to be and they weren't?

MR. BELGER: Right I understand and you're right, you're exactly right, I cannot say that I asked is the NMCC on the net. They were supposed to be and I've not heard anything to the contrary but this is after the fact. I haven't heard anything to the contrary that says they weren't.

MR. AZZARELLO: And at this point I want to come back to the point that we were discussing this thing about using SVTs as crisis management versus consequence mgmt.

MR. BELGER: Okay.

MR. AZZARELLO: And the specific question here is, during this time frame and this awareness of 93, were you on the SVTs and was it being used to track 93, realtime?

MR. BELGER: I don't recall that. I don't recall that at all.

MR. AZZARELLO: You recall that it was o r

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it wasn't?

MR. BELGER: I don't recall the secure conversations being used for tactical purposes.

MR. AZZARELLO: Okay.

MR. BELGER: Not the ones I was on.

MR. AZZARELLO: And specifically tactical purposes to track 93 as it came in?

MR. BELGER: No, I don't recall that for any that I was participating in.

MR. AZZARELLO: Right, and let me just amend that 93 or 77.

MR. BELGER: Or any of them.

MR. AZZARELLO: And the reason I say it that was is to distinguish them between the northern situation, the New York situation; which is 11 and 175 at 8:46 and 9:03.

MR. BELGER: Yeah, right.

MR. AZZARELLO: And there's sort of an arignum [ph], if you will before the attack on the Pentagon unfolds.

MR. BELGER: Right.

MR. AZZARELLO: And do you recall in the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

position at you held that day as Deputy Administrator how you first learned that there was threat--totally apart from New York how there was now a threat to Washington, D.C., as well?

MR. BELGER: Well, obviously, when American 77 hit the Pentagon, we knew. Clearly we knew then.

MR. BELGER: Right. I mean, I think from my perspective, that's the first.

MR. AZZARELLO: Do you recall any recording--

MR. : May I say that when the Pentagon was hit, obviously--it was an obvious indication of a threat to Washington. You say 77, but how do you square that with your belief that they--that 77 had crashed--at the time it would have just been the aircraft.

MR. BELGER: At that time we did not know that it was American 77.

MR. AZZARELLO: Did you have any indication, that Washington, what I was getting at, was that Washington it was a potential threat to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Washington prior to that impact of that aircraft at the Pentagon? Well, let's back it up, you said, you heard, you do recall hearing about a VFR approaching--

MR. BELGER: In an easterly--high-speed easterly direction West of Dulles Airport.

MR. AZZARELLO: Was that the first indication that you had--

MR. BELGER: Yes.

MR. AZZARELLO: --that the capital area might be--that it might be a threat to the capital.

MR. BELGER: Yeah, I think that's fair.

MR. : And you don't recall reporting that a plane might be approaching from the North and it might be American 11 which hadn't crashed into the World Trade Center?

MR. BELGER: No--

MR. : You don't recall that?

MR. BELGER: No.

MR. : So your awareness then of the threat was the West of Dulles--

MR. BELGER: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : --fast moving VFR
approaching from the--

MR. BELGER: Right, I do recall--

MR. : --and, John, and then I'll
turn it back to you and none of that was being
discussed in realtime, I mean, on SVTs?

MR. BELGER: None that I was on, I mean,
if there were other--

MR. : It would have been
somebody else--

MR. BELGER: --it would have been within
other circles, yeah. Just so I don't lose my train
of thought, on United 93 because you asked me, and
rightly so, you asked me to discriminate what I
think I knew that morning, versus what I learned
subsequently. So, let me now, just mention two
things that I learned subsequently.

MR. AZZARELLO: Mm-hmm.

MR. BELGER: There were, I mean,
interviews by several Department of Defense folks
made the point that the fighters out at Langley
were positioned over Washington, should there be

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

another approach by aircraft, which could have been United 93. So they were in position. And, you know, I don't know this, but I've got to assume they were in contact and people were telling them what was going on. So that's one.

And, then, secondly, I remember seeing, because I asked a thousand questions about this, right after 9/11, you know, did we do the right things? Is there any chinks in our armor in terms of our notification? And all of the information I got was that by the time of United 93, there was an open line of continuous communication with the military. And, in fact, I recall seeing a NORAD press release that said that.

MR. AZZARELLO: So your request post-9/11 was to your staff?

MR. BELGER: Oh, absolutely.

MR. AZZARELLO: Did we, the FAA, do everything we could in terms of notifying proper notifications?

MR. BELGER: Absolutely, absolutely.

MR. AZZARELLO: Was that for each of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

four flights?

MR. BELGER: For each of the four.

MR. AZZARELLO: Did we give proper notification on each of the flights?

MR. BELGER: Absolutely, and so, I never got anything that indicated to me that there was a problem with United 93; never saw anything from DOD that indicated there was a problem with United 93. In fact, to the opposite, they were saying that there was continuous communication with the FAA and until the time I left the FAA, I never heard from DOD that they had any problems with--

MR. : Sounds like you might be hearing something different now.

MR. BELGER: Well, you know, I hear all this urban legend crap that everybody else--

MR. : Tell me what [unintell.] what did you hear?

MR. BELGER: That there was some problem with the FAA's notification of the military on United 93.

MR. : Well, where are you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

hearing that from, recently, obviously? When you said you had thought, post-9/11 your folks told you that, you know, that there was an open line on 93.

MR. BELGER: No, I mean, to be very candid. I'm hearing that from people that are alleging that you all had said that.

MR. : People we've interviewed?

MR. BELGER: Yeah, yeah, yeah.

MR. : It's not [unintell.] and sat through many of these interviews, I've said to plenty of folks [unintell.] not that this was a game of anything, we just, we're telling you folks the same thing that we told the military, which was this is where we're at and this is what we're finding.

MR. BELGER: Yes, sir.

MR. : If you guys would know of something different that would change this story or augment it or edit it, then let us know.

MR. : Remember how you laid it out for me?

MR. BELGER: Yeah, so I really want to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

help, if there's--if you have those--

MR. : We have to, pure and simple, we have to tell the story of 9/11 as accurately as we possibly can to the American people.

MR. BELGER: Oh, absolutely. And I want to help--well, let's--

MR. : I wanted to go through. You said your staff told you there was an open line between the military and the FAA?

MR. BELGER: Well, that's the net.

MR. : Okay, that's the net?

MR. BELGER: Yeah, I'm saying NORAD said--

MR. : Okay, NORAD--

MR. BELGER: --in the press release, that there was, I believe it was continuous communication.

MR. : Okay, you saw the NORAD press release, right?

MR. BELGER: Right.

MR. : That was September 18, I think, about a week after.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: It was in that time frame.

MR. : Did you get it from Kevin?

MR. : Okay, so there was an open line discussing 93?

MR. BELGER: Well, I think, I mean, again, I think there were continuous communication.

MR. : Was it discussing other aircraft, do you remember?

MR. BELGER: Yeah, United 93, specifically.

MR. : Now what about, that's different from the two things you learned afterwards. You talked about the DOD interviews that they gave.

MR. BELGER: Yeah.

MR. : About the fighters over the D.C. area should another aircraft approach.

MR. BELGER: Right.

MR. : Do you remember if they mentioned 93, too?

MR. BELGER: I don't remember if they mentioned 93 specifically, I just don't remember

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that.

MR. : Okay, now the second one, though--

MR. BELGER: The implication was, in the context of the story, the implication was United 93, but I don't remember who said that.

MR. : Okay, yeah, the implication was that 93 may have been one of the aircraft?

MR. BELGER: Right that they were, you know, kind of prepared for.

MR. : Right. Now, let me ask you about the second facet of this.

MR. BELGER: Okay.

MR. : An that is, let's forget about what NORAD told its staff to do or what press release they put out. Obviously, you had, from an FAA perspective, you had an interest in finding out what we know.

MR. BELGER: Absolutely.

MR. : What did we know and when did we know it?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Right.

MR. : And what did we do with
it?

MR. BELGER: Right.

MR. : Specifically, did we tell
the military as soon as we could after--

MR. BELGER: Right.

MR. : When you asked that
question of your folks about, walking backwards
with 93, what did they tell you that they had found
in their review of what the FAA records and--

MR. BELGER: Yeah--

MR. : --and telecons--

MR. BELGER: --right, what I was told was
that the NMCC was on the Primary Nets.

MR. : Okay told them that
the--okay, so they're telling you that the NMCC's
on the Primary Net?

MR. BELGER: Right.

MR. : So when you say the open
line there the net, you mean the Primary Net and
that the NMCC was on it?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Right.

MR. : And did they get that, was there any indication that they got that just from the log or there was an assumption, or--because we're back to--even in the aftermath, you can always assume some said--

MR. BELGER: Well, I think they're--I think, now, obviously, this is a matter of record so you should have it, but when the Operations Center calls other agencies to bring them into the net, they record that time, so there should be a recording a document that says what time the NMCC was called and added to the Primary Net right.

MR. : They log it, you're saying?

MR. BELGER: Yeah, I mean, that's what they're supposed to do.

MR. : Right.

MR. BELGER: They're supposed to--you know, I called, Secret Service was in the net at x-time; NMCC was in the net at x-time and they just kind of go down the list and call people and log

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it.

MR. : What we learned about that from the log is, obviously, we want to look at what notes they had from the day because they take handwritten notes and then later on they try to--but during the morning, we understand as the morning was unfolding getting much more hectic, they went from sort of handwriting notes to try to share a computer in the middle and log it in.

We asked for the handwritten notes, just so that you know, they apparently were never preserved or at some point were not kept. So, we're just left with, you know, the most contemporaneous format of the initial efforts, we're just left with, basically, the typewritten log that, you know, was done later in the morning, where they added the earlier information presumably that was on handwritten paper--handwritten on paper.

MR. BELGER: I don't know, I haven't seen it. But the question to ask of the FAA folks.

MR. : This is one of the--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : That's not the
handwritten--

MR. : This is the chrono that we
were given by the ADA 30 of the WALK an they have
9:20 Primary Net activated requested by Wickert.

MR. BELGER: That's the security guy,
right.

MR. : Now this one doesn't have,
who might have logged on and when?

MR. BELGER: The duty officer, I was just
telling, is supposed to be--the duty officer should
have kept, generally, it's handwritten on a kind of
a summary page, who he called--who he or she
called, and at what time they were added to the
Primary Net or put into the net. Now, the question
to the FAA folks is, does that exist?

MR. : And we were told that
nothing of the handwritten notes do. That this
was--this is the result of the log keeping efforts
of the WALK folks that day. Obviously, not as
detailed or contemporaneous as we would have liked
to have seen. But it is what it is and it's what

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they gave us.

MR. BELGER: So, the summaries I saw, I mean, more--longer summaries than that one, basically said to me, the Primary Net was established at 9:20, including NMCC, Secret Service, et cetera, et cetera.

MR. : Okay, I think I know what you're talking about, is this other document that we had.

MR. : I'm looking for my copy of it.

MR. : Let me see. Okay, this is just a document done by a woman named Tracey [ph], I don't know if you know Tracey Packman [ph].

MR. BELGER: Yes, I know who she was.

MR. : She was, I guess, on the staff at headquarters, but I don't recall what she--

MR. BELGER: She was on the staff of the Associate Administrator that was in charge of all of our regional activities. So, she was stationed in the headquarters. I mean, you know, we pulled

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in a bunch of different people to come together and try to capture some of the information, so I guess she's one of them.

MR. : This is, I don't know, we'll explore with her how much of a final or a draft product this is, because it, at times, seems to be chronological here and it says 9:20 Ops Center sets up Primary Net, including NMCC--is this the document you were--

MR. BELGER: I don't remember seeing that one, but I remember seeing something like that--actually in several chronologies.

MR. : And this is not, though in the WALK chronology, which is back to the question, I guess is if the WALK did it and set it up and this is the official WOC chronology, then--

MR. BELGER: Well, I mean, I guess, what they're saying is the Primary Net activated, they're just, I mean, the Primary Net's supposed to include all these people. Are these times? I don't know what these--I don't remember seeing this, but those look like times to me.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : Sure but this doesn't tell you--you would agree wouldn't you that it's activated and suppose to include--

MR. BELGER: No, yeah--

MR. : You'd rather see--

[Simultaneous inaudible conversation.]

MR. BELGER: Oh, absolutely, that's why I said that the ideal thing would be to have the handwritten entries that says, I called the NMCC and they're on the net. But it looks to me like that thing that Tracey did, I don't remember seeing that before, but that looks like those are times.

MR. : That's what it looks like, yeah, it does look like these are times. We'll see if we can shed any further light on it.

MR. BELGER: If that's true, then the NMCC at 9:--what time?

MR. : 9:20.

MR. BELGER: 9:20, okay, which is what I was told.

MR. : Now, so you were told that the NMCC was on the Primary Net?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Okay.

MR. : And you don't know whether or not that was from the logs or did anybody have it--was anybody able to affirm it other than it appeared in some logs that they were on?

MR. BELGER: I mean it was given to me in chronologies that were prepared--

MR. : Okay. Well, I gotta ask you the question about United 93, then?

MR. BELGER: Okay.

MR. : I imagine your folks determined the time of--approximate time of hijacking and takeover of the aircraft? Do you recall anything about that?

MR. BELGER: Yeah, I mean, I think, let me think about times for right now; 9:28 is that right?

MR. : Yeah, 9:28 it was like--so to the extent that it was a NORAD press release that indicated that they knew about it earlier wouldn't that have sort of raised a red flag for your folks at the FAA if NORAD was reporting that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they knew about United 93, was reported to them prior to 9:28--

MR. BELGER: Yeah, and I do recall seeing, yes. I recall seeing a document that was prepared--and, actually, we talked about that. There was some NORAD record that they had been notified about 93 even before we knew 93 had a problem. And so, I mean, we assumed that was just an error on NORAD's part. I mean, I can't explain why.

MR. : This is that press release that came out on 18 September. Do you recall Jeff Griffith specifically having a conversations with General Arnold at CONAR [ph], about the time line and how you guys were going to jointly put out a time line?

MR. BELGER: You mean, after 9/11?

MR. : Just after, right--in the days right after--

MR. BELGER: No, uh-uh, I don't think the FAA ever put out a time line, as I recall.

MR. : Actually, they did, they

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

put it out in August.

MR. BELGER: Oh, okay, yeah, a year later, yeah.

MR. : Yeah, and since you said that, is there a reason you didn't put out a time line in the immediate--

MR. BELGER: Well, I think we were real sensitive to what Justice was asking us to, you know, not put out anything.

MR. : To not put out anything, you're saying this is guidance from Justice?

MR. BELGER: I--I mean that's my recollection, anything, is probably not the right thing but to be very sensitive to what we were putting out.

MR. : And did they elaborate on it any further?

MR. BELGER: I can't tell, you, the lawyers would have to speak to that, but I just don't think the FAA put out a time line. Maybe we did in--maybe we did as--

MR. : Was that specifically in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

relation to being sensitive about what information the FAA releases about chronology and what they knew when and when they--

MR. BELGER: I mean, that's my recollection, yeah, yeah.

MR. : Do you remember who from the Bureau said that?

MR. BELGER: No, I have no idea.

MR. : Who brought it to your attention?

MR. BELGER: I don't know it was just general--it was just general knowledge.

MR. : It was just general knowledge that they were saying to be careful about it not, not any--you don't recall anything specific?

MR. BELGER: I don't recall anything specific.

MR. : And that was put out in public press release or in any format?

MR. BELGER: I mean, publicly--

MR. : Was anybody within

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

government or, you know, in Administration asking for or wanting the information that the FAA had so that they could see what--

MR. BELGER: Sure, sure, I mean, we gave chronologies to the Department of Transportation; we passed those on to--and, obviously, you know, if the White House or Justice if they--I don't remember specifically, but, obviously, if they'd asked we would have given them the same.

MR. : I want to go back to one of the two bases for thinking that the military was following 93.

MR. BELGER: Okay.

MR. : That the F16s were scrambled you know and over Washington and you believe they were scrambled in response to 77?

MR. BELGER: Right.

MR. : I'm having a tough time understanding that if your recollection on the day of, which is reflected in some conversations and transcripts is that 77 crashed somewhere, then why would they have been launched in response to--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Okay, very good question, let's be clear that they were launched in response to what I will call the unidentified aircraft. We didn't know at that time it was American 77. So, that's a good clarification. I mean, I remember one of the most frustrating things for me that whole day was not being able to quickly determine which aircraft hit the White House, I mean, the Pentagon.

MR. : So you said Langley was scrambled in response to the aircraft that was later determined to be 77?

MR. BELGER: Yeah, which was, at the time an unidentified--I mean, I'm just going by what NORAD said. And what, I mean, we knew they were scrambled.

MR. : In response to an unidentified aircraft that later turned out to be 77?

MR. BELGER: That would be the accurate way I would say, it yeah.

MR. : If we can separate now,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what NORAD might have said about it, I want to know your FAA review as the Deputy Administrator in the aftermath saying your folks.

MR. BELGER: Okay.

MR. : All right let's find out what we knew when and did we relay that and did that cause the scrambling and coverage of these aircraft or not. You tell me if you know something differently, but from what we've seen from the tapes and at the controller level and all that, United's--American's 77 was lost over radar in INDY Center and so far as we can see, it was lost completely, no one picked it up as a primary or otherwise--

MR. BELGER: Right.

MR. : --until someone picked up a VFR, you know six, seven, eight, I mean, Dulles TRACON as you reflected, picked up--

MR. BELGER: Yeah--

MR. : --they didn't know it to be 77, but they thought it to be a fast-approaching VFR. But from the time of the loss of that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

aircraft till Dulles' report that there's a VFR--

MR. BELGER: Right.

MR. : --we have not found a single thread that would indicate that anybody was even thought that they had 77 on their radar screens.

MR. BELGER: I think that's accurate because--

MR. : Okay.

MR. BELGER: --we thought that it had crashed.

MR. : Right, which is what you said earlier.

MR. BELGER: Right.

MR. : So, then, how could Langley have even been--identified aircraft which later turned out to be 77?

MR. BELGER: Well, a couple. Two reason, I think, I mean, I can't answer for them--

MR. : Right, but from the FAA's side.

MR. BELGER: One, they did get a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notification about the American 77 hijacking.

MR. : Who is they?

MR. BELGER: NORAD or the military NORAD. They got a notification about American 77, so we were thinking it crashed. I don't know what they were thinking.

MR. : How did they get--didn't they only get--correct me if I'm missing something--

MR. BELGER: Okay.

MR. : How did the military get independent information on 77 not being crashed but potentially being hijacked if they don't get it from the FAA--

MR. BELGER: I don't think they would have.

MR. : It would have had to have come from the FAA?

MR. BELGER: I think it would have had to come from the FAA.

MR. : Okay, well, then, in your staff's efforts to recreate after the fact, what

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information did they give you that some FAA facility did find it and did report it as hijacked to the military?

MR. BELGER: No, wait, let's back up. I mean, there was a report from the FAA to NORAD, that should be in the logs that there was a suspected hijacking of American 77.

MR. : In whose logs should it be?

MR. BELGER: It should--in NORAD's logs.

MR. : The NORAD's logs, the day of, their operation logs?

MR. BELGER: Yeah.

MR. : Who in your shop at the FAA had access to that post-9/11, the NORAD logs, did you see a copy of it?

MR. BELGER: I saw, I mean, it was in the press release.

MR. : But the logs, I'm not talking about the press release, I'm talking about the logs.

MR. BELGER: I don't know that I've seen

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

any original NORAD logs.

MR. : Well, or a photocopy of them?

MR. BELGER: I mean, or even a photo.

MR. : But this is a copy of a NORAD log or NEDS, I don't want to loosely.

MR. BELGER: So what does it say about--

MR. : Well, before I get to what it says about it, I want to ask you about, if you'd seen it before, a copy of it?

MR. BELGER: No.

MR. : You haven't, well, okay, then have you seen this summary of air traffic hijack events that your people prepared?

MR. BELGER: Yes, yeah.

MR. : Who did you understand had prepared this summary?

MR. BELGER: It was an Air Traffic.

MR. : Air Traffic folks?

MR. BELGER: Yeah.

MR. : Do you know who in Air Traffic?

MILLER REPORTING CO., INC
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: I don't have any idea, I mean, AT-20 that's the office.

MR. : Is that Cannoles?

MR. BELGER: I don't know, I don't know what job he was in at time, so--

MR. : Were you given a copy of this?

MR. BELGER: Oh, yeah, sure.

MR. : Were you briefed on it?

MR. BELGER: We discussed i that, yeah.

MR. : There's an entry here, this was on--they give a chrono on each aircraft--

MR. BELGER: Yeah.

MR. : It says 8:40 Northeast Air Defense Sector logs say that they were notified by the FAA of the events concerning 11--12:40 Zulu, possible hijack American Airlines.1

MR. BELGER: Okay.

MR. : It appears to correspond to this log, that is a NEDS log.

MR. BELGER: Okay.

MR. : So, somebody had this at

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the FAA.

MR. BELGER: Okay. Well, obviously, yeah, I assume that the Air Traffic evaluation folks went to NORAD and asked them.

MR. : Yeah, I would assume, so.

MR. BELGER: I mean, they talk to these guys every day.

MR. : Mr. [unintell.] says he put this together, but that he did not have access to the log.

MR. BELGER: To--

MR. : He thought there might have been--he thought that somebody might have distilled information out from this and given it-

MR. BELGER: I don't know who personally would have gotten the information from NORAD.

MR. : Okay. Where do you see 77?

MR. BELGER: I don't know, let me see here. Scrambled on American 11--

MR. : Otis fighters, did you know that on the day of 9/11, that the Otis

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

fighters were scrambled on 11?

MR. BELGER: Yeah, United 175 possible hijack; American Airlines, November 334AA, I don't know if that's--

MR. : That's another one.

MR. BELGER: That's another one, too. Okay. Hijack American flight something to Washington, D.C. Is that still American 11?

MR. : That's 925, that's 11, yeah, and we'd appreciate your insight on that, on your thoughts?

MR. BELGER: At 9:25?

MR. : Yeah, if you can give us your insight on that we've seen from various FAA sources that after American--

MR. BELGER: 9:25--what time did American 11--

MR. : Put aside the specific time frames, I don't want you to get caught up in that, let's look in sequences--

MR. BELGER: Okay, that's what I was trying

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : American 11 went in at 8:46; 8:46 a.m. it crashed.

MR. BELGER: Well, this couldn't have been American 11 then.

MR. : Well, we know that in hindsight.

MR. BELGER: Okay.

MR. : Because we know--we might not have known it at 9:25 on that morning, but we certainly know now as we stand here today or maybe after 9/11 that it was American 11 for sure that went in to the North Tower.

MR. BELGER: Right.

MR. : That went in at 8:46, the second crash in New York, the United 175 went in at 9:03.

MR. BELGER: Right, okay.

MR. : After that, after that those first two crashes, and there was a report throughout, through various parts of the FAA system, that there was a belief that American 11 may still be up there airborne headed South to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Washington. Which would have meant that if it was on its southerly path--

MR. BELGER: Yeah, okay--

MR. : I mean it didn't strike the Trade Centers, that it would have continued on. If it continued on, logically, it would be headed to Washington, D.C. and cause a threat to them.

MR. BELGER: I think I do remember--

MR. : But what we've seen from the NEDS Operational report--

MR. BELGER: Okay.

MR. : --the report comes in to NEDS that there's a report out of Washington that American 11 is still airborne, from the Washington Telecon, that it's still airborne and headed South to Washington. That yields the Langley scramble on the aircraft that they thought was headed to Washington that was not.

MR. BELGER: Okay.

MR. : And there are various reports of that. There are people from headquarters on 9/11 around this same time that are

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

making calls to the Command Center asking people to check on PSD, check with centers and see if American 11 is either headed South to Washington; someone else is asking the Command Center to call Cleveland and see if it's headed West--

MR. BELGER: Yeah.

MR. : --because the PSD is showing a hollow target projecting West on American 11 and I wanted to know what your recollection of that was as it came into the system on 9/11?

MR. BELGER: I mean at that level of detail and specificity, would have, I didn't have any knowledge of that at that time. I mean, all of this is happening in 45 minutes. And that level of detail, I don't think I would have known, until after--until we reconstructed it after the fact.

What did NORAD say about scrambling on 11?

MR. : I don't want to--I sort of at this juncture would rather not sort of strain your mind with other extraneous factors that other agencies might, you're having a tough enough time sort of separating what you knew on 9/11 and what

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you knew afterwards.

MR. BELGER: Yeah.

MR. : But, if you didn't know the level of detail, I understand that would encompass American 11.

MR. BELGER: Well, here's an American 77, you asked me.

MR. : Mm-hmm.

MR. BELGER: 1334, 9:34, is that--

MR. : Mm-hmm.

MR. BELGER: American 77 flight lost, unable to locate.

MR. : Right. But that, see, that dovetails with what I told you we found so far is that lost, unable to locate. And I can tell you that came from Washington Center, that information.

MR. BELGER: Okay.

MR. : To Northeast.

MR. BELGER: Okay.

MR. : that's a lot different than we lost it, we found it, we located it, it's headed to Washington, therefore, leading to the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

scramble of fighters and I track it.

Now, let's talk about when you folks learned about that in the aftermath. I guess I want to ask you two things. Before you go to the post-9/11, I want to ask you a question about American 11, if they did think it was reborn, then it would pose--it would be a loose aircraft in this instant posing a threat to some critical infrastructure, potentially in Washington, if they said, that was the report, it's headed to Washington. Understanding that you would not necessarily get that level of detail, of who's tracking, exactly what it is, I would think that it came to gain a lot of traction at headquarters on 9/11 and I would think that they might want to elevate that to an executive level of management, that there's another missile out there, so, you know, headed for potentially a target in the nation's capital.

And I'm going to be frank with you, I would be totally shocked to think that no one raised, brought it to your attention even in a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

general sense as Mr. Deputy Administrator, by the way, you know, the first one we thought crashed, we were all laboring under that assumption, we now are no longer laboring, we now think it's actually headed for the nation's capital, where, by the way, we all happen to be standing in an FAA building.

MR. BELGER: Right.

MR. : I'm not trying to be--I'm not trying to poke fun at it, but I'm trying to, like, call it for what it is and what I see that you gotta keep track of missiles that could be headed to take out human beings and buildings on that day. And I would be shocked if they didn't share that with you.

MR. BELGER: I mean, in this 45 minutes, which have now covered in over two hours, two and a half hours of talking about what I might have done in 45 minutes. I remember vividly, the discussions about American 77; the thought that it might have crashed. The fact that we might have had an unidentified VFR aircraft heading East. I don't recall. I recall, you know, discussions about

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

dozens of other aircraft that we thought might have had a problem. I don't, specifically, vividly recall talking about American 11 coming at--to Washington from the North.

MR. : Okay, you don't recall anything about that. What about in the aftermath when we didn't have the time constraints of the day of or with all the various information? What about, you know, when you have a little bit more, to have your folks look at it in hindsight and concentrate on rebuilding a chronology effort when they're not under pressure and they're focused on that assignment. Did somebody bring it to your attention after? Hey, we got, you know, we've seen these entries or logs or phone calls and tapes that people are saying they think American 11's still up there?

MR. BELGER: I'd have to go back and look at the chronologies that were given to me, but I don't recall in those, like, summary chronologies that you've shown me, that I would have seen, I don't recall that being highlighted in those logs

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

or chronologies.

MR. : Do you remember Doug Davis mentioning that American 11 was airborne?

MR. BELGER: No.

MR. : He, by the way, when he met with us, said that he was given information by someone at headquarters and pretty much went in to the ATC and announced it, that it was--

MR. BELGER: I don't know.

MR. : --which could be the way that it got, also into the system.

MR. BELGER: Yeah, I don't know.

MR. : But no one brought that to your attention afterwards?

MR. BELGER: I don't remember that, no.

MR. : What do you remember, then, about 93, you say, you remember that the basis for believing the military was following it and one of them was that the F16s were scrambled and were over Washington. That seems to be a little general as opposed to them following it. I mean, scrambled and over D.C. is a little different

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

from them either knowing where it is or being followed

MR. BELGER: No, I should, but I was making the assumption--

MR. : Okay.

MR. BELGER: --that they were in the loop, that they were in the communication net; that they were in the Primary Net and that they were hearing information on a realtime basis. And we talked about why I made these assumptions there.

MR. : I want to sort of follow up on 93 on the day of when information was--

MR. BELGER: Okay.

MR. : --do you remember getting updates on that aircraft as it was in flight?

MR. BELGER: I remember, again, I don't remember specifically. But I do remember that that was one of the four that we really had the time to kind of get some updates. The others kind of happened so--at least the first two, certainly, happened so quickly that, at least at my level we weren't getting any updates.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : So, you remember getting information on United 93, before it crashed?

MR. BELGER: Yeah.

MR. : Is it fair for me to use the phrase that, as opposed to maybe the first three, you were a little bit more ahead of the curve on that one?

MR. BELGER: Oh, absolutely, absolutely, yeah, we were.

MR. : Do you know if about at headquarters, yourself or anyone under you or Jane Garvey, checked just to make sure that the military was in the loop? Did anyone say, hey, let's make sure we're getting these updates on 93, let's make sure the military's--

MR. BELGER: I didn't do that, so I don't know if anybody else specifically did. Well, let me say though, I mean, I knew that--I mean, maybe it was an assumption, again, but it sure sounded like, from all the discussions I was having with the Air Traffic folks that they were talking to the military.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : Yeah, how did, yeah, let's step back from what the military knew, did you know if the right folks at FAA, folks that you would expect to have the need to have that information so that they could communicate it to the military, did you know that they had that on 93?

MR. BELGER: Well, I assumed that since they were part of the Primary Net and they were all hooked up down in Air Traffic.

MR. : So, you're saying the people in the ACC had the United--

MR. BELGER: Yeah, Jeff Griffith and the people that were working for him.

MR. : And you assumed that they were hooked up with the people down in Air Traffic suite?

MR. BELGER: Correct.

MR. : Did anybody in the after review of the FAA look back and confirm whether that, indeed, was happening, that there was a contact between Air Traffic and the ACC and that the information on 93 was being shared by the right

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

people at FAA? Did they-

MR. BELGER: All I can say is that the information that was given to me, the chronologies that were given to me, indicated that NMCC was on the Primary Net.

MR. : So, help me out with the summary here that we got from your AT-20 people.

MR. BELGER: Okay.

MR. : We got the notification I showed you on 11, A40, and it cites the logs.

MR. BELGER: Okay.

MR. : We've got a notification on 93 cited in the logs, I'm sorry, I'm looking at 175, the second aircraft to crash in New York. This would be the second one, here. That's the second one that struck the Trade Center, 175, Boston/L.A.

MR. BELGER: Right, okay.

MR. : They have communications between the controller and the aircraft leading up to when it was taken over.

MR. BELGER: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : Then they have personnel statements for what people observed as the aircraft was on its final stages.

MR. BELGER: Okay.

MR. : An then they have the impact time at 9:03. And then they have 9:05 and the NEDS logs indicate they were notified by the FAA of the events concerning 175. So, roughly, two minutes after the log showing that they were notified.

And this is the NEDS log and they yeah, 175 possible hijacking, so that would appear to be, somebody had access, obviously, to the NEDS logs and referred to them.

MR. BELGER: I don't doubt that, yeah.

MR. : It certainly looks like that because they're citing the NEDS log. So, we would assume that--and I know that Jeff Griffith said that somebody provided him, I think, one of the NORAD folks provided him a copy. The FAA, we the FAA had a copy.

MR. BELGER: Okay, I never say it, but,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

okay, I don't doubt that.

MR. : Now, when we get to 93, you can, you know, read the three pages or the two and a half pages yourself, but I'll represent to you that there's no notification time in here.

MR. BELGER: Right, and that doesn't surprise me.

MR. : Why, tell me why not?

MR. BELGER: Because from, and again, going back to my assumption, or my two assumptions, from this time on, from 9:00--before this time, from 9:20 on, my assumption, my belief, my--what I was told is that NMCC was on the net, so it's kind of like the three of us on this conference call we're all hearing the same thing, there's no record of me turning to you and saying, hey, I'm notifying you of what you just heard.

MR. : And that's because you're saying the FAA believed that the NMCC was on the net?

MR. BELGER: Yes, that's what I believe, that's what I was told.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : Then, I have to--why would it not, then, make sense to put in there that there was an open line, just like NORAD did on their release, as you said, why not put in that there was an open line and--

MR. BELGER: I don't know.

MR. : --that we believe notification occurred at this time?

MR. BELGER: It could have, I think--

MR. : What that is is that--an the same thing applies for 77--

MR. BELGER: In other summaries, I saw, there was an indication of the 9:20, other summaries prepared by the FAA.

MR. : I want to show you from the NEDS log that, obviously, some person in a position of responsibility at the FAA did have to work on this.

MR. BELGER: Okay.

MR. : Among other things, maybe, I don't know. But listed for the first citation of United 93, in here. That's United tail number,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that goes with 93; just so you know, one of your Boston folks gave the tail number and they wanted to know what it was, souls on-board and tail number--just sort of standard--

MR. : 93 or 175?

MR. : I'm sorry, 175. The first mention we see, and you can look at it yourself is 1407 bomb on-board UAL 93 over Pittsburgh, with a mode 3 an a lat and long. 1007.

MR. BELGER: All right.

MR. : And that is 1007. And I would pose the question to you that was this reviewed with you at all that your folks, obviously, and your staff, are relying on the log to give the notification time on 11 and 175. The leave blank, the notification times for United 93. The basis that you say you have for your belief that they did know about it, that they--the military-- knew about it was because of the open line--

MR. BELGER: Right.

MR. : --but the open line's not

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

even cited in here.

MR. BELGER: Okay.

MR. : Nothing's cited and the source that they're using, at least, for what the military says that they were told by FAA and when, mainly this NEDS log shows a 1007 was the first time that United 93 was mentioned.

MR. BELGER: Okay, but I've seen other summaries that did note the 9:20 Primary Net being established which included the NMCC. So, I mean, this, I don't know just when that was prepared, but my guess is, you could probably--my guess is every summary that was put together had some different information--added information in it.

MR. : But this is an FAA summary put together on September 17 at 6:30 in the morning, which is the day before the NORAD press release goes out to the public.

MR. BELGER: Okay.

MR. : And which, parenthetically, we are told the Administration was alerting a briefing from the FAA and the military

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

on what happened on 9/11 and what they knew when.
Did you participate in the briefing or the
Administrator Garvey do you know?

MR. BELGER: With whom?

MR. : The representatives of the
Administration.

MR. BELGER: Geeze, I don't--we had dozens
of meetings. I mean, I don't remember specifically
that--

MR. : Within the first week
after the events of 9/11, do you recall an initial
meeting where the Administration wanted to know--we
want a representative from the FAA and the
military, we want to know what happened when?

MR. BELGER: I don't remember that.

MR. : Would you have remember if
you attended?

MR. BELGER: I don't remember attending a
meeting like that.

MR. : You don't remember either
hearing about it?

MR. BELGER: I don't, I mean, like I said,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there were--I remember, just generally, that there were dozens of status briefings and meetings. I don't remember that specifically the way you described it.

MR. : This is something Shirley Miller faxed me last night. This is material that she says from the Administrator's briefing book for the Congressional hearings.

MR. BELGER: Okay.

MR. : Okay, so--I guess before we look at the material, would you agree with the assumption that I'm going to make now, and if you don't, by all means tell me.

MR. BELGER: Sure.

MR. : But I'm going to make some sort of underlying assumption here, that if the Administrator of the FAA and the highest-ranking person is going to brief Congress on what the FAA knew when and what they told the military when--I'm going to kind of assume that the FAA folks are going to do a little work--not you, but your staff's going to do a little work to try and get it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

right--

MR. BELGER: Yeah, sure.

MR. : --to find out what happened.

MR. BELGER: Absolutely.

MR. : And, certainly, to the extent that there's any indicia of an indication early on to the military, that, obviously, would reflect favorably on the performance of the FAA, one would think that would be included in the Administrative brief. Is that fair to say?

MR. BELGER: Sure, if it was known, yeah.

MR. : This is marked September 18, which, I guess, coincidentally is the same day as the NORAD press release.

MR. BELGER: Okay.

MR. : And this is United 93. This is from the briefing book.

MR. BELGER: Yeah, I remember seeing that.

MR. : You do remember this?

MR. BELGER: Right.

MR. : The Roc, 9:39 an then

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Cleveland Center notifies Pittsburgh TRACON of the unauthorized turn toward Pittsburgh, loss of transponder--

MR. BELGER: Right.

MR. : And then it just says primary target terminates. There's no time here about notification to the military. There's a note that says a specific time for FAA notification of the military is not available.

MR. BELGER: Okay.

MR. : However, FAA in the Northeast Air Defense Sector had established a line of open communication discussing American Airlines 77 and it is believed--it is believed--that UN 93 was also discussed. It doesn't sound too definitive, but there's a belief that it is.

MR. BELGER: Okay.

MR. : Tell me about if you remember this--it seems like that's an important point that it would have been discussed with regard to this specific chronology on United 93?

MR. BELGER: Well, I think it was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

discussed, and I think, again, it is my belief--it's my belief that the NMCC was on the Primary Net and United 93 was discussed on that net.

MR. : And if someone, though, were able to go confirm that in the aftermath leading--prior to this document, or up to the date of this document, 9/18, then wouldn't they have used stronger language, like review of the Primary Network?

MR. BELGER: They might have, I mean, again, these people were under enormous--I mean the person who wrote this, probably hadn't slept in a week. I think I may--if I got two hours sleep a night that week, it was extraordinary. So, I can't fault them for not being as specific as we, four years later might have thought they might have been.

MR. : It doesn't even have a notification at all, it's just a footnote sort of.

MR. BELGER: Yeah, but it's very accurate and honest. I mean there is no specific

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notification time.

MR. : It doesn't give a general one, either, it doesn't give a time frame.

MR. BELGER: I mean, again, because I've already said this 15 times, if I think they all heard it at the same time, that is what I think,

MR. : Okay, did anybody discuss the possibility that they didn't hear it? Was that brought up during the discussion with United 93?

MR. BELGER: No, an the reason being--no. The answer is, no. And, as I said earlier, I never got any indication--I never got any indication from the military that they were not aware of United 93 status.

MR. : You, personally, didn't?

MR. BELGER: I never did.

MR. : None of your folks did?

MR. BELGER: I never did--

MR. : Do you know if any--

MR. BELGER: I don't know, I mean, they never told me so how would I know? Up until the time I left, I never thought, was never told,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

nobody from the military ever said to me, and I asked Shirley this, also, and nobody ever said to here--that they wee concerned about United 93 notification. I mean, that's--

MR. : One of your Air Traffic folks had had conversations with General Arnold from CONAR an they said that notifications to the military from the FAA was, and I'm using now, quotes from, virtually verbatim from two of your people who were in Air Traffic, that it was, quote/unquote, "the topic was a hotly debated topic,"--

MR. BELGER: Between?

MR. : --hotly debated and disputed between the FAA and the military as to what each party knew when, and specifically when the FAA notified the military.

MR. BELGER: This is like, after the fact?

MR. : After the fact, that there were some heated exchanges about when the FAA actually knew stuff and when they told the military.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: I have no idea.

MR. : That was never brought to your level of attention?

MR. BELGER: No, no.

MR. : Would you expect that to be something that should have been brought to your attention?

MR. BELGER: If it wasn't resolved.

MR. : Okay.

MR. BELGER: The fact that there was heated discussion, doesn't necessarily mean they didn't come to a resolution.

MR. : It was also stated that a CONAR representative took the position that they did not have any advance notice of United 93, the fourth airplane.

MR. BELGER: Okay, like I said, that's, I haven't heard--

MR. : You never heard of that before?

MR. BELGER: I don't believe that--I might be wrong, if this is a matter of record that can be

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

checked, I don't believe that came out in any of the hearings. That DOD said that--I mean, I don't believe that came out in any press reports; I'm just saying it never came to me officially or unofficially. It certainly, I mean they had plenty of opportunity to complain if it were true, both in hearings and dozens of interviews.

MR. : Well, we haven't been able to find the Primary Net, certainly not between the hours of 8:30 and 10:30. Now, we all know at 10:30, all four crashes were over.

MR. BELGER: Right.

MR. : I haven't been able to find any recording of a Primary Net.

MR. BELGER: Yeah, I don't think it was recorded.

MR. : I can tell you, that we have a recording of what's referred to as the Tactical Net, from FAA headquarters. That they had a line called the Tactical Net.

MR. BELGER: Okay.

MR. : And we do have a part to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that, and not because it was recorded, from the Command Center, from I mean the WOC or headquarters, but we have the Herndon end of it, the Command Center at the Herndon end of the recording.

MR. BELGER: Okay, do you follow me?

MR. : Do you follow me?

MR. BELGER: They're talking to these people down her, probably.

MR. : No, what we have is, this is, we're calling it the FAA Tactical Net, is on here, the moderator, I'll show you where it first comes in.

MR. BELGER: Okay.

MR. : And we have this transcript is from the Command Center in Herndon, Virginia, from position No. 14, which is the CNY, New York Center position in Herndon.

MR. BELGER: Okay.

MR. : So, we're picking up from the Herndon end--

MR. BELGER: Well, I think that's

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

different than the Tactical Net we're talking about here. This is--that's probably Air Traffic's terminology for it.

MR. : You think this is going on down at the--

MR. BELGER: Well, let me see it, let me--generally the folks in the Command Center were talking to the Air Traffic people down in--

MR. : It says FAA's Tactical Net go ahead. Who are you trying to get in touch with? AEA--

MR. BELGER: All right, that's Security.

MR. : Pete Falcone [ph], Pete Falcone.

MR. BELGER: All right, that's security, so that's probably here.

MR. : That's here?

MR. BELGER: Yeah, that's probably here. That's what I thought, because it's Pete Falcone, moderating--

MR. : Okay, gotcha.

MR. BELGER: --that should be centered in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

here. And he asked Pete Falcone, this is Marcus Aroyo [ph], who we know is Eastern Region Security at the time.

MR. BELGER: Okay.

MR. : AEA Security, which net is this?

MR. BELGER: Okay.

MR. : This is tactical, Marcus. Now that's Peter Falcone. So, I could be wrong, but I'm, based on the protocol--I've got Pete Falcone, who should be security in the ACC telling one of his security folks at the region--

MR. BELGER: Right.

MR. : --this is the Tactical Net.

MR. BELGER: We just called it the internal FAA net,. right.

MR. : This is, we're getting from the Command Center, this transcript, this tape, in other words I have this tape because we got the Command Center at Herndon, was obviously listening--they were on the line.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Okay, all right, that's what I said before, okay, that's right. Yes, they should have been on, yeah, that facility should have been on the Tactical Net.

MR. : And I'll represent to you that, and you can look at it, but there was conversation here were there was updates about United 93.

MR. BELGER: Okay.

MR. : In fact, there's even a conversation about the fast-moving aircraft, at 9:36, roughly--fast moving VFR moving towards the White House.

MR. BELGER: Yeah, okay.

MR. : Be alert that this information is coming from Air Traffic, that's the Eastern Region reporting on the Tact net?

MR. BELGER: Okay.

MR. : Falcone copy. Falcone and his people copy. And that four, now there's four, United 99, Newark to San Francisco over Cleveland, someone says, no, United 93. It's the fourth,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

someone corrects him. This is [unintell.] passing on from [unintell.]

MR. BELGER: Okay.

MR. : He gives the information on this going forward. This is another Command Center gentleman saying from our understanding American 11 was the first to hit the World Trade Center, it was originally Boston/L.A.; he talks about 175; and then the other two flight call signs we have are United 93 and American 77. And at this point, there aren't 12, 13, 20 in the mix yet. More come later. And then they have an update on United 93, you'll see this throughout their updates on 93, so the Tact net is monitoring it. But we know the military's not on the Tact Net because that's internal FAA.

MR. BELGER: Mm-hmm.

MR. : And we see that this is at 10:14 a.m. do we have NMCC on-board, someone asks, NMCC, someone says NOCC is on; question, military Command Center? And then answer, I believe that the Maintenance Command Center that checked in in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the FAA Tact Net. You probably should get a military entity on here. We also received word from Air Force 1

MR. : This is still the Tactical Net.?

MR. BELGER: Right.

MR. : This is still the Tactical Net, I understand we should get a military entity on here.

MR. BELGER: All right. It doesn't mean they weren't on the Primary Net.

MR. : Right.

MR. : Still, this is much later than 10:15, about 30 pages ahead. This is Air Traffic Services cell at Herndon, I'd like to find out if NORAD is up on the net?

MR. BELGER: Okay, that's a military person.

MR. : FAA Tact Net, they want to know if the military's on this bridge. Air Traffic Cell, okay, this is the Command on the Air Traffic, there's no indication that--Air Traffic Services,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I'm trying to find out if NORAD is up on the bridge yet? This is the Air Traffic Control Center, I have not hear them on here. So, this is on the Tact Net again, well, past 10:15, people are asking for--

MR. BELGER: Right. Well, but, let me, if you go back to. There's a person and it looks like it was probably Falcone, running the Tactical Net. He ought to be passing whatever information comes out of this Tactical Net onto the coordinator and getting it into the Primary Net.

I mean, that's kind of his job, yes. So, he's getting a lot of, you know, kind of detailed information from the FAA facilities. He's right--he should--I assume he's right here, he should be right here. He ought to be passing whatever's relevant, whatever he's learning on to the folks on the Primary Net.

MR. : Well, what just sort of strikes me, as a reader, and a listener to this tape is the Tact Net's moderated and you can hear that, he's on it Tact Net, this is Tact Net, we got

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Herndon on--and they keep saying no at NMCC yet.

MR. BELGER: Okay, I'm not even sure if they should be on the Tact Net.

MR. : Right someone indicated to us that they probably shouldn't have been on here, but what you don't here, what's conspicuously absent, I guess, is nobody from the Tact Net side, i.e., Peter Falcone saying, hey, if you wanted NMCC, get on the Primary Net, you're on the wrong net or roughly, they're on the Primary Net. There's no indication that from his end, at least, that he's even aware that they are on any net, call it Tact call it Primary call it a Cannoles Telecon, call it the ABC telecon, he's not indicating.

MR. BELGER: I assume you will talk to him about that.

MR. : Pete? Yeah.

MR. BELGER: But see, that's the same--that Tactical Net summary, the same type of discussion was happening on the Primary Net. The coordinator's talking to--

MR. : Well, you're assuming

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that, but we haven't seen it yet.

MR. BELGER: No, I'm assuming it from 30 years in history.

MR. : Right.

MR. BELGER: Yeah.

MR. : But what we're trying to find out and it's not, I'm not passing judgment on whether or not--I'm just trying to figure out was it up.

MR. BELGER: And I'm going to try to tell you how you can tie that down factually.

MR. : Okay.

MR. BELGER: That's what I'm going to try to help you. God, almighty, I want to help. And there, this--what frustrates me about some of this discussion, quite frankly, is there are factual ways to answer your questions without relying on what people remember four years ago.

MR. : Okay, I'm going to be 100 percent, I'm going to be 100 percent straight on this, because you know what? I don't--you know what my stake in this is, Mr. Belger? I want to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

just know what the truth is and give it out to the public. That's our job to find out--

MR. BELGER: I'll tell you what I would do if I were you.

MR. : And I'll tell you what--I want you to know what my efforts were. If I've asked once, I've asked a million times of your former colleagues across the street, could you help us find the Primary Net because it's referenced in the documents and we can't find it for the love of God.

MR. BELGER: Okay.

MR. : I can't find it and tell me where I can find it. And you know what? I get this. And I get a shell game, I get, I don't know, maybe it's here; maybe it was--

[Simultaneous inaudible conversation.]

MR. : An indicia of it, even if it's not recorded, you tell me who was on it. Nobody can even give me a name of an FAA representative who was on the Primary Net that day. And I'm baffled by this.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : John, let me take over for just a second.

MR. AZZARELLO: I have talked to Shirley, I've talked to Linda Schuessler, I've talked to Shirley Miller ad nauseam about, can you at least tell me where it was conducted from or who was on it.

MR. BELGER: Hold on, let me tell you--

MR. : Wait. One level below you, here's as close as we've come--we have come to the--

MR. AZZARELLO: No, don't even, let's hear how we should get it before we say any--I don't want to pollute Mr. Belger's mind on anything what shoulda/coulda what somebody else said. I want his input on how we can find it. If he can tell us.

MR. BELGER: If I were going to try to factually zero-in on what you're asking. These are the questions I would ask. So, bear with me for a second here, I'm this is the result of ten seconds of thought, but bear with me. Here's the first think I would do. From the Washington Operations

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Center, do they have a log of when other agencies were ratchet into the Primary Net?

MR. AZZARELLO: We asked for that.

MR. BELGER: Did they say no?

MR. AZZARELLO: They say handwritten logs are non existent or they were discarded or this is the only one that exists.

MR. BELGER: Well, you know, I--I'd go ask again.

MR. AZZARELLO: And it's not--

MR. BELGER: And you're right and it wouldn't be on there, it would be on kind of their daily notes of when they call people. So, that's number one. Number two, whoever was running the Primary Net, for the Security organization, if it was Lee Longmire or if it was somebody else standing in for him, at 920, ask them who was on the Primary Net?

Ask the other agencies, you know, were you on the net with the FAA from at least 9:20 on. And by other agencies, I mean--

MR. AZZARELLO: We've asked.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: In terms of the notifications to NORAD, rather than relying on an FAA report that says, NEDS log shows nothing. I would ask specifically, is there an FAA record? In other words, when somebody in the Boston Center called NORAD, was that an FAA entry on some FAA log or can you talk to that person who made that call to tell you that he made that car.

In other words you were asking me, and rightfully so, why is the FAA just relying on what NORAD's logs show? So, I'd go back to the FAA and say, you now, who made this call to NEDS and is there some documentation within FAA. And there might already be.

MR. AZZARELLO: Here's something that Miles just reminded me it does exist on September 20, so this is a document that was produced by the FAA to us and it's called notifications to the molliter. And if you want to look at this, it's a sequence of events. This comes out on the 17th, it says the FAA summary. It doesn't say anything about 93 or 77, but it quotes the logs.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Okay, this is what I'm getting at. So you can get FAA records, not just NORAD records.

MR. AZZARELLO: Right.

MR. BELGER: Okay.

MR. AZZARELLO: And we've listened to the TRACON tapes, we've seen--

MR. BELGER: So, you're not just relying on--

MR. AZZARELLO: No--

MR. BELGER: --what you asked me before about--

MR. AZZARELLO: No.

MR. BELGER: --okay, good, that's good.

MR. AZZARELLO: And then the NORAD press release comes out a day after this.

MR. BELGER: Okay, good--

MR. AZZARELLO: Then Darlene Freeman [ph], believes that she may have been the author of this, only this looks like it's familiar language, one of these entries looks like the words she would use.

MR. BELGER: She did do some of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

summary work for us.

MR. AZZARELLO: And we were told that one of her specific assignments--we were told actually by you, was to compare what the FAA had in terms of notifications and what the military has--

MR. BELGER: That's what I said before, I wanted to know if there were discrepancies.

MR. AZZARELLO: And this is what was produced on the 20th, you have Boston TRACON called--Boston Center asking Cape TRACON to call Otis to get help on 11.

MR. BELGER: Yes, I remember that.

MR. AZZARELLO: Then at 8:38, they called directly to NEDS.

MR. BELGER: Yeah.

MR. AZZARELLO: In the interim they find out TRACON they can't just scramble without authorization, that they've already figured out that they--and we know that this is thinking outside the box, it's parallel notification. That's not protocol but they were assuming--

MR. BELGER: And my hat goes off to them.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Absolutely, and their logs, see now the NEDS log show they got the call.

MR. : And that's a direct reference, we think to this document.

MR. AZZARELLO: And we've listened to the call from both ends, we've listened to it from the ZBW end and from the NED ring.

MR. BELGER: Okay.

MR. AZZARELLO: We're tracking all tapes we got from any angle. Now, this is, we'll come back--that's just an anomaly, we'll come back to that later, but it's at 8:43. NORAD put in their press release that they FAA told them about United 175. We've looked at the controller who was on 175 at that time and he was not even aware that there was something amiss until after, 8:46, because he was tracking, he was responsible for American 11.

MR. BELGER: Yeah.

MR. AZZARELLO: So, we don't know where this came from, but your representative, Darlene Freeman, says that they believe it's related to 11, the first hijacking, but it might be the source of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the NORAD press release which says it was--see they put 8:43 in the NORAD release for FAA notification to NEDS.

MR. BELGER: Okay.

MR. AZZARELLO: From what we can see the transponder wasn't changed on 175 till 8:46, so there would have been no indicia for the Controller looking at her screen or talking to the aircraft to know there was something wrong.

MR. BELGER: Yeah, I remember that.

MR. AZZARELLO: So, clearly, whatever the source at NORAD is inaccurate.

MR. BELGER: Right.

MR. AZZARELLO: We have yet, just so you know, we have yet to track this, though the 8:43 time to what's the source of this time.

MR. BELGER: Okay.

MR. AZZARELLO: The document says New York Center asked their military liaison specialist to go get military help.

MR. BELGER: Okay.

MR. AZZARELLO: We have yet to see that in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a log, but it suggests that maybe there's some New York Center log which would have an 8:43 time when someone said, go get help.

MR. BELGER: Right. That's what I was getting at.

MR. AZZARELLO: Let's go down, it says 9:05, the NEDS log show them notified--FAA notified the military regarding 175, again, it's the NEDS log. So this would indicate that either Darlene Freeman had access to that or somebody else was giving her the information from the log. But we know it was provided to, according to a couple of folks that the FAA had access to the log.

MR. BELGER: Okay.

MR. AZZARELLO: [unintell.] was convened between 9:16 and 9:25 by the CIA; it says Washington Ops Center activates the Primary Net, which includes NMCC and [unintell.] at 9:20.

MR. BELGER: Mm-hmm.

MR. AZZARELLO: NEDS log show 9:24, FAA notifying them regarding American Airlines 77.

MR. : That's the entry where the

tail number is.

MR. AZZARELLO: This is the difficulty we have with that one, we think this is just totally wrong, because that, the NEDS log entry is at 1324 is American Airlines tail number hijacked, but that's the tail number of 11. And so, if anybody bothered to check the tail number, they would know that that's not 77, but 11.

MR. BELGER: Okay.

MR. AZZARELLO: And, in fact, we have the pull and [unintell.] in the floor where your Boston folks are reporting the tail number on American 11, as it comes across on the call--

MR. BELGER: Okay.

MR. AZZARELLO: --roughly within a minute of it being logged just saying here's the tail number on 11.

MR. BELGER: Okay. So, that's obviously an error.

MR. AZZARELLO: And it's also in connection, by the way with the belief that American 11 was flying South to Washington.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Okay.

MR. AZZARELLO: Not on notification of 77.

MR. BELGER: Okay.

MR. AZZARELLO: Then you have 9:26, FAA Net Logs. We have yet to find any net logs. Either Primary or Tactical or any other deemed net.

MR. BELGER: [reads to self] I don't know which net log that would be.

MR. AZZARELLO: Now, that says, though, that there was a discussion about possibly both New York, accidents, or New York crashes being caused by American Airlines flights. That was a belief at some point in the system, that American thought both--they thought 77, which was thought lost, and then crashed, had actually crashed--

MR. BELGER: That's right.

MR. AZZARELLO: And it says, this may be the source of the 9:24 NEDS entry on, I guess on 77. And then it says NMCC and Secret Service on the Net. I don't know which net, she's referring to, because previous sentence is Net Logs. I don't know if that's Tactical or Primary.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Well, My--I mean.

MR. : But there's no second--

MR. AZZARELLO: There's no second page--

MR. : --there's no second page
to this.

MR. AZZARELLO: --and there's not mention
even to 93 of even reliance on an open line and you
have the NORAD press release which is two days
before this, which obviously, you folks had,
because you asked them to do a comparison between
what the military was saying--

MR. BELGER: Right.

MR. AZZARELLO: --we told them when--

MR. BELGER: Right.

MR. AZZARELLO: --and when we were saying
we told them when. And there is a notification of
93, there's four asterisks, it says the FAA needs
to establish an open line communication discussing
77 and 93.

MR. BELGER: Right, that's what I was--

MR. AZZARELLO: But that's got adopted by
your folks on the 20th.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Well, you know, you're right, I mean, I can't explain why whoever wrote this didn't include that in this document.

MR. BELGER: Let me ask you this--

MR. AZZARELLO: Well, did they discuss it with you, I mean, this obviously--

MR. BELGER: No, again, my assumption all along was just what this says. And I, you know, I would have read this, I would have said, yeah, I know about 93, it was already in open continuous discussion, so there was no discrete notification. I mean, that's what I thought when I read this.

MR. : We were told that this publication by NORAD on the 18th caught FAA headquarters by surprise. Did that surprise get communicated to you and Jane?

MR. BELGER: I was surprised.

MR. : Hmm? l

MR. BELGER: I was surprised.

MR. : You were surprised?

MR. BELGER: I was surprised they put out a press release.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : Did you or Jane call General Eberhardt [ph], or did someone call their Public Affairs people and say why did you do this?

MR. BELGER: I don't remember, I don't know. Actually, I think our Public Affairs folks did talk to NORAD. Oh, yeah, I was surprised that they put out a press release.

MR. : Because frankly they got out in front of you with this.

MR. BELGER: Well, I was surprised because I thought we were kind of not going to be releasing chronologies.

MR. : Yeah, how does that dovetail with your earlier statement that DOJ was saying be careful about what you disseminate out there.

MR. BELGER: Well, that's why I was surprised. I mean, I had, I can't answer for why NORAD did it.

MR. : There are discussions between Jeff Griffith and General Arnold at Tindle Air Force Base, we have--those discussions have

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

been characterized to us as being heated at times.

MR. BELGER: Yeah, I--

MR. : And there are differences between the two agencies between who was told what when.

MR. BELGER: Okay.

MR. : Your guidance form DOJ is not to publish a time line, you're in discussions with NORAD and NORAD on the 18th, in my military terminology took the high ground, they put out their release. But what happens at the highest levels of FAA when this happens?

MR. BELGER: Well, I think we were surprised just because we didn't know it was coming. I don't think, when we went back and looked at it, I don't think that there was, if I recall right, there was nothing inconsistent in there with what we thought. So, there was no reason to get alarmed about inaccuracies in it. We were just shocked that they did it.

MR. : But this doesn't rely on cite to this notification on 93 occurring sometime

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in this open line that started at 9:--what did I say, 9:16?

MR. BELGER: I'm sorry say, again?

MR. AZZARELLO: You have asked Darlene, right. I don't want to make assumptions that--

MR. BELGER: I asked her to compare. I asked her to look at everything we had and tell me if there was a problem.

MR. AZZARELLO: And to give you--what is this, this is the FAA position on when they notified the military, it's her document?

MR. BELGER: Right.

MR. AZZARELLO: What I'm saying is what's conspicuously absent is any reference to any open line between FAA and NEDS discussing United 93.

MR. BELGER: Yeah, that's what I said, I can't--I don't know why she didn't include that in here. I don't know. What I said was, there was nothing that appeared to me to be in error with what NORAD said. That was all I said. That's what I said a minute ago.

MR. AZZARELLO: Wouldn't there have been a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

discussion with her if you decided not, that there was nothing on 93 on this, there was no citation when FAA notification on 93, which you might not say conflicts with the NORAD one, but NORAD has additional information on 93, they're saying there was an open line of communication with--

MR. BELGER: Well, I guess I inherent--I knew that, I mean, I knew that, I mean, I knew it. So, the fact that she didn't put it on the paper, didn't alarm me, I knew it.

MR. AZZARELLO: You knew it or you assumed it was occurring on this open line, that there was communication--

MR. BELGER: I knew that the net was set up, I knew they were supposed to be on it, I knew that all the briefings I got said they were on it. I'm telling you what I knew.

MR. AZZARELLO: I'm going to put myself in your shoes, now. I'm the number two guy at the FAA. I have a lot of assumptions on what should have happened on 9/11

MR. BELGER: Well, for us.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Some assumptions on what should have happened on 9/11 according to--

MR. BELGER: On what they told me, by what I was told. That the NMCC was on the net.

MR. AZZARELLO: So, somebody you're saying went back and confirmed post-9/11 and said they were on the net, the NMCC was on the net.

MR. BELGER: The briefing papers I got, like this one, says they were on the net.

MR. AZZARELLO: Well, this one doesn't say it.

MR. BELGER: Well, it says, which includes NMCC.

MR. AZZARELLO: Okay, it says that they're on the net.

MR. BELGER: Right.

MR. AZZARELLO: Did you get any confirmation that they were on the net when United 93 was discussed?

MR. BELGER: No, I did not go and say, you know, is NMCC on the net at this moment? No, I did not.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: No, if they were really, really on the net, if they stayed on the net? That they stayed on the net and they were on it when that information came across.

MR. BELGER: They can tell you were they on it all the time or not.

MR. AZZARELLO: Let me ask you a more fundamental question: You've been in FAA for 30 years, you were in it before you left. I don't need to tell you something as rudimentary as if we want to say that the military was actually aware of 93, because we had lead time on it, then we, potentially, would we not, look to the Cleveland or the people that might have been controlling within the FAA that might have been guiding the interceptors towards United 93. Wouldn't that be some indicia that the FAA could look to to see if there was any communication between the FAA and the military about tracking down a suspect missile--

MR. BELGER: Mm-hmm.

MR. AZZARELLO: --that was headed for Washington, D.C.?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Yeah.

MR. AZZARELLO: Wouldn't that be a good way to say?

MR. BELGER: Yeah.

MR. AZZARELLO: Because they can't just go find it till the FAA says, you know, here's United 93, Cleveland says it's tracking them as a primary, and now hook your folks up with Cleveland Center and they're give you a lat and long of where he's headed?

MR. BELGER: Right. And I don't think there's a record of that.

MR. AZZARELLO: No, I don't, I would imagine that would have been--was that something that was brought to your attention after 9/11? In the aftermath, that there was no indication that any FAA air traffic controllers were coordinating--

MR. BELGER: Yeah, I knew that, yeah, I mean, it was what it was, yeah.

MR. AZZARELLO: So, that's some indication, is it not, that there may have been a disconnect between the FAA and the military on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

getting an aircraft a fighter escort to go find
United 93?

MR. BELGER: Well, so what you said is
just kind of speculation, so allow me to speculate,
I mean--

MR. AZZARELLO: Okay, well, no, it's not
spec--in all fairness to the record, it's not
speculation that your people told you there was no
FAA--

MR. BELGER: Okay, so you're talking about
the absence of something.

MR. AZZARELLO: Right.

MR. BELGER: So, let me talk about the
absence of something in it, which might make a
difference for you.

MR. AZZARELLO: Okay.

MR. BELGER: You can also paint this
picture that by the time of 9:20 or I'm sorry by
the time the F16s had scrambled from Langley and I
forget what time that was, they're over the
Washington area--

MR. : 9:24 they scrambled.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: --all right, so they're over the Washington area shortly after that. They're there. The military said, they kept them there in case there were any other aircraft that they needed to respond to, at least they said that publicly. Everybody in the world, in my view, knew what was happening with United 93 at that time.

I can't show you a discrete notification, you're absolutely right, but I think the military folks at the Command Center knew; I think the military liaison folks in Air Traffic knew; I think that NMCC was on the net.

MR. AZZARELLO: But in order to coordinate a response on the military end, who was--was is it the NMCC would have asked--

MR. BELGER: The NMCC would have requested or DOD would have requested. Or, as it was reported, you know, somebody would have given an order.

MR. AZZARELLO: Well, the FAA headquarters generally has to request DOD assistance on a hijacked aircraft, right?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: In general, yes, although this was not your normal hijacking exercise.

MR. AZZARELLO: And somebody had pointed out the aircraft, we have it on our system somewhere and we--need you to go--

MR. BELGER: Right and, in fact, they--in fact they did that with another aircraft that was over the Washington area.

MR. AZZARELLO: You brought up something now that I want to address. You said that you wanted to speculate that--talked about speculation--and I want to draw a distinction between there is--it's not speculation if somebody comes and tells you, we have not found any air traffic control tapes that would indicate our controllers were vectoring military fighters toward--

MR. BELGER: Right, I new we weren't, right, yeah.

MR. AZZARELLO: And we've interviewed all the controllers at Cleveland and no one seems to recall that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: We weren't', we didn't do that.

MR. AZZARELLO: So, if it's not, if it's just that there's an absence of that is that we haven't found it, then tell us, because if it existed--

MR. BELGER: Oh, no, no, it wasn't done, I mean I don't think there was any evidence or recollection that the military was--that the FAA asked the military to do something regarding United 93. I'm not aware of that at all. No, don't think that happened.

MR. : Give me the last question.

MR. BELGER: I don't think there's any record--it didn't happen, I don't think the FAA asked the military to do anything regarding United 93.

MR. AZZARELLO: It wasn't clear to me until you just said that now. So you don't think there's any record that shows--

MR. BELGER: Oh, no, no, no, there's no record--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: --that the FAA asked the military to do anything with the plane?

MR. BELGER: Oh, no, absolutely, I don't think there's any record of that.

MR. AZZARELLO: Short of asking them to do something, is there any record that they even alerted the NMCC that they were tracking United 93 as a primarily and they thought it was hijacked with a bomb on-board?

MR. BROWN: No, there is no record I can point to. But I'm telling you, I think the NMCC was on the Primary Net.

MR. : I want to come now, John, to the specificity that we do know. There's a dais in the aviation crisis center and Lee Longmire is looking down on the 9 or 12 positions. Is that your recollection of what that room looks like?

MR. BELGER: Yeah, right.

MR. : And, variously, we've been told that Jeff Griffith and Doug Davis were here in constant communication with John White out at the Command Center in Herndon.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BROWN: Okay.

MR. : However, we agree with you that that conversation, perhaps, was taking place down there. We're not 100 percent sure.

MR. BELGER: I think they were back and forth. I think Doug and Jeff were back and forth.

MR. : Back and forth between Cannoles and up here?

MR. BELGER: Yeah.

MR. : And what we can pinpoint, then, based on what you just said, is where the hub, if you will of wherever was Doug Davis who was glued to the ear, was he down here or was he--

MR. BELGER: I thought he was down here.

MR. : You thought he was down in Cannoles.

MR. BELGER: Yeah.

MR. : Now, then we've been told that in the first row below that pick, port or starboard, is the primary operator for the Tactical Net, let me scratch that word primary, the operator or the Tactical Net and the Operator for the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Primary Net and then behind them they had recorders, we were on a computer.

MR. BELGER: Okay, correct, okay.

MR. : And then in the middle here somewhere would be Janet Right, who was in communication with the companies, if you will?

MR. BELGER: Right.

MR. : Does that square with your understanding? I know that's getting a level of management a little bit below where you--

MR. BELGER: Yeah, I know those functions existed, I didn't know what exactly, yeah.

MR. : And we are trying to identify who these two people were below that were Tactical and Primary. And you're in and out and you're management awareness. Can you help us out on that at all?

MR. BELGER: No, I can't.

MR. : Okay.

MR. AZZARELLO: We're almost finished up. I just want to make sure I clarify this because I now the military is an all encompassing term. And

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what I want to make sure is--

MR. BELGER: Well, actually that's a good point, yeah.

MR. AZZARELLO: When you said there's no record that the FAA asked for military assistance on 93, does that cover NMCC, NORAD, NEDS, the military?

MR. BELGER: Yeah, I mean, I think that's my understanding.

MR. AZZARELLO: And the same would apply with respect to, there's no specific pointing out that we could have evidence, nothing in the record that the FAA pointed to any branch of the military on United 93 and said, hey, it's out there, it's a hijack, we wanted you to know about this?

MR. BELGER: I can't, I have not been shown and I don't think you've been shown any discrete documentation ?

MR. AZZARELLO: No.

MR. BELGER: I don't

MR. AZZARELLO: And let me tell you where we're at--this is where we are at right now, is that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there's no record on a NEDS floor that it ever came in until 10:07, which you see in your log. We've listened to all the tapes and there's nothing that would indicate, and when you hear it come in on the floor at 10:07, the tape and the call comes in--

MR. BELGER: Yeah.

MR. AZZARELLO: --you hear the IB techs yelling out 93 bomb--bomb on-board.

MR. BELGER: Yeah, it had already crashed.

MR. : Yeah, that's right.

MR. AZZARELLO: So, let me, I'm not finding that, and tell me if this was in any way considered as a possibility in the aftermath of 9/11. Where we're at now, is we're believing that, based on what we see, and what we're reviewing, that there might have been assumptions by a lot of people that the military was on the line, the NMCC, that maybe they were aware of 93 but maybe, that those assumptions prove to be inaccurate and that they were unaware of it. I mean, have your folks looked at that in the aftermath of 9/11?

MR. BELGER: Not that I'm aware of--not

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that I'm aware of.

MR. AZZARELLO: Was that even discussed?

MR. BELGER: No, because there was never any indication, like I said from the military that they were not aware of United 93.

MR. AZZARELLO: So to the extent that General Arnold or one of his representatives told somebody in the FAA Air Traffic that it never reached him?

MR. BELGER: No, that was never brought to my attention. It's never on any of these logs; it's never, I don't know that you--if you've got a document, for God's sake show me and I'll--if you've got something show me. But, I mean, it never was brought to my attention that there was a notification problem with United 93.

I'll say, again, it never came up in hearings; it never came up in any press reports that I saw. I was there for a year after 9/11, it never came up.

MR. AZZARELLO: Did you call, I would feel, if I were in your shoes, and you might not

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

have felt the same. If I were in your shoes, I'd feel a little bit, if I can find the right word here, a little bit confused if not frustrated or maybe even upset, if I were told by DOJ, you know, be careful, did they say don't put out any time lines yet, did they want you to run it by them before it was put out?

MR. BELGER: No, I wasn't upset, that's kind of the normal when you're in the midst of a possible criminal investigation. The hugest criminal attack on the country in its history and it's kind of normal that you just don't have agencies go putting out stuff.

MR. AZZARELLO: When you saw the NORAD one, though, did you want to reach out to them and say, wait a minute, what's going on here? You said not to put anything out, now they've put something out.

MR. BELGER: Well, actually, I think our public affairs folks did do that. Yeah, I mean, I think they did contact NORAD and say, what's going on?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: So the reason for the DOJ, then, which I didn't know earlier was is because of the potential of criminal prosecution they didn't want to--

MR. BELGER: Yeah, I think so, I mean this was a huge, I mean the biggest criminal attack in the history of our country.

MR. : But what then, causes the FAA a year later, almost a year later to go ahead and put out a--

MR. BELGER: Well, I mean, this is--it's a year later, all this stuff was kind of in the public anyway, a year later?

MR. AZZARELLO: Did the DOJ say that was okay?

MR. BELGER: I assume they did, yeah.

MR. AZZARELLO: Do you remember?

MR. BELGER: I don't know, no one ever made.

MR. AZZARELLO: One last--

MR. BELGER: I was going to make another point, go ahead.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: This is on the transcript from the Command Center, it's from the MT analyst position, John White was seated at this line, I think.

MR. BELGER: Okay, he's the number two guy at the Command Center.

MR. AZZARELLO: Yes, Jeff Griffith at 9:18 a.m., it says [unintell.] zulu, Jeff Griffith on the line, I need to talk to Linda or John, John's right here. John gets on, hold on for Jeff.

MR. BELGER: All right.

MR. AZZARELLO: Hi, Jeff; Hi, John.

MR. BELGER: Okay.

MR. AZZARELLO: Griffith says he wants phone number where he can reach him at any time.

MR. BELGER: Mm-hmm.

MR. AZZARELLO: John gives him this number for the non-5144, says I've been calling it, it rings off the hook, nobody answers, pretty much he wants a line there. This is, whenever you see MTM, that's John White talking at the Command Center. He's giving him information on the first day of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

ground stop--

MR. BELGER: Are you sure that's always
John White?

MR. AZZARELLO: Yeah, he stays with this
phone.

MR. : He's glued.

MR. AZZARELLO: Yeah,

MR. BELGER: But you don't know if that's
the same number?

MR. AZZARELLO: No, no, he doesn't call
another number--

MR. BELGER: Okay.

MR. AZZARELLO: He says I've been calling

MR. BELGER: Okay.

MR. AZZARELLO: They haven't really
established the second aircraft that hit the tower,
okay. Jeff says, all right, and then John says
it's either American or United, we don't know
which. Okay, Jeff knows it's United 175, tell me
if you can give me it's departure and destination?
John says, it's Boston, I'll get you the
destination, what else do you need. And then he

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

tells him, Jeff, you know 175 was going to Los Angeles. You still there, John? Yeah; okay, John stays on. All right, John, stay with me; you got time for some information? Let me ask you one. Jeff wants to know about a Chicago-to-L.A. flight just to check with Chicago Center; get some awareness out to the PMCs or the traffic manager units, report any unusual circumstances direct to the Command Center, loss of ID, radio, unusual, anything.

MR. BELGER: Right, right.

MR. AZZARELLO: Okay, John says to Jeff, I have one of those for you. Go ahead. American 77, go ahead. Dulles to L.A. and he gives him the indicia that it was played level at its last top; where it was last seen; where they lost the target and that they're looking for the aircraft.

Now, they don't have a primary or anything like that. That's right before 9:26.

MR. BELGER: Okay.

MR. AZZARELLO: So, that's 9:25.

MR. BELGER: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: These are FAA transcripts we were told were produced immediately on that following weekend at the direction of somebody at a higher level, potentially at headquarters and that, specifically, they wanted to see this call because they knew John White was on it with headquarters and it was a direct link of communication to see what was going back and forth, do you recall that?

MR. BELGER: Yeah, yeah.

MR. AZZARELLO: Well, it shows, just what-- one of the things that jumps out is that it's 9:25 they had no idea where American 77 is, so that, certainly would conflict with the FAA--with NORAD saying at 9:24 they were told it was reported as a hijack. They didn't know where it was at this point at all and there was no indicia that it was hijacked.

MR. BELGER: Okay, wait a second, who--

MR. AZZARELLO: NORAD--

MR. BELGER: --no, but who in the FAA? I mean, we're talking about notification, who made that notification?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Well, we don't know?

MR. BELGER: From the facility? I mean it could very easily, I mean I could see a 10-second difference and these are in minutes, now, not seconds.

MR. AZZARELLO: Right.

MR. BELGER: I don't know who did that.

MR. AZZARELLO: The only calls coming into NEDS at that time was regarding American 11, may still be airborne headed to Washington.

MR. : But the specificity of the tail number on--

MR. BELGER: The wrong tail number?

MR. : Right it's got 11's tail number--

MR. BELGER: Okay.

MR. AZZARELLO: You think that's the source of the NORAD's confusion

MR. BELGER: Yeah, gotcha there.

MR. AZZARELLO: Okay, when did you get that? What time did you get the information, Jeff wants to know. John tells him about 10 minutes ago

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

on losing 77.

MR. BELGER: So, about 9:15.

MR. AZZARELLO: And it's 9:26, Jeff says, we're talking about that right now, just got a Cannoles correction, just make sure we get this information out to all the Centers, report any unusual transmissions.

MR. BELGER: Yeah, yeah.

MR. AZZARELLO: Now, I want to go forward to 9:34. This is now Doug, sitting in for Jeff Griffith. It says, Doug, we just had another report, United 93 it was in Cleveland Center's airspace somewhere around [unintell.] just reported they heard screaming on the frequency and that people have a bomb on-board the aircraft.

MR. BELGER: Mm-hmm.

MR. AZZARELLO: Departed Newark en route to San Francisco was the report. This goes on from 9:34 a.m. to past the time it crashes.

MR. BELGER: Right.

MR. AZZARELLO: So, it does sort of comport with your statement that the FAA was out in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

front on this one, in the sense that--

MR. BELGER: Right.

MR. AZZARELLO: --29 minutes before it crashes.

MR. BELGER: Right.

MR. AZZARELLO: So, we now know that this is at--this is being discussed from Command Center and at headquarters by Doug Davis?

MR. BELGER: Mm-hmm.

MR. AZZARELLO: And Jeff Griffith?

MR. BELGER: Mm-hmm.

MR. AZZARELLO: Doug's recollection is, he passed this information to one of three or four people, either Jeff Griffith, who was standing by him much of this time--

MR. BELGER: Mm-hmm.

MR. AZZARELLO: Peter [unintell.], Steve Brown, or Shirley Miller.

MR. BELGER: Mm-hmm.

MR. AZZARELLO: So, that if he's glued to the phones, then the decision makers can do whatever they feel necessary. This goes from a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

plane crashed into the Pentagon is reported at 9:41, just three minutes after impact.

MR. BELGER: Right.

MR. AZZARELLO: Doug, yes? This is John giving information, United 93, we spoke about him before? 9:41, yeah, John. He's reversing his course over Akron, they just lost his transponder, he's headed east-bound. What kind of airplane, do we know yet? 757. Okay, he's descending, John says correct, John says, you heard that somebody crashed into the Pentagon; yeah, that sounds [unintell.] that is, these are reference to diverting international in-bound aircraft. Now, John, hang on, please make sure someone is on this line at all times. John, keeps saying are you there? I'm here. Put in a national ground stop, all airports, everything on the ground, Doug says, from headquarters. We've already done that, John White says, who told you to do it? We did it on our own. Okay, don't take any action like that on your own, this whole thing needs to be coordinated.

It's Doug's recollection that Jeff told

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

him to pass that on, being his superior and that Doug wouldn't have given that kind of admonishment for making that order.

MR. BELGER: Thank God they did.

MR. AZZARELLO: United 93,

[Simultaneous inaudible conversation.]

MR. AZZARELLO: Okay, United 93, Doug says go ahead. It's 29 miles out--29 minutes out of Washington, D.C.--29 minutes out of Washington, D.C., and tracking towards us. The one on reverse course out of Ohio. Doug tells him go ahead. John says, Command Center, that's all I have. All right, please keep someone on this line. At any time, Doug, tells John, right.

Now, it goes forward and it's tracked. 9:48, he's headed toward the Washington area, he was at flight level 350, he turned around at Akron, Ohio, and is tracking towards the Washington area. Doug tells John, stay on the line. Type aircraft? He wants to know again. John gives him Boeing 757, are you there, John? Yeah, I'm here. They're pulling Jeff away to talk about United 93. So,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Jeff Griffith is obviously there at the time as Doug's getting this information. Do we want to think about scrambling aircraft, John says, from the Command Center? Doug says, oh, God, I don't know. John says, that's a decision somebody's going to have to make probably in the next 10 minutes. Now, it's 9:59, roughly 14 minutes before impact.

Doug says, you know, everybody just left the room--unintelligible then, after that. This is an FAA transcript that came out [unintell.] yeah, it's an FAA-provide one.

Now, let me just ask you, if everybody just left the room as they're discussing this and pulling Jeff away to talk about United 93 and somebody decided whether to scramble or not on it. Would that have been occurring--would everybody have left the room as if--what room do you think they're talking about? Do you think they're back in Air Traffic, it would be unlikely that everyone left the--

MR. BELGER: Oh, yeah, yeah, they're down

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

here.

MR. AZZARELLO: They're down there in the suite? Then it says, Doug, I have another one. Go ahead, United 9--United Doug says 1989 Cleveland to Boston has a confirmed hijack in northern Ohio. That's the one that's, I don't know I'm sure you learned in the aftermath that at first it was a hijack, then it was--

MR. BELGER: There were a lot of those.

MR. AZZARELLO: --but at this point this is the only other one that's entering the system as a potential at this time, other than United 93 and the fact that 77's lost--

MR. BELGER: At least the only one that they're talking about.

MR. AZZARELLO: That they're talking about?

MR. BELGER: Yeah, there might have been others that--

MR. AZZARELLO: Well, that we have seen, I mean, there might have been, but we don't see them, filtering into the Command Center yet?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Right.

MR. AZZARELLO: Or into headquarters?

MR. BELGER: Right, and right, or it might have been, yeah, you're right.

MR. AZZARELLO: And then they talk about a call sign for a different aircraft from JFK; they're talking about Cleveland and Los Angeles, that would have been--I don't know what flight that is, turning around and going to Boston; that's the Delta I think; they decide that's--what's his call sign? That's a Delta, I told you. Okay.

John, now at 9:53, Doug says to John, to John White, Peter's talking and he thinks that's Peter Challin [ph] talking to Monte now about scrambling--

MR. BELGER: Mm-hmm.

MR. AZZARELLO: --which he said would have been you, at 9:53. Do you remember having a conversation--that's roughly 10 minutes before 93 crashed.

MR. BELGER: No--

MR. AZZARELLO: Do you remember having a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

conversation with--

MR. BELGER: --I don't remember talking with Peter Challin till much later in the morning about anything.

MR. AZZARELLO: Doug, I was just advised that we are scrambling in the Washington and New York area. This is John White telling Doug that he was just advised--

MR. BELGER: Right, a minute later.

MR. AZZARELLO: --that they were--we are scrambling in the Washington and New York Area.

MR. BELGER: Yep.

MR. AZZARELLO: John White tells him that's what I've been told.

MR. BELGER: Okay.

MR. AZZARELLO: He says okay, and then they get an update on the Delta 1989, he's not a trick flight, he's returning to Cleveland, so that's out of the picture, pretty quickly.

MR. BELGER: Do you know what that means, a trick flight?

MR. AZZARELLO: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Okay.

MR. AZZARELLO: 7500 will be the overt way and [unintell.] and covert way. We don't have a position any longer on United 93, John tells Doug at 9:56, roughly.

MR. BELGER: Okay.

MR. AZZARELLO: He did pass over Pittsburgh the last time we saw him. United N3, 20 miles Northwest of Johnstown on Primary. That's a report from another aircraft, somebody got a visual on him. Then they're asking about a Continental, whether anything's known about a Continental 321, no update on that.

And then I don't think there's any other discussion on 93, other than when they hear that it's crashed. Oh, I'm sorry, no, just a second, the United 93 was spotted by a VFR at 8,000 feet 11 miles south of Indianhead, just north of Cumberland, Maryland.

MR. BELGER: Mm-hmm. You know, right, yeah, okay, I'm with you.

MR. AZZARELLO: And United 93 was waiving

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

his wings, he went past the VFR, I don't quite know what that means, he's rocking his wings. Then you have to track it down, it's reported--

So the scramble was 53 you were talking about it. John White reports that somebody, I guess down at the Command Center--we are advised that--we are scrambling in Washington--

MR. BELGER: Right, so that goes to my belief, I can't give you a document that proves this, but the military knew what was going on with--

MR. AZZARELLO: Well, they were already scrambled to that--to the Washington area for reasons other than 93?

MR. BELGER: Right.

MR. AZZARELLO: And there's no other indication at NEDS that they ever were--

MR. BELGER: Yeah, this is way above my pay grade; way above my pay grade, but I'm sure you all know of media reports where somebody in the Administration was going to give a shoot-down order.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Mm-hmm.

MR. BELGER: Well, they had to know what was going on to even think about that.

MR. AZZARELLO: To give a shoot-down order on what? On a particular aircraft? On 93? You have to know about it to give a shoot-down order, okay?

MR. BELGER: I don't know what they knew but--let me--

MR. AZZARELLO: Let me ask the question--

MR. : No, let's go back to Dana's question for a moment, was shoot-down or the authority to engage a rogue aircraft discussed on the SVTS when you were on the SVTS?

MR. BELGER: No.

MR. : Okay.

MR. BELGER: I don't remember that being discussed.

MR. : And in particular--

MR. BELGER: I can't say it wasn't, but I don't remember that.

MR. : Particularly in reference

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to 93?

MR. BELGER: I don't remember that.

MR. AZZARELLO: Understanding that an order to shoot down a commercial aircraft, I understand would be above all of our pay grades, yours, even though you are the number two guy at FAA, I don't expect you would make that call.

MR. BELGER: No.

MR. AZZARELLO: Obviously, somebody else had to make that call. But you'd have to know about it to put an order specifically to take it down. We don't see any indication at NEDS was aware of it to pass an order to a pilot to take it down. Is that an issue that you thought about post-9/11 in the weeks and months that followed that that, you know, the fact that, wow, how could, you know, maybe--how could they be saying that maybe they were in a position to take it down and maybe they didn't even know--

MR. BELGER: No, I didn't think about it, because I'll go back to what I said before. I had no indication, after 9/11 and before I retired, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

had no indication that there was a notification problem with United 93. I mean, I didn't, all of this is new to me that NEDS is saying they weren't notified of United 93.

MR. AZZARELLO: Somebody at CONAR in the immediate after the week and the days that followed 9/11, told one of your higher ranking FAA folks that we never got any advance notice on that.

MR. : What did--

MR. AZZARELLO: Somebody in CONAR, it was either General Arnold or one of his representatives.

MR. BELGER: Okay.

MR. AZZARELLO: Either General Arnold or one of his representatives told one of your Air Traffic folks, pretty high up in the food chain that was working on these notifications back and forth and conversing with him back and forth that--

MR. BELGER: Well, I mean--

MR. AZZARELLO: Well, he told Jeff Griffith.

MR. BELGER: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: He told Jeff Griffith
that--

MR. BELGER: I didn't know that.

MR. AZZARELLO: --we didn't get any heads
up on 93.

MR. : This is part of that
heated discussion that--

MR. AZZARELLO: This is part of that
heated debate.

MR. BELGER: That reminds me of what I was
going to say--okay let me go--okay, this is another
piece to consider. Prior to 9/11, on this primary
hijacking net, it was the NMCC that was the
military point of contact.

MR. AZZARELLO: What, according to their
protocol?

MR. BELGER: Right, it wasn't NORAD. It
was NMCC.

MR. AZZARELLO: Right.

MR. BELGER: And of course, we relied on
NMCC to do whatever they needed to do--

MR. AZZARELLO: Absolutely.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: --within DOD. So, I'm not saying that NORAD was on this Primary Net.

MR. : Understand.

MR. BELGER: Okay.

MR. : You're saying that NMCC was on the--

MR. BELGER: That's what I believe, yes.

MR. : We're still working that out.

MR. AZZARELLO: And I want to be clear about this, too, just so we know what may have been shared with you or not shared with you. To the extent that General Arnold or his representative told Jeff Griffith and potentially others that were working for Jeff that the military had no advances notice on 93, that was something that was either intentionally or unintentionally not give to you, not shared with you. It was either intentionally or unintentionally not shared with you.

MR. BELGER: It was not shared with me.

MR. AZZARELLO: Now, I'm going to ask you: I'm the number two guy, I'm you.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Yeah.

MR. AZZARELLO: I would be pretty ticked off if my folks didn't share that with me, because you're asking, you've given a specific task to Darlene Freeman, I want to know about distinctions, between what the military says we told them and what we think we told them when. That's certainly a distinction. That's a big difference. That's the military saying, you guys might have been tracking this for a while, but we had zero heads up on that.

And the FAA believing, having an assumption based on a belief that there was some log or some record that indicated the NMCC was on a Primary Net that they did tell it to them or that they heard it. That's big, that's not little, I mean, we're all, you know. Come on, you know, we're talking about the fourth aircraft to be a missile to take out American lives that day when, I'm not talking about the first one where we were caught, really off guard. We're talking now an hour and 18, 17 minutes later between impacts.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And we were out in front of it and your folks are saying that we're talking to that what stands out in their mind on 93 is we weren't behind the curve on that one. And that's a phrase that you and others have adopted, if they were ahead of the curve.

That's a pretty big issue for the Deputy Administrator or for that matter the Administrator, to never have discussed and I'm only left with, we as the Commission Staff representatives, are left with the impression that it was either hid from you, I have to accept you at your word that you didn't know about it.

MR. BELGER: No.

MR. AZZARELLO: So, then, should I draw the conclusion that to the extent that other folks are telling us that they discussed it, that they hid it from you and what if they tell us they did share it then it's just a difference in recollection if they say that that was shared--

MR. BELGER: Well, if somebody says they shared that type of information, I'd like for you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to tell me so it would help me. Did they?

MR. AZZARELLO: There is no indication that it was--it was apparently an issue that was discussed widely within the FAA, they seemed not to think that it was a secret that there was some discrepancy. There was a couple of folks that said it was in AAT-20, too, the folks that were from Accident Investigations were looking at it and they said, well, it was a topic of hot debate. What we knew when, particularly on the last aircraft.

MR. BELGER: But did it ultimately get resolved? That's kind of where I--

MR. AZZARELLO: Not that we understand that there was agreement on it, no. They didn't come to an agreement on it, our understanding is they didn't say you're right or we're right.

MR. BELGER: Yeah, but how can you say--

MR. AZZARELLO: Here's what we're left with.

MR. BELGER: The NORAD release gives no indication that there was a problem with notification, none, zero, at all.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: They're not holding that belief today as we sit here.

MR. : No, but they're fighting their own, they go out with this on the basis they do--

MR. BELGER: But I can't, you know, I only know what I knew. And there was NORAD was saying, you know, we were in continuous discussion about United 93. That's what they said.

MR. AZZARELLO: But prior to that coming out is when your folks in Air Traffic and Accidents Investigations was working on a time line, conversing with NORAD, looking at their logs and, you know, all it takes is a cursory look at the log to show that the first time that they mentioned 93 is 10:07. so, you know, there's a potential discrepancy right there. And they took the position that we didn't know about it.

MR. BELGER: Yeah, hang on. There's a real difference in a discrete log entry and a continuous discussion.

MR. AZZARELLO: That's not on your plate.1

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : That's not on your plate, I'm not asking you that, that's their issue.

MR. : That's their issue to work with.

MR. AZZARELLO: That's something they have to explain and, believe me, we've discussed that issue at length. But what I'm telling you is that your folks say that prior to this coming out, it may be part of the reason why they were taking a little bit of shock when this came out was that your folks position was, that they had some disagreement, they thought maybe that they did tell them about it and that NORAD, the military was saying through CONAR, we had no heads up on that.

MR. BELGER: No, I never heard that. I never heard that there was a disagreement with what was in that press release.

MR. AZZARELLO: So, when Darlene Freeman did that one-page notifications to the military for you that was supposed to address any discrepancies, she never brought it to your attention that we can assume.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: It's not--

MR. : This is two days after
that.

MR. BELGER: It's not that she never
brought the United--she never brought what General
Arnold apparently said to--

MR. AZZARELLO: Right, that's correct.

MR. : That's correct, and this
mysteriously to our point of view, and I think you
might agree with it [unintell.] as if there should
have been a second page--

MR. BELGER: Yeah, I can't respond, I
can't answer that.

MR. AZZARELLO: And what it does do,
though, is it omits any adopting of the language of
an open line discussing these flights.

MR. BELGER: No, no. Activates a Primary
Net.

MR. AZZARELLO: No, this line where it
says an open line of communication discussing this.

MR. BELGER: I think that's the same
thing.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Activating it is the same as discussing specific flight numbers?

MR. BELGER: No, I'm saying, actually it's open. I mean, it's like you and I get on the net and we're all hearing the same thing at the same time.

MR. AZZARELLO: Let's--she's got this with her.

MR. BELGER: Okay.

MR. AZZARELLO: And she's asked to see if there's any discrepancies between this and what the FAA says they told the military?

MR. BELGER: Gotcha.

MR. AZZARELLO: She knows that they're saying there was an open line discussing specifically these two flights?

MR. BELGER: Yes.

MR. AZZARELLO: This document in specific you asked her for notifications to the military--

MR. BELGER: That's right.

MR. AZZARELLO: --on each of the four flights.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: Okay.

MR. AZZARELLO: It gives it on 11?

MR. BELGER: Yes.

MR. AZZARELLO: It gives the source for--

MR. BELGER: Right.

MR. AZZARELLO: --it says the logs show
notifying of 77--

MR. BELGER: Right.

MR. AZZARELLO: --the log shows, it
doesn't refer to the open line.

MR. BELGER: Right.

MR. AZZARELLO: And it doesn't say
anything about United 93.

MR. BELGER: Right.

MR. AZZARELLO: That is different from
adopting or that this--

MR. BELGER: I mean, if she had written
down here, I don't know why she didn't. If she had
written in here at 9:20, this means that there was
a continuous discussion about United 93.

MR. LEWIS[?]: Then here's the problem
with that, 93 is not in distress at that point in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

time.

MR. BELGER: I know, this is even before.
Before.

MR. LEWIS: Yeah, if you start that--

MR. BELGER: This is before, so they were
on the Net when there was the first report of
distress.

MR. LEWIS: I seriously, I mean, he's
seriously not sure--

MR. AZZARELLO: I'll tell you what.

MR. LEWIS: There's a supposed elephant
standing here in the middle of this room. I don't
understand how it is that you think that there is a
problem in the [unintell.] discussion is on.

MR. AZZARELLO: No, no, time-out right
now. We have both sides of this in our brains and
we're working to a common--because we have both
sides of it in our brains and I don't think that
it's fair that you object at this point in time
with what you just said. You've only got one side
of it, we've got both sides in our brain.

MR. LEWIS: Well, you know, tell the man

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

who it is saying there's a problem.

MR. BELGER: Help me recollect.

MR. AZZARELLO: I told you that, I took the position--how much [unintell.]

MR. LEWIS: Somebody at CONAR.

MR. AZZARELLO: No, General Arnold or his representative, if you'd taken notes, that's what I said; General Arnold or his representative--

MR. LEWIS: Has formally told you that the--

MR. AZZARELLO: --formally advised the FAA--

MR. LEWIS: --they had no idea that 93--

MR. : --they had no advance notice on United 93.

MR. AZZARELLO: I'll repeat it again and we were told by an FAA, Jeff Griffith, that General Arnold or his representative one or the other told him we had no advance notice on United 93. Can I be any clearer than that?

MR. LEWIS: How could they possibly be discussing shooting it down, if that were the case?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Well, I'll tell you what, you ask the White House and then get back to us with an answer, okay?

MR. : That's the third piece we have in our brain.

MR. AZZARELLO: You ask the White House and then bring me an answer on that.

MR. BELGER: I'll ask you--

MR. LEWIS: Do you have an answer that relates to this?

MR. AZZARELLO: All right let me ask you the obvious question, obviously a difficult question, now that we're at this point. Did somebody at a pay grade above you, as in, somebody in the Administration, suggest that to the extent that there was any disputes between the FAA and the military on notification times for any of the four hijacked aircraft, that they would resolve that dispute?

MR. BELGER: No.

MR. AZZARELLO: Okay, are you aware of whether anybody arbitrated any dispute on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notification times other than the FAA and the military?

MR. BELGER: No.

MR. AZZARELLO: Other than the FAA and NORAD?

MR. BELGER: No.

MR. AZZARELLO: No one?

MR. BELGER: No.

MR. AZZARELLO: So, are you aware of, even that there was a dispute on United 93?

MR. BELGER: No.

MR. AZZARELLO: Are you aware if there's a dispute on any notification times on any of the four aircraft?

MR. BELGER: No.

MR. AZZARELLO: And that's why I think it is difficult, with all due respect Brook, when you do jump in because you haven't gone through the hundreds of tapes; the hundreds of logs; the hundreds documents from both sides, from the military and from the FAA. And with all due respect, when we're done, you can look at this

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

later and see that all I'm left with is I was told that Mr. Belger asked one of his special assistants to give him specific notification times on each of the flights. And there's nothing here that references United 93 in any shape, manner or form, that could be arguably, say, notification--

MR. LEWIS: I understand if you tell us, but you can build back to it by saying they were on the line--

MR. AZZARELLO: You can't build back to it from this document. This was the document that was the notification.

MR. BELGER: There are a bunch of documents, that's another one which--

MR. LEWIS: [unintell.] That piece of paper is not something that argues a position, it just gives--

MR. : He's about to help us out here, go ahead.

MR. BELGER: I mean, I remember seeing this, I think. But there's another document which I used kind of as my continuous reference point and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it was like a matrix, the four aircraft with five or six times and under United 93, notification, I think it said, that it was not applicable or something like that.

MR. : Is it this matrix where they put all four of them together in the back?

MR. BELGER: No, no, no, no, this was a one-pager.

MR. : Oh, it was a one-pager.

MR. BELGER: It had the four aircraft up top; it had four five or six entries, vertically and for notification it had times for the four notifications.

MR. : I don't think I've see that.

MR. BELGER: For United 93, it said, N/A, which is Not Applicable. This was the document that I used, it was one that Darlene prepared. It's the one that I kind of used. We went through a bunch of iterations, I think, it's kind of the one I used as the--not kinda, it is the one I used as the--I'm sure she--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Did you know that--not our team, but Team 7 interviewed Lee Longmire? He said it was standard procedure to put the military in the communications link as soon as possible so that they could monitor the aircraft?

MR. BELGER: Yes, that's what I said.

MR. AZZARELLO: The link up from the FAA Command Center was supposed to be with the National Military Command Center. It was his expectation that the NMCC and the FBI should have been included in the link--

MR. BELGER: Right.

MR. AZZARELLO: --as soon as there was a crisis center set up.

MR. BELGER: That's what I said, yeah.

MR. AZZARELLO: He later learned that this didn't occur, but he wasn't sure when the situation was rectified.

MR. BELGER: I think it was 9:20 when it was rectified.

MR. AZZARELLO: It appears from the context of his interview that he was talking about,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

after, later that morning as the events were well into the progression of the attacks, not 9:20.

MR. BELGER: Well, the Primary Net should have rectified it, that's --

MR. AZZARELLO: What I'm saying is it's his belief that it wasn't but perhaps it was later than that.

MR. BELGER: I believe it was at 9:20.

MR. AZZARELLO: You don't think that's it? That's all I have, we generally have asked--

MR. BELGER: Yeah--

MR. AZZARELLO: --and I certainly think that someone in your position and experience at the FAA should be asked if they have any recommendations, that they would make--

MR. BELGER: Yeah, I do, yeah I do. Yeah, when I met with the group for the first time, I gave you some security type recommendations.

MR. AZZARELLO: Yeah.

MR. BELGER: The single biggest recommendation I have--I hope you guys focus on this is, it's along the lines of making sure that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

we're--we, the country, are prepared if this should happen again.

So, let me just--I said this a few minutes ago, but you got a brand-new organization with TSA in the loop now. And the TSA Administrator has assumed the responsibilities that used to be the FAA Administrator's for managing a hijack incident. I don't think that legislation's been changed. I mean, it was changed to give it to the TSA, I don't think it was changed since then.

So, I just have this gut feeling that the procedures between the military, NORAD, specifically, FBI, and TSA and FAA in their lesser role now, haven't been exercised enough. I hope I'm wrong. But I mean, one of your recommendations ought to be a clear set of MOUs between those key people. Some periodically well-funded, well-thought-out exercises because in today's world, prior to 9/11, I mean, NORAD's got an, obviously, a much bigger role, FAA's got a lesser role; FBI's probably got a lesser role. And it's now really TSA and NORAD.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : The modern, to make a short--it was FAA and NORAD before, and now it's TSA and NORAD?

MR. BELGER: Yeah, well, actually--

MR. : But FAA still has a vested interest in it, it's--

MR. BELGER: Oh, absolutely, they're still in the game. Actually it was even FAA and FCC.

MR. : I'm sorry, NMCC, right.

MR. BELGER: Which was in the old and now it's NORAD to the forefront and TSA to the forefront.

MR. : Right, okay, got it.

MR. BELGER: And that's best--

MR. : And was it--in your estimation was it a mistake to transfer those authorities?

MR. BELGER: Oh, no, I don't think so, I mean, once you set up the TSA organization, I think that responsibility to manage the incident kind of goes on with the territory. so, no, I don't think it was--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : Should it have been something that you think should have stayed where it was?

MR. BELGER: Should, I mean, should TSA not have been established.

MR. : It should not have been transferred, that authority to them.

MR. BELGER: Oh, no, well, once you established TSA, then I think that authority has to be transferred.

MR. : Well, I guess then the question would be do you think that maybe it shouldn't have been established and it could have stayed within the FAA or somewhere else, other than--

MR. BELGER: I don't have a thing on that.

MR. AZZARELLO: I guess I would be remiss to ask you one other question.

MR. BELGER: Sure.

MR. AZZARELLO: Follow it up on where we ended?

MR. BELGER: Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Did it ever come to either your attention or, to your knowledge, anyone else in the FAA after 9/11, did they ever begin to believe that maybe the military couldn't have been in a position to take out 93 based on their knowledge but were reluctant to raise that because someone at a higher pay grade had said that they were in a position to take it down?

MR. BELGER: Well, I'm not sure I follow you. I mean.

MR. AZZARELLO: Did you ever, I mean, in your chronology review, in your after-action, you know pulling together the events, did any information come to your attention that would create the impression that, jeeze, you what? Maybe the military did know about 93 like we did and maybe they weren't in position to take down 93 and then decided that there really wasn't much they could say or do?

MR. BELGER: Well, I think that in one of the congressional testimonies, the NORAD spokesperson, I don't remember who it was. This

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was one of the hearings that I think the Administrator was--or maybe even before you guys, maybe it was even the 9/11 early on.

MR. AZZARELLO: The joint inquiry?

MR. BELGER: Hmm?

MR. AZZARELLO: The joint inquiry before the 9/11 congressional inquiries?

MR. BELGER: It could have been or it could have been one of your early hearings where I think the Administrator was on with some NORAD folks.

MR. : Well, we had a hearing in--

MR. : In May of '93?

MR. BELGER: I don't remember the forum, but whoever the NORAD representative was said very clearly, we couldn't have done anything if we were notified.

MR. : On 93?

MR. BELGER: On 93.

MR. AZZARELLO: I don't know if it was said in Congress, but I know at our May hearing in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

2003, one of the NORAD representatives gave an indication that, you know, even if we had gotten in position about how to having to shoot down targets--take it down--

MR. BELGER: Right, that's what I'm saying, I mean, they weren't, I don't mean this critically, he said it, I mean he said it, but they weren't prepared to follow-through with that, so, that's been said publicly, I think.

MR. : It was said at that hearing, right?

MR. : That's what Arnold said.

MR. AZZARELLO: What about, they also said at that hearing, though, that they knew about United 93 at 9:16, correct, they said 9:16. And that's 12 minutes before it was even hijacked.

MR. BELGER: Well, I can't answer that.

MR. : That may be our signal, John.

MR. : That's it.

MR. : Sir, thank you so much.

MR. BELGER: Well, I hope I helped.

SWORN INTERVIEW OF

JANE GARVEY

BY

SAM BRINKLEY, 9/11 Commission

JOHN RAIDT, 9/11 Commission

BILL JOHNSTONE, 9/11 Commission

LISA SULLIVAN, 9/11 Commission

Wednesday, June 30, 2004

[TRANSCRIPT PREPARED FROM A TAPE RECORDING.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I N T E R V I E W

MR. AZZARELLO: Wednesday, June 30, we're at GSA about to begin an interview with Jane Garvey. I'm John Azzarello, Team 8, 911/Commission.

MR. KARA: Miles Kara, 911/Commission.

MR. LEWIS: Brooke Lewis, FAA, Counsel's office.

MS. GARVEY: Jane Garvey, former FAA Administrator, 1997 to 2002.

MR. AZZARELLO: Thanks for taking the time to meet with us again at the Commission. We actually just wanted to follow-up in some specific areas with you, given we're at the point now where we're pretty much wrapping up our investigation and producing a final report. We know that you've met with Team 7 on at least one or more occasions. And we've had the opportunity to review the memorandum that they produced as a result of your interview, so we have some specific follow-ups from there. Adn then there may be one or two areas, mostly focused on the day of 9/11 and what you did and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

what you observed while at FAA headquarters on 9/11, that Team 7 may not have addressed because it wasn't their particularity.

MS. GARVEY: Right.

MR. AZZARELLO: So, if we can just sort of go over those few areas, then we'll be finished. So, if I could just sort of go right into the day of September 11 and see if I understand a sense of where you were, I guess when the first crash occurred.

It's my understanding from reading your interview with Team 7, that you were with Secretary Mineta at a meeting?

MS. GARVEY: That's correct, we were meeting with one of the commissioner's from the European Union. We were preparing for a conference that was going to be held in Montreal, an ARCAO [ph] conference that was going to be held in the middle of September. We were in very different points with the Europeans over environmental issues and the goal for the meeting for the Secretary and myself was to try to find some compromise, try to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

find some common ground with the Europeans over environmental issues.

And it was held in the Secretary's main conference room at the DOT building, 10th floor.

MR. AZZARELLO: Do you remember when that meeting was scheduled to start, when it did start?

MS. GARVEY: I think it started about, I would say, about 8:00 in the morning, because it was also a breakfast meeting, so we were--we had been served breakfast and were beginning the discussion in earnest at that point.

MR. AZZARELLO: We have some data points in terms of what was the earliest recognition or knowledge by anyone at FAA headquarters that there may have been a hijacking in the system reference American 11. And we determined that that earliest time is roughly in the 8:20 to 8:30 range. Within that 10-minute period of time. Within that 10-minute Boston Center had recognition based on overhearing some transmissions from the cockpit of American 11 that they most likely had a hijacking.

They, then, engaged in their process of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notification, which included multiple pages being sent, apparently, throughout the chain of command, through the region up to headquarters. And we believe that at headquarters, Dave Cannoles, may have received a page in that 8:20/8:30 time frame, alerting him that there may be a hijacking in the system reference American 11.

And I guess what we'd like to know from you is did any of that information come to you in the form of an urgent phone call or message to you at the meeting that you were at, prior to the first crash at the Trade Center?

MS. GARVEY: It did not, which is not unusual. We had--since I've been at the FAA there have been , you know, many, I don't want to say many, but certainly several potential hijackings . Thank God those turned out not to be the case, but it was normal for the operations folks to gain information to try to get a little bit more information, figure out if they were dealing with a real situation or something that may not have been real. So, I did not receive that early

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

notification.

MR. AZZARELLO: What was the first knowledge or information that you had the morning of September 11 that there was something amiss in the national airspace system with regard to any aircraft?

MS. GARVEY: John Flaherty, the Chief of Staff opened the door to the meeting. He was coming from the Secretary's office into the conference room where we were seated. He opened the door, said Mr. Secretary, Administrator, we need to see you right away or something to that effect.

Obviously, the Secretary and I got up immediately and went into the Secretary's office. Again, the Secretary's office was adjoining. And we could see, the Secretary had the TV CNN on and we could see the first--we could see what was being shown on the television, which was the World Trade Center.

MR. AZZARELLO: So when you--that was your first recognition of it was Flaherty called you out

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and you see the aftermath of the crash--first crash?

MS. GARVEY: Yes, and went immediately to the telephone to call the Operations Center at the FAA headquarters. I think, simultaneously, he may have testified to this--I think simultaneously, perhaps, Monte Belger may have been calling on another line, calling over to the Secretary's office. But I was, at that point on the call or on the phone with the Operations Center. And said, I'm looking at something here on television, World Trade Center, can you give me some information what's happening. And they said, we are not sure, now we are also monitoring a potential hijacking of an American Airline.

MR. KARA: They separated out the 240--

MS. GARVEY: They were, in their own mind that had not been reconciled at that point.

MR. AZZARELLO: When you called, you said you called the Operations Center, is that was the 24/7--

MS. GARVEY: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: --you would have gotten the duty officer--

MS. GARVEY: Right. And then asked was Monte there, yes. And said well, I'll be over immediately.

MR. AZZARELLO: Did you speak to anyone else in that first phone call other than the operations backups?

MS. GARVEY: No, I don't believe so. I don't believe so, I may have talked to Monte at some point, and I quite honestly can't remember if I talked to him directly there or when I got over--more remembering when I talked to him when I got back to the building.

MR. AZZARELLO: But you may have, you're not sure if you talked to him before you got there. So the situational awareness, so to speak of the Washington Operations Center Duty Officer was that he or she informed you that there was a hijacking that they were monitoring but they did not necessarily connect or they didn't connect the two events in this phone call with you?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: That is correct, that is correct.

MR. AZZARELLO: Did they--were you left with the impression that the Duty Office believed that that hijacked aircraft was still airborne somewhere?

MS. GARVEY: I don't think I had an impression one way or the other. I think that they were still, just said it was unclear.

MR. AZZARELLO: Okay, but you--

MS. GARVEY: They said it was unclear.

MR. AZZARELLO: Okay, but you--were you left with the impression, though, that those two events were not connected, yet--the hijacking and the plane?

MS. GARVEY: Probably at that point, yeah. I have to say that my own sort of intuitive gut reaction was, ooh, you know, what--certainly caused a great concern. I mean, I can't say that I necessarily connected them right away. But certainly struck a cause of great concern to have two incidents at the same time.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Is it fair to say that you were concerned that maybe they were connected? Did you--thinking.

MS. GARVEY: I don't know if I would say that, that's giving me probably more intuitive, probably, credit, than I'm, more with the benefit of hindsight looking back at it. But I think what concerned me is just that you would have two incidents occurring within the air traffic system at one time. Even assuming--even assuming that the first one was a small aircraft. Whatever happened at the World Trade Center was very serious; hijacking is very serious to have two occurring at the same time was certainly something that anyone would be concerned about.

MR. AZZARELLO: That's a very good point, I guess, if they were not connected then you'd have two incidents on your hands?

MS. GARVEY: Right, right.

MR. AZZARELLO: Which would be even maybe greater concern?

MS. GARVEY: Right, yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Now, I did see in your earlier interview you said that, I guess you had heard the reports according to the media that it was a small plane, did you have any independent impression yourself when you saw the TV, whether or not you thought the crash was caused by a small plane or a large commercial airplane?

MS. GARVEY: I think it was probably more colored by what I heard on the TV, but that would not--that would not have been surprising. I think, you know, it might be someone's first reaction that it would be a small Cessna or something to that effect. Someone may have had a heart attack, there might have been a malfunction, something like that. My first reaction was certainly not that it was a large commercial aircraft, it would not have been that.

MR. AZZARELLO: And after speaking to the Operations Center, did you leave the building then?

MS. GARVEY: I reported what I had heard to the Chief of Staff and to the Secretary who both were still standing there and said I'm going to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

head right back to the FAA headquarters, which I did.

MR. AZZARELLO: So, you told Mineta and Flaherty and left?

MS. GARVEY: And left, yes.

MR. AZZARELLO: And then you went directly to FAA headquarters, right?

MS. GARVEY: That's correct.

MR. AZZARELLO: When you arrived at headquarters, where did you go?

MS. GARVEY: I went immediately to the 10th Floor. My office, the Deputy's Office, Monte Belger is right across from the Operations Center, so went, actually directly to Monte's office--

MR. AZZARELLO: Across from the Operations--

MS. GARVEY: --yeah, and we walked from there sort of talking and walked across to the Ops Center.

MR. AZZARELLO: Do you recall when you arrived at headquarters and saw Monte Belger, do you recall whether or not there was any information you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

had on the second--

MS. GARVEY: The second plane--

MR. AZZARELLO: --crash?

MS. GARVEY: --the second plane had hit and it may have, it occurred sometime between my leaving and arriving, which, of course, and I--which Monte reported, although I think even as I was coming into the building, you know people were discussing it, obviously, in the building. And so, I may have even heard it before I heard it directly from him, as I was walking in.

And just said to Monte, what do we know? He said we're still gathering information, we know that they've both gone in, but we're still, you know, we're still monitoring and gathering information. We walked over to the Operation, at that point, our people were clearly, you know, gathering in the Operation Center. I said is the net up. And he said, yes. So, that began the day.1

MR. AZZARELLO: Let me back up a second. Now, on American 11, there was some information

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

given to Command Center and headquarters that there was a hijacking before the first crash. When you arrived at headquarters, and the second crash had already occurred, did you find out or did you learn whether or not a report of a second hijack was given to headquarters prior to--

MS. GARVEY: I did not know at that time, no. No, I did not know. Just that the plane had hit--

MR. AZZARELLO: Just that it had been crashed--

MS. GARVEY: Exactly.

MR. AZZARELLO: --not necessarily, you did not hear that there had been a second reported hijacking, but that there had been a second crash.

MS. GARVEY: There had been a second crash.

MR. AZZARELLO: Did you--taking you past the day of September 11, now, did you learn in any subsequent after action, reviews, whether or not that information was held by the Operations Center or anyone at headquarters, the information being

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that there was a second reported hijack in the system, did that information reach headquarters before the information of a second crash reached headquarters?

MS. GARVEY: I'm not sure. I mean, I certainly got no indication that any information had been held from headquarters, headquarters was receiving it, you know, when they received it. So, I didn't get the sense that anything had been held back.

MR. AZZARELLO: Yeah, and I'm not trying to sort of attach any motive to whether information got there or not. I guess, what we have determined in our investigation and what we presented at our hearing a short time ago, was that from our investigation, and interviewing all the folks at headquarters, what we determined was that there was no notification that went to headquarters from any field facility that there was a second hijack in the system prior to there being a crash.

MS. GARVEY: Mm-hmm.

MR. AZZARELLO: So, that the situation

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

awareness here at headquarters appears to be that they learned of the second crash before they learned that there was a second hijacking.

MS. GARVEY: I think that's probably accurate. I will say, once the second crash occurred, though, I think, certainly for Monte and myself and I suspect for everyone else, something changed. I mean, we knew we had a situation unlike anything we had had before. We all believed that something very significant was happening in the system that was quite different from anything--

MR. AZZARELLO: As soon as the second crash occurred?

MS. GARVEY: Right, so to some degree and not to minimize it at all, but to some degree whether it had been hijacked or not, or whether we had received notification, what we knew became almost, I don't want to say immaterial, but became less important than the fact that we knew we had a significant event occurring in that he system, we had something going on here that was unlike anything we had before.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: So, I guess, then to summarize it, then, you don't have any independent information that you learned--

MS. GARVEY: That's correct.

MR. AZZARELLO: --that there was an awareness of a second hijack before the second crash--

MS. GARVEY: That's correct.

MR. AZZARELLO: --was acknowledged? Okay, and I guess getting to your point on the second crash, did you see the, either live or a replay on TV of that second--

MS. GARVEY: Certainly saw the replay, don't believe I saw the--

MR. AZZARELLO: Is it fair to say that seeing the replay that was there a recognition by yourself and others that this appeared to be a deliberate act in terms of watching the second?

MS. GARVEY: Yes, that's absolutely accurate. I think the Secretary used to say something about the first incident could be an accident, the second one could be an incident or

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

something but by the third one, you knew you had
a--

MR. AZZARELLO: Pattern or--

MS. GARVEY: --a pattern, yeah, a program.

MR. KARA: You asked Monte if the net was
up. What was your--what was going through your
mind about what net were you thinking about when
you asked him that question?

MS. GARVEY: I really was referring to the
Security folks--

MR. KARA: The Security folks--

MS. GARVEY: Yeah, and I saw a couple of
the Security people in there so, I assumed that
they were--

MR. AZZARELLO: So you were in the
Security Center and the Crisis Room also?

MS. GARVEY: Right, sort of between the
two.

MR. AZZARELLO: Do you--who do you recall
from Security being in the Crisis Room sort of
setting up a response team?

MS. GARVEY: Well, you know, certainly, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

remember seeing Lee Longmire, Longmire, sorry,
And I think Fran was there at that time also--

MR. AZZARELLO: Losito [ph]?

MS. GARVEY: --Losito, I believe was there
at that point. There were a couple of other people
I knew by faces, but I'm not sure of the exact
names. Certainly saw some Air Traffic people in
the room.

MR. AZZARELLO: Did you remember seeing
Jeff Griffith?

MS. GARVEY: Jeff was certainly that and
I'm certain he was there all day, so I don't know
if he was actually in the room when I walked in or
if I may have seen him later in the morning.

MR. AZZARELLO: What, in particular, if
anything, prompted you to think, apparently, pretty
early on about whether the net was up and asking
Monte Belger whether or not the Security folks had
a net up?

MS. GARVEY: It was really just a routine
question. It was really just something that you, I
guess, and part of it maybe by seeing the Security

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

people. It seemed to be to be a natural question just to say, you know, what's going on, is the net up, who else was--you know, what do we know. I mean, really, it was probably a stream of questions like that. You know, have we--have you heard again from the Secretary's office, there were sort of a stream of those sorts of questions. Do we know where people are? Do we know where--I mean, from my perspective, for me that day, there were sort of you know, three paramount concerns at the morning went on. I mean one, was obviously the Air Traffic Control System, which was always significant and I think, as you all reported, I think Air Controllers did quite a job that day.

And the second was to make sure that we were keeping the right lines of communication open, particularly to the, you know, to the other agencies, but particularly to the Secretary's office.

And the third was, really, the employees within the building itself. People were confused about what was happening. We had a day care center

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there. You know, concern about children at the day care center. So, there were those, I think three concerns as we, certainly as I went through the day. and I think that was probably true for some others. The immediate issues was, obviously, the Air Traffic Control. And also making sure we were communicating with people.

MR. AZZARELLO: The concerns, to make sure that I have them down accurately are the Air Traffic Control System?

MS. GARVEY: Yes.

MR. AZZARELLO: The, I guess, having a good open line of communication with the Secretary's office.

MS. GARVEY: Chiefly, with the Secretary's office and other agencies as well, but particularly, I would say the Secretary's office.

MR. AZZARELLO: And then the concern about the safety of the folks in the building--

MS. GARVEY: Yes.

MR. AZZARELLO: --evacuation, if necessary. Okay.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: right.

MR. AZZARELLO: I guess going back to the, one more follow-up on the net.

MS. GARVEY: Sure.

MR. AZZARELLO: It's our understanding there are a couple of different nets, the Security folks get going in that room and were you referring to any one in particular? I mean, there's an internal one we understand--

MS. GARVEY: right.

MR. AZZARELLO: --and then an external one with other agencies.

MS. GARVEY: Right.

MR. AZZARELLO: Did anyone in particular you were referring to or--

MS. GARVEY: I think in my own mind, I was really referring to the net that brought in the other agencies. I knew, certainly, from briefings that I received from Monte within that time frame, that the Air Traffic Control folks had their own tactical net, their own communication lines that were open to the various facilities. So, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

certainly knew about that, as well. But, particularly seeing the Security people in the room, I think, the focus would have been more on--

MR. AZZARELLO: The one with the external--the one with the outside agencies?

MS. GARVEY: Well, the, yes, the Security net.

MR. AZZARELLO: Okay, we do understand that some of the Security folks would occasionally drill the process of responding to an air emergency event like a hijacking--

MS. GARVEY: Right.

MR. AZZARELLO: --or a similar incident--

MS. GARVEY: Right.

MR. AZZARELLO: --where they would go and, you know activate the crisis room and take their positions?

MS. GARVEY: Yes.

MR. AZZARELLO: Conversely, we have heard through most of interviews, if not all of FAA headquarters that the folks on the upper levels of management there do not recall participating in any

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

of those type drills. Of course they don't have any of those assignments to you know sort of run the crisis room or take a position in it. Is your recollection of that different or--

MS. GARVEY: No, I think that's, I believe that's pretty accurate. I can tell you that there were a couple of times, and I'm not going to remember the exact dates, but more in the Admiral Flynn period where we had some potential hijacking and they occurred during the day, when I was actually there. And so I went over to just watch them in both cases, they turned out not to be the case, but in both cases, I was able to observe the how they were able to, you know come together and, what they did and so forth. So, to that extent, you know, I was somewhat familiar with it.

There was one hijacking incident, again, when Admiral Flynn was there, that occurred that I remembered that occurred quite late in the evening and he called me at home. I lived probably a five minute walk from the FAA building across the Mall. And I remember saying should I come in? It was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

sort of the middle of the night, late in the night anyway and Admiral Flynn said no, not at this point. I just wanted to give you a briefing, wanted to just let you know, we'll monitor it and fortunately called a couple of hours later to say, you know, everything worked out, it was not a--it was not anything.

So, I've had that kind of familiarity with the net.

MR. AZZARELLO: Based on your observations or interactions in the Crisis Room, who, if any one individual did you see as the person in charge of that room? Is there someone who was running the crisis room, who was managing it or the person that you would go to?

MS. GARVEY: No, I think that day, I really was turning to Monte.

MR. AZZARELLO: Okay.

MS. GARVEY: So, I probably, particularly, again, that's a very good situation, I--my inclination was to turn to Monte to ask the questions and so forth.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Did you spend any, I guess, appreciable amount of time in that Crisis Room, or were you just sort of in and out or were you in there for a period of time, where you actually could observe what was going on there?

MS. GARVEY: There were periods of time, when I was in there for 5 to 6 minutes. It's hard to remember exactly what the time frames were, but it's probably more accurate to say that I was in and out checking on things, coming back. But, you know, certainly there were periods of times, particularly as we were bringing the planes down, where I was in there listening and watching.

MR. AZZARELLO: So you rely pretty much on Monte Belger to give you situational awareness, is that fair to say or--

MS. GARVEY: I think it's a combination of watching--of asking Monte, but then also going in and out of the Ops Room.

MR. AZZARELLO: Okay, so, in terms of you don't, just so I don't misunderstand--

MS. GARVEY: Right, right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: --what your position is. What I'm hearing, I guess, is that you didn't have direct contact with anyone in the Crisis Room in terms of whoever may have been in charge of it, you weren't speaking directly to that person, but you were going to through Monte Belger?

MS. GARVEY: For the most part, I do remember speaking to Lee, later on in the morning at a couple of points and sometimes when we would be in the office if we had just briefed the Secretary's office, we'd have someone like a Jeff Griffith come up in and say, here's what we know or someone from Air Traffic. Or a Cannoles, for example, or we might have Lee come in or someone from Security to say here's what we know. And it could have been, you know, Lee, or it could have been someone directly under him, one of the Security people. And that was primarily to make sure as we were communicating with the Secretary, we were giving him the most current information.

MR. AZZARELLO: We were, because we've been sort of struggling to identify that one person

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and it's not someone that's readily identifiable; that one person who we can say he or she took command and control of the Crisis Room and was the, let's say the filter for decision-making or information sharing with upper management. We have yet to identify that one person and I'd like your comments, Ms. Garvey, on this. My--but our, I think joint impression is, we'll give you what our impression is and we'd like your comments on that. What Miles and I have observed, in terms of what went on in the Crisis Room that day are two general phenomena: The first one is that Security, on paper, were the folks or division that generally would coordinate and organize the response to a hijacking event from the Crisis Center, they would be the folks in control of the Crisis Room and organizing the response; generally, it would have been Civil Aviation Security highest ranking operations person--

MS. GARVEY: Right.

MR. AZZARELLO: --and that there would be Air Traffic elements on the internal net with the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Security telling them what's going on in the field reference the hijacked airplane.

MS. GARVEY: Right.

MR. AZZARELLO: But it would be a Security-run event or response to the event. Whereas what we've seen--what's transpired on 9/11 is after there was a recognition that this was a multiple attack on the country, that Air Traffic became a very important and vital element and, potentially, even more important their participation than the Security folks, because they were the people--Air Traffic--who had their hands on the aircraft, were controlling them and who would be the first to know that something was amiss, with another aircraft; that it was either off course or lost coms.

And that there appeared to be, I guess, potentially a little void in someone taking control of that room because of those two elements. I'm trying to find the proper word--it's not clashing, but just the interaction of the Air Traffic--

MS. GARVEY: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: --folks with the Security folks, given the events of 9/11 was not something that on paper, at least, indicated that the Air Traffic folks should be in control of, but it seemed like on that day, out of necessity, you would want them to take a leading role in the response.

And our impression is that, potentially, there might have been a little sort of folks not knowing or you know looking at each other and, maybe, not having a clear leader in the room because, you know, there was a little bit of, I guess, confusion about who, maybe, should maybe have taken control of the response.

MS. GARVEY: I think your assessment is a fair assessment. I think that's a fair assessment. I think what's remarkable, though, and maybe it's because a lot of these people have worked together so often in the past and over so many occasions, including drills for Y-2-K, which seems like a distant memory at this point, but I think what's remarkable is that they still did incredibly well.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

There was, I think you're right, and I think that's why when you look at some of the after-action recommendations and some of the changes that were made, I think tried to address some of those issues.

So, I think that's a fair assessment, but I think, in spite of that, people acted quickly; they acted professionally. I was struck at many points during the day, how very calm people were, even those folks who had spouses at the World Trade Center. So, I think that's a fair assessment. And while, certainly going over there, while I was very much aware of the kind of intensity within the room, the urgency within the room, I was struck by the sort of professional calm that also existed.

And I think your assessment of the Air Traffic control organization, kind of assumed more of a role, is an accurate one and, quite honestly, even in hindsight, was the right one. I mean, it was the Air Traffic control person that was in jeopardy primarily. I mean, we didn't know what was happening. It was, really, I think appropriate

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

for them to assume more leadership roles. So, I think to some degree the professionalism, I think really exhibited itself by the fact that they were able to quickly secure that control.

MR. KARA: Let me put names to that.

MS. GARVEY: Okay.

MR. KARA: I know you were in and out and all of these people work for you and you said you [unintell.] to be the foremen, if you will, in the room.

MS. GARVEY: Yeah.

MR. KARA: But, as John lays out, what we end up with is there's a dais in that room that looks out on 9 or 12 positions--

MS. GARVEY: That's right.

MR. KARA: --that are functional positions--

MS. GARVEY: Yes, absolutely.

MR. KARA: --people are working hard.

MS. GARVEY: --Air Traffic, generally, yeah.

MR. KARA: Yeah, and the dais is set up

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

for three people, but we believe that ultimately four people at various times, in various combinations were on there on one such Lee Longmire and, perhaps, Fran Losito, which would be the Security side of it. Then next to him were Jeff Griffith and Don Davis.

MS. GARVEY: Doug Davis--

MR. KARA: Doug Davis from the Air Traffic side. Is it your recall in any of your forays over to the Crisis Center that you saw those four in any combination or one side more in charge than the other?

MS. GARVEY: No, as a matter of fact, I think I saw a lot more sort of interaction, kind of the exchanging of, you know, either a couple of folks staying together, more sort of communication among them.

MR. KARA: And these are the names right? Are there--

MS. GARVEY: No, you've got the names right, absolutely, Doug Davis and Jeff--

MR. KARA: And then Lee Longmire and Fran?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: And, Fran, yeah, I mean there were other people, obviously, as well. I just don't remember.

MR. KARA: The only other name that was a potential for being on the dais, that I heard was Morris, right?

MR. AZZARELLO: Yeah, Mike Morris.

MS. GARVEY: Oh, yes, okay.

MR. FARMER: I'm sorry to barge in, John Farmer.

MR. KARA: John, watch the cords, you'll hang yourself.

MR. AZZARELLO: We were, I guess, we were, what we noticed is, now, the protocol, obviously, that Security run the event [unintell.] I guess, given the events of 9/11, the Air Traffic element, if one could foresee what was going to happen, maybe would have said, we'll have an Air Traffic person run this event. And what you're saying is you saw that element get involved--

MS. GARVEY: right.

MR. AZZARELLO: --that day in the room. I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

think the other issue that--I said there were two, sort of phenomena that we observed.

The second one was, in the Crisis Room, that there were a lot of upper management folks. In particular, like a lot of people remembered Monte Belger being in the room and obviously wanting information and wanting to know what was going on in response to the hijackings.

And I think one of the other things that we observed is there was a sense by some of the people in Security or Air Traffic to perhaps want to defer to senior leadership, who were present in the room, in terms of, okay, I'm not the Deputy Administrator, or, you know, I'm not the Director of Air Traffic Control, or the Deputy Director, so, maybe, perhaps, I should defer to them in such a situation like this to make decisions, when those are the folks, though, who were not, it appeared, intimately, familiar with the hijack protocol and procedures.

That had not undergone the training that the Security folks did to run a response for such

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

an event. And one of our observations, I think, Miles and I talked about is that that appeared to, at times, maybe cause some potential delay in immediate action by the folks from, say, either from Security who might have wanted to make a decision or take control of the situation because they saw some executive management people there.

And I wanted to know if you, either on that day or in the aftermath in any after-action reviews, you know, if any of that--of an issue of that nature was ever brought to your attention or if you observed anything of that nature that day?

MS. GARVEY: That's interesting--that's really an interesting observation and it's a new one to me. I had not heard that from folks post-9/11. And Monte's an interesting person, because, of course, he came up, you know 35 years or 30 years within the FAA and he certainly had a background in Security, as well as Air Traffic. So, might there be people who might want to defer to him, that, you know, that has a ring of truth about that. I could see that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

On the other hand.

MR. AZZARELLO: In fairness, I'm not saying that anyone, in particular--

MS. GARVEY: No, no, absolutely I'm not--

MR. AZZARELLO: --said that--

MS. GARVEY: Oh now, absolutely.

MR. AZZARELLO: --I didn't take this action because of it, it's more of an impression that we have from just observing what happened in that room.

MS. GARVEY: Right, and the uniqueness of the situation, I think, could certainly cause people, if not to defer, at least to want to have buy-in, so to speak. But I, really, honest, I didn't see any evidence where a decision could either not have been made or were delayed to the point of being, you know, affected, or--or--or turning out to be the wrong decision because it was a late decision. I didn't see any evidence of that. And, while I think Monte has a lot of credibility in the organization, I think he's also, I don't think he's that intimidating. I don't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

think people would feel that. That's not historically how people have viewed him.

And I must say, certainly, the work that the controllers did in the individual facilities, which is exactly what they should have done, which is putting the place some ground stops and putting in place some restrictions early on; certainly, I think, indicated that they were willing to make some of those decisions, head on. And in a timely fashion.

MR. AZZARELLO: Well, let me ask you about, connectivity with the military, in particular. You asked, you said early on, when you got to the FAA headquarters, you search warrant the Crisis Room was going and you wanted to know if the net was up and Monte indicated, he said, yes, that it was up.

Did you or Monte ask the specific question to anyone in the room, is the military on the line in here? Do we have connectivity with the military so that we have an open line with them, and can communicate with them?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: I believe in the string of questions that I asked Monte, you know, including is the net up, I said, is the--I think I said DOD and Monte said--you know, are they on the line or are they involved? Yes. I know I asked about the FBI, as well. And I know Monte answered, you know, affirming that they were on the line. And at that point, they may have been.

MR. AZZARELLO: Is that, can you give us a frame work or eventwise, was that before or after the Pentagon was hit?

MS. GARVEY: Well, this was before, it was after the second, but it was just as I had arrived.

MR. AZZARELLO: So, after the second crash, but before the Pentagon was--

MS. GARVEY: Before the Pentagon, yes.

MR. AZZARELLO: Well, let's talk about that in connection with the military. I'm sure you're aware that after our hearing that one of the issues on United 93 was that that plane was being tracked for roughly a half hour and that the Command Center was given the pretty constant

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

updates to headquarters. It was John White at the Command Center giving the periodic updates to either Jeff Griffith or Doug Davis, who, we believe were in that Crisis Room--

MS. GARVEY: Right.

MR. AZZARELLO: --on United 93. And that no specific notification on that aircraft ever went over to the military on United 93. So, how do--help us out, how do we square--how do you square the--your position that you were told that there was some connectivity with the DOD after the second crash at the Trade Center and before the Pentagon was hit--how did that square up, then with no notification going to the military on 93.

MS. GARVEY: Well, I think to some degree we have to acknowledge, and I think people have acknowledged that--and I think our actions acknowledge--that we needed to change the way we communicated. One, we needed to have direct connection with NORAD; we now have the damage that I know you all know about and have heard a lot about. So, I think we have to acknowledge that it

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was not solid communication by any stretch of the imagination.

But, having said that, I think, particularly after the second crash, everything was real time. There were informal, there were military liaisons were on the floor at the Command Center, you know, Colonel Atkins was in headquarters, I had seen her myself. There were people, you know, so there was a kind of real time communication. I mean, I'm understanding that, you know, that in watching some of the other testimony that, you know, Richard Clark of the NFC had communicated directly with NORAD, as well.

So, I am not excusing, I'm not saying we didn't need to make changes, we obviously did. And I that, I think was one of the first things we acknowledged. But I do think there was communication. I think there was real time communication and I think.

MR. AZZARELLO: Do you know if United 93 was airborne on 93?

MS. GARVEY: Real time in terms of people

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were communicating with each other, the net was up, it was operational, people were communicating from the Command Center.

MR. AZZARELLO: Let me tell you what we found--let me tell you what we have found.

MS. GARVEY: You guys have spent much more time on this.

MR. AZZARELLO: We really, you know, we dug deep, long, and hard on this and have come to some pretty strong conclusions and I want to know that if you have any information or evidence to the contrary, we would welcome that at this point. [

We heard from people at headquarters refer to Colonel Atkins as an assumption that maybe she was involved and maybe involved in getting a military response. No one, though, had any specifics in terms of her being involved early on. In fact, most people remember her coming to the 10th floor, after the fourth crash.

We've interviewed Colonel Atkins, she indicated that she was not up on the 10th floor until pretty much after the four incidents, the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

fourth hijackings and the crashes were over. And that more important and specifically, she was never asked to assist in getting a military response. That it wasn't her duty, it wasn't her position as a liaison at headquarters, she was not someone who was tasked with the responsibility of obtaining military assistance.

MR. KARA: And was down at the other end of the--

MS. GARVEY: She was in that end in the Air Traffic--yeah, that's right--

MR. KARA: Correct, but not in the Crisis Room.

MS. GARVEY: Yeah.

MR. AZZARELLO: So, to the extent that we have tried to evaluate folks at headquarters, saying, well, Colonel Atkins was there. We really see it as a non-factor in getting military assistance on any of the four aircraft.

MS. GARVEY: Fair.

MR. AZZARELLO: Is that a fair assumption?

MS. GARVEY: I guess my only point was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that, even as part of the--my only point is that the military liaisons on the floor at Herndon, even Colonel Atkins being part of the Air Traffic operations. There was information that was flowing pretty freely and pretty directly. And--

MR. AZZARELLO: But that might, what it appears to us, to the extent that that was occurring with respect to Colonel Atkins, or the Military Personnel Command Center--

MS. GARVEY: Yeah, she may have--

MR. AZZARELLO: --would be after the fourth crash.

MS. GARVEY: Is that true for the Herndon folks?

MR. KARA: Then, we're going to talk about that--

MS. GARVEY: Oh, I understood that they were there from the very--

MR. AZZARELLO: The Herndon folks, I guess, now, but that's not to say if Colonel Atkins was asked to do something before the fourth crash--

MS. GARVEY: Oh, no, that's not--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: --she wouldn't have tried to get help but that's--

MS. GARVEY: --she would have--

MR. AZZARELLO: --but I guess the point is, you know, her position is, she very clearly stated to us unequivocally that she wasn't involved in any response, wasn't asked to and really didn't get involved in the 10th floor until after the fourth crash.

With regard to the Command Center personnel. We know that there was some folks in the CARF [ph] on the civil side, that were asked just to find out by Ben Slyney [ph] whether or not Otis was trying to--whether someone was sending fighters down from Otis or somewhere else to help New York, look out for New York? And that some information came out back from the CARF that, yeah, the fighters are on their way down--

MS. GARVEY: On their way down.

MR. AZZARELLO: --to New York City. Again, though, no one, as we understand it, no one from the Air Traffic Service, itself. None of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

military personnel around there, either Colonel Zibareth [ph] or Cherry--

MR. KARA: Cherry, Lieutenant Colonel Cherry.

MR. AZZARELLO: --Lieutenant Colonel Cherry were asked prior to the fourth crash to, hey, we need help, we need the military, we need NORAD, can you contact them and get assistance?

That was, as far as we understand, as far as our interviews with them, they were not asked to do that either, prior to the fourth crash. In fact when the air threat conference call does finally, when the FAA does finally get a representative on the air threat conference call, it's not until after the fourth crash, approximately 10:15, give or take a few minutes, that the FAA has an actual representative on the air threat conference call. And the individual who is then placed on that call is a gentleman named Raifford Brooks [ph], who is not a military--not military personnel, but civilian from the CARF unit.

And we've interviewed Mr. Brooks and, you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

know, he's someone involved in the mass movement--coordinating the mass movement of troops, no familiarity with hijack responses or no hijack training, in terms of what's the protocol for getting military assistance.

And, you know, frankly, when we interviewed him, he was a little bit overwhelmed. He was told to sit on the call because, you know--

MS. GARVEY: But, you know, because I did see that discussion at the hearing and just for a point of clarification. Maybe this is my own clarification. I always understood that those kinds of military calls were for the military. And that we, ordinarily never participated in that. It was unusual to be asked and that he was assigned to it just simply to monitor it.

All the things you've said are exactly right. But that it would not have been a normal--it was because this was so unusual--to have anyone from the FAA on what was, essentially, an internal military call, am I correct on that?

MR. AZZARELLO: No, the, what we have

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

found is that--well, the air threat conference call. It started as a significant event conference and then it sort of elevated to an air threat conference call. They involved interaction communication from the military and other agencies. However, on their checklist, the FAA was not one of the preset agencies.

MS. GARVEY: Right, right, that's what I meant.

MR. AZZARELLO: Nor were they an alternate agency.

MS. GARVEY: Right.

MR. AZZARELLO: We believe, because of the threat they perceived to be a missile threat, as opposed to a hijacking--

MS. GARVEY: Exactly, yes.

MR. AZZARELLO: --of a commercial airlines.

MS. GARVEY: It became much more a Defense, it was a Defense, military sort of--

MR. KARA: Well, actually, and you can give us a little insight on this. The National

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Military Command Center is sort of set up to be the hub, the focal point for crisis management for the government--

MS. GARVEY: Right.

MR. KARA: --which implies something beyond the Department of Defense. And it's accurate to say that FAA and FEMA, for example, were not on their preset list. But it's been portrayed to us that the conference is built in such a way that the National Military Command Center can add on anybody it wants to--

MS. GARVEY: Absolutely.

MR. KARA: --which is what they were trying to do.

MS. GARVEY: Absolutely, which is what they did. And I think they did the right thing. I guess the only thing that concerned me is that when I heard it on the, you know, just watching the hearing, I guess what concerned me. And please bear with me, I will be a little defensive on this stuff. That it sounded as though this was sort of a routine thing and that the person we would

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

ordinarily assign to that would be somebody who would know the stuff and be prepared.

MR. KARA: Right.

MS. GARVEY: And, clearly, if we were ordinarily on the check list--

MR. AZZARELLO: You would have had--

MS. GARVEY: --we would have, yeah. We were doing, we were asked to do something that we wouldn't ordinarily do. And so, everybody was busy, we took a person who I don't know and I absolutely, the poor guy must have been overwhelmed. But my understanding is the direction to him was listen, monitor, you know, be helpful if you can--

MR. KARA: Answer questions if you can, don't--

MS. GARVEY: --answer questions, yeah, exactly.

MR. KARA: And, in fact, that's what he did, for example, fighter support for Air Force One, to escort in the Attorney General--

MS. GARVEY: Exactly, exactly, clear the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

airspace or whatever, yeah.

MR. KARA: The point we learned from all of that is he, the log showed up that he showed up that day for duty at 10:00 o'clock. And then, at about 10:17 or so, he is suddenly saddled with this duty. He does the best he can.

MS. GARVEY: He does the best he can, yeah.

MR. AZZARELLO: I think what it points out, this example, and I'd like to know if this was something that was discussed at your level in after-action review. What it points out, I think is the lack of--significant lack of familiarity with each other's agencies; the FAA and NORAD and DOD or the bigger, actually DOD and the military, is that the military's reaching out to the Command Center or that's where they reached out to, to try to get somebody on the air threat conference.

They wound up with this civilian, Raifford Brooks, from the CARF unit. When, where they really needed to get was to headquarters because that's where he decision-makers were in terms of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the hijack coordinator, the Crisis Room, and the people with--supposedly the people with the information, the situational awareness and with the authority to say we need fighter escorts and we need them in response to this aircraft and this is where it is--this is where the aircraft is at the time.

So, what they really needed to do was to connect up with headquarters.

MS. GARVEY: Yes.

MR. AZZARELLO: And headquarters, on the other hand, really needed to connect with NORAD and that didn't happen on either end until later in the morning, after the fourth, from what we could see in any meaningful way until after the fourth crash.

Where it appears to us, that if there was more interagency exercises leading up to 9/11, perhaps, one would think with the benefit of hindsight, spurred on by the heightened threat of that spring and summer of 2001, that if that had caused the agencies to flex their communications muscles with one another, that, perhaps, these gaps

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

would have been identified. And is that something that you looked at afterwards, with your staff?

MS. GARVEY: Oh, absolutely. Again, that is exactly why the DAN [ph] was set up, I mean, there was, I think, a much greater recognition that we needed to be in much closer communication; there needed to be tighter links with--and more direct links with the military.

But, John, even just going back to that for the moment, even, you know, should we have done more sort of exercises pre-9/11, I think that certainly, I wish we had, with the benefit of hindsight, I would certainly say, absolutely, in the same way that we did leading up to Y-2-K.

Again, not to repeat what I know has been said by many people far better than I'm going to say it, but, again, most of what we looked at in that summer, pointed to something that was going to happen more overseas. And I think that's reflected even in the number of aircraft that NORAD had and where they were positioned on that day. It was definitely still an outward thrust and an outward

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

protection.

MR. AZZARELLO: I think, even if the threat were seen more as one coming from abroad, wouldn't the basic necessity for communications still need to be tested? In other words, even if the threat were coming from a hijacked airplane from overseas and if the attempt was to penetrate U.S. borders.

MS. GARVEY: Right, but I didn't think that, again, just not to put too fine a point on it, but while we never eliminated the domestic threat, the real threat, as we understood it, as I understood it was that the event would occur overseas, it would be in the Middle East.

MR. AZZARELLO: Occur, okay, of course that's--

MS. GARVEY: Right, that it would occur there.

MR. AZZARELLO: Okay.

MS. GARVEY: Again, not to say that the domestic threat was eliminated.

But I think your points are, you know,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

certainly well taken. I mean, should we and was it right to make the changes in terms of communication? I think without a doubt. And I think that if there's a lesson learned that's clearly one of the lessons that a communications structure that included people all together that included a much more direct communication.

I have to say and, again, I guess the puzzle, as I listened to the hearing is why the NMCC did get off, did they, you know, were they, maybe, connected to something better?

MR. KARA: Now, we're going to tell you about your line.

MR. AZZARELLO: Let me tell you about that line. Right before I hit that one, I've just got one other point on United 93. To sort of solicit your views on a bigger picture issue. And that is Command Center. On United 93, right after headquarters is told that the aircraft is, you know, there's bomb threats and, you know, the plane is being hijacked.

At roughly the same time, Cleveland Center

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

calls the Command Center and says, listen, we're tracking this aircraft, you know, we can get a local base here, even though they're not an alert NORAD fighter base, we can get some assistance. And they were concerned because they didn't want to lose track of the aircraft and they wanted to make sure someone from the military took off after it to tail it.

And someone at the Command Center, one of the Air Traffic Control specialists said, headquarters has that and that decision's got to be made there at a higher level than you or I. In fact that, on paper, that certainly was the protocol. It wasn't the Command Center function and one of the things that we wanted.

MR. : The Center had no real role in--

MR. AZZARELLO: The Command Center did not have a real--didn't have any defined role in responding to a hijack making decisions vis-a-vis fighter aircraft and military assistance. As we understand it, the Command Center role in a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

hijacking was, they were alerted about the hijack and their role was to make sure that that aircraft did not pose a safety threat to any of the other aircraft in it's path.

MS. GARVEY: Right.

MR. AZZARELLO: And that they would coordinate the national airspace clear around it on its path, which path maybe they didn't know where it was even headed. But that was their role.

And what seemed to happen ad hoc that day is, the Command Center became the nerve center for information because they're the ones with the first line of contact to the field facilities and the Air Traffic Controllers who are on the scopes; not directly, but through their management, they have the most direct connectivity to the folks with the real time air traffic information.

And it sort of--it struck us and, in fact, some managers from that facility, thought that the events of 9/11 would be an event to seize upon to [unintell.] the Command Center to put it in the forefront as the facility that could be most useful

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

in coordinating the response to an event like the events that occurred on 9/11.

And that that was the time to recognize the Command Center for what they believed to be its intended purpose when it was set up, but that it never fulfilled, to be the Command and Control Center, not just the system center. And do you have any views on that? Did you discuss that after?

MS. GARVEY: Yeah, and I think, first of all, to some degree, they really are, I mean, the Command and Control. If you look at every day and you look at the collaborative decision-making, that emanates and begins, that was run by the Command Center. So, when you have the kinds of discussions that occur every day, particularly in bad weather situations and you have conference calls that come on, go on every hour, it is the Command Center that is essentially calling the shots, if you will.

I think where it gets more challenging and more difficult is that there are still situations where the local facility--and I think this is

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

always the tension--where the local facility has the most information. And where they have a lot of expertise, as well. I love the Command Center. I'm very big on the Command Center, I wanted this collaborative decision-making to be there. So, I have a lot of respect for them.

But I also respect the local facilities and know that out of those facilities, we can sometimes see some very, very talented folks who ought to be making some of those decisions, as well. So, I think it is having to find that right balance between recognizing that the Command Center, yes, is able to pull information from around the country. But, also, recognizing that there are a host of decisions that still need to be--and should be made at the local facility.

I thought that while we struggled with that, I thought we've done a better job at sort of giving the Command Center more appropriate control. And I say that we, that's not me anymore, but--

MR. KARA: Where do you put the regions?

MR. AZZARELLO: Yeah, where are the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

regions?

MR. KARA: How do you put the regions in the structure.

MR. AZZARELLO: On 9/11, the protocol on paper was the Center, if they had a hijack would notify the region and the region would notify headquarters and headquarters would activate it's Crisis Center and then the hijack coordinator would organize and respond to the hijacking. No where in there is the Command Center. And, you know, obviously, we have the benefit of hindsight at seeing how things worked on 9/11. And with the benefit of hindsight, it would appear that the Command Center would be the better facility as opposed to the regions to coordinate the response to a hijack, to go from the center to the Command Center to headquarters. Or to have the Command Center have the decision makers at the Command Center to coordinate the military response.

MS. GARVEY: Mm-hmm.

MR. AZZARELLO: Right after 9/11, in the aftermath of 9/11, was that examined, the structure

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and the protocol for hijack response and the fact that the Command Center didn't have a role and, perhaps, maybe should have--

MS. GARVEY: Yeah, and I believe that has been changed. Am I wrong--

MR. AZZARELLO: After 9/11?

MS. GARVEY: After 9/11, yeah. I believe. I will tell you, one of the greatest political challenges for any Administrator is what to do with the regions. And I that's far beyond--far beyond long before me--

MR. KARA: Beyond your pay grade, ma'am?

MS. GARVEY: I was going to say, long before me, other--other Administrators have tried that notion of sort of examining the regional facilities. I actually think with--and one of the goals we had in 2000 and 2001 was, as we set up the Air Traffic organization was to use that as a way to sort of, in the light of day, and with a lot of congressional support, one would hope, examine the whole structure of the regional centers.

And, frankly, the 20 centers of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

regional organization, but, also, the 20 centers. True, 9/11 put a lot of that on hold on the Air Traffic stuff.

MR. AZZARELLO: From our vantage point, it seemed that the regions involvement in hijacking response didn't create an extra layer and, perhaps, was not necessary.

MS. GARVEY: I think, probably, in hindsight, you're right. Again, I think, before 9/11, the traditional hijacking that did not create--it was not a red flag, because you had more time, and you had--and, frankly, most of them turned out to be all right. I don't think it was flagged as so much of a problem.

I will tell you that from an operational point of view, I felt we were, because there was such political sensitivities around some of the regional issues, I felt we were sort of operationally, giving more control to the Command Center and we began with the collaborative decision-making, which was very controversial at the time. Because we were giving so much

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

responsibility to the Command Center, on a daily basis in operating the system.

MR. AZZARELLO: Some of the Command Center management folks felt that, in the very beginning that it was going that way, that they would have more command and control of the Air Traffic System, but that because of some political sensitivities and some major push back from the regions, that it didn't continue down that path; that it only reached a minimal level and then they were, sort of, pushed back a little bit to the background and the regions reasserted themselves in the command and control structure.

MS. GARVEY: Hmm, post-9/11?

MR. AZZARELLO: No, no, no, pre-9/11, leading up to 9/11. And I'm saying after it's creation in the mid-'90s.

MS. GARVEY: I had lots of discussions with Jack Keyes [ph] about that, I thought he felt that he was making progress on that, but maybe not.

MR. KARA: When we looked for it on the line of block charts, you can't find the Command

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Center, on the line and block chart, it's very down over in Air Traffic, somewhere in there. It's not a visible entity to the outside observer.

The outside observer, looking at the FAA as a command and control structure or mechanism and knowing that the Command Center at Herndon plays the role it does, it's almost a commenting dissonance, a disconnect in your mind to try to find them in any way shape or form, having a key role to play. And, I don't know, I haven't looked at the current one, John, if it's any better today.

MS. GARVEY: That's interesting, because I--

MR. AZZARELLO: Well, the current situation because of the deadline sort of cuts all that out and the military's listening real time on Air Traffic.

MR. KARA: Yeah, the DAN trumps everything.

MS. GARVEY: The DAN trumps, exactly.

MR. AZZARELLO: Let's get to the line, now, that you talked about. The Primary Net was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

supposed to be the line the military was on. We've talked to the individual from the FAA who was the person managing that net. Mike Wickert says he got it up and, you know, got in that position roughly 9:20, but that's early on. That's when it gets going. That doesn't mean everyone was on it at that point. People just started to climb on.

He remembers very briefly a DOD or military representative being on from the Pentagon, before it was hit, for a very, very brief period of time. And then them not being on. And him thinking that maybe it had to do with the fact that the Pentagon was hit, maybe that they lost the communications.

However, that Primary Net did not function in any shape, manner, or form that day the way it was supposed to. The way we understand it and the way he explained it. That Primary Net is supposed to have not only the military on it, but the Air Traffic Control element from the field, the people that are watching the potentially hijacked aircraft, so that they can pass information on the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

net. Hey, here's where the aircraft is now, it's in New York Center's airspace, we've lost coms, we've lost radar, whatever the situation is. And then, if the military's on that line, obviously, they're getting that information simultaneously and they'll be able to coordinate a response.

We were told by Mike that there was no Air Traffic Control element on his line. They were on the other net, they were on the internal net, the Tactical Net. So, he's not getting any updates, he wasn't getting any updates on United 93 on his line. He had some awareness of it because people were shouting in the room, right. But not getting anywhere on this and that he remembers a few federal agencies being on it, maybe DOJ, and Department of State were two that come to mind that he recalls.

MS. GARVEY: FBI?

MR. AZZARELLO: Well--

MR. KARA: Interesting.

MR. AZZARELLO: --FBI's interesting because the FAA headquarters log from the WOC lists

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the FBI coming on at roughly 9:21--

MS. GARVEY: Yeah.

MR. AZZARELLO: --it says FBI Jeff Bower [ph], is on from the FBI at 9:21. When you listen to the Tactical Net, which there is a recording of from the Command Center end, because they record it, you see Jeff Bower checking on the Tactical Net at 9:21 and announcing himself, FBI, Jeff bower.

MS. GARVEY: Hmm.

MR. AZZARELLO: So, and that led us to believe, even at some point, that maybe there really wasn't a Primary Net early on. We thought maybe it was just everyone was on the Tactical Net. In fact one of your former employees that we interviewed who was tasked interest he aftermath of 9/11 to do a review said that she believed that the Tactical Net later that morning, just morphed into the Primary Net. That that became--

MS. GARVEY: Yeah, I remember--

MR. KARA: That was Darlene Freeman.

MR. AZZARELLO: That was Darlene Freeman's group. So, what we have determined is that--from

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

interviewing both ends of this, the military and the FAA is it never really got up and going to be any meaningful type of communications net. That the Air Traffic Control folks weren't on it, they weren't giving updates on any potentially rogue aircraft or missing aircraft on the Primary Net.

To the extent that the military was on it, they were potentially on for, you know, a cup of coffee, so to speak, for a short period of time. It's not clear why that connectivity wasn't held or why they didn't recognize it on either end for a period of time.

Continuing on the FAA side, what's interesting to us is a lot of other people in the room don't even remember seeing anybody manning that position for a period of time that morning-- the Primary Net position that's supposed to have the military on it. That most folks didn't have any recollection of anyone standing in that position, be it Mike Wickert or someone else; don't really recall anybody standing there until after the fourth crash.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

The person who logs the event, [unintell.] the Primary Net, sits right behind that person in the Crisis Center and is supposed to be on a computer logging the events that he learns, that he or she learns, [unintell.] hearing it, because they can plug into the Primary Net, or they get notes passed to them by the person on the Primary Net and they enter them into the computer log. That person was interviewed by Miles. And doesn't even remember who was standing--

MR. KARA: He could not recall who was in front of it--

MR. AZZARELLO: --doesn't remember anybody being in that position.

MR. KARA: But concurrently haven't to literally look through that position, he described with great clarity and accuracy, the four people that we agreed--

MS. GARVEY: Right, right.

MR. KARA: --so he could see and he knew there was someone on the Dais--

MS. GARVEY: On the Dais.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: --but he could not recall, in fact, at that point in the interview he broke down, when he said, I can't recall who was sitting in front of me.

MS. GARVEY: Oh, poor guy.

MR. AZZARELLO: I think that what we've seen is that there was an assumption by a lot of folks at headquarters that the military had to be on the line somewhere. Be it the Crisis Room, the WOC, the Air Traffic suites where Dave Cannoles had set up. You know, later on that morning, they see someone after the fourth crash, like Colonel Atkins walk around in uniform. All right, the Military's--they're involved somehow.

But, you know, what strikes us is that, you know, didn't someone that day, you know, while the events were unfolding, just ask the question, okay, where's the military, are they on the Primary Net? Are they on the Tactical Net, are they on the line anywhere here in this room?

And the earliest time that we see a recognition from the FAA headquarters then, that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there's not a meaningful connectivity with the military, we believe occurs shortly after the fourth crash. Monte Belger, apparently, according to others, came into the room and yelled out in no uncertain terms, you know, did anyone have the military in this room, on the phone in this room? And they--there was more than one witness that recalled--

MS. GARVEY: Yeah, he lost it.

MR. AZZARELLO: Yeah, not being quite--not being happy, I understand that, but under the circumstances was, you know, was using some strong language and wanted to know where are they? Are they on? And the people--

MS. GARVEY: Because he believed up until that point, which is why he said to me, when I said is the military on, he said, yes.

MR. AZZARELLO: But--

MS. GARVEY: He was absolutely, I mean, he is a letter-of-the-law-guy, so--

MR. AZZARELLO: I think that's when he came to the realization that the assumption was not

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a good one, that somebody had them on the line. What we've been able to determine and if you have any information to the contrary, then we'd appreciate you telling us--what we found is that at around 10:15 on the Tactical Net, you hear Pete Falcone yell out, is NORAD--is NMCC on here? We need to get them on the line.

MR. : At what time?

MR. AZZARELLO: At 10:14, actually to be exact. And to paraphrase Pete, I'm not at the level of management, when I'm yelling that out on the Tactical Net, which generally does not have the military on it anyway, unless somebody tells me it was my boss. And he said, he--I don't know whether or not he specifically attached that to Monte Belger, but had some recollection that somebody, I think was making a request and I was passing it on, hey, are you on my line, and they weren't.

And Mike Wickert, who was, apparently, at some point that morning running the Primary Net recalls Monte coming in and screaming out to the military, I checked on my line, they weren't on my

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

line. So, we believe that occurred right around that 10:13/10:14 time, which, unfortunately, at that point, United 93 was down already. But we've been given all that, I mean, 93 crashed in Pennsylvania; and we are mindful of the fact that even if the FAA had been able to contact the military and had been able to vector an aircraft towards that, a military fighter aircraft towards United 93, the worse case scenario would have been that they shot it down and what happened that day was a crash, so certainly it didn't cause any greater loss of life, the fact that the FAA wasn't able to link up with the military that day.

Obviously, the bigger picture going forward and what was more important is why did that fail? Why did the coms fail, the communications fail, because, God, forbid if it happens again post-9/11 and an aircraft reaches it's target, you'll have more lives lost,

but a lot of assumptions we believe were made that day, you know, at the headquarters level, that the military was involved somehow and that they were involved in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the response to United 93. And they weren't. And there doesn't appear to be recognition of that by executive management at Monte's level, until shortly after.

MS. GARVEY: But do we know why they may have dropped off? I mean?

MR. AZZARELLO: The military personnel?

MS. GARVEY: Right.

MR. AZZARELLO: On the other line that we interviewed, Major Chambers [ph].

MS. GARVEY: Right, because I think one of the things I noticed, Monte said at that hearing was, in my 30-years' experience, you know, when you call the NMCC, they're on the line, they're on the line. So, he sort of--

MR. AZZARELLO: We've interviewed Major Chambers and he's the guy who remember at some point that morning fielding a call from the FAA and his sort of summary of that call is that a junior officer that are in the Emergency Action Cell, was tasked to do, as you can imagine a number of things while as the FAA was doing that morning.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Sure.

MR. AZZARELLO: And it's a push to talk hand set, so you can't leave it on intercom. And he was on it and said, you know, there was minimal information, a lot of dead space; a lot of just nothing coming over to us. And that, frankly, is corroborated by the FAA representative who said, I really wasn't, I didn't have much to say, there wasn't much going on on my--

MS. GARVEY: There was not--no we didn't have [unintell.]

MR. AZZARELLO: --I didn't have much information to give out and I wasn't getting any. To the extent that DOJ or DO, Department of State was on, they're not feeding me any information. I mean, he doesn't have Air Traffic on, so I'm not getting information and so, therefore, I don't have a lot to give out. So, and I think that was being perceived at the NMCC end--

MS. GARVEY: I see.

MR. AZZARELLO: --and so they would periodically put it down, put down the phone, run

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and do other tasks. And, ironically one of the tasks they were tasked to do immediately was around 9:20, at the same time, probably, that the call came into them, they're being told to get the FAA on the significant event conference and then the air threat conference.

MS. GARVEY: I see.

MR. AZZARELLO: So, while the military was trying to get an FAA representative on a secure line, because they perceived this to be a terrorist attack and they wanted to get your agency on a secure line, the FAA is reaching out through an unsecured line on the Primary Net, but caveat, that Primary Net is not functioning the way, at least on paper, it was intended to function, in terms of coordinating the military response, they didn't have the right elements on it, notwithstanding the military involvement, the right elements were not on to help the Primary Net manager coordinate a response.

MR. KARA: And the military has to have their lines secure, because as this thing

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

escalates, it could well go into COG and they even have to go into compartments that they have to stay secure.

MR. AZZARELLO: And I think that goes to a larger points that we'd like your opinions and comments on and that is, even to the extent that any domestic hijacking remained, even a minimal threat, if not a larger threat in the summer of 2001.

Had both agencies sort of flexed their communications on both ends, there would have been, perhaps, a realization that, hey, wait a minute there is really an attack on the country through the use of commercial aircraft or for the use of the NAS, we, the military are going to want you to participate on this secure line.

And the way your protocol is set up at the FAA, you're going to try and pull us in on an unsecured line, well, we need to get these apples and oranges together in the same basket. And obviously, with hindsight you can see that on examining the conduct that day, but it would appear

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

an issue that could have been identified pre-9/11 in terms of communications issues, if both agencies had more--had done some exercises together, joint exercises prior to 9/11/

What we saw is that there really weren't.

MS. GARVEY: Yeah, again, I would, I think you're absolutely right, with the hindsight, you know, that's an excellent point and that's, I think a lesson learned.

But, again, given the context of the summer of 2001, believing that the threat was greater in other parts of the world and that that's where the threat would occur, it was not something that, you know, sort of leaped to the top of the list. We certainly did exercises, you know, in preparation for Y-2-K. There certainly were those sorts of exercises, so, and, clearly, that would have been a benefit at the time.

But I don't think--and I think because the net had worked in other hijacking situations, this was unparalleled, of course, but I don't think we had seen that sort of difficulty that would have

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

said, we better have another training exercise here.

MR. AZZARELLO: And I do recognize the other scenarios of hijackings pre-9/11 time wasn't necessarily of the essence.

MS. GARVEY: Time was not the, right, exactly.

MR. AZZARELLO: Do you remember, there was an exercise, I think it was called Twin Star, which was one of the only, I think joint exercises that we were able to identify that occurred, we believe, later in 1996, between the FAA and the military, where there was actually an airline company that actually allowed the exercise the use of their aircraft for the exercise, and some FAA employees even volunteered to play the role of passengers.

And the commercial aircraft, actually was a live exercise. They got airborne and it was reported as a hijacking. And then the communications started between the FAA and the military to try and track that aircraft. And I was wondering if--what we were told is that it didn't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

work so successfully that day. And they were never able to--

MS. GARVEY: I worked, actually for Federal Highway, in 1996.

MR. AZZARELLO: Okay, were there any exercises like that in your tenure that you can recall?

MS. GARVEY: There may have been at the Security level, in fact, I'm quite sure that there were. There were none that I participated in, though.

MR. KARA: Just to come back on the line that the FAA established that morning, the 9:20, line. The log clearly shows the FAA made the connection and the NMCC did pick up the line at the other end, but that connection being made, we don't find anything on either side that leads us to conclude that the line was ever officially or effectively used that day. But it was opened to be sure. The log entry is accurate. But nothing carried forward, at least that we've been able to find.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

And I talked to Shirley Miller three days ago on this and I said, Shirley, if anybody knows anymore information or has anymore insight for us, please let me know.

MS. GARVEY: Right, you were certainly talking to the right people. No, I mean, what I can tell you is that from my perspective, I was receiving briefings as the morning went on. I may have made a false assumption that some of it was coming from the net, but it was clearly coming from both the Security people and the Air Traffic people.

I will, and particularly, now that you've said that, much of what I was getting, though, was clearly Air Traffic stuff. It was Air Traffic information and, really, the sort of Security/FBI information, those were things that we heard after, you know, later on in that afternoon and in subsequent days.

We knew we had a situation, obviously; we knew we were under attack, but all of us at that point were focused on let's hear what the Air

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Traffic piece and most of the people who were in our offices during that morning, were the Air Traffic people, the Air Traffic organization.

MR. KARA: And Air Traffic did, in fact, have two lines of communication set up--

MS. GARVEY: Right.

MR. KARA: --they had the Cannoles' Air Traffic Suite and then the line that Jeff set up between himself and John White out at the Command Center.

MR. AZZARELLO: Do you remember, did you convey any information regarding United 93 on the SVTS to the White House representatives or other?

MS. GARVEY: I believe we said we were tracking it. Either I said that or somebody else said, I think, on one of the SVTS. I must say those conferences have run together in my mind. I mean, I know that we had several that morning. I know there was a sharing of information among the agencies. It was more status--quite honestly, I'm not sure that we heard anything on those calls that we hadn't already heard from other sources or from

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

other discussions in the morning, but it was more quick, tactical, what's happening reports.

MR. AZZARELLO: Do you remember when you first went into the room to participate in the SVTS, when you got to headquarters?

MS. GARVEY: Pretty early on in the morning, I do not remember the exact time. I know that Clark was on it. I know that the FBI, State, the various agencies that you would have expected.

MR. AZZARELLO: Do you recall whether it was pre- or post-Pentagon being hit that you were on the SVTS?

MS. GARVEY: I think it was pre-, but I cannot be exactly sure.

MR. KARA: Was Richard Clark, running the SVTS?

MS. GARVEY: Yes.

MR. AZZARELLO: He was running it, Clark was?

MS. GARVEY: I think Clark was running every SVTS that I was on, that I remember.

MR. AZZARELLO: Do you remember any DOD

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

representatives being on?

MS. GARVEY: I remember DOD being on, I cannot tell you who exactly was on from DOD, but I--FBI, I know was on.

MR. KARA: Do you recall Don Rumsfeld being on?

MS. GARVEY: The ones that I, I don't remember, and I think I might have remembered that.

MR. KARA: Yeah.

MS. GARVEY: But I don't remember him being on.

MR. AZZARELLO: Do you remember any on directions aimed at the FAA coming over the SVTS from the White House, from Clark?

MS. GARVEY: More--

MR. AZZARELLO: Suggestions or corrections?

MS. GARVEY: --more status reports; more, you know, keep us up to date, where are we, you know, that sort of thing; more status reports.

MR. AZZARELLO: Trying to get information?

MS. GARVEY: Information, yes.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: Was there any discussion on the SVTS about the grounding of aircraft with Clark?

MS. GARVEY: At one of the SVTS there was some discussion, and I think the actions may have already begun.

MR. AZZARELLO: That's actually--

MS. GARVEY: Not consistent?

MR. AZZARELLO: --yeah, I'm piecing together our time line, I think we--what we have put together is that there might have been a suggestion coming over the SVTS and the OAS about trying to ground all aircraft from the sky so that you could sort of get a handle on what's still up there that's a rogue aircraft, that's not listening to us, that's not coming down.

MS. GARVEY: That's very possible.

MR. AZZARELLO: And that that was passed over to the Command Center and they had indicated they had started?

MS. GARVEY: They started already, yeah.

MR. AZZARELLO: Any discussions about

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

fighter aircraft, do you recall in the SVTS in terms of fighter aircraft and where they were headed or whether or not they were affording protection to the D.C. area?

MS. GARVEY: I remember at one of the SVTS, there was some discussion about the fighters being up. I cannot exactly remember where but that actions had been taken. I think that was one of the things that DOD may have reported on .

MR. AZZARELLO: To the extent that you said, I thought, you recalled some discussions about 93, do you recall them being on the SVTS while Clark was present about 93?

MS. GARVEY: I'm not sure, I wish I were clearer on that, sorry.

MR. AZZARELLO: So, you're not sure whether they were real time discussions? Or discussions maybe after 93 went down? Are you clear one way or the other whether or not they were real time or perhaps afterwards?

MS. GARVEY: I thought at the point we were talking about tracking it, but I, you know, I

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

should be careful on that, because I really am not 100 percent sure. Some other things are clearer.

MR. AZZARELLO: One of the other questions, I had a follow-up with your Team 7 interview was that you indicated that there was--you indicated an open line for communications with the field and was asking them what was happening. Through what mechanism was that open line?

MS. GARVEY: It was really through Doug Davis and the Air Traffic folks in that part of the room.

MR. AZZARELLO: Doug got information from--

MS. GARVEY: Yeah.

MR. AZZARELLO: Yeah, actually, that part of it, as I think came to light in the hearing, that part, the early part of it did work well, in terms of gaining the awareness of 93. The request went out to the field facilities to report any suspect aircraft--

MS. GARVEY: Right.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: --and within minutes 93 was reported and it came up to Delta, at headquarters.

Do you remember, I guess, lastly on 93, there's--one of the two efforts is on the transcript, Doug's phone call with Command Center. In one instance Doug said that they're pulling Jeff away to talk about United 93. And this was, roughly, I don't know 10-minutes before impact, give or take a few minutes. Do you recall participating in any conversation with Jeff where he was pulled away to discuss with either you, Monte, or others the fate of United 93?

MS. GARVEY: No, I remember many discussions, I mean, several discussions, not many--several discussions with Monte. A couple that Jeff was in, I don't know if that one, in particular, whether he was actually pulled away to discuss it, but just, again monitoring it, watching it, a great deal of concern, a great deal of anxiety over it.

MR. AZZARELLO: And I guess, in that same

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

vein, right around the same time, maybe a few minutes before that when John White says to Doug Davis, hey, are they going to scramble on 93, because someone sure has to make this call in the next ten minutes or so, you know, it's 29 minutes out of DC. At some point Doug says, Peter is talking to me--referencing Peter Challenge, talking to Monte about scrambling, do you recall, did you participate in any--

MS. GARVEY: I did not participate in that?

MR. AZZARELLO: --with Peter?

MS. GARVEY: I did not participate in any--

MR. KARA: How about Peter and Steve Brown, were they major players that morning?

MS. GARVEY: Yeah, they were very visible, very much around yes, yes.

MR. KARA: We've covered all the points that we--was there anything left in your mind, having heard all the hearings now and things--

MS. GARVEY: I wish I had paid more

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

attention to that a lot of the hearings. There was one note that I just wanted to clarify and I may have misheard it, so if I, have please don't hesitate to push back. But, at one point, I think in the last hearing, I think it was Commissioner Layman [ph], mentioned that he thought that the FAA and I think he mentioned me, in particular, or the Administrator in particular, had received the--he referred to it as the August 6 memo. The only think I know of the August 6, was the Presidential Directive. And I think he said that that and, perhaps, other information had been filtered by a special assistant that I had.

And he referred, I think, back to Claudio Manno, that he thought that he had heard that from Claudio Manno. I just wanted to at least correct it, if I can. One, is that classified documents, top secret documents, none of that was ever filtered by anyone in my organization. And, in fact, those would have not gone through a special assistant, but would have come directly to me either by--the Security Associate Administrator, in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this case it was Canavan, before that, Admiral Flynn. Or they would have come to me through Monte.

And I certainly did not see the August 6, which is, by the way, not to say that I would have done anything differently, this is not a criticism one way or the other. But I simply did not see it. I don't believe anyone at the FAA, either General Canavan, though I've not spoken to him directly, but I don't believe he saw it or I think he would have told me if it was significant. And Claudio, I don't believe saw that, so.

MR. KARA: How did you receive your daily intelligence briefs?

MS. GARVEY: Well, certainly, obviously, if it were classified or anything, information I want to be clear about that, I got that directly. The only thing I didn't get it is over the phone. We were very careful about not doing anything like that over the phone. If I was out of the office, they either alerted me that I needed to see Admiral Flynn or Admiral Canavan or Monte when I got back

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

and I would do that or Monte would see me, personally, if the others were not around.

The daily ones, generally came through Monte, through Shirley, Monte and I can't say that I saw every single one, but certainly anything of any significance. One of the reasons I was very eager to have Monte as the Deputy was because of the breadth of experience that he had and the depth of knowledge that he had of the agency and particularly in those areas where I did not feel that my background--and Security, certainly, you know an area where his years of experience I thought was very valuable.

MR. AZZARELLO: Is it fair to say, I guess, is it fair to say with regard to the content of part of that PBB [ph], did the information come to your attention through any form or from any agency the intelligence that there were folks in the United States believed to be associated with terrorist organizations that were taking--engaging in preparations consistent with hijackings?

MS. GARVEY: No.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: None of that reached you prior to 9/11?

MS. GARVEY: Exactly. And even the Mossoui incident, which I know people have discussed, this is after 9/11 and I've gone back to ask those questions. As I understand it, we did receive work from the FBI in early September, maybe sometime, perhaps, around September 4, and that a memo was or it was part of an information document that came up to the Administrator that I may or it came, I think to Mike Canavan. I may very well have seen that, but the fact that the memo said someone was in custody and the FBI had it well under control, would have been a signal to me that that was a good thing. That would not have signaled to me, I need to act, I need to, you know, it was.

MR. AZZARELLO: The Phoenix memo, did that information come to your attention?

MS. GARVEY: No, I don't think it came to anyone at the FAA.

MR. AZZARELLO: Any of the Security folks?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: And the Security folks, my understanding is there's not, you may have heard, have no information on that. Some of this came to light after I left the FAA and so, some of that information, I, you know, have obviously not been able to ascertain.

MR. AZZARELLO: Five minute break and then we'll take about 10 minutes to wrap up?

MR. KARA: Okay, we're going to stop--

[BREAK.]

MR. KARA: We're back on the record with Jane Garvey on June 30.

MR. AZZARELLO: Could we, actually follow up on your interaction with Secretary Mineta after you arrived at headquarters, could you tell us what communications or interactions you had with the Secretary after you arrived back at headquarters after the second crash?

MS. GARVEY: Yes. The communication with the Secretary in his office was pretty direct and pretty frequent; all throughout the morning. I would say, you know, either I was speaking to him

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

or Monte was speaking to him on a very, very regular basis. Having lost a little bit of the track of time, but not unusual or it would not be, I think, inaccurate to say, you know, at least every five to ten minutes we were in communication with him.

And, certainly, when any information, new information arose, we would contact him. But he was very good about calling us quite frequently. If he was in the car and heading to a secure location, he was calling us, as well.

MR. AZZARELLO: What kind of information was he asking for?

MS. GARVEY: Pretty much, the information that you would expect. What do we know? Where are, specifically, what information are you hearing? What are you hearing from the facilities? What's the, you know, what's the Command Center got? He was definitely on a receive mode.

MR. : Do you recall him asking about whether the military had been contacted or whether they were involved?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: I don't recall that. There were some conversations that I was not part of that Monte was into.

MR. : Do you remember if you had contact with or communications with the Secretary after you arrived at headquarters and before the Pentagon was hit?

MS. GARVEY: Oh, I'm sure we did. I will not remember exactly--

MR. : I'm trying to put in context, I guess, one of the comments in your earlier interview with Team 7, basically they were discussing after the fourth crash, that there was a challenge in terms of determining about what to do with the national airspace, after the fourth crash in terms of getting all the aircraft down. And by that time, I guess, Secretary Mineta and John Flaherty had left to go to the White House.

And, I guess Monte had informed you that Boston and New York had already gone ATZ-zero and that the controllers had already started to take down all the aircraft from the national airspace

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

system and was it at that point you and him, Monte Belger, needed to get the Secretary more into the decision-making loop.

MS. GARVEY: On that particular issue?

MR. : Was it on that issue?

MS. GARVEY: It was definitely on that issue, yeah. I mean, I felt he had been part of the loop, you know, all morning, but on that particular issue.

MR. : So, to the extent that Dick Clark raised that issue on SVTS prior to the fourth crash, the issue being grounding all aircraft and to the extent that that was being discussed and done at the Command Center level at that point in time Secretary Mineta was not in the loop on that then?

MS. GARVEY: He may not have been, I'm not 100 percent sure, again of all the sort of sequence of those activities, but I know that the controllers began the action before the final, you know, decision was being made. But, we clearly felt--I think, by the way, and I notice that there

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was some discussion of this at the last meeting about whether or not, you know, any criticism had been leveled at the controllers. Boy, I thought they did just--and I think everyone, you guys seemed to agree that they did just a magnificent job.

MR. : On both sides, military and civilian.

MS. GARVEY: Right, and did the right thing and starting with bringing folks down or starting with the ground stops in Boston and New York and moving it to--

MR. KARA: Absolutely.

MS. GARVEY: --exactly the right thing. Obviously, anything of that magnitude you want to have the Secretary of Transportation--

MR. : Sure.

MS. GARVEY: --and, frankly, as soon as we got one quarter of the way through, you know, talking about it, he was, do, you know, let's do it. It was a pretty instantaneous, as you would expect, reaction.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. AZZARELLO: I think the genesis of that comment was, just when Jeff Griffith found out Ben Slyney had started, had made that decision already, and started to ground the aircraft, just so, you know, it wasn't completely unfounded. He said in the transcript, he says, Jack says, what are you doing making a decision like that, don't do anything like that, that has to be coordinated through the Administrator, don't do anything like that again without going through us.

So, he was, now this is, he's--Jeff is telling John White, not that Ben Slyney directly, so he's chastising the decision by Slyney through telling John White, don't you folks down there make any calls like that without going through--it has to be made at the highest level. So that's the genesis of it. Just so, I wanted you to know, it wasn't completely on their level.

MS. GARVEY: Was it that he was, I think, I know what I heard after the fact that there was some concern, not that they had made the decision, but more that they had been a little slower in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

letting folks know, since we were on sort of a real time thing but maybe, but you may be--

MR. : On the paper, it reads as, he said, Jeff says, take down all the aircraft, you know, ground all the aircraft, and White says, we already started that--

MS. GARVEY: Started that, yeah.

MR. : When did you start, he said, I don't know five-, ten-minutes ago. Well, don't make any calls like that; don't do that without consulting with us.

MS. GARVEY: Right.

MR. : There was a meeting, I don't sort of going forward post-9/11, a White House briefing on September 17. Did you attend that briefing at the White House?

MS. GARVEY: I know I attended a discussion in Andy Card's [ph] office, in Mr. Card's office, I do not know if it was the 17.

MR. : It was shortly after--

MS. GARVEY: It was fairly shortly after, there may have been other meetings that the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Secretary himself went to, without anybody. But at this particular meeting I don't believe--this was a--and, actually, this was a meeting that Michael Jackson was in, so I don't believe the Secretary was at that particular meeting, that I'm referring to, in any case. So, if there was a White House briefing of the Secretary, I was not at that.

MR. AZZARELLO: What was the nature of that meeting, what was the subject matter discussed at that meeting?

MS. GARVEY: With Secretary [unintell.]?

MR. AZZARELLO: Yeah.

MS. GARVEY: Really much more along the lines of, you know, again, status. What were we doing. I think at that point, it was a lot of the beginning of discussions on legislation and so forth, that may have been touched on, but it was, really, more a status of what we knew. The National Airport was a very big and hot issue. That was one of the key discussion points. We had the Secret Service there, as well. What were we going to do about National? Was there a way to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

bring it up?

What were we going to do about General Aviation, I think that there were some concerns that were being raised by some folks in some quarters about General Aviation. And I think that the Deputy Secretary was, really exploring as what some options might have been.

MR. AZZARELLO: Do you remember who, if anyone was with you from the FAA at that briefing?

MS. GARVEY: I may have been the only one from the FAA there at that point. I know that Michael--I was, I think [unintell.] Deputy Secretary Jackson.

MR. AZZARELLO: Do you remember if there was any discussion regarding the events of 9/11 in terms of an after-action review, along the lines of who and sort of who knew what when in the FAA and a discussion along those lines?

MS. GARVEY: No, no, not at, no, that was not part of that discussion.

MR. AZZARELLO: Do you remember a group that was put together at headquarters, we believe

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

led by Darlene Freeman, she recalled being tasked at the DSW, yourself and, perhaps, more directly Monte Belger and that they put together a working group to support her to examine the facts of the day of to work with Dave Cannoles and his group to do an after-action review and determine what--within the FAA system, who knew what when with regard to each of the four hijacked aircraft; when did we have--

MS. GARVEY: Time lines and so forth?

MR. AZZARELLO: Yeah.

MS. GARVEY: Yeah, absolutely, and I think they were really probably two primary purposes for that. We wanted to know so that we could learn and, obviously, if there were any changes that needed to be made, that was going to be one way that we would examine that. Although Monte also undertook a separate initiative, if you will, to really take a more specific look at the Ops Center, a more specific look at some of the Air Traffic Control issues and so forth. But we felt, obviously, we wanted to learn as much as we could

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

to make the necessary changes that we had to.

Secondly, we also knew that there would be congressional hearings and we had to have information prepared and ready for both the Secretary and myself, you know, if and when we were called to discuss the events of 9/11.

MR. AZZARELLO: Did either of you or both of you give testimony to Congress where you spoke about the time lines?

MS. GARVEY: We did give testimony to Congress, both, as I recall, it was a--there were two hearings, at least, that I'm remembering: One, in front of Senator McCain's committee; another in front of Chairman Rogers. I think they may have occurred on the same day, if I'm remembering that.

MR. : Was that October--

MS. GARVEY: Yeah, and we certainly gave as much information as we had at the time.

MR. AZZARELLO: In fact, I think some of the people who worked on the briefing book, that you said was one of the purposes to prepare you for any congressional testimony and--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Yeah.

MR. AZZARELLO: --figure out what happened in the events of the day of. Do you remember if there have been at least two witnesses of some of your managers who have alluded to the fact that there was, at times, early on, on 9/11, some heated discussions between military representatives and FAA management about who knew what when in terms of awareness of the four hijacked aircraft?

Particularly with 93, because, obviously, that sort of stands out as sort of a separation in terms of, you know, the military, as we now established at the hearing, that they didn't get notification until after it crashed from Cleveland Center, roughly four minutes after it crashed. And, yet, that information was held in the FAA both at the Center level, Command Center and at headquarters as early as 9:34 that the plane had been hijacked.

So, obviously that one sort of jumps out at you as, you know, the FAA, as an institution, had 29 minutes of advance notice that it was hijacked before it crashed and the military didn't

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

get notice four minutes after it was in the ground.

And, according to at least two witnesses, that was the topic of some, you know, maybe not so cordial discussions about who knew what, when, you know--

MS. GARVEY: You know, I've heard that, but I checked it out or at least I've asked people, the people, the person that was supposed to be involved was Jeff Griffith. And he said he never had any sort of heated discussions. There were points of differences in trying to reconcile it. I know that was an issue. And quite, quite directly, I thought that had been resolved. I knew that, you know, that came to me maybe a couple of weeks, maybe a month after or a few days afterward, there was some difficulty or some differences of opinion of what the time lines were.

And quite honestly, that seemed very natural to me, given the amount of information everyone was receiving; given some of the confusion that was occurring that day. I said, well, you know, obviously, sit down with NORAD, see if you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

can work this out or figure it out, we want to be as accurate as we possibly can and we want to be, you know, we, obviously, want to resolve it, if we can, you know.

MR. AZZARELLO: Right

MS. GARVEY: And I was told that, in fact, that it had gotten resolved and--

MR. AZZARELLO: It's interesting you said sit down with NORAD and figure it out--

MS. GARVEY: --or the military.

MR. AZZARELLO: --because I don't know if you know this, but NORAD did give their--a copy of their log, their operations log from the floor of the Northeast Air Defense Sector, which would be the folks asked to dispatch the aircraft and respond.

MS. GARVEY: Right.

MR. AZZARELLO: And they had that log and that log indicates that 10:07 is when they got the first notification of United 93 and--

MS. GARVEY: I remember that part, but I do remember their log being in The New York Times

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

or it was actually reported in one, there was one, their log or their time line was actually reported in one of the major newspapers, I don't remember which one.

MR. KARA: Well, it could be, on the 18th of September, they put out their press release.

MR. AZZARELLO: Yeah.

MS. GARVEY: Oh, that was it, yeah, thank you, yeah, that was exactly it.

MR. AZZARELLO: The at the FAA Dave Cannoles believed and Jeff Griffith, at least were the two folks that had access to the log, that copy of the Northeast Air Defense log. In addition to that, they created a separate--someone created a separate document and written on the top of it it says, internal FAA briefing.

From interviewing Darlene Freeman and people in her group, it appears that that document was created in the aftermath of 9/11 to brief upper management on when did the FAA gain awareness of each of the four hijacked aircraft and when did they tell the military. And what's interesting on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

United 93 is it says 10:08 and it actually cites to the Northeast Air Defense Sector log and represents that that's the earliest indication of any notification from the FAA to the military on United 93, which, frankly, coincides with what we found in our investigation. And I guess what strikes us immediately is if someone within the FAA, internally, is briefing that or making a chart out of it--making that a point in a chart, how then, could it be that in May of 2003 the military comes before the Commission, as well as FAA representatives and say, you know, 9:16, we were told about United 93?

In fact, that very same internal briefing document, notes that 9:16 time by the military that they were, I guess early on saying to the FAA that they thought maybe was accurate, and the FAA notation is it can't be because at 9:16 the plane wasn't hijacked yet.

And that, obviously, I mean, jumped out at us immediately, too, as that the first thing that the FAA would be able to ascertain from Air Traffic

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Control tapes is when was the--if the plane was taken over, when can we tell that someone breached the cockpit?

MS. GARVEY: Right.

MR. AZZARELLO: And so, that really leaps out at you, I have to say, and that's caused us great concern.

MS. GARVEY: Consternation.

MR. AZZARELLO: Yeah.

MS. GARVEY: Say that again, if the 9:15, if in fact in May that they testified--I'm sorry, I don't remember that.

MR. AZZARELLO: In May of 2003, the military came with this chart and slide show--a PowerPoint presentation and they said at 9:16, the FAA alerted them that United 93 was hijacked.

MS. GARVEY: Oh, I see.

MR. AZZARELLO: And it couldn't have been because it wasn't hijacked until 9:28. And that was known early on from the review of Air Traffic Control tapes. In fact there's a document created called Summary of Air Traffic of Hijack Events by

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the FAA--

MS. GARVEY: Right.

MR. AZZARELLO: --that Dave Cannoles and Tony Ferrante's group put together?

MS. GARVEY: Tony, yeah, Tony's had put together, yes.

MR. AZZARELLO: And it shows in that very time line for United 93 that 9:28 is when the series of transmissions occurred in the cockpit--

MS. GARVEY: Mm-hmm.

MR. AZZARELLO: --which alerted Air Traffic Control that United 93 was hijacked.

MR. : The--

MR. AZZARELLO: This is the May-- In fact, also, you see the FAA reports possible hijack of American 77, the FAA hijack summary that was prepared in September of 2001, by Tony Ferrante and Dave Cannoles does not list 9:16 as the notification for United 93. Nor does it list 9:24 as the notification of the hijack of 77. In fact, it gives no notification times to the military for either United 93 or American 77. And what jumps

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

out at you when you look at this is, they had the NEDS log, because in the very same Summary of Hijack Events, it cites to the NEDS log for the 8:40 time on the notification time of American 11 and it cites to 9:05 as the notification time of United 175.

And you know, I've gotta be frank with you, this has really disturbed me for a while. And I've asked witnesses and in upper level management at the FAA, you had the log, obviously, from NEDS. You're referring to it in you're referring to it in your summary, which was created within 10 days of the attacks. And you cite to it for notification of the first two aircraft. You give no notification, no citation for any notice on the last two, when the log suggests, specifically, at least on United 93, that notice wasn't given till 10:07, why wouldn't you put that data point in? And, frankly, one answer I got was, well, why would that be relevant because it's four minutes after the crash?

To which, I had to point out that well,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

your notification that you put in your Summary for United 175, is 9:05, that's two minutes after the crash, so, what's the dividing line there, you know, between what's relevant and what's not.

MS. GARVEY: So, why--

MR. : Excuse me, I haven't been present when anybody said he had the NEDS log. I--no witness that I've heard said he actually had custody of the NEDS log.

MR. AZZARELLO: No, Dave Cannoles said he saw a copy of it, he things Griffith had it.

MR. : Okay, and I don't know what Griffith told you, but the witnesses I've heard said that it is quite possible that someone called the military and got that particular time point and referred to it as coming from the military. But it's not necessarily so that anybody who prepared that list of times was looking at all the times on that log. So, you know, to be fair, I don't think we can--

MR. AZZARELLO: That's your first--that's your interpretation--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : No, it's the witnesses.

MR. AZZARELLO: Dave Cannoles said that he saw the log and he things that--

MR. : I wasn't there for Cannoles, but--

MR. AZZARELLO: I'm telling you what he said.

MR. : Well, I guess I'm long, you said that Cannoles actually said.

MR. AZZARELLO: Cannoles said he saw it, he may have--he may, himself, have also, like examined it, but he knows that there was a physical log and that he things Griffith had it. Griffith had extensive conversations, interactions with General Larry Arnold and said he gave him--he gave me whatever I needed, so that we could find out what they thought they knew from us and vice versa--we shared information.

We interviewed General Arnold and he said, whatever the FAA wanted, if they needed some documentation, so, who knew what when, I told my staff to make that available to the FAA.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: Mm-hmm. That was my understanding that people were very generous, both on both sides, by the way. No one was trying to one-up each other or, you know, hang the other guy out to dry or whatever.

John, let me ask one think and I it's actually going back, I think to the net, because you gave me and on 93, certainly, a sense of what happened that I didn't have before. I guess one of the things that I get I'm still struggling with. Did the military or NORAD, then, did they had, must have had some communication with, even if it wasn't the FAA, they were getting information from the White House or from--

MR. AZZARELLO: On 93, no.

MS. GARVEY: No.?

MR. AZZARELLO: No.

MS. GARVEY: Really?

MR. KARA: We know there's a section in the Northeast Air Defense Sector they're called identification technicians.

MS. GARVEY: Yeah.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. KARA: Their responsibility is to reach out and get information wherever they can. Those four young women in the space of an hour made about 20 to 25 calls to four--five centers. They talked to Cleveland Center twice before Cleveland Center finally told them about 93. Now, we don't fault Cleveland Center here, because Cleveland Center is made to report, via the protocols, to, they should have

MR. AZZARELLO: And they were told it was being worked when they said they would contact an independent base nearby, they were told, no, don't worry about it that decision has to be made above. On the FAA conference, about a minute before 93 crashes, someone on the FAA conference says, asks NORAD what information they have on 93, and they said, we don't have any information, we don't know about that aircraft.

MR. : That was 10:07.

MR. AZZARELLO: At 10:07, so it was actually--

MR. : Right as the Northeast Air

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Defense Sector has been notified, NORAD is--who hasn't heard this yet, is saying we don't have anything going to Washington.

MR. AZZARELLO: You know, I have to come back to it because, obviously, this is something that I've thought about long and hard. Come back to the point about the NEDS log and Brooke saying, that you know, at least, the witnesses that he sat in on that there was no one he recalled saying saw that.

Let's just even put that aside for a minute. How could it be that the FAA in an internal review in an after-action, who, I mean, you know, this is an agency that has to do reviews after accidents--

MS. GARVEY: All the time.

MR. AZZARELLO: --all the time. They know where to go to find the datapoints for when did we learn this plane was in distress. So, I think the simple, unavoidable fact here is that they had to know at 9:16 was not a good time for the military to stand behind and either put in a press release

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

or come before the Commission in May 2003 and say the FAA told us at 9:16 about the possible hijacking of United 93. I mean, if that didn't jump out at the folks who put together the FAA summary of events, then I don't know what would have. I mean, they knew, I mean, their own internal documents that said that can't be because the plane wasn't hijacked yet.

Now, that's an internal document that was created in September, '01. So, that's why it begs the question: Why, then, in May '03, or immediately after the hearing, did not someone from the FAA who was still there stand up and say, well, wait a minute, we've got, you know, we know that can't be true?

MS. GARVEY: Well, I knew that wasn't true. I mean, I knew that. I saw that. Not the NEDS document, but I saw the press release. And I think that's when partly, or that was when we had the discussion--we need to talk to NORAD, because we got some different things going on here. So--

MR. AZZARELLO: In fact, Darlene Freeman

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

said that they saw, she was asked, specifically--

MS. GARVEY: Kind of like--how did that, no, you're right.

MR. AZZARELLO: Darlene was asked specifically by Monte Belger to look at this NORAD press release and see what we, the FAA, have and if there's any discrepancies to bring it to our attention.

MS. GARVEY: Right.

MR. AZZARELLO: And so we wonder what happened with that discrepancy because we would think that would have been brought to the attention of Monte, then.

MS. GARVEY: I'm sure it was. But I think that that is exactly what, then the subsequent discussions with NORAD is, you know, we need to figure this out together folks. We didn't see the press release, as I recall, we did not--

MR. KARA: It caught you by surprise according to Darlene and others it caught you by surprise.

MS. GARVEY: Yes, we read it in the paper

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

when everybody else read it. And I looked at it quickly and thought, you know, it didn't leap originally, you know, immediately, just quickly reading it that morning, but I know Darlene was asked to do that. And I know we did focus on that, but I thought that people, therefore, had gone to NORAD, we had had lots of discussions about, you know, what is the right time line, based on what we know. Based on this log and so forth. And that something had been pieced together.

I cannot answer the question about May '03. I mean, I was certainly gone then, and--

MR. AZZARELLO: To your knowledge, then did someone from the FAA call a NORAD representative to say this is wrong, back in '01?

MS. GARVEY: I actually believe that to be the case. I'd be surprised if someone--I'm quite sure that they were in communication about--I don't know if they started the conversation with that particular one as wrong, but it was more, I think we've got some inconsistencies, we need to figure this out together. I mean, that was what I thought

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was--and that before I left, now, again, that year after was very, very busy with TSA and with, you know, a host of other things new Security Directives and so forth; National; General Aviation; so many things.

But I was under the impression that we had resolved the differences with NORAD and that, you know, we had arrived at a time line that worked. At the time that I was there, until August of 2001 that was good information to know. But, quite honestly, it didn't come up again in discussions until after I had left, yes.

MR. AZZARELLO: Do you remember if there was anyplace back on the military's end from notification on United 93, because we've seen some documents, some written communications between, internally within the military and military and FAA, which would indicate that the military did get some written notification or verbal notification over to the FAA that on United 93, to the effect that they didn't know about it--they, the military--until after it crashed.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. GARVEY: I'm not aware of that, yeah, I'm not aware of that kind of written documentation, I have not seen that. But I do know that we all knew that that was an incorrect time because of the reason that you gave. And that folks or I think, specifically Jeff, I could be wrong on that, but people from Air Traffic would then go back, talk with the NORAD folks and resolve it.

And I remember, at the time, and I've--no one was so concerned because people said, look, this was a confusing time, we got logs, you know, people were saying--nobody thought NORAD was either trying to do the FAA in or that we were trying to do them in. It was, really, we just need to resolve this. We need to spend some time and go through this. And this is going to be tough because we, you know, we've got some written information and some stuff we just didn't--we just moved too quickly and didn't put it down.

I've got to--am I going to prevent you from--

OFFICE OF INSPECTOR GENERAL

Case # 032R-024-2001

SWORN INTERVIEW OF
LYNNE OSMUS
BY
SPECIAL AGENT BILL JOHNSTONE
SPECIAL AGENT JOHN RAIDT

[No date provided.]

[TRANSCRIPT PREPARED FROM A TAPE RECORDING.]

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I N T E R V I E W

MR. JOHNSTONE: Okay, first we want to identify ourselves for the record. I am Bill Johnstone with the 9-11 Commission.

MR. RAIDT: John Raidt with the 9-11 Commission.

MS. OSMUS: And I'm Lynne Osmus with the FAA.

MR. JOHNSTONE: And we are here to interview Ms. Osmus for the Commission, whose mission I think you already know, but I'll state it just as our requirements. The 9-11 Commission has two major functions as established by the statute that created it. Number one is to investigate the facts and circumstances of the 9-11 hijackings. Number two is to take those facts, take an assessment of where we are now, and make recommendations to the President and the Congress for further improvements. The particular component that Mr. Raidt and I are involved in with the Commission staff concerns aviation and transportation security. And here today at the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

FAA, we will focus exclusively on the aviation side.

In telling our story, we are looking at three parts, and luckily for you, Lynne, you can testify in all three of them as can Mr. Morse did the other day to tell you. I'm not sure how long that one went. But we are interested in looking at the way the system that was in place on 9-11 evolved, the system, the Civil Aviation Security, what happened on that day and the immediate aftermath, that is kind of part 2. And then finally where we are today, and we definitely want to get your own recommendations for the final part of our mission.

As we said before turning the recording on, the policy of the Commission is to record these interviews. The interviewees have every right to review the tapes afterward. Beyond that, for us, this record is open as long as we're working on the report. The final report is not due until the end of May next year, and at any point, we would appreciate any further thoughts or clarification

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that you might want to suggest. So our record will be open.

MS. OSMUS: Okay, great. Thank you.

MR. JOHNSTONE: Anything?

MR. RAIDT: No. Other than maybe we want to describe--we kind of want to do this in three phrases. Pre-9-11, Aviation Security leading up to 9-11, then what happened that day are the areas that we're most interested in. And then again, the most important parts, particularly as a veteran of the system, your thoughts and ideas about where we can go from here, and also a little bit of the after-action stuff from 9-11. I would kind of consider that as part of the--

MS. OSMUS: Yeah.

MR. JOHNSTONE: Very good. First, for the record, if you would tell us about the positions that you've held that are relevant to Civil Aviation before and after you came to the FAA.

MS. OSMUS: Sure. Actually this is the part that makes me feel old. All of my federal career has been at the FAA. And I started with the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

FAA in 1979, having graduated from college in '76. Just did, you know, kind of first odd jobs prior to that, including being a screener for a couple of years, summer jobs and that sort of thing.

MR. JOHNSTONE: So you were a screener prior to '79?

MS. OSMUS: Yeah. One of the summer jobs when I was in college. My first job with the FAA was a federal police officer out at Dulles back in the days when Dulles and the national airports were still owned by the FAA. And then in 1981, I was hired by the Aviation Security organization within the FAA in Los Angeles at a field office. And stayed there holding a series of kind of developmental assignments, including being a federal air marshal and--

MR. JOHNSTONE: Approximately when?

MS. OSMUS: That would have been '81 through '86 I think I was involved in--

MR. JOHNSTONE: Okay, so the FAM service was during that period?

MS. OSMUS: Yes, a couple of years during

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that time. And then I came back to Washington in a senior staff position in '86 or '87.

MR. JOHNSTONE: And that was--that position was?

MS. OSMUS: It was in the domestic security program and I was like a GS14, senior staff professional. Became a branch manager, responsible for airport security, which at that time was domestic airport security within the U.S.

MR. JOHNSTONE: And that would have been approximately?

MS. OSMUS: Probably '88, give or take. And then became the division manager, also responsible for airport security, probably a year or so after that. And then obviously in 1988 in September was the PanAm 103 attack, and we had a significant reorganization within the Aviation Security organization subsequent to that, and as a result, I was acting director in a new position that was established, director of Policy and--

MR. JOHNSTONE: That would probably be Aviation Security?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: Part of Aviation Security. Essentially the difference then which carried through the organization--I mean if I could just take 30 seconds to explain it. We did an internal evaluation at the FAA led by folks outside of the Security Organization after Panama 103, and one of the conclusions they came to with which all the security officials concurred was when there's an instance like that, either an attack or even a situation where there's an increased threat, which leads to additional counter measures with surveillance and inspection and that sort of thing, the entire focus of the organization as it was configured then where policy and operational issues were not separated, were totally focused on the day-to-day operational issues and longer term planning, strategic planning, rule-making, anything that wasn't something that needed to be accomplished, literally within that 24-hour period fell by the wayside. Really didn't get the attention it needed. So the organizational changes after Panama 103 established an alternate policy

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

which obviously contributed to day-to-day operational issues, but their main objective was the long-term planning, the rule-making to change the aviation kind of landscape for the future, the development of the security programs and proposals to the industry, the--and that sort of thing.

The operational part of the house was the larger piece of the organization in which all the field inspectors were invited, the federal air marshals were invited, the Principle Security inspectors and others, and essentially it was to conduct inspections and ensure compliance with the rules that were promulgated in the policy office. Obviously both shops contributed to that policy development and that sort of thing in order to keep it current and reflective of operational impact. But it allowed us to split our focus.

And frankly the time that it probably worked the most effectively was in 1995 when we had the Asia-Pacific threat. The operational people were totally consumed with that and got support from Policy, but the policy work

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

continued. And when we looked back on that, it was that organizational cell and serviced us quite well.

So I was the director of Policy for a period of time, and then went for about six months in 1991 on a developmental detail as a specialist --with the administrator who was Admiral--at the time. And that developmental process was part of the preparation to become an executive, which I did in '91, I think it was.

MR. JOHNSON: I'm sorry, Lynne. You said the previous assignment was when?

MS. OSMUS: That was in late 1990's or early 1991.

MR. JOHNSON: Okay.

MS. OSMUS: Six months.

MR. JOHNSON: Okay.

MS. OSMUS: And then in 1991, I was selected as director of Operations.

MR. JOHNSON: And when were you director of Policy?

MS. OSMUS: It must have been in 1990.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSON: Okay.

MS. OSMUS: And I was director of Operations in the Security Organization till about May of 1995 when I went to be Chief-of-Staff for then Administrator David Henson, and I stayed as Chief-of-Staff until November of 1998. Jane Garvey was the administrator then. And November of '98, I went to Brussels with the FAA director of our office there which is the Europe-Africa and Middle East office.

MR. JOHNSON: 1998?

MS. OSMUS: Yes. And I stayed in Brussels until November of 2000. And came back for about 57 months as the acting assistant administrator for Aviation Policy and International. And then in June of 2001, went to the Security Organization to be the deputy associate administrator.

MR. JOHNSON: Administrator?

MS. OSMUS: Yes.

MR. JOHNSON: I'm sorry. The date on the Aviation Policy International?

MS. OSMUS: That would have been from

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

November, 2000 to June, 2001.

MR. JOHNSON: Okay. And how long were you in the position of deputy associate administrator?

MS. OSMUS: Until TSA took over management of the Aviation Security program which would have been February of 2002. Technically I was still in that position on paper for a while, but in the middle of March, we pretty much transitioned out of--I pretty much transitioned out of doing Aviation Security issues because TSA was up and running. So then I assumed sort of the liaison position in the Office of the Deputy Administrator, you know, working on things like the MOA that FAA developed with TSA and obviously trying to work out and coordinate a million issues that we both cared about, Air Traffic coordination issues and crisis management. In addition to kind of sorting out the personnel issues because--was transferring to a new organization.

MR. JOHNSON: And today, bringing us up to--

MS. OSMUS: And today, as the TSA role

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

kind of diminished or became more normalized so it wasn't a full-time position anymore--

MR. JOHNSON: Your role was working with Control?

MS. OSMUS: Right, right. I assumed the responsibility of THE assistant administrator for that part of the former Security Organization which focused on internal security of FAA facilities and FAA personnel and the hazardous materials program. So the official title was assistant administrator for Security and Hazardous Materials. That is essentially the chunk of the former EPS that did not transfer to TSA.

MR. RAIDT: Well, that's an issue that we'll want to talk to you about, you know, the FAA's role in security now. And also kind of the impact of the evolution of those responsibilities to TSA, what impact that's going to have on the system.

And we were up in Dulles tower and we were talking to some of the controllers about what they have to do now, and I asked one of them whether

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they ever worried that some of their security focus is going to take their eye off their Air Traffic Control focus, and they said frankly they thought that was the case. So I'd like to talk to you a little bit about that too.

MS. OSMUS: Okay, sure.

MR. RAIDT: Yeah. Lynne obviously you have a wealth of information, or it's just because you've been here for so long, and, you know, it's real important for us to write the history of Aviation Security and how it's relevant to the system status on 9-11. So, you know, we'll ask you as many questions as we can think of, but if there's things that you feel that we should know, please fill in any gaps.

So I guess what I'd like to do is start with just a more fanatic question, and really we want to lead up to 9-11 and just describe the mission of Aviation Security as you saw it. And also what you saw as the weaknesses and strengths of the system. Ours is a very general question. We'll get more specific than that, but let's start

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

with that.

MS. OSMUS: Okay. Well, the sort of the mission was to protect by making sure we had appropriate counter measures in the--for obviously aviation within the U.S. but also U.S. carriers that operated outside of the U.S. And over the years that had evolved from, you know, the 1970's when our focus was really on traditional, usually individual hijackers out of Miami or southern Florida that wanted to get back to Cuba kind of thing to a much more sophisticated series of requirements that apply to U.S. carriers wherever they operated around the world, and to airports located in foreign countries that had flights either by foreign carriers or U.S. carriers to the States, and foreign air carriers that operated to the U.S., when over the years kind of slogged through a myriad, as you might imagine, issues about sovereignty with other governments and that sort of thing.

And so by the time we came to 9-11 and rules that had been in place up until that was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

essentially one rule, Part 129, that applied to foreign carriers operating to the U.S., Part 108 then applied to U.S. carriers wherever they operated, and then a program of foreign airport assessments which was laid out in legislation to actually direct the Secretary to make determinations on whether foreign airports being served by U.S. supported carriers, then IKO standards. And that was really the key for us that we were assessing them against international standards, but it wasn't a U.S. policing against the U.S. standards.

And so you had IKO standards in effect at foreign airports, and then FAA required security programs that came from our rules and where the documents are not publicly available because they had all the nitty gritty counter measures in them that were approved and in place for every foreign carrier and U.S. carrier flying to the U.S. So our inspector workhorse traveled overseas. We had numbers of folks located in Brussels and other small offices across Europe and Asia-Pacific to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

inspect those with support from our opponents workforce.

So essentially the focus there was on passenger aircraft because historically the intelligence essentially had been both hijacking and attacks on aircraft with explosive devices or aircraft that carried people, which we can talk about later. The changes after 9-11 obviously were we simply had not contemplated aircraft being used as weapons as we saw on 9-11 and large numbers of people on aircraft to be used in exchange for hostages and the traditional hijacking and also where the huge impact that we saw after Panama 103 where the jumbo aircraft is blown up in midair. Those were the kinds of targets of opportunity and choice for the terrorists and-

Strength in the system, I think--actually it's interesting for me to come back with the Security Organization after having been gone for about six years, and I've kind of contrasted what I can see when I left in '95 to what I see coming back in 2001. And one of the big differences which

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I think was a strength was kind of the emergence of data system that had been in their infancy when I left in 1995, which were rarely automated. And when I came back, there were a series of systems that were placed with an inspection data on adequacy of screening, what kind of metal detector detected them, what kind of weapon and what kind of X-ray, if it could be sorted by screen, company and air carrier and airport and all that sort of thing, were much better in terms of data analysis and trend analysis, and being able to build on that kind of data.

There were others which I suspect you folks are aware of, those ones put together put together in the Policy office by Mike McCormick that gave us a more quantifiable way of saying we've got counter measures against all these avenues of access, what are they giving us, which ones should we bolster if the threat changes, and that sort of thing. So we had a more quantitative way of looking at the adequacy of existing counter measures, and then when additional threat came in,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

make more informed or better informed decisions not having changed those measures.

Weaknesses system-wide I think was associated with the hundreds of thousands of people at airports in this country specifically, but also around the world, that are involved in the implementation of Aviation Security, and sort of a human factors thing. Happily, knock wood, they aren't events that happen frequently. And so anyone, be it a screener or a carbo handler or a rat person or a mechanic, whoever, who all have safety and security obligations while they're working in airport restricted areas likely don't have at the top of their list of things to worry about that day, keeping an eye out for bad guys. So it's just sort of--complacency I think is too strong a word, but just the numbers of flights and things that go well on a daily basis didn't make a concern that even increased threats domestically something that the average worker in airports were aware of.

And that's one of the reasons that Claudio

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Manno's shop, and along with the folks from the Operations office of Policy spent a lot of time kind of over and over and over reaching out to Security directors of the carriers and the airport directors with information about the threat, as we saw particularly within the U.S. but overseas as well, to keep us informed that, although we hadn't had an event, that didn't mean there wasn't anything to worry about.

I mean I think the complexity of the system is really what I'm getting at and just the number of folks involved in it with whom communication needed to be maintained pretty regularly in order to keep the importance of their job right in front of them.

MR. RAIDT: Associated with that, what would you say was your greatest frustration as a manager in these areas with respect to applying security? Was it, you know, the whole horizon of things, whether it was in a ruling that was tough to do, people, you know, couldn't take it seriously because of the lack of actual incidents? What was

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it that frustrated you?

MS. OSMUS: Oh, I don't know. I wouldn't say rule-making I don't think. I mean we have the ability if we had a threat change in the moment to issue security directive and change security programs, but I really can't tell you I can think of a single incidence where we needed to get a different security measure out there and couldn't do it. It was a difficult construct, though, to work through the air carriers to get adjustments in, having the fundamental baseline measures like what's goes on at screening checkpoints and that sort of thing on a day-to-day basis, which I think is one of the real improvements of having a federal workforce, or frankly contract workforce that was overseen by federal supervisors. I think you could have got to the same place because the carriers are in the business to make money, and the security directors, the vast majority of whom I had gotten to know real well and they were good actors in either job, but they had to explain their requirements for additional measures that cost

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

something to their higher up. And then they had to tell their bosses that they had grilled the FAA and, you know, poked at everything we told them was a threat to make sure it was.

Occasionally, probably a little bit less when I came back in 2001, but I've seen it a little more in earlier years, some of the Security directors would have been former, you know, FBI folks or DJ folks who have personal connections with people in the intelligence community. And they would go talk to their personal connections and perhaps get an opinion different than what our Intel office was putting out. Well, that's like, you know, somebody on the street calling one of my inspectors and asking for a personal favor. It's not the Agency position. But we did have that pretty continual debate, and sometimes not in a healthy way with the air carriers about what the threat was and why we were requiring measures of that--

MR. RAIDT: That's interesting. We've heard that from a few sources that this kind of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

back channels what's undermining the FAA. And so to capsule that, then we have the cost issue versus the absence of incidents which really drove--okay, we'd better do it, so it's kind of tough, and then the idea of that being able to show them the risk in the absence of incidents was undermined by the fact that some of the Security directors were going right to their former colleagues and getting opinions that undermined FAA--

MS. OSMUS: No, I have to say that the--part of that is when it was perfectly clear to the industry, like in '95 when we had the Asia-Pacific threat, that we really had breaking, you know, literally breaking. It's like being in the middle of the movie, unfortunately breaking intelligence reports coming just about every afternoon that we were responding to. There was no delay on their part in response. So when they really knew there was an issue, they were very effective with what they did.

MR. JOHNSON: Was that different overseas

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

versus domestic too? Would you break it down-

MS. OSMUS: Yeah, actually I think that's an interesting point. We had always had a higher threat overseas, and I think that's right. I think there was sort of an easier ability for the carriers to understand that it was the more likely venue in that instance to occur overseas. After the World Trade Center bombing and then the connection that was made between the--threatening and the Asia-Pacific in New York,--obviously came to the conclusion that the threat within the U.S. with trans-national terrorists was higher than had been thought. That was one that it was difficult I think for the carriers to really understand it and quantify it.

Frankly I think people within the Administration were struggling with it too. I mean, you know, the FBI knew it, but they couldn't say how much of it was here that wasn't known about, and I think people were trying to be careful to really make that field assessment could be made and not overstated but not understated. So for a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

period of time we were trying to get the measure of what it was, and I remember one of the former--I guess it was Admiral Flynn--it's kind of like a Cheshire cat. You know, you've got the faith and you see it in--so there was a period of time when people were really trying to get the sense of it and without hard quantification, the carriers are not going to be persuaded. So I think that's a good point, as we were getting into that kind of new environment.

MR. JOHNSON: Can I ask you another general question, and then we'll--

MR. RAIDT: Yeah, I have one more general one.

MR. JOHNSON: All right. Do you want to ask your's first?

MR. RAIDT: Yeah, yeah, just because it's related to this. In trying to organize our report, and even though we're dealing with a lot of people who don't know the organizational structure of the FAA, we're trying to take great pains to be able to explain to people the situation. We're kind of

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

divided up into institutions and Civil Aviation Security from, you know, Congress to the FAA to the air carriers to the airports, and define and give an exposition of what it is they were responsible for, and given those roles and responsibilities and then quantify and list the vectors of the layers, what each was designed to do, and knowing, you know those institutions and vectors better than this side of the table but looking at the institutions, the roles and responsibilities and the vectors in a general sense, how well do you think that worked, as far as the roles and responsibilities of regulation and operation, or did you see the weaknesses there? And also, you know, were you satisfied particularly as you came into the ASC that the effectiveness of the vectors as a layered system to counter the threat as the system understood it at the time?

MS. OSMUS: The role and responsibilities I think, and it maybe it's just because I've been involved in this for a while, they didn't trouble me. I mean partly because I was used to them.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

There had been debate of three or four times that I can think of over the previous 10 years about, maybe even going back further than that, about what legislative authority that required the air carriers to be in charge of screening was appropriate and should that be changed. And every time it was looked at, it was looked at by JO and the IG and others.

The conclusion was the carriers had to be in charge of it because it was their aircraft. They had liability for when on board that aircraft, and they were in the best position to know all of that. And the carriers up until 9-11 wanted to maintain that because it impacted their scheduling. They couldn't, I don't think, imagine the situation where they weren't in control of how the aircraft were loaded.

We were working to see if there were a couple of pilot projects we could initiate--San Francisco with a very dynamic airport Security director out there and others to see if an airport did it, the screening and so forth even on a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

limited basis, it would be a difference in efficiency. And really airports would want to do it from time to time if they saw the difficulty--logistical difficulties just kind of walked away from it.

So while I certainly think working through the air carriers as I described earlier was a difficult thing to do, it wasn't clear to me that putting that relationship someplace else would necessarily be a better fit at the time. I mean at that time, I could never--the federal workforce doing screening. We would've been laughed out of town. It would've been possible I think to have airport operators do it, but the issue would have been the same issue that FAA and other agencies have, broad regions across the country have, is an issue of consistency. And everyone would have wanted to have to do it to make the consistency work. We didn't have that kind of interest on the part of the airport operators or the carriers. So not that there couldn't have been different models, but there just wasn't the kind of impetus to make

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

any different model work, given the really large change that would have meant.

MR. RAIDT: Yeah, and did you ever get the feeling that cost was an issue with respect when the federal government said all right, should we take on this role knowing that that would be very expensive?

MS. OSMUS: Oh, sure. I mean, you know, we had just gone through downsizing, what, four or five years before that, and the numbers here even if they'd been the numbers like the industry--

MR. RAIDT: Did you ever wonder, hey, it probably would work better this way because OMB and others were saying, you know, this is just too expensive, it's a non-starter?

MS. OSMUS: No, not really. I mean part of my issue was having been a screener. I mean at the time I think we were making a little more than McDonald's but not a heck of a lot. There's huge turnover, and the company that I happened to work at was well managed and people were happy there. It was just a job without much of a progression, so

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

I imagine the same thing in the federal workforce, and I think they will be struggling with that at some point. What do you do after you've been a screener for a year or two? It gets exceedingly boring. So I mean I thought there were implementation issues with it beyond just the fact that I didn't think that side of the federal workforce would ever be seriously--

MR. RAIDT: And how about the layers of vectors in Security in the threat as we understood it?

MR. JOHNSON: And maybe we could hear you talk about those in terms of strengths and weaknesses.

MS. OSMUS: Well, there were some areas that we knew we needed to do additional bolstering.

MR. RAIDT: Let's go through each vector. Let's start with the intelligence. What did you see as the strength and what was the weakness of the intelligence?

MS. OSMUS: Actually the strength--but I think the way the intelligence--was set up really

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

was one of the best in government.

When I was at headquarters having come back from California in the mid'1980's, we had one guy who was a former military intelligence officer that was the intelligence to the FAA at the time. He was working through personal connections. The next person that came in started to establish an office, and things had gotten progressively better because folks were brought who were serious about their intelligence entities and were brought in here that were--and as Claudio will probably--they were--looking at the threat to the aviation perspective. And having seen the issue that this office identified kind of teed up the rest of the community to look at, evaluate and develop international intelligence--and that sort of thing.

MR. RAIDT: The 1990 act that set up how was a really good thing.

MS. OSMUS: I think so, yeah. The folks who were brought in to do it I think did a really outstanding job. What we thought had been lacking after Panama 103 as we looked at the intelligence

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

sharing with the intuition that the FBI and others really recognized that they really had this stuff. I think that has significantly improved--the thing that was still I think a work in progress I suspect and still is a little bit is that, you know, the FBI previously had been and still is the--tutorial and investigative entity that kicks in after something happens. They were much, much used to looking out and anticipating threat as we were used to--. And so we didn't have, and I don't know how Claudio would have described that today, but there wasn't the same kind of information available about what was going on after--

MR. RAIDT: Yeah, he had a very interesting formulation. He was saying that they would tell the Intel communities you can tell us what's going on in the street in Kabul, but you can't tell us what's going on in Atlanta. And we heard that consistently that it was just felt that there was a real blind spot with respect to what was going on.

MR. JOHNSON: Yeah, that's one of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

others I used at Detroit and Bangkok.

MS. OSMUS: Yeah, right. So we knew there were things in terms of--as I described earlier--other vectors. My concern was were we getting things like EDS now, check the baggage, protection area (inaudible) and that's another big difference I noticed when I came back in 2001. We had hundreds of units out there that (inaudible). So I think that was the beginning (inaudible).

MR. RAIDT: Let's talk about--is that all on Intel?

MS. OSMUS: Yeah, I think so.

MR. RAIDT: Well, let's talk about pre-screening, both kind of with respect to CAPS and a little bit--maybe you can help us put our arms around how some of these lists were developed that the air carriers have for people to watch out, but pre-screening in general. Let's start with CAPS and what you thought was good or bad about that.

MS. OSMUS: You know, I think to develop the criteria on which CAPS was made, and I'm sure

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you know by now it's not just one-way ticket (inaudible). It was very violent and we went back and looked at this again after 9-11, particularly in light of the suicide hijackers. The fellow that was Claudio's (inaudible) on CAPS, developments and implementation here who is now working in Ellsworth CFA, casually reached out to an Israeli expert on suicide bombers and suicide terrorists-

MR. RAIDT: And this is after 9-11?

MS. OSMUS: No, this was before. And the definition and criteria for CAPS. I'm trying to figure out how much you weight things which might identify or be associated with travel habits of someone--

MR. JOHNSON: Do you know when the outreach would have been?

MS. OSMUS: Well, let's see. CAPS was sort of put in place in the mid-1990's. They were kind of reviewing the criteria all along. So I'm not sure where we ever implemented it or whether it was one of those--

MR. JOHNSON: But mid-'90's would be the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

guess?

MS. OSMUS: Yeah, yeah, I would guess. James Padgett is the expert on it if you want to talk to him.

MR. JOHNSON: (Inaudible).

MS. OSMUS: Yeah, he can give you hours of detail.

MR. RAIDT: But suicide bombers was something that was factored in--

MS. OSMUS: It was looked at, yeah, and the assessment of--the bottom line is (inaudible) on all the details (inaudible) but the bottom line was the attack by suicide bombers was not believed to be high on our list of concern according to an expert as well. This was consistent with what the community thought.

So criteria was good I thought. What we saw was implementation by carriers is pretty good, and there had been significant work done with the Department of Transportation and (inaudible) equity and how travelers were being identified to see if there were any ethnicity issues that we needed to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

worry about, and that was going okay.

But the problem with it is there's such a limited database on characteristics of people with terrorism, the targeting nation, that you use, what you can glean from that is a very small number, so we always knew that. It helped us focus resources (inaudible) when we needed to continue looking at it to see how we could either tweak it or replace it with the version (inaudible).

MR. RAIDT: Yeah, I've been fascinated, and I don't want to waste your time focusing on because Jim Padgett sounds like a good person but just the mathematics behind what he weighed and how at the end of the day you come up with something that people above this threshold (inaudible) and those below it--

MR. RAIDT: Would we have to go over to the TSA skid to be allowed--

MS. OSMUS: Yes, you will. Yes, you will.

MR. RAIDT: Although we were told that it was on the Internet that we'd have to go over to the skid.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSON: Right. Some students had done engineering of it and came very close.

MS. OSMUS: Is that right?

MR. RAIDT: Lynne, we were told by somebody, and I just want to get your reaction to this characterization, that they thought that the development of CAPS was rather ad hoc, that it was a bunch of people sitting around, just kind of making guesses that, well, goes back to the--something that looks a lot more professional?

MS. OSMUS: Yeah, it was (inaudible). (Inaudible) and those folks was looking at it and we got into it with a lot of other agents but the one that (inaudible) which ones mattered and then translating that into what it would seem like in the U.S. I mean we've got (inaudible) further documentation versus the (inaudible) so it limited the things that could be looked at, but given the information and the data that was used, I think it was a pretty good first step.

MR. RAIDT: And the limited database of what attackers looked like, that was one of the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

problems with it, but did you see any problems with the net effect of who legitimate--civil liberty concerns or what was your attitude about that?

MS. OSMUS: The part that began I think to undermine the credibility of this because it couldn't be precise enough to only identify the bad guys, picked up a lot of people that by nature their travel would also be (inaudible) selectees-- flight numbers of Congress who traveled at the last minute might trigger one of the eight criteria, and the more that happens, the more people wonder if it's really picking out the right folks. So I think there was public confidence in it and then, you know, (inaudible) tend to have to change it in ways you'd rather not have to.

MR. RAIDT: Was there any frustration at any point where, you know, you felt, well, in 1986 you had Osama Bin Laden declare war against the United States and then in '98 reiterate that threat saying that the citizens were subject at 93, you know, where the threat is at home, where, you know, like we've been declared war against. Now why

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

wouldn't we have as an automatic part of that anybody carrying a passport from, you know Arab--I'm saying this--the Arab countries, blah, blah, blah, blah, so we picked up all these people and that I presume was probably not allowed, you know, by the system. Was there any frustration either here or in the building that, you know, we shouldn't be getting in these people, but because of these other concerns we can.

MS. OSMUS: No. Primarily because we knew there were Americans (inaudible) terrorists groups and that people that look like Europeans or ethnic Middle Eastern folks were specifically used that time, so as has been shouldered in older people when (inaudible), but I mean people that clearly don't (inaudible) because it wouldn't have been a--

MR. RAIDT: (Inaudible) transcended that.

MS. OSMUS: Yeah.

MR. JOHNSON: One other aside on the CAPS. Can you talk to us briefly wherein about the consequences of CAPS?

MS. OSMUS: Sure.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSON: We had gotten testimony, including at the hearing we had back in May about the focus on unchecked baggage. So could you talk to us about how you thought that worked or not?

MS. OSMUS: Once we were certain that the threat (inaudible), our biggest concern was how to check baggage (inaudible) because at that point in time in the mid-1990's, the (inaudible) requirements for some segments of checked baggage but not all of it, and that was that we had had India Development which from years, actually quite a generation (inaudible) started in the last 1980's (inaudible) which you may have heard about and got significant funding from the deployment after TWA 100 (inaudible) but we got funding (inaudible) getting some of that equipment out in the field, but we knew given the (inaudible) degree with which it could be manufactured and then could be implemented in an airport that wasn't developed originally for those kind of (inaudible) equipment, it was going to take (inaudible), so CAPS was implemented to look at people about whom checked

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

baggage we thought needed scrutiny (inaudible).

MR. JOHNSON: Was that specifically developed for that purpose?

MS. OSMUS: Yeah.

MR. JOHNSON: Not for a larger purpose?

MS. OSMUS: We've been exploring how you really focus in on people that you're really concerned about and CAPS is a concept of whittling down the entire (inaudible) population for additional scrutiny. It was under development for a while. But the implementation (inaudible) consciously was to focus on checked baggage.

MR. RAIDT: And to facilitate the phase-in because that was just a reality. In other words, you can only check one in 10 and let's try to identify who that one in 10 should be.

MS. OSMUS: That's right. So in CAPS (inaudible) re-checked baggage (inaudible) or (inaudible). And the other thing quite honestly was some of those things are kind of tough to do. (Inaudible), so we also wanted them to understand that when they got EDS (inaudible) a lot of them

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

were more eager to get it. It would facilitate their flight operation. So it was a security thing and sort of an encouragement to the industry to help with (inaudible).

MR. RAIDT: Well, while we're on this topic, after TWA 800, there was a security directive in fact that as we understand it, it's a practice (inaudible) that said that selectee not only had to have their baggage checked under the list of ways that were appropriate to do it, but also that they would receive additional scrutiny at the checkpoint. And that security directive we're told was expired in '97. And so we're curious. Do you have any knowledge of that at all?

MS. OSMUS: I don't. I wasn't in the skip at the time, and I've never heard of that.

MR. RAIDT: Yeah, okay. How would you react to that just as an observer?

MS. OSMUS: Not knowing the context of why it was issued, if it was issued, I can't tell you.

MR. JOHNSON: Who would be in that time period, '96, '97, who would be the authoritative

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

people--

MS. OSMUS: Admiral Flynn would have been the head of the Security Organization, the first of nine Security directors.

MR. RAIDT: And he would have been the one to decide whether to allow a directive to expire.

MS. OSMUS: Yeah, yeah, yeah.

MR. RAIDT: Okay. With respect to CAPS as it was devised to facilitate a limited capacity of the AVS, was there even at that time, was that seen as the sole purpose for computer (inaudible) re-screening, or was there a broader Band-Aid that wanted to--

MS. OSMUS: Well, prior to CAPS being developed, (inaudible), we kind of had the same problem over there in terms of focusing (inaudible) people that we're concerned about. So there was a manual pre-selection (inaudible) criteria that were required of U.S. carriers flying to the U.S. from foreign countries.

MR. JOHNSON: Do you know the time period for that one?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: Oh, boy, when it was started. I don't. I can't tell you when.

MR. JOHNSON: Okay.

MS. OSMUS: It's been there for some years. I would guess early '90's, maybe even a little before that, but that's just a guess on my part.

MR. RAIDT: And when was the CAPS--we should know this, and I'm sure we do. When was that first implemented? (Inaudible) high security directive?

MR. JOHNSON: (Inaudible).

MS. OSMUS: That's right. They did have a program.

MR. JOHNSON: That was endorsed by (inaudible), and that effort was what was gradually adopted by more airlines as I recall in that period and then--

MR. RAIDT: Was it (inaudible) or was it--

MS. OSMUS: No, I think it would have been a security program (inaudible).

MR. RAIDT: So there was in effect a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

manual--

MS. OSMUS: A manual one.

MR. JOHNSON: And that was just overseas?

MS. OSMUS: Overseas, yeah. And that's why I say although CAPS was used for domestic check bags, it was under development--I'm to figure out a more sophisticated way of narrowing down the scope of the population traditional measures (inaudible). We were hoping at some point to get an automated version overseas. It was just labor intensive.

MR. JOHNSON: We were just trying to ask about that '96, '97--

MR. RAIDT: Did you have the idea that you wanted a broader scope--

MS. OSMUS: Oh, yeah, thank you, thank you. Right. Just knowing that thousands of folks travel on a daily basis, we figured if there was an automated way--a more sophisticated and accurate way to help us narrow down the people to which security resources were proposed, that would be a good thing.

MR. RAIDT: Okay. Oh, this no-fly-in and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

watchlist. We understand that there was--the only no-fly list was basically a security directive that said if these people show up, don't let them fly.

MR. JOHNSON: Is that correct?

MS. OSMUS: A couple of different things. We'll go back a little ways. Some years before 9-11, and I'm not sure the first time we got this request, there would be occasionally a request from somebody in the intelligence community who said look, we've got and X, Y and Z, these people traveling from here to here, where we think they're going to be (inaudible) in some part of the world and need information that may conclude they're a threat to aviation. Claudio's folks will verify that. And they would ask us, well, what would you suggest about that (inaudible). (Inaudible) and Claudio's folks would track the progress of these folks through their ICF and when their travel or their--they weren't picked up or whatever, or they were found out to be suspicious people after all, that security directive would be cancelled.

MR. RAIDT: Now was that information

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

loaded into the CAPS software, or was this manually done?

MS. OSMUS: No. The carriers originally, they did it a different way. We sent it out to them by security directive. Some had the ability to load it in their automated (inaudible) pop up that way, and others did it manually, depending on the kind of system they had on a station by station basis.

MR. RAIDT: Okay, and just so I know the manual--I'm the check-in person. A person comes in and they establish their person, name, record or whatever they're checking in. I've got to look at that name and then go over--

MS. OSMUS: She's got something else to refer them to, yes, not automated, triggered (inaudible).

MR. JOHNSON: But some you said have the capability.

MS. OSMUS: Some, yes.

MR. JOHNSON: Which airlines specific?

MS. OSMUS: (Inaudible), exactly.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT: And did that ever worry you guys operationally that, you know, that millions of people coming through that the person's supposed to check-

MS. OSMUS: Well, it didn't happen--I mean in those days, they didn't get that kind of alert that often. Tended to get folks attention and we only left it out there long enough, you know--we didn't leave it out there for a long time. So it gets back to that issue of keeping security at the job in front of everybody. But it (inaudible) because it was unusual enough they were likely enough to look.

The next thing that occurred actually since (inaudible) and I guess (inaudible). He at the time was doing big (inaudible) and actually came through on an official visit one time. And it was very clear that there were people looking for him, and so for a while, he was traveling out of the UK, had a very effective security firm at the UK that kept operationally security for his travel quite tightly done, but I think (inaudible) that he

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

found that to be constraining. The security firm dumped him essentially, and he began traveling a lot and (inaudible) with his itinerary and that sort of thing. Very dangerous. So that drove us to prepare a security directive which we called something like threat to people or something like that. He was the only name on it, and it was specifically for that situation. Had several discussions with him too in the days when I felt like I was in the twilight zone and explained to him why, so that was that thing.

And then after 9-11, and the Bureau developed this very large list because I think at first it was 200 people. It grew for a while as we began to sort through it. That became what has been known as the watchlist.

MR. JOHNSON: So there was nothing other than in terms of the sources of information (inaudible) had to keep people off the plane. Essentially it was security directive pre-9-11.

MR. RAIDT: And the list that the air carriers may have had (inaudible) for people who

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

had caused them problems that have no real--

MS. OSMUS: (Inaudible). I don't know about that.

MR. JOHNSON: Didn't have any security-

MS. OSMUS: Now it may be--the only other piece that needs to be completed that is--occasionally the FBI could be working on something involving criminal directly with an air carrier, which was fine, but in terms of what we regulate and require, that (inaudible).

MR. RAIDT: Okay. Anything else in the pre-screening that's there that we don't need to know about? Those are the two things we've already seen in the pre-screening?

MS. OSMUS: Yeah, yeah.

MR. RAIDT: Okay, that's it. Okay. Let's go to checkpoint screening then. Again, kind of strangely this is how you divided up--addressed the threats as you know.

MS. OSMUS: Well, strength I think is finding the things that have been historical weapons used at hijacking which were guns, knives

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

(inaudible) as well, and where we had been going with oh, probably from the early '90's to the time I got back in 2001 was helping to educate the screener workforce telecon (inaudible) suitcase and carry-on luggage. And moving away from, you know, kind of the antiquated big (inaudible) we had used in the early '90's, late 1980's to something that was developed by the (inaudible). I don't know if you've come across that before. (Inaudible) what we configured to look very different and were much more representative of the kinds of things that we (inaudible).

MR. JOHNSON: (Inaudible) showed it to us.

MS. OSMUS: Did they? Yeah. Good, good. So the equipment that was there was again physically capable of detecting firearms and knives and things like that. Physically capable of detecting through X-ray or metal detectors (inaudible).

MR. JOHNSON: On knives, could you provide any more specific detail? (Inaudible). I don't think we've gone anywhere beyond SSI level at this

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

point, but I thought you said at the outset, you'll indicate when in the (inaudible) of where we're going because we have great capability obviously in your facility here to go. I mean we're cleared up to SCI, but if you could just point out when you go above SSI level. We assume all of the rest is of SSI--

MS. OSMUS: (Inaudible), that's right.
Yeah.

MR. JOHNSON: But if you'll just point that out.

MS. OSMUS: Okay.

MR. JOHNSON: So if you could talk for a minute about the system's capabilities for knife detection and distinguish in terms of knife size or configuration, that would be, you know, helpful.

MS. OSMUS: Do you want to talk a little bit about how we came to the--

MR. JOHNSON: Yes, that would be good.

MS. OSMUS: Actually it happened years before I ever came to the Security Organization, but I remember some of the old-timers talking about

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

it, and it was really two pieces. One was traditional hijacking that historically lasted some hours or some days. He picked out (inaudible) 47, which just went on and on and on. The ability to keep a margin (inaudible) at bay, even if you have a lot of hijackers, requires weapons that are sufficiently threatening (inaudible) that will happen. And so the weapons of choice were large knives (inaudible) to intimidating to, and the threat was (inaudible), and (inaudible) firearms.

MR. JOHNSON: And in terms of getting through the (inaudible) or whatever standards-

MS. OSMUS: (inaudible) some time in the '80's, and I can't give you a date because I've not been able to find it, but there was sort of an informal survey done of state law and (inaudible) were illegal and that three-inch determination arrived at as--

MR. JOHNSON: I'm sorry. The three-inch?

MS. OSMUS: I'm sorry. Four inch.

MR. JOHNSON: Okay.

MS. OSMUS: As a size that was small

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

enough to be legal, kind of typical size mounted pocket knives, cutlery and that sort of thing, and not large enough to be used as a weapon by the traditional hijacker. No more scientific than that.

MR. JOHNSON: (Inaudible).

MS. OSMUS: Yeah, yeah.

MR. RAIDT: So that's really helpful.

(Inaudible) answer that question, but that was the IKO standard, and our sense was that while we were the ones that dictated IKO standards, so where did we get--so that's kind of how that went. Okay, so went from this to the IKO and then back at us through IKO.

MS. OSMUS: And I can't even tell you. I mean I'm not personally aware that the IKO--it wouldn't surprise me if it was. I'm sure that's how it got there. I just don't--IKO or not.

MR. RAIDT: When that standard was set, what's the process for setting the standard? That's just the decision. There's no rule-making associated with--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: Those (inaudible) security programs, so it would have been in the (inaudible) and that sort of thing.

MR. RAIDT: At some point we want to talk about how those worked and how they were updated, that type of thing. So let's not forget that.

MR. JOHNSON: And now so this standard is set at four inches. Can you talk to us about the system's capabilities of enforcing that standard? And now we're talking mainly about screening, but if there were other elements, that'd be fine too.

MS. OSMUS: So three ways really that someone with a knife in their possession or a firearm could be (inaudible) checked baggage and observed in X-ray, or on their person and identified through the metal detectors as soon as they walked through them, or through a hand (inaudible) after that. Before 9-11, we didn't have the kind of physical (inaudible) that are much more frequent now. (Inaudible).

I don't know if you were given the tests that were done on the X-rays, but it's really a

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

wire test, very, very narrow band of metal (inaudible) actually for an (inaudible) that's going to be seen because of it's broad surface, and even if (inaudible).

MR. JOHNSON: What level should we classify this at?

MS. OSMUS: Just regular (inaudible).

MR. JOHNSON: Okay. What would be the threshold in your view for knife size and X-ray detection? I mean would it be less than four inches?

MS. OSMUS: Oh, yeah. I mean--

MR. JOHNSON: (Inaudible).

MS. OSMUS: So if you have a knife like this laying like this flat, and you're reviewing this, and winding up even at two inches, you're going to see it. It could be just hidden from like clutter, but anything that (inaudible) which a metal knife will be on an X-ray, (inaudible) needs to be examined by (inaudible) X-ray operator can't determine what it is. If it's on edge, you'll see that line. It could wider than the wire tabs on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the X-ray (inaudible) and it depends where it is. If it's on the side that's sticking, (inaudible) X-ray operator, but if the line is--

MR. JOHNSON: About an inch and a half. (Inaudible).

MS. OSMUS: (Inaudible) bag it then.

MR. JOHNSON: Okay.

MS. OSMUS: Knives typically aren't thick enough that even at an inch and a half flat, you're going to see that outline, and they're not just rectangular, you know, so I mean they're actually going to be an easy thing to actually--

MR. JOHNSON: Have you seen any of the press accounts of the weapons, purchases of the hijackers?

MS. OSMUS: No, I haven't.

MR. JOHNSON: If you were told that it's at least thought that they had been buying knives specifically that were less than four inches but were somewhere in the one and a half to two and a half, all the way up to four inches, at least (inaudible) in terms of X-ray detection, would you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

believe that those knives either would have been detected or would have registered in such a way because they were at a sharp angle so (inaudible) profile that that should have triggered (inaudible)?

MS. OSMUS: Well, you know, it depends. I mean depending on how they're configured in the bag, how much other stuff is in the bag, I would have expected them to be visible. Now on a plane, an astute X-ray operator that's worked long enough on the type of machine I mean the image can sometimes scratched. Worked there long enough, you can tell by looking at the image how big the knife is pretty much. So the other possibility is that if anybody saw the image of the knife, less than four inches, and then worked there long enough to know (inaudible) okay to go through. So there's a lot of tough positions (inaudible) with that.

MR. RAIDT: And how about the magnetometer? Would that calibrated where someone with a four-inch knife--

MS. OSMUS: You know, Lyle Malotky, if you

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

haven't talked to him yet, is our technical advisor and he still is-

MR. JOHNSON: I'm sorry. What's the name?

MS. OSMUS: Lyle Malotky. M-a-l-o-t-k-y. He was the scientific advisor to Apius I and II when he was here, and I think he does similar work now at TSA. He worked with the Tech Center a lot and can tell you the quantity of metal, however that's measured, to trigger the metal detector. And it was associated with small firearms that we (inaudible) to be more and more available on the market.

MR. JOHNSON: So it would be--just to your understanding that (inaudible) that between two calibers as a test item. Is that roughly would be your guesstimate of the metal content that would trigger--

MS. OSMUS: We were actually developing test protocol using (inaudible) small guns, configured differently to make sure we were covering the--different metal detectors have different characteristics. So I mean Lyle can give

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

you the (inaudible) to make it more accurate.

MR. RAIDT: (Inaudible) but policy-wise, what was the discussion with respect to making sure that we calibrated the calibration of the magnetometer with what was prohibited and what wasn't? Did somebody say okay, let's figure out the metal content of the average four-inch knife and let's calibrate to that level, or did we know there's going to be a blind spot, or was there not supposed to be a blind spot?

MS. OSMUS: I know we calibrated them to small handguns that we were concerned about going through. Whether we did at the Tech Center (inaudible), I can't answer that. I don't know.

MR. RAIDT: Okay. From a policy standpoint, was there any discussion, was there any concern that, okay, we've got a standard of four inch and we've got a calibration that's up here. We've got this blind spot. What do we do about that?

MS. OSMUS: I don't know the answer to that.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. JOHNSON: Mr. May, do you have any comments--James May, for ATA at our May hearing--Sorry. At our hearing in the month of May testified that yes, they had box cutters on this checkpoint operations guide that's restricted items, but that the FAA standards that they were forcing--that their magnetometer were set to detect small metal content of small handguns or larger, and therefore they shouldn't be kept off. Do you have any response to Mays' comments?

MS. OSMUS: Box cutters, typical box cutters--I mean and (inaudible)--that small metal content wouldn't have been enough to typically trigger a metal detector unless (inaudible), which is why after 9-11, we (inaudible) screening and that sort of thing (inaudible), you know, and expanded the (inaudible) process to check baggage as well because we were doing additional measures to make up for it (inaudible) lack.

MR. JOHNSON: As a former screener, if you were given the words and no further explanation that box cutters were a restricted item, but

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

utility knives less than four inches were an explicitly approved item. How would you--in your screening capacity, how would you have distinguished with the one than the other?

MS. OSMUS: Well, I didn't know, which I wouldn't have. I would've asked (inaudible).

MR. JOHNSON: Okay, okay.

MR. RAIDT: But as ACS2 time, I mean if there was any concern floating around that, you know, we have a detection capability. We have a prohibition. There's a gap. We're just confident that the hijack protocol that somebody with a four-inch knife isn't going to be able to do a whole lot.

MS. OSMUS: No, it wasn't something we were focused on. This is why (inaudible) difference in that reason. What we were seeing was the terrorists building (inaudible) in the '95 threat which (inaudible), and there are things hidden under seat cushions and life preservers and that sort of thing (inaudible). And we were getting reports of weapons being capable of firing

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

one cartridge hidden in lots of belt buckles and other things that look pretty (inaudible). So we were concerned about that kind of (inaudible).

MR. RAIDT: So we're going to hijack, and they ended up (inaudible).

MS. OSMUS: That's exactly it. And what we had seen in hijacking in terms of knives (Inaudible) big ones, big size. Frankly, I was worried about a five-inch knife at one time.

MR. JOHNSON: Okay, but you had some confidence that the knives, large knives could be detected.

MS. OSMUS: Oh, yeah. They were detected by the hundreds every year. We have records about that.

MR. JOHNSON: Could you point us to those records because we have--in one of our earlier document requests, we got data from the checkpoints that someone actually used. And they're (inaudible), and now I'm beginning to wonder whether it was just because of the classification. But while they listed guns that were collected, and

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

a couple of cases bombs or explosive devices, and none of them had any list of large knives confiscated at any of them. One of the FBI people writing the reports exclusively said that one of the checkpoints, by the way, no knives were confiscated. So if you could think about that, and, you know, let us know of where we might get data on whether or not that is true and whether they're collecting it at the airport level or at the checkpoint level. I mean even if it was at the airport level, that would be helpful because, you know, that limits our (inaudible) for the (inaudible).

MS. OSMUS: Yeah, I don't know about specifics that FAA--ACS used to do a report to Congress every couple of years is rolled up kind of programmatic (inaudible), and so there was a national compilation of things found and knives were--

MR. JOHNSON: Well, can we ask you though to just check and see, you know, what is the source for that and see if you can just point us to

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

where--

MS. OSMUS: I think Courtney Tucker would be--he was the first that was preparing it when I was last here, and he's got--he's the person that keeps all the files at his fingertips, so if he doesn't have it in his personal possession, I bet he can tell you who does.

MR. RAIDT: All right. Anything else on checkpoints, Bill?

MR. JOHNSON: No, no. I have just one general, but were you going to go through the rest of them?

MR. RAIDT: Yeah, I'm going to access control.

MR. JOHNSON: Okay, good.

MR. RAIDT: Okay. So on access control and on baggage and stuff.

MR. JOHNSON: That's more--let's just hold off on that.

MR. RAIDT: We might want to go back and talk to you on that.

MR. JOHNSON: Yeah, because we don't want

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

this to go all day.

MR. RAIDT: On access control, the one question that I have is that I'm still not able to discern in my mind who the heck was responsible for--with respect to checking background. First, I thought it was the airports, and then I thought it was FAA and now I think it's the air carrier, but could you kind of run through all the different categories that people that work in an aircraft, who is responsible--now I know that anybody with access to the AOA has to be credentialed by the airport. But who is responsible for doing the background check and what did that background check entail?

MS. OSMUS: Airport employees have had access to what we call the five areas, the security identification area and have (inaudible) by the employer, by the airport operators. And my short-term memory is going to get me. I can't give you all the particulars of it. (Inaudible) I think went back I think 10 years--

MR. RAIDT: So it's a year gap and then

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they had to--

MS. OSMUS: Right, to trigger any criminal history, right. That changed over time, so I'm not sure that I'm giving you the most recent version. Some of it happened before I came to Aviation. Then we changed it again after 9-11.

MR. RAIDT: Okay, I'm with you up till then, but here's what then confuses me is that when you say airport employees, you're talking about not like the ramp rats and people who are--

MS. OSMUS: Somebody that works for Los Angeles International Airport.

MR. RAIDT: Okay. Now does the same rule apply if you're a ramp rat or something like that with respect to the air carrier? They had to do the same thing, the same year and if not, a background.

MS. OSMUS: Yes.

MR. RAIDT: And the airport had nothing to do with that background check.

MS. OSMUS: Well, the airport had to do one before an airport could issue an airport I.D. badge

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

for that employee. They had to (inaudible) by receiving some confirmation (inaudible) that a background check had been done.

MR. RAIDT: Okay, and then I assume the FSM or the (inaudible) look over to make sure that they were doing (inaudible).

MS. OSMUS: Yes.

MR. RAIDT: All right.

MS. OSMUS: (Inaudible) complicated. The other piece of it was we were--FAA was facilitating those background checks (inaudible) working as the point of contact because they had to go to OPM to get access to the criminal history. So there was a process that started, I don't know, four or five years ago, an increase (inaudible) kind of gone on line, which you get automated fingerprints. So we were the facilitator of it as well, so that's another kind of (inaudible) blurb a little bit.

MR. RAIDT: Okay, so basically the airport had to (inaudible) everybody with respect to airport employees. They had to do the 10-year background check. If there was a year missing,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they'd do the criminal background checks. The air carriers did their folks, and the FAA facilitated access to the database.

MS. OMUS: That's correct.

MR. RAIDT: Now so that's with access control.

MR. JOHNSON: And in terms of strength and weakness of that, did you have any concerns?

MS. OSMUS: Was and is one of my biggest concerns. Getting back to my original comments, there's literally hundreds of thousands of (inaudible) that access and although for years part of their training to get I.D.'s knowing to challenge people, knowing when to wear them, knowing when the look (inaudible), behind them, you know, through a secure door. Incredibly difficult, and we were looking at this issue in ACS before I left in '95. I think it was in 1994 (inaudible) the same time the IG was doing the audit found terrific problems with it. And (inaudible) who was my deputy at the time spent just about all of his time for three weeks (Inaudible) and when we

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

focused our inspector resources on that almost to the exclusion of everybody else, there was penalties in training increased (inaudible) significantly and then as we started to go back to a more normal spread of our resources, we could see (inaudible) attention.

MR. RAIDT: And on that line as the air carriers, do they now contract out with Sky Chef or, you know, the Gourmet or the Refueler, or whatever it is is the contractor. If they're in the OA and they're a contractor there, the air carrier has to see that those people have a background check bar none, correct?

MS. OSMUS: Yes.

MR. RAIDT: Okay, because that's one thing we do need to check about 9-11 whether, you know, the Sky Chef or Gourmet or all those people really did have--I was just astounded at the number of people that had access to the aircraft.

MS. OSMUS: Now remember again, in terms of where they are in the airport, not everybody in the AOA have (inaudible).

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT: (Inaudible), okay.

MR. JOHNSON: Just to finish out on this so maybe we won't have to come back to access when we get to the other phases, are you aware of any evidence in terms of the 9-11 hijackings that would indicate this particular vulnerability was exploited in any way by the 9-11 hijackings?

MS. OSMUS: No, I don't know.

MR. RAIDT: So next is control. We want to talk a little bit about what we call aircraft protection which is we equate with access control, and that being that the protocols that the flight crew had with respect to hijacking and that type of thing.

MR. JOHNSON: Common strategy.

MR. RAIDT: Common strategy, and this feeds into what the vision of the hijack protocol would be. And why don't you ask the questions?

MR. JOHNSON: Okay. You talked about three things with regard to aircraft security. One would be the flight crew training. We've seen in the standard security program the outline that FAA

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

provided, and we've seen the training film that was used back then. So it seems (inaudible) so you don't need to go into a lot of detail on it, but the other two would be the air marshals and how you saw them during your--covered them at several points in your career and you've been one. So you're uniquely qualified to talk on that. And then third would be aircraft hardening issues, and in particular your thoughts on the concept of cockpit door hardening. So if you could just talk about these.

MS. OSMUS: Sure, sure. The outline of the cockpit need to be trained providing to the flight crew for training in terms of (inaudible) hijack response was taken by the air carriers and developed into a training program to cover the security piece. It was typically presented at either an initial recurrent training for flight crew (inaudible). The principle Security inspectors were providing each of them major carriers. Many of the little ones worked with their principle Operations inspectors which were on

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

the same (inaudible) looking at the adequacy of the (inaudible) training. And the two of them would collaborate and recommend approval for training programs and then also collaborate on oversight of the training program. It's one or the other and then sometimes goes through (inaudible) training. You know, they'd make sure there was really (inaudible) standard.

MR. JOHNSON: Do you have any thoughts on the content or the adequacy of the current strategy that existed up till 9-11?

MS. OSMUS: I mean we thought it was the appropriate content. It was in the process of being updated again. Not because we (inaudible) 9-11 hijacking (inaudible), but happily we hadn't had hijackings for some time involving U.S. carriers. In fact the last one, I think it was a foreign carrier, I think it was 1994 from Frankfurt over here. So we wanted to look at the content in terms of the FBI response to see if their technology could change the (inaudible), and little things, like the fact that there were cell phones

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

that you could have on the aircraft (inaudible) plane phones. That was a twist that we hadn't envisioned, but, you know, it was that kind of outdated kind of (inaudible). No, but we were all (inaudible).

MR. JOHNSON: Okay, now the FAM's-

MS. OSMUS: Air marshals. Yeah, they really evolved over the years-

MR. RAIDT: Before you answer, let me ask one more question on that. I have a friend who is a flight attendant and we talked about some of these issues, and I was just asking her about her training too I think with American because I've always been real curious as to why flight attendants call certain facilities from the aircraft--

MR. JOHNSON: During the hijack.

MR. RAIDT: Yes, during the hijack, and I said well, what were you told, what was her training. She said well, the training I had was that just if there's a problem, you contact the cockpit. That's all you do. And I said what

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

happens if the cockpit's disabled, the pilots didn't--we've never even, you know, talked about that. It was always just call the cockpit. And I guess my question on that is that being the case, that's, you know, the proper training, at the same time as we were having, you know, air raids and cockpit intrusion problems, what's your best guess as to why there would have been some thought to saying well, what do we do if the cockpit is attacked, the pilot's (inaudible) respond to an emergency? What's your thought on that?

MS. OSMUS: The training is a little (inaudible). I mean it's (inaudible) completely accurate. The rest of their training was to understand the other resources (inaudible) for that aircraft (inaudible) communication systems to tell somebody something's going on. And then the rest of their training was what turned out to be (inaudible), which is calmly, rationally. You don't need to excite the hijacker. Try to, you know--

MR. RAIDT: Don't serve alcohol.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: Yeah, just kind of let it play out while the law enforcement resources are brought to bear. From a safety perspective (inaudible) to protect kind of the occasional nut factor, if you will, by (inaudible).

MR. RAIDT: I wanted to pass this on too and please take whatever steps you think, and I don't know if it was isolated, or there was a policy and there's no longer. I suspect it not's, but this individual said that the curious thing to her too is when she left, she just went on to another job, they didn't ask for the cockpit keys back or manuals or anything, you know, nobody asked for a thing back. And I assume that's changed, but just wanted to relay that. If you could do whatever you need to do just to --yeah, this was surprising, and I don't know whether that's really something that we ought to try to recommend if there is a (inaudible) real protocols about doing that.

MS. OSMUS: Yeah, absolutely.

MR. JOHNSON: So that has evolved.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: Yeah, I mean it started years and years and years ago when there were a series of hijackings down in southern Florida. It was actually in (inaudible) and it was made from (inaudible) volunteers from a bunch of different agencies. Literally from (inaudible) hijacking aircraft. And then (inaudible) director to establish a (inaudible) within the FAA which would have been early (inaudible) I think and that was the first group which I wound up being a part of for a period of time in (inaudible) compared to what they are today. We had training, not like the sophistication today, and it was pretty (inaudible) to protect against. So we didn't have any intelligence--we didn't know anything about how the bad guys might be training. We were just trying to keep people from (inaudible) aircraft. After the threat of an international hijacking began to emerge in international locations, the FAM training was adjusted to really critique (inaudible) dangers, (inaudible).

MR. RAIDT: When you say they, was it by

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

Presidential directive in the '80's. We were told that the FAM program started back in the '70's in customs or something?

MS. OSMUS: Oh, it did. I think it was voluntary, people from other agencies bringing together customs and others when it was established in the FAA there was a TVD involved.

MR. RAIDT: Oh, okay.

MS. OSMUS: And we (inaudible).

MR. RAIDT: When you say it's a voluntary, somebody said let's get an air marshal program. We're not going to have a dedicated air marshal. These are just different agencies saying--

MS. OSMUS: (Inaudible) in a hurry, that came together and worked, and I'm not sure how long that went on.

MR. RAIDT: But, I'm sorry, that was post--the PDD in the '80's was--

MS. OSMUS: The originally emergence of the IVF.

MR. JOHNSON: And do you remember whether that was Presidentially driven?

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MS. OSMUS: I don't know. I'll have to (inaudible).

MR. JOHNSON: Okay, okay. We have some conflicting information.

MR. RAIDT: Okay, okay.

MR. JOHNSON: No, that's okay. We don't expect you to know everything.

MS. OSMUS: As you know, if my short-term memory is worse than my long-term, (inaudible). So in the early '90's the FAM force was training (inaudible). Let me make sure I get the dates right here. At that time, which would have been early '90's, it was--we were hiring new folks (inaudible) at FAA, and one of their--one of the duties they had to agree to do was to be a federal aviation marshal because they wanted to increase the force. They were posted at all our (inaudible) around the country. They came together in teams (inaudible) and that was one of the duties they needed to do (inaudible) and that sort of thing. Over time, we concluded we could put together a workforce to look at that little task force in

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

early 1990's, (inaudible), look at the way we're configuring the federal air marshal force with the force to see if we were doing it most efficiently. And the conclusions from that, which they definitely made changes accordingly, but it was much better to have a voluntary federal marshal board made up of people that did it pretty much on a permanent basis because they wanted to do it. And then after so many years when they had enough travel (inaudible) they would rotate back into an aviation inspector position.

MR. JOHNSON: When was that approximately?

MS. OSMUS: That was the early '90's. If I could remember exactly when. Maybe '92, early '90 in any event. (Inaudible). And so we transitioned--

MR. RAIDT: Well, we know someone who we can ask for details on that.

MS. OSMUS: Yes, you can. He knows that inside and out. And training was increased as well (inaudible) standards to be a federal air marshal were increased. (Inaudible). There's also an

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

evaluation of whether or not the program needed continuing (inaudible) and the threat evaluation was done and potentially we determined we needed to continue with them for threat of international hijackings continued to be at international locations. At that point in time, there was a (inaudible) was done again when Admiral (inaudible). We kind of looked at--giving the layout of the world at the time, the (inaudible) location at (inaudible) and that analysis continued

[Tape becomes increasingly difficult to hear that this point.]

UNITED STATES DEPARTMENT OF TRANSPORTATION
OFFICE OF INSPECTOR GENERAL

Case # 042R0122001

SWORN INTERVIEW OF

MONTE BELGER

BY

BILL JOHNSTONE, 9/11 Commission

JOHN RAIDT, 9/11 Commission

[NO DATE PROVIDED.]

[TRANSCRIPT PREPARED FROM A TAPE RECORDING.]

MILLER REPORTING CO., INC.

WASHINGTON, D.C. 20003-2802
(202) 546-6666

I N T E R V I E W

MR. BELGER[?]: [in progress]--and then in 1986 or so, was selected as the Deputy Director for the Great Lakes Region.

In 1988, I came to Washington as an Associate Administrator. I think at the time that particular title was Associate Administrator for Aviation Standards, I believe was the title at that time. Security was one of the programs that was in my organization. I went to Washington around September of '88 and December 21, '88, PanAm 103 happened and my life was consume by PanAm 103 for a couple of years. And from '88 until I retired in 2002, I was in Washington in a variety of senior management positions.

The last five years as the Acting Deputy Administrator from 1997 to 2002. And I actually retired as the Acting Administrator, about a month and a half just before I retired. I retired in September--September 13, 2002. And I went to work for--started to work for Lockheed/Martine Lockheed Martin in January of this year, January of 2003.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. : With your history in the system, start with that with a general question. In the period leading up to September 11, 2001, what did you see as the strengths--the primary strengths and the primary weaknesses of the Civil Aviation Security System?

MR. BELGER: Well, I think the strengths, lets start there first. I think the strengths were manifested in the fact that there had not been a domestic hijacking or even a significant domestic security event for, jeeze, I don't know, eight or ten years, it seemed like, at the time.

There had been some international events, but nothing that affected U.S. carriers and nothing, domestically, so it appeared as though things were under control an working okay.

There was in place a, if I can use the word, profiling capability for passengers with checked baggage that was designed to kind of counter the explosives threat. In the several years, prior to 2001, the public interest, congressional interest, the primary FAA interest

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

from the Administrator and my standpoint was on capacity and congestion. And we had a terrific team, that was one of the strengths I should say that, too.

People like Admiral Flynn, who was the head of security at the time was extremely well known throughout the intelligence communities, had great rapport. We had a great deal of confidence in him.

MR. : And what about on the down side, what did you see as weaknesses?

MR. BELGER: Well, as always, I think the capability or the ability to detect everything going through the screening points has always been a weakness. I don't know that we'll ever get 100 percent, but that's, probably, always been--at least in my view--a weakness. The inability to detect everything all the time.

And as it turned out, you know, I probably wouldn't have answered this this way at the time, but, as it turns out, I think one of the real weaknesses was the sharing of intelligence

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information.

MR. : But that's something
that's been more apparent to you--

MR. BELGER: Oh, absolutely, you don't
know what you don't know.

MR. : Monte, thank you for being
with us.

MR. BELGER: Yeah, sure.

MR. RAIDT: In case it hasn't been made
clear, what we want to do is to create [unintell.]
pre-9/11 and 9/11.

MR. BELGER: I'm sorry, what was your last
name, John?

MR. RAIDT: Raidt, R-a-i-d-t, John.

MR. : I'm sorry, I should have
added just one other administrative thing that our
hearing record remains open, you know, anything you
care to submit post now--

MR. BELGER: Okay.

MR. : --up to when we do the
report.

MR. BELGER: Just like on the Hill, huh.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT: Let me say for the record, too, that this wasn't operating for the first, you know, minute or so, so we provide the normal briefing on the purposes of the Commission and started to get Mr. Belger's background.

There's so much to cover, by obviously we'll use our time to actually focus on really, the essential things. I'd like to kind of go down with you, first, general treatment of intelligence and the security function from the Administrator's office, leading up to 2001. And then go over the vector to ask you a few questions, that we have on each of those.

MR. BELGER: Okay.

MR. RAIDT: So, as a general matter, could you tell us, both for yourself and then interfacing with the Administrator the frequency and the methods by which you had obtained not only intelligence of what the threats are, but how's our security system doing?

MR. BELGER: Okay, well, let me start, I mean, with my background in security, I knew the

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

people. I knew who to go to to ask questions if there was any specific questions. It was easy for me to go to the security folks and just, you know, find out what was going on.

But there was a daily, I think it was called a daily brief. My assistant, Shirley Miller, looked at that every day. She brought things to my attention that were appropriate.

MR. : Was this daily security or daily intelligence?

MR. BELGER: Intel, yeah, it was an intel brief that was classified. And Admiral Flynn or the intel folks would, I mean, they had an open door to the Administrator and myself if there was ever anything that they needed to get to us and they didn't hesitate to do that. So, I mean, I always felt comfortable that we were getting the information that they had. I never felt that they didn't have an open door to come to us. And they, I mean, they exercised it whenever they needed to.

MR. RAIDT[?]: And Shirley's brief, was that in writing or that was--

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. BELGER: It was the security intel brief, that she just looked at. I didn't look at it every day. She did look at it every day and brought, you know, whatever seemed to be significant to my attention.

MR. RAIDT: And did Jane receive that same written--

MR. BELGER: I would bring things to her attn.

MR. RAIDT: So--

MR. BELGER: Either I or Shirley or the security folks would bring things to the Administrator's attn.

MR. RAIDT: Okay, so, and just tell me if this is a short characterization: So, ACI would produce the daily brief;

MR. BELGER: Right.

MR. RAIDT: Shirley would read it; if there was something that needed to be called to your attention, it would be--

MR. BELGER: Right.

MR. RAIDT: --and if it needed to be

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

called to Jane's Attention--

MR. BELGER: Right.

MR. RAIDT: --it would go from you to her?

MR. BELGER: Right.

MR. RAIDT: And then, also the idea of an open-door policy, if anything from ACI or ACS would come in and--

MR. BELGER: They would go to Jane or to me, whoever they could get to first.

MR. RAIDT: And we're going to be taking a look at the intelligence case files and at some of those briefs. So if we need to go into specifics. At some point we might want to ask you about something.

But, let's talk about the spring and summer of 2001. Did you feel like that there was a greater threat--the threat level was increased in the summer of 2001 compared to a year or two before?

MR. BELGER: No, I don't think that I recalled anything that made me think that the threat level was higher.

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

MR. RAIDT: Okay, so it was just--

MR. BELGER: You know, there was always a threat and for the several years prior to 2001, the security folks had put out bulletins and sort of made some circulars to try that keep the carriers aware of what was going on, but I don't recall anything that actually made me think the threat was higher.

MR. RAIDT: Let me ask--

MR. BELGER: Certainly not domestically.

MR. RAIDT: Right, and I want to talk to you a little bit--I'm going to get into [unintell.] vectors on intel. Because one of the problems has been, in the intelligence being [unintell.] from reading the joint and Intelligence Committee report, you know, the high degree of chatter and the great deal of information. Is that what you were talking about, where in retrospect you see the sharing of intelligence was a problem?

MR. BELGER: Oh, sure, I mean, the fact that these guys were in the country for four or five years planning and that, if I remember right,

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

there were a couple, two that were on somebody's list that weren't on other folks' list.

MR. RAIDT: And you weren't aware of any of that--

MR. BELGER: No, no.

MR. RAIDT: Well, we'll go into that--let's talk about intelligence. There was nothing you ever saw in the spring or summer that, one, led you to believe that the threat was generally higher, or two, that there was any plot that even closely approximated a domestic hijacking or [unintell.] hijacking and using an aircraft as a weapon?

MR. BELGER: No, my general feeling was that the highest threat was international and it was explosives.

MR. RAIDT: Explosives and did that reflect the general impression in the building or was--

MR. BELGER: I think so, I think that would be a fair statement, yeah.

MR. RAIDT: And the intelligence

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

information you received from Shirley, et al., certainly did nothing to--

MR. BELGER: I don't recall anything that was inconsistent with that.

MR. RAIDT: So, let's focus, then, on intelligence. And, I guess the two issues. Let me go with mine, Bill. Bill has one--that are of concern to us and what we've looked at. And we're disclosing a lot of the other stuff, strictly, because, you know, your time's valuable and I want to cut right to the chase.

One of the things that's really concerned us is that if it's fair to say that security measures were calibrated to intelligence and that the intelligence was developed by the IC with a liaison from the FAA, but that liaison position, both among state, FBI, and CI are critical positions.

MR. BELGER: Right.

MR. RAIDT: And one of the things that greatly concerns us is it seems, particularly with respect to the FBI liaison is that that individual

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

is there doing a lot of other stuff that had little to do with the FAA.

MR. BELGER: Are you talking about the FAA liaison to the FBI?

MR. RAIDT: Yeah.

MR. BELGER: Okay.

MR. RAIDT: And so, my question, I guess, for you, Monte, is do you recall any debate or conversation about how that--one the importance of the FBI liaison to have a good understanding of the domestic threat. Did you feel like some of it as reported from ACI that there was a blindness about domestic issues and threats; and, two, was there ever any concern about how the FBI liaison was spending his time in serving the FAA over at the FBI?

MR. BELGER: Well, I knew we had a liaison to the FBI, that we, the FAA, had a liaison to the FBI. I didn't have any knowledge of the concerns you're expressing about what he was or wasn't doing. That never came to my attention. And I don't recall anybody, you know, telling me that

MILLER REPORTING CO., INC.
735 8th STREET, S.E.
WASHINGTON, D.C. 20003-2802
(202) 546-6666

they had--I don't recall anybody in security telling me that they had concerns about the FBI liaison's actions or inactions.

MR. RAIDT: And were you ever aware of any effort by Irish or anybody else to say it was worried about the level and the quality of intelligence and sought to try to improve matters in that regard?
