FOIPA Request No.: 1221687-000
Subject: FLOODING OF FBI RECORDS
(SEPTEMBER 08, 2011)

The FBI has completed its review of records subject to the Freedom of Information/Privacy Acts (FOIPA) that are responsive to your request. The enclosed documents were reviewed under the FOIPA, Title 5, United States Code, Section 552/552a. Below you will find check boxes under the appropriate statute headings which indicate the types of exemptions asserted to protect information which is exempt from disclosure. The appropriate exemptions are noted on the enclosed pages next to redacted information. In addition, a deleted page information sheet was inserted to indicate where pages were withheld entirely and identify which exemptions were applied. The checked exemptions used to withhold information are further explained in the enclosed Explanation of Exemptions:

Section 552

☐ (k)(2)

☐ (k)(3)

☐ (k)(4)

☐ (k)(5)

☐ (k)(6)

☐ (k)(7)

525 preprocessed pages are enclosed. To expedite requests, preprocessed packages are released the same way they were originally processed. Documents or information originating with other Government agencies that were originally referred to that agency were not referred as part of this release. This material is being provided to you at no charge.

Please refer to the enclosed FBI FOIPA Addendum for additional standard responses applicable to your request. "Part 1" of the Addendum includes standard responses that apply to all requests. "Part 2" includes additional standard responses that apply to all requests for records about yourself or any third party individuals. "Part 3" includes general information about FBI records that you may find useful. Also enclosed is our Explanation of Exemptions.

For questions regarding our determinations, visit the www.fbi.gov/foia website under "Contact Us." The FOIPA Request Number listed above has been assigned to your request. Please use this number in all correspondence concerning your request.

If you are not satisfied with the Federal Bureau of Investigation's determination in response to this request, you may administratively appeal by writing to the Director, Office of Information Policy (OIP), United States Department of Justice, 441 G Street, NW, 6th Floor, Washington, D.C. 20530, or you may submit an appeal through OIP's FOIA STAR portal by creating an account following the instructions on OIP's website: <https://www.justice.gov/oip/submit-and-track-request-or-appeal>. Your appeal must be postmarked or electronically transmitted within ninety (90) days of the date of my response to your request. If you submit your appeal by mail, both the letter and the envelope should be clearly marked "Freedom of Information Act Appeal." Please cite the FOIPA Request Number assigned to your request so it may be easily identified.

You may seek dispute resolution services by contacting the Office of Government Information Services (OGIS). The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769. Alternatively, you may contact the FBI's FOIA Public Liaison by emailing foipaquestions@fbi.gov. If you submit your dispute resolution correspondence by email, the subject heading should clearly state "Dispute Resolution Services." Please also cite the FOIPA Request Number assigned to your request so it may be easily identified.

Sincerely,

Michael G. Seidel
Section Chief
Record/Information
Dissemination Section
Information Management Division

Enclosure(s)

FBI FOIPA Addendum

As referenced in our letter responding to your Freedom of Information/Privacy Acts (FOIPA) request, the FBI FOIPA Addendum provides information applicable to your request. Part 1 of the Addendum includes standard responses that apply to all requests. Part 2 includes standard responses that apply to requests for records about individuals to the extent your request seeks the listed information. Part 3 includes general information about FBI records, searches, and programs.

Part 1: The standard responses below apply to all requests:

- (i) **5 U.S.C. § 552(c).** Congress excluded three categories of law enforcement and national security records from the requirements of the FOIPA [5 U.S.C. § 552(c)]. FBI responses are limited to those records subject to the requirements of the FOIPA. Additional information about the FBI and the FOIPA can be found on the www.fbi.gov/foia website.
- (ii) **Intelligence Records.** To the extent your request seeks records of intelligence sources, methods, or activities, the FBI can neither confirm nor deny the existence of records pursuant to FOIA exemptions (b)(1), (b)(3), and as applicable to requests for records about individuals, PA exemption (j)(2) [5 U.S.C. §§ 552/552a (b)(1), (b)(3), and (j)(2)]. The mere acknowledgment of the existence or nonexistence of such records is itself a classified fact protected by FOIA exemption (b)(1) and/or would reveal intelligence sources, methods, or activities protected by exemption (b)(3) [50 USC § 3024(i)(1)]. This is a standard response and should not be read to indicate that any such records do or do not exist.

Part 2: The standard responses below apply to all requests for records on individuals:

- (i) **Requests for Records about any Individual—Watch Lists.** The FBI can neither confirm nor deny the existence of any individual's name on a watch list pursuant to FOIA exemption (b)(7)(E) and PA exemption (j)(2) [5 U.S.C. §§ 552/552a (b)(7)(E), (j)(2)]. This is a standard response and should not be read to indicate that watch list records do or do not exist.
- (ii) **Requests for Records about any Individual—Witness Security Program Records.** The FBI can neither confirm nor deny the existence of records which could identify any participant in the Witness Security Program pursuant to FOIA exemption (b)(3) and PA exemption (j)(2) [5 U.S.C. §§ 552/552a (b)(3), 18 U.S.C. 3521, and (j)(2)]. This is a standard response and should not be read to indicate that such records do or do not exist.
- (iii) **Requests for Records for Incarcerated Individuals.** The FBI can neither confirm nor deny the existence of records which could reasonably be expected to endanger the life or physical safety of any incarcerated individual pursuant to FOIA exemptions (b)(7)(E), (b)(7)(F), and PA exemption (j)(2) [5 U.S.C. §§ 552/552a (b)(7)(E), (b)(7)(F), and (j)(2)]. This is a standard response and should not be read to indicate that such records do or do not exist.

Part 3: General Information:

- (i) **Record Searches and Standard Search Policy.** The Record/Information Dissemination Section (RIDS) searches for reasonably described records by searching systems, such as the Central Records System (CRS), or locations where responsive records would reasonably be found. The CRS is an extensive system of records consisting of applicant, investigative, intelligence, personnel, administrative, and general files compiled by the FBI per its law enforcement, intelligence, and administrative functions. The CRS spans the entire FBI organization, comprising records of FBI Headquarters, FBI Field Offices, and FBI Legal Attaché Offices (Legats) worldwide; Electronic Surveillance (ELSUR) records are included in the CRS. The standard search policy is a search for main entity records in the CRS. Unless specifically requested, a standard search does not include a search for reference entity records, administrative records of previous FOIPA requests, or civil litigation files.
 - a. *Main Entity Records* – created for individuals or non-individuals who are the subjects or the focus of an investigation
 - b. *Reference Entity Records* – created for individuals or non-individuals who are associated with a case but are not known subjects or the focus of an investigation
- (ii) **FBI Records.** Founded in 1908, the FBI carries out a dual law enforcement and national security mission. As part of this dual mission, the FBI creates and maintains records on various subjects; however, the FBI does not maintain records on every person, subject, or entity.
- (iii) **Requests for Criminal History Records or Rap Sheets.** The Criminal Justice Information Services (CJIS) Division provides Identity History Summary Checks – often referred to as a criminal history record or rap sheet. These criminal history records are not the same as material in an investigative “FBI file.” An Identity History Summary Check is a listing of information taken from fingerprint cards and documents submitted to the FBI in connection with arrests, federal employment, naturalization, or military service. For a fee, individuals can request a copy of their Identity History Summary Check. Forms and directions can be accessed at www.fbi.gov/about-us/cjis/identity-history-summary-checks. Additionally, requests can be submitted electronically at www.edo.cjis.gov. For additional information, please contact CJIS directly at (304) 625-5590.

EXPLANATION OF EXEMPTIONS

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552

- (b)(1) (A) specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and (B) are in fact properly classified to such Executive order;
- (b)(2) related solely to the internal personnel rules and practices of an agency;
- (b)(3) specifically exempted from disclosure by statute (other than section 552b of this title), provided that such statute (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;
- (b)(4) trade secrets and commercial or financial information obtained from a person and privileged or confidential;
- (b)(5) inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;
- (b)(6) personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;
- (b)(7) records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information (A) could reasonably be expected to interfere with enforcement proceedings, (B) would deprive a person of a right to a fair trial or an impartial adjudication, (C) could reasonably be expected to constitute an unwarranted invasion of personal privacy, (D) could reasonably be expected to disclose the identity of confidential source, including a State, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source, (E) would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or (F) could reasonably be expected to endanger the life or physical safety of any individual;
- (b)(8) contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or
- (b)(9) geological and geophysical information and data, including maps, concerning wells.

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552a

- (d)(5) information compiled in reasonable anticipation of a civil action proceeding;
- (j)(2) material reporting investigative efforts pertaining to the enforcement of criminal law including efforts to prevent, control, or reduce crime or apprehend criminals;
- (k)(1) information which is currently and properly classified pursuant to an Executive order in the interest of the national defense or foreign policy, for example, information involving intelligence sources or methods;
- (k)(2) investigatory material compiled for law enforcement purposes, other than criminal, which did not result in loss of a right, benefit or privilege under Federal programs, or which would identify a source who furnished information pursuant to a promise that his/her identity would be held in confidence;
- (k)(3) material maintained in connection with providing protective services to the President of the United States or any other individual pursuant to the authority of Title 18, United States Code, Section 3056;
- (k)(4) required by statute to be maintained and used solely as statistical records;
- (k)(5) investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment or for access to classified information, the disclosure of which would reveal the identity of the person who furnished information pursuant to a promise that his/her identity would be held in confidence;
- (k)(6) testing or examination material used to determine individual qualifications for appointment or promotion in Federal Government service the release of which would compromise the testing or examination process;
- (k)(7) material used to determine potential for promotion in the armed services, the disclosure of which would reveal the identity of the person who furnished the material pursuant to a promise that his/her identity would be held in confidence.

No; I told [REDACTED] we need a guard for as long as we have a plywood door at 604 bay with dehunidifier and for night/weekend coverage of trailers/PODs (regardless of whether at 604 or 917).

b6 per FBI

[redacted]

No, the need now and in future is for one additional guard 8p-5a workdays and all weekend. That would cover our immediate needs for 604 and the filled trailers at other ARC location. Agree we need to make 604 self-supporting from security standpoint; even if bay door and alarms are intact, we still have to visually monitor 2nd bay door where dehumidifier enters as it is only protected by a sheet of plywood. We are currently using regular roving guard (specially approved one 8p-5a and weekends) to watch that then swing over to trailers at 917 several times an hour.

I traded emails with [redacted] last week before all this occurred, and sent him EC number [redacted] did on additional coverage. As I recollect, may be under review, by FBI Police unit currently.

b6 per FBI

I think your plan will cover us well in interim until door/alarms in place at 604, trucks extant 917, and EC approved. Thanks for your continuing help [redacted]

[redacted]

Let's extend the special guard service for ARC4 for another week while we sort out the permanent plan. Are you saying that another armed guard is required at ARC 1-3 since there are trucks over there or will the 1 roving guard suffice?

Have you received a reply from UC [redacted] on the permanent guard request that RMD made a few weeks ago? FLSD hasn't received an answer from PSU. I will contact him again.

[redacted] is working on the door repairs [redacted] from FLSD-TSSU indicated that [redacted] will be replacing the door sensors with support from TSSU. Our goal should be to reactivate the ARC 4 security systems ASAP (hopefully within a week).

[redacted]

It looks like we will need to extend the guard service; we have a dehumidifier at 604 S. Pickett Street that will be in place for at least another 5 days. The bay door is temporarily sealed by a sheet of plywood. We have had the roving (5a-9p M-F) and special guards sitting in their vehicle between it and the buckled door on the end. It is my understanding that end door has been replaced today, but the new door will not close completely.

Even after the dehumidifier is removed, we will have to have someone from [redacted] team work with our ET [redacted] [redacted] to install door contacts on the new door and check the contacts and system integrity throughout, in order to arm the alarm system. The good news (about time, huh?) is that SOC called me today to report multiple motion detector (PIR) alarms at 604. I advised them of the situation and told them to turn down the annunciator and disregard until further notice. But, that does indicate the overall system is probably still usable, once the damaged contacts are changed.

To exacerbate the issues, we still have approximately 14 freezer trailers/freezer POD devices split between 604 South Pickett and the main ARC buildings at 917/923/841/883/885 S. Pickett. As these contain the same records we are compelled to protect with alarms and XO-9 locks, and are unalarmed and have only heavy duty padlocks, armed guard protection is our only security option.

b6 per FBI

So, we are faced with two alternatives: extend the emergency work order; or expedite implementation of Mr. [redacted] EC (319Q-HQ-1487641-RMD, Serial 29) requesting permanent 8p-5a and 24 hour weekend/holiday coverage by one roving, armed officer. I am convinced that the experiences of the past several weeks has supported the efficacy of that EC request.

Thanks for your help in general, and your expeditious actions on this--

[redacted]

I reviewed the ARC 4 extended guard details below and noticed that the guard is provided after hours on weekdays and only until Wed night/Thurs morning at midnight on 9/15. Is that what is required until 12:01am on Thurs 9/15? What's the requirement after the initial authorization runs out?

Someone mentioned additional guards at ARC1-3 on the weekends. I remember a previous request but that hasn't been approved by SecD and it is unrelated to the ARC4 security issues. That should be handled as a separate request if its not directly related to the ARC4 flood event.

Thanks,

b6 per FBI

All,

Due to the flooding at 604 Pickett Street, Alexandria, VA and the issues at hand, the bay door is temporarily sealed by a sheet of plywood, the new door will not close completely and records have been relocated into 14 freezer trailers/freezer POD devices split between 604 South Pickett and the main ARC buildings at 917/923/841/883/885 S. Pickett which have to be protected by alarms and XO-9 locks. Currently these records are unalarmed and have only heavy duty padlocks on the trucks. RMD is requesting additional guard service to protect 604 S. Pickett Street and the 14 freezer trucks that contain records.

I will be requesting an additional guard service post to cover 604 Pickett Street and the 14 freezer trailers. The additional post schedule is as follows:

09/14/2011 Wednesday 8:01pm – 09/15/2011 Thursday 4:59am
09/15/2011 Thursday 8:01pm - 09/16/2011 Friday 4:59am
Friday 09/16/2011 8:01pm- Monday 09/19/2011- 04:59am
Monday 09/19/2011 8:01pm- Tuesday 09/20/2011 4:59am
Tuesday 09/20/2011 8:01pm-Wednesday 09/21/2011 4:59am

[redacted]
Thanks for the update. Spoke with [redacted] FPS, this morning and he said the guards were en route to returning to the site. Thanks for all your help with this issue.

Currently 604 Pickett Street has 24/7 coverage through 09/30 and I am in the process of getting a quote for a portion of FY12 to prevent a lapse in coverage beginning October 1.

I want to make sure the guard company understands these post orders. Being FBI is third party to the contract, I do not have any contact info for Masters. Therefore, when [redacted] reports to the site can you confirm with him the 24/7 post orders or you can have him contact me. I want to make sure everyone understands that 604 is to be secured 24/7.

Please advise on how you want to handle

Subject: RE: Alexandria, VA--ARC guard service

b6 per FBI, DHS

[redacted]

Talked to the field, and would like to extend the emergency guard service at 604 Pickett Street, Alexandria, VA through 09/30/2011 using the same schedule; 12A-5A M-F and 8p-11:59P M-F, and 24 hours Sat/Sun.

Please provide a quote for 1 Guard post beginning at 8PM 09/09 and ending at 11:59PM 09/30/2011. Post hours requested are as follows: 12A-5A M-F and 8P-11:59P M-F, and 24 hours Sat/Sun.

From my calculations FBI owes an SWA for 75 hours 09/09/2011 beginning at 8PM – 09/14/2011 ending at 5A ; 102 hours 09/14/2011 beginning 8P – 09/22/2011 ending at 5A; and 106 hours 09/22/2011 beginning at 8PM- 09/30/2011 ending at 11:59PM. Total SWA should be 283 hours [redacted]
[redacted] (Per [redacted] the new hourly rate for September is [redacted])

When we submit this SWA, we should be squared up with FPS for all the Emergency Service at 604 Pickett Street. I will amend the SWA, R1111F1FR11, we started with on 08/28/2011.

(SEPTEMBER 08, 2011)

The FBI has completed its review of records subject to the Freedom of Information/Privacy Acts (FOIPA) that are responsive to your request. The enclosed documents were reviewed under the FOIPA, Title 5, United States Code, Section 552/552a. Below you will find check boxes under the appropriate statute headings which indicate the types of exemptions asserted to protect information which is exempt from disclosure. The appropriate exemptions are noted on the enclosed pages next to redacted information. In addition, a deleted page information sheet was inserted to indicate where pages were withheld entirely and identify which exemptions were applied. The checked exemptions used to withhold information are further explained in the enclosed Explanation of Exemptions.

151 preprocessed pages are enclosed. To expedite requests, preprocessed packages are released the same way they were originally processed. Documents or information originating with other Government agencies that were originally referred to that agency were not referred as part of this release. This material is being provided to you at no charge.

Please refer to the enclosed FBI FOIPA Addendum for additional standard responses applicable to your request. **"Part 1"** of the Addendum includes standard responses that apply to all requests. **"Part 2"** includes additional standard responses that apply to all requests for records about yourself or any third party individuals. **"Part 3"** includes general information about FBI records that you may find useful. Also enclosed is our Explanation of Exemptions.

For questions regarding our determinations, visit the www.fbi.gov/foia website under "Contact Us." The FOIPA Request Number listed above has been assigned to your request. Please use this number in all correspondence concerning your request.

If you are not satisfied with the Federal Bureau of Investigation's determination in response to this request, you may administratively appeal by writing to the Director, Office of Information Policy (OIP), United States Department of Justice, 441 G Street, NW, 6th Floor, Washington, D.C. 20530, or you may submit an appeal through OIP's FOIA STAR portal by creating an account following the instructions on OIP's website: <https://www.justice.gov/oip/submit-and-track-request-or-appeal>. Your appeal must be postmarked or electronically transmitted within ninety (90) days of the date of my response to your request. If you submit your appeal by mail, both the letter and the envelope should be clearly marked "Freedom of Information Act Appeal." Please cite the FOIPA Request Number assigned to your request so it may be easily identified.

You may seek dispute resolution services by contacting the Office of Government Information Services (OGIS). The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769. Alternatively, you may contact the FBI's FOIA Public Liaison by emailing foipaquestions@fbi.gov. If you submit your dispute resolution correspondence by email, the subject heading should clearly state "Dispute Resolution Services." Please also cite the FOIPA Request Number assigned to your request so it may be easily identified.

Sincerely,

Michael G. Seidel

Good morning [redacted]

I took the approximately 10,000 boxes total listed on my SAR report from the draft Statement of Work that [redacted] put together to have the records remediated. That number was just an estimate. I think Ms. Jupina may have been provided more accurate numbers from the Records Conversion Unit from the TRIM listings they have been running. I would go with the number Ms. Jupina presented.

Hi [redacted]

Regarding the ARC water damage, I have two conflicting damage reports.
AD Jupina had used 8700 linear feet in a CRC document presented to FD and FLSD a week or so ago.
The RPAS SAR says approximately 10,000 boxes were water damaged.
I have always thought that a box was approximately 1 linear foot or perhaps a little more than 1 linear foot, so to me the two reports conflict with each other.
Which report is more accurate? Maybe my 1 linear foot = 1 box is in error, too....

Sorry you are probably wondering why I am asking, but the flood damage is showing up as a mention in some CRC documentation, to underline the need for the CRC.

You are correct, no remediation has taken place. The freezer trucks/pods purpose is to stop any potential for mold to grow.

[REDACTED]

I am sorry I have another question.

We haven't "freeze dried" any of the damaged records yet, correct?

We have frozen them and are planning to freeze dry them in the future as part of remediation correct?

b6

I thought the trucks and pods we have are just freezer units, not freeze drying units. You have to have a partial vacuum to freeze dry and I didn't think any of the trucks or pods were under vacuum.'

Good day.

A thin DE 196-227 file Sub 1A vol 3, Serial # 1A53 file was found by [redacted] at ARC 4 –it was stuck under/inside a pallet! The file will need remediation or will be a part of a future destruction request to NARA. Unless anyone has another suggestion, the file should probably be reunited with its related case file in a pod/truck.

b6

[redacted] when convenient, would you please look up the pod/truck number for us? (The file is in my office in an envelope on my bookcase, if you want to look at it, and the bar code on it is still adhered.)

b6

Once I know the pod/truck number, I will work with [redacted] on getting the file placed at least in the correct pod/truck.

Thank you,

[redacted]

Good afternoon [redacted]

b6

I have been tasked with putting together a letter to explain the unavailability of a file due to the flood and its present state – in a freezer truck. I know that you probably have already put together some sort of form letter with this type of response in response to FOIPA or Litigation requests, could you share that with me? It would be helpful to have language that has already been approved by someone.

Thank you!

FOIPA Request No.: 1142818-002

Subject: [REDACTED]

Dear Requester:

This responds to your Freedom of
(FOIPA) request.

Information/Privacy Acts

A search of the indices to our Central Records System reflected there were records potentially responsive to your request. On September 8, 2011, the facility where the records are stored suffered a catastrophic flood that temporarily prohibits access to these records. Remediation is ongoing for the records stored in this facility. Unfortunately, we are unable to determine if, or when, these records will be available for review.

You may file an appeal by writing to the Director, Office of Information Policy (OIP), U.S. Department of Justice, 1425 New York Ave., NW, Suite 11050, Washington, D.C. 20530-0001. Your appeal must be received by OIP within sixty (60) days from the date of this letter in order to be considered timely. The envelope and the letter should be clearly marked "Freedom of Information Appeal." Please cite the FOIPA Request Number assigned to your request so that it may be identified easily.

Very truly yours,

David M. Hardy
Section Chief,
Record/Information
Dissemination Section

Good Morning Debra and [redacted]

b6

I have a few follow up questions with regards to the 2 items that remain on the critical unfunded list.

-Records remediation [redacted]

[redacted]

b5

b7E

-Records removal [redacted]

[redacted]

We are scheduled to have a critical unfunded meeting on Dec 28 and I have placed these items on the agenda for discussion. If you have any questions, please let me know.

Thank you,

[redacted]
Budget Analyst, FAU

Good morning [redacted]

We are still waiting for a contract to be awarded for the restoration of the records. The last word I had was that the package went to Finance to identify funding for the effort. We do not have a timeline when the restoration will begin so I cannot really give you any idea of how long it will take. I am sorry I don't have any additional information at this time.

=====

All:

I think we are missing the more important issue that the files and boxes are coated with dried mud that was considered contaminated as a result of the flood in September. The mud is now either dried and in a dust type format on the boxes and files and the floors and shelves in the units as well as caked on dried mud on the floor of the units as well as some of the boxes. The removal of boxes from several of the trailers will raise dust from the dried contaminated mud as the boxes are moved and as personnel walk through the 53' long trailers.

The units themselves are kept below 32 degrees Fahrenheit ranging from 25 to -10. A few of the freezer pods are currently frozen solid as a single mass also.

So workers will need protection from both the cold and from the possible contamination from the dried mud and dust.

Respectfully,

[redacted]

=====

Mr. [redacted]

Thank you for the e-mail, but giving the nature of this operation I will defer the first line of recommendation and comments to [redacted] FBI CIH, for her guidance and/or PPE usage during this operation/project.

b6

Please note, as I reviewed your e-mail, I have provided some items that maybe helpful until you hear from Ms. [redacted]

Giving the facts that were provided at this time and that OSHA has no specific regulation that addresses the protection of workers from environmental cold, the FBI must comply with the General Duty Clause for guidelines and resources on how workers can be protected from Cold weather/Cold working conduction.

Areas of concern: Worker Hands, Foot, Head, Body and Face from cold conductions, for example Gore-Tex. breathable, Coats are great protection for the body.

Note: This building has very heat sources, also I would recommend that special attention be giving to the walking-working surfaces as personnel unloaded the trucks using correct lifting procedures.

Last items, I didn't see [redacted] or [redacted] names listed or your e-mail, please note they are also working another issue in the same building with concerns of exterminating and fumigating pest, that may conflict with your operation.

b6

I look forward, to working with you on this project.

Hope this information help.

Thanks,

[redacted]

b6

Cc: [redacted] (CID) (FBI)

Subject: Upcoming Sorting Operation on Damaged Files at the Alexandria Records Center (ARC)

Classification: UNCLASSIFIED
=====

Hi Mr. [redacted] and Mr. [redacted]

b6

In the next few weeks, RMD is planning to begin sorting through the damaged files at the Alexandria Records Center (ARC). These files were contaminated with flood water in September 2011. The files are currently frozen and stored in 5 freezer pods and 10 freezer trailers outside building 604 at the ARC.

We are planning to unload the boxes from the pods and trailers and sort them into boxes to be destroyed and boxes to keep. The box and file sorting effort will be accomplished within building 604, which is closed and ventilated. [redacted]

b7E

[redacted]
[redacted] Work will occur inside 604 S. Pickett Street. We will limit the time period the boxes are out of the freezer environment to prevent them from thawing.

We plan to use RMD volunteers for this sorting operation. We may also have a limited amount of contract moving assistance.

We would like your advice on how these workers should be outfitted (tyvek suit, gloves, goggles, breathing masks, etc) and other guidance you could provide for a safety and health standpoint. There are obvious concerns about contamination from the flood water, and about possible mold growth in the records since the flooding, although we think most mold growth was stopped by the rapid response to freeze the files after the flood.

This project has been expedited because of the need to reduce the significant reoccurring monthly costs, and the near-term prospect that the destruction of approximately half of the files may be authorized.

Please provide comments/suggestions/concurrence as soon as possible.

Sincerely,

[redacted]

b6

=====

Hi Debbie,

Unfortunately we won't know unless a file is returned or if there is a charge out card in the box, but sometimes there isn't one. But now with the new FRAP System maybe a list of charge-outs can be generated and we can compare it to the our lists. If by chance a file/box is marked destroyed when the file returns we can place it back in the active inventory. Which is what we did with the files that were returned on the list I provided below. Nothing will be deleted from TRIM, just marked as destroyed.

Thanks.

Hi Debbie,

My team is currently in the process of reviewing the 1446 UCFN boxes to determine if there are any permanent files in the box. Once this is determined, the boxes that contain permanent files (one or more) will need the specific box inventory. I hope this helps!

Please let me know if you have any other questions.

Thanks,

=====

This bring to light another question/concern. When we do the sort and we look at a box and it isn't on the "special list" and the box goes to destruction or remediate, how will we know exactly what is in the box and what therefore got destroyed/remediated. Will we need to inventory the inside of the box or check to see if there is a charge out or something? I don't remember this being addressed in the overall plan and I apologize if it was discussed after I left the meeting on Friday.

Good Morning [REDACTED]

b6

There is a very small amount of files to date that have been returned, 5 cases (7 file folders). I have attached the list for your review. Please let me know if you have any questions.

<< File: Flood Recovery Files Returned 3_5_2012.xls >>

Respectfully,

Mr. [Redacted]

When my staff receives a file back that was originally stored on the two bottom shelves in 604 and was charge out at the time of the flood, they take it to [Redacted] team. [Redacted] team puts the file into a "miscellaneous box" and when they fill up the box they scan it to a shelf. She will be able to run a report and let you know how many files that is. I am copying her on this email.

b6

Classification: UNCLASSIFIED

RSMU (Unit Chief [REDACTED]) collects them. I believe it is a small number and I think they go back on the shelves in other buildings but I'm not positive.

b6

[REDACTED] can you please answer [REDACTED] question? Thanks

Thanks; who is actually collecting the charged out files that are returned to RMD, and where are they kept? It's a relatively small number of files, correct?

Subject: Data

b6

Classification: UNCLASSIFIED

I copied our entire "ARC Records Recovery 2011" folder to the RMD main shared folder. Multiple people throughout our section have added data to this folder. If there is a question related to the data, please ask and we will get clarification for you. In the folder, you will see an Access Data Base titled "Consolidated Damaged Files Database". [REDACTED] believes this is a list of everything. Basically we took a listing from [REDACTED] and [REDACTED] put it into this database. There are multiple ways of sorting through Access. Again, this database, if you have any questions please ask. Also note that this list could include files that were charged out as the list from [REDACTED] was all the files that were indicated as being on the bottom 2 shelves in TRIM. Please let us know if we can be of any further assistance.

Makes sense, thanks.

FYI, [REDACTED] is still checking on the RDU info of damaged boxes. By the way, besides the 100s [REDACTED] showed me that RDU also has some info on [REDACTED] and 27s. She is double checking on the info RDU has and will let you all know tomorrow.

Subject: RE: "The Tour" & Damaged Records

b6

Classification: UNCLASSIFIED

=====
All of the 263s at the ARC were entered in TRIM. We are getting ready to move the 263 files downtown. [redacted] and I spoke earlier today and when the boxes move she will have her staff scan them to the shelf. By deduction the files that are still in TRIM [redacted] will be the ones that are in the trucks or pods damaged.

b6
b7E

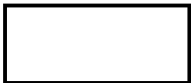

As far as the 190s go, [redacted] has already annotated all of the 190 files that were damaged. She had a list of all of the 190s that were placed in 604. When the flood happened, she and [redacted] went back over there and marked off which boxes were still on pallets and by deduction annotated in the database which ones were damaged.

Does the list only show those 100 files that were actually in the 604 at the time of the flood?

From: [REDACTED] (RMD) (FBI)

b6

Sent: Wednesday, March 07, 2012 12:22 PM
To: OCLAIR, DEBRA A (RMD) (FBI); [redacted] (RMD) (FBI)
Cc: [redacted] (RMD) (FBI)
Subject: "The Tour" & Damaged Records

b6

Good day.

The Tour (SC Krysa, [redacted]..) just came through my area a little while ago and all seemed to go well.

b6

Just a heads up on one question:

- A question regarding an index/list of the damaged 100s, 263s, and I believe also the 190s was asked about, as those boxes were not in TRIM. I said RDU should have an index of the 100s and would verify but wasn't sure about the other classes--maybe [redacted] would have a list, but I would follow up.

After their visit, I verified RDU has a lists and asked [redacted] to provide me the list of the damaged 100 files. Once I have the info, I can provide it to you all. As I am writing this email, [redacted] just brought me about 100 pg hard copy report—let me know if you would like a hard copy or scanned copy.

b6

And, in talking with [redacted] we were thinking about the 190s in the Access dbase that RDU just started reviewing. If we don't already know what 190 boxes were damaged, maybe the Access dbase list could be used to determine what's missing?

As things will be moving quickly now, is there any RDU can be doing to be prepared? I understand planning meetings are continuing and remain available to be involved.

Just a couple things on my mind that will be needed, ultimately:

- Volume stats for what is actually destroyed.
- Destroyed file numbers will need to be noted in TRIM (and any other system?) with a destruction date.
- And, ideally some report or record in a single system be maintained as to what is destroyed?

Thanks,

[redacted]

Subject: RE: Maintenance Agreement for WAV Machines at the ARC

b6

Classification: UNCLASSIFIED
=====

[REDACTED] had the vendor for the maintenance contract prepare a QUOTE for the cost of repairs. Work was not performed. [REDACTED] can confirm that this on Tuesday.

b6
b7E

The estimated repairs equaled 36% of the replacement cost with no assurance that the unit would start up and operate. The [REDACTED] representative advised against the repair, stating that parts that were sealed and could not be replaced would rust and fail in the future.

I am pretty certain that the WAV was worked on by the company more than once, following the flood, and then it was determined that it would be too costly to repair. [REDACTED] is off but when he returns he may be able to confirm when they were here. It seems there are probably some invoices that still need to be paid but have not been submitted unless the work they performed was covered by the maintenance agreement.

[REDACTED]

Thank you for the update.

b6

b7E

[REDACTED] et al: Please see [REDACTED] email notification below regarding one of the WAV machines destroyed by the ARC flood. Currently, RPAS has a maintenance agreement for 7 WAV machines effective December 1, 2011 through November 30, 2012 via purchase order # M2N202618 [REDACTED] Would you like to proceed with reducing the maintenance agreement from 7 to 6 WAV machines? According to FMS and our records, no invoices have been received or paid as of yet.

[REDACTED] FYI, please advise if is anything additional is required from RMD to reduce the current agreement.

=====

Good afternoon,

During your tour at the ARC, [redacted] mentioned that you were seeking information about files that were damaged during the flood but not in TRIM. These files were stored on pallets. I am attaching the list of 190 files that were damaged and are in freezer trucks and pods. I believe you also wanted a list of the 263 files that were damaged. All of those files were entered in TRIM and in order to produce that list [redacted] team will need to scan the files to the shelf that were not damaged and were moved to [redacted] today. Once they scan those boxes, by deduction, they will be able to provide a list of those files/boxes that were damaged. I spoke with [redacted] today and she will provide that list once they have scanned the boxes to the shelves.

b6
b7E

I don't know if [redacted] has provided her list yet or not but she is working on the list that pertains to the classification 100 files.

If you have any questions please let me know.

Thanks,

[redacted]

=====

[REDACTED] created this list. I was also over at 604 with them when they were working on it. They had a beginning inventory of all the pallets that we took over to 604 after their arrival here from WNRC. After the flood they took that list and went through every pallet and marked off the boxes that were still on the pallets. Then from that [REDACTED] developed this list of boxes that were damaged in the flood since they were previously on the pallets but no longer there. They went over the pallets several times to double check that they had marked it correctly.

b6

The reason we had to do this at the time is because we receive a lot of requests for these records and we needed to know which ones were damaged by the flood in order to respond to customers.

Subject: RE: Maintenance Agreement for WAV Machines at the ARC

Classification: UNCLASSIFIED
=====

Good Morning,

Just as a follow-up to the previous emails below, I didn't see a response from [redacted] yet.

b6
b7E

The current maintenance agreement (PO # M2N202618) is in place for 7 WAVs [redacted] and is effective from 12/01/2011 through 11/30/2012. As of today, no invoices have been received or posted to the purchase order. In order to remove the WAV from the current agreement, a requisition will need to be submitted in ART to de-obligate the funds and modify the purchase order.

Hi [redacted]

I was thinking that we would allocate money to cover the pallet jacks in the FY12 spend plan. However, if this is something that [redacted] can cover on his purchase card, then we could go that route as well. Just let me know which is easier.

b6

Thanks,

b6

UNCLASSIFIED
NON-RECORD

Hi [REDACTED]

b6

[REDACTED] stopped by to inquire about the maintenance/services of the recently ordered pallet jacks. He would like to confirm whether or not the maintenance/services of the pallet jacks will be handled by him (via purchase card) or if it will be covered under a purchase order agreement. Is it anticipated that the maintenance/services costs for the pallet jacks will be included in the FY12 RPAS Spend Plan? Please note that the pallet jacks are covered under a 1 year parts and technical support warranty.

[REDACTED] I spoke with [REDACTED] (manufacturer) and confirmed that neither company provides maintenance/services support. As you previously confirmed, they also indicated that they do not provide a set-up servicing of the pallet jacks. [REDACTED] does not maintain an authorized vendors list. In regards to the other pallet jacks, which vendor(s) provides service/maintenance on them? Is there a contractual agreement with the vendor(s) via purchase order or is it paid on a "need" basis via purchase card? Also, how much has this type of servicing cost previously?

b6
b7E

Thanks,

[REDACTED]

Subject: Trace Evidence list - clarification

b6

Classification: UNCLASSIFIED

[redacted] – per our telcal today, RMD is currently engaged in a project to restore a portion of approximately 10,000 flood damaged case files which were damaged in a flood in September, 2011; the FBI has obtained permission to destroy the vast majority of the flood damaged records with few exceptions. To date, RMD has identified approximately **90** of the flood damaged boxes contain files pertinent to the Trace Evidence project. In an effort to identify any and all pertinent Trace Evidence files in the flood damaged collection, RMD requests complete/reconstructed FBI file numbers for a portion of the incomplete data contained in the attached Trace Evidence spreadsheet. The attached spreadsheet was sent by the Lab to RMD earlier in the Trace Evidence project. As we discussed in our telcal, RMD intends to use the additional requested data only to search the inventory of the flood damaged records currently maintained in freezer trailers and pods to identify files that must be restored for the Trace Evidence project; RMD is **not** suggesting, and the Laboratory has **not** requested that the additional requested data be used to pull additional paper files from our records storage facilities or field offices for scanning.

b6

- In the attached spreadsheet, under tab “DC Cases” – please provide complete FBI file numbers for the data contained in Column K (“Contributor Number”), including the relevant field office or HQ office of origin alpha designator. I understand that in some cases the “Contributor Numbers” are not FBI file numbers, and may in fact be a local police department case number and therefore no additional data is available or forthcoming
- In the attached spreadsheet, under tab “FBI Cases” – please provide complete FBI file numbers for the data contained in Column H (“Contributor Number”), including the relevant field office or HQ office of origin alpha designator.

Thanks in advance for your help. Please call me if you have any questions,

Hello,

I received the message below from [redacted] about the 263 file I requested on behalf of an Assistant General Counsel .

b6

She is requesting a more formal explanation with dates about how the file ended up in the freezer to respond to a request from DOJ. Also, when will the file and bulkies be available for use? We need to obtain some items from the 1A envelopes and enclosures.

Thank you,

[redacted]

b6

Classification: UNCLASSIFIED
=====

Good Morning,

[REDACTED] are meeting with FD today and I am tasked with getting some background information together. Can you please provide me with any or all of the following?

b6

- How much did the FBI spend on New Orleans records recovery for Hurricane Katrina?
 - Initial site stabilization
 - **Transportation** = 13 employees initially deployed to New Orleans to assess records, pack, and load trucks. [REDACTED] believes they were there for 5 days. Per Diem costs [REDACTED] and flight cost [REDACTED] (they flew into Jackson, MS) for a total approximate cost of [REDACTED]. The material was transported and escorted to the ARC by FBI staff in two tractor trailers.
 - **Freezer trucks** = 2 freezer pods for approximately 4 months at a cost of [REDACTED]
 - **Supplies** = purchased plastic tubs to pack the boxes and damaged records in order to transport them to the ARC
 - Remediation/Destruction
 - **How many records were remediated and the cost?** = 1000 cubic feet (1000 boxes) at a cost of [REDACTED]. Remediation included freeze drying in a facility in New York, irradiation of the records in a facility in New Jersey, and then cleaning of the records and copying the documents that were not stable enough to put back in the files. The FBI also had to pay for replacement hard drives, copier drums, and memory for the vendors copiers because some of the material was classified and therefore the FBI took possession of these items. Because the records were classified FBI employees were dispatched to stand over and guard the records as they were being worked on by the vendor personnel. 4 employees were detailed at a time and we started

b6
b7E

b7E

on March 17, 2006 and finished on May 27, 2006. 2012 per diem rates for Rochester NY was [redacted] and based on that rate for 4 employees for 70 days the cost for per diem would have been around [redacted] - plus air travel at approximately [redacted] per person = [redacted] for a total FBI staff cost of approximately [redacted]

b7E

- How many records were destroyed and the cost? = 6.5 cubic feet of temporary records were destroyed and NARA approval was sought and acquired.

If I've added up everything, it cost approximately [redacted]

- How much did the ARC 604 Flood Cost?

- Initial site stabilization

- Transportation = Rental of the truck to move the trailers, transportation of the records to Joppa for destruction
- Dehumidifier = [redacted] for a four day rental
- Freezer trucks = [redacted] per month
- Supplies =

b7E

Cleaning company to clean the building

- Remediation/Destruction

- How many records were remediated and the cost? = Anticipated to be approximately [redacted]
- How many records were destroyed and the cost? = Included in above.

- We need to identify the at risk legats where we are scanning records or offering to provide records storage.

b7E

- We need a complete list of field offices that have asked us to centrally store records to free up space for operational needs
 - WFO
 - Albany
 - Other than Training Division, the need to move records out of the Legats because they are asking our permission to destroy them based on situations, and the OKBOMB and PENTBOMB records throughout the FBI, no field office or legat has asked RPAS for space.

Any other costs or events relating to large records recovery projects or limited records storage space?

San Francisco has a may questions, but here are a few. I am hoping that you will be able to fill us in on some information that is needed, in order to make a decision. We have over 35,000 files in which a decision is needed by COB December 7th.

- a) Destruction of these files, will RDM destroy the files in the computer?
- b) If, so will they do a partial or full destruction? Will the Index records be deleted
Some of these cases have automated records, will that information be deleted out of ACS/Sentinel.
- c) What happens to cases that are being destroyed where in some instances the ARC has several volumes and the Field Office has a few volumes? Was Trim database check to ensure all volumes of all files are stored at the ARC and they are all being destroyed at the same time?
- d) Will San Francisco be notified when the destruction process is complete, in order for us to document the Destruction Logs / list of the FD-478 logs?

San Francisco has reached out to several other offices, and we all seem to be in the same situation. We are all trying to make sure we covered every base imaginable, before we give a definite yes or no.

Thanks for any assistance you can provide.

Subject: Assistance in reviewing flood damaged files. --- UNCLASSIFIED

b7E

Classification: UNCLASSIFIED

=====

To All Chief Division Counsels:

In September, 2011, a flood at the Records Management Division's (RMD) Alexandria Records Center (ARC) damaged approximately 10,000 boxes containing approximately 240,000 case files. The damaged case files include both field office and HQ files. The National Archives and Records Administration (NARA) has provided the FBI authorization to

destroy most of the collection of flood damaged records absent files subject to a litigation hold, FOIA request, or other serious matter. RMD has reviewed the list for files subject to FOIA requests. OGC has reviewed the list for files subject to a litigation hold issued by OGC. However, in rare circumstances, a CDC may issue a litigation hold or preservation notice for a file that is not tracked by OGC.

Could you please review the files assigned to your field division to determine if there is any reason to remediate and preserve these files. Some of the files contain Elsur/Title III information that requires the court's permission to destroy. The files with Elsur are marked. If your office has these files you will need to contact the local U.S. Attorney's Office, advise them of the situation and if appropriate they must obtain the court's permission to destroy.

I have also included the records officers for each field division so they might help you in this review.

Below is the link to the RMD SharePoint site which contains the comprehensive list of flood damaged records. There are also instructions for filtering the list by field division. Please review and identify any of the files which must be preserved and remediated.

The files cannot be destroyed until we have made a reasonable effort to determine if any of them meet the above criteria for remediation and preservation. The cost of maintaining the damaged files is extremely expensive so your prompt attention to this matter is greatly appreciated. The deadline for completing your review of these files is December 7, 2012. Please respond via email to me and RMD SC Louise Neagle with the files numbers that must be preserved and remediated. Negative responses are required. Thank you in advance for your assistance in this matter.

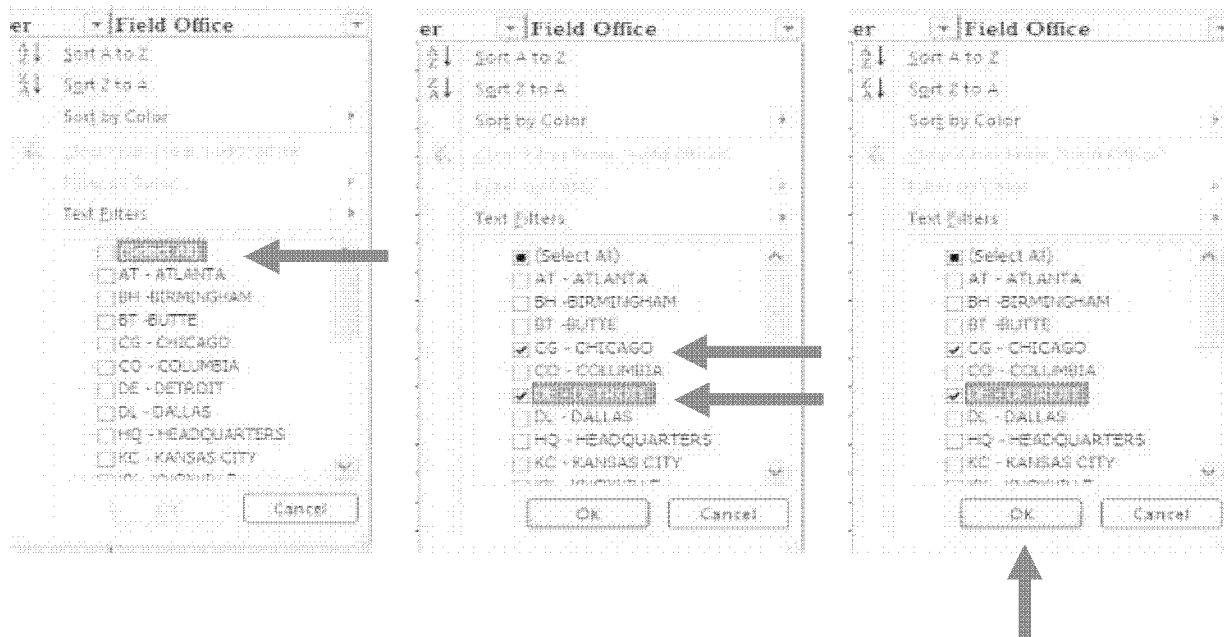

RMD Sharepoint site:

To view a specific Field Office(s): Click the drop-down arrow next to the "Field Office" column heading. Click the box next to the (Select All) option to "Uncheck" all the boxes. Then click the box next the Field Office(s) you only want to see, which will place a check mark in the box next to the Field Office(s). Finally click the OK button. Now you will only see those rows that apply to the Field Office(s) selected.

=====

Hi Nancy –

My name is [REDACTED] and am the SAS over Records. I spoke to our CDC here in SF, Brenda Atkinson who advised me she spoke with you and said that she didn't know how to go about reviewing the files. So my Admin. Specialists and I are trying to come up with a plan of action to review the files. Can you answer a few questions for us regarding the project.

b6

- a) With regards to the destruction of these files, will RDM destroy the files in the computer? No, the electronic records will remain in ACS/Sentinel. A notation will be made in the system indicating that the paper file was destroyed during the flood, and this is the only information available on this case file. As the files reach the end of their retention period, the computer data will be destroyed or transferred to the National Archives and Records Administration (NARA) in accordance with our records retention schedules.
- b) If, so will they do a partial or full destruction? Will the Index records be deleted n/a - see response in #1. Some of these cases have automated records, will that information be deleted out of ACS/Sentinel.
- c) What happens to cases that are being destroyed where in some instances the ARC has several volumes and the Field Office has a few volumes? Was Trim database check to ensure all volumes of all files are stored at the ARC and they are all being destroyed at the same time? Only the damaged volumes will be destroyed, and the computer systems (the File Automated Control System and Total Records Information Management) will be updated accordingly. Any undamaged volumes existing in the field offices or the ARC will continue to be retained until they have reached the end of their retention period.
- d) Will San Francisco be notified when the destruction process is complete, in order for us to document the Destruction Logs / list of the FD-478 logs? Yes.

Thanks,

b6

Thanks for the email. We will be keeping the files out here for the immediate future. We are looking at moving forward with the case and have been going through the files. Having said that, I received the below email back in January of this year in response to my request for this file stating (vols. 4-7 of the main and subfiles A, B, C, D, E, F-1A, FUG 1, FUG 2, and G) are currently under remediation.

Is there any update on when the remediation of these files may be completed.

Thanks for your help

[REDACTED]

b6

Reference email below:

Good morning,

We have received your request in FRAP for [REDACTED]

b7A

Unfortunately, the only sections of this file currently available are volumes 1-3 of the main.

The remaining 21 volumes (vols. 4-7 of the main and subfiles A, B, C, D, E, F-1A, FUG 1, FUG 2, and G) are currently under remediation, which means that those sections are currently unavailable due to water (flood) damage during inclement weather.

The file is being remediated for restoration to its original state which may take several months.

We will send you the available volumes of the main today.

Please let us know if we can be of further assistance.

Thank you,

See the below email from SF. This file needs added to the remediation list. Although she only states [REDACTED] knows [REDACTED] are also in the freezer trucks. I would suggest the entire file be remediated. We were only able to give Ms [REDACTED] not the entire file.

Thanks,

[REDACTED]

b6

Streets in area around all ARC buildings closed by police due to flooding. We have been dealing with alarms situations all night. [] finally got in to ARC-4. Police were there; exterior appeared okay as they reported earlier. However, when he went in to re-set alarm, he found 3' of water and many boxes inundated. A rear door was buckled, hence the alarm.

b6

While I was speaking with [] Alexandria Police approached him and made him vacate area. They have cordoned off whole immediate area from any entry and will remain on scene until flood waters subside and traversing roads is again safe.

I am getting reports that an employee on scene with Alexandria officials [] has indicated flooding in 917. I have not yet been able to determine extent. We have had night shift people working in 800 series buildings until around 8pm; guards did not report any issues before leaving.

b6

At this point, this seems like a records recovery project. No one will be allowed in tonight. I will have FLSD dispatched re buckled door as soon as they can get in. Will also update on 917 as more information becomes available. []

Subject: Potential ARC visit

I thought a heads up was needed. Late Friday the AD got follow up details and the reporters questions for an interview to take place Tuesday. Dave Hardy and I were there with her until almost 6, supporting her preparations. A photographer from Federal Times will come separately to take pictures of stored records on Wed. I expect the AD will decide to take the photographer to just ARC 4 / bldg 604 where there are rows upon rows of boxed records.

If that's her decision its my thought that it may be appropriate to have a security officer on duty to sign them in and maybe someone pulling or replacing boxes with the Work assist vehicle.

=====

Classification: UNCLASSIFIED

Federal Bureau of Investigation

SF-1151 Nonexpenditure Transfer Authorization for No-Year Funds

The FBI proposes to transfer [] of prior-year unobligated balances to its No-Year appropriation to cover costs related to the Records Remediation effort.

b7E

Justification for Records Remediation

The FBI's Records Management Division (RMD) administers the creation, storage, maintenance, and disposition of all FBI records. On September 8, 2011, approximately 10,000 cubic feet of FBI records were damaged by muddy and potentially contaminated water that reached approximately two feet above floor level at the Alexandria Records Center (ARC) Building 604. All boxes stored on the bottom two rows of shelving sustained water damage. Some of the boxes were moderately wet from the flood water. Other boxes were saturated with potentially contaminated water and mud. Mold growth could be present in some of the boxes due to the length of time it took to remove them from the building. These damaged boxes were originally stored in a heated warehouse area of the ARC that lacked complete temperature and humidity controls. A professional grade dehumidifier was installed approximately 14 hours after the event, and RMD removed and froze the damaged boxes to prevent further damage. Although the majority of the boxes were loaded in freezer trailers and freezer pods in less than 48 hours after the flood, some records took as long as 72 hours before being placed in a freezer. The damaged records remain frozen and stored in ten freezer trailers and five freezer pods at the ARC.

The FBI has identified records that are eligible for immediate destruction due to the expiration of their retention period and has requested authorization from the National Archives and Records Administration (NARA) to destroy additional records within non-permanent file classifications that have not reached the expiration of their retention period. If authorized, the destruction of some records will reduce the number of boxes which require remediation and recovery, and will reduce the monthly expenses of maintaining the permanent files in a frozen state.

The records to be remediated contain information related to FBI Domestic Terrorism, Weapons of Mass Destruction, Foreign Counterintelligence, Cyber crimes and FBI Confidential Human Sources. The loss of this information would have a significant negative impact on the FBI mission. These records continue to be requested and reviewed by agent and analytical personnel throughout the FBI, to support ongoing investigative and intelligence activities. For example, the FBI San Diego Field Office recently requested some of these damaged records to support an ongoing National Security investigation. The loss of information contained in the FBI's Civil Rights investigations may impact the rights and interests of United States citizens. Recent direction by the Department of Justice to re-open closed Civil Rights cases could be impacted by the loss of these records. As the United States continues to confront the housing crisis and Mortgage Fraud, the loss of FBI records related to this activity could hamper efforts to prosecute those involved in fraudulent activities. Some of these records are related to recent Office of Professional Responsibility Matters and may be needed to defend the FBI's decisions related to the conduct of FBI personnel. Many of these files contain information that is not available electronically or in hard copy in other locations throughout the FBI. The records

designated for remediation have previously been determined by National Archives and Records Administration (NARA) to be of such historical significance that they were designated as permanent. Upon transfer to the NARA by the FBI, these records will be maintained in perpetuity. The absence of these records would leave a void in the historical record of the FBI's intelligence and investigative activities.

The FBI is required to manage records throughout their life cycle in accordance with federal records management laws and regulations per 36 CFR Parts 1220-1235 and 44 USC Chapters 31 and 33.

The FBI is currently spending approximately per month to maintain the damaged files in a frozen state, and will continue to incur the costs indefinitely until remediation is finalized. Approval of this request will enable the FBI to remediate the records and end the accrual of ongoing monthly expenses.

FOIPA Request No.: 1221687-000
Subject: Flooding of FBI Records
(September 08, 2011)

The FBI has completed its review of records subject to the Freedom of Information/Privacy Acts (FOIPA) that are responsive to your request. The enclosed documents were reviewed under the FOIPA, Title 5, United States Code, Section 552/552a. Below you will find check boxes under the appropriate statute headings which indicate the types of exemptions asserted to protect information which is exempt from disclosure. The appropriate exemptions are noted on the enclosed pages next to redacted information. In addition, a deleted page information sheet was inserted to indicate where pages were withheld entirely and identify which exemptions were applied. The checked exemption boxes used to withhold information are further explained in the enclosed Explanation of Exemptions.

☐ (k)(7)

507 pages were reviewed and 154 pages are being released.

Please see the paragraphs below for relevant information specific to your request as well as the enclosed FBI FOIPA Addendum for standard responses applicable to all requests.

- ☒ Documents were located which originated with, or contained information concerning, other Government Agencies [OGA].
- ☒ This information has been referred to the OGA(s) for review and direct response to you.
- ☒ We are consulting with another agency. The FBI will correspond with you regarding this information when the consultation is completed.

Please refer to the enclosed FBI FOIPA Addendum for additional standard responses applicable to your request. **“Part 1”** of the Addendum includes standard responses that apply to all requests. **“Part 2”** includes additional standard responses that apply to all requests for records about yourself or any third party individuals. **“Part 3”** includes general information about FBI records that you may find useful. Also enclosed is our Explanation of Exemptions.

For questions regarding our determinations, visit the www.fbi.gov/foia website under "Contact Us." The FOIPA Request Number listed above has been assigned to your request. Please use this number in all correspondence concerning your request.

If you are not satisfied with the Federal Bureau of Investigation's determination in response to this request, you may administratively appeal by writing to the Director, Office of Information Policy (OIP), United States Department of Justice, 441 G Street, NW, 6th Floor, Washington, D.C. 20530, or you may submit an appeal through OIP's FOIA STAR portal by creating an account following the instructions on OIP's website: <https://www.justice.gov/oip/submit-and-track-request-or-appeal>. Your appeal must be postmarked or electronically transmitted within ninety (90) days of the date of my response to your request. If you submit your appeal by mail, both the letter and the envelope should be clearly marked "Freedom of Information Act Appeal." Please cite the FOIPA Request Number assigned to your request so it may be easily identified.

You may seek dispute resolution services by emailing the FBI's FOIA Public Liaison at foipaquestions@fbi.gov. The subject heading should clearly state "Dispute Resolution Services." Please also cite the FOIPA Request Number assigned to your request so it may be easily identified. You may also contact the Office of Government Information Services (OGIS). The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

See additional information which follows.

Sincerely,

Michael G. Seidel
Section Chief
Record/Information
Dissemination Section
Information Management Division

This is the **fourth interim release** of information responsive to your FOIPA request. This material is being provided to you at no charge. Based on the information you provided, we conducted a search of the places reasonably expected to have records. For more information about records searches and the standard search policy, see the enclosed FBI FOIPA Addendum General Information Section. Duplicate copies of the same document were not processed.

Inquiries regarding your Other Government Agency (OGA) referral(s), designated within the release as "Referral/Direct," may be directed to:

National Archives and Records Administration
National Archives at College Park
8601 Adelphi Road, Room 5500
College Park, MD 20740

Enclosure(s)

FBI FOIPA Addendum

As referenced in our letter responding to your Freedom of Information/Privacy Acts (FOIPA) request, the FBI FOIPA Addendum provides information applicable to your request. Part 1 of the Addendum includes standard responses that apply to all requests. Part 2 includes standard responses that apply to requests for records about individuals to the extent your request seeks the listed information. Part 3 includes general information about FBI records, searches, and programs.

Part 1: The standard responses below apply to all requests:

- (i) **5 U.S.C. § 552(c).** Congress excluded three categories of law enforcement and national security records from the requirements of the FOIPA [5 U.S.C. § 552(c)]. FBI responses are limited to those records subject to the requirements of the FOIPA. Additional information about the FBI and the FOIPA can be found on the www.fbi.gov/foia website.
- (ii) **Intelligence Records.** To the extent your request seeks records of intelligence sources, methods, or activities, the FBI can neither confirm nor deny the existence of records pursuant to FOIA exemptions (b)(1), (b)(3), and as applicable to requests for records about individuals, PA exemption (j)(2) [5 U.S.C. §§ 552/552a (b)(1), (b)(3), and (j)(2)]. The mere acknowledgment of the existence or nonexistence of such records is itself a classified fact protected by FOIA exemption (b)(1) and/or would reveal intelligence sources, methods, or activities protected by exemption (b)(3) [50 USC § 3024(i)(1)]. This is a standard response and should not be read to indicate that any such records do or do not exist.

Part 2: The standard responses below apply to all requests for records on individuals:

- (i) **Requests for Records about any Individual—Watch Lists.** The FBI can neither confirm nor deny the existence of any individual's name on a watch list pursuant to FOIA exemption (b)(7)(E) and PA exemption (j)(2) [5 U.S.C. §§ 552/552a (b)(7)(E), (j)(2)]. This is a standard response and should not be read to indicate that watch list records do or do not exist.
- (ii) **Requests for Records about any Individual—Witness Security Program Records.** The FBI can neither confirm nor deny the existence of records which could identify any participant in the Witness Security Program pursuant to FOIA exemption (b)(3) and PA exemption (j)(2) [5 U.S.C. §§ 552/552a (b)(3), 18 U.S.C. 3521, and (j)(2)]. This is a standard response and should not be read to indicate that such records do or do not exist.
- (iii) **Requests for Confidential Informant Records.** The FBI can neither confirm nor deny the existence of confidential informant records pursuant to FOIA exemptions (b)(7)(D), (b)(7)(E), and (b)(7)(F) [5 U.S.C. §§ 552 (b)(7)(D), (b)(7)(E), and (b)(7)(F)] and Privacy Act exemption (j)(2) [5 U.S.C. § 552a (j)(2)]. The mere acknowledgment of the existence or nonexistence of such records would reveal confidential informant identities and information, expose law enforcement techniques, and endanger the life or physical safety of individuals. This is a standard response and should not be read to indicate that such records do or do not exist.

Part 3: General Information:

- (i) **Record Searches and Standard Search Policy.** The Record/Information Dissemination Section (RIDS) searches for reasonably described records by searching systems, such as the Central Records System (CRS), or locations where responsive records would reasonably be found. The CRS is an extensive system of records consisting of applicant, investigative, intelligence, personnel, administrative, and general files compiled by the FBI per its law enforcement, intelligence, and administrative functions. The CRS spans the entire FBI organization, comprising records of FBI Headquarters, FBI Field Offices, and FBI Legal Attaché Offices (Legats) worldwide; Electronic Surveillance (ELSUR) records are included in the CRS. The standard search policy is a search for main entity records in the CRS. Unless specifically requested, a standard search does not include a search for reference entity records, administrative records of previous FOIPA requests, or civil litigation files.
 - a. *Main Entity Records* – created for individuals or non-individuals who are the subjects or the focus of an investigation
 - b. *Reference Entity Records*- created for individuals or non-individuals who are associated with a case but are not known subjects or the focus of an investigation
- (ii) **FBI Records.** Founded in 1908, the FBI carries out a dual law enforcement and national security mission. As part of this dual mission, the FBI creates and maintains records on various subjects; however, the FBI does not maintain records on every person, subject, or entity.
- (iii) **Foreseeable Harm Standard.** As amended in 2016, the Freedom of Information Act provides that a federal agency may withhold responsive records only if: (1) the agency reasonably foresees that disclosure would harm an interest protected by one of the nine exemptions that FOIA enumerates, or (2) disclosure is prohibited by law (5 United States Code, Section 552(a)(8)(A)(i)). The FBI considers this foreseeable harm standard in the processing of its requests.
- (iv) **Requests for Criminal History Records or Rap Sheets.** The Criminal Justice Information Services (CJIS) Division provides Identity History Summary Checks – often referred to as a criminal history record or rap sheet. These criminal history records are not the same as material in an investigative “FBI file.” An Identity History Summary Check is a listing of information taken from fingerprint cards and documents submitted to the FBI in connection with arrests, federal employment, naturalization, or military service. For a fee, individuals can request a copy of their Identity History Summary Check. Forms and directions can be accessed at www.fbi.gov/about-us/cjis/identity-history-summary-checks. Additionally, requests can be submitted electronically at www.edo.cjis.gov. For additional information, please contact CJIS directly at (304) 625-5590.

EXPLANATION OF EXEMPTIONS

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552

- (b)(1) (A) specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and (B) are in fact properly classified to such Executive order;
- (b)(2) related solely to the internal personnel rules and practices of an agency;
- (b)(3) specifically exempted from disclosure by statute (other than section 552b of this title), provided that such statute (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;
- (b)(4) trade secrets and commercial or financial information obtained from a person and privileged or confidential;
- (b)(5) inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;
- (b)(6) personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;
- (b)(7) records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information (A) could reasonably be expected to interfere with enforcement proceedings, (B) would deprive a person of a right to a fair trial or an impartial adjudication, (C) could reasonably be expected to constitute an unwarranted invasion of personal privacy, (D) could reasonably be expected to disclose the identity of confidential source, including a State, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source, (E) would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or (F) could reasonably be expected to endanger the life or physical safety of any individual;
- (b)(8) contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or
- (b)(9) geological and geophysical information and data, including maps, concerning wells.

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552a

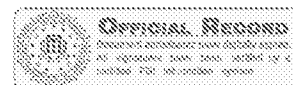

- (d)(5) information compiled in reasonable anticipation of a civil action proceeding;
- (j)(2) material reporting investigative efforts pertaining to the enforcement of criminal law including efforts to prevent, control, or reduce crime or apprehend criminals;
- (k)(1) information which is currently and properly classified pursuant to an Executive order in the interest of the national defense or foreign policy, for example, information involving intelligence sources or methods;
- (k)(2) investigatory material compiled for law enforcement purposes, other than criminal, which did not result in loss of a right, benefit or privilege under Federal programs, or which would identify a source who furnished information pursuant to a promise that his/her identity would be held in confidence;
- (k)(3) material maintained in connection with providing protective services to the President of the United States or any other individual pursuant to the authority of Title 18, United States Code, Section 3056;
- (k)(4) required by statute to be maintained and used solely as statistical records;
- (k)(5) investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment or for access to classified information, the disclosure of which would reveal the identity of the person who furnished information pursuant to a promise that his/her identity would be held in confidence;
- (k)(6) testing or examination material used to determine individual qualifications for appointment or promotion in Federal Government service the release of which would compromise the testing or examination process;
- (k)(7) material used to determine potential for promotion in the armed services, the disclosure of which would reveal the identity of the person who furnished the material pursuant to a promise that his/her identity would be held in confidence.

Subject: RE: FLSD/OSEP report --- UNCLASSIFIED

Classification: UNCLASSIFIED
=====

☐ I have reviewed the report and believe that we would be good to go with requiring FBI employees to do the remediation work on the files provided they are given the appropriate protective gear and are provided proper instruction on the proper use of the protective gear. Further, I note that the report suggests that should the boxes be opened and the documents inside the boxes be handled, then further testing should be conducted. As such, I would recommend that RMD get with OSEP in order to establish a testing protocol for when the boxes are opened. While it would seem that the amounts of possible containments one would expect from the flood would be less, prudence dictates that we still test to be sure.

b6

Should you need anything further, please don't hesitate to contact me.

Title: ALEXANDRIA RECORDS CENTER FLOOD
RECORDS REMEDIATION

Synopsis: Request mobile communications platform deployment/technical assistance from the Operational Technology Division (OTD), Technical Response Unit (TRU) to support the upcoming sort of flood damaged records at 604 South Pickett Street, scheduled to begin 4/23/2012.

Reference: 261D-HQ-C1062048-RMD Serial 48
261D-HQ-C1062048-RMD Serial 52
261D-HQ-C1062048-RMD Serial 53
261D-HQ-C1062048-704 Serial 17

Details: As background, on 09/08/2011, approximately 10,000 boxes of closed FBI files stored at 604 South Pickett Street, Alexandria, VA, were damaged by flooding. The files are stored in trailers and pods outside 604 and 917 South Pickett Street. The FBI has determined which of these damaged files should be remediated and which should be destroyed. NARA has recently approved the FBI's recommendation of which files can be destroyed.

RMD will soon begin a sorting operation of the 10,000 damaged boxes. The sort operation is expected to be a significant effort requiring dozens of RMD personnel. FBInet connectivity is

UNCLASSIFIED

5292

b6
b7E

UNCLASSIFIED

Re: 62F-HQ-A1700817, 04/12/2012

crucial for RMD to execute an effective and efficient sort operation. Because traditional FBInet connectivity cannot be restored to the building in a timely or cost effective manner, RMD requests that TRU provide a temporary FBInet connectivity solution. Unet connectivity is present and functional at 604 South Pickett Street.

The FBInet terminals are needed to access the FBI's records inventory application, TRIM, during the sort operation. TRIM runs on FBInet. The operation will occur at 604 South Pickett Street, which is cleared for open secret storage, but has no operational FBInet connectivity.

FBInet and TRIM access are essential to the efficient and effective execution of the RMD sort operation, as personnel will scan the thousands of boxes, enter the scanned data into TRIM, query against the data, and utilize the data for quality control.

The large volume of files, and their storage condition in trailers and pods, dictates that the sort operation be conducted in place. It is not feasible to move the trailers and pods to a different location with established FBInet or Unet connectivity.

RMD will break down and remove all TRU equipment daily for overnight storage at 885 South Pickett Street. Reference 261D-HQ-C1062048-704, serial 17, the FBI facility at 885 South Pickett Street was approved by the Security Division as an open storage secure area.

The FBInet terminals will be required from 04/18/2012 through approximately 5/18/2012, and will be returned to TRU at the conclusion of the operation.

RECORDS REMEDIATION

Synopsis: Document sample test results.

Enclosure(s): Test results.

Details: The purpose of this EC is to document sample test results. On Monday, 04/02/2012, and on Friday, 04/13/2012, the Occupational Safety and Environmental Programs (OSEP), Facilities and Logistics Services Division (FLSD), FBI Headquarters, visited the Alexandria Records Center located at 604 South Pickett Street, Alexandria, Virginia. The purpose of the OSEP visit was to collect samples for testing. Specifically, the collected samples were obtained from the freezer pods and trailers storing the flood-damaged records from the 09/08/2011 flood event at 604 South Pickett. The OSEP test results are enclosed.

Hazardous Waste Characterization

REPORT DATE: April 24, 2012

SURVEY AREA / SHOP: Trailers and Pods in Warehouse Parking Lot

LOCATION: Warehouse, Alexandria, VA

COST CODE #:

SURVEY DATE: April 13, 2012

OF EMPLOYEES:

SUPERVISOR:

POC:

CONDUCTED BY: [] CIH / []
Consolidated Safety Services, Inc.

REFERENCES: 1) Resource Conservation and Recovery Act, 40 CFR Part 261

In response to your request, [] CIH of Consolidated Safety Services, Inc. (CSS) (Occupational Safety and Environmental Programs (OSEP) Industrial Hygiene Contractor) conducted sampling of boxes, paper and file folders that were contaminated with mud during a flood event in September of 2011. At the time of the sampling the boxes were being stored in refrigerated pods and trailers. An attempt was made to collect representative samples of boxes, paper and file folders. However, most of the sample consisted of cardboard box material. Sampled materials were collected from trailers 1, 6, 8 and 11 and pods 3 and 7. [] assisted in the collection of the samples.

The materials sampled were packaged and sent to Analytics Laboratory in Richmond, VA to determine hazardous waste characteristics using the toxicity characteristic leaching procedure (TCLP) test method 1311 in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods, EPA Publication SW-846." Analytics is approved as an environmental laboratory in conformance with the National Environmental Laboratory Accreditation Conference (NELAC) standards through the State of Virginia for the following categories: Potable Water, Non-Potable Water, Solid and Hazardous Waste, and Air and Emissions.

Results of the TCLP analysis indicate all hazardous waste contaminants listed in Table 1 of 40 CFR 261.24 were below detectable levels and below the maximum concentration of toxicity characteristics. Results are presented in Table 1. The results as reported by the laboratory are also attached.

Table 1. TCLP Results

Drafted By:

Case ID #: 354D-HQ-A2598659-I (U) FBI OSEP Industrial Hygiene Matters
- Personnel Monitoring

Synopsis: (U//~~FOUO~~) OSEP conducted an exposure assessment during trailer replacement activities at the ARC warehouse located at 604 S. Pickett Street on February 4-6, 2013. RMD personnel relocated flood-impacted boxes out of refrigerated trailers and pods into refrigerated trailers. Personal samples for arsenic and lead along with bulk and area air samples for mold were collected. An instant-read instrument was used to track volatile organic compounds during box relocation. Results for arsenic and lead were below all applicable exposure limits. Volatile organic compound levels were consistent with background levels in non-industrial spaces. Elevated levels of mold were found in the trailers. RMD personnel should continue to wear appropriate PPE when handling affected boxes.

Enclosure(s): Enclosed are the following items:

UNCLASSIFIED//~~FOUO~~

UNCLASSIFIED//~~FOUO~~

Title: (U//~~FOUO~~) Exposure Assessment for RMD Trailer Replacement at ARC
604 Warehouse Feb 4-6, 2013
Re: 354D-HQ-A2598659-I, 03/12/2013

1. (U//~~FOUO~~) Trailer Replacement Exposure Assessment Final

Details:

OSEP conducted an exposure assessment during the relocation of stored materials by the Records Management Division (RMD). The materials were exposed to water and mud following a major flood in September 2012 and were subsequently frozen and stored in climate-controlled trailers and pods at the Alexandria Records Center (ARC). The assessment was performed from February 4-6, 2013 and the point of contact was Mr. [REDACTED]

b6

Four of the trailers were replaced and four pods were also emptied and their contents moved into climate-controlled trailers. Fifteen RMD employees worked in teams to remove boxes from their current trailer or pod location, stack them on pallets, wrap and strap them, and relocate them to their assigned trailers. After the trailers and pods were emptied, bulk debris and shelves or scaffolding were removed and the trailers and pods were cleaned. The work tasks took three days to complete.

Based on previous analytical results and the potential for exposure to mold, OSEP collected personal air samples for lead and arsenic, area air and bulk samples for mold, and used a direct reading instrument to measure concentrations of volatile organic compounds (VOCs), including petroleum hydrocarbons.

Air monitoring for metals was conducted in accordance with National Institute for Occupational Safety and Health (NIOSH) Method 7300, *Elements by ICP*. The industrial hygienists collected a total of seven personal air samples during trailer replacement operations.

The industrial hygienists collected a total of three air samples for fungal spores during trailer replacement operations. Two samples were collected inside separate trailers during box removal, and one sample was collected outdoors for comparison.

UNCLASSIFIED//~~FOUO~~

Title: (U//~~FOUO~~) Exposure Assessment for RMD Trailer Replacement at ARC 604 Warehouse Feb 4-6, 2013
Re: 354D-HQ-A2598659-I, 03/12/2013

The industrial hygienists collected two bulk samples of suspected mold growth during trailer replacement operations. Both samples were collected from suspected growth observed on two different boxes removed from Trailer 9.

To evaluate potential exposure to VOCs, the industrial hygienists used a RAE Systems ppbRAE 3000 Photoionization Detector (PID) to measure concentrations of ionizable vapors in the trailers and outdoors, for comparison.

The results of the personal exposure monitoring indicate that arsenic and lead concentrations were well below any recognized occupational exposure limit.

The results of the mold sampling indicate an amplification of *Penicillium*/*Aspergillus* in the trailers which could result in allergic-type responses or other adverse health effects in susceptible individuals if respiratory protection were not used.

Levels of VOCs detected in the trailers, pods, and Gaylord boxes are consistent with concentrations measured in typical indoor, non-industrial environments and do not indicate a potential concern.

Conclusions and Recommendations

1. The personal exposure monitoring results for arsenic and lead were well below recognized occupational exposure limits. These results indicate that employees are not exposed to hazardous concentrations of lead and arsenic while handling flood-impacted boxes from the ARC 604 warehouse. However, additional personal sampling is recommended if employees access the contents of the boxes to review, sort, and segregate documents or other materials.
2. The air sampling for fungal spores indicated high concentrations of *Penicillium*/*Aspergillus* in the trailers relative to the outdoors. Mold growth, which included *Penicillium*/*Aspergillus* types, was identified on the two bulk samples collected. These results indicate that employees are potentially exposed to airborne mold concentrations that may cause adverse health effects in susceptible

UNCLASSIFIED//~~FOUO~~

Title: (U//~~FOUO~~) Exposure Assessment for RMD Trailer Replacement at ARC 604 Warehouse Feb 4-6, 2013

Re: 354D-HQ-A2598659-I, 03/12/2013

individuals. The PPE worn by RMD employees during trailer replacement activities (coveralls, gloves, and N95 filtering facepieces or half-face elastomeric respirators equipped with P100 filters) is appropriate and should continue to be worn by employees when handling flood-impacted materials from the ARC 604 warehouse in other situations.

3. The results of the air monitoring for VOCs indicated that measured concentrations were typical of those found in indoor, non-industrial work environments and do not indicate potential exposure concerns while handling flood-impacted boxes. However, additional monitoring is recommended if employees access the contents of the boxes to review, sort, and segregate documents and other materials
4. Fecal coliform bacteria were identified in the composite bulk sample collected in April 2012 from flood-impacted materials from the ARC 604 warehouse. Exposure to these bacteria were not sampled during the trailer replacement activities, however, since there is currently no sampling method to estimate airborne exposure concentrations and no established occupational exposure limit. The PPE worn during the trailer replacement activities would provide adequate protection from exposure to fecal coliform bacteria. In addition to wearing PPE, employees should also follow good hygiene practices (i.e., no eating, drinking, or chewing gum or tobacco use in the work area and washing hands and face thoroughly after exiting the work area).

For full details, see "Trailer Replacement Exposure Assessment FINAL" attached to this report.

Background

In response to a request, [REDACTED] CIH, CSP and [REDACTED] CSP, of Consolidated Safety Services (CSS), FBI Occupational Safety and Environmental Programs (OSEP) industrial hygiene contractor, conducted an exposure assessment during the relocation of stored materials by the Records Management Division (RMD). The materials were exposed to water and mud following a major flood in September 2011 and were subsequently frozen and stored in climate-controlled trailers and pods at the Alexandria Records Center (ARC). The assessment was performed from February 4-6, 2013 and the point of contact was Mr. [REDACTED]. The purposes of the exposure assessment were to: (1) quantify exposure to contaminants previously identified in mud and debris associated with the flood impacted materials and 2) determine if the control measures used, including the personal protective equipment (PPE), were adequate.

b6

RMD maintains warehouses at the ARC. In September 2010, boxes containing documents, records, and evidence which were stored on the lower shelves of the warehouse at 604 S. Pickett Street were contaminated with water and mud during a flood event. In an effort to prevent or minimize mold growth, the documents were frozen and stored in climate-controlled trailers and pods beginning approximately 48 hours after the flood occurred. During the record relocation

operation in February 2013, four of the trailers were replaced, one due to a malfunctioning refrigeration system and three for fiscal reasons. Four pods were also emptied and their contents moved into climate-controlled trailers. Fifteen RMD employees worked in teams to remove boxes from their current trailer or pod location, stack them on pallets, wrap and strap them, and relocate them to their assigned trailers. RMD personnel provided their own cold weather clothing as needed. RMD provided the following PPE for employees:

- Coveralls – Kimberly-Clark KleenGuard A20 Breathable Particle Protection Coveralls
- Disposable nitrile exam gloves – Kimberly-Clark
- Disposable cotton work gloves with coated palm
- N95 filtering facepieces – Moore Medical Moorebrand N95 Particulate Respirator Mask
- Half-face elastomeric respirators – 3M 6000 series
- P100 filters (for respirators) – 3M
- Goggles
- Kneepads
- Shoe covers – Grainger 5T455A

Boxes were stored inside the trailers along each wall on either prefabricated shelving, shelving built from 2x4s and plywood, or stacked on the floor. Boxes on the floor were moved by employees forming a line and passing the boxes from one person to the next. Boxes stored on shelves were moved in the same manner or by sliding them along the shelves to the back of the trailer before being passed out of the trailer by hand. Although sliding the boxes on the shelves decreased the manual lifting and required less people, it did appear to appreciably increase airborne dust levels from boxes sliding over the loose dust and dirt left by previous boxes.

Boxes stored in the pods were stored on the floor and stacked on top of each other. Boxes were moved out of the pods by forming a line of employees, who then passed the boxes from one person to the next.

After the trailers and pods were emptied, bulk debris and shelves or scaffolding were removed. The trailers were then swept and cleaned with a water-based cleaning solution. RMD provided several household cleaners including dishwashing detergent, Formula 409 and Simple Green. A pump sprayer was used to apply the cleaning solution in the pods and a hose was used in the trailers. The work tasks took three days to complete.

Exposure Assessment Methods

In April 2012, composite bulk samples of mud and debris were collected from flood-damaged materials and analyzed for heavy metals (arsenic, cadmium, lead, and mercury), fecal coliform bacteria, and petroleum hydrocarbons. The analytical results of this bulk sampling indicated that lead and arsenic, fecal coliform bacteria, and petroleum hydrocarbons were detected in the bulk sample. Based on these analytical results and the potential for exposure to mold and mold spores, CSS collected personal air samples for lead and arsenic, area air and bulk samples for mold, and used a direct reading instrument to measure concentrations of volatile organic compounds (VOCs), including petroleum hydrocarbons.

Air monitoring for metals was conducted in accordance with National Institute for Occupational Safety and Health (NIOSH) Method 7300, Elements by ICP. The industrial hygienists collected a total of seven personal air samples during trailer replacement operations. With the exception of samples 020413-RMD-01 and 020413-RMD-03, each sample was collected from the breathing zone of a different RMD employee. Sample 020413-RMD-01 was discarded due to an equipment malfunction, so sample 020413-RMD-03 was collected from the same employee. Each air sample was collected using a sampling pump that draws air at a known flow rate through a 0.8 micron mixed cellulose ester filter. Sampling pump flow rates were measured prior to and following each sampling period, using a mini-Buck M-5 calibrator, to determine an average flow rate for the sampling period. An eighth filter cassette was opened on site but no air was drawn through it. This cassette was submitted for analysis as a field blank. All samples were labeled with a unique identification code and shipped to Galson Laboratories (Galson) in East Syracuse, NY for analysis. Galson is accredited by the American Industrial Hygiene Association (AIHA) Industrial Hygiene Laboratory Accreditation Program. All samples were analyzed using inductively coupled plasma.

The industrial hygienists collected a total of three air samples for fungal spores during trailer replacement operations. Two samples were collected inside separate trailers during box removal, and one sample was collected outdoors for comparison. The air samples were collected using an Aerotrap Total Fungal Sampler that draws air through a sampling orifice at a known flow rate and deposits entrained particulate matter, including mold spores, onto a spore trap slide (a glass microscope slide with an adhesive reservoir). The fungal sampler flow rate was determined using a calibrated rotameter prior to sample collection and validated after completion of the final sampling period. The samples were labeled with a unique identification code and hand delivered to EMLab P&K located in Fairfax, VA. The samples were analyzed using direct microscopic examination. EMLab P&K is accredited by the American Industrial Hygiene Association (AIHA) Environmental Microbiology Laboratory Accreditation Program (EMLAP).

The industrial hygienists collected two bulk samples of suspected mold growth during trailer replacement operations. Both samples were collected from suspected growth observed on two different boxes removed from Trailer 9. The samples were labeled with a unique identification code and hand delivered to EMLab P&K in Fairfax, VA. The samples were analyzed by direct microscopic examination.

To evaluate potential exposure to VOCs, the industrial hygienists used a RAE Systems ppbRAE 3000 Photoionization Detector (PID) to measure concentrations of ionizable vapors in the trailers and outdoors, for comparison. Field experience suggests the following guide for the use of PIDs to assess indoor environments ⁽¹⁾:

- <100 parts per billion (ppb) isobutylene⁽²⁾ units: normal outdoor air
- 100-400 ppb isobutylene units: normal indoor air
- ≥500 ppb isobutylene units: potential of indoor air quality contaminants

¹ RAE Systems, Inc. Application Note AP-212 Using PIDs for Indoor Air Quality (IAQ) Surveys (January 2002)

² PIDs are commonly calibrated with isobutylene; therefore, the response of the instrument to the TVOCs encountered in the field is relative to the response to isobutylene.

The PID was equipped with a 10.6 electron volt (eV) lamp and was calibrated using a 10 ppm isobutylene gas standard before the sampling period. The PID will ionize and measure most organic or inorganic vapors or gases with an ionization potential of 10.6 electron volts (eV) or less.

Exposure Assessment Results

The results of the personal air sampling for metals performed on February 4-6, 2013 are presented in Table 1.

Table 1 – Air Sample Results for Metals during ARC 604 Trailer Replacement – February 4-6, 2013					
Sample Identification	Date	Employee	Duration (minutes)	8-hour TWA Airborne Concentration ($\mu\text{g}/\text{m}^3$)	
				Arsenic	Lead
020413-RMD-02	02/04/13		358	<0.00031	0.00104
020413-RMD-03	02/04/13		229	<0.00028	<0.00035
020513-RMD-04	02/05/13		309 ¹	<0.4511	0.977
020513-RMD-05	02/05/13		448	<0.00031	0.00131
020613-RMD-11	02/06/13		100	<0.00035	<0.00029
020613-RMD-12	02/06/13		123	<0.00031	<0.00038
020613-RMD-13	02/06/13	Blank	N/A	N/A	N/A
Standard			Airborne Concentration ($\mu\text{g}/\text{m}^3$)		
ACGIH Threshold Limit Value (8-hour)			10 50		
NIOSH Recommended Exposure Limit (up to 10 hours)			2 ² 50		
OSHA Permissible Exposure Limit (8-hour)			10 50		

TWA: Time-weighted Average, zero exposure was assumed for the unsampled period of the eight hour workday

¹The tygon tubing for sample RMD-04 became detached some time after the last pump operation check at 12:40.

Therefore, the sample volume used in the exposure calculation was 665 liters. The exposure concentrations for lead and arsenic for the sampled period was assumed to be the identical over the unsampled period.

²The NIOSH recommend exposure limit for arsenic is established for a 15-minute period

The results of the personal exposure monitoring indicate that airborne concentrations of lead were detectable in some personal samples collected during the trailer replacement activities. Although lead concentrations were detectable, they were well below any recognized occupational exposure limit. The monitoring results indicate that employees were not exposed to hazardous concentrations of arsenic or lead when handling boxes impacted by the flood. Detailed laboratory results are included with this report in Attachment A. Sample RMD-020513-04 was erroneously identified in the laboratory report as a blank. It was not a blank, but was submitted for analysis with no air volume reported.

Fungal Spore Air Sampling Results

The results of the fungal spore air sampling performed on February 4-6, 2013 are presented in Table 2.

Table 2 – Fungal Spore Air Sample Results during ARC 604 Trailer Replacement – February 4-6, 2013			
Sample Number	020513-RMD-06	020513-RMD-07	020513-RMD-08
Fungal Spore Type	Location		
	Inside trailer 3	Outside	Inside trailer 2
Ascospores			53
Basidiospores	320	1,100	110

Table 2 – Fungal Spore Air Sample Results during ARC 604 Trailer Replacement – February 4-6, 2013			
Sample Number	020513-RMD-06	020513-RMD-07	020513-RMD-08
Chaetomium	13		
Cladosporium	1,000	110	53
Curvularia			
Epicoccum			
Fusarium			
Myrothecium			
Nigrospora			
Other Brown	53		27
Other colorless			
Penicillium/ Aspergillus types	34,000		8,100
Pithomyces			13
Rusts			13
Smuts, Periconia, Myxomycetes	27		
Stachbotrys			
Stemphylium			
Torula			
Ulocladium			
Zygomycetes			
Total Spores	35,000	1,200	8,400

The total concentration of spores in the samples collected in the trailers ranged from 8,400 spores per cubic meter of air (spores/m³) to 35,000 spores/m³. The total concentration of spores in the outdoor sample was 1,200 spores/m³. The total concentration of spores inside the trailers was significantly higher than the total concentration outdoors. Penicillium/Aspergillus spore concentrations were much higher inside the trailers relative to the outdoors and dominated the types of fungal spores detected. In the sample collected in Trailer 3, approximately 97% of the spores identified were Penicillium/Aspergillus spores and in the sample collected in Trailer 2, approximately 96% were Penicillium/Aspergillus spores. Laboratory results are included with this report in Attachment B.

The results of this sampling indicate an amplification of Penicillium/Aspergillus in the trailers which could result in allergic-type responses or other adverse health effects in susceptible individuals if respiratory protection were not used.

Fungal Spore Bulk Sampling Results

The results of the bulk sampling for fungal growth performed on February 4-6, 2013 are presented in Table 3.

Table 3 – Fungal Spore Bulk Sample Results during ARC 604 Trailer Replacement – February 4-6, 2013		
Sample Number	020513-RMD-09	020513-RMD-10
Fungal Spore Type	Location	
	On box from Trailer 9	On box from Trailer 9
Acremonium	Very light growth	
Alternaria		
Aureobasidium		
Basidiospores		
Brown spore type, ID unknown		Moderate growth
Chaetomium		
Chrysosporium	Light growth	
Cladosporium	Light growth	Light growth

Colorless spores typical of Penicillium/ Aspergillus		
Colorless spores typical of Penicillium/ Aspergillus	Moderate growth	Light growth
Fusarium		
Oidiodendrom	Moderate growth	
Other colorless, ID unknown		
Septonema	Moderate growth	
Stachbotrys		
Torula		
Ulocladium		
Miscellaneous spores	Very few	Very few
Other comments	None	None
Background debris	Light	Light
General impression	Mold growth	Mold growth

Light to moderate growth of various fungal species were reported in both samples. Numerous Penicillium/Aspergillus type spores were identified in both trailer samples, which is consistent with the results of the fungal spore air sampling. Detailed laboratory results are included with this report in Attachment B.

VOC Monitoring Results

The results of the VOC monitoring performed on February 4-6, 2013 are presented in Table 4.

Table 4 – VOC Monitoring Results during ARC 604 Trailer Replacement – February 4-6, 2013				
Location	Date	Time	PID reading (ppb)	Comments
Pod 4	02/04/2013	10:50 am	39 – 44	Container emptied
Pod 5	02/04/2013	10:51 am	26 – 36	Container emptied
Pod 7	02/04/2013	10:52 am	53 – 267	Work in progress
Pod 3	02/04/2013	10:53 am	29 – 45	Work in progress
Trailer 1	02/04/2013	10:54 am	84 – 134	Work in progress
Outdoors	02/04/2013	10:54 am	4 - 6	None
Outdoors	02/04/2013	12:10 pm	23 – 36	None
Gaylord boxes	02/04/2013	12:11 pm	40 – 66	Container materials from Pod 7
Pod 7	02/04/2013	12:12 pm	112 – 117	Work in progress
Pod 1	02/04/2013	1:30 pm	46 – 78	Work in progress
Trailer 3	02/05/2013	7:50 am	75 – 82	Measurements performed just after doors opened
Outdoors	02/05/2013	7:51 am	<1	None
Trailer 3	02/05/2013	7:55 am	42 – 48	Work in progress
Trailer 2	02/05/2013	10:00 am	135 – 140	Measurements performed just after doors opened
Trailer 9	02/05/2013	12:45 pm	477 – 524	Measurements performed just after doors opened

ppb: parts per billion

Levels of VOCs detected in the trailers, pods, and Gaylord boxes ranged from 29 to 524 ppb. These concentrations are consistent with concentrations measured in typical indoor, non-industrial environments and do not indicate a potential concern.

Conclusions and Recommendations

1. The personal exposure monitoring results for arsenic and lead were well below recognized occupational exposure limits. These results indicate that employees are not exposed to hazardous concentrations of lead and arsenic while handling flood-impacted boxes from the ARC 604 warehouse. However, additional personal sampling is recommended if employees access the contents of the boxes to review, sort, and segregate documents or other materials.
2. The air sampling for fungal spores indicated high concentrations of *Penicillium*/*Aspergillus* in the trailers relative to the outdoors. Mold growth, which included *Penicillium*/*Aspergillus* types, was identified on the two bulk samples collected. These results indicate that employees are potentially exposed to airborne mold concentrations that may cause adverse health effects in susceptible individuals. The PPE worn by RMD employees during trailer replacement activities (coveralls, gloves, and N95 filtering facepieces or half-face elastomeric respirators equipped with P100 filters) is appropriate and should continue to be worn by employees when handling flood-impacted materials from the ARC 604 warehouse in other situations.
3. The results of the air monitoring for VOCs indicated that measured concentrations were typical of those found in indoor, non-industrial work environments and do not indicate potential exposure concerns while handling flood-impacted boxes. However, additional monitoring is recommended if employees access the contents of the boxes to review, sort, and segregate documents and other materials.
4. Fecal coliform bacteria were identified in the composite bulk sample collected in April 2012 from flood-impacted materials from the ARC 604 warehouse. Exposure to these bacteria were not sampled during the trailer replacement activities, however, since there is currently no sampling method to estimate airborne exposure concentrations and no established occupational exposure limit. The PPE worn during the trailer replacement activities would provide adequate protection from exposure to fecal coliform bacteria. In addition to wearing PPE, employees should also follow good hygiene practices (i.e., no eating, drinking, or chewing gum or tobacco use in the work area and washing hands and face thoroughly after exiting the work area).

Dear Ms. [REDACTED]

Enclosed are the analytical results for the samples received by our laboratory on February 07, 2013. All test results meet the quality control requirements of AIHA and NELAP unless otherwise stated in this report. All samples on the chain of custody were received in good condition unless otherwise noted.

Results in this report are based on the sampling data provided by the client and refer only to the samples as they were received at the laboratory. Unless otherwise requested, all samples will be discarded 14 days from the date of this report.

Current Scopes of Accreditation can be viewed at www.galsonlabs.com in the accreditations section under the "about Galson" tab.

Please contact [REDACTED] at [REDACTED] if you would like any additional information regarding this report.

b6

Thank you for using Galson Laboratories.

Sincerely,

Galson Laboratories

Laboratory Director

 Date Analyzed: 11-FEB-13

Unless otherwise noted below, all quality control results associated with the samples were within established control limits.

Unrounded results are carried through the calculations that yield the final result and the final result is rounded to the number of significant figures appropriate to the accuracy of the analytical method. Please note that results appearing in the columns preceding the final result column may have been rounded in order to fit the report format and therefore, if carried through the calculations, may not yield an identical final result to the one reported.

The stated LOQs for each analyte represent the decontaminated LOQ concentrations prior to correction for desorption efficiency (if applicable).

Unless otherwise noted below, reported results have not been blank corrected for any field blank or method blank.

100104 (Report ID: 78858):

The Arsenic results are considered accurate to within +/-5.1% based on a 95% confidence interval (N=3). This method has an average recovery of 104%. The estimated uncertainty applies to the media, technology, and SOP(s) referenced in this report and does not account for any uncertainty associated with the sampling process. The Lead results are considered accurate to within +/-7% based on a 95% confidence interval (N=1). This method has an average recovery of 97.6%. The estimated uncertainty applies to the media, technology, and SOP(s) referenced in this report and does not account for any uncertainty associated with the sampling process. Reported results reflect elemental analysis of the requested metals. Certain compounds may not be solidified during digestion, resulting in data that is biased low.
 SOCs: MT-SOP-5(13), in-situ/11(17)

#100104-0 (Report ID: 78858):

Client-submitted blank result is above the LOQ at 0.05 ug for lead. Sample results not blank-corrected. Instrument and prep blanks are <LOQ. Blank results have been confirmed. Visible particulate was observed on the client blank prior to metals digestion and analysis.

Miscellaneous spores**	Very few	Very few
Other comments†	None	None
Background debris or Description††	Light	Light
General impression	Mold growth	Mold growth

* See Mold/Fungal Growth Details table on the last page.

** See Miscellaneous Spores table on the last page.

† Some comments may refer to the following: Most surfaces collect a mix of spores which are normally present in the outdoor environment. At times it is possible to note a skewing of the distribution of spore types, and also to note "marker" genera which may indicate indoor mold growth. Marker genera are those spore types which are present normally in very small numbers, but which multiply indoors when conditions are favorable for growth.

†† Background debris is an indication of the amounts of non biological particulate matter present. This background amorphous material is graded and described as scant, light, moderate, heavy, or very heavy. (Very heavy background debris may obscure visibility.)

Fungal types listed without a growth rating or data entry were not detected during the course of the analysis for the respective sample.

Interpretation is left to the company and/or persons who conducted the field work.

‡ A "Version" indicated by "-x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".

Mold/Fungal Growth Rating Details

Growth Rating	Quantities of molds indicating growth are listed in the MOLD/FUNGAL GROWTH section. Judgement is used in determining the amount of growth present in the sample. For example, if only one portion of the sample has evidence of heavy growth, then it will receive a rating of heavy growth even though, strictly speaking, on a percentage basis of the entire sample, the amount of growth is low.	
	Swab/Tape/Dust/Wipe sample	Bulk Sample
< 1+ (Very Light Growth)	Evidence of very light growth observed on the sample as indicated by spores of one type seen with underlying mycelial and/or with their sporulating structures found in less than 10% of the microscopic fields examined.	Areas of very light growth detected by the presence of spores of one type seen with underlying mycelial and/or with their sporulating structures in the bulk sample.
1+ (Light Growth)	Evidence of light growth observed on the sample as indicated by spores of one type seen with underlying mycelial and/or with their sporulating structures found in 10 to 25% of the microscopic fields examined.	Areas of light growth detected by the presence of spores of one type seen with underlying mycelial and/or with their sporulating structures in the bulk sample.
2+ (Moderate Growth)	Evidence of moderate growth observed on the sample as indicated by spores of one type seen with underlying mycelial and/or with their sporulating structures found in 26 to 50% of the microscopic fields examined.	Areas of moderate growth detected by the presence of spores of one type seen with underlying mycelial and/or with their sporulating structures in the bulk sample.
3+ (Heavy Growth)	Evidence of heavy growth observed on the sample as indicated by spores of one type seen with underlying mycelial and/or with their sporulating structures found in 51 to 75% of the microscopic fields examined.	Areas of heavy growth detected by the presence of spores of one type seen with underlying mycelial and/or with their sporulating structures in the bulk sample.
4+ (Very Heavy Growth)	Evidence of very heavy growth observed on the sample as indicated by spores of one type seen with underlying mycelial and/or with their sporulating structures found to be nearly confluent in the majority of the microscopic fields examined.	Areas of very heavy growth detected by the presence of spores of one type seen with underlying mycelial and/or with their sporulating structures in the bulk sample.

Miscellaneous Spores

Slides/specimens are examined for the presence of mold spores and pollen, noting the quantities and distribution of spore types found. A designation of 'normal trapping' is made when a mix of spore types is present with the same general distribution as is usually found outdoors. In other words, the biological component of the sample surface is like that found everywhere. Types of spores present would include basidiospores (mushroom spores), myxomycetes (slime molds), plant pathogens such as ascospores, rusts and smuts, and a mix of saprophytic genera with no particular spore type predominating. Many of these spore types would not be found growing indoors on building materials since many plant pathogens require living plants for growth, and mushrooms require compost, leaf duff of various types, or associations with roots of certain trees, etc. Due to these factors, when a mix of spores seen include these types as well as pollen, the rational source is the outside air, rather than indoor mold growth. The numbers of miscellaneous spores seen are graded and described as shown below as none, very few, few, variety, and wide variety.

None	Very Few	Few	Variety	Wide Variety
No spores detected	Very few spores detected	A few spores detected	Many spores containing a variety of different genera detected	Many spores containing a wide variety of different genera detected

§ TOTAL SPORES/m3		35,000		1,200		8,400

Comments: A) Trace overloaded with debris. The counts provided should be considered as minimal.

Spore types listed without a count or data entry were not detected during the course of the analysis for the respective sample.

† The spores of *Aspergillus* and *Penicillium* (and others such as *Acremonium*, *Paeclomyces*) are small and round with very few distinguishing characteristics. They cannot be differentiated by non-viable sampling methods. Also, some species with very small spores are easily missed, and may be undercounted.

†† Background debris indicates the amount of non-biological particulate matter present on the trace (dust in the air) and the resulting visibility for the analyst. It is rated from 1+ (low) to 4+ (high). Counts from areas with 4+ background debris should be regarded as minimal counts and may be higher than reported. It is important to account for samples volumes when evaluating dust levels.

The analytical sensitivity is the spores/m3 divided by the raw count. The limit of detection is the analytical sensitivity multiplied by the sample volume divided by 1000.

For more information regarding analytical sensitivity, please contact Q&A by calling the laboratory.

‡ A "Version" indicated by "x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".

§ Total Spores/m3 has been rounded to two significant figures to reflect analytical precision.

Smuts, Periconia, Myxomycetes	-	7	13	13	47	93	38	13	13	53	150	280	72	
§ TOTAL SPORES/m3	1,200													

†The 'Typical Outdoor Data' represents the typical outdoor spore levels for the location and time frame indicated. The last column represents the frequency of occurrence. The very low, low, med, high, and very high values represent the 10, 20, 50, 80, and 90 percentile values of the spore type when it is detected. For example, if the frequency of occurrence is 93% and the low value is 53, it would mean that the given spore type is detected 93% of the time and, when detected, 20% of the time it is present in levels above the detection limit and below 53 spores/m³. These values are updated periodically, and if enough data is not available to make a statistically meaningful assessment, it is indicated with a dash.

§ Total Spores/m³ has been rounded to two significant figures to reflect analytical precision.

*The spores in this category are generally capable of growing on wet building materials in addition to growing outdoors. Building related growth is dependent upon the fungal type, moisture level, type of material, and other factors. *Cladosporium* is one of the predominant spore types worldwide and is frequently present in high numbers. *Penicillium/Aspergillus* species colonize both outdoor and indoor wet surfaces rapidly and are very easily dispersed. Other genera are usually present in lesser numbers.

**These fungi are generally not found growing on wet building materials. For example, the rusts and smuts are obligate plant pathogens. However, in each group there are notable exceptions. For example, agents of wood decay are members of the basidiomycetes and high counts of a single morphological type of basidiospore on an inside sample should be considered significant.

†n = number of samples used to calculate data.

Interpretation of the data contained in this report is left to the client or the persons who conducted the field work. This report is provided for informational and comparative purposes only and should not be relied upon for any other purpose. "Typical outdoor data" are based on the results of the analysis of samples delivered to and analyzed by EMLab P&K and assumptions regarding the origins of those samples. Sampling techniques, contaminant infecting samples, unrepresentative samples and other similar or dissimilar factors may affect these results. In addition, EMLab P&K may not have received and tested a representative number of samples for every region or time period. EMLab P&K hereby disclaims any liability for any and all direct, indirect, punitive, incidental, special or consequential damages arising out of the use or interpretation of the data contained in, or any actions taken or omitted in reliance upon, this report.

MoldSTAT™: Supplementary Statistical Spore Trap Report

Outdoor Summary: 02051333-RMD-07: Outdoors

Species detected	Outdoor sample spores/m3				Typical outdoor ranges (North America)	Freq. %
	<100	1K	10K	>100K		
Ascomycetes					< 13	77
Basidiomycetes					13 - 430	92
Cladosporium					27 - 480	91
Penicillium/Aspergillus types					13 - 160	69
Smuts, Periconia, Myxomycetes					7 - 47	64
Total						

The "Typical outdoor ranges" and "Freq. %" columns show the typical low, medium, and high spore counts per cubic meter and the frequency of occurrence for the given spore type. The low, medium, and high values represent the 2.5, 50, and 97.5 percentile values when the spore type is detected. For example, if the low value is 53 and the frequency of occurrence is 63%, it would mean that we typically detect the given spore type on 63 percent of all outdoor samples and, when detected, 2.5% of the time it is present in levels below 53 spores/m3.

* The Friedman chi-square statistic is a non-parametric test that examines variation in a set of data (in this case, all indoor spore counts). The null hypothesis (H0) being tested is that there is no meaningful difference in the data for all indoor locations. The alternative hypothesis (used if the test disproves the null hypothesis) is that there is a difference between the indoor locations. The null hypothesis is rejected when the result of the test is greater than the critical value. The critical value that is displayed is based on the degrees of freedom (df) of the test and a significance level of 0.05.

** An agreement ratio is a simple method for assessing the similarity of two samples (in this case the indoor sample and the outdoor summary) based on the spore types present. A score of one indicates that the types detected in one location are the same as that in the other. A score of zero indicates that none of the types detected indoors are present outdoors. Typically, an agreement of 0.5 or higher is considered high.

*** The Spearman rank correlation is a non-parametric test that examines correlation between two sets of data (in this case the indoor location and the outdoor summary). The null hypothesis (H0) being tested is that the indoor and outdoor samples are unrelated. The alternative hypothesis (used if the test disproves the null hypothesis) is that the samples are similar. The null hypothesis is rejected when the result of the test is greater than the critical value. The critical value that is displayed is based on the degrees of freedom (df) of the test and a significance level of 0.05.

**** MoldSCORE™ is a specialized method for examining air sampling data. It is a score between 100 and 300, with 100 indicating a greater likelihood that the airborne indoor spores originated from the outside, and 300 indicating a greater likelihood that they originated from an inside source. The Result displayed is based on the numeric score given and will be either Low, Medium, or High, indicating a low, medium, or high likelihood that the spores detected originated from an indoor source. EMLab P&K reserves the right to, and may at anytime, modify or change the MoldScore algorithm without notice.

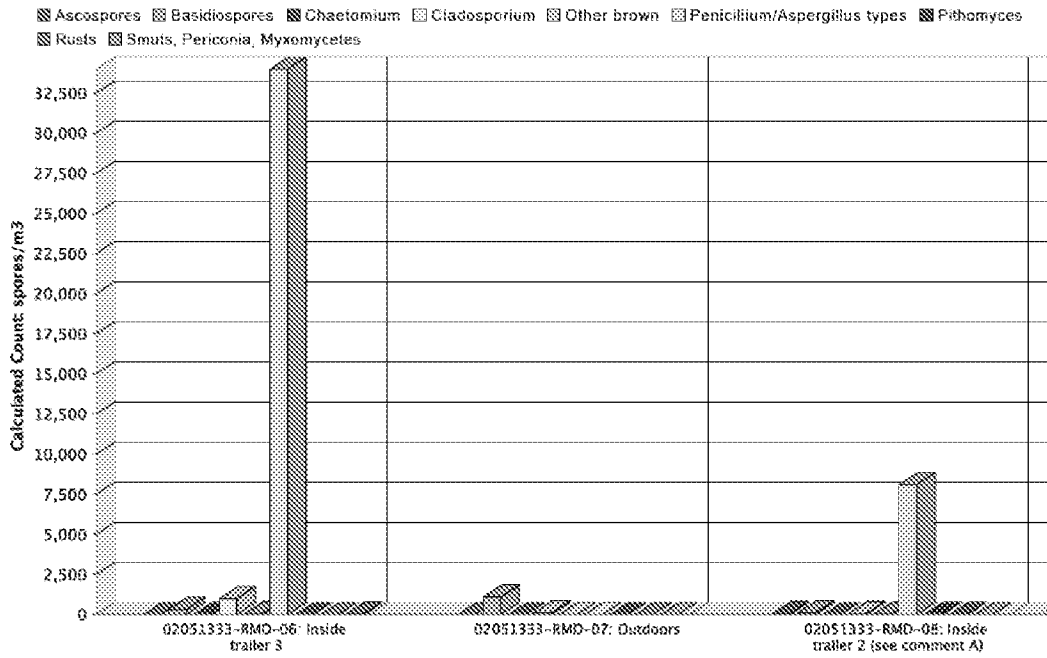

Interpretation of the data contained in this report is left to the client or the persons who conducted the field work. This report is provided for informational and comparative purposes only and should not be relied upon for any other purpose. "Typical outdoor ranges" are based on the results of the analysis of samples delivered to and analyzed by EMLab P&K and assumptions regarding the origins of those samples. Sampling techniques, contaminants infecting samples, unrepresentative samples and other similar or dissimilar factors may affect these results. With the statistical analysis provided, as with all statistical comparisons and analyses, false-positive and false-negative results can and do occur. EMLab P&K hereby disclaims any liability for any and all direct, indirect, punitive, incidental, special or consequential damages arising out of the data contained in, or any actions taken or omitted in reliance upon, this report.

Attachment B Laboratory Results for Fungi

Synopsis: Document Records Management Division (RMD) effort in furtherance of remediation and destruction of flood-damaged records.

Add the following paragraph after paragraph #3:

The Records Automation Section (RAS), Records Conversion Unit (RCU) produced a file-level detail list of the flood-damaged records collection, which captures the approximately 240,000 damaged files. The enclosed RCU spreadsheet (named "604 Flood Super List") is the basis of the derivative spreadsheets named "Remediation List" and "Destruction List."

I'll call you on the other edits – no easy way to do it in sentinel, more effort than it's worth in Word.

b6

Streets in area around all ARC buildings closed by police due to flooding. We have been dealing with alarms situations all night. [REDACTED] finally got in to ARC-4. Police were there; exterior appeared okay as they reported earlier. However, when he went in to re-set alarm, he found 3' of water and many boxes inundated. A rear door was buckled, hence the alarm.

b6

While I was speaking with [REDACTED] Alexandria Police approached him and made him vacate area. They have cordoned off whole immediate area from any entry and will remain on scene until flood waters subside and traversing roads is again safe.

I am getting reports that an employee on scene with Alexandria officials [REDACTED] has indicated flooding in 917. I have not yet been able to determine extent. We have had night shift people working in 800 series buildings until around 8pm; guards did not report any issues before leaving.

b6

At this point, this seems like a records recovery project. No one will be allowed in tonight. I will have FLSD dispatched re buckled door as soon as they can get in. Will also update on 917 as more information becomes available. [REDACTED]

Records recovery folks will be leaving ICRC at 5 am. I have advised that they may be blocked from entry but will wait in area until they are authorized entry. ARC staff will be available to assist with records recovery and will be advised of assistance needed in the AM. [REDACTED] and I will arrive at approximately 745 at the ARC and will remain in area for assessment and to assist in records recovery. b6

Re: Situation at ARC buildings as currently reported

b6

Update: No flooding in other ARC buildings that has caused records damage. Only 604 has the flooding problem. The water in 604 has now receded. We now have about an inch left on the floor.

Subject: Situation at ARC buildings as currently reported

b6

Streets in area around all ARC buildings closed by police due to flooding. We have been dealing with alarms situations all night. [redacted] finally got in to ARC-4. Police were there; exterior appeared okay as they reported earlier. However, when he went in to re-set alarm, he found 3' of water and many boxes inundated. A rear door was buckled, hence the alarm.

b6

While I was speaking with [redacted] Alexandria Police approached him and made him vacate area. They have cordoned off whole immediate area from any entry and will remain on scene until flood waters subside and traversing roads is again safe.

I am getting reports that an employee on scene with Alexandria officials [redacted] has indicated flooding in 917. I have not yet been able to determine extent. We have had night shift people working in 800 series buildings until around 8pm; guards did not report any issues before leaving.

b6

At this point, this seems like a records recovery project. No one will be allowed in tonight. I will have FLSD dispatched re buckled door as soon as they can get in. Will also update on 917 as more information becomes available. [redacted]

The area around 604 is still closed off. I am attempting to talk to police to get estimate.

RE: Situation at ARC buildings as currently reported

b6

I spoke with the Alexandria Police Office sitting at the Van Dorn /Pickett Street intersection. I was advised the area is closed to routine traffic but we can go into the area at our own risk. There is no longer any danger from a gas leak, but if we get another round or real heavy rain for a prolonged period there is always the chance for another flash flood through the area.

I plan on getting the wet/dry shop vac and going over to start some preliminary cleaning of the floors and to make sure all of the electrical cord have been disconnect that were plugged in to charging equipment yesterday.

The team should meet at 841 and I will then lead them over to 604 when safe.

We also just had about a 30 minute downpour here so it is not over yet.

Additionally, I will walk 917 to check for additional leaks when I get the shop vac.

Think sunshine!

;-)

b6

[REDACTED]

I am sorry I did not catch up with you this afternoon as I would probably do a better job explaining this than trying to capture it all in a message. I am scheduled to be on AL Wed - Fri (12/19 - 12/21) but will be in the area and available to chat. I will reach out to you tomorrow. I will forward a spreadsheet on the high side that has some rough figuring that we did to try to portray potential savings if we can move the trailers to the ICRC location. I can explain it when we talk.

[REDACTED] is responsible for originally identifying this opportunity and doing some leg work to gather estimates etc. [REDACTED] worked at putting the figures on the spreadsheet together and determining rough sizing for the parking pad etc. I personally have not been involved in any communications with the ICRC lessor. [REDACTED] can give you the most up to date information though about what, if any, conversations have occurred.

b6

Walt, I will forward (finally!) the spreadsheet to you when I send it to [REDACTED]

Please don't hesitate to call me if you need anything. Thanks Louise

[REDACTED]
Michelle Jupina called me this afternoon. They have been looking at better locations to move the ARC trailers from the flood so they can cut down on security costs. They would like to move them to the ICRC but need to have crusher run placed over some existing grass areas inside the fence line. Walt Meslar has been involved in some fashion. Michelle would like to move forward with this. SC Louise Neagle is the prime POC. Please work with RMD to see what needs to be done.

Thanks,
Mike

[REDACTED]

I am sorry I did not catch up with you this afternoon as I would probably do a better job explaining this than trying to capture it all in a message. I am scheduled to be on AL Wed - Fri (12/19 - 12/21) but will be in the area and available to chat. I will reach out to you tomorrow. I will forward a spreadsheet on the high side that has some rough figuring that we did to try to portray potential savings if we can move the trailers to the ICRC location. I can explain it when we talk.

[REDACTED] is responsible for originally identifying this opportunity and doing some leg work to gather estimates etc. [REDACTED] worked at putting the figures on the spreadsheet together and determining rough sizing for the parking pad etc. I personally have not been involved in any communications with the ICRC lessor. [REDACTED] can give you the most up to date information though about what, if any, conversations have occurred.

b6

Walt, I will forward (finally!) the spreadsheet to you when I send it to [REDACTED]

Please don't hesitate to call me if you need anything. Thanks Louise

Subject: Situation at ARC buildings as currently reported

b6

Streets in area around all ARC buildings closed by police due to flooding. We have been dealing with alarms situations all night. [redacted] finally got in to ARC-4. Police were there; exterior appeared okay as they reported earlier. However, when he went in to re-set alarm, he found 3' of water and many boxes inundated. A rear door was buckled, hence the alarm.

b6

While I was speaking with [redacted] Alexandria Police approached him and made him vacate area. They have cordoned off whole immediate area from any entry and will remain on scene until flood waters subside and traversing roads is again safe.

I am getting reports that an employee on scene with Alexandria officials [redacted] has indicated flooding in 917. I have not yet been able to determine extent. We have had night shift people working in 800 series buildings until around 8pm; guards did not report any issues before leaving.

b6

At this point, this seems like a records recovery project. No one will be allowed in tonight. I will have FLSD dispatched re buckled door as soon as they can get in. Will also update on 917 as more information becomes available. [redacted]

Subject: Re: Alexandria, VA--ARC guard service

[REDACTED]
Thanks for the update. Spoke with [REDACTED] FPS, this morning and he said the guards were en route to returning to the site.
Thanks for all your help with this issue.

Currently 604 Pickett Street has 24/7 coverage through 09/30 and I am in the process of getting a quote for a portion of FY12 to prevent a lapse in coverage beginning October 1.

I want to make sure the guard company understands these post orders. Being FBI is third party to the contract, I do not have any contact info for Masters. Therefore, when [REDACTED] reports to the site can you confirm with him the 24/7 post orders or you can have him contact me. I want to make sure everyone understands that 604 is to be secured 24/7.

Please advise on how you want to handle

Again. Thanks for all your effort this morning.

The chart for LMU appears to be accurate.

I was not at the ARC on 9/9, but I was there on 9/10 and 9/11.

Did chart also did not reflect Mr. Cannon being there on 9/11.

Good afternoon,

Attached is an invoice for some services provided at the ARC. We are trying to figure out who authorized this work order. Right now, the few people asked have said they did not authorize the service. If no one authorized this service, we can return the invoice and refuse payment.

I'm sure someone authorized the work though. Can you find out who authorized this work to be completed?

Thanks.

Subject: DISPOSAL OF TEN CPUs FLOOD DAMAGE

b6
b7E

Classification: UNCLASSIFIED

=====

LSU,

The Finance Division has issued the **Letter of Authorization** for the disposal of the ten flood damaged CPUs that are currently located at the ARC-4.

ZUCKERMAN'S in Winchester will handle the disposal / recycling. They will be handled as bio-hazard waste. (Contaminated with "CLASS 3" flood waters.)

The ten CPUs need the property stickers (such as [REDACTED]) and any classification stickers (SECRET / UNCLASSIFIED) removed. The hard drives have already been removed.

b7E

There is a release form that must be signed by a representative of Zuckerman's certifying receipt of the CPUs.

The CPU property numbers are attached. Only these ten CPUs may be taken to Zuckerman's.

Can these ten CPUs be prepared (stickers removed) and transported directly to Zuckerman's?

Thanks,

I agree that it is not cost effective to pay for the repairs when the outcome is uncertain.

This was purchased from CROWN. I looked at their website. They sell used lifts. I wonder if they would accept the flood damaged unit as a trade in towards the purchase of a new lift?

I have received an estimate to repair the water damaged WAV 50 located in Bldg 604. This estimate is for [redacted] that includes [redacted] labor and [redacted] for parts.

My concern is the WAV was only pressure washed in an attempt to clean the Class 3 Hazardous material from the chassis. All circuit boards have been submerged and the estimate states this expense is needed to "get booted up". There is no guarantee these repairs will fix the unit.

This unit has a cost of [redacted] and was purchased in 2009 with a 5 year shelf life. It is my suggestion that we scrap the unit, as we did the computers, they too were Class 3 Hazardous.

Please let me know if your need any additional information.

Subject: Laser barcode reader

b6

Classification: UNCLASSIFIED
=====

[redacted]

b6

We now need to accelerate the laser technology barcode reader wand test we discussed last week. I just came out of a meeting with the AD on the remediation effort for flood records where I briefed our plans to attempt to capture box barcode info that was previously un-available when we tried in Sept.

[redacted]

b6

When [redacted] laser reader is tested on boxes in a freezer truck and a POD, I want your folks need to be present and also test with the Denzo LED technology wand to see if there is any difference. The failure to read in Sept may have been caused by a reflection from wet labels or pollutants and not just a blurring of the bar-code from being dipped. Either way, we need to see if we can resume box-level control by barcode using the wands.

It's looking to be far too costly to remediate everything—about 10,000 boxes total. So the current plan is to seek approval to select and remediate just those boxes with permanent files based on file classification alone (not serial count or prominent names) and about 1,500 – 2,000 boxes of OPR files and permanent HQ files which were prepped and pending accession. The rest would be destroyed. RPAS is drafting a Director-level request to the Archivist for this expanded emergency destruction. So, ability to track boxes by bar code as they come off of the trucks has become of increased importance.

Subject: Laser barcode reader

b6

Classification: UNCLASSIFIED
=====

[REDACTED]
We now need to accelerate the laser technology barcode reader wand test we discussed last week. I just came out of a meeting with the AD on the remediation effort for flood records where I briefed our plans to attempt to capture box barcode info that was previously un-available when we tried in Sept.

Subject: RE: Revised SOW

b6

Classification: UNCLASSIFIED

Before we commit to using a contractor's facility, FLSD has advised that OTD moved out of their building at Quantico (they went to [redacted]). That space apparently has not been reallocated and it is certified Open Secret Storage. How it came up is as a recommended location for the freezer trailers/PODs in case we had to move them with the extra guard contract ending 4/1 and—maybe—a records remediation site.

b7E

I want to stay in the security vs. logistics lane, but would proffer that the OTD building and parking lot—if we had to park trailers/PODs there, appear to meet all security requirements.

Hi [redacted]

b6

I made some updates based on your comments below. See my notes beside each question.

[redacted] can you assist me with answering questions 3 and 4? Please let me know the language that should be inserted. When I originally talked with you about the security requirements, we thought that we could do it onsite; however, now

that Building 923 is being filled with boxes and an opening is being cut between the two bays, we no longer have a space to remediate onsite so we will be forced to use a contractor's facility.

Thanks.

Can we look at the facility and have a discussion very soon please? We also have to look at the vendor bringing their equipment and stuff there as well which might not be the least expensive way to go. John, [REDACTED] and I are free at 11:00 to discuss this. [REDACTED] and I are headed to Winchester now.

FOIPA Request No.: 1221687-000
Subject: Flooding of FBI Records
(September 08, 2011)

The FBI has completed its review of records subject to the Freedom of Information/Privacy Acts (FOIPA) that are responsive to your request. The enclosed documents were reviewed under the FOIPA, Title 5, United States Code, Section 552/552a. Below you will find check boxes under the appropriate statute headings which indicate the types of exemptions asserted to protect information which is exempt from disclosure. The appropriate exemptions are noted on the enclosed pages next to redacted information. In addition, a deleted page information sheet was inserted to indicate where pages were withheld entirely and identify which exemptions were applied. The checked exemption boxes used to withhold information are further explained in the enclosed Explanation of Exemptions.

Section 552

☐ (k)(3)

☐ (k)(4)

☐ (k)(5)

☐ (k)(6)

☐ (k)(7)

503 pages were reviewed and 116 pages are being released.

Please see the paragraphs below for relevant information specific to your request as well as the enclosed FBI FOIPA Addendum for standard responses applicable to all requests.

This is the **fifth interim release** of information responsive to your FOIPA request. This material is being provided to you at no charge. Duplicate copies of the same document were not processed. Information compiled for law enforcement purposes was withheld under FOIA exemption (b)(7)(E).

Documents were located which originated with, or contained information concerning, another Government Agency [OGA]. We are consulting with the other agency and are awaiting their response. Our office has processed all other information currently in our possession. The FBI will correspond with you regarding those documents when the consultation is completed.

Please refer to the enclosed FBI FOIPA Addendum for additional standard responses applicable to your request. **"Part 1"** of the Addendum includes standard responses that apply to all requests. **"Part 2"** includes additional standard responses that apply to all requests for records about yourself or any third party individuals. **"Part 3"** includes general information about FBI records that you may find useful. Also enclosed is our Explanation of Exemptions.

For questions regarding our determinations, visit the www.fbi.gov/foia website under "Contact Us." The FOIPA Request Number listed above has been assigned to your request. Please use this number in all correspondence concerning your request.

If you are not satisfied with the Federal Bureau of Investigation's determination in response to this request, you may administratively appeal by writing to the Director, Office of Information Policy (OIP), United States Department of Justice, 441 G Street, NW, 6th Floor, Washington, D.C. 20530, or you may submit an appeal through OIP's FOIA STAR portal by creating an account following the instructions on OIP's website: <https://www.justice.gov/oip/submit-and-track-request-or-appeal>. Your appeal must be postmarked or electronically transmitted within ninety (90) days of the date of my response to your request. If you submit your appeal by mail, both the letter and the envelope should be clearly marked "Freedom of Information Act Appeal." Please cite the FOIPA Request Number assigned to your request so it may be easily identified.

You may seek dispute resolution services by emailing the FBI's FOIA Public Liaison at foipaquestions@fbi.gov. The subject heading should clearly state "Dispute Resolution Services." Please also cite the FOIPA Request Number assigned to your request so it may be easily identified. You may also contact the Office of Government Information Services (OGIS). The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

Sincerely,

Michael G. Seidel
Section Chief
Record/Information
Dissemination Section
Information Management Division

Enclosure(s)

FBI FOIPA Addendum

As referenced in our letter responding to your Freedom of Information/Privacy Acts (FOIPA) request, the FBI FOIPA Addendum provides information applicable to your request. Part 1 of the Addendum includes standard responses that apply to all requests. Part 2 includes standard responses that apply to requests for records about individuals to the extent your request seeks the listed information. Part 3 includes general information about FBI records, searches, and programs.

Part 1: The standard responses below apply to all requests:

- (i) **5 U.S.C. § 552(c).** Congress excluded three categories of law enforcement and national security records from the requirements of the FOIPA [5 U.S.C. § 552(c)]. FBI responses are limited to those records subject to the requirements of the FOIPA. Additional information about the FBI and the FOIPA can be found on the www.fbi.gov/foia website.
- (ii) **Intelligence Records.** To the extent your request seeks records of intelligence sources, methods, or activities, the FBI can neither confirm nor deny the existence of records pursuant to FOIA exemptions (b)(1), (b)(3), and as applicable to requests for records about individuals, PA exemption (j)(2) [5 U.S.C. §§ 552/552a (b)(1), (b)(3), and (j)(2)]. The mere acknowledgment of the existence or nonexistence of such records is itself a classified fact protected by FOIA exemption (b)(1) and/or would reveal intelligence sources, methods, or activities protected by exemption (b)(3) [50 USC § 3024(i)(1)]. This is a standard response and should not be read to indicate that any such records do or do not exist.

Part 2: The standard responses below apply to all requests for records on individuals:

- (i) **Requests for Records about any Individual—Watch Lists.** The FBI can neither confirm nor deny the existence of any individual's name on a watch list pursuant to FOIA exemption (b)(7)(E) and PA exemption (j)(2) [5 U.S.C. §§ 552/552a (b)(7)(E), (j)(2)]. This is a standard response and should not be read to indicate that watch list records do or do not exist.
- (ii) **Requests for Records about any Individual—Witness Security Program Records.** The FBI can neither confirm nor deny the existence of records which could identify any participant in the Witness Security Program pursuant to FOIA exemption (b)(3) and PA exemption (j)(2) [5 U.S.C. §§ 552/552a (b)(3), 18 U.S.C. 3521, and (j)(2)]. This is a standard response and should not be read to indicate that such records do or do not exist.
- (iii) **Requests for Confidential Informant Records.** The FBI can neither confirm nor deny the existence of confidential informant records pursuant to FOIA exemptions (b)(7)(D), (b)(7)(E), and (b)(7)(F) [5 U.S.C. §§ 552 (b)(7)(D), (b)(7)(E), and (b)(7)(F)] and Privacy Act exemption (j)(2) [5 U.S.C. § 552a (j)(2)]. The mere acknowledgment of the existence or nonexistence of such records would reveal confidential informant identities and information, expose law enforcement techniques, and endanger the life or physical safety of individuals. This is a standard response and should not be read to indicate that such records do or do not exist.

Part 3: General Information:

- (i) **Record Searches and Standard Search Policy.** The Record/Information Dissemination Section (RIDS) searches for reasonably described records by searching systems, such as the Central Records System (CRS), or locations where responsive records would reasonably be found. The CRS is an extensive system of records consisting of applicant, investigative, intelligence, personnel, administrative, and general files compiled by the FBI per its law enforcement, intelligence, and administrative functions. The CRS spans the entire FBI organization, comprising records of FBI Headquarters, FBI Field Offices, and FBI Legal Attaché Offices (Legats) worldwide; Electronic Surveillance (ELSUR) records are included in the CRS. The standard search policy is a search for main entity records in the CRS. Unless specifically requested, a standard search does not include a search for reference entity records, administrative records of previous FOIPA requests, or civil litigation files.
 - a. *Main Entity Records* – created for individuals or non-individuals who are the subjects or the focus of an investigation
 - b. *Reference Entity Records*- created for individuals or non-individuals who are associated with a case but are not known subjects or the focus of an investigation
- (ii) **FBI Records.** Founded in 1908, the FBI carries out a dual law enforcement and national security mission. As part of this dual mission, the FBI creates and maintains records on various subjects; however, the FBI does not maintain records on every person, subject, or entity.
- (iii) **Foreseeable Harm Standard.** As amended in 2016, the Freedom of Information Act provides that a federal agency may withhold responsive records only if: (1) the agency reasonably foresees that disclosure would harm an interest protected by one of the nine exemptions that FOIA enumerates, or (2) disclosure is prohibited by law (5 United States Code, Section 552(a)(8)(A)(i)). The FBI considers this foreseeable harm standard in the processing of its requests.
- (iv) **Requests for Criminal History Records or Rap Sheets.** The Criminal Justice Information Services (CJIS) Division provides Identity History Summary Checks – often referred to as a criminal history record or rap sheet. These criminal history records are not the same as material in an investigative “FBI file.” An Identity History Summary Check is a listing of information taken from fingerprint cards and documents submitted to the FBI in connection with arrests, federal employment, naturalization, or military service. For a fee, individuals can request a copy of their Identity History Summary Check. Forms and directions can be accessed at www.fbi.gov/about-us/cjis/identity-history-summary-checks. Additionally, requests can be submitted electronically at www.edo.cjis.gov. For additional information, please contact CJIS directly at (304) 625-5590.

EXPLANATION OF EXEMPTIONS

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552

- (b)(1) (A) specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and (B) are in fact properly classified to such Executive order;
- (b)(2) related solely to the internal personnel rules and practices of an agency;
- (b)(3) specifically exempted from disclosure by statute (other than section 552b of this title), provided that such statute (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;
- (b)(4) trade secrets and commercial or financial information obtained from a person and privileged or confidential;
- (b)(5) inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;
- (b)(6) personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;
- (b)(7) records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information (A) could reasonably be expected to interfere with enforcement proceedings, (B) would deprive a person of a right to a fair trial or an impartial adjudication, (C) could reasonably be expected to constitute an unwarranted invasion of personal privacy, (D) could reasonably be expected to disclose the identity of confidential source, including a State, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source, (E) would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or (F) could reasonably be expected to endanger the life or physical safety of any individual;
- (b)(8) contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or
- (b)(9) geological and geophysical information and data, including maps, concerning wells.

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552a

- (d)(5) information compiled in reasonable anticipation of a civil action proceeding;
- (j)(2) material reporting investigative efforts pertaining to the enforcement of criminal law including efforts to prevent, control, or reduce crime or apprehend criminals;
- (k)(1) information which is currently and properly classified pursuant to an Executive order in the interest of the national defense or foreign policy, for example, information involving intelligence sources or methods;
- (k)(2) investigatory material compiled for law enforcement purposes, other than criminal, which did not result in loss of a right, benefit or privilege under Federal programs, or which would identify a source who furnished information pursuant to a promise that his/her identity would be held in confidence;
- (k)(3) material maintained in connection with providing protective services to the President of the United States or any other individual pursuant to the authority of Title 18, United States Code, Section 3056;
- (k)(4) required by statute to be maintained and used solely as statistical records;
- (k)(5) investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment or for access to classified information, the disclosure of which would reveal the identity of the person who furnished information pursuant to a promise that his/her identity would be held in confidence;
- (k)(6) testing or examination material used to determine individual qualifications for appointment or promotion in Federal Government service the release of which would compromise the testing or examination process;
- (k)(7) material used to determine potential for promotion in the armed services, the disclosure of which would reveal the identity of the person who furnished the material pursuant to a promise that his/her identity would be held in confidence.

Subject: UPDATE: Disposal of WAV F2319821 / ARC-4

b6
b7E

Classification: UNCLASSIFIED

=====

All,

This asset was declared 'excess, damaged by Class 3 flood waters – beyond repair,' in the Property Management Application. RMD has not yet received the Letter of Authorization (LoA) from the Finance Division authorizing the disposal of this asset. Once the LoA is received, we will notify LMU who will transport it directly to the Zuckerman facility in Winchester, VA, for disposal.

The WAV remains active in cost code 1722 until the disposal is completed. (Items being processed for disposal are usually transferred into cost code 1704. Because the WAV is classified as an 'other motor vehicle' it can't be transferred between cost code by RMD.)

Please contact me if you have any questions.

Thanks,

[redacted]

[redacted] and I will need to conduct inventories at the ARC buildings soon.

Has the damage from the flood waters at ARC-4 been completely repaired/remediated?

b6
b7E

Is it considered safe/cleared for personnel to conduct regular operations again without the need for protective gear?

Thanks,

ARC 4 has been cleared for normal operations. You would need to coordinate with [redacted] to make sure you have access to complete the inventory. This could be done by your PMA person assigned those duties. There are some projects taking place that might have to be worked around.

[redacted]

What equipment at 604 are you inquiring about? I do not believe there are any computers or other office equipment located there.

Regarding your original question, the current condition of the building does not require any protective gear, and the conditions caused by the flood have been remediated.

There has been report of bug in the boxes, and there are plans to spray and or fumigate in the near future.

Thanks,

[redacted]

[redacted]

We should probably ask [redacted] to make arrangements through GSA to have Greenhill schedule the cleaning of the facility daily during this two week period (April 16 – 27) and also stock up on the cleaning and bathroom supplies (hand soap and toilet tissue.) Also large trash bags for the trash cans.

b6

As far as power jacks for the pallets. We have one there that works and one that is dead due to flood. We do not have a pallet jack with scale. That will need to be ordered and rented from somewhere. Is Bob going to request an additional powered pallet jack from FLSD for this project?

Are “they” getting a tractor to be one site for the duration?

Subject: Request for LMU assistance for ARC 604 Sort Operation 4/16-4/27

b6

Classification: UNCLASSIFIED
=====

Sir,

The tentative dates for the ARC 604/Freezer Truck Sort Operation is April 16-27th. The operation will run from 8am-4:30pm. We will be running vans for Winchester personnel from ICRC to ARC at 6am and return at 6:30 pm.

We will require LMU's assistance:

- [redacted] is essential for all days that the operation runs. He is needed for trailer/truck operations.(Pre-staging possibly 4/11-4/13)
- [redacted] will be also be needed as a forklift operator, key control, and ARC logistics person.
- If you can spare (1) additional LMU person, it would be very much appreciated. They will be in charge of constructing, weighing, and moving pallets. They will also supervise some contract laborers who will be moving the boxes to the pallet areas.
- We will need to have (2) operational powered pallet jacks at 604.
- We will need to have (1) operational pallet jack with a scale to weigh each pallet before being loaded.
- We will need to have (1) operational forklift on site.
- Janitorial staff will need to pre-stock 604 with toilet paper/handsoap, ect, for the estimated (30) personnel participating. Mops, buckets, and brooms will be needed for clean-up. Some trash cans with extra trash bags will also be needed.
- We will require [redacted] to continue to have the trailers refueled at 604 until they are all removed.
- We estimate that (1) or (2) trailers will be brought to the ICRC with files that will need to continue to be frozen. These trailers will have to be refueled as needed.

b6

The below items are already being addressed by LMU Personnel:

- tables(7)-(identified, will need to be brought over prior to operation)
- chairs(30)
- safety equipment(already onsite)
- dumpster(already onsite)
- pallets(some onsite, additional being located)

Please let me know if require anything from the front office. I appreciate all your help, as this operation will not function without your staff.

Respectfully,

[redacted]

We'd certainly share it if it materializes. I haven't seen any report to that effect though. I mentioned in another e-mail that it would be unusual, in my experience, to test flood waters. I can't imagine OSHA would have done so either.

☐ have you heard anything more specifically?

Good Morning,

Please have the (1)pallet jack w/scale, the (2) powered pallet jacks, and (1)forklift staged in 604 no later than April 11th.

We will be conducting a pre-staging on 4/11, 4/12, and 4/13 to make sure all equipment is onsite and ready to go.

Thanks you guys! [REDACTED]

b6

Classification: UNCLASSIFIED
=====

All: please canvass your sections/units for volunteers. Thanks,

TO ALL RMD EMPLOYEES IN THE WINCHESTER AND METROPOLITAN WASHINGTON AREA:

The Alexandria Records Center (ARC) building 604 flooded in September 2011, and RMD acted quickly to load the nearly 10,000 boxes into freezer trailers and pods. RMD is seeking volunteers to sort the damaged records and reload them in freezer trailers for remediation or destruction. Volunteers will work in an austere environment, and should be prepared to perform tasks such as lifting and moving boxes, remove and carry shelving, moving palletized loads of boxes on pallet jacks, moving boxes on hand carts, and sorting and scanning the boxes. The working environment may include exposure to boxes that are wet, dusty, dirty, and possibly moldy. Some volunteers will work in the freezer pods to extract and

unload frozen records. Boxes will be heavy from absorbed water and ice, and may weigh up to 45 lbs. It is anticipated that contract laborers will unload trailers and move pod contents into the building and will generally be responsible for bulk movement of the files throughout the building; however, because of contract labor uncertainty, volunteers should be prepared to perform this function as well. Please do not volunteer if you have a pre-existing medical condition that would be aggravated by this type of work environment.

Freezing the records should have generally prevented mold and stopped any additional damage from occurring. Prior to the initiation of the sorting operation, medically cleared RMD personnel will enter the trailers and pods to assess the condition of the records and look for indicia of mold. FBI representatives from the Occupational Safety & Environmental Programs Unit (OSEP) will also participate in the daily brief at ARC/604 to address any safety or environmental concerns encountered.

Volunteers may get dirty so appropriate clothing to include non-slip boots/shoes without open toes and with low or no heels are recommended. Gloves, protective tyvek suits, masks, goggles and hearing protection will be provided to volunteers. Workers assigned to unload the freezer pods will be provided with insulated gloves, but will need to provide their own cold weather apparel. Volunteers will be permitted to wear jeans.

Work hours for the operation will be 8:00 AM to 4:30 PM, Monday through Friday, starting on Monday, 04/16/2012 until completion. The operation is expected to take 2-3 weeks. Vanpool transportation from the ICRC to ARC will be provided, and will depart the ICRC at 6:00 AM and return at approximately 6:30 PM depending on traffic. Due to limited parking at the ARC, it is preferred that volunteers utilize the Vanpool transportation provided by RMD; however limited parking will be available at the ARC for volunteers who would prefer to arrive in their own personal vehicle. Volunteers arriving by personal vehicle are encouraged to carpool. Overtime and travel expense reimbursement will not be authorized. As long as your duty station is not the ARC, you may be eligible to earn Comp Time for Travel. You will also need to supply your own lunch.

All selected volunteers are required to complete two Virtual Academy classes, which include Mold Awareness and Personal Protective Equipment. As a precaution, RMD will integrate a cadre of medically cleared/trained responders into the sort operation to address any moldy boxes encountered. These volunteers will be asked to complete a Respiratory Protection Physical, a chest X-ray, and be fitted for an N95 Respiratory Mask, and be designated as mold responders.

Preserving these records is important and your participation is encouraged from all sections. However, please volunteer only if you are capable of performing the work described above and have the advance approval of your Unit Chief. **To volunteer, please email [REDACTED] (RMD) with the following information on or before COB Wednesday, 03/28/2012:**

b6

Name

Contact information (office phone, home phone, Blackberry, cell phone)

=====

Hi [redacted]

b6
b7E

My number at HQ is [redacted]

[redacted] is tasking you with supporting the effort to work with [redacted] to procure resources for Moonachie. When I was working the ARC flood, my primary job was to

1) gather the requirements. You will rely on me and [redacted] for that mostly.

2) research sources for the equipment on line and by telephone. If we needed freezer trailers (also called refer trailers) then I used the phone book and internet to locate a bunch, called them to make sure they could deliver, then passed the info to [redacted] and [redacted]

At this time, the equipment list is anticipated to be:

- 1) The self powered de-humidifier
- 2) Approximately 10 freezer trailers. (These have to be mobile units. No pods.)
- 3) We will need shelving installed in the freezer units. We hope FLSD can build shelves (like they did at the ARC) but we may have to rent some if FLSD can't help us.

We want to get up to the point of cutting purchase orders but need to hear from [redacted] to firm up the requirements and delivery date.

b6

Just had a call from FLSD's Paul Jarvis. He mentioned that [redacted] is working on this as well. [redacted] would you please be sure to call him to make sure we are on the same page?

Thanks. [redacted]

Subject: De-Humidifier For Moonachie --- UNCLASSIFIED

b6

Classification: UNCLASSIFIED

[REDACTED]

Thank you for getting ready to support the recovery effort in Moonachie.

An RMD team lead by SSA [REDACTED] should arrive at the warehouse today about 1:00 p.m. They will do an initial assessment and let us know what they need.

[REDACTED] and [REDACTED]

Please meet with [REDACTED] and Jennifer to support their efforts. We will need to help find resources to support the Moonachie recovery.

FLSD, Please assist as you can. This is a NYFO recovery so we will need funding sources identified.

First thing needed ASAP

- We anticipate an immediate need for one of the high capacity de-humidifiers – about the same size we used at the ARC 604 flood. There is no electricity in the area so the unit will need to be self powered (just like the unit we used at the ARC). We need to hear from [redacted] but can reasonably anticipate delivery for tomorrow.
- Can you please check with Polygon and ascertain the availability for the Moonachie NJ area?
- I understand from SC O’Clair that a company, Rapid Refile, may also be able to fill the need and is in the Newark area.
- The actual address for the Moonachie warehouse is:
 - 35 Oxford Dr Moonachie NJ 07074

b6

Second Item Needed

- We can anticipate the need for self powered freezer trailers. Just like at the ARC. Delivery anticipated for ASAP to within a few days.
- Please start working on sources that may be able to supply the freezer trailer units. Penski rentals may be a good place to start.

Please advise me as to your progress by 2:00 today.

Thanks.

[redacted]

Classification: UNCLASSIFIED

[redacted]
FYI.

We are very close to moving the 8 Alexandria and 4 Winchester freezer trailers to the Martinsburg Air National Guard. The FBI has signed the MOU and it appears the MANG is very close to signing. Once signed we will have the green light to move the trailers.

LMU is planning to have [redacted] and [redacted] move the trailers using rental tractors.

Total cost of the move is about [redacted] which consists of renting 2 tractors for approx 4 days at [redacted] per tractor per day, [redacted] per mile rental charge for approximately 2000 rental miles across the 2 tractors, and approximately [redacted] in fuel to support 2000 miles.

Currently, LMU is planning for [redacted] to put the trailer rental on his purchase card, and for [redacted] and [redacted] to put diesel expenses totaling approximately [redacted] on their travel cards.

Is this ok, particularly the sizeable diesel fuel purchases.

Is there anyway for this [redacted] to [redacted]

Once moved to MANG, the FBI will need to cancel the extra contract guards at Pickett Street. This will save [redacted] per month!

Also on a related note, I called [redacted] to notify her that the contract guard service will be able to end soon. Upon getting a green light from us, she indicated she would need approximately one full week of notice to close out the contract.

b6
b7E

This fits well into LMU's estimated 4 days needed to move the trailers.

[redacted] noted that the guard contract has never hit the [redacted] that was placed in [redacted] to cover contract guard expenses for the last 8 months.

She said the contract has continued to hit [redacted] He asked whether the funds could be [redacted]

This is an old issue I thought had been resolved, but I guess not. (Some of the old emails are copied below.)

I asked her to provide an accounting of the contract expenses and break those down into two time periods

1. Oct 1, 2012 – present (the [redacted] was supposed to cover this time period)

2. Prior to October 1, 2012

I'll forward this to you when I receive it, it's up to FSU whether we can [redacted] or otherwise fix this issue.

Classification: UNCLASSIFIED

=====

[redacted]

b6
b7E

As we recently discussed, FLSD requires [redacted] in funding to continue contract guard service on the freezer trailers and pods at 604 South Pickett Street.

Please see estimate attached.

We plan to begin processing the damaged files soon, which will allow us to destroy over 90% of the collection and remediate the remaining 10%.

At the conclusion of these efforts, the contract guard services can end.

However, in the meantime, the records need to be maintained in a frozen state and must be guarded.

This is an extension of an existing contract that has previously been funded by [redacted]

[redacted]

The [redacted] total supports 9 months of contract guards, from October 1, 2012 thru June 30, 2013.

However, the actual contract will be issued on a month to month basis.

We anticipate that we will be able to expedite processing of the damaged records, and will not require all 9 months, in which case the unused funding would be returned to [redacted]

b6
b7E

Please let me know if [redacted] can provide this funding, presumably from the [redacted] that was originally provided for file remediation.

This funding is in addition to [redacted] of funding that supports rental of pods and trailers, and diesel fuel.

b6 per FBI

[redacted]
I reviewed the ARC 4 extended guard details below and noticed that the guard is provided after hours on weekdays and only until Wed night/Thurs morning at midnight on 9/15. Is that what is required until 12:01am on Thurs 9/15? What's the requirement after the initial authorization runs out?

Someone mentioned additional guards at ARC1-3 on the weekends. I remember a previous request but that hasn't been approved by SecD and it is unrelated to the ARC4 security issues. That should be handled as a separate request if its not directly related to the ARC4 flood event.

Thanks,

[redacted]

Sent: Tue Sep 13 07:39:33 2011
Subject: RE: Alexandria, VA--ARC guard service

All,

Due to the flooding at 604 Pickett Street, Alexandria, VA and the issues at hand, the bay door is temporarily sealed by a sheet of plywood, the new door will not close completely and records have been relocated into 14 freezer trailers/freezer POD devices split between 604 South Pickett and the main ARC buildings at 917/923/841/883/885 S. Pickett which have to be protected by alarms and XO-9 locks. Currently these records are unalarmed and have only heavy duty padlocks on the trucks. RMD is requesting additional guard service to protect 604 S. Pickett Street and the 14 freezer trucks that contain records.

I will be requesting an additional guard service post to cover 604 Pickett Street and the 14 freezer trailers. The additional post schedule is as follows:

09/14/2011 Wednesday 8:01pm – 09/15/2011 Thursday 4:59am
09/15/2011 Thursday 8:01pm - 09/16/2011 Friday 4:59am
Friday 09/16/2011 8:01pm- Monday 09/19/2011- 04:59am
Monday 09/19/2011 8:01pm- Tuesday 09/20/2011 4:59am
Tuesday 09/20/2011 8:01pm-Wednesday 09/21/2011 4:59am
Wednesday 09/21/2011 8:01pm-Thursday 09/22/2011 04:59am

[REDACTED] - I received a phone call from Penske, ref trailer #236989 someone placed a service call for faulty compressor on this unit. Penske is going to transfer one freezer unit from Jessup office to Capital Heights MD office. [REDACTED] from Penske will call me once trailer is available.

Penske will not delivery trailer to 604 South Pickett Street, Alexandria, VA. NATI will need to rent a tractor from Penske for one day to pick-up freezer unit at Capital Heights office, delivery to Pickett street, pickup inoperative trailer #236989 at Pickett Street and delivery to Penske at Capital Heights MD location

[REDACTED]

I am in communication with the scaffold vendor regarding the purchase of the scaffolding vice continued rental. The rental costs are [REDACTED] per month. As it stands now, the original purchase order was for [REDACTED]. At the current "burn" rate, the funds will be exhausted by [REDACTED].

I am looking at a purchase/"continued rent" analysis to determine the most economical way forward. The vendor has given me a quote to purchase the gear for [REDACTED]. I dispute that, but that is his quote. Give my assumption that the trailers are needed long term, purchase (at the right price) over rent would appear to be the best option.

I assume that the trailers will be needed for the foreseeable future until a plan for the remediation of the files is determined??

Can we also consider just moving the boxes from the trailer into another trailer like we just did for the one that failed recently. Understand there is a cost (labor/trailer movement), but I think it would be much cheaper than continued rental/purchase.

Thoughts?

[REDACTED]

Do we have any funds available to pay for this trailer swap at 604? The estimate says non credit card use only... I would assume a PO would have to be created which causes a ratification issue since the PO was not in place prior to the service provided.

This work had to be accomplished since one of the trailers became inoperative and it became a time critical issue with the mild weather.

RMD did a great job of getting it accomplished quickly, they are only asking if we can pay for this service.

Please advise as soon as you can.

b6
b7E

Everyone,
[REDACTED] beat everyone to the punch asking this question this morning [REDACTED] and I called John Krysa who spoke to Debbie O'Clair. Here is the deal.... We have huge volumes of material in trucks and pods that are frozen. For NNCP, if there are critical files that are needed they will dig into the trucks and retrieve the documents, dry them and scan them if they are salvageable. We need to be extremely judicious and look at the risk associated with certain files types in our requests since this will be a huge undertaking and could easily overwhelm the folks who will have to retrieve these files. For now, If you have an urgent and risk associated need for a file, send them to me and I will send to RPAS and RAS. We can revisit this when [REDACTED] returns next week.

Subject: RE: Flood-Damaged Files at the ARC

b6
b7E

This is a very difficult situation trying to access the criticality of the files to complete the Name Check. I recommend the SRA make the call once we receive the response from DocLab that the file requested is in the damaged file group. We had the same notification this morning on 2 of our file requests. Here are some examples of what we found.

Customer: OSOA Subject: [REDACTED] File: [REDACTED] Information: Subject referenced in [REDACTED]

b3
b6
b7C
b7E

Customer: [REDACTED] Subject: [REDACTED] File: 54-SF-113513 Information: 54 classification no longer exists. Subject is a main on a Customs Violent Crime case, the serials are newspaper articles

As you can see it is not a clear cut decision what to pull, scan and put up on the t-drive.

b6

[REDACTED] suggest serious cutting of the earlier chain or eliminating all be the last from the AD.)

Email is a record as it documents a decision by a senior manager. By themselves, the first 3 sentences are a transitory record communication regarding physical conditions which will go into status report and would not merit retention. But sentences 4 and 5 issue instructions and document a management decision to immediately close a facility and grant admin leave, making the e-mail a record.

b6

Fyi, I just drove down to the area. The police advised me the street is shut down due to a gas leak. The area smells like natural gas by the 604 area. If we have folks in the warehouses, send them home. I grant them admin leave.

I just talked with my night team lead, [REDACTED] She's on duty in 885 with 4 others (#5 was turned away by police and went home) They are staying put as it safer there than on the streets. They have power and commo. [REDACTED] was the one who intervened to prevent [REDACTED] FD from breaking down the door to 917 because of alarms.

b6

[REDACTED] I stand by my assessment of just the 11:28 Jupina message paragraph--all by itself-- as an example of a record for the reasons stated. But you and I would quickly deem this whole chain as a record because it is the primary chronological log of status, decisions, taskings, and responses during an incident. I would think there might be a similar blackberry chain in some investigative or operational case. I'm told by Michelle that the FBI's Holocaust Museum shooting response was initially a blackberry email chain crossing HQ, WFO, SIOC, first agents on-scene, DC Police.... That might offer a good example and one no longer pending a court action.

b6

I spoke with the Alexandria Police Office sitting at the Van Dorn /Pickett Street intersection. I was advised the area is closed to routine traffic but we can go into the area at our own risk. There is no longer any danger from a gas leak, but if we get another round or real heavy rain for a prolonged period there is always the chance for another flash flood through the area.

All – I spoke to Polygon POC [redacted] this morning regarding the document remediation for mold. They can send the team of three people to remediate our 10 boxes today, with work starting in the morning. I've sent the info required for Security Unit to grant escorted access, and should have them all clear within about an hour. I've advised [redacted] that they have vacuums and a HEPA filter they'll be using, and he believes our 50 amp breaker will handle that.

b6
b7E

[redacted] asked our schedule here and I told him 7:00am-4:00pm would work. [redacted] – We'll need to be sure someone stays with them, and get them added to the GJ list for the one box of First Class Equities we have. They will also remediate two other jobs, one with eight boxes and one with another single box as I discussed with [redacted] on Friday. Please let me know if there are any questions.

[redacted] -- I told [redacted] would likely be the POC. Let me know if this is okay.

Thanks.

Subject: New folder on shared drive for ARC remediation/flood records --- UNCLASSIFIED

b6

Classification: UNCLASSIFIED

=====

I created a new folder on cc:1720 shared drive to file stuff related to the ARC flood and recovery efforts. It's called ARC Records Recovery, 2011. Please put anything there that you create related to the recovery efforts. It's also where I've stored the roster of names of folks working at the ARC this weekend.

I got [REDACTED] out of office message just now. Can you or someone else in your unit review section 12 and let me know what needs to stay and what needs to be removed? We need to have this ready to go forward on Tuesday, so I really need your response by COB tomorrow.

Thanks,

Classification: UNCLASSIFIED

Hi all,

Based on our meeting yesterday, I've revised the statement of work.

[REDACTED] can you look at section 12 and delete out any of the security requirements that aren't needed. I copied these intact from the BPA that [REDACTED] put together previously. I did add in the first two paragraphs based on what we'd already written yesterday.

b6
b7E

[REDACTED] can you please look at the other sections. In particular, I don't know if we need section 11.

Debbie and I are going to call some vendors for quotes tomorrow.
