Re: NIH FOIA Case No. 57071

This is the final response to your September 9, 2021, Freedom of Information Act (FOIA) request addressed to the National Institutes of Health (NIH) FOIA Office, received September 20, 2021. You requested a copy of the detailed NIH plan to expand non-human primate resource infrastructure at the National Primate Research Centers and Caribbean Primate Research Center located in seven states plus Puerto Rico, including space and infrastructure capability expansion, and animal purchase and transport, and investments to expand housing and support space.

A search for records was conducted and located 76 pages responsive to your request, all of which are enclosed. I have determined to withhold portions of the released pages pursuant to exemptions 4, 5 and 6 of the FOIA, 5 U.S.C. § 552 (b)(4), (b)(5) and (b)(6); and sections 5.31 (d), (e) and (f) of the HHS FOIA Regulations, 45 CFR Part 5. Exemption 4 protects from disclosure trade secrets and commercial or financial information that is privileged and confidential. Exemption 5 permits the withholding of internal government records which are pre-decisional and contain staff advice, opinion, and recommendations. This exemption is intended to preserve free and candid internal dialogue leading to decision-making. Exemption 6 permits the withholding of privacy information, the release of which would constitute a clearly unwarranted invasion of personal privacy.

You have the right to appeal this determination to deny you access to information in the Agency's possession. Should you wish to do so, your appeal must be sent within ninety (90) days of the date of this letter, following the procedures outlined in Subpart F of the HHS FOIA Regulations (<https://www.federalregister.gov/documents/2016/10/28/2016-25684/freedom-of-information-regulations>) to the Assistant Secretary for Public Affairs at <https://requests.publiclink.hhs.gov/App/Index.aspx>. Clearly mark the communication "Freedom of Information Act Appeal."

If you are not satisfied with the processing and handling of this request, you may contact the NIH FOIA Public Liaison and/or the Office of Government Information Services (OGIS):

NIH FOIA Public Liaison

Subject: RE: Approps questions on FY22 PB for Non-Human Primates - Due 7/8

Hi everyone – thanks again for your help on this. We've been asked to put approximate funding figures to the priorities mentioned in this response.

Please let me know if that is something we can have completed by early/mid next week.

Thanks!
Morgan

Subject: Approps questions on FY22 PB for Non-Human Primates - Due 7/8

Hi Patti,

Dr. Tabak recently briefed the Appropriations committee staff on the president's budget. One of the questions that came from this briefing was on the \$30M for non-human primate research infrastructure (specifics below). The Senate Minority staff asked if a smaller funding amount could make a difference and if so what would be prioritized? They also asked how any funding would be distributed to the NPRCs. It would be great to have this info by 5pm on 7/8.

For background – question during the FY22 briefing with House and Senate Appropriations LHHS subcommittee staff:

- Question: Does the FY22 NIH request for Non-Human Primates funding go towards greater capacity or greater enrichment of NIH facilities?
 - Answer (Tabak): In terms of greater capacity or greater enrichment of NIH-funded facilities, the initiative would cover some of each. Colony growth will require adequate housing and quarantine space, as well as increased veterinary medical support. More specialized facilities will require equipment to perform aerosol exposures, support functional MRI studies, and conduct studies requiring high biological containment.

Let me know if you have any questions.

Thanks!

Morgan

Subject: RE: House Appropriations Committee Releases Reports for Labor, Health and Human Services, Education, and Related Agencies

I am not clear if institutions which have NPRCs are still eligible to apply to the C06 program if seeking funds for biomedical research facilities involving NHPs.

Subject: FW: House Appropriations Committee Releases Reports for Labor, Health and Human Services, Education, and Related Agencies

The House Appropriations Committee has released report language for the FY 22 Labor-HHS appropriations bill. Press release is below with a link to the report (highlighted in yellow). Later today OLPA will email an updated summary with the information that is in this report.

Below are a few highlights:

Biomedical Research Facilities.—The Committee includes \$50,000,000, the same as the fiscal year 2021 enacted level and \$50,000,000 above the fiscal year 2022 budget request, for grants to public and/or nonprofit entities to expand, remodel, renovate, or alter existing research facilities or construct new research facilities as authorized under 42 U.S.C. section 283k. The Committee urges NIH to make awards that are large enough to underwrite the cost of a significant portion of newly constructed or renovated facilities. (page 145)

Collection and Reporting of Animal Research Numbers and Agency Funding.—The Committee recognizes that Congress has long expressed an interest in reducing the use of nonhuman animals in NIH-funded research and replacing animals with valid, reliable alternatives. In the National Institutes of Health Revitalization Act of 1993, Congress first requested that the agency create a plan for doing so.

The Committee also recognizes the scientific community's Stated commitment to the "three Rs" of replacement, reduction, and refinement. Integral to that commitment are the accurate counting of animals used in research and testing and the accurate reporting of NIH funding dedicated to projects involving animals. The Committee recognizes that it has been NIH's policy since 1985 to collect an "average daily inventory" of vertebrate animals housed in research facilities that wish to receive agency funding. The Committee understands that domestic facilities are required to file such documentation every four years as part of an Animal Welfare Assurance and that copies of the documents are available to the public only through Freedom of Information Act requests. The Committee requests a report from NIH within 120 days of enactment of this Act outlining a plan for increasing the accuracy and transparency of collecting and publicly disseminating research animal numbers. The plan should explain how NIH will collect the information annually and include a draft form that requires the total number of animals per species bred and used in the previous year and assigns all animals to a pain and distress category. The plan should also include details on how NIH will create a publicly accessible online database for dissemination of this information. Secondly, the Committee requests that NIH include in its report a plan for implementing a system that tracks which agency-funded projects involve the use of animals and makes the information publicly accessible. The Committee recognizes that NIH currently collects such information with every grant application using the Research & Related Other Project Information form, which asks applicants to answer "Yes" or "No" to the question "Are Vertebrate Animals Used?" NIH's plan should ensure that the answer to that question for each funded project is searchable via the Expenditures and Results module of NIH's Research Portfolio Online Reporting Tools website as many other categories of information are. (page 147)

Maintenance of Chimpanzees on U.S. Air Force Bases.—The Committee remains concerned about NIH's intention to retain government-owned chimpanzees at the Alamogordo Primate Facility (APF), a laboratory facility, instead of retiring them to the national chimpanzee sanctuary, Chimp Haven. While NIH cites the health condition of the chimpanzees as a reason to warehouse them at APF, the health condition of the chimpanzees and their long history of laboratory use makes it urgent that they be provided an opportunity to live the remainder of their lives in sanctuary, even if for a short period. The Committee directs the NIH to resume transport of government-owned and supported chimpanzees beginning with chimpanzees at APF. Movement of chimpanzees from Southwest National Primate Research Center (SNPRC) and Keeling Center for Comparative Medicine and Research (KCCMR) should follow transport of the APF chimpanzees to Chimp Haven. The Committee also directs the NIH to provide a written report to the Committee every 180 days, beginning no later than December 31, 2021, that shall include: (1) the number of chimpanzees transported to the national sanctuary over the last quarter; (2) a census of all government-owned and supported chimpanzees remaining, if any, at APF, SNPRC or KCCMR; (3) a list of any chimpanzee deaths that have occurred at any time after January 1, 2020, at either APF, SNPRC, KCCMR, or the national sanctuary system, and (4) the plan, including the timeline, for transferring the chimpanzees from APF, SNPRC, and KCCMR to Chimp Haven. (page 155)

National Primate Research Centers.—The Committee does not include funding directed towards expanding non-human primate resource infrastructure. The budget request included \$50,000,000 for this activity (page 156)

Appropriations Committee Releases Reports for Labor, Health and Human Services, Education, and Related Agencies and Commerce, Justice, Science, and Related Agencies Bills

WASHINGTON — The House Appropriations Committee today released its reports accompanying the fiscal year 2022 Labor, Health and Human Services, Education, and Related Agencies and Commerce, Justice, Science, and Related Agencies appropriations bills.

The reports will be considered at tomorrow's full Committee markup.

The 2022 Labor, Health and Human Services, Education, and Related Agencies funding bill, which was advanced by a voice vote in Subcommittee on Monday:

- Creates and sustains good-paying American jobs through investments in job training, apprenticeship programs, and worker protection

- Grows opportunity with transformative investments in education, including record funding for high-poverty schools and students with disabilities, and strong increases for programs that expand access to post-secondary education
- Supports middle class and working families with increased funding for child care and development programs, Head Start, and preschool development grants
- Strengthens lifesaving biomedical research with increased funding for the National Institutes of Health, including funding to establish the Advanced Research Projects Agency for Health
- Bolsters our public health infrastructure with more resources for the Centers for Disease Control and Prevention and for states and local governments to strengthen infrastructure and capacity
- Addresses our nation's most urgent health crises, including maternal health, mental health, gun violence, and opioid abuse, while making strides to reduce persistent and unacceptable health disparities
- Advances equal treatment for women by increasing funding for the range of health services, including family planning, covered by Title X and repealing the discriminatory Hyde Amendment

The bill report is [here](#). The text of the draft bill is [here](#). In keeping with the Appropriations Committee's commitment to transparency, information on Community Project Funding in the bill is [here](#). A summary of the bill is [here](#).

The Commerce, Justice, Science, and Related Agencies funding bill, which was advanced by a voice vote in Subcommittee on Monday:

- Creates good-paying American jobs with investments in economic development in distressed communities with support for small businesses, including small and medium sized American manufacturers
- Supports safer communities with funding for local law enforcement while bolstering police and criminal justice reform and expanding gun violence prevention efforts
- Addresses gender-based violence with strong increases for Violence Against Women Act prevention and prosecution programs, as well as efforts to reduce the backlog of unprocessed rape kits
- Confronts the climate crisis with strong funding for climate resilience and research at NASA, the National Oceanic and Atmospheric Administration, and the National Science Foundation

The bill report is [here](#). The text of the draft bill is [here](#). In keeping with the Appropriations Committee's commitment to transparency, information on Community Project Funding in the bill is [here](#). A summary of the bill is [here](#).

Tomorrow's full Committee markup begins at 10 AM. It will be webcast live and linked from <https://appropriations.house.gov/events/markups>.

Subject: C06 FOA for FY 2022

Hi, Mat and Sheri,

I don't know if you saw this, but things have changed relative to the C06 request for FY 2022. The new C06 line item out of the Appropriations Committee is no longer about NHPs. The \$30 Million earmark for NPRCs has changed back to \$50 Million for general biomedical facilities. Thus, we are working on an outline instead of the full FOA, as it might not even happen.

For now, please look this over and let us know what should be added or deleted, at least at a high level.

Best, Karen

Subject: NHPs & C06s

Sheri, Matt and Jeff:

There may be construction funds in the FY2022 budget for NHP facilities. The current budgetary proposal, still under discussions, is for \$30M. So I looked at the notes you prepared with a description of the proposed "NHP" construction program. I had some minor comments and questions about the bullet points – see the attached document.

(b)(5)

Please let me know by the next Tue. We can do it by email or Sherri and Matt can always drop in DCI tea (1:00pm) or we can find 15 min at a different time to chat about this document.

Second trial (my computer just closed on me and the e-mail disappeared)...

Malgorzata:

I reviewed the documents in detail and they are very good. I will send them to Jim with a modified background text. I look forward to the discussion on Monday. Thank you and Karen for outlining such a clear and thoughtful approach.

The meeting on Monday is at 1:00 pm and I am enclosing the zoom link below (this was what caused my computer to close Outlook). Franziska ☺

Franziska:

I've attached 2 documents for the discussion with Jim on Monday. Below I've included a cover letter – a text of an email that provides some background info. Would you like to send this message to Jim or would you like me to do so?

Thank you, Malgorzata

Jim:

As FY2021 is ending, we would like to prepare for FY2022 and plan for the possibility that the NIH budget includes an appropriation to support the construction program and that ORIP is tasked to manage it for the NIH Director.

(b)(5)

Thank you, Malgorzata

Jim:

For our meeting on Monday (9/20) at 1:00 pm, I have asked Malgorzata and Stephanie to join us. The plan is to discuss some details of the two (this is ORIP's proposal) FOAs for construction that we suggest to write, if there is FY2022 construction appropriation. (b)(5)

(b)(5)

In the two attached documents, we outline ORIP's plans which we will review and discuss on Monday. (b)(5)

(b)(5)

If you have any questions, please let us know. We are looking forward to the Monday meeting and discussion, Franziska and Malgorzata

Sheri and Matt :

Do you have 10 min at 1:00 pm to drop into DC tea? I have an update about the (planned/potential) FY2022 NHP C06 FOA.

Thanks, Gosia

Subject: Agenda for today's meeting at 1:00 pm
Attachments: Action: Documents for Construction FOAs FY2022 - to be discussed on 9/20/2021 at 1:00 pm

Jim, good morning:

As outlined earlier, both Malgorzata and Stephanie will join us for today's 1:00 pm meeting to review and discuss the potential C06 FOAs for FY2022 (e-mail previously sent is attached). (b)(5)

(b)(5) which is the only other topic on my agenda? If so, I will let her know, so that she can plan her day (the NPRC Directors are meeting in parallel).

Thank you for letting me know. Franziska
