EXPLANATORY NOTE 2019 INVENTORY

With the exception of the "Record Number Change" - "XRNC" location, the statement "Transfer from..." indicates a physical relocation of an object.

The "Without Room Location - Unlocated" - "XLOC" location applies to items unaccounted for during the current inventory as well as those items destroyed or surplused (as noted in the object description).

There are a number of objects with "0" in the column entitled "On Hand Per Last Inventory". These objects, fall into the following categories:

1. Objects acquired since the last inventory - these are identified by a "Date" and possibly "Method of Acquisition" under the heading "Received During the Year Ending June 30, 2019."
2. Some objects not newly acquired, but nonetheless picked up on the inventory for the first time - this reflects the continuing effort to create digital records for all accountable property objects belonging to the Executive Mansion.
3. Objects for which existing record numbers were:
 - a. Modified - usually the discovery of a more precise date of acquisition with the attendant modification of prefix (e.g., "1960" to "1925".)
 - b. Subdivided - to create individual records for objects previously included in composite records of like or related objects.
 - c. Replaced - usually a property number in favor of the appropriate but previously unidentified Old Collection number.

At times, rooms in the private quarters on the Second and Third Floors may seem under furnished if non-White House collection objects such as those belonging to the First Family, the White House Gift Unit, or objects on loan have been installed instead of objects belonging to the White House. Offices, hallways, etc., in the West Wing and East Wing are rarely furnished fully with property administered by the Executive Residence.
