Re: Freedom of Information Act Requests NGC10-014

This is in response to your Freedom of Information Act request of May 22, 2009, for a printout or copy of the listing of transcripts and interviews and other records associated with the Rogers Commission formally known as the Presidential Commission on the Space Shuttle Challenger Accident. Your original request of May 22, 2009, was forwarded to our Special Access and FOIA staff as a request for any withheld materials from the Rogers Commission. That request, our reference NW 32190, has been withdrawn based on our face to face discussion concerning this issue. We are now treating your May 22, 2009 request as an initial request for operational records received in this office for the first time on October 25, 2009. I apologize for any inconvenience the delay may have caused.

Unfortunately, NARA does not have a complete finding aid detailing transcripts and interviews conducted by the Commission. This information is found among the published volumes of the Rogers Commission Report. The table of contents and some documents from the Commission are available on the NASA website at <http://history.nasa.gov/rogersrep/genindex.htm>

Enclosed, however, are all documents we were able to locate concerning the Rogers Committee records referenced in your request. We are including copies of the accession dossier, staff notes concerning electronic records transferred to NARA from the Rogers Commission, the entry on these records from The Guide to Federal Records in the Archives of the United States. Please be advised the references to photographic images used by the Commission can be found on the Access to Archival Databases (AAD) which can be found on our website at www.archives.gov.

Please let me know if I may be of further assistance.

Sincerely,

RAMONA BRANCH OLIVER
NARA FOIA Officer
Office of General Counsel

6. STATEMENT OF AGENCY REPRESENTATIVE

The records described above and on the attached pages are hereby offered for deposit with the National Archives of the United States in accordance with 44 U.S.C. 2103. It is agreed that these records will be administered in accordance with the provisions of 44 U.S.C. Chapter 21, 41 C.F.R. 101-11.411, 41 C.F.R. 105-61, and such other rules or regulations as may be prescribed by the Administrator of General Services or the Archivist of the United States. Unless specified and justified above, there are no restrictions on the use of these records other than the general and specific record group restrictions on the use of records in the National Archives of the United States that have been published in 41 C.F.R. 105-61.53 or in the Guide to the National Archives of the United States. The Archivist of the United States may destroy, donate, or otherwise dispose of any containers, duplicate records, unused forms, blank stationery, nonarchival printed or processed material, or other nonrecord material in any manner authorized by law or regulation without further consent of this agency. I certify that any restrictions specified by this agency on the use of these records are in conformance with the requirements of 5 U.S.C. 552 and that I am authorized by the head of this agency to act for the agency on matters pertaining to the disposition of agency records.

(BINDER No. 3)

The following proofs were identified as "Blue Line" proofs (i.e., proofs of the press plates); thus only minor corrections required while Volume I was on the press at the printing and binding contractor. The majority of these corrections were telephoned or telefaxed back to Swanson.

1	I	Ch 1, prelims	6-1	12:15				Blue line Title page, prelims, table contents, preface, Ch I
1	I	Ch II, pg 39	5-29					Blue line
1	I	Ch IV, pgs 40-70						Blue line
1	I	Chs IV, V	6-1					Blue line, pages 71-86
1	I	Ch V	5-31					Blue line, pages 87-118
1	I	Chs V, VI	5-29					Blue line, pages 119-150
1	I	Chs VII to App C	5-31					Blue line, pages 247-256
1	I	App D						Blue line, 21 misc back matter pages & 4 gals captions

F. ARRANGEMENT AND NARRATIVE DESCRIPTION

President Ronald Reagan established the Presidential Commission on the Space Shuttle Challenger accident by Executive Order 12546 on February 3, 1986. William P. Rogers, former Secretary of State and Attorney General was appointed to head the commission and was sworn in February 6. The commission consisted of thirteen members including Rogers and comprised a cross section of individuals familiar with the engineering and flight technology and skills required by the shuttle program. After intensive investigation the commission submitted its report to the President on June 6, 1986.

Records of the Presidential Commission on the Space Shuttle Challenger: The process used to identify information withheld on the public use version of the electronic records

The National Archives and Records Administration has in its custody textual records, microfilm, motion pictures and electronic records of the Presidential Commission on the Space Shuttle Challenger Accident. The Judicial, Fiscal and Social Branch (NNFJ) has custody of the textual records of the Commission. The electronic records in the custody of the Machine-readable Branch (NNSR) consist of the following seven datasets: an INQUIRE Index and six JURIS text files (Affidavits, Hearings, Digests, Reports, Interviews, and Meetings).

Access to the records of the Commission is governed by the provisions of the Freedom of Information Act, 5 USC 552. As part of processing procedures, a review of the textual records was conducted by archivists in NNFJ. The same information which NNFJ identified during processing to be withheld based on various exemptions of FOIA will be withheld in the public use version of the electronic records. The comparison of the textual records and the dump of the electronic records in order to identify the information to be withheld was performed by an archivist from NNFJ and NNSR working as a team.

This comparison also provided an opportunity to determine the extent of overlap between the records of both branches. There are considerably more documents in the textual records than in the electronic records. For instance, the textual records include large series of reports (there are only seven documents in the Reports file) and correspondence. These records are not available in electronic form.

Most of the documents in the electronic records are available in textual form in NNFJ. The textual records do not contain two panel sessions that are in the Meetings file on the tape. The abstracts of the hearing transcripts contained in the Digests file are also not available in the textual records. There are twelve interviews which are in the textual records, but are not in the Interviews file on the tape. More specific information about these exceptions is included in the documentation package prepared by NNSR for the electronic records.

The comparison of the records produced a list of line numbers containing information to be withheld for use in the preparation of the public use versions of the electronic files. Two datasets, the INQUIRE index dataset and the Affidavits dataset, have no information withheld. The lines of texts in the remaining datasets that have been withheld are as follows:

1. Hearings dataset

Authority- Freedom of Information Act, 5 USC 552 (b)(2)

Withheld- Lines T00005790 to T00005805

2. Meetings dataset

Withheld- Lines T00005392 to T00007690.

Researchers have the right to file a formal request under the Freedom of Information Act, as amended, to obtain access to information withheld from these records. The request must be submitted in writing and addressed to the Assistant Archivist for the National Archives, National Archives and Records Administration, Washington, DC 20408.

This statement is intended to reflect the coordination of the application of FOIA exemptions between the two branches; to define the process by which the withheld information was identified; and to complete the documentation package describing the electronic records of the Commission. These concurrences represent agreement on the process used and on the information identified.

Introduction:

The Presidential Commission on the Space Shuttle Challenger Accident, chaired by former Secretary of State William P. Rogers, investigated the circumstances surrounding the explosion of the Space Shuttle Challenger shortly after liftoff on January 28, 1986. The Commission was established in February 1986, pursuant to Executive Order 12546, and it issued its final report in June 1986. At the conclusion of its investigation, the records of the Commission were transferred to the National Archives and Records Administration (NARA) for permanent preservation. They have been accessioned in the Records of Temporary Committees, Commissions, and Boards (Record Group 220) [*see entry 220.19, Guide to Federal Records in the National Archives of the United States (1995)*], and are available to the public.

The records of the Presidential Commission on the Space Shuttle Challenger Accident in the custody of NARA are in several media, and custody of the records within the NARA varies accordingly. The paper and microfilm records are available from the Textual Archives Services Division, National Archives at College Park; the electronic records (i.e., the computer-readable data files) are in the custody of the Center for Electronic Records, and the video and audio tapes are in the custody of the Motion Picture, Sound and Video unit, Special Media Archives Services Division.

Researchers should note that there is considerable, but not complete, overlap between the textual records on paper or microfilm and the textual records that are stored in an electronic format. Therefore, in order to review all textual records of the Commission, a researcher should consider the paper, microfilm, and electronic records. Each of the custodial units has finding aids to supplement the following brief description; they describe the Challenger Commission records

more extensively.

Indices

1. **Index to the P.C. Series:** The reports, photographs, and other materials submitted to the Commission, as well as some of the Commission's correspondence and internal memoranda, referred to as "P.C." (preliminary control) Series documents, were microfilmed and indexed by Commission staff. The index, which includes bibliographic, control, and subject matter information about the P.C. documents, was developed and maintained on a computer. It was referred to as the INQUIRE Index, and was so named because of the software system utilized by the Commission for retrieval and review from the index. Several printouts of the INQUIRE Index were produced by the Commission staff. They list all of the documents by date, by PC control number (i.e., in chronological order on the basis of the arrival of paper to the Commission), by subject term, and by document number (i.e., location on the microfilm).

The INQUIRE Index was transferred to NARA in the form of the printouts and as a software-independent electronic records file. The printouts subsequently were microfiche at NARA and copies of the index may be acquired on either paper (electrostatic copies of the printouts), microfiche, or as an electronic records file on computer readable media (9-track tape, 3480-class tape cartridge, or CD-ROM; see "[Ordering Information for Electronic Records](#)"). The microfiche of the printed index is National Archives Microfilm Publication **M1501, *Indexes to Records of the Presidential Commission on the Space Shuttle "Challenger" Accident, 1986*** (30 cards, microfiche). This microfilm publication may be ordered or may be viewed in the Microfilm Research Room of the National Archives at College Park.

2. **Indices to the "C.C." Series and Audiovisual Records:** The Textual Archives Services Division also has an index, on paper, to the "C.C." (correspondence of the Commission) Series. It also has a list of the interview transcripts and of the sound recordings and video tapes preserved and available from the Motion Picture, Sound, and Video unit, Special Media Archives Services Division.

Documentary Material

1. **The P.C. Series:** reports, photographs, and other materials submitted to the Commission by NASA and its contractors to provide background information on technical aspects of the Space Shuttle program; also includes some of the Commission's correspondence and internal memorandum.
 - o These records are preserved in paper and are available from the Textual Archives Services Division. There are 148 boxes of this material.
 - o The P.C. Series documents also have been microfilmed as National Archives Microfilm Publication **M1496, *"Challenger" Commission P.C. Numbered Documents, 1986***. (73 rolls). This microfilm publication may be ordered or may be viewed in the Microfilm Research Room of the National Archives at College Park.

- An electronic records file identified as a Reports Text File, includes the text of 7 reports received by the Commission; a copy may be acquired from the Center for Electronic Records.
2. **Transcripts:** of the Commission's various panels which investigated a variety of technical issues; of hearings held by the full Commission; and of interviews conducted by Commission staff members with employees of NASA and its contractors. The transcripts have been published and are also preserved in electronic format, with a few exceptions.
 - **Transcripts of the panels (meetings):** the electronic records file has transcripts for 54 panel meetings; one of these is not in the paper records. Transcripts for two additional panels are in paper but are not included in the electronic records file.
 - **Transcripts of hearings** appear to exist identically in published and electronic formats, but this has not been completely verified. The electronic data file includes transcripts of 62 hearings. In addition, there is an electronic records file called Digests Text File which has abstracts for 48 of the hearings conducted by the Commission. The abstracts are not available on paper.
 - **Transcripts of interviews** exist in both paper and electronic formats, with a few exceptions. The electronic records file includes transcripts for 160 interviews conducted by the Commission; there are 12 additional interview transcripts in the paper records.
 3. **"C.C." Series:** correspondence of the Commission, primarily letters received from the public, and some from journalists and members of Congress. They are preserved in their original paper format.
 4. **Affidavits:** the electronic records include a file with the text of three affidavits taken by the Commission. The paper records do not contain a segregated affidavits file, making it difficult to determine the relationship between the electronic records file and the affidavits in the paper records.
 5. **Videotapes** of the launch, press conferences, Commission meetings, and other events. These are preserved and available through the Motion Picture, Sound, and Video unit, Special Media Archives Services Division (Fourth Floor, Research Complex, National Archives at College Park).
 6. **Sound recordings** of a majority of the interviews and hearings conducted by the Commission. These are also preserved and available through the Motion Picture, Sound, and Video unit, Special Media Archives Services Division.

Accession Number(s): N3-220-86-7

Scope & Content

UNEDITED VIDEO REPORT: First public meeting. Commission members present and sworn William P. Rogers, Chairman; Neil A. Armstrong, Vice-Chairman; Sally K. Ride; Albert D. Wheelon; Arthur B.C. Walker; Richard P. Feynman; Robert B. Hotz; David C. Acheson; Joseph F. Sutter; and

Maj. Gen. (USAF) Donald J. Kutyna. Statement of purpose and procedure by Rogers. Brief remarks pledging cooperation with the Commission by William R. Graham, Acting Administrator, National Aeronautics and Space Administration (NASA). Testimony of Jesse W. Moore, Associate Administrator for Space Flight, NASA; and Chairman of the 51L Data and Design Analysis Task Force (DDATF). Moore names NASA employees scheduled to testify and identifies the subjects of their testimonies; he describes the responsibilities of the Office of Space Flight and of the various space centers, and the lines of communication between the Office of Space Flight and the various space centers; he reviews the purpose of each Space Transportation System (STS) mission, the role of the Department of Defense (DOD) in the STS program, and gives a summary of the 51L mission including a description of the payloads and their functions, mission profile, launch window, inclination of orbit, end-of-mission and abort landing sites, events on the day of the launch, and NASA's plans for investigating the accident. Commission inquires about whether there had been problems on previous launches, and design changes and reuse of solid rocket booster (SRB) steel casings.

General Note(s): NASA established a mission identification code that it used to identify Space Transportation System (STS) missions scheduled for launch during the 1980s. The code consists of four characters: two numbers, a hyphen and a letter. The first character of the code is the last number of the fiscal year (FY). This character specifies the FY of the scheduled launch. The second character of the code indicates the launchsite. And the third character of the code corresponds to the numerical sequence of missions for a FY. For first character, "5," for fiscal year 1985, is the FY in which the launch is scheduled. The second character, "1," for Kennedy Space Center, is the launch site. The character following the hyphen, "L," the twelfth letter of the alphabet, corresponds to the numerical sequence of missions for the fiscal year. Mission 51-L, therefore, was the twelfth mission scheduled for launch from the Kennedy Space Center during FY 1985. This method of identifying STS missions was established and NARA assigned this title.
