Description of document:	Federal Emergency Management Agency (FEMA) records re: FEMA National Shelter Survey including definitions or a key to the abbreviations and codes
Requested date:	22-March-2008
Appeal date:	26-April-2011
Released date:	29-April-2013
Posted date:	19-August-2013
Source of document:	FEMA FOIA Office Records Management/Disclosure Branch 1800 S. Bell St., Fourth Floor, Mail Stop 3005 Arlington, VA 22202 Email: FEMA-FOIA@dhs.gov
Note:	The bulk of these records are undated

FEMA

APR 2 9 2013

Re: **Freedom of Information Act FEMA 08-315/Appeal A-11-0071**

The Department of Homeland Security (DHS)/Federal Emergency Management Agency (FEMA) Records Management Division has completed its review of your appeal of the response by the FEMA's Disclosure Branch to your Freedom of Information Act (FOIA) request. We regret the delay in our response.

You submitted a FOIA request, dated March 22, 2008, seeking an electronic copy of the most recent FEMA National Shelter Survey including definitions or a key to the abbreviations and codes.

On April 20, 2011, FEMA provided you with a final response to your FOIA request, indicating that, while an adequate search was conducted, we were unable to locate or identify any responsive records.

On or about April 26, 2011, you filed an appeal with DHS, and FEMA received your appeal on September 27, 2011. In your correspondence to DHS, you appeal the denial in full of your FOIA request, where you "requested an electronic copy of the most recent FEMA National Shelter Survey including definitions or a key to the abbreviations and codes." You also indicated that the document you were requesting may also have been renamed the "National Facility Survey."

After consideration of your appeal, I am granting your appeal in part.

In reviewing your appeal, FEMA conducted another search for a "FEMA National Shelter Survey" or a "National Facility Survey." This comprehensive search was conducted by FEMA's Mass Care/Emergency Assistance Branch within FEMA's Individual Assistance Division. Unfortunately, FEMA was unable to locate any current records entitled "FEMA National Shelter Survey" or a "National Facility Survey."

On January 25, 2013, Attorney-Advisor D. Fon Muttamara contacted you via e-mail, requesting a clarification of your FOIA request and your subsequent appeal. Ms. Muttamara informed you there are no surveys maintained at FEMA entitled "FEMA National Shelter Survey" or "National Facility Survey." However, because your appeal included a PowerPoint titled "FEMA National

Shelter System," Ms. Muttamara indicated that FEMA did maintain a National Shelter System ("NSS") and that the NSS "contains an extremely large number of facilities and data fields." Ms. Muttamara inquired whether you would be able to narrow your request to specific facilities or to data sets.

You responded to Ms. Muttamara on January 25, 2013, and indicated that you are "interested in the entire digital file as a flat file type Excel file." You also indicated that you would consider narrowing the request to remove fields which would be problematic to review.

Based on your January 25, 2013 e-mail, further inquiry was made of FEMA's Mass Care/Emergency Assistance Branch within FEMA's Individual Assistance Division. While that information does exist, the information pertaining to potential mass care facilities has been determined to be exempt entirety pursuant to Title 5 U.S.C. § 552 (b)(5), (b)(6), and (b)(7)(E).

> **FOIA Exemption 5** protects from disclosure those inter- or intra-agency documents that are normally privileged in the civil discovery context. The three most frequently invoked privileges are the deliberative process privilege, the attorney work-product privilege, and the attorney-client privilege. After carefully reviewing the responsive documents, we determined that portions of the responsive documents qualify for protection under the following privilege:
>
> > **Deliberative Process Privilege**
> > The deliberative process privilege protects the integrity of the deliberative or decision-making processes within the agency by exempting from mandatory disclosure opinions, conclusions, and recommendations included within inter-agency or intra-agency memoranda or letters. The release of this internal information would discourage the expression of candid opinions and inhibit the free and frank exchange of information among agency personnel.
>
> **FOIA Exemption 6** exempts from disclosure of personnel or medical files and similar files the release of which would cause a clearly unwarranted invasion of personal privacy. This requires a balancing of the public's right to disclosure against the individual's right to privacy. The privacy interests of the individuals in the records you have requested outweigh any minimal public interest in disclosure of the information. Any private interest you may have in that information does not factor into the aforementioned balancing test.
>
> **FOIA Exemption 7(E)** protects records compiled for law enforcement purposes, the release of which would disclose techniques and/or procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law. We determined that disclosure of certain portions of the documents could reasonably be expected to risk circumvention of the law.

The NSS is a repository of potential mass care facilities, maintained by FEMA, but the data is "input" by third parties, including, but not limited to, State and local entities and non-governmental organizations (NGOs), and the data is not considered a list of currently operational mass care facilities. This information exists to assist emergency management entities in mass care related decision making. The release of this information would be a premature disclosure of mass care facilities which may or may not be utilized during a disaster response. To release this information now would create a "premature" disclosure that would cause public confusion as to available resources during an emergency. The NSS also contains data fields with personal information for individuals, such as names and personal telephone numbers, where the privacy interest in the information would outweigh any public interest in the disclosure. Also, to the extent that the release of the potential facility location is deemed to be critical infrastructure, or that the disclosure of such could create a potential "target" for those who may have criminal or "ill will" thoughts or actions that would harm such structures in the event preceding their usage by the community at large, and that the risk of circumvention to legitimate law enforcement goals becomes threatened, we pre-emptively assert exemption (b)(7)(e).

However, FEMA is releasing screenshots of the NSS so that you may ascertain the data fields that are collected in the NSS. FEMA is also releasing to you a data dictionary for data fields in the NSS, which provides you the attributes of the data fields and the purpose of those data fields.

I suggest if you have further concerns that you contact the Office of Governmental Services (OGIS). As part of the 2007 FOIA amendments, the OGIS was created to offer mediation services to resolve disputes between FOIA requesters and Federal agencies as a non-exclusive alternative to litigation. You may contact OGIS by any of the following means:

Office of Government Information Services
National Archives and Records Administration
(OGIS) 8601 Adelphi Road
College Park, MD 20740-6001
E-mail: ogis@nara.gov
Web: https://ogis.archives.gov
Telephone: 202-741-5770/Facsimile: 202-741-5769/Toll-free: 1-877-684-6448

Judicial review of my action on this appeal is available to you in the United States District Court for the judicial district in which you reside, or in the District of Columbia.

Sincerely,

Charlene Myrthil, Director
FEMA Records Management Division
Mission Support Bureau
