FOIA Request JPL-08-012
RC000/NMO

January 9, 2008

Re: FOIA Request JPL-08-012

Your Freedom of Information Act (FOIA) request for release of information from the files of the National Aeronautics and Space Administration (NASA) was received in FOIA processing at the NASA Management Office-Jet Propulsion Laboratory on November 14, 2007. You requested the following:

an electronic copy of the FOIA Case Logs for NASA Management Office - JPL for the time period FY2005 and FY2006 and FY2007 to the present.

Please find FOIA Logs for FY2005 to present attached. Personal addresses of requesters were redacted from this log. The removal of this information constitutes a partial denial pursuant to the FOIA, Title 5, USC, Section 552, Exemption (b)(6). You have appeal rights concerning these actions.

You may appeal this initial determination to the NASA Administrator. Your appeal must: (1) be addressed to the Administrator, National Aeronautics and Space Administration (NASA), Mail Stop: P, 300 E Street, SW, Washington, DC 20546, (2) be identified clearly on the envelope and in the letter as an Appeal under the Freedom of Information Act (FOIA); (3) include a copy of the request for the agency record, and a copy of the adverse initial determination; (4) state, to the extent possible, the reasons why you believe the initial determination should be reversed; and (5) be sent to the Administrator with thirty (30) calendar days of the date of the receipt of this initial determination.

I trust this will be of assistance to you.

Thank you.

Sincerely,

Dennis B. Mahon
Freedom of Information Act Public Liaison Officer and Records Manager

1) A computer readable copy of all Versions of all Images taken by, obtained by or received from the Rovers along with the standard identifying information for each Version of the Image as recorded by NASA. The request is for a copy of each Image exactly as stored on NASA's system including, but not limited, the highest resolution and most lossless form available. The standard identifying information for each Image typically includes identification of which Rover obtained the Image, the camera, the internal Rover clock timestamp, the site, and filter used. The identifying information can be supplied in the filename of the Image or in a combination of the filename and the directory structure on the computer readable media as will described below. If either of the Rovers is still generating new images when the copies are made for this request, the request is for everything that exists up to the point in time when the copies are made. NASA has placed some Images from the Rovers on the Internet in JPG, IMQ, IMG and/or PNG type formats with filenames that include the identifying information about the Image including which Rover obtained the Image or Data, the instrument, the internal Rover clock timestamp, the site, filter used, etc. This filename format as used by NASA f
