DEC 28 2007

Re: FOIA No. FY08-13

This letter responds to your November 10, 2007 request for documents under the Freedom of Information Act (FOIA) and the Federal Energy Regulatory Commission's (Commission) implementing FOIA regulations. *See* 5 U.S.C. § 552(b)(4) (2000 & Supp. IV 2004); 18 C.F.R. § 388.108 (2007). Specifically, you requested copies of the Commission's FOIA-case log from 2005 to the present. A copy of the log is enclosed with this letter.

The FOIA-case log includes names of Commission attorneys assigned to the cases as well as miscellaneous internal notations in the subject field unrelated to the description of the case. These data are exempt from disclosure pursuant to FOIA Exemption 2, which covers records that are "related solely to the internal personnel rules and practices of an agency." 5 U.S.C. § 552(b)(2).

FOIA Exemption 2 permits withholding of internal matters that are relatively trivial in nature. *See Schiller v. NLRB*, 964 F.2d 1205, 1207 (D.C. Cir. 1992) ("Predominantly internal documents that deal with trivial administrative matters fall under the 'low 2' exemption.") For the exemption to apply, such information must be of a trivial nature and not of any genuine public interest. *See ACLU v. FBI*, 429 F. Supp. 2d 179, 189 (D.D.C. 2006). The names of attorneys assigned to the cases and the miscellaneous notations constitute internal information that is trivial and not of genuine public interest and therefore falls within the scope of the exemption.

FOIA No. FY08-13

As provided by FOIA and 18 C.F.R. § 388.110 (2007), any appeal from this determination must be filed within 45 days of the date of this letter. The appeal must be in writing, addressed to Cynthia A. Marlette, General Counsel, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, and clearly marked "Freedom of Information Act Appeal." I would appreciate it if you would also send a copy to Ellen K. Schall, Associate General Counsel, General and Administrative Law, at the same address.

Sincerely,

A handwritten signature in black ink, appearing to read 'A. J. Black', with a long horizontal flourish extending to the right.

Andrew J. Black
Director
Office of External Affairs

Enclosure

Figure 1. The effect of the number of nodes on the performance of the proposed algorithm. The figure shows two line graphs. The left graph plots 'Number of nodes' (x-axis, 1 to 10) against 'Number of iterations' (y-axis, 0 to 100). The right graph plots 'Number of nodes' (x-axis, 1 to 10) against 'Number of iterations' (y-axis, 0 to 100). Both graphs show a decreasing trend in iterations as the number of nodes increases.
